

Τότε

$$S_{N^*(t)+1}^* = S_{N^*(t)}^* + X_{N^*(t)+1}^* \leq t + T$$

$$\Rightarrow E[S_{N^*(t)+1}^*] \leq t + T$$

$$\Rightarrow \tau^*(M^*(t)+1) \leq t + T$$

$$[E[S_{N^*(t)+1}^*] = \tau^*(M^*(t)+1)]$$

$$\Rightarrow M^*(t) \leq \frac{t+T}{\tau^*} - 1$$

$$\Rightarrow \frac{M^*(t)}{t} \leq \frac{1}{\tau^*} + \frac{T-\tau^*}{t \cdot \tau^*}$$

Επίσης έχουμε

$$X_n^* = \min\{X_n, T\} \leq X_n, n \geq 1 \Rightarrow$$

$$S_n^* \leq S_n, n \geq 1 \Rightarrow$$

$$N^*(t) \geq N(t), t \geq 0 \Rightarrow$$

$$E[N^*(t)] \geq E[N(t)], t \geq 0 \Rightarrow$$

$$M^*(t) \geq M(t) \Rightarrow$$

$$\frac{M^*(t)}{t} \geq \frac{M(t)}{t}$$

$$\text{Οπότε} \quad \frac{M(t)}{t} \leq \frac{M^*(t)}{t} \leq \frac{1}{\tau^*} + \frac{T-\tau^*}{t \cdot \tau^*} \Rightarrow$$

$$\limsup_{t \rightarrow \infty} \frac{M(t)}{t} \leq \frac{1}{\tau^*}$$

$$\text{'Οπως και ως } T \rightarrow \infty, \tau^* = E[X_n^*] = E[\min\{X_n, T\}] \rightarrow E[X_n] = \tau$$

Οπότε ως $T \rightarrow \infty$, έχουμε

$$\limsup_{t \rightarrow \infty} \frac{M(t)}{t} \leq \frac{1}{\tau}$$

'Αρα

$$\frac{1}{\tau} \leq \liminf_{t \rightarrow \infty} \frac{M(t)}{t} \leq \limsup_{t \rightarrow \infty} \frac{M(t)}{t} \leq \frac{1}{\tau} \Rightarrow$$

$$\lim_{t \rightarrow \infty} \frac{M(t)}{t} = \frac{1}{\tau}$$
