

Survey The Ellinikon:

To gain a broad range of perspectives, I have created two separate surveys:

1. One aimed at participants with a background in geography or urban studies, where I explore more specialized aspects of the project
<https://www.surveio.com/survey/d/T3W4P4L6M4G5R8B6K>

2. Another for the public, which focuses on more accessible and broader views
<https://www.surveio.com/survey/d/L4X8K2I3V5N4N5D6N>

Thank you for taking part in this survey!

This research aims to explore the social and sustainable dimensions of the Ellinikon project, a large-scale smart city development in Athens (<https://theellinikon.com.gr>). I am particularly interested in understanding public perceptions of the project, its accessibility and its potential impact on the urban environment and local communities.

Your responses will help me to analyse how projects like Ellinikon influence issues such as social inclusion, sustainability and urban development in Athens. The information collected will be used for academic purposes only and will be treated in the strictest confidence.

I appreciate your time and insights as they are invaluable to this study.
