690. DeSilva, *Honor*, 192, citing Xen. *Oec.* 13.6–13; Arist. *Pol.* 1.13, 1260b3–7. But as noted above, animals were also trained. Many slaves were well educated, so the counsel is condescending.

691. CD XII, 10–11; 4Q159 2–4 1–3 (following Lev 25:47–55).

692. Garnsey and Saller, *Empire*, 124–25; Jeffers, *World*, 230, 239; Bartchy, *Slavery*, 87–125. For manumissions and limitations, see Gaius *Inst.* 1.20, 41–44; Justin. *Inst.* 1.6. See much further comment at Acts 6:9.

693. Fogel and Engerman, *Time*, 150, who tend to be optimistic on other points, allow manumission for less than one in two thousand slaves (below 0.05 percent). On differences between U.S. and Greco-Roman slavery (though sometimes exaggerated), see, e.g., Dodd, *Problem*, 87–89. For current slavery, see, e.g., Masland et al., "Slavery," 30, 32, 37–39; "Forgotten Slaves"; "Sudan: Caught," 3; Bhatia, "Booty"; Pohor, "Slavery"; Gordon, *Slavery*, xi, 231; Usry and Keener, *Religion*, 94–98. In the early 1990s, a U.S. scholar visiting that region told me that he personally was shown Sudanese sales receipts for "Christian slaves."

694. E.g., Buckland, *Slavery*, 187–238; Garnsey and Saller, *Empire*, 119; Finley, *Economy*, 64; Martin, *Slavery*, 7–11; for even agrarian slaves in Italy, cf. Roth, "Food." Again, this does not alleviate the horror of the slave system; even in the United States, slaves on some estates were allowed to earn money or land as bonuses or to secure some income on the side (Fogel and Engerman, *Time*, 148–51), and slaves, when freed, sometimes bought other slaves (Koger, *Slaveowners*).

695. See Cohen, *Laws*, 179–278; cf. also Stern, "Aspects," 628 (perhaps too reluctant to recognize Roman influence).

696. Stambaugh, *City*, 96–97; Lewis, *Life*, 59.

697. Apul. *Metam.* 10.13; *y. Yebam.* 7:1, §2; cf. 1 Sam 9:8 (though the "lad" here might simply belong to the extended household).

698. E.g., Plut. *M. Cato* 21.7; *y. Yebam.* 7:1, §2; Garnsey and Saller, *Empire*, 119; Meeks, *Urban Christians*, 20.

699. Plut. *M. Cato* 21.7.

700. Cf., e.g., Barrow, *Slavery*, 64.

him to be so concerned by a slave's death.⁷⁰¹ Others also offered consolation over the death of a favorite slave.⁷⁰² Although some looked on a slave's death as only an economic loss,⁷⁰³ Pliny could not avoid grief over the death of some of his young slaves.⁷⁰⁴ Rabbi Gamaliel ruled that one may not accept condolences for slaves, but when his own slave Tabi died, he mourned, claiming that Tabi was exceptional.⁷⁰⁵ Greek novels sometimes depict close relationships between slaveholders and high-level servants.⁷⁰⁶

Slaves often proved loyal to the slaveholders,⁷⁰⁷ sometimes even dying for⁷⁰⁸ or with⁷⁰⁹ them. The elites who authored most extant literary sources deemed slaves who defended their holders' lives deserving of freedom and great reward.⁷¹⁰ Naturally, most ancient literature, produced from the elite, slaveholding class, chose to emphasize "loyal" rather than "disloyal" slaves,⁷¹¹ but they did have genuine (in addition to fictitious)⁷¹² examples to choose from. Following standard epistolary conventions for conveying affection, one slave girl complained to her absent holder, "We die if we do not see you daily," and urged him to write soon.⁷¹³

Not all slaveholders earned affection or even toleration;⁷¹⁴ it was said that some slaves even betrayed⁷¹⁵ or falsely accused⁷¹⁶ them. Pliny complains about a slaveholder attacked by his slaves, struck in the face, stomach, and privies, and then left to die⁷¹⁷ though rescued temporarily by some faithful slaves.⁷¹⁸ While admitting that the slaveholder was a cruel master,⁷¹⁹ Pliny worries that not even benevolent masters are safe, attributing the attack to slaves' intrinsic brutality.⁷²⁰ (That brutality characterized the institution seems not to have occurred to him.) Further, slaves who were too loyal to their masters might merit the ridicule of other slaves.⁷²¹

701. Cic. *Att.* 1.12.4. Naturally, the grief is nothing like what he later expresses over the death of his daughter, Tullia.

702. Statius *Silv.* 2.6 (encouraging the slaveholder to weep as much as he needs to, 2.6.12–14).

703. Pliny *Ep.* 8.16.3.

704. Pliny *Ep.* 8.16.1, 3–4. He paternalistically consoled himself that he was always good to his slaves, better than law required (8.16.1). Scholars have sometimes used him as an example of a caring slaveholder (Barrow, *Slavery*, 51–52).

705. In *y. Ber.* 2:7 (where R. Eliezer also insists against accepting condolences for slaves, comparing them to animals). Tabi practiced Judaism (*y. Sukkah* 2:1, §3).

706. Hock, "Ethnography," 114, cites Char. *Chaer.* 1.12.9; 2.1.2; 2.3.6; 2.6.1.

707. E.g., Val. Max. 2.5.3; 6.8; Appian *Hist. rom.* 8.3.17; Mart. *Epig.* 3.21; *Test. Ab.* 15:5 A. So also freedwomen (Suet. *Calig.* 16.4) and freedmen (Tac. *Hist.* 1.49). In one novel, a servant's murders are excused as loyalty to his master (see Hock, "Ethnography," 116, citing Char. *Chaer.* 3.7.2); in another, former servants who had become masters of an estate gladly handed it over to their former master when he passed through (Xen. *Eph. Anthia* 5.10).

708. E.g., Val. Max. 6.8.6; Appian *Bell. civ.* 4.4.26; Tac. *Hist.* 4.50. Slaves might give their lives to avenge their slaveholders (Val. Max. 3.3.ext. 7; Appian *Hist. rom.* 7.1.2; Suet. *Aug.* 16.3) or endure torture to protect the master (Val. Max. 6.8.1); in Tac. *Hist.* 4.59, slaves and freedpeople prevent their patron's suicide; in Tac. *Ann.* 13.44, a freedman confesses to his patron's crime to try to save his life.

709. Val. Max. 6.8.3–4; perhaps the freedman in Tac. *Ann.* 14.9.

710. Cic. *Mil.* 22.58.

711. Bradley, *Slaves*, 37. E.g., an ideal society included slaves' obedience (Pliny *Panegy.* 42.2).

712. In ancient Egypt, a slave brother rejoices over his sister's death for mistreating the mistress ("King Cheops and the Magicians" 12.8–28 [in Simpson, *Literature of Egypt*, 23–24]).

713. P.Giss. 17, in Richards, *Letter Writing*, 13–14.

714. See Bradley, *Slaves*, 44–45.

715. See, e.g., Plut. *Sulla* 10.1; Hdn. 5.2.2; also freedpersons, e.g., Tac. *Ann.* 15.54–55.

716. See, e.g., Jos. *Ant.* 19.12–14; Tac. *Ann.* 16.18; also freedpersons, e.g., 16.10.

717. Pliny *Ep.* 3.14.2.

718. Pliny *Ep.* 3.14.3. Only the guilty, most of whom were apprehended, were executed (3.14.4).

719. Pliny *Ep.* 3.14.1.

720. Pliny *Ep.* 3.14.5. In many letters, Pliny favors a more benevolent approach toward slaves than was dominant in his day; this passage in Pliny exposes a deeper level of anxiety.

721. Alciph. *Farm.* 23 (Lenaeus to Corydon), 3.26. Earlier slaves in a household might abuse newcomers (Tac. *Agr.* 31); seniority seems to have been one means of slave peers' establishing their own pecking order.

14. Slaves with High Status⁷²²

Urban household slaves were more apt to have better opportunities for social mobility than did most freeborn people who were poor.⁷²³ The lowest-ranking slaves in society, who constituted the majority, had little hope for advancement, but educated and skilled slaves had much more reason for hope.⁷²⁴ Slaves who managed their holders' businesses or estates usually had considerable freedom.⁷²⁵ Even in the republic, some slaves could become bankers, estate managers, and government officials.⁷²⁶

Education was often one means of advancement in status.⁷²⁷ Athenians erected a statue of Aesop, thereby, Phaedrus remarked, giving fame to a slave and showing that honor comes by merit, not by birth.⁷²⁸ Some ancients viewed highly educated servants as valuable dialogue companions⁷²⁹—the agenda normally being set, of course, by the slaveholder. Some philosophers were slaves,⁷³⁰ including the famous Stoic Epictetus before his freedom.⁷³¹ One slave teacher who rose to freedom and intellectual prominence accumulated a library of some thirty thousand volumes;⁷³² many renowned teachers, in fact, were freedmen.⁷³³ One skillful slave was freed to help his patron with rhetoric and later became a prominent teacher of rhetoric.⁷³⁴

Some people even voluntarily entered particular forms of slavery to improve their status or secure other benefits;⁷³⁵ this was especially the case if they could enter Caesar's household.⁷³⁶ Free women sometimes improved their status by marrying into imperial slavery.⁷³⁷ In one papyrus, a person proposes to go to Rome and become an imperial freedman to secure a government office.⁷³⁸

Some slaves of rulers could exercise considerable power.⁷³⁹ A slave of the imperial household could wield more power than free aristocrats;⁷⁴⁰ the emperor often used imperial slaves in accounting, assisting provincial officials, and civil administration.⁷⁴¹

722. Slavery itself represented a status rather than a class (Martin, "Slavery").

723. Garnsey and Saller, *Empire*, 124; MacMullen, *Social Relations*, 124; cf. Meeks, *Urban Christians*, 20.

724. Martin, *Slavery*, 49. The divergence of ranks is frequently noted (e.g., Boer, *Morality*, 83). The hierarchy of slaves' roles in the American South (Fogel and Engerman, *Time*, 149–50) was more difficult to ascend, more clustered toward the bottom, and without truly high-ranking or wealthy slaves.

725. Garnsey and Saller, *Empire*, 119; cf. Stambaugh and Balch, *Environment*, 113. In such a setting, the state of being a fugitive slave, with little hope of income and status, would normally have seemed a poor alternative.

726. Dupont, *Life*, 56–57.

727. For highly educated slaves, see, e.g., Barrow, *Slavery*, 60–63; for slaves as teachers and readers, see, e.g., Shiell, *Reading Acts*, 31–32.

728. Phaedrus 2.9.1–4. Aesop had to use fables because, as a slave, he could not speak openly (3.prol. 33–40). In the tradition, Aesop proved wiser than the slaveholder (*Vit. Aes.* 33–55); historically, the same is likely true of Epictetus and many others.

729. Pliny *Ep.* 9.36.4.

730. E.g., Aul. Gel. 2.18; Diog. Laert. 6.2.74. Cf. also the former slave of Pythagoras who taught Pythagoreanism (Iamb. *V.P.* 30.173).

731. Fronto *Ad verum imp.* 1.1.5.

732. Suda, s.v. "Epaphroditos" (in Sherk, *Empire*, §178I, p. 238).

733. Suet. *Gramm.* 15–20; 23. When one was freeborn, this is noted (*Gramm.* 21; and this one became a slave).

734. Suet. *Rhet.* 3.

735. Winter, *Welfare*, 154–59. For slavery as a means to social mobility, see also Martin, *Slavery*, 30–42.

736. See, e.g., P.Oxy. 3312.99–100, in Horsley, *Documents*, 3:7–9, §1; cf. Judge, *Rank*, 20.

737. Pomeroy, *Goddesses*, 196. In 52 C.E., a law passed that free women marrying a slave without the slaveholder's knowledge would be reduced to slavery (or to freed status if the slaveholder knew; Tac. *Ann.* 12.53).

738. Weaver, "P. Oxy. 3312," suggests that the writer may be overly optimistic.

739. E.g., Epict. *Diatr.* 1.19.19; 4.7.23; inscriptions in Sherk, *Empire*, 89–90; Deissmann, *Light*, 325ff. passim; cf. Char. *Chaer.* 5.2.2; Martin, *Slavery*, 49.

740. E.g., Hdn. 1.12.3 (though this slave, Cleander, was later executed for treason, 1.13.4); cf. also Carcopino, *Life*, 62–63.

741. DeSilva, *Honor*, 192.

One slave of Claudius, who administered Hispania Citerior (Nearer Spain) for him, had a silver dish weighing five hundred pounds and eight more, each weighing half of that.⁷⁴² Dale Martin notes the power of one of Tiberius's slaves, a finance officer working for him in Gaul; among this slave's own household slaves traveling with him were a "buying agent; . . . treasurer; . . . physician; [two persons] in charge of silver; . . . in charge of wardrobe; two chamberlains; four attendants; and [two] cooks."⁷⁴³

Certainly, freedpersons exhibited significant social mobility.⁷⁴⁴ Banking tablets from Pompeii illustrate this point well: one imperial freedman lent ten thousand sesterces to a man of rank in a loan arranged by means of the free man's slave manager; the free man also borrowed three thousand sesterces more from this managerial slave himself.⁷⁴⁵ Imperial freedmen achieved the height of their power under Claudius and Nero.⁷⁴⁶ The Jewish king Agrippa also freed a slave of Caligula who had once shown him kindness, and made him master of his own estate.⁷⁴⁷ For readers who intuitively assume the forms of slavery practiced in the Americas, use of the same terminology to describe a different range of slavery in the Roman Empire can sometimes obscure the differences. At other times, of course, parallels are all too clear.

15. Slave Families

Slaveholders controlled slaves' marriage options. Centuries earlier, Xenophon felt that family life was beneficial for a good slave but simply made a bad slave more perverse; in any case, he recognized the expectation that slaves could not breed without the slaveholders' permission.⁷⁴⁸ Inscriptions suggest the difficulties slaves had in establishing their own families,⁷⁴⁹ especially if partners belonged to different households. Some groups of slaves had more opportunities for family life than did others, depending partly on their household, available partners, status differences, and the like.⁷⁵⁰ Breeding was apparently one of the reasons for purchasing female slaves.⁷⁵¹ Jewish people also knew that Gentile slaveholders, rather than the slaves themselves, had ultimate say in choosing slaves' mates.⁷⁵²

Roman law counted slaveborn children as illegitimate;⁷⁵³ a free person could not legally marry a slave, although Roman law did provide a legal category for this sort of union.⁷⁵⁴ A male slave could not charge his companion with adultery because their union

742. Pliny E. *N.H.* 33.52.145.

743. Martin, *Slavery*, 7 (citing *CIL* 6.5197). On prominent slaves and freedmen in powerful households, see also Harrison, *Authorities*, 21–22, suggesting that some believers in Rome probably belonged to these circles (Phil 4:22; Rom 16:11).

744. See, e.g., López Barja de Quiroga, "Mobility"; Jeffers, *World*, 232–33; extended comment on freedpersons at Acts 6:9.

745. Balch, "Families," 273.

746. Jeffers, *World*, 234; for imperial freedpersons of high office under Claudius, see Sherck, *Empire*, §47, pp. 89–90 (including *ILS* 1533, 1546, 1643, 1682, 2816). See comment on Pallas at Acts 23:24. Even in the late republic, a freedman of Sulla had a free hand to exploit the state (Cic. *Rosc. Amer.* 49.141). In that era, Cicero approved the promotion of trustworthy slaves but warned against entrusting public matters to them, lest it stir gossip that the householder was influenced by slaves (*Quint. fratr.* 1.1.6.17; 1.2.1.3).

747. Jos. *Ant.* 18.194.

748. Xen. *Oec.* 9.5 (LCL, 441).

749. Rawson, "Family," 24.

750. Bradley, *Slaves*, 47–80, esp. 79–80.

751. Gardner, *Women*, 206–9.

752. *Pesiq. Rab Kah.* 2:4; Sup. 3:2.

753. Gardner, *Women*, 143; Stambaugh and Balch, *Environment*, 123.

754. Treggiari, "Marriage and Family," 170. Martin, "Slave Families," 214, comments on these mixed households.

was not legal.⁷⁵⁵ But inscriptions show that slaves did in fact form unions essentially like marriages, despite the lack of legal recognition (*contubernium*, “cohabitation”).⁷⁵⁶ A number of inscriptions from Roman Asia reveal nuclear families,⁷⁵⁷ and some even extended families,⁷⁵⁸ among slaves. At least in larger households, most slaves probably became couples within the same household, but some did so with partners outside.⁷⁵⁹ Family life remained precarious until the entire family could achieve manumission.⁷⁶⁰

One of the greatest horrors of the slave trade was the involuntary rupture of family bonds when slaves were “sold off” or estates divided.⁷⁶¹ Of some sixty extant documents recording the sale of slaves in Egypt, not one male is recorded to have been sold with his wife or child; only rarely do we know of mothers being sold with their children.⁷⁶² For example, the texts reveal eleven girls under seventeen being sold; seven under thirteen; and a fourteen-year-old already now being sold for the fourth time; since they cannot all be orphans, even this limited evidence is suggestive.⁷⁶³

16. Women Slaves⁷⁶⁴

Because Rhoda was both a slave and a woman, comments here are particularly relevant to her case. That women slaves faced double prejudice⁷⁶⁵ seems likely from how frequently ancients paired wives and slaves as subordinates,⁷⁶⁶ including in their household codes.⁷⁶⁷ (Still, although wives were subordinate, they were not subordinate in the same way or to the same extent that slaves were.)⁷⁶⁸

755. Justin. *Cod.* 9.23 (in Lefkowitz and Fant, *Life*, 183, §193).

756. Buckland, *Roman Law*, 64; Pomeroy, *Goddesses*, 193; Gardner, *Women*, 213–18; Martin, *Slavery*, 2–3; Jeffers, *World*, 228. Similarly, in the American South, slaves formed families, though not legally by U.S. law (Fogel and Engerman, *Time*, 128).

757. Martin, “Slave Families,” 208.

758. *Ibid.*, 208–13.

759. *Ibid.*, 214–22.

760. Bradley, *Slaves*, 80.

761. See, e.g., Bradley, “Traffic”; Dixon, *Mother*, 17–18; Cary and Haarhoff, *Life*, 131. Earlier politicians might use their children’s marriages politically, even when this required breaking their existing marriages or engagements (Suet. *Jul.* 21; 27.1); but this does not match the scale of slave mating.

762. Finley, *Slavery*, 76. Conversely, many slaves were not sold but were retained in families for multiple generations or manumitted (Lewis, *Life*, 58).

763. Finley, *Slavery*, 76, also noting a study on slavery in the American South: if just 1.92 percent of slaves were sold each year, half of all slaves would be sold in a thirty-five-year lifespan, and the average slave would see 11.4 immediate family members sold. Fogel and Engerman, *Time*, 5, 49–51, argue that the numbers were probably much lower than has often been supposed from the limited documents, but they are probably too optimistic. Certainly the slave narratives reveal that it was a persistent fear.

764. On women slaves, see Osiek and MacDonald, *Place*, 95–117 (ch. 5, “Female Slaves: Twice Vulnerable”); Lefkowitz and Fant, *Life*, 196–98. Ironically, slave women field workers in the American South were closer in equality to their husbands than were white women in the same period (Sterling, *Sisters*, 37), but this was partly because they were equally subjected.

765. Women, slaves, and minors, as household dependents, often appear together (Hezser, “Impact,” 377–90, including Jos. *Ant.* 4.209, 219 [p. 384]; Hezser, *Slavery*, 69–82). Cf. the emphasis regarding racial and gender oppression in Grant, *Black Women’s Jesus*, e.g., 195–201. For some theological or biblical reflections focusing specifically on African-American women’s situation, see, e.g., Grant, “Black Woman”; Martin, “Interpretations”; Sanders, “Biblical Perspective”; Weems, “Reflections.”

766. E.g., Dio Chrys. *Or.* 38.15; Ael. Arist. *Def. Or.* 128–30, §§40–41D; Artem. *Oneir.* 1.24; Jos. *Ant.* 4.219; y. *Sukkah* 2:9; *Ter.* 8:1; Stern, “Aspects,” 628–29 (citing *m. Hag.* 1:1; *Sukkah* 2:8; *b. Hag.* 4a); Swidler, *Women*, 84, 117–18.

767. Arist. *Pol.* 1.1.6, 1252b; 1.2.1–2, 1253b; 1.5.3–4, 1259b; 3.4.4, 1278b; cf. Balch, “Household Codes,” 27; in Pauline codes, e.g., Jewett, *Male*, 138–41, 144, 148; Giles, *Woman*, 43, 46; Keener, *Paul*, 186–88, 207–9.

768. E.g., Arist. *Pol.* 1.5.3–11, 1259b–1260b; one view in Livy 34.7.13; Dio Chrys. *Or.* 38.15. Because barbarians fail to distinguish the householder’s relationship with his wife from his relationship with his slave, Aristotle opines, they are like slaves themselves (*Pol.* 1.1.5, 1252b).

Girls were not as economically valuable as boys in terms of diverse labor, but they could be used to produce more slaves and hence often warranted the investment of their rescue as foundlings and two years of subsequent nursing contracts.⁷⁶⁹ Women in households filled a wide range of functions.⁷⁷⁰ For example, slave women were often nurses.⁷⁷¹

Nevertheless, slave men seem to have outnumbered slave women, even in households ruled by women, perhaps because of the greater incidence of female child abandonment⁷⁷² (or the greater labor utility of males rescued from such abandonment). Such child abandonment would not, however, be relevant in Judea (see comment on Acts 7:19).

Women slaves were subject to abuse just as male slaves were.⁷⁷³ A new slave girl might be terrified by her slave tasks and a cruel mistress.⁷⁷⁴ In the late first century, a satirist mocked the cruel matron who would beat a poor slave woman because of one misplaced lock in the matron's hair.⁷⁷⁵ Nor did gender always protect women slaves from male masters' cruelty; in a familiar Greek tale, the hero Odysseus mercilessly hanged twelve women servants who had acted shamelessly.⁷⁷⁶ When reports of the early Christians made them seem not dangerous, Pliny resolved to secure the full truth by torturing two deaconesses, who were slave women.⁷⁷⁷ Some scholars estimate that more than half of slave women died by age thirty, most dying between twenty and twenty-five.⁷⁷⁸ But surviving epitaphs may overemphasize young deaths, and similarly low longevity figures obtain for free persons.

17. Sexual Abuse

Women were subject specifically to a form of abuse comparatively rarely employed on adult male slaves—namely, sexual abuse.⁷⁷⁹ That this was less common with male slaves (and less often reported when it happened) is to be expected given the society's sexual double standard for the slaveholders.⁷⁸⁰ When a male slave was known to be sleeping with the master's wife, this was regarded as an especially vile form of adultery.⁷⁸¹ A man who discovered his mother's love for a slave could kill her, and it was considered honorable for him to stop loving her.⁷⁸² A woman who had intercourse with someone else's

769. Saller, "Women," 203–4.

770. See esp. Treggiari, "Jobs for Women"; cf. also idem, "Jobs in Household."

771. E.g., Char. *Chaer.* 1.12.9; see discussion of nurses at Acts 7:21.

772. Osiek, "Female Slaves," 260–61.

773. *Ibid.*, 262.

774. Ap. Rhod. 4.35–39 (fictitious but realistic).

775. Mart. *Epig.* 2.66.1–8.

776. Hom. *Od.* 22.465–73. In an ancient Egyptian tale, a slave girl's brother beats her and celebrates her death because of her misbehavior toward the mistress ("King Cheops and the Magicians" 12.8–26 [in Simpson, *Literature of Egypt*, 23–24]).

777. Pliny *Ep.* 10.96.8.

778. Pomeroy, *Goddesses*, 194. Complications in childbearing may have been a major cause of early death.

779. See, e.g., Sen. E. *Controv.* 4.pref. 10; Arlandson, *Women*, 99–102; Pomeroy, *Goddesses*, 192; Gardner, *Women*, 118, 221; Dupont, *Life*, 117–18; Dover, "Attitudes," 147–48; Osiek, "Female Slaves," 262–64; Osiek and MacDonald, *Place*, 103–5 (cf., more broadly, 95–117); Bradley, *Slaves*, 116–18; Keener, "Adultery," 12; Glancy, "Obstacles"; Hezser, *Slavery*, 179–201, esp. 191–94.

780. On the double standard allowing male but not female slaveholders to sleep with slaves, see Osiek and MacDonald, *Place*, 22 (though cases of women sleeping with slaves do appear, e.g., 44).

781. Lucian *Downward Journey* 11; *Sat.* 29; Tac. *Ann.* 14.60 (a false accusation); Iambl. (nov.) *Bab. St.* extract 2. Cf. also stories where the male slave rebuffs the mistress's advances, e.g., Gen 39:7–12; *Adulteress* (MS from 2 c.E. in *SPap* 3:350–61); Xen. *Eph. Anthia* 2.5; 3.12.

782. Philost. *Vit. soph.* 2.25.610.

slave could be reduced to slavery.⁷⁸³ Slave boys were also the object of attention, but the vast majority of cases involved homosexual use,⁷⁸⁴ and so the slaves' sexual exploiters remained male in the overwhelming majority of reported cases. The Stoic philosopher Musonius challenged the double standard: men thought it acceptable to sleep with female slaves but would be scandalized by a free woman's sleeping with male slaves.⁷⁸⁵

Roman men's sleeping with their slave girls was common⁷⁸⁶ but became an object of crude humor.⁷⁸⁷ One could legally cohabit with a slave⁷⁸⁸ (though the offspring were not considered "legitimate" under Roman law);⁷⁸⁹ it was legal even if subject to ridicule.⁷⁹⁰ Sleeping with one's slave (whether male or female) in a dream was a good omen, according to one dream handbook, since slaves were one's possessions and this behavior portended prosperity and increase.⁷⁹¹ An agricultural specialist might seriously advise that an overseer be given a woman companion to keep him from the household women.⁷⁹² A man might prefer a freeborn woman, but if she was unavailable, then he might want a freedwoman; if she was unavailable, he might settle for a slave.⁷⁹³

Beautiful slaves brought higher prices on the slave market,⁷⁹⁴ and buyers might plan to have intercourse with them immediately.⁷⁹⁵ The offspring of such a union remained a slave.⁷⁹⁶ Rape of freeborn women was a crime; nothing was said of slaves.⁷⁹⁷ In the distorted androcentric perspective of most of our fictitious sources, the women apparently liked the attention⁷⁹⁸ and sometimes were happy for any partner available.⁷⁹⁹

Women captured in war were common sexual objects.⁸⁰⁰ Honorable was the man

783. Suet. *Vesp.* 11 (noting that the ruling's purpose was to decrease sexual sin).

784. Cf., e.g., Aeschines *Tim.* 16; Val. Max. 8.1.abs.12; Robinson, *Criminal Law*, 70; Hartmann, "Homosexuality," 470; esp. here Bradley, *Slaves*, 115. Solon's law prohibited this abuse of slave boys in classical Athens, but it was said that this was only to prevent the habit from spilling over to free youth (Aeschines *Tim.* 17). Slaves who loved free boys would be severely punished (*Tim.* 139).

785. Mus. Ruf. 12, p. 86.33–38. He disapproves of men sleeping with prostitutes and unmarried free persons (86.13–16) and also with his servant woman (86.14); sleeping with his servant is wrong (86.30–32; p. 88.4–5).

786. Hezser, "Impact," 377, even suggests that slave-holding married men may have had intercourse more often "with their female slaves than with their wives." Hezser notes (411) that they offered "a cheap alternative to prostitutes"; her observation that this must have annoyed wives (411) may be an understatement, though some wives seem to have adopted the expected posture of tolerance.

787. E.g., Mart. *Epig.* 1.84.1–5.

788. See Paulus *Sent.* 2.1–9 (in Lefkowitz and Fant, *Life*, 193, §196); Schieman, "Concubinatus," 682. Sex with another's slaves also was not illegal (Paulus *Sent.* 2.26.1–17, in Lefkowitz and Fant, *Life*, 182, §193), even if it was not highly viewed.

789. Treggiari, "Marriage," 391. Thus, in contrast to the patriarchal era, slave children could not compete as heirs (Hezser, "Impact," 412).

790. Justin. *Cod.* 9.25 (in Lefkowitz and Fant, *Life*, 184, §193). Josephus views passion for slaves as degrading (Hezser, "Impact," 415; idem, *Slavery*, 195–96); Romans, like Josephus, opposed marrying slaves ("Impact," 416; *Slavery*, 194–95).

791. Artem. *Oneir.* 1.78.

792. Colum. *Rust.* 1.8.5.

793. Mart. *Epig.* 3.33 (cf. 5.37).

794. Xen. Eph. *Anthia* 2.2. This remains true in sexual slavery today (see, e.g., Pierce, "Faith," 80).

795. As in Xen. Eph. *Anthia* 3.11.

796. E.g., Plato *Laws* 11.930DE. In Sen. E. *Controv.* 6.3, a father could, however, acknowledge, and hence legitimize, his child born through a slave girl; cf. *ILS* 7479 (Sherk, *Empire*, §178E, p. 237), where a man is buried with his son, "born a slave in the house."

797. Cic. *Verr.* 2.4.52.116. A free woman raped by a tyrant might not be considered unchaste, because she was forced (Sen. E. *Controv.* 9.4.10).

798. Lower-class and slave women are easily won over by affection (Char. *Chaer.* 1.4.1–2). In Soph. *Ajax* 485–91, a woman captured in war wishes her captor well because she is his sexual partner.

799. E.g., Lucian *Lucius* 5, 8–11; Apul. *Metam.* 3.

800. Cf. also Deut 21:11. Priests could not marry those who had been captives or slaves, since they may have had sex with Gentiles (see Jos. *Ag. Ap.* 1.35; *Ant.* 13.292).

who refused to disgrace his captives.⁸⁰¹ One man made a widowed war captive his mistress and raised her son, but this hardly reveals him as a kind person; he had supported the decree to execute all the males of the town.⁸⁰² Despite apparent examples to the contrary,⁸⁰³ it was clear that some captive women resented their new bed partners.⁸⁰⁴ It was said that dignified Teuton women hanged themselves rather than allow themselves to be abused sexually.⁸⁰⁵ Sexual abuse extended beyond prisoners of war to all other slave women as well.

Later rabbis, who opposed sexual abuse of slave women, warned about the temptation they posed: to the early sage Hillel is attributed the warning, “The more female servants, the more sexual immorality.”⁸⁰⁶ Another sage warns that a man who lusts for female slaves will be ashamed in his own house,⁸⁰⁷ and a still earlier sage warns against sleeping with other men’s slave women.⁸⁰⁸ The many warnings against the practice suggest that it happened, though it was not approved as it was among Gentiles; a man impassioned with his slave had to first free her and then marry her.⁸⁰⁹ Although later Islamic slavery often included slave concubines,⁸¹⁰ Jewish and subsequently Christian sources condemned sexual abuse of slaves.⁸¹¹ The only way to eliminate it altogether, of course, would have been to eliminate slavery.

One might buy a slave’s freedom and marry her (possibly to his parents’ disdain).⁸¹² A Gentile patron might well later free his former slave mistress, and he could even pay her dowry when she married someone else.⁸¹³ It was perfectly legal to free a slave woman in order to marry her,⁸¹⁴ and it seems to have been often done.⁸¹⁵ As slave women grew older and less attractive to the patrons, they grew less “valuable” and hence perhaps could purchase their freedom at a lower cost.⁸¹⁶ Often the slaveholder

801. It was said that Alexander married Roxane rather than disgrace her sexually as a prisoner of war (Arrian *Alex.* 4.19.5).

802. Noted by Plut. *Alc.* 16.4–5.

803. Soph. *Ajax* 485–91, again.

804. A captive concubine could be suspected of murder, alongside a stepmother (Hermog. *Issues* 56.16–18).

805. Val. Max. 6.1.ext. 3.

806. *M. 'Ab.* 2:7 (although the comment may include the danger of their immorality with others, a concern also of Jewish fathers). A rabbinic parable tells of a king who warned his son not to touch the servant women; but the son disgraces himself thus anyway (*Pesiq. Rab Kah.* 20:6). A priest could not marry a freedwoman because her virginity was suspect (Cohen, *Law*, 147, citing *m. Qidd.* 4:1; *Yebam.* 6:5; *t. Qidd.* 5:3; see also *t. Hor.* 2:11; *y. Hor.* 3:5, §1). Ilan, *Women*, 206–7, notes the abuse and argues that the rabbis were protecting the man from temptation, not the slave woman.

807. *Sent. Syr. Men.* 347–53.

808. *Sir* 41:22.

809. Safrai, “Home,” 748–49 (contending, perhaps optimistically based on idealized sources, that Jewish women were not used as slaves and so the Gentile slave woman would have to be converted before the marriage). Technically, rabbis disapproved of his marrying her if he had intercourse with her before freeing her, but this would not invalidate the union (Cohen, *Law*, 149, citing *m. Yebam.* 2:8).

810. Gordon, *Slavery*, 43, 57, 79–104, esp. 79, 83. It is common to most slave societies. Fogel and Engerman, *Time*, 132, note that in the 1860 census, 39 percent of urban freedpersons and 20 percent of urban slaves were mulatto (counted as even one-eighth white ancestry), but only 9.9 percent among rural slaves; they also claim (133) that surveys and genetics suggest that less than 5 percent of fathers were white. This seems lower than expected, but in any case, one would expect the lower numbers among field slaves in rural areas, especially in the Deep South, where slaveholders had less personal contact with individual women slaves.

811. Gordon, *Slavery*, 83. Osiek and MacDonald, *Place*, 106–7, argue that the restriction was not complete.

812. Aelian *Farmers* 19 (Mormias to Chremes).

813. Appian *Bell. civ.* 4.4.24.

814. Gaius *Inst.* 1.19.

815. E.g., Jeffers, *World*, 239; Osiek, “Female Slaves,” 261.

816. Pomeroy, *Goddesses*, 195.

wished to take the freedwoman as a concubine⁸¹⁷ or marry her himself.⁸¹⁸ Some ancients condemned this outright as driven by passion.⁸¹⁹ If the man freed the woman for the purpose of marrying her, she could not legally refuse.⁸²⁰ Although a freedwoman married to her patron could divorce him, this did not grant her the freedom divorces normally conferred on wives.⁸²¹

Slaves did not always reciprocate affection, and this was true not only for prisoners of war. One writer seeks to entertain his audience by depicting a man who bought a woman slave to love her and make her his heir; she, however, kept mocking him, and so he threatened to teach her that he was also her master.⁸²² She responded that she would endure anything rather than have intercourse with him⁸²³ and would even kill herself, if need be, to evade his advances.⁸²⁴ An honorable freeborn slave could be presented as resisting a master's advances.⁸²⁵

Ancient men were not oblivious to the reality that wives sometimes grew jealous of slave women,⁸²⁶ a man who refused to sleep with a slave woman lest he anger his wife was honorable.⁸²⁷ But men might praise as honorable a wife who pretended not to notice and who even rewarded the slave with freedom and a marriage after her husband's death.⁸²⁸ It was nice, one man opined, when a wife appeared more beautiful than a slave, especially since the wife, unlike a slave, provided intercourse voluntarily.⁸²⁹ Some ancients found aging men particularly vulnerable to ridicule for their interest in young girls, slave or free.⁸³⁰

That a large number of women slaves in the empire were prostitutes⁸³¹ probably only reinforced the perspective that women slaves were sexually available.⁸³² In New Comedy, often a free man becomes impassioned for a slave, but she turns out to be freeborn, and her father, who had exposed her when he was poor, now provides a dowry for the couple to marry.⁸³³

As already noted, all Jewish (and, later, Christian) teaching opposed any sexual abuse of slaves. Because Mary's household is Jewish and seems to be headed by a believing widow,⁸³⁴ Luke's audience would not assume that Rhoda faced such dangers

817. Treggiari, "Marriage and Family," 169; Gardner, *Women*, 221.

818. Augustus's legislation allowed freeborn males to marry freedwomen, probably for demographic reasons (and perhaps more; cf. McGinn, "Missing Females").

819. *Jos. Ant.* 4.244–45 (thinking not of abuse of power over the slave but of breach of class distinctions).

820. Buckland, *Roman Law*, 88.

821. *Ibid.*, 117.

822. *Alciph. Farm.* 24 (Gemellus to Salaconis), 3.27.

823. *Alciph. Farm.* 25 (Salaconis to Gemellus), 3.28, ¶1.

824. *Alciph. Farm.* 25 (Salaconis to Gemellus), 3.28, ¶2.

825. E.g., *Ach. Tat.* 6.20; *Xen. Eph. Anthia* 2.4; 3.11 (cf. 4.5).

826. Cf., e.g., *Gen* 16:5. In *Ap. Rhod.* 1.609–19, the terrible women of Lemnos had slain all the men for taking slave-maids to bed instead of them. In *Babr.* 10.1–5, a married man sleeps regularly with a slave girl, who quarrels with her mistress.

827. *Hom. Od.* 1.428–33. Cato slept with a slave after his wife's death until his children heard and were displeased; so he took another free wife (*Plut. M. Cato* 24.1–3).

828. *Val. Max.* 6.7.1. Questions of matronly honor aside, we might guess that the widow's purpose was wanting the slave out of her house. Plutarch also advised the wife to look the other way if necessary (*Friedländer, Life*, 1:243). A wife might jest that a husband should have sex with a slave woman (*Lysias Or.* 1.12 [*On the Murder of Eratosthenes*], though the wife turns out to be adulterous in this story).

829. *Xen. Oec.* 10.12.

830. *Alciph. Farm.* 7 (Phoebianē to Anicetus), 1.28; 31 (Anthylla to Coriscus), 3.33; cf. also *Alciph. Court.* 17 (Leontium to Lamia), 2.2.

831. E.g., *Mart. Epig.* 9.6.7; 9.8; *Apul. Metam.* 7.9; *'Abot R. Nat.* 8 A. See further, e.g., Hezser, *Slavery*, 179–82; Keener, "Adultery," 11–12.

832. Cary and Haarhoff, *Life*, 147.

833. Pomeroy, *Goddesses*, 139.

834. Mark also appears to share his mother's faith in this period (*Acts* 12:25).

(perhaps in contrast to the servant in Acts 16:16–19, for which text this background may be relevant).

18. Philosophers and Others

Some ancients insisted that they needed no slaves, claiming that they worked hard and lived simply;⁸³⁵ others, especially in the more agrarian republic, worked alongside slaves in the field.⁸³⁶ Such views were exceptional in this period but are presented as honorable. Roles between slaves and slaveholders were reversed at the Roman festival of Saturnalia,⁸³⁷ but Saturnalia was playful and boded no long-term freedoms.⁸³⁸

Some aristocrats also proved more sympathetic to slaves than did others.⁸³⁹ Pliny, in a period when tyranny had receded and mores were becoming less stern, defended slaves' freedom⁸⁴⁰ and even survival⁸⁴¹ in various cases. He is particularly remembered for interceding on behalf of a freedman, seeking to reconcile him to his patron.⁸⁴²

More striking are the views of some philosophers.⁸⁴³ Most recognized slavery as an "accident," not a result of one's character.⁸⁴⁴ Some ancients who were philosophically minded thought that people were better off without, or at least with fewer, slaves.⁸⁴⁵ Early Cynics and Stoics even challenged social values to the extent that many scholars believe that they wanted to do away with slavery;⁸⁴⁶ they almost certainly believed that it was against nature,⁸⁴⁷ which Aristotle construed as an argument for slavery's abolition.⁸⁴⁸ As Stoics became guardians of society's values instead of its challengers, however, they moved away from such radicalism; the concern was no longer whether slaveholding per se was just but simply that slaves should be treated justly.⁸⁴⁹

835. Philost. *Hrk.* 33.44.

836. Plut. *M. Cato* 3.2.

837. Lucian *Sat.* 2, 13, 17; cf. Leach, "Essays," 111. Luke 12:37 depicts a reversal of roles that would fit Saturnalia (but more likely bursts the bounds of parabolic realism to depict Jesus's striking service).

838. See Harrill, "Paul and Slavery," 594. Since slaves outnumbered slaveholders in wealthy households, implementation would also be at best partial (cf. Lucian *Sat.* 22); e.g., how often can a rich man's friends aid him waiting on slaves (*Sat.* 18) when his peers would have slaves of their own?

839. Cic. *Fam.* 13.23.1–2 writes a letter of recommendation on behalf of another wealthy person's freedman.

840. E.g., Pliny *Ep.* 4.10.1–2; cf. 10.31.2–3.

841. Pliny *Ep.* 8.14.12; 10.29.2.

842. Pliny *Ep.* 9.21.1–3. His intercession proved successful (9.24). New Testament commentators often cite this example (e.g., Lightfoot, *Colossians*, 318; Martin, *Colossians*, 146; Lohse, *Colossians*, 196).

843. See esp. Garnsey, *Ideas of Slavery*; idem, "Stoics and Slavery." Aristotle, by contrast, supported the institution of slavery (Deming, "Indifferent Things," 393; Kelly, *Peter*, 116).

844. E.g., Lucret. *Nat.* 1.455–58; cf. Dion. Hal. *Ant. rom.* 4.23.1; Cic. *Inv.* 1.25.35. That it could affect character may have constituted a different sort of question.

845. Dio Chrys. *Or.* 10.9–13; 13.35.

846. Grant, "Economic Background," 105. Deming, "Indifferent Things," 393, doubts that Stoics ever rejected slavery per se.

847. Erskine, *Stoa*, 46 (contending that Philo *Spec. Laws* 2.69 [SVF 3.352] reflects Chrysippus); cf. *Stoa*, 61; certainly the view in Heracl. *Ep.* 9; cf. Epict. *Diatr.* 1.13.4. Ironically, Chrysippus apparently approved flogging as a discipline for boys (Quint. *Inst.* 1.3.13). Stowers, "Resemble Philosophy?," 94, notes that Zeno abolished slavery, along with marriage (because of its hierarchical application; see also Engberg-Pedersen, *Paul and Stoics*, 76–77).

848. Arist. *Pol.* 1.2.3, 1253b (Aristotle being hostile to this position). This position was eventually watered down, so that Roman law acknowledged that slavery was against nature, without thereby abolishing slavery (Justin. *Inst.* 1.3.2; 1.5.intro.). Aristotle himself believed that nature supported slavery (*Pol.* 1.2.8, 1254a) because it subordinated the inferior to the superior (1.2.12, 1254b), and that such subordination was just (3.5.8–9, 1280a).

849. Erskine, *Stoa*, 48, 181; cf. Engberg-Pedersen, *Paul and Stoics*, 77; for Stoics on slavery, see Fitzgerald, "Slaves," 154–62. On just treatment, see Lutz, "Musonius," 29–30 (citing Mus. Ruf. 12.86.29–32); cf. Dio Chrys. frg. 5 (Stob. *Flor.* 4, 19.46 [Hense, 430]; 62.46 [Meineke]). Usually without drawing a connection with Stoicism, many scholars suggest a similar move away from egalitarian radicalism in early Christianity

Despite Seneca's view that virtue is rarely found in slaves, he argues that they are human beings and equals in many respects.⁸⁵⁰ Slaves are fellow human beings, who equally breathe, live, and die.⁸⁵¹ One should be kind to slaves and converse with them on friendly terms;⁸⁵² he argues for loving, benevolent, and gentle treatment of slaves.⁸⁵³ He and some other philosophers contended that there was nothing wrong with eating with slaves, contrary to standard custom.⁸⁵⁴ But Seneca's agenda was the just treatment of slaves, not the abolition of slavery.⁸⁵⁵

Likewise, when a Stoic became emperor, he praised policy based on the "equality" of all;⁸⁵⁶ he did not, however, try to liberate slaves.⁸⁵⁷ Stoicism had become too mainstream, co-opted by society's values. Although many philosophers taught and practiced some egalitarianism (with Epicureans doing so most dramatically), few philosophers of this period were willing to consider abolishing hierarchical roles.⁸⁵⁸ Nevertheless, many philosophers' emphasis on treating slaves justly⁸⁵⁹ probably exercised a restraining influence on some slaveholders who heeded them.

19. Ancient Abolitionists?

Luke includes some passages with slave images that would be unusual and striking in his day,⁸⁶⁰ as well as others reflecting the expectations of his culture. Nevertheless, we should not expect the issue of abolition to come up explicitly in Luke or the earliest Christian sources, since it was barely an issue of discussion in that era.⁸⁶¹ Greek and Roman writers of this period did not attack slavery.⁸⁶² A culture with no slaves was considered unusual and noteworthy.⁸⁶³ Freed slaves could find it difficult to earn a livelihood unless they had previously acquired marketable skills.⁸⁶⁴

(cf., e.g., Beavis, "Origins"; Thurston, *Widows*, 18–19); I believe that even *1 Clement* was less restrictive than later sources (Keener, "Woman," 1211–12).

850. Cf. Sevenster, *Seneca*, 185–89. Further, a pious soul could enter a slave as easily as a knight (Sen. Y. *Ep. Lucil.* 32.11).

851. Sen. Y. *Ep. Lucil.* 47.10.

852. Sen. Y. *Ep. Lucil.* 47.13. One should keep in mind that one may have a master someday (47.11).

853. Sen. Y. *Ep. Lucil.* 47.18–19; cf. 47.4–5; *Clem.* 1.18.1; 1.26.1. Cruel masters are loathed (*Clem.* 1.18.3).

854. Sen. Y. *Ep. Lucil.* 47.2–3; Heracl. *Ep.* 9.

855. See Watts, "Seneca on Slavery."

856. Marc. Aur. 1.14; cf. 1.16.7.

857. Even the early Stoic Zeno himself reportedly held slaves and beat one (Diog. Laert. 7.1.23).

858. Meeks, *Moral World*, 60. Balch, "Household Codes," 31, observes that "Roman Stoics were egalitarian in theory but Aristotelian in practice." Engberg-Pedersen, *Paul and Stoics*, 78, suggests that the only known attempt to put Stoic communal values into practice in genuine communities was Paul's own.

859. Also, e.g., Hierocles *Love* 4.27.20 (in Malherbe, *Moral Exhortation*, 94); Epict. *Diatr.* 1.13.2; Porph. *Marc.* 35.525–29; Epicurus in Diog. Laert. 10.1.9; 10.118.

860. Particularly notable is that in Luke 12:37 (mentioned briefly above), the divine master serves the servants (Buckwalter, "Saviour," 121).

861. Cf. Martin, *Slavery*, 42; Bartchy, *Slavery*, 63–67; Lightfoot, *Colossians*, 323. That Scripture provided ready principles for the abolitionist cause is clear from history (e.g., Sunderland, *Manual*; idem, *Testimony*; cf. Raboteau, *Slave Religion*, 103–9, 122–24; Noll, *History*, 161); for Pauline readings both for and against slavery, see, e.g., Callahan, "Witness"; Horsley, "Paul and Slavery"; Martin, "Language"; Patterson, "Slavery"; Smith, "Back Together"; Still, "Slavery." Some Christians in the patristic era simply advised benevolent treatment of slaves (Longenecker, *Social Ethics*, 63–64, noting, e.g., Augustine; Rupprecht, "Attitudes," 261–77, esp. 277), but others did argue for their emancipation (Longenecker, *Social Ethics*, 65, citing Chrys. *Hom.* 1 *Cor.* 40, on 1 *Cor.* 10; Balch, "Families," 272, citing Greg. Nyssa *Homilies on Ecclesiastes* 4, on 2:7; Latourette, *First Five Centuries*, 262–63, citing *Apost. Const.* 4.9). Some sold themselves into slavery to help others (1 *Clem.* 55.2); on later Christian abolitionism, see, e.g., Keener and Usry, *Faith*, 33–41, and sources cited there.

862. Jeffers, *World*, 235.

863. Arrian *Ind.* 10.8, on reports of India.

864. Cf. Jeffers, *World*, 235. Those with such skills generally retained a more secure economic situation as their patron's slaves or freedpersons.

Slaves themselves might purchase slaves,⁸⁶⁵ as might freedpersons;⁸⁶⁶ slaves often sought their own freedom but not the wholesale end of slavery. Someone might promise freedom to slaves to maintain his power,⁸⁶⁷ but again, slaves' incentive lay in their own liberation, not in the abolition of the institution of slavery per se. Likewise, a massive slave revolt might free and enlist other slaves to overthrow their Roman oppressors, but this was to guarantee their movement's victory in the war, not to abolish slavery universally or permanently.⁸⁶⁸ Those who spoke of a totally egalitarian world treated it as unattainable and utopian.⁸⁶⁹

Slaves had revolted on various occasions during the republic,⁸⁷⁰ especially because of severe abuses,⁸⁷¹ and the memory helped shape Roman fears. Spartacus the gladiator led a particularly notorious slave revolt,⁸⁷² joined also by the Gauls.⁸⁷³ When Cicero wants to revile Mark Antony, he calls him "an assassin, a brigand, a Spartacus."⁸⁷⁴ Likewise, Herdonius summoned slaves in Rome to freedom,⁸⁷⁵ but he was killed.⁸⁷⁶ When slaves sought to revolt by setting fire to homes and then seizing the Capitol,⁸⁷⁷ it was said that Jupiter punished their evil plans, whereas the slaves who betrayed (and so foiled) the plot were rewarded with money and freedom.⁸⁷⁸ Roman law mandated the death of any slaves found guilty of plotting revolt.⁸⁷⁹

Ultimately, none of the Roman slave wars was successful in freeing the slaves.⁸⁸⁰ Abolition by force came closer to destroying the system than anything else, but failed; slavery's economic inconsequence had more to do with its decline in late antiquity.⁸⁸¹

865. E.g., Plut. *M. Cato* 21.7; Martin, *Slavery*, 42. Occasionally this happened even in the American South (Koger, *Slaveowners*).

866. E.g., *ILS* 7503 (Sherk, *Empire*, §173, p. 229). Occasionally this happened even in the American South (Raboteau, *Slave Religion*, 141).

867. Cic. *Att.* 4.3. Revolting soldiers might also liberate those in slave prisons to join them (Appian *Hist. rom.* 3.1.1). Earlier a Spartan allegedly conspired with the Helots to revolt, so that they could gain freedom and he could gain power (Thucyd. 1.132.4).

868. Bradley, *Slaves*, 145.

869. Harrill, "Paul and Slavery," 594 (citing Lucian *Hermot.* 24).

870. E.g., Diod. Sic. 34/35.2.5–23 (the leader rotting in prison, as he was said to deserve, 34/35.2.22–23); 34/35.2.24–48; 36.4.1–36.11.3 (lasting four years and culminating in the death of the slave rebels, 36.11.3); Livy 32.26.4–8; 39.29.8; Val. Max. 4.3.10; 6.9.8 (along with pirates). During the empire, see Tac. *Ann.* 3.43; 4.24. On ancient slave revolts generally, see now especially Urbainczyk, *Revolts*. Other forms of slave resistance were probably more common than our sources betray, if we may reason from more recent slavery analogies (Callahan and Horsley, "Resistance").

871. On the abuses, see, e.g., Diod. Sic. 34/35.2.32–33, 37 (an exceptionally kind slaveholder receiving mercy from them in 34/35.2.39). This probably constituted a factor in more humane treatment during the empire.

872. Vell. Patern. 2.30.5; Appian *Bell. civ.* 1.14.116–20 (joined by slaves, 1.14.117; death of Spartacus, 1.14.120). Spartacus was skillful and strategic (Fronto *Ad verum imp.* 2.1.17).

873. Appian *Hist. rom.* 12.16.109. Slave revolts in the empire benefited Rome's enemies; thus Jugurtha tried to induce Rome's slaves to revolt (Sallust *Jug.* 66.1).

874. Cic. *Phil.* 4.6.15 (LCL, 15a:249).

875. Livy 3.15.9.

876. Livy 3.18.10.

877. Livy 4.45.1.

878. Livy 4.45.2. Other slaves betraying slave revolts (and hence foiling them, 32.26.9) were also rewarded with money and freedom (32.26.14).

879. Cic. *Verr.* 2.5.5.10.

880. Finley, *Slavery*, 114–15, contending that only Toussaint's later revolt in Haiti was successful. There have, however, been other successful large-scale slave revolts in history (e.g., the Mamelukes in Egypt; African slaves in the Baghdad caliphate's salt mines; Lewis, *Race and Slavery*, 56–57).

881. So Finley, *Slavery*, 123–49, downplaying ideological factors such as Christian and Stoic teaching. His economic evidence appears ambiguous to me (he himself says that more work needs to be done); it is possible that Christian and Stoic teaching may have contributed to a climate that limited abuses of slavery and hence helped make it less profitable, as other factors had reduced its severity in the early empire (cf. Jeffers, *World*, 235–36).

As noted above, slaves' interest was in their own freedom, not in the institution itself; this was the objective of the slave wars as well.⁸⁸²

20. Escaped Slaves

Virtually no one, including the slaves themselves, sought to free all slaves, but individual slaves sought freedom (see comment on Acts 6:9), and not always through legally accepted channels. Everyone recognized that all other factors being equal, the state of freedom was preferable to being a slave;⁸⁸³ thus, not surprisingly, some slaves fled their captivity.⁸⁸⁴ Slaves might flee because of slaveholders' cruelty or other reasons.⁸⁸⁵ Slaveholders generally despised them.⁸⁸⁶

Catching runaway slaves became a familiar topic, even in jests.⁸⁸⁷ Their names were announced publicly to aid their capture,⁸⁸⁸ and members of the slaveholding class would write letters and supply other help to enable a peer to recover a runaway slave.⁸⁸⁹ During the empire, professional slave catchers checked inns, slave dealers, and elsewhere;⁸⁹⁰ at least in a later period, the government might participate in seeking the capture of runaways.⁸⁹¹ Some ancients believed that vestal virgins had the power to magically detain runaway slaves;⁸⁹² some people may have also invoked curses against runaway slaves.⁸⁹³

In one story, Diogenes the Cynic reproves a man looking for his runaway slave; since the man now considers the slave a bad slave, why would he be pursuing the slave to obtain him back?⁸⁹⁴ The penalty for dealing in fugitive slaves, a fairly minor crime, remained a fine.⁸⁹⁵ The penalties for runaway slaves depended on the slaveholder,⁸⁹⁶ but it was generally in the slaveholder's interests not to render the slave unfit for further service. The slaveholder suffered loss, in any case; sales contracts often addressed a slave's practice of running away, and apprehended runaways sold for lower prices.⁸⁹⁷

882. The nearest possible exception of which I am currently aware may appear in Dio Cass. 77.10.7: escaped slaves desiring to stop brigandage should liberate their slaves (Toner, *Culture*, 172).

883. E.g., Xen. *Symp.* 4.29.

884. See, e.g., Bradley, *Slaves*, 44.

885. Llewelyn, *Documents*, 8:36, §3.

886. Cic. *Deiot.* 1.3.

887. Lucian *Phil. Sale* 27. Finley, *Slavery*, 111, also notes that the topic was frequent in ancient literature.

888. Dio Chrys. *Or.* 66.2.

889. Cic. *Quint. fratr.* 1.2.4.14; Plut. *Alex.* 42.1.

890. Finley, *Slavery*, 112.

891. P.Oxy. 51.3616 (probably third century C.E.; Llewelyn, *Documents*, 8:9–46, §3); P.Oxy. 5.3617 (third century C.E.). Apparently, extradition of runaway slaves is practiced already in Livy 41.23.1–5. Earlier, in the Ptolemaic period, see, e.g., *UPZ* 1.121 (= P.Paris 10); but while officials posted notices, the owner probably had to track down runaways except when the officials might wish to grant a favor to a prominent owner (Llewelyn, *Documents*, 8:19–26, §3). Also, even in Roman Egypt (8:26–36, §3; P.Oxy. 12.1422; P.Panop. Beatty 1.149–52), when the state was involved in apprehending slaves (*Documents*, 8:26–31), it was probably usually unsuccessful, as owners usually acted on their own (8:32–34).

892. Pliny E. *N.H.* 28.3.13.

893. Possibly SB 14.12184, in Llewelyn, *Documents*, 8:4–8, §2.

894. Dio Chrys. *Or.* 10.2–5.

895. Robinson, *Criminal Law*, 34. Stealing a slave counted as theft rather than the harsher offense of kidnapping (32). It was illegal to encourage a slave to run away or to harbor a runaway (Llewelyn, *Documents*, 6:56, §7).

896. Xen. *Cyr.* 1.4.13, presumably reflecting one of the more benevolent views of his era, has an escaped slave put in chains to work; but if the slave returns willingly, he is beaten to teach him a lesson and then treated as before. Slaves suspected of seeking to escape were sometimes chained (Cary and Haarhoff, *Life*, 131; Finley, *Slavery*, 111).

897. Llewelyn, *Documents*, 6:57, §7, citing P.Turner 22. The cost of finding a slave could also be substantial (*Documents*, 6:57, §7, citing P.Cair.Zen. 59015 verso, line 5).

Nevertheless, slaves caught trying to escape to barbarian peoples were dealt with harshly; they might have a foot amputated or be consigned to the mines.⁸⁹⁸ Some scholars estimate that fewer than half of runaways were ever apprehended.⁸⁹⁹

Some slaves apparently stole money to aid in their escape, and unaccustomed to handling money, some were thought to spend it lavishly.⁹⁰⁰ A runaway slave meeting a friend of the slaveholder in another city might pretend to have been freed; if the ruse failed, the slave would be in serious trouble.⁹⁰¹ Some temples, like that of the Ephesian Artemis (see comment on Acts 19:29), provided refuge even to escaped slaves.⁹⁰² Biblical law mandated giving refuge to an escaped slave (Deut 23:15–16),⁹⁰³ but Josephus brings it into line with Roman law instead, urging that runaways be punished even if the masters are cruel (*War* 3.373).⁹⁰⁴

Trusted slaves in higher positions were given relative freedom and often traveled on their slaveholders' business.⁹⁰⁵ Such slaves had little incentive to become hunted refugees, but some did occasionally flee. Flight was rare enough that it probably proves irrelevant to the slaves mentioned in Acts.

21. Judean Slavery

Much of our evidence above derives from Roman or sometimes Greek slavery. Although this provides a broader context in which to read urban Mediterranean slave customs, it does not give us the particulars of this case. Rhoda was a household slave working for a woman; this narrows the range of abuses that she would have likely faced.⁹⁰⁶ Additionally, the household was Jewish, further constricting the possibilities.⁹⁰⁷ Catherine Hezser notes the hardships of slaves but also contends that for most urban domestic slaves (the majority of Judean slaves), “in a number of respects the master-slave relationship resembled the wife-husband, child-father, and student-teacher relationships,” taking note of ties of affection.⁹⁰⁸ Slave girls sometimes became their mistresses' confidantes.⁹⁰⁹

Judea had never used agrarian slaves on a large scale,⁹¹⁰ but a few slaves⁹¹¹ were em-

898. Robinson, *Criminal Law*, 35. A runaway slave might even face death if working for Rome's enemies (Polyb. 1.69.4–5). Occasionally a runaway might prefer suicide to recapture (Barrow, *Slavery*, 55).

899. Toner, *Culture*, 49, although his estimates are somewhat precariously extrapolated from oracular responses.

900. Char. *Chaer.* 4.5.5.

901. Cic. *Quint. frat.* 1.2.4.14.

902. Cic. *Verr.* 2.1.33.85.

903. In contrast to ancient Near Eastern collections (Eshn. 49–50; Hamm. 15–16).

904. Jewish sources also warned that a slave left too idle might acquire unhelpful ideas of freedom (Sir 33:26).

905. E.g., Cic. *Fam.* 13.45.1; Stambaugh and Balch, *Environment*, 40, 113; Stambaugh, *City*, 149.

906. Cf. Judith freeing her maid in Jdt 16:23 (and their earlier, sometimes dangerous, activity together in 8:10, 33; 10:2, 5, 10, 17; 12:15, 19; 13:3, 9). On possible bonding at times between persecuted Christians who were women slaveholders and women slaves in the same situation, cf. Osiek and MacDonald, *Place*, 153–54 (noting accounts in Euseb. *H.E.* 5.1.17 and *Acts of Perpetua and Felicitas* ch. 20).

907. On Palestinian Jewish household slavery, see esp. Hezser, “Impact”; idem, *Slavery*, 123–48.

908. Hezser, “Impact,” 375, noting that “mutual ties of dependency . . . counteracted the basic powerlessness of slaves.”

909. *Ibid.*, 391.

910. Judeans were, however, well aware of Gentile exploitation of large-scale slavery for farms, mines, etc. (see Wright, “*Ebed/Doulos*”).

911. Usually between one and four (Goodman, *State*, 37, cites *m. Ketub.* 5:5); cf. Lightfoot, *Colossians*, 320; Bailey, *Peasant Eyes*, 114–15. The Talmud presupposes at least one slave per family (Stern, “Aspects,” 627), but this halakah is from the perspective of a more privileged class than peasants. The most powerful priestly families had large numbers of slaves (e.g., John 18:18; Jos. *Ant.* 20.181, 206–7), but these families constituted a small minority.

ployed in households⁹¹² for both field work⁹¹³ and domestic chores.⁹¹⁴ This setting brought slaves and slaveholders into close contact, and there is little evidence that relations were strained or threatening in the manner often depicted in elite Roman households.⁹¹⁵

Slaves were, however, sometimes susceptible to beatings (though the evidence from this period is not as abundant as in Gentile households),⁹¹⁶ as were children.⁹¹⁷ Many Jews also looked down on them, in a manner analogous to views about them among Gentiles;⁹¹⁸ rabbis who formulated law viewed them as property, again like Roman jurists.⁹¹⁹ Slaves were “dangerous, greedy, dishonest, lazy”;⁹²⁰ they were associated with theft,⁹²¹ ought not be believed,⁹²² and were arrogant.⁹²³

Conversely, one should not mistreat good servants but should love them as oneself and ultimately grant them liberty.⁹²⁴ One should even serve the servant, in a sense,⁹²⁵ and treat the servant as oneself, in a sense.⁹²⁶ Many Jewish sources insist on treating slaves kindly;⁹²⁷ halakah reflects some ambivalence but appeals to a higher ideal than some current practices.⁹²⁸

Individuals may have chosen whether to follow the former, harsher disciplinary approach or the latter, more benevolent approach. On the whole, Jewish law encouraged the more benevolent approach, at least toward Jewish slaves,⁹²⁹ one later saying was that whoever buys a Jewish slave buys a master.⁹³⁰ Following biblical law, rabbis

912. Goodman, *State*, 37 (citing, e.g., *Did.* 4.10; *m. B. Meši'a* 7:6). Most slaves with Jewish holders were domestic slaves (Hezser, “Impact,” 375; González Echegaray, “Esclavos”).

913. Goodman, *State*, 37, citing *Sipre Deut.* 308, p. 74; Luke 17:7.

914. Goodman, *State*, 37, citing Luke 17:7; *Md Rashbi Bo* p. 38, 11.12–13. Rabbinic sources are later, but they seem to have fairly close parallels in Philo (Belkin, *Philo*, 89–103, esp. 89–97). Fiensy, “Composition,” 224, argues that most slaves in Jerusalem did domestic work in wealthy households.

915. Goodman, *State*, 38. Josephus reports that a thief who could not repay what he stole would become slave to the victim (Cohen, *Law*, 163); such a relationship might not begin with much trust. Jews could be enslaved for theft or debt (Fiensy, “Composition,” 224).

916. E.g., Prov 29:19; Sir 33:25; 42:5; Philo *Spec. Laws* 3.142; *Deut. Rab.* 3:2; cf. Moore, *Judaism*, 2:137; Thoma, “Death Penalty”; perhaps Philo *Alleg. Interp.* 3.201; *Cher.* 80–81.

917. Prov 13:24; 23:13; 29:15; Sir 30:13; 42:5; cf. *Ahiq.* 2.23; Syriac *Ahiq.* 2.22; Ethiopian *Ahiq.* 10; Elephantine *Ahiq.* 4.14; Philo *Worse* 49; *Jos.* 74; *Spec. Laws* 2.232; by teachers, *Worse* 145.

918. See, e.g., *Sipre Num.* 39.6.1; *b. Menah.* 43b–44a (though, on the other side, see *Exod. Rab.* 21 in Montefiore, “Spirit of Judaism,” 76); see esp. Hezser, “Impact,” 391–92, 397–98. In Tobit, Susanna, and Judith, slave women function more as stage props than as sentient characters (see Glancy, “Dialectic,” also noting some abuse); the elite expected their characters to have servants, and even read this into some biblical narratives (e.g., 4QEx^b, adding to Exod 2:3b; see Rofé, “Slave-Girl”).

919. E.g., *y. Ber.* 2:7.

920. Hezser, “Impact,” 391. She compares *m. 'Ab.* 2:7 with its probable source in a Roman proverb: “One had as many enemies as one had slaves” (Sextus Pompeius Festus *De verborum significatu* 314L; Sen. *Y. Ep.* 47.5; Macrobius *Sat.* 1.11.13). Gentile comedy’s “image of the clever, scheming slave” appears in *Test. Gad* 4:4; *Jos. Ant.* 17.55–56 (Hezser, “Impact,” 397). Slaves could be bribed financially to work against masters (*Jos. Ant.* 17.55–56, 141; Hezser, “Impact,” 397–98).

921. Hezser, “Impact,” 392, citing *t. B. Qam.* 11:4. *Gen. Rab.* 86:3 includes theft, unchastity, and other details.

922. Hezser, “Impact,” 392, citing *y. Hor.* 3:5, 48b.

923. Hezser, “Impact,” 392, citing *y. Qidd.* 4:14, 66b.

924. Sir 7:18, 20–21; 10:25; cf. *Jdt* 16:23. Similar advice is given for animals (Sir 7:22) and children (7:23). For Akiba’s views for human equality for slaves, see Finkelstein, *Akiba*, 191–94.

925. Sir 10:25; cf. Eph 6:9 (in the context of 6:5).

926. Sir 33:31.

927. Hezser, “Impact,” 393, cites Ps.-Phoc. 223–27; Sir 7:20–21; Philo *Spec. Laws* 2.83; *Sipra Behar* pq. 7:2, 80a. Many Roman sources said the same (“Impact,” 392).

928. Hezser, “Impact,” 394, notes that masters were not considered obligated to feed their slaves (*m. Git.* 1:6) but were to do so nonetheless (*y. Ketub.* 5:5, 30a). Masters apparently often gave slaves unnecessary work, but *Sipra Behar par.* 6.2–3 argues against doing this.

929. See Jeremias, *Jerusalem*, 312ff.

930. *Ibid.*, 316, cites *b. Qidd.* 20a; 22a (and interprets this saying in light of restrictions on abuse); also Bonsirven, *Judaism*, 147. Add to these *b. 'Arak.* 30b.

also forbade killing or maiming Gentile slaves.⁹³¹ Rabbis also apparently recognized the equality of all before God.⁹³²

Some scholars argue that there were no Jewish female servants in this period, only Gentiles;⁹³³ although there were some (a minority) of Jewish slaves in this period,⁹³⁴ Gentile slaves were apparently common among the Jewish aristocrats.⁹³⁵ Yet some sources suggest that Gentile slaves had to be circumcised (if male) and converted to Judaism;⁹³⁶ because this is a natural reading of the law (Gen 17:12–13, 23, 27; Exod 12:44), it was probably widely followed regardless of sectarian differences. Since some later rabbis concluded that a slave converting to Judaism had to be freed, rabbis eventually found a way around this emancipation.⁹³⁷ It is doubtful, however, that most Judean slaveholders in this period exercised such scruples. Strict pietists opposed the sale of slaves to Gentiles once they had been brought into the covenant of Israel.⁹³⁸ Luke's audience would not have known the scruples of Judean practice, and if Rhoda was a Gentile at this point in the narrative, Luke might well have found this datum useful to mention. If, however, she was a proselyte, Luke might well not mention it, since his narrative has already moved beyond the significance of proselytes (cf. Acts 6:5) to Gentiles.

Sexual harassment was forbidden;⁹³⁹ Josephus disapproves also of marrying slaves, though he does not portray it as forbidden.⁹⁴⁰ That harassment sometimes happened is likely,⁹⁴¹ but it would have happened less frequently than in Greek and Roman settings, where social restrictions and stigmas were much less.

One Judean sect that held no slaves was the Essenes.⁹⁴² Because the Essenes avoided private property altogether (see discussion at Acts 2:44–45),⁹⁴³ they could not have held slaves as property unless they were communally owned. Josephus also claims that the Essenes avoided slaveholding because it constituted a temptation to act unjustly.⁹⁴⁴ Josephus and Philo present the Essenes as a radical utopian (or anti-utopian) philosophic sect (see comment on Acts 2:44–45); the Essenes' approach would have been extremely rare, and Josephus's estimates of four thousand members altogether

931. Bonsirven, *Judaism*, 148, notes that the penalty for killing a slave was death (*Mek.* on Exod 21:23; cf. Exod 21:20) and that a slave, if physically damaged, had to be freed (Exod 21:26–27; *b. Qidd.* 24a, bar.); cf. Stern, "Aspects," 629. This differs from the ancient Near Eastern setting of Israel's laws (Hamm. 199, 213–14, 219–20) and from Gentile customs noted above. On the whole, though, Jewish slaveholders' Gentile slaves were in a much worse social position than Jewish ones (Jeremias, *Jerusalem*, 346–51).

932. *T. Bik.* 2:10. Certainly God was the master of all (*Test. Jos.* 1:5; *Lev. Rab.* 6:3; *Num. Rab.* 13:2). But "equality" was probably expressed primarily in benevolent treatment (cf. Philo *Decal.* 167).

933. Safrai, "Home," 748. When Romans enslaved Jews, Roman Jews apparently bought their freedom (Stambaugh, *City*, 95, citing Philo *Embassy* 155). We read of Jewish slaves in Ptolemaic Egypt (probably *CPJ* 1:125–27, §4, though some Egyptians were also circumcised).

934. See Goodman, *State*, 38.

935. Jeremias, *Jerusalem*, 345.

936. Bonsirven, *Judaism*, 148, citing *b. Yebam.* 47b; Falk, "Law," 509; Stern, "Aspects," 628. In later sources, they were quickly and forcibly converted to prevent them from claiming emancipation (Bamberger, *Proselytism*, 127; Buchanan, *Consequences*, 206). We do read of scrupulous slaves in scrupulous households (especially reported of Gamaliel's household; *Pesiq. Rab Kah.* 12:15; *y. Sukkah* 2:1, §3).

937. Cf. *b. Yebam.* 46ab; cf. further Bamberger, *Proselytism*, 127; Buchanan, *Consequences*, 206.

938. CD XII, 10–11; 4Q159 2–4 1–3 (following Lev 25:47–55).

939. Safrai, "Home," 748–49; cf. Hezser, "Impact," 417, allowing more variation.

940. *Jos. Ant.* 4.244. Rabbis believed that Gentile slaveholders paired slaves at the slaveholder's will (*Pesiq. Rab Kah.* 2:4).

941. Cf. *m. 'Ab.* 2:7; *Pesiq. Rab Kah.* 20:6; Safrai, "Home," 749; Hezser, "Impact," 375.

942. Philo *Good Person* 78. 4Q416 2 (+4Q417) I, 17, probably from the Essenes, denies becoming servants by sale but affirms all members' serving the overseers.

943. Cf. Philo *Good Person* 77, 86; *Hypoth.* 11.4–5.

944. *Jos. Ant.* 18.21.

(including those living in cities) makes them only a small portion of Judaism. Luke's portrayal of the Christian community in a major summary (2:44–45) fits Essene ideals, but passages such as 12:12–13 show that the ideals were not being applied in this period as radically as 2:44–45 could be construed.

22. Slavery and a House Church

Whereas some associations admitted women and slaves,⁹⁴⁵ others were limited to free men.⁹⁴⁶ Rhoda, however, appears a trusted part of the house congregation, requiring no supervision to guarantee that she will not betray the meeting. If early Christian soteriology (such as articulated in, e.g., Gal 3:28) eventually affected Jewish-Gentile relations, there is no reason that it could not have done the same with slave and free structures as well.⁹⁴⁷ At least in later Christianity, slaves' status in the external society did not dictate their status in God's church; slaves could rise to the office of bishop.⁹⁴⁸ Less than half a century after Luke wrote Acts, we hear of slave women as possibly "deacons" of some sort in churches in the interior of Asia Minor.⁹⁴⁹

Luke is reporting, not commenting on, the morality of slaveholding. His portrayal of Rhoda is, however, sympathetic, especially when she is viewed alongside figures performing parallel narrative functions in Luke-Acts. Luke's ideal in Acts 2:44–45 and 4:32–35 (along with its closest analogues in Essene practice and perhaps Greek utopias) militates against slavery, but even the style of home implied in 12:13 suggests that the Jerusalem church did not fully implement the ideal (at least in the radical sense of Luke 3:11; 14:33).

The Pauline Christian movement of which Luke was a part was more radical on slaveholding than most of the surrounding culture, apparently applying the Christian principle of mutual submission (Eph 5:21) even to slaves and slaveholders (6:9).⁹⁵⁰ Although the only explicit, concrete expression of this position would have seemed more mainstream among moralists, such voices were clearly among the more progressive of the culture. Nevertheless, slaveholding remained an integral part of the culture, and protesting the institution was not a sufficiently prominent category among cultural options to have invited direct comment in texts not addressing that point, much to our appropriate post-nineteenth-century dismay. Since slaves provided a model for the Christian life in general (esp. Luke 22:26),⁹⁵¹ Rhoda's role could offer a positive model. On Luke's positive portrayal of Rhoda, see comment on Acts 12:14.

945. E.g., the cultic association in Gager, "Class," 102; cf. also some cults (Mylonas, *Eleusis*, 282; Klauck, *Context*, 66; McRay, *Archaeology*, 279; Evans, "Sanctuaries") and philosophic sects (Smith, *Symposium*, 58).

946. Klauck, *Context*, 47.

947. Cf. Lowe, "Rethinking"; less dramatically, Dahl, *Studies*, 16; Fee, *Corinthians*, 81. This would not necessarily entail expectations of abolition among ancient readers (Lincoln, *Ephesians*, 418).

948. Latourette, *First Five Centuries*, 262–63.

949. Pliny *Ep.* 10.96.8. The meaning of *ministra* here may be debated (Harrill, "Functionaries," makes a case for slave cultic functionaries), but it may well be, in Latin, the feminine equivalent of διάκονος, which probably had an official meaning by this period (1 *Clem.* 42.4–5; *Did.* 15.1; *Poly. Phil.* 5.2–3; *Ign. Eph.* 2.1; *Magn.* 2.1; 6.1; 13.1; *Trall.* 2.3; 3.1; 7.2; *Philad.* 4.1; 7.1; 10.1–2; 11.1; *Smyrn.* 8.1; 10.1; 12.2; *Pol.* 6.1), perhaps somewhat developed beyond the usage in Phil 1:1; 1 Tim 3:8, 12 (but not necessarily as far as the patristic Greek use of the feminine article with the noun).

950. See, e.g., the argument in Keener, *Paul*, 204–7; Keener and Usry, *Faith*, 37–38, and sources cited there. Not everyone would agree with this understanding; for a survey of current approaches, see Byron, "Paul and Background." Although Paul's words go far beyond most of his contemporaries, they did not force on his hearers the issue of emancipation the way the Essene approach apparently would have (cf. the non-Essene approach in Sir 33:31).

951. Also, for serving God or Christ, e.g., Luke 1:2; 12:37–38, 42–47; 14:17, 21–23; 16:13; 17:7–10; 19:13–22; 20:10–11; as a title for Israel, Luke 1:54, 74; for David, Luke 1:69; Acts 4:25; for Jesus, Acts 3:13, 26; 4:27, 30. (I draw here on several Greek terms that usually apply to servants.)

23. Conclusions

Some of the abuses reported above provide a relevant range of potential nuances that Luke's audience may have associated with the status of the slave woman in Acts 16:16–19, especially after she is exorcised. Luke's audience would not, however, likely assume such abuses for Rhoda. She belonged to a female-headed Judean Christian home; she appears as a trusted part of the congregation. Moralists advised positive treatment of servants, and Luke's audience would more likely infer that an essentially positive figure such as Mary probably complied with such advice (the gathered believers are, after all, devout enough to take risks to meet and pray). Some of Luke's audience may have even been familiar with the traditional Jewish admonition to treat one's only servant as a family member (Sir 33:31).

This commentary's examination of the narrative will both support this partly favorable approach to Rhoda and also qualify it. Rhoda is not only a trusted member of the congregation; she appears as a positive character (providing some comic relief, but no more than Peter himself, and being more reliable than the others in the prayer meeting). It is possible that those in the prayer meeting briefly express some conventional, negative stereotypes of talkative or gullible servants; but if so, Luke subverts much of that stereotype.

Unfortunately, there is no call to slavery's abolition, a question that was probably barely ever framed in these terms in that era; even if Luke favored slavery's abolition (a perspective his ideal in Acts 2:44–45 renders at least not implausible, and perhaps very plausible), he has no reason to raise the issue in this narrative. There is no clearly implied condemnation of Mary either for having a substantial home (12:12–13) or for holding a servant, though Luke's ideals elsewhere militate against these practices being a norm (cf. Luke 12:33; 14:33; Acts 2:44–45; 4:32–35), and he may well have wished more of the church to come up to those standards. Luke writes history as well as theology, and the usefulness of the scene for its ironies about prayer, as well as the opportunity to portray Rhoda favorably (as a contrast to Acts 16:16 and Luke 22:56), would likely outweigh any hesitation to include the outer gate and servant. That is, we should not infer Luke's theology of slavery from an incidental historical datum that is not his focus.

But if we frame the questions less anachronistically, in terms of expectations of Luke's contemporaries, had Luke chosen to address issues of justice, he might have preferred to start with the oppression of the rural poor or the poor in Jerusalem's Lower City (cf. Luke 4:18; 6:20; 7:22; 14:13, 21; 16:22–23; 18:22; 19:8; Acts 6:1; 9:39). Rhoda may well hold a place in the socioeconomic spectrum higher than that of most Galilean peasants who followed Jesus in the Gospel.⁹⁵² Her status was not the same as that of slaves, including household slaves, in the Americas;⁹⁵³ there is value in modern readers comparing the text with later historical situations, but this is done most fruitfully when we understand also the differences. Indeed, readers implicitly engage in such comparisons, so engaging them in a nuanced way is important, especially on the level of human experience. Simply reading ancient social institutions through the prism of modern ones, however, without some sensitivity to differences, is not doing history.⁹⁵⁴

952. This is not to portray her situation as positive or ideal but to challenge the inconsistency of the modern critique sometimes leveled against ancient writers' relative silence on issues that are not their focus. Modern critics are often selective in our own critique of, and hence ourselves silent on large areas of, ancient injustice.

953. Indeed, to read the text through that lens is to embrace the slaveholders' rather than the abolitionists' hermeneutic (see, e.g., Usry and Keener, *Religion*, 101–10). For one summary of the difference between the two forms of slavery, see Dodd, *Problem*, 85–91.

954. I complain here about anachronistic readings that claim to represent a "Lukan" or "early Christian" perspective, not genuine historical description of the text's actual reception history (or even claims about its

Rhoda's role in Luke-Acts is, however, worthy of consideration as that of the only Christian slave named there, with whom some members of Luke's real audience may have identified. Her uniqueness may also reveal something about the early church, Luke's perspectives, or both. Mary is the only Christian slaveholder in Acts (we exclude Cornelius in Acts 10:7, since he has not yet become part of the movement); none of the primary protagonists in Luke-Acts (Jesus or the apostles) holds slaves. Most, in fact, follow a lifestyle that values people radically above possessions. This is also a lifestyle that demands few possessions and hence in any case could not accommodate slavery (which in its various forms treats people in varying degrees as property), whatever their beliefs about that institution per se. We therefore cannot read too much about Luke's views on the institution of slavery into this example; Luke has limited historical examples from which to choose.

VII. ANNOUNCING INSTEAD OF OPENING (12:14)

Whereas Peter's guards in 12:6, 10 failed to keep him in, this well-meaning doorkeeper inadvertently keeps Peter out.⁹⁵⁵ And whereas the iron gate in 12:10 opened "by itself," here the gate of the house where fellow Christians pray for his safety remains barred to him.⁹⁵⁶

Although Luke is generally positive toward women, some scholars note that ancient comedies often portray young (or old) women, and especially slave girls, as silly.⁹⁵⁷ The previously tragic texture of the narrative (12:2) becomes akin to comedy, with bumbling heroes rescued despite themselves.⁹⁵⁸ Despite comic elements, however, Rhoda is the most positive character in the house; she fulfills the role of Jesus's female proclaimers in Luke 24:10–12 whereas her skeptical hearers fill the role of the intransigent male disciples of that passage.⁹⁵⁹ Her "announcing" good news resembles the activity of the women in Luke 24:9⁹⁶⁰ (although Luke uses ἀπαγγέλλω frequently, about twenty-six times, the other parallels with Luke 24 imply that the term ἀπαγγέλλω here is a parallel as well). Given dominant male attitudes toward the testimony of women⁹⁶¹ (as well as toward that of slaves,

potential reception in various settings). For nineteenth-century arguments for and against slavery, the former often involving extrapolations of principle and the latter a range of prooftexted examples, see, e.g., Keener and Usry, *Faith*, 36–41; Usry and Keener, *Religion*, 102–8.

955. Cf. similarly Pervo, *Profit*, 63.

956. With also Spencer, *Acts*, 126; Gaventa, *Acts*, 185; Chambers, "Knock," 96. This contrast provides not only humor but theology, suggesting that it is not God's power to work but the church's faith that is limited. This idea matches the progress of the gospel in Acts, where God must persuade the church to embrace the Gentile mission; in some cases, God has things already set up (e.g., Acts 8:30). The gate in 12:13–14 may serve an emphatic role (Parsons, *Acts*, 176, suggests antistrophe in its strategic repetition).

957. See, e.g., Cic. *Off.* 2.16.55–57 (including women alongside children and slaves). The associations were common with old women in particular (not relevant to a παιδίσκη); see Pliny *Ep.* 7.24.5 (idleness); Philost. *Vit. soph.* 1.25.541 (talkative); Rosivach, "Anus" (overimbibing alcohol, talkative, and superstitious); for superstitions associated with older women, cf. Cic. *Nat. d.* 1.20.55; Philost. *Vit. Apoll.* 5.14; Iambl. *V.P.* 32.227; 1 Tim 4:7 (on which see sources in Lock, *Pastoral Epistles*, 50–51; esp. Dibelius and Conzelmann, *Pastoral Epistles*, 68).

958. Pervo, *Profit*, 63, also mentions that Rhoda "is like a figure from New Comedy."

959. With, e.g., Spencer, *Acts*, 128; Johnson, *Acts*, 213. Ancient interpreters also discerned the parallel with the unbelieving women of Luke 24; see Arator *Acts* 1 (Schrader, 55–56; Martin, *Acts*, 155); cf. also Chrys. *Hom. Acts* 26 (Martin, *Acts*, 155); noting just a woman announcer in both cases, Bede *Comm. Acts* 12.13 (L. Martin, 113).

960. Johnson, *Acts*, 213.

961. See, e.g., Jos. *Ant.* 4.219; Plut. *Publ.* 8.4; Justin. *Inst.* 2.10.6; *Sipra VDDeho. pq.* 7.45.1.1.

above), Luke's citation of women's testimony in both places subverts expectations and challenges convention.⁹⁶²

J. A. Harrill develops more fully the doubt that Luke's portrayal of Rhoda is favorable, arguing that Rhoda provides comic relief by fitting the convention of the *servus currens*.⁹⁶³ Rhoda blunders like the typical "running slave" "of New and Roman Comedy."⁹⁶⁴ Such servants imagined falsehoods and argued with superiors; here, the argument goes, Rhoda foolishly runs inside and leaves Peter waiting at the gate. Though appreciating Harrill's scholarship, not all scholars have, however, followed his line of interpretation.⁹⁶⁵

Although the account of Rhoda offers comic relief,⁹⁶⁶ it is less at her expense than at that of the other characters: Peter thinks he sees a vision (Acts 12:9), and Rhoda's critics think that she is hallucinating (12:15), whereas she is the only character who accurately perceives the truth. As Kathy Chambers notes, Rhoda "recognizes not fiction but fact: Peter really is at the door. She does not 'lecture' her social betters; to the contrary, they silence her" and appear foolish to Luke's informed audience. Their failure to listen "actually serves to enhance her status" for Luke's audience.⁹⁶⁷

Indeed, if Harrill is right about the *servus currens* background here, Luke actually subverts that perspective in his narrative.⁹⁶⁸ In light of the convention, one would anticipate foolish speech, yet she speaks truth.⁹⁶⁹ That is, Rhoda proves a fairly reliable character for Luke's audience; the cliché may function for her hearers within the narrative world, but they are themselves objects of Luke's comedy. Further, Peter's helplessness to gain entrance is comedy partly at Peter's expense; "inability to gain entry to the house is also a comedic convention."⁹⁷⁰ The end of the passage may confirm the joke, because Peter leaves without Luke's ever narrating his entering the house (12:17).⁹⁷¹

Rhoda does not in fact fit the most common slave stereotypes. Slaves could be associated with the insane (cf. 12:15),⁹⁷² but more often moral connotations were attached to their reports. Ancient literature regularly portrays them as flatterers, liars,⁹⁷³ and twisters of the truth to ingratiate themselves with their slaveholders (Char. *Chaer.* 6.5.5). Novels portrayed them as unafraid to lie under oath (Apul.

962. The Gospels' claim that women were witnesses also invited pagan criticism of the Gospels (Cook, *Interpretation*, 57).

963. Harrill, "Dramatic Function," 156; idem, *Slaves*, 64–66; followed by Pervo, *Acts*, 306.

964. Harrill, *Slaves*, 65. Harrill argues (66) that Luke thus uses Rhoda as the butt of a standard joke about slaves that reinforces slave ideology. Price, "Rhoda," 101–3, goes further (conveying, with unsupported assertions, speculations about what stands behind the text), arguing that Luke suppresses Rhoda. But John Chrysostom had a different perspective on why Rhoda runs: "She does what we all would do: she runs in so that she might be the one bringing the good news" (*Hom. Acts* 26 [Martin, *Acts*, 155]).

965. Cf., e.g., Chambers, "Knock," 92–93, 97; Shiell, *Reading Acts*, 181; Weaver, *Epiphany*, 173.

966. Gentile comedy's "image of the clever, scheming slave" appears in *Test. Gad.* 4:4; *Jos. Ant.* 17.55–56 (Hezser, "Impact," 397)—though we should note that these are not the images employed here or in Harrill's thesis. See Shiell, *Reading Acts*, 85–87, for voice inflections indicating humor and wit (including irony). Historians could draw on comic conventions; cf. the admittedly later Ammianus in Rohrbacher, "Digressions," 470.

967. Chambers, "Knock," 92, 97.

968. *Ibid.*, 92, arguing from a liberationist perspective; Shiell, *Reading Acts*, 181–82 (noting that Harrill's stereotype does not fit Luke's portrayal of other women and that Rhoda does not cause problems in the text).

969. Chambers, "Knock," 93.

970. *Ibid.*, 92 (citing Frost, *Exits*, 9, who notes that only a single instance of successful knocking appears in extant Greek comedies).

971. Chambers, "Knock," 93. This may well reflect Luke's abbreviation of irrelevant details, but the story as we have it portrays Peter simply addressing astonished disciples at the opened gate. Peter not entering might reduce their potential liability.

972. Cic. *Acad.* 2.47.144 (but this probably simply designates their marginal status).

973. Char. *Chaer.* 2.10.7; Philost. *Vit. soph.* 1.21.517.

Metam. 10.7), even under torture (10.10). Masters taught them to deceive by the servile behavior for which they rewarded them.⁹⁷⁴ Rhoda's gender and slave status together conspire against her credibility with others in the narrative world; Josephus, perhaps our best extant reflection of what some Hellenists in the Upper City would have thought, warns against trusting women's testimony because of their instability, and that of slaves because they lack virtue (*Ant.* 4.219).⁹⁷⁵ Yet Luke emphasizes that Rhoda brings not deception but truth (and happily, even those gathered for prayer in the narrative do not accuse her of deception). Somewhat less harshly, a slavewoman porter in a Jewish work (possibly later than Acts) disobeys her master Job (*Test. Job* 7:3–6) and confesses that she has done evil (7:8–9).⁹⁷⁶ This work's sympathies lie with Job rather than her, yet it probably depicts even her act of disobedience as motivated by virtue (7:5–6), which in turn reflects favorably on Job's virtue.⁹⁷⁷ In that case, however, the porter acts wrongly, whereas in Acts it is Rhoda and not the others present who speaks truth.

Though Rhoda is a slave, some scholars point out that she does not act like a stereotypical slave.⁹⁷⁸ She, as a member of the Christian community, recognizes Peter (by voice, Acts 12:14) and keeps asserting her claim despite others' skepticism.⁹⁷⁹ In antiquity, probably many household slaves exercised such assertiveness in practice (she was, after all, certain she was right), and this might be the more anticipated (as a generalization) in a house with few servants⁹⁸⁰ and headed by a widow (and Mark himself perhaps not fully grown). Some argue that Luke uses not Harrill's servant caricature but the typical ancient caricature of the "hysterical woman," implied by the other characters' designation of her as "mad."⁹⁸¹ But if Luke uses either such caricature, he inverts them. As noted above, Luke's portrayal is informative especially in light of the way that Rhoda parallels the women at the tomb: she is a true proclaimer of good news who is not believed by more prominent figures in the movement.⁹⁸²

She may also remind readers of the unnamed⁹⁸³ servant girl who recognized Peter in Luke 22:56, also in a wealthy home near the Temple Mount.⁹⁸⁴ Although it was a commonplace that one encountered servants in wealthy homes, these two

974. MacMullen, *Social Relations*, 116 (cf. also Petron. *Sat.* 75–76 [p. 102]).

975. Halakah also linked the status of slaves and women, e.g., in their status as witnesses (*b. Hag.* 4a) or in obligations to perform Torah (*m. Sukkah* 2:8; *m. Hag.* 1:1; Stern, "Aspects," 628–29).

976. My gratitude is due Richard Pervo (personal correspondence, Oct. 3, 2012) for bringing this passage to my attention. The woman porter in 2 Kgdms 4:6 (LXX; the detail does not appear in 2 Sam 4:6 MT) appears somewhat negligent, although the text offers an explanation for her sleepiness (followed by *Jos. Ant.* 7.48); she probably serves as the model also for the woman doorkeeper in *Jos. Asen.* 10:3, as she is also found asleep. For other feminine uses, BDAG lists also *BGU* 1061.10 (14 B.C.E.); P.Ryl. 36.6 (34 C.E.); P.Stras. 24.17.

977. In antiquity (as in this work), the behavior of members of one's household could reflect favorably on the householder.

978. Aristotle claimed that the slave, in his or her role as a slave, could have no friendship with a master because slaves were property (*N.E.* 8.11.6–7, 1161b). Texts concerning slaves' humanity were more nuanced.

979. Reimer, *Women*, 242. Rhoda's full status as member of the Christian community fits what our other sources lead us to expect (Gal 3:28; 1 Cor 12:13; Philemon passim; esp. Eph 6:9; cf. Col 3:11).

980. Although perhaps not often followed, Sir 33:31 advised treating one's only servant as if one's sibling.

981. Weaver, *Epiphany*, 173–74, associating madness with prophetic experience. But ecstasy is only one association of "madness" (see comment on Acts 26:24).

982. Arlandson, *Women*, 195–96; Chambers, "Knock," 92; Shiell, *Reading Acts*, 181–82.

983. Her anonymity is hardly to be blamed on Luke. It is extremely unlikely that pre-Markan tradition would have preserved her name; would Peter have chosen to return and interview her? Even the Gospel that claims a contact known to her (John 18:16) neither names the contact (possibly, though not certainly, the beloved disciple; cf. Collins, *Written*, 42; Wiles, *Gospel*, 9; for different suggestions, see, e.g., Charlesworth, *Disciple*, 336–59; Vicent Cernuda, "Desvaído") nor indicates that the contact necessarily would have known her name.

984. Cf. Johnson, *Acts*, 213 (who also compares the gate here to the ἀύλη in Luke 22:55).

references together compose half of Luke's use of παιδίσκη, and the contrast seems deliberate. In one case, a servant girl accuses Peter to those around her, and he fears arrest for following Christ; in the other, a servant girl announces Peter positively to those around her after the Lord has freed him from prison for following Christ. Just as Luke likes to balance stories about men with stories about women, he here balances a negative story about a female slave with a positive one. Because Rhoda has the higher role than her mistress here, Luke is able to hint at his larger portrayal of good news as transcending class as well as gender (cf. Luke 4:18–19; esp. 1:48, 51–53).⁹⁸⁵ Noble treatment of (parabolic) female (as well as male) slaves excludes abuse (12:45), and later another female slave is delivered (Acts 16:16–18).

Running off and leaving someone standing is not culpable behavior if excused by overwhelming emotion; Luke and his audience knew of the young woman Rebekah's doing just this to Abraham's servant (Gen 24:28–30; cf. 29:12; Exod 2:20). Moreover, Luke makes the emotional excuse explicit: she acts overwhelmed by "joy," exactly as the disciples could not believe their risen Lord because of joy (Luke 24:41)—that is, because it seemed too good to be true.⁹⁸⁶ Peter's deliverance initially seemed to himself too good to be true as well (Acts 12:9).

VIII. NOT BELIEVING HIS DELIVERANCE (12:15)

Although only women are named as present (12:12–13), the masculine plurals (ἱκανοί, 12:12; αὐτοῖς, 12:17; cf. οἱ, 12:15) indicate that at least some men are included.⁹⁸⁷ Women, when meeting together, would have less to fear from the authorities (see comment on Acts 8:3), but they would also be less likely to be out at night alone, at least under normal circumstances.⁹⁸⁸

God's grace often surprised his church in Acts (e.g., 9:26; 10:44; 11:18), and this instance is no exception. The disciples are praying for Peter's release (12:5) but hardly expecting to see him. They presumably did not think Peter already dead when they started praying that night (cf. 12:5).⁹⁸⁹ Why might they have disbelieved that it was Peter? Perhaps it was a matter of expectation: they were praying that Agrippa would show mercy and release Peter, something that would not occur in the middle of the night (forgetting the supernatural nocturnal release of 5:19). Perhaps it was a matter of weak faith, despite their meeting together to pray; since they were so close to the time when the execution was scheduled (12:6), they had simply begun to assume that Peter would meet the same fate as James (12:2) and Stephen (7:57–60). Though faith is the norm, even if as small as a mustard seed (Luke 17:6), lack of it did not always negate the value of prayer (1:13, 20).

985. Arlandson, *Women*, 195–96. Two of the proclaimers in Luke 24:10 are named Mary, but as already noted, this was the most common feminine name in first-century Judea.

986. This represents Luke's defense of them; cf. Luke 22:45, where he uses sorrow the same way. We might compare her "running" with Peter's (Luke 24:12; cf. joyful running in 15:20). Cf. similarly Haenchen, *Acts*, 385n3; esp. Johnson, *Acts*, 213 (comparing emotions preventing proper responses in Longus 2.30; Ach. Tat. 1.3; 2.23). Sudden joy was thought traumatic enough to sometimes bring death (Aul. Gel. 3.15). For a survey of emotions in Acts, see Pauw, "Influence of Emotions."

987. With Witherington, *Acts*, 387.

988. E.g., after the formal part of the dinner, nocturnal carousing (among Gentiles) tended to be a predominantly male pastime (apart from less reputable women), even in this period. See Friedländer, *Life*, 1:249; Witherington, *Corinthians*, 193; contrast the other side of the evidence in Sen. *Y. Ep. Lucil.* 95.20–21; Winter, *Wives*, 153, but again, it was *predominantly* male (dinner lists were not exclusively, but predominantly, male; Stambaugh, *City*, 207). Earlier times had been more segregated (Cic. *Verr.* 2.1.26.66; *Cael.* 20.49; Vitruv. *Arch.* 6.7.4–5).

989. Most rabbis did not believe that prayer worked retroactively, though the matter was debated (*Gen. Rab.* 72:6, on prayer for a child's gender after it is conceived).

Like Rhoda, they take long to open the gate; there may be some fear of whoever claims to be Peter, given the persecution, because, like Rhoda, they do hear the knocking. But Luke focuses only on their skepticism, paralleling them with disciples doubting the testimony of the women from the tomb in Luke 24.

Their unbelief also echoes Peter's own in Acts 12:9. Accusing her of being "out of her mind" may imply an ecstatic vision (cf. female servants in 2:17–18; Peter's thought of his own in 12:9). This might not seem too out of place in a prayer meeting, especially since Luke apparently accepts the same charismatic phenomena (e.g., 2:17–18) that Paul anticipates in corporate prayer (cf. 1 Cor 14 passim; the same term appears in 1 Cor 14:23). It is the same sort of reproof that Festus later offers to Paul (Acts 26:24, using the identical expression, and putting Rhoda in very good company), not personally hostile but utterly unable to believe; at other points, God's servants are thought crazed by drunkenness (2:13). The unbelief in this case is probably also partly associated with her gender; the testimony of women was widely denigrated, particularly because men thought them susceptible to emotional instability.⁹⁹⁰ This disbelief of a woman's testimony is ironic in view of Luke 24:11, where the disciples thought the women's resurrection testimony to be idle nonsense:⁹⁹¹ Jesus's followers still have not learned their lesson. But also ironically, while they accused Rhoda of being crazy⁹⁹² for affirming that Peter was present, Peter had "come to his senses" (Acts 12:11; cf. Luke 15:17) only when he recognized that the "vision" was real.

The irony in this scene would probably strike ancient readers as mildly humorous, as it does us (since none of them were the butt of the joke, just as none of us are).⁹⁹³ Its critique of human skepticism might, however, come at the expense of most ancient readers as of most modern ones. The fool was a common character in ancient comedy;⁹⁹⁴ here the gathered Christians fill this role to some extent. Yet in view of James's death and the real danger Agrippa posed, Luke was hardly writing comedy; harmless fools (like Mark's disciples) were safer than mortal enemies, yet the story's true moral hero, though never appearing directly except by his actions and others' references, is God himself. Interspersing light with serious elements was considered good design for holding an audience's attention (e.g., Pliny *Ep.* 8.21.1).

Assuming Peter to be an angel that had come perhaps to announce his death⁹⁹⁵ provides another irony: God did not send an angel to them to announce Peter's death but sent one to Peter to rescue his life (Acts 12:7–11). When the risen Jesus appeared to his disciples, some also thought him a "spirit" (Luke 24:37). Ghosts do

990. E.g., Jos. *Ant.* 4.219; cf. Justin. *Inst.* 2.10.6. For women's supposed instability, see Polyb. 2.56.9; Cic. *Fam.* 16.27.1; Livy 34.2.13–14; Dio Chrys. *Or.* 3.34; b. *Šabb.* 33b; also Seneca in Lavery, "Never Seen."

991. Cf. similarly Spencer, *Acts*, 128; note that Paul's "madness" is also associated with his resurrection claim in 26:23–24. The disbelief in their "nonsense" (λίπος) resembles Antiochus's denunciation of a Jewish martyr's faith in 4 Macc 5:11 (though there is no thought of any literary connection), or a later apologist's denunciation of philosophers (*Diogn.* 8.2).

992. Cic. *Acad.* 2.47.144 lumps slaves with mad persons and exiles (but probably emphasizing their marginal status). Men viewed women in general as more emotional (e.g., Publ. Syr. 6; Lucian *Disowned* 30; Shelton, *Romans*, 301–3; cf. Polyb. 2.56.9; see also comment on mourning in Acts 8:2) and therefore less trustworthy in their reports (Jos. *Ant.* 4.219).

993. For humorous irony in antiquity (acceptable to most if kept within bounds), see, e.g., Dio Chrys. *Or.* 33; Plut. *Cic.* 27.1; Pliny *Ep.* 5.13.10; Tert. *Apol.* 40.2; Anderson, *Glossary*, 39; Rapallo, "Umorismo." On humor here, see, e.g., Faw, *Acts*, 136; Larkin, *Acts*, 185; Goldingay, "Comic Acts?"; Grassi, *Laugh*, 112; Pelikan, *Acts*, 148–49. Humor appears not only in Greek and Roman comedy but also in Jewish haggadah (Kovelman, "Farce").

994. Cf., e.g., Welborn, "Runaway Paul"; jesters in Schäfer, "Entertainers," 998.

995. So Haenchen, *Acts*, 391, reasonably. Stephen looked like an angel before his martyrdom (Acts 6:15).

not fit Luke's view of Jesus's eschatology (23:43; 24:38–43), but they were popularly accepted, perhaps particularly in moments of panic (cf. Mark 6:49).⁹⁹⁶ The ghosts of those who died violently were thought to lurk about, sometimes terrorizing those who lived nearby.⁹⁹⁷ (Gentiles fairly widely accepted the existence of ghosts,⁹⁹⁸ though more educated Judean circles would have frowned on it.) Classical Greek sources claimed that a long-deceased golden race of people became pure δαίμονες or spirits (Hesiod *W.D.* 122), living on earth and guarding mortals (*W.D.* 121–23). Thinkers in the Platonic tradition also spoke of souls leaving bodies at death and becoming spirits in the air realm.⁹⁹⁹ For Jewish people, however, an angel would be likelier.

Jesus compared those who are raised to angels (Luke 20:36). Some Jewish sources speak of an angelic afterlife; thus one pre-Christian work offers the righteous dead a hope like heavenly angels (1 *En.* 104:4). The possibly first-century C.E. Similitudes of Enoch may speak of the righteous becoming angels in heaven;¹⁰⁰⁰ the late second-century Christian novel *Acts of Paul* (*Acts Paul* 3.5 [*Paul Thec.* 5]) agrees. The Syriac *Apocalypse of Baruch* (probably early second century) compares the resurrected righteous to both angels and stars (2 *Bar.* 51:10).¹⁰⁰¹ *Prayer of Joseph* 19 (perhaps second century C.E.) apparently requests transformation into an angel along with immortality.¹⁰⁰² A still more hellenized Jewish source claims that after resurrection (Ps-Phoc. 102–3), the dead will become gods coming from the earth (θεοὶ, Ps-Phoc. 104).¹⁰⁰³ Paul's comparison of the resurrection body to heavenly bodies (1 Cor 15:40–41, 48–49) and “spiritual” existence (15:44–46) might contain an implicit comparison to angels.¹⁰⁰⁴ This fits a common expectation that the righteous would become stars after death (1 *En.* 43:4);¹⁰⁰⁵ some pre-Christian Jewish sources promise the righteous dead that

996. For dangerous ghosts in some traditional worldviews, see, e.g., Mbiti, *Religions*, 113; Fuchs, “Techniques,” 135–37. Though Confucius elsewhere expects sacrifices to deceased parents (*Anal.* 29 [2.5]), he seems to express agnosticism about ghosts and the afterlife (206 [11.11]; 326 [7.20]).

997. E.g., Plut. *Cim.* 1.6; 6.5; *Brut.* 36; *Caes.* 69.5, 8.

998. E.g., Ovid *Metam.* 13.447–48; Lucan *C.W.* 1.11; Plut. *Cim.* 1.6; 6.6; Dio Cass. 42.11.2–3; Ach. Tat. 5.16.1–2; Dubourdieu, “Dead, Cult of,” 116; cf. Ovid *Fasti* 2.551–54, 563–70; among Pythagoreans, cf. Philost. *Vit. Apoll.* 3.38; 4.11; Thom, “*Akoumata*,” 104–5. Deities also sent phantom images made only of cloud (e.g., Apollod. *Epit.* 1.20; 3.5); some contended that the particular identity of ghosts was difficult to distinguish, since they interchanged their appearances (Philost. *Hrk.* 21.1). Pliny *Ep.* 7.27.1, 15–16 asked whether a friend believed in ghosts, and proceeded (7.27.2–3, 5–14) to provide evidence supporting his own tendency to believe in them. In the ancient Near East, see Scurlock, “Ghosts.”

999. Philo *Conf.* 174; *Giants* 6, 9, 12; *Dreams* 1.135; Max. Tyre 9.6; 10.2; Dillon, *Middle Platonists*, 288. Cf. Plut. *Mor.* 564F for individual guardian spirits (Betz, Dirkse, and Smith, “Numinis,” 225); among Stoics, see Klauck, *Context*, 358; cf. Diog. Laert. 9.1.7; among Pythagoreans, Diog. Laert. 8.1.32.

1000. 1 *En.* 51:5; so Knibb, 136, but differently in Isaac, 37 (1 *En.* 51:4 in the Isaac enumeration). Cf. probably also angel-like existence in 2 *En.* 22:8–10.

1001. *Sipre Deut.* 306.28.2 compares the righteous in life to angels, but 2 *Baruch's* comparison is more complete. Stars could be angels (1QMX, 12; 1 *En.* 80:6–8; probably 1 *En.* 46:7; 2 *En.* 29:3 A; Ps-Phoc. 71, 75; Philo *Plant.* 12, 14; *Sipre Deut.* 47.2.3–5); angels govern stars in 2 *En.* 4:1. Jewish people condemned pagans for worshipping stars as deities (1 *En.* 80:7; *Gen. Rab.* 6:1; *Pesiq. Rab.* 15:1); for the view of stars as divine, see Cic. *Resp.* 6.15.15; *Nat. d.* 2.15.39–40; Sen. *Y. Ben.* 4.23.4; earlier, Bright, *History*, 161.

1002. The document is probably not a Jewish-Christian composition but resembles magical texts.

1003. Van der Horst in *OTP* 2:578 n. g suggests that this means angels. Cf. just *perhaps* 1 Sam 28:13, where the LXX has gods coming up from the earth. Josephus may speak of the wicked dead as “demons” that could enter and possess the living (Isaacs, *Spirit*, 33–34, citing Jos. *War* 7.185; for appeasing the ghosts of the departed, cf. *Ant.* 13.317, 416; *War* 1.521). Demons were bodiless (e.g., *Gen. Rab.* 7:5).

1004. See, e.g., Riesner, *Early Period*, 391; Martin, *Body*, 117–18; Keener, *Corinthians*, 131; idem, *Background Commentary*, 488.

1005. For deceased persons ascending to the stars, cf., e.g., Cic. *Resp.* 6.26.29; Virg. *Aen.* 7.210–11; 9.641; *Ecl.* 5.56–57; 9.47; *Georg.* 4.226–27; Ovid *Metam.* 14.824–28, 846–51; 15.749, 843–51, 875–76; Sen. *Y. Herc. fur.* 959; *Ep. Lucil.* 73.15; Lucan *C.W.* 9.1–9; Val. Flacc. 3.378–82; cf. 4 Macc 17:5; Hengel, *Judaism and Hellenism*, 1:197; souls numbered like stars in Plato *Tim.* 41E.

they will shine like the heavenly luminaries (Dan 12:3; *1 En.* 104:2). On “angels” for those who have died, see further comment on Acts 23:8.¹⁰⁰⁶

Some interpreters think that the disciples refer to Peter's guardian angel.¹⁰⁰⁷ Commentators often view the disciples' belief here in terms of later rabbinic views of “guardian angels . . . as the double” (one sharing the same appearance) of the person they protected.¹⁰⁰⁸ Angels could otherwise appear as humans (cf., e.g., Judg 13:6, 8; Tob 5:4–5; Mark 16:5; John 20:12–13; Heb 13:2).¹⁰⁰⁹ Although corporate guardian angels of nations are better attested,¹⁰¹⁰ guardian angels of individuals also do appear in our sources.¹⁰¹¹ The individual's protective spirit, or *genius*, in Roman thought might provide another ancient Mediterranean analogy.¹⁰¹² But why would those in the house expect Peter's guardian angel to have left him unless they supposed that he had died (in which case, Peter as a posthumous “angel” seems likelier)? The parallel with Luke 24:37 suggests the righteous-dead interpretation.

IX. PETER'S REPORT (12:16–17)

That Peter continues knocking¹⁰¹³ (Acts 12:16) heightens the suspense. Haenchen perceptively asks, “Will they let him in before the neighbours are alerted and endeavor to capture the fugitive?”¹⁰¹⁴ Even the large luxury villas of Upper City Jerusalem were located in close proximity to each other,¹⁰¹⁵ and it has been argued that most of those who owned homes there were Sadducees.¹⁰¹⁶ Homes in cities offered a degree of privacy, but not so private that neighbors had no idea what went on there.¹⁰¹⁷

Most neighbors would be asleep, but some servants, especially guards at nearby gates, would not be asleep and would be well aware that many people were gathered and awake at the widow's house. Probably they knew that followers of Jesus met there (since it would not have been secret before Agrippa's repression, unless Mary had been converted only recently); perhaps they spoke at times with servants there, such

1006. Note also the Jewish (though perhaps Jewish-Christian) inscriptions in Corinth portraying the dead as angels (see Wiseman, “Gymnasium Area”).

1007. Origen *Comm. Matt.* 27–28 (in Pelikan, *Acts*, 147); Le Cornu, *Acts*, 654; Malina and Pilch, *Acts*, 85.

1008. Bruce, *Acts*¹, 247; Marshall, *Acts*, 219; Fitzmyer, *Acts*, 489; Witherington, *Acts*, 387 (citing *Gen. Rab.* 78); many of these follow Strack and Billerbeck, *Kommentar*, 2:707–8. This use of the “double” may stem from Persian sources (see Reitzenstein, *Religions*, 108); a similar idea (for an invisible person along with the visible one) appears among traditional Douala people (Rosny, *Healers*, 59). For Zoroastrian guardian spirits, see Yamauchi, *Persia*, 408.

1009. Cf. also, e.g., *Test. Job* 23:2 (Satan in disguise); *2 En.* 1:4–10; 7:1–2; 8:1, 8; 10:1, 4; 11:1; 13:1; 14:1; 16:1; 18:1, 9; 19:1; 20:1–2; 21:2, 4; 38:1; *Gen. Rab.* 50:2; *Pesiq. Rab.* 20:4; Rev 21:17. For humans portrayed as angels in the Qumran scrolls, see Fletcher-Louis, “Reflections.”

1010. See comment on Acts 16:9.

1011. E.g., Tob 5:22 (the informed reader will catch the irony here); Heb 1:14; Matt 18:10; *L.A.B.* 11:12; 59:4; *t. Šabb.* 17:2–3; *Sipre Num.* 40.1.5; *Gen. Rab.* 44:3; 60:15; *Song Rab.* 3:6, §3; Hermas 1.5. Le Cornu, *Acts*, 654, cites, in addition to some of these, *L.A.B.* 15:5; *Jub.* 35:17; *b. Hag.* 16a; *Ta'an.* 11a; see also Davies and Allison, *Matthew* 2:770–72.

1012. On this, see Pearson, “Domestic Religion,” 299; Rives, *Religion*, 19; cf. Sen. Y. *Ep. Lucil.* 110.1 (skeptically).

1013. In what may be consummate Lukan narrative irony, those inside, by continuing in prayer for Peter (12:5, 12), are continuing to “knock” that a figurative door may be “opened” for them (Luke 11:9, esp. in the context of 11:5–8)—even while they fail to believe that the answer to their prayers is knocking on their own door!

1014. Haenchen, *Acts*, 391.

1015. Avigad, *Jerusalem*, 83 (noting construction from the Herodian period); McRay, *Archaeology*, 77.

1016. Avigad, *Jerusalem*, 83 (noting, however, that they were not lax in observing ritual purity; cf. also 139); McRay, *Archaeology*, 78.

1017. Cf. Meeks, *Moral World*, 111. Indeed, they could watch quite carefully (see esp. Osborne, “Neighbours,” 617). Lopez and Penner, “Houses,” 93, warn that the distinction between public and private is largely a modern one.

as Rhoda (12:13), through whom they would have received a more favorable report about the goings-on there. Guards at gates would often notice neighborhood activity (so long as they remained awake), but since Mary's home has only a female servant to answer, and one stationed inside rather than at the gate (she "came" to answer), perhaps many of these are less endowed homes, with less access to neighborhood business. Even if guards noticed the person knocking at the gate, they might assume him to be simply a latecomer to the nocturnal meeting. Perhaps neighbors were not inclined to accuse neighbors or members of their own class.

Perhaps another factor reducing suspicion is the narrative's indication of the timing: it may be the final night of the Festival of Unleavened Bread (see 12:3–4, though "after" need not specify *immediately* after). More endowed Jerusalemite homes might swell with visitors during the Passover, perhaps especially distant kin.¹⁰¹⁸ This would necessarily include not only providing the Passover meal itself but also housing the guests until the end of the festival, since those who traveled from afar would want to attend the entire festival. Under such circumstances, nocturnal gatherings might arouse less suspicion even if such an extremely late arrival might stir curiosity.

Should the prison guards detect¹⁰¹⁹ Peter's escape before morning light, however, or should any other enemy by chance realize, even retroactively, that the knocker was Peter, the stakes for Peter (and for those inside) would be high. If the authorities knew that Christians met in Mary's house, it might be one of the first places for them to check.¹⁰²⁰ Mary's status and gender might count against harsh interrogation, but the less known contact Peter had with the group after leaving, the better for everyone. Again, the escape was not yet known (12:18), but the protagonists in the narrative cannot count on continued ignorance. If the visitor was seen and accusers subsequently recalled his resemblance to Peter, investigations could follow.

Those gathered are astonished (12:16); Peter's presence naturally creates a commotion, and he has to quiet¹⁰²¹ his audience with a hand motion (12:17); these can be rhetorical gestures (13:16; 26:1), but they can also be used to seek attention in the midst of noise (19:33; 21:40).¹⁰²² The gesture a speaker used to alert an audience that he (usually public speakers were male) was about to begin was to stretch out "the thumb, index, and middle fingers while folding the other two into the palm (Quint. *Inst.* 11.3.98)."¹⁰²³ The gesture for silence, however, differed from this;¹⁰²⁴ one would raise one's right hand with the smallest finger extended.¹⁰²⁵ Silence is needed so he can speak quickly; it may also reduce unwanted neighborhood attention.

After Peter reports the miracle, he urges them to report the matter to "James and the brothers." Luke's audience will be familiar with "the brothers": Peter refers to

1018. Cf. *m. Pesah.* 7:13; 8:4; Lane, *Mark*, 497. On the Passover proper (now past), later sources suggest that ten to twenty people shared each lamb, gathering together as households for purposes of the festival (Jeremias, *Eucharistic Words*, 47; Reicke, *Era*, 167).

1019. And dare to announce, since they and their immediate superiors might do their best to locate him before making his escape widely known (to reduce their shame and danger at his escape).

1020. Cf., e.g., the hypothetical freedman who bravely hid his patron in his own home (Sen. E. *Controv.* 4.8).

1021. Luke often employs the term *σιγάω* (six of ten times in the NT; e.g., Luke 9:36; 18:39; 20:26; Acts 15:13), including for listening to God's acts (Acts 15:12). See comment on Acts 11:18. Silence could also serve a transitional function to new speech (3 Macc 6:1; Plut. *Table* 8.2.1, *Mor.* 718B).

1022. E.g., Jos. *Ant.* 19.254. Cf. Haenchen, *Acts*, 385; also his surmise that Peter did not enter, although, given the circumstances, this may simply be Luke's abbreviation technique.

1023. Shiell, *Reading Acts*, 52–54 (quote, 52).

1024. *Ibid.*, 140.

1025. *Ibid.*, 145, suggesting that the lector of Acts would also perform this gesture (in the picture on 142, the thumb and index finger were pressed together). More fully, see 140–45 (documenting the gesture from art and literature). For the right hand and commands, see Libanius *Descr.* 2.3, 4.

the whole of the Jerusalem church (see Acts 1:15–16; 11:1, 29).¹⁰²⁶ But Luke also speaks of James as if he is known; though Luke has not mentioned him by name, his audience already knows of him (cf. Jesus's brothers in 1:14, without specifying that James is one of them, as Gal 1:19 does). Though his ministry was limited to Jerusalem, he was well known in the Diaspora (1 Cor 15:7; Gal 1:19; 2:9, 12; Jas 1:1; Jude 1).¹⁰²⁷ That Peter does not need to explain James's special prominence to those in Mary's home indicates that James was already a leading figure there (perhaps as early as Peter's travels in Acts 9:32–11:2).¹⁰²⁸

Though not a follower of Jesus before the resurrection (see comment on Acts 1:14), James received a personal resurrection appearance (1 Cor 15:7) just like Peter (15:5; cf. Luke 24:34) and, in a different way, Paul (1 Cor 15:8). He remained one of the three chief leaders of the Jerusalem church along with Peter and John in the period after Acts 15 (Gal 2:9). That Paul lists James first of the three probably suggests that he was the most prominent in the Jerusalem church, a role Paul would likely not have conceded him lightly in view of his own opponents' probable appeal to James's views (2:12).¹⁰²⁹ In many societies, kinship produces sociopolitical bonds;¹⁰³⁰ Middle Eastern custom would certainly have produced the expectation that some of Jesus's authority would pass to his brother.¹⁰³¹ Although Jesus warned against anything close to nepotism (Luke 8:21; 9:59–62; 14:26; 18:29; 21:16; esp. 14:12),¹⁰³² appointing brothers was common (Xen. *Hell.* 3.4.29; Otho's brother in Tac. *Hist.* 1.75, 77, 90; 2.23, 33; Plutarch *Otho* 7.4; 8.1; 13.3), since family honor bound them to oneself as trustworthy allies (Xen. *Cyr.* 8.7.14).

Paul regards James as very conservative or as one who wished to conciliate conservative elements in the church (Gal 2:12). He met with Paul after Paul's conversion, and despite their differences, Paul recognized him as an apostle and brother of the Lord (1:19). In contrast to Peter, James seems to have established positive relations with conservative elements in established Jerusalem religion, allowing him to function as a safe leader during Agrippa's persecution.¹⁰³³ So appreciated was his piety that when a Sadducee later did have him executed, the outcry among those considered more devoted to the law led to that high priest being deposed (Jos. *Ant.* 20.200–203).

Some scholars suggest that this James replaces the martyred apostle James (Acts 12:2).¹⁰³⁴ Since Matthias replaced Judas (1:20–26), it is possible that Luke presup-

1026. He could refer to the Lord's brothers, brothers of James as in Acts 1:14; but they do not recur in Acts whereas the usage for the church is much more common.

1027. Bauckham, "James," 427n37, argues that James appears less dominant outside Acts and Gal 1–2 because the Jerusalem church's role became anachronistic after 70 C.E.

1028. On James, see Martin, *James*, xxxiii–xli (esp. in the NT); in Jewish-Christian circles, xli–xlvi; for other traditions (esp. patristic and gnostic), xlvi–lxi; for the authenticity of Josephus's report, see, e.g., Dibelius, *James*, 14–15; Hare, *Persecution*, 32–33. His nickname "the Just" was not unique; see, e.g., Corn. Nep. 3 (Aristides), 1.2; likewise, "the good," Corn. Nep. 19 (Phocion), 1.1.

1029. Bauckham, "James," 441, suggesting that James achieved this authority because Peter and John "were no longer permanently based in Jerusalem."

1030. E.g., Chock, "Kinship," 88–89 (in that society, more social than political); Kaeppler, "Rank" (affecting rank); Spooner, "Politics"; Lewin, "Implications." For kinship and class, see, e.g., Kottak, "Kinship"; connections between messianic movements and lineage-based societies (Pereira de Queiroz, "Myths," 95–96) seem too generalized to be compelling, but kinship could affect lineage and authority in some religious groups (Solomon, "Kinship"). The loyalties that kinship generates sometimes also affect perceptions of events involving kin (e.g., Lucas, "Influence").

1031. Cf. Dunn, *Acts*, 164; Malina, *Windows*, 65; Foakes-Jackson, *Acts*, 7. Tradition claims that another relative of Jesus succeeded James (Malina and Pilch, *Acts*, 108, rightly notes Euseb. *H.E.* 3.32).

1032. Cf. also 4Q477 2 II, 8 (where loving a relative is probably related to mingling with outsiders; see II, 6).

1033. See Knox, *Jerusalem*, 169–70; cf. Klausner, *Jesus of Nazareth*, 41.

1034. Hort, *Judaistic Christianity*, 62. Luke might introduce this James after the other's demise to avoid confusing them, but this would constitute a literary courtesy, not a narrative identification of the two.

poses knowledge that this James replaces his deceased namesake among the Twelve. It is not clear, however, that the Twelve were a permanently self-perpetuating group, because Luke, at least, presents their role as eyewitnesses of Jesus's public ministry (1:21–22; which James was not); Paul distinguishes them from a larger body of "apostles" (1 Cor 15:5, 7). More likely, he is chosen *instead* of the Twelve: with the apostles as obvious targets (cf. Acts 8:1), with James brother of John dead, and with Peter and presumably John in hiding, another leader made better sense.¹⁰³⁵ As a Jewish cultural conservative, James seems to have been able to relate better to the groups that wanted his colleagues dead (Acts 12:3; 15:13–22; 21:18–20; Gal 2:12) and seems a more irenic figure (for a Jerusalem setting) to advance the church's status in Jerusalem.¹⁰³⁶

It is thus not clear that James the Lord's brother replaces John's brother; but even if he does, their shared names are likely simply coincidence. "James" (lit. "Jacob") was a common name,¹⁰³⁷ and namesake coincidences were common even for less frequent names.¹⁰³⁸ More often scholars suggest that James replaced Peter.¹⁰³⁹ But Peter and other apostles function alongside James (though he remains most prominent) in Acts 15:2, 4, 6–7, 22–23 and 16:4; moreover, James apparently already held a leadership role before Peter's flight.¹⁰⁴⁰ Nevertheless, the departure of Peter (and John) from Jerusalem would have allowed James to achieve the possibly highest rank among the three there, as suggested by the sequence of their names in Gal 2:12.¹⁰⁴¹ Luke certainly begins reporting James's prominence in Jerusalem and Paul's Gentile mission only once Peter has finished his early role in Jerusalem.¹⁰⁴²

The text is not clear as to whether Peter initially intended to stay at this home, but probably he did not. He would not have known that people were gathered there for prayer at this time of night (Acts 12:12); he probably came only to give out word before fleeing the city or to obtain help for such a flight (cf. 9:30; 17:10, 14). Staying in the home of a known Christian would risk rearrest and also cause serious trouble for whoever housed him (Agrippa was not patient with the guards, whom he treats as either accomplices or negligent in 12:19). Peter's departure does not indicate unwillingness to die if necessary (cf. continued preaching after a supernatural release in 5:20–21, 29–32), but his miraculous escape probably suggested to him that God wished to preserve him, and James's execution (12:2) illustrated that Agrippa was

1035. *G. Thom* 12 attributes directly to Jesus a transfer of authority from Jesus to James. Although this work includes enough gnosticizing features, and is generally far enough from early Palestinian features, to deny its authorship in the first century, it predates most other gnostic writings and, in this case, may reproduce an earlier Palestinian tradition. Speaking of people or an important person "for whose sake the world was created" probably echoes Jewish tradition outside the document's own community (see, e.g., *2 Bar.* 15:7; 21:24; *Sipre Deut.* 47.3.1–2; *b. Ber.* 6b; 61b; *Šabb.* 30b; *Gen. Rab.* 1:4; esp. for individuals in *b. Sanh.* 98b; *Pesiq. Rab Kah.* Sup. 1:20; *Tg. Neof.* 1 on Num 22:30; *Tg. 1 Chr.* 4:23; see more fully Keener, *John*, 381).

1036. His relation to Jesus may have also encouraged even the authorities, for whom Jesus himself, human memory being what it is, might now be recalled as a much less radical threat than Peter. They could also claim that they aimed to stamp out not the entire movement (virtually impossible at this point) but only its most "radical" leaders (a way of eliminating those with whom they had experienced conflicts).

1037. E.g., *Jos. Life* 96; *CPJ* 2:137, §235; 3:179; *CIJ* 1:267, §340 (Rome); 2:117, §890 (Caesarea); 2:155, §967 (Gaza); 2:186, §1017 (Beth She'arim in Galilee); 2:212, §1161 (Beth She'arim); 2:391, §1467 (Egypt); 2:414, §1505 (Egypt).

1038. E.g., *Xen. Hell.* 1.2.13; *Dion. Hal. Din.* 1; *Philost. Vit. soph.* 1.483; 2.20.600.

1039. E.g., Knox, *Jerusalem*, 169–70; cf. Cullmann, *Peter*, 55. Heiligenthal, "Petrus und Jakobus," doubts this historically.

1040. E.g., Witherington, *Acts*, 388.

1041. Bauckham, "James," 441. This may have begun even with Peter's imprisonment (cf. Cullmann, *Peter*, 41). *G. Thom.* 12 (*NHL* 119) suggests that James's leadership was planned from the start.

1042. See Wall, "Successors to 'Twelve.'"

far less reluctant to kill than the Sanhedrin had been. Peter would be free to return after Agrippa's death (12:23; cf. 15:7).

X. WHERE DID PETER GO? (12:17)

"To another place"¹⁰⁴³ could mean a place in Jerusalem different from Mary's house; but given the need to avoid endangering Peter's hosts and given the message here to James (who at some point afterward emerges as particularly prominent, 15:13; 21:18), it is reasonable to suppose that the place (whether that night or later) would be outside Jerusalem;¹⁰⁴⁴ this would be safer. More than likely, Peter's ultimate destination would be outside Agrippa's jurisdiction altogether.¹⁰⁴⁵ Early Christian tradition strongly indicates that he eventually went to Rome; church tradition (Euseb. *H.E.* 2.14.5)¹⁰⁴⁶ and earlier Roman Catholic scholars, along with some Protestants, have often suggested this destination here.¹⁰⁴⁷ It is unlikely, however, that he journeyed to Rome this early (cf. Rom 15:20).¹⁰⁴⁸ Certainly he did not establish a permanent ministry there at this point: would he have traveled back to Jerusalem in Acts 15:6–11 only for the church conference?¹⁰⁴⁹ Contemporary Catholic scholars have thus often moved away from this position.¹⁰⁵⁰

Some scholars have suggested that Peter returned to the area of his ministry along the coast (9:32–43), but this remained in Judea and hence under Agrippa's jurisdiction¹⁰⁵¹ (though, if he avoided both Jerusalem and Caesarea, at least not under Agrippa's nose). Certainly Peter travels abroad during some later years (1 Cor 9:5), possibly including parts of Asia (1 Pet 1:1).¹⁰⁵² Despite potential intervention in Galilee, he could probably expect to remain fairly undisturbed there. Because he knew Galilee well, that is a likely destination for him historically.¹⁰⁵³ At some point (probably later), he appears in Antioch with Paul and Barnabas, receiving there mes-

1043. The phrase is not very specific (e.g., a place of symbolic exile in Exod 12:3; other geographic locations in 1 Macc 12:2; Philo *Abr.* 67; places other than prayer houses, Philo *Flacc.* 49; other places in one's writing in Jos. *Ant.* 14.114; or in Scripture, 1 *Clem.* 8.4; 29.3; 46.3). If we expand the range to include ἄλλος, the phrase remains quite general (e.g., Num 23:13, 27; 1 Esd 2:16; Jos. *Ant.* 6.270; 13.65; *War* 6.346; cf. Philo *Creation* 20). Smaltz, "Peter," 214–15, argues that Acts 12:17 refers to Peter's death; Strelan, *Strange Acts*, 273, thinks his arguments "quite strong" here but is less persuaded about a different Simeon in Acts 15:14.

1044. Unless Luke's pre-70 C.E. tradition remains mute to avoid implicating a host; but then why mention Mary's house? She may have passed away like her husband before her, and perhaps no Christian relatives owned the property; but this view requires so many such caveats that it is not the simplest explanation for Peter's place of hiding. If, as I believe, Luke's source is oral and probably secured during his Judean visit some fifteen years after Agrippa's death, anonymity would be irrelevant.

1045. Probably outside Palestine (with, e.g., Finegan, *Apostles*, 40).

1046. Cf. Peter as founder of the Roman church in Gennadius of Constantinople, on Rom 15:20, in *Pauluskommentare* 416; Bray, *Romans*, 363). Bray, *Romans*, xvii, notes that Rome emphasized a Petrine foundation especially after the rise of Constantinople (350 C.E.), probably in a bid to maintain primacy.

1047. Citing *Acts of Peter*; *Ps.-Clementine Recognitions*; *Ps.-Clementine Homilies*. See, e.g., Wenham, "Peter to Rome?"

1048. With, e.g., Polhill, *Acts*, 283; Peterson, *Acts*, 367; esp. Das, *Debate*, 24–25. One would also expect Peter to be named in Romans, as he is (perhaps without even personal acquaintance) in 1 Corinthians (1 Cor 1:12; 3:22; 9:5; 15:5) and Galatians (Gal 1:18; 2:9, 11, 14).

1049. It is not clear that Christians far from Jerusalem received extended advance notice unless they were on the route between Antioch and Jerusalem (Acts 15:2–4).

1050. See, e.g., Fitzmyer, *Acts*, 489; summary in Longenecker, *Acts*, 207.

1051. For the objection, see, e.g., Longenecker, *Acts*, 207; Larkin, *Acts*, 186.

1052. Some have even suggested Edessa (Osborne, "Peter?") or Mesopotamia (Foakes-Jackson, *Peter*, 117, cited in Fitzmyer, *Acts*, 490; cf. 1 Pet 5:13, though this probably refers to Rome). Riesner, *Early Period*, 119, suggests that wherever he went, he left twelve years after Jesus's crucifixion, hence in 41–42 C.E. (citing *Acts Pet.* 5.22; Euseb. *H.E.* 2.14.6).

1053. Though it would have been helpful in that case for Luke to have mentioned it, his possibly Judean source may not have known where Peter went; the matter was probably kept discreet at the time.

sengers from James (Gal 2:11–12); Antioch is a reasonable guess here¹⁰⁵⁴ (though it was quite some distance, much farther from home than Damascus or Alexandria). Yet we cannot be sure.

Luke may not name the place because he does not know or because it does not concern him; perhaps the place had even been kept secret, but Luke's point in any case is simply that Peter slipped away unharmed.¹⁰⁵⁵ He reappears in Jerusalem by Acts 15:7–11, though only temporarily (cf. 21:18);¹⁰⁵⁶ perhaps he returned soon after Agrippa's death.¹⁰⁵⁷

2. Herod's Pride and Death (12:18–23)

This portion of the narrative underlines Agrippa's arrogance and abuse of power over life and death; it also reminds the reader that the power over life and death ultimately belongs to God, who intervenes when appropriate. Agrippa killed James and tried to kill Peter. Yet Peter's escape shortly before his planned public execution (undoubtedly announced in advance) publicly detracts from Agrippa's honor; by executing the guards, he can recoup a modicum of this lost honor. Angrily, he treats the delegates of Tyre and Sidon (who are concerned about feeding their people) arrogantly but warms to their offering him honor. In contrast to Peter (10:26; cf. 3:12) and other characters in Acts (14:15), he welcomes divine honor. Thus the Lord's angel who struck Peter to deliver him (12:7) now strikes Agrippa to slay him. Most relevant is that all of Agrippa's power (even when expressed in killing a key leader) fails to stop the church's growth (12:24). Luke thus reinforces his point, through yet another dramatic example, that nothing could stop the gospel (5:39; cf. 28:31).

a. Herod Kills the Guards (12:18–19)

Given the obvious threat to the guards' lives (soon fulfilled), "no small disturbance" (12:18) clearly means "a great disturbance."¹⁰⁵⁸ This is thus a typical Lukan example of litotes (also characteristic of Thucydides, whose historiographic style, some scholars think, may have even influenced Luke's indirectly).¹⁰⁵⁹ ("Guards" were not always soldiers,¹⁰⁶⁰ but 12:4, 6 makes clear that the guards here are the soldiers.) If the guards worked different shifts, ideally only the guards who had been on duty would face examination and death, and so perhaps the quaternion of four soldiers on whose watch Peter escaped would be those executed in 12:19.

Since we do not know on what watch of the night he escaped and it appears that the discovery awaited daylight (12:18), it is difficult to ascertain how many quaternions would be implicated. Perhaps it was only one, since changing the guards to which Peter was chained would presumably reveal his absence. Thus it may be the last watch of

1054. Favored as a possibility by, e.g., Marshall, *Acts*, 211; Longenecker, *Acts*, 207.

1055. With Conzelmann, *Acts*, 95; Polhill, *Acts*, 283; cf. Cullmann, *Peter*, 38–39.

1056. Longenecker, *Acts*, 207, suggests "in transit"; but Peter's presence for this conference is probably no coincidence, and our reading of Gal 2 keeps him in Jerusalem for some time afterward.

1057. With Munck, *Acts*, 114.

1058. Luke employs the same term for "disturbance" (the only other NT use) for the riot in Acts 19:23.

1059. Bruce, *Acts*¹, 248, noting the same litotes in Acts 14:28; 15:2; 17:4, 12; 19:23–24; 27:20; and other examples of litotes in 14:17; 17:27; 19:11; 20:12; 21:39; 26:19, 26; 28:2. Cf. also Conzelmann, *Acts*, 95; on litotes, see *Rhet. Her.* 4.38.50; Rowe, "Style," 128 (offering as examples Lysias *Or.* 12.22 [*Against Eratosthenes*]; Cic. *Cat.* 3.7.17); Porter, "Paul and Letters," 579 (citing Rom 1:16); Robertson, *Grammar*, 1205 (selecting all his examples from Acts, where it is common); e.g., Dio Chrys. *Or.* 54.3. For understatement, as here, the reader of Acts might use an ironic tone, sometimes with an indignant undertone (Shiell, *Reading Acts*, 85).

1060. See Rapske, *Custody*, 252 (citing Pliny *Ep.* 10.19–20).

the night before daybreak, or if it was the penultimate nocturnal watch, the discovery may have occurred a few hours before daybreak (the explication of which would have required of Luke more words than his simple “when day had come”). Or perhaps Luke envisions Peter not only being invisible during his escape but also seeming to remain so during the changes in shifts (a phantom, as in some Greek myths). If each shift believed that they changed the chains for different guards, only the final shift would prove incapable of denying complicity in Peter's escape.

In any case, Agrippa has lost face by Peter's escape after an execution was publicly announced;¹⁰⁶¹ he can recoup some lost honor only by executing those he can hold responsible for the fiasco (12:19). Given the survival of the guards during Peter's escape and their failure to even claim that they had been overpowered, the only naturalistic explanations were complicity and/or that some or all had fallen asleep and been careless in chaining him besides.¹⁰⁶² (When warehouses storing wealth were burglarized, guards could be punished on the assumption of being accomplices.)¹⁰⁶³ The possible complicity of one and negligence of the others seemed reason enough for the execution; that their examination apparently yielded no evidence of their being secret sympathizers with the widely spread movement of Christians must, however, have seemed curious.

A critic could also attribute the escape to sorcery (cf. comment on Acts 5:24), but Hellenistically educated Agrippa would not presume such an explanation in the guards' defense. That there is another explanation, which Luke presents, Agrippa cannot consider without admitting the possibility of serious error (hence risking further dishonor), and so he must assume the guards' culpability. Even before his friend Caligula's accession as emperor, Agrippa had been severe in demanding punishments (Jos. *Ant.* 18.183).

When soldiers, even Roman soldiers, failed in vigilance at their watch, enemies could break in,¹⁰⁶⁴ or the besieged could break out (Polyb. 1.19.12). Sometimes people sought to free prisoners by force (5.39.4–5 [which failed]), but making a guard drunk might work better (Jos. *Life* 388). (On guards' negligence and falling asleep, see comment on Acts 20:28.) The captain of the Levite temple guard could beat any guard he found asleep (*m. Mid.* 1:2), but Agrippa, raised in Rome, could prove far more exacting than the Jerusalem priestly establishment (contrast Acts 5:23–24).

Long before the Romans, camp discipline demanded severe punishment for guards who fell asleep on duty. Thus guards who failed to keep the killers out could face scourging and/or beheading (Eurip. *Rhes.* 812–19) and protest vociferously that they did not fall asleep (*Rhes.* 825–27); punishments could be so dreadful that some Assyrians who fell asleep at the night watch allegedly deserted to the Indians to escape the penalty (Diod. Sic. 2.18.8). Among Romans, if a soldier was found asleep during the night watch, all those endangered by his negligence would strike him with hands or stones; if he survived, he could never return to his country.¹⁰⁶⁵ When a Roman

1061. Even if the execution's timing was not announced in advance (its announcement is not explicit in Acts 12:4), at least the Christians would know that Peter had been taken prisoner and might face the same fate as James (12:2–3, 5).

1062. Cf. Keener, *Matthew*, 713–14. Sometimes a prisoner could escape through bribing guards (Tac. *Ann.* 2.68).

1063. Robinson, *Criminal Law*, 27.

1064. E.g., Hom. *Il.* 10.309–12, 416–21; Dion. Hal. *Ant. rom.* 5.47.1; 7.11.2–3; 9.34.4; Diod. Sic. 3.55.1; 19.95.5–6; Virg. *Aen.* 9.314–66, 375–445; Livy 24.46.4; 36.23.10–36.24.6; 44.33.8–9; Sall. *Jug.* 58.1; Jos. *Ant.* 18.356, 370; *Life* 405; see further comment at Acts 20:28.

1065. Polyb. 6.37.1–6; see further Dupont, *Life*, 126; cf. punishments, often lethal, after investigation of “any misdemeanour on watch” in Le Bohec, “Vigiliae.” An officer who failed in properly making rounds of the night watch was also subject to punishment (Val. Max. 8.1.damn.6).

garrison fell asleep and was nearly captured, the Romans hurled the captain of the guard over a cliff the next morning.¹⁰⁶⁶ Punishments were similar for deserters (see comment below).¹⁰⁶⁷ Some cultures showed mercy by requiring disgrace, not death.¹⁰⁶⁸ Rome had sometimes banished deserters,¹⁰⁶⁹ cut off their hands,¹⁰⁷⁰ or selectively executed them in a battle¹⁰⁷¹ but more often and, by this period, more consistently, executed them.¹⁰⁷²

It is thus not surprising that Romans counted it a capital crime for anyone on guard duty to abandon his post or retreat (Polyb. 1.17; Livy 24.37.9). Any soldier who failed to appear for roll call (Livy 3.69.7), who was too distant to hear the trumpet during battle, or who strayed from his unit without permission could be enslaved, mutilated, or killed.¹⁰⁷³ If an entire unit proved negligent, one rare punishment was random execution:¹⁰⁷⁴ every tenth (or sometimes hundredth) man was selected by lot, then beaten to death by his colleagues.¹⁰⁷⁵ Although rarer in the empire than in the republic, it still occurred.¹⁰⁷⁶ The death penalty for rank-and-file soldiers who left their posts was extended by Augustus to centurions who did so (Suet. *Aug.* 24.2).

The issue here is neither abandonment nor, given the chains, even solely negligence; and the punishment could be severe. Most who escaped prison did so through the guards' negligence, collusion, or both (Plut. *Demosth.* 26.2). Later sources consistent with Acts (cf. Acts 16:27; 27:42) suggest that a guard whose prisoner escaped would face the penalty originally assigned to his prisoner (Justin. *Cod.* 9.4.4),¹⁰⁷⁷ and more contemporary sources also suggest the possibility of executing negligent guards (Petron. *Sat.* 112; cf. Char. *Chaer.* 3.4.18).¹⁰⁷⁸ Because the negligence of multiple guards becomes cumulatively improbable, a leader ruling out divine rescue would probably view collusion as a likelier explanation in this instance.

1066. Plut. *Cam.* 27.2, 5.

1067. Cf., e.g., Lysias *Or.* 14.5–6, §140; Val. Max. 2.7.13; 2.7.15a–15c. Homicide was considered justifiable in killing a deserter to the enemy (Robinson, *Criminal Law*, 45). For hypothetical court cases regarding desertion, see, e.g., Quint. *Decl.* 246 intro; 371 intro; 378.4; 387 intro; cf. reluctance to receive even too many deserters from the other side in Quint. *Decl.* 255.1 (disrespecting them in 255.3, 6). Cf. disgust for deserters in Vell. Pat. 2.85.3–5; 2.119.4; Quint. *Decl.* 304 intro; disgust for traitors in Xen. *Hell.* 1.7.22; Cic. *Finib.* 3.9.32; Virg. *Aen.* 6.621; Livy 1.11.6–7; 5.27.6–10 (though cf. Livy 4.61.8–10); Val. Max. 1.1.13; Sen. *Controv.* 7.7.intro.; Libanius *Encomium* 1.8–9, 11; 4.19; *Invect.* 5.11, 17; *Topics* 2 (esp. 2.13–14, 17–18); *Refutation* 2.12; such behavior invited the hatred of even one's family (Livy 2.5.7–8; Corn. Nep. 4 [Pausanias], 5.3).

1068. Egyptians in Diod. Sic. 1.78.1; Charondas's laws, 12.16.1. Diodorus seems to appreciate the benevolence.

1069. Sil. It. 10.654–56 (during the Punic War). Cf. traitors in the hypothetical law in Quint. *Decl.* 334 intro (with their advocates); 366 intro.

1070. Val. Max. 2.7.11; Appian *Hist. rom.* 7.7.43.

1071. E.g., one-tenth; Dio Cass. 48.42.1–2.

1072. Dion. Hal. *Ant. rom.* 3.30.7, on deserters and traitors; 6.9.4, on those who fled in battle; Val. Max. 2.7.12; Quint. *Decl.* 246.3; 287 intro; 315 intro; for traitors, see Quint. *Decl.* 272 intro; 294 intro; 331.5; 348 intro. Tyrants might also execute those accused of trying to desert (Livy 34.27.9). Camps that executed deserters reportedly saw fewer than did those known for leniency (Tac. *Ann.* 13.35).

1073. Le Bohec, "Desertor" (citing Suet. *Otho* 11.1; *Dig.* 49.16.14). In times of peace, imprisonment was common (Tac. *Ann.* 1.21.3), but the offender could be executed (Suet. *Aug.* 24; Jos. *War* 3.103; Le Bohec, "Desertor").

1074. Le Bohec, "Decimatio," cites Polyb. 6.38; Frontin. *Str.* 4.1.34; 4.1.37; Quint. *Decl.* 348.

1075. Polyb. 6.37.1–6; Tac. *Ann.* 3.21.1; Le Bohec, "Decimatio." One could also execute a chief centurion (Vell. Pat. 2.78.3).

1076. Le Bohec, "Decimatio," citing Suet. *Aug.* 24.2; *Calig.* 48.1; *Galba* 12.2; Tac. *Ann.* 3.21.1; *Hist.* 1.37.3; 1.51.5.

1077. Commentators regularly cite this later code here (Lake and Cadbury, *Commentary*, 139; Conzelmann, *Acts*, 95; Witherington, *Acts*, 389; Bock, *Acts*, 430). Although much later, it codified earlier traditional practice.

1078. With Barrett, *Acts*, 588; Johnson, *Acts*, 214.

Romans decided appropriate penalties based on the significance of the escape and on the extent to which the guard appeared culpable; if one soldier was clearly at fault, the others would not require punishment.¹⁰⁷⁹ Similarly, in laws of obligations regarding objects, a guard lacked liability when an “act of god” destroyed an object.¹⁰⁸⁰ When the interrogation (Acts 12:19) yielded no one willing to admit guilt, however, and the prisoner’s escape should have at least been noticed by each of the guards, their collusion could only be assumed. A Roman penalty would not apply automatically in Agrippa’s jurisdiction, but given his Roman experience and ample pre-Roman precedents, “it would be surprising if it did not.”¹⁰⁸¹

How were the guards interrogated here? The questioning would likely have included cross-examination (see comment on Acts 6:13) but probably also more than this.¹⁰⁸² Since the offense is a capital one, it is possible that they were scourged—that is, tortured—as part of the interrogation;¹⁰⁸³ certainly, scourging frequently preceded executions.¹⁰⁸⁴ Roman citizens were exempt from torture, but if these soldiers are part of Agrippa’s own force, they likely are not Roman citizens. Torture could also be acceptable in some circumstances—for example, to make a traitor reveal accomplices (Quint. *Decl.* 307 intro); those who denied under torture, as these men may have, would not always be believed (Quint. *Decl.* 269.5). That the guards were “led away” could imply that they were led to prison (Luke 23:26; Gen 39:22; 40:3; 42:16, 19; cf. 1 Esd 1:38),¹⁰⁸⁵ but as noted above, prison was normally temporary detention awaiting further trial or, in this case (since they have already been examined), execution (cf. 2 Kgs 25:20–21).¹⁰⁸⁶ The likelier sense here is thus simply that they were being led to execution (cf., e.g., Dion. Hal. *Ant. rom.* 12.6.7, ἀπήχθησαν [to crucifixion]).¹⁰⁸⁷ The attentive reader might recall the cognate verb in Acts 12:4, where Agrippa had planned to bring Peter out to the people for public execution; now he has to settle for four of his own soldiers instead.

While the blame for the action rests with Agrippa rather than with Peter or the

1079. Rapske, *Custody*, 30–31.

1080. “Custodia,” 1029 (although this is not civil law involving prisoners).

1081. Barrett, *Acts*, 588.

1082. Johnson, *Acts*, 214, mentions cross-examination (citing Plato *Symp.* 201E) but notes that when performed by tyrants or household owners, it could include torture (citing Char. *Chaer.* 5.1–2; Pliny *Ep.* 10.96.8).

1083. For *coercitio* as part of preliminary examinations, cf. Lake and Cadbury, *Commentary*, 282–83; on various forms of beatings, see Brown, *John*, 2:874 (though Brown concedes in *Death*, 851, that the NT writers and their audiences probably did not recognize these distinctions). For the possibility of torture in the examination here, see Johnson, *Acts*, 214; Bock, *Acts*, 430 (and sources that they cite). Torture in the strict sense was normally reserved for slaves, but exceptions existed (Schiemann, “Torture,” 795; see the discussion of slaves’ torture in sect. 11 of the excursus at ch. 12).

1084. Jos. *War* 2.306–8; 5.449; Livy 2.5.8; 9.24.15; 10.1.3; 26.40.13; 33.36; 41.11.8; Appian *Hist. rom.* 3.9.3; Cic. *Verr.* 2.5.62.162; Dion. Hal. *Ant. rom.* 3.40.3; 5.43.2; 7.69.1; 9.40.3–4; 12.6.7; 20.16.2; 20.17.2; Arrian *Alex.* 3.30.5. As with Jesus in the Gospels (Keener, *Matthew*, 672–73, from which I borrow this information), they may have been stripped and tied to a pillar or post (Plaut. *Bacch.* 4.7.25; Artem. *Oneir.* 1.78 in Blinzler, *Trial*, 222; see also *m. Mak.* 3:12), then beaten with *flagella*—leather whips into whose thongs a spike or pieces of iron or bone were woven (Apul. *Metam.* 7.30.154; *Cod. theod.* 8.5.2; 9.35.2; Goguel, *Life*, 527; Blinzler, *Trial*, 222). Such a flogging left skin hanging from the back in bloody strips (Klausner, *Jesus of Nazareth*, 350; Blinzler, *Trial*, 222). Various texts (e.g., Hor. *Sat.* 1.3.119; Cic. *Rab. Post.* 5.15–16; Brown, *Death*, 851) attest the horror with which this punishment was viewed. Soldiers normally executed this task in the provinces (cf. Suet. *Calig.* 26; Blinzler, *Trial*, 222); in this case, the soldiers executing the task could take warning for themselves.

1085. Johnson, *Acts*, 214, cites also Hdt. 2.114; 6.81. Years earlier Caesar’s guards “led” (ἦγον) Agrippa himself to detention, slated for eventual execution (Jos. *Ant.* 18.191).

1086. Luke also employs the verb ἀπάγω for one led away to trial (Luke 21:12; 22:66), but that again does not suit this context.

1087. Also ἀπάγει, lead to punishment, in Porph. *Marc.* 25.400; εἰσῆχθη in Xen. *Anab.* 1.6.11; *duci*, the infinitive of the Latin equivalent, in Pliny *Ep.* 10.96.3 (for Christians).

angel, it is noteworthy that the normal course of human events follows here; there is no divine intervention for the guards. Luke does not invite his hearers to celebrate the guards' demise; elsewhere, one of his reliable characters intervenes to preserve a guard's life, where this was possible (16:28).¹⁰⁸⁸

Whereas at Jesus's trial the abuse of a Passover amnesty led to Barabbas's release at Jesus's expense (Luke 23:17; see comment on Acts 3:14), here Peter's release at a Passover comes at his guards' expense. Peter escapes death, but his captors (and in the next paragraph, Agrippa himself) unexpectedly meet death.¹⁰⁸⁹ Luke's tone here, however, does not appear vindictive toward the guards, whose personal treatment of Peter has not been mentioned. Daniel's enemies (some of the older of whom may have even been rescued by Daniel's intervention in Dan 2:12–16) plot his death in 6:4–5, and the narrative includes in Daniel's vindication the death of his accusers and their families (6:24). Here there is neither gloating over the deaths of the guards (cf. Paul valuing his captors' lives in Acts 16:28; 27:24) nor the sense that their death is part of Peter's vindication (contrast 12:23–24). Rather, their death, like James's execution, underlines the seriousness of the threat that Peter has escaped; Agrippa is a much more serious foe than the Sanhedrin has been. Luke's narrative highlights the tyrant's power and cruelty, yet the tyrant who meant to kill Peter wreaks his anger against his own guards instead, in both instances acting as if he holds authority over life and death morally as well as legally.¹⁰⁹⁰ His own fate in 12:23 will set the record straight.

Agrippa then moves from Jerusalem to Caesarea (see comment on Acts 10:1), where he can make use of another palace built by his grandfather (see comment on Acts 23:35; 24:23). Tyre and Sidon are much closer to Caesarea than to Jerusalem, and it is presumably here that the embassy of the Tyrians and the Sidonians finds him. The ideal reader, however (and perhaps especially a northern Mediterranean reader for whom the name Caesarea connotes primarily its Lukan use), recalls that Caesarea was where God employed Peter miraculously (10:28–48). This invites a brief contrast with Herod:

Herod Agrippa I	Simon Peter
Moves from Jerusalem to Caesarea (12:19)	Moves from Caesarea back to Jerusalem (11:2)
Herod claims the power of life and death over others (12:2–6, 19)	Peter is prepared to die for his witness and brings others the message of life (3:15; 5:20; 11:18)
Herod treats Gentiles arrogantly (12:20–21), reluctant to share food with them (12:20)	Peter treats Gentiles humbly (10:25–28, 46–48), even eating with them (11:3; cf. 10:23, 48)
Herod accepts pagan worship in Caesarea (12:22–23)	Peter rejects pagan worship in Caesarea (10:25–26)
The Lord's angel strikes Herod dead (12:23)	The Lord's angel strikes Peter awake, delivering him from Herod (12:7)

None of this suggests that Luke invented the site of Caesarea; Josephus confirms that this was the location of Agrippa's death.¹⁰⁹¹ But Luke chooses to report the location, and this was a location he had already made familiar to his audience.

1088. The literary function of including the guards' death is not vindication (cf. perhaps Dan 6:24) but reinforcing the recognition that Peter's detention had seemed fully secure, so that Agrippa holds the guards responsible.

1089. Cf. also Pervo, *Profit*, 63.

1090. He did hold the power legally, albeit as a Roman client king, in contrast to the Sanhedrin (see comment on Acts 7:54–8:1a). Rome reserved for itself and its delegated authorities the "right of the sword" (also delegated to governors; e.g., Pliny *Ep.* 10.30.1).

1091. Jos. *Ant.* 19.343 (though he had lived especially at Jerusalem, 19.331).

b. Herod Flaunts His Power (12:20–21)

Herod's "anger" (12:20) and arrogance (12:21–23) are in keeping with his behavior in 12:19. God's bringing down the arrogance of kings fits God's character in parts of Luke's Bible¹⁰⁹² and the announcement by Mary in Luke 1:52.

Caesarea (Acts 12:19) was an ideal location for a meeting about trade not only because it was more accessible to Tyre and Sidon¹⁰⁹³ but also because it was heavily engaged in trade. Excavations demonstrate that Josephus's description of Caesarea's harbor, which had constituted a massive undertaking, is accurate in most details, although there were some splendid features of which even Josephus was unaware. Blocks, some of them more than fifty tons, were used to build two breakwaters (one of them 150 ft. wide, the other 200 ft.) running 1,500 feet into the sea. These met to form a sixty-foot entrance for ships northwest of the harbor.¹⁰⁹⁴ Such a site was designed for and naturally invited substantial trade, and archaeologists have discovered five groups of twenty massive storage vaults each (100 in all) along the coast.¹⁰⁹⁵ Because these storage chambers lay on bedrock and included Herodian coins in the lowest level,¹⁰⁹⁶ it is clear that they belong to Herod's massive building program and hence were built about a half century before Agrippa's reign.

The events described in 12:20–23 occurred in 44 C.E. (Jos. *War* 2.219; cf. *Ant.* 19.343), as the latest coins from Agrippa's reign demonstrate. If Agrippa's collapse (described also in Josephus) occurred on Claudius's birthday, it may date to August 1, 44 C.E.;¹⁰⁹⁷ the alternative is the anniversary of Caesarea's founding (as a city dedicated to Caesar), on March 5 of the same year.¹⁰⁹⁸ Just as Peter refuses to fear those who kill the body (Acts 12:6; Luke 12:4) and Agrippa refuses to fear the one who casts into hell (Acts 12:22–23; Luke 12:5), Agrippa here also values wealth more than future judgment (Luke 12:16–21).

Tyre and Sidon shared close ties with each other and with Aradus (Strabo 16.2.15).¹⁰⁹⁹ The geographic proximity of Phoenicia to Palestine had led to important contacts for most of Israel's history as a nation, and Jews were settling in Phoenicia even in the Hellenistic period (Jos. *Ag. Ap.* 1.194); by the first century, Jews had settled in Ptolemais (*War* 2.477), Tyre (2.478), and Sidon (*Ant.* 17.324; *War* 2.479).¹¹⁰⁰ Archaeological evidence suggests that parts of Galilee were economically tied to Tyre.¹¹⁰¹ Tyre was known for its international trade, purple-dye and

1092. E.g., Isa 10:12; 14:4–6; Dan 4:30–33 (cf. repentance in 4:34–37); 5:20 (cf. repentance in 5:21); the king (perhaps apocalyptic?) in Dan 8:23–25; 11:36–39. Intertextual examination with respect to some Greek mythical traditions in the context may also be relevant: in view of connections with Dionysus narratives of prison escapes and judgment on repressive rulers (see Weaver, *Epiphany*, 149–217), Herod plays the role of King Pentheus here (though, again, Luke most certainly does not "invent" his death).

1093. Phoenicia is directly beyond Caesarea in the summary of Pliny E. *N.H.* 5.14.69.

1094. McRay, *Archaeology*, 140.

1095. *Ibid.*

1096. *Ibid.*, 142.

1097. Hemer, *Acts in History*, 166 (citing Suet. *Claud.* 2.1).

1098. Barrett, *Acts*, 592; Witherington, *Acts*, 80; cf. Lake and Cadbury, *Commentary*, 139–40. Some have preferred March 10 (cf. Pesch, *Apostelgeschichte*, 1:368, cited in Bock, *Acts*, 431, who notes both views).

1099. Sidonians had rescued many Tyrians from Alexander's massacre (Quint. Curt. 4.4.16), remembering their kinship, i.e., their alleged common founder (4.4.15).

1100. Stern, "Diaspora," 142. For earlier Phoenicia, see, e.g., Harden, *Phoenicians*; Moscati, *Phoenicians*; Muhly, "Homer and Phoenicians"; accessibly, Peckham, "Phoenicia" (and sources cited there); on Tyre in this period, see, e.g., Edwards, "Tyre" (and sources cited there, including Hanson, *Influence*); earlier, Katzenstein, "Tyre"; on Sidon, Schmitz, "Sidon." Tyre supplanted Sidon's economic prominence in the early first millennium B.C.E. (Liwak, "Tyros," 72).

1101. Meyers, "Judaism and Christianity," 74.

glass industries, and two harbors.¹¹⁰² Recovering from Alexander's conquest in 332 B.C.E., Tyre had regained its old prosperity under the Seleucids, and under Rome it was one of the eastern Mediterranean's chief commercial centers.¹¹⁰³ Phoenician (probably Tyrian) wares in Hellenistic Palestine reveal considerable trade in that period.¹¹⁰⁴ Agrippa had provided public benefactions for the Phoenician city Berytus (modern Beirut), just north of Sidon.¹¹⁰⁵

Phoenicia, however, had long depended on nearby territories such as Palestine for its food (1 Kgs 5:9, 11); this was especially true of Tyre, traditionally an island kingdom completely dependent on trade (Ezek 27:17).¹¹⁰⁶ Joppa exported wheat to Sidon each year (Jos. *Ant.* 14.206); Rome had reminded the Phoenicians that they had no claim on Judean territories (14.197).¹¹⁰⁷ Such economic dependence could prove disastrous if supplies were suddenly cut off; thus, for example, the Phoenician colony Carthage had once depended on the Libyan countryside, taking half its crops until the Libyans revolted (Polyb. 1.71.1–2).

Agrippa had been withholding trade from Tyre and Sidon, and his economic sanctions had achieved their purpose:¹¹⁰⁸ the republics were now suing for terms of "peace," in this case economic nonaggression and a trade agreement.¹¹⁰⁹ (The term "peace" could apply to the ending of civil discord [e.g., Cic. *Phil.* 1.1.1]. On the term, see more fully comment on Acts 10:36; there, as in Luke 2:14, but in contrast to the tyrant here, Jesus brings true peace.) Luke's portrayal here fits Josephus's indication that Agrippa was demonstrating political independence, beginning to build Jerusalem's walls and establish contacts with other client rulers (*Ant.* 19.326–27, 338–41).¹¹¹⁰ Prices rose in time of famine (probably relevant here, at least on a narrative level, in view of the famine context in Acts 11:28–30),¹¹¹¹ and those with wealth would pay

1102. E.g., Jones, Seyrig, and Salles, "Tyre"; Wallace and Williams, *World*, 174. For Tyrian purple in this period, see Pliny E. *N.H.* 5.17.76; further comment on Acts 16:14.

1103. Ward, "Tyre," 249.

1104. Berlin, "Monarchy."

Further in Dionysius of Halicarnassus, see Balch, "Friendship"; in general, Keener, *John*, 1007; idem, "Friendship," 381.

1110. Dunn, *Acts*, 166.

1111. Possibly, on the historical level, Judea was not yet hungry from the famine (if the visit of Acts 11:30; 12:25 indeed belongs to after Agrippa's death); but if he died in August 44, some might already be aware of failing harvests in Egypt. It is also the case that the elite could trade their region's resources more for politics than for the region's need. For the most notorious example, Egypt, the empire's breadbasket, was often underfed because it was feeding Rome (Kraybill, *Cult and Commerce*, 107; see comment on Acts 27:6; cf. *Sib. Or.* 11.279, 290; Charlesworth, *Trade Routes*, 16–34). (Aune, *Revelation*, 1010, generally positive on Roman economic policy, acknowledges Egypt as an exception.) Fertile Asia produced wine for export and hence had to import grain (Kraybill, *Cult and Commerce*, 66–67).

the inflated prices (e.g., *Jos. Ant.* 20.51). Tyre and Sidon were wealthy enough to pay extra for their food but certainly would avoid this if possible.¹¹¹²

Tyrants were known to often exploit their people's wealth for their own pleasures (Max. Tyre 33.4). A brother could warn a governor not to let his temper hurt his governorship (Cic. *Quint. frat.* 1.1.13.37–39), but there was probably no one giving such advice to Agrippa about his anger mentioned here, and he had achieved his aims in producing the submission of the republics of Tyre and Sidon. Pompous rulers to whom local populations deferred are common in ancient literature (e.g., Polyb. 28.20.10–11), and some rhetorically warned that any ruler who became angry and exploitative could become a tyrant (Libanius *Invect.* 7.21). A common OT model relevant here, however, is that of the arrogant king—whether of Babylon (Isa 14:13–14; cf. Dan 3:1–7; 6:7),¹¹¹³ Egypt (cf. Ezek 32:2–3), or, perhaps of ironic relevance here, Tyre (Ezek 28:6, 9)—who exalts himself as divine.¹¹¹⁴

Like Tyre, Sidon remained a pagan city. Its temple of Eshmun was a healing sanctuary, and ruins of its throne of Astarte remain even today.¹¹¹⁵ Sidon was known for the continued worship of Astarte (Ach. Tat. 1.1.1–2). Like Tyre, it was also fairly prosperous. Classical sources such as Homer treat Sidon as synonymous with Phoenicia.¹¹¹⁶ Sidon became a republic after Alexander's conquest and a free city in 111, later confirmed by Pompey.¹¹¹⁷ Its coastal location also secured its status as a major commercial center, and the city was known for “two industries, purple-dyeing and glass-blowing.”¹¹¹⁸ Sidon's relations with its Jewish population were better than those of some areas nearer Judea; it was among the few cities to spare their Jewish populations in the wake of Judea's revolt against Rome (*Jos. War* 2.479).

Ironically in Luke's narrative, God was working among many Phoenicians (Acts 11:19; cf. 15:3; Luke 6:17), explicitly including Tyre (Acts 21:2–3, 7) and Sidon (27:3). As Luke indicates elsewhere, God would tolerate Tyre and Sidon more than his own people's unwillingness to heed his message (Luke 4:26; 10:13–14).

The king's “chamberlain” (τὸν ἐπὶ τοῦ κοιτῶνος, Acts 12:20) was an important official who controlled access to the king.¹¹¹⁹ Although we know of the office, the chamberlain's name is not reported elsewhere, and his omission from other accounts of Agrippa's death emphasizes that Luke's source is independent of Josephus.¹¹²⁰ Luke does not explain what he does, probably suggesting that Luke is again abridging a more complete source or report to which he had access.¹¹²¹ Again, since Philip lived in Caesarea during this period (8:40) and since Luke (or his “we” source) resided in

1112. See Le Cornu, *Acts*, 660. Rulers could not afford to hold out indefinitely, however; the masses were often patient, but not in times of hunger (see Toner, *Culture*, 169; Stambaugh, *City*, 143).

1113. Cf. the possible allusion to Isa 14 in Luke 10:15.

1114. For an allusion to Ezek 28 here, with Agrippa as “king of Tyre,” see Strom, “Background to Acts 12.”

1115. Khalifeh, “Sidon,” 40. Sidon was not as known for rhetoric as some other cities were, but we hear of an apparently half-rate sophist from there in Lucian *Dem.* 14.

1116. Jones and Salles, “Sidon.” In early sources, it was especially the southern region (Tsirkin, “Canaan”).

1117. Jones and Salles, “Sidon” (it became a Roman colony only in the third century C.E.).

1118. *Ibid.* See Pliny E. *N.H.* 5.17.76 (attributing purple to Tyre, as was traditional, and glass to Sidon).

1119. Johnson, *Acts*, 215, cites cognates (Epict. *Diatr.* 1.19.17–23; cf. 3.22.15; 4.7.1–19; BDAG). The term κοιτῶν in the LXX often means a royal bedchamber (Exod 8:3; Judg 3:24; 2 Sam 4:7; 2 Kgs 6:12; 1 Esd 3:3; for others' bedchambers, cf. Judg 15:1; 1 Kgs 20:30; Eccl 10:20; Joel 2:16; Ezek 8:12; wealthy ones in 2 Sam 13:10; Jdt 13:3–4; 14:15; 16:19).

1120. Barrett, *Acts*, 589.

1121. *Ibid.* Pervo, *Acts*, 313–14, thinks that some of Luke's failure to be “coherent” here reflects “excessive compression.” The unexplained involvement of Caesarea's δῆμος also supports an abridgment. Some (e.g., Watson, “Blastus”) think that their “persuasion” of Blastus includes bribery (cf. Xen. *Mem.* 3.11.1), but while this would not be surprising and is not unlikely (see comment on Acts 24:26), Barrett, *Acts*, 589, notes that this meaning is not clear here.

Caesarea at length, it is not surprising that he would have oral access to some details from this location.¹¹²²

One wonders why, in such a compressed account, Luke pauses to mention Herod's having donned royal apparel (12:21), but in this instance we possess another source that indicates why mention of apparel would be preserved in Luke's source (though this is probably not why Luke thought it worthy of mention, since he does not explain it). Josephus notes that Agrippa donned "a garment woven completely of silver," which in the sunlight generated such awe (Jos. *Ant.* 19.344 [LCL, 9:377]) that his flatterers spoke to him as if he were divine (19.345).¹¹²³ Apparel counted for more then than it does today: one could portray as ambition's object an expensive robe and human applause (Sen. *Y. Ep. Lucil.* 69.4). It could generate a public reaction: before one declaimer could speak, his Athenian audience was so moved by "his appearance and costume . . . that . . . a low buzz of approval went round as a tribute to his perfect elegance" (Philost. *Vit. soph.* 2.5.572 [LCL, 195]).¹¹²⁴

Luke himself mentions such splendid royal apparel in connection with luxurious palaces in Luke 7:25 (part of Luke's condemnation of accumulating wealth; cf. 3:11; 12:33; 14:33). There the portrayal likely constitutes a deliberate contrast between the pomp of Herod Antipas (3:19–20, where Luke simply calls him "Herod," as with Agrippa I here)¹¹²⁵ and the humble prophet John, whom Herod martyred.¹¹²⁶ Thus, although Luke's tradition undoubtedly stressed Agrippa's apparel, Luke probably mentions it here to recall the earlier contrast: now a Herod, seeking to murder God's prophets (Acts 12:2–6), will meet the end appropriate to his wicked and luxurious lifestyle. As noted above, God casts down proud rulers from their thrones but exalts the humble (Luke 1:52).¹¹²⁷

c. Herod Receives Worship (12:22)

Shouts were customary in such settings;¹¹²⁸ acclamations were public, united shouts of approval (or, on some occasions, disapproval), often to a ruler or important official.¹¹²⁹ (For acclamations to deities, see comment on Acts 19:28.) Flattery was a common means of nonelites obtaining favors from elites,¹¹³⁰ but the level of flattery here is higher than usual. Because Hellenistic republics such as Tyre and Sidon were

1122. Agrippa would have little reason to persecute Christians in Caesarea (and political disincentive to do so); Jewish-Gentile relations were far more delicate there than intra-Jewish conflicts in Jerusalem (see comment on Acts 10:1).

1123. Conzelmann, *Acts*, 96, compares Nero's extravagant and divine costume during his public tour in Suet. *Nero* 25. Within Josephus's own narrative, Agrippa's ultimately futile apparel might recall his earlier being bound and led away "even in his purple apparel" (*Ant.* 18.191). Roman writers also critiqued the "flattery" of those who called a ruler divine (e.g., Quint. Curt. 8.5.8, 10–11). On flattery more generally, see comment on Acts 4:13.

1124. Lucian mocks one (egged on by flatterers, *Book-Coll.* 8) whose gold, gems, and purple raiment impressed the crowd until his speech proved empty (*Book-Coll.* 9).

1125. Cf. Antipas's mocking gift of a bright robe to Jesus in Luke 23:11.

1126. Theissen, *Gospels*, 26–41, suggests that even the "reed" is a backhanded allusion to Antipas, arguing for the reed as Antipas's emblem on coins before 26 C.E. (pp. 33–34). Although the allusion itself could be broader, the context offers some support for Theissen's proposal, and if he is right, the saying must have originated in Palestine while the memory of Antipas's reed emblem remained fresh—probably in the late 20s, i.e., the time of John's ministry (cf. pp. 39–41).

1127. See esp. discussion in Allen, *Death of Herod*, 116–20, on the divine-retribution theme in Luke-Acts (Luke 1:51–52; noting both "pride" and Herod's *bēma* in Acts 12:21; the vineyard in Luke 20:9–18; Jerusalem in Luke 21:20–24; cf. Luke 10:12, 16). A rich fool's life would be required without prior notice (Luke 12:20).

1128. Conzelmann, *Acts*, 96; also Toner, *Culture*, 158, noting from Pliny *Panegy.* 28 that people shouted acclamations to the emperor, hoping "for largesse in return. They even taught their children the formula to chant."

1129. Aune, *Dictionary of Rhetoric*, 1.

1130. Toner, *Culture*, 35.

dependent on others, they honored “royal patrons as benefactors” and hence could include them among their heroes or deities¹¹³¹ (see comment on divine benefactors at Acts 4:9).

Whereas Herod's audience praises his voice as divine, Luke's audience knows that the real divine voice endorses instead Jesus and his movement (10:13, 15; 11:7, 9; Luke 3:22; 9:35–36; cf. Jesus's exalted voice in Acts 9:4, 7; 22:7, 9, 14; 26:14). Perhaps the hearers mention Herod's voice only to speak of his character (Josephus mentions public response to Agrippa's apparel, not his speech), but probably their mention of “voice” is deliberate. Voice intonation¹¹³² and other aspects of delivery¹¹³³ were essential elements of ancient rhetoric, and Agrippa would have had ample training in rhetoric, enough to elicit praise (normally more restrained). Literature provides other examples of people hailing a great speaker as divine because of his voice.¹¹³⁴ Cicero claims that one Servius Galba “spoke as a god” though he was ignorant of the law (Cic. *De or.* 1.10.40 [LCL, 3:31]); he quotes another Roman with reference to the orator Marcus Antonius's “godlike [*divina*] power of genius” (1.38.172 [LCL, 3:119]). A philosopher was renamed Theophrastus because of “his divinely beautiful [*divinitate*] language” (*Or. Brut.* 19.62 [LCL, 5:351]). In novels, crowds seeing a heroine's beauty might cry out that she was really a goddess (Char. *Chaer.* 3.2.17). Perhaps most relevant is that people in Rome called for Nero's “divine voice,” inviting him to perform for the people.¹¹³⁵ On Agrippa I's pride, ambition, and sometimes overplaying his political capital, see comment at Acts 12:3.

Some ancients warned, however, against the superfluity of applause. Musonius warns that if an audience is moved by a philosopher's rhythm and other signs of rhetorical sophistication, so that they praise him and shout, he has accomplished nothing for philosophy (Mus. Ruf. frg. 49, p. 142.4–12). Truly useful speech, he continues, produces not applause but shame and repentance (142.12–19), silence rather than words (142.19–21; cf. also 142.21–28, citing Hom. *Od.* 18.1–2). Lucian mocks insincere praises of flatterers, such as some parasites who publicly praise a rich man but secretly pray for his death, hoping to obtain some of his wealth.¹¹³⁶ Plutarch condemns the hypocrisy of Athenians for honoring Philip of Macedon and making him a citizen when he was alive but celebrating wildly when he was assassinated (*Demosth.* 22.3). Such flattery was no less insincere in Agrippa's case; after his death, Gentiles (the majority of Caesarea's residents) celebrated (Jos. *Ant.* 19.358).

1131. Judge, *Pattern*, 24. The tyrant's corrupt “benefactions” here contrast starkly with the honorable benefaction in Acts 11:29–30 and 12:25 (with Parsons, *Acts*, 180, following Pervo, *Story*, 180).

1132. E.g., Dion. Hal. *Lit. Comp.* 11; Cic. *Brut.* 43.158; 55.203; 66.234; 91.316; Sen. E. *Controv.* 3.pref. 3; cf. Plut. *Demosth.* 6.3; 11.2; Cic. 3.5; Lucian *Z. Rants* 16; Fredrickson, “Tears,” 172; Marshall, *Enmity*, 385–86; see esp. Dion. Hal. *Demosth.* 54. Some (e.g., Sen. Y. *Ep. Lucil.* 75.2) claimed to leave such theatrics to orators. Along with “physical movement,” “voice quality” constituted the major part of delivery (*Rhet. Her.* 3.11.19–20; Olbricht, “Delivery and Memory,” 161).

1133. E.g., Cic. *Brut.* 82.283; Plut. *Demosth.* 7.2; Pliny *Ep.* 2.3.9; 2.19.2–4, 6; Philost. *Vit. soph.* 1.25.537–38; cf. Fredrickson, “Tears,” 170; Savage, *Power*, 71. Good delivery could be compared with acting (Cic. *Brut.* 55.203; Sen. E. *Controv.* 3.pref. 3), whence it originated (Winter, *Left Corinth*, 35; cf. Plut. *Cic.* 4.3).

1134. Conzelmann, *Acts*, 96, compares another's citation of Dio Cass. 62.20.5 (but notes differences from it; cf. also Tac. *Ann.* 14.15; 16.22, usefully; cf. Schille, *Apostelgeschichte*, 276).

1135. Suet. *Nero* 21.1 (LCL, 2:117). In view of Luke's date and likely non-Italian primary audience, however, I do not see a direct and specific allusion to Nero (contrast, e.g., Schmidt, “Friede”).

1136. Lucian *Dial. D.* 344–45 (15/5, Pluto and Hermes 1); for another case of one praying for another's death to obtain his possessions, see 347 (16/6, Terpsion and Pluto 1); one old man was taking too long to die, and so a beneficiary tried to poison him (accidentally poisoning himself instead), 356–57 (17/7, Zenophantus and Callidemides 2–3). Another designated an aged rich man as an heir, hoping for the latter to die and leave him wealth (instead, the former died first), 358–59 (18/8, Cnemon and Damnippus 1).

Such praise to rulers was customary, especially in the East. In imperial orations (encomia on the emperor, βασιλικοί λόγοι, *Men. Rhet.* 2.1, 368.3), “we propitiate [ἰλασκόμεθα] the emperor with words as we do the divine with hymns and praises [ὑμνοῖς καὶ ἄρεταῖς]” (369.5–7). If his family of origin was not particularly praiseworthy, orators would praise his origin as divine (*Men. Rhet.* 2.1–2, 370.21–23, 25–26); if his birth was not noble, they would claim that he was born from the gods (370.29–371.2). Philo complains that Caligula believed that the Alexandrians really thought him a god, because they addressed him in terms normally reserved for deity (Philo *Embassy* 164). A poor cobbler thought of King Megapenthes as if he were a god because of his wealth (Lucian *Downward Journey* 16). For treating humans, and especially rulers, as divine, see comment on Acts 10:25–26.

Even Gentiles, however, recognized that the proper response to sycophancy toward one who was not the emperor was to deflect the praise. For example, the popular general Germanicus noted that as much as he appreciated his supporters’ goodwill, he rejected their shouts of acclamation as appropriate only to a deity such as the emperor Tiberius.¹¹³⁷ Even Greeks, for whom the line between mortals and deities was sometimes razor thin, felt that taking the honor due only a god (Aeschylus *Ag.* 925) risks provoking the gods’ jealousy and consequent judgment (*Ag.* 946–47).¹¹³⁸ Indeed, many felt that such hubris merited the harshest hell.¹¹³⁹ Maximus of Tyre ridicules those who sought to make themselves objects of others’ worship;¹¹⁴⁰ philosophers¹¹⁴¹ and others¹¹⁴² sometimes summoned hearers to remember that they were but human. The tradition that the noble emperor Vespasian joked that his death would turn him into a god exemplifies the proper response to such praises in the West even for an emperor: he should take such convictions lightly (Suet. *Vesp.* 23).

The only emperors not deified after death in the first century were those who, even in the West, insisted on their deification even in their lifetime. Romans thought self-deification an act of hubris, and such emperors’ “divinity” was typically effaced after death.¹¹⁴³ (The senate decreed *damnatio memoriae* for Domitian and discussed it for Caligula; Nero was also punished posthumously.)¹¹⁴⁴ In Lucian’s satire, those judged most harshly in the afterlife were those who forgot their mortality, expecting others’ reverence (*Men.* 12). On deification, see the more extensive excursus at Acts 10:25–26.

The example of the imperial cult undoubtedly influenced conceptions of power more widely. Ironically, as some of Luke’s audience might know, the events in this narrative follow historically soon after the claims of Gaius Caligula to be divine; his attempt to establish his image in the Jerusalem temple was probably long remembered by early Christians, possibly even helping to shape their eschatological tradition (Mark 13:14; 2 Thess 2:3–4). (On Gaius and other emperors claiming to be

1137. SB 3924 (from Egypt, 19 C.E.). His deflection of honor was insufficient to prevent his assassination or his son’s (Caligula) later claiming divine honors.

1138. The story of Salmoneus was a case in point (Apollod. *Bib.* 1.9.7; Max. Tyre 35.2), and others were like it (Max. Tyre 29.4; Hermog. *Inv.* 1.1.96–97). Cf. the practice, attributed to Philip of Macedon, of having one remind him daily that he was but mortal (Aelian *Var. hist.* 8.15, cited in Conzelmann, *Acts*, 82).

1139. Lucian *Men.* 12.

1140. Max. Tyre 29.4; 35.2. Others also rejected excessive “divinization” (Cic. *Quint. fratr.* 1.1.2.7) or the folly of a barbarian who claimed to be a god so that he could fight Rome (Tac. *Hist.* 2.61).

1141. E.g., Heracl. *Ep.* 9.

1142. Pindar *Isthm.* 5.14–16.

1143. Caesar stopped short of this, but he exceeded the bounds of propriety in Suet. *Jul.* 76.1. On Lucan’s portrayal of Caesar’s hubris against Jupiter, see Nix, “Caesar.”

1144. Gizewski, “Damnatio,” 61 (noting Suet. *Calig.* 60; *Nero* 49).

divine, see comment on Acts 10:25–26.) Josephus's portrait of Agrippa's death for accepting adulation is undoubtedly informed by his knowledge that Agrippa, who once intervened against Gaius's arrogance, should have known better. Josephus says that Gaius, in his arrogance, thought himself a god (*Ant.* 18.256; 19.4) and deals at length with his attempt to erect his statue in the Jerusalem temple and with his death (18.257–309); Gaius also supposedly claimed that his daughter belonged to both himself and Jupiter, leaving ambiguous which of the two fathers was superior (19.11). Although no one in Luke's day would have thought favorably of Caligula, the imperial cult remained in Luke's day a reality with which Luke's theology here could never be reconciled.¹¹⁴⁵ Although Luke was positive toward Roman authority ("Render to Caesar what is Caesar's"), he would not condone the imperial cult ("but to God what is God's," Luke 20:25);¹¹⁴⁶ still, the issue is more safely raised by Luke in connection with Agrippa than with Caesar himself.¹¹⁴⁷

Some of Luke's hearers might remember that Agrippa was known for having tried to prevent Gaius Caligula from exacting worship of himself in the Jerusalem temple (*Jos. Ant.* 18.297–98; *Philo Embassy* 276–329).¹¹⁴⁸ Though the emperor demanded Jewish worship in the temple and Agrippa accepts the less politically sensitive—and presumably, from his standpoint, more tolerable because less biblically informed—praise of pagans, now he is struck down for permitting toward himself the very acclamation he warned the emperor not to demand. His repression of the church presumed divine prerogatives over the lives of God's servants (cf. Acts 9:4); now he reveals this same arrogant attitude for all to see.¹¹⁴⁹ Ironically, Agrippa's mortality is starkly revealed "the very moment he considers himself divine."¹¹⁵⁰

Whereas Peter rejected worship (10:25–26; cf. 3:12), as will Paul (14:11, 15; cf. 28:6), Satan invites worship for himself in return for political favor (Luke 4:6–7).¹¹⁵¹ In this narrative, Agrippa thus follows Satan's model of usurping God's prerogative. The narrative contrasts humble Peter, who escapes death at Agrippa's hands (Acts 12:11), and arrogant Agrippa, who dies at God's (12:23). This contrast also points to a deeper one: not leaders popular with Jerusalemites (12:3) but followers of Jesus truly embody the spirit and heritage of Jewish piety.¹¹⁵²

1145. Klauck, *Magic*, 43–44, even suggests carefully veiled "criticism of the imperial cult" (perhaps rightly, though Klauck's specific connection with the emperor's "voice" appears to presuppose that Luke's audience would read Acts with Josephus in front of them). In the wake of 70 C.E., even Jews might need to be cautious in their critique. Arguing more extensively for polemic against the ruler cult here, see Kauppi, *Gods*, 42–63; again, Josephus indicates that the setting was spectacles for the emperor (*Ant.* 19.343–50; Kauppi, *Gods*, 45), a setting that Luke omits (Acts 12:21's "appointed day"). Josephus's note might reflect pre-Josephan polemic against the imperial cult.

1146. With Talbert, *Acts*, 113.

1147. The latter's claims, happily, do not arise in the course of Luke's narrative, but given the furor surrounding Caligula's claims, the lack of direct critique of the imperial cult (potentially dangerous for a minority sect full of Gentiles) might reflect Luke's deliberate forethought.

1148. Agrippa's letter reported by Philo may well be genuine (see Rajak, "Gaius," 620). Herod the Great had supported the imperial cult among Gentiles but limited its direct impact among Jewish Judeans (see discussion in McLaren, "Jews and Cult").

1149. Cf. Allen, *Death of Herod*, 91. Much of Luke's audience probably would not be familiar enough with Agrippa to catch the connection with Caligula, but probably Luke was (and still more probably his source or sources were).

1150. Ray, *Irony*, 59.

1151. Cf., e.g., Allen, *Death of Herod*, 110–14. Jesus refuses the kingdom offered if he would worship Satan, instead following the way of the cross (Luke 4:5–8).

1152. Later rabbis also condemned Israel for flattering King Agrippa (*t. Soṭah* 7:16; *b. Soṭah* 41b [citing Israel's enemies]), though they also praise him (e.g., *m. Soṭah* 7:8) and do not refer to this incident. Luke does like Gamaliel (Acts 5:34–39; cf. 22:3) and thinks preconversion Saul at least sincere (9:5–8), but he has a lesser opinion of most leaders (23:14–15; 25:3).

d. God Strikes Herod Down (12:23)

In 12:7, the angel “strikes” Peter to deliver him; in 12:23, the angel “strikes” Herod to kill him. These are the only two verses in the NT where an angel “strikes” (πατάσσω), but the LXX uses the verb where the angel of the Lord went out and “struck” the Assyrian army (2 Kgs 19:35), including in the retellings of that same story (Sir 48:21; 1 Macc 7:41).¹¹⁵³ Like the Assyrian king, Herod was a tyrant oppressing God’s people and usurping divine prerogatives (2 Kgs 18:33–35; 19:10–13, 22–24), and God overthrew him.¹¹⁵⁴

As noted below, the more recent tyrant Antiochus Epiphanes provides an even closer model for Agrippa as a tyrant cast down by God. Scripture sometimes announced the destruction of rulers who deified themselves (e.g., Isa 14:12–14), and biblical narratives include the type-scene of the demise of proud rulers (Dan 4:30–33; 5:2–4, 30). Indeed, Agrippa appears here before Tyrians, whose ancient ruler God threatened to bring down to death for thinking himself a god (Ezek 28:2–10). Romans thought of apotheosis; when emperors died, they became deities (see comment on Acts 12:22).¹¹⁵⁵ Luke’s description of Agrippa’s brutal death stands in sharp contrast to such notions.

Luke explicitly declares that the reason for Herod’s demise is that “he did not give God glory.”¹¹⁵⁶ Some commentators suggest a possible connection between giving God glory and the confession of sin,¹¹⁵⁷ but Luke’s other use of the expression “give God glory” (Luke 17:18) is equivalent to “glorifying” or “honoring” God (17:15) for being cured (in Jesus’s ministry, cf. also 2:20; 5:25, 26; 7:16; 13:13; 18:43; 23:47).¹¹⁵⁸ “Glory” often means “honor,”¹¹⁵⁹ and it can include popular “opinion,” the concern for which philosophers condemned as vain.¹¹⁶⁰ Agrippa kept divine honor for himself instead of glorifying the true source of his honor (cf. Rom 1:21). By contrast, the ministry of the apostle he had sought to kill, Peter, led to people glorifying God (Acts 4:21; 11:18), as would the ministry of Paul (13:48; 21:20).

I. JOSEPHUS’S REPORT OF THE EVENT¹¹⁶¹

Josephus also reports the death of Herod Agrippa I; his details differ sufficiently to indicate different sources,¹¹⁶² but points of agreement reflect a clear historical

1153. Cf. also the promise of the angel of the Lord (in the LXX version) to strike the Midianites in Judg 6:16. The term is also used for Balaam striking his donkey, which, in contrast to him, feared the angel (Num 22:23, 32); the only other text using this verb and ἄγγελος together refers to human messengers (2 Sam 11:22). Cf. an angel striking people in 2 Sam 24:16. In *y. Šabb.* 6:9, §3, an angel struck Nebuchadnezzar for speaking of a divine son in Dan 3:25, making him retract.

1154. Luke would not be the only Gospel writer to suggest an implicit comparison between an oppressive Herod and a pagan tyrant (cf. Matt 2:16; Keener, *Matthew*, 107–8).

1155. E.g., Philost. *Vit. soph.* 1.25.534; see comment on Acts 1:9–11.

1156. Cf. a comparable editorial aside explaining that some of Caesar’s murderers suffered vengeance for killing him (Appian *Bell. civ.* 4.1.1).

1157. Cf. Lake and Cadbury, *Commentary*, 140; Haenchen, *Acts*, 387n2. See Josh 7:19; 1 Esd 9:8; John 9:24; Rev 11:13; 16:9.

1158. This is also a frequent sense of the idiom in the LXX (e.g., 1 Sam 6:5; 1 Chr 16:28–29; 4 Macc 1:12) and in early Christianity (Rom 4:20; Rev 4:9; 19:7) and Judaism (1 *En.* 90:40; *Jub.* 25:11; *Test. Ab.* 6:8; 18:11 A). As Neyrey, “Lost,” correctly notes, translating the expression in Luke 17:18 as “thanking God” misses the cultural connection with honor and benefaction.

1159. E.g., Plut. *Themist.* 1.1; *Demosth.* 12.1; Eunapius *Lives* 465.

1160. E.g., Mus. Ruf. 10, p. 76.30; Epict. *Diatr.* 2.21.12–14; cf. Diogenes *Ep.* 9; Porph. *Marc.* 15.253; *Test. Benj.* 6:4. Human reputation depended on people’s whims (Sen. *Y. Ep. Lucil.* 123.16; Dio Chrys. *Or.* 66).

1161. Comparison with Josephus here is not new; John Chrysostom’s exposition of the passage includes a comparison with Josephus’s account of Agrippa’s death (*Hom. Acts* 27); cf. Bede *Comm. Acts* 12.23 (following Euseb. *H.E.* 2.10).

1162. *Pace* those who think Luke dependent on Josephus here (e.g., Pervo, *Dating Acts*, 170–78; idem, *Acts*, 312–13).

tradition behind them. (In many respects it appears to be a common tradition; Josephus and Luke both even draw morals from the story.)¹¹⁶³ As a competent rhetorical historian, Josephus portrays Agrippa's death according to tragic conventions. His use of, for example, the owl as an omen¹¹⁶⁴—if the passage may be so read on the basis of its allusion to an earlier omen in Josephus's account—displays his liberties as a rhetorical historian (much more interested in Hellenistic rhetorical and tragic conventions than is Luke); but no one supposes that he invents Agrippa's death on that occasion, and many aspects of the story will stem from genuine information Josephus possesses.

Although Josephus plainly connects Agrippa's death with his failure to reject divine honors (*Ant.* 19.345–47; cf. also the portent in 19.346), he does not highlight *direct* divine intervention the way Luke does. Perhaps Josephus or his source played down the element of divine intervention because Agrippa I was such a popular king¹¹⁶⁵ or because Hellenistic historians were often restrained in such portrayals.¹¹⁶⁶ The setting in Josephus is games honoring the emperor; that Phoenicians would have come at this time to negotiate, expecting him in Caesarea, is not unlikely.¹¹⁶⁷

Josephus explicitly sets this scene in Caesarea's theater, constructed by Herod the Great,¹¹⁶⁸ where Agrippa often appeared.¹¹⁶⁹ Populations sometimes ventured public requests to rulers in public places (Rome's hippodrome in *Jos. Ant.* 19.24–25), where public requests would place a ruler's reputation for beneficence at stake, providing an opportunity for honor and the danger of shame. Although Acts does not detail the public assembly in Caesarea's theater, Luke's use of δῆμος in Acts 12:22 for hearers almost certainly presupposes it: this was the citizen body, as in 17:5; 19:30, 33 and always in ancient literature.¹¹⁷⁰ (One could argue that these delegates represent citizens of Tyre and Sidon, which were Hellenistic republics, but these are only embassies, not entire citizen bodies.¹¹⁷¹ Thus it almost certainly implies the citizens of Caesarea, thereby assuming a setting more like Josephus's than Luke has made explicit.) One feature of Luke's compression of the story is that the five days

1163. Cf. Dunn, *Acts*, 165. For Agrippa's death in Josephus, see, e.g., Eckey, *Apostelgeschichte*, 274–75.

1164. *Jos. Ant.* 19.346; if βουβών refers to an owl (as is likely from 18.195, since Josephus refers to Roman usage, and *bubo* is Latin for "owl"), it seems odd to have a nocturnal woodland creature in the outdoor theater (the term can also mean "groin," *War* 3.335; *Ag. Ap.* 2.21, 27; cf. Agrippa's stomach pains here); Aelian *Nat. an.* 5.2 thought Euripides used an owl (γλαῦξ) as an omen. Whatever the bird is, it provides literary cohesiveness with the earlier omen in *Ant.* 18.195. The "messenger" (ἄγγελος) may suit Luke's "angel of the Lord," though here it is clearly "messenger."

1165. Haenchen, *Acts*, 388 (though Haenchen's suggested connection between the portentous owl, as an ἄγγελον of bad news [*Jos. Ant.* 19.346], and Luke's angel [also in Klauck, *Magic*, 42] is improbable; the angel of the Lord has already appeared more than once in Acts, including in the preceding context, and so Luke has defined "angel" more narrowly in view of OT narratives).

1166. See the commentary introduction; Keener, *Acts*, 1:344–50, esp. 344–46.

1167. Cf. Haenchen, *Acts*, 388 ("not mutually exclusive").

1168. The theater's Herodian foundations remain today (Avi-Yonah, "Archaeological Sources," 53); on its later use, see, e.g., Retzliff, "Theatres." On this and Herod's other "entertainment" complexes as displays of political power, see Holum, "Building Power." Aerial photography suggests that Josephus may confuse its location with that of the amphitheater (McRay, *Archaeology*, 144).

1169. See Levine, *Caesarea*, 27.

1170. Judge, *Pattern*, 14; Bruce, *Acts*, 250; e.g., Libanius *Topics* 5.4. The NT hapax legomenon δημηγορέω in Acts 12:21 could connect with δῆμος (supporting the connecting with the embassy), but it refers to any deliberative speech to the public assembly (cf. 4 Macc 5:15; Prov 30:31), which could fit speech in the theater.

1171. Tyre's hippodrome could seat about sixty thousand spectators (Ward, "Tyre," 249); one would be hard pressed to fit Tyre's citizens in Caesarea's theater (which seated about four thousand; McRay, *Archaeology*, 144).

of suffering Josephus mentions (*Ant.* 19.350) are eliminated,¹¹⁷² but such compression seems characteristic of many of Luke's accounts, especially where he was not present (Acts 9:23; 20:2–3).

The Acts account is less detailed than Josephus but also less rhetorically embellished for Hellenistic consumption.¹¹⁷³ The differences are mostly matters of omission or perspective (certainly to be expected if they are independent), not contradictions of fact. Likewise, Luke's version lays more of the guilt on the visiting embassy from Phoenicia than on the Caesarean populace (though it also contained many Gentiles; see comment on Acts 10:1), though the latter must have joined in (cf. the δῆμος of 12:22). One would expect Luke's *Tendenz* to point in a different direction (cf. Luke 10:14).

Josephus <i>Ant.</i> 19.343–50	Acts 12:22–23
Agrippa was in Caesarea (19.343)	Agrippa was in Caesarea (12:19)
Setting of games in theater in honor of Caesar; no mention of embassy (19.343–44)	Mention of embassy (12:20), with no description of setting of the event (except that he was on a βῆμα [12:21] and his hearers included ὁ δῆμος, the citizen body of Caesarea [12:22])
Mentions Agrippa's glorious robe as a cause for praise (19.344)	Mentions his royal apparel, though without details that show why this is important (12:21)
No mention of Agrippa's speech before he is struck, but a rhetorically apt one is composed for afterward (19.347)	Agrippa is speaking when he is praised (12:21)
Flatterers acclaim Agrippa as divine (19.344–45)*	Flatterers acclaim Agrippa as divine (12:22)
Agrippa struck just afterward (19.346–48)	Agrippa struck just afterward (12:23)
Because he did not rebuke the acclamation (19.346–47)	Because he did not defer the glory to God (12:23)
He suffered stomach pains for five days (19.348–50)†	He was eaten by worms (12:23)
He died (19.350)	He died (12:23)

* They also plead for mercy ("Be propitious to us," Josephus *Ant.* 19.345 [LCL, 9:378]), which might fit Luke's context of at least the embassy (Acts 12:20).

† Eusebius treats Josephus's account here as corroborating Acts (*H.E.* 2.10.10; Witherington, *Acts*, 390n112).

Some modern scholars reading Josephus's description of the death of Agrippa I suggest that it may portray a ruptured appendix;¹¹⁷⁴ the two accounts taken together might point to peritonitis plus intestinal roundworms.¹¹⁷⁵ Peritonitis could stem from inflammation or rupture of a digestive organ (such as a peptic ulcer), appendicitis that leads to a ruptured appendix, or a perforation of the abdominal wall. It results in severe pain and leads to repeated vomiting; eventually the pain deceptively decreases, at which point death follows quickly.¹¹⁷⁶ The sort of roundworms caused by eating raw pork¹¹⁷⁷ are unlikely for the Jewish King Agrippa; other kinds of intestinal worms, however, are possible, such as tapeworms from infected meat, which can

1172. Unless Josephus created these to parallel five days that Herod survived Antipater in *Jos. War* 1.664–65; *Ant.* 17.191; but this is not likely.

1173. Dibelius, *Studies in Acts*, 20, thinks that the Jewish legend here is in a less embellished, hence earlier, form than in Josephus; also Johnson, *Acts*, 21 (who suspects a Herodian source, Acts 13:1); cf., e.g., Josephus's omen (*Ant.* 19.346) and use of pathos (19.346–50). Like Luke, Josephus had his agendas (with Kennedy, *New Testament Interpretation*, 124).

1174. Haenchen, *Acts*, 388. For this condition and its usual eventuation in peritonitis, see conveniently *AMA Medical Guide*, 512 (though it is sometimes confined, 514).

1175. Dunn, *Acts*, 167 (also suggesting, less probably, poisoning); Larkin, *Acts*, 188 (noting that the roundworms would have been "ten to sixteen inches long" if fully developed and can block the intestines). Allen, *Death of Herod*, 15n31, lists proposals but (15–21) understandably doubts whether modern medical analysis of ancient death scenes is appropriate, especially when literary convention is involved.

1176. *AMA Medical Guide*, 503.

1177. Cf. *ibid.*, 607–8 (on trichinosis).

embed themselves in the intestinal wall and reach a length of more than thirty feet.¹¹⁷⁸ Jewish literature reports diseases of various organs caused by worms.¹¹⁷⁹

Luke's use of *σκωληκόβρωτος* does not characterize ancient medical writers, although similar language does appear in them;¹¹⁸⁰ it appears in Theophr. *Caus. plant.* 3.12.6 and in papyri with regard to plants that are worm-eaten.¹¹⁸¹ Physicians noted various kinds of worms, such as some common in autumn (Hippocr. *Epid.* 2.1.3; 6.1.11); worms in the mouth (in a sickness accompanied by fever, 4.10); or some that one suspects might grow in a cavity caused by a hemorrhage (Hippocr. *Prorr.* 1.138). It appears in some very sick women who vomit up round worms (2.28).

II. DEATHS OF TYRANTS

Such painful deaths were considered appropriate to tyrants, though not recounted of them alone. Thus Sulla died while having a temper tantrum because someone was not paying him money quickly enough (cf. Agrippa's anger in Acts 12:20, though it may not be relevant in 12:21–22); after he shouted angrily, he “vomited his life-breath mingled with blood and threats” (Val. Max. 9.3.8 [LCL, 2:329]). Some of these stories (including Sulla's, below) referred specifically to worms. Not everyone who suffered from worms was thought divinely punished;¹¹⁸² such suffering often followed as punishment for the wicked, however, though sometimes after death (Isa 66:24;¹¹⁸³ *I En.* 46:6).¹¹⁸⁴ Some applied the Isaiah passage to eschatological judgment; so Mark 9:48; probably Jdt 16:17; cf. also the variants in Mark 9:44, 46. Scholars cite many texts in which the wicked were eaten by worms or lice.¹¹⁸⁵ Lucian notes that Alexander the false prophet died of gangrene in the leg and groin, infested by maggots (*Alex.* 59)—a fitting end, he opined, for such a wicked man (*Alex.* 60). Later rabbis told of a high priest who disobeyed Pharisaic teaching and hence was found with worms streaming from his nose and a calf's footprint on his head.¹¹⁸⁶ A later Targum claimed that worms left the excrement of the unfaithful spies who spread a negative report about the land; they crawled into the spies' mouths and devoured their tongues, killing them (*Tg. Ps.-J.* on Num 14:37). The same source claims that worms crawl from the heifer's dung and swarm a murderer, so identifying him for the judges (*Tg. Ps.-J.* on Deut 21:8).

Consumption by worms was counted a fitting end for tyrants.¹¹⁸⁷ The tyrant Sulla's extravagance exacerbated his bowel ulcers, and worms spread through his flesh (Plut.

1178. *Ibid.*, 609. For ancient knowledge about intestinal worms of various kinds, see the sources (Aristotle, Hippocratics, etc.) in Hünemörder, “Worms,” 761.

1179. Le Cornu, *Acts*, 666, cites *b. Hul.* 48a; *Šabb.* 109b (also comparing the gnat in Titus's brain, in *b. Git.* 56b, with nasal myiasis, a “maggot infestation”; this story, however, probably lacks basis in fact) and (p. 666) notes a talmudic “remedy for anal worms” (in *b. Git.* 69b).

1180. Hobart, *Medical Language*, 42–43.

1181. Moulton and Milligan, *Vocabulary*, 580 (citing *PSI* 5.490.14; *P. Grad.* 7.11; Theophr. *Caus. plant.* 5.9.1; cf. *P. Cair. Masp.* 3.67325.2.verso); Cadbury, *Acts in History*, 38; Bruce, *Acts*¹, 250; cf. Haenchen, *Acts*, 387n3.

1182. E.g., *Test. Job* 20:8–9/20:8–10 (Spittler in *OTP* 1:847 n. f notes other texts associating worms with Job, including *ʿAbot R. Nat.* 26–28; *Tert. Pat.* 14.2–7; cf. *Job* 7:5; 21:26).

1183. Interpreted eschatologically in Mark.

1184. Cf. *Eccl. Rab.* 5:10, §2; rabbis associated even posthumous consumption by worms with premortem sin (*Pesiq. Rab Kah.* 11:23; cf. *Sir* 7:17; 10:11; 19:3; *Jdt* 16:17). Normally, rotting precedes worms (*Exod. Rab.* 25:10, remarking on the unusual order in *Exod* 16:20, referring to manna).

1185. E.g., Pliny E. *N.H.* 7.172; Cassander in Paus. 9.7.2–3; Theodoret *Historia ecclesiastica* 3.9 (Bruce, *Acts*¹, 250; Conzelmann, *Acts*, 96–97; Fitzmyer, *Acts*, 491; Barrett, *Acts*, 591).

1186. *Y. Yoma* 1:5 (cf. *t. Kip.* 1:8); cf. *b. Yoma* 19b (esp. R. Hiyya's later comment attributing this act to an angel).

1187. With, e.g., Witherington, *Acts*, 390. The terrible death of tyrants was a classical motif (Klauck, *Magic*, 41; Marguerat, *Actes*, 441). For characteristics applicable to stock tyrants, see Keitel, “Vitellius,” passim (on *Tac. Hist.* 3.36–39).

Sulla 36.2); he was among those known to have died of worms (36.3–4). A ruler too zealous in vengeance died a terrible death from worms (Hdt. 4.205). In a later tradition, a worm split the huge mountain that Og prepared to hurl against Israel, allowing Moses to slay him (*Tg. Ps.-J.* on Num 21:35). Later Christians applied the image to persecutors in *Apoc. Pet.* 27 and Euseb. *H.E.* 8.16.4.¹¹⁸⁸

Of more direct relevance here is that Josephus declares that Agrippa's grandfather Herod the Great had gangrene in his genitals, which bred worms (cf. *Ant.* 17.169; *War* 1.656).¹¹⁸⁹ Josephus describes Herod's suffering as punishment (*Ant.* 17.168), especially for killing those who had torn down his golden eagle (17.167). Whether Luke deliberately transfers the story of the grandfather to the grandson (which is possible), Josephus transferred the worms the other direction (less likely),¹¹⁹⁰ Luke simply confused stories about the two, or worms afflicted both, we cannot easily at this remove conclude.

The closest parallel, however, and one likely known by at least the Jewish Christians in Luke's Diaspora audience (its inclusion in some versions of the LXX demonstrates its popularity) is the death of Antiochus Epiphanes, who made himself a god.¹¹⁹¹ In 1 Maccabees, Mattathias told his sons that the glory of any oppressor of the righteous would be worms (σκώληκας, 1 Macc 2:62); further, Antiochus Epiphanes died in agony because of his sins against Jerusalem (6:8–13, 16). It is thus not surprising that 2 Maccabees should elaborate Antiochus Epiphanes's death in these terms.¹¹⁹² He had tormented others' bowels, and so, when he spoke arrogantly against God, he was smitten with an incurable bowel disease (2 Macc 9:5–6); nevertheless, he continued in his arrogance (9:7). Then worms came up from his flesh and his flesh decomposed so that he stank (9:9); he finally repented, but it was too late (9:12–13). The comparison of a popular Jewish king (cf. Acts 12:3) who oppressed the church (12:2–4) with a Gentile oppressor of God's people fit the early church's sense of identity as the true remnant of Israel (comparable to the Qumran community's view of itself).¹¹⁹³

Everyone would recognize that dying from worms or from something that generated worms would be painful, since diseases of bladder and intestines were considered among the most painful (Cic. *Fin.* 2.30.96).¹¹⁹⁴ Being disemboweled in battle was a hideous way to die (Hom. *Il.* 4.525–26; 20.416–20; 21.180–81; cf. treachery in Judg 3:22; 2 Sam 20:10). Some rabbis considered bowel diseases so painful that they claimed (probably hyperbolically) that these atoned for sin, sparing one from Gehinnom (*b. Erub.* 41b).¹¹⁹⁵ This horrifying end allows a connection of the image with the death of Judas, whether the bursting of his bowels preceded or followed his

1188. Also Claudius Lucius Herminianus in Tert. *Scap.* 3; Judas in Papias frg. 3 (Haenchen, *Acts*, 387n3; Barrett, *Acts*, 591; a parallel perhaps more fitting than Luke's version).

1189. For various opinions of possible medical descriptions today that would fit his sickness, see Cornfeld, *Josephus*, 122n656[a]; Kokkinos, "Herod's Death" (noting that most scholars today suppose cardio-renal failure). Rumor assigned Cambyses a gangrene death as just punishment (Hdt. 3.64; Yamauchi, *Persia*, 125).

1190. That Josephus was fond of such descriptions cannot be denied; he claims that the anti-Semite Apion's genitals rotted as he died in the agony that he deserved (*Ag. Ap.* 2.143–44).

1191. For a survey of various royal oppressors, notably Antiochus IV, and the contribution of their model for the emerging portrait of eschatological "antichrist" figures, see Keener, *Matthew*, 573–75.

1192. See further Diod. Sic. 29.15; Polyb. 31.9; *Jos. Ant.* 12.354–59 (Allen, *Death of Herod*, 35–65). For Antiochus's death in 2 Maccabees as Luke's literary model here, see also Yamazaki-Ransom, "Antiochus," 118–20.

1193. Cf. the same technique, linking Herod the Great with Pharaoh, in Matt 2 (Keener, *Matthew*, 103–4, 107–8). The charge that Jesus was making himself "equal with God" in John 5:18 might reflect 2 Macc 9:12 (overlooked in my John commentary).

1194. Fatally, in this example. Such abdominal pains could result when an eater of simple foods shifts too suddenly to luxurious fare (Cic. *Fam.* 7.26.1–2, nonfatally).

1195. They knew that the righteous could suffer bowel disease, R. Judah ha-Nasi being a case in point (Dvorjetski, "Medical History").

death (Acts 1:18).¹¹⁹⁶ As mentioned above, this affliction also characterizes tyrants¹¹⁹⁷ such as the wicked Jehoram, who was stricken with bowel disease till his bowels came out (2 Chr 21:15, 18–19); later writers amplified this by noting that Jehoram watched as it happened to him (Jos. *Ant.* 9.103)¹¹⁹⁸ or by specifying two days of diarrhea (Tg. 2 Chr. 21:19). Josephus applies the same description to a wicked, anti-Jewish governor named Catullus (*War* 7.439–53), whose bowels fell out to demonstrate that God punishes the wicked (7.453). More generally, God struck down a high priest who sought to demolish a sanctuary wall, so that he died after days of torment (Jos. *Ant.* 12.413; 1 Macc 9:51–56, esp. 9:56). The miserable fate of Flaccus, mangled by his executioners before he died, was judgment for murdering Alexandrian Jews (Philo *Flacc.* 188–91).¹¹⁹⁹ Later rabbis also elaborated on the death of Titus, claiming that a mosquito entered his brain, ingesting his blood till it grew to resemble a small pigeon.¹²⁰⁰

The image of receiving just punishments—that is, those corresponding to the evils one had done to others—was a frequent one in antiquity, as early as the judgments on Pharaoh and his nation for drowning Israel's babies (Exod 1:22; 7:19; 12:29; 14:27).¹²⁰¹ A Jewish historian writing in Greek before Luke claimed that Antiochus was tormented in his bowels δίκαιώς (“justly”) because he had tormented the bowels of others (2 Macc 9:5–6). Even Polybius, who is far more nuanced than earlier Hellenistic historians in dealing with retributive justice, was happy to report “fitting personal ends where he could.”¹²⁰²

Most Mediterranean city dwellers, by this period, shared the conviction that tyranny was a bad system.¹²⁰³ The ideal ruler was gentle and merciful.¹²⁰⁴ Whereas murder was reprehensible under normal circumstances, most considered tyrannicide a praiseworthy act;¹²⁰⁵ this recognition even provided the basis for a standard declama-

1196. Cf. Allen, *Death of Herod*, 23, 120–29 (the narration of retribution in Luke 22:21–22; Acts 1:15–26; as well as retribution in 4:32–5:11).

1197. For a fuller treatment of the conventional type-scene of tyrants' deaths, see Allen, *Death of Herod*, 35–65 (citing, in addition to others above, Diod. Sic. 36.13; Jos. *Ant.* 13.301–19; *War* 1.70–84).

1198. Cf. again Hom. *Il.* 20.418, 420, where Priam's son Polydorus holds his bowels in his hands as he dies; the injury resembles (though with less graphic depiction) 2 Sam 2:23.

1199. Faw, *Acts*, 141, rightly points out other examples of God striking kings in various ways (Gen 14:13–16; Exod 14:10–31; 2 Kgs 19:36–37; Ps 2:1–4); God was glorified by executing judgment (Rev 15, esp. 15:4; purportedly Tannaic tradition in *Lev. Rab.* 24:1). For the retribution theme in philosophers' elaborations of providence, see Allen, *Death of Herod*, 151–55; in apologetic historiography, 155–95 (for Josephus, 182–95).

1200. E.g., *'Abot R. Nat.* 7, §21 B; *b. Git.* 56b; *Lev. Rab.* 20:5; 22:3; *Num. Rab.* 18:22; *Ecl. Rab.* 5:8–9, §4; for his afterlife, cf. *b. Git.* 56b–57a. Some infer from the combined Roman (a fever, Suet. *Tit.* 10.1) and talmudic evidence that Titus died of a brain tumor (Murison, “Death of Titus”); the diagnosis fits the talmudic evidence, but the latter is late and full of fictitious polemical hyperbole. He was accused of entering the holy of holies and blaspheming (*Sipre Deut.* 328.1.1–5; *'Abot R. Nat.* 1 A; *b. Me'il.* 17b); Romans, by contrast, praised him (Val. Flacc. 1.12–14; Suet. *Tit.* 5.2; Tac. *Hist.* frg. 2 [possibly spurious]; cf. Sulp. Sev. *Chron.* 2.30 in Whittaker, *Jews and Christians*, 31–32).

1201. See elsewhere Diod. Sic. 20.62.2; *Jub.* 4:32; Sir 27:25–27; 2 Macc 4:38; 13:7–8; *L.A.B.* 44:9–10; *m. 'Ab.* 2:6; *Sipre Deut.* 238.3.1. See further comment at Acts 3:2.

1202. See Trompf, *Retributive Justice*, 30, citing Polyb. 4.81.5; 4.87.10–11; 5.27.5–9; 32.11.1 for fitting ends, but also noting that he had to do without them wherever history turned out otherwise.

1205. E.g., Polyb. 2.56.15; 11.18.6; Val. Max. 3.3.ext. 2–3; 5.6.ext. 2; Philost. *Vit. Apoll.* 8.25; Athen. *Deipn.* 15.69SB.13; Jos. *Ant.* 19.42; they might end up in Tartarus (Men. Rhet. 2.17, 439.1). Occasionally philosophers persuaded tyrants to abdicate or otherwise freed people from tyranny (Mus. Ruf. 9, p. 72.9–10; Iambl. *V.P.*

tion topic.¹²⁰⁶ By portraying Agrippa as a tyrant, Luke invites readers to celebrate his death, something Agrippa's Jewish citizens did not do,¹²⁰⁷ though some Gentiles did.¹²⁰⁸

Although many hailed Agrippa's becoming king of Judea in 41, he died in 44, just three years later (Jos. *Ant.* 19.351). He actually reigned eight years, but most of these were spent outside Judea, with relatively little direct effect on affairs there. When Agrippa I died, he left three daughters, including Berenice and Drusilla, and a son, Agrippa II (War 2.220; *Ant.* 18.132; 19.354), whom we shall meet later (Acts 24:24; 25:13).

Although the continual prayer earlier in this chapter was for Peter's release (12:5), it might also be associated with the judgment on his persecutor. When Esther and her people fasted, the antagonist ended up dying instead of God's people (Esth 4:16; 7:9–10). The narrative invites the sentiments that generally followed a tyrant's death: people rejoiced when tyrants such as Tiberius (Suet. *Tib.* 75.1; Jos. *Ant.* 18.226–27) or Nero (Suet. *Nero* 57.1) died. Some celebrated Agrippa's death, though these were mainly Gentiles who had chafed under his rule (Jos. *Ant.* 19.356–58); most of his own people mourned (19.349). Herod expired (ἐξέψυξεν)—a description employed elsewhere in the NT only for the judgment deaths of Ananias (Acts 5:5) and Sapphira (5:10).¹²⁰⁹

3. Positive Conclusion (12:24)

Here, as with some other sections (9:31), Luke prefers to end on a positive summary note (12:24). The Greek tragic tradition often ends on sadder notes; most narratives in the biblical tradition, however, had positive endings for the protagonists (even in the book of Job). Herod's death brings closure to the persecution and the literary unit that describes it,¹²¹⁰ just as Paul's conversion brought the church rest earlier (9:31). The mention of Paul immediately afterward may highlight the contrast: Agrippa persecuted the church and died terribly; Paul persecuted the church and God mercifully converted him. Paul's own writings confirm his sense that he had received mercy from the Lord (1 Cor 15:9; Gal 1:15; cf. Eph 3:8; 1 Tim 1:13–16).

This verse is another Lukan summary statement; see comment on Acts 2:41–47; 6:7.¹²¹¹ That the message or the church “grew and multiplied” reflects a Lukan summary motif (cf. Acts 6:1, 7; 9:31; see fuller discussion at comment on Acts 6:7) but also the creation mandate (Gen 1:28; 9:1, 7; 17:20). Luke is aware that such a motif is specifically applied to Israel (Gen 22:17; 26:4, 24; 28:3; 35:11; 48:4; Exod 1:7, 10, 20; Deut 1:10; 7:13), probably citing this as historical precedent for his own formula

32.220; Hermog. *Issues* 59.17–60.8; Syrianus *Commentary on Hermogenes' "On Issues"* 101.21–102.18). Cf. statues of tyrannicides in the Athenian agora (*Athenian Agora*, 58). There was no one whom a tyrant could trust (Dio Chrys. *Or.* 3.59, 116–17; Lucian *Downward Journey* 11; Max. Tyre 14.7); sometimes assassinations came from one's own circle (see, e.g., Collins, “Revolution,” arguing that a palace conspiracy killed Domitian).

1206. E.g., Sen. E. *Controv.* 1.7.intro.; 1.7.1; 2.5.intro.; 2.5.1; 3.6 excerpts; 4.7 excerpts; 9.4 passim; Quint. *Decl.* 2.53; 274.5; 282 intro.; 288; 322 intro.; 329 intro.; 345 intro.; 382 intro (cf. also 269 intro); Hermog. *Issues* 34.10–14; 47.17–48.2; 59.17–60.8; Lucian *Tyr.* passim, e.g., 1; Sopater *Division of Questions* 95.21–98.11; Libanius *Topics* 4.6; 5; Hermog. *Inv.* 3.14.165. This applied also to Zeus's overthrow of the Titans (Men. *Rhet.* 2.17, 438.30–439.1).

1207. In contrast to their probable response to the death of his grandfather (Jos. *War* 1.660, 666; *Ant.* 17.193).

1208. Jos. *Ant.* 19.356–58.

1209. In the LXX, it depicts Sisera's violent death (Judg 4:21, the only use except Ezek 21:7).

1210. See Allen, *Death of Herod*, 77–92.

1211. “The word of God was growing and multiplying” is identical in Acts 6:7; the phrase “the word of the Lord was growing and becoming stronger” in 19:20 is synonymous.

(Acts 7:17). Just as Pharaoh's oppression of Israel caused Israel to multiply still more (Exod 1:12, 16–20; *Jub.* 46:15), so Agrippa's oppression led to the church's increase. In the end, nothing could stop the word of God (cf. Acts 6:7; 19:20; 28:31).¹²¹²

Luke connects his summary statements with their preceding contexts (thus *καί* in 6:7; *οὐν* in 9:31); the weak adversative *δέ* here emphasizes that evil rulers cannot stop the spread of the gospel.¹²¹³ Though Luke may not write to believers facing persecution, the suffering of Christians elsewhere and the warning that all would suffer persecution in time (Luke 21:12–19, esp. 21:17; cf. Acts 14:22) would invite them to find encouragement in this conclusion. Further, the principle extended beyond overt persecution to other obstacles: nothing could hinder the spread of the gospel, which is God's plan.

1212. Ray, *Irony*, 59, notes as irony the contrast between the persecutor's death and the word's continuing spread.

1213. In Acts 13:36, even God's servants have a limited role in his plan; how much more ephemeral the legacy of a tyrant who seeks to usurp God's honor.

PAUL'S DIASPORA MISSIONS (12:25–19:41)

The texture of the narrative of Acts changes once Luke's attention turns fully to Paul. He has oscillated between Paul and others for several chapters (Acts 7:58–12:25) but will now follow Paul's career through the end of the book. Luke's sources appear more often more detailed in this part of Acts. Although the play between heritage and mission continues throughout the book, this second "half" of Acts focuses on mission, exemplified in Paul's calling (9:15–16). When Barnabas leaves on another valid mission, Luke continues to follow Paul's story (15:39–40).

1. Pauline Focus

Luke's attention to Paul might at first seem odd. Ministry to Israel found fertile soil—hearers having sufficient familiarity with Scripture and foundational background that Judean believers grew rapidly to massive numbers (21:20). Paul, by contrast, started what we might call home Bible study groups across the Roman Empire, usually traveling farther from his home base than the Twelve and having to adapt his presentation cross-culturally to audiences that often lacked grounding in the Jewish Scriptures.¹ Even by today's standards, small churches pioneering unfamiliar soil seem unable to compete with well-endowed megachurches.

Moreover, not until 19:11–12 do we hear of Paul's signs on the same level as with the Jerusalem apostles in 5:15–16, and from a human perspective Paul seems to flounder initially when, without Barnabas, he presses into unevangelized territory (16:6–9). He could not, in any case, command the respect the church accorded the Twelve, known to have followed Jesus's earthly ministry. Yet Luke knew that the

1. As Just, *Luke*, 28, notes, "With the beginning of the Gentile mission (Acts 13–28), there are no longer any reports of fantastic numbers of quick converts."

future (or, by Luke's day, the present) of the Jesus movement lay especially with the Diaspora mission that Paul's ministry embodied and nurtured; as the movement's Lord had warned, Jerusalem's days were numbered.

Luke's presentations of Peter, Stephen, and perhaps even (in a different manner) Jesus have prepared for his portrayal of Paul; as Hengel puts it, Luke would have agreed with Paul that he labored more than all the apostles (1 Cor 15:10).² Paul's literary function extends beyond his historical identity: he parallels many of his predecessors in signs and sufferings, thereby vindicating his ministry.³ More critically, he exemplifies the model for the Gentile mission that is Luke's focus (Acts 1:8).⁴ As the high priest once commissioned Saul to stop the spread of the Christian movement (9:1–2; 22:5; 26:10), here the Spirit sends him forth to spread it (13:2–4). He had once inadvertently spread the church by participating in scattering its laborers (8:1, 3–4), but now, as a laborer himself, he spreads it deliberately and among the very Gentiles whose influence he may have once regarded as a threat.

Others had spread the gospel before Paul and Barnabas, including to Cyprus (11:19), but this new mission differed in its deliberate, premeditated, and commissioned focus on evangelization instead of simply carrying the message as one traveled for other reasons. The Pauline mission would also prove distinctive because the theological agenda emerging from it would shape the future of the church (15:1–2). The Antioch mission to Gentiles may have already assumed or argued that circumcision was not necessary (cf. Acts 11:20; 13:1; 15:1; Gal 2:11–12; Jos. *Ant.* 20.40–41), but Paul's training in Scripture and possibly rhetoric, as well as his reports from the Gentile mission, rendered him the most articulate spokesperson for this perspective to the mother church and in the Diaspora (Gal 2:2, 7–9).

2. Narrative Cohesion

Although the Pauline section of Acts relies more on detailed information and less on parallel patterns and summary statements than do previous chapters, patterns (or at least repetition of themes) appear. Goulder's observations, even if overstated, are helpful. He divides Acts 13–28 into four journeys:⁵

Activity	Cyprus and Galatia (Acts 13–15)	Macedonia and Greece (15:40– 18:22)	Asia (18:23–20:38)	Rome
Choosing	13:1	15:40	18:24	20:4
Holy Spirit	13:2	16:6	19:7	21:10
Sermon	13:15	17:22	20:18	28:17
Healing	14:8	16:16	(20:7)*	28:8
Council	15:1	—	21:18	—
False disciple	13:6	15:36	19:13	23:1
Passion†	14:19	16:22	19:23	21:27
Resurrection‡	14:20	16:25	20:7	Acts 28

* I would have cited instead the summary of Pauline miracles in Acts 19:11–12.

† Better: "Suffering" or "Danger."

‡ Better: "Deliverance" or "Upturn in the narrative."

2. Hengel, "Geography of Palestine," 50.

3. On Luke's apologetic for Paul, see the fuller discussion in Keener, "Apologetic."

4. Puskas, "Conclusion: Investigation," 154; cf. Rosenblatt, *Paul the Accused*; for Luke's focus on the Gentile mission, see further comment in the commentary introduction, Keener, *Acts*, 1:506–11.

5. Goulder, *Type and History*, 99; the table, 101 (I omitted one category that was subsumed under another). Italicized references represent those deviating from the anticipated sequence.

The specific pattern is easy to debate. For example, Acts 21–28 (which is certainly not a “missionary journey” in the sense in which Acts 13–14 is) includes journeys to Jerusalem as well as Rome (with a long stay in Caesarea between them). The geographic breaks are not clean and must overlap to support this structure. Also, some themes (such as the Holy Spirit) are mentioned frequently enough that we would expect them to recur in various sections—multiple times, in fact. Some categories (particularly the false-disciple and resurrection categories) are forced.

Nevertheless, what Goulder's pattern on the whole illustrates is the repetition of themes, and one could have discovered others if one were not committed to repeating a particular sequence.⁶ One could have added spiritual-power encounters in the first three sections (13:8–11; 16:16–18; 19:11–20).⁷ The view of some that the Paul of Acts 21–26 corrects rather than recapitulates the wonder-working Paul of Acts 13–19 has little to commend it;⁸ Paul resumes his wonder-working once out of prison (28:8–9), and the idea that the two are incompatible reflects modern Western presuppositions unintelligible both to ancients and to many non-Western Christians (the majority of Christian believers) today (cf. 19:9–12).⁹

The fruits of Paul's mission can fit the pattern Jesus provides of his own mission among Galilean Jews in Luke 8:5–8, 11–15 (from Jesus tradition; Mark 4:3–8, 14–20): some ignore or reject the message immediately; some receive but fall away through hardship (cf. Acts 14:22; 20:30); some fall away through easy lives (cf. perhaps 13:43, 45); but some persevere and bear good fruit. Like the Gospel, Acts focuses on the first and fourth kinds of soil and so does not specifically schematize narratives according to this pattern.

Nevertheless, Luke closes Acts by providing the same Isaiah passage in more detail and revealing that the frequent Jewish rejection in Acts is merely part of the larger pattern already present in Galilee. Some reject, some accept but do not persevere, and others do persevere, and the outcomes cannot be predicted by ethnic heritage. The mission also fits, in addition to Luke's explicit mission material (such as Luke 9:1–6; 10:1–16), the paradigm of compelling people to enter the banquet (14:21–23) and the model of material self-sacrifice (14:26–33).

3. Luke's Own Milieu

This second half (technically more than half) of Acts moves into a broader Greco-Roman framework more clearly than the first part of Acts; moving beyond Jerusalem, Samaria, and Judea, the narrative now advances toward the ends of the earth (Acts 1:8). From this point to the end of the book, Luke is in geographically familiar territory for himself and his audience;¹⁰ he proves particularly detailed in the “we” narratives (16:10–16; 20:5–28:16) and probably has secondhand (rather than tertiary) knowledge from Paul for the details the “we” narratives do not cover.

Although Scripture continues to be quoted explicitly (especially in the synagogue in 13:17–47), cultural allusions in these later chapters additionally presuppose a higher

6. Goulder, *Type and History*, 26, cites also the various helpers (note especially Barnabas in Acts 13–15; Silas in Acts 15–18; Priscilla, Aquila, Apollos, and convert companions later).

7. Some add Acts 28:3–5 in the fourth.

8. Hickling, “Portrait in Acts 26” (though the later portrait might, as he allows, supplement the earlier one).

9. See further comment in Keener, “Teaching Ministry.”

10. See Taylor, “Paul's Missionfield.” The idea that the Greek in these chapters reflects translation of an Aramaic original (Torrey, *Composition*, 62) is difficult to sustain.

degree of Greco-Roman cultural literacy than do the early chapters. Such allusions may include the following:

- A fairly clear allusion to the Phrygian Baucis and Philemon story, in Phrygia (14:11–12)
- Possible allusions to the Trojan War and especially Alexander of Macedon (16:8–10)
- An explicit allusion to the Delphic cult of Apollo (16:16)
- A possible allusion to the Dionysiac theme of liberation (16:26, though this also appeared earlier in Acts 5; 12)
- A barely possible (but quite unlikely) allusion to Jason of Thessaly in Jason of Thessalonica (17:5; the city bears little affinity to the very different region)
- A fairly strong allusion to Socrates, whose role Paul fills (17:18–19)
- Two marked quotations from Greek poets (17:28)
- An explicit challenge to the famous Ephesian Artemis cult (19:24–27)
- Acts 22–26 moving in the world of rhetoricians, especially forensic rhetoric, with its long history
- An oft-cited allusion in 27:9–28:1 to the literary motif of dangerous sea voyages (Hom. *Odyssey*; Ap. Rhod. *Argonautica*; parts of Virg. *Aeneid*; Jonah 1:3–2:10)

Even though he cannot provide classical citations on the same level that Scripture pervades his narrative (undoubtedly disappointing expectations of any non-Jewish elite hearers), Luke makes clear that, like a good intellectual of his era, he is culturally adept. He straddles classical Jewish and Greek, as well as contemporary Hellenistic and Roman, cultures.

4. Historical Reliability

Luke's travel narratives about Paul provide the same entertainment value as their analogues in novels, but they are not novelistic. The geographic movement in the rest of Acts especially parallels the travel narrative in the Gospel of Luke, which arranges genuine tradition (evident at numerous points) as a travelogue (Luke 9:51–19:44).¹¹ Yet good evidence supports Luke's essential reliability here:

1. Both Paul's letters and the rapid growth in the number of eastern Mediterranean Diaspora churches that later claimed him as one of their founders testify that Paul did undertake such travels.¹²
2. Luke's Paul does not visit major centers such as Alexandria or Seleucia on the Tigris but confines his mission, as in his letters, mainly to the "major east-west routes leading to Rome"¹³ (excepting Spain [Rom 15:24, 28], presumably after the strategic mission to Rome is complete).

11. On this section and its arrangement, see, e.g., Bock, *Luke*, 957–64, helpfully (the chiasmus in Talbert, *Reading Luke*, 111–12, is dubious). Dibelius, *Studies in Acts*, 6–7, argues that the itinerary is the basis of composition in Acts 13–19, as speeches are in later chapters; Johnson, *Acts*, 10, points out how Luke uses the form of journeys to structure his narrative. Some suggest that Luke constructed the Gospel's travel narrative on the model he found in Mark 10:1–52 (Aune, *Environment*, 122).

12. This is especially likely if Paul followed the principles of Rom 15:20 (cf. 2 Cor 10:14–16); cf. Kümmel, *Theology*, 138. Some others expressed a desire to do only what was not yet done (Philost. *Hrk.* 33.2).

13. Liefeld, "Preacher," 148.

3. Luke's itinerary for Paul is not contrived;¹⁴ that Paul omits prior evangelization in Macedonia or Greece from his itinerary in Gal 1–2 (cf. Rom 15:19) suggests that, as in Acts, Paul evangelized the nearer province of Galatia before the farther locations.¹⁵
4. It is noteworthy that events belonging to the “we narrative” appear in greatest detail, even when the same itinerary earlier was summarized in cursory fashion.¹⁶

Classical historians find Acts one of the most valuable (even the “most valuable of all”) among our few sources for travel conditions for “the plain civilian or merchant” in this period.¹⁷ Luke's story is driven neither by romance nor by adventures primarily characteristic of specific locations but by the mission that drives the entire second volume (Acts 1:8).

Paul's letters also imply that Paul and Barnabas shared a common mission (Gal 2:1, 9, 13). Moreover, Paul's letter to the Galatians is consistent with the knowledge that Antioch was their base (2:11), so that decisions there could affect Galatia's churches (hence the potential magnitude of 2:11–14).¹⁸ If one accepts the South Galatian hypothesis, which has strongest support from classical historians and seems to fit better with the whole of our evidence (see introduction, below, to Acts 15), Paul's letters also suggest the evangelization reported in Acts 13–14 (though the early date of Galatians, often drawn as a corollary from this reconstruction, need not and probably should not follow).

5. Traveling Missionaries¹⁹

Paul preached in Damascus (9:20), Jerusalem (9:28), and likely (although Luke does not record it) Cilicia (9:30; cf. 15:41); so why does Luke focus so much attention on the new start here? Paul was already in Damascus when he began preaching, and he was from Tarsus in Cilicia, but in this section Paul deliberately crosses geographic barriers for the gospel. Moreover, Paul's mission in this section also deliberately crosses the ethnic and religious barrier by turning to Gentiles (esp. 13:12, 46); although Paul may well have ministered to Gentiles before this, Luke does not give explicit evidence to that effect.

Nevertheless, the team started with the connections most readily available to them. They moved first to Barnabas's home region, where Barnabas may have had

14. See Campbell, “Journeys.” The elaborate chiasmus for Acts 12:25–21:16 (proposed in Miesner, “Narrative,” 204) is, like most chiasmic proposals, too artificial. Dockx, “Voyage,” 215–21, contends that Luke simply created the journey of 13:4–14:28, but this is incredible, given the many points of contact with known geographic detail (especially in the interior of Asia; see discussion below, loc. cit.) as well as Luke's lesser interest in this section (its events are far less detailed than in the “we” material; and why would Luke invent travels to more obscure places such as Iconium and Lystra?).

15. Riesner, *Early Period*, 269–70 (noting that “first” in Phil 4:15 refers not to Paul's first preaching altogether but to his first preaching in Philippi).

16. Knox, *Acts*, 57–58.

17. Charlesworth, *Trade Routes*, 85–86; on the usefulness of Acts for classical scholars, cf. further Nobbs, “Historians”; some additional sources in Keener, *Acts*, 1:197–98.

18. Riesner, *Early Period*, 271. Although being one's spiritual “father” should have counted for something (cf. 1 Cor 4:15; Gal 4:14–15), Paul's competitors in Galatia apparently hailed from Jerusalem and claimed to speak better for the “original” churches than did Paul.

19. The term “missionary” nowhere appears in early Christian literature, but I am seeking to avoid overusing the title “apostles” for Paul and his coworkers since this is also not Luke's preferred usage outside Acts 14. Simply using “Paul and Barnabas” every time would sound repetitious. While they fit broad modern definitions of missionaries as those commissioned to communicate a religious message cross-culturally, however, we cannot read into their activity all the models usually characterizing modern missions.

contacts or connections that gave them readier inroads to synagogues; they moved afterward to Pisidian Antioch, perhaps with a referral from Sergius Paulus (although Luke does not indicate this connection). By contrast, when Paul becomes sole leader of a new mission and the Spirit leads into new territory, the mission moves into fully uncharted territory and begins with some uncertainties (16:6–10).

Travel was often difficult and dangerous, as noted in the commentary introduction.²⁰ Most people avoided travel when possible.²¹ In 2 Cor 11:26–27, Paul includes in his list of sufferings “many journeys” (fitting Acts), along with more specific dangers that he faced on such journeys (such as robbers and dangers from rivers and seas); he likewise notes that he faced dangers in both cities and countryside as well as the sufferings of cold and inadequate clothing. Ancients, however, often respected rugged austerity undertaken for good reasons (e.g., Sall. *Catil.* 54.4–5; *Jug.* 85.33; see comment on Acts 20:33–35). Paul's singleness made his calling easier, as did that of Jesus and John the Baptist (cf. Jeremiah, Jer 16:2–4),²² though the more popular ideal of marriage and children in antiquity²³ is also recognized by Luke (Luke 1:7; 16:18; Acts 18:2; 21:5).

People of means might travel by donkey, by carriage (cf. Acts 8:28) or (especially for rapid journeys) horse, or, especially in the arid East, by camel;²⁴ Paul and Barnabas would have traveled most of the way by foot, necessitated at least by their frequent use of ships, which would have forced them to leave travel animals behind. They could have rented animals, though the cost would be multiplied by the number of travelers on their ministry team. Boats could make a trip much faster than could land travel and were also more economical in the long run.²⁵

Missionaries in the modern sense did not exist; the mobility of religions sometimes depended on traveling merchants or teachers who propagated them,²⁶ though traveling teachers also sought to propagate philosophy or gain honor or income by teaching. Traveling students (e.g., Cicero's two years abroad in *Cic. Brut.* 91.315–16) were far more common than traveling teachers, but we do read of a number of wandering preachers,²⁷ a category that fits Paul's ministry as well.²⁸ (See extended discussion concerning “wandering prophets” and others at Acts 11:27.) Paul does return regularly to the home base of Antioch (14:26; 15:35, 40; 18:22), which, in contrast to Jerusalem, is the center of the Gentile mission.²⁹

Paul's mission differs, however, from most nineteenth- and twentieth-century models of Western Protestant missions³⁰ in that Paul was not dependent on the sending church for support.³¹ Like the first traveling preachers Jesus sent out, he trav-

20. Keener, *Acts*, 1:585–87; cf. also the urban/rural divide in 589–96.

21. MacMullen, *Social Relations*, 97.

22. For familial sacrifice in Luke-Acts, see esp. Luke 14:26; 18:29; perhaps also 2:36; 14:20. Texts such as Luke 17:27; 20:34–35 should not be construed as opposing marriage.

23. See Keener, “Marriage,” 681–82.

24. Stambaugh and Balch, *Environment*, 38.

25. Jeffers, *World*, 37, even estimates 100 mi. a day. This assumes favorable weather conditions and infrequent stops for picking up or delivering cargo.

26. See Stambaugh and Balch, *Environment*, 41–46.

27. See Hock, *Social Context*, 27–28. See, e.g., Pythagoras in *Iambl. V.P.* 32.214.

28. See Liefeld, “Preacher,” 146–51.

29. Porter, *Paul in Acts*, 173, arguing that this creates conflict with Jerusalem (cf. Acts 15; Gal 2; 2 Cor 11:5), though Paul visited Jerusalem earlier (Acts 9:26; 11:30; 12:25).

30. Cf., e.g., Hanciles, *Beyond Christendom*, 91, 355. The language of “missionary journeys,” with the implication of returning to a home base in Antioch, may reflect the lens of the modern Protestant missions movement rather than ancient or medieval commentators (cf. Townsend, “Journeys and Missionary Societies,” more strongly).

31. See Bruce, *Thessalonians*, 38. Support and full-time ministry was an ideal (Acts 6:4; 1 Cor 9:3–14), but one not practical in his case (Acts 20:33–35; see comment there; 1 Cor 9:15–18). The Pauline model

eled lightly (Luke 9:3; 10:4), a lifestyle respected for traveling teachers.³² When (on missions after his first return to Antioch) he settled in locations at greater length, he worked and lived as a part of the cultures that he visited (1 Cor 4:12; 1 Thess 2:9), like (though usually more intentional than) traveling merchants who spread various cults in the empire. This was easier for Paul than for some modern missionaries crossing major cultural chasms. Local customs varied, but Paul knew much of urban eastern Mediterranean culture, and what he did not know he learned along the way. Of course, Paul also differed from most traditional Western missionaries in his emphasis on signs and wonders and in his claim of direct commission from Christ himself.³³

has successors; e.g., much of the missions movement in India involves “tentmakers” (Pothen, “Missions,” 311–13).

32. E.g., Val. Max. 7.2.ext. 3; cf. Liefeld, “Preacher,” 246; Hock, *Social Context*, 29–30; see comment on Acts 20:33–35.

33. For the latter element in Paul's epistolary view of apostleship, see Dahl, *Studies*, 71–72.

PAUL AND BARNABAS IN CYPRUS AND PHRYGIA (12:25–14:28)

Although the narrative has been shifting between Paul (or the Antioch church) and Peter (or the Jerusalem church; with Barnabas connecting the two circles), it is in this section that the focus shifts more narrowly to Paul and his circle.

Antioch appears as the home base for both the benevolent mission to Jerusalem (Acts 11:30; 12:25) and the evangelistic mission in 13:4–14:25; that prayer and fasting are coupled with Paul and Barnabas’s departure from both Antioch and the mission churches reinforces this framing with a double frame. Bligh’s chiasmus here,¹ asymmetrical in the length of its units but more plausible than many he offers, at the very least highlights this double framing:

- A Departure from Syrian Antioch (13:1–2)
- B Prayer and fasting (13:3)
- C Ministry in Cyprus (13:4–13)
- D Paul’s discourse at Pisidian Antioch (13:16–41)
- C’ Ministry in Galatia (13:43–14:22)
- B’ Prayer and fasting (14:23)
- A’ Return to Syrian Antioch (14:24–26)

Reinforcing this framing, Luke rehearses the original commissioning explicitly in 14:26. More symmetrical is the approach of Talbert, who notes the Antioch frame in 13:1–3 and 14:24–28, within which an A-B-A’-B’-A’’-B’’ pattern fits Paul’s “to the Jew first” (Rom 1:16) ideal.²

From Antioch (13:1–3)

- A To Jews (13:4–5)
- B To Gentiles (13:6–12)
- A’ To Jews (13:13–43)
- B’ To Gentiles (13:44–52)³
- A’’ To Jews (14:1–7)
- B’’ To Gentiles (14:8–18, 19–23)

To Antioch (14:24–28)

1. Bligh, *Galatians*, 7.

2. Talbert, *Acts*, 116.

3. Gentiles do appear in Acts 13:43, and Jews appear in 13:45, 50 (though not as objects of positive good news).

The focus of some sections overlaps (e.g., 14:1–7 really addresses both Jews and Gentiles), but the pattern of continuing to start with Israel and then reaching others remains. The ministry of Paul and Barnabas opens with a reaffirmation of the calling (13:2–3), a dramatic power encounter and an official's conversion (demonstrating that God is genuinely with this new mission team, 13:4–12), a speech connecting biblical history to the present gospel, and a typical (somewhat paradigmatic) mission scene providing theological explanation for targeting Gentiles, with attendant conflicts (13:13–52).

1. Consecrated for the New Mission (12:25–13:3)

Like the Seven (6:3), Barnabas and Saul fulfilled “social” ministry for the needy of the Jerusalem church before embarking on ministries reproducing more dramatic elements of the apostolic example. Now they are ready for their apostolic mission beyond where the church has already been established.

a. Return from the Jerusalem Mission (12:25)

Acts 12:25 and 11:30 geographically frame the Jerusalem account of 12:1–24 with leaving and returning to Antioch. This trip for the poor may prefigure a later one (24:17) or, for Luke's narrative, replace it (though Barnabas would not have been involved on a later occasion). It fits Luke's consistent concern for the poor (e.g., 6:1), including earlier by Barnabas (4:36–37).

The famine visit may well have occurred after Agrippa's death but was mentioned earlier only because the prophecy was given earlier (11:28–30).⁴ From a purely narrative standpoint, however, the arrangement may leave the appearance that Paul and Barnabas were in Jerusalem during the time of Agrippa's repression of leaders not acceptable to his religiously conservative popularity base.

Although this verse functions most notably with reference to 11:30, it also leads into 13:1–3. The first mission of Barnabas and Saul was successful; now they would be “sent” (11:30) again (13:3–4). Just as the Seven were engaged in social ministry (6:2–5) before their evangelism ministry (6:8–15; 8:5–40) and just as the Gospel focuses on care for the poor and marginalized more than does Acts, which focuses on proclamation (compare Luke 1:51–53; 4:18 with Acts 1:8; 2:17–18), so Barnabas and Saul proved themselves by caring for needy disciples before being sent on their full evangelism ministry.

Mark had apparently remained in Jerusalem (like Barnabas himself until Acts 11:22), despite the scattering of many Hellenists (11:19), and accompanied Barnabas and Saul to Antioch (12:25). (His presence was not explicitly stated in his mother's house in 12:12, but Luke apparently implies it here.)⁵ Disciples traveled with rabbinic mentors in Judea and Galilee,⁶ and Mark may have wanted to serve Barnabas and

4. E.g., Bruce, *Commentary*, 257; Witherington, *Acts*, 77. For Acts 12:25 and other passages as transitional structural cues, see Longenecker, “Aversion.” We here follow the reading ἐξ (P⁷⁴, A) against εἰς; if the latter is preferred, Luke repeats the mission of 12:25 (the other options would be to translate εἰς “with respect to,” which would be unusual, or to offer an emendation as in Pervo, *Acts*, 316–17 and some MSS); for the debate, see Metzger, *Textual Commentary*, 398–400.

5. If the collection mission occurred after Agrippa's death historically, John Mark could have also returned to Jerusalem at that time. Nave, *Repentance*, 215n320, points out that the mention of Mark in both 12:12 and 12:25 connects the ministry of Barnabas and Saul with that of Peter. Less compelling (though not impossible) is the tentative suggestion that they could have been among the “many” at the house at the time (12:12). Would Luke have neglected the opportunity to articulate such a connection?

6. Le Cornu, *Acts*, 669 (citing *Abot R. Nat.* 6:1 A; 11 B), though noting that there is no clear evidence for traveling outside the land with them. This is, however, what we would expect if this concept of deliberate travel for “mission” is a new one.

Paul as something of a disciple, hence as an apprentice. He remains with them until 13:13, though no judgment is passed on his departure from them until 15:37–38; Luke provides these brief statements in 12:12, 25; 13:5, 13 to prepare for the narrative later in 15:37–39. If what we today call Mark's Gospel was already associated with this Mark, as later tradition claims,⁷ Luke could contrast Mark's companionship with Paul unfavorably with his own;⁸ but as already noted, Luke neglects the opportunity (frequently exercised by others) to severely criticize his predecessors in Luke 1:1 (and does not seem to mind building on Mark's Gospel as a useful framework).⁹

b. The Spirit Sends Barnabas and Saul (13:1–3)

Although Paul has been proclaiming and teaching about Christ (Acts 9:20–22, 25, 28–29; 11:26; 13:1; 26:20), it is only at this juncture that he will begin to enter on the wider ministry to which the Lord called him in 9:15 (also 22:14–15; 26:16–18). The entire leadership of the church has been praying, and again praying together, it sends Paul and Barnabas out; the Antioch church's vision is not simply for its own outreach in Antioch but for God's larger purposes in his world.

I. LEADERS OF THE ANTIOCH CHURCH (13:1)

Before describing the commission, Luke first introduces the extraordinary leadership of the Antioch church, consisting of prophets and teachers. These were spiritually and intellectually mature leaders, who helped to confirm the Gentile mission of Saul and Barnabas. They were also from a geographically diverse background, emphasizing the cosmopolitan character of the church God used at the foundation of the Gentile mission.

(1) Prophets and Teachers

Just as Jesus sent his messengers out by twos (Luke 10:1) and Paul and Barnabas will go forth together (Acts 13:2), team leadership is a frequent characteristic of church leadership in Acts (1:21–26; 2:14; 6:3–5; 13:1; 14:23; see especially Jerusalem's "apostles and elders" in 15:2–6).¹⁰ Luke tells of prophets and teachers in leadership in the church (prophets are respected elsewhere, e.g., in 11:27; 15:32).¹¹ Some scholars argue that the grammar may imply two groups, each introduced by the postpositive coordinating conjunction τε: the first three are prophets, and the final two (Manaen and Saul) are teachers.¹² In favor of this possibility, we can be relatively certain that Manaen, like Saul, would have been well educated (see comments below).

This distinction, however, probably divides their ministries too neatly for the sake of serving our historical curiosity for details. Barnabas was likely also well educated (cf. his Levite and economic status in 4:36–37), and he joined with Paul in teaching

7. See Collins, *Mark*, 2–5; Hengel, *Mark*, 50–53, 81–82; Boyd, *Sage*, 229–37. Mark's limited knowledge of Galilean geography would be expected for the average Jerusalemite (Hengel, "Geography of Palestine," 33n19).

8. Cf. Collins, *Mark*, 5. Since Luke probably depended on neither Pauline nor Petrine epistles, it is possible that he could portray Mark quite differently than they do (Black, "Mark in Acts," 119–20), though he also portrays an earlier stage of Mark's career than they do, and not everyone in Acts shared Paul's opinion (Acts 15:39).

9. Discussed more fully in Keener, *Acts*, 1:173–74, 650, and especially 658–60.

10. See, e.g., comments in Shenk and Stutzman, *Communities*, 48–49; Meeks, *Urban Christians*, 7–8; Murray, "Evangelism"; Green, *Thirty Years*, 210–11; for Paul in both Acts and the letters, Paimoen, "Missionary Team"; Harrington, "Co-workers"; idem, "Collaborative Nature"; Ehrensperger, *Power*, 46–53, 61–62 (in the letters); cf. (for possible coauthorship) Loubser, "Media Criticism."

11. This strongly challenges the notion that Luke, while reporting prophecy, plays down prophets as "a fringe role in the leadership of the church" (Boring, *Sayings*, 40, probably following too closely the traditional Tübingen perspective on Luke's early catholicism); cf. Acts 2:17–18.

12. E.g., Dunn, *Acts*, 172–73; Longenecker, *Acts*, 212 (distinguishing forthtelling from or exposition).

in 11:26.¹³ Further, Paul functions like a prophet in 13:9–11. Part of the logic of the list's arrangement is that the names of Luke's special protagonists Barnabas and Saul frame it. Thus probably all are prophets and teachers¹⁴ (even if some were stronger in one gifting than the other), and the distinction between prophets and teachers is not absolute.¹⁵ Although the connection between the two terms is not technically a hendiadys, teaching and prophecy were probably closely related gifts relevant for leadership in the church.¹⁶

The church's Jewish contemporaries emphasized the teaching role in synagogues, but early Christianity's charismatic/prophetic dimension was quite distinctive (see comment on Acts 2:17–18). Paul's letters rank prophecy second only to apostleship itself and higher than teaching (1 Cor 12:28; cf. 12:29–30; Rom 12:6; Eph 4:11).¹⁷ In Pauline literature, Paul is a teacher (1 Tim 2:7; 2 Tim 1:11) but certainly also a prophet (1 Cor 14:37; cf. 2 Cor 12:1–4; Eph 3:5).¹⁸

In the *Didache*, prophets and teachers appear as charismatic ministries alongside what became more institutional offices such as overseers and deacons (*Did.* 15.1). Both kinds of leadership also appear in Acts (e.g., Acts 14:23; 15:2, 4, 6, 22, 23; 16:4), suggesting diverse, coexisting structures.¹⁹ This is certainly true in Paul's epistles, with leadership gifts being "charismatic" no less than the others (Rom 12:8; governments in 1 Cor 12:28; cf. Phil 1:1; 1 Tim 4:14). Did the prophets noted here migrate from Jerusalem in Acts 11:27?²⁰ There were Cyrenians and others there (Luke 23:26; Acts 2:10), as here, but most of these believers probably migrated earlier, in Acts 11:20. This prophetic leadership may earlier hail from Jerusalem, but it may have simply been trained or motivated by the example of the Jerusalem prophets.²¹

(2) Diverse Leaders

Luke provides a list of the church's leadership, which resembles other leadership lists in Luke-Acts (Luke 6:13–16; Acts 1:13; 6:5) and elsewhere in antiquity (see comment on Acts 1:13). Just as the list of leaders in Acts 1:13 is followed by prayer (1:14) and the designation of another apostle (1:25–26), so here the leaders pray and God sends forth laborers (cf. Luke 10:2).²²

The list suggests a measure of diversity, important for cosmopolitan Antioch.²³ (For a fuller discussion of Antioch and the distinctive shape that early Christian ministry must have assumed there, see comment on Acts 11:19–30.) At least four and probably five of the leaders of the Antioch church were not from Antioch. Because

13. Some see Barnabas and Saul as the teachers, and others as the prophets (Dormeyer and Galindo, *Apostelgeschichte*, 197). Again, this may go beyond Luke in offering distinctions.

14. E.g., Haenchen, *Acts*, 395; Witherington, *Acts*, 391; Twelftree, *People*, 158.

15. Many regard them as interchangeable here; see esp. Aune, *Prophecy*, 265 (noting also Greeven, "Propheten," 29; Bonwetsch, "Prophetie," 420; Baumgarten, *Paulus und Apokalyptik*, 51; Lake and Cadbury, *Commentary*, 141–42); cf. Bock, *Acts*, 439, noting the overlap. Moses is both prophet and teacher in *Test. Mos.* 11:16.

16. Cf. the prophetic empowerment of the two kings who did not inherit or usurp their office (1 Sam 10:6; 16:13; Acts 2:30) as well as of two of the most faithful judges (Judg 4:4; 1 Sam 3:10–21).

17. Paul apparently employs the term "prophet" for whoever prophesies regularly (1 Cor 14:29, 32).

18. For Paul as a prophet in his writings, see Hill, *Prophecy*, 111–15.

19. Dunn, *Acts*, 172.

20. Cf. Johnson, *Acts*, 220.

21. Certainly, pagan mantic phenomena occurred around Antioch (cf. Jos. *War* 1.328), but the teachers would have been immersed in Jewish Scripture as a nearer source. For Antioch in general, see comment on Acts 11:19.

22. Cf. also Matson, *Conversion Narratives*, 51–52.

23. Many scholars today emphasize this point (e.g., DeYoung, Emerson, Yancey, and Kim, *United*, 27–28; Thomas, "Church at Antioch," 152; Dormeyer and Galindo, *Apostelgeschichte*, 198). Some forms of diversity appear even among the Twelve (cf. Keener, *Matthew*, 311).

recent immigrants tend to be less socially rooted, many converts may have come from among the vast numbers who were originally from elsewhere (though long-term ethnic enclaves²⁴ would be more stable).

Luke's mention of their geographic diversity is undoubtedly deliberate; although it is not surprising that more-experienced teachers from elsewhere (Acts 11:20, 25–26) would initially lead a church just fairly recently founded, cosmopolitan Antioch probably also provided members with a variety of geographic backgrounds. Most important, this geographic diversity serves as a harbinger of the Gentile mission, mirroring the range of delegates later traveling with Paul from the Diaspora to Jerusalem (20:4).

The ethnicity of the leaders is less clear than their geographic diversity (which would entail some cultural diversity); although all are from either Asia or Africa (by ancient definitions), none are natives of Antioch, and together they cover at least Cyrene, Cyprus, Galilee, Tarsus, and Jerusalem (though perhaps many or all have lived in Jerusalem at one point). As teachers of Scripture, all are probably Jewish or have a long experience with the synagogue;²⁵ this is clear at least for Saul, Barnabas, and Manaen. But it is possible that some have been proselytes or descended from proselytes (see comments on Niger, below). In urban Antioch, they would speak Greek (helpful for Luke's scattered "Hellenists"), but in Syria's interior and countryside, Aramaic would also be spoken.²⁶ The social level and education are probably high, more so for the leaders than for the church as a whole, especially if Simeon Niger is a Roman citizen like Paul; Manaen certainly has high status even if he is a freedman (see comment below).

We know from Paul's writings that he and Barnabas were associated with Antioch (Gal 2:13).²⁷ The other leaders mentioned here do not appear in Paul's writings (with the possible but unlikely exception of Lucius), but the very detail Luke provides (in light of his method elsewhere, which does not include fabricating names for use in a passing list) supports the likelihood of authentic tradition here.

(3) *Simeon Called Niger*

Simeon was "called Niger," as John was "called Mark" (Acts 12:25), both being common names (see comment on Acts 1:13) that warranted a second name to distinguish them from others with the name. It is thus a reasonable surmise that "Niger" is, in this case, a nickname rather than a given name.²⁸ Luke's normal usage is not so restrictive (Luke 19:2; Acts 1:12; 3:11; 9:11; 10:1; 27:14), but certainly the formula fits second names for those with common names (Luke 6:15; 22:3; Acts 1:23). It could be a Roman citizen name (which would fit Acts 13:9 in the same context, though employing a different formula), but it differs from the other designations; even a Roman birth name of this sort might be given to a darker baby (the way *tertius* would fit a third son, etc.). The name distinguishes this Simeon from others of the same common Jewish name (cf. Gen 29:33; Luke 2:25; 3:30; 15:14): "Simeon the Black" or "Simeon the Dark."

24. Many cities, including Antioch, would have had these (cf. Rohrbaugh, "Pre-industrial City," 144).

25. All except Lucius have Semitic, probably Jewish, names (also Stambaugh and Balch, *Environment*, 148). For the large number of Jews and their status in Antioch, see Jos. *Ag. Ap.* 2.39; further comment on Acts 11:19–20.

26. Millar, *Empire and Neighbours*, 197, noting that "near the Mediterranean coast, all the known documents are in Greek (plus a few in Latin)." See also Rives, *Religion*, 63.

27. Meeks and Wilken, *Antioch*, 15; Barrett, *Acts*, 559, also noting the sending of Barnabas and Saul in Acts 15:1–5, whether it is a separate event (as I would argue) or a doublet of 11:30 (cf. Gal 2:1).

28. At an earlier period, all Roman surnames were nicknames (Plut. *Cic.* 1.2).

Given Luke's concern for diversity in this list and for ethnography (and Africa, cf. Acts 8:26–40) elsewhere, the Cyrenian origin of many of the church's founders (11:20), and the following mention of Lucius from Cyrene, many scholars think that Simeon may have been an African, or (in many cases) more specifically, a North African Jew, descended from African proselytes.²⁹ Far from this being a purely modern, "politically" sensitive interpretation, a nineteenth-century commentator could also point out, "Niger means *black*; and it is not an unreasonable surmise that he was an African convert."³⁰ (Although Luke does not specify a Cyrenian origin here as with Lucius, one might attribute this omission to the nickname "Niger" being more informative; but "dark" complexions were not limited to Cyrene or even North Africa.)

North Africa had long been a prominent part of the Roman Empire; in the imperial period, the fertile Roman province of "Africa," along with Egypt, replaced Sicily as Rome's primary source of grain.³¹ The region had a typical Mediterranean climate, with a moist, cool winter in contrast to its arid and hot summer.³²

Phoenician settlers in North Africa found indigenes, all of whom were reportedly called "Libyans" by others.³³ Greeks called the entire region between the Nile and Gibraltar "Libya," probably following Egyptian sources.³⁴ They could apply the term loosely to North Africans of lighter complexion than dark Egyptians or Ethiopians, though they also sometimes employed the designation "purely geographically"—for example, for Cyrene (Soph. *El.* 701–2, most likely; Paus. 6.19.10).³⁵ Because Greek historians neglected them,³⁶ much of our knowledge of the local eastern Libyan population of Cyrenaica comes from Greek documents from there.³⁷ Archaeological evidence shows, however, that despite considerable nomadism (cf. Fronto *Ep. Graecae* 1.5), many settlements existed, and in the Carthaginian (e.g., Polyb. 1.71.1–2) and Roman periods many coastal Libyans settled as farmers.

Local Libyans also intermarried and traded with the colonists, producing "racial and cultural mixes,"³⁸ although marriages were most common among one's own ethnic stock there.³⁹ (Thus, if non-Jews married Jews in this area with a large Jewish population, it was likely only after conversion to Judaism changed their primary sphere of identification.) Romanized Libyans could also become prominent, such as the famous orator and imperial tutor Fronto (Fronto *Ep. graec.* 1.5).

29. E.g., Pesch, *Apostelgeschichte*, 2:17; Witherington, *Acts*, 392; Dunn, *Acts*, 172; Felder, *Waters*, 47–48; idem, "Racial Ambiguities," 22; idem, *Race*, 39; Le Cornu, *Acts*, 674; Jervell, *Apostelgeschichte*, 340–41; Dormeyer and Galindo, *Apostelgeschichte*, 198; Eckey, *Apostelgeschichte*, 279; Kisau, "Acts," 1323; Bock, *Acts*, 439; Peterson, *Acts*, 374; though contrast Pervo, *Acts*, 322n28 (it "offers no clue"). The connection with "Simon of Cyrene" is plausible but speculative (Johnson, *Acts*, 220; Witherington, *Acts*, 392); Luke spells the names differently (Marshall, *Acts*, 214), and Luke would have likely noted any connection (cf. Luke 23:26) if he knew of it.

30. Abbott, *Acts*, 145.

31. Warmington and Wilson, "Africa, Roman." On Roman Africa (including the Roman literature, church fathers, etc., from there, e.g., p. 169), see Millar, *Empire and Neighbours*, 169–81.

32. Greene, "North Africa," 155.

33. *Ibid.* Discussing North Africa will be relevant as background for Lucius's Cyrenian context regardless of one's conclusions about Simeon Niger's geographic origin. For discussion of the possible relationship with OT peoples, see Heard, "Libya."

34. Greene, "Libya," 357; see Pliny E. *N.H.* 5.1.1.

35. Zimmerman, "Libyes," 515.

36. For Greek prejudice against indigenous North Africans (as against immigrant Jews), see, e.g., Ptolemy *Tetrab.* 2.3.70.

37. Masson, "Greco et Libyens," 387.

38. Reynolds, "Libya," 856.

39. See the study in Cherry, "Marriage."

If “Niger” is a Roman birth name rather than a nickname, it need not designate ethnicity; it was a common Roman name.⁴⁰ Of Paul's many associates with Roman names in Acts and the epistles, the most “respectable” cognomen next to “Paulus” itself may have been “Niger.”⁴¹ The name “Simeon” indicates that the leader here is also Jewish (if a citizen, he, like Paul, would bear his Roman *tria nomina* in addition to his Jewish name; see comment at Acts 13:9; 16:37); it leaves open the question, however, of his original ancestry. Jews sometimes bore the name “Niger”;⁴² because it was a Roman name, some who bore it may have been Roman citizens. We should take note of Frank Snowden's caution at this point:

Conclusions as to racial identity or provenance based on nomenclature, however, must be reached with the greatest caution. In some cases, for example, there may be no relation between the name of a slave and his provenance.⁴³ Further, names denoting color such as *Niger*, *Fuscus*, and *Melas*, type of hair such as *Iras*, or shape of nose such as *Simus*, although sometimes perhaps given to Ethiopians by their masters [in the cases where they were slaves], by no means necessarily implied Ethiopian extraction and may have referred only to the spread of physical characteristics observable in white races. In addition, just as today Mr. Blackman may be a white man and Mr. White a black man, the same was true in the ancient world.⁴⁴

But he notes that some slaves did receive such names and that Ethiopians in the Greco-Roman world often “carried Greek or Latin names.”⁴⁵

If, as seems more likely, the name was a nickname, it may offer a significant pointer to complexion in a way that a birth name would not. We need not assume that Simeon Niger was “Ethiopian”—that is, Nubian (see comment on Acts 8:27)—to warrant the nickname “Dark.”⁴⁶ Although Nubians represented the standard by which blackness was evaluated (see comment on Acts 8:27), northern Mediterranean peoples could call some Egyptians and North Africans “black,” using it in a relative manner.⁴⁷ Thus an Egyptian who settled or was raised in Greece might well bear a nickname or birth name such as “Melas” (Isaeus *Dicaeog.* 40)—that is, “Black.”

Precisely such nicknames based on complexion could be used, however, to distinguish individuals on the basis of the lighter or darker among them. Thus a Ptolemaic list of soldiers distinguishes two individuals named “Apollonius” by calling one μέλας (“black”) and the other λευκός (“white”), the two color extremes (though descriptions of individuals were typically more nuanced in terms of shade).⁴⁸ Thus we have

40. E.g., Brutteditus Niger (Sen. E. *Controv.* 2.1.36; *Suas.* 6.20; Tac. *Ann.* 3.66), Aquilius Niger (Suet. *Aug.* 11), and others (Suet. *Julius* 17.1–2; Fronto *Fer. als.* 3.1; Hdn. 2.7.3–3.4.7; inscription in Deissmann, *Light*, 443).

41. Judge, *Rank*, 36n20.

42. E.g., Jos. *War* 3.11 (killed in 4.359–60). For a Hellenist Jew, too, one name (Theodorus) may be conjoined with “who is also Niger” (*CPJ* 2:140, §§248, 249; 2:143, §261; 2:145, §§269–70; 2:146, §274; 2:147, §§275–76; cf. 2:139, §243; 2:141–42, §254).

43. He cites here Westermann, *Slave Systems*, 96–97.

44. Snowden, *Blacks in Antiquity*, 12, noting also that by the second and third generations, descendants of mixed marriages were no longer clearly discernible.

45. *Ibid.*, 12–13. Former slaves of Roman citizens were also citizens, with Latin names (see comment on Acts 6:9; 22:28).

46. Libyans in the Cyrenian countryside were Berbers, not “black” by our usual Western definition (Yamauchi, *Africa*, 186).

47. Aeschylus *Suppl.* 154–55; Sil. It. 7.682–83; Lucian *Ship* 2; *Sib. Or.* 11.289; see comment on Acts 8:27. Judeans generally considered themselves between black and white complexions (*m. Neg.* 2:1) and could apply the term “Kushite” to anything (*m. Sikkah* 3:6) or anyone (*m. Bek.* 7:6) of dark complexion. Most peoples considered themselves “in between” and the norm.

48. Cameron, “Black and White” (on P.Amh. 62.6–7).

suggested above that because “Simeon” was one of the most popular names, it, like John (Acts 12:12, 25; 15:37), warranted a nickname.

Different peoples have employed color labels with different meanings throughout history, leading to considerable confusion. Color was typically understood in relative terms (see comment on Acts 8:27), a practice retained much later in history; for example, Arabs considered themselves “black” compared with the Persians (who were “red”) but “red” or “white” compared with Africans, whom they considered black.⁴⁹

(4) *Lucius of Cyrene*

“Lucius” (Λούκιος) was also apparently a fairly common name in the Roman world.⁵⁰ It is therefore not necessary to identify the various Lukes in first-century Christian literature; one, for example, is likely Jewish (Rom 16:21) and another likely a Gentile (Col 4:10–14).⁵¹ Attempts to connect the present Luke with the author of Acts are even more improbable despite the antiquity of the church tradition favoring the identification.⁵² Luke elsewhere signifies his presence only by inclusion in the “we,” and it begins much farther north than Antioch. Lucius “of Cyrene” might point away from Lukan authorship for another reason: Luke designates a “Simon” as “from Cyrene” (Luke 23:26) perhaps partly to avoid confusion with other “Simons” (see, e.g., Luke 2:25; 5:4) and could distinguish this “Lucius” from another known to his audience—namely, himself. But he would probably wish to emphasize Cyrene in any case.

Presumably, Lucius was one of the leading Cyrenian Jewish founders of the Antioch church movement (Acts 11:20). Cyrene had an exceptionally large Jewish population in this period.⁵³ Cyrene and the land near it were fertile and prosperous;⁵⁴ it was noted for its grain, oil, and animal products (including ostrich feathers) but especially for silphium, a product unique to this province.⁵⁵ Cyrene produced the philosopher Aristippus, a student of Socrates; members of his philosophic school were called Cyrenaics, after his hometown.⁵⁶ It also produced Eratosthenes son of Aglaos, a noted grammarian, poet, and philosopher (Lucian *Oct.* 27).

The earliest known Greek settlement in Africa was Cyrene (631 B.C.E.; Hdt. 4.150–51), which lent its name in turn to the surrounding region of Cyrenaica.⁵⁷ The five major cities of the region formed a Pentapolis; besides Cyrene, these cities were Apollonia, Euesperides (called Berenice; modern Benghazi), Ptolemais, and Tauchira (Arsinoë).⁵⁸ A praetorian proconsul administered Cyrenaica (with Crete) after 27 B.C.E.⁵⁹ Rome combined Crete and Cyrenaica into a single province governed from Cyrene, but a Roman garrison protected the city after a war during the time of

49. Lewis, *Race and Slavery*, 22. Arab artwork depicted Arabs as white and African slaves (Lewis, *Race and Slavery*, plates 1–10, 16, 19), battle enemies (plates 11–15), and also the Prophet’s companion Bilal (plate 18) as black. See further discussion on relative color also in Usry and Keener, *Religion*, 63–68.

50. It appears among the four praenomina most common; all others were much rarer (Stambaugh, *City*, 94). It need not indicate Roman citizenship here (Judge, *First Christians*, 561).

51. Danker, *New Age*, xii.

52. See, e.g., Bruce, *Commentary*, 260; Hengel, *Acts and History*, 72; Moo, *Romans*, 934. Dunn, *Romans*, 909, thinks that someone with such a significant and long-standing association with Paul would merit fuller greeting in Rom 16:21. Cadbury, “Lucius,” 494, is less dismissive but notes that this “conjecture has not more to commend it than have most such conjectures.”

53. E.g., Jos. *Ant.* 14.115; Ag. *Ap.* 2.44; see comment on Acts 11:20.

54. Strabo 2.5.33; 17.3.21; cf. Pliny E. *N.H.* 5.3.24; 5.5.33.

55. Huss, “Cyrene: History,” 9.

56. Döring, “Cyrenaics.”

57. Greene, “Libya,” 357.

58. *Ibid.*, 357–58.

59. Huss, “Cyrenaica.”

Augustus. Veteran colonists were later settled there “to compensate for the casualties” occasioned by the Jewish revolt of 115–17 C.E. During times of peace, Cyrene apparently enjoyed a “modest prosperity.”⁶⁰ See additional comment at Acts 11:20.

(5) *Manaen, Brought Up with Antipas*

“Manaen” (Μαναιήν) is the LXX name Μαναιημ (2 Kgs 15:14–23; cf. Jos. *Ant.* 9.229–33)—that is, the Greek form of “Menahem” (“Comforter”). Given that king’s wickedness in the OT, it is not surprising that his name did not become common among first-century Jews.⁶¹ (Although some ancient Jews highlighted the Chronicler’s emphasis on Manasseh’s repentance, for some others he was too wicked to have been forgiven.)⁶² Luke informs us that this member of the Antioch leadership team was a person of high social status (a Lukan interest; e.g., Acts 8:27; 10:1; 13:7, 12; 17:4), one who had grown up with Herod Antipas (“the tetrarch,” Luke 3:1, 19; 9:7). This positive member of the Herodian circle contrasts starkly with the demise of a Herod just reported in Acts 12:23. Luke has a special interest in the Herod family (e.g., Luke 23:8–12) and seems to have contacts within Antipas’s extended household, who may have provided Luke or his sources with information (8:3);⁶³ the wife of Herod’s business manager⁶⁴ was a disciple firsthand and perhaps influenced Manaen. Historically, Manaen’s connection with Antipas had long since become useless politically; Antipas was exiled in 39 C.E.,⁶⁵ at which time Agrippa I (Acts 12:1) had taken over his realm. Such a past connection nevertheless spoke well for his social status, especially outside Palestine (and after Agrippa’s death).⁶⁶ This status (and his age, below) did not prevent his participation in a leadership team with progressive outlook on the Gentile mission; his connection with Antipas’s court, in fact, would have given him a far greater exposure to Gentiles and cosmopolitan perspective than would have been available to the vast majority of non-Hellenists growing up in Judea or Galilee.

60. Reynolds, “Cyrene.”

61. Only two appear in Josephus (an Essene in *Ant.* 15.373–78; son of Judas the Galilean, *Life* 21; *War* 2.433–49), and only a few more on ossuaries; the name is probably even rarer in the Diaspora (Williams, “Names,” 92). Winter, “Shortages,” 75, suggests the possibility that this Manaen was grandson of the Essene Manaen who prophesied to Herod the Great (Jos. *Ant.* 15.373); this is plausible but, from extant evidence, currently impossible to aver as more than speculation. Those instances of the name that do appear (cf. Jdt 8:2, 7; 10:3; 16:22–24) presumably evoke the patriarch (Gen 41:51; 46:20).

62. For repentance, see esp. 2 Chr 33:12–15; Pr Man title (Ode 12 title); *b. Sanh.* 103a; *Pesiq. Rab Kah.* 24:11; *Tg. 2 Chr* 33:12–13. Josephus presents Asa largely positively and even tones down Manasseh’s idolatry; cf. Feldman, “Manasseh.” Against R. Judah, the majority of early third-century rabbis insisted that Manasseh would not inherit the world to come (*m. Sanh.* 10:2; cf. *Num. Rab.* 14:1; for a survey, Hoffer, “Manasseh’s Repentance”).

63. Bauckham, *Women*, 189, thinks that much of the “inside” information on Herod (Luke 9:9b; 23:4–12) must derive from the circle of Jesus’s disciples (13:1–5, 31–32), so that Joanna plays a role in originating the traditions. On 165–86, he brilliantly argues that Joanna is Paul’s “Junia” (Rom 16:7), establishing the possibility (though not the certainty, since Andronicus was apparently also an apostle before Paul; Junia may have simply belonged to the synagogue of freedpersons, cf. Acts 6:9). Luke’s own “inside source,” however, could be from Manaen’s reports via Paul. Why would Joanna have information about a former “Herodian” contact in Antioch many years later?

64. Ἐπίτροπος can mean “steward” or “guardian,” quite a high office when serving a king (2 Macc 11:1; 13:2; cf. 14:2) or tetrarch; Chuza was some sort of manager. We need not identify Chuza with Manaen, since Luke, the author of both reports, does not connect them and reports quite different matters about them (Chuza is not himself said to be a believer).

65. It is possible that Luke and some members of his audience would know that this exile was due to Herodias’s machinations and would know that judgments on Antipas were seen as vindicating John (see Jos. *Ant.* 18.113–19, 124–25; Keener, *Matthew*, 397–402, esp. 399; on Antipas, see at length Hoehner, *Antipas*); but neither Luke nor other NT writers mention it.

66. Any ally of the Herodian family may have been respectable in Antioch; Antipas’s “father had been a major benefactor of the city” (Meeks and Wilken, *Antioch*, 15, citing Jos. *War* 1.425).

What does it mean that Manaen grew up with Antipas? The term σύντροφος applies to officials and others “brought up with” a king (e.g., 2 Macc 9:29), such as those brought up with Rehoboam (LXX 3 Kgdms 12:24, based on 1 Kgs 12:8, 10, 14) or with Alexander of Macedon (1 Macc 1:6; despite πάντες, the reference is to free persons here).⁶⁷ It originally meant “nurtured with” (Arist. *N.E.* 1161b),⁶⁸ sometimes connoting “adopted” as a “childhood playmate” (Hdt. 1.99), and was sometimes extended to “a court ‘familiar’ or ‘companion’” (Lucian *Nigr.* 12, 15).⁶⁹ The term applied to anyone raised in the royal court with the princes;⁷⁰ it included princes of other kingdoms raised in Caesar’s court (SIG³ 798).⁷¹ That an emperor was brought up in the palace was considered a basis for praising his status (Men. *Rhet.* 2.1–2, 371.18–20), and being brought up in a palace presumably would increase status for others as well. Rulers’ children did not grow up in total isolation; other noble children or royal relatives were often educated by the same teachers in the royal court,⁷² though the circle was deliberately kept small.⁷³ The laws of guest friendship obligated a prince to remember someone brought up in his grandfather’s home (Fronto *Ad M. Caes.* 3.2). Some scholars think that Manaen would have been a grandson of another Menahem, who was honored by the Herodian dynasty for predicting Herod’s reign (Jos. *Ant.* 15.373–78),⁷⁴ but since this Menahem was an Essene (15.373–74), he would hardly have joined the aristocracy; more likely, if the names have any connection at all, a different child in the household would have been named in his honor.

We need not assume that Manaen was a prince; in fact, he could have been a high-status servant. The Herodian dynasty held numerous slaves,⁷⁵ and the term σύντροφος applied to slaves brought up with the future master of the house, who sometimes became intimate friends of the free child (e.g., Jos. *Asen.* 10:4/6; cf. 17:4, with the verb cognate συντετραμμένα).⁷⁶ Even the birth child of one’s wet nurse shared a special relationship, for which Latin employed the term *conlacteus*, an equivalent to the original sense of σύντροφος.⁷⁷ Some of the nurses would be slaves, though in a wealthy household the preference was for an educated servant whose Greek was excellent.⁷⁸ Slaves raised with a young master were often freed when the master attained maturity.⁷⁹ Royal freedpersons could wield consider-

67. Scholars cite also Polyb. 5.9.4; Diod. Sic. 1.53.5; 1.54.5 (Pesch, *Apostelgeschichte*, 2:17). Cf. 1 Kgs 11:20 (concerning a political marriage).

68. Although cognates are not always determinative, it is noteworthy that the cognate verb συντρέφω can apply to brothers brought up together (4 Macc 13:21, 23; the use in Sir 38:29 is irrelevant). It probably connotes the Greek ideal of age-groups raised together in Dan 1:10 LXX.

69. Johnson, *Acts*, 221.

70. Bruce, *Commentary*, 260–61 (also noting, though not selecting, the looser meaning “courtier” or “intimate friend”).

71. From 37 C.E.; available in Sherck, *Empire*, §42B, p. 79.

72. Suet. *Tit.* 2.

73. Thus one teacher was allowed to bring his whole school to the palace when he was hired to tutor Augustus’s grandsons, on the condition that he not add other students (Suet. *Gramm.* 17).

74. A view noted in Le Cornu, *Acts*, 676, who also mentions a Menahem who later sources claimed served with Hillel as father of the court but left the Sanhedrin for a different “principle” (possibly the same person if he joined the Essenes; cf. *Midr. Cant. Zuta* 8:14; *m. Hag.* 2:2; *y. Hag.* 10b; *b. Hag.* 16ab). Grandchildren often did take a grandparent’s name (Finegan, *Apostles*, 63).

75. Fiensy, “Composition,” 224 (citing Jos. *War* 1.511, 673; *Ant.* 17.199).

76. Hock, “Ethnography,” 112, points out this special relationship in Longus 4.9.3. Romans, however, usually raised freeborn children separately from slaves (Tac. *Germ.* 20, contrasting the German custom).

77. Dixon, *Roman Mother*, 128. Epitaphs often display the affection of grown children for their wet nurses (e.g., in Lefkowitz and Fant, *Life*, 28; cf. Gen 35:8); nurses also cared about the grown children (Suet. *Dom.* 17.3).

78. Plut. *Educ.* 5, *Mor.* 3DE; Quint. *Inst.* 1.1.4–5; Lefkowitz and Fant, *Life*, 110–11, §111; cf. Tac. *Dial.* 29; Lucian *Anach.* 20. On nurses in general, see comment on Acts 7:21.

79. Note, e.g., Rawson, “Family,” 12–13.

able power in this era.⁸⁰ Many freedpersons were teachers,⁸¹ and many educated slaves who served their masters well—for example, by helping their rhetoric—were freed;⁸² one who was freeborn stayed a slave as a master's grammarian and was soon freed.⁸³ Whatever the specific sense of the term,⁸⁴ associates of one's youth normally remained trusted confidants.⁸⁵

To be on intimate terms with a ruler was no small matter. A king should have friends, Dio Chrysostom lectures (*Or.* 3.86), and should have the best friends (3.128); he should avoid flatterers (3.129) and value especially loyalty (3.86–89). “Friend of the king” had long been a particular designation for those close to the ruler.⁸⁶ Roman emperors conferred “friendship” on trusted associates, from whom they drew their primary advisors.⁸⁷ That Antipas was a tetrarch rather than a king would not have diminished the honor among Galileans or those familiar with Antipas through political knowledge or the gospel tradition.⁸⁸

Not only was Manaen of high status because of his background (a background Luke is happy to emphasize); his age would also be of importance. If he was brought up with Antipas (who must have been counted an adult when given his office in 4 B.C.E.), he was probably in his mid-60s at this time.⁸⁹ Age, too, was highly respected in the culture (see comment on Acts 7:58; 14:23).

Alongside two probable Roman citizens (Saul and Simeon, both also Jewish) and a person probably born to at least some wealth (Barnabas, Acts 4:36–37), Manaen filled out a leadership team that would have been socially respectable (cf. 1 Tim 3:2, 7; Titus 1:6).⁹⁰ As in synagogues, socially influential people may have often filled positions of leadership (provided they were also morally qualified). Though elite members in Corinth (where many were Roman citizens) may have resented Paul's artisan status and comparative rhetorical deficiencies (cf. 1 Cor 9:1–18; 2 Cor 10:10; 11:6), the church in Antioch was probably pleased with the standing of its leaders in the broader society. Spiritual qualifications were more important, but in a hostile society, “good reputation” still had its value for the church's public representatives (Acts 6:3).

II. THE COMMISSION (13:2–3)

Like some other critical revelations regarding the Gentile mission in Acts (cf. 10:9, 31), this revelation concerning the mission of Saul and Barnabas came during prayer—indeed, concerted prayer among spiritual and intellectual leaders of a successful church movement. Moreover, although God takes responsibility for calling Barnabas and Saul (for Saul's calling, cf. 9:15–16; 22:14–15; 26:16–18), the Spirit calls the church's

80. On freedpersons of status, especially of the emperor, see, e.g., P.Oxy. 3312.10–13; Pliny *Ep.* 10.27–28; at greater length, excursus on freedpersons at Acts 6:9.

81. Suet. *Gramm.* 15–20; 23.

82. Suet. *Rhet.* 3.

83. Suet. *Gramm.* 21.

84. Witherington, *Acts*, 392, notes my suggestion that Manaen might have been a royal freedman (*Background Commentary*, 357), but emphasizes (as I had noted) the term's broader possibilities.

85. See Judge, *Pattern*, 33; cf. also Isaeus *Dicaeog.* 40.

86. E.g., Diod. Sic. 17.31.6; Diog. Laert. 1.54; Corn. Nep. 9 (Conon), 2.2; 18 (Eumenes), 1.6; Char. *Chae.* 8.8.10; 2 Sam 15:37; 16:16–17; 1 Kgs 4:5; 1 Chr 27:33; 1 Macc 10:20; 15:28, 32; 2 Macc 7:24; *Let. Aris.* 40–41, 44, 190, 208, 225, 228, 318; *Jos. Ant.* 12.366 (though cf. 12.391); 13.146, 225; *Life* 131; cf. *Sipre Deut.* 53.1.3; *Gen. Rab.* 34:9; for Alexander of Macedon, Diod. Sic. 17.31.6; 17.39.2; 17.100.1; cf. Diod. Sic. 33.4.4a.

87. Judge, *Pattern*, 33–34; see Epict. *Diatr.* 4.1.45–50; Mart. *Epig.* 5.19.15–16; Hdn. 4.3.5; inscriptions in Deissmann, *Light*, 378. King Agrippa employed this title on his coins (Meysan, “Coins”). Friendship with Caesar also applied to alliances with peoples (e.g., Strabo 8.5.5).

88. Cf., e.g., friends of Cassander (Diod. Sic. 18.55.1). On tetrarchs, see Bringmann, “Tetrarches.”

89. Hemer, *Acts in History*, 166.

90. Judge, *First Christians*, 565, treats Manaen as a likely Roman citizen, but we cannot be sure.

leadership to share responsibility for sending them out. They are “sent” by the Spirit (13:4) but also by their fellow prophets and teachers who follow the Spirit (13:3).

(1) *Worshipping and Fasting* (13:2)

The verb *λειτουργέω*, which Luke employs only here, could include any kind of public service,⁹¹ but it clearly bears a narrower sense here. The LXX usually applies it to priestly, cultic worship,⁹² an activity difficult to perform without the temple. The term also, however, included the Levitical temple worship of thanks and praise (1 Chr 6:32; 16:4; 2 Chr 31:2).⁹³ To the extent that it retains its frequent cultic associations from the LXX, it is helpful to think of spiritual sacrifices of worship (cf., e.g., Rom 12:1; Heb 13:15; 1 Pet 2:5–9).⁹⁴

Although fasting characterized Jewish tradition (Luke 5:33; 18:12; cf. Acts 27:9) and did not always characterize Jesus’s disciples (Luke 5:33–34),⁹⁵ Jesus himself had fasted at length (4:2), and Luke respected this discipline (2:37); it was appropriate now that Jesus had ascended to the Father (Luke 5:35; Acts 14:23). Fasting was employed only rarely and for brief periods by Greeks⁹⁶ and was even rarer among Romans.⁹⁷ (It was used as a physical remedy as well, either complete fasting or fasting from meat and wine, probably in response to excessive diets.)⁹⁸ As with the Greeks, it was not a common practice in the ancient Near East.⁹⁹ (More generally, fasting for mourning was more widespread; see comment on Acts 9:9.)

Jewish people employed fasting for various purposes.¹⁰⁰ It was particularly prominent in mourning (Jdt 8:6; *Test. Zeb.* 4:1–3),¹⁰¹ sometimes in individual repentance

91. Often compulsory service (Lewis, *Life*, 177–84), perhaps most frequently as a form of taxation (Bell, “Egypt,” 301–2; Llewelyn, *Documents*, 7:93–105, §5), which contributed to Egypt’s economic collapse in the early third century (Bell, “Egypt,” 315). For its most general usage, see Thiselton, “Semantics,” 81.

92. Scores of times, e.g., Exod 35:19; Num 3:6, 31; 4:3–43 passim; 18:2–7; 1 Chr 23:28, 32; Ezek 43:19; 44:11–19; Jdt 4:14; Sir 45:15; Heb 10:11; figuratively, Sir 24:10. This is the usual use of the cognate noun in the LXX (e.g., Exod 38:21; Num 4:24–33; 1 Chr 6:48; 9:13, 19, 28; cf. also Heb 8:6; 9:21), and Luke so employs it (Luke 1:23). Le Cornu, *Acts*, 676–77, notes that Qumran texts employ the equivalent Hebrew terms for temple ministry (1QM II, 1–2; 4Q400 1 I, 4–5; 11QT XXXII, 12; LVI, 9), but as at Qumran, all believers could offer “spiritual sacrifices” (1QS IX, 3–6; X, 6, 8, 22–24).

93. It could also be extended more broadly for others offering worship (Sir 4:14) or service to other people (Sir 8:8; 10:25). Michael is a *λειτουργός* in *Test. Ab.* 15:1 A.

94. See comment on Acts 2:46; esp. 10:4.

95. Holmén, *Covenant Thinking*, 128–57, argues that fasting was a covenant marker, treated by Jesus with relative indifference (Mark 2:18–22).

96. E.g., for a day before initiation into the Eleusinian Mysteries (Clem. Alex. *Protr.* 2.21.2; see discussion in Klauck, *Context*, 92, 96; Rives, *Religion*, 60; cf. Sallustius *Gods* 4 in Parsons, *Acts*, 185); for the Pythia, who fasted before giving oracles (Klauck, *Context*, 186); ten days’ fasting and abstinence before the Dionysiac Mysteries (116).

97. See Henrichs, “Fasting” (offering other examples). Holmén, *Covenant Thinking*, 129, views it as an innovation of the era (noting [133] its specific attachment to Judaism in Tac. *Hist.* 5.4; Suet. *Aug.* 76.3).

98. Pliny E. *N.H.* 28.14.53. Some ancients also abstained from particular foods to avoid harmful spirits (Wimmer, *Fasting*, 115–16). John Chrysostom praises fasting but says that he would be happy if his hearers would merely abandon luxury, eating only what is healthy (*Hom. Acts* 27). Contrary to what one might expect, short-term fasting (but more than twenty-five hours) appears not to have negative health effects (Reiter et al., “Diabetes and Fasting”).

99. Walton, Matthews, and Chavalas, *Background Commentary*, 275.

100. See, e.g., Safrai, “Religion,” 816; for fasting in the Jerusalem Talmud, see Lehnhardt, *Ta’aniyot*; in the OT and early Judaism generally, Berghuis, *Fasting*, 1–35 (3–26 in the OT; 26–34 in early Judaism). Some Pharisees apparently approved of fasting twice a week, as in Luke 18:12 (p. 816; hypothetically in *b. Ta’an.* 12a; on some weeks in *Gen. Rab.* 76:3; Abrahams, *Studies* [1], 125; some fasting four days a week in *b. Ta’an.* 27b, bar.); given the *Didache’s* polemic, the custom may have been widespread (Borg, *Conflict*, 108). Some later Christians rejected Jewish fasts (*Did.* 8.1; *Diogn.* 4.1; cf. *Barn.* 3.1–3, following Isa 58:5–7; *Barn.* 7.3–5). *Herm.* 54.3–56.8 also recalls Isa 58.

101. Cf., e.g., *b. Ta’an.* 18ab; *Meg.* 5b; 6b; *Ḥag.* 17a; 18a.

(Acts 9:9; Sir 34:31; *Pss. Sol.* 3:8;¹⁰² *Did.* 7.4).¹⁰³ Sometimes one fasted in mourning for one's people, for their sins or sufferings (e.g., 2 Bar. 5:7; 9:2; 12:5); Scripture often associates fasting with the mourning for sin involved in corporate repentance (e.g., 2 Chr 20:3; Neh 9:1–2; Dan 9:3; Joel 2:12).¹⁰⁴ Pagans fasted for mourning as well (e.g., Apul. *Metam.* 2.24).¹⁰⁵ (On fasting for mourning, see fuller comment on Acts 9:9.) It could be conjoined with weeping and beseeching God's help (Neh 1:4; Esth 4:3, 16; *Pss* 35:13; 69:10; 2 Macc 13:12; Bar 1:5; Jos. *Ant.* 20.89). Probably growing from the idea of mourning and humbling oneself voluntarily before God, fasting came to be valued for intense prayer,¹⁰⁶ including among later Christians.¹⁰⁷

Some circles used fasting to prepare for revelations (e.g., Dan 10:3; 2 Bar. 20:5; 43:30,¹⁰⁸ as among some later Christians;¹⁰⁹ cf. Exod 34:28; Deut 9:9).¹¹⁰ But though a revelation does occur here (Acts 13:2), it does not seem to be the only purpose of the fasting, which is conjoined with “worshiping” the Lord (13:2) and continues after the revelation conjoined with prayer (13:3). The emphasis here, as in 14:23, is on fasting associated with prayer. Although we do not know for certain whether the leaders' time of praying and fasting sought specific direction for Saul's calling or the revelation simply came in the context of worship more generally, the prophets would not have lacked Jewish models for requesting revelation if they did so; such requests appear commonly in early Jewish texts.¹¹¹

102. *Pss. Sol.* 3:9–10 in a different enumeration.

103. Also *L.A.E.* 6:1; *Test. Sim.* 3:4. Perhaps also *Herm.* 54.1–2 (*Sim.* 5.1.1–2), where it is a regular discipline (albeit one shown inadequate, 54.3–5).

104. This was understood as “humbling” oneself (e.g., Ezra 8:21; Isa 58:3, 5; Sir 34:26 [LXX; 34:31 NRSV; in some versions, 31:26]; *Test. Jos.* 9:2; 10:2; 1 *Clem.* 53.2; 55.6), and hence applicable to OT passages about that demand.

105. Extreme mourning or anxiety, of course, causes loss of appetite (e.g., Dan 6:18; Acts 27:33). Fasting was included in initiation rites at Eleusis (Mylonas, *Eleusis*, 241, 243, 258; for initiation rites in some other cultures, cf. Eliade, *Rites*, 67).

106. E.g., Tob 12:8; Jos. *Life* 290, 293, 295; *Test. Jos.* 4:8; 10:1; *Test. Benj.* 1:4–5; b. *Ketub.* 106a; *Mo'ed Qat.* 15b; *Tg. Rishon* on Esth 1:9; cf. *Ahiq.* 8.10; Armenian *Ahiq.* 2.49. Sanders, *Jesus to Mishnah*, 82, adds Jdt 4:9–11; *L.A.B.* 30:4–5; and for facing drought, esp. *m. Ta'an.* passim, esp. 1:3–7; 2:9; 3:8; cf. similar use of fasting in entreaty in some other cultures (e.g., Fox, “Witchcraft,” 181). Some rabbis believed that fasting could cancel a bad dream (presumably the evil fate portended in it; *Pesiq. Rab Kah.* 28:2). Pagans probably used fasting for prayer and worship as well (Aristoph. *Thesm.* 984; Hor. *Sat.* 2.3.280–81, 291).

107. E.g., *Did.* 1.3; Poly. *Phil.* 7.2 (for help against temptation). Indeed, fasting is better than (κρείσσων) prayer alone (2 *Clem.* 16.4); Iren. *Her.* 2.31.2; Lactantius *On the Manner in Which the Persecutors Died* 11; a number use Tob 12:8–9 (2 *Clem.* 16; Cyprian treatise 4.32 [citing it as Scripture]; 8.5). *Test. Jac.* 7:17 associates fasting with exorcism and is probably a Christian Egyptian monastic work (cf. the variant in Mark 9:29). For fasting in the NT, see Fink, “Responses” (cited by Berghuis); Wimmer, *Fasting*; Berghuis, *Fasting*, 37–76; in the patristic era, *ibid.*, 77–118; monastic practice before the Reformation, 119–28; and subsequent practice, esp. in 128–49 (and sources cited there).

108. Some used fasting in seeking to procure visions or dreams of deceased rabbis (*y. Ketub.* 12:3, §7). Lincoln, *Paradise*, 111, cites also 4 Ezra 5:13, 20; 6:31, 35; 9:23–25; 12:51–13:1; 2 Bar. 5:7ff.; 9:2ff.; 12:5ff.; 21:1ff.; 47:2ff.; *Apoc. Ab.* 9, 12; Merkabah traditions; and *Corp. herm.* 4.5–8; 13.6–7. In paganism, see the possibly first-century C.E. source in Frankfurter, *Religion in Egypt*, 168 (the story of Thessalos of Tralles); some think that Greco-Roman magic may have influenced Jewish abstention for revelations (Swartz, “Angels”). For sensory deprivation producing trance experiences, see, e.g., Pilch, *Visions*, 9; Field, “Possession,” 7; cf. also Gelfand, *Religion*, 169 (citing Field, *Search*, 56, on the Ga people but not observing this phenomenon among the Shona).

109. *Herm.* 9.2 (*Vis.* 3.1.2.); 18.6–7 (*Vis.* 3.10.6–7). Afterward Hermas was warned that his continual fasting for revelations would damage his body (18.7 [*Vis.* 3.10.7]) and hence was exhorted to stop seeking revelations, which would come when God chose (21.4 [*Vis.* 3.13.4]). Earlier, cf. perhaps Col 2:18, 21 (cf. Francis, “Humility,” 168–71, noting patristic sources; Rowland, “Visions”).

110. For Moses's fast as preparatory to receiving revelation, see Philo *Mos.* 1.67–70; *Dreams* 1.33–37 (Lincoln, *Paradise*, 111); perhaps 1 *Clem.* 53.2; *Barn.* 4.7; 14.2.

111. See Johnson, *Prayer*, 34–36, thoroughly citing *Let. Aris.* 314, 315; 1 *En.* 9:4–11; 25:2; 40:8; 43:3; 46:2; 52:3; 54:4; 56:2; 60:9; 61:2; 108:5; 2 *En.* 7:3; 18:2; 68:7 A; 2 *Bar.* 14:1–19; 38:1–4; 49:1–3; 54:6;

As a form of self-humbling, fasting was ascetic in the general sense, and such asceticism naturally appealed to pagans who devalued the body.¹¹² The situation in Judaism is more complicated (partly because scholars lack a single, agreed-on meaning for “asceticism”). Although some have viewed Qumran practices as ascetic,¹¹³ and Gentiles viewed some Jewish practices as ascetic,¹¹⁴ Jewish practices were normally meant more as rigorous expressions of self-sacrifice¹¹⁵ than as a devaluing of the body.

Later rabbis particularly limited the ascetic element to prevent dangerously extreme acts of rigor.¹¹⁶ Even on Yom Kippur,¹¹⁷ they refused to require fasting for minors, though the latter were to begin accustoming themselves to it before reaching maturity.¹¹⁸ Those whose health or safety would be endangered were not to undertake fasts (*t. Ta'an.* 2:12);¹¹⁹ pregnant and nursing mothers were excused from even most regular fasts, except the most crucial (2:14).¹²⁰ Because the Sabbath was for rest and joy, one normally was to avoid fasting then (*Jub.* 50:12, a capital offense; *b. Ta'an.* 27b;¹²¹ *Erub.* 41a; *y. Ta'an.* 3:11, §3; 4:3, §2; but cf. *b. Šabb.* 11a).¹²² Some rabbis went so far as to claim that fasting for the purpose of self-denial was sinful.¹²³ Fasting conjoined with prayer need not be ascetic in the strictest sense; it is, however, a deliberate sacrifice and expression of commitment.

(2) *The Spirit's Call* (13:2)

Since Luke has already mentioned that the leaders are (or at the least include) prophets, he does not need to explain how “the Holy Spirit spoke.” Early Judaism,

3 *Bar.* 1:1–2, 7; 2:4, 6; 3:5; 4:1, 5, and passim; 17:3; 4 *Ezra* 2:44, 46; 3:4–36; 4:23; 6:38–59; 8:63; 12:7–9; 13:14–20.

112. Cf. the philosopher Carneades in Val. Max. 8.7.ext. 5; possibly Pythagoras in Iambl. *V.P.* 3.16–17. In subsequent centuries, Syria was a dominant center of Christian asceticism.

113. E.g., Simon, *Sects*, 81, 110; Thiering, “Source,” 444 (emphasizing Qumran’s consistency with the rest of Judaism); idem, “Suffering”; cf. Yamauchi, “Qumran and Colosse,” 143–44. Steiner, “Warum asketisch?,” thinks that Josephus and Philo interpreted Qumran “asceticism” through a philosophic grid but it, in fact, was simply following Torah from an extreme eschatological orientation.

114. Cf. Fronto *Ad M. Caes.* 2.7. Pagans wrongly associated the Jewish Sabbath with fasting (Strabo 16.2.40; Mart. *Epig.* 4.4.7; Suet. *Aug.* 76; Sevenster, *Anti-Semitism*, 130–32; Whittaker, *Jews and Christians*, 70).

115. Although I mean “sacrifice” more generally, see also the narrower sense in *b. Ber.* 17a. Fasting was often used for repentance (e.g., Sir 31:26; *Test. Reub.* 1:10; *Test. Jud.* 15:4) and desperate prayer (*Jdt* 4:13).

116. On the nonasceticism of the rabbis, see Abrahams, *Studies* (1), 12; Montefiore and Loewe, *Anthology*, 523–29; Bonsirven, *Judaism*, 159–60; with regard to fasting, Abrahams, *Studies* (1), 125. It may appear occasionally (*Song Rab.* 3:6, §2).

117. For the atoning value of fasting then and on other days, see (for later rabbis) *Eccl. Rab.* 9:7, §1.

118. *M. Yoma* 8:4; *t. Kip.* 4:1–2; *b. Ketub.* 50a. Because the Tosefta reference apparently opposes Shammaite practice, it may not represent the dominant view of pre-70 c.e. Judean Pharisees.

119. Voluntary fasts were usually from sunset until sunset (*y. Ned.* 8:1, §6).

120. And sometimes even then if necessary (*m. Yoma* 8:5); see further discussion in Safrai, “Home,” 764 (citing also *t. Ta'an.* 3:2; *Miqw.* 7:6). The Targum recognizes that fasting was expected on Yom Kippur (*Tg. Ps.-J.* on Lev 23:27), and adds a punishment for those who do not fast then—but also with the qualification “those who are able” (*Tg. Ps.-J.* on Lev 23:29).

121. Earlier tradition attributed to “our rabbis” a warning against fasting even on Friday (because of the Sabbath) or Sunday (for other reasons, including because of “Nazoreans”); by that period, Christians also forbade fasting on Sunday, but because of celebrating the resurrection (*Tert. Cor.* 3, in Cullmann, *Worship*, 11n1).

122. Also true in Dupont-Sommer’s reconstruction of CD XI, 4–5 (cf. the old Zadokite document, XIII, 13), but many read it differently (the parallel in 4Q271 5 I, 1–2 also has a lacuna). The *Fasting Scroll* listed other particular days when fasting was not permitted, but many rabbis fasted on those days anyway, not regarding it as authoritative (*y. Ned.* 8:1, §1). For a prohibition during Hanukkah, see *b. Šabb.* 21b (“our rabbis”). Some think that the Qumran sectarians rejected Esther partly because of its fast during Passover (Kalimi, “Esther”).

123. Some rabbis in *b. Ta'an.* 11a.

like the OT, most often associated the Spirit with prophecy or with divinely imparted wisdom or knowledge.¹²⁴ Thus Josephus, for example, frequently interprets texts about the Spirit's coming on one as meaning that one prophesied;¹²⁵ when he comments on passages in which God spoke, he often introduces prophetic spokesmen.¹²⁶ Given the context of Acts 13:1, therefore, scholars often accept the likelihood that the Spirit spoke here through the prophets.¹²⁷ Luke follows the style of some OT passages in not specifying how God spoke, but his contemporaries would understand well enough.¹²⁸ Oracles often function as a plot-moving device (see comment on Acts 2:23),¹²⁹ including here. (On the historical level, one may note that in charismatic movements prophecies need not be fictitious to serve this narrative function. In some circles real people do arrange their lives around prophecies.)¹³⁰

The content of the oracle commands the church or its leaders to “set aside” Barnabas and Saul. Paul employs the same term (ἀφορίζω) for his calling (Rom 1:1; Gal 1:15),¹³¹ and both in Acts (Acts 19:9; cf. Luke 6:22) and in one of his letters (2 Cor 6:17) he calls people away from the dangers of compromise with false ideologies. Paul in Gal 1:15 probably echoes Jer 1:5 with reference to Jeremiah's prophetic calling, though the LXX employs a different term. “The work” refers to their ministry (Acts 14:26; 15:38), as at times in Paul (1 Cor 9:1; 15:58; 16:10; Eph 4:12; Phil 1:22; 2:30; 1 Thess 1:3; 5:13; cf. 1 Tim 3:1; 2 Tim 2:21; 3:17; 4:5). Luke uses the term here for “calling” (προσκαλέομαι) both for salvation (Acts 2:39, following Joel 3:5 LXX) and for immediate direction by the Spirit (Acts 16:10). The perfect tense indicates that they are already called to this work (cf. 9:15), information they may well have already shared with their colleagues.

A message from the Spirit (reemphasized in 13:4) will encourage the missionaries when they face hardships. Dio Chrysostom declares that an oracle instructed him to “travel ‘until you come to the farthest part of the earth’ (243.10–11), an Odyssean lifestyle only bearable under direct orders from God (243.12–17).”¹³² Yet this revelation is only one of many encouragements and directions from the Spirit they will receive (see Acts 13:9; 15:28; 16:6–7; 20:22–23): the Spirit not only is intimately connected with their mission but is its author (1:8; 2:17–18).

Luke can presume that his audience will understand that the commission includes reaching Gentiles; the Antioch church has already begun this outreach at home (11:20–21), and Paul's mission (the work to which the Spirit has already called him, 13:2) includes bringing Christ's name to Gentiles (9:15).

124. See, e.g., Keener, *Spirit*, 10–13. Turner, *Power*, 105–18, correctly notes some other texts, but apart from the moral and salvific texts mostly related to Ezek 36–37 (pp. 119–37; Keener, *Spirit*, 8–10), many of these are related to expectations for prophets. See excursus on prophecy at Acts 2:17–18.

125. Isaacs, *Spirit*, 47 (comparing Jos. *Ant.* 4.165 with Num 27:18; 5.285 with Judg 13:25; 8.295 with 2 Chr 15:1; 9.168 with 2 Chr 24:20).

126. Aune, *Prophecy*, 265.

127. E.g., Haenchen, *Acts*, 396.

128. Aune, *Prophecy*, 265.

129. See, e.g., Aune, *Environment*, 134, citing Herodotus in particular for a historian emphasizing oracles (e.g., Hdt. 8.77), revelatory dreams (e.g., 1.34; 2.141; 3.124; 7.19), and portents (e.g., 6.27; 9.120).

130. This became obvious to me when writing an account of how my wife and I came together (forthcoming); at least in my own initial draft (at this point we are not sure how the work will be edited), the prophecies provided narrative cohesiveness, foreshadowing, and sometimes theological commentary, yet they were not fictitious and were sometimes preserved almost verbatim.

131. Some scholars have compared his use of the verb with LXX language for sanctification (Cranfield, *Romans*, 1:53; cf. Betz, *Galatia*, 108), including in the prophets (Cerfaux, *Church*, 177–78); others, less compellingly, with the root meaning of Pharisaism (Nygren, *Romans*, 45–46; Hunter, *Romans*, 24).

132. Alexander, “Biography,” 59 (on Dio Chrys. *Or.* 13), contrasting this message with a different oracle to Socrates.

(3) *Sending Off with Prayer* (13:3)

Antioch “sends off” the team by commissioning and probably provisioning them (13:3),¹³³ as Antioch will do on other occasions (15:3; cf. 15:40). (Not all Paul’s sendings-off will prove so pleasant; cf. 17:10, employing the same Greek term as 13:4.) It is reasonable to assume some exchanges of affection when the party was departing, as found in 20:36–38; 21:5 (though these are precipitated by a more certain finality in the farewells). When superiors sent off inferiors, they typically gave advice (Men. Rhet. 2.5, 395.8–10), but peers normally just expressed deep love (395.12–17).

Although the church has already been worshiping and fasting (Acts 13:2), it now fasts and prays more for Barnabas and Saul before sending them out on their enormous task (13:3). It is possible that the continued prayer here is to test the prophecy,¹³⁴ but three reasons suggest that a different idea is in view. First, Christian prophets apparently usually discerned prophecies more quickly (1 Cor 14:29; 1 Thess 5:20–22),¹³⁵ although we need not assume that they always did so. Second, the prayer here is probably connected with the laying on of hands; various ministry-related functions of laying on of hands (noted here and unrelated to discernment) frequently accompany prayer for the same purposes as the laying on of hands (Acts 6:6; 8:15, 17; 28:8). Third and most important, Lukan parallels point to the prayer’s being for ministry. Jesus prayed before appointing apostles (Luke 6:12–13); prayer normally precedes the sending of laborers (10:2; cf. Acts 1:24–26). Commissioning or divine or angelic declarations of calling also appear elsewhere in Luke-Acts (e.g., Mary, Luke 1:26–38; Jesus, 3:21–22; the Twelve).

That the church leaders who laid hands on them were prophets is significant, and prophecies may have followed at this sending off (cf. 1 Tim 4:14),¹³⁶ just as prophecy may have precipitated the sending (Acts 13:2). Laying on of hands appears frequently in Acts, often conjoined with prayer (6:6; 8:15–17; 28:8); it applies to commissioning for a ministry task (6:6),¹³⁷ imparting the Spirit (8:17; 19:6), and healing (9:12, 17–18; 28:8; cf. 14:3; 19:11).¹³⁸ In view of the earlier biblical background of blessing (see comment on Acts 6:6), the primary focus in view here is prayer for God’s empowerment for their task (as in 6:6, and related to 8:17; 19:6).

2. Mission in Cyprus (13:4–12)

This mission of Paul and Barnabas goes beyond previous ministry to Gentiles by its deliberate nature.¹³⁹ In view of Paul’s dramatic calling (9:15), it starts small, with preaching from one place to another; Paul and Barnabas could persist, however, through faith in Christ’s calling. This new mission further exemplifies Luke’s emphasis on the Spirit’s power for mission. They are “sent by the Spirit” (13:4), and in a crucial moment Paul is “filled with the Spirit” (13:9) to confront a sorcerer.

133. Cf. 1 Cor 16:6, 11; cf. Malherbe, *Social Aspects*, 68.

134. Dunn, *Acts*, 173.

135. That is, during the same meeting, not after a further period of concerted fasting.

136. Scholars often compare 1 Tim 1:18; 4:14; 2 Tim 1:6 here (Dibelius and Conzelmann, *Pastoral Epistles*, 32; Aune, *Prophecy*, 266).

137. Best, “Acts xiii.1–3,” finds the background in laying hands on Levites in Num 8:10.

138. This case is a blessing rather than an ordination per se (Conzelmann, *Acts*, 99; Hanson, *Acts*, 139–40) and is not for imparting the Spirit as in Acts 8:17 (Boismard and Lamouille, *Actes*, 2:231).

139. Cf. Best, “Acts xiii.1–3.” This is the case whether or not we should think that the Antioch church is pushing beyond what the Jerusalem church would have approved (as suggested by Knox, *Jerusalem*, 193–94); certainly Luke portrays it as being on good terms with the Jerusalem church at the time (Acts 12:25).

At that moment the team's recorded ministry in Cyprus culminates in a dramatic power encounter and the conversion of the island's chief Roman official; Luke thereby demonstrates that God is clearly with this new team even at the inception of their mission.

This passage (13:4–12) is readily recognized as a literary unity connected by various themes, though scholars debate its exact boundaries.¹⁴⁰ That the boundaries are so easily debated (though mainly because of the geographic transition in 13:13; the Cyprus narrative proper ends in 13:12) simply reinforces the sense that Luke's entire work is very much a narrative unity. The narrative focuses on a particular encounter, which emphasizes several points of interest to Luke, including (a) Roman authorities' sympathy; (b) Paul's link with Peter in confronting servants of evil with dramatic judgment (5:3–5, 9–10); and (c) the incompatibility of Christian signs with the practices of magicians.¹⁴¹

Why is the Cyprus section so much briefer than the ministry in southern Asia Minor (albeit longer than, e.g., Iconium, 13:51; 14:1–6)? It may be because Paul, who is Luke's primary protagonist and source of information, never returns to Cyprus whereas he continues to follow up the churches of Asia Minor (15:36; 15:39–16:1). Such a shift in Luke's Pauline source would also account for the limitations of his own information, as well as his interest, in the Cyprus section.

Neither Luke's brevity in summarizing the mission (esp. 13:4–6a) nor the group's failure to revisit Cyprus in 14:21–26¹⁴² should be counted against the mission's success. Luke elsewhere abbreviates accounts where Paul's letters reveal flourishing evangelistic successes (e.g., 17:1–10 with 1 Thess 1:7–9). Further, Luke focuses on one highly placed convert (Acts 13:12), a Roman official, whose presence points the direction for Luke's narrative (19:21; 23:11; 28:14) and reveals Luke's emphasis.

a. Beginning the Cyprus Mission (13:4–5)

The "sending by the Spirit" looks back to 13:2–3, but the rest of 13:4 looks ahead to the Cyprus mission of 13:5–12. Cyprus is the most logical place for Barnabas and Saul to start (in view of its proximity and connections there; cf. the Eleven in Jerusalem, 1:8; Luke 24:47), and in Acts 13:5, the team begins in the most natural places on Cyprus—namely, in its synagogues.

The meaning of Barnabas and Saul's being "sent by the Holy Spirit" (13:4) is clear enough in the context: they were commissioned by prayerful leaders (13:3) who were obeying the Spirit (13:2).¹⁴³ The guidance as to where to start, however, was another question, and they probably proceeded initially to the most logical place. Barnabas was originally from Cyprus (4:36) and knew people (or would have contacts who knew them) who could host them and invite them to speak in their synagogues (13:5). Although Saul and Barnabas brought special skills, they would not be working in totally unevangelized areas as they later would in Phrygia; others had preceded them (11:19; cf. 11:20). Further, even a Tarsian might have ties there; Cyprus had become part of

140. Porter, *Paul in Acts*, 73, notes the unifying theme of the Spirit in Acts 13:2, 4, 9. Blich, *Galatians*, 9, believes that he discerns the following chiasmus in 13:4–14: A. Journey to Salamis (13:4–5a); B. Mark as assistant (13:5b); C. Arrival at Paphos (13:6a); D. Proconsul well disposed (13:7); E. Opposition from Elymas (13:8); F. Paul rebukes Elymas (13:9–11a); E'. Elymas is blinded (13:11b); D'. Proconsul believes (13:12); C'. Departure from Paphos (13:13a); B'. John Mark returns to Jerusalem (13:13b); A'. Journey to Pisidian Antioch (13:14a).

141. Nock, "Magus," esp. 188.

142. On this point, see Boisnard and Lamouille, *Actes*, 2:233.

143. Though not mentioned with special frequency in Paul's ministry in Acts, the Spirit appears at the crucial turning points (e.g., Acts 9:17; see Porter, *Paul in Acts*, 93–94).

the Roman province of Cilicia in 55 B.C.E., though it became a distinct province in 27 B.C.E., perhaps in the lifetime of Paul's father or grandfather.¹⁴⁴

I. SAILING FROM SELEUCIA (13:4)

The travelers would have made their way down the river Orontes to Seleucia on the Mediterranean Sea; Seleucia was about fifteen miles west-southwest of Antioch (a bit less as the crow flies and a bit more, perhaps sixteen miles, for a traveler) but only five miles north of where the Orontes emptied into the sea.¹⁴⁵ The Orontes carried Antioch's sewage out to sea, exiting near Seleucia in what was called "the Cyprian Sea" (Polyb. 5.59.10–11).¹⁴⁶ The town of Seleucia was a smaller sister city to three other cities in the Syrian coastal region of the same name (Seleucia), the largest of which was Antioch (Strabo 16.2.2–4).¹⁴⁷ Rome had granted it the status of a free city, confirmed in 64 B.C.E. for its support against Tigranes.¹⁴⁸ It was apparently known for its piety.¹⁴⁹

Seleucia lay not only on the sea west of Antioch¹⁵⁰ (Polyb. 5.59.4) but also on the southern slope of Mount Coryphaeum, across a great ravine (5.59.4–6). From the coast of Cyprus, one could see a Syrian coastal mountain near this town;¹⁵¹ Cyprus was only sixty miles from Seleucia.¹⁵² Pliny the Elder calls the mountain Mount Casius, noting that it is so high that it dominates the skyline.¹⁵³ Seleucia's "artificial harbor" interrupted "an otherwise straight coast line"¹⁵⁴ and must have served its purpose well.

Its mercantile setting provided Seleucia with sufficient wealth that it was heavily fortified throughout, with expensive temples and other public works (5.59.8). At the base of the town's slope, on the level land near the sea, lay the business district and a heavily fortified suburb (5.59.7).¹⁵⁵ The city's wall, more than seven miles long, surrounded both the upper and the lower parts of the city.¹⁵⁶ Beyond this area, the town's terrain may not have appeared hospitable to foreigners. Cliffs and jagged rocks

144. Bruce, *Acts*¹, 254. It became a senatorial (as opposed to imperial) province five years later (pp. 254–55).

145. Lake and Cadbury, *Commentary*, 142; Talbert, *Barrington Atlas*, 67, B4; also Mark Wilson, estimating sixteen miles (26 km.; personal correspondence, Nov. 25, 2011). Further on Seleucia Pieria, see Fant and Reddish, *Sites*, 314–17; Smith and Hoppe, "Seleucia" (sect. 4).

146. Cf. Juvenal's wry comment about the "filth of the Orontes" (meaning Eastern "cults") pouring into the Tiber (i.e., Rome; *Sat.* 3.62). The Orontes flowed between the Lebanon and the Anti-Lebanon ranges (Pliny E. *N.H.* 5.18.80).

147. The region was so named because the Tetrapolis, or "Four Cities," was founded by Seleucus Nicator (Strabo 16.2.4), who died in 280 B.C.E. Not all Strabo's information, however (e.g., his view of the Orontes, 16.2.5ff.), is accurate (Gray, "Orontes").

148. Jones, Seyrig, and Sherwin-White, "Seleucia"; "Seleucia Pieria"; Pliny E. *N.H.* 5.18.79.

149. So Philost. *Ep. Apoll.* 12, assuming that the same Seleucia is in view (Seleucids gave the name to many cities; but this letter follows a letter to Caesarea in Palestine). For a temple from the Hellenistic period there, see Finegan, *Apostles*, 68; Fant and Reddish, *Sites*, 317 (it also had a Roman-period theater, Finegan, *Apostles*, 69).

150. Polyb. 5.59.4 places it "on the sea between Cilicia and Phoenicia" (Paton in LCL, 3:147); Strabo 16.2.2 places it near the seaboard.

151. Hemer, *Acts in History*, 109, reports this for Mount Casius, south of the town. Pliny E. *N.H.* 2.89.202 thought that earthquakes (cf. 2.87.201) had long before sundered Cyprus from Syria.

152. Dunn, *Acts*, 174.

153. Pliny E. *N.H.* 5.18.80, estimating 4 mi. high or, by the winding route to the top, 19 mi. of walking.

154. Munck, *Acts*, 118. Vespasian later improved the harbor (Jones, Seyrig, and Sherwin-White, "Seleucia"); two pieces of the old breakwater have survived (Fant and Reddish, *Sites*, 315), but the harbor is now mostly silted up (Finegan, *Apostles*, 69).

155. Excavations also reveal an ancient market with many shops not far from the harbor (Fant and Reddish, *Sites*, 316).

156. *Ibid.*, 315. It is doubtful that the entire area enclosed was occupied (Wallace and Williams, *World*, 173, following Grainger, *Syria*, 84). Archaeology shows an upper town built on various levels of a plain sloping up the sides of Mount Amanus, with a lower town located on the plain to the upper town's southwest, surrounding the harbor (Finegan, *Apostles*, 68; Fant and Reddish, *Sites*, 315).

surrounded most of the town, which descended by uneven terraces to the Mediterranean sea (5.59.6); one descended to the sea only by twisting steps (5.59.9).

Taking a trading ship to Cyprus would require the fare for each of Paul's companions, probably provided from the Antioch church (cf. "sent" in Acts 13:3). Small boats stayed near the coast and spent the night in ports; larger ships plied the open sea. In either case, one seeking passage needed to remain close to the port to hear signals; ships departed when weather conditions (and perhaps cargo ideals) were favorable rather than according to a regular schedule.¹⁵⁷ Barnabas and Saul were probably moving into an even more predominantly Gentile environment. Despite Herod's construction of Caesarea's harbor,¹⁵⁸ many (presumably especially inland) Jewish people disliked sea travel, though we do know of Jewish sailors.¹⁵⁹

Although many people who did not live near coasts feared sea travel,¹⁶⁰ the experience would not be new for Paul (9:30; cf. 2 Cor 11:25) and perhaps his companions; Antioch's proximity to the sea and its distance from Jerusalem (making overland travel lengthy) probably had provided them all with some experience, which, especially on a lengthy voyage, would fit that of most travelers, who

on large ships simply booked passage as deck passengers, sleeping in the open or under a small tent. They would travel with bags (*viduli*, or *manticae*) which would contain not only clothes but also cooking ware, food, bathing items, and sometimes bedding as well.¹⁶¹

II. STARTING WITH CYPRUS

Although some early Cypriot traditions of their visit might reflect Luke's account,¹⁶² the mission at Cyprus makes good sense of other data Luke reports. Barnabas was from there (Acts 4:36) and continued to feel comfortable in ministry there (15:39); other Hellenists undoubtedly would have provided additional connections there (11:19–20), as would the many synagogues (for the Jewish population, see comment below).¹⁶³ The team was not simply starting a mission from scratch, preaching in marketplaces (in contrast to some later, more difficult places of ministry; cf. perhaps 14:6–10). Their education and teaching experience probably would provide many open doors for their ministry there.

Barnabas thus seems the natural leader for the mission until Paul's prophetic activity in 13:9–12; at some point (perhaps from the start), Paul was the primary speaker (14:9, 12), though some villagers attribute to Barnabas the superior position (14:12).¹⁶⁴ But it was Barnabas who would be the guide and perhaps the manager of the expedition in Cyprus. Because Rome ruled Cyprus as part of the province of Cilicia after 67 B.C.E.,¹⁶⁵ Paul likely had some knowledge of Cyprus as well.

Because Paul and Barnabas would certainly have visited the Jewish churches (perhaps house congregations supplementing synagogues) if some were founded in 11:19,

157. Witherington, *Acts*, 639.

158. For sailors and ships, obviously (Jos. *War* 1.414).

159. *M. Ketub.* 5:6; *b. Ketub.* 61b; 62b; *Qidd.* 82a; *Nid.* 14a; apparently *b. Sotah* 48a; Le Cornu, *Acts*, 683. One should praise God for forming the sea (Le Cornu, *Acts*, 684, citing *m. Ber.* 9:2).

160. Cf. *1 En.* 101:4, 9.

161. Witherington, *Acts*, 639.

162. But the claim of "Paul apostle" inscribed in an early Christian basilica (cf. Harris, "Paul on Map") reflects a reconstructed text (apart from the question of the basilica's date).

163. Riesner, *Early Period*, 272–73.

164. The sequence of names is not significant, at least after Acts 13:7: Barnabas is mentioned before Paul in 13:1, 2, 7; 14:12, 14; 15:12, 25, but Paul before Barnabas in 13:43, 46, 50; 15:2, 22, 35.

165. Muhly, "Cyprus," 95. For their proximity, cf. Pliny E. *N.H.* 5.22.92; Pliny says that Cyprus lies in the "Cilician sea" (5.35.129), just 50 mi. from Cilicia (5.35.130).

some scholars discount the claim of 11:19.¹⁶⁶ But even apart from the fact that not all missions are successful, we should not expect Luke to report every detail, any more than we expect that of any ancient historian. Outside the “we” narratives, he abbreviates frequently, and evangelism is a far more central focus for him (cf. Luke 24:47); return visits to confirm faith warrant only the briefest mention even with churches Paul founded (Acts 14:21–25; 20:1–6), except in a strategically placed speech report (20:18–35). Others think that because this mission was preceded by evangelization in 11:19–20 (though not explicit in 2:9–11), it would generate less tension with the Jerusalem church than a mission elsewhere.¹⁶⁷ Probably Cyprus was simply the closest place to Antioch and the place where the team had the best initial contacts.

Cyprus was strategically located for having an impact on other eastern Mediterranean sites; it was centrally located, a place where sea routes from Egypt, Asia Minor, and Syria converged.¹⁶⁸ Recognized as one of the largest islands (Strabo 14.2.10),¹⁶⁹ Cyprus passed from Ptolemaic to Roman rule in the time of the final Cleopatra (14.6.6; 17.1.5).¹⁷⁰ Its topography would affect the missionaries’ travel there; Cyprus has two significant mountain ranges, a northern one named Kyrenia (more than 3,000 ft., or 900 m., high) and a western one called Troodos, its highest peak (Mount Troodos) 6,404 feet (1,952 m.) in elevation.¹⁷¹ Two rivers (the Yalias and the Pedias) flow through the central plain (named Mesaoria), running together to flow into the Mediterranean at Salamis.¹⁷²

Cyprus was relatively prosperous (see comment on Acts 4:36–37). The island had good harbors (Strabo 14.6.3); Alexander built some of his boats in Cyprus and Phoenicia (16.1.11). Because rainfall is unpredictable, fertility often depends on irrigation.¹⁷³ Nevertheless, in the Roman period it was apparently usually tranquil and prosperous.¹⁷⁴ Pliny the Elder mentions fifteen noteworthy towns, including Old and New Paphos and Salamis (*N.H.* 5.35.130). (On Cyprus, see further comment at Acts 11:20.)

III. SALAMIS AND ITS SYNAGOGUES (13:5)

Salamis was the island’s main port city and the one nearest Syria;¹⁷⁵ some of the ancient harbor’s foundation stones, near where Paul’s company must have landed, remain.¹⁷⁶ Greek tradition attributed its ancient founding to Teucer, son of Telamon, in the legendary past.¹⁷⁷ Teucer was from a different Salamis¹⁷⁸ but was banished from

166. Barrett, *Acts*, 610–11 (reporting, not endorsing, the view).

167. Knox, *Jerusalem*, 199.

168. Finegan, *Apostles*, 73, noting that it was 50 mi. (80 km.) from Asia Minor, 70 mi. (113 km.) from Syria, and 240 mi. (386 km.) from Egypt. In creating a fiction, Lucian writes of a Cypriot sailing from Cyprus (*True Story* 1.34).

169. By modern measure, 3,584 sq. mi. (9,282 sq. km.), the “third largest Mediterranean island” (Catling, “Cyprus,” 419).

170. For the Roman perspective (including Ptolemy’s just suicide), see Vell. Paterc. 2.38.5–6; 2.45.4–5. For recent excavations in Cyprus, see, e.g., Herscher, “Archaeology”; Steel, “Archaeology.”

171. Finegan, *Apostles*, 73.

172. *Ibid.*

173. Catling, “Cyprus,” 419. The rains usually start in late October, with the harvest in April–May; the summer was typically lengthy, hot, and arid (Finegan, *Apostles*, 77).

174. Catling, “Cyprus,” 420.

175. Conzelmann, *Acts*, 99; Fant and Reddish, *Sites*, 340. On Salamis, see further Fant and Reddish, *Sites*, 339–47; Gempf, “Salamis”; Rupp, “Salamis.”

176. Fant and Reddish, *Sites*, 345. The Pediaeus River had a sandy delta with islands, which made a harbor adequately shielded from the sea (Finegan, *Apostles*, 76).

177. Strabo 14.6.3 also notes that the island is narrow at Aphrodisium, with a voyage of only seventy stadia to Salamis from there.

178. Ajax and his half-brother, Teucer (cf., e.g., Hom. *Il.* 8.266–315), brought twelve ships from an island called Salamis, ca. 3 mi. from Attica, to the Trojan War (Hom. *Il.* 2.557).

there by his father; he founded this city by the same name near the harbor of Carpasia (Strabo 14.6.3; Vell. Paterc. 1.1.1). Historically, the site was settled in the eleventh century B.C.E.¹⁷⁹ Salamis therefore had a very old Greek history, and it served as the island's capital under Ptolemaic rule.¹⁸⁰ It remained one of Cyprus's major cities, although Rome moved the capital to New Paphos in 22 B.C.E. (13:6),¹⁸¹ "possibly because the harbour at Salamis had become silted up."¹⁸²

A large city, Salamis had a theater that, at some point in its history, seated about 15,000;¹⁸³ given frequent estimates that cities usually had ten times the number of people as could fit in the theater, Salamis might have boasted even 150,000 residents.¹⁸⁴ It had a long forum lined with porches, probably first built before 22 B.C.E. and rebuilt "in the first or second century CE."¹⁸⁵ Reminding us of the city's dominant Gentile population, to the forum's south lay the temple of Zeus Olympios, built in the late second century B.C.E., with a significant addition toward the end of the first century C.E.¹⁸⁶ The city also had a gymnasium with a marble pool; around this pool were headless pagan figures, one of them representing Persephone, an underworld deity.¹⁸⁷

Given ancient reports of the island's Jewish population, it is not surprising that Luke implies that Salamis had several synagogues.¹⁸⁸ Jewish people outside Cyprus were well aware of the island's large and famous Jewish population (e.g., Philo *Embassy* 282; Jos. *Ant.* 13.284).¹⁸⁹ Diaspora Jews often became permanent residents (albeit not citizens) of Hellenistic cities.¹⁹⁰ The Jewish minority in Cyprus was apparently quite conscious of its distinctiveness;¹⁹¹ in 116 C.E., about seventy years after this mission, Cypriot Jews allegedly killed a massive number of Cypriot Gentiles and destroyed Salamis, leading to retaliation and the destruction of the Jewish community.¹⁹²

179. Rupp, "Salamis," 456.

180. Greek connections are very early (e.g., Hdt. 4.162); Salamis revolted against the Persians but was again subdued (5.110–16).

181. It either remained the major city (Finegan, *Apostles*, 76; Fitzmyer, *Acts*, 500; Witherington, *Acts*, 395) or yielded primacy to Paphos ca. 200 B.C.E., regaining primacy in the fourth century C.E. (Catling, "Salamis"). Finegan, *Apostles*, 78, writes that New Paphos was also the capital in the Ptolemaic period.

182. Barrett, *Acts*, 611.

183. Finegan, *Apostles*, 76; Fant and Reddish, *Sites*, 342.

184. Fant and Reddish, *Sites*, 342, 344.

185. Rupp, "Salamis," 457.

186. *Ibid.*

187. Fant and Reddish, *Sites*, 342 (noting that many think that Salamis had a gymnasium for girls separate from the one for boys).

188. Bruce, *Acts*¹, 255; Munck, *Acts*, 118; Riesner, *Early Period*, 273. We cannot be sure of the synagogues' sizes; some may have been large (cf. the pre-70 C.E. Gamla synagogue, which could seat three hundred; Sanders, *Judaism*, 200). Le Cornu, *Acts*, 685, doubts that we may infer the Jewish population's size from multiple synagogues, since they could be established for various population segments (as in Acts 6:9), such as guilds, but this presupposes at least enough Jews for specialized niche audiences. Some synagogues may have been organized like guild associations (White, "Revisited").

189. Haenchen, *Acts*, 396–97n10, rejects 1 Macc 15:23 as spurious but accepts the evidence of Philo and Josephus (also accepted by most others, e.g., Conzelmann, *Acts*, 99). For further evidence for Cyprus's Jewish population, see Stern, "Diaspora," 154–55. Note the many Jewish coins in Destrooper-Georgiades, "Coins."

190. More common than living there without the legal right of domicile, though this also happened (Rabello, "Condition," 725).

191. In general, each immigrant subculture, including Jewish subculture, developed internal cohesion—in the Jewish case, around synagogues (MacMullen, *Social Relations*, 83).

192. Stern, "Diaspora," 155 (citing Jerome *Chronicon*, in *Die Chronik des Hieronymus* [ed. R. Helm; 2nd ed.; Berlin: Akademie, 1956], 196; Orosius *Hist.* 7.12.8; Syncellus *Ecloga chronographica*, in *Georgius Syncellus et Nicephorus* [ed. W. Dindorf; 2 vols.; Bonn: Weber, 1829], 1:657); Barrett, *Acts*, 611. The reported casualty figures may be inflated, both because no one could have counted and because atrocity reports are often inflated (except by governments who wish to maintain the appearance of having unrest under control).

Luke's expression "synagogue[s] of the Jews" (Acts 13:5; 14:1; 17:1, 10) appears elsewhere in antiquity (an official permission in the Bosphorus, *CII* 1:495, §683; 1:497, §684).¹⁹³ Given the broader possible meaning of the term "synagogue" in the Diaspora (any meeting place; see LSJ), Luke may have thought it a technically proper qualification for his earlier Diaspora references to the institution (in contrast to Acts 17:17; 18:4, 7, 8, 17, 19, 26; 19:8), though no one was likely to miss his point. The imperfect verb suggests that Paul and Barnabas regularly started with the synagogues, as the Hellenist Jewish Christians before them had done (11:19). (On synagogues, see excursus on Acts 6:9–10; on "prayerhouses," see comment on Acts 1:14.)

Especially if synagogues also provided schools throughout the week,¹⁹⁴ the evangelists could minister to some people in a number of synagogues there in a short amount of time as well as in Jewish gatherings in towns along the road to Paphos (13:6a). Then again, they may have remained longer in Salamis to teach in all the synagogues, since Sabbath crowds would be the largest (13:14, 42, 44; 16:13; 17:2; 18:4).¹⁹⁵ Further, though Tannaim mention Scripture readings on Mondays and Thursdays as well as the Sabbath, this custom may have taken place in the market,¹⁹⁶ and first-century sources are more apt to support regular synagogue assemblies on the Sabbath.¹⁹⁷ Practices may have differed in various parts of the Diaspora in this period, although Diaspora Judaism (still paying the half-shekel tax for the temple and sharing common institutions, such as the synagogue) saw itself as faithful to the Torah.¹⁹⁸ Educated Gentiles knew about Jewish Sabbaths,¹⁹⁹ even if their understanding of them was sometimes distorted.²⁰⁰

IV. STARTING WITH SYNAGOGUES (13:5)

Interestingly, Luke reports that the apostle to the Gentiles,²⁰¹ when in a new city, always began his ministry in the synagogues (e.g., 9:20; 13:5, 14; 14:1; 17:10, 17; 18:4, 19; 19:8) or, where necessary, other Jewish gatherings (16:13). Possibly some others did the same (18:19). Scholars frequently argue that the sequence reflects salvation-historical priority; Israel needed the first chance in every setting because God offered his work to the Gentiles only because Israel failed to accept it (cf. Rom 11:11, 30, where Paul interprets it as providential).²⁰² Paul's passionate sacrificial love for his people and their salvation (Rom 9:1–3; 10:1)

193. "Synagogue of the Hebrews" appears as a distinguishing title in Rome and Corinth. This distinction was valuable because συναγωγή simply meant "gathering" and, outside Jewish settings, was not limited to Jewish assemblies (see BDAG).

194. As in our extant (but later) sources; see Watson, "Education," 312; Evans, *World*, 58–59 (who cites *Jos. Ant.* 16.163–64 as a possible early source; but the relevant term may simply designate a dining hall). Apart from harvest season, people may have gathered on short notice in Galilean villages (Luke 8:4; 9:6, 12). Jewish communities may have been harder to gather in Diaspora cities, though probably most Jewish people lived in largely Jewish enclaves.

195. Qumran texts could warn against going out on Shabbat, even to read or explain Torah (if this is the correct understanding of 4Q251 1 5), but this was sectarian, not common, practice. Tigchelaar, "Sabbath Halakha," argues for Sabbath readings in 4Q421 11 and 13 (but the text is reconstructed).

196. Safrai, "Synagogue," 919. These were also the preferred days for fasts among some Pharisees (idem, "Religion," 816).

197. Safrai, "Synagogue," 918 (citing, e.g., Philo *Contempl.* 30–32 for the Therapeutae). People might meet for special meetings there on other days (*Jos. Life* 277–79).

198. See also Safrai, "Relations"; Le Cornu, *Acts*, 693–94.

199. E.g., Suet. *Tib.* 32.2 (who uses the Jewish term "Sabbath" for "Saturday"; cf. also *Aug.* 76.2).

200. E.g., Strabo 16.2.40; Mart. *Epig.* 4.4.7; Suet. *Aug.* 76; Tac. *Hist.* 5.4 (noting that some associate the Sabbath with Saturn); cf. Hor. *Sat.* 1.9.68–69.

201. If I may borrow a Pauline phrase to describe an equally Lukan concept, despite Luke's generally very different use of ἀπόστολος.

202. E.g., Stendahl, *Paul*, 29.

would be expressed in going first to them, including in the Diaspora, whatever his distinctive mission.

Another reason for this sequence, however, is missions strategy: where else would he find those who shared his basic premise about Israel's God and history on which the gospel proclamation built? This would be true even if Paul saw his mission as solely to Gentiles (which, as observed above at Acts 13:5, is an exaggeration of the epistolary Paul). The largest concentration of Gentiles open to the God of Israel and respectful of Israel's salvation history (a new phase of which Paul proclaimed), and with at least some basic knowledge of each, would be in the synagogues.²⁰³ Here Paul would find the greatest common ground and would probably initially feel most comfortable. If we are tempted to doubt this consideration of strategy, we need only consider the alternatives: where else might Paul have started to obtain an initial hearing and a base for operation (cf. Luke 10:5–7)?

Although scholars often oppose the two main proposed reasons for Paul's ministry starting in synagogues, both reasons may be factors.²⁰⁴ Synagogues were the most natural gathering place to find Jewish people (e.g., Acts 22:19), especially in the Diaspora (9:2), to whichever factor we assign the dominant role. Since both factors pointed, for Paul, in the same direction, the choice of which mattered more for him may not have been one he was forced to make. Although the historical Paul emphasized Israel's priority, missions strategy probably played a more prominent role in his praxis than it does in his theology. The Jewish people had at the least logical precedence in God's plan (Rom 1:16) but also the advantage of the Scriptures (3:1–2). Luke, like Paul, stresses Israel's theological priority (Acts 3:26; 13:46; 28:26–28) but probably hints at strategy as well (Luke 10:5–7). Again, theology may have been the primary concern, but even if no theology had undergirded it, any Jewish proclaimers starting in a given community would have begun with the synagogue anyway.

In view of Paul's perspective that his mission focused on Gentiles (Rom 1:5, 13–15; 11:13; 15:16–20; Gal 1:16; 2:7–9), some scholars doubt that he would have begun in synagogues as reported in Acts.²⁰⁵ This skepticism, however, is utterly unwarranted, ignoring alternative evidence even within Paul's letters:²⁰⁶

1. Paul's letters rarely address his initial evangelistic strategies, and Acts shows that although Paul started in synagogues, he often left them.²⁰⁷
2. Paul saw the priority of salvation history as for the Jew first and then the Gentile (Rom 1:16; 2:9–10)²⁰⁸ and affirmed that the gospel was for all (e.g., Rom 10:12; Gal 3:28), including in his congregations (1 Cor 1:24; 10:32; 12:13).²⁰⁹
3. Paul explicitly claims to have adapted himself to reach Jews as well as Gentiles (1 Cor 9:20) so that all might be saved (9:22); no place in the Diaspora was better suited for religious discussion with gathered Jews than the synagogues.

203. With, e.g., Blauw, *Missionary Nature*, 95–96. Synagogues also could participate in the life of Gentile cities (Harland, *Associations*, 200–210).

204. With, e.g., Blauw, *Missionary Nature*, 95–96.

205. E.g., Meeks, *Urban Christians*, 26.

206. Similarly against the skepticism, see Barrett, *Acts*, 628; also others (e.g., C. Williams, *Acts*, 23–24; Witherington, *Corinthians*, 26, 245; Strelan, *Artemis*, 22, 205–6; Watson, *Gentiles*, 69, 72–73; Miller, "Context"; Dunn, *Beginning*, 557–60). The consensus today is, indeed, that Paul began with synagogues (Jewett, *Romans*, 75; Dunn, *Romans*, 1:xlvii; Talbert, *Romans*, 273; and sources they cite). Where else would he have begun?

207. So Strelan, *Artemis*, 206.

208. See, e.g., Nanos, *Mystery*, 16, 21–40, 240, although perhaps overstating the case; Hvalvik, "Jøde"; Brindle, "Jew First." This need not dictate his own practice everywhere, but it presumably would where the local Jewish community had not yet heard the gospel.

209. See esp. Miller, "Context," 103–8, on Paul's agenda in Romans.

4. Even contexts emphasizing Paul's mission to the Gentiles (e.g., Rom 11:13; 15:16, 18) reflect deep concern for reaching his own people (11:14) or starting in Jerusalem (15:19), Judaism's center.²¹⁰
5. Paul agonized over his people and their rejection (Rom 9:1–5; 10:1), which suggests both a compelling interest in including them in ministry and a knowledge of the rejection firsthand (cf. 1 Cor 1:23).
6. Paul would not have been disciplined in synagogues (2 Cor 11:24, in a context of sufferings for his ministry) if he had remained uninvolved in them.
7. Synagogues provided the most strategic bridge for finding even Gentiles with some attraction to monotheism and biblical tradition.²¹¹
8. Even apart from theological and missiological considerations, a Jewish traveler, for practical reasons, would meet the synagogue community first. "Literary, documentary, and archaeological evidence all point to the fact that synagogues provided the traveling Jew with accommodation and food."²¹²
9. Paul's letters regularly assume biblical knowledge on the part of at least the most informed members of his audience, which suggests Paul's assumption of at least some Jewish and God-fearing elements with synagogue backgrounds.²¹³
10. Synagogues provided a useful model for churches that was far better adapted than discarded.²¹⁴

Although opposition to many associations in the eastern empire²¹⁵ made beginnings in a synagogue desirable, much of the apologetic value in reporting such beginnings would have been lost in a document attesting that many of the congregations begun there had left.

In the case of Luke's report about Cyprus, his lack of mention of opposition in the synagogues (in contrast to many of his accounts) also suggests that the report is not simply "a Lukan fixation."²¹⁶ Scholars even debate whether the later "comity agreement" that Peter would go to Jews and Paul to Gentiles was meant to *bar* either from the other's field; it is likelier that, as Paul presents it, each was affirming the validity of the other's mission (Gal 2:7–9). Paul certainly did not observe such boundaries geographically (Rom 15:25–31), nor was he expected to do so (Gal 2:10); ethnic boundaries would be even more difficult to observe if Paul preached in mixed areas to those he expected to find most receptive. Peter likely influenced Christians in Corinth and possibly Rome and Galatia (1 Cor 1:12; 3:22; 9:5; Gal 1:18; cf. 1 *Clem.*

210. Even Rom 1:5 may refer not simply to "all Gentiles" but to "all peoples" (cf. 16:25–26). Certainly Paul was not evangelizing primarily Gentiles in Jerusalem. Rom 10:18 (in light of 15:18–19) may also suggest that Paul has been preaching to Jews (so Grieb, *Story*, 103).

211. Cf. likewise, e.g., Dunn, *Acts*, 174. "[God-fearers] had already demonstrated their independence from their native religious traditions" (Malherbe, *Social Aspects*, 77). To Gentiles, synagogues, which lacked sacrificial cult, would seem like philosophic schools (Lake, "Proselytes," 75; Moore, *Judaism*, 1:323–24). Some scholars think that many believers in Jesus remained in synagogues in Paul's day (Nanos, *Mystery*, 14), and many think that this remained common even in the late first century (see, e.g., Keener, *John*, 207–8, 215).

212. Llewelyn, *Documents*, 7:89–90, §4 (citing, e.g., *CIJ* 2:333, §1404). On synagogues with guest rooms for travelers, see Koenig, *Hospitality*, 17 (following Sukenik, *Synagogues*, 49, 69–70).

213. Admittedly, this is less so for churches where Paul spent less time (e.g., Thessalonica) but also where the Jewish population was lower (such as in Philippi); he assumes a large Jewish element in Romans (though he has not visited Rome) and Galatians (perhaps Acts 13–14) and a very hellenized Jewish element in 1 Corinthians (cf. Acts 18:11).

214. Although arguing for connections with philosophic schools, Judge, *First Christians*, 615, treats synagogues as the most relevant model for early Christian gatherings.

215. Cf. the need to request permission for a fire brigade in Pliny *Ep.* 10.33.1–3, given the potential for unrest (10.34.1).

216. Concurring with Dunn, *Acts*, 174–75.

5.4), and a letter from at least his circle addresses Diaspora Christians (1 Pet 1:1), probably including Gentiles (1:18).²¹⁷

It is most often estimated that more than four million Jews lived in the Diaspora;²¹⁸ this was far more than sufficient to provide a small apostolic team with an initial basis for ministry. Some earlier scholars made Diaspora Judaism less “orthodox” than Palestinian Judaism,²¹⁹ often using later rabbinic Judaism as the criterion of orthodoxy or seeking to explain Paul’s “heterodoxy” vis-à-vis rabbinic Judaism.²²⁰ In reality, Diaspora Jews on the whole found ways to show loyalty to their locales while retaining loyalty to Jerusalem.²²¹ It is no longer argued that Palestinian Judaism was pure and Diaspora Judaism debased.²²²

Still, Diaspora Judaism was diverse and, indeed, was probably more liberal or hellenized than Palestinian Judaism, on average.²²³ Diaspora Jews saw themselves as Judeans living elsewhere,²²⁴ but they adopted elements of their environment that they felt did not contradict their Judaism.²²⁵ For the elite, this could include Greek philosophy or education;²²⁶ for some others, it might include interaction with pagan magic. Yet they also shared a variety of traditions with Palestinian Judaism.²²⁷ Moreover, we should be careful about what we are comparing: Jerusalem’s elite was hellenized, but most rural Palestinian peasants would have been no more hellenized than other rural peasants in this period. A greater portion of Diaspora Jews was urban.²²⁸ That is, the difference reflects urbanization more than it reflects a neat geographic divide.

V. JOHN MARK AS AN ASSISTANT (13:5)

Although they had a “helper” (ὀπηρετήν), the public ministry of the word seems to involve primarily Barnabas and Saul. This fits the pattern of sending preachers two by two (Luke 10:1; cf. Mark 6:7). Ancients often sent messengers in pairs,²²⁹ Judaism expected a minimum of two witnesses (e.g., Deut 17:6; 19:15),²³⁰ and rabbis expected disciples to learn especially in pairs (apparently for the interaction, *m. ’Ab. 1:6*).²³¹ At

217. See Bruce, *Peter*, 31–32.

218. See fuller comment on Diaspora Judaism’s population at Acts 11:19, though it should be remembered that any such figures are, at best, estimates. On Diaspora Judaism, see, e.g., inscriptions in *CIJ*; Meyers and Kraabel, “Remains,” 183–200; Kant, “Inscriptions.” On the hellenization of, e.g., Alexandrian Judaism, see *CPJ* 1:25–47.

219. Even then, voices of caution were raised (Kennedy, *Epistles*, 14, 22).

220. Some rabbis also doubted Diaspora Jews’ fidelity to the law (e.g., *t. ’Abod. Zar. 4:6; Exod. Rab. 42:9*).

221. See esp. Gruen, *Diaspora*. For relations between Palestinian Judaism and the Diaspora, see also Safrai, “Relations.”

222. Trebilco and Evans, “Diaspora Judaism,” 282. For various degrees of assimilation, see 288–91. Moreover, if Diaspora Judaism was extremely liberal and tolerant, as one scholar puts it, “Paul did not find much of it” (Robinson, *Redating*, 294; cf. 2 Cor 11:24, 26).

223. E.g., Isaacs, *Spirit*, 3; Shutt, “Aristeas,” 10. For emphasis on the differences (while allowing overlap), see Sandmel, “Hellenistic Judaism”; Vermes, *Jesus and Judaism*, 26; others react against the excessive traditional dichotomy (Davies, “Aboth,” 138–51).

224. Safrai, “Relations,” 185.

225. Meeks, *Urban Christians*, 165.

226. For the extent to which this could be taken, see, e.g., Tarn, *Civilisation*, 233–34; or read fragments of Artapanus or Alexander Polyhistor.

227. Some earlier scholars portrayed this as rabbinic influence on, e.g., Philo (Bamberger, “Philo and Aggadah,” noting some significant parallels), but it is better to speak of shared traditions.

228. Note especially commercial centers, e.g., *CIJ* 1:lxv.

229. Gordon, *Near East*, 110 (citing Hom. *Il.* 1.320ff. and Ugaritic materials; cf. Hom. *Il.* 7.274; 9.182); 2 Kgs 5:23 (but cf. 2 Sam 18:21). Pairs were also safer than going alone, even against demons (*b. Ber.* 43b; Edersheim, *Life*, 644), despite superstitions about pairs and demons (*b. Pesah.* 110a).

230. Also *y. Git.* 4:1, §2; Keener, *John*, 656, 740; Vliet, *No Single Testimony*.

231. Safrai, “Education,” 968; cf. rabbis learning in dialogue, *Gen. Rab.* 69:2. Travel was safer in pairs than alone (*Ecl. Rab.* 4:9ff., §1).

least in early Greek tradition, even when a third person was added to a pair of messengers, he was not strictly counted as a part, since the dual is still employed.²³² But as here (Acts 13:5), groups of messengers often did include more than two members.²³³

Mark's office as "helper" may reflect biblical tradition, appreciated in the nascent church; though the term is not used, Timothy may have been among those filling this role later (cf. 16:3; 19:22).²³⁴ The particular term Luke uses for "assistant" here is quite generic: Luke elsewhere employs it for the apostles themselves (Luke 1:2, in relation to their eyewitness message; cf. Acts 1:21–22), for Paul (in relation to his eyewitness message, Acts 26:16; cf. 1 Cor 4:1), and also for a synagogue officer (probably the *hazzan*, Luke 4:20)²³⁵ and other officers (Acts 5:22, 26).

Yet biblical tradition provides analogies for Mark's office. Elite soldiers had armor bearers (1 Sam 14:1; 16:21; 17:41; 31:4). Prophetic leaders such as Moses (Num 11:28), Elijah (1 Kgs 19:21; 2 Kgs 3:11), and Elisha (2 Kgs 4:12; 6:15) had assistants;²³⁶ among prophets, these servants were often apprentices and, ideally, successors of their masters. Failure to live up to the standards of the calling could have serious consequences (2 Kgs 5:26–27). Even in the Greek philosophic tradition, for a student to live with a sage and do all under his supervision was a privilege (Mus. Ruf. 11, p. 84.9–14). It is no wonder that Mark's departure (Acts 13:13), apparently under unpleasant or perhaps even acrimonious circumstances, disappointed Paul (15:38).

The company may include more than three members here (though this is not absolutely clear; the plural substantival article *oi* in 13:13 probably does include Mark, who apparently left them at Perga), two or more after 13:13, and at least four on Paul's later journey into Macedonia and Achaia (cf. 16:3, 10; 17:14–15).

However large the company, traveling companions were valued. Later rabbis claimed it safer to travel in the company of godly persons who carried divine protection.²³⁷ A good traveling companion to talk with could make walking as pleasant as riding (Aul. Gel. 17.14.4), and one might undertake extra labor for a long distance to talk with a friend (Plut. *Cic.* 39.4). Even those who had previously been strangers could become lively conversants on a journey, debating about their favorite heroes (Babr. 15.1–9) or sharing their stories (Heliod. *Eth.* 2.26) or with a younger learning from an elder (Tob 6:3–18). Later rabbis would often discuss Torah on their journeys (cf. also Luke 24:27).²³⁸ Most traveling teachers had students or associates on their travels.²³⁹ Certainly, finding a traveling companion who already knew the roads was advantageous (Tob 5:4–7), an advantage Barnabas would have at least for Cyprus (Acts 13:6; cf. 4:36).

232. Hom. *Il.* 9.168–70, 182; see Murray in LCL, 1:394n1.

233. E.g., Kehne, "Legatio," 351 (Rome usually dispatched three or more *legati*).

234. Mark may have later become "useful" to Paul for ministry again (cf. 2 Tim 4:11; see fuller comment at Acts 15:39).

235. Cf. *t. Meg.* 3:21; Applebaum, "Organization," 496; Safrai, "Synagogue," 935; Moore, *Judaism*, 1:289; Reicke, *Era*, 121; some sort of title in *CIJ* 1:124, §172; 2:94–95, §855; see further 1:xcix (found in Rome, 1:123–24, §172; Leon, *Jews of Rome*, 190).

236. Also *Mek. Pisha* 1.150–53; *Abot R. Nat.* 11, §28 B. In addition to primary assistants, prophets could have other disciples who could work for them; e.g., 2 Kgs 9:1. Mark's temporary "apostasy" (Acts 13:13) could be like Gehazi's (2 Kgs 5:26) but is probably not so serious; Barnabas, at least, is later reconciled to Mark (Acts 15:37; contrast the more negative assessment in Black, "Mark in Acts"). Later rabbis viewed prophets' disciples on the analogy with rabbinic academies (e.g., *Tg. Jon.* on 1 Sam 19:23; on 2 Kgs 6:1; 9:1, 4); likewise CD VIII, 20–21 assimilates Jeremiah's Baruch to Elisha's Gehazi.

237. *T. Abod. Zar.* 1:17–18; *Šabb.* 17:2–3.

238. Liefeld, "Preacher," 229 (citing *b. Yebam.* 42b; *Yoma* 85a; *Gen. Rab.* 35:3).

239. Stambaugh and Balch, *Environment*, 144.

b. Conflict in Paphos (13:6–8)

Luke's summary of Paul and Barnabas's ministry in Cyprus might have been brief indeed but for his record of the dramatic incident in the governor's court in Paphos. Here they overcome a sorcerer by divine power, leading to the governor's faith.

Luke is likely accurate about Sergius Paulus being the proconsul as well as about Elymas Bar-Jesus.²⁴⁰ Luke would not give such a precise name if he were fabricating on a matter that could be checked by any visitors from Cyprus, any more than he fabricated Felix and Festus for his Diaspora audience. And if Sergius Paulus later became, as Mitchell and others argue, a consul known from history, falsifying information about him could prove downright dangerous²⁴¹ (unless Luke wrote before 70, when Sergius achieved the consulship, or so far after 70 that no one close to Sergius remained alive to dispute the account).²⁴²

One would not expect Luke to be accurate on Gallio, where we can check him, yet fabricate a name where, by chance of what remains extant, we cannot check him; reporting nonexistent officials whom someone might have been able to dispute would have hurt his credibility more than would remaining silent where he lacked data (cf. the unnamed officials in most cities, including even the speaker in 19:35). Luke likewise would hardly dare report Sergius Paulus's "believing" if nothing of the sort occurred, whether the governor's commitment ultimately proved exclusive to the Christian faith or not (and whether or not Luke had access to that information).²⁴³

I. PAPHOS (13:6)

When Luke declares that the company covered the entire island as far as Paphos, he probably refers to ministry especially along the long but relatively recent Roman road on the southern coast from Salamis to Paphos. The travelers probably preferred this shorter southern route, which was 115 miles, to 142 miles for the northern route. The southern road was built by Augustus sometime after 12 B.C.E. and was at least a week's journey; stops along the way may have included such cities as Citium, Amathus, and Curium.²⁴⁴ Citium was one of the island's best-known harbors (Strabo 14.6.3).

It would not have been difficult to find places to preach.²⁴⁵ Aside from preaching in the synagogues, much of their time would be spent on the road, which

240. Lüdemann, *Christianity*, 151.

241. Cf. Pliny the Younger, who happily preserves (and sometimes apparently unnecessarily generated) correspondence with the emperor (*Ep.* 10) but would not dare have fabricated any of it (and had he done so, the correspondence would surely have sounded quite different, just as Luke might have elaborated further here, this being Paul's "highest-ranking" convert).

242. One could argue that Luke knew of the consul and made him governor here, at the appropriate stage in his senatorial career, to claim a high Roman official for the faith. But if so, we might expect to hear more about him, and Luke would also recognize that few would be impressed with this "conversion": as consul, Sergius Paulus would necessarily participate in Roman civic religion and had necessarily been doing so.

243. Admittedly, Luke might avoid reporting the governor's faith to avoid endangering the status of Sergius Paulus if he knew (he may or may not have) that the latter remained alive and active in Rome (as he may have been ca. 70 C.E.). But one filling the role of *consul suffectus* in Rome (as he may have done in 70) would necessarily practice pagan rites, and so the former governor would not be a practicing, or at least public (cf. 2 Kgs 5:18), Christian at this time. Had he remained active in southern Asia Minor, from which he hailed, however, his status would probably not be in danger—certainly no more from believing the Christian message about Jesus than from consulting with a Jewish magician.

244. Gill, "Travels through Cyprus"; also noted by Witherington, *Acts*, 396n144, following Gill; similarly Finegan, *Apostles*, 77 (though not ruling out a route with the Pediaeus River over the mountains); Schnabel, *Missionary*, 262. Wilson (personal correspondence, Nov. 25, 2011) estimates 112 miles (180 km.). Scholars long listed as large cities (in addition to Salamis and Paphos) both Citium (Kition) and Amathus, on the south, and Soli, on the north (Lake and Cadbury, *Commentary*, 143).

245. Schnabel, *Missionary*, 262, notes that the same verb was connected with preaching in Acts 8:4; see also, e.g., 8:40; cf. 9:32; 10:38; 11:19. The verb is certainly not decisive (e.g., 9:38; 11:22; 12:10) but allows the possibility.

would resemble many other Mediterranean roads. Most cities in the empire grew up where trade would naturally converge, on harbors, rivers, or roads. The road would mostly pass agrarian areas and, when near a city, would pass tombs on the sides of the road. Close to the gates of walled cities would be shrines, wells, and some shops whose odors kept them outside the city, such as those of tanners and leatherworkers.²⁴⁶

New Paphos itself, on the western end of the island (Strabo 14.6.4), had a harbor and magnificent temples (14.6.3). Jewish interpreters could refer to this city alongside Salamis to epitomize Cyprus.²⁴⁷ The empire's cities were mostly polytheistic, and Paphos was no exception; the most prominent deity there was Paphian Aphrodite,²⁴⁸ apparently a Syrian goddess overlaid with Greek traits.²⁴⁹ (Syncretism among goddesses was common [see comment on Acts 8:10], but in Cyprus, Aphrodite was combined particularly with another queen goddess, Astarte.)²⁵⁰ The Paphians were first to worship "Heavenly Aphrodite" after the Assyrians, opined Pausanias (Paus. 1.14.7); "Cyprian Aphrodite" was said to have fallen from heaven.²⁵¹ Some culturally informed members of Luke's audience, hearing of Paphos, may have associated it in their mind with a specific deity known to be venerated there;²⁵² Paphos was said to be dedicated to Aphrodite just as Athens was to Athena, or Delphi or Delos was to Apollo (Lucian *Sacr.* 10).²⁵³

Just sixty stadia (about 7 mi. or 15 km.) to the southeast, in originally Phoenician Palaepaphos (Old Paphos), which had its own harbor, was the famous temple of Paphian Aphrodite, to which both men and women from Paphos made an annual procession (Strabo 14.6.3).²⁵⁴ It was said that in a special court of this temple, rain would never fall (Pliny E. *N.H.* 2.97.210). Old Paphos was greatly loved by Aphrodite (Hom. *Od.* 8.362–63), whose birthplace was supposedly in the sea foam by the rocky coast nearby.²⁵⁵ The focus of the cult, evident from some portrayals of Aphrodite on

246. Jeffers, *World*, 51.

247. Lake and Cadbury, *Commentary*, 143 (citing *Sib. Or.* 4.128ff.; 5.450ff.). For further detail on New Paphos, see Gempf, "Paphos"; Fant and Reddish, *Sites*, 352–62; on Old Paphos, 363.

248. "Famous both among natives and strangers" (Tac. *Hist.* 2.2 [LCL, 1:163]; at greater length, see Tac. *Hist.* 2.2–4; *Ann.* 3.62; Philost. *Vit. Apoll.* 3.58).

249. Bruce, *Acts*¹, 256 (referring to both Old and New Paphos); cf. Knowing, "Acts," 285. Possibly older traditions survived as symbols on first- to second-century coins, since the excavated plan of the rebuilt sanctuary (ca. 100 c.e.) is notably different (Catling, "Paphos").

250. See Budin, "Reconsideration" (warning against seeing a blending only with Astarte in Greece). Undoubtedly this Aphrodite cult did interact with the cult of Aphrodite in nearby Cilicia (Pliny E. *N.H.* 5.22.92). The Roman Venus would have little relevance except insofar as some features derived from Greek Aphrodite (for these, see, e.g., Rives, "Venus," 284–85).

251. Lucian *Gout* 87–88, perhaps confusing goddesses; on goddess statues from heaven, see comment on Acts 19:35. For the contrast between "heavenly" Aphrodite and Aphrodite Pandemos (connected with prostitution and lust), see Llewellyn-Jones, "Tortoise," 189.

252. My point in mentioning this is to help capture the way the first audience would have heard these stories. Yet whether or not its members knew of particular deities associated with particular cities, they knew that their environment was mainly polytheistic and were conscious that the apostles who spoke boldly articulated a perspective then held by a tiny minority, not a dominant culture. The earliest Christian mission had little in common with imperialism.

253. Cyprus's Mount Olympus also held a temple of Aphrodite Acraea (Strabo 14.6.3).

254. Strabo notes that nearby Arsinoë had a sacred complex as well. If we may trust the report of Dio Chrysostom (since the other women rulers he names are noted elsewhere), Cyprus's history or legends included one tragic but wise female ruler and lawgiver, Demonassa (*Or.* 64.2–4). For a concise history of the Aphrodite cult there, see Graf, "Aphrodite," 67; for archaeology of the Aphrodite temple, and the argument that Rantidi contains the sanctuary of her male consort, see Young, "Aphrodite Cult."

255. See Grant, *Gods*, 22–23 (though he does not explain his claim that this distinction is significant for Acts); esp. Tac. *Hist.* 2.3; Hesiod, *Theog.* 199; cf. Libanius *Speech in Character* 18.3 (for foam); for her epithet "Cyprian," e.g., Libanius *Speech in Character* 17.3; 18.1, 3.

local coins, was the sacred rock in her temple.²⁵⁶ Old Paphos lay on a low elevation about a mile (less than 2 km.) from the coast.²⁵⁷

More relevant to the narrative is that New Paphos, also named Augusta, was Cyprus's capital under Rome and the Roman proconsul lived there.²⁵⁸ New Paphos, also on the coast, was about 12 miles (19 km.) to the northwest of Old Paphos.²⁵⁹ (Other cities in antiquity and more recently have also relocated from their previous sites.)²⁶⁰

The Jewish community in Paphos was likely significant enough to have attracted Paul and Barnabas to travel there, given their use of synagogues as a base for evangelization (Acts 13:5). Paphos certainly maintained trade with Judea, as evidenced by coins from Hasmonean, Herodian, and directly Roman-governed Judea.²⁶¹ It seems less likely that Barnabas and Saul had planned to visit the proconsul himself, though they were undoubtedly delighted with the invitation.

Traveling teachers gave orations, which sometimes secured them permanent resident-teaching positions;²⁶² an official might wish to meet visiting sages if he heard good reports about them.²⁶³ This would especially appear to be the case with Sergius Paulus, since he clearly already appreciated some Jewish (or perhaps generally Eastern) religious matters.²⁶⁴ Provincial governors typically had leisure time available (Sen. Y. Nat. Q. 4A.pref. 1) and followed the Roman patronal custom of receiving early-morning guests who came to pay respects (Plut. Cic. 36.3).²⁶⁵ On the missionaries' part, a favorable interview with a person of influence could reduce social complications and send positive signals to others who might be interested.²⁶⁶ Although his interview with the proconsul here may have been unplanned, Paul's subsequent ministry targeted centers of Roman administration as well as (like Cynics and sophists) urban centers.²⁶⁷

II. ELYMAS BAR-JESUS (13:6, 8)

Although Elymas was presumably the son of someone named Jesus (i.e., Joshua, a common name in this era),²⁶⁸ Luke probably plays on the name "Bar-Jesus" (Aramaic,

256. Gill, "Religion," 87 (also mentioning other evidence for the worship of sacred rocks on Cyprus); Tac. Hist. 2.3.

257. Maier, "Paphos," 245.

258. Fitzmyer, *Acts*, 501.

259. Maier, "Paphos," 245.

260. E.g., on new Jericho, see Hachlili, "Jericho"; for old Jericho, see Holland, "Jericho"; for Gaza, see comment on Acts 8:26. In more recent history, cf. the old Burmese capital at Ava (Anderson, *Shore*, 244, 276).

261. Stern, "Diaspora," 155; also Le Cornu, *Acts*, 683.

262. See Winter, *Left Corinth*, 36–37; Pogoloff, *Logos*, 176.

263. With Rackham, *Acts*, 200.

264. Many in the Greco-Roman world were attracted to the exotic and esoteric lore of the East or Egypt (Val. Max. 8.7.ext. 2–3; Lucian *Cock* 18; *Phil. Sale* 3; *Iambl. VP* 3.14; 4.19; cf. Hippol. *Ref.* 1.11 [including magi]; for magic, e.g., Lucian *Lover of Lies* 31; Klauck, *Context*, 213; among Stoics, Mastrocinque, "Choices," 381; with Germanicus, in the imperial household, 383); thus, e.g., a Roman matron heeds a Jewess who claims to interpret Jerusalem's laws and people's dreams, for a fee (*Juv. Sat.* 6.542–47). Such exotic connections aided Diaspora Jewish apologetic (cf., e.g., Stowers, *Rereading of Romans*, 62).

265. For the custom, see also Hor. *Sat.* 1.1.9–10; *Ep.* 2.1.103–5; Mart. *Epig.* 3.36.1–3; for this practice among Roman governors, see Cic. *Verr.* 2.4.66.147; Plut. *Cic.* 36.3; see further Keener, *John*, 1098.

266. In societies with high power distance, such as traditional African villages where the chief's and elders' approval could prove decisive, following protocol with leaders proved especially strategic. Roman administration does not fit the high power distance model as well as such villages, but it is much closer to that than Western society in general is (cf. Malina, *Windows*, 142–45).

267. See discussion in Liefeld, "Preacher," 213–15.

268. Josephus has Ἰησοῦς 123 times, the majority for the biblical Joshua, but also for more recent figures, in *Life* 66–67, 105, 108–10, 134, 178, 186, 193, 200, 204, 246, 271, 278–79, 294–95, 300–301; *Ant.* 11.298–301; 12.237–39; 15.41, 322; 17.341; 20.200, 203, 213, 223, 234; and *War* 2.566, 599; 3.450, 452, 457, 467, 498; 4.160, 238, 270, 283, 317, 322, 325; 6.114, 300, 387. Le Cornu, *Acts*, 700, points out that "Jesus" (ישוע) was presumably an updating of the longer biblical יהושע (Joshua).

“son of Jesus”) here:²⁶⁹ he is revealed as “son of the devil” instead in Acts 13:10.²⁷⁰ Scholars note some ironies in the passage.²⁷¹

Elymas	Saul
A “false prophet” (Acts 13:6)	A true prophet (Acts 13:1)
Elymas has two names (13:6, 8), one that provides Luke a wordplay (Bar-Jesus becomes instead son of the devil, 13:10)	Saul has two names (13:9), one of which provides a connection with Sergius Paulus (13:7)
Elymas twists the Lord’s straight “ways” (13:10)	Saul once opposed the “way” (9:2); now he preaches it (16:17) (the way John made straight, Luke 3:4–5)
Was blinded and sought someone to lead him by the hand (13:11)	Was blinded and led by the hand (9:8)
A false prophet (13:6), full of all deception (13:10)	Filled with the Holy Spirit (i.e., as a true prophet, 13:9)

Whether because of Jewish use of a mysterious divine name²⁷² or because of Jews’ apparently exotic customs, many Gentiles regarded Jews as particularly adept at magic.²⁷³ Ancient magical papyri reveal considerable Jewish influence, including in papyri from Gentiles lacking understanding of the formulae and names they were exploiting.²⁷⁴ (See fuller excursus on magic, including magic and Judaism, at Acts 8:9.) Some pagans viewed Moses as a magician,²⁷⁵ but Judaism countered by appealing to Moses’s defeat of Egyptian magicians (Exod 7:11–12). (Given the stereotypes about Egyptian magic,²⁷⁶ this charge would probably prove more persuasive than the one about Moses, despite Jewish involvement in magic.)²⁷⁷ This fits Luke’s polemic against Jewish spirituality without Jesus.

III. FALSE PROPHETS (13:6)

This passage contains Luke’s only use of the title μάγος (Acts 13:6, 8); see discussion on this title at Acts 8:9–11. This passage also contains one of Luke’s only two explicit uses of “false prophet” (ψευδοπροφήτης), the other passage warning that the prophets of whom all others think well are likelier false prophets (Luke 6:26). The term appears in Zech 13:2 LXX and is particularly prominent in Jeremiah (LXX

269. Plays on names were a common practice; see, e.g., Lucian *Dem.* 31; Max. Tyre 18.1; Hermog. *Method* 13.429 (citing Hom. *Il.* 2.758; Plato *Gorg.* 467b; Demosth. *Or.* 19.248); probably Jas 1:1; perhaps “remember” and “Zechariah” in the Hebrew of 2 Chr 24:20, 22; they were also used for humor or teasing (as among children today; “Jokes,” 1202, citing Cic. *Verr.* 2.1.121; Petron. *Sat.* 36.5–8). Ancients also offered mnemonic associations among namesakes (e.g., Val. Max. 4.6.2–3).

270. E.g., Dunn, *Acts*, 176; Le Cornu, *Acts*, 704; Klauck, *Magic*, 49. Bede *Comm. Acts* 13.6 doubts that a son of the devil could genuinely be named Bar-Jesus, and implausibly suggests a textual corruption for the latter.

271. Esp. Johnson, *Acts*, 227 (with my adaptations, including from Tannehill, *Acts*, 162–63).

272. See comment on Acts 3:6; and esp. on Acts 19:13.

273. E.g., Pliny E. N.H. 30.2.11 (cited in Ferguson, *Backgrounds*, 180–81); Lucian *Alex.* 13 (in Cadbury, *Acts in History*, 95).

274. See further comment on Acts 19:13. Cf. also the corpus of Jewish Aramaic incantation bowls (Isbell, *Bowls*). Egyptian hieroglyphics were likewise redeployed without understanding in magic (see Frankfurter, *Religion in Egypt*, 254; comment on Acts 2:4).

275. Gager, *Moses*, 134–61, esp. 161; Whittaker, *Jews and Christians*, 56–57; Apuleius *Apology* in Stern, *Authors*, 2:201; PGM 5.107–9; 13.345. See excursus on magic at Acts 8:9–11.

276. Hom. *Od.* 4.228–34; Lucian *Lover of Lies* 31, 33; Apul. *Metam.* 2.28; Ps.-Callisth. *Alex.* 1.2–8; Helioid. *Eth.* 6.14; Philost. *Vit. soph.* pref. 480; *Abot R. Nat.* 28 A; 48, §132 B; b. *Qidd.* 49b; *Gen. Rab.* 86:5; *Exod. Rab.* 9:6; 20:19; *Tg. Ps.-J.* on Exod 1:15; 7:11; cf. the prefect’s circular in Horsley, *Documents*, 1:47–51; Dauphin, “Amulet”; Frankfurter, “Magic”; idem, *Religion in Egypt*, 198–237; Lewis, *Life*, 95–96; Klauck, *Context*, 213. (Other locations, e.g., Thessaly, were also associated with magic; Lucian *Lucius* 4; *Dial. C.* 1 [Glycera and Thais], 281; implied in *Dial. C.* 4 [Melitta and Bacchis 1], 286.)

277. Early Christianity’s enemies associated Jesus’s stay in Egypt with magic (Dalman, *Jesus in Talmud*, 33; Cook, *Interpretation*, 32–33).

6:13; 33:7, 8, 11, 16 [26:7, 8, 11, 16 MT]; 34:9 [27:9]; 35:1 [28:1]; 36:1, 8 [29:1, 8]), was common in Josephus,²⁷⁸ and became a fairly common designation in early Christianity.²⁷⁹

Following biblical passages such as Deut 13 and 18, Jewish people sought ways to distinguish true prophets from false. Thus 4Q375 developed ideas in Deut 18 for this goal; the false prophet should be killed (4Q375 1 I, 4–5).²⁸⁰ Later Christians also urged discernment concerning false prophets (*Did.* 11.5–10); they often associated false prophecy with demonic spirits (Iren. *Her.* 1.13.3).²⁸¹ Some Jewish people also associated sorcerers and false prophets with misleading demons.²⁸² (This is not surprising, since even idolatrous false prophets could provide signs [Deut 13:1–3].) Many associated false prophets with pecuniary motives.²⁸³ It was expected that false prophets opposed true prophets and even sought to have them killed.²⁸⁴

Because of the respect for true oracles in antiquity, oraclemongers and interpolators of Sibylline oracles were common among Gentiles, Jews, and Christians.²⁸⁵ So widely were Sibylline oracles and other oracles fabricated or distorted that ancient literature frequently warns against and even lampoons the phenomenon.²⁸⁶ Some Jewish writers even compiled lists of canonical false prophets (4Q339).²⁸⁷ Balaam was the prototype for false prophets.²⁸⁸ Some believed that later false prophets were more dangerous than Balaam, who was at least able to be used by God.²⁸⁹ Whereas Jews were particularly concerned about false prophets, for Greeks they simply belonged to the larger spectrum of spurious rulers²⁹⁰ and fake philosophers.²⁹¹ Jewish people expected false prophets to continue until the time of the end (*Test. Jud.* 21:9; Mark 13:22).

As a “false prophet,” Elymas stands in deliberate and explicit contrast to Saul and Barnabas, who are true prophets (Acts 13:1).²⁹² Their message was incompatible with, and hence could challenge the influence of, Elymas’s in 13:8.²⁹³ Elymas would hardly stand idly by as others’ claims challenged his own livelihood. Although he would probably suffer nothing more severe than dismissal from the proconsul’s court, in principle he could be viewed quite harshly; some ancients considered it morally

278. Sixteen times (Jos. *Ant.* 8.236, 241–42, 318, 402, 406, 409; 9.133–34, 137; 10.66, 104, 111; *War* 2.261; 6.285). Strangely, it appears only once in Philo (*Spec. Laws* 4.51), perhaps because he focuses on the Pentateuch. Cf. also false prophets in 1QH^a XII, 17; 4Q430 1 4; 4Q177 5 VI, 6; 2 Bar. 66:4; *Mart. Is.* 2:12, 15; 5:2, 12; *Test. Jud.* 21:9.

279. Eleven times in the NT; six times in the *Didache* (*Did.* 11.5–10; 16.3); five in Shepherd of Hermas (*Herm.* 43.1, 2, 4, 7).

280. See also 1Q29 1, reconstructed by means of 4Q376 (*DSSNT* 178–79).

281. Cf. also demonic foreknowledge in the third-century *Test. Sol.* 15:8 (in Grudem, *Prophecy*, 42); cf. other texts in Stauffer, *Jesus and Story*, 207.

282. 1 En. 65:6; L.A.B. 34:2–3; *Asc. Is.* 2:5; b. *Sanh.* 67b; cf. CD XII, 2–3 (false prophets); *Test. Jud.* 23:1 (some MSS); Iren. *Her.* 1.13.3–4; sorcerers and false prophets tried to manipulate their spirit-guides through incantations (*PGM* 1.80–81, 88–90, 164–66, 181–85, 252–53; 2.52–54). Ironically, the use of angels became dominant in medieval Jewish “good” magic (Fass, “Angels”). Cf. divination by spirits in some traditional religions today (Mbiti, *Religions*, 233).

283. Mic 3:11; Aune, *Prophecy*, 228 (with 414n235).

284. *Asc. Is.* 2:12–3:12, esp. 3:6; cf. 1 Kgs 18:4, 13, 19–22; 19:10, 14.

285. See Collins, “Sibylline Oracles,” 320 (citing Cic. *Div.* 2.54.110–11).

286. See Collins, “Sibylline Oracles,” 320.

287. Possibly emulating Greek list-making practices (Cohen, “False Prophets”).

288. See, e.g., 2 Pet 2:15; *Sipre Deut.* 357.18.2; in 4Q339, see Shemesh, “Note on 4Q339”; see comment in the excursus on prophecy at Acts 2:17–18.

289. Kim, “Complexity,” on 4Q339.

290. E.g., Lucian *Book-Coll.* 20.

291. E.g., Lucian *Peregr.* passim; *Runaways* passim, e.g., 4, 15, 19–20; *Dial. D.* 370 (20/10, Charon and Hermes 8); *Indictment* 6, 11.

292. Tannehill, *Acts*, 162.

293. Rackham, *Acts*, 200.

just to punish deceivers (*Rhet. Alex.* 1, 1422b.5–8)²⁹⁴ and to execute a diviner who deliberately lied about omens (*Val. Max.* 7.2.5).²⁹⁵ Crowds might also seek to burn someone alive who employed dangerous magic (*Lucian Lucius* 54).

Perhaps relevant to false prophets in Luke's account, criticizing rival itinerants was also a way of distinguishing and defending the nobler itinerants about whom one was writing.²⁹⁶ Conflicts between competing teachers often appear; for example, Persian magi allegedly persuaded their king to send away a philosopher who sought to turn him from riches, claiming that the philosopher was a magician (γόης, *Eunapius Lives* 466) though in fact the magi deserved the title more. A false prophet might seek the death of true prophets (cf. 1 Kgs 18:4, 19)—for instance, by false accusation (*Asc. Is.* 2:12–3:12, esp. 3:6), the latter danger being relevant here (13:8). Claims that some prophets spoke only for financial gain went back many centuries (e.g., *Soph. Antig.* 1061; *Mic* 3:11). Here the missionaries' opponent is a magician, a "child of the devil" (*Acts* 13:10), which probably implies demonic power rather than mere fakery (on views of magic, see the excursus on magic and magicians at *Acts* 8:9–11). In light of Luke-Acts as a whole, detractors' accusations that Jesus or his followers act by demons (*Luke* 11:15) come to appear ironic and, from their accusers, even disingenuous (11:19).²⁹⁷ Outside Roman state cults, individuals (most often Greeks) could devote themselves to whatever cults proved most effective. Two spiritual spheres here vie for the governor's attention.²⁹⁸

That the false prophet is "Jewish" fits Luke's motif of the competition between Christian and non-Christian forms of Jewish faith; instead of bringing true faith to Gentiles, this Jewish magician distorts it.²⁹⁹ Other power encounters also occur with Jewish magicians (*Acts* 19:13–16) or magicians operating in a Samaritan (hence, from an external perspective, heterodox Jewish) sphere (8:9–13).³⁰⁰ Some scholars have compared this confrontation to Moses's confrontation with Pharaoh's magicians (mentioned above);³⁰¹ some Jewish tradition attributed their power to Satan (*Jub.* 48:9) just as Luke attributes that of Elymas to Satan (*Acts* 13:10). But whereas Moses confronted pagan magicians (*Exod* 7:11–12),³⁰² Saul here confronts an ethnically Jewish magician whose practice is pagan. This also fits a pattern in much of Luke's antimagical apologetic (see comment on *Acts* 8:9–11).³⁰³

The encounter described here accords with larger patterns in confrontations claiming to represent competing forms of spiritual power. Confrontations between different

294. On widespread opposition to falsehood in ancient literature, see comment at *Acts* 5:3–4.

295. Both early Judaism (see *b. Sanh.* 101a, in Alexander, *Possession*, 32) and early Christianity (Augustine, in Chadwick, *Early Church*, 79) acknowledged that demons could sometimes foretell the future.

296. See Liefeld, "Preacher," 298; Malherbe, "Gentle as Nurse."

297. See further Garrett, *Demise*, 36.

298. See Strelan, *Strange Acts*, 29–30.

299. Cf. Kilgallen, "Role of *magos*"; Robinson, "Paul in Cyprus."

300. Goulder, *Type and History*, 108–9, seeks to add some less persuasive parallels for "false disciples" (*Acts* 15:36; 23:1). Another power encounter appears in 16:16–18; cf. Johnson, *Acts*, 11.

301. E.g., Boismard and Lamouille, *Actes*, 2:234; Robinson, "Paul in Cyprus." This is more noteworthy if we recall a possible comparison of Agrippa I with Pharaoh in *Acts* 12 (see comment there). Later rabbinic texts also narrated a conflict with magicians (*b. Sanh.* 67b–68a; *y. Sanh.* 25d; in Levinson, "Gbwltwt").

302. Cf. 2 *Tim* 3:8, which employs the same verb (ἀνθίστημι) for magicians opposing Moses as for Elymas here. Luke employs this verb elsewhere for (and only for) opposition to the word (*Luke* 21:15; *Acts* 6:10), as does 2 *Timothy* itself (2 *Tim* 4:15). On Pharaoh's magicians, traditionally Jannes and his brother, see, e.g., CD V, 17–19; 4Q467 2 2; *L.A.B.* 47:1; *Tg. Ps.-J.* on *Exod* 1:15; 7:11 (cf. Grabbe, "Tradition," denying that it is early enough to be the background for 2 *Tim* 3:8); *Apul. Apol.* 90 (in Stern, *Authors*, 2:201); Charlesworth, *Pseudepigrapha and New Testament*, 79; Gager, *Moses*, 137–40.

303. See esp. here Klauck, "Paphos and Lystra." Cf. antimagical polemic as a method for distinguishing itinerants in Liefeld, "Preacher," 298.

religious groups or individuals with an active view of spiritual power often produce what missiologists call “power encounters.”³⁰⁴ Often, when those who doubt a religious system defy its taboos and escape unscathed, many insiders are convinced and abandon the taboos.³⁰⁵ Protestants grew enormously in Haiti through confronting vodun³⁰⁶ and through power encounters there;³⁰⁷ power encounters are also reported with the spread of the Christian message in parts of Asia.³⁰⁸ In one relatively recent report, when shamans gathered around a sacred tree were cursing the Christians' God (during a meeting of Christians seven miles away), lightning destroyed the tree, apparently producing a widespread response.³⁰⁹ See further discussion (with examples and some sources) at Acts 8:13.

IV. USE OF A COURT MAGICIAN (13:6–7)

That Sergius Paulus should employ a court magician,³¹⁰ or at least depended heavily on a magician as a consultant, is not surprising, for a number of reasons. Even though sorcery in the negative sense could invite official hostility,³¹¹ views varied on the private utility of magic,³¹² and Elymas may not have promoted himself as a magician (in contrast to Luke's label for him).³¹³ The empire's approximately forty provinces maintained as little Roman bureaucracy and staff as possible to keep the empire running;³¹⁴ governors would be free to draw on local expertise in addition to their official *consilium* (on the *consilium*, see comment on Acts 25:12). People of status often employed philosophers or others to lecture at their banquets;³¹⁵ Cyprus itself produced many philosophers and philosophic students.³¹⁶ Rulers might thus value speakers or other sorts of entertainment,³¹⁷ even without any intention of changing their behavior to accommodate philosophers or prophets.³¹⁸ Kings often valued a diviner in their royal court;³¹⁹ divination had long been employed for

304. Of the three definitions in De Wet, “Signs,” 82–83, I include the second (such as burning fetishes) but refer especially to the third, the “challenge-oriented power encounter in public.” See lengthier discussion of the subject at Acts 8:12–13; Keener, *Miracles*, 843–56.

305. See, e.g., Tippett, *People Movements*, 80–84, 164–67; De Wet, “Signs,” 81; Tandi Randa, interview, May 23, 2012; follow-up correspondence, May 25–26, 2012.

306. Johnson, “Growing Church,” 54–58.

307. E.g., destroying an “indestructible” sacred rock, in Johnson, “Growing Church,” 55–56.

308. Pothen, “Missions,” 305–8; cf. protection from witchcraft in Bali, in Hang, *Crushing*, 63–64; elsewhere in Indonesia in Tandi Randa, interview, May 23, 2012.

309. Chavda, *Miracle*, 9–10, 128–29, including photographs (between pp. 78 and 79) and the claim of eyewitnesses. One of my students, Paul Mokake, has shared with me several eyewitness accounts of power encounters in his homeland of northern Cameroon (noting demonstrations of what was believed to be supernatural power from both sides; May 13, 2009).

310. Witherington, *Acts*, 398, suggests that this magician functioned as part of Sergius's “official *comitatus* or entourage.”

311. E.g., Philost. *Vit. Apoll.* 7.17, though this is probably a novelistic element.

312. Classical Greeks sometimes distinguished what has come to be called “black” and “white” magic, but the dominant perspective on “magic” was pejorative (Klauck, *Context*, 211).

313. Cf., e.g., Jos. *Ant.* 20.97, calling Theudas a “magician” (not likely Theudas's own perspective).

314. Garnsey and Saller, *Empire*, 21.

315. See, e.g., Lucian *Posts* 35–36; Malherbe, *Moral Exhortation*, 13. On philosophers lecturing at banquets, see, e.g., Max. Tyre 22; cf. Slater, “Introduction,” 2–3; Pogoloff, *Logos*, 264–71.

316. Such as Demonax (Lucian *Dem.* 1, 3) and Rufinus (*Dem.* 54).

317. Governors also sought ways to employ their leisure time (Sen. *Y. Nat.* Q. 4A.pref. 1; Acts 24:24–26).

318. As in Mark 6:20. For people being entertained by, but not heeding, philosophers, see, e.g., Dio Chrys. *Or.* 8.11; for the same behavior with prophets, see, e.g., Ezek 33:32.

319. Johnson, *Acts*, 223, cites Ps.-Callisth. *Alex.* 1.1–12; Simon the magician in a senator's house in *Acts Pet.* 8 (also Philo *Spec. Laws* 3.100, noting that kings could study “true magic”); Eckey, *Apostelgeschichte*, 285–86, also notes magicians and mantics as rulers' advisors, e.g., Tiberius's (Suet. *Aug.* 98.4–5; *Tib.* 14.4; *Cal.* 19.3); Pervo, *Acts*, 325, cites Josephus himself (*War* 3.399–408) and refers helpfully to Potter, *Prophets*. Other commentators (Witherington, *Acts*, 399; Klauck, *Magic*, 51; esp. Talbert, *Acts*, 117) compare Tiberius's

matters of state,³²⁰ including war.³²¹ Romans had long respected the predictions of Eastern magi (Vell. Paterc. 2.24.3, on Sulla). It had also long been noted that charlatans claiming magic powers specifically sought out the wealthy (e.g., Plato *Rep.* 2.364BC).³²²

The very term μάγος (Acts 13:6, 8) most technically referred to a class of diviners on the staff of the Persian king. Μάγοι were typically adept in astrology (cf. Matt 2:1–2),³²³ and even many Jewish people by this period had developed skill in this discipline. Many intellectuals justified astrology,³²⁴ and in general, people in the empire, especially in the East, took astrology very seriously. See the excursus on magic and magicians at Acts 8:9–11 and the excursus on astrology at Acts 2:9–11.

Although we should not think of a large number of magicians moving between Paphos and Judea in some sort of magician “exchange program,” it is noteworthy that Cyprus probably had other high-status Jewish magicians; one of governor Felix’s friends was a Jewish Cypriot who successfully pretended to be a magician (Jos. *Ant.* 20.142), thus seducing Drusilla to abandon her husband and marry Felix (20.142–43).³²⁵ Everyone knew that such behavior was against God’s law (20.143), warranting the deceiver’s judgment (20.144); likewise, Elymas here is a figure whom most early Jewish critics of Christians would have also viewed negatively. Many Jewish people recognized the importance of testing and discerning prophets.³²⁶

We also have strong reason to believe that Sergius Paulus was from southern Anatolia and hence grew up as a Roman surrounded by Eastern culture; given widespread interest in the alleged esoteric powers of Eastern religious castes (somewhat akin to nineteenth-century “orientalism”),³²⁷ his interest in both a Jewish magician (Acts 13:6) and Jewish agents of a new (13:7) and signs-working (13:11–12) message is plausible.³²⁸ He may have also had some “God-fearing” relatives in Pisidian Antioch (cf. 13:50).

Perhaps Sergius Paulus invited Elymas to be present to help him evaluate the new Jewish teachers, or perhaps Elymas, wishing to counteract competitors, simply used his access to the court when he heard that they were coming. That the governor

well-known dependence on an astrologer named Thrasyllus (Suet. *Tib.* 14.4; Chaldeans in Juv. *Sat.* 10.93–94); Nero’s on Tiridates (Pliny E. *N.H.* 30.17) and Babillus (Suet. *Nero* 36.1); Otho’s on astrologers (Tac. *Hist.* 1.22.2) such as Seleucus (Suet. *Otho* 4.1; 6.1); Domitian’s on the astrologer Ascleterion (Suet. *Dom.* 15.3); Marcus Aurelius’s on an Egyptian magician (Dio Cass. 71.8.4); Valerian’s on another Egyptian magician in persecuting Christians (Euseb. *H.E.* 7.10.4–6). (Emperors and rulers often feared astrologers, however; Tac. *Ann.* 14.20; Suet. *Nero* 36; see Keener, *Matthew*, 100–101.) Although it is more scandalous in the modern world, we may compare the alleged dependence of a U.S. president’s wife on an astrologer about a quarter century ago.

320. On divination, see comment in excursus at Acts 2:17–18; also at Acts 16:6–7.

321. See comment in excursus at Acts 2:17–18.

322. A magician is attached to a senator’s household in *Acts Pet.* 8 (Talbert, *Acts*, 117).

323. E.g., Diod. Sic. 1.81.6; 2.31.8; Juv. *Sat.* 6.553–64; Aul. Gel. 1.9.6; 14.1; Philo *Dreams* 1.53; *Sib. Or.* 3.227; *Pesiq. Rab.* 14:8. For further comment on magi, see excursus at Acts 8:9–11. Magic could also be associated with astrology (e.g., *y. Roš Haš.* 3:8, §§1–2).

324. Beck, “Astrology.”

325. Others also make the comparison, e.g., Wikenhauser, *Apostelgeschichte*, 150; Lampe, “Wolves,” 259.

326. E.g., Deut 13:1–5; 1Q29 1 (reconstructed with the help of 4Q376, in *DSSNT* 178–79). On false prophets, see also comments on magicians at Acts 8:9.

327. The Greek and Roman world also associated the best magic with the East (Klauck, *Context*, 213); for “Egyptomania” analogous “to the Egyptian romanticism spread by Freemasonry in the eighteenth century,” see Klauck, *Context*, 129. On exotic views of distant lands, see the commentary introduction, Keener, *Acts*, 1:68, 74n207, 109, 137, 208, 337, 433, 517, 584.

328. Even apart from the likelihood of Sergius Paulus having multiple polytheistic allegiances (Israel’s God being only one interest), the pagan decorations in the likely governor’s palace (Fant and Reddish, *Sites*, 357) reflect a long period of official use by various governors, not Sergius Paulus’s personal tastes. Jervell, *Apostelgeschichte*, 346, even thinks him a God-fearer.

“summoned” (προσκαλέω, see BDAG) the apostles does not suggest harshness (given the motives mentioned for the invitation) but might imply that his attendants ushered them into his presence.³²⁹

V. SERGIUS PAULUS (13:7)

We do not know of a Sergius Paulus who governed Cyprus at this time, but this omission is not surprising; we know the names of only forty-six, or about one-sixth, of Cyprus's proconsuls between 22 B.C.E. and the close of the Severan period.³³⁰ That leaves only about one chance in six of his name being preserved as governor, which, as we would expect, it is not. Nevertheless, we can speak firmly of the aristocratic family of Sergii Paulli, of which he was a member.³³¹ Scholars have cited three inscriptions in this connection, though only the last of these dates to the right period. A later proconsul Paulus (*IGRR* 3.930) probably dates to the period of Hadrian (ca. 126 C.E.);³³² given that he belonged to a different generation, he can at most attest to the continuing influence of this family in Cyprus. Another inscription from Cyprus may speak of a Quintus Sergius there (*IGRR* 3.935 = *SEG* 20.302.9–11); this might suggest the influence of the family there in this general period. It is probably, however, not the same person; the inscription may date to Gaius Caligula's rather than Claudius's reign,³³³ may not be correctly restored, and may not refer to the governor.³³⁴

The third inscription (*CIL* 6.31545.3 = *ILS* 2.5926) may be more relevant; it refers to a Lucius Sergius Paullus, a Claudian senator, perhaps at an earlier stage of this proconsul's senatorial career.³³⁵ That the name is “extremely rare” counts in favor of identifying the third inscription's Sergius Paullus with Luke's (in view of the fairly narrow senatorial pool), especially given a later L. Sergius Paulus (noted below).³³⁶ He is “the only senator attested from this generation of the family” and hence, classicist Stephen Mitchell concludes, surely the one whom Paul met in Cyprus.³³⁷ Classical scholars are more open to the identification with Luke's Sergius Paulus than biblical scholars tend to be.³³⁸ This inscription probably dates between 41 and 47; Paul was in Cyprus sometime between 45 and 50. A praetor could be as young as thirty; consuls

329. See Treves and Lintott, “*Viatores*.” That the verb appears so soon after its use in 13:2 might imply only that it was fresh in Luke's mind, but someone might suggest that it could imply divine providence behind this summons (Luke employs the verb thirteen times, but nowhere else in Acts 7–15).

330. Horsley, *Documents*, 1:45, §10. For this period in particular, the evidence is patchy; see Riesner, *Early Period*, 143. For other information on the governor of Cyprus, cf. Kapera, “Administration.”

331. Cf. the caution of Hemer, *Acts in History*, 109; Marshall, *Acts*, 219; esp. Van Elderen, “Archaeological Observations,” 151–56.

332. Nobbs, “Cyprus,” 283; Riesner, *Early Period*, 138 (noting a revision of the earlier dating of 50–53 C.E.).

333. Nobbs, “Cyprus,” 283–84 (comparing also Pliny E. *N.H.* 1.2).

334. Mitchell, *Anatolia*, 2:7. Campbell, “Attestation” (cf. idem, “Anchor”), suggests a Quintus Sergius Paul(us) from the time of Tiberius and accordingly rearranges Pauline chronology, but this view depends on his textual reconstruction and (though claiming only to contradict the chronology in Acts) faces greater obstacles from Gal 1–2. If the Pisidian family of Sergii Paulli had long-term connections with Cyprus, even the reading “Sergius” would not specify which one.

335. Nobbs, “Cyprus,” 284–87; Mitchell, *Anatolia*, 2:6; Bruce, *Acts*¹, 255–56; idem, *Commentary*, 264; Fitzmyer, *Acts*, 501–2. Witherington, *Acts*, 80n265, notes that he could have gone to Cyprus after his curatorship or could have taken an office abroad while retaining that office. On the normal career path for Roman aristocrats, see, e.g., Levick, “Careers,” 291; Brennan, “*Cursus honorum*”; Gizewski, “*Cursus honorum*,” 1021; Eck, “*Cursus Honorum Inscriptions*” (esp. comments on imperial times).

336. Riesner, *Early Period*, 140; Schnabel, *Mission*, 1084; for further arguments for identification, see *ibid.*, 1084–86.

337. Mitchell, *Anatolia*, 2:7.

338. Nobbs, “Cyprus,” 285, citing Levick, *Roman Colonies*, 112; Mitchell, “Population and Land,” 1073; see also idem, “Antioch (OCD)”;

were generally forty-two and over.³³⁹ Acts 13 and the inscription both fit together well with the way senatorial careers usually proceeded in this era, and could indicate the same individual.³⁴⁰ Given the rareness of the name and the normal pattern of a senatorial career, Mitchell is also convinced that this would be the same Sergius Paullus who became *consul suffectus* in 70 C.E. (*CIL* 6.253).³⁴¹ If so, he was the first “senator from the eastern provinces to reach the consulship.”³⁴²

If L. Sergius Paulus of Pisidian Antioch was his son,³⁴³ perhaps Paul left for Pisidian Antioch after Cyprus because of a referral through the governor’s family connections there;³⁴⁴ certainly the Sergii Paulli, like the Caristanii, though Italian by descent, “were native to Pisidian Antioch.”³⁴⁵ The size and remoteness of Pisidian Antioch reduces the probability that the connection with Paul’s following journey is mere coincidence. This connection might help explain some Gentiles welcoming them (Acts 13:44, 48), though the local Jewish community’s long-term ties with aristocrats (13:50) would count more strongly. Some scholars even argue for attestation of Sergius Paulus as proconsul of Cyprus in Pliny E. *N.H.* 18, in the table of contents, against the earlier text-critical evaluation of Kirsopp Lake.³⁴⁶

Luke provides the governor with the correct title; Cyprus was a senatorial province in this period, with proconsuls residing in Paphos.³⁴⁷ Luke emphasizes Sergius Paulus’s intelligence for at least two reasons. First, Luke’s presentation of people with higher status receiving the message includes intellectuals (Acts 17:34; 18:24). Second, Luke cites Sergius Paulus’s intellectual acumen as helping to explain why he responds so quickly to the gospel (even signs did not always persuade others).³⁴⁸ When the apostles entered, both the governor’s seating and his garb would immediately identify him. Like priests, magistrates typically wore a distinctive garb, probably including purple on their toga.³⁴⁹

VI. THE GOVERNOR’S RESIDENCE (13:7)

To what sort of building would the missionaries have been summoned? In 1966 archaeologists discovered what is usually thought to be the governor’s palace. The largest ancient home discovered on Cyprus and one of the largest known from the Mediterranean world, its east-west length was more than 360 feet, and its north-south width more than 250. Both its separate areas for private living and public activity and a Latin inscription found there reinforce the likelihood that this was the governor’s residence.³⁵⁰ The surrounding neighborhood was also a wealthy one.³⁵¹ The north wing probably

339. Nobbs, “Cyprus,” 286.

340. *Ibid.*, 287.

341. Mitchell, *Anatolia*, 2:6; cf. also Levick, *Roman Colonies*, 112.

342. Mitchell, *Anatolia*, 1:152. In 48 C.E., Claudius had to defend senators from the provinces (*CIL* 13.1668; *ILS* 212; Tac. *Ann.* 11.23–24; in Sherck, *Empire*, §55, pp. 97–98).

343. See a full survey of evidence already available in Ramsay, *Discovery*, 150–62 (including other probable members of the prominent family into the second century).

344. Nobbs, “Cyprus,” 287; Mitchell, *Anatolia*, 2:6.

345. Mitchell, *Anatolia*, 2:7. On the Caristanii, see also Levick, *Roman Colonies*, 111–13.

346. Riesner, *Early Period*, 141–42, citing also possibly Pliny E. *N.H.* 2 (Pliny addresses Cyprus in 2.210; 18.68).

347. Hemer, *Acts in History*, 108 (citing *IGRR* 3.933, for 29 C.E.; 3.971, for 52 C.E.; and 3.978, for the Claudian period); Gasque, “Acts and History,” 55. For the difference between such provinces, cf. Strabo 17.3.25; Dio Cass. 53.12–15. For a proconsul’s responsibilities, see Jones, *Empire*, 180–83 (reproducing at length *Dig.* 1.16.4–13).

348. Some teachers opined that smarter students raised in wiser homes learned with less need for persuasion and argument (*Mus. Ruf.* 1, pp. 32.34–34.2). Like Josephus (e.g., *Ant.* 18.88–126), Luke is happy to report “good” Roman officials at times.

349. See Cary and Haarhoff, *Life*, 97–98, 152.

350. Fant and Reddish, *Sites*, 354, 356 (noting that Latin was used in the East only for official business).

351. See the map in *ibid.*, 355.

contained servants' quarters and laundry facilities. The south wing housed a bath complex, dressing room, and toilet facilities large enough for multiple simultaneous users.³⁵²

Although we cannot be certain in what room Paul and Barnabas would have met Sergius Paulus, we might venture a guess as to which of the rooms excavated in this palace is likelier than others. Passing beyond the bath area, Fant and Reddish note, "on the left is a large double room consisting of a rectangular hall and a horseshoe-shaped apse that is slightly elevated. Two steps lead up to it. The Roman governor likely held audiences in this room, seated within the elevated apse." The rectangular room had mosaics on the floor, and the wall panel that survives depicts Achilles's infancy. Paul must have met Sergius Paulus in such a hall.³⁵³

VII. OPPOSITION FROM "ELYMAS" (13:8)

The origin of Luke's basis for translating "Elymas" as "magician," if that is what he is doing, is unclear, though Arabic (*alim*, "wise man," perhaps "magician") and Hebrew (*hōlēm*, "dream interpreter") cognates have been proposed.³⁵⁴ If "El" means "God," it might connect with "Jesus" (as in "Bar-Jesus") for Luke's audience on a theological level, but this is an extreme stretch. Even if Luke were from Syrian Antioch (a tradition I do not consider very likely), he, as an urbanite, may have known little Aramaic;³⁵⁵ most of his target audience would know even less. The closest LXX term would seem to be "Elamite" (Tob 2:10; Jdt 1:6; 1 Macc 6:1; Dan 8:2); an association with Persia could then provide the connection with μάγος here,³⁵⁶ but this also seems far-fetched. Probably by "translated" Luke simply intends "understood to mean" in a nontechnical manner (cf. Acts 4:36).³⁵⁷

Elymas "opposed" or "resisted" (ἀνθίστατο, perhaps chosen partly for its phonetic similarity to ἀνθύπατος, "proconsul")³⁵⁸ Paul and Barnabas, but Jesus had promised that their enemies could not oppose them (Luke 21:15), and Stephen had demonstrated this victory (Acts 6:10).³⁵⁹ The reader attentive to Luke's use of this term will therefore expect Elymas to be silenced quickly (13:11).

By seeking to turn one from the faith, Elymas was the sort of person through whom stumbling blocks would come (Luke 17:1–2), and he was emulating Satan's role (cf. 22:31–32; Acts 13:10). That he sought to "turn" the proconsul from the faith may sound as if the governor had already believed but in context suggests rather that he was seeking to turn him from believing the message (Acts 13:12).³⁶⁰ (For "the faith"

352. Ibid., 357.

353. Ibid. In some respects the excavated hall could have been typical for such elite venues. Homeric scenes on walls were common (Petron. *Sat.* 29). For wall paintings, often with mythological scenes, see Kaufmann-Heinimann, "Religion," 189–91; floor mosaics became increasingly popular in the later empire (191). For depictions and descriptions of Achilles's childhood in Roman sources from the early empire, see Cameron, "Achilles."

354. See the proposals in, e.g., Witherington, *Acts*, 401; favoring the Semitic form of "magician," Kisau, "Acts," 1323. But Fitzmyer, a specialist in Semitic languages, while noting the Arabic possibility, points out that the "relationship is still unexplained" (*Acts*, 502). Had Elymas been struck mute instead of blind, like Zechariah in Luke 1:20–22, we might have thought of a Hebrew pun on מָלֵךְ; but etiological explanations work better for old legends and midrashic fables.

355. Cf. Millar, *Empire and Neighbours*, 197.

356. In this case, "Elymas" would translate "magician" in Acts 13:8 rather than "Bar-Jesus" in 13:6, though "translate" must in any case be taken as an interpretation rather than a direct translation.

357. Johnson, *Acts*, 223.

358. Three of Luke's five uses of ἀνθύπατος occur in this passage, and this is one of only three uses of ἀνθίστημι in Luke-Acts.

359. Cf. the use of ἀνθίστημι for magicians who opposed Moses in 2 Tim 3:8 and for opponents of the gospel in 2 Tim 4:15.

360. Luke associates this opposition with spiritual causes (Acts 13:6, 10); spiritual conflicts between worldviews are also expected in some settings today. E.g., in some traditional cultures today, diviners tend to

as the Christian message, see 6:7; 14:22; 16:5; the context here refers to the message the governor was seeking to hear, 13:7.)

Elymas undoubtedly expected some sort of response, since the usual form of confrontation included challenging another's honor, followed by an attempt at riposte, responding to the challenge. The winner would be decided by the hearers,³⁶¹ but Elymas must have been confident that, having the governor's ear already, he would succeed.

c. *Paul's Power Encounter (13:9–12)*

The conflict proves to be not merely an academic competition between differing religious perspectives but a confrontation between spiritual powers: because Paul is "filled with the Holy Spirit" (13:9), he is able to oppose a "son of the devil" (13:10). It is at this crucial juncture, vying for a Roman governor's faith, that Paul begins going by his Roman name. If Luke has less information for (or less interest in) Paul's Cypriot and Phrygian ministries than for much of his later ministry, this is nevertheless one incident too dramatic, and apparently too seminal for Paul's future ministry, for him to omit.

Although Paul was probably the stronger intellectually or better educated than Barnabas,³⁶² that he acts here instead of Barnabas is attributed only to the activity of the Spirit³⁶³ and may be related to his distinctive calling to reach Gentiles as well as Jews. The Spirit has sent Paul and Barnabas on this mission (13:2, 4); now the Spirit empowers Paul to confront the opposition.³⁶⁴ The next mention of being filled with the Spirit describes their converts in another location (13:52); the ministry of the Spirit multiplied itself. That Paul "looked intently" (ἀτενίσας) at Elymas reflects a favorite Lukan expression (twelve of fourteen NT uses), on two other occasions conjoined with miracle working (3:4; 14:9).³⁶⁵

I. SAUL CALLED PAUL (13:9)

Emphasizing the connection with the Jerusalem church, Luke has been speaking of "Barnabas and Saul," with Barnabas as the senior partner (11:30; 12:25; 13:2). Now that the Gentile-welcoming Diaspora mission is under way, Paul becomes the leading figure (emphasized most obviously in 13:13: "Paul and his colleagues," lit. "those around Paul").³⁶⁶ Just as the disciples were first called "Christians" during Saul's

divine against Christians (see Prince, "Yoruba Psychiatry," 94), and spirit practitioners may not want Christians around (Turner, *Experiencing Ritual*, 155).

361. On this challenge-riposte schema, see, e.g., deSilva, *Honor*, 29–31 (noting its frequency in the Gospels); Malina, *Windows*, 8–10.

362. See Hengel and Schwemer, *Between Damascus and Antioch*, 219.

363. The present text is not an exorcism, but God's Spirit could be associated with exorcisms (Mark 3:29–30; Matt 12:28). Klutz, *Exorcism Stories*, 196–97, notes the spirit possession of shamans in some cultures, playing a role in traditional Sri Lankan exorcisms (although first-century Jews might well have viewed this as Satan casting out Satan).

364. This is probably an example of "subsequent filling" (as at Acts 4:8). Though πλησθεῖς, "having been filled," is an aorist passive participle, it need not refer to an event as antecedent as Pentecost was; if it refers to chronology at all, it simply demands action antecedent to that of the main verb (cf. the discussion in Blass, Debrunner, and Funk, *Grammar*, 174–75, §339).

365. Haenchen, *Acts*, 400, rightly dismisses the relevance for this phrase of some rabbis disintegrating the impious by gazing at them (cf. Strack and Billerbeck, *Kommentar*, 2:713). Those rabbinic passages are more relevant for illustrating sudden judgments (see comment on Acts 5:5).

366. Chrys. *Hom. Acts* 29, on 13:16 (Martin, *Acts*, 163) emphasizes Barnabas's humility in henceforth yielding to Saul, as John did with Peter, because they looked "to the common advantage." Luke mentions Barnabas first in Acts 13:1, John Chrysostom says, because Paul has not yet performed a sign (*Hom. Acts* 27, on Acts 13:1; contrast Acts 13:42–43).

ministry in Antioch (11:26), so now Luke begins to call Saul by his better-known name, “Paul,” as he ministers among Gentiles (13:9).

(1) *The Non-Roman Name “Saul” (13:9)*

At this point Luke clarifies that his protagonist Saul is also called “Paul,” a Roman name. This is an alternative name (as signified by ὁ καί), not a new one. Double names were common, sometimes with the formula “So-and-so, who is also ἢ or ὁ καί” (e.g., *CJ* 1:24, §30; 2:111, §879; or the equivalent Latin *qui et*, e.g., *ILS* 2839);³⁶⁷ the formula was not confined to Roman citizens (e.g., Peter in Acts 10:18, 32).³⁶⁸ Evidence from Doura reveals that Greek-speaking Jews there often retained Aramaic as well as Greek names.³⁶⁹ (Similarly, Greek pride could lead to dissatisfaction with Hellenists taking Latin names; Philost. *Vit. Apoll.* 4.5.) Even citizens could add an unofficial *signum* or *supernomen* to their three official Roman names.³⁷⁰ Scholars usually agree that “Saul” is the *signum*.³⁷¹

Paul had apparently worked hard to affirm his identity as a “Hebrew” in Jerusalem (cf. Acts 9:1–2; 2 Cor 11:22; Phil 3:5) despite his Diaspora ancestry (see comment on Acts 6:9);³⁷² in the Diaspora mission among Romans, however, he found useful his Roman name (Acts 13:9) and eventually also his citizenship (16:37). “Saul” was not a name that would have served Paul well in his mission among Gentiles, the vast majority of whom neither knew nor cared about his ancestral Benjaminite king. In Greek, σαῦλος meant “conceited” or “effeminate,” the cognate verb suggesting walking in an effeminate or arrogant manner.³⁷³ (For further discussion of the name “Saul,” see comment on Acts 7:58.)

(2) *The Roman Name “Paul” (13:9)*

Luke will later explicitly reveal Paul to be a Roman citizen in 16:37; 22:25–28, but readers might have guessed as much from his Roman name (see fuller comment on Acts 16:37).³⁷⁴ Roman citizens had three names (the *tria nomina*). The nomen was the clan name, inherited on birth (or adoption into a Roman household’s citizenship; see comment on Acts 22:28).³⁷⁵ The early republic used a praenomen to distinguish clan members; with some thirty available praenomens, it originally fulfilled this purpose most effectively. By the late republic, however, only about half of these remained in use, and so emphasis shifted from the praenomen to the cognomen as the distinctive “first” name.³⁷⁶ The cognomen began as a nickname,³⁷⁷ a distinctive epithet that was not always positive.³⁷⁸ But by the early imperial period it came into widespread and more positive use and became the primary identifying name of an individual.³⁷⁹

367. See Riesner, *Early Period*, 143–44, esp. for the Latin reference; Matthews, “Names, Greek,” 1023.

368. Though in these cases and in the nearer 13:1 the formula differs (“who is called”).

369. Jeffers, *World*, 205. In the Diaspora, Jews made less use of alternative, ethnic-specific names than Egyptians did (Williams, “Alternative Names”).

370. Rapske, *Custody*, 85; cf. Rix, “Supernomen.” Cf. the frequent Greek use of a fourth name, an agnomen, as a cognomen (Judge, *First Christians*, 563); Greek cognomens are frequent in largely Greek areas like Thessalonica and Ephesus (564).

371. E.g., Haenchen, *Acts*, 399n1; Marshall, *Acts*, 220; Rapske, “Citizenship,” 216.

372. If there were any women slaves in his ancestry, which is likely, some Jews could have even questioned the purity of his blood line; cf. *t. Hor.* 2:11; Cohen, *Law*, 147 (citing *m. Yebam.* 6:5).

373. LSJ, twenty-sixth edition. Leary, “Improper Name” (followed by Witherington, *Acts*, 402), suggests that hearers in Greek would associate σαῦλος with the seductive gait of prostitutes.

374. E.g., Goppelt, *Times*, 71; Judge, *First Christians*, 562.

375. Claudius forbade the use of Roman clan names by non-Romans (Suet. *Claud.* 25.3).

376. Solin, “Names, Roman,” 1025; Jeffers, *World*, 203; cf. Riesner, *Early Period*, 146. “Gaius,” “Lucius,” “Marcus,” and “Titus,” each of which appears in the NT, were the most common praenomens (Stambaugh, *City*, 94).

377. Plut. *Coriol.* 11.2–4; Cic. 1.2.

378. Stambaugh, *City*, 94, gives examples: “Scipio (‘Staff’), Cicero (‘Chickpea’), Calvus (‘Bald’), Naso (‘Nose’).”

379. Solin, “Names, Roman,” 1026; Jeffers, *World*, 202–3. For the development of all three names through Roman history, see most fully Salway, “Onomastic Practice.”

Fathers often gave sons their own cognomens,³⁸⁰ as earlier in the republic many sons bore their fathers' praenomens (e.g., six of the eight Roman names in Cic. *Fam.* 8.8.5); a daughter might share her mother's name (e.g., Gratia in Fronto *Ad M. Caes.* 4.6.2).³⁸¹ Thus cognomens were often inherited together with the family name (the nomen).³⁸² Not only among Romans but among other peoples, sons could be named for ancestors,³⁸³ and a Benjaminite (which Paul was though Luke omits to mention it; Rom 11:1; Phil 3:5) might well be named for the ancestral king Saul.³⁸⁴ But Saul is his signum, not his cognomen (see comments above).

New citizens in the eastern Mediterranean took Roman praenomens and nomens, but they went by their distinctive third name and also gave their sons distinctive third names.³⁸⁵ Freed slaves of a citizen (as Paul's ancestors may have been; see comment on Acts 6:9; 22:28) generally retained the name they had gone by as their cognomen but took their patron's (their former master's) praenomen and nomen.³⁸⁶ Some Greeks, however, would use Latin cognomens if citizenship had been passed on for several generations,³⁸⁷ and non-Greeks often preferred a Latin name with a sound or meaning like that of their original name.³⁸⁸ Among Jews in Rome, Latin was far more common in daughters' names than in sons', for whom traditional Greek names were more common.³⁸⁹ When male Roman Jews had two names, the first normally identified the *gens* (Roman tribe), and the second was most often a Roman cognomen.³⁹⁰

"Paul" ("Paulus") was uncommon among Romans, but "it was extremely rare among non-Romans, above all in the Greek East," and even rarer among Jews.³⁹¹ It is highly unlikely that Paul would have received this name in addition to his traditional Jewish birth name if he were not a Roman citizen.

(3) Why the Name "Paul"? (13:9)

Most scholars agree that "Paul" was the apostle's cognomen;³⁹² this would explain why he is called this almost exclusively (apart from Luke's "Saul," exclusively) in

380. Jeffers, *World*, 203.

381. A daughter could also bear a feminine form of her father's name (cf. the Greek-speaking Jewish family in Rome, *CIJ* 1:121–22, §169).

382. Stambaugh, *City*, 94.

383. E.g., a grandparent, Isaeus *Pyrr.* 30; *y. Šabb.* 2:7, §3; a parent in Fronto *Ad M. Caes.* 4.6.2; Joseph in Luke 3:24. Alternating names between generations was common (Finegan, *Apostles*, 63). Palestinian Jews also often named children for parents or grandparents (Ilan, *Women*, 53; cf. Mattathias in Luke 3:25–26).

384. Hemer, *Acts in History*, 183, rightly notes that Acts' attestation of his Hebrew name and Paul's of his tribe inadvertently and independently support the likelihood of the other. Although Paul may have rhetorical reasons for mentioning his tribe (cf. Cohen, "Benjaminite"), he would not have invented it (Judah or esp. Levi would have been more expedient). Cf. also Saulide names among Benjaminites (Esth 2:5; cf. comment on Acts 7:58).

385. Jeffers, *World*, 204. Cf., e.g., the Greek and other additional names of "M. Aurelius Diodorus Koriaskos, also called Asbolos," whose third Roman name was his original Greek name (Ramsay, *Cities of Paul*, 213); cf. also linguistic combinations such as "Faustinos" (Latin name in Greek) "son of Isaac" (*CIJ* 1:434, §600).

386. Jeffers, *World*, 204. Free Romans had Roman names and were enrolled in tribes (Quint. *Decl.* 311.5).

387. Ramsay, *Cities of Paul*, 214, noting that Paul's Latin cognomen might thus suggest that his citizenship went back at least as far as his father or grandfather (Acts 22:28).

388. Jeffers, *World*, 205.

389. Leon, *Jews of Rome*, 111–12.

390. *Ibid.*, 113.

391. Hengel, *Pre-Christian Paul*, 8, noting that the closest equivalent to "Paul" in Jewish Palestine is "Paulinus," one to three centuries after Paul (8–9). We know of two other Jews named Paul, both from Asia Minor (one in Sardis, one in Aphrodisias; Bauckham, "Latin Names," 207).

392. E.g., Ramsay, *Cities of Paul*, 214; Pesch, *Apostelgeschichte*, 2:25; Wallace and Williams, *Acts*, 26; Nobbs, "Cyprus," 288; Rapske, "Citizenship," 216; contrast Jewett, *Romans*, 99, who thinks it Paul's *signum*. It was not likely derived from a family patron (*pace* Riesner, *Early Period*, 146), since "Paulus" was not common among Roman aristocrats of this period (Jeffers, *World*, 205). Scholars have also debated which of the three names

first-century Christian texts. (Some, though, argue that it is Paul's family name.)³⁹³ Provincials who became citizens used cognomens as their personal names; only official documents would need the citizen's full "three names" and related information such as father's praenomen and tribe.³⁹⁴ Further, "Paul" appears in Roman names most commonly as a cognomen (e.g., Lucius Aemilius Paulus), though occasionally it also appears as a praenomen.³⁹⁵ We can only guess concerning Paul's other two names. If his ancestors acquired citizenship through Pompey, Julius Caesar, or Marc Antony, in a period when many Jewish slaves were being freed, his name might be Gnaeus Pompeius Paulus, Gaius Julius Paulus, or Marcus Antonius Paulus.³⁹⁶

At least some other Jewish people of status held the name "Paul" (thus a later Paul from Alexandria leading a deputation to the emperor).³⁹⁷ Of all the Latin names in Paul's epistles, his own was among those that sounded most respectable to Romans.³⁹⁸ Roman cognomens were originally nicknames (e.g., "Rufus" for "Red"), and had Paul's been a nickname (though this is unlikely in this period), he could have received the name "Paulus" ("Small") because he was a small baby.³⁹⁹ As Roman citizens in the East, Paul's family may have known little Latin,⁴⁰⁰ but they could easily learn Latin equivalents for names. Thus, for example, Syrians named for Baal frequently adopted the Roman name "Saturninus" (an equivalent deity) on receiving citizenship.⁴⁰¹ Sadiq ("Righteous") became Justus or Justissima; Gad ("Fortune") became the Greek Eutyches; Isaac ("Laughter") became Gelasios or Hilarus.⁴⁰² "Small" fits the later description of Paul in the second-century *Acts of Paul*,⁴⁰³ but this description may have been partially inferred from his name.

Sometimes assonance mattered more than sense, so that "Esther" (ΛXX Ἑσθηρ), for example, became the Greek Ἀσθήρ.⁴⁰⁴ Some scholars argue that Paul's parents gave him the name "Paulus" (Greek Παῦλος) because it sounded similar to the Aramaic

some other names from antiquity are, e.g., Strabo (see Pothecaray, "Strabo," concluding that "Strabo" was his given, personal name from his parents).

393. Rapske, *Custody*, 86, by comparison with Sergius Paulus; "Paulus" might be the governor's cognomen as well (though cf. comment on the Sergii Paulli).

394. See Hemer, "Name of Paul."

395. Cadbury, *Acts in History*, 70; Riesner, *Early Period*, 145.

396. Hemer, *Acts in History*, 128n77. Given the probabilities, Wallace and Williams, *Acts*, 26, suggest "Gaius Julius Paul[1]us."

397. Deissmann, *Studies*, 316.

398. Judge, *Rank*, 36n20.

399. Aug. *On the Spirit and the Letter* 7.12 (Martin, *Acts*, 160) suggests that Paul chose this name to emphasize "his own smallness as the least of the apostles." This is not very plausible, since none of the *tria nomina* used by a citizen was primarily a nickname in this period. But one could receive a nonfamily name through the circumstances of birth—e.g., "Secundus" as the second child. Smallness, if carried into adulthood, was considered not physically helpful athletically but could be overcome (Philost. *Hrk.* 14.4; 15.1–3). Jewish people could name children according to the circumstances of their birth (Cambridge Geniza Text, col. 3, lines 13–16, with three different wordplays); for paronomasia in OT names, see, e.g., Arnold, *Samuel*, 57. McDonough, "Small Change," suggests that the name shift exemplifies the shift from the arrogant persecutor Saul to "Paul," i.e., "small." Yet because Luke does not translate the sense as he does, e.g., with "Elymas" in the same passage, and because we cannot be certain that even his ideal audience was competent in Latin (though in Philippi many would have been), it seems unlikely that Luke makes any point of the Latin meaning. Luke's audience already knows Saul by his more familiar name, "Paul."

400. Even in Rome, more Jews spoke Greek regularly (Leon, *Jews of Rome*, 75–77), though they must have known some Latin. Nearly 50 percent of Jewish names in Rome are exclusively in Latin, with nearly 10 percent more being double names including Latin (ibid., 107). But see discussion at Acts 18:1–11.

401. Jeffers, *World*, 205. For patterns in the interchange of Greek and Semitic names, see Astour, "Names in Semitic World."

402. *CIJ* 1:lxvii.

403. *Acts Paul* 3.3 (*Paul Thec.* 3); see, e.g., in Ramsay, *Church in Empire*, 31–32.

404. *CIJ* 1:lxvii. See more fully Bauckham, "Latin Names," 204–14.

“Saul.”⁴⁰⁵ The Aramaic form does not really sound much like Παῦλος,⁴⁰⁶ but the Greek transliteration used in Acts is generally Σαῦλος (following LXX Σαούλ [as in Acts 13:21; 314 times in the LXX] only when reproducing a Semitic form, 9:4, 17; 22:7, 13; 26:14), which was probably how his Hellenist family and friends had reproduced it in Greek, a language they often spoke. If Paul’s cognomen is individual and not hereditary,⁴⁰⁷ it is possible that this correspondence of sound (in Greek) provided a consideration in selecting Paul’s Roman cognomen. It may be likelier, however, that his name “Saul” (in its common Lukan form) is conformed to “Paul” (in contrast to the LXX form of “Saul”).⁴⁰⁸

That Paul shares part of the same name as Sergius Paulus may be “sheer literary coincidence,”⁴⁰⁹ but there might be literary reasons Luke first introduces Paul’s name here.⁴¹⁰ We should not, of course, press the possibility very far; certainly Sergius Paulus does not become his patron in a technical sense,⁴¹¹ nor would Paul take the name the way a freed slave would from his householder.⁴¹² But the primary reason for Luke’s transition at this point is that Paul’s ministry to Gentiles begins here, inviting Paul as well as Luke to shift to emphasis on his Roman name.⁴¹³ The graphic coincidence of the names reinforces the point that Paul’s is an acceptable Roman name.⁴¹⁴

Name changes could occur to signal raised social status,⁴¹⁵ cultural reaffiliation,⁴¹⁶ or religious transformation,⁴¹⁷ and the OT showed God (or other superiors) renaming people at times when establishing or confirming a covenant with them (Gen 17:5; 32:28; 35:10).⁴¹⁸ Paul’s name is not of course changed at this point,⁴¹⁹ but the

405. Deissmann, *Paul*, 91.

406. Riesner, *Early Period*, 145.

407. Some were hereditary by this period, but mostly in the aristocracy (Solín, “Names, Roman,” 1025).

408. Hengel, *Pre-Christian Paul*, 9. Whether Paul’s name was already this way or Luke changed Σαούλ to Σαῦλος, it is close enough to remain a sound equivalent (Bauckham, “Latin Names,” 209–10).

409. Fitzmyer, *Acts*, 502; Nobbs, “Cyprus,” 288–89. Origen *Comm. Rom.* on 1:1 (CER 1:70–78; in Bray, *Romans*, 2) notes that some think Paul took the name the way a conqueror might take the name of conquered territory (e.g., “Parthicus”), but Origen rejects this view himself. Certainly both the Sergii Pauli and the apostle Paul existed; neither name was *invented* to correspond to the other.

410. E.g., Hengel, *Pre-Christian Paul*, 9–10. Conzelmann, *Acts*, 100, sees it as a literary connection but denies its historicity, which is unnecessary; cf. Riesner, *Early Period*, 144. Romans did use plays on names (e.g., Quint. *Inst.* 6.3.53; Val. Max. 4.6.2–3).

411. Mitchell, *Anatolia*, 2:7, thinks that Paul adopts the name here to express gratitude to Sergius Paulus, the way Herod honored Agrippa by naming his son Agrippa. But Paul is not naming a son but going by a name himself, and if we should infer it as a patron-client relationship, Luke would surely have made more of it (thereby honoring Paul’s status as not only a citizen but the governor’s client). Most important, the renaming should occur after the governor believes—not simply when Paul confronts Elymas. Jerome *Vir. ill.* 5.4 (Martin, *Acts*, 160) suggests that Paul took the name to honor Sergius Paulus.

412. Nor could the governor have bestowed Roman citizenship (hence Paul taking the name of his patron in this manner; see comment on Acts 23:26); the governor would have had to appeal to the emperor on Paul’s behalf to provide this grant.

413. Most recognize the Gentile mission as reason for changing to this “public” name, e.g., Bruce, *Acts*¹, 257; Marshall, *Acts*, 220; Pesch, *Apostelgeschichte*, 2:25; Johnson, *Acts*, 223; Dollar, *Exploration*, 202–3.

414. It would be most significant, of course, if both shared the same family name (see Rapske, *Custody*, 86); they probably share only the cognomen.

415. Johnson, *Acts*, 223, notes Lucian *Cock* 14; *Tim.* 22 (though doubting this is at issue here).

416. Cf. an application for a name change from Egyptian to (higher-status) Greek (W.Chrest. 52, from 194 C.E.; *SPap* 2:312–15, §301).

417. Horsley, “Name Change.” Some later rabbis claimed that God changed the names of Abram and Sarai to free them from their planetary destiny (*Gen. Rab.* 44:10; *Pesiq. Rab.* 52:3). Pelagius *Comm. Rom.* on 1:1 (Bray, *Romans*, 5) compares Abraham, Sarah, and Cephas and attributes Saul’s “new name” to progress in virtue.

418. Conquerors (2 Kgs 23:34; 24:17; 2 Chr 36:4) and others (Gen 2:19–20; perhaps 3:20) exercised authority in this way, replacing the role of birth parents as the naming authority. It could be understood as redefining a person’s destiny (*Pesiq. Rab Kah.* 28:2; *b. Roš Haš.* 16b).

419. Origen *Comm. Rom.* on 1:1 (CER 1:70–78; Bray, *Romans*, 2) rightly affirms that, like many persons, Paul simply had multiple names.

changed usage (at least in the narrative) is meant to command our attention no less than in those cases. On the narrative level, *Luke* changes use of “Saul’s” name to “Paul,” hereafter always employing the latter.

That he introduces Paul’s Roman name here, during ministry to a Roman official, rather than at Paul’s conversion, signals that the Diaspora mission leading to Rome⁴²⁰—and hence Paul’s call—is the focus of his role in the book.⁴²¹ (It may also signal to any very uninformed first-time hearers that the Saul about whom Luke has been narrating the story is the otherwise famous Paul.)⁴²²

Possibly Luke implies that Paul himself usually used his Jewish name until this point (perhaps even as a prophet and teacher in Antioch, Acts 13:1, where the church was also reaching Gentiles, 11:20–21). If so, it might imply that Paul began using his Roman name reluctantly at first, just as even later he apparently appealed to his Roman citizenship only when absolutely necessary (16:37; 22:25–28). This reticence fits his epistles, where (lacking the above life-and-death reasons to appeal to it) he never mentions his Roman citizenship, though many hearers would infer it from his name. If “Saul,” named for Israel’s sole Benjaminite ruler (who later apostatized), was a popular name among Benjaminites (cf. Acts 13:21; Rom 11:1; Phil 3:5), it would not necessarily commend itself to non-Benjaminite Jews who were biblically literate. But it would at least be more conspicuously Jewish than “Paul.”

II. PAUL PRONOUNCES JUDGMENT (13:10–11)

Paul utters a judgment oracle in Acts 13:10–11; this was a common form of prophetic speech in the OT, but there it was usually introduced by a messenger formula, even in narratives (e.g., Exod 7:17; 2 Chr 12:5), whereas here it emphasizes the same point by noting Paul’s state of inspiration through an aorist passive participle: “filled with the Holy Spirit.” As Aune notes, the emphasis on the inspiration of prophetic speech, “though rare in the OT (cf. Balaam in Num. 23–24), is more frequent in early Judaism (probably through Hellenistic influence) and pervades Greco-Roman paganism and early Christianity.”⁴²³

(1) *The Rebuke (13:10)*

Paul’s rebuke (Acts 13:10) includes several wordplays with the context, appropriate for prophetic language (cf. Hebrew puns in Mic 1:10–15; Jer 1:11–12; Amos 8:1–2) in inspired history. Whereas Paul is “filled with the Spirit” (Acts 13:9), Elymas is “full of deception.”⁴²⁴ Elymas is not truly *bar Jesus*, “son of Jesus” (13:6), but “son of the devil.”⁴²⁵ As Elymas tried to “twist” (διαστρέψαι) the proconsul from the faith (13:8), here he “twists” the Lord’s ways (13:10).⁴²⁶ Luke elsewhere uses the term for a “twisted” generation disbelieving Jesus (Luke 9:41),⁴²⁷ the charge that Jesus was a

420. This being the first narrated incident of Paul’s ministry after the sending forth of 13:2–4.

421. With Stendahl, *Paul*, 11.

422. Perhaps some potential first-time hearers in Luke’s target audience mistrusted Paul and would respond negatively to the portrait of Paul the persecutor; in anticipation of this possibility, Luke might veil Paul’s identity by using his *signum*. But despite Luke’s apologetic for Paul, I think it likelier, on the whole, that Luke’s target audience respects Paul but must simply answer outsiders’ objections against him and his perspectives.

423. Aune, *Prophecy*, 269–70.

424. Also Johnson, *Acts*, 227. Texts regularly condemn δόλος (e.g., LXX Lev 19:16; Deut 27:24; 1 Macc 1:30; 7:10, 27, 30; 2 Macc 4:34; Wis 1:5; 4:11; 14:25, 30; *Let. Aris.* 246), including one who is πλήρης δόλου (Sir 1:30; 19:26; Jer 5:27), as here. Deception or leading astray could be linked with demons (e.g., *Test. Jud.* 23:1; cf. *1 En.* 65:6; *L.A.B.* 34:2–3; on the devil and deception, see Keener, *John*, 760–61; comment on Acts 5:3–4).

425. With, e.g., Witherington, *Acts*, 402. For Satan filling the heart, cf. Acts 5:3; implicitly, Luke 22:3.

426. With, e.g., Johnson, *Acts*, 227.

427. This phrase is from the Jesus tradition (Q material in Matt 17:17; cf. the echo in Phil 2:15), in turn echoing Deut 32:5. Acts 2:40 also echoes Deut 32:5 (see comment there).

misleader (23:2), and the warning of other misleaders to come in the church (Acts 20:30). The true prophet John prepared the Lord's "way" (Luke 1:76; 3:4; cf. 7:27; Acts 9:2), which included straightening the crooked (Luke 3:4–5); the false prophet Elymas, by contrast, was making the straight way crooked.⁴²⁸

In some later sources, the devil was Cain's literal father,⁴²⁹ but Paul means "child of the devil" in a figurative, not a genetic, manner; this magician follows the devil and imitates his activity.⁴³⁰ The devil deceives (Acts 5:3), seeks to counter God's true message (Luke 8:12), and seeks to keep people under his alternative dominion (Acts 26:18). (For further comment on Satan, see comment on Acts 5:3.) Paul's inspiration comes from being filled with the Holy Spirit (13:9), but Elymas's, from being full of deception and from Satan (cf. being "filled" with Satan to speak, 5:3; *Test. Job* 41:5/7).⁴³¹

(2) Judgment (13:11)

Ancient readers could have interpreted Paul's word of judgment as a magical curse,⁴³² but Luke's antimagical apologetic counters this perception; ancients defined magic partly on the basis of the source of power.⁴³³ Luke's biblically informed audience would more likely consider OT analogies,⁴³⁴ such as Elijah summoning fire from heaven (2 Kgs 1:10–12) or the withering of Jeroboam's hand (1 Kgs 13:4). Luke clearly employs a biblicism, "and now behold" (as also in Paul's speech in Acts 20:22, 25);⁴³⁵ this phrase, καὶ νῦν ἰδοὺ, appears seventeen times in the LXX. Perhaps coincidentally, one of the stories in which it appears (1 Kgs 22:23; 2 Chr 18:22) refers to lying spirits in the mouths of false prophets.⁴³⁶

On the biblical idiom that the "hand of the Lord" is "against" one, see comment on Acts 11:21. (The Lord's hand being against Elymas may also contrast with the need for someone to lead Elymas by the "hand" later in the verse [likely implied in the verb there], though χεῖρ is a common term.) For judgment falling "on" one as a biblical idiom, see comment on Acts 8:24.

"Darkness" was a biblical judgment (Exod 10:21–22) that lent itself to symbolic evocations (cf. Luke 1:79; 11:35; Acts 26:18), but here it refers to total (presumably as opposed to light-sensitive) blindness. Being struck blind⁴³⁷ was a divine punishment in both biblical (Gen 19:11) and pagan tradition,⁴³⁸ though it is only one of several judgments that could be visited on mortals⁴³⁹ (cf. being struck mute in Luke 1:20, for a lesser offense). Perhaps the most relevant biblical parallel is 2 Kgs 6:18:

428. See Tannehill, *Acts*, 163. Unlike Acts 2:40, this text does not use σκολιός but employs διαστρέφω, which is paired with σκολιός in Phil 2:15; see discussion on the concept at Acts 2:40.

429. *Tg. Ps.-J.* on Gen 4:1; 5:3; cf. Reim, "Joh. 8.44," citing *Tg. Neof.* on Gen 4:7; Dahl, "Mandraperen"; McNamara, *Judaism*, 223–24.

430. See Keener, *John*, 760–61.

431. Luke on occasion employs "filled" with negative as well as positive characteristics (e.g., Luke 6:11).

432. See, e.g., Walz, "Cursing," 168.

433. Garrett, *Demise*, 86.

434. On the efficacy of benedictory or imprecatory speech in the OT, see, e.g., McKeown, "Blessings," 83.

435. With Haenchen, *Acts*, 400.

436. "Hand" appears with the phrase in 1 Sam 24:20 but is clearly irrelevant.

437. Harnack's argument for a historical nucleus here, based on lack of equally dramatic punishment against the still viler Simon Magus (*Acts*, 153), is questionable (cf. Acts 5:5, 10; even if one agrees with his conclusion). Nor are the medical terms cited in Hobart, *Medical Language*, 44, strictly medical. Many who are blind can see light; inability to see the sun, therefore, might imply total blindness (cf. Isa 59:10; the expression for life in Ps 58:8; Eccl 7:11; 9:13; 11:7 does not appear relevant, nor is the idolatry in Deut 4:19 [contrast Jos. Ag. Ap. 2.192; 1 En. 80:1], despite Elymas's profession).

438. E.g., Val. Max. 1.1.17; 1.1.ext. 5; *Juv. Sat.* 13.93; also Heyob, *Isis*, 65. It might appear as a human punishment in Quint. *Decl.* 357 intro.

439. E.g., Ovid *Metam.* 3.513–18; Val. Max. 1.1.20; cf. Hierocles p. 48.22–49.9 from Stob. *Ecl.* 1.3.54 (in van der Horst, "Hierocles," 157–58); *y. Hag.* 2:1, §3.

the blindness there was temporary,⁴⁴⁰ as here, and it plays on the contrast between physical and spiritual sight (6:17–18, 20).⁴⁴¹

Elymas has been blinding others spiritually, and now he is blinded; Elymas has been making crooked the straight ways of God, and now he needs someone to lead him by the hand.⁴⁴² Paul recovered spiritual sight when struck blind; now Elymas, who also has opposed the faith, receives the same opportunity (see comment on Acts 9:8).⁴⁴³ This judgment miracle, in contrast to one associated with Peter, which it parallels (Acts 5:5, 11), ends more gently, just as Peter's prison liberation proves gentler to his captor (16:28 vs. 12:19).⁴⁴⁴

Elymas sought someone to lead him by the hand (cf. 9:8; 22:11, using the verb cognate); blind people would need someone (e.g., a παῖς, a boy or a servant,⁴⁴⁵ or some other guide⁴⁴⁶) to do this.⁴⁴⁷ Elymas had been what Luke already called a "blind guide of the blind" (Luke 6:39, fleshed out more fully in 6:41–42; Q material in Matt 15:14).⁴⁴⁸ Presumably, Elymas would at least be impressed with Paul's "magic" at this point. Much later tradition makes Elymas, like Simon Magus, a continuing problem, claiming that he stirred Cyprus's Jews to martyr Barnabas on his later return to evangelize (Acts 15:39).⁴⁴⁹ This is probably simple haggadic recycling of named characters; we cannot know what became of Elymas.

It is possible that Luke presents Paul as growing in faith for miracles. This is not clear, since not enough has been reported about Paul's ministry so far to argue from silence that they have been sparse. But the disciples in the Gospel had to grow in faith (Luke 8:24–25; 9:40–41; 17:5), and even in Acts, Peter continues learning (Acts 10:28); Luke's portrait of their faith is not "flat," in literary terms. Many miracles are performed through Paul and his colleague soon after this in 14:3, 9–10, perhaps from the encouragement of his experience here; by 19:11–12 he seems to be acting on a much more intense level (though this might simply reflect greater popular interest), comparable to Peter's intense ministry in 5:15–16. What is most clear is that these signs help fulfill and vindicate the Gentile mission (15:12).

III. THE GOVERNOR'S FAITH (13:12)

Why does not Luke, who emphasizes believers of status, include more information about this prominent person's conversion? First, Luke's narrative follows Paul, with

440. Cf. also the temporary blindness, for the purpose of securing repentance, in *Let. Aris.* 316. This connects with healing the blind (Luke 18:42–43; Acts 9:12, 18; the Isaian summaries in Luke 4:18; 7:22).

441. For play on the two concepts, see also sources in Keener, *John*, 796. For metaphorical use of blindness, see, e.g., Cic. *Phil.* 12.2.3. See further comment on Acts 9:8.

442. Le Cornu, *Acts*, 705, noting the Jewish principle of like-for-like judgment (citing *Mek. Besh.* 7). For like-for-like judgment, see also *Jub.* 4:32; *m. 'Ab.* 2:6/7; *Sipre Deut.* 238.3.1; further discussion at Acts 3:2.

443. Cf. similarly Chrys. *Hom. Acts* 28 (Martin, *Acts*, 161); for the view that its purpose here is redemptive, see also Isidore of Pelusium in *Cat. Act.* 13.10 (Martin, *Acts*, 161). Some cite here Deut 28:28–29 (the judgment of groping due to blindness; Parsons, *Acts*, 189).

444. Some expected that God himself was more merciful than his servants (*Test. Ab.* 10:12–14 A). Ancients were not disturbed by reports of judgment miracles so long as the worker did not act for personal ends (Reimer, *Miracle*, 247).

445. E.g., Soph. *Oed. tyr.* 444; *Judg* 16:26.

446. E.g., Soph. *Antig.* 989–90; Dio Chrys. *Or.* 62.1 (figurative).

447. E.g., Soph. *Oed. Col.* 199–201; Philost. *Hrk.* 51.4; Rom 2:19; Quint. *Decl.* 297 intro; 297.8, 13; for the danger of blind guides, see, e.g., Matt 15:14; 23:16, 24; Dio Chrys. *Or.* 62.7; Lucian *Indictment* 1 (a play on both senses of "blind").

448. The image circulated in the Mediterranean before its use by Jesus; cf. Xen. *Mem.* 1.3.4 (ἡγεμόνα τυφλὸν), though this similar metaphor could arise by coincidence. See also Hesiod *Astron.* frg. 4; Dio Chrys. *Or.* 62.7.

449. Finegan, *Apostles*, 78, noting *Acts of Barnabas* (fifth or sixth century, i.e., about half a millennium after the events depicted here).

whom he later travels (16:10); had the narrative followed Barnabas's later mission (15:39), the focus would have surely been quite different, with more interest in and information about Cyprus. Second, this is not a "we" section; even aside from "we" material, Luke seems to lack as much detail for Paul's first mission (apart from the synagogue speech) as his next. Third, we cannot be certain that (and Luke may not know whether) the governor's faith produced a permanent transformation (cf. Luke 8:12–14); if he is the senator who became consul in 70 C.E. (see comment on Acts 13:7), he must have at least accommodated Roman religion in public. If Luke knew this, he probably would not feel compelled to abandon notice of the governor's initial faith. Even if the governor responded only temporarily, he illustrated Luke's point: people of status could respond to the gospel. But under such circumstances, Luke would probably not make him a central focus of a lengthy narrative.

Because we lack other evidence from this period of anyone of such status converting, some scholars suggest that "believes" means only that Sergius Paulus trusted Paul and Barnabas the way he had trusted Elymas, not that he was converted.⁴⁵⁰ This is not, however, the normal sense of "believed" in Acts (so far, Acts 2:44; 4:4, 32; 5:14; 9:42; 10:43; 11:17, 21), and we should not expect to find external attestation of a proconsul's faith when Acts is the only document from this period that would have reason to comment on it.⁴⁵¹ Further, such a view ignores this passage's brevity and Luke's frequent abbreviation of his material.⁴⁵² Given Luke's emphasis on persons of status, the spread of the message, and the Lord being with Paul, he is undoubtedly happy to report the team's success here whether or not he has secure information about the governor's perseverance in the faith.⁴⁵³

We cannot be certain that the historical Sergius Paulus did go on to become a permanent disciple (cf. Luke 8:12–15), as much as Paul and Barnabas would have wished to ensure that outcome.⁴⁵⁴ That Luke presents his initial faith as genuine, however, need not be questioned. The respect of a high official had propaganda value for apologetic historians.⁴⁵⁵ Some philosophers also advised gaining attention from the influential (Mus. Ruf. 11, p. 84.16–17). On the historical level, the faith of one who already was following a Jewish prophet (albeit a false one, from Luke's standpoint, Acts 13:6) is not implausible.

Nevertheless, since this is the highest-level Roman official whose conversion Luke reports, one might expect him to elaborate further. Whether on the historical level the faith did prove tenuous,⁴⁵⁶ or it was equivalent to that of a mere God-fearer for Judaism (or replaced his former trust in Elymas), or (quite plausibly) Luke simply lacked further information on the story, we cannot say. Luke is often brief where we expect more information (which is how he keeps to a single volume for Acts).

450. E.g., Foakes-Jackson, *Acts*, 113. Cf. Queen Olympias's persuasion when the magician's prophecy was fulfilled (Ps.-Callisth. *Alex.* 1.9). "Religious" affiliation entailed less moral transformation than philosophic reorientation (Stambaugh and Balch, *Environment*, 45–46; Nock, *Conversion*, passim; for nuancing to allow for progress, see Stowers, "Resemble Philosophy?" 91). For moral responsibility to embrace the correct counsel, see the wordplays on counsel in 2 Chr 25:16–17.

451. For a harsher evaluation ("merely idle speculation"), see Fitzmyer, *Acts*, 504 (against Lake and Cadbury).

452. Munck, *Acts*, 119.

453. Cultural outsiders also appreciated accounts of outsiders' success before rulers (cf. Gnuse, "Prison," noting Gen 41; Hdt. bk. 3).

454. It was possible to "believe" temporarily yet fail to persevere (Luke 8:13; Acts 8:13).

455. E.g., Jos. *Ag. Ap.* 2.45–47; cf. Dan 4:37; *Let. Aris.* 35 and passim; 3 Macc 7:6–9, 18; cf. also the accounts in Donaldson, "Royal Sympathizers."

456. If one speculates his connection with prominent families in Pisidian Antioch (see comment on Acts 13:13–14), perhaps the reaction to the apostles there could have embarrassed his patronage, either into reversal or into silence. This, too, however, is purely speculation.

Historically, however, it is possible that Sergius Paulus's faith did not lead him to join the Christian movement or to abandon at least public practice of civic religion (cf. 2 Kgs 5:18–19)—not for the entire remainder of his life, in any case. Christians were not officially persecuted in Rome until 64, and if Sergius Paulus did not live there at the time, he may have escaped notice. But if the same Sergius Paulus was *consul suffectus* in 70 (as some classicists think), he cannot have followed Jesus and Israel's God in an exclusive way. Nevertheless, he probably supplied the recommendation to their next goal: Pisidian Antioch (see comment on Acts 13:14).⁴⁵⁷ Just as Paul and Barnabas started in Cyprus because Barnabas knew Cyprus, they could move to Pisidian Antioch on the basis of contacts.

Luke chooses his words carefully: Sergius Paulus is amazed at the “teaching” of the Lord because signs are inseparable from the teaching they confirm (14:3). This phrase also evokes Luke 4:32, where people were amazed at Jesus's teaching⁴⁵⁸ because it was expressed in authority against the demonic (4:32–36, with “authority” as an *inclusio*), as here. Most Gentiles (though especially Greeks) were pragmatic about faith; if one deity proved particularly effective, devotion to that deity seemed natural.⁴⁵⁹

If the building mentioned above (see comment on Acts 13:6) was genuinely his palace, the governor's faith would contrast starkly with the pagan surroundings in the room.⁴⁶⁰ Probably neither Luke nor anyone in his ideal audience knew this specific palace, but we might imagine the contrast in this or similar settings striking Paul, probably Luke's source for the information in this paragraph.

3. Ministry in Pisidian Antioch (13:13–52)

Acts 13:13–52 is a literary unity.⁴⁶¹ Early in his depictions of Paul's ministry, Luke presents a typical (somewhat paradigmatic) mission scene, providing salvation-historical justification for preaching also to the Gentiles and revealing the conflicts attending the mission.⁴⁶² Paul's message here connects biblical history to the present gospel, just as Luke does in the broader schema of his two-volume work.

The governor of Galatia when Paul was planting churches there was Annus Afrinus (49–54 C.E.), portrayed on Galatian coins of the time.⁴⁶³ In contrast to Paul's ministry in Cyprus, however, probably neither Paul's mission nor his conflicts brought him into contact with the governor; although he was responsible for the affairs of the province, governors entrusted most questions to the judges they appointed over local courts.⁴⁶⁴

457. It is possible that the turn of events in Pisidian Antioch, embarrassing any of Paul's benefactors there, soured the governor's relatives, and eventually the governor himself, to the faith. This can at most be a plausible speculation, however, since Acts is our only source.

458. The same term for “amazed” appears in Luke 2:48; 4:32; 9:43; but it appears together with “teaching” only in Luke 4:32 and here in Luke-Acts (borrowed from Mark 1:22; 11:18). Philosophers seeking to categorize “amazement” could list it as a form of fear (Arius Did. *Epit.* 2.7.10c, pp. 60–61.24–30, esp. ἔκπληξις in line 26).

459. Strelan, *Strange Acts*, 29.

460. The panels in the suggested meeting hall included a scene of Achilles; the probable living area included many statues, and “a mosaic of Poseidon” appeared in a room in the palace's southwest corner (Fant and Reddish, *Sites*, 357).

461. See O'Toole, “Acts 13, 13–52,” for discussion of the structure.

462. This turning to welcome Gentiles does not exclude all Jews, nor does it imply a permanent rejection of the Jewish people or the heritage that Luke has so labored to cultivate (see comment on Acts 13:46–47).

463. Hansen, “Galatia,” 388.

464. *Ibid.*

a. *Journey and Setting (13:13–15)*

After a stint in Barnabas's country, a trip to Paul's Cilicia would have made sense, unless (as is possible) he had made himself unwelcome there—or at least in some synagogues there—during the earlier years of 9:30 (cf. 11:25; but cf. later 15:41). Rome administered Cyprus as part of its province of Cilicia after 67 B.C.E.,⁴⁶⁵ and so even political ties existed between Cyprus and Cilicia. But whereas Salamis (13:5), where the missionaries began in Cyprus, was closer to Tarsus, Paphos, on the other side of Cyprus (13:6), would be closer to Pamphylia.

Further, some scholars suggest that Sergius Paullus (the Latin spelling) may have provided a letter of recommendation for people he knew in Pisidian Antioch.⁴⁶⁶ He probably had relatives there, or at least connections that invited relatives to settle there; it is possible that a later inscription referring to L. Sergius Paullus in Pisidian Antioch refers to his son.⁴⁶⁷ By the Flavian period and probably earlier, the Sergii Paulli owned significant estates in this region,⁴⁶⁸ and it is logical that they were relatives of the proconsul of Cyprus, whose name is not a common one. That this family comes from the same region as the missionaries' next place of ministry is probably more than coincidence; granted, the move from Cyprus to the southern coast of Asia Minor is not unexpected, but such a move by itself in no way entailed a trip to the interior. Pamphylia and Lycia were well-populated areas on the coast. Paul and Barnabas had previously begun where they already had some connections (13:4 with 4:36) and historically probably followed the same procedure here. This might explain some Gentiles welcoming the group (13:44, 48), though the local Jewish community's long-term ties with aristocrats (13:50) would count more strongly. But Luke does not recount these connections.

I. FROM THE COAST TO PERGA (13:13)

Although Antioch was the goal, Luke must first at least summarize the missionaries' travel en route to Antioch. In contrast to most of Luke's probable target audience, Pamphylians, Pisidians, and Phrygians might be familiar with some of the geography behind Luke's descriptions.

(1) *Journey through Pamphylia (13:13)*

A ship from Paphos would have arrived first in the Pamphylian seaport Attalia (more explicit in 14:25).⁴⁶⁹ Because Attalia is not mentioned as a destination here, the band may have transferred from a larger coastal ship to a smaller boat to travel most of what was reported to be sixty stadia (ca. 13 km.) north on the river Cestrus (Κέστρος) from Attalia to Perga (Strabo 14.4.2); though unnavigable today, the Cestrus may have then been navigable for smaller boats for the approximately eight miles (11 km.) to Perga's river port.⁴⁷⁰

465. Muhly, "Cyprus," 95.

466. Nobbs, "Cyprus," 287; Stambaugh and Balch, *Environment*, 154 (following Mitchell, "Population and Land"). Pervo, *Acts*, 320, and the sources he cites (esp. Christol and Drew-Bear, "Sergii Pauli") are skeptical; but Luke may have reason to omit the connection in retrospect, and Paul would be expected to go to a synagogue, in any case (see comment on Acts 13:5).

467. Nobbs, "Cyprus," 287. Hudson, "Principal Family," argues that the town's principal family was related to Sergius Paulus.

468. Riesner, *Early Period*, 140, 275–76. Cf. a pagan freedman of Sergii Paulli in *MAMA* 7.486 (and introductory comments in *MAMA* 7, p. xxxiii; 89 C.E.); Sergia Paullina (7.319). "Sergius" appears commonly in eastern Phrygia (7.321, an *epitropos* of Paullus; 7.14, 330, 486). On the use of large estates in this period more generally, see Rathbone, "Latifundia."

469. E.g., French, "Roads," 52; Hemer, *Acts in History*, 109. For a high-class Roman presence in Attalia, see, e.g., Mitchell, "Archaeology," 170; on Attalia, see also Wineland, "Attalia." Wilson estimates the voyage from Paphos to Perga as 186 mi. (300 km.; personal correspondence, Nov. 25, 2011).

470. On inland navigation (for both travel and trade), see Höckmann, "Inland Navigation" (esp. 816, on sailors and wharves). Pliny E. *N.H.* 5.26.96 gives Eurymedon and Catarrhactes as the names of Pamphylia's major rivers.

Despite sources claiming that one could reach Perga by boat on the river (*Stadiasmus maris magni* 219), a five-mile (8-km.) walk remained to the main part of Perga once one reached the port.⁴⁷¹ Thus some scholars argue that the band may have simply walked the entire seven to twelve miles inland to Perga;⁴⁷² though boats upriver were probably frequent, half a day's trek would be less expensive than fare for the whole party, and one would endure a long walk in either case. Further, a paved road led from Attalia to Perga.⁴⁷³ That Luke mentions only Perga here and only Attalia on their departure for Syria (Acts 14:25) fits historical reality, since Perga was the appropriate goal if they wished to catch the Via Sebaste for travel into the inland highlands, whereas Attalia was the more appropriate goal for a departure port.⁴⁷⁴ Pamphylia was the coastal region south of Pisidia, with Attalia on its far southwest border and Perga on its northwest border.⁴⁷⁵

Paul would have known something of Pamphylia already;⁴⁷⁶ most said that it adjoined his homeland of Cilicia (Pliny E. *N.H.* 5.23.94), and Pamphylia's sea was said to adjoin that of Cilicia (5.26.96). The boundaries of provinces changed often, though Perga remained in Pamphylia in any case (5.23.96). Pamphylia was a distinct province from 25 B.C.E. to 43 C.E., then was combined with Lycia, as it would have been during Paul's visit (ca. 48); sometime after Paul's ministry there, under Nero or Galba, it was removed from Lycia and attached to Galatia; then, still later, it was restored to Lycia.⁴⁷⁷ We should not think that the travelers found any trouble communicating in a general sense; various distinctive dialects existed in Pamphylia, but few seem to have persisted into Roman times.⁴⁷⁸ There were some Jewish people living in Pamphylia⁴⁷⁹ (cf. Acts 2:10 and comment there).

(2) Perga (13:13)

Perga was one of the five major cities of Pamphylia, competing with the neighboring city of Side (whose efficient harbor allowed profit from slave trading)⁴⁸⁰ for the honor of "first city" in the region.⁴⁸¹ One indicator of its size is its large theater,

471. Conzelmann, *Acts*, 103; cf. also Lake, "Route," 224; Barrett, *Acts*, 626; Fitzmyer, *Acts*, 509; Finegan, *Apostles*, 85.

472. Favored by Lake and Cadbury, *Commentary*, 147; Bruce, *Acts*¹, 259. For 7 mi., see Fant and Reddish, *Sites*, 168; for 8 mi., see Haenchen, *Acts*, 407; for 10 mi. (16 km.), Wilson, personal correspondence, Nov. 25, 2011; for 11 mi. (18 km.), Finegan, *Apostles*, 85; for 12 mi., Bruce, *Acts*¹, 259; Fitzmyer, *Acts*, 509, says 13 km. Mitchell, *Anatolia*, map 5, after 1:78, places Perga ca. 13 km. northwest of Attalia as the crow flies (it appears to be ca. 10 mi. [16 km.] in Talbert, *Barrington Atlas*, 65, E4), both remaining in the lower coastal area; but the road may have been a bit longer.

473. French, "Roads," 52; cf. Riesner, *Early Period*, 274.

474. Attalia's more heavily trafficked harbor, directly on the sea, provided the better port for a return voyage to Syrian Antioch (Acts 14:25–26; Campbell, "Paul in Pamphylia," arguing, from this information and the asymmetry of Luke's references in 13:13–14 and 14:24–26, for the virtually assured historical accuracy of Luke's itinerary here). Perga, however, does better fit the alliteration (mostly topographic) pointed out by Parsons, *Acts*, 191 (citing *Rhet. Her.* 4.22.18).

475. Mitchell, *Anatolia*, map 5, after 1:78.

476. On Pamphylia, see Carroll, "Pamphylia"; for a summary of 1990s archaeological publications on Pamphylia, see Mitchell, "Archaeology," 170–72.

477. Lake and Cadbury, *Commentary*, 147; Haenchen, *Acts*, 407 (citing Dio Cass. 53.26; 60.17); Levick, *Roman Colonies*, 163–64; Strobel, "Galatia," 651. Probably it was united politically with Lycia by Acts 27:5, but inhabitants would not have confused them. Pamphylia was near Caria (Jos. *Ant.* 11.305), near Lycia. Alternatively, Lycia was an autonomous province from 43 to 74 C.E., after which Vespasian joined it to Pamphylia (Zimmermann, "Lycia," citing Suet. *Claud.* 25.3; but it need not be so construed).

478. Mitchell, *Anatolia*, 1:172.

479. Stern, "Diaspora," 148.

480. For some information on Side, see Mitchell, "Archaeology," 171; it is the first town of Pamphylia mentioned in Pliny E. *N.H.* 5.26.96 (the others being in the hills).

481. Harrill, "Asia Minor," 133. For detailed archaeological data, see Sahin, *Inschriften von Perga*. For more detail on Perga, see Breytenbach, *Provinz*, 166–67; Fant and Reddish, *Sites*, 264–73.

whose colonnaded, covered cavea (seating section) could seat between 13,000 and 15,000.⁴⁸² (Compare the theater of Ephesus, which may have seated around 20,000 in this period and perhaps 24,500 in the next century; see comment on Acts 19:29.) Although the estimate for Perga's cavea might reflect later growth (its stage building, like the city's Roman stadium, is from the second century),⁴⁸³ it illustrates that this was a significant city that could at the least attract such growth.

About sixty-five feet wide and with colonnades on both sides, Perga's major north-south thoroughfare likewise indicates a city of significant size and resources.⁴⁸⁴ Roman baths lie west of this major street;⁴⁸⁵ a gymnasium from this period (dedicated to Claudius, who reigned 41–54 C.E.) lies north of the principal east-west thoroughfare.⁴⁸⁶ The colonnaded agora, lined with shops, was 215 feet (65 m.) long and wide.⁴⁸⁷ The older Hellenistic agora probably lay farther north than the later (fourth-century C.E.) Roman one.⁴⁸⁸ Two round towers remain from Perga's Hellenistic gate.⁴⁸⁹ Some scholars argue that the region of Pamphylia as a whole was relatively poor;⁴⁹⁰ others stress the prosperity resulting from its fertility and good harbors.⁴⁹¹

Antiochus surrendered Perga peacefully to the Romans (Polyb. 21.41.1–5), and it soon hosted a Roman presence. Mitchell notes that some Italian settlers “played a leading role in civic life during the 1st and 2nd cents. AD at Attaleia, Perga, and Aspendus, and several of the earliest Roman senators from the eastern provinces came from this background.”⁴⁹² Significant Roman evidence from a later period probably also reinforces the Roman connection for Perga.⁴⁹³ Attalia and Perga had significant settlements of Roman *negotiatores* engaged in commerce, with names revealing their Italian origin.⁴⁹⁴

Religiously, Perga's range of divinities resembled that of other cities in the region; statues in the theater include “Marsyas, Heracles, Hermes, Dionysus . . . , Tyche and Hera,” as well as emperors;⁴⁹⁵ mythological reliefs in the theater emphasize Kestros (deity of the local river) and the wine deity Dionysus.⁴⁹⁶ A “street lined with tombs” lies northwest of the city; Perga's acropolis, a flat hill, lay to the north, with a fountain at its base displaying “a reclining statue of Kestros.”⁴⁹⁷ Perga also had links with Syrian priesthoods—hence the later statue of a Syrian priestess.⁴⁹⁸ Perga at some point also

482. Fant and Reddish, *Sites*, 266. Barrett, *Acts*, 626, estimates about 20,000 each for theater and stadium; Judge, “Perga,” 767, estimates at least 12,000; McRay, *Archaeology*, 240, estimates 14,000 for the theater; Finegan, *Apostles*, 86, estimates 15,000 for the theater and 12,000 for the stadium.

483. Finegan, *Apostles*, 86; Fant and Reddish, *Sites*, 268.

484. Fant and Reddish, *Sites*, 271. The north-south and east-west grid fits Hellenistic planning.

485. Finegan, *Apostles*, 88.

486. *Ibid.*; cf. McRay, *Archaeology*, 240.

487. Finegan, *Apostles*, 88; cf. McRay, *Archaeology*, 240, for the Roman market “south of the Hellenistic Gate,” “300 feet by 175 feet.” Archaeologists have also found some of the main street's shops (Mitchell, “Archaeology,” 170).

488. Fant and Reddish, *Sites*, 270–71.

489. *Ibid.*, 270. The gate was originally part of the south wall, but the Romans moved the south wall of the city farther south.

495. Mitchell, “Archaeology,” 171. Besides being an ill-fated satyr, Marsyas was a river in southern Phrygia famous in Greek mythology (Quint. Curt. 3.1.2; see fully Dowden, “Marsyas,” citing for the river also Hdt. 5.118; 7.26.3; Paus. 10.30.9).

496. Finegan, *Apostles*, 86.

497. *Ibid.*, 88.

498. Mitchell, “Archaeology,” 171.

had a temple for the imperial cult.⁴⁹⁹ Pamphylians laid claim to ancestry from Trojans scattered after the Trojan War (Strabo 14.4.1, 3); it is thus not surprising that statue bases in Perga claim two of the heroes of that war as the city's founders.⁵⁰⁰

Not far from Perga was the elevated and highly visible Syllium, forty stadia above the sea; here stood the temple of Artemis Pergaia, which hosted an annual festival (Strabo 14.4.2).⁵⁰¹ It was said that the Greek poet Sappho and a Pamphylian woman with whom she was intimate composed hymns honoring Artemis Pergaia (Philost. *Vit. Apoll.* 1.30). Perga's coins portray the local Artemis as a baetyl (rock),⁵⁰² much like Aphrodite in Paphos (see comment on Acts 13:6).

A number of Jews lived in Pamphylia, probably including some in Perga (1 Macc 15:23; Philo *Embassy* 281).⁵⁰³ Some scholars contend that we lack clear evidence of a Jewish community in Perga; if there was none, it is possible that Luke's silence about Paul's preaching there is because he did not do so.⁵⁰⁴ Others also suggest that Paul bypassed Perga; this may infer too much from Luke's brief mention (see comment on Acts 13:14) but might explain why Luke explicitly notes preaching in Perga in Acts 14:25.

(3) John Mark's Departure (13:13)

John called Mark had been close to Barnabas and Saul since their return from Jerusalem in 12:25. Luke's narrative focuses on the primary protagonists and only rarely mentions the "companions" (which could refer only to Barnabas and, before his departure, John Mark but may have included a few others as well). Biblical narratives often focused on a single person, such as Abraham's steward or David, while briefly mentioning those who aided him or her (Gen 24:32; 1 Sam 18:27; 2 Sam 12:28).⁵⁰⁵ The mention of Mark's departure, however, is noteworthy, especially in view of (and from a literary standpoint, preparatory for) Paul's ill feeling concerning it in Acts 15:38. The verb ἀποχωρέω could refer to turning away from fear (Jer 26:5 LXX; 46:5 MT) or something like apostasy (3 Macc 2:33).⁵⁰⁶ Jewish sources often warn about apostasy⁵⁰⁷ (especially end-time apostasy).⁵⁰⁸ Honorable Jews preferred death to apostasy (4 Macc 9:24).

There is no thought here of Mark's leaving the faith (especially in view of Acts 15:37), but abandoning a mentor was also viewed as a form of unfaithfulness. Later rabbis complained about a disciple who would leave a sage (*m. Hag.* 1:7). No one proved more hostile to rabbinic teaching, later rabbis opined, than a disciple who

499. Klauck, *Context*, 323–24 (citing Price, *Rituals*, catalogue no. 140).

500. Finegan, *Apostles*, 86.

501. *Ibid.*, 88, suggests that the famous Artemis Pergaia temple may have stood on the city's acropolis. Contrast the more widely popular temple of "Ephesian" Artemis in Acts 19:27. Cicero mentions it earlier (*Verr.* 2.4.32.71) and speaks of wicked officials who plundered the temple in his time (2.3.21.54).

502. Gill, "Religion," 87.

503. See esp. Stern, "Diaspora," 148 (citing also *CIJ* 2:38–39, §781); Barrett, *Acts*, 626.

504. Barrett, *Acts*, 626. Probably at least some Jews lived in a town of this size, and Luke often passes over details (e.g., Acts 13:6a); but if they were difficult to locate, the company may well have proceeded to its target city, especially if Sergius Paulus had provided contacts there.

505. Cf. Philost. *Hrk.* 48.13, who critiques Homeric hyperbole by noting that some things that Homer attributes to Achilles alone were, in fact, accomplished by all the Greeks, emboldened through Achilles's presence.

506. Johnson, *Acts*, 229; Witherington, *Acts*, 396. The only other LXX use simply means "withdraw," without moral connotations (2 Macc 4:33).

507. E.g., Ezek 33:12–13, 18; 1 Macc 1:41–51; 2:15; *Pss. Sol.* 17:13–15; *b. Qidd.* 40b; see data in Caird, *Apostolic Age*, 29–30; Schiffman, "Crossroads," 144–46; cf. CD V, 21; *Sipre Deut.* 318.1.10, 15.

508. E.g., *1 En.* 91:7; *Test. Iss.* 6:1; *Test. Naph.* 4:1; *3 En.* 48A:5–6; *m. Soṭah* 9:15; *Pesiq. Rab Kah.* 5:9; *Pesiq. Rab.* 15:14/15; cf. *4 Ezra* 5:1–2; 14:16–18.

had turned from the way (*b. Pesah.* 49b). Normally a disciple would *obey* a teacher;⁵⁰⁹ abandonment of a teacher would thus appear humiliating.⁵¹⁰ Not everyone agreed with such reasoning, of course; one should not blame Pericles if Athens failed to learn virtue, or the gods if humanity did so, or orators if hearers did so (Ael. Arist. *Def. Or.* 336, §111D).⁵¹¹ Philosophers also recognized that many of their students failed to turn out right because they refused to change (Sen. Y. *Ep. Lucil.* 108.5–6). But a disciple's abandonment would still lay the teacher's honor open to challenge.⁵¹² One trusted associate's abandonment could create scandal and even generate mass abandonment in times of difficulty (Corn. Nep. 14 [Datames], 6.3).⁵¹³

Paul expected Mark to act differently (Acts 15:38). True friends should remain loyal in adversity.⁵¹⁴ They would not abandon one even if one were exiled; those who abandon us, one thinker opined, we are better off without (Mus. Ruf. 9, p. 68.13–15). Those who deserted in war were treated most severely,⁵¹⁵ but any breach of trust was viewed harshly. Although Luke views Mark's actions here negatively, this need not mean that he would assume that Mark could not change. He might be unaware of Paul's later reconciliation with Mark (Col 4:10; Phlm 24; 2 Tim 4:11),⁵¹⁶ but he is aware that Barnabas believed that Mark became ready for ministry (Acts 15:37), and probably shared the widespread view that character could change over time.⁵¹⁷ That Luke later uses a cognate of the verb for Mark's departure to refer to Paul and Barnabas separating over Mark (15:39) might sug-

509. E.g., Xen. *Anab.* 3.1.5–7; Philost. *Vit. Apoll.* 2.30; John 13:13–14; for rank granted to sages, *t. Sanh.* 7:8; *b. Hor.* 13b, bar.; *y. Sanh.* 1:2, §13; *Ta'an.* 4:2, §§8–9. Correcting a teacher was rare (*Abot R. Nat.* 1 A); some sages believed that even teaching law in the presence of one's teacher was wrong (*y. Seb.* 6:1, §8) and merited death from God (*Sipra Sh. M.d.* 99.5.6; *b. Erub.* 63a; *Tem.* 16a; *Lev. Rab.* 20:6–7). Some later rabbis also claimed that striving with one's teacher was equivalent to contending with the Shekinah (*Num. Rab.* 18:20), though some ancient teachers did affirm critically evaluating claims (Mus. Ruf. 1, p. 36.6–7). Pointing something out to a teacher or former teacher required great respect (Fronto *Ad verum imp.* 2.3; though cf. the objection in Philost. *Vit. Apoll.* 7.22). One rabbi refused to accept an office before his teacher was appointed (*y. Bik.* 3:3, §9).

510. See comment on Acts 1:16; see further, e.g., Malina, *Windows*, 17–18. The loyalty of one's followers reflected positively on one (e.g., Jos. *Life* 84); positively or negatively, disciples' behavior reflected on their teachers (Aeschines *Tim.* 171–73; *t. Ed.* 3:4; *Abot R. Nat.* 27 A; 34, §76 B; Mark 2:18, 24; perhaps Acts 4:13; Alciph. *Court.* 7 [Thais to Euthydemus], 1.34, ¶¶6–7), as Luke knew (Luke 6:1–2).

511. Betrayed trust reflected badly only on the betrayer if the betrayed had taken appropriate precautions (Polyb. 8.36.4).

512. Thus Acts Paul 3.1 (*Paul Thec.* 1) emphasizes that Paul knew Demas's insincerity from the start (cf. 2 Tim 4:10); cf. similarly Jesus regarding Judas in John 6:64, 71; 13:11. Even a disciple's abandonment of a teacher's position could be used against the position (Heracl. *Hom. Prob.* 78.4).

513. Such traitors merited and received death (Corn. Nep. 14.6.8; also other traitors among friends in 14.9.5). Betrayal by one's own soldiers was tragic (Vell. Paterc. 2.24.5); loyalty remained the ideal for clients to patrons in trouble as well (deSilva, *Honor*, 115, citing Sen. Y. *Ep. Lucil.* 81.27; *Ben.* 4.20.2; 4.24.2).

514. E.g., Isoc. *Demon.* 25; Val. Max. 3.8.ext. 5–6; 4.7 passim (esp. 4.7.pref.; 4.7.1, 4); Fronto *Ad Ant. Pium* 3.4; Char. *Chær.* 3.3.1; 3.5.7–8. Cf. the willingness to die together in Eurip. *Orest.* 1069–74, 1155; *Iph. Taur.* 674–86; Char. *Chær.* 4.3.5; 7.1.7. For further discussion, see Keener, *John*, 1005, 1009–10.

515. E.g., Val. Max. 2.7.11–13; 2.7.15ac; Jos. *Ant.* 20.79; see fuller comment at Acts 12:18–19. Loyalty to country could take precedence even over hospitality-friendship (Xen. *Hell.* 4.1.34; Corn. Nep. 13 [Timotheus], 4.4), but disloyalty to friends remained despicable (e.g., *Rhet. Alex.* 36, 1442.13–14).

516. Although I allow this possibility, I believe more likely that these passages do suggest that Luke (also mentioned in the contexts of these passages) would be aware of the reconciliation with Mark if (as I think) he is the author of Luke-Acts. Black, "Presentation of Mark," is probably right about Luke's ignorance of the letters and perhaps (also idem, *Rhetoric of Gospel*, 95–113) is also right that Mark functions as a foil. But Black's suggestion that Mark's emphasis on the Jewish mission was the cause of his pulling back (113; whatever his association with Jerusalem, 111) is only one of several possibilities.

517. See, e.g., Gen 37:26–27; 44:17, 33; 1 Sam 10:6; 2 Chr 24:17–22; Val. Max. 6.9.pref.–6.9.9 (e.g., Scipio Africanus the Elder, 6.9.2); Polemo in 6.9.ext. 1. That Luke is critical of Mark as author of a prior Gospel (suggested in Collins, *Mark*, 5) is not impossible, but any possible criticism would have to be limited in force (Luke is, after all, heavily dependent on Mark in his Gospel).

gest that Paul, who rejected Mark, committed the same error of division himself in his division with Barnabas.⁵¹⁸

II. PISIDIAN ANTIOCH (13:14)

The heart of the action in 13:13–52 transpires in Antioch. The city was not significant enough to figure heavily in literary sources outside the region, and hence would not likely merit Luke's attention apart from historical tradition about Paul. At the same time, archaeology shows that it *was* significant within the Anatolian interior. Although Antioch was no large and famous city like Rome, Ephesus, or Corinth, it was one of the largest and most strategic towns of the interior highlands of Asia Minor. Paul's ministry here took place in smaller and more isolated towns before moving to the giant cities.

(1) *Reaching Pisidian Antioch*

The suggestion that Paul bypassed ministry in Perga for Antioch because he contracted malaria by the marshy coast and needed time in the hill country (cf. Paul's sickness in Galatia in Gal 4:13)⁵¹⁹ is possible but speculative.⁵²⁰ Luke could have simply omitted discussion of minor events in Perga to focus on more eventful ministry in Antioch, perhaps due to a larger Jewish community there. Since the “we” narratives never come near southern Asia Minor, Luke lacks firsthand acquaintance here and chooses not to invent information that he does not have.⁵²¹ If Paul's team wished to travel to the mountainous interior, however, a well-known and widely traveled route, the paved Via Sebaste, now existed.⁵²² Those wishing to enter Asia's interior from Syria or Egypt might sail to Attalia⁵²³ with this route in view.

The likelier Alexandrian reading here for the city is “Pisidian Antioch.” Although the city was technically in Phrygia, the title fits the known character of the city in this period as the Phrygian Antioch that, from a Phrygian perspective, was near Pisidia (Strabo 12.3.31; 12.6.4, Antioch τὴν πρὸς τῇ Πισιδίᾳ, “as it is called”).⁵²⁴ The genitive reading in later manuscripts reflects the situation after Diocletian's reorganizing of the provinces and is anachronistic.⁵²⁵ (Because of its title, even Pliny the Elder wrongly assumed that it was part of Pisidia in his day [*N.H.* 5.24.94], and it is possible that Luke would have made this assumption as well, since he did not travel here.)⁵²⁶

Inscriptions place it in Phrygia,⁵²⁷ but the title “Pisidian” Antioch distinguished it from another Phrygian Antioch in Caria, on the Meander River.⁵²⁸ For less geographically informed members of Luke's audience, this title would also serve to distinguish

518. The verb ἀποχωρίζω of Acts 15:39 appears nowhere else in Luke-Acts (and only one other time in the NT); the cognate verb in 13:13 appears only two other times in the NT.

519. Ramsay, *Galatians*, 421; subsequently others, e.g., Walaskay, *Acts*, 128; as one view, Schnabel, *Missionary*, 368. Certainly such a sickness is likelier than the eye disease that some propose on the basis of Gal 4:15 (see Keener, “Eyes”).

520. Larkin, *Acts*, 197, rightly critiquing Ramsay.

521. Conzelmann, *Acts*, 103, argues that Luke lacked the itinerary here, though his suggestion that Luke might have inferred from a map the information that he does have may be too optimistic about the widespread availability of maps.

522. Mitchell, *Anatolia*, 1:70.

523. Finegan, *Apostles*, 84–85.

524. Metzger, *Textual Commentary*, 404–5; Hemer, *Acts in History*, 109; MAMA 7:xi.

525. See Metzger, *Textual Commentary*, 405.

526. With, e.g., Fitzmyer, *Acts*, 509. Pliny the Elder (*N.H.* 5.145) thought that the northeast of Phrygia “marches with Galatia” and its southeast “with Lykaonia, Pisidia and Mygdonia,” but Pliny wrongly excluded the “part of Galatic Phrygia . . . along the Pisidian border” (MAMA 7:xi).

527. See Calder, MAMA 1:xii.

528. Fitzmyer, *Acts*, 509.

the town from its much larger and more famous namesake in Syria (Acts 13:1); like Alexander and Seleucus, the kings named Antiochus had many cities named in their honor.⁵²⁹

By the time the group reaches Antioch, they will have spent considerable time in Pisidia.⁵³⁰ Although Antioch was technically part of the province of Phrygia in this period (see discussion below), it lay on Pisidia's border and shared much of the character of the Pisidian highlands. Thus the Pisidian setting is described here (Phrygia will be discussed more fully in terms of the group's subsequent destinations).

As part of the earlier kingdom of Amyntas,⁵³¹ Pisidia qualified as part of the Roman province of Galatia; within this province, it invited a significant share of the governor's early military attention.⁵³² It is possible that much of Pisidia was detached from Galatia and adjoined to Lycia and Pamphylia a few years before Paul's arrival; in any case, Galatian governors are still said to govern "Pisidia" in sources a few decades later. This claim might cover just "the northern edge of the region,"⁵³³ but certainly that would cover Antioch in Phrygia, which bordered on Pisidia's north.

Pisidia was remembered for its rugged, independent, warrior tradition;⁵³⁴ warrior deities were prominent there, and Roman settlers apparently identified such deities with their own war god.⁵³⁵ This history had invited a strong Roman military presence in the region;⁵³⁶ consequently it is not surprising to find epigraphic evidence for military units in Pisidian Antioch. Rome recruited both legionaries and auxiliaries from this area.⁵³⁷

(2) *The Route Taken*

It would be difficult to cross the Taurus Mountains⁵³⁸ (or other mountain ranges) in winter,⁵³⁹ but if it were winter Paul's company probably would not have sailed from Cyprus in any case (for the danger even over that short distance, cf. Acts 27:4–5); if they reached Cyprus (13:4) in early spring, they could have months remaining for travel even if they spent several months in Cyprus. Although the Taurus Range, which becomes the Anti-Taurus Range in eastern Turkey, could have provided a formidable obstacle for trade routes, merchants did pass through these mountains.⁵⁴⁰ Travel northward was limited; apart from the Via Sebaste (noted below), east-west travel (after leaving Antioch) was virtually impossible.⁵⁴¹

Besides a multitude of less desirable goatherd trails, only two or three major routes existed through the Taurus Mountains from Perga north to Antioch; all were in use

529. Luke is not drawing deliberate literary connections between the two cities; there were at least sixteen Antiochs in antiquity, since Seleucus I named many cities for his father (or his son; Finegan, *Apostles*, 63).

530. For a summary of 1990s archaeological publications on Pisidia, see Mitchell, "Archaeology," 173–78; on Pisidia, see also the summary and sources in Schnabel, *Mission*, 1092–93.

531. Mitchell, *Anatolia*, 1:38.

532. *Ibid.*, 1:64.

533. *Ibid.*, 2:154.

534. Ancient sources mention their warlike character, never subdued by Hellenistic kings, and archaeology confirms this picture (Mitchell, *Anatolia*, 1:72; 2:26).

535. *Ibid.*, 2:27–28.

536. *Ibid.*, 1:72–73.

537. *Ibid.*, 1:74.

538. On this range, which connected with other mountains in Armenia near the Caucasus Range, see Warmington, "Taurus Range"; Olshausen, "Taurus."

539. Hdn. 3.3.7; Vell. Paterc. 2.105.3 (Alps); Rapske, "Travel," 4; Riesner, *Early Period*, 278 (citing Cic. *Att.* 5.21.14); cf. Carter and Earle, *Acts*, 183. Among one general's exploits was his having been the first Roman to lead an army across the Taurus Range (Plut. *Comparison of Lucullus and Cimon* 3.1). The average lowest winter temperature in central Turkey is about -18°C (Lamprecht, "Heating," 27).

540. Yener, "Taurus Mountains," 155. For the Cilician Gates farther west, see comment on Acts 16:1.

541. Mitchell, *Anatolia*, 1:70.

in this period.⁵⁴² The shorter route ran through the Cestrus River valley, following “deep, rocky valleys” and the “high ridges” of western Taurus; the circuitous western route was longer but easier (through flat alluvial valleys).⁵⁴³

The company probably would have taken the circuitous but preferable western route, the Via Sebaste, built about five decades earlier in 6 B.C.E. and reaching Antioch via Comama. This road was central to Rome's earlier project to pacify and control Pisidia.⁵⁴⁴ (In contrast to Ramsay's earlier informed guess, archaeology shows that this road ran to Perga but may not have extended as far as Attalia.)⁵⁴⁵ It was more than 3.5 meters wide on average;⁵⁴⁶ others estimate even wider (6–8 m.) for the overall average of the road throughout its length.⁵⁴⁷ Unlike Hellenistic and other Roman trails in these highlands, “narrow, often stepped, stone tracks designed for pedestrians and pack-animals,” this paved road was designed for wheeled traffic.⁵⁴⁸

Mark Wilson provides valuable information regarding the route. The road started “at Perga and climbed out of the Cestrus River valley before heading northwest across the plain of Pamphylia.”⁵⁴⁹ Travelers would soon reach a natural pass through the Taurus Mountains called Klimax; a Roman marker indicates that it was 139 Roman miles (about 128 modern miles) from Pisidian Antioch.⁵⁵⁰ If a traveler stopped at significant towns, the first would be Comama, on “a flat plain” where two roads met. Comama, holding some thirty-five acres and apparently lacking city walls, was a small town by the standards of ancient Mediterranean megacities;⁵⁵¹ travelers would now be 122 Roman miles from Pisidian Antioch.⁵⁵²

From Comama one would walk northwest “through pine-covered hills passing several smaller villages,” following the plain on the western side of the saltwater Lake Ascania. At the lake's northwest corner the road ran up to where the great Southern Highway, which Paul would take on later journeys, met the Via Sebaste.⁵⁵³ Then travelers would descend into a valley toward Apollonia and proceed further northeast along the base of Mount Gelincik and then by a freshwater lake, Lake Limnae.⁵⁵⁴ Finally, they would ascend again “into the foothills leading to Pisidian Antioch.”⁵⁵⁵

542. French, “Roads,” 51 (two roads); Wilson, “Route,” 471 (noting three). Paved roads and trails through the mountains connected various highland towns even in the Hellenistic period (Mitchell, *Anatolia*, 1:70). Wilson, “Route,” 480, notes that Broughton's alternative shortcut proves only four miles shorter than the Via Sebaste.

543. French, “Roads,” 52; see also Mitchell, *Anatolia*, 1:70 (also noting a third route through the mountains to Iconium); Wilson, “Route,” 482; Finegan, *Apostles*, 90 (preferring the Roman road to Side, then another going north past Lake Beyşehir). The third route might have made more sense had they landed at Side farther east (perhaps 65 or more km. to the east of Attalia), then gone north (perhaps through a few more mountains) and connected with the road to Iconium, but because of the mountains, this might not have saved much time.

544. Mitchell, “Via Sebaste”; cf. idem, *Anatolia*, 1:77.

545. French, “Roads,” 52.

546. Hansen, “Galatia,” 384; also French, “Roads,” 53. Much earlier, Cadbury, *Acts in History*, 62, also opined that at least through Antioch and Lystra, Paul followed the Via Augusta; cf. Reicke, *Era*, 218.

547. Mitchell, “Via Sebaste,” 1596.

548. Mitchell, *Anatolia*, 1:70; also Wilson, “Route,” 477.

549. Wilson, “Route,” 477, following the more detailed Takmer and Önen, “Surveys,” for this part of the route.

550. Wilson, “Route,” 477. Roman miles are normally estimated as 8 percent shorter than modern miles, hence 128 miles here; but given the actual distance between Roman mile markers of roughly 5,000 (instead of 4,856) feet, a figure of 131.6 modern miles may be closer.

551. Ibid., 478, following Levick, *Roman Colonies*, 94n4 (who estimates 6,300–9,450 residents of the territorium).

552. Wilson, “Route,” 478, citing the Roman milestone (*CIL* 3.6974).

553. Wilson, “Route,” 478, noting the nearby boundary between Galatia and Asia.

554. Ibid.

555. Ibid., 479.

(3) *Why Antioch?*

The road from Perga to Antioch covered about 125 miles (200 km.), and so this was no small journey. Pisidian Antioch lay about ninety miles (150 km.) north (and slightly west) of Perga, as the crow flies.⁵⁵⁶ But the company's members could hardly have traveled straight as the crow flies; some of the highest mountains in the Taurus Range obstructed their path.⁵⁵⁷ If they took the Via Sebaste from Perga, bypassing mountain trails, as argued below (with most scholars), they would travel approximately twenty-three miles to Klimax Pass, nineteen more miles to Comama, seventy-one miles to Apollonia, and forty-three further miles to Pisidian Antioch, a total of 156 miles (roughly 250 km.).⁵⁵⁸ The journey cannot have been a short one. One writer, who proposes a shorter route of eighty miles (130 km.) or more, estimates a six days' journey on foot, "considering the terrain."⁵⁵⁹

Moreover, although the terrain varied, much of the journey was uphill from the coastal plain to the interior highlands,⁵⁶⁰ as Antioch was located in a mountainous region west of the Taurus Range, about 3,600 feet above sea level.⁵⁶¹ Why walk so far, and so far uphill? Pisidia is on the northernmost border of Pamphylia, and Attalia on the southern coast, adjoining Lycia. One would think a westward move into Lycia would bring one into contact with more cities and people (see comment on Acts 27:5), yet Paul moved north.

Although there were other towns in or on the border of Pisidia, Antioch was among the six largest (as was Perga, on the border of Pisidia and Pamphylia). Antioch was also one of four known Roman colonies in the Pisidian region from any time in the Roman era,⁵⁶² and of them only Cremna was comparable in size.⁵⁶³ Why would Paul not have chosen Cremna instead of Antioch? Cremna is less than 50 kilometers from Perga as the crow flies (i.e., much closer than Antioch), and if one walked up the Cestrus Valley, through much less hill country en route (such a north-south route from Perga to Cremna⁵⁶⁴ was fairly close to sea level until reaching Cremna).⁵⁶⁵ Cremna, like

556. It appears just below 100 mi. (perhaps ca. 96) in Talbert, *Barrington Atlas*, 3, B2.

557. French, "Roads," 51–52 (noting especially the northernmost part "of the Anamas Dagl between the lakes Beysehir and Egridir," p. 52).

558. Wilson, "Route," 479; idem, personal correspondence, Nov. 25, 2011. His map measurements differ by only about 4 percent from the Roman mile markers ("Route," 479n47). My own much rougher estimates (apparently roughly 20 percent off) from map 5 after p. 78 in Mitchell, *Anatolia*, without adjustment for increases due to elevation, were over 65 km. from Perga northwest to Comama (a Roman colony), over 75 km. north (west and then east) to Apollonia, then perhaps 60 or more to Antioch: in all, a trek of about 200 km. (some 125 mi.) from Perga to Antioch.

559. Finegan, *Apostles*, 90.

560. See Levick, *Roman Colonies*, "Mountains and Routes in Southern Anatolia" (mostly pre-Roman), 7–20.

561. Witherington, *Acts*, 405; Le Cornu, *Acts*, 713. Karris, *Invitation*, 143, indicates 3,900 ft.; Finegan, *Apostles*, 90, indicates more than 3,000 ft. (915 m.) and, for the site of Antioch, "3,500–3,800 ft (1,067–1,158 m) above sea level" (91).

562. Mitchell, *Anatolia*, map 5, after 1:78. Altogether there were thirteen colonies under Augustus in Galatia, twelve of them in South Galatia (1:77).

563. Augustus founded Cremna as a colony well before this period (Mitchell, *Anatolia*, 1:77). For a summary of archaeological work on Cremna, see Mitchell, "Archaeology," 176.

564. Inferred from Mitchell, *Anatolia*, map 5, after 1:78. A narrow Roman road led from the Augustan colony of Comama, to the west, through more rugged terrain into Cremna's west gate (1:128). Levick, *Roman Colonies*, 39, suggests that the Via Sebaste "presumably" reached Cremna as well as the documented sites, but from Mitchell, *Anatolia*, map 5, it is clear that Cremna is too far from the main road unless we think of a branch road, which would have to run through the mountains. Surely travelers from Perga to the south could approach it much more easily from there, even without a major Roman road.

565. Cremna itself was less accessible; even today one must drive up a winding route with dense woods (Levick, *Roman Colonies*, 46; she notes [15] that modern road systems resemble ancient ones because of terrain and difficulty of travel there). The traditional road of today has made no use of the Cestrus Valley

Isaura, had been important in Amyntas's kingdom, and these two cities were the only colonies "in the heart of the mountainous district."⁵⁶⁶ Cremna also had fertile plains.⁵⁶⁷

Some proposed reasons for choosing Antioch are possible but not certain, such as the need for a cooler climate because of malaria,⁵⁶⁸ as noted above. But this proposal would not have necessitated Antioch as the choice rather than Cremna or some other sites. Another suggestion is that Antioch offered connections with Sergius Paulus's relatives, as already noted. Although this suggestion is unprovable, the known connections between the governor whom Paul and Barnabas just left and the town where their preaching is next recorded (see discussion below) are probably⁵⁶⁹ more than coincidence. But even if Sergius Paulus recommended the site, why did Paul's company take the advice? His recommendation and geographical proximity are likely factors but may be supplemented by others.

More important for one entering the region is that Antioch was on the Via Sebaste, allowing for ministry elsewhere in the interior. Antioch was also much larger than Cremna (which was the second-largest colony in the region). The city wall apparently surrounded about 115 acres, making Antioch moderately sized for a colony.⁵⁷⁰ The larger *territorium* was about 540 square miles, at the lower end of the normal range for colonies;⁵⁷¹ this size was fairly substantial for the Pisidian hill country. The two towns' ranking in terms of numbers of colonists was also substantial for this region; Antioch probably had more than 5,750 colonists and Cremna around 2,000.⁵⁷² Cremna was isolated, controlling no major route;⁵⁷³ Romans made it a colony because of its undefeated military status, not its location.⁵⁷⁴ (The colonists constituted only a portion of the population⁵⁷⁵ but controlled civic administration;⁵⁷⁶ even after Greco-Phrygians joined the citizen body, Italians remained central to it.)⁵⁷⁷

Some scholars have gone so far as to claim that Antioch was "the principal Roman colony in the Greek East."⁵⁷⁸ (It was certainly no rival in size for Ephesus, Syrian Antioch, Jerusalem, or Alexandria, but these were not colonies.) It continued to grow with major building projects in Tiberius's day and probably also in that of Gaius Caligula and

(Levick, *Roman Colonies*, 46), but it is likely that ancients took such a route to Cremna and Sagalassus (see Mitchell, *Anatolia*, 1:70).

566. Mitchell, *Anatolia*, 1:77. Isaura was in Isauria to the east (map 5, after 1:78).

567. *Ibid.*, 1:71.

568. Ramsay, *Galatians*, 421. If Paul had a bout of malaria, he likely would have stayed in place till it subsided before traveling; but malaria is recurrent.

569. The geographic proximity of Antioch to Cyprus might account for both cases, allowing coincidence (assuming that Sergius was able to influence the securing of that province instead of simply getting it by lot). Antioch was, after all, a significant city. But a connection remains likelier, though Luke himself does not make it (and may well not have known of it).

570. Levick, *Roman Colonies*, 43.

571. *Ibid.*, 45. This *territorium* was divided into allotments for Roman settlers (Mitchell, *Anatolia*, 1:151).

572. Levick, *Roman Colonies*, 94. In an earlier period, Romans sometimes established colonies with as few as 300 men; in the (pertinent) Augustan period, this was more often closer to 6,000 (p. 92). Augusta Praetoria obtained 3,000, implying a total population of more than 10,000 (assuming a population density comparable to Pompeii's); since Pisidian Antioch was founded the same year (25 B.C.E.) and was roughly the same acreage (115 acres for Pisidian Antioch, 102 for Augusta Praetoria; p. 92), Antioch may have received 3,000 colonists, for a total Roman population of more than 5,750. A comparable British Roman town was estimated at 2,500–7,500 in population (p. 94).

573. *Ibid.*, 46.

574. *Ibid.*, 47.

575. Of the 465 persons named in sources for Antioch and its *territorium*, "297 are citizens, 168 non-citizens" (63.87 percent vs. 36.13 percent); the latter names could belong to either slaves or *peregrini* (Levick, *Roman Colonies*, 98).

576. *Ibid.*, 189.

577. *Ibid.*, 190.

578. Mitchell, *Anatolia*, 2:7, following Levick, *Roman Colonies*, 76–78.

Claudius. It was Galatia's second city, after Ancyra, the capital, but its Italian settlers made it more important than Ancyra, and the rise of the senatorial family of Sergius Paulus in this period further augmented its prominence.⁵⁷⁹ In South Galatia, it was easily the most prominent city.⁵⁸⁰ Further, if Rome was Paul's long-range goal (Rom 1:13–15), "Antioch, the *simulacrum* of Rome in the East, providentially offered itself as a substitute."⁵⁸¹ Paul normally targeted strategic cities, especially Roman colonies and major metropolitan areas;⁵⁸² Antioch qualified at least as the former (as would Troas and Philippi on his next mission).

(4) *Connections with the Sergii Paulli?*

Paul's company might visit Antioch because of its prominence if they traveled to that region, but just as Paul once carried letters of introduction on a different sort of mission (Acts 9:2) and Paul and Barnabas first sailed for Barnabas's homeland, it is likely that the group would have sought connections in Pisidian Antioch. Their encounter with Sergius Paulus before sailing from Paphos may have provided those connections.

Landholding is documented around many towns, but "the best attested of these large domains is the estate of the senatorial family of the Sergii Paulli."⁵⁸³ The estate lay near the boundary between the *territorium* of Ancyra (in North Galatia) and Laodicea Catacecaumene.⁵⁸⁴ That is, it lay about equidistant from Galatia's capital (Ancyra) and South Galatia's most prominent city, Antioch.⁵⁸⁵ The estate is well attested, including a gravestone erected by a senator's wife, Sergia L. f. Paullina (112 C.E.; MAMA 7.319); a tombstone of a freedman named Sergius who worked for one Paullus (7.321); and an L. Sergius Corinthus, a wealthy freedman in the late first century (7.486).⁵⁸⁶ Mitchell notes, "Several other Sergii or Sergiani mentioned on inscriptions of the central plateau were clearly connected with the estate, which was evidently a large one" (1.108; 7.14, 330, 331).⁵⁸⁷ Scholars debate the exact contours of the estate, but it is clear that even its freedpersons exercised considerable local influence.⁵⁸⁸ The family itself was among the most prominent in Asia; L. Sergius L. f. Paulus was the first senator from the East to become consul (in 70 C.E.).⁵⁸⁹ Such connections would not likely be known outside the region but would be well known in the region.

Although it was influential over a wider area of the region, at least part of the family had a home in Pisidian Antioch. One of the inscriptions from Antioch honors "L. Sergius L. f. Paullus *filius*, presumably the son of the proconsul of Cyprus, who also entered the senate."⁵⁹⁰ The other leading family of Italian colonists in Pisidian Antioch was the

579. Mitchell, *Anatolia*, 2:7.

580. Levick, *Roman Colonies*, 122.

581. Mitchell, *Anatolia*, 2:7.

582. *Ibid.*, 2:8. For the progressive movement of Luke-Acts from a rural to an urban setting, see the commentary introduction, Keener, *Acts*, 1:589–90. Acts 13–14 offers a key period in the transition.

583. Mitchell, *Anatolia*, 1:151.

584. *Ibid.*, 1:151 (concurring with Ramsay and Calder).

585. As best I can estimate from *ibid.*, map 10, after 1:164, the estate of Sergii Paulli in the area of Vetissus is ca. 110 km. south-southwest of Ancyra, ca. 110–20 km. north of Iconium, and ca. 110 km. northeast of Pisidian Antioch. Travel from Antioch would take more than this distance, however, since it would not be "as the crow flies"; mountains would likely require one to travel from Antioch to Iconium and then north to reach the estate.

586. Mitchell, *Anatolia*, 1:151.

587. *Ibid.*

588. *Ibid.*

589. *Ibid.*, 1:152. This remains true whether this is the same Sergius Paulus whom Paul met (as Mitchell and Levick both reasonably affirm) or simply a relative.

590. Mitchell, *Anatolia*, 1:152.

Caristanii,⁵⁹¹ and the two families formed a marriage alliance through this younger Sergius Paulus's sister or daughter; her husband later became *consul suffectus* in Rome in 90 C.E.⁵⁹² After surveying various sources of evidence, Mitchell concludes, "The accumulation of evidence leaves little room for doubt that although the Sergii Paulli, like the Caristanii, were ultimately of Italian origin, they were native to Pisidian Antioch."⁵⁹³

(5) *Life in Pisidian Antioch*

Remains of Pisidian Antioch are found about a mile to the northeast of contemporary Yalvaç (or Yalovatch).⁵⁹⁴ It was located in a mountainous region west of the Taurus Range, about 3,600 feet above sea level.⁵⁹⁵ Unlike some settlements, Antioch could not be designed very symmetrically, given the rugged Pisidian terrain.⁵⁹⁶ From the north, Antioch's hill looks like a plateau but is less flat than it might appear; the hill is much higher in the east, then drops steeply "to the river Anthios, which, in winter and spring, flows past the colony."⁵⁹⁷ An aqueduct provided Antioch water from the Sultan Dagh Mountains on the east and north.⁵⁹⁸

Although Pisidian Antioch's location seems remote, we have an inscription from Alexandria that apparently found its way there in antiquity (*ILS* 2696).⁵⁹⁹ Romans planned the roads they constructed in mountainous country so as to avoid avalanches as much as possible.⁶⁰⁰ East of Apollonia, north of a lake in Pisidia, is a valley, the southern side of which touches the northern side of "Pisidian Tauros"; the northern ridge of the valley contained Antioch.⁶⁰¹

Antioch was relatively prosperous.⁶⁰² The colony sustained itself from its *territorium's* produce, needing to import food only rarely.⁶⁰³ It probably specialized in grain but also raised various vegetables as in this area of Turkey today.⁶⁰⁴ Despite its advantages, the city suffered a famine in 91–93 C.E.⁶⁰⁵ Although its countryside was fertile, its location on the Via Sebaste eventually brought it greater importance.⁶⁰⁶ Its location on the southern branch of the Via Sebaste, the land route connecting Ephesus with Syria, as well as its being a key point of entry to the highlands of Pisidia must have made it an important commercial center.⁶⁰⁷ Still, although inscriptions show

591. Further on the Caristanii, see Levick, *Roman Colonies*, 111–13. A newer inscription from 5–48 C.E. (close to Paul's arrival) shows a certain Caristianus fulfilling a vow on behalf of Claudius (Mowery, "Caristianus").

592. Mitchell, *Anatolia*, 1:152; Levick, *Roman Colonies*, 112.

593. Mitchell, *Anatolia*, 2:6–7; quote, 7.

594. McRay, *Archaeology*, 237. Much more fully on Pisidian Antioch, Mitchell, "Antioch of Pisidia"; Schnabel, *Mission*, 1098–1103; Fant and Reddish, *Sites*, 152–61; briefly, Eckey, *Apostelgeschichte*, 295–96; earlier, Ramsay, "Pisidian Antioch"; idem, *Cities of Paul*, 247–314; Unger, "Pisidian Antioch."

602. The expensive decorations of the Augustus temple probably suggest this (with McRay, *Archaeology*, 238).

603. Levick, *Roman Colonies*, 97. Many of the colonists farmed the surrounding *territorium* (Mitchell, *Anatolia*, 1:151).

604. Levick, *Roman Colonies*, 97–98, suggesting, from modern evidence, "broad beans and chick-peas," grapes (attested on coinage), apples and other fruit, nuts, probably opium poppies (attested on coins and sculpture), but not olives.

605. The inscription is translated in Sherk, *Empire*, §107, pp. 149–50.

606. Weiss, "Antioch," noting that this increased after the third century C.E.

607. Thus Levick, *Roman Colonies*, 42, 99 (though admitting [101] that this is inference); Mercury, patron deity of commerce (among other activities), figures prominently on coins of Antioch and Cremna (99).

that merchants from other towns were often active abroad, little evidence suggests this for Antioch's merchants. Most of them apparently did their trade in Antioch itself with those whom the Via Sebaste brought their way.⁶⁰⁸

Like the rest of Phrygia and northern Pisidia, Antioch belonged to the southern part of the large Roman province of Galatia, and hence its believers are potentially among the addressees of Paul's letters to and concerning Galatia (1 Cor 16:1; Gal 1:2; 3:1; cf. 2 Tim 4:10). Antioch was part of this province from 25 B.C.E. to 295 C.E.⁶⁰⁹ (see comments on "South Galatia" at Acts 14:1–7).

The town grew in magnificence and functioned as an administrative center for southern Galatia; inhabitants may well have boasted in their honorable city's status (cf. Acts 13:50).⁶¹⁰ By the mid-first century C.E., visitors could compare the city's architecture and sculptures to Rome's own; most striking was the temple to Augustus in the town square. A three-arched gateway (a *propylaeum*) connected the colonnaded "Tiberius Street" (Tiberia Platea) with a stairway leading to the main square, completed probably soon after Paul's arrival.⁶¹¹ The wealthy and elaborately decorated Augustus temple lay on the east end of the square.⁶¹² One of the city forums was named after Augustus, and the other after Tiberius.⁶¹³ The bath house, theater, and other sites have been excavated.⁶¹⁴ The main street running north-south opened at the northern end into a wide area that eventually hosted a public fountain building, constructed perhaps a few decades after Paul's visit.⁶¹⁵

(6) Antioch and Rome

Pisidian Antioch was originally settled by colonists from Magnesia on the Meander.⁶¹⁶ Marc Antony donated it to the final Galatian king, who in turn wisely donated it to Augustus at his own death; Rome made the territory into the Roman province of Galatia and refounded Antioch as a colony, in which it settled many veterans.⁶¹⁷ Augustus "founded" several colonies here and built the Via Sebaste to help secure this easily defended, mountainous region under Roman military control.⁶¹⁸ Colonists in Pisidia "provided a military presence when legions could not be afforded."⁶¹⁹

Antioch was Colonia Caesarea (Pliny E. *N.H.* 5.94),⁶²⁰ a place that took Roman citizenship very seriously.⁶²¹ Mitchell believes that it "was the most important Roman

608. Ibid., 100–101.

609. With, e.g., Fant and Reddish, *Sites*, 152.

610. Most scholars follow Ramsay's argument that it was part of Galatia (Lake and Cadbury, *Commentary*, 148; Witherington, *Acts*, 405).

611. Pearson, "Antioch," 32 (dating the gate's completion to 50 C.E.); cf. McRay, *Archaeology*, 237 (to 50 or 62 C.E.); Mitchell, "Antioch (OCD)." The gate would not have been complete during Paul's visit. A much later Hadrianic inscription (ca. 129 C.E.) appears on the city gate (Mitchell, "Archaeology," 178).

612. McRay, *Archaeology*, 238.

613. Finegan, *Apostles*, 91. It may be no coincidence that all extant copies of Augustus's *Res Gestae* derive from the Roman province of Galatia, including one from Pisidian Antioch (see Harrison, *Authorities*, 24).

614. Mitchell, "Archaeology," 178. On the typical Roman bath there, see Fant and Reddish, *Sites*, 159, but it is probably from after the time of Paul.

615. McRay, *Archaeology*, 237.

616. Avi-Yonah, *Hellenism*, 123.

617. Pearson, "Antioch," 32. On veterans more generally, see Schneider, "Veterans" (esp. 352–53).

618. Mitchell, "Pisidia"; idem, "Via Sebaste," 1595. Augustus settled vast numbers of veterans in the empire (*Res Gestae* 1.3).

619. Sherwin-White, Levick, and Bispham, "Colonization," 364.

620. Conzelmann, *Acts*, 103, also noting that it "was one of the Roman colonies which offered protection against the highlanders."

621. Long-term cultural influences were not exclusively Roman; for its Hellenistic character, see Ramsay, *Cities of Paul*, 261–62. The strength of Greek culture resisted romanization better than some other cultures did (Hus, "Résistance des Étrusques," 159).

colony in Asia Minor and the home of several senators and equestrians in the 1st cent. AD.”⁶²² Pisidian Antioch was built on seven hills—a helpful reminder that it was to be “a little Rome.”⁶²³ Antioch maintained its Roman forms and institutions for a long time.⁶²⁴

Early reports on inscriptions in the region point out that 70 percent of the inscriptions in Antioch are in Latin but perhaps 14 percent elsewhere in Phrygia (outside Antioch and Iconium). The Latin on the inscriptions is usually reasonably good (“at the worst, respectable”).⁶²⁵ After further decades of collected data, Barbara Levick notes that whereas most private inscriptions and especially offerings to Mên Askaēnos are in Greek, the vast majority of inscriptions produced by the civic administration are in Latin.⁶²⁶ Latin remained strong for the colony’s first two centuries; although the lower classes were not romanized, the presence of the army may have helped keep Latin in use.⁶²⁷ Despite other cultural influences, the colonists continued using Latin for official matters at least as late as 297 (when Antioch became metropolis of Pisidia as a new province).⁶²⁸

Except in Italy, colonies were traditionally founded by settling retired soldiers there, but during the early empire, “when veteran colonies were discontinued,” the title *colonia* came to function honorifically, “conferred by special grant, linking a city in its title with an emperor but carrying no substantive privileges.”⁶²⁹ That Antioch received veterans and the title when it was meaningful gave the town higher status in practice than more recent colonies. Even in a colony, most inhabitants were not necessarily Roman citizens,⁶³⁰ but the colony’s citizens, who were Roman citizens and the town’s most influential members, would certainly respect citizenship. Names on inscriptions suggest that most of the original veteran colonists probably were from families in central and northern Italy, especially Etruria, with some others having been recruited in Campania and perhaps Cisalpine Gaul.⁶³¹

The only situation where his citizenship might have helped Paul in Pisidian Antioch would have been in Acts 13:50, but even then it is not clear that, given the opposition of so many other citizens, a plea based on his citizenship would have proved effective. Luke does not emphasize that it was a colony the way he does for Philippi (16:12), but this need not mean that he was unaware of its status;⁶³² the fact is not

622. Mitchell, “Antioch (OCD)” (including among these L. Sergius Paulus). More modestly, Weiss, “Antioch,” considers it the most significant colony “in the western Taurus-region.”

623. Levick, *Roman Colonies*, 78; cf. also McRay, *Archaeology*, 237. For Rome’s seven hills, see, e.g., Varro *L.L.* 5.7.41; Dion. Hal. *Ant. rom.* 4.13.2–3; Ovid *Tristia* 1.5.69–70; Pliny E. *N.H.* 3.5.66 (cf. 36.24.122); Sil. It. 10.586; 12.608; Statius *Silv.* 2.3.21; 4.1.6–7; *Sib. Or.* 2.18; 11.113, 116; Rev 17:9; cf. further Langdon, “Hills” (including more than seven); Aune, *Revelation*, 944–45 (though I doubt that the image originated with Varro); Caird, *Revelation*, 216; Clarke, “Italy,” 457; for the “Seven Hills” festival, see, e.g., Suet. *Dom.* 4.5. Some sources also identify seven hills in Jerusalem, perhaps for parity (Le Cornu, *Acts*, 624), hence also seven hills of paradise (*1 En.* 24:2; 32:1; cf. 4Q403 1 II, 10).

624. Levick, *Roman Colonies*, 91 (concluding the chapter on Roman forms in government, especially of Antioch, 68–91). On Antioch’s Roman connections, cf. also Blaiklock, *Cities*, 22–26.

625. *MAMA* 7:xxx.

626. Levick, *Roman Colonies*, 134. Seventy out of eighty-five funerary inscriptions are in Greek (and three of the Latin examples belong to original veterans); only eighteen of 125 dedications to Mên are in Latin (p. 135), and the names of those offering Greek dedications to Mên reveal that they belonged to “the lower, native strata” (136); some of the lower class could not even write proper Greek (137).

627. *Ibid.*, 143–44.

628. *Ibid.*, 136.

629. Garnsey and Saller, *Empire*, 27. Still, veterans were sometimes settled later to colonize a town, thereby honoring it (e.g., Tac. *Ann.* 12.27, in Claudius’s reign) or guarding it (12.32; cf. 13.31); further veterans could settle later in colonized areas (14.27).

630. Jeffers, *World*, 208.

631. Levick, *Roman Colonies*, 66.

632. Pace the suggestion in Conzelmann, *Acts*, 129–30.

essential to this story the way it is to Paul's ministry in Philippi,⁶³³ and Luke, not writing a work focused on geography (or offering eyewitness information here as in the "we" narrative), lacks incentive to report an extraneous detail. That Paul goes to several colonies, however, is suggestive for his historical missions strategy of reaching influential bases (cf. Luke 10:5–8).

Indigenous and Roman elements predominated in the city; hellenization became dominant only after the third century C.E.⁶³⁴ Although Roman colonists controlled civic administration (and remained a force even after Greco-Phrygians were admitted to the citizen body),⁶³⁵ Greek, Pisidian, and Phrygian influence grew in the south Anatolian colonies not because only these ethnic groups lived there but simply because the fewer Italians who settled there intermarried with them and did not insist on raising children as if in Italy.⁶³⁶ This cultural mix may not have proved easiest to the missionaries; despite Paul's Roman citizenship (see comment on Acts 16:37), he and his coworkers were probably more conversant with Greek culture.

(7) Religion in Antioch

Although residents of Antioch worshiped multiple deities (cf. Gal 4:8–10), two objects of worship thoroughly dominated their attention.⁶³⁷ First, it was a famous center for the worship of the god Mēn, the city's patron deity; it originally had its own priesthood of Mēn Askaēnos, but this was destroyed (Strabo 12.8.14); a temple of another Mēn remained in Antiochene territory (12.3.31).⁶³⁸ In Paul's day, two Hellenistic temples stood within the sacred enclosure of Mēn (near the imperial temple); hundreds of cult dedications to Mēn Askaēnos have been recovered there.⁶³⁹ Like the Mother Goddess and Zeus, Mēn and his cult centers were pervasive throughout central Asia Minor, but the most prominent center of his cult there was his temple in Pisidian Antioch (where he was patron deity), the temple of "Mēn Askaēnos."⁶⁴⁰

Just as other peoples had a distinctive object of worship, the Phrygians had Mēn.⁶⁴¹ Reliefs and coins typically portrayed him as "wearing a Phrygian cap and cloak, with a crescent moon behind his shoulders, carrying a pine cone and often a cock."⁶⁴² Worshipers were initiated,⁶⁴³ and archaeology shows purification pools; the cult included

633. Conzelmann himself (*Acts*, 128) recognizes that Philippi's colony status is essential to the story of Paul's ministry there.

634. See Weiss, "Antioch."

635. Levick, *Roman Colonies*, 189–90.

636. *Ibid.*, 191. Levick notes (130) that a distinctly Italian culture could not survive when even a "diluted" Hellenism had not penetrated beyond the cities in Pisidia and southern Phrygia.

637. Despite an abundance of inscriptions at Mēn's temple, very "few other deities" are mentioned there (Mitchell, *Anatolia*, 2:24–25).

638. See also *MAMA* 7:xxxiii; 7.4 (on the sanctuary there, with the epithet "Askanius," Ἀσκανιανός); cf. 7.486 (a freedman of the Sergii Paulli builds a temple of Mēn, 89 C.E.); Horsley, *Documents*, 3:30–31, §6; Gill, "Religion," 89; Ramsay, *Cities of Paul*, 285; Weiss, "Antioch." For other references to Μῆν, see (without epithets) *MAMA* 7.244, 311; and (with epithets besides "Askanius") 7.243, 244, 245. For recent excavations, Mitchell, "Archaeology," 178.

639. McRay, *Archaeology*, 238–39.

640. Mitchell, *Anatolia*, 2:24. In other locations, the deity went by names such as Mēn Gaineanos and Mēn Andronēnos (2:25).

641. Lucian *Z. Rants* 42.

642. Mitchell, *Anatolia*, 2:24. See also Petzl, "Men," 656 (on Mēn as a moon deity), 657 (for his crescent). His Phrygian cap was "a soft cap folded over in front, associated by the Greeks and Romans with eastern peoples . . ." (Rives, *Religion*, 60).

643. Characteristic of the Mysteries; see, e.g., Dio Chrys. *Or.* 12.33–34; 17.5; 45.9; *Ep.* 5; Paus. 9.39.7–14; *PGM* 70.13–15; Guthrie, *Orpheus*, 17; Heyob, *Isis*, 57; Burkert, *Mystery Cults*, 7, 40–41, 91; idem, *Religion*, 288; Mylonas, *Eleusis*, 237–39, 250; Klauck, *Context*, 86–88, 94–96, 102–3, 116–17, 144. The language became common enough to provide a popular metaphor or comparison (Dio Chrys. *Or.* 12.33–34; 17.5; Ach. Tat. 1.2.2; 1.9.7; 5.15.6).

initiated freedmen, and members of the local elite apparently could become priests.⁶⁴⁴ Mēn's two temples overlooked Antioch's plain. Mitchell notes that the temple that was more visible in Antioch stood on the hill locally called Karakuyu, "an hour's climb above the city"; the other was "about fifteen miles away, in the north-west part of its territory, at the modern village of Sagir."⁶⁴⁵ Until Roman times, the Karakuyu temple controlled most of the land below, and many who lived there were "sacred slaves." Rome dissolved this practice, but Roman names on dedications indicate that the new colonists adopted the cult as well.⁶⁴⁶

By Paul's day, however, the cultic site that dominated Antioch's urban center was, as noted above, an imperial sanctuary.⁶⁴⁷ Roman settlers brought other Roman cults, but none compared with the worship of Augustus and his family; Augustus was honored as the colony's "founder."⁶⁴⁸ The imperial cult, with its civic celebrations on special days and months (cf. Gal 4:10), regulated much of public life in Antioch, making the incompatible commitments of aniconic monotheists inescapably obvious.⁶⁴⁹ Pisidian Antioch was a Roman colony, proud of the Roman status that this honor conferred on its own citizens (see comment on Acts 13:14). This meant that most of its citizens would also be eager to demonstrate their loyalty in the city's imperial temple.

The imperial temple was so large that Paul would have seen it miles before reaching the colony as he journeyed along the Via Sebaste.⁶⁵⁰ A "podium temple and a propylon" constituted the sanctuary's focus; sculptures commemorating Augustus's triumphs decorated the building, "dated to 2–1 BC."⁶⁵¹ Tiberius began the building project, and it was probably still in progress under Gaius and the early part of Claudius's reign and hence only recently completed (if yet completed) when Paul arrived.⁶⁵² Antioch's Roman priesthoods began either at Antioch's founding or in the first century C.E., then persisted for centuries.⁶⁵³

In nearby Pisidia, temples show a fairly consistent form;⁶⁵⁴ evidence shows that earlier traditional deities were hellenized and assimilated in time.⁶⁵⁵ Warrior deities had long been prominent in the region, given Pisidia's warlike traditions.⁶⁵⁶ Mercury, perhaps as a patron deity of commerce, also appears on many coins in both Cremna and Antioch.⁶⁵⁷ On Phrygian religion, see comment on Acts 14:11–12.⁶⁵⁸

644. Gill, "Religion," 89. Mitchell, *Anatolia*, 2:10, points out that the priesthood of Mēn, "combined with that of Demeter," went to the most prominent citizens (citing *CMRDM* 1.164–74; 4.52). The cult had its own treasury, and its festivals included athletic contests (citing *CIL* 3.295 = 6829; *CMRDM* 1.178). In most locations, members of provincial elites served priesthoods, sometimes in a hereditary role (Rizakis, "Elites," 317–18).

645. Mitchell, *Anatolia*, 2:9. Worshipers ascended the steep route to the temple on Karakuyu, leaving dedicatory inscriptions both at the site and on the way (2:9–10, citing *CMRDM* 1.160–294; 4.1–161; 3.55–66).

646. Mitchell, *Anatolia*, 2:10; on Romans adopting such local cults, see also 2:29.

647. Mitchell, "Antioch (OCD)"; cf. Klauck, *Context*, 323–24 (citing Price, *Rituals*, catalogue no. 123). For the imperial cult in the interior of Asia Minor in general, see esp. Mitchell, *Anatolia*, 2:100–117.

648. Mitchell, *Anatolia*, 2:10. On the imperial temple in Antioch, see further 1:101 (fig. 14), 104–6, 106 (figs. 15–16).

654. Mitchell, *Anatolia*, 2:13 (including five temples from Cremna, albeit from the mid- to late second century C.E.).

655. *Ibid.*, 2:18.

656. *Ibid.*, 2:27–28. On the pre-Roman prominence of Ares in southern Asia Minor, see Gonzales, "Oracle."

657. Levick, *Roman Colonies*, 99. On Hermes, see comment on Acts 14:12.

658. For pagan religion in Anatolia generally (from the first through the third centuries C.E.), see Mitchell, *Anatolia*, 2:11–31.

(8) *Judaism near Antioch*

Luke indicates that many Jewish people lived in Pisidian Antioch (Acts 13:14), but some non-Lukan evidence previously cited for this claim⁶⁵⁹ is debated today.⁶⁶⁰ Until the late empire, only Acts specifically indicates Jewish people in Antioch or Iconium, and even Acts does not point to the size of these communities. This is not unusual, since what survives is often by chance, but we do have an abundance of evidence for a Jewish presence in the region as a whole, and if in the region, then likely in a town such as Antioch, one of the more prominent of the region. Josephus testifies that large numbers of Jewish people lived in Phrygia from the time of Antiochus the Great (*Ant.* 12.147–53, esp. 12.149).⁶⁶¹ (In general, next to Diaspora communities in Babylonia and Egypt, that in Asia Minor assumed the greatest importance.)⁶⁶² Jewish inscriptions from southern Asia include a number from Aphrodisias (see comment on Acts 10:2) and Acmonia,⁶⁶³ including one with an OT quotation in Hebrew, with a blessing on Israel and Jerusalem (*MAMA* 6.334).⁶⁶⁴

As a Roman colony Antioch may have attracted even more Jews than many parts of Phrygia (certainly more than rural locations).⁶⁶⁵ Even allowing that Acts 13:44 (“almost all the city”) is Lukan hyperbole (21:30; Luke 8:37, 39; 21:38; cf. also Mark 1:33; Matt 8:34; 21:10), the synagogue must have been significant (Acts 13:45).⁶⁶⁶ Though it was not, conceivably, among the larger synagogues in Asia (most notably the later, massive synagogue complex in Sardis),⁶⁶⁷ large synagogues were hardly impossible in this period; some estimate that the pre-70 Gamla synagogue in Palestine could seat about three hundred people.⁶⁶⁸ One would naturally find more local Jewish people gathering on the Sabbath (see comment on Acts 13:5).⁶⁶⁹ If the Jewish community was not large, it would nevertheless provide a base to begin making proclamation to Gentiles, as Paul’s interpretation of Isaiah here demands (13:43–47).

659. Ramsay, *Cities of Paul*, 256–57 (citing a Phrygian epitaph, *CIJ* 2:33, §772, concerning one Δεββωρα, a LXX name, e.g., Gen 35:8; Judg 4:4–14).

660. The evidence’s wording probably suggests a more distant Antioch, e.g., in Caria or Syria (Levinskaya, *Diaspora Setting*, 150); other scholars think that Pisidian Antioch is more probable but allow for the possibility of a different Antioch (Stern, “Diaspora,” 149n8; cf. Levick, *Roman Colonies*, 128n1, cited by Stern).

661. For Jews in Asia’s interior, see Mitchell, *Anatolia*, 2:31–36 (for Phrygia, 33–36); in South Galatia, Breytenbach, *Provinz*, 167–68; in Asia Minor generally, Barclay, *Jews in Diaspora*, 259–81.

662. Koester, *Introduction*, 1:223. According to the highest estimates, Jewish people composed a fifth of the eastern Mediterranean population (Baron, *History of Jews*, 1:171; this is, however, probably too high, as noted by Stambaugh and Balch, *Environment*, 47).

663. *MAMA* 6.177, 316, 323 (perhaps), 325, 334, 335, 335a, 347; possibly also 339. For evidence from Apamea, see Mitchell, *Anatolia*, 2:33, 35; for Acmonia, 2:35.

664. Acmonia is north-northwest of Apamea; Apamea is in western Phrygia, more than 150 km. from Iconium and fewer than 100 km. southwest of Pisidian Antioch; Aphrodisias is more than 100 km. farther southwest than Apamea (though ca. 150 km. east-southeast of Ephesus; see Mitchell, *Anatolia*, map 7, after 1:119). Thus Jewish populations seem more strongly attested to the west.

665. Nevertheless, because Antiochus III settled especially farmers on the land, many Jews in Phrygia and Galatia, like the Gentiles even in the towns, worked the land (see Mitchell, *Anatolia*, 2:35).

666. If the synagogue did not control a prime piece of real estate, it might have enjoyed more spacious accommodations than would be available in, e.g., Rome, where property was expensive; but since the synagogue has not yet been identified, this is at best a guess.

667. See the comments of Seager, “Synagogue.” For a very different picture of Asian Judaism, see Trebilco, “Communities,” 564. Some now date the Sardis synagogue as late as the Byzantine period (Magness, “Synagogue”).

668. Sanders, *Judaism*, 200. For synagogues in Asia Minor, see Goodenough, *Symbols*, 2:77–83.

669. Luke’s expression, lit. “the day of the Sabbaths,” is distinctive to him in the NT (Luke 4:16; Acts 16:13; cf. *Diogn.* 4.3), but it clearly recalls the LXX (Exod 20:8; 35:3; Lev 24:8; Num 15:32–33; 28:9; Deut 5:12, 15; Jer 17:21–22, 24, 27; Ezek 46:1, 4, 12; Jdt 10:2; 1 Macc 2:32, 34, 41; 9:34, 43; 2 Macc 15:3).

Luke says that they “sat” in the synagogue. People of status or elders might sit on benches around the synagogue walls;⁶⁷⁰ some synagogues also had additional tiers of benches.⁶⁷¹ At least in less prosperous synagogues, people of less status might sit on floors (cf. Jas 2:3). Those who would teach could be invited to a seat of special honor, such as the special seat in a synagogue that many scholars call “Moses’s seat” (Matt 23:2),⁶⁷² or another seat of prominence (23:6). (Not only in Jewish settings⁶⁷³ but throughout antiquity,⁶⁷⁴ the “best seats” were generally determined by rank, even if sequence of arrival could exert some advantage [cf. Luke 14:8–10].) If various later sources are a guide, those who would read, translate, or teach, along with the synagogue leader (and perhaps others of very high status), might be located on a dais along with the Scripture scrolls.⁶⁷⁵ At least in Judea and Galilee, sages normally sat to teach,⁶⁷⁶ but there were exceptions,⁶⁷⁷ and the Diaspora practice was to stand, which Paul will do in Acts 13:16 (see further comment there).

III. SYNAGOGUE SETTING (13:15)

The immediate setting in the synagogue service offers several points at which exploration of the ancient context can illumine our understanding of the text. Who were synagogue officials? Why would they invite Paul and Barnabas? How were Scripture readings conducted?

(1) *Why Invite Paul and Barnabas? (13:15)*

The text does not indicate how the officials recognized Paul and Barnabas as potential speakers. Several factors are possible. First, in a town with a Jewish community of limited size, the arrival of two Jewish men at the synagogue from out of town would be recognized, which might have prompted inquiry into their profession or background.

670. E.g., Le Cornu, *Acts*, 718 (citing *y. Meg.* 3.1.73d). The first-century Palestinian synagogues have seating on benches around all the walls, perhaps suggesting that those who spoke did so from the room’s center (Sanders, *Figure*, 100–101).

671. Note “two tiers of benches along the walls” at the Herodium synagogue (Evans, *World*, 51) and Qiryat Sefer (57) and four tiers at Masada (55; more general mention of benches for Magdala, 53, and Modi’in, 57).

672. Suggested by Le Cornu, *Acts*, 719, as a possibility here. Many scholars link “Moses’s seat” in Matt 23:2 with a seat that has been found in synagogues (Manson, *Sayings*, 228; Filson, *Matthew*, 243; Yamauchi, *Stones*, 102; Avi-Yonah, “Archaeological Sources,” 53; Ferguson, *Backgrounds*, 400; Newport, “Seat of Moses”; Rahmani, “Synagogue Chairs”; Young, *Jewish Theologian*, 185–86; Evans, *World*, 60; for literacy sources, cf. esp. *Pesiq. Rab Kah.* 1:7; *Song Rab.* 1:3, though these references are more easily construed differently). Although these seats are well attested, the label “Moses’s seat” may be applied to them later on the basis of a broader figurative usage (such as being Moses’s successors). On Matt 23:2, I am thus more apt to follow Carson, “Matthew,” 472, who lists many examples showing that the formula “to sit on X’s seat” frequently indicates someone succeeding X.

673. In schools, see, e.g., *’Abot R. Nat.* 6 A; in assemblies (often by seniority), Gen 43:33; Philo *Contempl.* 66–69; *m. Sanh.* 4:4 (the Sanhedrin); *t. Sanh.* 8:1; *y. Ta’an.* 4:2, §12; *b. Hor.* 13b, bar.; at banquets, Luke 14:7–11; *y. Ta’an.* 4:2, §§9, 12; *Ter.* 8:7; at other events, 1QS II, 19–23; 1QSa II, 11–17; *y. Ketub.* 12:3, §6; *Roš Haš.* 2:6, §9.

674. In schools, e.g., Diog. Laert. 7.1.22 (normally); assemblies, Val. Max. 4.5.ext. 2 (by age); at banquets, Plut. *Table* 1.2.3, *Mor.* 616E; Smith, *Symposium*, 33; at other events, Tac. *Ann.* 3.31; Apul. *Metam.* 10.7. Those not accorded seating commensurate with their rank could be gravely offended (Diog. Laert. 7.1.22; cf. Smith, *Symposium*, 33).

675. See *t. Meg.* 3[4]:21; Le Cornu, *Acts*, 688–89 (though acknowledging that we lack archaeological support for such a dais; if made of wood, it might well be less apt to survive); Lachs, *Commentary*, 367. Excavated synagogues have such platforms (Ferguson, *Backgrounds*, 400), but these are later.

676. Palestinian Jewish teachers customarily stood to read (Luke 4:16; Dalman, *Jesus-Jeshua*, 45) and sat to teach (Luke 4:20; Matt 5:1; *Pesiq. Rab Kah.* 18:5; cf. further Dalman, *Jesus-Jeshua*, 45–46; Safrai, “Education,” 968; Davies, *Setting*, 423; *b. Meg.* 21a, bar.).

677. See the differences in practice, attributed to the first-century schools of Shammai and Hillel, in *t. Ber.* 1:3; *Sipre Deut.* 34.5.3. At least in later times, only ordained rabbis sat to teach whereas disciples stood (*’Abot R. Nat.* 6 A; *Gen. Rab.* 98:11).

Paul's training in Jerusalem (22:3) would have made him an exceptional candidate for a guest speaker in this relatively out-of-the-way Jewish community. Second, some scholars suggest that teachers, both Jewish and Gentile, wore special apparel that indicated their status,⁶⁷⁸ though it is not clear that Paul and Barnabas wore such apparel.⁶⁷⁹

Third, there is no suggestion in this verse that Paul and Barnabas reached town on the Sabbath (when, presumably, they would be resting rather than traveling, especially if they wished to gain a hearing in local synagogues). If they have already arrived, they probably would have already made contact with the synagogue community and would be housed with a fellow Jew rather than in an inn (cf. 17:5; see comment on Acts 16:15). Their entrance to the synagogue appears to be on the first Sabbath after their arrival, and by now they have probably begun making contacts and are known to be from the "Holy Land" and well versed in the Torah. Fourth, Paul and Barnabas might have volunteered their availability beforehand; Luke is not, after all, providing a blow-by-blow account.

Finally, Barnabas was a Levite (4:36), and if this was known he might have been invited, choosing to defer to Paul as a better speaker (14:12).⁶⁸⁰ Later tradition, probably reflecting more general preferences, specified that those calling forward readers should give first preference to priests and second to Levites.⁶⁸¹ Even aside from Barnabas's being a Levite (perhaps along with some regular members), such practices may illustrate the tendency to defer to those expected to know the law best.⁶⁸²

Although Philo presents more-formal services in his circle (*Hypoth.* 7.13), in many congregations (certainly in smaller ones), it seems likely that "anyone with something important to say would be allowed to speak."⁶⁸³ The synagogue leaders must have had the freedom to invite whomever they thought best to expound, with preference for sages, educated persons, or at least someone respectable.⁶⁸⁴ It would also be natural to recognize visitors from Judea who could both read the Hebrew text and provide encouragement from the Holy Land, especially if the synagogue leaders recognized that they were sages.

(2) Synagogue Leaders

"Synagogue head" (ἀρχισυνάγωγος) is a widely attested title, frequent in the Diaspora.⁶⁸⁵ At least in a later period, Roman officials treated these leaders as Jewish

678. E.g., Le Cornu, *Acts*, 717 (citing *Der. Er. Zut.* 5:3; *b. Šabb.* 114a); *y. Bik.* 3:3, §8 (signifying high office); cf. honorable apparel in *b. Šabb.* 114a; the possibility that Essenes wore distinctive clothing even in public (Baumgarten, "Essene"). Among Gentiles (philosophers' rough garb or, among some Romans, a Greek pallium), see, e.g., *Mus. Ruf.* 16, p. 106.13; *Dio Chrys. Or.* 70.8; *Lucian Tim.* 56; *Fronto Eloq.* 1.12; *Just. Dial.* 1; *Tert. Pall.* 6; *Eunapius Lives* 471; Liefeld, "Preacher," 168–70; *Croom, Clothing*, 51; contrast the apparel of Cynics. The evidence for Jewish scribes (cf. *b. B. Bat.* 98a; *Matt* 23:5; Liefeld, "Preacher," 180; *Lane, Mark*, 439–40; *Goodman, State*, 77) is weaker, especially in the Diaspora, where we have little information.

679. Presumably, they wore their tzitzit, or fringes (*Num* 15:38–40; *Deut* 22:12), openly, at least for synagogue worship, but this would merely identify them as Jewish (cf. *Jesus* in *Matt* 9:20; 14:36). It is possible that Shammaites may have prescribed longer fringes than Hillelites (*France, Matthew*, 325) and that the tallit of a scholar may have been particularly long (*b. B. Bat.* 57b; *Lachs, Commentary*, 367). The tallit was not yet a "prayer shawl" in this period (*Le Cornu, Acts*, 562).

680. Cf. *Sanders, Jesus to Mishnah*, 79, on the preference for priests as readers in *Neh* 8:4–8 and for synagogue leaders in the Theodotus inscription (*CIJ* 2:332–35, §1404) and *Philo Hypoth.* 7.13. Cf. also (for a priest) *CIJ* 2:76–77, §828a.

681. *Moore, Judaism*, 1:302 (citing *m. Git.* 5:8; cf. scholars in *m. Hor.* 3:8, where learning takes precedence over social rank). On priests teaching, see, e.g., *Deut* 24:8; *Ezek* 44:23; *Mal* 2:4–9; in a negative case, *Mic* 3:11.

682. Later rabbis insisted that a town's true guardians were not their elite citizens but their scribes and teachers (*y. Hag.* 1:7, §2). Although I do not mention it above, there is also the possibility, given the local prominence of Sergii Paullii and the interest of Cyprus's governor in Judaism, that a letter of recommendation from Sergius Paulus would have introduced them favorably to the synagogue leaders.

683. *Sanders, Jesus to Mishnah*, 80–81; cf. *idem, Figure*, 101.

684. *Safrai*, "Synagogue," 932.

685. See, e.g., *MAMA* 4.90; *CIJ* 1:187–88, §265; 1:297–98, §383; 1:369, §504; 1:409, §553; 1:428, §584; 1:433, §596; 1:457, §638; 1:492, §681; 1:522, §722; 2:10, §741; 2:12, §744; 2:27–28, §766; 2:55–56, §§803–4;

communities' "responsible representatives."⁶⁸⁶ Traditionally this office has been identified with a similarly constructed Hebrew phrase in rabbinic texts, the *rosh ha-kneset* (ראש הכנסת), head of an assembly, typically the highest office in the synagogue.⁶⁸⁷ More recently some scholars have offered significant evidence in support of the view that most who were honored as synagogue benefactors in the Diaspora were Gentile patrons.⁶⁸⁸ Rajak argues forcefully that the title ἀρχισυνάγωγος⁶⁸⁹ involved especially socioeconomic patronage.⁶⁹⁰

Clearly, however, the holders were not always Gentile; a Jewish woman in Smyrna, for example, held the office.⁶⁹¹ Moreover, Theodotus's grandfather in Jerusalem held this position, perhaps in the first century B.C.E.⁶⁹² It is quite likely that most were benefactors, but the Jewish benefactors were probably also respected leaders in the Jewish community and would be accorded some influence in the synagogue. It is likely that not everyone employed the term, in the many locations where it was used, in the same manner.⁶⁹³ Official duties may have depended on whether the office was honorary or performed a substantial role in a synagogue (though honorary synagogue rulers may have participated in the service as part of their role, this is much less likely for Gentile benefactors). The ἀρχων of a synagogue⁶⁹⁴ was probably generally equivalent (Luke 8:41, 49).⁶⁹⁵ (Another

2:175, §991 (Sepphoris, but fourth century); 2:332–35, §1404; 2:339, §1414; discussion, 1:xcvii–xcix; Leon, *Jews of Rome*, 171–72; Chilton and Yamauchi, "Synagogues," 1146. For women filling this role in some (a minority of) locations, see Brooten, *Women Leaders*, 5–33.

686. Leon, *Jews of Rome*, 172, citing *Cod. theod.* 16.8.4, 13, 14.

687. Applebaum, "Organization," 492; cf. Levinskaya, *Diaspora Setting*, 186–87 (noting the debate); Goodman, *State*, 119, 123; Leon, *Jews of Rome*, 171; on the rabbinic office, see, e.g., Ferguson, *Backgrounds*, 454. One handles the Torah in *m. Yoma* 7:1 and *Sotah* 7:7 (cited in Larkin, *Acts*, 197), but this is clearly a later construct (involving the high priest). The rabbis may reflect usage especially in Palestine and the East (perhaps more relevant for the Gospels). Because the terminology is too close for coincidence, where the function differs, both offices probably overlap and sprang from the same roots (the honorary use, especially as applied to Gentile benefactors, presumably being derivative and later).

688. Witherington, *Acts*, 204, following Rajak, "Synagogue within City." On donor inscriptions honoring patrons, see, e.g., White, *Origins of Architecture*, 1:77–85. One freedman renovated an Isis temple in Pompeii in the name of his six-year-old son, who unlike him was eligible to receive decurion status for this benefaction (1:30–31).

689. The term appears often enough in Asia; e.g., *MAMA* 4.90.

690. Witherington, *Acts*, 204–5, and Winter, *Left Corinth*, 204–5 (both following esp. Rajak, "Community and Boundaries"); cf. also Goodman, *State*, 119, 123; Rajak and Noy, "Office and Status" (see further also for the influence of Greco-Roman ideals on the office).

691. Goodenough, *Symbols*, 80. Stern, "Diaspora," 150, applies it to local synagogue leaders in a first- or second-century inscription from Synnada in Phrygia, relatively close to Luke's area.

692. Meyers and Strange, *Archaeology*, 83; Kloppenborg Verbin, "Dating Theodotus."

693. See Trebilco and Evans, "Diaspora Judaism," 287 (noting even the change in Alexandrian leadership from *Let. Aris.* 310 to *Jos. Ant.* 14.117 to *Philo Flacc.* 74, 117). Some Jewish-Christian congregations in Palestine also used this title (*Epiph. Her.* 30.18, cited in Bruce, *Acts*¹, 261).

694. See, e.g., *CIJ* 1:6, §1; 1:8, §4; 1:15, §13; 1:20, §22 (perhaps); 1:23, §26; 1:49, §78; 1:59, §85; 1:62, §88; 1:67, §95; 1:77, §110; 1:82, §118; 1:83, §120; 1:88, §125 (probably); 1:99, §140; 1:103, §145; 1:104, §146; 1:154, §216; 1:176, §247; 1:187–88, §265; 1:191–92, §271; 1:195, §277 (age nineteen); 1:200, §284 (age twelve, possibly non-Jewish); 1:230, §291; 1:240, §304; 1:249, §317; 1:255, §324; 1:256, §325; 1:261, §332 (but mostly reconstructed); 1:266, §338; 1:272, §347; 1:295, §380; 1:310, §402 (less than three years old); 1:332, §442; 1:343, §465 (ἐξάρχων; for worship leading, cf. Williams, "Exarchon"); 1:346, §470; 1:355, §483 (μελλάρχων); 1:367–68, §503; 1:369, §505 (age nineteen); 1:399, §538; 1:399, §539 (προάρχων); 1:476, §663; 2:76–77, §828a; in Europe, see further 1:lxxxvii–lxxxix. In Rome, the title was sometimes conferred on children (Leon, *Jews of Rome*, 179), i.e., as an honorary or hereditary title. That it could be held "twice" (*CIJ* 1:15, §13; 1:205, §289; 1:248, §316; 1:265, §337; 1:298–99, §384; 1:303, §391; 1:369, §505) or "three times" (1:360, §494) suggests that in at least some locations, it was held for a particular duration of time. The most common Jewish office title in Rome (Leon, *Jews of Rome*, 173), it was borrowed by Jews from Greek civic usage (Ferguson, *Backgrounds*, 454).

695. Cf. ἀρχων "of [or from] the synagogue," e.g., *CIJ* 1:269, §343; 1:298–99, §384; 1:303, §390; but apparently it was sometimes added to the archisynagogue title (e.g., 1:187–88, §265; 1:409).

synagogue title, γεροσιάρχης,⁶⁹⁶ may have sometimes been equivalent and would have been especially applicable to elders.)

Why is the plural used? Though many synagogues may have had only one person with this title (Luke 13:14), others had several (Mark 5:22; cf. Acts 18:8, 17); this may have been especially the case where a synagogue community enjoyed multiple benefactors and employed the title in an honorary way. There is also the possibility of several synagogues meeting for joint services⁶⁹⁷ (though the service mentioned in this passage appears to be a regular service, not one arranged simply to hear the visiting teachers).

Although such leaders would not need to be known as sages themselves, they would have to be knowledgeable enough to be able to evaluate “the competence of those who were invited to read the Scriptures, translate, or address the people.”⁶⁹⁸ The synagogue official might invite a member of the congregation to explain the text, but an available sage would undoubtedly prove welcome.⁶⁹⁹ Officials might well be delighted to invite travelers from the Holy Land known as teachers, but when the congregation rejected their message (Acts 13:45), the officials might well have been embarrassed by their teaching. Although Paul and Barnabas had the appropriate credentials and no one could know their unusual views in advance, the leaders might still feel personally dishonored in the situation.

On the address, “Men” (“Ἄνδρες; also in 13:16), see comment on Acts 2:14; on the frequently ethnic function of “brothers,” see comment on Acts 9:17. Most commentators suggest that a “word of exhortation” (λόγος παρακλήσεως) is an exposition of the Scripture that has just been read⁷⁰⁰ (often citing Heb 13:22, the expression’s other NT appearance, which does not mean this;⁷⁰¹ 1 Tim 4:13 is a more likely parallel to the concept).⁷⁰² Such a phrase could apply to a prophetic message of consolation (2 Bar. 81:1, referring to the message of consolation that follows in 2 Bar. 81). The phrase here probably indicates simply “encouraging” or “hortatory words” (as in the LXX of 1 Macc 10:24; 2 Macc 15:11). The reader knows in advance what basic message the invited guests will bring (cf. Acts 9:20) and that true “comfort” (παράκλησις) comes from the Holy Spirit (9:31), right teaching (15:31), and the promised hope (Luke 2:25) and so will not be surprised that the honored visitors’ “message of exhortation” is a “message of salvation” (Acts 13:26), the message of God and the Lord (13:44, 46, 48–49).⁷⁰³

(3) Scripture Readings

Some scholars argue for the lack of concrete evidence for Scripture readings in synagogue services in the first century,⁷⁰⁴ but given our fragmentary evidence from

696. *CIJ* 1:13, §9 (age sixty-five); 1:67, §95; 1:75, §106; 1:83, §119; 1:105, §147; 1:133, §189 (perhaps); 1:238, §301; 1:276, §353; 1:286, §368 (54); 1:312, §405; 1:313, §408 (probably); 1:323, §425 (probably); 1:374, §511; 1:393, §533; 1:413, §561; 1:434, §600. The title was significant enough to go back three generations to record (1:440–41, §613). Cf. *ιερευσάρχων*, 1:369, §504.

697. Witherington, *Acts*, 406 (also noting that husbands and wives could share the title).

698. Le Cornu, *Acts*, 717.

699. *Ibid.*, 692.

700. E.g., Johnson, *Acts*, 230; cf. Reicke, *Era*, 123.

701. Some interpret Heb 13:22 in light of Acts 13:15 and hence as a sermon on a text (e.g., Lane, *Hebrews*, 568; Goppelt, *Theology*, 2:240); despite the pervasive use of Ps 110, however, Hebrews does not follow this precise form.

702. Cf. Justin 1 *Apol.* 67; in synagogues, cf. sources in Sanders, *Jesus to Mishnah*, 78, 81 (Philo *Hypoth.* 7.13; *Good Person* 81; Jos. *Ag. Ap.* 2.175); Ferguson, *Backgrounds*, 461; Aune, *Environment*, 202.

703. Although Luke employs λόγος about sixty-five times in Acts alone, genitive nouns of content (or nouns other than “God” or “the Lord”) rarely follow it (exceptions include “message of his grace” in Acts 14:3; 20:32), and so the connection between “encouragement” and “salvation” may be noteworthy (compare Luke 2:25 with 2:38). On Luke’s use of the LXX, see comments in our introduction to Acts 7 and in the commentary introduction, ch. 14; for Luke’s use of the LXX here, see especially Sterling, “Understanding,” 115–18.

704. Cf. Aune, *Environment*, 27.

this period, an argument from silence against such readings would be completely unwarranted even if the silence were as total as some claim.⁷⁰⁵ Many synagogues must have also expounded Torah readings even before 70 C.E.; Luke is unlikely to have inadvertently invented a custom that coincidentally became dominant over a wide geographic range later (Luke 4:16–20).⁷⁰⁶

Moreover, other pre-70 sources also clearly *do* indicate such readings.⁷⁰⁷ The Theodotus inscription attests reading of Scripture as an important function of a synagogue in Second Temple Jerusalem.⁷⁰⁸ Philo knew not only of meetings on the Sabbath⁷⁰⁹ but of Scripture reading and, in some of his writings, (explicitly) exposition by someone more learned.⁷¹⁰ Josephus (*Ag. Ap.* 2.175) thought that Moses prescribed weekly meetings to hear the Torah read and to learn it precisely (the latter practice presumably suggesting either teaching or discussion); he claims that Asian Jews in the time of Herod the Great already believed that they were obligated to learn their laws on the Sabbath (*Jos. Ant.* 16.43). Beginning in the next century, early church fathers also attest the synagogue practice,⁷¹¹ just as Luke does in the first century. Reading followed by exposition may fit one form of school exercises developed in antiquity;⁷¹² apparently, Jewish people had developed a technique similar to this independently, or the pattern was already widely known from an early period (Neh 8:7–8).

Certainly, synagogues often read the law on Sabbaths (Acts 13:27; 15:21). Though poorer synagogues meeting in homes perhaps could not afford them, the norm seems to have been that even Diaspora synagogues had Torah scrolls (*Jos. Ant.*

705. Some Jewish gatherings may have omitted Scripture readings if they could not yet afford scrolls (in *t. B. Meši'a* 11:23, people of a town would fund construction of a synagogue and purchase of Torah and scrolls of the Prophets), and we should not think of the later schedule of readings. But it is impossible to believe that later practice simply emulated a fiction widely reported in our first-century sources. First-century practice probably emulated still earlier tradition (Neh 8:5–8, 18; 9:3).

706. In the early second century C.E., Christians maintained a heavy emphasis on Scripture reading (to a prisoner in Lucian *Peregr.* 12); it was standard practice in the churches by the middle of the century (Justin *I Apol.* 67; later, Murat. Canon 73–80) and probably had simply persisted from the beginning in all early Christian assemblies with Scripture available (cf. 1 Tim 4:13). Naturally Paul expected his letters to be read to the gathered assemblies (1 Thess 5:27; Col 4:16), as did John with his apocalypse (Rev 1:3; 22:8). For the compatibility of Luke's portrayal with other information known about first-century synagogues, see, e.g., Oster, "Rejoinder to Kee."

707. Oesterley, *Liturgy*, 38–40; Levine, "Synagogue," 15–17; Sanders, *Jesus to Mishnah*, 78–81; Aune, *Environment*, 202; Le Cornu, *Acts*, 692; Dunn, "Synagogue," 219; Graves, "Reading"; by the late first century, cf. the tradition in *m. Ber.* 1:2; much later, Shinan, "Sermons," esp. 107. Though Luke may schematize his reports, items such as a synagogue attendant's title (ὑπηρέτης, Luke 4:20) are no mere guesses, since independently attested elsewhere (Riesner, "Synagogues in Jerusalem," 202; see comment on Acts 13:5) even if not universally used. Formal, permanent Torah arks did not survive from before the third century (for some suggested reasons, see, e.g., Hoffman, "Torah Service"); but Hachlili, "Torah Shrine," argues that Torah shrines were prominent after 70 C.E. The scrolls may have been kept in the small room found in many synagogues (Le Cornu, *Acts*, 689).

708. *CIJ* 2:332–35, §1404.

709. In the Diaspora; Philo *Embassy* 156; *Good Person* 81. In a later time, Scripture was read in some places on Mondays and Thursdays as well (Safrai, "Synagogue," 919; for this later practice, see further 927–33), but in this period, regular assemblies were primarily for the Sabbath and, for those who had not made pilgrimage, festivals (idem, "Education," 966–67).

710. Philo *Good Person* 81–82, esp. 82; *Spec. Laws* 2.62; *Mos.* 2.215–16; *Dreams* 2.127; cf. *Creation* 128. Possibly also in the Qumran scrolls (cf. Tigchelaar, "Sabbath Halakha," on 4Q421, 4Q264a), but this depends on a reconstructed reading.

711. Cohen, "Evidence on Synagogue," 164–65, citing esp. Justin *Dial.* 72.3; Justin *Exhort.* 13 (PG 6:268); Hippol. *Ref.* 9.12.8 (Wendland, 247).

712. For the pedagogic technique, cf. perhaps Epict. *Diatr.* 1.10.8 (in light of LCL, 1:77n1); reading and then explaining a law (Demosth. *Aristocr.* 28–36); paraphrase and then exposition (Townsend, "Education," 146); philosophic lecture followed by questions and answers in philosophic schools (Watson, "Education," 311). Others might also lecture on relevant matters at other cult associations (Smith, *Symposium*, 121–22).

16.164),⁷¹³ and it is difficult to imagine that they kept such expensive works only for decoration.⁷¹⁴ Perhaps it was employed for individual study during the week, but optimum use of the scroll would include readers reading it to the assemblies (some of whose members probably could not read). Later rabbis expected that the Jewish residents of a town were responsible for deciding to buy scrolls of the law and the prophets (*t. B. Meši'a* 11:23). Some scholars, while wrongly playing down a role for public prayer in ancient synagogues (see comment on Acts 1:14), provide abundant evidence that pre-70 synagogues were used for reading, study, and teaching of Torah (e.g., *Jos. Ag. Ap.* 2.175; Philo *Spec. Laws* 2.62).⁷¹⁵ Given most people's lack of personal ownership of scrolls and the generally low level of reading literacy in the wider culture, how else would Jewish men have maintained biblical literacy even if they had been instructed to recite as children?

The language in which the Scriptures were read is a more difficult question. Some rabbis apparently claimed that even Hellenist synagogues included a reading in Hebrew,⁷¹⁶ but this is questionable for Diaspora synagogues that may have lacked any members sufficiently proficient in Hebrew to read it well⁷¹⁷ and also for synagogues that lacked resources to procure both Greek and Hebrew scrolls (especially if the latter would need to be procured in Jerusalem and brought back by pilgrims).⁷¹⁸ If read in Hebrew, Scripture would surely be translated into Greek (or Aramaic, where that was the dominant language). Even in Palestine, translations probably usually accompanied the readings.⁷¹⁹ Expositions probably focused not simply on exegetical details but on practical ethical questions relevant to the audience.⁷²⁰

Readings from the prophets may not have been mandatory in this period, but at least some locations must have read from them, since many people knew the prophets and some synagogues owned prophet scrolls (which would not make sense if they did not use them).⁷²¹ Luke assumes readings from them to be at least a regular occurrence in Jerusalem (Acts 13:27), using language similar to his accurate assumption that Moses was read each Sabbath in synagogues (15:21).

None of this, of course, settles the question as to whether there was a regular lectionary reading assigned to each Sabbath this early. We cannot be certain whether, in this period, lections sometimes dictated Sabbath Torah readings or, perhaps more frequently,

713. Earlier in Palestine, scrolls are mentioned in towns of Judah in 1 Macc 1:55–56, although some may have belonged to individuals (1:57; cf. *Jos. Ant.* 12.256), perhaps individuals of substance. Scrolls did appear in villages in the first century (*Jos. War* 2.229); in the prominent city of Tiberias, cf. *Life* 134. The books were precious, so that Jews leaving Caesarea carried them (*War* 2.291–92).

714. For that matter, ornamentation in the earliest Palestinian synagogues as well as the synagogue on Delos lacked artwork, *menoroth*, other Jewish symbols, or, it is thought, even a shrine for storing the Torah scroll (Stambaugh and Balch, *Environment*, 85).

715. See Falk, "Prayer Literature," 277; arguing for Scripture exposition, see also Safrai, "Education," 967. For later rabbinic discussion of minimum lengths for Torah readings, see *y. Ta'an.* 4:3, §1.

716. Dalman, *Jesus-Jeshua*, 40, citing *t. Meg.* 4:13. Le Cornu, *Acts*, 690, cites *m. Meg.* 2:1; 4:4; *t. Meg.* 4[3]:20ff. Hebrew scrolls would unwind from right to left (Ferguson, *Backgrounds*, 92).

717. Readings in the LXX were undoubtedly common (Le Cornu, *Acts*, 691, notes *m. Meg.* 1:8; 2:1; *Yad.* 4:5 as arguing against this practice; *t. Meg.* 4[3]:13).

718. Despite six Hebrew fragments, the overwhelming majority of the more than eighty inscriptions from the Sardis synagogue are in Greek (Kroll, "Greek Inscriptions"), although, admittedly, these are mostly donor inscriptions, not Torah.

719. Safrai, "Education," 966–67.

720. See Goodman, *State*, 7–8 (comparing philosophers), 223n175 (comparing the frequently ethical discussions of the *Sipre* to more strictly legal interests in Mishnah and Tosefta).

721. Riesner, "Synagogues in Jerusalem," 202–3, cites Luke 4:17 and also "the Ezekiel scroll buried in the Masada synagogue." The prophets' works were not as prominent as the Law (Philo, e.g., focuses almost entirely on the Pentateuch). Longer scrolls, e.g., Isaiah, would have two rollers (Ferguson, *Backgrounds*, 92). In contrast to Acts 13:15–16, the prophetic lesson's reader sometimes also preached it (Abrahams, *Studies* [1], 4).

readers chose their own texts.⁷²² On the whole, it seems improbable that we should assume a fixed system of lectionary readings applicable even to the interior of Asia Minor at this early date.⁷²³ If there are questions surrounding the antiquity of scheduled readings from the Torah, assigned haftarah portions are even less likely for this period.⁷²⁴

Public readers were used in other settings—for example, in Gentile courts of law⁷²⁵—and so Diaspora synagogues probably would not have objected to particularly competent readers dominating the readings when necessary. Most synagogues, however, would have contained a number of literate readers (urban areas and Jews having higher concentrations of literacy), at least for readings in Greek. The *chazan* gave the scroll to a reader, who would unroll and then read it after the blessing.⁷²⁶

The expression “law [or “Moses”] and prophets” (13:15) appears frequently in Luke-Acts (Luke 16:16, 29, 31; 24:27; Acts 24:14; 26:22; 28:23), much more than does a tripartite expression as in Luke 24:44. “Law” (or “Moses”) “and the prophets” is also more common in early Jewish sources, especially in those preceding Luke’s day.⁷²⁷ Although some scholars have argued for a tripartite expression in 4QMMT, this has been questioned,⁷²⁸ and most examples of this expression are later (especially among the rabbis),⁷²⁹ though the rabbis may be emulating an earlier sage.⁷³⁰

b. Proem and Biblical narratio (13:16–22)

Like Stephen, Paul begins with a sweep of biblical history; Luke’s Paul wishes it to be clear that his message is grounded not solely in isolated proof texts but in the pattern of God’s working throughout biblical history, particularly in the key moments revealing the development of his plan.

I. INTRODUCTION

Here we must survey the nature of synagogue homilies, literary connections with other Lukan speeches, distinctively Pauline characteristics, and proposals regarding the speech’s structure.

(1) Synagogue Homilies

There is little evidence to suggest that synagogues had regular preachers or teachers; the Scripture exposition does not seem to have been a prescribed part of the service

722. Cf. Safrai, “Synagogue,” 927; Morris, *Lectionaries* (passim, esp. 15–16; cf. 25, on the second-century Justin 1 *Apol.* 67); Morris, “Lectionaries”; Patte, *Hermeneutic*, 37. Cf. the practice of bibliomancy, randomly opening sacred texts (pagan, Jewish, or Christian) for a relevant message (van der Horst, “Bibliomancy,” citing 1 Macc 3:48; 2 Macc 8:23; though he thinks [167] that Jesus in Luke 4:17 followed the lectionary). For one survey of the synagogue service’s development (noting its early simplicity), see Langer, “Study.”

723. Safrai, “Synagogue,” 927. Even without a regular cycle of readings, some later principles about public readings likely follow earlier practice (cf. Perrot, “Lecture de la Bible”).

724. Even after the triennial cycle for Torah was established, readers had more freedom in the Prophets (Moore, *Judaism*, 1:296–301). Cohen, “Earliest Evidence,” notes that more than three-quarters of Philo’s rare Minor Prophets quotations coincide with readings from a particular part of the haftarah cycle, suggesting that it predates 70 C.E.; while both reflect a common tradition of usage, this argument may merit further investigation. Haftarah readings normally corresponded significantly to the Torah readings (Goswell, “Hermeneutics”).

725. Isaeus *Pyrr.* 37–38; Demosth. *Aristocr.* 28–36; Cic. *Sest.* 4.11.

726. See Le Cornu, *Acts*, 691. On the *chazan*, see further Ferguson, *Backgrounds*, 462; comment on ὑπηρέτην in Acts 13:5.

727. See 2 Macc 15:9; 4 Macc 18:10–18; Matt 5:17; 7:12; Q (Matt 11:13 = Luke 16:16); Rom 3:21; Davies and Allison, *Matthew*, 1:484, cite also *t. B. Meši’a* 11:23.

728. Ulrich, “Non-attestation”; Campbell, “4QMMT^d”; Lim, “Reference.”

729. E.g., ‘*Abot R. Nat.* 14 A; *b. ‘Abod. Zar.* 19b; *B. Bat.* 13b, bar.; *B. Qam.* 92b; *Mak.* 10b; *Sanh.* 90b (attributed to Gamaliel II); 106a; *y. Meg.* 1:5, §3; *Ned.* 3:9, §3; *Šeqal.* 3:2; *Pesiq. Rab Kah.* 12:13; *Gen. Rab.* 76:5.

730. Sirach’s prologue, though more often speaking of “law and prophets,” does include the phrase “law, prophets, and other writings [τὰ λοιπὰ τῶν βιβλίων].” Although Philo focuses primarily on the Pentateuch himself, he notes also the prophets and “hymns” as objects of the Therapeutae’s sacred study (*Contempl.* 25).

per se. The expositions were usually haggadic, focusing on moral exhortation and comfort.⁷³¹ There can be little doubt, however, that Diaspora synagogues allowed educated members to explain the Scripture readings to hearers, as is clear in Philo.⁷³²

Because only Jews and Christians combined worship with speaking, they alone among religious groups practiced “rhetorical activity” in a corporate religious setting.⁷³³ Scholars have pointed to parallels between Paul’s synagogue homily and those characteristic of synagogue homilies in general.⁷³⁴ By some estimates, some two thousand examples remain, though most of these are in rabbinic literature from the Amoraic period.⁷³⁵ Although reconstructing first-century models based on subsequent sources may be hazardous,⁷³⁶ it does seem promising that this speech matches the examples we have, which cannot reasonably be assumed to be based on Acts 13 or other NT examples.

Further, the basic form of the later homily is likely based on Greek rhetorical forms, which more prominent educated Diaspora Jews, possibly even earlier than their Judean counterparts, would have adapted for use in public Scripture exposition.⁷³⁷ Some scholars have compared Acts 13 to the pattern in a variety of nonrabbinic texts, both Jewish and Christian (e.g., 4 Macc 16:16–22; Jos. *War* 5.362–415; 7.341–80).⁷³⁸ This is helpful so long as the contrast with Greco-Roman speeches is not overemphasized.⁷³⁹

Synagogue homilies could prove quite hellenized, reflecting the culture of those who offered them; two possibly first-century sermons in Asianic style lack allegory (contrary to what some other Diaspora Jews, e.g., Philo, may have preferred) or apocalyptic elements and include few LXX quotations (perhaps because of the translation’s “low stylistic level”). These hellenized homilies are favorable toward Gentiles, betray a high level of rhetoric, and reveal a Stoic “conceptual framework.”⁷⁴⁰ But the LXX⁷⁴¹ was well known in Asia Minor; Jewish inscriptions from Acmonia often cite it, including funerary inscriptions.⁷⁴²

As good rhetoric demanded, this speech suits local color (especially the synagogue setting, Quint. *Inst.* 3.7.24); speeches in histories could also contribute to events, as does this one.⁷⁴³ The speech focuses on the fulfillment of promises concerning David through Jesus (Acts 13:23, 32; cf. 7:5, 17; 26:6);⁷⁴⁴ the promise theme has an unfulfilled eschatological component (24:15 with 26:7; 28:20), but in Luke’s theology its

731. Le Cornu, *Acts*, 692.

732. Philo *Good Person* 82; *Spec. Laws* 2.62; cf. *Mos.* 2.215–16; Jos. *Ag. Ap.* 2.175.

733. Berry and Heath, “Oratory and Declamation,” 420.

734. Bowker, “Proem and Yelammedenu Form” (with the comparison tending toward authenticity); Stegner, “Homily,” 66; Le Cornu, *Acts*, 721; for a survey of views on the rhetorical form of the passage (homily, Greco-Roman rhetoric, etc.), see Aune, *Dictionary of Rhetoric*, 219–21. It should be noted, however, that our extant rabbinic midrash was academic discourse among sages, not homiletic expositions for synagogues (Porton, “Midrash”).

735. Stegner, “Homily,” 52 (noting esp. Heinemann, “Profile”).

736. Aune, *Environment*, 202, argues that fixed sermonic patterns are later.

737. Davids, “Homily,” 515–17; for sources, cf. esp. Black, “Form of Sermon.”

738. Wills, “Form of Sermon”; followed by others, e.g., Lane, *Hebrews*, lxxii.

739. See Black, *Rhetoric of Gospel*, 119–23.

740. Siegert, “Homily,” 435–37. For examples of Judaism’s cultural adaptation to its surroundings in southern Asia Minor, see Williams, “Jews of Corycus.”

741. That is, the basic text type that is summarized today as LXX; the textual diversity of the early Greek version leads some to distinguish various recensions.

742. Trebilco, *Communities*, 58–84, esp. 60–78.

743. See Plümacher, “Missionsreden.”

744. Strauss, *Messiah*, 148–80 (not only in Jesus’s resurrection but also in his earthly life and ministry); Lövestam, *Son and Saviour*, 84; on David and messiahship in early Judaism and Luke-Acts, see further Miura, *David*. Lövestam, *Son and Saviour*, 87, connects Jesus as “Savior” (Acts 13:23) with the Davidic promise, hence the kingdom, hence forgiveness and the rest of what Paul preaches in this speech. Although fulfillment

realized eschatological component is available in the present era through the gift of the Spirit (1:4; 2:33, 39; Luke 24:49).

(2) *Literary Connections*

In many respects, Paul's inaugural speech here (as opposed to merely a summary about speeches, Acts 9:20) closely parallels Peter's inaugural evangelistic speech in 2:14–39.⁷⁴⁵ Goulder cites the same "theme, text, and exposition":⁷⁴⁶

Subject	Peter's Sermon (Acts 2)	Paul's Sermon (Acts 13)
You killed Jesus	2:22–23	13:27–28
God raised him up	2:24	13:30
David says in Ps 16	2:25–28	13:35
David remains dead	2:29	13:36
God raised up Christ from David's seed	2:30	(13:23)
Jesus did not see corruption	2:31	13:37

Such parallels deliberately underline the continuity between the two apostles.⁷⁴⁷ The parallels are not surprising, in view of the way Luke connects various characters.⁷⁴⁸ (That Paul's first and last long speeches in Acts are to Israel is also significant.)⁷⁴⁹

(3) *Pauline Characteristics*

Despite connections with other Lukan speeches, this speech contains some distinctively Pauline elements; if Luke adds these himself,⁷⁵⁰ he does so with a knowledge of Paul's typical style, which he acquired from Paul or a Pauline source.⁷⁵¹ Comparisons between Paul's speeches in Acts and the historical letters of Paul are not easily made because of both Luke's (and other ancient historians') range of acceptable literary freedoms and the different literary genres involved.⁷⁵² Paul was not writing speeches or hybrids between letters and speeches,⁷⁵³ although standard argumentative patterns

of earlier biblical promises is a Lukan theme, it is hardly foreign to Paul (Rom 1:2–3; 3:21; 16:25–26; 1 Cor 15:3–4; cf. Ware, *Synopsis*, §97, pp. 176–77).

745. Foakes-Jackson, *Acts*, 116–17, though acknowledging the distinctiveness of each. Others compare also the Scripture-laden speech of Stephen, some (e.g., Soards, *Speeches*, 81–88) arguing that negative elements escalate in the speech whereas others think this speech much less negative than Stephen's. See especially Zhang, *Paul Among Jews*, for comparison with inaugural sermons of Jesus (34–64) and Peter (65–109); for a detailed survey of previous research on Paul's speech in Acts 13, see *ibid.*, 11–31.

746. Goulder, *Type and History*, 83; cf. Stronstad, *Prophethood*, 111.

747. Zehle, *Pentecost Discourse*, 41.

748. Cf. also Jesus's inaugural speech scene in Luke 4:16–30 (Neiryneck, "Luke 4,16–30," 365–75; Longenecker, "Character," 143; Chance, *Acts*, 228). Some of these parallels are dictated by the synagogue settings (Acts 13:14; Luke 4:16), such as the welcome to speak (Acts 13:15; Luke 4:17) and reading or expounding Scripture (Acts 13:16–41; Luke 4:18–19); the note of fulfillment in each naturally fits the gospel message as a fulfillment of Scripture. Nevertheless, Luke includes these details though he was not obligated to report them. More important is the contrast between initial openness and a violent response after the affirmation of Gentiles (Acts 13:42–50; Luke 4:22–29).

749. Borgman, *Way*, 309, argues that Acts 13:16–41 and 28:25–28 provide Paul's "Two Framing Speeches to Israel."

750. Zehle, *Pentecost Discourse*, 41, contending that the Pauline conclusion does not fit the rest of the speech.

751. See discussion of *prosopopeia* in the commentary introduction, Keener, *Acts*, 1:284–85. Sabugal, "Dios cumplio," seeks to isolate genuinely Pauline, pre-Lukan tradition from Luke's redaction; although it is not impossible that Paul may have recounted the speech's essentials to Luke, this approach probably is too optimistic about ancient historiographic method and especially about the effectiveness of source criticism. See more helpfully Pillai, *Preaching*, 77–111, esp. 105–10, who shows that everything in the speech is compatible with the historical Paul; he concludes (111; also 121) that Luke "is composing" but this composition reflects genuine Pauline theology.

752. See Porter, *Paul in Acts*, 109–15 (noting that much of the rhetoric in the Acts speeches may be Luke's).

753. See *ibid.*, 102–9, though I am much more amenable to rhetorical criticism of Paul's epistles. If Dionysius of Halicarnassus critiqued literature on rhetorical grounds, people of status must have, consciously or unconsciously, done the same with letters.

would be common to both argumentative letters and argumentative speeches. Still, there are elements of Paul's missionary speeches distinct from those of other speakers in Acts, and some of these do comport particularly well with passages in Paul's letters (e.g., Rom 1:18–32).⁷⁵⁴ The approach in Paul's speeches is consonant with the complex, epistolary Paul and with the sort of character we would expect of one who accomplished what the epistles testify that he accomplished.⁷⁵⁵

Though the specifically quoted texts here are favorites of Luke's, the themes may be also Pauline. Certainly Jesus's resurrection is central to Paul's soteriology; he preached this as part of his gospel to unbelievers in accordance with apostolic tradition, and he believed that it could be defended from Scripture, apparently amply (1 Cor 15:4).⁷⁵⁶ His letters to Christian congregations do not emphasize Davidic Christology; but he believed it (Rom 1:3; 15:12),⁷⁵⁷ and it would have made sense that he sometimes used it evangelistically or in inevitable debates in synagogues. Even the piling up of quotations from Scripture (3:10–18; 10:18–21; 15:9–12), though done in a different way, appears when Paul addresses particularly Jewish audiences or issues. Paul could summarize segments of salvation history (e.g., 9:7–18).

Luke's accurate preservation of midrashic features in the speech suggests the authenticity of the basic portrayal.⁷⁵⁸ Though Luke, as a historian, would have freedom to fill in a speech with midrashic details if he knew or surmised that midrash occurred, he derived his knowledge of such midrashic exposition somewhere, and he certainly provides here at least the kind of exposition Paul was known to offer presumably especially in synagogues.⁷⁵⁹ Perhaps most in favor of the idea that the speech includes recollections of some Christian exposition prior to Luke's composition are the implicit midrashic connections in the speech that are never explored.

(4) *Proposals regarding the Speech's Structure*

Scholars have proposed a range of structures; samples of four types of them are noted here. Bligh's chiasmic type of outline is most complex and perhaps least discernible for Luke's average audience (even notwithstanding a slight dislocation):⁷⁶⁰

- A God's work for Israel in the past (Acts 13:16b–19)
- B Unsatisfactory interim before the first David (13:20–21)

754. See Porter, *Paul in Acts*, 150; Baum, "Paulinismen," 414–15 (comparing Acts 13:38–39 with Gal 2:16; Phil 3:9), 416–17 (comparing Acts 13:29–31 with 1 Cor 15:3–7), 418 (comparing Acts 13:27–28 with 1 Cor 2:8; 2 Cor 3:15; 5:21), 419–20 (comparing Acts 13:46 and 28:27–28 with Rom 1:16; 10:14; 11:8, 11, 16; 1 Cor 11:3), and 421–22 (comparing Acts 13:32–33 with Gal 1:9; 3:14, 16; Rom 1:2, 4; 4:13, 16).

755. See Porter, *Paul in Acts*, 170–71. For an example closer to Paul's letters, see comment at Acts 20:18–35, the only Lukan speech of Paul addressing a Christian audience and hence closer in character to Paul's letters.

756. See further Ware, *Synopsis*, §34, pp. 64–69.

757. It is precarious, in view of our limited Pauline corpus and its occasional nature, to pontificate on what must have been characteristic of his preaching. The biblical David promise is also likely presupposed in the "Christ" title (see, e.g., excursus on messiahship at Acts 2:36; Keener, *John*, 284–86). In any event, the sparse evidence in Paul is sufficient to prevent us from supposing that he would have repudiated as contrary to his theology the Davidic material in the present Lukan speech. For evidence supporting the early tradition of Jesus's Davidic ancestry, see Brown, *Birth*, 505–12.

758. Ellis, "Midrashic Features" (putting the matter more strongly; but while midrashic features are consistent with tradition, Luke could write speeches in character if he had learned something of midrash). Bruce, "Paul's Use of Old Testament," allows that Luke composed the speech but argues that he preserved the substance of Paul's exposition. Sterling, "Understanding," 111, follows Dibelius in attributing to Luke this speech, which he sees as inadequately Pauline.

759. That is, this is a sample of Pauline synagogue exposition, nowhere else fleshed out so fully (Acts 9:20), just as 17:22–31 provides a sample of Paul's philosophic apologetic, only hinted at elsewhere (19:9), and just as several Acts speeches flesh out Jesus's Scripture exposition in Luke 24:44–45.

760. Bligh, *Galatians*, 10–11.

- C God's promise to David is fulfilled in Jesus the Savior (13:22–23)
- D Word of salvation is now sent to you (13:26)
- E John bore witness to Christ (13:24–25)
- F Jerusalemites condemned him, fulfilling Scripture (13:27)
- G They had him crucified (13:28)
- F' Fulfilled Scriptures, buried him, God raised him (13:29–30)
- E' His disciples now his witnesses (13:31)
- D' We bring good news to you (13:32)
- C' God's promise to David is fulfilled in Christ (13:33–37)
- B' Unsatisfactory interim before the second David (13:38–39)
- A' God's wondrous work for Israel in the present (13:40–41)

This outline legitimately recognizes the repetition of some ideas in the speech but at other points is unnaturally asymmetrical and forced.

Second is a basic outline based on purported content:⁷⁶¹

1. 13:17–23: history of the chosen people
2. 13:24–25: history of John
3. 13:26b–31a: history of Jesus
4. 13:31b–37: history of disciples
5. 13:38–41: history of listeners

Although such an outline does note some shifts in content, it claims for the *narratio* more than is reasonable in this case (i.e., the entire speech after the proem); this speech is not interrupted like some others. A better proposed rhetorical outline follows:⁷⁶²

1. Narration (13:17–25)
2. Division (13:26, a single proposition)
3. Demonstration (13:27–37)
4. Conclusion (13:38–41)

This outline may be accurate. I would suggest, however, that the *narratio* may extend through all of 13:17–31; given his work's genre, Luke knows that narrative appeals to his ideal audience, and he keeps their attention by including fuller narrative even within his speeches.⁷⁶³ In this case, the outline would be as follows:

1. Proem (13:16)
2. *Narratio* (13:17–31)⁷⁶⁴
3. *Propositio* (13:32)

761. Pillai, *Interpretation*, 3.

762. Black, "Form of Sermon," followed by Satterthwaite, "Acts," 359; Black, *Rhetoric of Gospel*, 123–26. This also overlaps with an outline structured by points of direct address at Acts 13:16, 26, 38 (Gaventa, *Acts*, 196); see esp. Pichler, *Paulusrezeption*, 124–31, as cited in Schnabel, *Missionary*, 158. Varo, "Hacia," uses rhetorical analysis to examine the speech's OT usage.

763. Stories within stories were common fare in antiquity, at least as early as Homer (e.g., the descriptions of the shields, or Odysseus learning of his fellow heroes' demise); in Philostratus's *Heroikos*, the overarching narrative allows the inclusion of numerous shorter stories that are the heart of Philostratus's point.

764. Admittedly, the mention of witnesses in Acts 13:31–32 may fit the "proofs" section and function transitionally. Despite the handbooks, actual speeches exercised flexibility in their outlines, and so NT critics ought not to impose ideal structures on biblical texts that they do not fit (cf. Black, *Rhetoric of Gospel*, 21).

4. *Probatio* (proofs, from texts; 13:33–37)⁷⁶⁵
5. Deliberative *peroratio* (13:38–41)

The narrative could function epideictically (here christologically) for Luke's audience (though as part of his larger salvation history apologetic). In view of 13:32, 38–41, however, the speech's function as a whole is deliberative within the narrative world.

In any case, most important is that the theme of Paul's message (Paul is already the main speaker, as in 14:12) is God's gifts to Israel (God's deliverance of Israel from Egypt; his mercy in the wilderness; and his gifts of the land, judges, kings, and finally a Savior) and the fulfillment of God's promises in Jesus (see comment on Acts 13:18). Whereas Stephen, following one line of the prophetic tradition, preached to resistant persecutors about God's judgment, Paul here offers mostly a model of preaching grace to first-time hearers. (This apparent dichotomy probably reflects the same pattern observable at various points in Luke's Gospel: Jesus's preaching grace to sinners yet his harsh words to the resistant religious elite [Luke 5:30–32; 11:37–54; 15:1–32; 18:9–14].) One may note, in contrast to some patterns of Protestant theology shaped mainly by Paul's approach in Romans, that speeches in Acts sometimes begin with grace, either with God's blessings in Israel's history (as here) or with God's benevolence to humanity (Acts 14:15–17; cf. 17:24–28).⁷⁶⁶ The themes are not, however, mutually exclusive, and Paul concludes with a warning of judgment for those who reject God's mercies (13:40–41).

II. OPENING THE SPEECH (13:16)

As the more academically trained and rhetorically skilled speaker (cf. 14:12; 22:3), Paul, rather than Barnabas, delivers the homily, which is (apart from 13:40–41) very affirming and positive. Following rhetorical expectations, he rises and then addresses his audience.

(1) *Rising to Speak*

Luke does not specify that Paul and Barnabas came forward, perhaps envisioning them having taken prominent seats to begin with; Paul might speak from that location, but he is said here to “stand.” Scholars often note that a Palestinian Jewish teacher would normally sit to expound Torah (Luke 4:20; see comment on Acts 13:14), and sometimes contend that Paul does not do so because he offers a general exhortation rather than an exposition of a particular passage read that day.⁷⁶⁷ But although Luke does not give the text here, he does note that there was one (Acts 13:15a), and pulling various other texts into one's teaching was not uncommon in an exposition of a particular text (cf., e.g., Luke 4:24–27).

Others more relevantly cite Diaspora parallels for teachers rising to expound (Philo *Spec. Laws* 2.62), following standard Greek rhetorical practice (e.g., Xen. *Cyr.* 7.5.55; see comment on Acts 1:15).⁷⁶⁸ Even among Palestinian Jewish sages, there was not

765. These could conceivably extend into Acts 13:41, but probably this is part of the *peroratio*; 13:41 may function more like a closing *gnome* (see comment there) than a proof. One could argue that in 13:30–41, the speech uses all the forms of appeal emphasized by Quintilian: “things perceived by the senses—credible witnesses of the resurrection (vv. 30f)”; “material established by written authorities—in this case the scriptures (vv. 32–35)”; “principles on which his audience would agree (the providence and power of God, vv. 33, 37)”; and “relevant facts that would be admitted by all honest parties” (such as Jesus's death and burial; Green, *Thirty Years*, 101).

766. Even in Acts 3:12–26, where the audience's guilt and rejection of their own deliverer come toward the beginning of the speech (3:13–14), the occasion of the speech is an act of divine benevolence (cf. 4:9). This is not to deny that Paul also grounds his theology in Israel's history (including in Rom 9–11).

767. E.g., Abrahams, *Studies* (1), 8; followed by Bruce, *Commentary*, 271; apparently Longenecker, *Acts*, 220.

768. With Larkin, *Acts*, 198; cf. Conzelmann, *Acts*, 103.

yet a single rule observed by everyone in the first century.⁷⁶⁹ Even the two Pharisaic schools disagreed about whether one should sit or stand when expounding, with the Shammaites, dominant in the first century, preferring reclining; the issue survived into the second century (*t. Ber.* 1:3; *Sipre Deut.* 34.5.3). Since speakers in most of the Mediterranean world would typically stand at the beginning of their speeches,⁷⁷⁰ those who wished to speak in an assembly might indicate this intention by standing.⁷⁷¹

Luke often depicts speakers quieting hearers with hand motions (Acts 12:17; 19:33; Paul again in 21:40). Here the hand motion will be like not the gesture for silence in 12:17 but the gesture used to begin a speech.⁷⁷² Here it may have been “two fingers extended with the thumb uplifted and fingers four and five folded.”⁷⁷³ Stretching out the right hand was a common rhetorical gesture (e.g., Philost. *Vit. soph.* 1.25.541), sometimes used even when one was preparing to speak just a single sentence (Plut. *Caes.* 44.6).⁷⁷⁴ Many statues (especially of equestrians) from the period portray a man with a right arm stretched out and raised.⁷⁷⁵ The summons to listen fits a wide variety of rhetoric, including that of traditional Jewish sages,⁷⁷⁶ but was also part of Greco-Roman rhetoric (see comment on Acts 2:14, 22). Rhetorical handbooks warned orators to beg the jury for continued attention (Dion. Hal. *Lysias* 24).

(2) Address

The address “men of Israel” may not have been common in the Diaspora,⁷⁷⁷ but it provides a connection with God’s people in Judea (Acts 2:22; 3:12; 5:35; 21:28) that allows for shared responsibility (cf. 13:27) and especially hope (13:32). (For the formation of addresses in Acts with the plural of *άνθρωπος*, as in 1:11, 16; 2:14, 22, 29, 37, see comment on 2:14.)

“Those who fear God” (cf. 10:2) is probably distinct from “Israelite men” here (and from “descendants of Abraham’s stock” in 13:26), since (1) it makes simpler sense grammatically; (2) Gentiles present (though not explicit before 13:44–48) cannot be included in “Israelite men” (though technically it does not explicitly include the women either);⁷⁷⁸ (3) “God-fearers” is a standard Lukan expression for Gentiles

769. Among Gentiles, forms also could vary individually. Not bound by convention, some orators varied their practice as the mood struck them; one would begin speeches in a sitting posture but would be standing by the end (Suet. *Rhet.* 6). Seneca the Younger’s Stoic teacher Attalus even paced back and forth when he lectured (*Ep. Lucil.* 108.3); for perambulatory lectures, see, e.g., Eunapius *Lives* 481; Aune, *Prophecy*, 186 (cf. the joke about Peripatetics in Lucian *Dem.* 54).

770. E.g., Xen. *Anab.* 5.1.2; Pliny *Ep.* 4.9.18; 9.13.18; see further comment on Acts 1:15.

771. E.g., Xen. *Anab.* 5.1.5; 6.4.12; Cic. *Verr.* 2.4.64.142.

772. Shiell, *Reading Acts*, 145–48.

773. *Ibid.*, 148, also noting that another gesture, the sort used when one began an *exordium*, might follow soon after. Hall, “Delivery,” 226, cites Quint. *Inst.* 11.3.92 for the common gesture for speech opening: the middle finger would be against thumb with the remaining three fingers extended, as the hand glided gently forward to the left and then right; head and shoulders would then follow the hand. The gentle and dignified hand or arm gestures beginning a speech differed from more vigorous gestures during more emotional parts of a speech (Hall, “Delivery,” 224, citing *Rhet. Her.* 3.26–27).

774. The rhetorical character of the gesture is also noted by others (e.g., Soards, *Speeches*, 81). Idealizations of preclassical Athens included too much modesty to expose one’s arm (Aeschines *Tim.* 25–26).

775. Hurschmann, “Gestures,” 837. Stretching out the right index and middle fingers (and sometimes thumb) toward one’s hearer added emphasis (832), the index finger being significant for a variety of gestures (836). On Roman hand gestures in Cicero and esp. Quint. *Inst.* 11.3, see Hall, “Cicero and Quintilian”; on gestures more generally, Shiell, *Reading Acts*, 47–78.

776. E.g., Prov 1:8; 4:1, 10; 5:7; 7:24; 8:6, 32–33; 22:17; 23:19; Sir 3:1; 6:23; 16:24; 23:7; 31:22; 32:22; 33:19; 39:13; 51:28.

777. Pillai, *Interpretation*, 8. Certainly, Luke’s exact wording is not found in the LXX, though the idea of “men of Israel” is common.

778. Women were not yet segregated from men in synagogues, at least not by any barriers that left archaeological evidence; see Safrai, “Segregated”; idem, “Place of Women”; esp. Brooten, *Women Leaders*,

sympathetic to Judaism (10:2, 22; see comment on Acts 10:2); and (4) even though the term applies to proselytes in 13:43 rather than uncircumcised observers, it is distinguished from “Jews,” as it is here distinguished from “Israelite men.”⁷⁷⁹

III. GOD’S FAITHFULNESS TO ISRAEL (13:17–22)

Paul’s survey of biblical history (and Luke presumably intends only a précis here) focuses on God’s faithfulness to Israel: God chose, multiplied, and saved the people of Israel (13:17); he nurtured them or (depending on the variant reading) endured their disobedience (13:18); he gave them land as a gift (13:19) and judges to lead them (13:20); when they asked for a king, God even granted this request (13:21) and ultimately provided a virtuous king, David (13:22), from whose seed God promised to bring the Messiah (13:23, 34–36).

(1) *God Chose and Delivered (13:17)*

God chose the people of Israel, multiplied them in Egypt, and delivered them from Egypt. A proem homily often began with a “remote” verse not obviously connected with the pentateuchal reading because the expositor recognized “some inner connection between that verse and the pentateuchal text for the day.”⁷⁸⁰ The opening verses of the speech proper (13:17–19) recall Deuteronomic language, especially for Israel’s election and redemption (Deut 1:31; 4:34, 37; 5:15; 9:26, 29; 10:15).⁷⁸¹ The choosing of the ancestors is implied in Deut 4:37; 10:15. Although a common expression in Luke, “the people” (Acts 13:17, 24, 31) connects the discourse with the Israelite center of the audience (13:15).

The exaltation of the ancestors may reflect Luke’s motif of the exaltation of the humble (Luke 1:52; 14:11; 18:14; for cities, 10:15), fulfilled especially in Jesus (Acts 2:33; 5:31). It might echo patriarchal blessing language (Gen 48:19), but it is probably Luke’s adaptation of Israel’s multiplying in Egypt (Exod 1:7), since it refers to the sojourn and not to the exodus proper.⁷⁸² Perhaps it also prefigures the exaltation of others after suffering: David (Acts 13:22) and especially Jesus (13:23, 30, 33, 34, 37) are raised up.⁷⁸³

God’s “uplifted hand” was standard LXX language for divine deliverance in the exodus⁷⁸⁴ (Exod 6:1, 6; 13:3, 9, 14, 16; 32:11; Deut 3:24; 4:34; 5:15; 6:21; 7:8, 19; 9:26, 29; 11:2; 26:8; 2 Kgs 17:36; Ps 135:10–12 [136:10–12 MT]; Jer 39:21 [32:21]; Dan 9:15; Bar 2:11).⁷⁸⁵ Stephen earlier emphasized God’s gracious deliverance of Israel in the exodus (Acts 7:34, 36), which, as perhaps here (one reading in 13:18), highlighted in turn Israel’s rebellion against God in the wilderness (7:39–43).

103–38; idem, “Segregated.” Before Brotoen, it was often thought that such gender segregation happened earlier (May, “Synagogues,” 14; Swidler, *Women*, 89–90). This would fit the exclusion of women from the inner courts of the temple (e.g., Jos. *War* 5.199, 206, 227; 6.415; *Ant.* 15.419; *m. Mid.* 2:6); if purity or other considerations kept men from sitting with adult women (esp. other men’s wives) in many synagogues, however, it was apparently by seating arrangement rather than permanent architecture.

779. Many scholars note that numerous Gentiles attended synagogues (cf. Bruce, *Acts*¹, 263; Dibelius and Kümmel, *Paul*, 21), though Josephus seems to indicate that Gentile women outnumbered men (cf., e.g., *War* 2.560–61; *Ant.* 20.34; see Acts 13:50).

780. Stegner, “Homily,” 53. Homilies could begin with a halakic question or a verse from the Writings (Le Cornu, *Acts*, 722).

781. Dunn, *Acts*, 179. Ramsay speculates that the readings on this occasion were Deut 1 and Isa 1 (*Cities of Paul*, 297). The reading in Acts 13:18 and Deut 1:31, however, is debated (see comments there).

782. “Sojourn” (παροικία) was more commonly applied to the later captivity in the LXX, but the speech does not turn to this period (despite Acts 13:41). Perhaps Paul omits the sufferings emphasized by Stephen because he addresses a more prosperous Diaspora audience (Spencer, *Acts*, 144).

783. Pillai, *Interpretation*, 81.

784. For a proposed route for the exodus, see Hoffmeier, *Israel in Egypt*, 164–98.

785. The language was more rarely applied in any other way (2 Chr 6:32; Isa 26:11; Jer 39:17 [LXX; 32:17 MT]; Ezek 20:33–34).

(2) *Israel in the Wilderness* (13:18)

The wilderness evoked a formative period in Israel's history, one also rich as a paradigm for eschatological deliverance; Israel's prophets had predicted a new exodus in the wilderness (Hos 2:14–15; Isa 40:3). (See further discussion on early Jewish memory of the wilderness as a place of deliverance at Acts 21:38.)

Although Paul's survey of Israel's pre-Davidic history emphasizes God's love for and faithfulness to Israel, part of this survey might foreshadow Israel's later rejection of the Messiah (Acts 13:27, 29). Israel's rebellion in the wilderness teaches about God's patient endurance (the contextual emphasis) but also reminds the audience that the majority Jewish viewpoint about God's agent could be mistaken (cf. 7:35, 39–44). The question is whether the speech foreshadows this point here or addresses it only later, a question that hinges on an uncertain variant reading.

Depending on a debatable textual variant, the speech may stress either Israel's rebellion here (as in Stephen's depiction of the wilderness period) or God's benevolence. In favor of the former view (reading ἐτροποφόρησεν, "put up with"), the earliest manuscript evidence seems to slightly favor this reading, although not decisively so. Moreover, a speech in Acts has already portrayed the forty years in the wilderness (7:36; see comments there) as a time of rebellion (7:39, 42). In this case, the wording may prepare the reader for the negative period of Saul (13:21). That God "put up with them" would be Luke's own wording, but it would reflect one OT view of God's relationship with Moses's generation (Josh 5:6; Ps 95:10; Isa 63:10; Amos 5:25 in Acts 7:42; God was more positive with the rising generation, Deut 8:2–4; 29:5) and of Israel's frequent rebellion in general (Neh 9:30).⁷⁸⁶

Conversely, the early variant ἐτροφοφόρησεν ("nursed")⁷⁸⁷ better reflects Luke's predilection toward use of LXX language in such speeches (God nursed Israel in the wilderness, Deut 1:31); while the LXX text reflects the same variant as here, this reading is the dominant one. Although scribes might have altered the text here to fit Deut 1:31,⁷⁸⁸ one wonders how many later scribes would have thought of 1:31 or, still less, been inclined to introduce a favorable view of Israel here. The immediate context seems to emphasize not Israel's rebellion but God's benefaction to Israel; God afterward gave the people of Israel land (Acts 13:19), judges (13:20), (at their request) a king (13:21), and finally a Savior (13:23); eventually Paul notes that God "grants" the holy promises to David (13:34) and does not "give" his holy one to decay (13:35). This speech is less about Israel's rebellion (until 13:41) than about God's love for and grace toward his people (cf. "grace" in 13:43). Stephen preached to those who had already demonstrated opposition to his message; Paul becomes harsh only when the offer of grace is rejected (13:45–46). Whichever variant one chooses, the rest of the context emphasizes God's benevolence toward Israel.

(3) *God Gave Israel the Land* (13:19)

The destruction of "seven nations" reflects the count in Deut 7:1 (though multiple nations are also listed elsewhere, e.g., the six in Exod 23:23);⁷⁸⁹ the term for taking pos-

786. Although Soards, *Speeches*, 152, emphasizes the contrast with God's compassion in the wilderness in 2 Esd 19:19–21, the idea is present in 19:26–30, esp. 19:30 (Neh 9:26–30, esp. 9:30), which may be read as including behavior during that time.

787. Well attested from an early period (with \mathfrak{P}^{74} and A, though ἐτροποφόρησεν has \aleph and B) with somewhat wider geographic distribution, especially in the south (less so in the west). This variant is tentatively favored by Barrett, *Acts*, 632; Marshall, "Acts," 583; Pervo, *Acts*, 335–36; Zhang, *Paul Among Jews*, 130.

788. Metzger, *Textual Commentary*, 405–6.

789. Cf. Jos. *Ant.* 5.88; the expanded thirty-nine kings in L.A.B. 20:9 (Johnson, *Acts*, 231); cf. thirty-one kings in Josh 12:24 (LXX twenty-nine kings).

session (κατακλιρονομέω) is frequent in LXX discussion of the conquest, especially in Deuteronomy.⁷⁹⁰ So essential is the conquest narrative to the early books of the Bible that language associated with it, such as fear of God's chosen agent on others (Exod 23:27; Deut 2:25; 11:25; Josh 2:9) or subduing the earth (Num 32:22, 29; Deut 20:20; Josh 18:1), is prefigured in creation and patriarchal narratives (Gen 1:29; 9:2; 35:5). Luke mostly passes over the conquest narratives, however, failing even to use them as a pattern for the gospel's expansion (though he uses Israel's multiplying this way, with its creation associations, e.g., in Acts 6:7; 12:24; see comment on Acts 7:17).⁷⁹¹

Nevertheless, that God "gave them as an inheritance" (κατεκληρονόμησεν) the land fits the context of God's generosity; God also gave them judges (13:20), a king when they requested him (13:21), and other signs of his kindness and favor (13:17–18, 22). (Luke apparently affirms God's providence in their receiving Canaan's land in Joshua's time also in 7:45. On theological ramifications of "inheritance," see comment on 20:32.)

(4) God Gave Judges (13:20)

This passage's mention of the distribution of the land might refer to the period of the judges.⁷⁹² Yet if so, Luke's desire to be concise has sacrificed full clarity; the text more naturally sounds as if this distribution precedes the judges period (μετὰ ταῦτα, 13:20). The figure of 450 years⁷⁹³ might consist of what was mentioned previously—hence four hundred years in Egypt (Gen 15:13)⁷⁹⁴ plus forty years in the wilderness (Exod 16:35; Num 14:33–34; 32:13; Deut 2:7; 8:2, 4; 29:5; Neh 9:21; Heb 3:9, 17)⁷⁹⁵ and perhaps another decade for the conquest to commence.⁷⁹⁶ It is at best a rough estimate (like most broad estimates in the OT, excepting more carefully preserved regnal calculations) and should not be pressed too far; as Johnson complains, this "makes an already obscure chronology . . . even more obscure."⁷⁹⁷ Ancients also sought creative solutions to the details of early chronology, in the Qumran scrolls,⁷⁹⁸ Hellenistic Jewish writers,⁷⁹⁹ and even different renderings of the biblical text in the

790. Soards, *Speeches*, 152–53, compares 2 Esd 19:22–24 with God giving Israel the land in Acts 13:19; cf. *Barn.* 6.8. See also comment on Acts 7:45, although the term is different.

791. Philo is among Diaspora Jews who feel compelled to play down the conquest, especially the extermination of Canaanites (Berthelot, "Conquest"; among later rabbis, cf. Krygier, "Extermination"). It was likely not a popular subject among Diaspora Jews (just as it is not very popular among most Bible readers today). Cf. here also comments on *herem* in Acts 7:45 in Park, *Herem*, 128–29 (noting the shift from biblical to Second Temple approaches to *herem* in 53–114); see our comment on Acts 7:45 for what might be larger Lukan connections.

792. Merrill, "450 Years," counts this as the period between Othniel and Eli, arguing that Paul calculated literally, without synchronisms. Some synchronists in Paul's day might have explained the figures for the judges period (cf. 480 years in 1 Kgs 6:1 MT; 440 in 1 Kgs 6:1 LXX; 592 years in *Jos. Ant.* 8.61; as Conzelmann, *Acts*, 104, notes, Josephus is inconsistent; contrast *Ant.* 8.61; 10.147–48 with 11.112–13; 20.230) as including overlapping periods, like the list of Egypt's kings ruling different parts of Egypt (Manetho *Aeg. frg.* 1.7). For overlapping Egyptian and other dynasties, see Kitchen, *Orient*, 74 (who regards Judges as less complicated than others).

793. In Acts 13:19 in many English translations.

794. The more technical estimate was 430 (Exod 12:40–41; Gal 3:17), but Luke elsewhere follows the 400-year estimate from Genesis (Acts 7:6). Josephus offered precise but sometimes varying estimates of biblical periods; see *Ant.* 8.61 (592 years from the exodus to the temple); 10.147 (again, 592 years); 20.230 (612 years from the exodus to the temple); cf. 10.148 (3,513 years from Adam to the temple's destruction); 11.112 (more than five hundred years for the judges); comments in Schille, *Apostelgeschichte*, 293.

795. The thirty-eight years may start after the forty had begun (Deut 2:14).

796. Witherington, *Acts*, 410. A decade is too brief to complete the conquest by any passage's estimate, even despite the typically hyperbolic ancient Near Eastern conquest list summaries (see Hoffmeier, *Israel in Egypt*, 25–51, esp. 34–35, 40, 42).

797. Johnson, *Acts*, 231; similarly, Conzelmann, *Acts*, 104.

798. 4Q559, addressed in Wise, "To Know."

799. DiTommaso, "Note." On various interpretations of the 430 years in Exod 12:40, see Andrei, "430 Years." Various modern solutions have been proposed (e.g., Poirier, "Generational Reckoning," probably

LXX, Samaritan Pentateuch, and so forth.⁸⁰⁰ More important is the theological point: it is God and his promise, not any mortal or human lifespan, that are central, a point reiterated elsewhere in the speech (see 13:36). Paul points his audience to God's activity as author of salvation history and salvation for them.

The language of "giving" judges is not specifically familiar from the LXX (cf. Deut 16:18) but prepares for God's "giving" a king in Acts 13:21. (Occasionally, though not regularly, the LXX notes that God "gave" kings [1 Sam 12:13].) The idea reflects God's grace in the era of judges in raising up leaders for his oppressed people; God's graciously providing leader-deliverers for oppressed people provides the pattern of his working that leads naturally to the overt messianic proclamation in the speech (Acts 13:22–23). The era of judges, which technically ran until the era of kings (2 Sam 7:11), was a distinct era in Israel's history (Ruth 1:1; 2 Kgs 23:22; 1 Chr 17:10).

Samuel represents the beginning of the era of the "prophets" (Acts 3:24).⁸⁰¹ That Luke does not develop the emphasis on prophecy here, however, is understandable. Stephen's speech focused on the prophet like Moses and rejected prophet Christology; Paul here focuses on the Davidic-king Christology (as in Acts 2). Luke repeats themes but does not develop them at the expense of failing to develop new ones he has not previously had opportunity to elaborate. Thus he covers the entire narrative ground of 7:2–44 in 13:17–18 but develops at greater length the point of 7:45–46 in 13:19–22. Acts 13 thus continues Luke's interpretation of the biblical metanarrative from Acts 7, but Luke has divided his material to address different situations. Jesus's unspecified teaching about himself in the Scriptures (Luke 24:44–45) whets the appetite of Luke's audience, but the promise-fulfillment theme in Acts' speeches develops Jesus's role in that larger story more explicitly.

(5) *God Granted a King (13:21)*

God gave the people of Israel good leaders (Acts 13:20, 22) and also gave them a king they asked for (13:21). The length of Saul's reign in the OT depends entirely on the textual tradition one reconstructs; 1 Sam 13:1 (omitted in most LXX manuscripts), referring to two years in the Hebrew (and generally reckoned as fragmentary), does not resolve the question.⁸⁰² Forty was, however, a standard summary number for the long reign of a judge or king (Judg 3:11; 5:31; 8:28; 1 Sam 4:18; 1 Kgs 2:11; 11:42; 2 Kgs 12:1; 1 Chr 29:27; 2 Chr 9:30; 24:1; cf. 2 Sam 5:4; 15:7). The Greek text of Josephus at one point also cites forty years for Saul's rule (*Ant.* 6.378), possibly suggesting a broader haggadic or even textual tradition; but elsewhere he claims twenty years (10.143), and the Latin version of 6.378 also claims twenty, which fits later Jewish sources.⁸⁰³ The forty years at least provides a literary connection with the

rightly viewing Gen 15:13 as a rounding of Exod 12:40, and more controversially proposing a connection with Hesiod).

800. Cf., e.g., Larsson, "Septuagint" (also citing *Jubilees*), suggesting that these were meant as "improvements" of the tradition that became Masoretic.

801. Although Philo's extant work addresses 1 Samuel fairly rarely, Josephus makes abundant use of 1–2 Samuel, which also appears in Qumran texts (on which see Parry, "Retelling *Samuel*"; see references in 4Q160 1 1–7; 4Q174 II, 19–III, 2; III, 7, 10–11; 4Q389 4; 4Q522 1 I, 13; 11Q5 XXVIII, 3–11, noted in the index of *DSSNT* [509]). Yet as Hannah's song (after Samuel's birth) turns to the anointed king (1 Sam 2:10), so Zechariah's prophecy (after John's birth) turns to the Messiah (Luke 1:69); Samuel is David's forerunner as John is Jesus's.

802. For problems there, see, e.g., Ackroyd, *1 Samuel*, 104; Keil and Delitzsch, *Samuel*, 123–24. *Seder 'Olam Rabbah* 13 gives three and one-third years (Lake and Cadbury, *Commentary*, 151).

803. Johnson, *Acts*, 232; cf. Lake and Cadbury, *Commentary*, 151. Normally one would prefer the Greek, but that later Christian scribes conformed the Greek text to Acts cannot be ruled out. At the same time, it could be likelier that the Greek is original, the Latin harmonizing Josephus internally. Josephus's Greek text of 1–2 Samuel seems closer to 4QSam^a than to the MT (Ulrich, "Text for Samuel," 93).

wilderness period of Acts 13:18, perhaps emphasizing how long (a generation) Israel had to wait for this promise (fully fulfilled even later still, 13:19). Added to earlier figures (13:19),⁸⁰⁴ the sermon's chronology indicates that Israel had waited a long time, which should reinforce the sense of privilege that salvation had finally come in the hearers' own era (13:26, 38; cf. Luke 10:24).

Would the historical Paul (as Saul the Benjaminite, Rom 11:1; Phil 3:5) pass over the negative portrayal of King Saul, presumably having grown up with some pride in the Benjaminite king?⁸⁰⁵ Although this suggestion is possible, it seems more likely here (or at least more to the point here) that King Saul serves as the foil for David (Acts 13:22).⁸⁰⁶ That Israel requested a king (against Samuel's advice) and received a bad one vindicates God and traces further the history of God's purpose for the leadership (and ultimate king) of his people. Ironically, people of Jesus's generation rejected the divinely appointed king and instead asked for (ἠτήσαντο) Barabbas to be given them (Luke 23:18, 25; Acts 3:14); the same verb appears in Acts 13:28 (its only other use in this sermon).

(6) *God Chose David (13:22)*

God may be said to have "removed" Saul by taking away his office from him (cf. Luke 16:4; 1 Sam 16:1) or by his death (1 Sam 31:4–5); Josephus employs the term both ways.⁸⁰⁷

The biblical quotation is composite, which was acceptable in midrash (since all the texts were God's word anyway). It employs Ps 89:20 (88:21 LXX); 1 Sam 13:14; and Isa 44:28.⁸⁰⁸ God, who alone knows human hearts (Acts 1:24), can best "attest" someone's heart (15:8). "I have found David" reflects Ps 89:20 (esp. 88:21 LXX); the context of this passage includes "exalting" him (89:19 [88:20 LXX]; cf. exalting Israel in Acts 13:17; raising up David in 13:22) and God's strengthening by his arm (Ps 89:21 [88:22 LXX]; cf. Acts 13:17; Luke 1:51).⁸⁰⁹ The source of David's being "a man after God's heart" is straightforward (1 Sam 13:14).⁸¹⁰ The last part of the composite quotation reflects Isa 44:28,⁸¹¹ viewing Cyrus (the Lord's anointed, 45:1) as a type of a divinely appointed king, who would also order the building of God's house (44:28).

The numerous potential midrashic connections that are at most assumed rather than stated suggest that Luke condenses a larger source or exegetical tradition that presupposes these connections. "All my wills [πάντα τὰ θελήματά μου, plural]"

804. Lake and Cadbury, *Commentary*, 151, add this 40 to the 450 to yield 490, for an allusion to Dan 9:25–27. But we can add 450 to 40 only if 450 covers the era of judges and only if we omit the 40 in the wilderness.

805. That Benjaminites appreciated Saul may be suggested by preservation of Saulide family names among later Benjaminites (Esth 2:5; though cf. also 1 Chr 23:21). Acts employs φυλή for "tribe" only here, and Paul only in Rom 11:1 and Phil 3:5 (mentioning the Benjamin connection; but cf. Luke 2:36; 22:30). The Greek transliteration of "Saul" differs here from that of Paul's Semitic name; see discussion in Bauckham, "Latin Names," 208–10.

806. Cf. also Barrett, *Acts*, 635; Larkin, *Acts*, 199.

807. Bruce, *Acts*¹, 265.

808. Most scholars concur here; Conzelmann, *Acts*, 104; Johnson, *Acts*, 232; Witherington, *Acts*, 410; cf. Arnold, "Use of Old Testament in Acts," 319. Most note the identical combination in *1 Clem.* 8:1, probably dependent on Acts 13.

809. Johnson, *Acts*, 232, also connects "holy" (ἅγιος) in Ps 89:20 (88:21 LXX) with ὁσιος in Acts 13:34; but ἅγιος appears more than seventy times in Luke-Acts, and so Luke's use of ὁσιος points in a different direction (2:37; 13:34–35). "Son of Jesse" appears as a synonym for David too often to require any single passage to be in view (e.g., 1 Sam 16:18; 20:27, 30, 31; *pace* Witherington, *Acts*, 410, who focuses on just one).

810. Cf., e.g., Schmitt, "Kerygme," 160.

811. Cf. Conzelmann, *Acts*, 104. The closest alternative allusions, 2 Sam 23:5 and 1 Kgs 5:8, are much more distant both in wording and in sense.

may reflect a Septuagintalism.⁸¹² It might be translated as “all my purposes,” or “all my desires,” or “all my wishes”;⁸¹³ this would fit David’s serving God’s “purpose” in Acts 13:36. Though less often proportionately than Matthew or John, Luke elsewhere emphasizes doing God’s will (Luke 12:47; 22:42; Acts 21:14; 22:14; cf., e.g., Mark 3:35; Matt 26:42). “In his own generation” reinforces that David died and contrasts with the permanence of the risen son of David (Acts 13:36–37; cf. 2:29, 34), countering expectations of a literal David (as one could understand Jer 30:9; Ezek 34:23–24; 37:24–25; Hos 3:5) rather than his seed (Isa 9:7; Jer 23:5; 33:15, 17, 21; Zech 12:8).⁸¹⁴

Paul does not emphasize Davidic messiahship in his letters to Christians, but he accepts that view (Rom 1:3), which is probably therefore presupposed in his discussion of messiahship in general.⁸¹⁵ Indeed, he includes it, when he does mention it, in his summary of the gospel he preaches (Rom 1:3; cf. 2 Tim 2:8). It is not therefore unnatural that he would have preached it in synagogues, as here, but Luke selects what fits his overarching emphasis, which certainly includes the Davidic Christ (Luke 1:32, 69; 2:11; Acts 2:25–36). Some scholars think that the focus on the royal promise and eschatology, consonant with early expectations of the kingdom restored to Israel (Acts 1:6; 3:19–26), fades later in Paul’s preaching in Acts and in his letters,⁸¹⁶ but this cannot be sustained, certainly in Acts (26:7; 28:20). The “raising up” here prefigures that of Jesus in 13:30; Luke sometimes finds in “raising up” a double entendre for resurrection (see comment on Acts 7:37).⁸¹⁷ For the Davidic Messiah in early Judaism, see extensive comments at Acts 2:36.

c. *The Narrative about Jesus (13:23–31)*

Speeches often included a narrative of events leading up to the current situation; after Paul provides a survey of God’s benevolence in biblical history in general, he surveys the recent history of God’s generosity in continuity with biblical history. This survey of Jesus is like a survey of much of Luke’s Gospel and serves, in concise form, much the same purpose: Jesus’s story continues the earlier story of God’s faithfulness to Israel. As such, the survey also weaves its hearers into that story, to act like either the disobedient or the righteous remnant of Israel (13:40–41).

I. THE PROMISED SAVIOR (13:23–26)

Just as God gave the people of Israel the land (13:19) and gave them leaders (13:20–22), now God has given them the Savior (13:23). Jesus’s coming fulfills both the promises of the prophets about David’s descendant (13:23) and the proclamation of a recent prophet, John (13:24–25). In turn, the same message of salvation was now being sent through the apostolic prophets (13:26, 47).

812. Le Cornu, *Acts*, 725, plausibly suggests an Aramaism (רעוּתִיָּה); but this may make little sense for a synagogue audience in Pisidian Antioch. This plural appears nowhere else in the NT except with reference to more than one possessor (Eph 2:3; so also *1 Clem.* 14.2).

813. 2 Chr 9:12; Isa 58:3, 13; Jer 23:17, 26; for *God’s wishes*, Ps 103:7 (102:7 LXX); Isa 44:28; Sir 43:16; for *doing God’s wishes*, 2 Macc 1:3.

814. Although David is very important for Luke (cf., e.g., comment on Acts 2:25; 15:16; Strauss, *Messiah*), “son of David” is far more important for Matthew (cf. the comparison with usage in *Psalms of Solomon* in Willitts, “Messianism”) than for Luke (who simply repeats Mark’s uses in Mark 10:47–48 in Luke 18:38–39).

815. See also Haacker, *Theology*, 143 (noting that Paul was more apt to emphasize this in Romans, one of his letters more situated in Judaism). Even “Son of God” may presuppose this; see 4QFlor; fuller discussion in Keener, *John*, 284–88. Early Christian emphasis on the Davidic character of Jesus’s messiahship may be one reason one version of the Amidah omits the fifteenth benediction (Le Cornu, *Acts*, 726, citing *Num. Rab.* 18:21).

816. Boismard and Lamouille, *Actes*, 1:28–29.

817. Cf. Johnson, *Acts*, 232; Witherington, *Acts*, 410; see esp. Bock, *Proclamation*, 243–45.

(1) *God Gives a Davidic Deliverer (13:23)*

That Jesus is a “Savior” (σωτήρ) also continues the pattern of divine leadership summarized in 13:20, since some judges were “saviors” (Judg 3:9, 15; Neh 9:27); the cognate verb σώζω frequently applies to the judges (Judg 2:16, 18; 3:9, 31; 6:14, 15, 36, 37; 7:2, 7; 8:22; 10:1; 13:5) and to the first kings (1 Sam 9:16; 10:1, 27; 11:3; 2 Sam 3:18).⁸¹⁸ On Jesus as the Savior, see comment on Acts 5:31.⁸¹⁹ On the “promise,” see Acts 13:32 (cf. 7:5). Although most of Paul’s narrative here covers the events of Luke 3–24, Luke may hint at the Davidic Savior of the Gospel’s infancy narrative⁸²⁰ in Acts 13:23.

(2) *John’s Mission (13:24–25)*

The gospel story (when distinct from the larger history of Israel) properly starts with the announcement of John (Acts 1:22; 10:37; cf. also 1:5; 11:16; 18:25; 19:4; Mark 1:1–8; John 1:19; esp. Luke 1:5–25).⁸²¹ The forerunner’s mission is as much a part of the story as the predictions of the prophets, all of which confirm Jesus’s identity.⁸²²

Luke reports John’s message of repentance in his Gospel (Luke 3:3, 8).⁸²³ This message of repentance also allows an important element of Lukan soteriology here (cf. Luke 24:47; Acts 2:38; 3:19; 5:31; 8:22; 11:18) and continuity with Jesus’s message as well (Luke 5:32; 10:13; 11:32; 13:3–5; 15:7, 10; 16:30),⁸²⁴ though it will not be the focus of the sermon’s soteriological language (Acts 13:38–39; though cf. 13:41).⁸²⁵

There is no reason to doubt that John preached repentance to Israel. The report about John in Josephus (*Ant.* 18.116–19) is likely authentic. It fits the language of this section of *Antiquities of the Jews* and does not fit expectations for a Christian interpolation (contradicting the Gospels at points, focusing on John more than on Jesus, and omitting any connection between them).⁸²⁶ Nevertheless, if one compares Josephus and the Gospels, Josephus has hellenized his portrait of John much more than the Gospels do.⁸²⁷

818. Although the Qumran scrolls are known particularly for their pesher application of prophecies, they also reapplied principles from narratives (e.g., 4Q370 I; see Wise, “Introduction to 4Q370”).

819. It is not frequent in Paul’s undisputed letters (Phil 3:20; but cf. Eph 5:23; 1 Tim 1:1; 2:3; 4:10; 2 Tim 1:10; Titus 1:3–4; 2:10, 13; 3:4, 6; cf. further Luter, “Savior [DPL]”; Longenecker, *Christology*, 142–43), but neither is it a dominant Lukan description (Luke 2:11; for God in Luke 1:47). Some of Jesus’s followers apparently were playing on “savior” (σωτήρ) and “Jesus” (Ἰησοῦς) from an early period (Matt 1:21; Le Cornu, *Acts*, 726).

820. Cf. David in Luke 1:27, 32, 69; 2:4, 11; for the messianic savior, see Luke 1:69, 71, 77; 2:11, 30 (cf. God the savior in Luke 1:47).

821. For parallels between John’s and Jesus’s infancy narratives in the Gospel, see discussion in the commentary introduction, Keener, *Acts*, 1:556–57. That Paul does not mention John in his letters does not make Luke’s portrayal unrealistic; Paul’s letters are to churches (like the analogous speech in Acts 20:18–35), not reporting how he would have preached in a synagogue. But this is an undeniably Lukan emphasis.

822. The wording (πρὸ προσώπου before εἰσόδου) is unusual but may evoke Mal 3:1 LXX, associated with John in Luke 1:17; 7:27 (Fitzmyer, *Acts*, 513). Contrast perhaps Luke 9:31.

823. That some of the Gospels’ sources would have had access to some key teachings of John is likely, since John had disciples who could preserve his teachings and at least some joined the early Jesus movement (Webb, *Baptizer*, 87–88).

824. Thus John’s preaching is valued for its content here (Pillai, *Interpretation*, 25, against Conzelmann).

825. Just as it is not the focus of Pauline soteriology elsewhere, though he affirms it (Rom 2:4; cf. 2 Cor 7:9–10; 12:21; 2 Tim 2:25; in different language, clearly in 1 Thess 1:9). Paul does mention it in Acts (Acts 17:30; 19:4; 20:21; 26:20). Paul’s extant letters do not mention John the Baptist, but as “occasional” letters, they lacked reason to do so (Pillai, *Preaching*, 91).

826. Feldman, “Methods,” 591; for authenticity, see also Webb, *Baptizer*, 39–41 (emphasizing [87] points of congruence with the Gospels’ portrait); Park, “Untersuchung.”

827. See Meier, “John the Baptist,” 234; cf. Liefeld, “Preacher,” 146n31; Park, “Untersuchung.” On the historical John, see also Webb, *Baptizer*; for a survey of research, see idem, “John,” 179–86.

John's completion of his course in Acts 13:25 resembles Paul's description of his own ministry in 20:24. Athletic metaphors were common in both Gentile⁸²⁸ and Greek-speaking Jewish⁸²⁹ sources; these included metaphors about running.⁸³⁰ Running was one of several areas of competition favored by Greeks.⁸³¹

Luke's summary of John's testimony (13:25) begins with a leading rhetorical question (τί ἐμὲ ὑπονοεῖτε εἶναι;) ⁸³² not recounted in the Gospel's questions about John's identity (Luke 3:15–16; cf. John 1:19–23) and perhaps modeled (consciously or unconsciously) after Jesus's question about his identity (Luke 9:20, τίνα με λέγετε εἶναι;) to underline the contrast between the two figures. John's submission to Jesus's role is not simply polite deferment⁸³³ but rather an acknowledgment of Jesus's superiority.⁸³⁴

John's proclamation of the coming one⁸³⁵ also reveals his submission. The most servile tasks performed by a household servant concerned the master's feet—for example, washing the feet.⁸³⁶ Likewise, servants carried sandals for their masters or unfastened the thongs of the sandals;⁸³⁷ people of status expected others to remove their sandals⁸³⁸ or had slaves to put them on.⁸³⁹ The wealthier might bring a slave to replace their outdoor shoes with house shoes during the meal.⁸⁴⁰ (For more information on ancient shoes and sandals, see comment on Acts 12:8.)

Dealing with the feet was the one servile activity that was too demeaning for Jewish disciples to fulfill for their teachers.⁸⁴¹ In other respects, ancient teachers often expected disciples to function as servants,⁸⁴² but later rabbis' one caveat was that,

828. E.g., Isoc. *Ad Nic.* 11; *Rhet. Her.* 4.3.4; Cic. *Att.* 13.21; *Brut.* 67.236; 69.243; *Rosc. Amer.* 47.136; Sen. *Y. Ben.* 5.3.1; *Dial.* 1.2.3; 4.15.2; Epict. *Diatr.* 1.2.25–26; 1.4.13; 1.18.21–23; 2.5.15–20; 2.17.29; 2.18.27–29; 3.20.9–10; 3.22.52; 4.4.30; *Encheir.* 51.2; Dio Chrys. *Or.* 2.18; 8.11–20, 27; 9.11–12; 32.20; 37.34; 52.3; Lucian *Hermot.* 33; Max. Tyre 8.7; 15.2; 34.9; Marc. Aur. 6.20; Philost. *Ep. Apoll.* 24; Char. *Chaer.* 1.2.2–3; Diog. Laert. 6.2.27; Men. *Rhet.* 2.7, 410.11–13; Iambl. *V.P.* 9.49; cf. Cagniart, "Attitude"; Garrison, "Metaphor"; Cousland, "Athletics," 142; Lateiner, "Contest." In philosophy and other Greek thought, see further esp. Pfitzner, *Agon Motif*, 23–37; for one view on the Diogenes tradition's portrayal of his challenge to athletics, see Bosman, "Athletes." Athletic imagery was used even for warfare (Plut. *Cim.* 13.3; *Comparison of Lucullus and Cimon* 2.1) and politics (Plut. *Luc.* 38.4). Perhaps the metaphoric element grew as the original civic function in the polis (before the empire) declined (cf. Brown, "Privatization").

829. E.g., *Sib. Or.* 2.39; 3.738–39; Philo *Worse* 33; 4 Macc 9:8; 15:29; 17:12, 15; Jos. *Ag. Ap.* 2.217–18; *Test. Job* 4:10; 27:3–5/27:5–8. For Hellenistic Jewish sources, see further esp. Pfitzner, *Agon Motif*, 38–72; in both Stoic and Hellenistic Jewish sources, see Schwankl, "Lauf."

830. E.g., Men. *Rhet.* 2.7, 406.14–24; Diog. Laert. 6.2.34; Porph. *Marc.* 32.500.

831. See Cousland, "Athletics," 141; see comment on Acts 20:24.

832. Rhetoricians sometimes asked the audience's opinion when the answer was obvious or (as perhaps here) simply to hold their attention. For various forms of rhetorical questions, see Anderson, *Glossary*, 51.

833. Cf. this cultural principle in Malina, *Anthropology*, 78.

834. Whether or not this was polemical; see comment on Acts 19:1–3.

835. On John's proclaiming an expected figure, see Webb, *Baptizer*, 261–306.

836. For its servile character in early Jewish circles, see Thomas, *Footwashing*, 40–41; in the broader Mediterranean culture, 50–55, 115; Hom. *Od.* 19.344–48, 353–60, 376, 388–93, 505. I borrow here from Keener, *John*, 448–49, 903–4.

837. E.g., Diog. Laert. 6.2.44; *b. B. Bat.* 53b (though both sources ridicule treating slaves in such a demeaning manner); see Daube's and Urbach's citations below. Other commentators have noted that this is the work of a slave (Westcott, *Gospel*, 19; Hunter, *John*, 23). Palestinian Amora'im might even lean on disciples when walking (Ehrlich, "Lending Shoulder").

838. E.g., Aeschylus *Ag.* 944–45. One might also read John's statement in light of removing shoes in a holy place (Acts 7:33), but John's emphasis on unworthiness makes this approach less likely.

839. E.g., Pliny *Ep.* 3.16.8.

840. Croom, *Clothing*, 63. Dinner guests removed their shoes for a banquet and asked for them when ready to depart (e.g., Pliny *Ep.* 9.17.3).

841. Daube, *New Testament and Judaism*, 266.

842. Exod 24:13; 33:11; Josh 1:1; 1 Kgs 19:21; 2 Kgs 5:20; 6:15; 8:4; Zeno in Diog. Laert. 7.1.12; Cleanthes in Diog. Laert. 7.5.170; *t. B. Meši'a* 2:30; cf. *'Abot R. Nat.* 27, §56 B; *y. Soṭah* 5:5, §4. Commentators cite also *b. Ketub.* 96a. Cf. Joshua as Moses's disciple and other "disciples of the prophets" (CD VIII, 20–21; *Mek. Pisha* 1.150–53; *'Abot R. Nat.* 11, §28 B).

unlike slaves, disciples did not tend to the teacher's sandals.⁸⁴³ John is thus claiming to be unworthy to be the coming one's servant. This is quite a remarkable christological claim when we consider that the Hebrew Bible and later tradition regularly call the Israelite prophets "slaves of God,"⁸⁴⁴ also applying the title to David,⁸⁴⁵ Moses,⁸⁴⁶ the patriarchs,⁸⁴⁷ and Israel as a whole;⁸⁴⁸ other ancient hearers would have also received the image of being God's slave as one of great honor.⁸⁴⁹ By contrast, the prophet John here claims his unworthiness to be even Christ's slave.⁸⁵⁰

Some scholars think that Luke emphasizes Jesus's superiority to John because of groups of John's followers in Asia (Acts 19:3);⁸⁵¹ this may be a factor, though Luke would certainly emphasize Jesus's superiority to everyone, in any case.

(3) *Salvation for Israel* (13:26)

The promised Savior has come (13:23), and in accordance with God's activity through history, this is a gift to Israel (13:17–22), climaxing God's gift of leaders (13:20–22), and especially his gift of a Davidic-type deliverer. The message about "this salvation" concerns the salvation brought by the new deliverer, which Paul will expound (in terms of Jesus's death and resurrection) in the following verses (13:27–31).

The new address (cf. 13:16; for the same words, 13:15) may begin a new section here;⁸⁵² repetition of address does not always function as a transition marker, but it can do so (cf. 2:14, 22, 29; 3:12, 17).⁸⁵³ Certainly the emphasis shifts to Jesus's death and resurrection immediately afterward (13:27–31). Paul addresses both ethnic descendants of Abraham and God-fearers (see comment on Acts 13:16, 43; on God-fearers, see comment on Acts 10:2).⁸⁵⁴ (One may compare the "place of the Jews and God-worshippers" (*theosebion*) inscribed at the theater of Miletus in Asia Minor.)⁸⁵⁵

Such respectful language toward his people in a synagogue fits what we would expect of the epistolary Paul, as best we can reconstruct how he would have addressed

843. B. Ketub. 96a, cited by various commentators (e.g., Daube, *New Testament and Judaism*, 266; Lachs, *Commentary*, 45; cf. Davies, *Sermon*, 135).

844. E.g., 2 Kgs 9:7, 36; 10:10; 14:25; 17:13, 23; 21:10; 24:2; Ezra 9:11; Isa 20:3; Jer 7:25; 25:4; 26:5; 29:19; 35:15; 44:4; Dan 3:28; 6:20; 9:6, 10; Amos 3:7; Zech 1:6; cf. 'Abot R. Nat. 37, §95 B; Martin, *Slavery*, 55–56; Sanday and Headlam, *Romans*, 3; Käsemann, *Romans*, 5.

845. E.g., 2 Sam 3:18; 7:5, 8, 19–21, 25–29; 1 Kgs 3:6; 8:24–26, 66; 11:13, 32, 34, 36, 38; 14:8; 2 Kgs 8:19; 19:34; 20:6; 1 Chr 17:4, 7, 17–19, 23–27; 2 Chr 6:15–21, 42; Pss 78:70; 89:3, 20; 132:10; 144:10; Isa 37:35; Jer 33:21–22, 26; Ezek 34:23–24; 37:24–25; cf. 'Abot R. Nat. 43, §121 B.

846. E.g., Exod 14:31; Num 12:7–8; Deut 34:5; Josh 1:1–2, 7, 13, 15; 8:31, 33; 9:24; 11:12, 15; 12:6; 13:8; 14:7; 18:7; 22:2, 4–5; 1 Kgs 8:53, 56; 2 Kgs 18:12; 21:8; 1 Chr 6:49; 2 Chr 1:3; 24:6, 9; Neh 1:7–8; 9:14; 10:29; Ps 105:26; Dan 9:11; Mal 4:4; cf. 4Q378 22 2; L.A.B. 30:2, *famulum*; 'Abot R. Nat. 43, §121 B.

847. Cf. Gen 26:24; Exod 32:13; Deut 9:27; Ps 105:6; 2 Macc 1:2; *Jub.* 31:25; 45:3; *Test. Ab.* 9:4 A; 2 *Bar.* 4:4; 'Abot R. Nat. 43, §121 B.

848. Lev 25:42, 55; Deut 32:43; Isa 41:8–9; 42:1, 19; 43:10; 44:1–2, 21; 45:4; 48:20; 49:3; Jer 30:10; 46:27–28; Ezek 28:25; 37:25; 2 *Bar.* 44:4; *t. B. Qam.* 7:5; 'Abot R. Nat. 43, §121 B; *Gen. Rab.* 96 NV; *y. Qidd.* 1:2, §24; cf. *Tob* 4:14 mss.

849. Inscription in Grant, *Religions*, 122; Martin, *Slavery*, xiv–xvi (citing Soph. *Oed. tyr.* 410; Plato *Phaedo* 85B; Apul. *Metam.* 11.15; inscriptions), 46, 49 (against, e.g., Beare, *Philippians*, 50); cf. Rom 1:1 (cf. Minear, *Images*, 156). On the high status of slaves of rulers, see excursus on slaves at Acts 12:13.

850. E.g., Anderson, *Mark*, 72–73; Taylor, *Mark*, 157. For one discussion of implications, see Webb, "John," 200–201.

851. Stählin, *Apostelgeschichte*, 182. On this likelihood as a reason for the Fourth Gospel's emphasis, see Keener, *John*, 388–91.

852. Munck, *Acts*, 123.

853. Direct addresses sometimes signal transitions in ancient letters; see Longenecker, *Introducing Romans*, 219, citing P.Mich. 206.4–5 (which uses "brother"); note also his citation of Mullins, "Formulas," 387.

854. Munck, *Acts*, 123. Chrys. *Hom. Acts* 29 (Martin, *Acts*, 165) suggests that Paul allows his Jewish audience to distinguish themselves from Jerusalemite leaders who rejected Jesus (Acts 13:27).

855. C. Williams, *Acts*, 167 (using the spelling in Williams).

his own people evangelistically (cf. Rom 11:1–2; 1 Cor 9:20; Phil 3:5). Abraham's role as father was pivotal for Paul, though he especially emphasized Abraham's spiritual fatherhood of believers (Rom 4:1–16; Gal 3:6–18; 4:22); this was also true of early Christian theology in general (spiritual in John 8:39–40; 1 Pet 3:6; probably ethnic in Jas 2:21). Luke emphasizes both the spiritual (Luke 3:8) and the genetic (13:16, 28; 16:24, 30; 19:9) aspects as well as the promised blessing to Abraham's descendants (Acts 3:25–26). (Luke opens with an allusion to Abraham's narrative even in Luke 1:5–7 and implies the covenant privileges available to, but not automatic for, his descendants also in Luke 13:16; 19:9.) Paul addressed spiritual Jewishness mainly when addressing Jewish-Gentile conflicts in his churches, but he also recognized ethnic Jewishness and descent from Abraham (Rom 9:5; 11:1; 2 Cor 11:22).

The epistolary Paul also accepted Israel's special heritage and privilege (Rom 3:1–2; 9:4–5) and priority (1:16; 2:9–10), though contending that individuals who repudiated God's new work in Christ also joined the outsiders in repudiating their salvation-historical heritage (9:6–7; as in Acts 13:46). Luke is so emphatic that this priority appears in his work's structure (no serious historical scholarship disputes the historical expansion of the Jesus movement from Israel to the Gentiles, but Luke continues to reiterate this point) and Paul's repeated pattern in the synagogues (cf. Acts 3:26). For fuller discussion of the pattern, see comment on Acts 13:5.

The “word” plays on the word they have been invited to give (13:15)⁸⁵⁶ and the gospel message Paul is proclaiming here (13:44, 46, 48–49).⁸⁵⁷ The message of salvation here can be John's message of repentance in view of the coming one (13:24–25), more likely the rehearsal of the gospel story (13:27–31), or both; God “sent” his “message” to Israel (10:36). Jesus's story (13:23–31) is the climax of Israel's story (13:17–22), from David (13:22–23). This is especially clear because the message of salvation in 13:26 is the good news of the promise to the ancestors in 13:32.

“Salvation”⁸⁵⁸ is one of the themes in the preaching in Acts, for both Peter (2:40; 4:12; 11:14; 15:11) and Paul (13:47; 16:31; 28:28), as well as in some quoted speech in the Gospel (Luke 19:9–10), especially in the special Lukan introduction (1:71, 77; 2:30). (For “salvation,” see further comment at Acts 2:20; 27:20.) Here “this salvation” is “sent” first to Israel (Acts 13:26; cf. 3:26; a “message sent” to Israel in 10:36); later Paul will emphasize that “this salvation” has also been “sent” to the Gentiles (28:28). As noted above, in the immediate context, the “message of this salvation” refers to the message about the promised Savior (13:23).

Although Paul tactfully includes himself among those who are hearing the message (“us” referring to all Jews and God-fearers of his day), Paul is clearly the vehicle for his audience's hearing and hence stands in continuity with the prophets presupposed in 13:23–25 (see also 13:47 and comment there).

II. JESUS'S DEATH AND RESURRECTION (13:27–31)

Paul shifts here from announcing the promise about the Davidic deliverer and John's prophecy about the greater coming one to focusing on Jesus's death and resurrection, the means of salvation announced in 13:26.

856. A biblical passage was also a “word” (1QpHab II, 5; V, 3; X, 9; XII, 2, 12).

857. For the kerygmatic history of “word” in the OT, see Pillai, *Interpretation*, 30–32 (although in Hebrew, even more than in Greek, the term bore a variety of senses).

858. C. Williams, *Acts*, 163, cites the nuance of “life” in the Aramaic or Syriac word for “salvation” (cf. “this life” in Acts 5:20; cf. Marshall, *Acts*, 118), but neither Paul nor Luke's source would have used Aramaic in addressing a Greek-speaking synagogue (Bruce, *Acts*¹, 267). The connection simply attests independently the obvious association between life and salvation in ancient thought.

(1) *Executing Jesus* (13:27–29)

Like Peter preaching to Jerusalemites in 3:17, Paul here notes the ignorance of Jesus's enemies to seek to mitigate the guilt of Israel, in order to appeal to his Diaspora hearers (13:27).⁸⁵⁹ Still, ignorance could be deliberate (Luke 11:52). Jerusalem's role in salvation history may help explain its mention here⁸⁶⁰ (cf. Acts 13:31; its priority in 1:8 as well), or it may dissociate Paul's Diaspora audience from the full force of the moral responsibility for Jesus's rejection in Jerusalem. But the historical content of Paul's speech made such mention natural, in any case.

Many Jewish hearers could cite Jesus's death at the hands of the Jerusalem leaders (cf. the lament in Luke 24:20–21) to argue against his being genuinely the Messiah, but rhetoric customarily sought to turn potential disadvantages into advantages.⁸⁶¹ How did the leaders' hostility to Jesus fulfill Scripture? In addition to particular texts about righteous sufferers, Stephen's speech may suggest a way that Luke will not rehearse here: salvation history includes a history of God's people in which they (and sometimes their leaders) rejected the deliverers and prophets God gave them. The hostile leaders of Jerusalem, in fact, contrast starkly with the deliverer leaders God had given through history (Acts 13:20–25). That those who condemned Jesus fulfilled Scripture fits an irony that runs throughout Luke-Acts.⁸⁶²

Other early Christian writers, including Paul (Rom 3:21; 16:26), summarized the foretelling of Jesus's sufferings with global citations of "prophets" (1 Pet 1:10–12; John 1:45), but Luke is the most prominent user of this technique. Luke elsewhere recognizes that Scripture was read in synagogues "on every Sabbath" (Acts 15:21; see comment on Acts 13:15). Although most scholars doubt assigned readings from the prophets for various Sabbaths already in this period,⁸⁶³ there is little question that the prophets were also read, at least in synagogues that could afford scrolls beyond the law (cf. 8:30).⁸⁶⁴

The text emphasizes that the leaders executed Jesus without grounds (13:28). Luke's apologetic includes an emphasis on Jesus's innocence (e.g., Luke 23:4, 14–15, 22, 47).⁸⁶⁵ "Found" echoes Pilate's finding no guilt in Luke 23:4, 14 and especially finding no "cause for death" (αἴτιον θανάτου) in 23:22; "requesting" his death echoes 23:23, 25; Acts 3:14.⁸⁶⁶ Luke includes no formal Jewish trial, and so "condemn" in Acts 13:27 need not by itself signify formal condemnation in a court setting.⁸⁶⁷ In the larger context of Luke's work, such language also connects Paul with Jesus, since the authorities sought to ascertain the "cause" of charges against Paul (22:24; 23:28; 25:27) and found them baseless (25:18; 28:18), the real cause being his genuine faithfulness to his heritage rather than to how others had defined that heritage (28:20).

859. Cf. Foakes-Jackson, *Acts*, 117; O'Neill, *Theology*, 86; Pillai, *Interpretation*, 34 (rightly comparing the excuse for both Jewish and Gentile hearers, in 3:17 and 17:23, 30). On degrees of culpability for ignorance, see comment on Acts 3:17; cf. 1 Tim 1:13. For Jewish and Gentile ignorance behind rejecting Christ in Paul, see Rom 10:2–3; 1 Cor 2:8; for the ignorance of leaders who opposed Jesus, see 1 Cor 2:8 (according to the most probable interpretation).

860. Pillai, *Interpretation*, 33.

861. E.g., Heath, "Invention," 97. Paul also knew how to turn apparent disadvantage to advantage; e.g., 2 Cor 12:13; Gal 3:13.

862. See Ray, *Irony*, 155–56 (in his larger work connecting Luke's motifs of prophecy fulfillment and Israel's rejection by way of irony). Luke may have found irony in passages such as Isa 53:3, 8.

863. Cohen, "Earliest Evidence," finds some evidence for readings in Philo; if correct, at least some later standard seasons' readings may reflect early tradition used by some ancient scholars.

864. Without such readings, it seems difficult to explain the many allusions to the prophets in the NT, at least some of which the authors probably expected their audience to notice. They were viewed as Scripture (Jos. *Ag. Ap.* 1.40); the Essenes may have focused on them more than others (cf. *War* 2.159).

865. Cf. Lake and Cadbury, *Commentary*, 153; Witherington, *Acts*, 411.

866. Cf. Johnson, *Acts*, 234.

867. See Harvey, *History*, 174–75. Luke of course knew the tradition in Mark.

For Pilate's role (not of major relevance to his hearers), see comment on Acts 4:27. We should not think it implausible that some members of a synagogue in Asia Minor would have heard of Pilate's name. Travelers networked Jewish communities throughout the empire, but even if they knew little about other locations, they would know something about the administration of Judea. Pilate was notorious and also was deposed only about a decade earlier, and so it is reasonable that many members would have heard of him; anyone who had not, however, might well infer his role from the context, as well as that Paul had reliable knowledge of the affairs he was describing.⁸⁶⁸ Luke's own audience, of course, knows Pilate well enough from Luke's Gospel and probably from the earlier passion tradition as well.

Paul's description may include an element of ironic pathos in mentioning the "tree" (13:29). The term here for cross is "tree" or "wood" (see 5:30 and comment there). The cross had evolved from a torture stake; Latin sometimes paraphrases *crux* as *arbor infelix*.⁸⁶⁹ Further and most relevant (see Gal 3:13 for Paul's own citation), the LXX spoke of hanging a dead victim on a ξύλον to expose the corpse to posthumous shame before sundown (Deut 21:22–23).⁸⁷⁰ A "rejected deliverer" (see comment on Acts 7:9–42, esp. 7:35–37) could hardly be rejected in a more grotesque and shameful manner.⁸⁷¹

Luke's précis of Paul's speech includes Jesus's burial (Acts 13:29), perhaps underlining the genuineness of Jesus's physical death and resurrection. Some scholars think that the text claims that Jesus's elite Jerusalemite accusers buried Jesus, but they probably read too much into "a concise summary."⁸⁷² A member of that class, however, did provide Jesus's burial, attested in all four Gospels (with somewhat different details, Luke 23:50–53).⁸⁷³ What "is written" about Jesus's suffering here presumably fits the rejected-deliverer pattern (see comment on Acts 7:35–37; including the persecuted-prophets motif [e.g., Luke 11:47–50], on which see comment on Acts 7:52) and probably the righteous-sufferer pattern (see comment on Acts 1:20) and Suffering Servant passages as well (see comment on Acts 8:32–33). In any case, Luke, like a number of other NT writers (e.g., 1 Cor 15:3; 1 Pet 1:10–11; Mark 9:12; 12:10; 14:21, 27; 15:34; Matt 26:24, 31; John 2:19–22; 19:24, 28, 36–37), believed that Scripture foretold Jesus's sufferings (Luke 24:26–27, 46; Acts 3:18; 17:2–3; 26:22–23). On the use of "written" for Scripture, see comment on Acts 1:20.

(2) *God Raised Jesus (13:30–31)*

The motif of raising up appears throughout the section, referring both to David (Acts 13:22) and to Jesus's resurrection (13:30, 33, 34, 37).⁸⁷⁴

868. "Pilate" was not, however, a common Roman name (Sherwin-White, "Pilate," 867).

869. Pillai, *Interpretation*, 40. Cf. Sen. Y. Ep. 101.14 (crucifixion as "the 'accursed tree'") in Brown, *Death*, 947. Non-cross trees had also been used for hanging (Diod. Sic. 33.15.1); early Christian tradition supported the t-shaped cross for Jesus (Evans, *World*, 77); the earlier report of the "inscription above him" (Luke 23:38; also Matt 27:37; though Mark 15:26 and John 19:19–20 are not specific) also suggests that the *palus* extended above the *patibulum*.

870. Jos. Ant. 4.202 depends on this passage; but Philo allegorizes it (Knox, *Jerusalem*, 132, citing Philo *Posterity* 17). Given the rarity (though not uniqueness) of calling the cross a "tree," Deut 21 is probably in view (Morris, *Cross in New Testament*, 142, though Luke need not emphasize the curse here). On Paul's theology of the cross, see, e.g., McGrath, "Cross"; treating the Messiah's crucifixion as a contrast with imperial honor (cf. 1 Cor 1:18–29), see Kim, *Introduction*, 73–74.

871. On various early Jewish approaches to the curse in Deut 21:23, see Bernstein, "Study." Justin may follow Paul's usage in Gal 3:13 (Stylianopoulos, *Justin*, 105). In the *Temple Scroll*, one should be hanged on a tree for treason (11QT LXIV, 7–8) and evading the law (LXIV, 10–12).

872. Conzelmann, *Acts*, 105; also Pillai, *Interpretation*, 39. If they did offer such a burial, it would presumably be a dishonorable one (see McCane, "Shame," 452).

873. For the reliability of this tradition, see Brown, *Death*, 1240; Davies and Allison, *Matthew*, 3:647; Keener, *Matthew*, 690; idem, *John*, 1158–59; supporting Jesus's burial, see, e.g., Brown, "Burial"; Evans, *World*, 117–30, esp. 120–30.

874. Pillai, *Interpretation*, 81. For Jesus's resurrection in this speech, see fuller discussion in Anderson, *Raised*, 234–60.

On the character of the appearances in 13:31, see comment on Acts 1:3. Appeal to witnesses was standard in forensic rhetoric (e.g., Lysias *Or.* 3.14, §97), and this could mean to as many witnesses as available (even if the speaker avers their existence without summoning all to testify; 3.27, §98). See discussion on witnesses at Acts 1:8. Although Paul's speech is primarily deliberative in its intent (Acts 13:41, 46), mixed speech genres were common;⁸⁷⁵ witnesses appear in forensic rhetoric because a matter under dispute must be proved, which is also the case with the basis for the deliberative appeal here.

d. Proofs and peroratio (13:32–41)

Having claimed Jesus's resurrection on the basis of witnesses (13:30–31), Paul now establishes that it fulfills the Scriptures (including the pattern of God's benevolence he has already narrated). He moves from scriptural proofs (13:32–37) to a concluding *peroratio*, inviting faith (13:38–39) but warning (again from Scripture) against unbelief (13:40–41).

I. JESUS'S RESURRECTION FULFILLS SCRIPTURE (13:32–37)

(1) The Promise Fulfilled (13:32)

The ancestral promise that Paul now announces is founded in Scripture, including the Scripture passages he will now lay out (13:33–37). When Paul transitions from the Galilean witnesses (13:31) to "evangelizing" in the first-person plural (13:32), he links himself with the first witnesses not so much by mentioning his analogous experience (as in 1 Cor 15:5–8; compare ὠφθῆναι in Acts 13:31 with ὀφθεῖς in 9:17) as by the continuity of their shared message.⁸⁷⁶ The good news of the promise being preached to them is identical with the message of salvation in Acts 13:26; Luke consistently grounds Jesus's story (13:23–31) in Israel's story (13:17–22), as its proper climax. The promise here includes the promise of a Davidic Savior (13:23), fulfilled in raising up Jesus (13:33) as God raised up David (13:22).⁸⁷⁷ This fits the Davidic promises in Pss 2 and 16 (Acts 13:33, 35), since David prophesied of his descendants (Acts 2:25–31), and also the promise to David in 13:34. Yet this passage describes it as the promise "to the patriarchs" (as in 26:6); although this could simply mean to the ancients in general, it probably includes the promise to Abraham (7:17). For Luke, though the promise must extend beyond what Abraham explicitly heard, all the promises simply unfold the one promise of blessing made to Abraham (7:17; 13:23, 32–33; 26:6–7).⁸⁷⁸

(2) Resurrection Sonship (13:33)

The repetition of "promise" from 13:32 clarifies the syntax and might be emphatic.⁸⁷⁹ Perhaps both Acts' public reader and first-century hearers' construal of Paul in the narrative world would have used here a gesture for quotations, extending "a slightly

875. Aune, *Dictionary of Rhetoric*, 307, 419.

876. This is a Lukan emphasis, though one with a genuine historical foundation (see 1 Cor 15:1–11; Gal 1:8–9; 2:7–9). See fuller discussion in the commentary introduction, Keener, *Acts*, 1:304–8 (esp. 307–8); cf. 499–500.

877. Luke clearly understands the Davidic promises in a manner quite different from the often-political framework in which they were traditionally read (cf. Tuckett, "Christology," 162). Nevertheless, Acts 13:33 does recall a specifically Davidic promise (Cotton, "Gospel," 285).

878. See Dahl, "Abraham," 148. The promise concerns especially his seed and (land) inheritance, narrowed down through the Davidic promise to the Messiah, and (concerning the land) the consequent restoration of the kingdom.

879. On repeating a word for clarity, see Anderson, *Glossary*, 37 (noting that Demet. *Style* 103 thought it elevated speech stylistically).

drooped index finger, with the two outer fingers curved.”⁸⁸⁰ For the frequent formula “it is written,” see comment on Acts 1:20.

Identifying a work as “the second book” (Polyb. 3.26.5) or second psalm was a natural way to help the reader locate it; given the size of the Psalter, this was a useful specification. Yet the manuscript tradition is quite divided on the mention of the “second” psalm here. This is not surprising since there remained differences of opinion in arranging and designating some psalms. Not only the sequence but to some extent the content of the canonical book of Psalms remained in flux when many of the Qumran psalms scrolls were written (see, e.g., 4Q88; 11Q5).⁸⁸¹ Perhaps most to the point, some treated Ps 1 as the introduction to the Psalter, making our Ps 2 the “first” psalm in some Western manuscripts,⁸⁸² as in *Midrash Tehillim*.⁸⁸³ Regardless of its numeric designation, its role as introductory to at least the first two books of Psalms (which, as the superscriptions suggest, early Judaism mostly regarded as Davidic) made it prominent and ripe for messianic application.

Originally an enthronement psalm,⁸⁸⁴ by this period Ps 2 was naturally usually understood by interpreters with reference to the ultimate Davidic ruler, the Messiah, and hence eschatologically.⁸⁸⁵ This is clear in 4QFlor 1 I, 18–II, 1. The rabbis also interpreted it messianically.⁸⁸⁶ Probably the cultic acclamation of Davidic rule in Israel's royal psalms provided the earliest commentary on the promise of 2 Sam 7. Qumran's 4QFlor combined discussion of 2 Sam 7:10–14 with Ps 2:1–2 (and Ps 1:1).⁸⁸⁷ This work (4Q174 1 I, 11–13) also applies 2 Sam 7:11c, 12b, 13b–14a (quoted in 4Q174 1 I, 10–11) to the end-time “shoot of David” (Isa 11:1) and raised-up fallen booth (Amos 9:11; cf. Acts 15:16) and branch (cf. Jer 23:5; 33:15; Zech 3:8; 6:12).⁸⁸⁸ Some scholars find an implicit connection between 2 Sam 7 and Ps 2 here, linked via *gezerah shevah*.⁸⁸⁹

In Acts' speeches, “Son of God” appears only in Paul's preaching (though it occurs only here and in Acts 9:20), although Luke affirms the same claim (Luke 1:32–35). It also appears in Paul's letters (e.g., Rom 1:4; 2 Cor 1:19; Gal 2:20) but likewise

880. Shiell, *Reading Acts*, 56, noting that orators often gestured before quotes instead of mentioning (as here) that they were quoting.

881. Wise, “Introduction to Apocryphal Psalms”; cf. Wilson, “Date.” Various editions continued to circulate at Qumran in the first century c.e. (Flint, “Psalms in Light of Scrolls”). The way the canonical psalms were divided, rabbis counted 147 (*y. Šabb.* 16:1, §9); many kept writing psalms (e.g., 4Q380; 4Q381; 4Q88; 11Q5–6; 4Q448; 1 Cor 14:26).

882. Wilson, *Psalms*, 1:92; idem, *Editing of Psalter*, 204–6.

883. Hansberger, “Mose.”

884. Bright, *History*, 225–26; Harrelson, *Cult*, 86–87; de Vaux, *Israel*, 109. The enthronement decree resembles those in Assyrian and other texts (cf. *ANET* 267, 370, 383; Dahood, *Psalms*, 1:11–12; Gordon, *Near East*, 254) and an adoption formula (de Vaux, *Israel*, 112).

885. Longenecker, *Christology*, 113. Bons, “Psaume 2,” even argues that it was redacted after the exile for an eschatological application, such as appears in the Qumran scrolls and the NT. It could easily be linked with Ps 110 in Acts 2:34–35 (see Hengel, *Son*, 23). *Pss. Sol.* 17:23 uses Ps 2:9 in a messianic passage, although “son” (Ps 2:7) is not mentioned.

886. See, e.g., *b. Sukkah* 52a, bar.; *Gen. Rab.* 44:8; *Midr. Pss.* 2, §9 (on Ps 2:7; though late). More fully, see Lövestam, *Son and Saviour*, 17–21 (noted by Bauckham, *Jude*, 219). Part of Josephus's apologetic may have played down potential messianic overtones in 2 Sam 7 (Avioz, “Nathan's Oracle”).

887. E.g., Longenecker, *Exegesis*, 98 (also noting [n. 67] Ps 2:7 in 3Q2); see discussion of 4QFlor (= 4Q174) in Brooke, “4Q174.”

888. Bergmeier, “Erfüllung,” argues that 4Q174 II, 17–III, 13 may apply 2 Sam 7:10–14 to the end-time community and temple. On 2 Sam 7:1–17 in early Judaism (OT; 4Q174; NT), see, e.g., Robert, “Avenir.” On the “branch,” see Isa 4:2; 11:1; Jer 23:5; 33:15; Zech 3:8; 6:12; 1QH^a XIV, 15; XV, 19; XVI, 6, 8, 10; cf. *Test. Jud.* 24:4 if not an interpolation. *Nezer* may be associated with Jesus in later rabbinic texts (*b. Sanh.* 43a, bar.; cf. Herford, *Christianity*, 95–96).

889. See Doeve, *Hermeneutics*, 172–73; Longenecker, *Exegesis*, 98 (noting also Lövestam, *Son and Saviour*, 6–15). Dumais, “Language,” finds adaptations in the language of 2 Sam 7 in Acts 13.

elsewhere.⁸⁹⁰ Paul also spoke of the resurrection as declaring Jesus's sonship in fulfillment of Scripture (Rom 1:2–4).⁸⁹¹

The announcement of Jesus's sonship here sounds as if it is declared by Jesus's resurrection, his exaltation to the Davidic throne of which Ps 2:7 speaks.⁸⁹² This interpretation fits the analogous use of Ps 2 in Heb 1:5⁸⁹³ as well as Paul's teaching (or adaptation of earlier tradition)⁸⁹⁴ in Rom 1:4 (cf. perhaps, but not likely, also 1 Thess 1:10). All of this fits the association of the psalm's sonship declaration with enthronement in the psalm's probably original context. The entire Lukan context is somewhat more complex. In Luke's Gospel, Jesus is already Son (Luke 1:35;⁸⁹⁵ cf. 1:32, though it is future; 22:70), and the Father announces Jesus's sonship in language echoing Ps 2 (Luke 3:22; cf. 9:35; acknowledged by demons, cf. 4:3, 9, 41; 8:28).⁸⁹⁶ Luke is not, then, "adoptionist" in associating Jesus's sonship with the resurrection, as if Jesus became God's Son only at the resurrection.⁸⁹⁷ Nevertheless, this verse seems to argue that Jesus's sonship is made publicly known to humanity in a special way at his resurrection (Acts 2:36), which baptism merely prefigured.⁸⁹⁸ The use of ἀνίστημι in 13:33 and 13:34,⁸⁹⁹ synonymous with ἐγείρω (13:22, 30, 37), may evoke 2 Sam 7:12,⁹⁰⁰ though it also applies to resurrection (Isa 26:14, 19; Dan 12:2, 13). If so, however, it is Luke's play on words; in view of Acts 13:30–31 and especially 13:34, Luke clearly points to Jesus's resurrection (cf. 2:24, 32).⁹⁰¹

(3) Promise to David (13:34)

The sermon introduces the verses not randomly but based on the standard exegetical technique *gezerah shevah*, linking keywords.⁹⁰² (Most of the early Jewish exegetical

890. E.g., Mark 1:1; John 3:18; 5:25; Heb 4:14; 6:6; 7:3; 10:29; 1 John 3:8; 4:15; 5:5, 10–13, 20; Rev 2:18.

891. Noted by Baum, "Paulinismen," 421–22.

892. It probably includes the exaltation to God's right hand (Acts 2:33–35) as well as the resurrection, in contrast to following quotations (Steyn, *Septuagint Quotations*, 172–76). This passage treats Christ as the fulfillment of the promise in Ps 2:7 (Bellinger, "Psalms and Acts," 140–42).

893. Cf. also Heb 5:5, where it is midrashically linked with Ps 110:4 (cf. the exaltation in 110:1, in Heb 1:13) in Heb 5:6. Heb 1:5 links it with 2 Sam 7:14 (noted further below).

894. Pre-Pauline tradition is possible in the passage, but Schweizer's claim that Paul is "correcting" it ("Davidic 'Son,'" 186) is excessive.

895. Nevertheless, Luke did not apply the psalm's "begetting" to the incarnation, as did some church fathers (Cyril of Alexandria in *Cat. Act.* 13.33; Bede *Comm. Acts* 13.33 [both in Martin, *Acts*, 167]), who appear to have read their later, more limited theological vocabulary into the text.

896. Bock, *Proclamation*, 245–49, argues that the text claims that Jesus must be raised *because* he is already the Son. For the likely allusion to Ps 2:7 at Jesus's baptism, see, e.g., Marshall, "Son or Servant?," 332–33; for some detractors, see, e.g., Cranfield, "Baptism," 61.

897. Noted by Dunn, *Acts*, 180–81; cf. also Goulder, *Type and History*, 53. In some sense, the virgin birth made him God's Son (Luke 1:32–35); in another, his baptism declared it (3:22); ultimately, his resurrection confirms it.

898. Cf. Lampe, *Seal*, 39; Robinson, *Studies*, 160–61; Uprichard, "Baptism."

899. The noun cognate is Paul's typical phrase for the resurrection both in his letters and in Acts (Porter, *Paul in Acts*, 157), though it is by no means limited to either (John 5:29; Acts 1:22; 2:31; 4:2, 33; Heb 6:2; 1 Pet 1:3; 3:21; Rev 20:5–6).

900. Heb 1:5 links 2 Sam 7:14 with Ps 2:7. The connection is midrashic (via *gezerah shevah*) but not artificial. When David died (2 Sam 7:12), God would adopt and defend David's son, taking the role of the new king's father (7:14); because the promise was for David's house "forever" (7:13, 16), it applied beyond Solomon to David's entire lineage. Israel's cult celebrated this promise (Pss 2:7; 89:26–27), and prophets echoed it for the idealized king of the future restoration (cf. Isa 9:6–7; Jer 23:5–6). The connection with 2 Sam 7:12, however, is at most suggestive; ἀνίστημι appears about 450 times in the LXX (including books of the Apocrypha; 24 times in Psalms and more than 110 times in 1 Samuel–2 Kings) and more than 100 times in the NT (with varied senses).

901. With, e.g., Hansen, "Preaching," 302; contrast Larkin, *Acts*, 202. Schweizer, "Davidic 'Son,'" 186, 190, thinks that Luke exploits the ambiguity of the language, as in Acts 3:22; 7:37.

902. *Mek. Pisha* 5.103; *Mek. Nez.* 10.15–16, 26, 38; 17.17 (Lauterbach, 1:41; 3:75–77, 130); *b. Ber.* 9a; 35a; *B. Qam.* 25b; *Git.* 49a; *Ker.* 5a; *Qidd.* 15a; 35b; *Menaḥ.* 76a; *Naz.* 48a; *Nid.* 22b–23a; *Roš Haš.* 3b; 34a;

middot have analogues in Greek logic, from which they were borrowed,⁹⁰³ and so the method was familiar over a broad geographic and cultural range. Only those with significant biblical literacy would catch all the allusions to context of the passages cited, but the connections among the explicit citations here are obvious enough to be caught by everyone who is attentive.)

The verse cited here (Isa 55:3) is connected by means of an implicit *gezerah shevah* with David the (implicit) royal psalmist in Acts 13:33, as also the next citation in 13:35.⁹⁰⁴ “Holy” (ἁγία) here especially explicitly connects with “holy” (ἁγιόν) in 13:35. As a measure of the significance of the term’s recurrence for the midrashic connection that Luke makes here,⁹⁰⁵ we may consider the term’s rareness (eight NT occurrences, three in Luke-Acts) compared with Luke’s use of ἅγιος (seventy-one times); these two verses represent two of the three uses in Luke-Acts (the other is again Ps 16:10 [15:10 LXX] in Acts 2:27).⁹⁰⁶ The exegetical link with Ps 16:10 (15:10 LXX) is essential to connect the promise in Isaiah explicitly to the resurrection hope.⁹⁰⁷ In light of Acts 2:27–29, however, Luke may find it implicit even in the use of Isa 55:3: an eternal covenant and faithful mercies to David make sense, on Pharisaic and Christian presuppositions, only if David will be raised from the dead.⁹⁰⁸ But the promise must extend beyond David personally (Acts 13:36), as a promise on behalf of the people.⁹⁰⁹ Jesus, then, does not annul the promises to David or the prophets but demonstrates God’s faithfulness to fulfill them.⁹¹⁰

The term “holy” appears only in the LXX form of Isa 55:3, but Diaspora Jews would use this text as authoritative, and even Palestinian rabbis mixed and matched text types (including the Greek) to argue their case. In the LXX, the “holy things” may refer to the promises or oracles to David.⁹¹¹

Luke probably shows awareness of the context of Isa 55:3. This passage affirms God’s promise to Israel’s people that if they turn to him (55:1–3a), he will make an

Sanh. 40b; 51b; 52a; *Šabb.* 64a; *Tem.* 16a; *Zebah.* 18a; 49b–50b; *Exod. Rab.* 1:20; cf. Chernick, “Application”; the use of one authoritative text to interpret another also appears elsewhere (e.g., CD VII, 15–20).

903. So, e.g., Lieberman, *Hellenism*, 47–82; Levine, *Hellenism*, 113–16; Stambaugh and Balch, *Environment*, 103.

904. Readers by the NT period considered the first book of Psalms especially Davidic, although the superscriptions developed over time and Davidic associations need not be construed as authorship claims even there (cf. Wilson, *Psalms*, 75–81).

905. It is far less significant in the LXX itself, which includes fifty-six uses, mostly in Psalms (twenty-six uses), Proverbs (nine uses), and Wisdom (eight uses) (elsewhere in Greek-speaking Judaism, cf. twenty uses in *Pss. Sol.* 2:36; 3:8; 4:1, 6, 8; 8:23, 34; 9:3; 10:5–6; 12:4, 6; 13:10, 12; 14:3, 10; 15:3, 7; 16:0; 17:16). But this is the only occurrence in Isaiah. Less relevant for Luke’s audience or most of Paul’s synagogue audience, the paired deities “Holy and Just” were deities distinctive to Phrygia; see Mitchell, *Anatolia*, 2:25–26; Rives, *Religion*, 60; Niang, *Faith*, 51. Two of Luke’s three uses of this term for “holy” appear only here (Acts 13:34–35; elsewhere 2:27), in a synagogue familiar with surrounding religion; yet his cognates of “just” (13:38–39) are far more frequent (close to thirty times), and his term for “holy” appears more than seventy times in the LXX. For the more traditional divine title “holy one” in the Hebrew Bible and ancient Middle East, see van Koppen and van der Toorn, “Holy One.”

906. “Corruption” also appears only in the quotations of Acts 2:27, 31 and here (13:34–37) in the NT (Steyn, *Septuagint Quotations*, 184).

907. Doeve, *Hermeneutics*, 186. To make the connection even more explicit, διαθήσασθαι (the verb is often used with establishing covenants in the LXX) in Isa 55:3 LXX is rendered δώσω (since Luke omits explicit mention of the covenant), preparing for the δώσεις of Acts 13:35 (Pillai, *Interpretation*, 88).

908. The covenant in Isa 55:3, not part of Luke’s quotation (as Schmitt, “Kerygme,” 163, emphasizes), probably alludes to the covenant of peace in 54:10.

909. See Bock, “Scripture and Realisation of Promises,” 50.

910. Kee, *Every Nation*, 167. Bock, *Proclamation*, 254, points out that the resurrection guarantees the Davidic covenant’s “eternal character” instead of exhausting the promise of Isa 55:3 (see further 249–54).

911. So Johnson, *Acts*, 235; followed by Witherington, *Acts*, 412 (citing *Jos. Ant.* 8.115; *Wis* 6:10). The term appears often in funerary inscriptions, for the deceased among the holy (*CIJ* 1:37, §55; 1:71, §100; 1:78, §111; 1:253, §321; 1:267, §340; 1:282–83, §363; 1:468, §652; in Latin, 1:166, §233).

eternal covenant with them as he showed mercy to David (55:3, end) and made him a witness (μαρτύριον; cf. the Isaian motif in Acts 1:8) and leader (ἄρχοντα; cf. Acts 7:35) to nations (Isa 55:4);⁹¹² so also will Israel be glorified and call to and draw nations (55:5), at its restoration (55:12–13). In the further context, Gentiles and eunuchs (cf. Acts 8:27) are welcome in this covenant (Isa 56:4–7). Isaiah 55 may also be linked in the author’s mind with the servant passage in Isa 52:13–53:12 (cf. Acts 8:32–33); compare “glorified” in Isa 55:5 with 52:13, and nations in both 55:4–5 and 52:15. Luke might also use the more common verb δίδωμι as part of the link.⁹¹³ God would “give” the “holy” and confirmed promises; therefore God would not “give” the “holy” fruit of these promises over to decay.

(4) *Incorruptible Holy One (13:35–37)*

The final prophecy in the series (Acts 13:33–35) naturally concludes the preceding context, and it becomes the basis for comment in 13:36–37. The connection between Isa 55:3 (in Acts 13:34) and Ps 16:10 is natural midrashically, given the common key term ὅσιος⁹¹⁴ (and possibly also δίδωμι, as suggested tentatively above). See comment on Acts 13:34. That Ps 16:10 must apply to Jesus in its ultimate, literal sense rather than to David is demonstrated by the fulfillment, in Acts 13:37, for Jesus and lack of fulfillment, in 13:36, for David. On Ps 16, see also comment on Acts 2:27, 31; whereas here Paul links Ps 16 with Ps 2 (in Acts 13:33), in Acts 2 Peter linked it with Ps 110, another psalm about an exalted one.

In Acts 13:36–37, Paul shows (as Peter did in 2:29, 34) that David could not have fulfilled the promise himself, so that this reference must look beyond David to his ultimate royal descendant. David served⁹¹⁵ not himself, as if God’s purposes for David were for David’s own sake alone, but God’s plan,⁹¹⁶ the same plan of God that elsewhere in Acts is revealed in Scripture and eventuates in Jesus’s death and resurrection (2:23; 4:28; 5:38–39; 20:27; cf. Luke 7:30).⁹¹⁷ His service to God’s will was, however, voluntary (cf. Acts 13:22), not simply as an unwitting instrument like some other biblical characters (e.g., Isa 10:5–7, 15; Rom 9:17), as Acts 13:22 makes clear.⁹¹⁸

For “sleep” as a standard figure for death, see comment on Acts 7:60. “Added to his fathers” is an idiom for joining one’s deceased ancestors in their deceased state (Gen 49:29; Judg 2:10; 2 Kgs 22:20; 2 Chr 34:28; 1 Macc 2:69); David “slept with his fathers” in 1 Kgs 2:10.⁹¹⁹ That David died shows that the promise was not immediately

912. For this context of Gentiles, see also van de Sandt, “Acts 13, 32–52”; Dupont, *Salvation*, 152. Others also note that Luke thinks of the context when citing passages in Isaiah (Secombe, “Luke and Isaiah”).

913. Though it is a more common term in general, about ninety-five times in Luke-Acts. In the immediate context, it indicates benevolence in Acts 13:34, as in 13:20–21.

914. Doeve, *Hermeneutics*, 174. The term ὅσιος appears as a distinctive (albeit pagan) divine title in this very region of South Galatia (see Mitchell, *Anatolia*, 2:25 [linked with a twin deity, δίκαιος; the concepts were easily linked, as in Arius Did. *Epit.* 2.7.Sb.12, pp. 26–27.17–18]; cf. Kearsley, “Angels”), though we should not read too much into its use here (probably dictated by exegetical constraints).

915. Only Luke in the NT employs the term ὑπηρετέω, which can include financial support (Acts 20:34; 24:23) but has a much wider semantic range (cf. Sir 39:4; BDAG; noun cognate in Acts 26:16 if admissible), including in other early Christian texts (e.g., Ign. *Phld.* 11.1; *Barn.* 1.5; *Herm.* 87.2; *Diogn.* 11.1).

916. Miura, *David*, 177–87, argues that Acts 13 involves a prophetic David typology. In Scripture, David was raised up not just for his own sake (though he was more spiritually qualified than his predecessor, 1 Sam 13:14; 16:7) but especially for Israel’s (see 2 Sam 5:12). He was raised up because Saul disobeyed (1 Sam 15:28). He himself later disobeyed (2 Sam 11:2–27), with disastrous consequences (2 Sam 12–1 Kgs 1); although he could have been replaced during that time, God accepted his repentance (2 Sam 12:10–13; 15:25–26; 16:12).

917. Moessner, “Script,” 238.

918. Technically we could read either “served his generation by God’s purpose” or “served God’s purpose in his generation”; the latter is more likely (Acts 13:22; Bruce, *Acts*¹, 270), although the sense is close in either case.

919. Some other expressions were more common, but this one clearly appears in the LXX, so that the idiom would be familiar.

fulfilled for him (Peter makes the same argument in Acts 2:29);⁹²⁰ he experienced decay, but the psalmist promised one who would not even experience decay (13:35), which applies to the ultimate Davidic ruler, Jesus (13:37), whom God raised (13:30).

Although much Jewish tradition depicted positive biblical characters as heroes⁹²¹ (a pattern amplified in later Christian hagiography), Luke's theology is clear that each person apart from Jesus had only a limited (though valuable) role in God's larger purpose, which climaxes and is fulfilled ultimately in Jesus. David fulfilled God's purpose in his limited lifespan; his role was God's choice, just like the roles of the apostles in Luke's own narrative (Acts 1:2; 15:7).

II. FORGIVENESS THROUGH FAITH (13:38–39)

After proving that Jesus's resurrection fulfills Scripture (and before noting that his hearers' rejection of the message could also fulfill Scripture), Paul speaks of forgiveness through faith.⁹²² Here, too, Paul presumably drew on Scripture (such as Gen 15:6 [Rom 4:3; Gal 3:6; also Jas 2:23; *1 Clem.* 10.6; *Barn.* 13.7]; or esp. Hab 2:4 [cf. Rom 1:17; Gal 3:7; also Heb 10:38], in the very context of the Habakkuk verse quoted in Acts 13:41), but it is omitted in Luke's summary.

"Therefore" in Acts 13:38 may connect forgiveness with the hope of resurrection, tying the future hope of believers with Jesus's resurrection/vindication (13:33, 35). ("Know therefore" is conventional language in exhortation.)⁹²³ The context of Isa 55:3 (cited in Acts 13:34) might suggest further connections omitted in Luke's more compressed account; God will pardon those who turn to him (Isa 55:7).⁹²⁴

Forgiveness was thus part of the complex promise: the Davidic promise of a Savior (Acts 13:23); the salvation message in the prophets (13:26–27), as evidenced by the context of, for example, Isa 55 (part of which was just cited in Acts 13:34); and the promise to the ancestors (Acts 13:32). Israel's promised eschatological restoration to God's favor was now available through the eschatological event of Jesus's resurrection. (The forgiveness preached here is the salvation preached in 13:26, 32.) It thus fits both its Lukan context and the context of texts mentioned but not developed by Luke (which could imply a fuller source), raising again the question of the extent to which the speech reflects Lukan and/or Pauline language.

(1) *Lukan, Pauline, or Both?*

"Let it be known to you" (13:38) is typical Lukan language of gospel proclamation (Peter in 2:14; 4:10; Paul here and in 28:28); "men, brethren" (ἄνδρες ἀδελφοί) is also characteristic of Luke's speeches (see 13:15, 26; 15:7; comment on Acts 2:14). But in some of what follows, Luke apparently reproduces some characteristically Pauline thought. In 13:38–39,⁹²⁵ most scholars recognize some Pauline language. It is unlikely that Luke had read any of Paul's letters and extremely unlikely that he

920. The connection with Peter's speech is generally noted; e.g., Knowling, "Acts," 296.

921. See, e.g., comments on various characters mentioned by Stephen in Acts 7 (ad loc.).

922. Luke often speaks of faith in the context of miracles (Luke 5:20; 7:9; 8:25, 48, 50; 17:6, 19; 18:42); see esp. discussion at Acts 3:16. The subject of faith here is different, but its object (God/Jesus) remains the same. Just as Paul can apply Abraham's faith in God's promise of seed, for God's purpose in salvation history, as a model for Christian faith in Abraham's ultimate seed for the ultimate salvation-historical promise (Rom 4:23–24), Luke can employ justifying faith as the entrance into a life of faith, rather than something radically different from other expressions of faith. The common feature, although not all believers exhibit all aspects of this faith, is radical dependence on God.

923. E.g., *Test. Iss.* 6:1; *Test. Jud.* 20:1.

924. Cf. also Isa 54:7–9; the covenant of peace and compassion in 54:10, which informs the eternal covenant of 55:3.

925. The usual English and Greek texts divide the verses differently, but I treat them together also because they are conceptually difficult to separate.

had read those that articulate these matters most fully (Romans and Galatians).⁹²⁶ It is far more likely that Luke had some closer acquaintance with Paul's preaching on the subject.⁹²⁷

Some of the familiar traits in these verses are as follows, though they are not necessarily uniquely Pauline in the history of early Christianity,⁹²⁸ and most also have Lukan parallels:⁹²⁹

Acts 13:38–39	Lukan Parallels	Pauline or Deuteropauline Parallels	Other NT Writers
"Forgiveness of sins" through Jesus	Luke 24:47; Acts 2:38; 5:31; 10:43; 26:18 (Luke 1:77; 3:3; Acts 8:22; 14:17)	"Forgiveness of sins" in Jesus (Eph 1:7; Col 1:14) (implied in Rom 4:7; 5:9)	(Implied in Mark 1:4; Heb 9:22; 10:18; John 20:23; perhaps Jas 5:15) Jesus forgives (Mark 2:10) and is involved in divine forgiveness (1 John 1:7, 9; esp. 2:12)
"Everyone who believes"	Acts 10:43 (including Gentiles; Luke often speaks of "believing," however, e.g., 13:12, 41, 48)	Rom 1:16; 3:22; 4:11; 10:4, 11* (all welcoming Gentiles who trust God's provision of Christ); Gal 3:22; 2 Thess 1:10	John 3:15–16; 6:40; 11:26; 12:46, 48; 17:21; 1 John 5:1
"Justified"† from everything	Implied in Luke 18:14	Rom 3:24, 26, 28, 30; 4:5; 5:1, 9; Gal 2:16–17; 3:8, 24; Titus 3:7 (implied in Rom 8:33; 1 Cor 6:11; Gal 3:11)	(For forgiveness, see above; the language of "justification" is absent, but the idea is implied in 1 John 2:1)
Not "justified" by "the law"	—	Rom 3:20, 28; Gal 2:16; 3:11; 5:4 (cf. Rom 2:13; 4:2)	Contrast at least the wording in Jas 2:21, 24–25
"Law of Moses"‡	Luke 2:22; 24:44; Acts 15:5; 28:23	1 Cor 9:9§	John 7:23; Heb 10:28

* With a biblical source in Rom 10:11.

† Translations (e.g., NRSV, NLT, NASB) often render this "freed," also part of the term's semantic range (see BDAG; the NIV and TNIV include both nuances). It is less likely that the "everything" from which one is freed is the laws, given Luke's favor toward the law (e.g., Acts 21:26) and the nonsensical tautology that this would make of the stated alternative (the law of Moses could hardly free one from its own laws). The "all things" must refer instead to the sins of 13:38, paralleling justification regarding sins here with forgiveness of sins there.

‡ The phrase is not Luke's creation but reflects OT usage (Josh 8:31–32; 23:6; 1 Kgs 2:3; 2 Kgs 14:6; 23:25; 2 Chr 23:18; 30:16; Ezra 3:2; 7:6; Neh 8:1; 9:11, 13; Mal 4:4). Paul's complaint is not against the law but against his familiar phrase "law-works" (attested also in 4QMMT C 27, though cf. Abegg, "4QMMT," 710).

§ Obviously Paul, though employing the phrase rarely, nevertheless attributed the law to Moses (Rom 9:15; 10:5, 19; 2 Cor 3:15) and hence would not have disagreed with the formulation.

The language of "forgiveness of sins" is more Lukan than Pauline (though Paul certainly would not have objected to it), as is the specific phrase "law of Moses," but the language of justification by faith rather than works is distinctively Pauline (though Luke's inclusion of the language shows that he would not object to it).⁹³⁰

926. Given his association with Philippi, it is possible that Luke saw Philippians, which does contain some relevant language (Phil 3:9), but he would hardly know that it was characteristic only from the letter.

927. Hanson, *Acts*, 21–28, 38. Haacker, *Theology*, 143, notes that although everyone acknowledges that Acts 13:38–39 echoes Paul, some think the wording clumsy and not very accurately Pauline, because it identifies justification with forgiveness and uses "to justify" with "from." But both these characteristics appear in Paul, in a letter also addressing Jewish issues (Rom 4:5–8; 6:7).

928. Indeed, as Hays, *Conversion*, 71, rightly notes, Paul could take for granted (assuming that Gal 2:15–16 belongs to his quotation) that his fellow Jewish believers in Jesus accepted justification by faith in Christ (see also Dunn, *New Perspective*, 39). (We cannot be certain, however, that Paul's polemical summary here reflects the precise language employed on that occasion.)

929. Cf., e.g., Luke 18:9–14; 19:9–10; Acts 16:31. Instead of indicating that such language was not Pauline, however, they might simply suggest that such Lukan examples illustrate that Luke is closer to Pauline soteriology than, e.g., Matthew is.

930. Cf. Acts 15:9; as in Paul's letters (cf. Rom 3:9, 29; Gal 2:15–17; 3:8; Eph 2:8–11), justification by faith appears especially in the context of Gentiles' access to Israel's God (Acts 15:7–8; cf. 13:46–48). In Luke as in

Even this sense of “justification” is usually Pauline. Perhaps partly because he had found himself God’s enemy, rather than servant, through deeds based on his interpretation of the law, Paul recognized righteousness as only a gift of divine generosity, nothing boastworthy.⁹³¹ He became so convinced that all righteousness came only as God’s gift that he portrays any true good works as “fruit” (Gal 5:22–23) and accomplishments for God as gifts.

Of course, the language is not exactly like that of Paul’s letters (and certainly not borrowed from them); like many other ancient historians, Luke composes speeches in his words on the basis of his available source material, probabilities, and knowledge of the speaker’s level of rhetorical competence. Either condensing or expanding the tradition of Pauline preaching he has available would necessarily alter some Pauline wording, in addition to Luke’s own freedom to write in his own style. Further, Luke writes narrative containing brief speech summaries, not the detailed, lengthy, and nuanced arguments and diatribal counterarguments possible in a work such as Romans.⁹³²

Indeed, Luke may preserve authentic Pauline echoes elsewhere that we miss because modern Protestant interpretation has focused on the polemical letters Romans and (most polemical of all) Galatians,⁹³³ though Paul’s explicit emphasis on justification by faith rather than law is limited mostly to these letters despite occasional references elsewhere (e.g., Eph 2:8; Phil 3:9).⁹³⁴ Paul’s apparent hostility toward the law emerges especially in Galatians⁹³⁵ (it appears in Romans only if read through the lens of Galatians). But Galatians employs a more polemical form of rhetoric to address a particular crisis in the Galatian churches.⁹³⁶ It seems at least interesting that the one speech in Acts emphasizing justification by faith in Jesus instead of by the law (Acts 13:38–39) is addressed to the general region where the churches later most needed this message reinforced.⁹³⁷

Paul, faith rather than law leads to the gift of the Spirit, especially if we may read Luke (even the pre-Pauline part of Acts) in view of earlier Christian sources (Kilgallen, “Difference”). For one survey of scholarship on Paul and “justification,” see McGrath, “Justification”; on “faith” in Paul, Morris, “Faith.”

931. Cf. Phil 3:9, though admittedly the particulars of Paul’s language of righteousness are debated; for my argument, cf. briefly Keener, *Romans*, 27–29. Paul might not have appreciated the distinction between forensic and ontological applications of δικαιοσύνη as readily as his later interpreters; if God decreed one righteous forensically, one became new (cf. Rom 6:2–11) no less surely than God’s decree of light’s existence produced light (Gen 1:3). Though hyperbolically and in more general human terms, Paul speaks of sin exploiting the law, according to some including his own past case as an example, in Rom 7:7–13.

932. Dunn, *Acts*, 181, thinks that Luke has “only half grasped” Paul’s point; it would more charitably suffice to say that he has condensed Pauline language instead of spelling out the full proofs or explication. More exaggeratedly, Theissen, *Writing and Politics*, 85, thinks that Luke “would certainly fail” a Pauline theology test; Vielhauer, “Paulinism,” 42, doubts that Luke even knew justification’s significance for Paul. One wonders who is defining Pauline theology; on these grounds, one might wonder if the Paul of 2 Corinthians or 1 Thessalonians knew its significance either! Against exaggerated contrasts between Luke’s Paul and the epistolary Paul, see the discussion in Keener, *Acts*, 1:221–57 (esp. 250–57), following, e.g., Borgen and Porter; also (too recent for inclusion in my first volume) Thompson, “Paul in Acts.”

933. Some read Romans as softening and nuancing the polemical tone of Galatians (see esp. Tobin, *Rhetoric in Contexts*).

934. On authentic Pauline elements even regarding law and salvation, despite Luke’s adaptations, see Larsson, “Paul: Law and Salvation.”

935. Cf. Udoh, “Views on the Law”; Tobin, *Rhetoric in Contexts*, passim; Hübner, *Gesetz*.

936. Whether the anger is simulated (Isoc. *Ad Nic.* 23) or, more likely, heartfelt (Cic. *De or.* 2.45.189; Pliny *Ep.* 6.33.10), it affects style; on various forms of reproving letters, see Stowers, *Letter Writing*, 86, 89, 133–34, 166–67, 173; for invective rhetoric, see Quint. *Inst.* 6.2.20. Emotion (often observed in Galatians; e.g., Deissmann, *Light*, 237) was expected to produce elements of roughness (e.g., Isoc. *Antid.* 140, 310, 320). For various approaches to Galatians and rhetoric, see Anderson, *Rhetorical Theory*, 129–42; Aune, *Dictionary of Rhetoric*, 192–94. Though Galatians was not haphazardly composed (Harvey, *Listening*, 217–30), it has fewer rhetorical devices than most of Paul’s letters (286) and is less rhetorically crafted than Romans (Anderson, *Rhetorical Theory*, 239–40).

937. Ramsay, *Galatians*, 399 (counting Antioch as Galatian). That Luke knew something of Paul’s trouble with the Galatians is not at all improbable, especially on a later date for Galatians.

Some argue that Paul began using the language of justification only later, when he wrote Romans and Galatians (assuming the later date of Galatians, which I accept). Since it would have been the later Paul that Luke knew personally, it is possible that he employs such “later” Pauline language here. It is, however, by no means certain that Paul originated the terminology only in the first extant letter where we have it documented, and it does appear that our earliest glimpses of Paul already contain the essential elements that he could frame in that language.

For example, although Paul does not explicitly expound justification by faith in 1 Thessalonians, he employs πίστις or πιστεύω thirteen times, especially for embracing the gospel message, speaks of Christ delivering some from God’s wrath, and so forth. We cannot argue from silence that Paul would never have spoken of “justification” at this time, since that formulation becomes a crux in a debate occurring only in later letters. What we can argue is that his basic teaching of salvation through Christ is already evident in the earliest extant letter we have from him⁹³⁸—which is, after all, only ten to fifteen years before our last extant letter from him.⁹³⁹ Although the specific language of “justification” is not pervasive in Paul’s letters, the matter of dependence on Christ, not only for forgiveness but for all one’s moral and spiritual existence as a believer in Christ (understanding “faith” as dependence), is pervasive in the Pauline corpus.⁹⁴⁰ The forensic image is a particular application fitting this larger theological perspective.

Being “made righteous from all things” is more ambiguous than one would expect in Paul, but to claim that Luke has only “half grasped”⁹⁴¹ Paul’s point seems an exaggeration or even distortion. Luke could have stated the point more clearly, but the context suggests that the “all things” from which one is justified are the sins that are forgiven (Acts 13:38).⁹⁴² It is not the laws from which one is freed or justified; against that interpretation are both Luke’s favor toward the law (e.g., 21:26) and the nonsensical tautology this would make of the stated alternative (the law of Moses could hardly free one from its own laws).

(2) *Not against the Law (13:39)*

Although the Spirit’s activity compelled the Jerusalem church to admit Cornelius without circumcision, even Stephen praised the law itself (7:38, 53), as Luke

938. See also Kim, *New Perspective*, 85–99; Riesner, *Early Period*, 394–403; cf. Dunn, *New Perspective*, 36–38; Rainbow, “Justification.” Although the situation in the Corinthian correspondence did not require elaboration on this teaching, it does appear there (Kim, *New Perspective*, 99–100, cites 1 Cor 1:30; 6:9–11; 10:16f.; 11:23–26; 15:3–5; 2 Cor 3:1–4:6; 5:10, 14–21; more fully on 1 Cor 6:9–11, see Kim, *New Perspective*, 67–70). For consistency in his justification doctrine (allowing for improved articulation rather than intense development), cf. Hahn, “Entwicklung.” Contrast Donfried, *Thessalonica*, 89–90, overplaying the differences between 1 Thessalonians and later letters. By way of analogy, not all of Luther’s works stress justification, and had we lacked his early works, we would not know that he already held the same basic views on justification present in his later works (Hengel and Schwemer, *Between Damascus and Antioch*, 312–13).

939. In a mature theologian, we might not expect major shifts in that period; but Paul was a pastoral, missionary, praxis-oriented theologian in the heat of polemic, not a later systematician, and so we dare not rule out shifts, certainly in language. Cf. Hengel and Schwemer, *Between Damascus and Antioch*, 311.

940. Though not appearing in every paragraph, it is highly prominent in most of the correspondence after 1–2 Thessalonians and before the Pastorals.

941. Dunn, *Acts*, 181.

942. That Paul was a better writer than speaker (2 Cor 10:10) might allow that Luke, in fact, follows Paul’s ambiguous wording here; but this is not probable on the basis of Luke’s approach of condensing and rewording speech material, nor does it necessarily follow from Paul’s speaking abilities. It was his delivery rather than his logic that proved substandard (2 Cor 11:6; Keener, *Corinthians*, 34–35, 218–19), and even his letters sometimes lacked clarity (cf. 2 Pet 3:16), normally considered a literary virtue (*Rhet. Alex.* 25, 1435a.24, 34–36; 1435b.6–16, 19–22; Dion. Hal. *Thuc.* 40; Quint. *Inst.* 8.2.22; Suet. *Gramm.* 10; Fronto *Ad M. Caes.* 3.1; Diog. Laert. 7.1.59; e.g., Dion. Hal. *Demosth.* 5–6, 18; Photius *Bibl.* 166.109a, on Ant. Diog. *Thule*; cf. Rowe, “Style,” 123–24; Black, “Oration at Olivet,” 84).

himself does (e.g., Luke 2:22–24, 27, 39; 24:44). Rather than rejecting the law, Paul is interpreting it in light of the prophets.⁹⁴³ Paul's view of the law here introduces some tension into the narrative, a tension between the positive character of the law and its inability to save, also found in Paul's letters (esp. Rom 7:10–16).⁹⁴⁴ The issue is played out in Acts 15 (based partly on pre-Pauline precedent in Acts 10–11) but especially in later accusations that Paul undermines the law (21:21, 28; cf. 25:8), accusations the reader knows to be baseless (16:3; 18:18; 21:24; cf. 1 Cor 9:20).

For Luke, this is not a soteriology contradicting repentance and baptism (Acts 2:38) but a complementary one.⁹⁴⁵ Peter also preaches believing in order to receive forgiveness (10:43; 15:9, 11). Luke can depict conversion in terms of faith (4:4; 8:12–13; 11:17; 13:12, 48; 14:1, 23, 27; 15:5, 7; 16:31, 34; 17:12, 34; 18:8; 19:2) as well as obedience to the faith (6:7), turning to the Lord (11:21), or repentance (3:19; 8:22; 11:18; Paul in 17:30; 26:20), regardless of who is preaching. The church is also those who “believe” (2:44; 4:32; 5:14; 18:27; 19:18; 21:20, 25; 22:19; 26:18). Luke emphasizes different aspects of conversion in different passages; he expected repentance and faith as two aspects of the same event (20:21). Paul's letters also reveal that genuine faith must be expressed in genuine transformation (Rom 1:5; 6:1–23; 16:25;⁹⁴⁶ 1 Cor 6:9–11; Gal 2:17–20).⁹⁴⁷

What was the law unable to do? Later rabbis spoke of God's condescension (συγκατάβασις) in the law to accommodate Israel's weakness.⁹⁴⁸ Rabbis spoke of God's “concessions” in the law (cf. Mark 10:5; Rom 8:3; 1 Cor 7:6).⁹⁴⁹ The law could teach Israel righteousness (e.g., Luke 2:22–24; Rom 7:14, 16; cf. 1 Tim 1:8–9), but on early Christian assumptions it could not bring forgiveness to Israel; Scripture did, however, include the end-time promise of forgiveness (Luke 24:47; Rom 3:21–26; 11:26–27). At least for Luke, the phrase “everyone who believes” might (though need not) serve the same function as probably in Acts 10:43 and often in Paul (Rom 1:16; 10:11–13)—namely, that salvation includes Gentiles.⁹⁵⁰ Paul will cite a passage about “believing” in Acts 13:41.

943. See Perry, “Paul in Acts.”

944. Spencer, *Acts*, 146. Matera, *Theology*, 87–88, notes that Luke views the law positively except in Acts 15:10; the new era (Luke 7:28; 16:16) does not terminate the law (Luke 16:17).

945. Barrett, *Acts*, 652, thinks that the lack of mention of baptism at some points (in contrast to others, such as Acts 16:15, 33; 18:8) “may mean that baptism was differently evaluated in different strands of tradition, and . . . was not universal.” Luke, however, merely offers summaries.

946. Some debate the authenticity of Rom 16:25, but I believe the evidence favors it (see Keener, *Romans*, 192–93; also others, e.g., Grieb, *Story*, 146; Longenecker, *Introducing Romans*, 37, 454–57; Marshall, “Conclusion,” 183; Schlatter, *Romans*, 278; Stuhlmacher, *Romans*, 256); scholars divide fairly evenly regarding its authenticity (so Jewett, *Romans*, 998, though doubting its authenticity himself). Nanos, *Mystery*, 218–38, esp. 237–38, applies Paul's “obedience of faith” to the apostolic decree of Acts 15:29; with most scholars, I believe that this application is too narrow (e.g., Romans addresses sexual immorality less than 1 Corinthians, and addresses some other issues less still).

947. Contrary to many scholars, I do not believe that Paul separates forensic acquittal (or less accurately, I think, pardon; following a standard LXX sense) from ontological transformation when he uses δικαιοσύνη, even if the former *logically* precedes the latter (as it does, in passages such as Rom 6:1–11; 1 Cor 6:11). God's declaration has ontological effect (2 Cor 4:6); in the language of subsequent, harmonized NT theology, genuine justification also entails regeneration. Faith includes both trust and reliability (cf. the patronal use, deSilva, *Honor*, 145; idem, “Patronage,” 768, with full citation of relevant texts, including 4 Macc 8:6; Sen. Y. Ben. 3.14.2).

948. Le Cornu, *Acts*, 743, citing the medieval, classical expression in Maimonides *Guide for the Perplexed* 3.32. The thought appears in patristic sources (Mitchell, “Accommodation,” 208–12); some doubt whether it appears before Clement of Alexandria, however (Glad, “Adaptability,” 26–27; cf. Clem. *Strom.* 2.16).

949. See Daube, “Concessions to Sinfulness”; cf. esp. the prozbul (10), which was probably instituted no later than Hillel.

950. With Marshall, *Acts*, 228.

Excursus: Pauline Soteriology in Context

This excursus will not treat Pauline soteriology as a whole; entire books and monographs are devoted to even minor elements of that discussion, and many issues in it remain a matter of intense debate. Moreover, this is a commentary on Acts, not Romans, and so we simply look for sufficient background to assess Luke's portrayal of Pauline soteriology in Acts 13:38–39. Even if Luke belonged to the Pauline circle, he need not have repeated Paul's vocabulary precisely (ancient speeches were not verbatim, sometimes even when original documents were available [and they would not have been in this case]), and he need not have reproduced all the nuances of Paul's thought. But was he aware of, and would he have concurred with, the "justification" and "faith" elements of Paul's soteriology?

To put the question in context requires first an examination of early Jewish soteriology, then the treatment, in turn, of Pauline soteriology, Paul and the law, and Paul's view on justification. It is not necessary to resolve all the questions debated today to recognize that Luke reproduces a basic Pauline idea here, whether or not he understood all that Paul's language would have meant to either Paul himself or others—for example, his peers in Torah in Jerusalem.

1. Early Jewish Soteriology

The old stereotype that Judaism did not care for inwardness or "intention" is a caricature without foundation in the ancient sources, a product of anti-Semitism.⁹⁵¹ Love was necessarily the highest motivation for study of the Torah.⁹⁵² People needed God to judge them according to grace.⁹⁵³

Some scholars have thus argued that ancient Judaism was a religion of grace and that its soteriology focused on God's gracious and unmerited covenant with Israel.⁹⁵⁴ This perspective is clearly evident in many texts. For example, in some Qumran texts, God chose the people of Israel not because of their righteousness but because God loved their ancestors;⁹⁵⁵ he forgives Israel because of his love for them.⁹⁵⁶ E. P. Sanders heavily emphasized this approach.⁹⁵⁷ Some suggest that Sanders's use of categories,

951. For an example, see Bultmann, *Jesus and Word*, 67–71 (nuancing [70] his formulation only slightly); cf. Ridderbos, *Paul: Outline*, 133; Jeremias, *Theology*, 182 (who should have known better). Even in rabbinic literature, which by its genre focused on laws the way law books must do, inwardness was important; see, e.g., *m. 'Ab. 1:3; 2:9; b. Ber. 13a; y. Qidd. 1:7, §9*; rabbinic discussions of *kavanah* (on which see Bonsirven, *Judaism*, 95; Montefiore and Loewe, *Anthology*, 272–94; Limbeck, "Lobpreis"; Pawlikowski, "Pharisees"); cf. *Jos. Ag. Ap. 2.183, 217* in Vermes, *Religion*, 32. Rabbinic documents may appear more legalistic because they are *legal* documents, but this does not represent all of rabbinic, Pharisaic, or Jewish ethics (Davies, "Aboth," 127; Vermes, *Religion*, 195).

952. E.g., *Sipre Deut. 41.5.1*; cf. already *Deut 6:5–6*.

953. E.g., *Pss. Sol. 3:5; 9:6–7; 10:1–3; 13:6–11* (on *Psalms of Solomon*, see further Lane, "Legacy"; Lührmann, "Pharisaic Tradition"); *'Abot R. Nat. 8 A*.

954. Sanders, *Paul and Judaism*, 33–428 *passim*; idem, *Judaism*, 275–78; Dunn, *Romans*, lxiv–lxvi (on covenant nomism, lxvii–lxviii); against rabbinic Judaism's legalism earlier, cf., e.g., Odeberg, *Pharisaism*; Davies, "Aboth," 127; Limbeck, *Ordnung*.

955. CD VIII, 14–15, citing and reflecting the theology of Deuteronomy (*Deut 9:5*, then *7:8*).

956. 4Q504 1–2 II, 8–10. Garnet, "Light," 19, argues that in Qumran texts, salvation involves belonging to the covenant community but that individuals cannot be saved without obedience. Przybylski, *Righteousness*, 37–38, argues that the *Damascus Document* (CD) and most of the *Manual of Discipline* employ *tsedaqah* for God's gracious and salvific work but *tsedeq* for the moral norm.

957. Sanders, *Paul and Judaism*, *passim*, noted above. Longenecker has also emphasized this approach, but recognizing more diversity in the Jewish sources; see *Introducing Romans*, 324–27.

some apparently imported from Pauline or biblical theology, may be anachronistic,⁹⁵⁸ but the material had to be categorized somehow, and his objective was to compare other early Jewish sources with Pauline soteriology.

Others argue for “works righteousness,” legalism, or at least synergism in many parts of early Judaism.⁹⁵⁹ Josephus may view the basis of Abraham’s justification as works.⁹⁶⁰ In *Wisdom of Solomon*, loving righteousness leads to immortality.⁹⁶¹ Sanders himself acknowledged works righteousness in *4 Ezra*,⁹⁶² and it probably appears in *2 Baruch* as well.⁹⁶³ Many have identified it also in rabbinic sources.⁹⁶⁴ Inclination to disobey the law appears widely in ancient sources.⁹⁶⁵ Whereas Sanders eliminated many such statements as not reflective of Judaism’s “pattern” of religion, others have complained that this restriction simply eliminates inconvenient evidence.⁹⁶⁶ Certainly, Jewish people expressed confidence in their relationship with God in comparison to that of the Gentiles⁹⁶⁷ (which one, indeed, would expect from the covenant and from observations about Gentiles in view of biblical ethics).

Both the legalistic and nonlegalistic positions probably represent legitimate emphases in the sources.⁹⁶⁸ This is true, first of all, because early Judaism included a wide variety of views on righteousness as well as on many other topics.⁹⁶⁹ Even more clearly, it is true because most of ancient Jewish thought, like most of ancient Christian thought,⁹⁷⁰

958. Some argue that his perspective on covenantal nomism stems from Tannaic sources and does not so readily fit apocalyptic sources (Collins, “Apocalyptic Literature,” 359–60) or Qumran’s theology (Donfried, *Thessalonica*, 290–91, following Fitzmyer, “Paul and Scrolls”), whereas Neusner, “Comparing Judaisms,” faults his approach for imposing Pauline theological categories on the rabbis.

959. E.g., Brinsmead, *Galatians*, 128–37; Scott, *Customs*, 274–76; Seifrid, *Justification*, 78–135; Hagner, “Matrix”; Eskola, “Paul et judaïsme”; idem, *Theodicy*, 28–60; Elliott, *Survivors*; Kim, *New Perspective*, 143–52 (from whom I borrow some of these sources); Hamilton, “Bootstraps”; Quarles, “Perspective”; Moo, *Romans*, 215–17; Gathercole, *Boasting*, 37–160, 214; cf. Smith, *Parallels*, 73, who argues that Paul abstracted and simplified the system in how he portrayed it. See esp. Thielman, “Plight to Solution”; idem, *Paul and Law*; Talbert, “Revisionists”; Hagner, “Judaism,” 84–88. Sanders would, however, cite in reply similar statements about reward in the NT.

960. Cairus, “Works-Righteousness” (on *Jos. Ant.* 1.183, comparing Targumim); though it must be said that Josephus may have simply not viewed works and faith as incompatible (cf. *Jas* 2:21–24). Josephus does appear to associate obedience with salvation (*War* 3.374; Gathercole, *Boasting*, 145) and to portray Pharisees (*War* 2.162; cf. 1.650; Gathercole, *Boasting*, 143, 148) and Essenes (*War* 2.154–58; Gathercole, *Boasting*, 144) as doing so. On God as judge of works in the Targumim, see Maher, “God as Judge.” Isaacs, *Spirit*, 47, suggests that Philo may have viewed grace and works as in competition.

961. Raurell, “Gift” (on *Wis* 1:1–15); though it must be said that there are passages in Paul, even in *Romans*, that can be read the same way (*Rom* 2:6–16).

962. Sanders, *Paul and Judaism*, 409–18, esp. 418. Ironically, some others have emphasized the balance of works and faith in *4 Ezra* (Hatch, *Faith*, 16–17); but for works there, see also Gathercole, *Boasting*, 136–39.

963. *2 Bar.* 51:7; Harrison, *Grace*, 102; Gathercole, *Boasting*, 139–42.

964. E.g., Quarles, “Soteriology” (on *m. ’Ab.* 3:16–17); Boccaccini, *Judaism*, 218–20; esp. Avemarie, *Tora und Leben*, esp. 36–43 (summarized in Gathercole, *Boasting*, 150–56; note *m. ’Ab.* 3:15; *t. Sanh.* 13:3; *Qidd.* 1:14; *y. Qidd.* 61d; *b. Sanh.* 81a). Even corporate salvation could be variously construed; although God redeemed Israel before giving it the law, in some texts the redemption was conditional on subsequent obedience (esp. *Sipra: Sipra Sh. pq.* 12.121.2.5; *Sipra Behar par.* 5.255.1.10; *Sipra Qed. pq.* 8.205.2.6; *Sipra Emor pq.* 7.227.1.6; Urbach, *Sages*, 1:386).

965. See, e.g., Thielman, “Plight to Solution,” 48–57, for the Hebrew Bible; 61–69, for the Qumran scrolls; and 69–72, for pseudepigraphic literature.

966. Moo, “Paul and Law” (while valuing Sanders’s contribution); cf. idem, *Romans*, 214–17.

967. See Gathercole, *Boasting*, 37–194 passim, esp. 193–94.

968. With, e.g., Kim, *New Perspective*, 83; cf. Gathercole, *Boasting*, 67, 263–64 (arguing that salvation by obedience could coexist with gracious election; in Reasoner, *Full Circle*, 119); Grindheim, “Jødedommen”; Das, “Pressure Points,” 101; Keener, *Romans*, 7; Kruse, *Romans*, 21; and some of those cited above. Harrison, *Grace*, 103, suggests that both sides in the debate may have theological agendas (traditional or ecumenical).

969. With, e.g., Harrison, *Grace*, 100; Watson, *Gentiles*, xii.

970. Räisänen, *Paul and Law*, even thinks that Paul (a single author) is self-contradictory in letters written close to the same time (cf. similarly Mac. Magn. *Apocrit.* 3.30–36 [*Porphyry’s* 58–65]); but while Paul

was never systematized into a single coherent system.⁹⁷¹ The rabbis, for example, did speak both of individuals' salvation by membership in the covenant people and of meriting the coming world by works.⁹⁷² Qumran sectarians spoke of themselves both as "perfect" in the law among humanity and as utterly inadequate before God.⁹⁷³ Others probably also held divergent views.⁹⁷⁴ Moreover, even if all of ancient Judaism viewed works only as a by-product of salvation by covenantal grace, it is doubtful that this would have prevented legalism⁹⁷⁵ any more than it does in some Christian circles with the same professed belief today.⁹⁷⁶ Thus some later rabbis criticized some earlier Pharisees for treating merits and sins as a mere accounting project.⁹⁷⁷

When E. P. Sanders sparked the "New Perspective," he developed, as he himself notes, already-existing perspectives on Judaism (e.g., in G. F. Moore) and Paul (e.g., in K. Stendahl).⁹⁷⁸ Most of the current reaction against the New Perspective argues for a legalistic stream in early Judaism but does not (and cannot) deny the emphasis on covenant grace that Sanders emphasized at such length.⁹⁷⁹ One problem in the debate is that different authors define categories differently and often make them mutually exclusive in ways that ancients would not have envisioned; ancient thinkers may have believed, for example, that their deeds merited God's attention, yet understood that without God's mercy no deed was sufficient for salvation.⁹⁸⁰ That

addresses different rhetorical situations and shifts arguments, Räisänen's critique, which uses some forced-choice logic, is overstated (see, e.g., Moo, "Paul and Law," 290–92; Cranfield, "Name"; Weima, "Evaluation"; Waters, *Justification*, 91–96). Still, it is true that Paul was a missionary, not a writer of systematic theology (with, e.g., Haacker, *Theology*, 68), and Paul's treatment of the law is more nuanced in Romans than in Galatians (cf. Hübner, *Gesetz*, though he may contrast them too much).

971. Sanders, *Paul and Judaism*, 120, notes that most rabbinic statements are ad hoc, though he believes that their commonalities show common concerns.

972. Avemarie, "Erwählung"; Hagner, "Judaism," 84–86; cf. Schmid, "Sünde"; Gathercole, *Boasting*, 134–35, 152, 155 (complaining [23] that Sanders downplays too much "the future dimension to salvation"); eternal reward for commandments in, e.g., *b. 'Abod. Zar.* 4b; *Qidd.* 39b; *Lev. Rab.* 14:1; Urbach, *Sages*, 1:350; Johnston, "Commandments"; works for paradise in *Exod. Rab.* 2:2; faith was also meritorious (*Gen. Rab.* 74:12; Marmorstein, *Merits*, 175–76; Montefiore and Loewe, *Anthology*, 336ff.). (Sanders, *Paul and Judaism*, 138–39, also notes such material.) The Tannaim approached righteousness as demand, not a gift, but their focus was primarily behavioral rather than soteriological (Przybylski, *Righteousness*, 39–76, esp. 74–76). The world of halakah is also far removed from early apostolic teaching (Macleod, "Perspective"), though genre accounts for some of this (contrast, e.g., *Thanksgiving Hymns*).

973. Kim, *New Perspective*, 150; cf. Gathercole, *Boasting*, 110–11; perhaps also emphasis on obedience in Timmer, "Nomism" (esp. 347, 349–52).

974. Krieger, "Paul and Torah," cites varied options for Gentiles in "apocalyptic Judaism."

975. Cf., e.g., Moo, *Romans*, 216, on what he calls "lay" Judaism.

976. Certainly the problem appears early in patristic sources (e.g., *Herm.* 2.4.3). Reward and punishment (which Paul himself affirms, e.g., Rom 2:6–10; 1 Cor 3:8, 14; 9:17–18) are pervasive in childrearing in most cultures and are undoubtedly necessary motivation, especially for a particular stage in children's moral development. Nevertheless, it is inevitable that such an approach as well as various other psychological factors dispose some of us individuals (especially if we fail to internalize grace in the same setting) toward fixation on details and their consequences.

977. See *y. Sotah* 5:5, §2, on the "bookkeeping Pharisee" (Neusner, 27:156).

978. See Sprinkle, "Pre-Sanders' Thinkers." To such lists one should certainly add Longenecker, *Paul* (rightly emphasized in some lists of pre-Sanders thinkers, e.g., Campbell, *Deliverance*, 97; cf. also Donaldson, *Paul and Gentiles*, 311); in a different way (though published after Sanders's seminal work), Fuller, *Gospel*.

979. Sanders was correcting an earlier overemphasis on legalism in early Judaism as a foil to Paul, especially in its form dominant in the German Lutheran tradition before the Holocaust (including in Billerbeck and Kittel; see Thielman, "Plight to Solution," 8–13). Thus many agree with his warnings, though not going as far as he does (McNamara, *Judaism*, 42–44; Carson, *Sovereignty*, 87–89; cf. Bird, "Dust"; idem, "Via Media"; discussion in Keener, *Romans*, 4–9; Campbell, *Deliverance*, 110). Gaston, "Impact," thinks that this approach helps Jewish-Christian relations only indirectly, by increasing appreciation for ancient Judaism.

980. Though emphasizing grace, Sanders, *Paul and Judaism*, 422, does not neglect the role of obedience in maintaining the covenant nearly so much as his critics imply. Though denying that obedience earns salvation, he regards it as a condition for it (141); obedience merely maintains one's place in the covenant initiated by election

is not Pauline theology, but it is the sort of idea that different scholars could put in different categories.

The appeal of some Jewish people in antiquity to a notion of “merit” invites mention here. Some of the earliest Christian sources report or suggest the prevalence of a view or perhaps attitude that Jewish people were saved by virtue of descent from Abraham (Luke 3:8//Matt 3:9; John 8:39, 52; Rom 4:12; 9:7–8; Gal 3:29; 4:25–26).⁹⁸¹ Some other early Jewish sources also react against the view that one could depend on one's ancestors for status before God without walking in their ways (*L.A.B.* 33:5; cf. Deut 26:5).⁹⁸² This perspective was developed further in later sources, though not necessarily in the same direction. Later rabbis stressed Israel's first redemption from Egypt and deliverance through the sea on the basis of patriarchal merits,⁹⁸³ reportedly depending on pre-Christian tradition concerning Abraham's merit.⁹⁸⁴ (The idea of God showing favor to descendants for an ancestor's sake does appear in Scripture—for example, Deut 7:8; 10:15; 1 Kgs 11:36; 2 Kgs 8:19; 2 Chr 21:7.) Later rabbis sometimes attributed God's blessings on Israel to merits of the patriarchs⁹⁸⁵ or occasionally the matriarchs,⁹⁸⁶ though some also emphasized the greater importance of one's own merits.⁹⁸⁷

Opinion was not unanimous, however, even by the end of the second century,⁹⁸⁸ and there appears little explicit connection between merits and personal benefits unrelated to corporate blessing on Israel.⁹⁸⁹ The “merit” approach to Paul's “works of the law” first surfaced in the patristic period.⁹⁹⁰ For discussion on circumcision, see the excursus at Acts 15.

(362); rabbis accepted both grace and works (100). Thus it is again not just the evidence but the different definitions used that lead to different verdicts on “ancient Jewish perspectives.” (For Sanders's clarification of his own position, which has sometimes been misconstrued or misapplied, see Sanders, “Nomism”; his primary point in this nuanced form, on which we exchanged some dialogue [as noted in *ibid.*, 23n1, 25n6, 49n52], seems difficult to dispute.)

981. Later, cf. Justin *Dial.* 140. I have borrowed this discussion on merits from Keener, *John*, 754–55; at greater length, see *idem*, *Matthew*, 125–27; for a more extensive survey of the final product in rabbinic thought, see Marmorstein, *Merits*.

982. For deliverance by mercy without merit, see *Mek. Shir.* 9.24ff. (Lauterbach, 2:69); *Exod. Rab.* 1:35; *Pesiq. Rab.* 49:4. It is God's honoring the covenant and favor toward the righteous (cf. Bonsirven, *Judaism*, 20). Cf. also dependence on mercy in the later Day of Atonement liturgy (Moore, *Judaism*, 2:214).

983. E.g., *Mek. Pisha* 16.165–68 (other opinions, 16.169–72); *y. Ta'an.* 1:1, §8; *Gen. Rab.* 55:8; 74:12; 76:5 (Jacob's merit); 84:5 and 87:8 (Joseph's merit); *Exod. Rab.* 2:4; 15:10; 23:5; *Lev. Rab.* 34:8, bar.; *Num. Rab.* 13:20; *Song Rab.* 4:4, §4; *Pesiq. Rab.* 10:9 (in prayer); see further Moore, *Judaism*, 1:537. Some Tannaim suggested they could have used more merit (*Sipre Deut.* 2.1.1–4); some Amoraim attributed the exodus to the merit of or faith in Moses (*Exod. Rab.* 15:3; 16:1), to righteous acts (*Exod. Rab.* 1:28; *Lev. Rab.* 28:4; *Num. Rab.* 20:22), to the merits of Israelite women (*Exod. Rab.* 1:12; *Num. Rab.* 3:6, bar.), or to various factors, including patriarchal merits (*Deut. Rab.* 2:23).

984. E.g., in *Mek. Besh.* 4.52–57 (Shemaya and Abtalion).

985. E.g., *m. 'Abot* 2:2; *Sipra Behuq.* pq. 8.269.2.5; *Sipre Deut.* 8.1.1; *Pesiq. Rab Kah.* 1:1; 2:5; 5:8; 22:4; *Pesiq. Rab Kah. Sup.* 5:2; *Gen. Rab.* 39:3; 44:16; 48:12; 49:11; 70:8; *Exod. Rab.* 1:4; 15:4; 44:5; *Lev. Rab.* 31:4; 36:5; *Song Rab.* 7:6, §1; *Pesiq. Rab.* 15:9; 27/28:1; *Tg. Neof.* 1 on Gen 48:20; cf. *Tg. Neof.* 1 on Gen 30:27; 39:5; *Tg. Ps.-J.* on Gen 18:18; 19:29; 21:17. This included expiation of Israel's sins (*Pesiq. Rab Kah.* 23:8; *Lev. Rab.* 29:7; *Deut. Rab.* 3:15).

986. *Pesiq. Rab Kah.* 11:6; *Lev. Rab.* 21:11; 36:5; *Num. Rab.* 11:2; *Pesiq. Rab.* 12:5; 15:9.

987. E.g., *'Abot R. Nat.* 12, §30, 22, §46 B; *Gen. Rab.* 74:12; *Num. Rab.* 8:9; cf. individuals' benefits from ancestral merit, *y. Ta'an.* 4:1, §14; *Lev. Rab.* 9:2. Amoraim differed as to whether patriarchal merit could eventually run out (*y. Sanh.* 10:1, §6; *Lev. Rab.* 36:5).

988. See *Sipre Deut.* 329.3.1, following biblical precedent (Ezek 18:20); cf. 2 *En.* 53:1. Even in *Song Rab.* 1:2, §3, biblical sacrifices appear preferable to ancestral merits.

989. Later, merits could earn blessings even in the present era (*b. 'Abod. Zar.* 17b). Because the messianic era would lack evil, it would also lack opportunity for merit (*Eccl. Rab.* 12:1, §1). Sanders, *Paul and Judaism*, 183ff., argues that ancestral merits help, but are not transferrable to, individuals.

990. See Mijoga, “Merit.” This would fit the period of its development in Judaism.

2. Pauline Soteriology

Debates on the New Perspective regarding early Jewish soteriology necessarily shape debates about the New Perspective approaches to Paul. If Paul counters a religion of legalism by preaching grace, it is believed that either that religion was truly legalistic or Paul offered a caricature; alternatively, he was countering a distortion of Judaism among some Jewish Christians (who came up with legalism on their own). For others less inclined to accept either legalism in Judaism or Paul's misrepresentation, Paul builds on what he agrees with in Judaism yet rejects any basis for personally salvific righteousness before God apart from Christ.

The New Perspective on Paul has both defenders⁹⁹¹ and critics.⁹⁹² It should be noted, though, that the New Perspective now represents a conglomeration of approaches even further apart from one another than were Sanders, Räisänen, and Dunn.⁹⁹³ Many proponents of the New Perspective argue that Paul's focus on "law-works" involves especially "boundary-markers," identifiers of ethnic Israel more problematic for Gentiles.⁹⁹⁴ Conversely, many critics of the New Perspective deny this position;⁹⁹⁵ others regard it as an old, rather than recent, insight.⁹⁹⁶ N. T. Wright and others have made much of a restoration eschatology based on the Jewish view that Israel was in exile; others have critiqued this view.⁹⁹⁷ Some who agree with the New Perspective nevertheless accept Luther's approach as a legitimate contextualization of Paul for Luther's own setting.⁹⁹⁸

Some have argued synthetically that Paul and most of the rest of early Judaism shared the overarching pattern of obedience in response to grace but that they defined

991. E.g., Dunn, *Romans*; idem, *Theology of Paul*; Wright, *Founder*. For attempts to apply the approaches' insights in translation, see, e.g., Schmidt, "Translating Faith."

992. E.g., Gundry, "Staying Saved"; Eskola, "Covenantal Nomism"; Seifrid, "Problems"; Zahl, "Mistakes"; Das, "Covenantal Nomism"; Hamilton, "Bootstraps"; Chester, "Justification"; Porter, *Paul in Acts*, 190; Kim, *New Perspective*, esp. 7–84; Busenitz, "Understanding"; Hughes, "View"; Fesko, "Imputation"; Zweck, "Wright" (mostly); Lohse, "Theologie" (regarding justification); Byrne, "New Perspective"; Theissen, "Nouvelle perspective." A popular view's detractors tend to write more often than its proponents, though not necessarily as influentially. Some accuse New Perspective proponents of being driven by presuppositions (e.g., Farnell, "Perspective"; Thomas, "Hermeneutics"); many of its proponents so view its detractors as well. Cf. varied approaches in Bird, *Paul*.

993. See Hylldahl, "En ny Paulus?" For summaries of the New Perspective approach to Paul, see Horrell, "Studies"; Garlington, "Perspective"; more hostile (and including Davies among advocates of the New Perspective, despite his date), see Kelly, "Approches"; for one bibliography, see Swanson, "Bibliography." As Longenecker, "Critiquing," observes, some criticisms of the New Perspective also stem from misunderstandings (or miscommunications).

994. Cf., e.g., Dunn, *Romans*, lxix–lxxi; idem, *Partings*, 117–39; idem, "Justice"; idem, "Works of Law"; cf. idem, "Justice"; Bachmann, "Paulusperspektive" (adding a distinction between good works and more specific halakic works). The Mishnah does not emphasize covenant obligations much, but they were heavily emphasized in what emerged as the liturgy (see Segal, "Covenant").

995. E.g., Fesko, "Works of Law" (against Wright); Waters, *Justification*, 105, 158 (against Dunn); Das, "Pressure Points," 103–6 (noting many critics). Marshall, "Works," complains that this approach neglects the later Pauline literature (whether it comes from Paul or his earliest interpreters). Moo, *Romans*, 214, notes that one cannot confine Paul's polemic solely to boundary markers.

996. Cf. Zahl, "Mistakes."

997. E.g., Seifrid, "Problems"; Pitre, *Tribulation*, 31–40 (arguing for a different view of exile); Kim, *New Perspective*, 136–41 (arguing [138] that even if early Judaism had a unified notion of exile, this hardly supplies the background for Gal 3:10, 13–14); Waters, *Justification*, 153.

998. Lung-Kwong, *Purpose*, 421 (noting that Paul's argument also addressed a specific, contextualized setting); Yeo, "Response," 30. Others find important agreements between Paul and Luther (Härle, "Paulus und Luther"; Brondos, "Luther"; Donfried, "Revisionists") and between Luther and the New Perspective (Saarinen, "Luther," on Finnish Lutheran interpreters); Watson, *Gentiles*, 346–47, warns against rejecting Luther's approach too far (accepting [346–50] the validity of theologically applying Paul's message formulated in a more particular setting).

differently how to obey.⁹⁹⁹ Paul emphasized moral principles above particular regulations meant to inculcate such principles (e.g., 1 Cor 9:8–10),¹⁰⁰⁰ and his emphasis on the eschatological era of the Spirit pointed to an obedience empowered by God's Spirit rather than shaped by human discipline.¹⁰⁰¹ Obviously, his insistence that righteousness was God's gift in Christ differed from non-Christian Jewish perspectives.

3. Paul and the Law

Most scholars agree that Paul's thought reflects some Pharisaic elements (cf. Phil 3:5).¹⁰⁰² But this observation does not settle what he retained and what he found incompatible with the revelation of Christ.

Scholars have offered a wide variety of views regarding Paul and the law (not all incompatible). For example, Paul caricatured and opposed the law;¹⁰⁰³ he expected Jewish believers in Jesus, though not Gentiles, to observe the law;¹⁰⁰⁴ he affirmed that Christ gave a person power to obey the law that the person could not otherwise keep;¹⁰⁰⁵ he expected continued obedience to many of the laws;¹⁰⁰⁶ he retained some laws as guides but not others;¹⁰⁰⁷ he shifts in his use of νόμος (which has a wide semantic range) from one text to another;¹⁰⁰⁸ he retained the first covenant as revelation but not as legal covenant;¹⁰⁰⁹ the haggadic (story) function of the law remains but not its halakic (legal) function;¹⁰¹⁰ the law exercises a convicting function, but its primary function is prophetic witness to Christ;¹⁰¹¹ Paul found God's will in the law but as understood through the revelation of Christ;¹⁰¹² Paul affirms the law but warns against depending on obedience for merit.¹⁰¹³

The very diversity of views might reflect a variety of nuances in Paul not easily summarized in a single phrase or sentence (as many of the authors of views summarized briefly above would no doubt agree). The law was good, but as an external code it could not save (Rom 7:12, 14, 16); it had to be written in the heart (8:2; cf. 2 Cor 3:3–6), as the prophets promised (Jer 31:33; Ezek 11:19–20; 36:25–27).¹⁰¹⁴ Although salvation

999. See esp. Davidson, "Patterns"; cf. Dunn, *Romans*, lxvi.

1000. Later rabbis reacted against a form of *minim* who emphasized only the Ten Commandments (Urbach, *Sages*, 1:361).

1001. For the distinctiveness of Paul's emphasis on the Spirit for moral empowerment (moving even beyond Qumran), see Gathercole, *Boasting*, 134; cf. Keener, *Spirit*, 2; Fee, *Paul, Spirit, and People*, 98–111; "divine agency" in Watson, *Gentiles*, 15.

1002. See, e.g., Cohn-Sherbok, "Paul and Exegesis"; Lührmann, "Pharisaic Tradition" (esp. on *Pss. Sol.* 3; earlier, see Lane, "Legacy"); esp. (though overemphasizing later rabbinic sources) Davies, *Paul*; Longenecker, *Paul*; this is also important in Sanders, *Paul and Judaism*. Most scholars agree with this view (e.g., Ramsay, *Other Studies*, 89–90; Grant, *Hellenism*, 136; Davies, *Introduction*, 27–28; Bruce, "History," 50).

1003. Kohler, *Jewish Theology*, 438; for Paul's being negative toward the law, see also Schoeps, *Paul*, 168ff. Sandmel, *Judaism*, 310, is more nuanced.

1004. Wyschogrod, "Christianity and Law."

1005. Engberg-Pedersen, *Paul and Stoics*, 8; cf. Fuller, *Gospel*, x–xi, 93–96, 202. Cf. Rom 8:2–4; Jer 31:32–33.

1006. Hill, *Hellenists*, 146; cf. Rosner, *Ethics*, passim. Cf., e.g., 1 Cor 9:13 (though Paul does use explicitly marked Scripture more often to attest Christ than to explain ethics).

1007. Brooten, "Paul and Law" (doubting the traditional moral-vs.-ritual distinction).

1008. Haacker, *Theology*, 67–68.

1009. Vanhoye, "Validité"; idem, "Validità."

1010. Segal, *Convert*, 139 (noting that these rabbinic distinctions are post-Pauline).

1011. Reicke, "God of Abraham," 191–93. Cf. Rom 3:21, 31.

1012. Cranfield, "Response"; cf. Marguerat, "Avenir"; Dunn, *Theology of Paul*, 716–22; 2 Cor 3:14.

1013. Schreiner, "Works of Law"; Paul opposes not the law but legalism (Hunter, *Gospel according to Paul*, 18; Gasque, "Acts and History," 66; Calvin's approach toward the law was much more favorable than Luther's (noted, e.g., in Wright, *Justification*, 72). On Paul and the law, see also comment on Acts 9:1–19a; 21:21.

1014. Cf. Ammonius in *Cat. Act.* 13.39 (Martin, *Acts*, 169).

was by God's gracious act in Christ, not by anything possible by human effort, it was received by "obeying" the gospel message (cf. Rom 1:5; 6:17), and salvation from sin transformed a person to live a new life (e.g., 6:1–11; 1 Cor 6:11; Gal 5:24).¹⁰¹⁵ Paul closely connected saving faith with obedience (esp. Rom 1:5; 16:25);¹⁰¹⁶ he advocated not a passive mental assent but an active embrace of Christ's transforming lordship by the Spirit. The law as a whole remained God's revelation; its principles and the goals to which its stipulations pointed remained objects of obedience.¹⁰¹⁷

The law's specific stipulations, many of which applied to ancient Israel in the land and resembled ancient Near Eastern legal collections, fulfilled a purpose for ancient Israel and remained valid as teaching about God's purpose. But such stipulations were a means, not an end;¹⁰¹⁸ the end or goal was found in Christ, the climactic revelation of God's plan, of which the law was only a part (Rom 10:4; Gal 3:17, 19, 23–24). In a new era of salvation history, when God was embracing the Gentiles as promised in the prophets, stipulations specific to ethnic Israel were not necessary for Gentile converts.

For Paul, believers in Jesus are not "under the law"—that is, do not stand under the judgment of the law's righteous standard (Rom 2:12; 3:19; Gal 3:23; 4:4–5; 5:18); human works with respect to the law never could have justified (Rom 3:20; Gal 2:16). Instead, the law is written in the hearts of believers by the Spirit and approached from the perspective of its ultimate purpose in Christ (Rom 3:27; 8:2; 9:31–32; 10:2–4). The law itself testifies to this approach of righteousness by faith (3:31; cf. 3:27; 4:3). To be "justified from these things," as Luke puts it (Acts 13:39), likewise does not mean abrogating the law as divine revelation but instead indicates justification through God's gracious act in Christ rather than through obedience to the law (which, as 13:39 declares, is impossible, in any case).

4. Conclusions

The survey above has mostly just summarized the debate. Here I will likewise merely summarize my own response without providing my exegesis on the relevant Pauline passages.¹⁰¹⁹ Whatever else may be said, certainly Paul knew the form of Pharisaism from which he emerged far better than we, with our dearth of first-century Pharisaic sources,¹⁰²⁰ can hope to, and so Paul cannot be impugned with ignorance of Judaism's

1015. For Paul's affirming obedience, see, e.g., Moule, "Obligation." Employing multiple Aristotelian approaches to causation, one might pull together salvation's different aspects in Paul (cf. the compatibility of grace and faith in Frick, "Means and Mode").

1016. See, e.g., Du Toit, "Faith and Obedience."

1017. As Schreiner, "Works of Law," points out, Paul is not against obeying the law but against depending on obedience for justification.

1018. Even Tannaim allowed setting aside certain stipulations in emergencies when a true prophet requires it (*Sipre Deut.* 175.1.3).

1019. Although I have done the exegesis, I have not yet been able to write the commentaries (and am admittedly not firm in my understanding of all the passages, especially the more polemical ones in Galatians). It is possible that revisiting the exegesis in the course of writing commentaries will further shift my position.

1020. As Orval Wintermute, one of my esteemed and learned professors at Duke University, once pointed out to me in private conversation, our clearest extant examples of Pharisees writing in the first century are Paul and Josephus. Of course, the depth of Josephus's Pharisaic commitment is open to question, and rabbinic treatment of the Shammaites and Hillelites offers significant insight into first-century Pharisaism; but the hyperbole nevertheless usefully reinforces the point: Paul knew his personal experience of first-century Pharisaism better than we do (cf. Barrett, *Paul*, 78, as cited in Hagner, "Judaism," 88: "He is a bold man who supposes that he understands first-century Judaism better than Paul did"). And even if his experience was distorted or marginal, as some might have it, he also knew firsthand the teaching and lives of Pharisees in Jerusalem in ways that we (and even second-century Tannaim) cannot.

“true” character. Without tracing all the evidence from all the Pauline passages—this is a commentary on Acts, not on Pauline letters—I would suggest that Paul’s opponents appear “legalistic” because of a combination of factors.

First, as noted above, one could talk about grace in theory yet prove legalistic in practice; this happens often in Christian circles (and I have succumbed to it myself). Second, Paul probably portrays his opponents as one-sidedly as did any ancient rhetorician or writer; because their view, more than their person, is the object of his polemic, he can press their position with such a demand for logical consistency that he portrays it in a manner they may not have appreciated (by *reductio ad absurdum*).¹⁰²¹

Third, Jewish people could trust God’s grace and keep Jewish customs with which they had grown up, without seeing any inherent tension between the two. For new Gentile converts, however, imposing customs as a condition for entering the covenant did require a complete transformation of every aspect of life, including diet, relationships, and so forth (beyond the moral changes Paul would have required). That is, part of the “legalism” Paul combats is (when examined from a social rather than a purely theological perspective) a cultural ethnocentrism—one justifiable by appeal to biblical teaching about the covenant (Gen 17:12–14) and the strangers (e.g., Exod 12:19; Lev 16:29; 17:12, 15; 18:26) but one that also hindered the divinely ordained mission to the Gentiles as well as ignored the messianic basis for the eschatological new covenant (cf. Isa 19:23–25; Zech 2:11).

Paul apparently believed that his focus on the law had once obscured the truth about God’s appointed king for Israel and God’s plan for delivering his people; now, instead, God’s eschatological revelation in Christ is the central grid through which all else must be interpreted.¹⁰²² The beginnings of God’s plans provided one foundation through which to understand it, but its eschatological climax, which provided its fullest disclosure, provided the most complete perspective on all that had preceded it.

For Paul, salvation history pointed not to emerging rabbinic schools’ meticulous efforts to define and apply Israel’s God-given laws, zealous and devoutly intended though they were, but to the climax of Jesus’s prophetic ministry, resurrection, and enthronement as king over Israel and the nations. This climax entailed and initiated the new era of the Spirit, which included apostolic ministry, not least Paul’s own. Paul’s problem with his opponents’ approach was not that it was Jewish but that it missed the centrality of God’s act in Christ and the new life of the Spirit. If brought into our era, Paul would likely experience a similar conflict with most of Christendom today.

5. Paul on “Justification”

One’s view of Paul’s understanding of Judaism will also affect how one approaches his teaching on “justification,”¹⁰²³ although not to the same degree as it affects one’s understanding of his approach to “works” or the exclusivity of faith.¹⁰²⁴

1021. Cf. Keener, *Romans*, 7–9. If Paul no longer *agrees* with an aspect of his Pharisaic background, he may highlight an inconsistency and demand that it be pushed to its logical conclusion: Salvation by grace *and* by works? Unspoken pride in virtuous obedience while emphasizing humility? Hearts that fall short of the moral perfection that everyone knows that God requires? Perhaps others expected the covenant and atonement to make provision for such failings, but for Paul, they remain failings that God has dealt with more decisively in Christ. Cf. Agnew, “Adversary,” arguing for “straw” opponents, though allowing for real opponents behind them.

1022. Many scholars have suggested that Paul’s presentation of Judaism and the law reflects not his contemporaries’ understanding but Paul’s eschatological perspective in light of Christ (e.g., Keck, *Paul*, 126; Ladd, *Theology*, 501; cf. Dahl, *Studies*, 134–35).

1023. Cf., e.g., Ziesler, “Justification.”

1024. For much lengthier treatments of Paul and justification, coming to various conclusions, see, e.g., Morris, *Preaching*, 251–98; Barth, *Justification* (for background discussion, esp. 15–21).

When Greeks spoke of δικαίω and (more often) its cognates δίκαιος (“just,” “upright”)¹⁰²⁵ and δικαιοσύνη (“justice”),¹⁰²⁶ they thought especially in terms of justice, often as a category in forensic rhetoric or moral philosophy, rather than being put in right relationship with God.¹⁰²⁷ A Greek audience unfamiliar with the LXX would hear δικαίω as “seek justice against one,” involving punishment, not “justify one”; for them, Paul’s language probably administered a high-voltage “lexical shock.”¹⁰²⁸

A closer background for the center of Paul’s biblically informed ideal audience is the LXX and early Jewish usage in general. In Romans, Paul speaks of “God’s righteousness” (Rom 1:17; 3:5, 21–22; 10:3),¹⁰²⁹ drawing on one sense of the expression in Scripture even if it was not the only sense. Greek-speaking Judaism often used the language of God’s righteousness to refer to just demands;¹⁰³⁰ it contrasts with human sin.¹⁰³¹ God’s “righteousness” includes his faithfulness to fulfill his covenant promises (Neh 9:8).¹⁰³² In the psalmist’s prayers, God’s righteousness repeatedly disposed him to act justly¹⁰³³ or mercifully¹⁰³⁴ on behalf of his servant.¹⁰³⁵ The psalmist pleaded for forgiveness of guilt; then the psalmist would praise God’s righteousness (Ps 51:14).¹⁰³⁶ The psalmist also pleaded for God to answer in his righteousness and faithfulness (143:1) but not to judge him, since no one could be righteous in God’s sight (143:2).

1025. E.g., *Rhet. Alex.* 1, 1421b.25–28; 4, 1427a.24–30; 6, 1427b.39–41; 1428a.1–2; Mus. Ruf. 3, p. 40.25; 7, p. 58.25; 8, p. 62.8–9; 12, p. 86.6; 14, p. 92.21; Dio Chrys. *Or.* 4.24; 32.37; Marc. Aur. 3.6; 8.1; Men. *Rhet.* 2.3, 379.19–20; 2.11, 420.22; 2.5, 397.22; Philost. *Vit. Apoll.* 5.35; the adverb cognate in Mus. Ruf. 20, p. 126.22. What is “just” is the universally accepted, unwritten law (*Rhet. Alex.* 1, 1421b.36–1422a.2). The “righteous” in Jewish sources were those who obeyed God (1 *En.* 99:3; 100:5; 102:6, 10; 103:1), and they could be contrasted with “sinners” (e.g., 102:6, 9; 103:5).

1026. E.g., Dion. Hal. *Isoc.* 15; Mus. Ruf. 14, p. 92.32; Arius Did. 2.7.5b2, pp. 14–15.18–20; Men. *Rhet.* 1.3, 361.14–15, 17–22; Philost. *Vit. Apoll.* 1.20; 6.11; Hermog. *Progymn.* 12, “On Introduction of a Law,” 27; 11, “On Thesis,” 26; Aphth. *Progymn.* 7, “On Commonplace,” 35S, 20R; 14, “On Introduction of a Law,” 53S, 47R. For justice among the four cardinal Greek virtues, see, e.g., *Rhet. Alex.* 3S, 1440b.17–19; 1441b.4–5; Mus. Ruf. 4, p. 44.12–16; 17, p. 108.10; Dio Chrys. 3.7, 58; Arius Did. *Epit.* 2.7.5a, pp. 10–11.8; 2.7.5b1, pp. 12–13.19; 2.7.5b2, pp. 14–15.4, 8, 18–20; 2.7.5b5, pp. 18–19.34–35; Lucian *Hermot.* 22; Men. *Rhet.* 2.1–2, 375.8–376.2; 2.10, 416.5–12; Iamb. *V.P.* 30.167–86; see further comment on Acts 26:25.

1027. Nevertheless, justice was often associated with deities (Arius Did. *Epit.* 2.7.5b.12, pp. 26–27.17–18), with the highest deity (Mus. Ruf. 16, p. 104.32–33; Sil. It. 6.467), or even personified in its own right (see comment on Acts 28:4).

1028. Anderson, *Rhetorical Theory*, 209 (esp. citing Rom 4:5). Had Paul used the wording deliberately in a manner dissonant to accepted usage, this could have been a rhetorical device for securing attention (cf. Anderson, *Glossary*, 66, on κατάχρησις). Haacker, *Theology*, 120–24, emphasizes Roman associations of the term (more than Greek, 122–23), but it was pervasive in Greek philosophers.

1029. On Paul’s theocentric argumentation in Romans, see, e.g., Williams, “Righteousness of God”; Piper, “Demonstration,” 22.

1030. Berger, “Gerechtigkeit Gottes,” noting its forensic sense and minimizing as exceptional texts referring to God’s mercy.

1031. Cf. Feuillet, “Antithèse” (emphasizing the theme in Isa 52:13–53:12).

1032. With such relational faithfulness one might compare aspects of the Korean concept of “yeon” (see Chae, “Yeon”).

1033. E.g., Pss 31:1; 35:24; cf. 35:27–28; 50:6; 97:6 (with 97:2); 103:17–18. Cf. also God’s righteousness helping the ruler dispense justice (72:1); God enacts justice (89:14). God might show his “righteousness” in vindication predicated on forgiveness (Mic 7:9).

1034. I include here any heeding of the psalmist’s plea for deliverance without specification of justice: e.g., Pss 5:8; 71:2, 15–16, 19, 24; 88:12; cf. Judg 5:11; 1 Sam 12:7. God’s righteousness parallels (or supplements) his faithfulness and/or covenant love in Pss 36:5–6, 10; 40:10; 88:11–12; 98:2–3; 103:17; 111:3–4; 119:40–41; 141:1; 143:11–12; 145:7; his salvation in 71:15. Cf. Job 33:26.

1035. Often one cannot distinguish between justice and mercy in the text (e.g., Pss 7:17 [cf. 7:8]; 22:31; 89:16; 119:40, 142); I have listed examples simply to try to show that both can be involved. In the Qumran scrolls, too, God’s righteousness established judgment on behalf of his servant (1QS XI, 5–6).

1036. Likewise, the psalmist praises that the enemies will not come into God’s righteousness, i.e., will not be vindicated or forgiven (Ps 69:27).

Qumran attests that the same ideas persisted in early Judaism:¹⁰³⁷ recognizing the supplicant's just and right way, God would act in his righteousness, forgiving the supplicant's sins (1QS XI, 2–3).¹⁰³⁸ God in his righteousness and goodness would judge, atone for the sins of, and purify his servants (XI, 13–15). God often rescued Israel because of his mercy rather than according to its rebellious works (1QM XI, 3–4). God pardoned people and removed their sin by his righteousness (1QH^a XII, 37).¹⁰³⁹ Likewise, in 4 *Ezra*, God would display his righteousness by showing eschatological mercy to those who had sinned.¹⁰⁴⁰

Many scholars thus argue that, in light of the Jewish context, Paul can use God's righteousness to represent not only God's punishment of evil but also his faithfulness to his covenant to deliver and vindicate his people (whether because they were righteous before God or because they repented before him).¹⁰⁴¹ Drawing on the sort of piety found in some psalms and Qumran scrolls, Paul could recognize that whatever humans' works, they were worthless for acceptability before God's perfection apart from God's love. Paul went beyond these other sources by affirming that God's ultimate demonstration of love in saving history was in Jesus's death and resurrection.¹⁰⁴²

Although God's righteousness includes his covenant mercy,¹⁰⁴³ the verb δικαιοῶ in the LXX included the notion of being recognized as righteous,¹⁰⁴⁴ not a fictitious bestowal of status.¹⁰⁴⁵ To "justify" oneself might mean to keep oneself innocent.¹⁰⁴⁶ It was also forensic language, applied, for example, to the guilty unable to protest their innocence (cf. Gen 44:16; Isa 43:9, 26) or be acquitted (Sir 10:29).¹⁰⁴⁷ Judges must

1037. Some have noted the parallels with Paul (Fritsch, *Community*, 126–27), though there are also differences (Sanders, *Paul and Judaism*, 312). They illustrate that this idea of God's righteousness remained intelligible in this period (Dahl, *Studies*, 99). It retained also a moral sense (1QS X, 25). Some later rabbis also present God's righteousness as his saving mercy (*Gen. Rab.* 33:1; *Ruth Rab.* proem 1; cf. "God of righteousness" in *Test. Jud.* 22:2; righteousness as grace in *b. Hag.* 14a); as his justice, *Test. Ab.* 13:10 A. But whereas "righteous" could apply to either norm or relationship in the OT, in the rabbis it usually specifies a norm (Przybylski, *Righteousness*, 76).

1038. Judgment, i.e., vindication, could come only from God (1QS XI, 5, 9–10); a person could not follow the right way in his or her own strength (XI, 10); only God's righteousness could deliver in trouble (XI, 12). One could appeal to one's righteousness after confessing one's sins (X, 11)—i.e., one's status before God depended partly on God's mercy and covenant faithfulness.

1039. In contrast to the righteous God, humans could not even walk in the right way except by God's Spirit (1QH^a XII, 29–32). Cleansing from sin was God's work alone (XIX, 10–11); he forgave and atoned for them because of his love (4Q504 1–2 II, 8–11).

1040. 4 *Ezra* 8:35–36 (pointed out in Stuhlmacher, *Justification*, 14–16). Unless God pardoned the guilty, few mortals would survive (4 *Ezra* 7:139–40).

1041. See, e.g., Wright, *Founder*, 103 (arguing [117–18] that it is covenant language); Stuhlmacher, *Justification*, 13–24; Haacker, *Theology*, 53–54; Stendahl, *Paul*, 31; Hunter, *Romans*, 29; Donaldson, *Paul and Gentiles*, 93–100; cf. God's faithfulness to his name in Piper, *Justification*, 90–91; idem, "Demonstration," 22–26; idem, "Righteousness." (Some prefer a genitive of origin here, hence "righteousness from God"; so, e.g., Cranfield, *Romans*, 1:98.) Wright, *Founder*, 119, argues that the issue in the first century was how one became part of God's people (cf. Sanders, *Paul and Judaism*, 544); although Paul's argument might involve this, we should not think that the terminology itself necessarily included this nuance (after all, Jewish usage most often involved those who were already considered part of God's people).

1042. Cf., e.g., Ladd, "Righteousness." Later, cf., e.g., Basil *Of Humility* 20.

1043. Barth, *Justification*, 16, connects God's righteousness in Isaiah and Psalms with God's salvific faithfulness but argues that it never includes acquitting the guilty.

1044. Gen 38:26; cf. Job 33:32; Sir 1:22; 23:11; 26:29; 31:5 (LXX; some versions, 34:5); of God in Sir 18:2; used in a comparative sense in Jer 3:11; Ezek 16:51–52. Cf. 1QS III, 3; *Gen. Rab.* 65:6.

1045. It can be fictitious if those pronouncing the verdict are poor judges of character, e.g., people supporting one's words simply because one is wealthy (Sir 13:22).

1046. Ps 72:13 LXX (73:13).

1047. Cf. the sense of "seeking vindication" before God (*Gr. Ezra* 2:5–6). Allen, "Romans I–VIII," 9–14, compares Paul's usage of "righteousness" in Rom 1–8 with the OT covenant lawsuit, but this is too narrow.

not “acquit [δικαιώσεις] the guilty”;¹⁰⁴⁸ they must “justify”—that is, pronounce righteous—the innocent (Deut 25:1). One could ask God to condemn and punish the guilty while vindicating (“justifying”) the righteous by rewarding them (1 Kgs 8:32; 2 Chr 6:23).

God himself was “justified,” or “shown to be right,”¹⁰⁴⁹ including when he pronounced just judgment against the psalmist.¹⁰⁵⁰ God would not recognize the guilty as righteous before him (Mic 6:11).¹⁰⁵¹ Yet apart from God’s mercy, no one could receive this verdict of righteousness (Ps 142:2 LXX [143:2 ET]).¹⁰⁵² Israel’s sins revealed God’s righteousness to judge them (Dan 9:7, 14), but God could be asked to forgive them according to his “righteousness” (Dan 9:16).¹⁰⁵³ Those who had sinned might endure his wrath until God “justified” them and pleaded their case for them, and they would see God’s “righteousness” (Mic 7:9). To “justify” was also to “render justice” on someone’s behalf (2 Sam 15:4); one should “justify,” “vindicate,” “defend the rights of” the widow (Isa 1:17) and the poor (Ps 81:3 LXX [82:3 MT]).

God had also promised eschatological vindication for Israel (Isa 45:25; 50:8) and God’s way (42:21).¹⁰⁵⁴ Perhaps most significant is that this term for “justify” appears in 53:11, part of a key passage mined by early Christians. In the LXX, God would justify, or vindicate, the righteous servant of many who carried away their sins (53:11 LXX), though in Hebrew God’s righteous servant is the verb’s subject. Although the context does lead to the servant’s vindication (53:12), the context probably makes better sense in saying that the righteous servant “justifies” or “vindicates” the many by carrying away the load of their sins (53:11).

For God to “justify”—that is, “acquit,” “vindicate,” and “show to be righteous”—a morally guilty person¹⁰⁵⁵ violates most Jewish usage, yet Jewish people would experience less lexical shock than Greeks,¹⁰⁵⁶ recognizing this acquittal (by God’s righteous mercy forgiving people) as part of the term’s semantic range. For Paul, God is both righteous and the one who makes righteous, because the sentence of guilt has already been executed on Jesus (Rom 3:24–26).¹⁰⁵⁷

Although Roman law understood the notion of pardons,¹⁰⁵⁸ this is no mere pardon;¹⁰⁵⁹ it is transformation of one’s status before God. In Pauline theology, this is insepa-

1048. Exod 23:7; cf. Isa 5:23; Sir 42:2; also forensic in Ezek 44:24.

1049. LXX Ps 18:10 (19:9); Sir 18:2.

1050. LXX Ps 50:6 (51:4); also against Israel, Dan 9:7, 14 (but see 9:16).

1051. Cf. Sir 9:12.

1052. To claim righteousness (justify oneself) before the Lord was exalting oneself, like boasting in wisdom before a king (Sir 7:5).

1053. Later Amoraim insisted that God wanted to acquit people (declare them righteous) so that he need not destroy them (*Pesiq. Rab.* 40:1, 3/4). Someday God would make Israel’s (comparative) righteousness known (*Pesiq. Rab.* 30:4).

1054. Cf. eschatological righteousness in Isa 56:1 (mercy in the LXX); 58:8 and redemption in 1:27 (changed to “pity” in the LXX); God’s gift of a robe of righteousness to Israel in Bar 5:2.

1055. For this usage in Paul, see, e.g., comments in Moore, “Δικαιοσύνη.” Some prefer, more technically, “render judgment in favor of” (e.g., Manson, *Paul and John*, 54) or “vindicate” (Dodd, *Bible and Greeks*, 42–59, esp. 57) rather than “acquit” (cf. Bultmann, *Theology*, 1:253, 270, “right-wise”—both accurate and ambiguous). DeSilva, *Honor*, 130, compares inscriptions about benefactors’ generosity. For Hays, *Echoes*, 157, Paul in Rom 1:17 sees Scripture as a narrative “about . . . God’s righteousness.”

1056. Scripture spoke of a wicked person repenting and becoming righteous (Ezek 18:22; cf. Tob 13:6). Some later rabbis spoke of Abraham’s intercession as making people appear more righteous before God (*Pesiq. Rab Kah.* 16:4).

1057. This interpretation, like all others, is debated today, but I believe it has the strongest exegetical warrant in light of the ancient sources (I address it, though only briefly, in Keener, *Romans*, 59–61, 72–73).

1058. Schiemann, “Indulgentia,” 793; cf. Blinzler, *Trial*, 207–8.

1059. Pace, e.g., Manson, *Paul and John*, 56. Cf. Jeremias, *Message*, 63, arguing for a genuine change and not a legal fiction; Ladd, *Theology*, 443, arguing that the status of the relationship is changed.

rable from the transformation of one's moral disposition effected by sharing Christ's death, a transformation also depicted (in terms of "ritual" status) as being set apart or consecrated to God.¹⁰⁶⁰ Although δικαιοσύνη includes a forensic component ("justification," "acquittal"), Paul also employs it for moral "righteousness." There is no contradiction; God puts his people in the right with him but also transforms them into eschatological creations capable of doing his will.¹⁰⁶¹ Paul emphasizes this teaching especially in letters addressing the salvation of Gentiles, who otherwise could not match Jewish people in obedience to the law.¹⁰⁶²

III. WARNING AGAINST UNBELIEF (13:40–41)

A plea to continue listening (Acts 13:40) was good rhetorical form (e.g., Cic. *Verr.* 2.3.5.10; see comment on Acts 2:22). Just as the prophets' warnings about Jesus's rejection were fulfilled by Jerusalem's leaders who did not understand them (Acts 13:27), Paul's hearers should beware lest other prophetic warnings be fulfilled by them. This passage illustrates the interplay between God's sovereign plan and human responsibility; someone will do the evil deed, but one must take care that it be not oneself (cf. esp. Luke 17:1; 22:22; perhaps 21:21–22).

Luke regularly uses the common phrase "the prophets" (Acts 13:40; elsewhere, e.g., Luke 16:29, 31; 18:31; 24:25, 27, 44; Acts 3:18, 24), but the term is certainly apropos here, since he quotes from the scroll of the prophets, the twelve "minor" prophets forming a single book (cf. Acts 7:42; 15:15).¹⁰⁶³

Although it was not uncommon to move from the Torah to the prophets (as in Acts 7:42–50), this citation's location at the end (13:41) should not mislead us into underestimating its significance for the speech. It may function like a closing gnome, which was common in speeches.¹⁰⁶⁴ Sometimes the most significant, central texts appeared at the end of a homily, as with all the homilies in *Pesiq. Rab Kah.* 16, most of which conclude with Isa 40:1 (whether they cited it earlier or not).

The context of Hab 1:5¹⁰⁶⁵ is Babylonian judgment on wicked Judah, judgment so terrible that God's doomed people would not believe it.¹⁰⁶⁶ The righteous, by contrast, would survive the judgment because of faith (2:4),¹⁰⁶⁷ an idea perhaps implicit behind

1060. That is, δικαιοσύνη as a forensic decree of righteousness overlaps with δικαιοσύνη as righteous character; God's decree is efficacious (cf., e.g., Gen 1:3), and a transformed eschatological destiny should reorient the convert's current life direction.

1061. Note this emphasis, e.g., in Schlatter, *Romans*, 20, 26–27, 133, 152; Stuhlmacher, *Romans*, 30–31, 185; Ortlund, "Justified," 338–39.

1062. For this emphasis most commonly with regard to Gentiles, see, e.g., Stendahl, *Paul*, esp. 1–7; with regard to the law, Sanders, *Paul and Judaism*, 439; earlier, Jeremias, *Message*, 58, recognized it especially in Paul's polemics with the synagogue. Cf. Keener, *Romans*, 7–8.

1063. With Lake and Cadbury, *Commentary*, 157; Johnson, *Acts*, 236.

1064. Cf., e.g., *Rhet. Alex.* 1439a, 32.3–7; 32.33–35. If the speech has emphasized Israel's unfaithfulness alongside God's faithfulness, it warns Paul's (and Luke's) audience not to repeat it (*Zywica*, "Odpowiedzialność").

1065. For the importance of the context of texts cited in Acts 13:34–47, see van de Sandt, "Acts 13, 32–52." Wall, "Function," shows that Luke employs Hab 1:5 (in the spirit of LXX Habakkuk) to explain the divided audience response here. See Mufwata, *Extrémities*, 114–15, for textual comparisons and contrasts between Acts 13:41 and Hab 1:5.

1066. The marvel/wonder is terrible impending judgment (Hab 1:6–11), but Habakkuk pleads for God to turn back injustice, especially that of Chaldeans (1:2, 12–17); he waits to hear God's message (2:1). The message comes in 2:4: judgment will come on the proud, but the (humble) righteous will live by faith. For impending judgment, Luke's audience could envision 70 C.E., but this would appear more relevant for Jerusalemites than for Jews in Pisidian Antioch.

1067. Whose faith or faithfulness is meant varies between the MT and the LXX readings, which Paul seems to have finessed by omitting the pronoun altogether, though probably usually speaking of the believer's faith

Acts 13:39, since the only OT texts connecting faith and righteousness are Hab 2:4 and Gen 15:6. (If Luke's version of the speech condenses a longer and more Pauline source, Paul likely made more explicit connections at this point between Hab 2:4, in support of forgiveness by faith in Acts 13:38–39, and Hab 1:5 in Acts 13:41.) Qumran's commentary on Habakkuk (1QpHab) also offers a pesher application to end-time events: Habakkuk is here understood as referring to those who betrayed the new covenant by refusing to believe the divinely appointed Teacher of Righteousness.¹⁰⁶⁸ Here, Israel's potential unbelief is no surprise, having been predicted in Scripture, as implied earlier in Stephen's analogy with Moses (Acts 7:35–37; cf. Isa 53:1 in Rom 10:16).

The MT's reading that opens this text, "among the nations," could have been helpful for Luke's point, but the quotation follows the standard LXX form, "See, you who scoff!"—a form also presupposed in the exposition in 1QpHab II, 1–10.¹⁰⁶⁹ Amazement at signs (here θαυμάσατε) is frequent in Luke-Acts (Luke 2:18; 8:25; 9:43; 11:14; 24:41; Acts 2:7; 3:12; 4:13; 7:31; see comment on Acts 3:12), but sometimes these can harden confounded opposition as well (Acts 5:16–17; 6:8–12; 14:3–5; 16:18–23; 19:20, 26).

Some scholars see the "work" here as Paul's preaching,¹⁰⁷⁰ which would fit Luke's use of the term elsewhere (cf. 5:38; 13:2; 14:26; 15:38), and perhaps preaching as a sign (perhaps Luke 11:30). But immediate context must retain precedence over wider context, and the grammar (not least the emphatic "I") favors the interpretation that the work is God's (fitting even better the same Acts texts noted for Paul). Paul is the agent of recounting (ἐκδιηγῆται, also Acts 15:3, the only other NT use), not its subject; the work should be the object of faith in this verse, presumably the same object of faith as in 13:39.

The biblical warning of judgment for rejecting the Lord's message here develops a theme in Luke 19:42–44 and 21:6, 22. It begins to be fulfilled when Paul's hearers reject the divine messengers sent to them (Acts 13:45, 50). Some prophets and apostles would be persecuted (Luke 11:49; contrast Matt 23:34) so that judgment could come on that generation (11:50), a judgment proleptically symbolized by the disciples shaking the dust from their feet in Acts 13:51 (cf. Luke 10:10–11).

e. Response (13:42–52)

Although the immediate response was favorable (Acts 13:42–43), the rest of the narrative moves back and forth between Jewish and Gentile hearers, highlighting a

(Rom 1:17; Gal 3:11; cf. also Heb 10:38; but Gal 2:20 might imply use of the LXX reading). Hays suggests that by omitting the pronoun, Paul draws on associations of both the Hebrew and the LXX readings (*Echoes*, 40–41). Hays and numerous other noteworthy scholars interpret "faith of Christ" differently, however, preferring a subjective genitive (Hays, *Faith*, 157–76; Barth, "Faith"; Johnson, "Faith of Jesus"; idem, *Romans*, 60–64; Dunnill, "Whose Faith?"; Ramarosan, "Études"; Hooker, "ΠΙΣΤΙΣ ΧΡΙΣΤΟΥ"; Tonstad, "Πίστις Χριστοῦ"; Talbert, *Romans*, 43–47; Stubbs, "Shape"; see a fuller listing in Longenecker, *Interpreting Romans*, 319), marshaling significant evidence (especially important is the subjective genitive in Rom 3:3; 4:12, 16). But the objective-genitive view retains many supporters (e.g., Hultgren, "Formulation"; Matlock, "Πίστις Χριστοῦ"; idem, "Detheologizing"; Leyrer, "Πίστις Χριστοῦ"; Lee, "Against"), who appeal to context (e.g., Dunn, *Theology of Paul*, 380–85, esp. 384–85; also Hunn, "Πίστις Χριστοῦ," pointing to Gal 3:1–6), patristic usage (Harrisville, "ΠΙΣΤΙΣ ΧΡΙΣΤΟΥ"; but cf. early translations in Talbert, *Romans*, 44), or the fact that Christ is an object, rather than subject, of the cognate verb (Tobin, *Rhetoric in Contexts*, 132–34; Schreiner, *Romans*, 186 [esp. on Rom 4:13–24]; contrast Vanhoye, "Πίστις Χριστοῦ"). Some others think that ancient readers may not have pressed the distinction too sharply (Morris, *Romans*, 175), or even prefer a genitive of origin (Rusam, "Πίστις"). See now especially discussion in Bird and Sprinkle, *Faith*.

1068. Pillai, *Interpretation*, 70; Steyn, *Septuagint Quotations*, 193.

1069. Conzelmann, *Acts*, 106.

1070. Fitzmyer, *Acts*, 519.

contrast between them. Thus, on the next Sabbath, the Gentile hearers (13:44, 46–48) mostly responded more favorably than the Jewish hearers (13:45). Many Gentiles were therefore converted (13:48–49), but hostile Jewish members solicited the help of Gentile benefactors to drive the apostles from town (13:50–51). Meanwhile the disciples continued to be filled with the Spirit (13:52). Such a contrast serves an ironic purpose: the failure of those one expected to repent was particularly noteworthy, as was the positive response of the outsiders. One could not predict the results of one's sowing (Luke 8:4–15).¹⁰⁷¹

I. FAVORABLE SHORT-TERM RESPONSE (13:42–43)

The immediate response of all in the synagogue was favorable, just as it was in Jesus's inaugural sermon in the Gospel (Luke 4:22) and Paul's final speech in Jerusalem (Acts 22:2).¹⁰⁷² It is only when Gentiles are welcomed on virtually the same level as Israel that hostility arises, and then it is serious hostility (Luke 4:25–28; Acts 22:21–22). For Luke, the greatest objection of the Jewish people to the Jesus movement is its inclusion of Gentiles on equal terms, an objection prefigured in opposition to Jesus's table fellowship with the marginalized of Israel (Luke 15:1–2, 25–32).

We know that many Gentiles attended Jewish services and, in general, were welcome there,¹⁰⁷³ as Philo emphasizes (e.g., *Spec. Laws* 1.51–53, 308).¹⁰⁷⁴ If Josephus sometimes exaggerates the appreciation of all ancient Gentiles for Judaism (e.g., *Ag. Ap.* 2.280–86, balanced elsewhere), he is nevertheless clear that many Gentiles became adherents to Jewish faith (e.g., *War* 7.45). Word would hardly have spread throughout Pisidian Antioch (Acts 13:44) about the speakers without the interest of those present that first Sabbath. But it is doubtful that uncircumcised Gentiles (not included in proselytes here) outnumbered Jews in the services, as was to happen in 13:44. More important, Luke accepts, though he does not here articulate, the idea that faith *without circumcision* justifies and presumably even makes Gentiles members of God's people (15:8–11); if his narrative presupposes this Pauline gospel, then the hostility that will follow is more readily explained.¹⁰⁷⁵

The primary interpretive problem in this verse is the identity of the “God-fearing proselytes.” Does Luke refer to what he normally means by proselytes or to what he normally means by God-fearers?¹⁰⁷⁶ The context divides the synagogue into two

1071. This is not an ethnic criticism per se. Had Luke written today, he might have made a similar point of nominal Christians' taking God's good news for granted, persecuting an evangelist working among non-Christians. Such conflicts reflect a general human tendency, not a particular ethnic one, and could be illustrated abundantly through history (in recent centuries, e.g., through much local English opposition to the Wesleys; examples could be multiplied).

1072. Cf. also Johnson, *Acts*, 243, comparing Luke 4:22–29. Many see the rejection at Nazareth as programmatic for synagogue rejections in Acts (e.g., Brawley, *Luke-Acts and Jews*, 155).

1073. Minority movements whose size can be augmented by conversion are sometimes aggressive in pursuing converts. There is some evidence that many Jewish people were willing to use synagogues to attract Gentiles (see Moore, *Judaism*, 1:284–85, 306, 324; Liefeld, “Preacher,” 206–7; their evidence is mostly from a later period, but one in which outreach was probably more restricted). A Jewish “missions movement,” however, is overstated (see comment on Acts 1:8).

1074. Schiffman, “House of Adiabene,” thinks that Luke used even his account of Adiabene's royal family to show that Judaism welcomed all.

1075. Luke's narrative probably does presuppose Pauline soteriology (see, e.g., Kilgallen, “Difference”), and the issue of Gentiles is probably what provokes hostility (idem, “Hostility”). Ramsay, *Cities of Paul*, 308, doubts that the local Jewish community understood the implications until the next week.

1076. Levinskaya, *Diaspora Setting*, 47–49, offers a third proposal—namely, converts to Paul's message—but despite later Christian use of “proselyte” for Christian converts (e.g., Justin *Dial.* 28.2; Levinskaya, *Diaspora Setting*, 40–46), nothing extant from first-century Christianity—certainly nothing in Luke-Acts—prepares us for this reading. For one discussion of the significance of proselytes and God-fearers among hearers in Acts 2:11; 13:43, see Koch, “Proselyten.”

groups, apparently Jewish and Gentile (13:16, 48), perhaps allowing that these are simply devout but uncircumcised Gentiles.¹⁰⁷⁷ Conversely, anyone could fear God whereas “proselyte” is a more technical designation (2:10; 6:5), and so the term here probably means “devout proselytes.”¹⁰⁷⁸ From a narrative standpoint, Luke can use proselytes to stand in for Gentiles when they are the group closest to Gentiles available for his point (6:5), as he can use Samaritans (Luke 17:16–18;¹⁰⁷⁹ Acts 8:5–25); he may include both technical proselytes and God-fearers in the phrase.¹⁰⁸⁰ If we must decide between the two options, however, “devout proselytes” is the likeliest assumption, based on Luke’s usage.¹⁰⁸¹ Some scholars have argued that much of Paul’s ideal audience in his letters consisted of God-fearers;¹⁰⁸² if so, Luke’s portrayal of Paul evangelizing proselytes (here) and (on other occasions) God-fearers is quite plausible.

Synagogues functioned as community centers¹⁰⁸³ and hence provided an appropriate venue for continuing to speak after meetings. Those converted through grace (cf. Acts 15:11) must yet persevere. The exhortation to “continue” in God’s grace reflects a Lukan (and other early Christian, e.g., Rom 11:22; Col 1:23; Heb 3:14) concern for perseverance (see comment on Acts 14:22); Barnabas (Acts 11:23) and Paul and Barnabas (in 14:22) employ this language of “continuing” in the faith.¹⁰⁸⁴ That the exhortation appears so often in the context of young faith suggests that Luke expects it and views it as a model.

II. MIXED RESPONSE THE NEXT SABBATH (13:44–48)

When Gentiles whom the synagogue had not reached responded now to Paul’s message (13:44), apparently because he demanded only faith in Israel’s God without full conversion to Jewish culture and ethnicity (13:38–39), much of the synagogue responded with hostility (13:45). Paul then turned to the Gentiles (13:46–47), to the joy of the Gentiles (13:48) and the further annoyance of local Jewish people of influence (13:50).

(1) *Success Breeds Jealousy* (13:44–45)

The “whole city” (13:44) is standard hyperbole, foreign neither to Luke (Luke 8:39; 9:6, 60; Acts 21:28, 30; 24:3; 26:20; 28:22) and the gospel tradition (Mark 1:33, 45; 6:33; Matt 21:10) nor to other sources (e.g., Deut 2:25; Ruth 1:19).¹⁰⁸⁵ Nevertheless, word of a speaker with a dramatic style or message would spread quickly, and Paul’s message was nothing if not dramatic (its emphasis on the fulfillment of biblical promises might sound something like “The end of the world is coming,” but from a positive perspective). When famous speakers (e.g., Dio Chrysostom or Lucian)

1077. The usual sense of “God-fearers” in Luke (Nock, *Christianity*, 2; see comment on Acts 10:2).

1078. Marshall, *Acts*, 229. “God-fearers” (τοὺς σεβομένους) applies to proselytes in *Test. Jos.* 4:6.

1079. Cf. the LXX use of ἀλλογενής (Luke 17:18, a NT hapax legomenon) for a foreigner (e.g., Exod 12:43; 1 Esd 8:69, 70, 83, 92, 93; 9:7, 9, 12, 17, 18, 36; 1 Macc 3:36, 45; 10:12), including those attached to Israel (Isa 56:3, 6).

1080. Munck, *Acts*, 126, views them interchangeably here.

1081. One could argue for women, whose adherence to Judaism was not sealed with circumcision (Acts 13:50; 16:14), but this term is not so limited (17:4; cf. 17:17) and can apply to men (18:7).

1082. See Reiser, “Heiden”; for Romans, Tobin, *Rhetoric in Contexts*, 31–32, 43; cf. Lung-Kwong, *Purpose*, 155; Brändle and Stegemann, “Formation,” 124. This is more likely true in some letters (e.g., Romans) than in others.

1083. See esp. Levine, “Synagogue,” 14, citing, e.g., Philo *Embassy* 156; *Jos. Ant.* 14.214–16; 16.164, 167–68.

1084. It also seems to imply that some have been converted (with Wall, “Acts,” 194), though more would be later (Acts 13:48–49).

1085. C. Williams, *Acts*, 167 (citing Athen. *Deipn.* 5.48.212b); cf. more generally Crowe, *Acts*, 104. Johnson, *Acts*, 240, cites “such mass responses to excitement” in novels (Char. *Chaer.* 3.4.4–18; Heliod. *Eth.* 4.19.5; *Acts John* 31; *Acts Pet.* 3).

came to town, they would draw large crowds.¹⁰⁸⁶ A sophist wishing to be heard in a town had to attract sufficient numbers for his initial audition or risk shame; a small number, such as seventeen, was too few to succeed.¹⁰⁸⁷ Paul, by contrast, had clearly won the city's attention (though ultimately the local elite prove more influential on their local population, Acts 13:50). Despite hyperbole, then, many had gathered.¹⁰⁸⁸ Although the synagogue itself would not have been able to hold such crowds,¹⁰⁸⁹ an overflow meeting would be possible in the spacious central area of the town.¹⁰⁹⁰

By no means would all the hearers be devout. Even though "all the city" is undoubtedly exaggerated, even a partial cross section would include many people exposed to the sort of paganism mentioned in the comment on Acts 13:14 and participants in the imperial temple mentioned in the comment on Acts 13:50. Such a response is therefore remarkable.

Hostility from some synagogue members here (13:45) sets a pattern for much of Paul's subsequent public ministry (Paul's own testimony leaves open the possibility that he faced such conflicts even before this point historically, 2 Cor 11:24). Jealousy was a common motive to attribute to one's enemies (e.g., *Jos. Ag. Ap.* 1.213, 222, 225; see comment on Acts 5:17), and Luke at times attributes it to Jewish leaders as the cause of their hostility (Acts 5:17, which employs the identical phrase ἐπλήσθησαν ζήλου; 17:5), following the pattern of the patriarchs' rejection of Joseph in Scripture (7:9).¹⁰⁹¹ For ἀντιλέγω, see also Luke 2:34; 20:27; Acts 28:19, 22, in each instance with people speaking against the truth.¹⁰⁹²

That Paul would have hecklers is not at all surprising; challengers often heckled speakers during their orations.¹⁰⁹³ The motive of jealousy in this case would not be

1086. Nock, *Conversion*, 62. Cf. also the crowds (initially hostile but won over) following Diogenes in the story in Diogenes *Ep.* 2.

1087. Winter, *Left Corinth*, 37 (citing Ael. Arist. *Or.* 51.29; Russell, *Declamation*, 77n16).

1088. While allowing hyperbole, Luke does not earlier go as far as Mark's hyperbolic "whole city" at the door (Mark 1:33; cf. Luke 5:19).

1089. Despite the massive size of a synagogue such as the much later one (the largest known to us) in Sardis (the bulk of the interior was roughly 197 by 59 feet, or about 60 by 18 meters—Fant and Reddish, *Sites*, 308; earlier, Goodenough, *Symbols*, 12:191, had suggested "three hundred feet long," more than 90 meters, for the entire structure). First-century synagogues in the Holy Land could measure 15 by 10 meters (which would be some 49 by 33 feet; Evans, *World*, 51, on the Herodium synagogue); 120 square meters (Evans, *World*, 53, on Magdala); 12.5 by 10.5 meters (Evans, *World*, 55, on Masada's synagogue); 12 by 10 meters (Evans, *World*, 56–57, on the earlier synagogue at Modi'in); or 9.6 by 9.6 meters (Evans, *World*, 57, on Qiryat Sefer). Although it might accommodate more, fitting even two hundred people into the Herodium synagogue might feel very uncomfortable by Western standards.

1090. Schnabel, *Missionary*, 82–83, proposes that "the crowd could have gathered in front of the synagogue, or perhaps in the plaza called Augusta Platea at the northern end of the *Cardo Maximus*, or perhaps in the theater located on the *Decumanus Maximus*."

1091. Despite Mark 15:10, Luke skips the opportunity to attribute the motive to the priestly aristocracy at Jesus's trial. Baum, *Gospel*, 159, rightly notes that this portrayal of jealousy reflects a personal flaw of human individuals, not something inherent in Judaism. It may, however, reflect part of the honor-shame dynamic of ancient Mediterranean culture; note competition for honor (Jewett, "Shame," 551–53; Savage, *Power*, 23–25; cf. further Barton, "Moment"; idem, *Honor*, 29–130, for honor's relationship to a contest culture); it was a criterion in judicial rhetoric (Hermog. *Issues* 76.5–6; 78.22–79.6). For Mediterranean honor and shame more generally (and the limits of assigning this stereotype), see Gilmore, "Shame," 3–6, 16; Herzfeld, "House," 75; Brandes, "Reflections," 121–23; in antiquity, e.g., Hom. *Il.* 5.471–93; 5.529–32; 8.145–50, 161–63; Isaeus *Cleon.* 39; Cic. *Cat.* 2.10.25; Val. Flacc. 1.77; Pliny *Ep.* 5.11.2; 6.6.1–9; Suet. *Jul.* 11; 19.2; Lucian *Critic* passim; Philost. *Hrk.* 45.8; deSilva, "Wisdom"; idem, *Shame*, chs. 2–3; Adkins, *Merit*; Williams, *Shame*; in the OT, Hadjiev, "Honor"; for Stoic thought, see Mus. *Ruf.* 3, p. 38.29–30; 4, p. 48.3; Arius Did. *Epit.* 2.7.5 L, pp. 34–35.19; 2.7.10c, pp. 60–61.19, 27; 2.7.1 li, pp. 78–79.25–29.

1092. It is also negative in its other early Christian occurrences (Rom 10:21 [citing Isa 65:2]; Titus 1:9; 2:9; Ign. *Smyrn.* 7.1; *Barn.* 12.4 [citing Isa 65:2]; Herm. 28.3); in the LXX, see Isa 22:22; 50:5; 65:2; Hos 4:4; Sir 4:25; also 3 Macc 2:28; 4 Macc 4:7; 8:2. Jealous people do not praise (Symm. *Ep.* 1.25).

1093. E.g., *Rhet. Alex.* 18, 1432b.35–40; 1433a.14–25; Cic. *Or. Brut.* 40.138; Lucian *Dem.* 14; see further comment on Acts 2:13.

difficult to understand. Outsiders—offering the entire local Gentile community faith on terms that would have seemed “cheap” to traditional Jews who had labored among them¹⁰⁹⁴—would have appeared to treat lightly, in the name of and by means of their synagogue, the traditional Jews’ own years of work as a minority community.¹⁰⁹⁵ They probably viewed the newcomers as violating their hospitality, demanding conformity with new beliefs, and stirring trouble.¹⁰⁹⁶ The perspective one takes on the apostles’ behavior here will rest largely on one’s Christology.

More important, however, would have been the immediate attention of synagogue-attending Gentile sympathizers to the new teaching. God-fearers may have been of higher social status more often than were proselytes because persons of status had more to lose by full conversion.¹⁰⁹⁷ Their presence in the synagogues showed their attraction to Jewish ethics and monotheism and their willingness to question their own religious heritage. To be welcomed as first-class members of this faith without having to undergo circumcision and renounce their own ethnic identity must have been especially appealing to these sympathizers, helping to explain their rapid conversion to Christian faith.¹⁰⁹⁸

What appealed to the Gentiles, however, could prove offensive to the synagogue’s base constituents.¹⁰⁹⁹ Further, many of these Gentile adherents, though unable to be full members of the synagogue, were benefactors whose transfer of support (if the synagogue community itself rejected the apostolic message) would stir opposition (cf. Acts 13:45, 50; 17:12).¹¹⁰⁰ Gentiles who had already taken the step of full conversion (for males, including circumcision)¹¹⁰¹ may also not have been pleased by a newer, “lower” standard for other Gentiles. Possibly the higher-status members of the synagogue (13:15) or these high-status God-fearers were able to stir others with status against the outsiders (13:50).

The term translated “blaspheme” (which bears this meaning when applied to deities, 19:37) can mean simply reviling when applied to human objects (see comment on Acts 6:11–13; BDAG). That Luke uses such a term, however, reveals the strength of the hostility of Paul’s critics here and suggests the real object, unknown to them, of

1094. Diaspora Jewish homilies tended to be positive toward Gentiles (e.g., Siegert, “Homily,” 435–37); cf. also favorable works such as the *Letter of Aristaeus* (e.g., Hadas, *Aristaeus*, 225, on *Let. Aris.* 316; many have even viewed the *Letter of Aristaeus* as apologetic toward Gentiles, despite Tcherikover, “Ideology,” 60–61). Longenecker, “Character,” 152, suggests here “a defensiveness to guard one’s possessions (i.e., divine favor on Israel),” which he connects (p. 155) to possessiveness regarding possessions in the Gospel (Luke 12:16–21).

1095. One might compare a struggling local church trying to teach Christian morality in an otherwise unchurched area, suddenly confronted with the exploding growth of an apparent cult with apparently lower standards, using the church’s property but competing for its members. The analogy is inexact but might provide Christian readers more sense for the feelings involved.

1096. See fully Sandmel, *Anti-Semitism*, 100. Strelan, *Strange Acts*, 16, comparing modern views on marginal sects, also considers how other Jews would have regarded Christians; cf. also Thompson, “Ethics,” 64–78, for diverse interpretations of Paul’s preaching in the synagogues.

1097. Malherbe, *Social Aspects*, 77. This sometimes included even the high-status women (e.g., Poppaea, *Jos. Ant.* 20.195); but the royal house of Adiabene became high-status converts (*Ant.* 20.17, 38, 46, 48–49; despite initial resistance, 20.39–41, 47).

1098. Malherbe, *Social Aspects*, 77.

1099. When ethnic religion (for one definition, see Peel, “Christianization,” 443) loses its specifically ethnic component, it can attract outsiders rapidly (cf., e.g., the rapid modern proliferation of indigenous Christianity in many regions as soon as it shook free of Western, especially colonial, influence), yet this process risks alienating its traditional constituency.

1100. Levinskaya, *Diaspora Setting*, 124–25; Stambaugh and Balch, *Environment*, 55, following Gülzow, “Soziale Gegebenheiten,” 196. Many Jewish communities in southern Asia Minor were well-accepted members of their society (see, e.g., Williams, “Jews of Corycus”; Trebilco, “Communities,” 567).

1101. Full conversion entailed not merely initiation into another polytheistic cult but joining an ethnic community (see Meeks, “Aliens,” 133–34).

their opposition (as in Luke 23:39; Acts 18:6; 26:11). God's servants are accused of blasphemy (Luke 5:21; Acts 6:11), but the severest accusers are themselves guilty of blasphemy against God (Luke 12:10).¹¹⁰² Paul's writings also testify to considerable opposition from some synagogues (2 Cor 11:24, 26; in Judea, see Rom 15:31; 1 Thess 2:13–16), without which, presumably, most of Judaism would have embraced the Jesus movement.¹¹⁰³ For Luke, rejecting Jesus's apostles is tantamount to rejecting both Jesus and the Father who sent them (Luke 10:16; the reader explicitly knows the sending in Acts 13:4). The result of a local synagogue "blaspheming" here, as in Acts 18:6, will be Paul's declaration that he is right to bring Israel's message also to the Gentiles.

(2) *Turning to the Gentiles (13:46)*

Whereas sophists stereotypically sought audience praise,¹¹⁰⁴ philosophers viewed changed behavior as the goal,¹¹⁰⁵ and faithful prophets in the biblical tradition shared the same commitment; when gentler rhetoric failed, prophets often pronounced judgment, sometimes severe. Paul's words are not calculated to win him favor in the synagogue (contrast Luke 11:43; 14:7–10; 20:46) but are spoken with the boldness of biblical prophets (e.g., Amos 3:2; see comments on "boldness" at Acts 4:13). Prophetic leaders often found themselves in conflict with institutional leaders, whom they regarded as obstinate against God's obvious message (e.g., Luke 14:1–6). The epistolary Paul could also sound hard on a Jewish audience (e.g., Rom 2:24) because he believed that his people had greater moral responsibility on account of greater knowledge (2:12–13, 17–29; 3:19–20; 4:15; 7:7–23; cf. Amos 3:2). He saw some contemporary Jewish claims as expressions of ethnocentric arrogance (Rom 2:17–23; 3:9, 27),¹¹⁰⁶ which he believed the God of Scripture rejected (3:29).

Paul's warning from the prophets in 13:41 suggests that some of his hearers will not believe despite testimony and hence will perish. As modern readers in a different setting, we may well wonder why Paul would give up on his audience so quickly. Several factors may make his response more intelligible. First, in keeping with 13:41, he believes that some have already rejected the message. This rejection is not likely to be resolved, at least not in the short run, by further dialogue. Again in keeping with 13:41, Paul believes that the rejection of true testimony brings moral responsibility. Second, Paul's mission in Pisidian Antioch is not likely to be a long-term one. Luke's narrative does not depict him settling at length in a city until the major urban center of Corinth (18:11). His haste might be motivated by the need to spread the gospel as widely as possible in an initial way (cf. Luke 10:4, 10–11, esp. in view of Acts 13:51),

1102. Possibly they used oaths or cursed Jesus (Witherington, *Acts*, 415), but the language need not demand this. On the meaning of blasphemy, see discussion at Acts 6:11.

1103. Thus, though repeated opposition can function as a plot device (Petersen, *Literary Criticism*, 91, who unfairly doubts its correspondence with the extrinsic world), it also reflects historic reality.

1104. Ael. Arist. *Def. Or.* 189, §57D; 201–2, §61D–62D, responds to this moral critique of orators.

1105. E.g., Mus. Ruf. frg. 49, p. 142.12–19. For philosophic critiques of rhetoric, see Xen. *Mem.* 4.3.1; Plato *Theaet.* 164CD; *Hippias major*; *Hippias minor*; Val. Max. 3.4.ext. 1; *Philo Creation* 45; *Worse* 38; Sen. *Y. Ep. Lucil.* 40.4; 86.16; 100.1; 108.12, 23, 38; 115.1–2; Mus. Ruf. frg. 36, p. 134.14–16; Epict. *Diatr.* 1.8.7–8; 3.23 (e.g., 3.23.20, 38); Dio Chrys. *Or.* 6.21; 54.1–4; Arius Did. *Epit.* 2.7.11m, pp. 90–91.21–25; Anacharsis *Ep.* 1; Tac. *Dial.* 31–32, 42; Aul. Gel. 5.3.7; 5.10; Max. Tyre 26.2; 27.8; Marc. Aur. 1.7; 1.16.4; 1.17.8; Philost. *Vit. Apoll.* 4.30; *Ep. Apoll.* 1; Porph. *Marc.* 17.284–85; Kennedy, *Classical Rhetoric*, 42–60; Winter, *Philo and Paul*, 83–98.

1106. The problem that Ramsay, *Cities of Paul*, 304, suggests in this narrative. If modern readers agree too painlessly with Paul's intra-Jewish critique, consideration of the endemic character of ethnocentrism among all cultures today might add perspective (on ethnocentrism, see, e.g., Luzbetak, *Church and Cultures*, 126; Kraft, *Christianity in Culture*, passim, e.g., 7, 23, 49–50, 82, 228, 292–93; Kroeber, *Anthropology*, 11, 74, 106, 234–35; Merriam, *Anthropology of Music*, 8; Mayers, *Christianity Confronts Culture*, 6–7, 149; Grunlan and Mayers, *Cultural Anthropology*, 26–27, 88, 263).

perhaps in part for eschatological reasons (cf. Acts 1:8; Mark 13:10).¹¹⁰⁷ Luke does not present Paul's approach here as a mistake, since it continues to be repeated (Acts 18:6; 19:9; 28:25–28).

In Luke's narration, both Paul and Jesus spoke after a reading from Scripture (Luke 4:21–27; Acts 13:15), and both offended their synagogue audience by embracing the Gentiles (Luke 4:25–27; Acts 13:46–47).¹¹⁰⁸ Despite Luke's design, he did not originate the concept. Acts shows the church's gradual growth in identifying God's people not simply as Jacob's ethnic descendants but instead as a multiethnic worldwide community.¹¹⁰⁹ One component that helped the missionaries to realize this point and turn increasingly to Gentiles was the pattern of rejection in Acts, analogous to what the epistolary Paul envisions as a partial hardening of Israel (Rom 11:7, 25, 30–31).¹¹¹⁰ Jewish unbelief, as well as the divine plan of reversing the status of outsiders and insiders (Luke 14:11; 18:14), necessitated turning to the Gentiles.¹¹¹¹ "Necessity" was also one important way to explain the reasons for, and hence defend the propriety of, one's behavior (Hermog. *Issues* 76.5–7; 77.20–78.21). But part of the necessity is the divine plan (on which see comment at Acts 2:23); turning to the Gentiles was already God's plan even before Israel's hardness (Luke 2:32; Acts 1:8; cf. Rom 11:31–32),¹¹¹² explicit even in the OT citation in Acts 13:47. Thus Israel's disobedience proved "the occasion, but not the cause, for the mission to the Gentiles."¹¹¹³ Luke did not compose this theology himself even though he emphasized it in particular ways; the Paul of the epistles no less views Israel's temporary rejection as grounds for reaching the Gentiles (Rom 11:11–15, 19–20; cf. also Jesus tradition in Mark 7:27–29).

Paul's claim that he turns to the Gentiles, however, appears to mean locally because he continues to begin in synagogues on subsequent occasions (Acts 14:1; 17:1, 10, 17; 18:4, 19; cf. 28:17).¹¹¹⁴ Three times in Acts he warns his own people that he is "turning to the Gentiles," but each time (except the last because the book ends there) he goes to his own people in other cities (18:6; 28:28).¹¹¹⁵ This simply fits the pattern of Jesus's command to his agents: when people in one city reject his agent, the agent should shake off the dust and move on (Luke 10:10–11). Thus the schism is nowhere

1107. Cf. in later times a similar practice by the China Inland Mission and other groups working in new areas (Neill, *History of Missions*, 334, 336). Paul did not of course neglect church planting, which was necessary to sustain subsequent indigenously led evangelism. Pragmatic considerations might also support some urgency: once rejected by prospective Jewish hosts, it might be logistically difficult for them to remain locally, especially if expected patronage arrangements (such as with the Sergii Paulii) had fallen through.

1108. Though Paul responds to prior opposition in Acts 13:45, responding in turn, apparently, to Gentile acceptance in 13:44.

1109. See discussion in Seccombe, "People."

1110. See *ibid.*, 370–71; for the compatibility with Rom 11, Haacker, *Theology*, 90. Israel's hardening recalls Rom 9:18; cf. 2 Cor 3:14. Alternatively, Nanos, *Mystery*, 270–73, views turning to Gentiles not as a result of Israel's rejection but rather as a means to its eschatological restoration (predicated on his earlier argument in that book). Arguing for the continuing connection of the church with Israel, see Deutschmann, *Synagoge*, 35–168.

1111. See Talbert, "Again: Mission."

1112. See Nolland, "Salvation-History," 76–81. On the role of Luke 2:32 in Luke-Acts, see Radl, "Beziehungen," 305–6; for the relationship here, cf., e.g., Rese, "Funktion," 78; Mufwata, *Extrémities*, 157 (noting the allusion to Isa 49:6; though cf. also Isa 42:6; 60:1–2).

1113. Barrett, *Acts*, 657; cf. Chance, *Acts*, 223. One might also contrast the ultimate cause (God's purpose) and the proximate cause or catalyst that effected it (by removing it from seeming like a breach of God's covenant with Israel).

1114. This pattern was noted even by John Chrysostom, who from it inferred that Paul did not abandon his people, "for great was his desire toward them" (*Hom. Acts* 37 [Martin, *Acts*, 211, on Acts 13:46]; he goes on to quote Rom 9:3; 10:1). He argues that Jews remained welcome (*Hom. Acts* 30 [Martin, *Acts*, 171]).

1115. With, e.g., Seccombe, "People," 364; Barrett, *Acts*, 657; Koet, "Pogłady"; Dollar, *Exploration*, 320–21; Nanos, *Mystery*, 273 (comparing Paul's theology in Romans).

final in Acts; Paul remains loyal to his Jewish identity and heritage (Acts 21:39; 22:3; 24:11–12, 14–15, 17; 25:8; 26:4–7; 28:17).¹¹¹⁶

Had Paul lived to see a final schism, he surely would have claimed that he, rather than the majority of his people, remained faithful to Israel's heritage; but by his and Luke's definition of God's plan (Acts 1:6–7; 3:21–26; Rom 11:11–32), the schism could never be irreconcilably final. The view that Israel rejected the gospel and that the God of the early Christians had therefore rejected Israel's further opportunities for repentance "is the first step towards Christian antisemitism"¹¹¹⁷ as well as a step back from ethnic universalism. Neither Luke nor Paul implies that Israel's rejection was total (cf. Luke 8:5–15); the rejection by large numbers, however, was particularly conspicuous for God's own chosen people (Rom 11:1–10). Instead of rejecting his people, God was welcoming Gentiles into his people;¹¹¹⁸ this is part of Luke's focus on the Gentile mission (cf. Acts 1:8; Luke 24:47), connecting his circle of Gentile churches with their heritage in ancient Israel.¹¹¹⁹

For Luke (as for Paul, Rom 1:16; 2:9–10), the message was not for Jewish people exclusively, but it was for them "first," as here and in Acts 3:26 (cf. also 1:8, though one's geographic sequence could be determined by one's starting location, 26:20).¹¹²⁰ The "necessity" of it going to them first probably reflects the divine purpose announced in God's promises to Israel.¹¹²¹

The epistolary Paul, too, refused to give up on his people's turning to Christ, insisting that God had not rejected his people (Rom 11:1–2), that God had left a remnant of Jewish believers (11:1–10), and that the Jewish people as a whole would someday embrace faith in Jesus (11:11–32, esp. 11:15, 24–27, 29, 31–32). Paul earnestly desired his people's salvation (9:1–3; 10:1; 11:14). He could not have envisioned the subsequent history of Christian anti-Semitism as the Gentiles who he hoped would provoke Israel's jealousy instead imported their pagan anti-Jewish prejudices into their practice of Christian faith.

Johnson's suggestion of irony here may be correct: "those who 'judged' Jesus to death without worthy cause are now 'judging' themselves unworthy of life" (cf. Acts 13:27; Luke 23:14–15).¹¹²² Leaving one's case to one's judges was often a rhetorical technique to flatter them (e.g., "You are the judges of what I have said," Aeschines *Tim.* 196; see comment on Acts 7:51–53), but it could be used ironically to opposite effect (cf. Acts 4:19 and comment there; 1 Cor 11:13)—for example, to declare that a critic had pronounced judgment on himself (cf. Luke 19:22; for views reversing who was on trial, see comment on Acts 7:51–53). Rhetoricians could claim in a court that their most effective evidence was the vile behavior of their opponents (e.g., Isaeus *Pyrr.* 54, 77).

Paul's hearers would readily understand his claim that what he offered was "eternal life" (also Acts 13:48; Luke 10:25; 18:18, 30), a phrase familiar in early Judaism from

1116. Dunn, *Acts*, xii.

1117. *Ibid.*, 182–83.

1118. With, e.g., Squires, "Acts 8.4–12.25."

1119. See the fuller discussion at Acts 28:23–31, and especially in the commentary introduction (Keener, *Acts*, 1:459–91, esp. 483–86).

1120. Sharing Israel's "leftover bread" (Mark 7:27–28; not in Luke) with the Gentiles was not anti-Jewish even if some of Paul's detractors took offense. But Luke's image of rejection is stronger than the leftover-bread image.

1121. With Le Cornu, *Acts*, 752. This is not a deliberative argument from necessity (on which see Anderson, *Glossary*, 17), since Paul is not persuading (at least not directly) but pronouncing judgment, and probably no one questioned Jewish priority, in any case; for Luke, however, it may supply a sort of "necessity" argument for Paul's turn to the Gentiles. In argument, one could enumerate multiple possibilities (here two) and eliminate all but one (see Anderson, *Glossary*, 32).

1122. Johnson, *Acts*, 241. In this case it would be those who chose to identify with those who passed that verdict, by agreeing with it.

Dan 12:2 onward (see comment on Acts 11:18). Luke uses “eternal life” as synonymous with salvation (compare Luke 10:25; 18:18 with Acts 16:30), the subject of Paul’s proclamation in Pisidian Antioch (Acts 13:26, 47).

(3) *Light for the Gentiles* (13:47)

The verb for “command” may evoke 1:2, where Jesus gave final instructions to his disciples (presumably including the mission as well as waiting in Jerusalem, 1:4–8). Here the verb applies to Paul and Barnabas a command of Scripture, a mission for God’s ideal people appropriated by those with the vision for their responsibility.

It is no coincidence that Luke gives Paul’s mission, against its Isaian background (see comment on Acts 1:8), the climactic location in the speech. Paul applies to his own mission the call Jesus gave his first witnesses; 1:8 alludes to the entire section of Isaianic Servant Songs (such as Spirit-empowered witness in Isa 42:1; 43:10–12; 44:8), with Isa 49:6 being a prominent example.¹¹²³ The mission of light in Isaiah belongs to the servant Israel (42:6), but through the nation’s disobedience (42:19), it is transferred to the remnant, who must restore the nation as a whole (49:5–6).¹¹²⁴ Similar Isaian language describes Jesus in Luke 2:30–32, as does Isaiah’s servant language (Luke 22:27, 37; Acts 3:13, 26; 8:32–33). That Paul historically saw himself as carrying part of the servant’s mission is likely; Paul may use Isa 42:6, 16 to describe his mission in Acts 26, and the epistolary Paul may use Isa 49:1 in Gal 1:15.¹¹²⁵ Other passages in Paul’s letters may also employ Isaiah’s servant passages as a grid for his calling.¹¹²⁶ One study of Rom 9–11 argues that “Paul read large sections of Isaiah as a prophetic word concerning his own role in the eschatological restoration of Israel and the extension of that salvation to the Gentiles.”¹¹²⁷

For Luke, the ends of the earth include Africa (Acts 8:26–40), and this passage, like others in Acts (2:5–13; 8:26–40; 28:16–31), is merely a proleptic fulfillment of the ultimate reaching of the ends of the earth that Isaiah prophesied (see again comment on Acts 1:8).¹¹²⁸ For Luke, temporary Jewish rejection leading to Gen-

1123. Pao, *Isaianic Exodus*, 96–101, addresses Acts 13:46–47 and the foundational character of Isa 49:6 for Acts; others also comment at length on 49:6 here (e.g., Rese, “Funktion,” 76–79; Meek, *Mission*, 24–55; for the view that Luke approaches Isaiah polysemously here, see May, “Reader-Response Critic,” 80–81; *ibid.*, 83, also identifies these uses as responding to resistance in 1:6 and 13:45). Van de Sandt, “Acts 13, 32–52,” especially notes the context of 49:1–6 for Acts 13:47; for Luke’s use of Isaian context, see Seccombe, “Luke and Isaiah”; Johnson, “Jesus against Idols.” For comparisons and contrasts between the wording of Acts 13:47 and Isa 49:6, see Mufwata, *Extrémities*, 115–16; for allusions to the passage elsewhere in Acts, see 156–57; for allusions to it in Enoch’s Similitudes, see 191–92; in the Isaiah Targum, 192–95. For Luke’s wider use of Isaiah’s servant, see also Mallen, *Reading*, 86–88. Malina and Pilch, *Acts*, 97, treat the quotation here as the center of a brief chiasmus regarding eternal life and Gentiles (Acts 13:46–48).

1124. Cf. Moessner, “Fulfillment,” 46–50. The narrowed remnant also appears in Isa 52:13–53:12, which early Christians widely applied messianically. Still, Luke may omit as irrelevant to his immediate purpose several words particular to Israel (see Pervo, *Acts*, 343n116).

1125. See Riesner, *Early Period*, 236; Kim, *New Perspective*, 101–3. Cerfaux, *Church*, 177–78n3, even thinks that Gal 1:15 is closer to Isa 49:5 (cf. Isa 29:22; 56:3) than to Jer 1:5. On the centrality of mission and evangelism for Paul, see Krentz, “Necessity”; for mission in his thought, e.g., Bowers, “Mission.”

1126. Kim, *New Perspective*, 101 (arguing that 2 Cor 4:4–6 alludes to Isa 42:6–7; 49:6; Gen 1:3; by contrast, Savage, *Power*, 112, argues that this passage alludes to Isa 9:1 LXX); cf. Hays, *Conversion*, 26. Kim, *New Perspective*, 103, affirms Paul’s Nabatean ministry (based on Gal 1:17, which might not refer to ministry) and thinks that Paul began ministry there to fulfill Isaiah (Kedar in Isa 42:11, which is Nebaioth in Isa 60:7; interpreted as the ancestor of Nabateans in Jos. *Ant.* 1.220–21).

1127. Wagner, *Heralds*, 32–33 (more fully, see 29–33). It might be noteworthy that all Paul’s explicit mentions of “Isaiah” appear in Romans (Rom 9:27, 29; 10:16, 20; 15:12).

1128. For a philosopher’s mission to the farthest reaches of the world (Dio Chrys. *Or.* 13), see Alexander, “Biography,” 58–59. May, “Reader-Response Critic,” 85, connects Luke’s use of Isa 49 with Acts’ open ending, showing that subsequent believers continue the servant’s mission.

tile conversion (cf. 28:26–28) simply provides divine opportunity to fulfill Isaiah's promised Gentile mission.¹¹²⁹

Even less biblically literate members of Luke's audience would not be taken aback by someone calling individuals "lights."¹¹³⁰ Rhetoricians depicted great or beloved individuals as "lights" (Fronto *Ad M. Caes.* 5.27 [42]), sometimes extinguished at death (e.g., Men. Rhet. 2.11, 419.18–20).¹¹³¹ Jewish teachers regularly called particularly righteous sages or other persons lights (cf. John 5:35; Matt 5:14),¹¹³² including Abraham,¹¹³³ Jacob,¹¹³⁴ Moses,¹¹³⁵ David,¹¹³⁶ and ultimately the Messiah;¹¹³⁷ the designation also could be applied to Israel,¹¹³⁸ Jerusalem,¹¹³⁹ the temple,¹¹⁴⁰ or God himself.¹¹⁴¹

Some scholars have argued that before his conversion Paul held that conversion to Judaism was necessary for salvation and that he sought Gentile proselytes (Gal 5:11; cf. Jos. *Ant.* 20.34–35, 43–45);¹¹⁴² this theology of conversion then carried over into his mission to the Gentiles.¹¹⁴³ This view is surely plausible and perhaps correct, yet it may press too much information from its primary textual basis (Gal 5:11), given the hyperbolic nature of Galatians' intense rhetoric.¹¹⁴⁴ There was no Jewish missions movement as such (see comment on Acts 1:8), making Paul's vocation new in some respects¹¹⁴⁵ (though we read too much into the difference if we read typical modern missions models into his travels; see comment on Acts 13:5–12). But certainly Paul's writings, and extant first-century Christian sources as a whole, reflect this christologically bounded soteriology (cf. comment on Acts 4:12).¹¹⁴⁶

1129. See Pao, *Isaianic Exodus*, 243; cf. the fulfillment idea also in Le Cornu, *Acts*, xxxv.

1130. On light imagery, see more fully the documentation in Keener, *John*, 383–84, from which I have drawn this material.

1131. Cf. a pagan metaphor for a skillful sophist (Eunapius *Lives* 495) or heroes (Men. Rhet. 2.11, 419.18–20; Philost. *Hrk.* 44.5; 45.5).

1132. Sir 50:6–7; *L.A.B.* 51:4; *'Abot R. Nat.* 25 A; 9, §25 B; 13, §32 B; *b. Ber.* 28b (Johanan ben Zakkai); *y. Šabb.* 2:6, §2; *Ta'an.* 3:9, §4; *Exod. Rab.* 15:6; *Pesiq. 1138. E.g., Sir 17:19; *Pesiq. Rab Kah. Sup.* 5:1; uses of Isa 60:3 in the late *Song Rab.* 1:3, §2; 1:15, §4; 4:1, §2.

1139. *Pesiq. Rab Kah.* 21:4 (citing Isa 60:3); *Gen. Rab.* 59:5 (citing Isa 60:3).

1140. *Pesiq. Rab Kah.* 21:5, bar.; *Gen. Rab.* 2:5 (the temple in the messianic era; citing Isa 60:1); 3:4 (fifth century, citing Jer 17:12; Ezek 43:2).

1141. 1QH^a XV, 24–25; 4 *Bar.* 9:3; *L.A.B.* 12:9; *L.A.E.* 28:2; *Test. Zeb.* 9:8 (paraphrasing Mal 4:2); PGM 4.1219–22; perhaps 4Q451 24 7; cf. *Sib. Or.* 3.285; *b. Menah.* 88b (late second century); *Gen. Rab.* 3:4 (third century, citing Ps 104:2; also in *Exod. Rab.* 50:1); 59:5 (citing Isa 60:19); *Num. Rab.* 15:2; *Pesiq. Rab.* 8:5 (citing Pss 27:1; 119:105); 21:5 (citing Isa 60:19); Rev 21:23. In rabbinic texts, this often alludes to the Shekinah, e.g., *Sipre Num.* 41.1.1; *b. Ber.* 60b; the glory at the exodus is also depicted as light (e.g., Wis 17; 18:1–3; *b. Menah.* 86b; *Exod. Rab.* 14:3). For light symbolism in Scripture, see "Light" (cf. also Achtemeier, "Light," noted there).

1142. On this strict (and not dominant) Jewish view, see Donaldson, *Paul and Gentiles*, 54–60.

1143. *Ibid.*, 78.

1144. See, e.g., Gal 1:8; the grammatical lapse in 2:2–4. For a survey of various approaches to Galatians and rhetoric, see Anderson, *Rhetorical Theory*, 129–42; Aune, *Dictionary of Rhetoric*, 192–94.

1145. See Bowers, "Propaganda," 318.

1146. Green, "Salvation," contends that "salvation" is the unifying theme of Acts.

(4) *The Word Spreads* (13:48)

Many Gentiles believed (Acts 13:48), and the message spread throughout the region (13:49). Conversion and salvation are causes of joy elsewhere in Luke-Acts (e.g., Acts 8:39; 13:52; Luke 10:20; 15:7), and joy a common response to other divine activity (e.g., Luke 1:14, 44, 47, 58; 2:10; 6:23; 10:17, 21). This is also true of “glorifying” God—that is, attributing appropriate honor to God by praise (2:20; 4:15; 5:25–26; 7:16; 13:13; 17:15; 18:43; 23:47).¹¹⁴⁷ Thus Luke shows Paul’s mission to be godly partly by showing that it honors God (cf. esp. Acts 4:21; 11:18; in response to Paul, 21:20).

Acts portrays Paul as a more successful speaker than his letters claim him to be (1 Cor 2:1–4; 2 Cor 10:10),¹¹⁴⁸ but his letters reveal that his content, at least, was rhetorically sophisticated¹¹⁴⁹—indeed, they display sharper rhetorical argumentation than do the speeches in Acts. It is not his content but his delivery style (1 Cor 2:3; 2 Cor 10:10),¹¹⁵⁰ on which Acts does not comment, that Paul and some high-status observers found inadequate (2 Cor 10:10 suggests that his letters were not viewed as rhetorically deficient). Further, Paul’s letters indicate that whatever the complaints about his style, his missionary preaching proved effective nonetheless, an effectiveness he attributes to divine empowerment (1 Cor 2:4–5; Gal 3:1–3; 1 Thess 2:13). What we do see is that Luke emphasizes Paul’s strong points rather than his weaknesses (with a few possible exceptions, e.g., perhaps Acts 15:39).¹¹⁵¹ For Luke, Paul is a hero (probably, by the time he writes, a deceased one); he is also a model.

The phrase “appointed” applies to “enrollment” in papyri,¹¹⁵² relevant in view of the perspective in Luke 10:20. One may think of the Book of Life in early Jewish literature.¹¹⁵³

1147. The only other canonical use of the Lord’s word being glorified appears in 2 Thess 3:1; cf. perhaps Isa 40:3–5, 9.

1148. Cf. discussion in Porter, *Paul and Acts*, 101. Ramsay, *Cities of Paul*, 299, plausibly suggests that Paul was historically weak here, on the basis of Gal 4:13.

1149. His form was also rhetorically literate; cf. Meeks, “Birth,” 26–27; Malherbe, *Social Aspects*, 54–58; idem, “Theorists,” 17; Holloway, “Prose”; Smit Sibinga, “*Serta Paulina*”; though Paul did not aim for atticizing elegance (Caragounis, “Dionysios Halikarnasseus”). Because many have overstated the case, some doubt that Paul used classical rules of rhetoric (see Weima, “Aristotle”); certainly one cannot structure letters as speeches (Anderson, *Rhetorical Theory*, 114–17, 280; Reed, “Epistle”; Porter, “Paul and Letters,” 541–67, 584–85; Weima, “Theory,” 329; idem, “Letters”; Stamps, “Rhetoric,” 958; Aune, *Dictionary of Rhetoric*, 418; Keener, *Corinthians*, 4–5), and he also made rhetorical “mistakes” (Porter, “Paul and Letters,” 584; Anderson, *Rhetorical Theory*, 240). Yet Paul is far beyond “the vulgar language” in most papyri (Anderson, *Rhetorical Theory*, 113); he uses more rhetorical devices (without necessarily knowing their technical titles) than would be expected for someone reflecting only completely unlearned, popular usage (see, e.g., Keener, *Corinthians*, 25, 29–32); and he displays at least the basic knowledge of any literate people in his era (Litfin, *Theology*, 137–38), and probably more. Fitting their own era, patristic and later sources analyzed his letters rhetorically (Classen, “Rhetorik”; Harvey, *Listening*, 22–23). 2 Pet 3:16 could imply his inappropriate rhetorical impenetrability (cf. Dion. Hal. *Thuc.* 40; though some have thought Paul difficult, Mac. Magn. *Apocrit.* 4.8–19 [*Porphyry’s* 77–82]; Anderson, *Rhetorical Theory*, 240) but in context is more likely praising his depth (cf., e.g., Cic. *Fin.* 4.1.2; Diog. Laert. 9.1.12–13).

1150. See, e.g., Keener, *Corinthians*, 34–35, 227; on the importance of delivery, see, e.g., Shiell, *Reading Acts*, 37–44. Paul’s disclaimer in 1 Cor 2:1–3 can, indeed, be paralleled among more sophisticated rhetoricians (e.g., Isoc. *Panath.* 3; Isaeus *Astyp.* 35; *Aristarch.* 1; *Lysias Or.* 2.1, §190; 12.3, §120; 19.1–2, §152; Dion. Hal. *Lysias* 17; Cic. *Quinct.* 1.1–4; 24.77; *Catull. Carm.* 49.5–7; *Sall. Sp. G. Cotta* 4; *Ovid Metam.* 13.137; *Quint. Inst.* 4.1.8–9, 11; *Dio Chrys. Or.* 1.9; 12.16; *Tac. Hist.* 4.73; *Jos. Ag. Ap.* 1.27).

1151. Paul boasts in his weaknesses, including his sufferings (2 Cor 11:23–33); Luke depicts Paul’s sufferings but also emphasizes elements that Paul could not emphasize without “boasting.”

1152. See Lake and Cadbury, *Commentary*, 160; and esp. Bruce, *Acts*¹, 275.

1153. For the Book of Life, see *Jub.* 30:21–23; 36:10; *Phil* 4:3; *Rev* 20:12; *Herm.* 1.1.1; cf. (some perhaps regarding a list of the living) *Exod* 32:32–33; *Pss* 69:28; 139:16; *Dan* 12:1; *Jub.* 28:6; *1 En.* 39:2; 47:3; 89:70–71; 91:14; 93:1–3; 1QM XII, 2 (if we read “book”); 4QS04 1–2 VI, 12–14; *Daniélou, Theology*, 192–204; *Pesiq. Rab Kah.* 24:3; *Gen. Rab.* 24:3; 25:1. Cf. heavenly tablets or other records in

Some scholars have argued that the people “appointed” themselves,¹¹⁵⁴ but this interpretation is difficult to sustain.¹¹⁵⁵ Possibly the verse refers to God’s plan for the Gentiles, that Gentiles have been ordained to life (cf. Acts 11:18; Isa 49:6).¹¹⁵⁶ Luke might especially emphasize God choosing these Gentile believers in a context that mentions God “choosing” Israel (13:17) and therefore giving Jewish people the first opportunity (13:46). But early Judaism did not experience the dissonance between predestination and human responsibility¹¹⁵⁷ experienced by much subsequent Christian theology,¹¹⁵⁸ and there is no reason to think that Luke found the ideas dissonant either. (For God opening hearts, see 16:14; cf. Luke 24:45; note especially the key text Luke 10:21. On predestination in Luke-Acts and Luke’s environment, see further the excursus at Acts 2:23.) In this context, note the fairly conspicuous and perhaps deliberate tension with 13:46: “judge yourselves unworthy of eternal life,” a contrast underlining the play between God’s sovereignty and human choice.

That opponents are humiliated and the crowd rejoices is a good conclusion for a Lukan account (e.g., Luke 13:17). This conclusion leads to a section conclusion in Acts 13:49, followed by a further conclusion in 13:51–52 (Luke was not averse to multiple levels of conclusion; see Luke 16:8–13).

III. LONG-TERM RESPONSE (13:49–52)

Luke summarizes the longer-range response: the word spread (Acts 13:49, a common Lukan summary); Jewish opponents and the Gentile elite drove the apostles from town (13:50); by contrast, the apostles continued ministry elsewhere (13:51) while the disciples persevered in joy (13:52).

(1) *The Message Spreads (13:49)*

That the word spread (13:49) fits Luke’s usual way of summarizing its success in a period or location (e.g., 12:24; see comment on Acts 6:7). Baptism is not mentioned here; but if it occurred, the river Anthios may have been available,¹¹⁵⁹ or water could have been procured from elsewhere.¹¹⁶⁰

Dan 7:10; *Jub.* 3:10, 31; 4:32; 5:13; 6:17, 29, 35; 15:25; 16:3, 9, 28–29; 18:19; 19:9; 23:32; 24:33; 28:6; 30:9, 18–23; 31:32; 32:10, 21, 28; 33:10; 39:6; 49:8; *1 En.* 10:8; 81:1–4; 93:2; 97:6; 98:7–8; 103:2–3; 104:1, 7; 106:19; 107:1; 108:3, 7; *2 En.* 19:5; 44:5 A; *3 En.* 18:24–25; 44:9; *Jos. Asen.* 15:12; *Test. Ab.* 12:7–18 A; 10:7–11 B; *4 Ezra* 6:20; *Apoc. Zeph.* 3:6–9; 7:1–6; 9:2; *m. ’Ab.* 2:1; *b. Roš Haš.* 32b; Noack, “Qumran and Jubilees,” 200. Pagans also believed in records of deeds (*Lucian Downward Journey* 4; *Callim. Hymns* 6 [to Demeter], line 56), perhaps modeled after prison records (cf. Rapske, *Custody*, 250). Cf. also citizen enrollment, perhaps partly implied in Rev 3:5 (Ramsay, *Letters*, 385; Hemer, *Letters*, 148; Aune, *Revelation*, 225).

1154. Abbott, *Acts*, 158, noting that some hold this view; Blaiklock, *Acts*, 110 (claiming that the verb is middle).

1155. Luke employs not the middle (as in Acts 28:23) but the passive (as in 22:10; cf. Luke 7:8); although in Paul persons could order themselves (1 Cor 16:15), the passive referred to ordering by God (Rom 13:1). For a predestinarian reading here, see, e.g., Peterson, *Acts*, 399.

1156. Marshall, *Kept*, 94.

1157. E.g., 1QS X, 1ff.; 4Q180 1 2; *1 En.* 1:1–3, 8; 5:7–8; 25:5; 38:4; 48:1, 9; 50:1; 58:1; 61:4, 12; 93:2; *Jub.* 11:17; *Test. Job* 4:11/9. This appears particularly likely for Pharisees and later rabbis (*Jos. War* 2.162–63; *Ant.* 13.172; 18.13; see discussion in Klawans, “Fate”). Despite Josephus’s presentation of the Essenes (*Ant.* 18.18), many contend that even the Scrolls do not deny free will (Nötscher, “Schicksalsglaube”; Driver, *Scrolls*, 558–62; Marx, “Prédestination”; Sanders, *Judaism*, 251). See further comment on Acts 2:23.

1158. Patristic writers had to respond to some increasingly widespread pagan notions of Fate that excluded free will (e.g., Justin *Dial.* 141; *1 Apol.* 43; Tatian *Or. Gks.* 11; see further comment on Acts 2:23).

1159. It flowed by the city in winter and spring (Levick, *Roman Colonies*, 43–44); Paul is not traveling in winter (and spring may be past); at this altitude, winter water would be cool.

1160. For the aqueduct, see Finegan, *Apostles*, 91; one excavated fountain house is somewhat later (McRay, *Archaeology*, 237; on the baths, see 238). The fountain with the statue of the river god (Finegan, *Apostles*, 88) might not appear ideal.

(2) *Inciting the Elite* (13:50)

Local standards of honor and shame could dictate actions, and the local political connections here were powerful enough to lead to the apostles' expulsion. Public opinion could force people to conform to behavioral expectations or suffer disgrace (Isaues *Cleon.* 39). Although people of rank often embraced the Christian movement (Acts 8:27; 10:1; 13:12; cf. Luke 1:3), they could also prove its formidable enemies. Luke elsewhere indicates the importance of "leading" (lit. "first") men or women (e.g., Acts 28:7, 17), whether for (17:4, women) or against (Luke 19:47; Acts 25:2, men) the gospel. (For "first" as a "leading citizen," see, e.g., Pliny *Ep.* 3.2.2, and fuller discussion at Acts 28:7, 17.) Inscriptions reveal that many women held important roles in synagogues in Asia Minor, more often than in many other locations.¹¹⁶¹

Luke's emphasis on aristocrats comports well with the work's dedication to an elite patron or dedicatee ("most *excellent* Theophilus," Luke 1:4). Apparently some of the God-fearers of high social status (see comment on Acts 13:43) were the Jewish community's advocates with the other elements in the city. Local elites were decurions, belonging to the town council; they were lower in rank than Roman "knights" (*equites*) but acquired wealth from owning land (most respectably) or mercantile activity.¹¹⁶² They oversaw taxation, markets, and (where relevant) harbors and would be sent on embassies to the emperor or his local agents.¹¹⁶³ Most of them were former magistrates; the office was lifelong once one was admitted, and membership in the class became hereditary, with members nominated to offices.¹¹⁶⁴ On average, there were often about a hundred per city.¹¹⁶⁵ A smaller town such as Pisidian Antioch may have had fewer.

In Egyptian nomes, those perceived to be associated with Hellenism flaunted their status above other Egyptians, though to the Romans they remained Egyptian.¹¹⁶⁶ In a Roman colony, however, the (generally) large number of Roman citizens possessed the high-status culture. Antioch's elite used Latin and prided themselves in their Italian roots.¹¹⁶⁷ Inscriptions reveal that the upper class here consisted of Roman citizens descended from Italians the emperor Augustus had settled here; the leading people of the city here are Gentiles.¹¹⁶⁸ Some of these *may* have been relatives of Sergius Paulus (see comment on Acts 13:14; if Sergius Paulus was a sympathizer with Jews, or perhaps, more generally, reportedly esoteric knowledge from the East, even before the apostles' arrival [Acts 13:6–7], it is no less possible that some of his relatives were); in any case, his relatives could not prevent the persecution. Likewise, some members of the other leading family, the Caristanii, may have been involved.¹¹⁶⁹

Except where the Jewish community was powerful enough to seem to threaten citizens' exclusive privileges (namely, for elite Jews in Alexandria), sympathies for Judaism appear even among elites, including in Rome itself.¹¹⁷⁰ Given how rarely

1161. Kraabel, "Judaism in Asia Minor," 46–48 (though the supposed connection to female Anatolian divinities [48] is questionable); Trebilco, *Communities*, 104–13.

1162. Stambaugh and Balch, *Environment*, 111. On municipal aristocracies, see also Sanders, *Jesus to Mishnah*, 79.

1163. Stambaugh and Balch, *Environment*, 111, citing Plut. *Old Men* 794A.

1164. Sherwin-White, Jones, and Honoré, "Decuriones."

1165. *Ibid.*, 437. The 10 percent estimate in Harland, *Associations*, 27, thus appears too high.

1166. Lewis, *Life*, 36, 40–41.

1167. See Levick, *Roman Colonies*, 68–91, 134, 136, 143–44.

1168. Levinskaya, *Diaspora Setting*, 122; cf. Ramsay's suggestion that these citizens would be less attracted to Paul's preaching in Greek (*Cities of Paul*, 313).

1169. With Mowery, "Caristanius" (noting from an inscription the vow on behalf of Claudius from this period by one C. Caristanius Fronto Caisianus Iullus).

1170. See Gager, *Anti-Semitism*, 67–88. For a synagogue donor also prominent in Aphrodisian city politics, see Gilbert, "Civic Life."

Eastern religions, viewed as exotic, seem to have penetrated wealthy elites,¹¹⁷¹ this is significant. Like other minority cults, Jewish residents depended on local patrons who belonged to higher social networks to make them acceptable to the cultural mainstream.¹¹⁷² If numerous enough, Jewish residents may have also exercised some measure of influence in local politics.¹¹⁷³

As in other Roman colonies, the governing body would be the *ordo*, ruling the *populus*.¹¹⁷⁴ The *populus*, whose best-attested political activity was to publicly hail their benefactors, exercised little oversight¹¹⁷⁵ but may have been easily swayed. Yet we need not think here of action based on an official meeting of the *ordo*; some officials, acting with the backing of crowds or with threats, could have been sufficient to drive the apostles out.¹¹⁷⁶ Paul's Roman citizenship might have helped him had he thought to appeal to it, but there is no evidence that this tactic even occurred to him until much later, after a beating in another colony (16:37).

Though Luke often mentions women, that the women are mentioned first here probably underlines their prominence.¹¹⁷⁷ Educated and high-born women could command significant respect, at least in Macedonian and Roman society (Plut. *Alex.* 21.4; Cic. 16.2).¹¹⁷⁸ They could prove influential enough that their political support could help shield an official from censure.¹¹⁷⁹ Although they constituted a minority, it is known that women held certain public offices in Asia Minor.¹¹⁸⁰

Sometimes such prominent women threw their support to the missionaries (Acts 17:4, 12), but in this case the support went to the latter's local opponents. It is known that many influential Gentile women sympathized with Judaism. For example, Josephus, undoubtedly exaggerating, claims that most women in Damascus were Jewish sympathizers (*War* 2.560).¹¹⁸¹ Many Romans complained about Roman women following Judaism,¹¹⁸² but this was probably partly because Judaism was enjoying so much success among other Romans¹¹⁸³ and partly because Roman husbands expected their wives to follow their religion.¹¹⁸⁴ Some women who sympathized with Judaism proved highly influential even in Rome itself (such as the empress Poppaea; see *Ant.* 20.195–96). Acmonia in Phrygia, near Antioch, provides an example of how Gentile women sympathizers could prove valuable to local synagogues. In that

1171. Beaujeu, "Cultes locaux," 443.

1172. White, *Origins of Architecture*, 1:58–59.

1173. The Isis cult sometimes favored local officials in elections, and some argue that Judaism was even more involved in politics (Grant, "Christian and Roman History," 24).

1174. Levick, *Roman Colonies*, 78, noting that these replaced the traditional Greek βουλή and δήμος. For the distinction in rank between the colonists and natives, see, e.g., Mitchell, *Anatolia*, 1:178.

1175. Levick, *Roman Colonies*, 78–79.

1176. The traditional culture of the region was known to be aggressive (see Mitchell, *Anatolia*, 1:72; 2:26–28; for the Roman military presence, 1:72–74; although, of course, military force would not be relevant here).

1177. Spencer, *Acts*, 147. Normally men took precedence over women of equal (and sometimes higher) rank (Gardner, *Women*, 67).

1178. Bruce, *Acts*, 275, doubts that they would hold this status in Athens or an Ionian city (e.g., Ephesus), but it was possible elsewhere (such as among colonists in Antioch). Men treated elite women with much greater respect than other women (see, e.g., Buszard, "Speech"). On women of status in antiquity, see the sources cited in the commentary introduction, Keener, *Acts*, 1:606–8; cf. also 616, 628.

1179. Cic. *Verr.* 2.4.61.136, though Cicero's intention is to insinuate Verres's adultery with aristocratic women.

1180. Kraabel, "Judaism in Asia Minor," 44 (also noting prophetesses in the Asian churches, Rev 2:20; Euseb. *H.E.* 5.17.2–4); see esp. Brooten, *Women Leaders*, 5–39.

1181. Attraction to Judaism may have been "positively fashionable" (Judge, *Pattern*, 44) in some of these cities.

1182. Cf. *Juv. Sat.* 6.542–47; Witherington, *Acts*, 417n244.

1183. E.g., Gager, *Anti-Semitism*, 59–61; see comment on Acts 16:20–21.

1184. See Balch, *Wives*, passim.

case, a member of the local aristocracy named Julia Severa built a synagogue there.¹¹⁸⁵ Like men, women probably usually achieved synagogue offices and honors through wealth, status, and helping the synagogue.¹¹⁸⁶

Although only 40 percent of tomb inscriptions concern women, women constitute 50 percent of the proselytes and 80 percent of the God-fearers in these inscriptions.¹¹⁸⁷ Perhaps because women in the general population tended to be less educated and hence more easily exploited than men, some unscrupulous teachers were said to target women, especially wealthy women (cf. 2 Tim 3:6).¹¹⁸⁸ Although Luke never shies away from reporting women's patronage of the churches (Luke 8:3; Acts 16:15; see comment on Acts 16:15), suiting his valuing of both genders (Acts 2:17–18), neither can it have hurt his apologetic case for a first-century audience to show that Paul's opponents also made use of women's patronage.¹¹⁸⁹

Historically, the "persecution" may have included synagogue beatings (2 Cor 11:24) and/or beatings with Roman officials' rods (11:25), but we cannot be certain in which locations Paul faced such hardships; some may be in the period Luke surveys in a more cursory manner (in Acts 9:30; 11:25–26). Appeals to political allies to pressure out troublemakers sounds highly plausible to audiences in some cultures today.¹¹⁹⁰ The term for expelling them (ἐξέβαλον) is a strong one that Luke often uses for expelling demons, but Luke also uses it for driving God's agents out (Luke 6:22; 20:12; cf. Acts 16:37), sometimes in order to kill them outside a city (Luke 4:29; 20:15; Acts 7:58).

(3) *Shaking Off Dust (13:51)*

This action of shaking dust from their feet connects them with earlier witnesses (Luke 9:5; 10:11). What does shaking dust from feet symbolize? Jesus instructed his disciples to employ this symbol (Luke 9:5; 10:11) in the context of rejection that constituted the antithesis of hospitality (9:4; 10:5–10).¹¹⁹¹ One mark of proper hospitality was providing water for washing feet (7:44); hospitality included providing water for guests to wash their feet (Gen 18:4; 19:2; 24:32; Luke 7:44) or providing servants to wash their feet.¹¹⁹² People often washed their feet when returning home;¹¹⁹³ washing one's feet was common enough that "unwashed feet" became proverbial in some places for "without preparation."¹¹⁹⁴

1185. Mitchell, *Anatolia*, 2:9 (citing MAMA 6.262).

1186. See Brooten, *Women Leaders*, 32–33.

1187. Riesner, *Early Period*, 351; similarly, Levinskaya, *Diaspora Setting*, 25.

1188. Liefeld, "Preacher," 239–42 (citing, e.g., Lucian *Runaways* 18; *Alex.* 6; *Iren. Her.* 1.13.1, 3; 1.23.2, 4); cf. *Pesiq. Rab Kah.* 24:15; Kelly, *Pastoral Epistles*, 195.

1189. Cf. *Jos. Ant.* 17.41 (cf. 13.401, 405); Ilan, "Women to Pharisaism"; *Juv. Sat.* 1.38–39. Benefactresses are well attested in Asia Minor, e.g., at nearby Perga (Mitchell, "Archaeology," 171) or farther west in Lydia (White, *Origins of Architecture*, 1:81). For women as frequent guardians of inherited tradition against innovations in Middle Eastern societies, see Pizzuto-Pomaco, "Shame," 44.

1190. González, *Acts*, 163–64, compares how those advocating minority positions in Latin America often have faced trouble with ecclesiastical authorities, who then "appealed to the state—to the 'secular arm'"; e.g., those working for biblical principles of justice were called Communist agitators. The social situation depicted here is not entirely analogous, since the majority religion in Antioch was not Jewish, but good relations with the city authorities may have produced an analogous effect.

1191. Idealized philosophers did not employ the symbol, but they also withdrew from those rejecting them; Malherbe, *Philosophers*, 17, notes that when the masses refuse his cure, the Cynic "withdraws from them" (Heraclitus *Ep.* 2, 4, 7, 9; Socrates *Ep.* 24; Diogenes *Ep.* 28.8); sometimes he is even said to hate the masses and being with them (Diogenes *Ep.* 28.2).

1192. E.g., a triclinium wall mural in Carcopino, *Life*, 274; *Jos. Asen.* 7:1. For the hospitality function in Jewish circles, see esp. Thomas, *Footwashing*, 35–40; more broadly in the Mediterranean world, see 46–50.

1193. *Pesiq. Rab.* 23/24:2.

1194. Aul. Gel. 1.9.8. On Greco-Roman footwashing for hygiene, see Thomas, *Footwashing*, 44–46; on Jewish footwashing for comfort, see 31–35.

Most local roads would afford Paul and Barnabas an abundance of dust for this action,¹¹⁹⁵ though they probably left town on a paved road (see comment below). Within town, streets contained trash and sometimes even carcasses (Justin. *Dig.* 43.10.1.5); although laws in Rome forbade people in upper-story apartments emptying chamber pots into the streets, it seems to have happened.¹¹⁹⁶ One could also demonstrate contempt by showing one's heel (John 13:18).¹¹⁹⁷

There may be another reason, however, that Jesus told his disciples to shake dust from their feet against cities that rejected their preaching (Luke 10:10–11; Matt 10:14). If the following context in Luke 10 is closely related to the meaning of the act, the disciples were to shake dust from their feet probably in part to symbolize that the judgment of hostile Israelite towns would be stricter than that of pagans (Luke 10:12–15; Matt 10:15).¹¹⁹⁸ How would shaking dust off symbolize this stricter judgment implied in the following verses? Many scholars argue that Jewish travelers normally shook dust from their feet when leaving a pagan town, so that the action treats Jewish communities that *act* pagan (i.e., like non-Jews rejecting the kingdom) as if they were pagan.¹¹⁹⁹ Sandals that had touched profane soil must be removed in truly holy land (Acts 7:33; Exod 3:5).

Whether or not Jewish people practiced this gesture customarily, they would have grasped this symbolism easily enough. Later rabbis claimed that land outside Israel was unclean;¹²⁰⁰ already in this period, the land was considered holier than land outside (see comment on Acts 6:1; introduction to Acts 7). Josephus claimed that entering another country made Jews impure, requiring cleansing (*Ag. Ap.* 2.203);¹²⁰¹ excessive direct contact with Gentiles was also impure (see comment on Acts 10:28). For ancients, the soil of a land could represent the land itself: thus Naaman requested Israelite soil to take back for worshipping God in his land (2 Kgs 5:17), and Agamemnon kissed the soil of his native land (*Hom. Od.* 4.521–22).¹²⁰² Some other societies even in more recent times also beat off dust from feet and clothing to remove ritual contamination.¹²⁰³ For a similar action, compare Paul shaking out his garment in Acts 18:6 (cf. *Pesiq. Rab.* 10:11).

(4) *Journeying to Iconium (13:51)*

Iconium, modern Konya, was apparently at least eighty-five to ninety miles (140 km.) from Antioch (hence Acts 13:51 summarizes probably at least four days of walking).¹²⁰⁴ Paul and Barnabas would likely have traveled farther along the Via Se-

1195. See Stambaugh and Balch, *Environment*, 107.

1196. See Stambaugh, *City*, 178, 184. In Rome, rain could wash trash down toward the sewers (189); but waste gradually raised the levels of streets (Owens, *City*, 157).

1197. Brown, *John*, 2:554, following observations about Near Eastern customs in Bishop, "Bread," 332; more generally, turning one's back may have also functioned as an insult (Jer 2:27; 18:17; 32:33).

1198. The verses likely are related for Luke because rejection of the messengers (Acts 10:10, 16) frames the verses about shaking dust off and treatment like pagans.

1199. E.g., Lake and Cadbury, *Commentary*, 160 (following Strack and Billerbeck, *Kommentar*, 1:571); C. Williams, *Acts*, 168; Marshall, *Acts*, 231; Arnold, "Acts," 346; Keener, *Matthew*, 320.

1200. See purportedly early tradition in *b. Šabb.* 14b (and other sources in Safrai, "Religion," 829).

1201. Cf. Le Cornu, *Acts*, 760 (citing *m. 'Ohal.* 18:6–7 [one incurs uncleanness from Gentile lands and homes]; *Ṭehar.* 4:5 [Gentile soil rendering impure]; *t. Miqw.* 6:1 [Gentile lands unclean]). For removing dust from one's feet in the temple (i.e., for a higher degree of holiness), see, e.g., *b. Ber.* 54a; *Yebam.* 6b; *Eccl. Rab.* 4:17, §1.

1202. Odysseus, at sea for days, kissed land (not even specifically his homeland) when he came upon it (*Hom. Od.* 5.463).

1203. The Gikuyu, to chase away any residual contact with demons (Mbiti, *Religions*, 117).

1204. Finegan, *Apostles*, 91, suggests 80 mi. (130 km.), perhaps meaning directly as the crow flies; offering newer estimates, Wilson (personal correspondence, Nov. 25, 2011) suggests 92 mi. (148 km.). On Iconium, see further Gasque, "Iconium"; Breytenbach, *Provinz*, 162–64; Schnabel, *Mission*, 1110–11 (including on 1110

baste, on which they had initially approached Antioch (see comment on Acts 13:14).¹²⁰⁵ It made more sense to take a paved road when possible,¹²⁰⁶ and Roman roads, built especially for pack animals and pedestrians, were superior to most roads in Europe before 1850.¹²⁰⁷ At twenty to twenty-six feet (6–8 m.) wide throughout its length, it would have readily accommodated wheeled traffic¹²⁰⁸ as well as pedestrians (see further comment on Acts 13:14).

One might wonder why they would take the most prominent road if they could be easily followed. Their persecutors (13:50) were not necessarily satisfied to merely drive them from town (14:19), but the apostles had little choice: there were simply no other practical east-west routes through this mountainous country.¹²⁰⁹ Their use of this Roman road is also what late second-century Christians, who knew the ancient local geography better than we, inferred from the story; *Acts of Paul and Thecla* 3 claims that Paul traveled the ὁδὸς βασιλική—that is, the imperial or Augustan highway.¹²¹⁰

The Via Sebaste, constructed under the supervision of Cornutus Aquila, the propraetor for Augustus in 6 B.C.E.,¹²¹¹ ran from Colonia Comama to Colonia Antiochia (Pisidian Antioch), then an estimated eighty-five miles east-southeast to Colonia Iconium and probably on to Lystra (Acts 14:6).¹²¹² Leaving Antioch on this route, Paul and Barnabas would initially follow the border between Phrygia Paroreius (on the north) and Pisidia (on the south; later Isauria is to the south) and remain on the road till reaching Iconium, which lay in Lycaonia (apparently near Phrygia). This road would take them nearly sixty kilometers south-southeast, then turn sharply east for about seventy to eighty kilometers,¹²¹³ for a total of about 130 to 140 kilometers (more than eighty miles).¹²¹⁴ The road from Lystra to Derbe (14:6, 20), covering perhaps fifty-six miles, may not have been paved.¹²¹⁵

Given the possible connection with Sergius Paulus's relatives noted earlier, they could have initially started along the Via Sebaste with this further westward journey in mind. (Had Iconium been the group's final destination, however, they could have skipped Antioch and taken a shorter route.)¹²¹⁶ Sergii Pauli Vetissus was about 110 kilometers

cities Paul and Barnabas would have passed en route to there); Fant and Reddish, *Sites*, 228–31; Blaiklock, *Cities*, 27–30.

1205. So most scholars here (e.g., Hansen, "Galatia," 384), though some note that the matter remains debated (Conzelmann, *Acts*, 108). The road from Ephesus to Iconium did run near Antioch, but it was difficult to reach from Antioch (Lake, "Route," 225). For a photo of part of the Via Sebaste that remains between Antioch and Iconium, see Mitchell, *Anatolia*, 1:125.

1206. This assumes, probably rightly, that the persecution's objective was a local deterrent rather than deliberately life threatening, thus allowing open flight; though mobs might seek to kill him (Acts 14:5, 19), Roman citizens (a particularly respectable status in the East) risked too much by lynching someone.

1207. Cary and Haarhoff, *Life*, 138.

1208. Mitchell, "Via Sebaste," 1596.

1209. Mitchell, *Anatolia*, 1:70.

1210. Lake, "Route," 226; Johnson, *Acts*, 246. Cf. the language in Num 20:17; 21:22.

1211. Lake, "Route," 225. Milestones attest the date (Mitchell, "Via Sebaste").

1212. French, "Roads," 52; Mitchell, "Via Sebaste," 1596; cf. Levick, *Roman Colonies*, 39 (speaking of Lystra and Iconium as separate branches of the road).

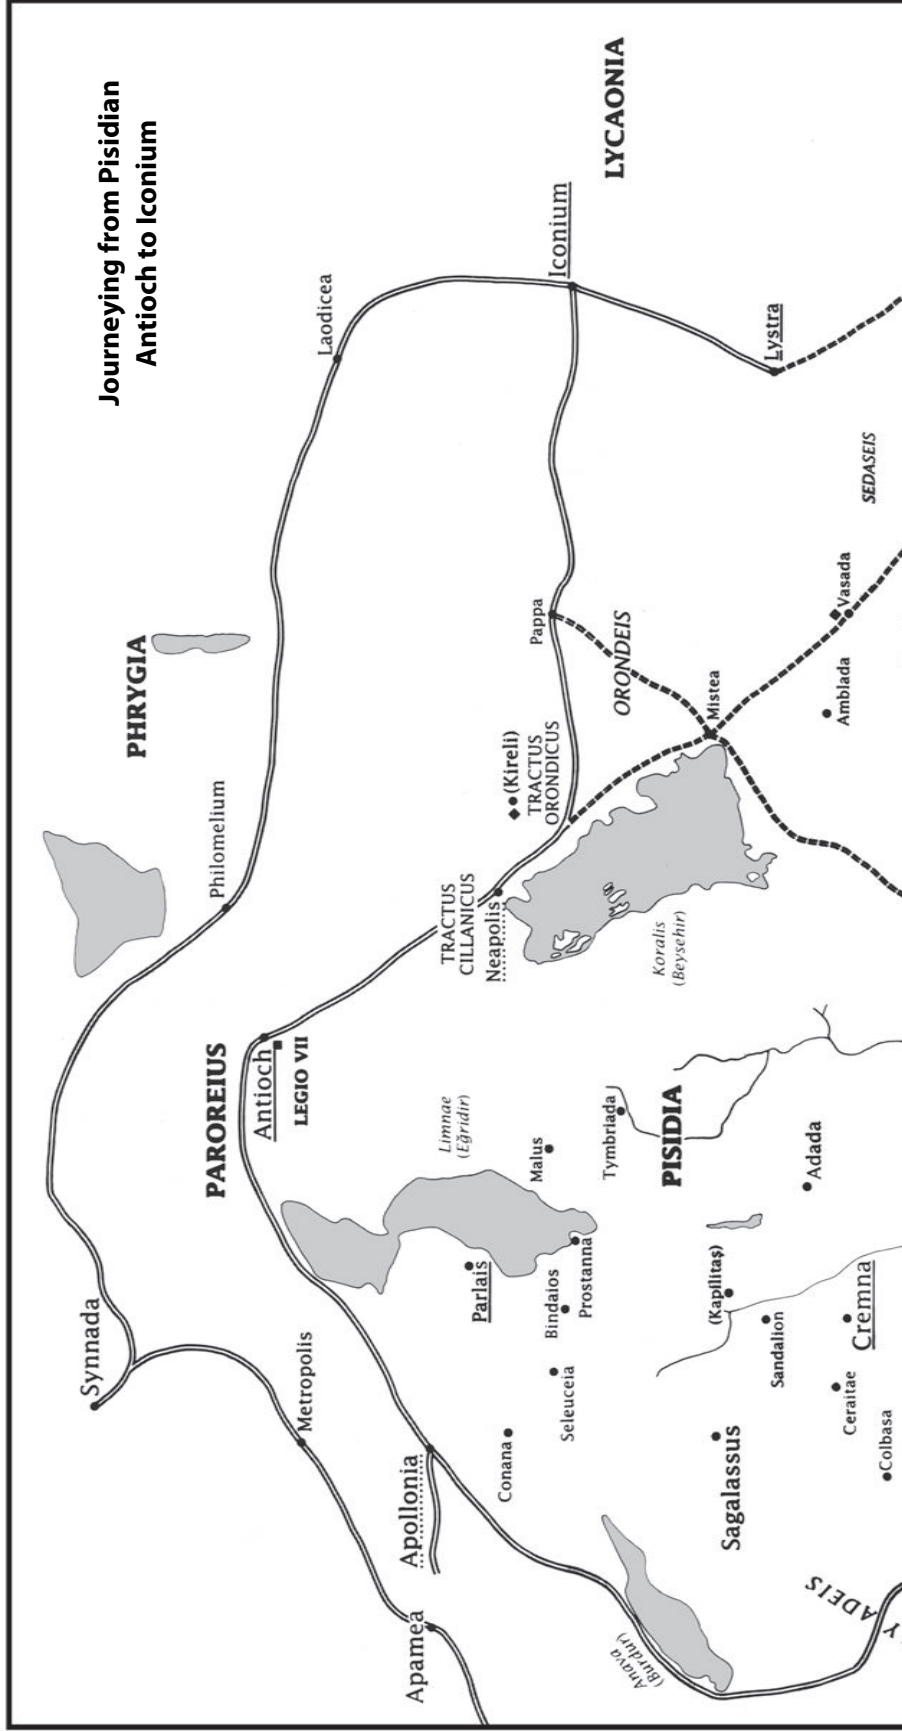

1213. A brief part of that section (perhaps a few kilometers) including a somewhat higher altitude crossing through the mountains ca. 30 km. from Iconium); but most of the journey is at 1,000–1,500 m. above sea level (Mitchell, *Anatolia*, map 5, after 1:78; cf. also map after 1:10).

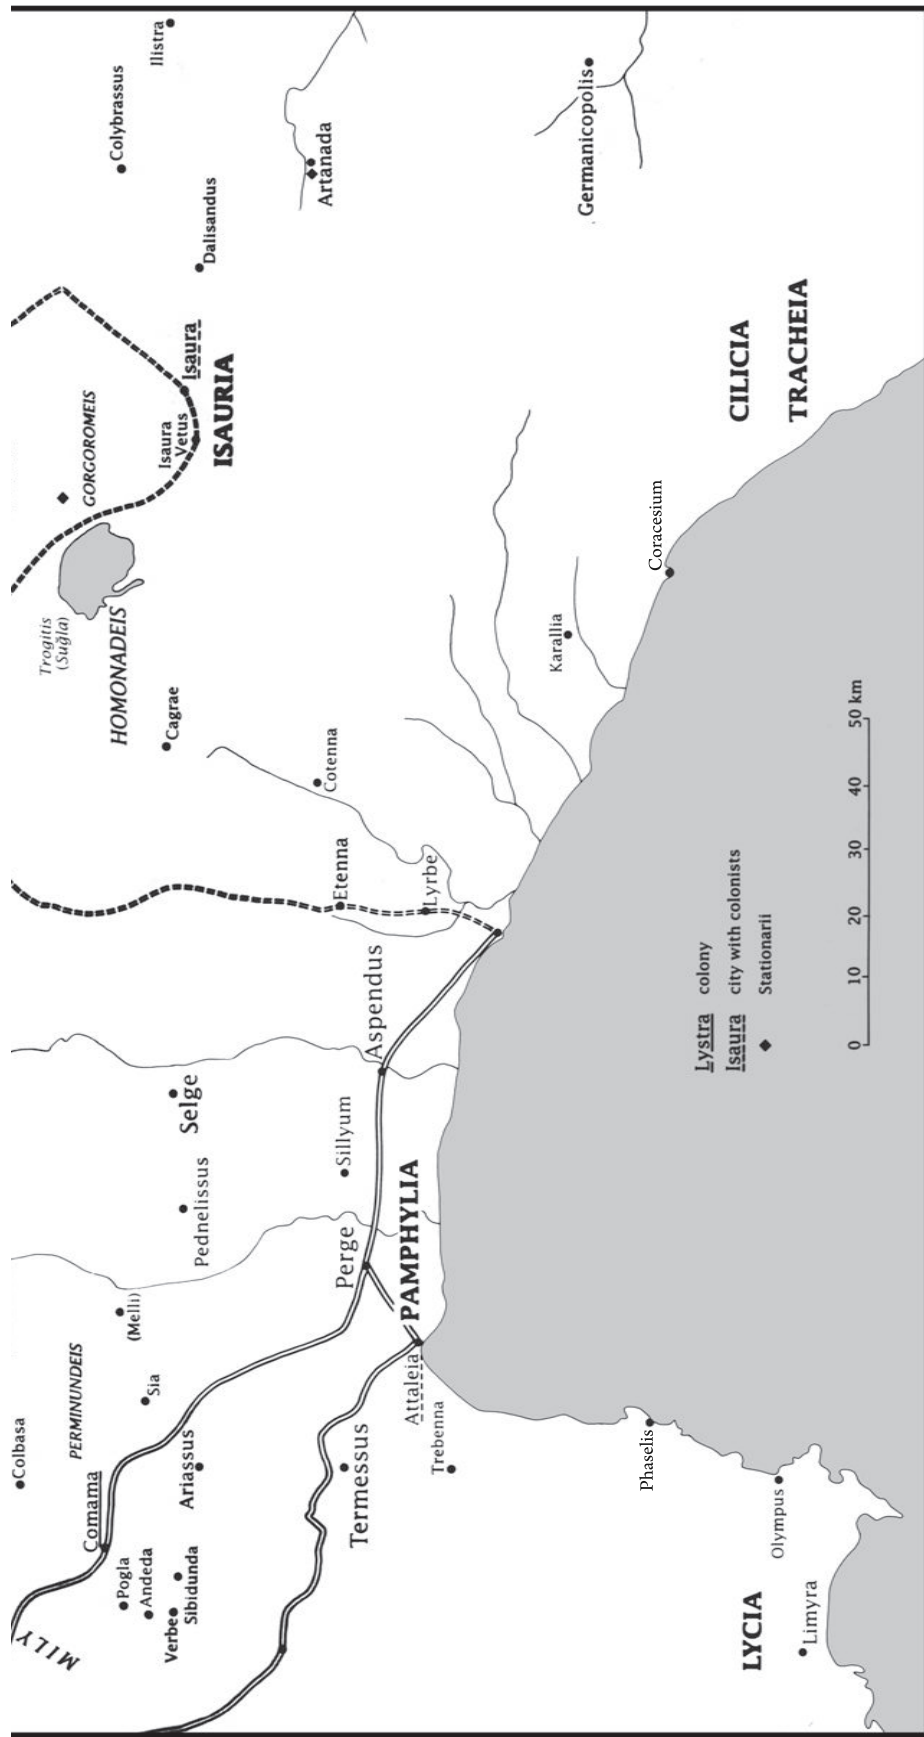

1214. These distances are my estimates based on the map in Mitchell, *Anatolia*, between 1:78 and 1:79. Actual distances walked can be much longer than map distances, however, because ascending and descending rugged terrain adds distance (one might similarly compare posted distances versus map distances in much of rural Africa today).

1215. French, "Roads," 53. Wilson (personal correspondence, Nov. 25, 2011) estimates 81 mi. (130 km.) from Lystra to Derbe via Laranda.

1216. Mitchell, *Anatolia*, 1:70; see also map 5, after 1:78, along with map 8, p. 130. According to map 3, after 1:40, this northern route was an older Cilician road functioning in the first century B.C.E.

Journeying from Pisidian Antioch to Iconium

Reproduced from *Anatolia: Land, Men, and Gods in Asia Minor*, Vol. 1: *The Celts in Anatolia and the Impact of Roman Rule* by Stephen Mitchell (1993): Map 5: "The Pisidian Taurus." By permission of Oxford University Press.

south-southwest of Ancyra, about 110 to 120 kilometers north of Iconium, and about 110 kilometers northeast of Pisidian Antioch.¹²¹⁷ Mountains might force the traveler between Antioch and estates of the Sergii Pauli in Vetissus to travel by way of Iconium.

Thus, if Paul and Barnabas carried a letter of recommendation from Sergius Paulus and had not run into trouble with this family in Antioch, they might think of heading north from Iconium. That they instead turned south to Lystra may simply reflect their route following the Via Sebaste, but persecution in Iconium (14:6) or alienation from this family in either Antioch or Iconium could have deflected a northward goal had they had one. They probably had made contact with this family in Pisidian Antioch (where the family may have resided most of the year), if at all; and if the family was there, the encounter had probably gone poorly (given both 13:50 and Luke's silence on potential sponsors) or at least proved of little help. Other than such a contact, they lacked any reason to go north; in the mid-first century, very few towns larger than small villages (or camps of nomads) existed between Iconium and Ancyra.¹²¹⁸ Indeed, their primary contact with this family, and the people to whom they could provide access, would have been in Antioch anyway.

(5) *Iconium's Politics and Locale (13:51)*

Augustus had founded a colony at Iconium, distinct from and alongside the Greek polis, long before Paul's day.¹²¹⁹ The Greek polis Iconium was granted the title "Claudiconium," perhaps some time in the reign of Claudius;¹²²⁰ some scholars have suggested that it achieved the coveted status of Roman colony at this time (which would have presented an issue of immediate civic pride), but it was likelier during the city's refounding in the reign of Hadrian (117–38 C.E.).¹²²¹ (Colonial status had cheapened by then; Iconium became a full colony without any influx of Romans.)¹²²²

In any case, Iconium was significant, especially among local towns. Pliny the Elder called it an *urbs celeberrima*, the Lycaonians' most celebrated city (*N.H.* 5.25.95).¹²²³ Iconium is known to have included a theater, sponsored by both local and imperial patronage in the first half of the first century C.E.¹²²⁴ A prominent center from at least the fourth century B.C.E., the town "had clearly long been an important community and had presumably acted as a political and economic centre for south east Phrygia."¹²²⁵ Its fertile countryside was easily divided "into colonial allotments."¹²²⁶ Iconium's population was distinct from the rural communities in the district, though some of these were also growing by this period.¹²²⁷

Strabo notes that its territory boasted natural resources much superior to the rest of Lycaonia; the Galatian king had once held more than three hundred flocks there (Strabo 12.6.1). Explicitly exempting Iconium, Strabo claims that much of the rest

1217. As best as I can estimate from *ibid.*, map 10, after 1:164.

1218. Mitchell, *Anatolia*, 1:96 (although, by the end of the first century, towns were growing there).

1219. Belke, "Iconium," 706; cf. Mitchell, *Anatolia*, 1:77.

1220. Conzelmann, *Acts*, 107; Mitchell, *Anatolia*, 1:95.

1221. Witherington, *Acts*, 417 (noting esp. Mitchell, "Iconium and Ninica"); Mitchell, *Anatolia*, 1:95.

1222. Levick, *Roman Colonies*, 165.

1223. With Barrett, *Acts*, 661; Fitzmyer, *Acts*, 522. Pliny the Elder, LCL, 2:293, translates "most famous city."

1224. Mitchell, *Anatolia*, 2:18 (citing IGRR 3.262, 1474).

1225. Mitchell, *Anatolia*, 1:95. Only in the Byzantine era did it supplant Lystra as Lycaonia's metropolis, but only Lystra's colonial status had made it more prominent beforehand (Levick, *Roman Colonies*, 183).

1226. Mitchell, *Anatolia*, 1:77; cf. 1:151.

1227. In the basin ca. 30–40 km. southwest of Iconium, a small agricultural village appears about every 6 sq. km., and these grew into small towns during the Roman period (Mitchell, "Archaeology," 185, with 126, fig. 1). On Lycaonia further, see Bruce, "Lycaonia"; Schnabel, *Mission*, 1108–10; most extensively, including views about its history, see Bechard, *Walls*; for a summary of 1990s archaeological publications on Lycaonia and Isauria, see Mitchell, "Archaeology," 185–86 (noting that little excavation has been done during this period).

of the region of “the plateaus of the Lycaonians” was “cold, bare of trees, and grazed by wild asses,” with little water and (where there was water) the world’s deepest wells to procure it. The country nevertheless produced enough sheep to make some rich, “but the wool is coarse” (12.6.1 [LCL, 5:473–75]). Romans drove out robbers and pirates from Lycaonia and so brought the land under Roman control (12.6.2). As the intersection of several roads (including the Via Sebaste and a road from Ephesus), it held great importance.¹²²⁸ Its local advantages may have gone to its head: it fancied itself the most ancient of cities, even prediluvian.¹²²⁹

Luke specifies that Lystra and Derbe were in Lycaonia (Acts 14:6), some distance from (14:19), yet related to (13:51; 14:21; 16:2), Iconium. His description sounds as if he distinguishes Iconium from Lycaonia, another example of the ambiguous and shifting boundaries in this region. Strabo includes Iconium in Lycaonia¹²³⁰ but distinguishes it from Lycaonia in some respects. (Lycaonia was not far from Paul’s home territory of Cilicia and was eventually joined to it administratively in the second century.¹²³¹ Like Pamphylia, it was probably known to Paul before his visit.)

Luke’s apparently distinguishing Iconium from Lycaonia should not surprise us, since others in antiquity did the same.¹²³² Regional and ethnic boundaries were not hard and fast, and political boundaries fluctuated, especially affecting border cities.¹²³³ Further, geographically Iconium lay on the Lycaonian plain, but political and ethnic affiliation were more significant, and the local language was plainly Phrygian.¹²³⁴ (Phrygian names also were common in Iconium but not in Lystra.)¹²³⁵

Strabo himself, indeed, considers Phrygia’s various boundaries difficult to fix, noting even a proverb making fun of how difficult it was to distinguish Phrygia from Mysia (Strabo 12.4.4; 12.8.2). Whereas Strabo includes Iconium in Lycaonia,¹²³⁶ a single author, Pliny the Elder, places it sometimes there (*N.H.* 5.95) and sometimes in Phrygia (5.245).¹²³⁷ The citizens viewed themselves as Phrygian,¹²³⁸ and earlier writers had counted this as the easternmost town in Phrygia (*Xen. Anab.* 1.2.19). In the mid-second century, a citizen from there claims that he came from Iconium of Phrygia.¹²³⁹ A church council convened in “Iconium of Phrygia” less than a century

1228. Lake and Cadbury, *Commentary*, 160.

1229. Ramsay, *Pictures*, 355. Many in the Greco-Roman world believed in the antiquity of Phrygia (cf. Rives, “Phrygian Tales”).

1230. Like Pliny E. *N.H.* 5.25.95 and others.

1231. Bean and Mitchell, “Cilicia,” 330; Mitchell, *Anatolia*, 2:155 (cf. also map 6, 1:99); Levick, *Roman Colonies*, 168–69.

1232. Finegan, *Apostles*, 83, notes that Iconium was in Lycaonia geographically but, more broadly, in Galatia Phrygia administratively; also Dmitriev, “Observations.”

1233. Fitzmyer, *Acts*, 528, rightly: Luke “reflects the changing boundaries of Phrygia and Lycaonia in the first century, for which there is little historical control at present.”

1234. Ramsay, *Discovery*, 65; Finegan, *Apostles*, 92; Hemer, *Acts in History*, 178, 228; Mitchell, *Anatolia*, 2:155. Ramsay argues that it was on the Phrygian side only during 37–72 (see fully Ramsay, *Discovery*, 39–114; followed by Longenecker, *Acts*, 229); for the Phrygian language here, see *Discovery*, 42, 71, 76. A language in Pisidia is attested (at least in names) as late as the third century (Davies, “Anatolian Languages”).

1235. Hemer, *Acts in History*, 228–30. This is confirmed also “by the geographical distribution of Neo-Phrygian texts” (110).

1236. Strabo could be detailed in his assessments, such as of the boundary between Lycaonia and Cappadocia (12.6.1).

1237. Conzelmann, *Acts*, 107; Pliny the Elder treats Lycaonia shortly after treating Pisidia and Antioch (*N.H.* 5.24.94–5.25.95).

1238. E.g., C. Williams, *Acts*, 168. It “was the furthestmost city of Phrygia on its south-eastern, Lycaonian border” (Calder, “Introduction, 1,” xi). It is generally considered “the last city of Phrygia” (Jones and Mitchell, “Lycaonia”).

1239. Ramsay, *Discovery*, 55; Lake and Cadbury, *Commentary*, 160, citing one Hierax in the time of Justin Martyr (in the *Martyrdom of Holy Martyrs*, or *Martyrdom of Justin*, ch. 3, probably fairly reliable on the sort of matter in question). See Calder, “Introduction, 1,” xi.

later.¹²⁴⁰ (On Phrygia, see comment on Acts 14:1–7.) It remained part of Galatia after the distinct eparchy of Lycaonia was formed, before 150 C.E.; it was the second city (Antioch was the first) when Pisidia became a new province in 295 C.E.¹²⁴¹ Cicero had classed Iconium as Lycaonian (*Fam.* 15.4.2) because of geographic proximity, but Iconium was politically the administrative center of Isaurian territory, not Lycaonian.¹²⁴²

Politically, however, it had long been counted even more plainly as part of the province of Galatia.¹²⁴³ In the early first century B.C.E., it became part of “the old Kingdom of Galatia (and thus formed part of what is sometimes known as ‘South Galatia’ . . .).”¹²⁴⁴ Amyntas, the Galatian king, once ruled this area (Strabo 12.6.1); when he died in 25 B.C.E., the Romans made it part of their province of Galatia. For the Phrygian and Lycaonian regions as part of the province of Galatia, see the introduction, below, to Acts 14:1–7.

(6) *Filled with Joy and the Spirit* (13:52)

Whereas the opponents of God's servants were “filled up” (a functional synonym) with jealousy in 13:45, the new believers here are “filled” with joy. “Filling” with joy is not an uncommon expression,¹²⁴⁵ but the contrast in the context may be deliberate. Gentiles had rejoiced at God's welcome in Acts 13:48; the new believers now continued in the joy of their confidence in God (13:52). Christian faith probably needed to be joyful to compete in ancient society; Greek religion was often joyful and celebratory.¹²⁴⁶ The goal of most ancient philosophy was happiness (εὐδαιμονία),¹²⁴⁷ a term absent in biblical Greek perhaps because the goal of most biblical ethics was oriented toward God's pleasure rather than that of mortals.¹²⁴⁸ For what it is worth,¹²⁴⁹ although Stoics distrusted emotions,¹²⁵⁰ Greek philosophy, including Stoics, valued joy,¹²⁵¹ among philosophers, wisdom and virtue, rather than bodily pleasure, yielded

1240. Ramsay, *Discovery*, 56 (citing Cyprian *Ep.* 71).

1241. Ramsay, *Discovery*, 56, citing also Basil in 372 C.E.

1242. *Ibid.*, 39–40, 55. Ramsay is certain that Luke was right about Iconium being outside Lycaonia (42); Mitchell, *Anatolia*, 2:155, concurs.

1243. Conzelmann, *Acts*, 107; Mitchell, *Anatolia*, map 6, 1:99 (for the period between Augustus and Hadrian); Belke, “Lycaonia,” 911.

1244. Barrett, *Acts*, 661.

1245. Cf., e.g., 2 Macc 3:30; 3 Macc 4:16; *Let. Aris.* 294; Philo *Alleg. Interp.* 3.81; *Abr.* 108; *Mos.* 1.177, 333 (cf. *Spec. Laws* 2.48); *Jos. Ant.* 15.421; *War* 3.28; *Symm. Ep.* 1.50.2 (cf. 1.22); *John* 3:29; 15:11; 16:24; 17:13; *Rom* 15:13; 2 *Cor* 7:4; *Phil* 2:2; 2 *Tim* 1:4; 1 *John* 1:4; 2 *John* 12; *Diogn.* 10.3.

1246. For joy in Greek and Roman religion, see Miccoli, “*Spirito festivo*” (though, for the Romans, cultic celebration might characterize especially festivals).

1247. E.g., *Mus. Ruf.* 7, p. 58.13–15; Arius Did. *Epit.* 2.7.5b.5, pp. 20–21.15–16; 2.7.6d, pp. 38.34–41.3; 2.7.6e, pp. 40–41.11–13; cf. Lutz, “*Musonius*,” 28; Engberg-Pedersen, *Paul and Stoics*, 74; Hossenfelder, “*Happiness*.” Cf. pleasure for Epicureans, *Diog. Laert.* 10.131; 10.144.17.

1248. Though cf. more hellenized Jewish and Christian approaches in, e.g., *Diogn.* 10.5; the term and its cognates appear 151 times in Josephus (e.g., *Ant.* 1.14, 20, 41, 44, 46, 69, 98, 104, 113, 142–43) and 189 times in Philo (e.g., *Alleg. Interp.* 1.4; 2.10, 82, 101–2; 3.52, 83, 205, 209, 218–19, 245).

1249. Wojciechowski, “*Vocabulary*,” doubts that moral philosophy shaped much NT language. I find some overlap in Pauline literature (e.g., Keener, “*Spirit Perspectives*”; idem, *Corinthians*, 44–47, 57; see esp. Malherbe, *Philosophers*), most prominently in the Pastorals, but much less often in Luke (apart from texts such as Acts 24:25; 26:25, where Paul addresses educated Gentiles).

1250. E.g., Knuttila and Sihvola, “*Emotions*,” 13, 15; cf. Plato (17); Aristotle was more positive (16); most non-Stoics regarded the Stoic position as unworkable (17). Plotinus urged suppressing emotions insofar as possible (Emilsson, “*Plotinus*,” 359). Apparently most Stoics viewed humans as entirely rational (Brennan, “*Theory*,” 23), but Posidonius may have broken with this approach (Cooper, “*Posidonius*,” 71, 99), assuming, as is likely, Galen correctly understood him (Sorabji, “*Chrysippus*”); some think Galen misunderstood Chrysippus (Gill, “*Did Galen Understand?*,” e.g., 126–27). Marcus Aurelius appreciated positive, “sane” emotions (Engberg-Pedersen, “*Marcus*,” 334–35).

1251. E.g., *Mus. Ruf.* 17, p. 108.7; Arius Did. *Epit.* 2.7.5k, pp. 34–35.1; 2.7.11e, pp. 68–69.12–16; *Iamb.* *V.P.* 31.196; cf. Vorster, “*Blessedness*,” 38–51. Stoics approved of joy as a good emotion (Engberg-Pedersen,

happiness.¹²⁵² Some moralists condemned frivolous laughter and jesting, emphasizing true joy instead (Dio Chrys. *Or.* 32.99).¹²⁵³

Jewish people often connected joy with keeping God's commandments;¹²⁵⁴ living according to wisdom (Wis 8:16); prayer (Tob 13:1); worship;¹²⁵⁵ and right living (*Let. Aris.* 261).¹²⁵⁶ Joy could be associated with public festivals (Neh 8:10–12; Ps 42:4).¹²⁵⁷ The association of joy with worship¹²⁵⁸ suggests worship as a possible component of the joy here. But Paul (whose life and, presumably, teaching Luke highly respects) often associates the Spirit with joy (e.g., Rom 14:17; 15:13),¹²⁵⁹ including in conversion (1 Thess 1:6) and as a normal feature of Christian living (Gal 5:22). Joy follows conversions in Luke-Acts (e.g., Acts 8:39), especially in Luke 15:5–7, 9–10, 23–24, 32.¹²⁶⁰ See comment on Acts 13:48. Perhaps most relevant here (although a deliberate connection is uncertain) is that Jesus “rejoiced” (a synonym albeit not a cognate) in the Spirit in Luke 10:21 over the Father revealing his truth to infants rather than the wise; here outsiders, who receive the message rejected by the insiders, are filled with joy and the Spirit.

4. Ministry in Iconium and Lystra (14:1–23)

In Acts 14:1–25, the two missionaries continue to face conflicts with hostile fellow Jews and others as they carry the gospel to other inland towns of southern Asia Minor. Apostolic signs do not dissipate opposition but rather reinforce the lines dividing supporters from opponents, neither of whom can ignore such a powerfully attested message. Signs continue to draw attention to the gospel and confirm for Luke's audience the veracity of the message about Jesus.

¹²⁵²“Vices,” 612; idem, *Paul and Stoics*, 73). It was not, however, a moral “virtue” (Arius Did. 2.7.5b, pp. 10–11.19; 2.7.5c, pp. 28–29.7; 2.7.5g, pp. 32–33.4), though Paul lists it with virtues that belong to the Spirit's fruit (Gal 5:22–23). Stoics appreciated a “calm pleasure” concerning what was good (Brennan, “Theory,” 57).

¹²⁵³Cic. *Parad.* 16–19; *Leg.* 1.23.60; *Tusc.* 5.7.19–20; Mus. Ruf. 7, p. 58.13; 17, p. 108.7; Iambl. *V.P.* 31.196; Sen. *Y. Ep. Lucil.* 23; 27.3–4; 59.10; *Benef.* 7.2.3; *Dial.* 7.16.1–3; Epict. *Diatr.* 4.7.9; Dio Chrys. *Or.* 25.1; Arius Did. 2.7.6e, pp. 40–41.13–15; 2.7.11g, pp. 70.33–73.4; Lucian *Dem.* 19–20; also Meeks, *Moral World*, 46–47; Lutz, “Musionius,” 28; Engberg-Pedersen, *Paul and Stoics*, 73. Self-knowledge also yielded full joy (Cic. *Tusc.* 5.25.70).

¹²⁵⁴Cf. also warnings against excessive laughter or frivolity, e.g., Arist. *N.E.* 4.8.1–12, 1127b–1128b (esp. 4.8.3, 1128a); Epict. *Encheir.* 33.15; Dio Chrys. *Or.* 7.119; 32.99–100; 33.10; frg. 7 (Stob. *Flor.* 4, 23.60 [Hense, 588]; 74.60 [Meineke]); Aul. Gel. 4.20.4–6 (cf. 4.20.11); Iambl. *V.P.* 2.10; 17.71; 30.171; Porph. *Marc.* 19.321–22; Diog. Laert. 8.1.20; Pelikan, *Acts*, 148–49 (citing Arist. *N.E.* 2.7.11–13, 1108a; Clem. Alex. *Instr.* 2.8); *m. 'Ab.* 3:13/14; *t. Ber.* 3:21; *b. Ber.* 30b; perhaps 4Q266 18 IV, 12–13; 4Q184 1 2; *Gen. Rab.* 22:6; *Exod. Rab.* 30:21; *Ecl. Rab.* 2:2, §1 (but the rabbis disapproved of only inappropriate laughter; Reines, “Laughter”). For the approval of rhetorical humor so long as dignity is maintained, see, e.g., Cic. *Brut.* 43.158; *Or. Brut.* 26.88–90; Quint. *Inst.* 4.3.30–31; Plut. *Table* 2.1.4, *Mor.* 631C.

Rab.* 21:2/3; 51:4; Urbach, *Sages*, 1:390–92; Bonsirven, *Judaism*, 95; esp. the Tannaitic sources in Urbach, *Sages*, 1:390; most fully, Anderson, “Joy.” In *Song Rab.* 4:11, §1, public teaching of Torah should generate as much joy as wedding guests experience from beholding a bride (cf. John 3:29).

¹²⁵⁶Pss 32:11; 33:1, 3; 43:4; 68:3–4; 71:23; 81:1; 90:14; 92:4; 95:1; 98:4; 132:9, 16; *Jub.* 36:6; *Jos. Asen.* 3:4; *m. Pesah.* 10:6.

¹²⁵⁷The Spirit appears with joy in *y. Sukkah* 5, cited in Montefiore and Loewe, *Anthology*, 203; cf. *Tg. Onq.* on Gen 45:27–28.

¹²⁵⁸Cf. also, e.g., *m. Pesah.* 10:6; Halpern-Amaru, “Joy,” on *Jubilees*.

¹²⁵⁹E.g., Pss 2:11; 5:11; 20:5; 27:6; 31:7; 32:11; 33:1, 3; 35:9; 42:4; 47:1; 63:7; 67:4; 71:23; 81:1; 84:2; 90:14; 92:4; 95:1; 98:4; 132:9, 16. Joy could also lead to praise (Tob 8:16; 13:1; Jas 5:13; Luke 1:47).

¹²⁶⁰Haya-Prats, *Believers*, 159–60, views the Spirit as the source of joy in Acts 13:52. For joy in the NT, see further Elliott, *Feelings*, 167–81; in Paul, Kampling, “Freude”; Morrice, “Joy.” Cf., in later rabbis, *y. Sukkah* 22b; *Midr. Ps.* 24:3 (in Le Cornu, *Acts*, 760). Contrast the emotionless view of God in the Platonic tradition (Max. Tyre 9.2).

¹²⁶¹For Spirit-empowered joy in Luke-Acts, see Martín-Moreno, “Alegría”; along with praise, Cullen, “Euphoria.”

Although, geographically, 14:1 continues the location of 13:51, the verse that intervenes between them comments on the believers back in Antioch. Thus it is justifiable to start a new section here, though ancient writers were probably more concerned with narrative transitions than with our smooth modern outlines. With the admission that the section break used here is somewhat arbitrary and invites us to look back to previous comments, I introduce here some matters relevant for 14:1–23.

a. Introduction

The connections between Antioch, Iconium, and Lystra in Paul's ministry in Acts (cf. also 14:21; 16:2) may be independently attested in 2 Tim 3:11 (though it omits explicit mention of Derbe),¹²⁶¹ and there is little reason to doubt that Paul and his colleagues did travel to these four towns.¹²⁶² In view of Paul's ministry in prominent locations such as Corinth, who would invent ministry in such out-of-the-way towns?¹²⁶³

I. PHRYGIA

For Iconium's ambivalent character as a Phrygian or Lycaonian town, as well as its location in Roman Galatia and along the Via Sebaste, see comment on Acts 13:51.

Phrygia was not a province per se (it was split between Asia and Galatia),¹²⁶⁴ but it possessed a cohesive Phrygian identity, with a language continuing into the third century C.E. (cf. the similar use of Lycaonian in Acts 14:11) and a distinctive religion (for the religion, see also comment on Acts 14:11–12).¹²⁶⁵ Sabazios was a prominent traditional deity of Phrygia.¹²⁶⁶ Phrygians were particularly known for the worship of Agdistis (the mother goddess called Cybele elsewhere in Anatolia), "her youthful consort Attis and other Anatolian deities associated with righteousness, vengeance and justice"; Phrygians were also morally strict (as we might expect from reading Galatians).¹²⁶⁷ Outsiders associated them with the worship of the earth "mother" or "mother of the gods."¹²⁶⁸ The center of the Phrygian cult was farther north, in Pessinus.¹²⁶⁹ Cybele worship was considered wild and barbarous.¹²⁷⁰ See further comment on Cybele at Acts 14:15.

Greeks traditionally considered the Phrygians barbarians, but of the most ancient, hence most honorable, sort (Men. Rhet. 1.2, 354.2).¹²⁷¹ Paul evangelized in Phrygia, but some cities received his ministry only by means of the agents whom he had trained

1261. Hemer, *Acts in History*, 184; cf. Dunn, *Acts*, 189; Pervo, *Acts*, 320–21.

1262. See Lüdemann, *Christianity*, 165 (who calls it "a historical fact").

1263. The exception might be if Luke's primary audience was located there—which is extremely unlikely.

1264. Pliny E. *N.H.* 5.41.145 noted its boundaries with Galatia on the north (cf. here also 5.42.146) and Lycaonia, Pisidia, and Mygdonia on the south. Pliny clearly knows the overlap, since Galatia borders Pamphylia, Pisidia, and Lycaonia on the south (5.42.147).

1265. For religion in Phrygia, see Mitchell, *Anatolia*, 1:187–91; for a summary of 1990s archaeological publications on Phrygia, see idem, "Archaeology," 178–83. For paganism in Anatolia in the first three centuries C.E., see idem, *Anatolia*, 2:11–31.

1266. See idem Parker, "Sabazius."

1267. Harrill, "Asia Minor," 134; Mitchell, *Anatolia*, 1:189, 191. On the mother goddess there, cf. also Martin, *Colossians*, 4.

1268. E.g., Diog. Laert. 6.1.1; Lucret. *Nat.* 2.611; cf. a later sect in Hippol. *Ref.* 5.4.

1269. Apul. *Metam.* 11.4–5. Although the cult had spread around the Roman world, the site at Pessinus was in decline by the beginning of the first century (Mitchell, *Anatolia*, 2:20, 22).

1270. Grant, *Religions*, xxxvii (though Apul. *Metam.* 11.4–5 conflates the two figures).

1271. The most ancient cities could be praised as most honorable (Men. Rhet. 1.2, 355.2–11). For Iconium's claim that it was the most ancient city, see Ramsay, *Pictures*, 355. Some ancients placed the site of Heracles's son's burial in Phrygia (Philost. *Hrk.* 8.14); for the alleged prediluvian history of the region, see comment on Acts 14:11–12. More recent respectable figures could also be claimed for Phrygia (Aesop in Max. Tyre 15.5; 32.1), though some ancients (including classical Athenians, who held a number of Phrygian slaves) ridiculed Phrygians as effeminate (Menander *Aspis* 242) and/or cowardly (Libanius *Invect.* 2.1; cf. Virg. *Aen.* 4.215–17; 12.99–100).

(cf. Acts 19:9–10; Col 1:2; 2:1; 4:16).¹²⁷² Phrygia and Galatia lay to the northwest of Paul's home province of Cilicia but were separated from it by the difficult passage across the Taurus mountains (Hdn. 3.1.4; 3.2.6), though it could be crossed if no human obstacles were added to the natural ones (3.3.8).¹²⁷³

Widely spread Neo-Phrygian inscriptions help define the part of the province of Galatia that would view itself as (or at least speak) Phrygian.¹²⁷⁴ William Calder argues that the boundary ran west from Iconium, “between the Sultan Dagh and the Pisidian mountains, to Apollonia”; he further notes that “the inscriptions assign Neapolis, Antioch, and Apollonia to Phrygia.”¹²⁷⁵ More Neo-Phrygian texts and Greek texts with Neo-Phrygian peculiarities have helped define the extent of ancient Phrygia.¹²⁷⁶ There was a significant Jewish population in Phrygia.¹²⁷⁷

II. THE PROVINCE OF GALATIA

The Phrygian region that includes many towns Paul visited is probably the area referred to in Paul's letter to the Galatians. The title “Galatia” sometimes applied to a region settled by Galatians—that is, Celtic tribes (what NT scholars typically call “North Galatia”)—but was also the title of a Roman province, which included “much of eastern Phrygia, Lycaonia, Isauria, Pisidia, and Pamphylia.”¹²⁷⁸ People in the middle of the first century C.E. called the entire province, and not merely its northern, Celtic region, “Galatia.”¹²⁷⁹ It is likelier that Paul's letter applies the title to residents of the province that held this explicit title.¹²⁸⁰ Those who doubt that Paul addresses the Phrygian churches founded in Acts favor the North Galatian hypothesis,¹²⁸¹ which some of its supporters claim as a majority view;¹²⁸² those who believe that Paul addresses the churches founded in Acts favor the South Galatian hypothesis,¹²⁸³ which some of its proponents likewise claim as a majority view.¹²⁸⁴ (These South Galatian

1272. For Laodicea as part of Phrygia, see Philost. *Vit. soph.* 1.25.539; *MAMA* 1:xii.

1273. Some (Arrington, *Acts*, 147, comparing 2 Cor 11:26) also emphasize the perils of robbers in the mountains.

1274. For Neo-Phrygian inscriptions, see, e.g., *MAMA* 7:xxvii–xxix.

1275. Calder in *MAMA* 1:xi–xii. Ramsay, *Galatians*, 209, notes that Pisidian Antioch was later southern Galatia's “metropolis,” and he assigns (*idem*, *Cities of Paul*, 264, 298) even Antioch to South Galatia, as well as (343, 350) Iconium.

1276. Hemer, “Phrygia,” 126.

1277. Jos. *Ant.* 12.147; Cic. *Flacc.* 28.66–69 (quoted in Whittaker, *Jews and Christians*, 117–18); Stern, “Diaspora,” 149–50; Kraabel, “Judaism in Asia Minor,” 61ff. (for syncretism, see, e.g., 81–86, 142, 146); Bruce, “Lycus Valley”; cf. Meyers and Kraabel, “Remains,” 191; see also discussion below, on South Galatia.

1278. Calder and Mitchell, “Galatia.” Pamphylia was no longer part of Galatia when Paul visited but possibly again a part when he wrote Galatians (on its later date; see Levick, *Roman Colonies*, 163–64). Lycaonia (Belke, “Lycaonia,” 911) and Lystra (*idem*, “Lystra,” 47) were both in the province of Galatia.

1279. Mitchell, “Galatia,” 871 (citing Eutropius *Breviarium historiae romanae* 7.10; *ILS* 9499; *IGRR* 3.263).

1280. With Calder and Mitchell, “Galatia,” and other sources.

1281. E.g., Lightfoot, *Galatians*, 18–19; Lake, “Route,” 235 (attributing Ramsay's view to a conjectural emendation); Meeks, *Urban Christians*, 42–43; Reicke, *Era*, 229; Cousar, *Galatians*, 4 (very tentatively). (Strobel, “Region,” 649–50, might support the North Galatian hypothesis, but in *idem*, “Galatia,” 651, he certainly recognizes Phrygia and Lycaonia as parts of the province.) It was favored by patristic commentators (Wallace and Williams, *Acts*, 74), presumably on the basis of common usage.

1282. Betz, *Galatia*, 4; Stambaugh and Balch, *Environment*, 154.

1283. E.g., with varying measures of certainty, Ramsay, *Galatians*, *passim* (e.g., 81, 126, 180, 209, 318); *idem*, *Galatia*; Knox, *Jerusalem*, 236–39; Breytenbach, *Provinz*, esp. 99–126; Scott, *Nations*, esp. 181–215; Riesner, *Early Period*, 286–91; also Blaiklock, *Archaeology*, 90–91; *idem*, *Acts*, 122; Arrington, *Acts*, 165; Hemer, *Acts in History*, 278–307; Hansen, “Galatia”; *idem*, “Galatians,” 324–26; Ridderbos, *Galatia*, 23–31; Tenney, *Galatians*, 46–51; Guthrie, *Introduction*, 468–72; Barnett, *Birth*, 206–10; Bligh, *Galatians*, 3–6; Wainwright, “Silas”; Yamauchi, *Cities*, 18; Carson, Moo, and Morris, *Introduction*, 290–93; Finegan, *Apostles*, 83; McRay, *Archaeology*, 236; Rapa, “Galatians,” 550–52.

1284. Hanson, *Acts*, 19–20; Tenney, *Galatians*, 51.

proponents are probably correct about the majority view today, even though, as in other matters, scholars tend to read and count especially those on their own side.)¹²⁸⁵

This question may prove important for our understanding of the character of Luke's historiography. This is because one objection raised to the fit between Paul's letters and Acts is that Paul knows only North Galatians (the supposed meaning of 1 Cor 16:1; Gal 1:2; 3:1; cf. 2 Tim 4:10) whereas Luke speaks only of Paul's travels in South Galatia.¹²⁸⁶ Since Luke and the undisputed Pauline epistles mutually attest each other on most other cities and regions where Paul ministered (either by the letter's audience or by random comments about churches), the lack of complementarity of the evidence at this point seems odd—and ultimately suspicious.¹²⁸⁷

It is unlikely that Paul would have converted the Galatians on a later journey (though I favor a post-Acts 15 dating for Galatians), because they know Barnabas (Gal 2:1, 9, 13; only twice elsewhere in Paul's corpus);¹²⁸⁸ likewise, Luke allows little room for such a journey. Luke elsewhere condensed long journeys into short comments, but he might at least report the fact of a journey so far out of the way (cf. the reports of places they could not journey in Acts 16:6–7). Granted, the journey to North Galatia can fit plausibly into the second journey, but for this, too, we lack clear evidence beyond Paul's claim that his audience consisted of "Galatians" (see comment on Acts 15:36–41; 16:6–7), which, as noted here, is not at all sufficiently clear evidence.

It is intrinsically more likely that Galatians tells us about churches that Acts mentions than that Luke was ignorant of some churches founded by Paul,¹²⁸⁹ churches nevertheless known to the Corinthians (1 Cor 16:1) and even well enough known by Paul's competitors that they followed him there to improve on his work (Gal 1:7; 3:1; 4:17; 5:10–12; 6:12–13). Paul visited the Galatians at least twice (Gal 4:13), which comports well with a second visit in Acts 14:21–25 or 16:1–6.¹²⁹⁰

A large number of scholars today incline instead to the South Galatian theory concerning Paul's letter to the Galatians, and not only for this reason.¹²⁹¹ As Stephen Mitchell,

1285. It is a frequent practice among some of the more radical scholars to omit from their count all scholars more conservative than themselves, regarding their books as unworthy of attention, apparently because these radical scholars do not count as true scholars exegetes who have differences with their critical presuppositions. (Ironically, they sometimes exclude conservative opinions by caricaturing all conservatives as too closed-minded to consider diverse views; the practice of the extreme left thus mirrors that of the extreme right.) Extreme conservatives likewise tend to read only conservative scholars and their critiques of more liberal scholars. Many other scholars do read a wider range of perspectives, but admittedly it is rarely possible for an individual to master all the literature on a subject.

1286. Meeks, *Urban Christians*, 42–43; cf. Meeks and Fitzgerald, *Writings*, 10 (though some with a higher view of Luke's historical accuracy nevertheless prefer the North Galatian hypothesis; Lightfoot, *Galatians*, 18–19; Reicke, *Era*, 229). Some other titles in 1 Pet 1:1 seem associated with more northern locations in Asia Minor, which could imply that North Galatia may have begun to be evangelized before 1 Peter; but if Paul did not directly evangelize these other regions (cf. Acts 16:7; 19:10), need he have evangelized North Galatia either? Nor was Cappadocia far north.

1287. With, e.g., Rackham, *Acts*, 195–98.

1288. One could appeal to 1 Cor 9:6 to argue that Barnabas continued traveling with Paul in a later period than Acts reports; but 2 Cor 1:19 names only Silas and Timothy, and it is quite difficult to imagine that Luke invented the uncomplimentary rift described in Acts 15:37–39. Paul's account of Barnabas's involvement is considerably fuller in Galatians than in 1 Corinthians.

1289. Riesner, *Early Period*, 287; cf. Ridderbos, *Galatia*, 26–28.

1290. Ramsay, *Galatians*, 405.

1291. E.g., Hanson, *Acts*, 19–20: "Most scholars therefore incline to the view that Paul in Galatians was addressing the four churches of Pisidian Antioch, Iconium, Lystra, and Derbe." The view has been argued at great length (and convincingly) by Hemer, *Acts in History*, 278–307; cf. also Hansen, "Galatia"; Ridderbos, *Galatia*, 23–31. For examples of supporters, see, e.g., Barnett, *Birth*, 206–10 (though also supporting the early date for Galatians, which a South Galatian view allows but does not require); Blich, *Galatians*, 3–6; Wainwright,

a leading expert on central Anatolia, has argued, Ramsay's work "should long ago have put the matter beyond dispute" in favor of *South Galatia*.¹²⁹² In another work he puts the matter more bluntly: "There is virtually nothing to be said for the north Galatian theory. There is no evidence in Acts or in any non-testamentary source that Paul ever evangelized the region of Ancyra and Pessinus, in person, by letter, or by any other means."¹²⁹³

Ancient texts treat the entire region as Galatian.¹²⁹⁴ "Galatian" had a wide range of meaning in Asia Minor because of the Galatians' widespread influence, a range that certainly had to include the Roman province of Galatia. The "Gauls," or "Galatians" (Celts), who migrated to Asia took possession of the part of Phrygia adjoining Cappadocia and the Paphlagonians (Strabo 4.1.13).¹²⁹⁵ They were considered lawless but were subdued by Roman conquest to the benefit (in Roman opinion) of their neighbors (Polyb. 3.3.5).¹²⁹⁶ Reputed Gallic practices included ritual human sacrifice (following old Druid-like customs)¹²⁹⁷ and the self-castration of the eunuch priests of Cybele (the Galli).¹²⁹⁸ But to the extent that names indicate ethnic self-identification, pure Celts became rare whereas diverse peoples throughout the Roman province of Galatia adopted the title.¹²⁹⁹

Galatians occupied Greater Phrygia (the region Midas ruled, in contrast to the Lesser Phrygia near Troy; Strabo 12.8.1).¹³⁰⁰ Greater Phrygia thus included both what was commonly known as Galatia and a smaller Phrygia as well as Lycaonia and Lydia (Strabo 2.5.31). The boundaries in this region became so confused that it was difficult to decide the exact contours of Phrygia (12.8.2; cf. 12.4.4); many Galatians settled in Phrygia (12.1.1).¹³⁰¹ Part of Greater Phrygia lay directly south of Galatia proper, but some of this region was held by Amyntas, king of (northern) Galatia, in the first century B.C.E. (12.5.4).

"Silas"; Finegan, *Apostles*, 83; McRay, *Archaeology*, 236; Hansen, *Galatians*, 16–17. Cf. Breytenbach, "Reasons," 165, who envisions the Galatian conflict as occurring near the Via Sebaste, which would fit this position.

1292. Mitchell, "Galatia," 871, noting that there is no evidence that Paul evangelized North Galatia. Ramsay, *Galatians*, 126, contended that North Galatian theorists made numerous blunders about Asia Minor's history.

1293. Mitchell, *Anatolia*, 2:3. Mitchell suggests (*ibid.*) Peter as a likelier candidate for such evangelization, on the basis of 1 Pet 1:1, but this suggestion seems more questionable. That Peter was culturally equipped to initiate significant evangelistic inroads in that largely Gentile region appears unlikely, though he was undoubtedly respected by the churches there.

1294. Noted by, e.g., Ridderbos, *Galatia*, 23–24.

1295. On the Gauls, see further Caesar *Gall. W.* 1.1; Pliny *E. N.H.* 3.4.31–37; 1 Macc 8:2; Lafond, "Gallia"; Lightfoot, *Galatians*, 1–17; for trade connections, Charlesworth, *Trade Routes*, 179–205; Goudineau, "Marseilles"; Tchernia, "Wine." On Gauls in Asia, see Polyb. 5.11.1–7; Callim. *Hymns* 4 (to Delos), lines 173, 184; Livy 38.17.2 (in Phrygia); Sen. *Y. Dial.* 12.7.2; 2 Macc 8:20; *Sib. Or.* 5.340; cf. Lightfoot, *Galatians*, 235–46 (arguing that they were genuine Celts, ancestors of the Welsh); Ramsay, *Galatians*, 25, 45ff. On Gauls being light-skinned, tall, and blond, see, e.g., Diod. Sic. 5.28.1; 38.17.3; Ptolemy *Tetrab.* 4.10.203. For a thorough history of the Celts in Asia Minor, see Mitchell, *Anatolia*, 1:11–58 (including [19] their resettlement in North Galatia); cf. also Strobel, "Region," 649.

1296. On Gauls being less civilized than Asians, Cic. *Quint. frat.* 1.1.9.27 (with the Asian variety being most degenerate, Livy 38.17.13); as the fiercest warriors in Asia, see Livy 38.17.2, 4; as barbarous and haters of Rome (including in Asia), see 38.47.9; as crude and stupid, Ant. Diog. *Thule* 109b. Noting the rhetorical level of Paul's letter to the Galatians, Betz, *Galatia*, 2, notes the absence of specifically Celtic elements.

1297. Cic. *Resp.* 3.9.15; Caesar *Gall. W.* 6.16. Archaeological finds have increased the credibility of ancient reports about Celtic human sacrifices (Euskirchen, "Celts: Religion," 98), including in pre-Roman North Galatia (a possibility noted in Dandoy, Selinsky, and Voigt, "Celtic Sacrifice").

1298. On Galli, see comment at Acts 8:27.

1299. Hansen, "Galatia," 390.

1300. Midas's palace was supposed to have been at Gordium in Phrygia (Quint. Curt. 3.1.11). The name "Midas," though, is probably Old Anatolian rather than Phrygian, and Assyrian material dates the historical Midas's reign to 718–709 B.C.E. ("Midas: Historical"; for Greco-Roman literary treatment of Midas, see Scherf, "Midas").

1301. The text also indicates the proximity of the Lycaonians and Cilicians to the boundaries of Cappadocia.

When Amyntas died in 25 B.C.E., Rome made his territory, including Lycaonia, into the province of Galatia, which remained until 295/297 C.E.¹³⁰² The Roman province called Galatia thus “comprised much of eastern Phrygia, Lycaonia . . . , Pisidia . . . and northern Pamphylia” (though the boundaries often shifted, in this period especially regarding southern Pisidia).¹³⁰³ Galatia was the Roman province, in other words, governing Iconium, Lystra, Derbe, and even Pisidian Antioch, cities where Paul preached in Acts.¹³⁰⁴

They were “ethnically Phrygian and politically Galatian”¹³⁰⁵ and in Lycaonia more specifically ethnically Lycaonian and politically Galatian.¹³⁰⁶ It is likely to these, rather than to the more remote northern towns that would have taken Paul far out of his way, that Paul refers. (Indeed, few towns larger than villages or camps of nomads lay between Iconium and Ancyra, far to the north, had they traveled that route on the occasion depicted here.)¹³⁰⁷ Paul's letters suggest urban churches in strategic cities, often with some members who were Roman citizens or otherwise held high status; why would he have journeyed to North Galatia?¹³⁰⁸

The title in Paul's letters most naturally applies to the province. We should expect Paul to use the *provincial* title “Galatia” (1 Cor 16:1; Gal 1:2; cf. 2 Tim 4:10), since he regularly employs provincial titles: Achaia (Rom 15:26; 1 Cor 16:15; 2 Cor 1:1; 9:2; 11:10; 1 Thess 1:7–8); Asia (Rom 16:5; 1 Cor 16:19; 2 Cor 1:8; cf. 2 Tim 1:15); Macedonia (Rom 15:26; 1 Cor 16:5; 2 Cor 1:16; 2:13; 7:5; 8:1; 9:2, 4; 11:9; Phil 4:15; 1 Thess 1:7–8; 4:10; cf. 1 Tim 1:3); and Syria-Cilicia (Gal 1:21).¹³⁰⁹ If this is true for the other titles in 1 Cor 16 (16:5, 15, 19), it should be assumed when he employs “Galatia” in 16:1.¹³¹⁰ Further, Paul's Judaizing opponents in Galatians make little sense in North Galatia; why would they follow Paul to “the remote interior of Anatolia” when South Galatia “was both accessible and settled by Jews”?¹³¹¹ Moreover, Josephus explicitly identifies Gomer's descendants, including Paphlagonians

1302. E.g., Calder in *MAMA* 1:xii; C. Williams, *Acts*, 175; Jones and Mitchell, “Lycaonia”; Levick, *Roman Colonies*, 122.

1303. Harrill, “Asia Minor,” 134. On the frequent shifting of boundaries in Galatia (where they were originally too arbitrarily drawn, without regard for ethnic differences), see Levick, *Roman Colonies*, 121. Several years past Paul's visit, an inscription from Sagalassus (on which site see also Mitchell, “Archaeology,” 176) still attests Galatia's boundary south of both Antioch and Iconium (Levick, *Roman Colonies*, 163n2, citing *SEG* 19.765). Even Pisidia belonged to this region in the early part of the period (Mitchell, *Anatolia*, 1:38, 64).

1304. E.g., Mitchell, *Anatolia*, 2:4, 155; C. Williams, *Acts*, 175; Hanson, *Acts*, 19–20; Dunn, *Acts*, 186 (“more likely than not”). Experts on each of these areas agree that they lay in Galatia in this period (e.g., Belke, “Iconium,” 706; Strobel, “Galatia,” 651; Mitchell, *Anatolia*, 2:155; cf. map 6, 1:99, along with 2:155; Dmitriev, “Observations”).

1305. Hansen, “Galatia,” 378; cf. C. Williams, *Acts*, 176.

1306. E.g., Dmitriev, “Observations.”

1307. Mitchell, *Anatolia*, 1:96. The four cities on that route all were founded toward the end of the first century or in the early second (1:96–97).

1308. Of course, “urban” is a term relative to the setting with which it is compared. Most villages and cities in Phrygia were barely distinguishable (Mitchell, *Anatolia*, 1:181).

1309. Most of the ethnic designations Paul employs are much broader, such as “Greeks,” almost denoting “Gentiles,” perhaps from the Greek-speaking East (Rom 1:14, 16; 2:9–10; 3:9; 10:12; 1 Cor 1:22, 24; 10:32; 12:13; Gal 2:3; 3:28; Col 3:11); he never uses “Roman.” Lake and Cadbury, *Commentary*, 162 (followed by Bruce, *Acts*¹, 279), allow for this to be Lycaonia Galatica (separated from the rest of Lycaonia in 41 C.E.; they view it at least as part of the additional tetrarchy in Pliny E. *N.H.* 5.25; Ptolemy *Geog.* 5.4). Romans tended to emphasize cities more than provinces (Judge, *Pattern*, 20–21), but Paul's regional titles are especially provincial.

1310. Riesner, *Early Period*, 289. The provincial title “Galatia” was common (Riesner [287] cites as examples *ILS* 9499.6–7; *CIG* 1.3991; Ptolemy *Geog.* 5.14; Tac. *Hist.* 2.9; *Ann.* 13.35; 1 Pet 1:1).

1311. Riesner, *Early Period*, 286; cf. Ramsay, *Galatians*, 189ff.; Ridderbos, *Galatia*, 24–25; for Jews in Phrygia but rarer elsewhere in Galatia, see Mitchell, “Galatia,” 2:33, 35; Stern, “Diaspora,” 148–50. Betz, *Galatia*, 4–5, mentions some Jewish inscriptions in Anatolia's interior, but the evidence is considerably less than for Phrygia. For some Jewish inscriptions in Gaul proper (most of uncertain date and some as late as

and Phrygians, with “Galatians” (*Ant.* 1.123, 126).¹³¹² Josephus’s view reveals an educated Hellenistic Jewish perspective that is relevant for understanding how both Paul and his opponents would have perceived the area. Finally, subsequent Christianity flourished quickly in Phrygia but progressed in North Galatia only slowly till the third or fourth century.¹³¹³

One objection to the South Galatian theory is the argument that people there would have preferred to be called Phrygians or some other title, bearing no long-term ethnic loyalty to their Roman provincial label as Galatia. Thus on this view Paul might describe them as such in third-person references but not in the vocative as in Gal 3:1.¹³¹⁴ In 3:1, however, Paul is hardly attending to their sensitivities; the verse also calls them “foolish” and suggests that they have been dangerously misled.¹³¹⁵ The early Celts of Galatia had a reputation for barbarism,¹³¹⁶ and so an insult here need not be ruled out.¹³¹⁷

Granted, Lycaonians and Pisidians were nowhere else addressed as “Galatians” (Gal 3:1); “but,” as Riesner puts it, “how else could the apostle have addressed Lycaonians, Phrygians, Pisidians, Greek speakers, and Roman colonists together other than with reference to their common province?”¹³¹⁸ Their ethnic self-identities were too disparate for another overarching designation. Ethnic Galatians might be a minority in the southern part of political Galatia, but ethnicity studies demonstrate that people often identify with multiple ethnic groups.¹³¹⁹ An inscription from this period (57 C.E.) in Apollonia of Phrygia Galatica describes his land as “land of the Galatians.”¹³²⁰ Paul’s two references to them as such in his epistle “to the Galatians” can readily point to South Galatia. The first of these two references (Gal 1:2) must surely refer to the province, given Paul’s use of provincial titles elsewhere (cf., e.g., Rom 15:26; 1 Cor 16:1, 15; 2 Cor 1:1; 1 Thess 1:7–8). Luke himself links Phrygia and Galatia closely in Acts 16:6 and 18:23 (see comment there, esp. extended comment at Acts 16:6–8). Though not as compelling as evidence, it is nevertheless interesting that the one speech in Acts emphasizing justification by faith in Jesus instead of by the law (13:38–39) is addressed to the region where the churches later most needed this message reinforced.¹³²¹

the sixth century), see *CIJ* 1:478–84. The site in 2 Tim 4:10 may be Gaul (Riesner, *Early Period*, 304; Kelly, *Pastoral Epistles*, 213; Chadwick, *Early Church*, 63), though some prefer Galatia (Scott, *Pastoral Epistles*, 136).

1312. Scott, “Galatia,” 390.

1313. Latourette, *First Five Centuries*, 89 (following Ramsay, *Church in Empire*, 146–47). If one objects that this was because urban and coastal areas would be more open to change than more rural, inland areas, one should acknowledge that Paul would have likely targeted more urban coastal areas for the same reasons.

1314. Meeks, *Urban Christians*, 42, noting that even Augustus in *Res gestae divi Augusti* calls them Pisidians. Paul employs an analogous vocative for pathos in 2 Cor 6:11, where, however, he employs neither provincial nor ethnic categories but the residency (more likely than citizenship, which would exclude too much of the church) of his addressees in Corinth; most of his other letters are to churches in particular cities rather than in regions.

1315. Riesner, *Early Period*, 287. For the use of “fool” as an insult in rhetoric, see Epict. *Diatr.* 1.18.10; 2.16.13; 2.21.2; 2.22.4–5; 3.13.17; 3.22.85; Plut. *Pleas. L. 2, Mor.* 1086EF; Mart. *Epig.* 10.100.1; Max. Tyre 38.5; Marc. Aur. 5.36.1; Phaedrus 3.15.2; Diog. Laert. 10.1.7–8; 1 Cor 15:36; Matt 5:22; Philo *Cher.* 75; *Sipre Deut.* 309.1.1; 309.2.1; *b. B. Bat.* 115b, end; *Ber.* 10a; *Erub.* 101a; *Yebam.* 102b.

1316. E.g., Livy 38.17.2, 4; 38.47.9; cf. Harrill, “Asia Minor,” 134–35; German Celts in Jos. *Ant.* 19.119–20.

1317. Mitchell, *Anatolia*, 2:4 (citing negatively on Celts, including in Gaul, Callim. *Hymns* 4 [to Delos], line 184; Val. Max. 2.6.10; Lucian *Alex.* 27). Galatians were stereotyped as intellectually weak, though they had labored to overcome this prejudice (Mitchell, *Anatolia*, 2:84).

1318. Riesner, *Early Period*, 287; so also Wallace and Williams, *Acts*, 74–75. For the self-identification of many long-term settlers in Iconium as Greek rather than Phrygian, see comment on Acts 14:1.

1319. Scott, “Galatia,” 390.

1320. Witherington, *Acts*, 478.

1321. Ramsay, *Galatians*, 399 (counting Antioch as Galatian; if Antioch was not at this time in Galatia proper, it was in any case not far from it). That Luke knew something of Paul’s trouble with the Galatians is not at all improbable, especially if we accept a later date for Galatians.

b. Mixed Results in Iconium (14:1–7)

Luke, who did not mention signs in Antioch, now returns to them (14:3), but this narrative indicates that despite 13:12, signs do not always lead to faith. In Iconium, as in Antioch, it is, ironically, Jewish opposition that prevents a wider Gentile reception and requires the apostles to leave.

I. FAITH, HOSTILITY, AND SIGNS (14:1–4)

Although many Jews and Gentiles “believed” (14:1), the Jewish people who did not believe stirred hostility among the other Gentiles (14:2), requiring Paul and Barnabas to speak boldly and with the confirmation of signs (14:3). Their preaching ultimately divided the city between their own message and the claims of their Jewish accusers (14:4).

(1) Jewish and Greek Believers (14:1)

Paul's interest in both Jews and Gentiles is attested in his own letters (e.g., Rom 1:16). Iconium's Jewish and Gentile populations may have been typical for Phrygia. Phrygia included many Jews (CIJ 2:24–38, §§760–80, much of it from W. M. Ramsay's work), and an excavated synagogue in its city Acmonia, dating to Nero's reign, “has produced the only Hebrew inscriptions found in the interior of Asia Minor outside Sardis.”¹³²² Antiochus III settled two thousand Jewish families in Phrygia (Jos. *Ant.* 12.149).¹³²³ If our understanding of the passage is correct, Babylonian Amoraim even cited an earlier Jewish sage from Galatia (*b. Ketub.* 60a, bar.). Paul and Barnabas continue ministry in the synagogues (see comment on Acts 13:46);¹³²⁴ they follow the pattern of Jesus's ministry, since he traveled to many synagogues (Luke 4:44). (For the expression “synagogue of the Jews,” distinguishing it from other assemblies, see comment on Acts 13:5.) Although Jews could settle as aliens, they apparently usually had the legal right of domicile.¹³²⁵

Like Paul, even when many of his hearers may be Roman citizens or ethnically non-Greek Asians (Rom 1:16; 2:9–10; 3:9; 10:12; 1 Cor 1:22, 24; 10:32; 12:13; Gal 3:28; Col 3:11), Luke sometimes contrasts “Jews and Greeks” or uses the titles together to summarize an entire population (Acts 14:1; 18:4; 19:10, 17; 20:21). Traditional Jewish language could use two polar opposites, such as “heavens” and “earth” or “day” and “night,” to summarize everything in between as well.¹³²⁶ Jews and Greeks certainly had developed hostility toward each other over the centuries, whether over citizen rights in Alexandria or hellenization in Judea.¹³²⁷ Josephus sometimes portrays Jews and Greeks as natural enemies, though often because these were among the primary cultural elements in a location.¹³²⁸ It has been argued that he uses “Greeks” to refer to residents of Greek cities and, secondarily, all non-Jewish inhabitants of cities.¹³²⁹ The original Greek settlers had to supplement their numbers with

1322. Harrill, “Asia Minor,” 134 (the others are in Greek).

1323. See Hansen, “Galatia,” 391.

1324. Cf. Chrys. *Hom. Acts* 30: despite having just been driven out in Antioch, they preached in a synagogue in Acts 14:1; this demonstrates that they were not cowardly.

1325. Rabello, “Condition,” 725.

1326. See, e.g., Gordon, *Near East*, 35n3.

1327. For genuine Jews vs. Greeks in Paul's letters, see esp. Stanley, “Jew nor Greek”; but cf. criticism in Das, *Debate*, 59. On Greek ethnicity in Acts, see discussion in Barreto, *Negotiations*, 110–13.

1328. Jos. *Ant.* 18.374–76 (though the Syrians were enemies also, 18.376); 19.278 (Alexandria, omitting the Egyptian residents). But sometimes Jews are “Greeks” as nonbarbarians (Jos. *War* 1.17, 94; Schnabel, *Missionary*, 325).

1329. Rajak, “Location,” 11–13, arguing that “Syrians” tend to be *rural* provincials in Josephus; cf. Jos. *War* 2.458; Schnabel, *Missionary*, 325. Josephus lists many distinct peoples (Stanley, “Hybrid,” 119, following

those who adopted Greek culture though lacking its ethnicity; “Greeks” were those with privileged status in Hellenistic cities.¹³³⁰ Thus “Greeks” could refer generally to urban citizens in the East.¹³³¹

By “Greeks” Luke might mean more specifically the Greek-speaking urban population distinct from Latin-speaking descendants of Italian Roman citizen settlers of the nearby colony (on which see comment on Acts 13:51). But since it is not certain, and (in view of coins and inscriptions) apparently unlikely, that Iconium itself was a colony this early (in contrast to Lystra and Pisidian Antioch)¹³³² and it is unlikely that it was settled by significant numbers of Italians in this period,¹³³³ it appears more likely that the title distinguishes them from the much-less-hellenized countryside.¹³³⁴ Numismatic evidence suggests that Greek religion and ideas dominated over native Phrygian conceptions, and by Paul’s day the Greek language had been dominant here for generations.¹³³⁵ Although immigrant Greek culture had sometimes overlaid or reinterpreted traditional conceptions, the inhabitants had probably long viewed themselves first as Greeks (providing status) rather than as Phrygians.¹³³⁶ Luke thus uses a term appropriate to the town.¹³³⁷

Among Greeks not associated with the synagogue, paganism was as pervasive in Iconium as elsewhere. The dominant religious devotion in other parts of Phrygia focused on the Phrygian mother goddess Cybele,¹³³⁸ known in this region as the Zizimmene Mother (because the home of her cult was Zizima, among mountains ca. 5 mi. north of Iconium).¹³³⁹ She was the patron deity of Iconium.¹³⁴⁰ Phrygia in general has been thought to have given much attention to the local variety of Mysteries; its focus on the underworld was probably related to the wealth of nearby mines and the nearby hot springs and cool fountains. Phrygians traditionally viewed the underworld as the home of the divine and the place of human origin and destiny.¹³⁴¹

Esler, *Conflict*, 59), but the binary ethnic division of humanity dominant in Paul’s letters may reflect his own experience as a Jew nurtured in a Greek city (Stanley, “Hybrid,” 125). Avi-Yonah, *Hellenism*, 131–32, estimates perhaps a million urban Greeks (scattered in a hundred Eastern cities with an average of ten thousand each) in contrast to fifteen to twenty million natives (though he estimates that in Egypt the proportion of Greeks was higher, one million out of eleven million).

1330. Reicke, *Era*, 38–39. Before their spread under Alexander, Greeks (including those in the islands) numbered over seven million, and probably closer to nine million (see Hansen, “Update,” esp. 276). In the century after Alexander, 38.9 percent of households (and an apparently higher proportion of the population) were Greeks in a nome we can test in Egypt (*ibid.*, 277).

1331. If this is the case, we need not think that all ancient writers shared this usage. Mark apparently distinguishes geography from ethnicity in Mark 7:26; “Greek” residents of Egypt’s nomes also held privileges denied the native Egyptians in the countryside.

1332. See Ramsay, *Pictures*, 357–58; more tentatively, Witherington, *Acts*, 417, following Mitchell, “Iconium and Ninica.” In this period, Iconium resisted Roman influence and tried to remain a Greek city-state, ruled by its citizen assembly and remaining “aloof from interference by the praetorian legate” (Longenecker, *Acts*, 227).

1333. Veteran settlements were no longer common, though some veterans are attested at Iconium (Mitchell, *Anatolia*, 1:73).

1334. On the initial hellenization of Anatolia’s interior even before Augustus, see *ibid.*, 1:82–84.

1335. Ramsay, *Cities of Paul*, 332–34.

1336. *Ibid.*, 334; tentatively followed by Witherington, *Acts*, 418. Ramsay also argues that Iconium was part of Roman Galatia (*Cities of Paul*, 343), as has been contended more broadly above.

1337. Given his frequent pairing of “Greeks” and “Jews” (Acts 14:1; 18:4; 19:10, 17; 20:21), Luke might use “Greeks” loosely for eastern Mediterranean urban Gentiles (cf. John 7:35; Rom 3:9; 1 Cor 1:22, 24; 10:32; 12:13; Isa 9:12 LXX; Winter, *Left Corinth*, 23). In each instance, however, he probably means Greek-speakers who probably identified themselves as culturally Greek.

1338. On Cybele, see more extensive comment at Acts 14:15.

1339. Ramsay, *Cities of Paul*, 330; on the mother, see further 331.

1340. Mitchell, *Anatolia*, 2:18.

1341. Ramsay, *Cities of Paul*, 330. Mystery connections, more popular in early twentieth-century scholarship, might be overstated, especially with regard to Cybele (see Bøgh, “Kybele”).

The cult of Pluto flourished there (*MAMA* 8.4, 26).¹³⁴² Serpents, which lived in the earth, mediated between divine and mortal realms, offering healing.¹³⁴³

Iconium's civic religion was, however, more Greek than Phrygian, and it was Roman as well; a priest of Tiberius serviced the Roman imperial cult there.¹³⁴⁴ High priesthood in the imperial cult was the city's "most prominent public position."¹³⁴⁵ The Christian message did eventually take firmer root there, and bishops are known starting in the third century (Euseb. *H.E.* 6.19.17–18).¹³⁴⁶

(2) Jewish Opposition (14:2)

Luke speaks of local Jewish people who "disbelieved" (ἀπειθήσαντες); Luke later describes Jewish "disobedience" in another Asian city (Acts 19:9) and often speaks of Jewish communities stirring trouble for Paul among Gentiles (e.g., 14:19; 18:12–13; 19:9). The influence of local Jewish people of Iconium on their fellow inhabitants in the town is not surprising. In contrast to Alexandria, many elites in the empire were sympathetic toward their Jewish populations, including some members of the elite in Rome.¹³⁴⁷ In some locations in Asia Minor, a strong Jewish community with considerable ties to the Gentile elite was apparently able to prevent the early spread of the Christian movement (then a competing form of early Judaism) there.¹³⁴⁸

Judaism was influential in many communities in Asia Minor; when local Jewish leaders in many locations rejected the early Christian message, they understandably felt threatened in their influence and security when many of their Gentile sympathizers (who were less literate in their heritage than most Jews) became followers of the new movement.¹³⁴⁹ Paul's own letters testify that the Jewish Christians' Gentile mission encountered hostility from many other Jews (1 Thess 2:16).¹³⁵⁰

Presumably the larger number of Gentiles who believed (Acts 14:1) were those most closely associated with the synagogue; other Gentiles might well not show interest in such a message and hence might hear only the hostile perspective of Jewish leaders from their own community. Meanwhile, the Jewish people who did not embrace the message may have represented some of the more influential members of the Jewish community (cf. 14:4), the new message proving most appealing to those least satisfied with their social or religious status.

(3) Signs Confirm the Message (14:3)

Jesus commanded his agents to heal the sick when they were proclaiming the nearness of the kingdom (Luke 9:2; 10:9). Luke's Paul and Barnabas have been following

1342. Mitchell, *Anatolia*, 2:28.

1343. Ramsay, *Cities of Paul*, 330.

1344. On the imperial cult in Iconium, see Winter, "Imperial Cult," 94. For the imperial cult in Phrygia, see further *MAMA* 1:xiii (noting 1.19, 23, 24, 24a, 416, 429).

1345. Mitchell, *Anatolia*, 1:116.

1346. Belke, "Iconium," 706. Cf. also the church council in Ramsay, *Discovery*, 56; in the thirteenth century, it is noteworthy as the site of the monastery of the Sufi Rumi (Mevlana), who founded the order known for the Whirling Dervishes (Fant and Reddish, *Sites*, 229–31).

1347. Gager, *Anti-Semitism*, 67–88.

1348. See van der Horst, "Aphrodisias."

1349. See Levinskaya, *Diaspora Setting*, 124–25.

1350. Some scholars wrongly exclude this evidence on content-critical grounds. The claim that these lines in 1 Thessalonians are interpolated (Schmidt, "Linguistic Evidence"; Setzer, *Responses*, 16–19; Bruce, *Thessalonians*, 51), although appealing for our modern sensitivities, is ultimately content criticism, with no textual or other extrinsic corroboration, and only minor deviations from Paul's typical vocabulary (deviations explicable on better grounds; Donfried, "Test Case"; idem, *Thessalonica*, 198–203; Das, *Paul and Jews*, 129–36; Collins, "Integrity"; Gundry, *Matthew*, 609; Witherington, *End*, 101). External evidence elsewhere in early Christian texts, in fact, supports its retention. Evidence of such intra-Jewish conflicts is uncomfortable because it has been exploited in the service of Christian anti-Semitism, but it is the latter's obvious misrepresentation and abuse of the historical data, not the data itself, that we should challenge.

the model found in those instructions (see comment on Acts 13:51). The commentary introduction provides more detailed background for the discussion here.¹³⁵¹

Paul himself mentions that signs were done through him, supporting his evangelizing of Gentiles (Rom 15:18–19) and attesting his apostolic ministry (2 Cor 12:12; cf. Heb 2:4) and, apparently, his gospel (cf. 1 Cor 2:4–5; Gal 3:5). It is interesting that Paul claims to have performed signs in Corinth (2 Cor 12:12), where Luke does *not* record them, which suggests that Luke offers at most a sampling of miracle reports. If such reports in ancient historical documents or occasional letters offend our modern sensibilities, this disconnect reflects our cultural philosophic presuppositions no less than theirs.¹³⁵² Luke's own audience would have had no such reservations, and Paul's audience apparently shared his conviction that they had witnessed these events (2 Cor 12:12; cf. 1 Cor 12:8–10; Gal 3:5). Paul's letters attest that he expected healings and miracles to occur in his churches (1 Cor 12:10, 28–30; cf. Gal 3:5); more to the point, he very likely claims that they occurred in his evangelistic ministry (Rom 15:18–19; 2 Cor 12:12).

The disciples in the Gospel of Luke had to grow in expressing faith for miracles (e.g., Luke 9:40–41).¹³⁵³ It is possible that we can read the narrative in Acts as presenting a progression of faith, moving from prophecy (Acts 13:1) to the blinding of Elymas (13:9–11) to many signs here; Paul's first recorded exorcism is in 16:18, but by 19:11–12, healings and exorcisms occur on a wider scale than in previous reports (and again widely in 28:8–9). It admittedly seems precarious to argue from silence that Paul was not already doing signs in Antioch, but it would suit Luke's linking of signs with evangelism to suggest that Paul experienced them especially on the cutting edge of apostolic ministry.

Although ancients reported some signs prophets or magicians who healed, suppliants most often sought healing at sanctuaries devoted to that purpose.¹³⁵⁴ However the signs may have been sometimes misunderstood in a Hellenistic context (Acts 14:11),¹³⁵⁵ here Jesus's followers perform signs to demonstrate God's reign or kingdom, as in the Gospel. It is possible that Luke emphasizes signs in less-sophisticated areas (the backward interior of Anatolia, here, or among "barbarians" in 28:8–9) and in magic-laden Ephesus (19:11–19), as opposed to prestigious Athens, Corinth, or Rome. Yet despite Luke's emphasis on different information for Corinth, Paul himself believed that miracles occurred through him in Corinth (2 Cor 12:12). Luke's emphasis is probably not that signs occur only among the backward or magically inclined,¹³⁵⁶ but that Paul emphasized intellectual discourse where it would be most effective, yet could combine it with signs where they remained welcome (e.g., 19:9–12).

Here the signs attest specifically the message of God's grace,¹³⁵⁷ just as disciples earlier prayed that God would grant them boldness by performing healings (4:29–

1351. See Keener, *Acts*, 1:320–82, 537–49; in greater detail for some questions, *idem*, *Miracles*.

1352. See Keener, *Acts*, 1:352–54; *idem*, *Miracles*, 200–207.

1353. Some other reports also suggest growth in a signs worker's expectation (Tac. *Hist.* 4.81).

1354. See Keener, *Acts*, 1:326–29; *idem*, *Miracles*, 35–65. On Asclepius as a healing deity or hero, see Guthrie, *Greeks and Gods*, 242–53; for healing cults in Roman Egypt (after the first century), see Frankfurter, *Religion in Egypt*, 46–52 (including discussion of how Christian "saints" later adapted this model, replacing expectations for the priests). See at greater length the commentary introduction, Keener, *Acts*, 1:326–29; *idem*, *Miracles*, 37–42.

1355. For example, in a later text a divine man might perform a sign to demonstrate his identity (Eunapius *Lives* 459).

1356. This would not fit his understanding of the setting in Acts 5:12. Unless one argues that Luke considered every location backward, there is little justification for associating signs with backwardness. If he expected them less in some kinds of sophisticated areas, he does not make this clear; his narration of Paul's stay in Rome is too brief to justify an argument from silence about miracles there (and certainly the epistolary Paul did not shy away from mentioning miracles for hearers there, Rom 15:19).

1357. Cf. Heb 2:3–4, where they attest salvation (I date Hebrews ca. 68 C.E.); Mark 16:20 (which may be dependent on Acts).

30). Their bold speech here is probably thus related to the signs (as in 4:13; though Paul had spoken boldly on other occasions apparently without them [9:27–28; 26:26; 28:31] or perhaps before them [19:8–12]). That the signs and wonders occurred through their “hands” might be simply a Semitism for their instrumentality, but it is probably more, comporting well with Luke’s portrait of many healings accomplished through laying on hands (e.g., 9:12; 28:8; Luke 4:40; 13:13; probably the same in Acts 5:12; 19:11). “Word of grace” could mean a “graciously spoken message” (cf. Luke 4:22) but here probably means the “message about grace” (Acts 20:24, 32).

(4) *Division concerning the “Apostles” (14:4)*

The message of grace brings division (cf. 23:7, employing ἐσχίσθη, as here; the family division of Luke 12:51–53), here between the local Jewish community’s side and the apostolic side.¹³⁵⁸ The πλῆθος in Acts 14:1 referred to Jewish and Gentile believers but in 14:4 must bear a different sense, perhaps referring to all the people or to the “popular assembly.”¹³⁵⁹ The term expressing schism, σχίζω, was a common one in political and social bodies, normally used negatively.¹³⁶⁰ The summary of conflicting views resembles other such summaries in ancient literature,¹³⁶¹ including those describing genuine historical conflicts.¹³⁶² Thus, for example, Pliny the Younger reports a division in Rome between two opinions (which he then details, *Ep.* 5.9.6). By itself, however, the division could refer to serious discussion rather than threats of violence;¹³⁶³ it is Acts 14:5 that reveals that more is at stake. Luke’s only other relevant use of the verb (23:7) also becomes potentially violent (23:9–10).

Despite the persecution of 14:5, “the apostles” had significant support here. The Christian movement spread from Iconium, which grew into one of the most influential seats of Christianity in Asia Minor (especially in proportion to its size).¹³⁶⁴

Luke restricts the term “apostles” almost always to the Twelve, making exceptions only in 14:4, 14. One common theory is that Luke simply reproduces a source here,¹³⁶⁵ but Luke’s overall literary artistry renders this suggestion dubious (just as it is doubtful that Luke preserved a prior “we” in his narrative that did not include himself; see comment on Acts 16:10). Barrett summarizes and evaluates several views of the term’s meaning here:¹³⁶⁶

1. Luke was simply careless (Barrett views this as unlikely).
2. Luke knew better than to call Paul an apostle but respected him so much that he allowed the title to slip once.
3. The term applies not to Paul and Barnabas but to their message from the apostles (Barrett rightly notes that this is not what the text says).

1358. After noting the division, Luke specifies it; a different rhetorical form would link both groups with a common verb, then differentiate them (cf. Anderson, *Glossary*, 49–50). Lists of crowd responses were common (e.g., the responses, most—but not all—negative, to Diogenes in Dio Chrys. *Or.* 9.8–9).

1359. For the latter, see Johnson, *Acts*, 247 (citing Plato *Apol.* 31C).

1360. See Mitchell, *Rhetoric of Reconciliation*, 70–73.

1361. Cf., e.g., Terence *Andr.* 1–27; *Self-T.* 16–52; *Eun.* 1–45; *Phorm.* 1–23; *Moth.* 1–57; *Brothers* 1–25; Phaedrus 2.9.7–11; 3.prol. 23; 4.prol. 15–16; Lucian *Lucius* 54.

1362. Cf. Appian *Hist. rom.* 3.7.3; 7.5.28; 8.10.68; *Bell. civ.* 1.intro. 1; 4.8.64; Aul. Gel. 6.19.6; 17.4.3–6; Corn. Nep. 7 (Alcibiades), 4.1–2; 25 (Atticus), 7.1–11.6; Tac. *Ann.* 4.49–50; Hdn. 4.3.2, 5; or conflicting advice in Tac. *Ann.* 2.76–77; 16.25–26.

1363. Cf., e.g., Pliny *Ep.* 8.18.3; Tac. *Ann.* 3.23.

1364. Ramsay, *Cities of Paul*, 370.

1365. E.g., Gerhardsson, *Memory*, 220. Interestingly, Barnabas is named before Paul in Acts only at 14:12, 14 (although, before Luke began calling Saul “Paul,” Barnabas was always mentioned first).

1366. Barrett, *Acts*, 671–72.

4. They were simply apostles of the church of Antioch (13:1–3), and after this chapter, Paul is no longer an apostle of that church.

Barrett favors the fourth option if any,¹³⁶⁷ but I find it unlikely. To argue for it, one must import a secondary Pauline sense (2 Cor 8:23; Phil 2:25) against both the Lukan sense elsewhere and even the usual Pauline sense. (An appeal to this infrequent Pauline usage is especially strange because Paul elsewhere calls both himself and probably Barnabas [1 Cor 9:5–6] apostles.) If the Antioch church “sent” them out (Acts 13:3), so did the Holy Spirit (13:4, though neither verse employs ἀποστέλλω). And if Paul was sent by the Antioch church, was he not also sent in 15:2, 22 and especially 15:40, which does not employ the term? The sole semantic clue provided by Luke to the meaning here is the meaning he attributes to “apostle” elsewhere. Though Luke normally uses the term only for the Twelve, perhaps for consistency, he cannot but know the common Pauline usage, and it is difficult to imagine that he opposed theologically his mentor’s self-claim.¹³⁶⁸ He can thus use it the way he might imply it for the Seventy, who were also “sent” (Luke 10:1); he applies the verb cognate to Paul himself in Acts 22:21; 26:17.¹³⁶⁹ The Twelve were “witnesses,” but the term also extends beyond them because they ultimately perform this function paradigmatically, and further examples in this role demonstrate that the paradigm should continue to be observed among Luke’s audience (see comment on “witness” in Acts 1:8). The use of the term “apostles” here probably reminds Luke’s audience that these were God’s commissioned agents analogous to the Twelve (cf. Luke 11:49), an idea well suited to the way Luke parallels various characters.

Most scholars believe that Barnabas is also an apostle in Paul’s writings (1 Cor 9:2, 6),¹³⁷⁰ though Paul employs the title more broadly than Luke—for himself (often, e.g., Rom 1:1; 11:13), for James the Lord’s brother (Gal 1:19), probably for his traveling companions on a later journey (1 Thess 2:7, if the plural is meant with its usual force, including Silas and Timothy), and for others (Rom 16:7; 1 Cor 15:7).¹³⁷¹

1367. Dunn, *Acts*, 188; idem, *Romans*, 895; Talbert, *Acts*, 17; and Stuhlmacher, *Romans*, 21–22, likewise argue for a lesser apostleship than the Twelve here. Linking the title with those who saw the risen Lord (1 Cor 9:1, which accumulates, not coordinates) would probably exclude both Barnabas (Gal 2:9; 1 Cor 9:5–6) and Silvanus (1 Thess 2:6–7), since they were apparently from Jerusalem whereas most of Jesus’s first followers who saw him after the resurrection were Galilean.

1368. Some did in fact question Paul’s apostleship (1 Cor 9:2; Gal 1:1; Meeks, *Urban Christians*, 131; Stuhlmacher, *Romans*, 21; on early competition for the title, see esp. Taylor, “Identity,” 122–23), but these critics were often hostile to Paul. They would be the antithesis of a writer such as Luke, who if anything tends to idealize Paul as a hero. Further, Paul’s application beyond the Twelve extends to others besides himself. Very possibly they could receive the title “apostles” only once they began working miracles (cf. 2 Cor 12:12; Mark 6:7, 30; Luke 9:1–2, 10), which (apart from one judgment in Acts 13:9–11) are reported of Paul and Barnabas first in 14:3, the verse before the “apostles” title. (Unless Luke presupposes Mark 6:7, 30, however, it is not clear in Luke 6:13.) Or perhaps Luke’s apologetic responds to those still denying Paul’s apostleship, and Luke prefers to focus on his innocence rather than his title.

1369. See Witherington, *Acts*, 420. Verb cognates do not always share a sense cognate with the nouns, but a relationship is frequent enough that in the absence of closer conflicting evidence, we should take them into account. Neither should we suppose that Luke implies that Barnabas was at least one of the seventy(-two) (Luke 10:1); as a Diaspora Jew of means, he was surely living in Jerusalem (Acts 4:36–37) and not one of Jesus’s original Galilean followers.

1370. Cf., e.g., Pesch, *Apostelgeschichte*, 2:59.

1371. Scholars who want to limit the use of “apostle” to the Twelve ignore Pauline use for Luke’s; those who wish to limit it to “the Twelve plus Paul” confuse the categories entirely. Those who wish to limit the usage to church planters draw only on Paul’s model (contrast James, Gal 1:19); what the Twelve and Paul share in common is distinctive authority as God’s special agents. Even as late as Ephesians, the church’s “apostolic foundation” (cf. Eph 2:20) hardly implies that apostles are not needed afterward (see Eph 4:11–13).

II. PERSECUTION AND FLIGHT (14:5–7)

Paul and Barnabas were ready for a divided city, but stoning (Acts 14:5) was normally intended to be fatal (cf. 14:19), not merely divisive. Thus the time was appropriate to move on to another town needing the gospel, as Jesus had commanded his agents (Luke 10:10–11).

(1) *Persecuting the Apostles (14:5)*

The antipathy of Iconium apparently remained (Acts 14:19), and so did the memory of Paul's sufferings there (2 Tim 3:11). Luke reports Paul's adventures in lively style, but he does not invent them. Luke's accounts of persecution in Asia Minor are plausible; later sources confirm that at least sporadic, local persecution continued to be the experience of many Diaspora churches in Asia Minor for many decades following (1 Pet 4:12–19; Rev 2:10; 3:8–10; Pliny *Ep.* 10.96; *Mart. Pol.* 1.1–2.1).

More important, we have undisputed eyewitness corroboration of such persecution in Paul's ministry. Lest we suppose Luke's narratives too dramatic, we should note that Paul records sufferings far more extensive in his own writings (1 Cor 4:9–13; 2 Cor 1:4–10; 4:8–12; 6:4–10; 11:23–28), including far more beatings and shipwrecks than Acts records (2 Cor 11:23–25).¹³⁷² (In view of Paul's tribulation lists,¹³⁷³ Luke does not exaggerate Paul's sufferings in Acts; if anything, he plays them down.¹³⁷⁴ Most likely they fall under his summarizing axe like other historical information he includes in the monograph, allowing only representative samples.) Paul attests that he faced dangers both from his fellow Jews¹³⁷⁵ and from Gentiles (2 Cor 11:26 mentions both). In addition to being beaten more times than Acts records (11:23), facing dangerous persecution regularly (1 Cor 15:30–32), and often being in danger of dying (2 Cor 11:23),¹³⁷⁶ Paul was hardly unfamiliar with the danger of stoning; he explicitly notes that he was once stoned (11:25; see discussion on Acts 14:19, below).

This is not the first unsuccessful attempt to kill Paul (Acts 9:23–25, 29–30); even though Luke's audience probably knows of his martyrdom, they also learn that God protected him many times before allowing his death. Stoning was common behavior for mobs, but it was also the appropriate punishment for blasphemy (Lev 24:16; see comment on Acts 7:58–59); note the more successful attempt in Acts 14:19. By contrast, those who saw Paul and Barnabas as God's agents would view persecution of them as criminally impious.¹³⁷⁷

1372. Paul's "brand marks of Jesus" (Gal 6:17) probably also implies that the beatings left marks (with Ramsay, *Galatians*, 472; Ridderbos, *Galatia*, 228; though others take them solely figuratively [Betz, *Galatia*, 324]). Cf. further his theology of apostolic "tribulation," in the comment below on Acts 14:22.

1373. Paul may schematize his sufferings even more than Luke does, especially in his tribulation lists; cf. Socratic labors (echoing Heracles's labors; Alexander, "Biography," 59–60, citing Sen. *Y. Ep. Lucil.* 104.27–33); especially philosophers' *peristasis* catalogues (see esp. and most fully Fitzgerald, *Cracks*, 49, 59–70), though these were not limited to philosophers (Danker, "Debt," 265, citing, e.g., Polyb. 4.45; 2 Macc 4:16).

1374. So Hemer, *Acts in History*, 184.

1375. Cf. also for Judea 1 Thess 2:14–16, Rom 15:31, and Gal 6:12 (but this last text probably represents Paul's Christian opponents' non-Christian peers in Jerusalem, not in Asia Minor). Luke emphasizes local Jewish opposition in each location where he finds it, whereas Paul summarizes more the widespread unbelief of his people (Rom 9:3–6; 9:27–10:3; 10:19–21; 11:7–32).

1376. Second Timothy 3:12 presents persecution as normal for believers in Jesus (cf. Acts 14:22). Those who think Paul's or Luke's descriptions exaggerations because they doubt the reality of such beatings fallaciously read their own limited cultural experience of toleration into other societies. I know African evangelists who were regularly beaten for their testimony; indeed, in earlier years, I myself suffered three beatings (and some death threats) for my testimony even in North America, and know of others who shared the same.

1377. For the impiety of slaying even enemy envoys, see, e.g., Xen. *Anab.* 5.7.18–19 (leading to trial even by one's own people, 5.7.34); Ps.-Callisth. *Alex.* 1.35, 37; cf. Polyb. 15.2; Appian *Hist. rom.* 3.6.1–2; 3.7.2–3; 4.11; 8.8.53; see more fully Keener, *John*, 313–14.

“Their rulers” could refer to those of the immediate antecedent, the Jews (cf. Luke 8:41; 14:1; 18:18; 23:13, 35; 24:20; Acts 3:17; 4:8; 13:27; 23:5), or to those of “the Gentiles and the Jews,” thus including civic authorities as well as the high-status synagogue leadership (cf. Acts 4:26; 16:19).¹³⁷⁸ A city’s magistrates were authorized to take whatever action was necessary to quell disturbances and safeguard people.¹³⁷⁹ The τε καί here might be construed as favoring the view that “with the authorities” applies only to the Jewish leaders; civic leaders would be in charge of expulsion from the city but would not normally sanction a mob stoning, especially if the city already had some special privileges (whether as a Roman colony or as a town of high enough status to become a colony over the next century). Then again, “normal” behavior is often contravened in urgent situations.

The term ὀρμή indicates an impulse, strong desire, or beginning action to achieve something, often exceeding mere desire (cf. Jas 3:4).¹³⁸⁰ The term used here for mistreatment (ὕβριζω; also Luke 11:45; 18:32)¹³⁸¹ implies no mild insult,¹³⁸² the sort of experience that Paul is known to have resented (1 Thess 2:2, on his mistreatment in Philippi; see comment on Acts 16:22–23). Thus those who insulted tribunes could be killed during the republic (Dion. Hal. *Ant. rom.* 10.35.3), and scandalizing even a peer warranted monetary penalties set by a court (P.Hal. 1.210–13). The term ὕβριζω applies to moral outrage, even of a deity, in Eurip. *Tro.* 69. The stoning failed here, but Paul’s enemies were able to catch up with him in Lystra and stone him there (Acts 14:19).

(2) *Fleeing Iconium (14:6)*

The model of fleeing appears elsewhere (9:24–25; cf. 17:10; 20:3) and might even stem from Jesus tradition (if Matt 10:23 reflects Q or another source), though if Luke has access to the tradition, he omits the opportunity to repeat it in his Gospel. (It could derive from pre-Markan eschatological material; cf. *m. Soṭah* 9:15 and sources in my Matthew commentary loc. cit.) We should not suppose that Luke compares Paul unfavorably with Peter, who did not flee the priestly authorities in Acts 4–5; in the face of potentially deadly persecution in which political authorities targeted him, even Peter left for a time (12:17).

How would Luke’s audience evaluate flight? Josephus at one point claims that he considered it undignified to flee (*Life* 146)—though he fled and even surrendered on other occasions. Fleeing in battle epitomized cowardice.¹³⁸³ Lucian mocks a philosopher who fled a hostile mob (*Peregr.* 19) and later had to defend himself for this action (*Peregr.* 20). Many, however, regarded flight as common sense under some circumstances and not an act of cowardice.¹³⁸⁴ Those who preferred death to denying their faith might nevertheless seek to escape persecution by other means.¹³⁸⁵ In

1378. Bruce, *Acts*¹, 278, favors rulers of both Gentiles and Jews here.

1379. Ramsay, *Cities of Paul*, 372.

1380. See Matheson, *Epictetus*, 31; Lake and Cadbury, *Commentary*, 162; BDAG. Luke might think of the verb cognate in Acts 7:57, but its sense differs from the noun. Philosophers spoke of restraining the ὀρμαί (Arius Did. *Epit.* 2.7.5b.2, pp. 14–15.6).

1381. Elsewhere in the NT, only at Matt 22:6; 1 Thess 2:2. Cf. the relevant use of cognates in 2 Cor 12:10.

1382. Cf., e.g., the hostile behavior in Aeschines *Tim.* 16; Demosth. *Aristocr.* 141; Polyb. 1.69.5; 6.7.5; Diod. Sic. 36.15.1–2; Mus. Ruf. 10, p. 78.23; Appian *Hist. rom.* 2.8.2; Epict. *Diatr.* 2.17.20; Diogenes *Ep.* 20; Arius Did. *Epit.* 2.7.10e, pp. 62–63.18; 2.7.11m, pp. 92–93.5–6, 9.

1383. E.g., Thucyd. 2.42.4; Lysias *Or.* 14.5–6, §140; Polyb. 1.17; 6.24.9; Dion. Hal. *Ant. rom.* 6.9.4; Vell. Paterc. 2.85.3–5; 2.119.4; Quint. *Decl.* 287 intro; 315 intro; 375 intro; Libanius *Descr.* 1.7; Quint. Curt. 3.8.7; Sil. It. 10.7; Plut. *Luc.* 15.7; Suet. *Jul.* 60, 62, 67; Max. Tyre 3.8; 15.10; 33.3; Ps.-Callisth. *Alex.* 2.9.

1384. E.g., Iambl. *V.P.* 31.190; y. *Abod. Zar.* 5:4, §3 (a story concerning R. Ishmael in Samaria). Flight that abandoned loyalties, however, was dishonorable, as in Mark 14:50 (with casting off a cloak in 14:52, cf. Lysias *Or.* 3.12, §97).

1385. *Gen. Rab.* 82:8 (a story about two disciples who disguised themselves during Hadrian’s persecution).

the early second century, Ignatius longed for martyrdom,¹³⁸⁶ an ideology that grew in time. But some who volunteered to suffer changed their minds when they saw the suffering, and early Christians warned against *seeking* suffering (*Mart. Pol.* 4.1). Even Stoics opined that one should not seek or desire suffering though one should endure it if it comes (*Sen. Y. Ep. Lucil.* 67.3–4). Wandering itself, however, was counted a form of suffering.¹³⁸⁷

The trip was likely not pleasant. Most of the Lycaonian plateaus were cold, poorly watered, and devoid of trees, though they did have sufficient water and vegetation to sustain sheep (Strabo 12.6.1). This was thus not a particularly prosperous region, in contrast to Iconium (cf. comment on Acts 13:51). Paul and Barnabas were likely able at least to travel the paved Via Sebaste on the way.¹³⁸⁸ (A northward journey would have made little sense, since there would be few possible evangelistic goals there; in the mid-first century, very few towns larger than small villages existed between Iconium and Ancyra.)¹³⁸⁹

(3) *Lycaonia and Lystra (14:6–7)*

Some classicists argue that Iconium was technically part of Isaurian territory in this period (see discussion at Acts 13:51); in this case the flight to Lycaonia meant entering a different political district (though both were part of the Galatian province), which moved them into a new jurisdiction and away from false charges—at least until they were followed (Acts 14:19). Whereas Phrygian names were common in Iconium, they were rare in Lystra, perhaps supporting here “a passage across a linguistic and administrative boundary from Phrygia [in a narrower sense] to Lycaonia.”¹³⁹⁰ (On Lycaonia, see further discussion at Acts 13:51.) The flight to Lystra and Derbe summarizes the next section; for more detail on out-of-the-way Derbe, see comment on Acts 14:20.

Antioch, Iconium, and Lystra likewise appear together in 2 Tim 3:11, which also mentions Paul's persecution at these locations; for the historical likelihood of their connection in Paul's ministry as portrayed in Acts, see comment on Acts 13:51. Lystra (at the mound called Zoldera Höyük, about a mile north of modern Hatunsaray) was about twenty to twenty-five miles (some 32–40 km.) south-southwest of Iconium.¹³⁹¹ It was closer than Derbe, but the “surrounding region” was only sparsely settled.¹³⁹² If villages once existed in the vicinity, we would not likely know it today, but it is also possible that Paul and Barnabas simply spoke to people along the roads to Lystra and then Derbe.

The Romans planted Lystra here to guard the highway (the Via Sebaste).¹³⁹³ In contrast to some of the countryside, its location on the way from Laranda to Iconium

1386. E.g., Ign. *Trall.* 10.1; *Rom.* 3–8 passim, e.g., 4.1–2; 5.2–3.

1387. E.g., homelessness as the hardest of sufferings in Hom. *Od.* 15.343; being driven from place to place as judgment in *Song Rab.* 6:10, §1.

1388. See French, “Roads,” 53; Hansen, “Galatia,” 385; Riesner, *Early Period*, 277; for fuller discussion, see comment on Acts 13:51.

1389. Mitchell, *Anatolia*, 1:96 (though, as stated earlier, by the end of the first century, towns were growing there).

1390. Hemer, *Acts in History*, 228–30 (quote, 228). Lystra shared the broader Phrygian culture but was also distinct.

1391. Fant and Reddish, *Sites*, 243; Finegan, *Apostles*, 92; Mitchell, *Anatolia*, map 5, after 1:78; map 6, after 1:99. Wilson estimates 21 mi. (34 km.; personal correspondence, Nov. 25, 2011). Roads would have permitted them to travel alternatively a greater distance east and then south toward Tarsus (map in Rathmann, “Roads,” 642).

1392. Dunn, *Acts*, 188–89.

1393. Levick, *Roman Colonies*, 52. If it existed before Augustus made it a colony, it does not seem to have issued its own coins and hence must have been small (154). On Lystra, see further Potter, “Lystra”; Breytenbach,

allowed it to thrive as a market town.¹³⁹⁴ Lystra itself stood on a small hill distinct from the surrounding plain, but its surrounding countryside is not flat either; to its north (from which the apostles approach) is hill country, and to its west (across the Via Sebaste) a high ridge obstructs vision.¹³⁹⁵ Lystra's mound covers only about sixteen acres, but this represents only the town's acropolis; a slope "down to a small stream" on its west contains fragmentary remains of ancient Lystra's buildings.¹³⁹⁶ We cannot easily estimate the size of the *territorium* it controlled; it had few other competitors for the land, but given its size, it may not have needed a large *territorium*.¹³⁹⁷ Among colonies, it is smaller than Antioch, Cremna, and Olbasa and has less area but more "vigour" than Comama; Levick suggests that it began with about a thousand colonists.¹³⁹⁸

Coins reveal that Augustus made Lystra a Roman colony,¹³⁹⁹ as does a statue at Pisidian Antioch honoring that city and dedicated by "*colonia Lystra*." Lystra's title was Colonia Julia Felix Gemina Lustra.¹⁴⁰⁰ Lystra's inscriptions pair it with Pisidian Antioch as a sister colony instead of linking Lystra with the Greek cities closer by.¹⁴⁰¹ Thirty-five of Lystra's 107 inscriptions are in Latin, although not always good Latin; that all these are from Lystra proper or one nearby village suggests some discontinuity with the countryside, which yields only Greek and many local names.¹⁴⁰² Yet Lystra does not seem to have taken as much interest in its colonial status as did Antioch (which included both Italian and local elements) or Iconium (which may have been still seeking to achieve colonial status).¹⁴⁰³ It also had a more prominent native element than Antioch.¹⁴⁰⁴

Paul's focus on Roman colonies where available suggests (probably on the historical level behind Luke's report, since he does not avail himself of the opportunity to emphasize this) that the Roman citizen Paul recognizes already the strategic importance of reaching Rome itself (Rom 15:20–23). Lystra, like Antioch and Iconium, belonged to the Roman province of Galatia in this period,¹⁴⁰⁵ and hence its church could be among those addressed in Paul's letter to the Galatians (see discussion on South Galatia at Acts 14:1–7). Still, many traditional customs remained throughout the larger region. Some cultural continuity existed in Lycaonia from Hittite culture in the second millennium B.C.E. to the early Christian period.¹⁴⁰⁶

Provinz, 164–65; Schnabel, *Mission*, 1112–13; Blaiklock, *Cities*, 31–34; Fant and Reddish, *Sites*, 240–43. The site has not been excavated, but it was identified by a monument discovered there in 1885 (*ibid.*, 243).

1394. Levick, *Roman Colonies*, 154.

1395. *Ibid.*, 51.

1396. *Ibid.*, 51–52.

1397. *Ibid.*, 52–53. The land of the plain was useful for agriculture and readily divided for colonial allotments (Mitchell, *Anatolia*, 1:77).

1398. Levick, *Roman Colonies*, 94.

1399. The precise date is debated; for 25 B.C.E., see *ibid.*, 195–97.

1400. See Lake and Cadbury, *Commentary*, 162; Conzelmann, *Acts*, 108; cf. Levick, *Roman Colonies*, 29–41.

1401. Ramsay, *Galatians*, 224; also Mitchell, *Anatolia*, 1:76 (though warning that their sisterhood says nothing about a common foundation date; they were not "twins").

1402. Levick, *Roman Colonies*, 154.

1403. Only one-sixth of the types of coins found there are "Roman in character" (*ibid.*, 197).

1404. Mitchell, *Anatolia*, 2:11.

1405. *Ibid.*, map 6, 1:99; 2:155; also most commentators (e.g., D. Williams, *Acts*, 247–48); see discussion on South Galatia at Acts 14:1–7. In the second century, Lycaonia was detached and united with Paul's home province of Cilicia (Mitchell, *Anatolia*, 2:155; Levick, *Roman Colonies*, 168–69). Eventually, in 370, it became part of the new province of Lycaonia (Belke, "Lystra," 48).

1406. See Lebrun, "Asianisme." The indigenes "spoke a form of Luwian" (Belke, "Lycaonia," 910). Apparently, Hittite fertility deities also persisted, mixed with Zeus cults (Parsons, *Acts*, 201, following Breytenbach, *Provinz*, 69–73).

c. Rejecting Deification in Lystra (14:8–20a)

If response to the apostles' message was mixed in Iconium (Acts 14:1–7), it proves still more ironic in Lystra. After Jesus's message heals a permanently disabled man (14:8–10), the crowds attempt to venerate the apostles (14:11–13); after the apostles reject such veneration (14:14–18), Jewish opponents have them stoned—for blasphemy (14:19–20a).¹⁴⁰⁷ Preaching the good news is central in the narrative.¹⁴⁰⁸

I. THE HEALING (14:8–10)

Paul's first described healing (though not his first described miracle [see 13:11] or his first mentioned healing [implied in 14:3]) closely parallels Peter's first. This connection fits Luke's pattern of paralleling Peter and Paul where he is able to do so:¹⁴⁰⁹

Peter's First Healing (3:6–8)	Paul's First Healing (14:8–10)
Lame from birth (3:2)	Lame from birth (14:8)
Peter "gazes intently" at the man needing healing (3:4)	Paul "gazes intently" at the man needing healing (14:9)
Once healed, the man leaps and walks (3:8)	Once healed, the man leaps and walks (14:10)
Near temple gates (3:2)	Near temple and gates (14:13)
Through faith (3:16)	Through faith (14:9)
Human "adulation" rejected (3:12)	Human "adulation" rejected (14:15)

Some points of comparison (especially the temple gates) appear weak, but most are strong and clear.

Luke elsewhere notes those unable to walk (Luke 14:13, 21), especially with regard to their healings (5:24; 7:22; Acts 3:2; 8:7).¹⁴¹⁰ This interest contrasts with a practice found in the larger Roman world: Roman fathers sometimes left disabled babies on the ground, to be discarded on piles of trash or dung.¹⁴¹¹ (By contrast, Jewish fathers disapproved of infant exposure [thus Acts 3:2].)¹⁴¹² The man lame from birth here presumably either had a merciful father or nothing visibly wrong with his legs at birth. Those with disabilities faced many prejudices.¹⁴¹³

Healing is a pervasive Lukan emphasis related to the spreading good news of the kingdom. Faith for healing (14:9) appears elsewhere in Luke-Acts (Luke 7:9–10, 50; 8:48, 50; 17:19; 18:42) and the Jesus tradition (cf., e.g., Mark 5:34, 36; 9:23; 10:52; 11:22–24; John 4:50; 11:40); it also appears in the parallel in Acts 3:16.¹⁴¹⁴

1407. Dionne, "Épisode," divides Acts 14:7–20 into a five-part schema yet views this unit as a cohesive narrative unity. This account is as full of colorful detail as the account of Iconium is sparse (Marshall, *Acts*, 235, complains that Haenchen criticizes each for the opposite reason).

1408. With Fournier, *Episode*, 80.

1409. Following here Spencer, *Acts*, 149; the parallels are also noted by others (see Witherington, *Acts*, 422–23; Green, "Acts," 753; recently, see esp. Fournier, *Episode*, 199–203). Suggested denials of the deliberate nature of the parallel (e.g., Munck, *Acts*, 131) are not convincing (Williams, *Miracle Stories*, 175–76, is much more convincing, but because he is denying additional parallels, not those particular to these two stories). Ancient interpreters also noticed the parallel (Bede *Comm. Acts* 14.8 [Martin, *Acts*, 175], allegorizing the first man as representing salvation for the Jewish people, and the second as salvation for the Gentiles).

1410. Parsons, *Acts*, 198, points out that Luke employs three similar phrases (using *interpretatio*, i.e., synonymia; *Rhet. Her.* 4.28.38) to underline the desperation of the man's situation. Roth, *Blind, Lame, Poor*, 107–8, treats the lame as a character type in the LXX.

1411. See Stamps, "Children," 197–98. Deformed babies could even be killed (see comment on Acts 3:2; 7:19).

1412. See comment on Acts 3:2; 7:19.

1413. For this and other information about disabilities in antiquity, see further de Libero, "Disability"; comment on Acts 3:2.

1414. The Greek associates faith with wholeness, or "salvation" (σωτηρία) as broadly expressed, as also in Luke 7:50; 8:48, 50; 17:19; 18:42; this offered a natural transition from physical to national and spiritual

(This is not to suggest that Luke or the gospel tradition associates healing only with faith.)¹⁴¹⁵

The apparent plural of the dative for Lystra in 14:8 (also 16:2; contrast the accusative singular in 14:6, 21; 16:1) seems strange, but it also appears in 2 Tim 3:11 and possibly (though not certainly) in some Latin documents; the title may thus be heteroclitic.¹⁴¹⁶ Although this is the only NT example with this sense, ἀδύνατος can refer to physical powerlessness elsewhere.¹⁴¹⁷

One could turn from addressing a crowd (Acts 14:9) to addressing an individual (14:10) or group (sometimes hypothetical) for rhetorical effect,¹⁴¹⁸ but Paul's action here is no mere rhetorical device. Paul's ability to discern faith here (14:9) might be viewed as an excellent teacher's insight, but more likely it is viewed (especially given Luke's emphasis) as supernatural.¹⁴¹⁹ Libanius allegedly recognized each person's character and moral inclinations when he saw them, enabling him to teach pupils well (Eunapius *Lives* 495); closer to our period, the same ability seems attributed in a more natural way to Musonius Rufus (frg. 48, p. 140.17–19). Rabbis occasionally spoke of prophetic discernment,¹⁴²⁰ sometimes even including a rare “charismatic” sage's confidence based on whether his prayer came fluently (*m. Ber.* 5:5). On faith for healing, see comments above.

On Luke's frequent use of “loud voice,” see comment on Acts 7:57. Healing by command also occurs in Acts 3:6, although there Peter helped the man up (3:7). Here, as in the account in 3:8, the man who is healed “leaps” (though here it is said only that he leaps up to walk, whereas there he both leaped up to walk and continued leaping as well as walking). In both texts, Luke's choice of the term “leap” suggests an allusion to Isa 35:6, the text alluded to in Luke 7:22.

Excursus: Paul as a Cynic Preacher?

One of the more controversial elements that occasionally appear in Luke's portrayal of Paul's ministry in Acts is Paul's occasional public preaching in a manner similar to Cynics.¹⁴²¹ Some suggest that Luke merely created this image of Paul to conform him to a popular philosophic model. Yet as we shall see, the model was not restricted to

restoration in Acts 4:9–12 (cf. the “soteriological” usage in Luke 8:12; Acts 15:11; 16:31). The context may also suggest a connection here (see Fournier, *Episode*, 82).

1415. Miracles can occur despite some participants' lack of faith (Matt 8:26; 14:17, 26; 16:8–10; Mark 4:40; 6:49; 8:4, 17–21; 9:24, 26; Luke 2:9; 5:4–9; 8:25; 11:14–15; esp. Luke 1:20; cf. Luke 10:18). The disciples themselves are often the ones chided for their little faith (Mark 4:40; Luke 8:25; 12:28; cf. Luke 17:5), albeit esp. in Matthew (Matt 6:30; 8:26; 14:31; 16:8; 17:20). See further discussion in Keener, *Miracles*, 634.

1416. Hemer, *Acts in History*, 110 (citing MAMA 8.5, first century C.E.; 8.8, a third-century milestone; but admitting that the reconstruction is questionable).

1417. See Libero, “Disability,” 534. Hobart, *Medical Language*, 46, notes its occurrence in the medical literature, also comparing parallels for ὀρθός in Acts 14:10 (cf. Heb 12:13).

1418. E.g., Libanius *Declam.* 36.22–23; i.e., “apostrophe,” in, e.g., *Rhet. Her.* 4.15.22; Rowe, “Style,” 139 (citing Rom 2:1; Tert. *Mart.* 1); Porter, “Paul and Letters,” 581; Anderson, *Glossary*, 25 (citing Quint. *Inst.* 4.1.63–69; 4.2.103, 106–7; 6.1.3; 9.2.38; 9.3.24–26; and other sources).

1419. Strelan, “Recognizing,” argues for other signs to the Lystrans of the apostles' “divinity” here besides the miracle (though by themselves they may not have persuaded); on the gaze, see also Strelan, “Stares”; idem, *Strange Acts*, 127 (viewing it as displaying special power); comment on Acts 3:4. Parsons, *Acts*, 198–99, follows this background of the “divine,” unblinking gaze and gods' loud voices.

1420. Cf. *t. Pisha* 2:15; *Mek. Shir.* 7.17–18 (Lauterbach, 2:55); *b. Ber.* 31b.

1421. For Paul's fitting the ancient typology for a “wandering preacher,” see Liefeld, “Preacher,” 146–51. On Cynics, see further Desmond, *Cynics*; Klauck, *Context*, 377–85.

the Cynics, and Paul's own writings indicate his own use of a Cynic model at times. Once the paucity of our concrete evidence, on the one hand, and Luke's literary freedom as a historian, on the other, are taken into account, the supposed conflict between Luke and the epistolary Paul (mainly an argument from silence in the latter) appears far less clear.

1. Luke versus Paul on Public Preaching?

The emphasis of a "Cynic model" of open-air preaching has been exaggerated for Acts. Luke himself provides only four examples of Paul's "open-air" preaching, in three cities (Acts 14:8–10; 16:13; 17:17, 22–31).¹⁴²² Of these, one is a Sabbath gathering in which Paul would be naturally welcomed to speak as at a synagogue (16:13); another, a trial speech invited by local educators after initially hearing him (17:22–31), was a conventional way of introducing sophists in new cities. Acts does not emphasize the sophistic portrait as much as some have charged, and the apparent absence or rareness of this portrait in the epistles can be readily explained by their different focus and the fact that even Acts does not present this as Paul's usual method.

The proposed conflict rests on evidence that is better understood as reflecting the different genres and agendas of the two corpora. Luke focuses on the founding of churches and Paul on their continuing growth. We may illustrate this by responding to the arguments of two scholars. Meeks rightly points out that Acts sometimes portrays Paul and his companions as resembling the most successful "traveling sophists or philosophers," complete "with a retinue and rich patrons."¹⁴²³ By contrast, Paul's epistles, though not completely different from Acts, emphasize "the natural networks of relationship in each city and between cities."¹⁴²⁴

This contrast, however, may simply highlight the different agendas of Acts and the epistles: the former focuses on Paul's founding of churches, the latter on the spread of the movement after the initial contacts had been made. Before the church could grow along the lines of natural social networks, Paul needed to establish some contacts and gain a hearing. This he must have often done as Acts suggests, like a visiting synagogue lecturer (see the comment on Acts 13:5, where I have already argued this point) or a traveling sophist; 1 Cor 2:1 speaks of Paul's beginning in Corinth the way sophists often began, although it emphasizes the contrasts between Paul's focus and that of the sophists.¹⁴²⁵

Stowers objects that Paul's letters, as well as Acts when the uniquely Lukan elements are removed, reveal Paul starting as a teacher in private homes, and he notes that only those with recognized status in the Roman world would have access to public buildings.¹⁴²⁶ But that Paul moved quickly to private homes does not mean

1422. Liefeld, "Preacher," 202; Malherbe, *Moral Exhortation*, 23. Although Acts presents Paul as preaching openly earlier as well as later in his ministry and in synagogues throughout, both Acts (esp. Acts 19:9) and Paul's letters (esp. 1–2 Corinthians and Philipians, but even 1 Thessalonians, his earliest letter; even more if we accept, as I do, Ephesians and Colossians) testify that Paul grew quickly conversant with Greco-Roman sophistic or sage models (Judge, "Scholastic Community," 126–28, even argues for a progression in Acts).

1423. Meeks, *Urban Christians*, 28.

1424. *Ibid.*

1425. See Winter, *Left Corinth*, 36–37. Philosophers offered the same contrast at sophists' expense (e.g., Plato *Theaet.* 164CD; *Apol.* 38D–39B; Plato *Hippias major*; Xen. *Mem.* 4.3.1; Val. Max. 3.4.ext. 1; Sen. Y. *Ep. Lucil.* 20.2; 40.4; 86.16; 100.1; 108.12, 23, 38; 115.1–2; Mus. Ruf. 8, pp. 62.40–64.4; Marc. Aur. 1.7; 1.16.4; 1.17.8; Anacharsis *Ep.* 1; Porph. *Marc.* 17.284–85; Philo *Creation* 45; cf. Keener, *Corinthians*, 36).

1426. Stowers, "Status, Speaking, and Teaching." Cf. Witherington, *Corinthians*, 246, who doubts that Paul would have preferred street corner preaching to the domestic locus of intellectual activity.

that he always started there. Where did he obtain his initial contacts whose homes he could use (cf., e.g., Acts 18:6–8), or lecture halls (19:8–9)?¹⁴²⁷ Luke, who knew urban Hellenistic culture firsthand, does not force a choice between these different venues (20:20), nor is there anything logically incompatible about these venues.

Further, Paul's Roman citizenship and experience as a teacher provided him some degree of status, as is evident in his epistles (in the Corinthian correspondence, the higher-status members seem particularly upset that Paul refuses to conform to higher-status models available to him). Likewise, although his Jewishness counted against him for many hearers (16:20–21), others were interested in Judaism (see comment on Acts 13:43) and in exotic ideas from the East (similar to nineteenth-century Western fascination with the "Orient"). New speakers in a city had to start somewhere with a speech open to the public before starting their school and attracting students.¹⁴²⁸ Established status could draw a crowd, but even homeless Cynics could preach and harangue passersby freely in the porches of public temples and other buildings.

2. A Useful Portrayal?

This point raises the question of status, relevant not only to whether one required high status for public preaching but also to whether Luke had reason to simply invent such a portrait. Luke likes to emphasize high-status believers or sympathizers when he has them available, yet far from such public preaching being viewed as high-status, later Christian intellectuals avoided it precisely because it was low-status. Celsus charged that Christian preachers appealed to masses in the marketplace like other demagogues;¹⁴²⁹ Origen had to defend the practice in respectable terms (*Cels.* 3.50–52). Lucian *Runaways* 12 complains about low-class persons who pretend to become wise by becoming "philosophers," especially (*Runaways* 17) when they see that they can earn more as charlatans than as laborers.¹⁴³⁰

Marketplace preaching thus appeared disreputable to higher classes,¹⁴³¹ and so one who wished to establish himself as a sophist in an aristocratic home or attract disciples had to announce a public speech, draw a sufficient crowd, and begin more respectable teaching as quickly as possible. Once Paul had attracted some members whose social networks could extend the church, he would probably abandon the open-air method, especially if he had succeeded in winning some high-status members (whether through open-air preaching or, perhaps more likely, through rhetorical opportunities that this opened up for him in the homes of some converts' patrons).

1427. Lecture halls (Acts 19:9) were not private homes but would have been available to those who could afford to rent them. If Acts portrays Paul as supporting himself (20:33–34), so does Paul (1 Cor 4:12; 1 Thess 2:9; 2 Thess 3:8); and if Acts indicates that Paul had patrons in some cities (Acts 19:31), Paul also mentions influential members of his congregations probably analogous to the influential patrons of synagogues (though Paul refuses to accept patronage in Corinth). By the time of Paul's ministry in Ephesus, he would have developed both the skills and the reputation of a sage, at least for a large enough group of people to make patronage of his group seem advantageous (see comment on Acts 19:31). We do not know the extent to which his ministry in Ephesus (19:9–10; our epistolary sources for his Corinthian ministry are more complete) may have exceeded opportunities elsewhere, but it does seem to have exceeded them (1 Cor 16:8–9).

1428. See again Winter, *Left Corinth*, 36–37; see comment on Acts 17:19.

1429. Liefeld, "Preacher," 204. For the aristocrats' antipopulist sentiments, see comment on Acts 4:18–22; Keener, *John*, 732–33.

1430. Lucian elsewhere complains about these uneducated Cynics (*Runaways* 27; *Phil. Sale* 11).

1431. Liefeld, "Preacher," 205.

Cynics, indeed, acquired their name from being compared to “dogs” (κύνες, pl. of κύων).¹⁴³² Their indecent, private acts in public gained them this reputation; thus Diogenes, while preaching, squatted and did something considered dishonorable, leading the crowds to denounce him as crazy.¹⁴³³ For other philosophers, however, being “bestial” meant being led by passions instead of by reason.¹⁴³⁴ When Demonax was not Cynic enough to please the Cynics, one accused him of being insufficiently “doggish,” to which he responded that his interlocutor was insufficiently human (Lucian *Dem.* 21). When a Stoic kept a rich woman's dog and it wetted him, people mocked him as a Cynic, a dog (Lucian *Posts* 34). (Unqualified comparisons of early Christian preachers to Cynics, ignoring the Jewish sensitivities of the former, prove unduly selective.)

Thus some other philosophers denounced fake Cynics and other philosophers,¹⁴³⁵ accusing them of greed¹⁴³⁶ or of abandoning real work for an easier job of preaching.¹⁴³⁷ Many viewed excessive Cynics as demagogues (e.g., Lucian *Dem.* 61); the masses, some complained, could not distinguish between true and false philosophers (Lucian *Runaways* 15).

This is not to imply that everyone viewed Cynics negatively. Stoics sometimes respected Cynics,¹⁴³⁸ and others also followed the example of “good” Cynics.¹⁴³⁹ (Many disdained the harsh, uncompromising “hard Cynics” while respecting the more tolerant “soft Cynics.”)¹⁴⁴⁰ Stoic views toward Cynics in this period are typically ambivalent, with both positive and negative characteristics.¹⁴⁴¹ Embarrassed by their Cynic roots, Stoics had moved away from them in many respects,¹⁴⁴² but first-century Stoics such as Seneca and Epictetus celebrated the Cynic model of simplicity, which regained popularity in the first two centuries B.C.E. and the first century C.E.¹⁴⁴³ Epictetus idealizes Cynics as models of virtue, at length in one of his discourses (*Diatr.* 2.22) and more briefly in other passages.¹⁴⁴⁴

1432. For comparison of Cynics to dogs, see, e.g., Cercidas frg. 1; Mart. *Epig.* 4.53.5; Lucian *Phil. Sale* 7, 10; *Runaways* 16; *Peregrinus* 2; Diog. Laert. 6.2.40, 45–46, 60, 77; Athen. *Deipn.* 13.611bc; *Gr. Anth.* 7.63–68, 115 (perhaps also 116); Philo *Plant.* 151; more positively, Dio Chrys. *Or.* 32.62; Paus. 2.2.4; Crates *Ep.* 16; Diogenes *Ep.* 2, 7; Lucian *Dial. D.* 329 (1/1, Diogenes 1); 425 (2/22, Charon and Menippus 3); 336 (3/2, The Dead to Pluto against Menippus 1); 420 (4/21, Menippus and Cerberus 1); Philost. *Vit. Apoll.* 6.31–33; applied negatively to all philosophers in Lucian *Hermot.* 86. As an insult in general, see comment on Acts 10:11.

1433. Dio Chrys. *Or.* 8.36 (cf. insanity accusations, 9.8; 12.8; 34.2, 4); dogs were associated with indecent acts (Plut. *Exile* 7, *Mor.* 601DE; y. *Ta'an.* 1:6, §8). Cynics' behavior may be understandable; in working with the homeless years ago, I observed how “abnormal” those alienated from societal constraints seemed to those for whom such constraints defined normalcy.

1434. See, e.g., 1 Cor 15:32; 2 Pet 2:12; comment on Acts 10:11.

1435. E.g., Lucian *Dem.* 48; *Indictment* 7, 11; *Fisherman* passim, e.g., 15, 37, 42. Cf. public distaste for a hypocritical and greedy follower of Stoicism in Tac. *Ann.* 16.32.

1436. Lucian *Runaways* 17, 20; *Dial. D.* 374 (20/10, Charon and Hermes 10); *Hermot.* 9, 18; *Peregr.* 13; *Tim.* 54–57; Philost. *Ep. Apoll.* 42; cf. Malherbe, “Gentle as Nurse,” 216; for the same charge against religious charlatans, e.g., Soph. *Antig.* 1061; Philost. *Vit. Apoll.* 6.41; against other public figures, see, e.g., Lysias *Or.* 28.3, §179; Aeschines *Ctes.* 218.

1437. Lucian *Indictment* 6; *Runaways* 12.

1438. E.g., Diog. Laert. 7.1.121. Stoics did, however, move away from their Cynic roots, especially as Stoics became more socially respectable (Engberg-Pedersen, *Paul and Stoics*, 76); Cynicism was growing in popularity, however, in the first and second centuries B.C.E. (78).

1439. See Malherbe, “Gentle as Nurse,” passim (= also idem, *Philosophers*, 35–48).

1440. See Moles, “Cynics,” 418; Malherbe, “Gentle as Nurse,” 210, 214; idem, *Philosophers*, 20–22, 71–72. Malherbe, *Philosophers*, 14, points out that the Cynic materials themselves display this division.

1441. Arius Did. *Epit.* 2.7.11s, pp. 98–99.24–28 (also Pomeroy, 127–28n222, citing esp. Cic. *Fin.* 3.68; Apollodorus Ephillus in Diog. Laert. 6.104; 7.121; Epict. *Diatr.* 3.22).

1442. Engberg-Pedersen, *Paul and Stoics*, 76 (citing Diog. Laert. 7.34; cf. Cic. *Off.* 1.128, 148).

1443. Engberg-Pedersen, *Paul and Stoics*, 78.

1444. E.g., Epict. *Diatr.* 4.8.30–32. Contrast Philod. *Prop.* cols. 12–13.

It was the Cynics' lifestyle that above all distinguished one as a Cynic rather than something else,¹⁴⁴⁵ but elements of their behavior were adapted by others. In practice, philosophers exhibited a range of behaviors, sometimes borrowing what they thought most useful from the Cynic tradition without adopting it wholesale.¹⁴⁴⁶ Dio Chrysostom appreciated Cynic doctrine but denounced Cynics' usual harangues on the streets, in alleys, and at temple gates as turning people off to true philosophy.¹⁴⁴⁷ Although Dio, as a famous orator, had more "honorable" means of access to public assemblies, he himself "for a time adopted the Cynic way of life."¹⁴⁴⁸ Although he was not a Cynic, Apollonius was portrayed as living in temples (Philost. *Vit. Apoll.* 1.16; 4.40), following the Cynic model.

Claiming that Luke's portrayal is not high-status or fabricated is therefore not meant to imply that neither Luke nor Paul would be able to find some value in presenting Paul as a wandering preacher at least initially (although Luke does not focus on how Paul drew outdoor hearings, except through signs). Public preaching would not offend everyone, and perhaps would offend aristocrats only if it was a controversial movement's primary means of expanding, which would suggest that it sought popular (rather than aristocratic) support.

3. Forums for Public Speech

There were many public speakers besides Cynics. Sometimes a form of public preaching was simply the only way most entirely new speakers could gain a hearing. Sophists gained reputations especially through versatile, extemporaneous presentations, whether with students or in public.¹⁴⁴⁹ Pliny the Younger praises for extemporaneous ability a young orator who displayed his exceptional knowledge by letting the audience select any topic for him to discuss (*Ep.* 2.3.1–3).

Those who wished to find crowds could find them in the forums and other public places; such places were popular for buying and selling, loitering, and gossip.¹⁴⁵⁰ Public speakers were common in the streets and at festivals;¹⁴⁵¹ even bathhouse-gymnasium complexes, as public places, hosted philosophers, rhetoricians, and poets vying for attention.¹⁴⁵² Although in language full of exaggeration, Lucian appears to present hearers as surrounded by would-be philosophers on every side.¹⁴⁵³

Declaimers competed for large crowds and applause, and crowds would gather to try out the newest speakers in the same way they would throng to watch fresh

1445. Malherbe, *Philosophers*, 12, 24. Some Cynics may not have adopted the entire lifestyle; e.g., Demetrius the Cynic sought to defend someone in court (Tac. *Hist.* 4.40).

1446. E.g., Lucian *Dem.* 5, 7.

1447. Dio Chrys. *Or.* 32.9, in Alexandria.

1448. Malherbe, *Moral Exhortation*, 26 (citing Dio Chrys. *Or.* 8.4–5, 9–16).

1449. Maclean and Aitken, *Heroikos*, xlvii. Some strongly preferred extemporaneous speeches (Winter, *Philo and Paul*, 205–6, citing Alcidas *On the Writers of Written Discourse, or On the Sophists* 6, 13–14, 22); on appreciation for extemporaneous speeches, see, e.g., Sen. E. *Controv.* 4.pref. 7; Pliny *Ep.* 2.3.1–3; Suet. *Gramm.* 23; Tib. 70.1; Lucian *Prof. P.S.* 20; Philost. *Vit. soph.* 1.24.529; others insisted that preparation was important (Sen. E. *Controv.* 10.pref. 2–3). Even extemporaneous speeches, however, could draw on memorized stock topics (Walde, "Mnemonics," 96). Skilled memory allowed one to recall sufficient information on a range of subjects extemporaneously (Sen. E. *Controv.* 1.pref. 18; cf. 3.pref. 6).

1450. See, e.g., Stambaugh, *City*, 111. The most effective means of advertising was often shouting in the streets or markets (Hirschmann, "Advertizing," 978).

1451. E.g., Dio Chrys. *Or.* 20.9–10.

1452. McRay, *Archaeology*, 43.

1453. Lucian *Indictment* 6; esp. 8; cf. *Fisherman passim*, e.g., 15, 37, 42.

gladiators or actors.¹⁴⁵⁴ Although some philosophers lectured in halls or for wealthy patrons, such job markets could not absorb all aspiring sages, and so large numbers preached in streets and markets.¹⁴⁵⁵ As Abraham Malherbe notes, most philosophers “spoke in public settings ranging from the forum to the workshop.”¹⁴⁵⁶

A renowned orator such as Dio Chrysostom even criticized philosophers who secluded themselves in classrooms, as if the masses were beyond hope; he insisted on public forums to improve the moral state of the masses.¹⁴⁵⁷ Private lecturers tended to speak more positively and focus on details of academic interest whereas Cynics could rant and focused on the negative.¹⁴⁵⁸ Public speakers like Dio fall somewhere between these poles, denouncing ignorance yet more gently than the harsher Cynics.¹⁴⁵⁹ Paul's critiques, like Dio's, are generally reasoned but also can confront errors firmly (both in the epistles and in Acts).

Probably one could make a transition from street preaching to providing banquet entertainment in rich homes without the former activity reflecting badly on the latter; even if a street-preaching background would have been a problem if known, few marketplace speakers (except persistent Cynics with regular locations over a long period of time) would become widely known. Even the contrast between school settings and public settings did not always hold; although many schools met in rented buildings or private homes, some met outside.¹⁴⁶⁰ An ancient city's streets would be full of unofficial activity; teachers taught their pupils the alphabet while itinerant vendors called attention to their wares, butchers cut up carcasses on the side of the street, and scribes drew up rental contracts at tables. In such places of frenzied activity, “any kind of rumpus brought a crowd.”¹⁴⁶¹ The civic climate virtually necessitated such public activity and interests. Homes were mainly places to sleep and sometimes perhaps to cook food on charcoal braziers; they were too crowded, drafty, and poorly ventilated and lit for much else. Thus people congregated whenever possible in the generous open spaces allotted to public buildings (temples, markets, streets, amphitheaters, baths, gymnasia, city gate areas, etc.), which together might compose a quarter of the city.¹⁴⁶²

4. Cynic Preaching

Whereas philosophers addressed gatherings in the forum, baths, or other public settings by invitation, “some Stoics, but especially Cynics, preached in the marketplaces and on street corners, where they urged all who passed by to listen to them as they spoke of virtue.”¹⁴⁶³ Cynics spoke freely everywhere, whether in the streets or at temple gates, and Dio Chrysostom's hearers in Alexandria were accustomed to them (*Or.* 32.7–12).¹⁴⁶⁴

1454. Pogoloff, *Logos*, 176 (citing esp. Sen. E. *Controv.* 4.pref. 1–2; 7.pref. 8–9; 9.pref. 2). Of course, only those who proved most appealing would receive audiences before the elite (176, citing Sen. E. *Controv.* 2.4.12).

1455. Malherbe, “Life,” 35; cf. Lucian *Indictment* 8.

1456. Malherbe, *Moral Exhortation*, 24.

1457. Meeks, *Moral World*, 63 (citing Dio Chrys. *Or.* 32.8–12).

1458. Malherbe, *Moral Exhortation*, 40–41.

1459. *Ibid.*, 42.

1460. Jeffers, *World*, 255 (noting also seating provisions).

1461. MacMullen, *Social Relations*, 64.

1462. Jeffers, *World*, 57–58; for temples as public space, see, e.g., Libanius *Topics* 2.8, 12.

1463. Malherbe, *Moral Exhortation*, 13. On wandering Stoics in an earlier period, see, e.g., Culpepper, *School*, 131. By this period, however, public preaching characterized Cynics more than Stoics (Stambaugh and Balch, *Environment*, 45–46); older Greek Cynics pioneered the itinerant style that grew in the Roman period (see Montiglio, “Wandering Philosophers”).

1464. Malherbe, *Moral Exhortation*, 24–25.

Lucian gives us a sample of the style of preaching attributed to harsh Cynics.¹⁴⁶⁵ He mentions Cynics harshly abusing passersby indiscriminately¹⁴⁶⁶ and employing exaggerations;¹⁴⁶⁷ one wept and tore (gently) at his hair to stir emotion (*Peregr.* 6). They were loud and boisterous,¹⁴⁶⁸ and they might rant angrily if contradicted by another speaker (*Peregr.* 31).¹⁴⁶⁹ One comic portrayal presents Cynics hitting each other with their staffs (Lucian *Fisherman* 44). Pliny the Elder complains that a severe Cynic such as Diogenes lacked normal human feeling (*N.H.* 7.19.79).

Cynics were known for their rudeness and especially their disrespect for social rank and status.¹⁴⁷⁰ When a person of status warned Diogenes not to spit in the wealthy home where he had brought him, Diogenes allegedly spat in the man's face, noting that nothing of poorer quality was available (Diog. Laert. 6.2.32). They were also antisocial enough to criticize rulers, but given their established role in social tradition, they usually avoided punishment. In stories about Diogenes, he desired as much honor as Alexander of Macedon¹⁴⁷¹ (a clear example of Cynic hubris). One could, of course, go too far, criticizing some more sensitive rulers. It was said that when Demetrius the Cynic in Rome denounced baths on the day that Nero dedicated his new baths, Tigellinus had him banished from Rome.¹⁴⁷²

Still, positive elements in Cynic preaching could be emulated. Other philosophers often shared Cynic themes, so that lower-class Stoics sometimes used Cynics' public preaching methods and (often wrongly, in this period) were sometimes viewed together with them politically.¹⁴⁷³ Ever a critic of harsh Cynics, the rhetorician Lucian showed great affection and respect for the Cynic teacher Demonax.¹⁴⁷⁴

5. Cynic Characteristics in Paul's Letters

Some scholars argue that Luke simply wished to present Paul preaching publicly according to a Cynic ideal.¹⁴⁷⁵ Yet we should consider the possibility that Paul knew of, and presented himself according to, the same cultural ideal.¹⁴⁷⁶ Granted, Paul's thought is usually much closer to that of Stoics than that of Cynics—living within

1465. On harsh Cynics, cf. Pliny E. *N.H.* 7.19.79; Lucian *Runaways* 19, 27. On such Cynics as demagogues, see Lucian *Dem.* 61.

1466. Lucian *Peregr.* 3, 18; *Runaways* 14; *Phil. Sale* 10.

1467. E.g., Peregrinus can rival Zeus; Lucian *Peregr.* 4–6.

1468. Lucian *Peregr.* 3, 5; *Runaways* 14, 27; cf. *Icar.* 31.

1469. One imagines that some hearers' motives for listening resembled those of some watchers of horror movies or graphic violence today: the cheap thrill of an adrenaline rush that does not risk one's safety.

1470. More positively, they were known for frank speech; see Vaage, "Barking"; Malherbe, "Gentle as Nurse," 208, 213; Marshall, *Thessalonians*, 63; Diog. Laert. 6.2.51; 6.5.92. Diogenes probably employed his rude wit effectively, humorously attracting attention (see Bosman, "Selling Cynicism").

1471. Diog. Laert. 6.2.60, 64; he is unafraid of Alexander also (6.2.68), and Alexander respects him (6.2.32). Crates also answers Alexander boldly (6.5.93). The probably apocryphal story of Diogenes asking Alexander only that he move from blocking his sunlight was often told (e.g., 6.2.38; Arrian *Alex.* 7.2.1). Cf. also traditions about Diogenes's challenge to athletes' honor (Bosman, "Athletes").

1472. Philost. *Vit. Apoll.* 4.42. Demetrius had been close to an enemy of Nero (*Tac. Ann.* 16.34–35).

1473. Liefeld, "Preacher," 36, 40.

1474. E.g., Lucian *Dem.* 5, 7.

1475. Familiarity with Cynics was widespread; this was especially true for traditions about Diogenes (Hock, "Cynics and Rhetoric," 764–72). For a summary of information about the Cynics, see, e.g., Fiore, "Cynicism," 242–45.

1476. See esp. Downing, *Cynics* (though I would not find nearly so many elements specific to Cynicism); cf. Malherbe, *Philosophers*. Cynicism even offered an accepted (if often reviled) model for deviating from the norms of Gentile society (Downing, "Paul's Drive"); but this aspect of Cynicism could be more incidental to Paul's deliberate adaptation.

society's structures, working rather than living on the street, and so forth. But Cynic categories do allow Paul to expand the range of ideas he can communicate intelligibly in Gentile society (e.g., his ideal of radical apostolic lifestyle, following the Jesus tradition, sometimes resembles Cynic language).

Only a limited number of forums were available for public preaching, and Paul would likely employ methods that already existed. Granted, he usually started in the synagogues (see comment on Acts 13:5), but this is clearer in Acts than in the epistles, and Luke, who knew first-century culture better than we, saw no contradiction. Apparently Paul was ready to adopt a wide range of methods to gain a hearing among the largest possible range of audiences (1 Cor 9:20–22). These could include the way noted orators began in a city but also (and especially since Paul was rarely noted when he arrived) speaking on the street, a practice of many speakers (Cynics became particularly known for it because they went considerably further than others, even living on the streets).

Paul's writings do, indeed, show conformity to some Cynic-type ideals, although, at least on the ideal level (where they are most relevant to Paul), these models, like public preaching, were shared by some other philosophers as well (e.g., 1 Cor 3:21–23;¹⁴⁷⁷ 4:11–13).¹⁴⁷⁸ Scholars often compare Paul's argumentative style, especially in his three longest letters, to the diatribe used by (though not at all limited to) Cynics and Stoics,¹⁴⁷⁹ and his writings are full of elements frequent in this stream of philosophic thought.¹⁴⁸⁰ On some issues debated among philosophers, Paul comes closer to the Cynic position than do his opponents,¹⁴⁸¹ including his sacrificial lifestyle, though he is more often closer to Stoic thought (see comment at Acts 17:18). (Stoics, who differed from Cynics at some key points, nevertheless approved of some Cynic ideas and regarded the Cynic lifestyle as an accelerated path to virtue.)¹⁴⁸²

Although his life did not match the Cynic ideal in every respect even as he represents it, it is likely that Paul would conform to the pattern he espouses at least to a sufficient degree to retain his credibility when depicting this ideal to churches that knew him (such as Corinth and Thessalonica).¹⁴⁸³ In 1 Thess 2, his defense follows the conventional pattern that Dio Chrysostom portrayed as characteristic of the "good" Cynics.¹⁴⁸⁴ Paul may not describe the circumstances under which he began evangelism

1477. Not just Cynics (who implemented the notion radically, Crates *Ep.* 26–27; Diog. Laert. 6.2.37, 44, 72) but also the Stoics felt that all things belong to the wise; e.g., Sen. *Y. Ep. Lucil.* 66.22; Plut. *Cic.* 25.4; Arius Did. *Epit.* 2.7.11g, pp. 74–75.5–13; Diog. Laert. 7.1.125; mocked in Plut. *St. Poets* 4, *Mor.* 1058C.

1478. Cf., e.g., *peristasis* catalogues also used by Stoics; the wise person as being wealthy (1 Cor 4:8) in, e.g., Cic. *Parad.* 42–52; Arius Did. *Epit.* 2.7.11i, pp. 76–77.8–16. All kinds of philosophers thought themselves most fit to rule (Val. Max. 7.2.ext. 4; Iambl. *V.P.* 35.250), including Stoics (Cic. *Fin.* 3.22.75; Sen. *Y. Ep. Lucil.* 108.13; Mus. Ruf. 8, p. 66.3, 13–26; Arius Did. *Epit.* 2.7.11m, pp. 88–89.26–29; pp. 90–91.1–6; pp. 92–93.18–20; ridiculed in, e.g., Hor. *Sat.* 1.3.125).

1479. Stambaugh and Balch, *Environment*, 144; cf. Stowers, *Diatribe*. But the diatribe form admittedly characterized instruction, not just school settings and certainly not just Cynics (Anderson, *Rhetorical Theory*, 243; cf. Stowers, *Diatribe*, 175, favoring a school setting but refuting Bultmann's focus on Cynic street preaching; Watson, "Diatribe," 213; on Berol.P. 13044, see Bosman, "Riddle Contest").

1480. E.g., Rom 1:19–20 (cf., e.g., Epict. *Diatr.* 1.6.23–24); 1 Cor 8:6 (cf., e.g., Meeks, *Urban Christians*, 91; Grant, *Paul*, 72); Phil 4:11 (cf., e.g., Mus. Ruf. frg. 43, p. 138.15; Arius Did. *Epit.* 2.7.11h, pp. 74–75.31–32; Diog. Laert. 6.1.11; 6.2.22; 10.120); though Paul, like most of his contemporaries (see comment on Acts 17:18), was eclectic (compare, e.g., Middle Platonic imagery in 2 Cor 4:16–18 with, e.g., Max. Tyre 10.5; Porph. *Marc.* 32.494–97). See further deSilva, "Paul and Stoa"; comment on Acts 17:18.

1481. See Sumney, *Opponents*, 185–86.

1482. Diog. Laert. 7.1.121 (perhaps because it offered a crash course in not valuing possessions).

1483. Though he appeals to the pattern in 1 Cor 9 partly to counter the higher-status members' status consciousness, Paul appeals to their knowledge of how he lives.

1484. See Malherbe, "Gentle as Nurse" (followed in part or in whole by various commentators on 1 Thessalonians).

in various locations (summaries such as 1 Thess 1:9–10; 2:13 are too brief to include such details), but his writings reveal a sensitivity to the ideal-philosopher model no less than does Acts (see remarks in the introduction to Acts 17:15–24 and at 17:19–20).

None of this is unexpected. Jesus and his Galilean followers began their itinerant ministry as wandering preachers.¹⁴⁸⁵ Some other Galilean sages also disputed in marketplaces, attracting audiences by the same means that were employed in Greek cities.¹⁴⁸⁶ It was only natural that other early Christians would continue this model, which, when translated from a rural Galilean to an urban Hellenistic setting, looked more like that of traditional Cynics than most alternatives the Greeks (unfamiliar with mobile biblical prophets) knew.¹⁴⁸⁷ Some scholars have contrasted Paul with itinerant, possessionless sages inferred from the Jesus tradition;¹⁴⁸⁸ yet Paul's lifestyle in Acts comes closer to this lifestyle than do any other concrete figures in the NT after Jesus's ascension.

6. Distinguishing Paul from Cynics

Sharing a characteristic of outdoor preaching with Cynics, however, does not make Paul a Cynic (any more than it made all other outdoor speakers Cynics). Liefeld notes that Luke carefully distinguishes Paul from questionable itinerants. Luke criticizes Paul's rivals (a common technique for distinguishing): Elymas in Acts 13:8–11, the exorcists of 19:13–16, false prophets in 20:29–30. Paul is no rabble-rouser (contrast 19:24–29; 24:5, 18–19); he is a rabbi working through local synagogues (13:5) and, in contrast to Cynic sages, refuses contributions (20:33–35).¹⁴⁸⁹ Paul's own writings reveal many of these same techniques. Many commentators on 1 Thessalonians have followed Malherbe's parallels with Dio Chrysostom, who distinguishes the good Cynic model from the bad.¹⁴⁹⁰ Paul's refusal to accept support from some churches became a matter of controversy in Corinth (1 Cor 9:3–18; esp. 2 Cor 11:7–9; 12:13–16; cf. 1 Thess 2:9).

Neither Luke nor Paul presses the wandering-preacher type to its fullest Cynic ideal.¹⁴⁹¹ Granted, Cynic simplicity (abandoning possessions) fits the demands of Paul's apostolic call both in his writings (1 Cor 4:11–12; 2 Cor 11:27) and in Luke-Acts (see Luke 9:3; 10:4 [cf. Mark 6:8–9]); Luke presses this ideal further, applying it, in accordance with the Jesus tradition, to all disciples, Luke 9:58; 12:33; 14:33; 18:29). Given such commitments, it is not surprising that a Cynic could exploit Christians (Lucian *Peregr.* 11–16).¹⁴⁹² People often gave speakers money; on Cynic simplicity, see comment on Acts 2:44–45; on Cynic begging, see comment on Acts 3:2–3.

Some scholars have compared Jesus's demands on his disciples to those of wandering Cynics.¹⁴⁹³ The comparison of Cynics to the early Jesus movement (often

1485. On itinerant speakers, see comment on Acts 11:27; cf. Keener, *Matthew*, 57.

1486. See Goodman, *State*, 74 (citing esp. *t. Kil.* 1:4).

1487. Cf. here esp. Meeks, *Moral World*, 107. This is not to highlight the traditional category of “wandering prophets”; see comment on Acts 11:27.

1488. Theissen, *Setting*, 28–35, suggests various socioeconomic factors in Palestine that led to itinerant Christian charismatic preachers (the supposed source of the “Forsake all and follow me”-type traditions); he contrasts them (35–40) to Paul, stressing community organization.

1489. Liefeld, “Preacher,” 298.

1490. E.g., Best, *Thessalonians*, 94–95; Bruce, *Thessalonians*, 25; cf. Meeks, *Urban Christians*, 114; Marshall, *Thessalonians*, 61.

1491. Paul apparently distinguished his views from those of Cynics at times by opposing himself to Cynic language (cf., e.g., Fredrickson, “No Noose”).

1492. Edwards, “Satire,” even argues that Lucian presented Christians as sham Cynics.

1493. Hengel, *Charismatic Leader*, 27–33; Theissen, *Sociology*, 14–15; cf. Kee, *Origins*, 68. I borrow material here from Keener, *Matthew*, 154–55.

negatively by outsiders) is not unreasonable; missionaries such as Paul¹⁴⁹⁴ may have helped make such a model acceptable to later monasticizing streams of Christian thought (*Sent. Sext.* 18–19). Yet Jesus's itinerant ministry was in no respect distinctly Cynic.¹⁴⁹⁵ Cynics were not the only Greek philosophers who traveled;¹⁴⁹⁶ moreover, Torah teachers also could travel “from place to place to speak.”¹⁴⁹⁷ Most telling, Cynics were surely too rare in Jewish Palestine (indeed, so far as we know, nonexistent among Jewish people in Palestine or elsewhere) to provide the primary model.¹⁴⁹⁸ For Jesus's itinerant mission, the best background widely known in Jewish Palestine is that of the OT prophets.¹⁴⁹⁹

Although Cynics do not add much to our understanding of Jesus's ministry historically, they are more relevant to how some outsiders might view itinerant evangelists such as Paul.¹⁵⁰⁰ Like Paul, Cynics abandoned all possessions for their mission;¹⁵⁰¹ Paul did not take matters as far as they did, however, since he did not live on the street (cf. Acts 16:15; 18:2–3). Probably unlike Paul (given his Jewish aversion to nakedness),¹⁵⁰² Cynics wore very little—a short cloak, with a wallet.¹⁵⁰³ Like the early disciples, they might carry little with them, such as their staff.¹⁵⁰⁴ Other ancients complained about Cynics (or other sages) who thought that their simple garment or staff made them Cynics.¹⁵⁰⁵ But living simply also characterized some other thinkers who could compare their mean cloaks to those of Cynics (Dio Chrys. *Or.* 32.22; 34.2); philosophers with long hair, beards, and simple cloaks were a common sight,¹⁵⁰⁶ though they often faced mockery (72.2). All this despite the fact that statues of gods and heroes of old

1494. See Bowers, “Propaganda,” 318–19; Scroggs, “Present State,” 172.

1495. Even in Luke, who is most apt to present Jesus to his readers in such culturally relevant terms; cf. Schüssler Fiorenza, *Memory*, 74; Witherington, *Sage*, 117–45; Eddy, “Diogenes.”

1496. E.g., Diog. Laert. 2.22.

1497. Safrai, “Home,” 762. See also idem, “Education,” 965; *Sipre Deut.* 43.3.7.

1498. E.g., Boyd, *Sage*, 151–58; Eddy, “Diogenes,” 463–67.

1499. 1 Sam 7:16–17; 2 Kgs 4:8–10; cf. Hengel, *Charismatic Leader*, 16–24; Culpepper, *School*, 227. Whereas prophets like Jesus and Paul performed signs, Downing, *Cynics*, 220–21, cannot find notable Cynic examples.

1500. Though Paul was mostly itinerant as he was traveling to more hospitable venues, and did not go mostly naked or live on the street, as noted below. That is, ancients could use stock criticisms of Cynics against him, but they would not mistake him for a full-fledged Cynic, even before they heard him speak.

1501. Dio Chrys. *Or.* 64.18; Crates *Ep.* 18, 30; Lucian *Peregr.* 24, 36; see comment on Acts 2:44–45. They may have grounded this in their understanding of the primal ideal (see Martin, “Chronos Myth”).

1502. 2 Cor 5:3–4. Granted, he speaks of being poorly clothed (Rom 8:35; 1 Cor 4:11), but apparently as a trial necessitated by his travels rather than as a deliberate identification with the Cynic lifestyle. See fuller discussion of “nakedness” at Acts 7:58.

1503. E.g., Juv. *Sat.* 13.121–22; Crates *Ep.* 18, 30; Aul. Gel. 9.2.4–5; Lucian *Dem.* 48; *Runaways* 14, 20, 27; *Peregr.* 15, 24, 36; *Dial. D.* 364–65 (20/10, Charon and Hermes 2); *Indictment* 6; *Phil. Sale* 9; *Icar.* 31; *Cynic* 4, 19–20; cf. the complaint in Quint. *Decl.* 283.2. Against their detractors, Downing, *Cynics*, 34, allows more diversity for their apparel but concurs that they were poorly clothed.

1504. E.g., Lucian *Runaways* 27, 32; *Peregr.* 15, 24, 36; *Dial. D.* 364–65 (20/10, Charon and Hermes 2); *Indictment* 6; cf. philosophers in *Runaways* 14. One Cynic's staff sold for a high price after his death (Lucian *Book-Coll.* 14); Cynics could also be portrayed as hitting each other with their staffs (Lucian *Fisherman* 44, a comic portrait).

1505. E.g., Mus. Ruf. 16, p. 106.12–16; Dio Chrys. *Or.* 34.3; 49.11; Lucian *Runaways* 14; *Indictment* 6; Max. Tyre 1.9.

1506. Crosby, introduction to Dio Chrys. *Or.* 72 (LCL, 5:174), notes that this profession was more familiar than any other, which suggests that many practiced philosophy on the streets. On philosophers with long hair, see Dio Chrys. *Or.* 12.15; 35.2; *Encomium on Hair*; Lucian *Phil. Sale* 2; *Peregr.* 15; *Cynic* 17, 19; Philost. *Vit. Apoll.* 7.36; Diog. Laert. 1.109; Iambl. *V.P.* 2.11; 6.31; with long beards, see Epict. *Diatr.* 2.23.21; Plut. *Isis* 3, *Mor.* 352C; Artem. *Oneir.* 1.30; Aul. Gel. 9.2.4–5; Lucian *Runaways* 27; *Icar.* 29; *Fisherman* 42; *Dem.* 13; *Lover of Lies* 5; *Indictment* 11; *Hermot.* 18, 86; *Eunuch* 9; Philost. *Ep. Apoll.* 3, 70; with both, Epict. *Diatr.* 4.8.12; 8.15; Dio Chrys. *Or.* 36.17; 47.25; 72.2; Lucian *Dial. D.* 371–72 (20/10, Charon and Hermes 9); Philost. *Vit. Apoll.* 7.34. In contrast to Cynics, Stoics, though bearded, wore their hair short (Lucian *Runaways* 27; *Hermot.* 18).

also wore long hair and beards, says Dio,¹⁵⁰⁷ and that barbarians were expected to wear their hair long.¹⁵⁰⁸

Cynics also abstained from and taught abstinence from marriage,¹⁵⁰⁹ though, unlike Paul and other Jewish celibates, they did not think that singleness—useful to avoid distraction—necessarily entailed avoidance of deliberate sexual release. (Stoics differed starkly from Cynics on this point, approving of marriage.)¹⁵¹⁰ Because prostitutes cost money, it was best, said Cynics, to relieve one's sexual appetites for oneself; Diogenes was said to have given his hearers a public demonstration.¹⁵¹¹ One famous exception to the no-marriage rule was Hipparchia, from a wealthy family, who proved ready to endure the Cynic lifestyle and hence was welcome to marry Crates.¹⁵¹² It was said that they engaged in intercourse publicly, rejecting cultural notions of shame;¹⁵¹³ Crates and Hipparchia also continued living on the street.¹⁵¹⁴

Even where Paul could agree with Cynics, they followed some of these practices to extremes not appearing in Paul or even in the Jesus tradition. Those who fully followed Cynics' teaching also slept in public places (contrast Luke 10:5–7; Acts 16:15; 18:3), utterly unkempt and without concern for hygiene,¹⁵¹⁵ and were depicted as abandoning all family ties.¹⁵¹⁶ Some also regarded taking cold baths and going barefoot in winter weather as behavior typical for philosophers.¹⁵¹⁷ Not only did Cynics abstain from marriage themselves (as Paul did); they (unlike Paul; 1 Cor 7:9, 28, 36–40) would teach their followers to do the same. (For further on Cynics' simplicity, see comment on Acts 2:44–45; 3:2–3.)

Neither Acts nor the letters portray Paul as primarily Cynic, despite common features. Cynics were not alone in appreciation of sages who lived simply (see more detailed

1507. Dio Chrys. *Or.* 72.5. For long-haired heroes and deities, see, e.g., *Hom. Hymns* 3.450 (to Pythian Apollo); Pindar *Isthm.* 1.7; 3.14; Virg. *Aen.* 9.638; Ps.-Tibullus 3.10.2; Dio Chrys. *Or.* 36.17; Lucian *Dial. G.* 215 (8/5, Zeus and Hera ¶5); *Cynic* 1; *Dial. G.* 275 (3/23, Apollo and Dionysus 2); Paus. 1.8.4; Philost. *Vit. Apoll.* 8.7; *Hrk.* 27.13; 29.5; 31.1; 38.3; 42.1, 3; *Ep.* 16 (26); 61 (64); for exceptions, Philost. *Hrk.* 19.3, 6; 33.39; 37.3. For ancients more generally, Hom. *Il.* 4.533; *Od.* 2.408; Sil. It. 15.671; Dio Chrys. *Or.* 2.12; esp. "long-haired Achaians" in Hom. *Il.* 2.51; 3.43, 79; 4.261; 7.85, 328, 442, 448, 459, 472, 476; 8.53, 341, 510; 9.45; 13.310; 18.6, 359; 19.69; *Od.* 1.90; 2.7; Spartans, Xen. *Lac.* 11.3; Plut. *S. Sp.*, Charillus 6, *Mor.* 232D; *Alc.* 23.3; *Lys.* 1.1–2.

1508. E.g., Dion. Hal. *Ant. rom.* 14.9.4; Pliny E. *N.H.* 6.32.162; 11.47.130; Dio Chrys. *Or.* 35.11; Heliod. *Eth.* 2.20.

1509. Epict. *Diatr.* 3.22.69–76 (esp. 70–71); Diogenes *Ep.* 47; Lucian *Phil. Sale* 9; *Dem.* 55; *True Story* 2.18; Max. Tyre 36.5; Diog. Laert. 6.2.54. So also any intercourse demanding excess time (Diogenes *Ep.* 44); for rejecting families, cf. Alciph. *Farm.* 38 (Euthydicus to Philiscus), 3.40, ¶1.

1510. See, e.g., Arius Did. *Epit.* 2.7.8, pp. 52–53.13; 2.7.11b, pp. 64–65.18–21 (presenting it as a sacrifice to which one condescends); 2.7.11m, pp. 90–91.9–11; Diog. Laert. 7.1.21, 121; Hierocles *Marr.* 4.22.21–24 (in Malherbe, *Moral Exhortation*, 100–104); Deming, *Celibacy*, 51–57; Collins, *Corinthians*, 254–55. Apparently Epictetus was unmarried (Lucian *Dem.* 55). Zeno's attempt to abolish marriage simply belonged to his anarchism against institutions in general (Engberg-Pedersen, *Paul and Stoics*, 75).

1511. Dio Chrys. *Or.* 6.16–20; Diogenes *Ep.* 42. While noting that harsh Cynics were noted for public defecation, masturbation, and the like, Downing, *Cynics*, 47–48, argues that not all Cynics behaved in this manner.

1512. Epict. *Diatr.* 3.22.76; Diog. Laert. 6.7.96–97; see further Goulet-Cazé, "Hipparchia." Some sources, perhaps doubting a woman's ability to fulfill this lifestyle, weaken her resolve (e.g., Crates *Ep.* 28–30, 32), but others portray her strength (Diogenes *Ep.* 3; Diog. Laert. 6.7.98; cf. Crates *Ep.* 33).

1513. Sext. Emp. *Pyr.* 1.152.

1514. Mus. Ruf. 14, p. 92.1–4.

1515. E.g., Alciph. *Farm.* 38 (Euthydicus to Philiscus), 3.40, ¶2; Lucian *Icar.* 31. Lucian *Indictment* 6 mocks their self-tanning, based on their living in public space.

1516. E.g., Alciph. *Farm.* 38 (Euthydicus to Philiscus), 3.40, ¶¶1–3; cf. the portrayal of a father's alienation from a Cynic son in Quint. *Decl.* 283 (esp. 283.4). This resembles Luke 8:21; 9:59–62; 14:26; 18:29–30; but Luke does not press such controversial countercultural practices literally in Acts, as they would generate hostility from the broader society (see, e.g., Keener, *Paul*, 140–46).

1517. Lucian *Icar.* 31.

comment on Acts 2:44–45; 20:33–35); thus, for example, some rabbis praised (and perhaps idealized) the early sage Hillel for his background in poverty (*b. Yoma* 35b).

With some significant exceptions, most Cynics were uneducated or opposed education, especially rhetorical education;¹⁵¹⁸ Luke's portrayal of Paul appeals to a higher social stratum and (apart from Paul's public preaching) uses only widely favored elements of philosophic lifestyles (Paul's letters also confirm Luke's premise that Paul was more rhetorically sophisticated than the typical Cynic). Paul would agree with middle-of-the-road philosophers who held that philosophy was a matter not of being poorly clothed (though cf. 1 Cor 4:11) or of having long hair (cf. Acts 18:18; 1 Cor 11:14) but of thinking soundly (Mus. Ruf. 16, p. 106.12–16; Max. Tyre 1.9). Likewise, Malherbe concludes, regarding Cynic parallels in Paul's letters, that Paul "was no Cynic." He employed their language and addressed some of their favorite topics, but Paul was concerned with communities whereas Cynics were independent and concerned only with individuals.¹⁵¹⁹

7. Learning Greek Communication Patterns

Paul's training under Gamaliel (Acts 22:3) prepared him for synagogue expositions, but as the narrative progresses, Paul realizes that God is giving him more success with Gentiles (13:46; 18:6), increasingly forcing him into the probably less familiar Greek rhetorical mold of a sophist or sage.¹⁵²⁰ There is good reason to believe that Paul had some knowledge of rhetoric—which would be useful in Greek-speaking synagogues—before his divine encounter near Damascus;¹⁵²¹ but it is unlikely that he had prepared to speak as a philosopher to Gentile audiences, a role into which he presumably grew.¹⁵²² Acts presents Paul as a versatile speaker equipped for both Jewish and Gentile settings (e.g., 13:16–47; 14:15–17; 17:22–31) but seems to climax with the portrait of Paul as a contextualized philosopher (19:9, still reaching both Jew and Gentile) and a speaker who could confute adversaries in Roman legal settings (Acts 24–26). For Luke, Paul apparently learned the new role without losing his role as a Jewish man of God or prophetic figure (19:11–12; 28:8–9). We should note, however, that elements with Cynic analogies may appear even in his first extant epistles,¹⁵²³ suggesting that either in Jerusalem or in Tarsus, while he was preparing for his calling (9:15, 30; 11:25), Paul learned how to effectively employ some basic philosophic language.

II. ATTEMPTED VENERATION (14:11–13)

Witnessing a clearly miraculous healing, the crowds respond on the basis of their own cultural assumptions: Paul and Barnabas are gods who have come to them, as

1518. See Hock, "Cynics and Rhetoric," 759–64. On Cynics as typically uneducated, see, e.g., Lucian *Phil. Sale* 11. Earlier Stoics may have opposed rhetoric, but most used it after Cicero (Stem, "Stoic").

1519. Malherbe, *Philosophers*, 8; cf. also Downing, *Cynics*, 10, 251.

1520. Judge, "Scholastic Community," 126–27 (identifying the turning point as Macedonia, 128).

1521. See, e.g., Keener, *Corinthians*, 4, 227; more fully, comment on Acts 22:3. By "some knowledge," I do not mean that his advanced education focused on rhetoric (it likely focused on Scripture) but that he was exposed to rhetoric, perhaps the way most seminarians today receive some basic training in sermon preparation.

1522. As noted above, his epistles betray considerable acquaintance with Stoic (e.g., Rom 1:20–32; 1 Cor 8:5–6) and other philosophic (e.g., 2 Cor 4:16–18) language (albeit without the consistency of a particular system), but such language becomes more dominant in the captivity letters (and still more so, for those who find Pauline traits there, in the Pastorals).

1523. See Malherbe, "Gentle as Nurse"; idem, *Philosophers*.

recounted in some older Phrygian tales. Like some other misinformed characters in Acts, they mistake God's agent for a deity (10:25; 28:6). Ultimately Luke makes a theological point at the expense of Greco-Roman polytheism. Greeks portrayed their deities as coming in disguises (see comment on Acts 14:11), but the true God, of different character, revealed his greater power to the people of Lystra.¹⁵²⁴

(1) *Possible Historical Tradition?*

Some scholars doubt whether anyone would have honored traveling Jews as gods,¹⁵²⁵ but several lines of evidence (expanded further below) render it at least plausible. First, it was commonly believed that deities could appear as mortals; though this claim was usually offered only for the distant past, the part of Asia Minor near Phrygia would probably prove open to the idea in the contemporary era more than would most others (see comment below). Second, people often acclaimed others as gods in rhetorical praise that was not intended literally (cf. comment on Acts 12:22); the emperor cult in the West is a pervasive example (in the East it was taken more literally). In this region, however, the line between deity and mortal in Hellenistic and imperial religion was fairly thin; see comment on Acts 10:25; 12:22. Third, if the narrative accurately portrays how far the adulation had reached before Paul and Barnabas understood (14:14), their interpreter was not the best,¹⁵²⁶ and so their monotheism may not have been accurately conveyed.¹⁵²⁷

Paul reminds the South Galatians that they received him as “an angel from God” (Gal 4:14),¹⁵²⁸ a reception some scholars connect with the reception as deities here.¹⁵²⁹ But Paul appears to refer to all the Galatians (not only those in Lystra). Moreover, he surely addresses currently monotheistic believers, who would not understand an early idolatrous act in these terms. Although the converts may well have sought to remedy their own or others' misconstrual of Paul's role by honoring him with a more adequate description (as an angel; i.e., the events may be related), it is questionable whether this comment in Galatians is a direct evidence of the crowds deifying Paul in Lystra.¹⁵³⁰

Ultimately none of these lines of evidence can prove that the story happened in

1524. See Martin, “Barnabas and Paul in Lystra.”

1525. O'Neill, *Theology*, 143.

1526. The best of interpreters could provide even dynamic equivalent translation (see Martindale, “Translation,” 1545, noting Hor. *Ars* 133–34; Cic. *Opt. gen.* 14; Jerome *Ep.* 57.5), but this was the educated ideal. Translation was often fairly free (Kennedy, “Source Criticism,” 144).

1527. Perhaps they were preaching in Greek, and someone in the crowd finally informed them in Greek of the response in the native language, but perhaps some did not understand their Greek fully (or as well as some others) and stirred others on the basis of their own premature conclusions.

1528. Paul might compare Jesus with an angel of the Lord (cf. Longenecker, *Christology*, 26–28, 31; on a different passage, cf. Fossum, “Angel in Jude”); later Christians employed this image (cf. Juncker, “Christ as Angel”) until Arian use forced them to discontinue it (Daniélou, *Theology*, 117; it also appeared among other groups; cf. *G. Eb. frg.* 6, in *Epiph. Her.* 30.16.4–5; Daniélou, *Theology*, 67, 140). The angel could be identified with God in some passages (Gen 48:15–16); God's word can be portrayed as angelic (Philo *Names* 87; *Flight* 5); and wisdom may be portrayed as an angel (Rogers, “Wisdom”), although, in the Targumim, angels preserve God's transcendence (*Tg. Neof.* 1 on Gen 3:5; *Tg. Ps.-J.* on Gen 3:5). But this passage probably offers no such christological point; it simply offers two comparisons with Paul and, on the angelic side, resembles 1 Sam 29:9; 2 Sam 14:17; 19:27; Zech 12:8 (cf. 4Q377 2 II, 11).

1529. E.g., Mitchell, *Anatolia*, 2:24; cf. Ramsay, *Cities of Paul*, 299.

1530. On the other side, the objection raised against the narrative, that faith arises in Gal 4:14 despite Paul's weakness but in Acts because of a miracle (O'Neill, *Theology*, 143), demands too much from documents addressing very different interests; the Pauline text addresses not the cause of faith but the cause of Paul's preaching there and need not refer to an incident specifically in Lystra. The view that the misunderstanding proves that the word is more persuasive for truth than are miracles (Boismard and Lamouille, *Actes*, 2:275) creates a false dichotomy; God's word was attested through miracles (Acts 14:3), and the problem was inadequate translation (14:11, 14).

any way like how Luke tells it; acclamations of deity were common in novels¹⁵³¹ and are part of a common literary pattern in Acts (Acts 10:25; 28:6; see comment on Acts 10:25). But acclamations appeared in novels only because they also characterized the social reality that novels sometimes depicted; that is, they are not limited to novels.¹⁵³² Further, even Luke's literary motifs (e.g., the question "What shall we do [to be saved]?" in Luke 3:10; Acts 2:37; 16:30) often stem from some historical tradition (compare Luke 18:18 with Mark 10:17), and of all the instances of this pattern in Acts, the theme is more intrinsic to the fabric of the story in this passage than in the others. Moreover, various details (e.g., the accumulated evidence for pairing Zeus and Hermes at Lystra)¹⁵³³ suggest acquaintance with a source beyond a simple foreigner's familiarity with the myth. The story thus should not be deemed implausible simply because it is also entertaining.

(2) *Lycaonian Language (14:11)*

The rural and mountainous interior of Anatolia preserved indigenous languages and religious customs into late antiquity.¹⁵³⁴ A gloss in Stephanus of Byzantium claims that Lystra, though a Roman colony, preserved its native language;¹⁵³⁵ this claim could, however, be based on Acts 14. Apart from the hellenized Western cities, most of Asia's local languages persisted during the Hellenistic era.¹⁵³⁶ Some indigenes of Galatic Phrygia used the Phrygian language into the late third century C.E., with one district maintaining it as late as the fifth or sixth century.¹⁵³⁷ The Phrygian language revived briefly on late third-century C.E. pagan tombstones (perhaps as a pagan reaction against Greek-speaking Christianity), but both pagan and Christian eastern Phrygian inscriptions in Greek reflect Phrygian influence.¹⁵³⁸ Although the Phrygian-speaking area attested in 250 C.E. includes Iconium (on the border between Phrygia and Lycaonia), it does not include Lystra or Derbe.¹⁵³⁹

Funerary inscriptions indicate that the colony's Roman citizens spoke Latin; those speaking Lycaonian are thus the native Anatolians.¹⁵⁴⁰ Although languages such as Greek and Latin prevailed in the cities, local accents increased the farther one went from the city walls, and local languages persisted beyond them.¹⁵⁴¹ Some scholars argue that Lycaonian was one of the diverse Greek dialects of Asia Minor, simply too distant from the usual eastern urban Mediterranean Greek for Paul and Barnabas to understand.¹⁵⁴²

1531. E.g., Char. *Chaer.* 1.14.1; Xen. *Eph. Anthia* 1.12; see further Johnson, *Acts*, 248 (noting also that this reflects accurately the permeability of human and divine in Greek thought); see comment on Acts 10:25. On acclamations in the real social world of antiquity, see comment on Acts 19:28.

1532. See, e.g., Lucian *Alex.* 38; *Dion.* 2, 4, 5; cf. political acclamations in Dio Chrys. *Or.* 40.26–27; Welborn, *Politics*, 12–13; Stoops, "Riot," 87 (following MacMullen, *Enemies*, 170, 339n10).

1533. Mitchell, *Anatolia*, 2:24, arguing from this for "the historical precision of the famous episode in Acts."

1534. Mitchell, "Asia Minor."

1535. Hemer, *Acts in History*, 110.

1536. MAMA 1:xii. Outside the elites, much of the empire was "creolized" rather than "romanized" (Webster, "Creolizing").

1537. MAMA 1:xiii; cf. also Mitchell, "Phrygia"; Lejeune, "Phrygian Language." Likewise, the Pisidian language persisted in Pisidia's countryside (Mitchell, "Pisidia").

1538. MAMA 1:xii.

1539. MAMA 7:xliv; see also Mitchell, *Anatolia*, 2:155.

1540. Bruce, *Commentary*, 291. Romanization had begun far more recently than hellenization; romanizing a countryside went slowly, in some parts of North Africa "six centuries after the Roman conquest" (Garnsey and Saller, *Empire*, 192–93), though army recruitment helped (194); many in rural areas had "little [direct] experience . . . of Rome" (203).

1541. Ramsay, *Discovery*, 66; MacMullen, *Social Relations*, 45–46; Meeks, *Urban Christians*, 15; idem, *Moral World*, 25; Avi-Yonah, *Hellenism*, 131; cf. Stowers, *Letter Writing*, 71. This was true also for ethnic Galatians (Tarn, *Civilisation*, 171).

1542. Porter, *Paul in Acts*, 137, citing Brixhe, *Essai sur grec anatolien*, passim; cf. Consani, "Koiné et dialectes," esp. 32–33; Abbott, *Acts*, 160. Greeks could associate local "dialects" with lack of civilization (Parsons, *Acts*, 201, citing Strabo 8.1.6; 13.1.25).

Perhaps Paul and Barnabas could address only the Greek-speaking population directly;¹⁵⁴³ though Paul may have lacked means of contact with the Roman citizen population anyway, he probably did not know Latin well enough to preach in it at this point. (Even in Rome, most Jews spoke Greek.)¹⁵⁴⁴

Lycaonian speakers, however, no doubt understood Greek (in varying degrees); it was simply that they spoke among themselves in their first language or dialect, which Paul and Barnabas did not know.¹⁵⁴⁵ Luke reports the linguistic confusion to explain why the apostles did not intervene before matters became obvious (14:13–14).¹⁵⁴⁶ Whether or not Paul needed an interpreter to speak, he needed interpretation to understand (see comment on Acts 14:14).

(3) Proposed Mythical Backgrounds

Some scholars argue for the utility of a variety of Phrygian mythical traditions here.¹⁵⁴⁷ (Although Lystra was more Lycaonian than Phrygian, the latter, larger culture was sufficiently widespread in the area for interpreters to reasonably draw on its more widely extant background here.) Amy Wordelman suggests particular mythical backgrounds for the account here that differ from the usual approach. In Homer, Athena transforms herself in disguise (*Od.* 1.96–324, 405–19), for gods often come in disguises (17.484–87).¹⁵⁴⁸ (As noted below, this was a common motif in Greek myth, too pervasive by itself by this period to isolate a specific source.) She points out that some philosophers rejected this ideology; by locating the deification of Paul in rural Asia Minor, Wordelman suggests, Luke can dissociate it from Greek or Roman thought, which could reject such ideas.¹⁵⁴⁹ One wonders, however, whether on a popular level most Greeks did reject such ideas; Luke certainly does not isolate the idea in rural Asia Minor (Acts 10:25; 12:22; 28:6).

Wordelman notes that Ovid reports three stories in which mortals test Jupiter's (Zeus's) hospitality; in one case, Jupiter turns inhospitable Lycaon (Gk. Lykaon) into a wolf (λύκος) for rejecting his divinity;¹⁵⁵⁰ this provides a play on words with "Lycaonian" (14:11).¹⁵⁵¹ Given this background of transformation, Greeks spoke of "wolf-friendships," initial friendship that rapidly transmutes into enmity; Wordelman suggests that this helps explain the Lycaonians' fickle behavior.¹⁵⁵² The fickle attitude

1543. So Ramsay, *Discovery*, 67n2.

1544. See Leon, *Jews of Rome*, 75–77; Lung-Kwong, *Purpose*, 105; Noy, "Writing"; Avi-Yonah, "Archaeological Sources," 54. Of 534 inscriptions, Leon, *Jews of Rome*, 75, reckons that 76 percent are in Greek and 23 percent are in Latin, the latter concentrated in particular communities. If Paul later went to Spain (Rom 15:24, 28; cf. *1 Clem.* 5.5–7), he would need more Latin.

1545. With Haenchen, *Acts*, 431. This phenomenon can often be observed in bilingual settings with both "mother tongues" and "national languages." I have witnessed it in various African contexts.

1546. With Abbott, *Acts*, 160.

1547. Weaver, *Epiphany*, 7–9 (citing the metanarrative of Phrygian myth more generally), following esp. Bechard, *Walls*, 279–80.

1548. Wordelman, "Divides," 221.

1549. *Ibid.*, 222, citing Plato *Rep.* 2.380D–382D (and, less relevant, *Soph.* 216AB).

1550. Wordelman, "Divides," 223–31. On the myth, see Visser, "Lycaon"; on its original association especially with Arcadia (in Achaia), see Visser, "Lycaon," 909. For the prominence of the legend and its mixture with other local elements in Iconium, see Mitchell, *Anatolia*, 1:208.

1551. Wordelman, "Divides," 224–25. Such wordplays could also involve other λυκ- roots (e.g., Heracl. *Hom. Prob.* 7.10–11, implausibly preferring λυκαυγής or λυκάβας to λυκία, Lycia, as background for λυκιγενής; perhaps Quint. Curt. 3.1.1, 5).

1552. Wordelman, "Divides," 227 (citing for "wolf-friendship" Plato *Ep.* 318E; Marc. Aur. 11.15; Euseb. *H.E.* 6.43.6; cf. the wolf in Plato *Phaedr.* 241CD). On 227–28, she notes that Plato *Rep.* 8.565D applies the image to rulers who become tyrants (unfortunately, on 230 she appears to view the entire persecution theme in Acts through this narrow grid). For beliefs about wolf-like physiognomy, see Hünemörder, "Wolf," 691. For the fickleness of barbarians, see also Tac. *Ann.* 14.23.

of crowds is a common motif in ancient literature and is hardly limited to Lycaonia in Acts (see, e.g., 12:3 with 2:47; 16:17–19; 28:4–6), and so it is uncertain how far to press such a proposal. Nevertheless, although Wordelman argues the thesis insightfully and there may be value in it, I am convinced that in this case the conventional view of commentators—an allusion to the Baucis and Philemon myth—is more relevant. Although Lycaon's unbelief may count as a factor (indeed, we shall explore elements in a range of myths below), only the Baucis and Philemon myth includes both Zeus and Hermes together, testing hospitality.¹⁵⁵³

(4) *Baucis and Philemon*

Most commentators recognize the background of a particular myth here—namely, that of Baucis and Philemon.¹⁵⁵⁴ Ancient Phrygian tradition, reinterpreted through a Hellenistic and Roman grid,¹⁵⁵⁵ spoke of Zeus and Hermes coming to people in Phrygia; when all but one couple (Baucis and Philemon) failed to respond hospitably, the gods destroyed everyone else in a flood (Ovid *Metam.* 8.618–724).¹⁵⁵⁶ Some scholars have complained that Ovid, a Roman, is our earliest attestation for the story.¹⁵⁵⁷ But Ovid (43 B.C.E.–17 C.E.) wrote long before Paul's visit or Luke's account (this work, probably shortly before his exile in 8 C.E.),¹⁵⁵⁸ and a comparison of the rest of his work with earlier-attested myths demonstrates that most of his stories reflect earlier sources, even when he adds the transformation element relevant to his theme. Lycaonians also blended the story of a catastrophic flood with stories of their legendary founder, Lycaon.¹⁵⁵⁹

Because of this tradition, Jews also associated the flood with Phrygia (*Sib. Or.* 1.196) and located Ararat there (1.261–62).¹⁵⁶⁰ Second-century Christians in Asia Minor seem to have agreed.¹⁵⁶¹ (Because of their narrower canon, Jews focused on the flood even more than did Gentiles.¹⁵⁶² The flood was viewed as having inaugurated a new

1553. Pervo, *Acts*, 354, seems right to recognize Wordelman's scholarship as insightful while nevertheless finding stories like Baucis and Philemon more probable here.

1554. E.g., Ramsay, *Galatians*, 226; Foakes-Jackson, *Acts*, 126; Bruce, *Documents*, 95–96; Schille, *Apostelgeschichte*, 305; Fitzmyer, *Acts*, 531; Grant, *Gods*, 26; Hansen, "Galatia," 394; Bechard, *Walls*, 292–300 (as one example of local flood stories); Talbert, *Acts*, 124; Parsons, *Acts*, 199; Pervo, *Acts*, 353–54; idem, *Mystery*, 64; Rowe, *World*, 20–21; Green, "Acts," 753; contrast Hanson, *Acts*, 148. Lake and Cadbury, *Commentary*, 164, wonder what may have been the names of the Lycaonian deities behind Luke's (and perhaps Ovid's) narrative. Some, however, propose that contemporary Lycaonian was a dialect of Greek (see comment above); and hellenization of deities and their names might occur faster than the language as a whole.

1555. Although it is probably not relevant here, Greeks and Romans spoke of "Phrygian tales" in connection with euhemeristic or allegorical approaches to myths (Rives, "Phrygian Tales").

1556. The parallels to the well-known Greek story of Deucalion and Pyrrha (allusions in Ovid *Metam.* 1.322–29; Dio Chrys. *Or.* 36.49; Lucian *Patriot* 1; *Prof. P.S.* 20; *Syr. G.* 12–13; Philost. *Hrk.* 7.6; cf. Paus. 1.18.8) might be genetic, but this story is also indigenously Phrygian (e.g., "Baucis" is a Phrygian name; see Trebilco, *Communities*, 88–90). For southern Asia Minor flood traditions, see, helpfully and thoroughly, Bechard, *Walls*, 291–337; in other Mediterranean flood myths, see Stenger, "Deluge" (citing, e.g., Ovid *Metam.* 1.253–415; Apollod. *Bib.* 1.46–48; Plato *Critias* 110D–112A; *Tim.* 25CD); in Ovid *Metam.* 1.253–61, Jupiter sends a flood in lieu of destroying the world by fire.

1557. Wordelman, "Divides," 219. She does not oppose use of Ovid (on whom she also depends [223]); here she notes earlier attestation of the tradition, but I would argue that Ovid's dependence on sources where we can evaluate him suggests that he normally did depend on sources).

1558. Hinds, "Ovid," 1085. At least in later Rome, we have evidence that Ovid's own work was influential (see Hinds, "Martial's Ovid").

1559. Mitchell, *Anatolia*, 1:208; Bechard, *Walls*, 280–91, esp. 286–91.

1560. They also associated fallen Troy with judgment on Phrygia (*Sib. Or.* 3.205–6; 3.401–7; might this imply judgment on Troy's Roman descendants?), though this was a different region of Phrygia than is in view here.

1561. Phrygia (*Sib. Or.* 7.13) was the first land to emerge after the flood in 7.7–15, probably second-century Christian material.

1562. E.g., 1 *En.* 10:2; 54:7–10; 65:1; 106:15; *Jub.* 4:24–7:34; 4Q422 II, frg. 2–6; *Sib. Or.* 1.129, 168; 3.109; 4.53; *Jos. Ant.* 1.75–95; 4 *Macc* 15:31; 4 *Ezra* 3:9–10; 2 *Bar.* 56:15; 77:23; 3 *Bar.* 4:10; *Test. Reub.* 5:6;

era.)¹⁵⁶³ Although the Phrygian flood story existed from as early as the third century B.C.E., before Jews had settled there,¹⁵⁶⁴ Phrygian Jews mingled their flood story with the local story to the satisfaction of Jews and Gentiles alike.¹⁵⁶⁵ Late second- or early third-century C.E. coins from Apamea in Phrygia explicitly portray Noah (ΝΩΕ) and the ark, suggesting that the Jewish community there was sufficiently influential for its version of the flood to become part of the local mythology;¹⁵⁶⁶ likewise, the Jewish coins join Noah with his wife to fit the local story.¹⁵⁶⁷ Noah was, after all, said to be the common ancestor of Jews and Gentiles alike.

With a tradition from this region¹⁵⁶⁸ (a tradition so prominent that it was known abroad) providing such a lesson, the region's inhabitants would not want to repeat their regional ancestors' mistake of inhospitality. Other factors would also encourage rapid acknowledgment of visiting deities. People in this region were morally strict,¹⁵⁶⁹ and many confession texts from nearby regions of Asia Minor view suffering as divine punishment;¹⁵⁷⁰ with such sensitivity to divine retribution, locals would not wish to miss their opportunity with the gods' apparently having come in person.

Anatolian religion in the first three centuries C.E. further emphasized contacts between deities and mortals.¹⁵⁷¹ Their inscriptions indicate that Phrygians also worshiped their deities as ἐπιφανέστατοι, "manifest."¹⁵⁷² This was not, however, a distinctively Phrygian belief; even some Neoplatonists, in contrast with some other forms of

Test. Naph. 3:5; *m. 'Ab.* 5:2; *B. Meši'a* 4:2; *Mek. Bah.* 10.20ff. (Lauterbach, 2:278); *Sipre Deut.* 43.3.2; 310.2.1; *Pesiq. Rab Kah.* Sup. 4:1; *b. B. Meši'a* 49a, bar; *Gen. Rab.* 27:3; 49:5; 1 Pet 3:20. To later rabbis, they were particularly wicked (*Gen. Rab.* 26:5); hence they received the harshest judgment in history (*Tg. Ps.-J.* on Gen 6:3) and would not inherit the coming world (*m. Sanh.* 10:3; *t. Sanh.* 13:6; *Sanh.* 108a; *Gen. Rab.* 28:8). But in a range of sources, the flood judgment prefigured the eschatological fire judgment (*Jos. Ant.* 1.70; *L.A.E.* 49:3; *t. Ta'an.* 2:13; 2 Pet 3:5–7; cf. *Lev. Rab.* 7:6).

1563. *Sib. Or.* 1.195 (a "second age"); *Philo Mos.* 2.64; cf. 2 Pet 3:6–7, 13.

1564. Levinskaya, *Diaspora Setting*, 150–52. Flood stories were pervasive in early second-millennium Mesopotamia (a Sumerian account in ANET 42–44; The Epic of Gilgamesh [ANET 72–99]; Atrahasis [ANET 104–6]; cf. Albright, *Yahweh*, 98–99; Gordon, *Near East*, 50; idem, *Civilizations*, 76–77; Kitchen, *World*, 28–30; Frymer-Kensky, "Epic"; idem, "Flood Stories"); the Mesopotamian story was widely circulated (see Aharoni, *Archaeology*, 142–43; Gordon, *Civilizations*, 86), and traces apparently persisted (Collins, "Sibylline Oracles," 340, esp. n. 1), probably through Berossus's account (*Jos. Ag. Ap.* 1.130–31; *Ant.* 1.93); flood stories also appear elsewhere (Mbiti, *Religions*, 70). Some ancients knew that Eastern flood myths differed to some degree from the Greek version (Dio Chrys. *Or.* 36.49); identified Noah with Deucalion (*Philo Rewards* 23); or treated the biblical story as older (Theoph. 3.18–19).

1565. Fletcher, "Correction," even finds an echo of Gen 8:3 LXX in another flood setting in Ovid *Metam.* 1.294 (*ararat*; this is, however, simply a form of Latin *aro*).

1566. Trebilco, *Communities*, 86–88; idem, "Communities," 567–68; Meyers and Kraabel, "Remains," 191; Mitchell, *Anatolia*, 2:33; cf. Phrygia's prominence in the Diaspora flood account in *Sib. Or.* 1.196–98, 261–62. Apamea is more than 150 km. west of Iconium.

1567. Trebilco, *Communities*, 93. Josephus's flood narrative (*Ant.* 1.99) shares elements in common with the Deucalion story in Ovid *Metam.* 1, perhaps suggesting influence (whatever its direction; see Gossmann, "Möglichkeit"; though cf. Gen 9:15). Various cultures' versions of the deluge (including the Greek and biblical ones) were often connected (Diod. Sic. 1.10.4; *Jos. Ag. Ap.* 1.130–31). Moffatt, *General Epistles*, 142, even connects the emphasis on the flood in 1 Pet 3:21 with local Asian interest, as illustrated in Apamea.

1568. Griffiths, "Baucis," argues that it is rooted in an "ancient Anatolian tree cult."

1569. Harrill, "Asia Minor," 134; Mitchell, *Anatolia*, 1:189, 191. On the mother goddess there, cf. also Martin, *Colossians*, 4.

1570. Gordon, "Sceptre"; on confession texts and fear of punishment, see also Niang, *Faith*, 51–63.

1571. Mitchell, *Anatolia*, 2:12, noting, e.g., that Apollo at Didyma announced that the gods were spending more time with mortals lately, appearing to them as children or adults of either gender; the gods were present on reliefs and honored for benefactions. Inscriptions frequently report gods ordering mortals "to set up a monument or to perform a pious action." This happened most often through dreams; Apollo spoke through oracles at Clarus and Didyma but also, on a smaller scale, throughout Asia Minor. Cf. dice oracles in Lycia and Pisidia (p. 13).

1572. Ramsay, *Galatians*, 226.

Neoplatonism, insisted that the gods could dwell with people instead of being only remote in the heavens (Iambl. *Myst.* 1.8).

(5) *Disguised Deities (14:11)*

Most commentators recognize the background of the Baucis and Philemon myth here,¹⁵⁷³ and it appears fairly obvious to those acquainted with Ovid.¹⁵⁷⁴ In addition to his biblical allusions, Luke assumes his audience's familiarity with the Dioscuri in Acts 28:11, makes allusion to Socrates in 17:19, and may allude to other Greek traditions in 16:9, and so there is no reason to doubt that he would make an allusion with local color here.

It is nevertheless appropriate to examine the broader context of Greco-Roman myth and fiction, in which deities came in disguises or (less often) disguised their favored mortals for their protection. Sometimes this motif included the moral of hospitality (cf. Gen 18:1–16; Heb 13:2). It was known that one should never mistreat beggars or strangers, who sometimes turned out to be deities from heaven in disguise (Hom. *Od.* 17.484–87). Likewise, an old woman fortunately responded to Demeter's request for water (Ovid *Metam.* 5.449–50), but the goddess turned into a lizard a boy who mocked her (5.451–61). Gods could visit and receive hospitality in human likeness, then vanish (Eunapius *Lives* 468). Jupiter came disguised in human form but induced the commoners to worship him after he gave them signs (*signa*) that a deity had come (Ovid *Metam.* 1.220). In times more recent to Luke's narrative, two visitors were said to have lured Simonides outside a banquet hall just before it collapsed, saving him, but then they could not be found (Val. Max. 1.8.ext. 7).

In Homeric epic, deities often came in disguises, sometimes as persons known to others, both in the *Iliad*¹⁵⁷⁵ and in the *Odyssey*.¹⁵⁷⁶ Roman epic inherited the idea as well, which appears several times in Virgil's *Aeneid*.¹⁵⁷⁷ Ovid, who reports the Phrygian

1573. E.g., *ibid.*; Foakes-Jackson, *Acts*, 126; Bruce, *Documents*, 95–96; Fitzmyer, *Acts*, 531; Grant, *Gods*, 26; Hansen, "Galatia," 394; contrast Hanson, *Acts*, 148. As noted above, Lake and Cadbury, *Commentary*, 164, wonder about the names of the Lycaonian deities behind Luke's (and perhaps Ovid's) narrative. Some scholars, however, propose that contemporary Lycaonian was a dialect of Greek (see comment above); moreover, given antiquity's ready adoption of new deities from dominant cultures, hellenization of deities and their names (see discussion below) would probably occur faster than the hellenization of the language as a whole.

1574. For a recent example of reception history: on my first reading through Acts (decades ago, a few months after my Christian conversion from atheism), without access to or knowledge of commentaries but with considerable familiarity with Greek and Roman mythology (through Homer, Virgil, Ovid, Greek dramatists, etc.), I immediately recognized the resonance with Ovid's story (with which I was then more familiar than with the Bible); I had not expected to find such allusions. (I probably did also think of Ovid's Deucalion and Pyrrha flood story, but that recollection struck me more when I first read Genesis.) I would suppose that ancient pagan readers familiar with the popular myths on which Ovid drew would have recognized the similarities no less quickly. The transformation of the couple at the end could be Ovid's redaction to fit his unifying theme.

1575. Athena (as Laodocus, Hom. *Il.* 4.86–87; as Phoenix to Menelaus, 17.554–55; as Deiphobus to Hector, 22.224–31 [he realizes it only in 22.298–99]); Iris (as Helicaion, 4.121–24); Poseidon (as Calchas, 13.43–45, 69; as Thoas, 13.215–16; again in disguise, lest his intervention offend Zeus, 13.356–57; as an old man to Agamemnon, 14.136); Apollo (as Asius to Hector, 16.715–20; as Mentos to Hector, 17.71–73; as Periphas to Aeneas, 17.322–26 [but in 17.333 Aeneas recognizes him]; as Phaenops to Hector, 17.582–83; as Lycaon to Aeneas, 20.79–81; as Agenor to Achilles, 21.599–611; 22.7–11); Poseidon and Athena (to Achilles, 21.284–86); Hermes (to Priam, 24.354–458 [revealed in 24.459–61]).

1576. Where it most often involves Athena: as Mentos to Telemachus (Hom. *Od.* 1.105; cf. 1.113–35 [but Telemachus knows by 1.420]); as Mentor to Telemachus (2.267–68; 2.399–401 [traveling with him throughout *Od.* 3, like Raphael with Tobias, until revealing herself in 3.371–72]); as Telemachus himself (2.382–87); as a woman to Nausicaa (6.21–22); to Odysseus (as a young maiden, 7.19–20; 13.288–89; as a young shepherd, 13.221–22; as Mentor, 22.205–6 [becoming a swallow in 22.239–40]; 24.502–5, 548); to the Phaeacians (like their king's herald, 8.8; or as another man, 8.193–94); cf. also Hermes as a young man to Odysseus (10.277–79). For divine visitation in Homer, see also Denaux, "Theme," 266–68.

1577. Venus (as a virgin to Aeneas, Virg. *Aen.* 1.314–15 [he recognizes her as she turns in 1.402–6]); Cupid (as Ascanius to Dido, 1.657–60); Iris (as Beroë, 5.618–20 [but someone who knows Beroë well, and that she is not present, recognizes that it is a goddess, 5.645–52]); Allecto, a Fury (as an old woman in a dream, 7.415–16); Apollo (as Butes, 9.646–52 [but his disappearance reveals him, 9.658]).

story above, also narrates other appearances of deities,¹⁵⁷⁸ including the two deities mentioned in Acts 14:12. For example, Jupiter traveled disguised as a human, observing humanity's impiety (Ovid *Metam.* 1.212–13);¹⁵⁷⁹ Mercury came to Argus as a shepherd (1.676).¹⁵⁸⁰ In many tales, Zeus approached mortals in disguise to secure intercourse with them.¹⁵⁸¹ Greeks and Romans also told stories of immortals who metamorphosed into various forms trying to escape mortal captors who solicited information from them¹⁵⁸² or even managed to marry them.¹⁵⁸³ Morpheus imitated various human shapes (11.633–38), Icelos those of animals (11.638–40), and Phantasos other things (11.641–43). Jewish people spoke of angelic visits in disguise; the story of Abraham's hospitality (Gen 18:2–16) was the Jewish story par excellence of surprise visits from angels (Heb 13:2).¹⁵⁸⁴ Perhaps an important narrative connection of the theme of divine visitation here is also Luke's own background of God's visiting through Jesus in the Gospel (cf. Luke 1:68, 78; 7:16; 19:44).¹⁵⁸⁵

Greeks also sometimes suspected mortals of being divine, whether philosophers, heroes, or emperors.¹⁵⁸⁶ Some of Pythagoras's contemporaries allegedly (the report is late) suspected his deity (Iambl. *V.P.* 6.30). Local heroes also could receive almost any honor they solicited (Libanius *Declam.* 36.13);¹⁵⁸⁷ an emperor would naturally be praised as divine (Men. *Rhet.* 2.1–2, 370.21–26; 370.29–371.2; cf. comment on Acts 12:22); titular acclamations of various sorts were common after miracles.¹⁵⁸⁸ Ancient writers expected that common people would hail wonder-workers as divine;¹⁵⁸⁹ this might be particularly the case in smaller, out-of-the-way settlements where wonder-workers were probably less frequent.¹⁵⁹⁰ In Amoraic tradition, Abraham rejected being praised as king and god, declaring that the world has a true God and king (*Gen. Rab.* 42:5; 43:5).

The passage is pregnant with irony: rejected by some of their fellow Jews in Acts 14:2, the apostles are acclaimed as gods in the next town; they preach monotheism to idolaters, then are further assaulted by monotheistic enemies who join forces with the idolaters to attack them.¹⁵⁹¹ One suspects that the irony is deliberate: their opponents' blind hostility to the Messiah was so great that it appeared more important to them here than the common front for monotheism in a mainly polytheistic environment.

1578. Juno disguised as Beroë, Semele's nurse (Ovid *Metam.* 3.275–77); the sun like Leucothoë's mother, to kiss the daughter (4.222); Athena as an old woman, to warn Arachne to humble herself (6.26–27). Deities often came in disguise to seduce mortals (e.g., 14.765–71).

1579. Jupiter also disguised himself as Diana, to rape one of her virgins (Ovid *Metam.* 2.425, 434–37); as a bull, to seduce a woman (2.850–51). That he and Mercury came disguised as mortals (8.626–27) thus fits Ovid's interests.

1580. Mercury also changed shape to determine whether a witness would betray his theft of cattle (Ovid *Metam.* 2.698).

1581. E.g., Apollod. *Bib.* 2.4.1 (a stream of gold); 2.4.8; 3.1.1 (a bull); 3.8.2; 3.10.7 (a swan); 3.12.6; objecting, see Max. Tyre 35.1; for Poseidon, see Libanius *Narration* 39.

1582. E.g., Proteus in Virg. *Georg.* 4.405–14, 440–42; Nereus in Apollod. *Bib.* 2.5.11.

1583. Thetis in Apollod. *Bib.* 3.13.5; Ovid *Metam.* 11.241–46, 250–64.

1584. E.g., Philo *Abr.* 114; *Test. Ab.* 2:1 B; *Sipre Deut.* 38.1.4; *Tg. Neof.* 1 on Gen 18:1; also *Tg. Ps.-J.* on Gen 18:2. On the relevance of Gen 18–19 here, see also Denaux, "Theme," 268–72. Elsewhere, two angels made it appear that the pilgrims to Jerusalem remained home, so that their Gentile neighbors would not rob their home (*y. Pe'ah* 3:8, §3). Cf. Satan in *Test. Job* 23:2.

1585. Denaux, "Theme," 272–78.

1586. See comment on Acts 10:25–26; also material in Keener, *John*, 178–79, 291–93, 298–99.

1587. Past heroes were accorded divine honors in cults (Maclean and Aitken, *Heroikos*, I–IV [esp. lii], lxxvii–lxxviii, lxxxi), which grew especially in later centuries.

1588. Theissen, *Miracle Stories*, 161. The ancient world accepted many preachers and miracle workers as deities (Murray, *Stages*, 195).

1589. Hanson, *Acts*, 148, cites Lucian *Alex.* 13 and (for Apollonius being charged with claiming worship) Philost. *Vit. Apoll.* 8.5.

1590. Nor were rural areas necessarily more credulous (cf. Theissen, *Miracle Stories*, 247).

1591. Cf. Dunn, *Acts*, 189.

(6) *Zeus and Hermes (14:12)*

For connections with a particular myth involving these deities as well as relevant motifs in Greek and Roman mythology, see comment on Acts 14:11. The choice of the deities Zeus and Hermes fits the story of Baucis and Philemon, but Zeus and Hermes were also paired in local inscriptions, including a probable case from Lystra itself (whether related to that story or not).¹⁵⁹²

Remains from Lystra also include a relief connecting Hermes with Zeus's eagle; although the pair appear together throughout Asia Minor, "the concentration of evidence in the region of Lystra is highly suggestive" and fits Luke's description.¹⁵⁹³ Granted, their linkage was by no means unusual.¹⁵⁹⁴ Hermes carried out Zeus's bidding, carrying messages for him as for the gods in general (e.g., Hom. *Il.* 2.102–4; Lucian *Downward Journey 2*; *Charon 1*). Together they were guardians of ambassadors and of the sacred laws that required ambassadors to faithfully represent their message.¹⁵⁹⁵

Zeus was the most prominent and dominant member of the traditional Olympian pantheon and continued to be worshiped in a more religiously diverse era.¹⁵⁹⁶ The omnipotence of his Roman equivalent, Jupiter, was a dominant theme for him in Roman literature.¹⁵⁹⁷ Shrines for Zeus were pervasive throughout Asia,¹⁵⁹⁸ including in Galatia; he is especially attested as Zeus Megistos in Iconium and northern Lycaonia.¹⁵⁹⁹ Zeus appears frequently in Phrygian inscriptions, far more often than Hermes.¹⁶⁰⁰ Temples to Zeus were common throughout Galatia, and he was the most frequent object of worship there.¹⁶⁰¹ Jewish sources associate Zeus in a special way with Phrygia (*Sib. Or.* 4.130–31),¹⁶⁰² though not all Jews would have regarded this as a compliment to Phrygia (11.134).¹⁶⁰³

1592. Ramsay, *Discovery*, 48–49; Deissmann, *Light*, fig. 53, facing p. 281; Knoll, *Denkmäler*, 76–77, §146; Bruce, *Documents*, 95–96; Hemer, *Acts in History*, 111; Hansen, "Galatia," 393; Gill, "Religion," 83–84. These writers cite MAMA 8.1; Calder, "Cult of Homonades," esp. 79–81; idem, "Zeus and Hermes at Lystra"; idem, "Acts 14:12"; idem, "Light on Baucis and Philemon."

1593. Mitchell, *Anatolia*, 2:24.

1594. Hermes often accompanies Dionysus in sixth- to fifth-century B.C.E. vase paintings (Ley, "Hermes," 220). Associated deities were common; Mitchell, *Anatolia*, 2:25–26, notes that north and central Phrygians worshiped the pair "Holy and Just," sometimes along with Apollo (e.g., *RECAM* 2.44, 45; MAMA 5.11; cf. Niang, *Faith*, 51).

1595. Witherington, *Acts*, 424–25, citing Plato *Laws* 12.941A, the most appropriate text on the subject.

1596. See further Murray, *Stages*, 70–71; most extensively, Cook, *Zeus*; see esp. Burkert, *Religion*, 125–31; Graf, "Zeus"; Henrichs, "Zeus"; for iconography, Bäbler, "Zeus."

1597. E.g., *Virg. Aen.* 1.60; 3.251; 4.25, 206, 220; 6.592; 7.141, 770; 8.398; 9.625; 10.100, 668; 12.178, 791; *Georg.* 2.325; Ovid *Metam.* 1.154; 2.304, 401, 505; 3.336; 9.271; 14.816; Val. Flacc. 3.249; in Greek, Callim. frg. 586; Plut. *Isis 2*, *Mor.* 352A; van der Horst, "Macrobius," 232, also cites *Macrob. Sat.* 1.23.21. But Juno might be *omnipotens* (*Virg. Aen.* 7.428) yet prove unable to prevail against Fate (7.314); other deities as omnipotent, e.g., Pluto in *Orph. H.* 18.17 (but perhaps as the "chthonic Zeus," 18.3).

1598. Mitchell, *Anatolia*, 2:22.

1599. *Ibid.*, 2:23 (citing, e.g., MAMA 7.432, 521).

1600. E.g., MAMA 1.3, 4, 5, 7, 7a, 7b, 373, 429, 435, 435a (I did not find Hermes in this volume); in Phrygia and Caria, see 6.87, 88, 180, 242–43, 244, 250, 360, 370, 387 (Hermes might appear—though only two letters are clear—in 6.1, line 2); in eastern Phrygia, 7.105, 192, 359, 453, 476 (none with Hermes); in eastern Asia and western Galatia, 4.137, 138, 141, 184, 213, 226, 227, 265, 266, 267, 268. Note also Zeus "Soter" (1.6; 4.309; 6.2); "Megistos" (7.1, 107, 130, 135, 432, 521); Tios (Dios; 7.312, 313, 314, 316, 318, 406, 454, 495).

1601. Hansen, "Galatia," 393.

1602. Although this oracle may stem from early second-century C.E. Egypt, it probably reflects information from Phrygian Jewry. Many traditions assigned Zeus's birthplace to Crete (Hesiod *Theog.* 479–80; Apollod. *Bib.* 1.1.6; Lucian *Sacr.* 5, 10; cf. Diod. Sic. 3.61.1–3; Paus. 8.38.2; Max. Tyre 10.1; Philost. *Vit. Apoll.* 4.34; Sonnabend, "Ida"; Guthrie, *Greeks and Gods*, 40ff., 106, 155ff., 197, 201, 203, 209, 257; Norwood, *Greek Tragedy*, 310); but the Phrygian mother and the Cretan cave refuge were reconcilable (Strabo 10.3.7). In *Sib. Or.* 3.139–41, he was merely *reared* in Phrygia (probably implying Mount Ida near Troy; in either case, explaining his loyalties during the Trojan War). Cretans appear particularly attached to Zeus (Plato *Laws* 1.624A).

1603. The negative portrayal of the son of Cronus here may stem from the late first century B.C.E.

Why was Barnabas associated with Zeus? Some scholars suggest that “he was tall and stately”¹⁶⁰⁴ or that, as on local reliefs of Zeus Ampelites, he was elderly and bearded whereas Paul, like Hermes in the reliefs, was a younger aide.¹⁶⁰⁵ Although such associations are possible, the Lystrans may have associated Barnabas with Zeus simply because Paul was the main speaker¹⁶⁰⁶ (which is, in fact, the only reason that Luke explicitly offers). If Paul represented Hermes and the local people expected Zeus and Hermes as a pair, Barnabas would be identified as Zeus. Perhaps even Paul’s miracle working (Acts 14:9) seemed the delegated task of the messenger.

Normally the chief speaker held higher status than the other speaker (e.g., in the theater, Cic. *Ag. Caec.* 15.48), but the expectation of a Hermes-Zeus pair overrides that pattern here.¹⁶⁰⁷ Hermes was god of thieves,¹⁶⁰⁸ was a patron of travelers¹⁶⁰⁹ and commerce,¹⁶¹⁰ and (most important for our purposes) is called the “chief in speech” among deities (Iambl. *Myst.* 1.1).¹⁶¹¹ As noted above, Hermes was the chief messenger of the gods (e.g., Hom. *Od.* 1.38, 84)¹⁶¹² as well as chief crier for the gods¹⁶¹³ and in the underworld.¹⁶¹⁴ Further, he was a deity of crafty and eloquent speech (e.g., Aeschylus *Lib.* 811–18; Philost. *Vit. Apoll.* 5.15),¹⁶¹⁵ god of orators (Lucian *Nigr.* 10). Greeks could view a supposed Egyptian equivalent of Hermes as also a master of speech, creating the alphabet, naming objects, and creating a common dialect (Diod. Sic. 1.16.1). Stoics and others who allegorized myths equated Hermes with the λόγος, or word, of the gods.¹⁶¹⁶

1604. Grant, *Gods*, 20 (Zeus was naturally taller in a local portrayal, 25).

1605. Witherington, *Acts*, 422.

1606. Hermes was associated with wisdom (and his statues adorned Roman classrooms) in Cic. *Att.* 1.4.3. Paul was probably also the dominant theological thinker, though it should be noted that Paul and Barnabas must have agreed in their basic theological outlook and missionary approach, to have worked together so long (Hengel and Schwemer, *Between Damascus and Antioch*, 219). When they together defended Paul’s gospel in Jerusalem (Gal 2:1, 9), Paul was dominant there (2:2, 7).

1607. Cf. also the model of a messenger’s status deriving from the sender whom he represents (e.g., Dion. Hal. *Ant. rom.* 6.88.2; *m. Ber.* 5:5; *t. Ta’an.* 3:2; *b. Naz.* 12b); Keener, *John*, 313.

1608. Guthrie, *Greeks and Gods*, 91–92. Cf. the account of Hermes’s own youthful thievery in Apollod. *Bib.* 2.1.3; 3.10.2; Ovid *Metam.* 2.685–86; Lucian *Dial. G.* 220 (11/7, Hephaistos and Apollo 1); Philost. *Elder Imag.* 1.26; cf. Lucian *Prom. S.*; Burkert, *Religion*, 156–57.

1609. See Casson, *Travel*, 173–74.

1610. Levick, *Roman Colonies*, 99, attributing to this Hermes’s prominence on coins in nearby Antioch and Cremna; Philost. *Vit. Apoll.* 5.15. As deity of the market, see Lucian *Indictment* 8.

1611. Cited in Conzelmann, *Acts*, 110 (comparing also Ael. Arist. *Or.* 46.398); Johnson, *Acts*, 248; Fitzmyer, *Acts*, 531.

1612. Further, e.g., Lucian *Dial. G.* 275 (4/24, Hermes and Maia 1); 229–31 (14/10, Hermes and Helios 1–2, *passim*). Hephaestus also prefers that Hermes speak for him (Lucian *Prom. S.*). Hermes was the deity of messengers and heralds (Baudy, “Hermes,” 218); early vase images portray him primarily as the messenger for the gods (Ley, “Hermes,” 220).

1613. Lucian *Z. Rants* 6–7; *Indictment* 12; *Runaways* 26–27. He functions as crier at the figurative auction in Lucian *Phil. Sale* *passim*, e.g., 7 (the same term applies to auctioneers, e.g., in *Lucius* 35), and crier in the assembly and market (*Indictment* 8).

1614. Lucian *Downward Journey* 23. He was also the “guide” of souls there (*Downward Journey* 1; *Dial. G.* 276 [4/24, Hermes and Maia 1]; cf. *Dial. D.* 424 [2/22, Charon and Menippus 1]; 408 [5/18, Menippus and Hermes 1]; 341–43 [14/1, Hermes and Charon 1–2]), as well as tour guide (Lucian *Charon* *passim*, e.g., 24). Greeks thus identified the Egyptian Anubis with Hermes; cf. an allusion to this in Lucian *Dial. S.-G.* 307 (11/7, South Wind and West Wind 2); explicit in Macleod, *Lucian*, LCL, 7:219n1. He appears in art as a psychopomp, escorting souls (Ley, “Hermes,” 220), and was also associated with initiations and Mysteries (Baudy, “Hermes,” 216–19). The cult of Pluto appears here and at Iconium (Mitchell, *Anatolia*, 2:28).

1615. For Hermes and deception, see Jost, “Hermes,” 690; for Hermes and wisdom, Cic. *Att.* 1.4.3. On Hermes in Greek religion, see Burkert, *Religion*, 156–59; Baudy, “Hermes”; Ley, “Hermes”; Martin, “Hermes”; cf. Barr, *Will of Zeus*, 197–99. Perhaps North Galatians would have followed an alleged Celtic identification of eloquence with Heracles instead of Hermes (Lucian *Heracles* 4), but Galatians’ and Gaul’s acquaintance with Greco-Roman religion probably arose independently.

1616. Grant, *Gods*, 26. The gods sent him, “being the λόγος,” from heaven in Cornutus *Summ.* 16 (Lang, 20, lines 18ff.) (and κήρυξ, or herald, of the gods [Lang, 21, lines 18–19]; van der Horst, “Cornutus,” 169).

Whatever the appearance of Barnabas, the crowd identified Paul with Hermes for his speaking ability, not his appearance. By this period Hermes normally appears unbearded, sometimes wearing a leopard skin, and is characterized by his herald's sign (the caduceus), the hat of a traveler (the *petasos*, sometimes winged), and winged sandals.¹⁶¹⁷ Given Paul's elite training (Acts 22:3), which probably included at least some rhetoric,¹⁶¹⁸ it should not surprise us that he proves the primary speaker despite Barnabas's other important gifts.

Even had Paul been educated solely in Jerusalem without any other experience of the pagan world, he (and the Cypriot Barnabas) would know of Hermes both from Judea and from their travels. Roads were often lined with cultic sites and monuments, especially “to Mercury/Hermes, the patron saint of wayfarers”; these were so well known that they appear in rabbinic literature.¹⁶¹⁹

(7) *Phrygian or Greek Deities?*

Lake and Cadbury wondered about the names of the Lycaonian deities behind Luke's narrative,¹⁶²⁰ but as Cadbury recognized later and other scholars have emphasized more forcefully, local deities were already being hellenized in this period.¹⁶²¹ Given the likelihood that Ovid's story about Baucis and Philemon, like many geographically related traditions, was originally a local cult legend from nearby Phrygia, Jupiter/Zeus and Mercury/Hermes were already natural equivalents for local figures; long-known inscriptions verify even the pairing of these Greco-Roman deities in the region (e.g., *MAMA* 8.1; see comment above).

The rural and mountainous interior of Anatolia preserved indigenous languages and religious customs into late antiquity.¹⁶²² Lycaonia reflected considerable Phrygian cultural heritage and influence (although this was far more dominant at Iconium than in Lystra). Some Phrygian inscriptions preserved the names of indigenous pagan deities. But such inscriptions often identified the indigenous deities with Greek equivalents, and the deities had Greek names in the Greek inscriptions.¹⁶²³ Greek influence led to the identification of the local mother goddess of nearby Lycia with Leto, mother of Apollo and Artemis.¹⁶²⁴ Most Asian deities were identified with Greek analogues, although the indigenous Asian deities Cybele and Mên remained distinctive.¹⁶²⁵

Syncretism was perhaps the most outstanding characteristic of religion in the Hellenistic age, and it certainly continued into the Roman period (see comment on

For his involvement with interpretation (the etymology), see Macrob. *Sat.* 1.17.5 (cf. 1.12.20; van der Horst, “Macrob.,” 226). As the explicatory or interpretive word, see also Heracl. *Hom. Prob.* 2.8.2–3; 55.1; 72.4; cf. 67.6–7; 72.7, 19; cf. rational speech in the later Pythagorean Iamblichus *Letter* 5.2 (Stobaeus *Anth.* 2.2.5).

1617. Jost, “Hermes,” 690. Further on his portrayal, especially in an earlier period, see Ley, “Hermes,” 220.

1618. Paul does not write like a professional rhetorician, but he does write like someone with Greco-Roman education beyond the grammar level; i.e., he would have been at least introduced to rhetoric. See, e.g., Keener, *Corinthians*, 4, 25, 29–32; cf. Meeks, “Birth,” 26–27; Malherbe, *Social Aspects*, 54–58; idem, “Theorists,” 17; Holloway, “Prose”; Smit Sibinga, “*Serta Paulina*”; further comment on Acts 22:3.

1619. Le Cornu, *Acts*, 708, noting the (sing.) מרקוליס (citing *m. Sanh.* 7:6; *b. 'Abod. Zar.* 4:1; *t. 'Abod. Zar.* 6[7]:13; *b. Sanh.* 64a; *'Abod. Zar.* 50ab).

1620. Lake and Cadbury, *Commentary*, 164.

1621. Cadbury, *Acts in History*, 23; C. Williams, *Acts*, 170; cf. Greek and Roman names for Syrian deities in Rives, *Religion*, 144.

1622. Mitchell, “Asia Minor.”

1623. See *MAMA* 1:xiii.

1624. Bryce, “Lycia,” 386. On Apollo worship in Phrygia (in Hierapolis), see, e.g., Miller, “Apollo Lairbenos.”

1625. Graf, “Asia Minor: Religion,” 150–51. Cybele originated with a deity called Kubaba in the second millennium B.C.E. but eventually was identified with other mother deities, including the Greek Rhea (see van der Toorn, “Cybele”). On paganism in Anatolia in the first three centuries C.E., see Mitchell, *Anatolia*, 2:11–31. For the predominantly Greek character of Artemis of Ephesus (though Ephesus is in Ionia), see comment on Acts 19:27.

Acts 8:9–11). Local cultures and religions throughout the East were progressively hellenized, more quickly in urban areas than elsewhere.¹⁶²⁶ In the following two centuries, Rome's emperors raised temples in Baalbek (in Lebanon) for local Syrian gods identified with Jupiter, Venus, and Mercury.¹⁶²⁷

Asian cults often retained local color despite Hellenistic names; thus Jupiter Dolichenus represented Hadad and hence was portrayed as riding a bull in ways that linked him with the image of Hadad.¹⁶²⁸ But syncretism meant that local cults would also draw on the Greek and Roman elements of the portrayal, not just the local ones. This would be less so in the case of the popular Agdistis (the Phrygian mother goddess elsewhere called Cybele in Anatolia) and Attis, her consort, where Greek and Roman parallels (such as Adonis) were less prominent.¹⁶²⁹ The status of cities, however, depended on how closely they could link their local cults with Greek (or, in a colony's case, Roman) deities,¹⁶³⁰ and so such syncretism was probably under way among urban residents and accepted by others. Roman citizens and Anatolian residents might not share the same first language, but the Anatolians would have learned from Roman religion.

(8) *Attempted Sacrifice (14:13)*

It is possible that Paul and Barnabas were lecturing near the temple of Zeus mentioned here; Greeks and Romans used temples, as well as other public places, for public lectures.¹⁶³¹ That Luke mentions the temple only in connection with the priest of Zeus and the worshipers, however, probably counts against this suggestion, especially given Luke's previous silence about this location in spite of his desire to accumulate parallels to the paralytic's healing in Acts 3:1–10 (which occurs near a temple gate, 3:2).

That the temple is "before the city" (πρὸ τῆς πόλεως)—that is, outside its gates—is, at the least, likely a historical reminiscence acquired from someone who had traveled in Asia Minor. Urban temples were most often in a city's acropolis or marketplace.¹⁶³² But this description for a temple's location appears fairly frequently in Asia Minor's inscriptions,¹⁶³³ including nearby.¹⁶³⁴ Another deity might be venerated at one deity's shrine,¹⁶³⁵ but only Zeus is mentioned here.¹⁶³⁶

A local inscription mentions priests of Zeus,¹⁶³⁷ who, as noted above, was the most widely worshiped (though not the most distinctive) deity in nearby Phrygia. It was common to have "a college of priests at great temples,"¹⁶³⁸ though the local sanctuary for Zeus was not necessarily a sizable temple. Local priests were often members of the

1627. Munck, *Acts*, 132.

1628. Gill, "Religion," 84; cf. earlier Anatolian storm deities' associations with bulls in Kaiser, "Pantheon," 218. Cf. Hanson, *Acts*, 148, who thinks that the Lycaonian deities were only "vaguely identified with the more cosmopolitan Greek gods." For Zeus as a bull, see also Guthrie, *Greeks and Gods*, 46.

1629. Harrill, "Asia Minor," 134. On the mother goddess there, cf. also Martin, *Colossians*, 4.

1630. Pearson, "Civic Cults."

1631. Siegert, "Homily," 421n1; Watson, "Education," 310.

1632. Cousland, "Temples," 1186, noting exceptions. Cf. the gymnasium of Heracles that was ἔξω πύλων, Plut. *Themist.* 1.2.

1633. Grant, *Gods*, 25 (noting CIG 2462, 2796, 2963c, 3194, 3211 [= IGRR 4.1415], 3493; BCH 1 [1877]: 136; 11 [1887]: 464, §29; T. Wiegand, SAB [1906]: 259; IGRR 4.1406); Bruce, *Acts*¹, 282, compares IG 12.3.420, 522. Kearsley, "Acts 14.13," adds *I. Eph.* 5.1595.

1634. Gill, "Religion," 84, cites an inscription from Claudiopolis.

1635. E.g., in ancient Egypt, Badawy, *Architecture*, 180. Cf. honorary statues of mortals placed in temples in Val. Max. 8.15.ext. 2.

1636. In existing inscriptions, Hermes and Zeus do not appear anywhere as σύνναοι (sharing a temple; Haenchen, *Acts*, 432).

1637. E.g., in Witherington, *Acts*, 422. For priests in Phrygian inscriptions, see, e.g., MAMA 1.8, 13, 15, 373.

1638. Bruce, *Acts*¹, 282 (citing Aeschylus *Seven* 164; CIG 2963).

elite who served in the office for a set period (after paying the *summum honorarium*).¹⁶³⁹ An inscription names three priests of Zeus at Lystra; the Western reading here (the plural, “priests of Zeus”) might be accurate,¹⁶⁴⁰ or it may be a later attempt to conform the text to other information known from Christians in Lystra. But Luke has reason only to mention the priest acting at that point.¹⁶⁴¹

The term *στέμματα* signifies wreaths, garlands, or hair fillets, usually of wool. Those celebrating a festival or other event might wear garlands to signify joy (e.g., Char. *Chaer.* 3.2.14, using a different term); someone ready to sacrifice could therefore don a garland as well (e.g., Xen. *Cyr.* 3.3.34, using the different term). People likewise wished to crown their deities with garlands (Dio Chrys. *Or.* 12.60). But commentators also note the possibility that the wreaths or garlands are for the oxen about to be sacrificed;¹⁶⁴² they were garlanded before being sacrificed (Lucian *Sacr.* 12; *Dem.* 11).¹⁶⁴³ Greek artwork indicates that bulls to be sacrificed might have a wreath placed on them, and Romans seem to have done this as well.¹⁶⁴⁴

Bulls or oxen were expensive and hence especially employed for the most important sacrifices,¹⁶⁴⁵ which is, not surprisingly, applicable here if the people really believe that the gods have come to them.¹⁶⁴⁶ For their local associations with Zeus, see comment on Acts 14:12.¹⁶⁴⁷ Elites typically acquired local priesthoods through benefaction; they could thus be the ones who contribute the sacrifices here. The priest may have been able to bring bulls quickly because “the sanctuary or the priest himself had grazing near the *temenos*,” the sacred area outside the city.¹⁶⁴⁸ In any case, we should not think that the entire scene transpired in only a few minutes, given the reasonable surmise that Paul was preaching to some people while others ran off to spread word about the miracle workers; Luke regularly compresses narratives.¹⁶⁴⁹ Even the speeches in Acts, unlike those in typical histories, do not normally unfold in “real time”—in other words, at a realistic length.

At which gates the sacrifice would occur is unclear. Since the temple was “outside the city” yet meant to be approachable, it may have been near the city gates.¹⁶⁵⁰ Such gates provided a good place for Paul to draw a crowd, and they were a natural place

1639. Gill, “Religion,” 82–83. The period of one year was common; see, e.g., Grundmann, “Decision,” 304; Keener, *John*, 853.

1640. So Hemer, *Acts in History*, 111n25. But would this reflect the permanent number in the office for all years? Parsons, *Acts*, 200, argues for a tiny rural shrine, following Bechard, “Rustics,” 92.

1641. A slayer of sacrifices was typically a professional, at least sometimes a muscular man “stripped to the waist” and using an axe (Rives, *Religion*, 25, with the relief panel on 26).

1642. Bruce, *Acts*¹, 282. Johnson, *Acts*, 248, mentions the practice for human sacrifices in Hdt. 7.197. D. Williams, *Acts*, 249, suggests that the garlands could apply to the sacrifices, the priest, attendants, or the altar (comparing Virg. *Aen.* 5.366; Eurip. *Heracles* 529).

1643. Bechard, *Walls*, 414, plausibly suggests that a “festival was already under way,” although (414–15) Luke omits this information because of his natural focus on Paul.

1644. Fitzmyer, *Acts*, 146; Le Cornu, *Acts*, 779 (noting also garlands decorating altars).

1645. E.g., Polyb. 32.15.1–2; Pliny E. *N.H.* 8.70.183 (in Egypt, the bulls themselves received worship, 8.71.184–86). Others (Lake and Cadbury, *Commentary*, 165, following Wettstein; Johnson, *Acts*, 248) cite Lucian *Sacr.* 3, 12. Other cultures also used oxen (Druids in Pliny E. *N.H.* 16.95.250).

1646. On sacrifice rituals, see, e.g., Parker, “Sacrifice”; less relevantly, Scheid, “Sacrifice.” Those who offered sacrifice expected something in return from the gods (Klauck, *Context*, 38).

1647. Animals associated with Hermes in earlier Greek vase paintings include especially cocks, dogs, goats, and rams (Ley, “Hermes,” 220).

1648. Gill, “Religion,” 83. On the *temenos* in Greek thought, see Malkin, “*Temenos*” (and full bibliography there); Burkert, *Religion*, 84–87.

1649. Haenchen’s skepticism (*Acts*, 432, following Loisy) about bringing the animals so quickly (against which Gill, “Religion,” 83, comment) might make sense in a modern large city but seems unfounded for Lystra.

1650. On gate structures for large towns, see Jeffers, *World*, 51; on deities associated with gates in Greek religion, see Johnston, “Gates” (with thorough documentation).

to lay a disabled man if he was a beggar¹⁶⁵¹ (see comment on Acts 3:2). The other possibility is the gates of the sacred enclosure of Zeus, mentioned in the verse.¹⁶⁵² If Luke mentions the gates for the sake of a parallel with Acts 3:2 (which is uncertain), temple gates might be assumed by his ideal audience, but Luke would be more concerned with the mention of gates than with their location. This would make sense, however, only if the apostles are speaking near the temple gates, and if Luke knew this to be the case, he could have been more explicit.¹⁶⁵³ Luke's compressed account again provides hints that more detailed information was available to him without providing the reader sufficient detail to explain all of the hints fully.

To Luke's audience, crowds wanting to sacrifice to "the ultramonotheistic apostles" might appear humorous,¹⁶⁵⁴ though it could not have appeared this way to the apostles themselves within the narrative world.¹⁶⁵⁵

III. PREACHING THE TRUE GOD (14:14–18)

Paul and Barnabas finally learn of the crowd's misunderstanding of their mission (14:14), and they try to restrain them (14:18) with preaching about the true God (14:15–17). If the apostles' chief desire was to honor the true God, the distortion of their teaching to achieve the opposite would naturally horrify them. Luke summarizes their preaching in language reminiscent of the LXX but intelligible to a pagan audience.

(1) *Receiving the Report (14:14)*

Paul and Barnabas would recognize a sacred procession with sacrificial bulls¹⁶⁵⁶ and hence would have reason to ask their interpreter or others what was going on, especially when it became evident that the procession seemed directed toward them and not merely passing them.

If they were preaching in Greek without an interpreter (many who spoke Lycaonian as a first language would know some Greek as a second language), some misunderstandings might easily arise; the same could happen if the interpreter was not fluent enough in understanding either Greek or Lycaonian.¹⁶⁵⁷ Lystra yields many Latin inscriptions, but not all are in good Latin; outside Lystra most are in Greek, and names are often local.¹⁶⁵⁸ In this market town for the surrounding area, with a *territorium* divided among its colonists, the audience may have included people from the countryside. Lystra also had a more prominent native element than Antioch.¹⁶⁵⁹

1651. Lake and Cadbury, *Commentary*, 165; Munck, *Acts*, 132.

1652. Preferred by Gill, "Religion," 85 (noting [n. 27] that Lystra "is unlikely to have been walled at least at this time"); D. Williams, *Acts*, 249; Bechard, *Walls*, 409–10.

1653. Temples were public places; philosophers and other teachers could lecture on their steps or beneath their colonnades. But this would surely be a striking location for radical monotheists (Acts 14:15–17) to be preaching; we might thus expect Luke to clarify the site. (Arguments from silence never carry full weight, but their plausibility rests on the degree to which one could expect something other than silence in the given case.)

1654. So Pelikan, *Acts*, 150.

1655. The epistolary Paul would have always been unhappy to know that the people had not properly understood his message; he always was concerned about having labored in vain (2 Cor 6:1; Gal 2:2; 4:11; Phil 2:16; 1 Thess 2:1; 3:5). Misunderstanding is an experience familiar to virtually every cross-cultural communicator; in rural Africa, it was often the confused expression on my hearers' faces that on various occasions led me to ask some of my translators what they had said; in contrast to Paul's situation, in my case the correction often provoked strong laughter as I clarified and people understood what I had actually said.

1656. With Witherington, *Acts*, 425. On processions and sacrifices, relevant to Acts 14, see Kauppi, *Gods*, 64–82.

1657. Though I have been in situations where my interpreters were corrected either by me or by bilingual members of the audience. Even when I knew nothing of the local language, I could often pick up visual cues when my audience seemed confused by something.

1658. Levick, *Roman Colonies*, 154.

1659. Mitchell, *Anatolia*, 2:11.

Greeks and “barbarians” spoke different languages but could communicate through interpreters (Max. Tyre 8.8).¹⁶⁶⁰ Greeks needed interpreters to speak with Persians;¹⁶⁶¹ Themistocles had a local interpreter for the Persians executed for “corrupting” the Greek language (Plut. *Themist.* 6.2, who approves). Interpreters for the Roman military were of low rank, and their loyalty was not always trusted.¹⁶⁶² Sometimes interpretation even occurred in three languages; Greeks spoke to Armenians through their Persian interpreter (Xen. *Anab.* 4.5.34).¹⁶⁶³ Ideally one might eventually learn a language sufficiently well to dispense with an interpreter (Plut. *Themist.* 28.3); it was even claimed that Mithridates learned the languages of all twenty-two peoples he ruled so that he would not need to depend on interpreters (Val. Max. 8.7.ext. 16). Such aspirations would not, however, be practical for apostles who would spend only a short time initiating a Christian movement in the area.

Interpreters were also useful to those with only a partial command of a language (usually comprehension as opposed to speaking; e.g., Helioid. *Eth.* 7.19) or who felt it beneath their dignity to use a subordinate language (like some earlier traditional Romans concerning Greek).¹⁶⁶⁴ When Cicero was a Roman governor in southern Asia Minor, he needed to use an interpreter (Cic. *Fam.* 13.54.1).¹⁶⁶⁵ As here, one might learn what another said only after the fact, through interpreters (as in Dio Chrys. *Or.* 32.101, though the story is probably fictitious).

Even most strict Judean Jews recognized the importance of translation into local vernaculars. This was the function of both the LXX (cf. Jos. *Ant.* 1.11)¹⁶⁶⁶ and the Targumim.¹⁶⁶⁷ Later rabbis expected priests to use interpreters if the hearer did not understand the language (*Num. Rab.* 9:34).¹⁶⁶⁸ Certainly Luke does not portray the apostles employing a miraculous xenoglossy in their mission (see discussion at Acts 2:4); one who supernaturally understood all languages required no interpreter (Philost. *Vit. Apoll.* 1.21).

Some commentators note that one not yet worthy of a philosopher's reputation could rip off his garments and leap into public view naked, proving that he was simply mortal.¹⁶⁶⁹ More likely background, however, is the widespread ancient custom of

1660. Like other peoples; e.g., the familiar Gen 42:23.

1661. Plut. *Themist.* 28.1; and vice-versa, Quint. Curt. 5.13.7.

1662. See Peretz, “Interpreter.”

1663. Otherwise they were confined to communicating by signs “as if deaf” (Xen. *Anab.* 4.5.33; cf. Luke 1:22, 62). Their “march up country” depended heavily on interpreters (*Anab.* 7.2.19; 7.6.43).

1664. Val. Max. 2.2.2–3; Plut. *M. Cato* 12.4.

1665. Cicero's Greek was excellent, and so local languages were the complication. He was governor of Cilicia, which then included the Phrygian city Laodicea, where he was staying (Cic. *Fam.* 13.67.1; 15.4.2, mentioning also Lycaonia), though he usually stayed in Tarsus.

1666. Even the rabbis approved of Greek translation (e.g., *m. Meg.* 1:8; *'Abot R. Nat.* 37, §94, despite misinformation; *b. Meg.* 9a; *y. Meg.* 1:9, §4; *Gen. Rab.* 36:8), though Hebrew was better (cf. Sir prol.; cf. *y. Meg.* 1:9, §14). Defenders of the LXX regarded its translation as miraculous (*Let. Aris.* 301–11; cf. later Euseb. *H.E.* 5.8); later rabbis preferred Aquila's translation (*y. Meg.* 1:9, §4; *Qidd.* 1:1, §13; *Gen. Rab.* 93:3; *Song Rab.* 1:3, §3). The LXX influenced Paul's own style (Anderson, *Rhetorical Theory*, 281). Cf. the translation of Egyptian sacred literature into Greek (P.Oxy. 11.1381, in Grant, *Religions*, 124–27).

1667. Many early rabbis disapproved of Targumim (e.g., *t. Šabb.* 13:2–3), but they knew and came to recognize them (*b. Ber.* 45a; *Meg.* 23b; *Ta'an.* 4b; *y. Meg.* 4:1, §2; *Ta'an.* 4:1, §14; Safrai, “Education,” 966–68), especially in oral form (cf. *Gen. Rab.* 65:11; *Pesiq. Rab.* 5:1). The Targumim that we have are much later than the first century (*pace* McNamara, “Review”; idem, “Novum Testamentum”; idem, *Judaism*, 205–52), though they may preserve some early traditions (e.g., *Tg. Neof.* on Gen 32:25 with 4Q158 1–2 4; cf. Brownlee, *Habakkuk*, 122–23; arguments in Schäfer, “Geist”; Ohana, “Prosélytisme”); for traditions circulating by Jerome's day, see Hayward, “Jerome”; for some methodological cautions, see Chilton, *Approaches*, 305–15. For the importance of interpreters, see, e.g., *Num. Rab.* 9:34.

1668. Nevertheless, a translator ought not to raise his voice above the reader in a service (*b. Ber.* 45a).

1669. Dio Chrys. *Or.* 35.9, also cited by Conzelmann, *Acts*, 111 (who adds Dio Cass. 48 and 37.7).

tearing garments for mourning (cf. Acts 18:6), which was a standard practice among Jews¹⁶⁷⁰ as well as among Gentiles.¹⁶⁷¹ When hearing blasphemy, one would tear one's garments.¹⁶⁷² The verbs here are most closely paralleled in a mourning scene in Jdt 14:16–17, with which Luke was probably familiar (though there is no deliberate echo of the thought here, since Bagoas was mourning Israel's victory).¹⁶⁷³ It was considered virtuous for mortals to refuse divine honors (see comment on Acts 14:15 below), but a mob was difficult to restrain.

(2) *The Speech (14:15–17)*

Since Paul is the primary speaker (Acts 14:12), Luke's ideal audience may construe Paul as author of the speech here, although it is probably intended more as a summary of the sorts of things the apostles cried out to deter the crowd (thus the plural in 14:14–15, 18).

Rhetorically, the brief speech is deliberative, inviting a change in behavior (14:15), including only an introduction and perhaps a short *narratio* recounting God's past benefits (14:15c–17).¹⁶⁷⁴ This speech is not clearly interrupted, since it is merely a summary of the sorts of things the apostles were saying (as in 2:40).¹⁶⁷⁵ Luke here displays Paul's skill in extemporaneous speaking (as often, e.g., Acts 22:3–21; cf. Luke 12:11–12; 21:14–15), a skill that was highly prized¹⁶⁷⁶ though most professors of rhetoric objected to using it to make up for a neglect in preparation.¹⁶⁷⁷ Schools emphasized repeated practice of this skill so that one could improvise without it being evident (Quint. *Inst.* 10.7.1).¹⁶⁷⁸ For “men” as an address, see comment on Acts 2:14; usually it is paired with another title, but not always (cf. Acts 7:26; 19:25; 27:10, 21).

A comparison of Paul's¹⁶⁷⁹ speeches in 13:16–47 (a synagogue audience), 14:15–17 (a rural community; see esp. comment on Acts 14:17), and 17:22–31 (urban philosophers) reveals his adaptability to diverse audiences. Although such adaptability could be viewed negatively by critics,¹⁶⁸⁰ the ability to adapt one's form to the audience

1670. E.g., Gen 37:29, 34; 44:13; Judg 11:35; 2 Sam 1:11; 13:19, 31; 1 Kgs 21:27; 2 Kgs 2:12; 5:7; 6:30; 11:14; 19:1; 22:11; 2 Chr 23:13; 34:19, 27; Esth 4:1; Job 1:20; 2:12; Isa 37:1; Joel 2:13; 1 Esd 8:71; 1 Macc 2:14; 4:39; 5:14; 11:71; Mark 14:63; Jos. *War* 2.316; *Ant.* 2.134; 7.4, 40; 9.67; Philo *Flight* 111; *Spec. Laws* 1.115; *Sipre Deut.* 43.3.8; *'Abot R. Nat.* 4, 25 A; b. *Šabb.* 105b; *Mo'ed Qaṭ.* 15a; *Ned.* 87a; *Hor.* 12b; y. *B. Meš'a* 2:11, §1; *Sanh.* 2:1, §4. Some of these passages concern sorrow over corporate sin (e.g., Num 14:6; Josh 7:6; Ezra 9:3; Jer 36:24; Joel 2:13; Jos. *Ant.* 10.59; 11.141; cf. Kee, *Every Nation*, 173).

1671. In novels (Char. *Chaer.* 1.3.4; 3.5.6; 3.10.3; 5.3.4; 7.1.5; Xen. *Eph. Anthia* 1.4; 3.10; 5.5; *Apoll. K. Tyre* 25); historiography and biography (Quint. *Curt.* 10.5.19; Suet. *Julius* 33; Dio Cass. 54.4; Jos. *Ant.* 18.78) and life (Dio Chrys. *Or.* 46.12; Lucian *Fun.* 12; Croom, *Clothing*, 71; Brown, *Death*, 517). See further comment on Acts 22:23.

1672. *M. Sanh.* 7:5; *b. Sanh.* 60a, bar.; cf. *b. Mo'ed Qaṭ.* 25b–26a; *y. Mo'ed Qaṭ.* 3:7, §§7–8; *Sanh.* 7:6, §7; Matt 26:65. This response to blasphemy might include a natural extension of the response to not only mourning but treason (2 Kgs 11:14; 2 Chr 23:13; perhaps Jos. *War* 2.316).

1673. Johnson, *Acts*, 249, points out the similarity.

1674. Witherington, *Acts*, 426; cf. Fournier, *Episode*, 188–91; perhaps additionally a *probatio* (ibid., 191–93).

1675. Cf. the present participles κράζοντες in Acts 14:14 and λέγοντες in 14:18.

1676. Sen. E. *Controv.* 10.pref. 2; Tac. *Dial.* 6 (one speaker's view); Philost. *Vit. soph.* 1.482; 1.24.529; 2.26.614; cf. improvisation in earlier epic recitations (Collins, “Improvisation”). Some sophists were weak in this discipline (Philost. *Vit. soph.* 2.9.583; cf. also an emperor in Suet. *Aug.* 84). Speakers should be ready to embellish even prepared speeches during delivery (Dion. Hal. *Demosth.* 53).

1677. Cf. Sen. E. *Controv.* 10.pref. 3; Quint. *Inst.* 10.7.21.

1678. Calboli Montefusco, “Exercitatio,” 265.

1679. Though Barnabas is also offering exhortations here (Acts 14:14), Luke has already made clear that Paul is the main speaker (14:12), justifying our focus on him.

1680. Glad, “Adaptability,” 20–21; Mitchell, *Rhetoric of Reconciliation*, 134; Litfin, *Theology*, 115–17; Marshall, *Enmity*, 71–73; Ps.-Phoc. 49; cf. Dio Chrys. *Or.* 4.123; Hdn. 4.7.3–4; 4.8.1–3; S.S.S. Whether the case of Alcibiades is more negative or positive may be debated (Plut. *Alc.* 23.4–6; positive in Corn. Nep. 7 [Alcibiades], 11.2–6).

was essential for good rhetoricians (Quint. *Inst.* 3.7.24).¹⁶⁸¹ Although the language is thoroughly biblical (see comments below), it omits direct quotations of Scripture, which would be irrelevant for this audience (in contrast to Acts 13:16–47).¹⁶⁸² Some elements of the speech may even contextualize Paul's message specifically for an audience in this region, suggesting authentic tradition that Luke has compressed here.¹⁶⁸³

(3) *Compatibility with Pauline Thought*

Grant could be right that the speech “may not be what Paul would have said” but rather what Luke thinks “he should have said.”¹⁶⁸⁴ Still, although the wording and choice of terse elements that survive Luke's editing are Luke's, the approach is more Pauline than scholars often recognize. Most of Paul's epistles address Christians; when we approach the texts, however, that exemplify his understanding of natural theology (Rom 1:19–22), idolatry (1:23–25; cf. 1 Cor 8:5–6; 10:20–21), and repentance from idolatry (1 Thess 1:9), the resemblance between Luke's Paul and the Paul of the epistles is substantial.

The anti-idolatry language here resembles 1 Thess 1:9, the closest passage we have to a summary of Paul's expectations for pagans' conversion.¹⁶⁸⁵ Luke's natural theology is compatible with the natural theology in Rom 1:19–25.¹⁶⁸⁶ In both places, however, the natural theology must be qualified. In Romans, the revelation in nature makes humanity morally responsible for idolatry (1:18–23), but this revelation contrasts with the revelation in the gospel, which provides salvation (1:16–17).¹⁶⁸⁷ In fact, in different ways, Acts 14:15–17 and Rom 1:19–25 might even draw on the same source in Wis 13–15,¹⁶⁸⁸ though the connection is much clearer in the somewhat longer Romans passage.¹⁶⁸⁹ Wisdom of Solomon used God's revelation in nature to make idolatry morally indefensible¹⁶⁹⁰ and drew from Stoic models.¹⁶⁹¹ See more fully the discussion of natural theology at Acts 17:22–31.

(4) *Confronting Polytheism (14:15)*

As in the speech in Acts 17:22–31, Paul begins by establishing common ground with his audience (mentioning shared nature in 14:15; cf. also the agricultural imagery of 14:17). The approach here resembles the apologetic in Josephus and many

1681. For an example, see, e.g., Albucaius, adapting for both academic and popular audiences (Suet. *Rhet.* 6); later, Libanius (*Eunapius Lives* 495–96). See further Litfin, *Theology*, 65, 104–6; cf. *Thebaid* frg. 8; Max. Tyre 1.2; Diog. Laert. 2.66; *Exod. Rab.* 47:5.

1682. Cf. Siffer, “Annonce” (for here and Acts 17:22–31). The supposed exegesis of Ps 65:5–66:1 here, matched with the teaching of another student of Gamaliel in *Deut. Rab.* 7:7 (Barnes, “Paul and ben Zakkai”), is too narrow.

1683. Porter, *Paul in Acts*, 139, following esp. Breytenbach, “Zeus und Gott”

1684. Grant, *Paul*, 9. This section's material is also used in Keener, “Monotheism.”

1685. With Wenham, “Paulinism of Acts Again”; Witherington, *Acts*, 426; Grant, *Paul*, 9.

1686. With, e.g., Porter, *Paul in Acts*, 145. From Philo to Augustine, monotheists challenged pagan natural philosophy (Miller, “Idolatry”). Paul opposed idolatry but not all of Gentile culture (Sandnes, “Idolatry and Virtue”).

1687. Cranfield, “Romans 1.18,” connects the two “revelations” by predicating both on the gospel, but this weighs too much on the connective γάρ.

1688. Haacker, *Theology*, 103–4.

1689. In Rom 1, see, e.g., Sanday and Headlam, *Romans*, 52; Davies, *Paul*, 28; Bruce, *Books*, 169; deSilva, “Wisdom of Solomon,” 1274; Hooker, “Adam,” 299 (noting differences as well); Dunn, *Theology of Paul*, 91; Talbert, *Romans*, 63. Thus Bornkamm, *Experience*, 53, regards the parallels as well known. Wisdom and Acts stress humanity's ignorance, and Romans stresses suppression of knowledge (Talbert, *Romans*, 62–63; Gaca, “Declaration,” 3–5). But while ignorance may be less culpable (see comment on Acts 3:17), this ignorance is willful; both traditions seek to underline moral culpability.

1690. Cf. deSilva, “Wisdom of Solomon,” 1272.

1691. Kennedy, *Epistles*, 26; Ponizy, “Recognition”; cf. Collins, “Natural Theology”; Dafni, “Natürliche Theologie.”

Diaspora Jewish writers, and Luke's presentation of it would appeal to, and perhaps solicit the alliance of, many philosophic currents in his day.¹⁶⁹² The similarities with 17:22–31 might suggest that both reflect a pattern of Hellenistic Jewish apologetic as found in Wisdom of Solomon or Philo,¹⁶⁹³ though Paul's more directly confrontational summons to repentance (14:15; 17:30; cf. 19:26; 1 Thess 1:9) goes beyond the apologetic of most of his contemporaries.

Despite similarities, the speech confronts idolatry more bluntly than apologists often did. Although Jewish people naturally critiqued idolatry more often among themselves than with polytheistic crowds, they would recognize the ideas. Jewish literature often mocked paganism,¹⁶⁹⁴ following the lead of some biblical prophets (1 Kgs 18:27; Isa 44:12–17; 46:6–7; Jer 10:3–5; Ps 115:4–8).¹⁶⁹⁵ Some scholars fruitfully ground Luke's anti-idolatry polemic especially in Isaiah.¹⁶⁹⁶

Jews viewed idolatry as one of the very worst sins,¹⁶⁹⁷ perhaps the worst.¹⁶⁹⁸ For the rabbis, idolatry was one of the great sins of the antediluvian era.¹⁶⁹⁹ In Jewish tradition, Abraham¹⁷⁰⁰ became a fierce opponent of idolatry;¹⁷⁰¹ he destroyed the idols in his household¹⁷⁰² and faced conflict with his family.¹⁷⁰³ Later rabbis said that Abraham was the first person to leave idolatry.¹⁷⁰⁴ (For further discussion on Abraham's opposition to idolatry, see comment at Acts 7:2–8.)

A late Tanna complained that false gods, far from being creators, were created by the last entity created—namely, humans (*Sipre Deut.* 43.6.9). Church fathers adopted this approach. Criticizing the imperial cult, Tertullian pointed out that a person's divinity, far from being innate, was dependent on mortals' decisions and support (*Apol.* 5.2). It is not surprising that Gentiles believed that converts to Judaism hated Gentiles' deities (e.g., *Jos. Ant.* 20.77) and converts to Christianity denied them (*Lucian Peregr.* 13).

Sometimes, however, even Gentiles mocked what they viewed as ludicrous elements of mythology.¹⁷⁰⁵ Lucian (admittedly not typical) ridicules inconsistencies in popular views of the gods and Fate,¹⁷⁰⁶ arguing that the gods cannot reward mortals and are their

1692. See Downing, "Common Ground" (citing *Jos. Ant.* 1.272–73; 4.40–50; 20.89–90; and esp. *Ant.* 8.102–29; *Ag. Ap.* 2). For the inadequacy of portraying Paul and Barnabas as philosophers here, see Rowe, *World*, 21–22 (on the incompatibility of the way with pagan religion elsewhere in Acts, see, e.g., 26, 43).

1693. Grant, *Paul*, 9. For one comparison between Acts 14:8–20 and 17:16–34, see Bechard, *Walls*, 369–31.

1694. E.g., *Wis* 13:10–14:7; *Bel and the Dragon*; *Epistle of Jeremiah*; *Let. Aris.* 134–38. For other polemic, see, e.g., *Sib. Or.* 3.8–35; 4.4–23; among later Christians, 8.359–428.

1695. This could often be accomplished by means of *reductio ad absurdum*, a technique also familiar to philosophers (e.g., *Sen. Y. Ep. Lucil.* 113.20, mocking excessive personification of virtues).

1696. Pao, *Isaianic Exodus*, 181–216.

1697. *Jub.* 36:5; *Ep Jer* passim; *t. Sanh.* 13:8; *Pe'ah* 1:2; *Sipra VDDeho. par.* 1.34.1.3; *'Abot R. Nat.* 40 A; *b. Git.* 57b; *Šabb.* 145b–146a; *y. Sanh.* 3:5, §2; 6:7, §2; 8:8, §1; 10:1, §2; 10:3, §2; *Lev. Rab.* 37:1; *Tg. Ps.-J.* on Num 35:25. The evil inclination led to this (e.g., *Sipre Deut.* 43.4.1; *Song Rab.* 2:4, §1; 7:8, §1; see Davies, *Paul*, 30, noting *b. Šabb.* 105b). It was also wrong for Gentiles (*Sipre Num.* 112.2.2; meriting judgment in *Sib. Or.* 3.34; but cf. *Pesiq. Rab Kah.* 4:9). Idolatry brought Solomon down (*Test. Sol.* 26). Cf. further Safrai, "Religion," 829.

1698. *Wis* 14:27; *Mek. Pisha* 5.40–41; *y. Ned.* 3:9, §3. It was tantamount to rejecting the entire Torah (*t. Bek.* 3:12; *Sipre Deut.* 54.3.2; *b. Qidd.* 40a), and rejecting Torah could lead to it (*Sipre Deut.* 43.4.1).

1699. E.g., 3 *En.* 5:6–11. It was idolatry that made them vulnerable to demons (*Gen. Rab.* 23:6; 24:6).

1700. Similar traditions were applied to Job in *Test. Job* 2–5.

1701. E.g., *Jub.* 21:3 (summarizing his righteousness); *Apoc. Ab.* 1–8. Flusser, "Upanishads," highlights Abraham's resistance to idolatry (e.g., *Jub.* 11:16–18; 12:1–6, 12–14; *Jos. Ant.* 1.155–56), but his comparison to the Upanishads is unnecessary.

1702. *Jub.* 11:12–14; cf. *Judg* 6:25–27.

1703. *Jub.* 11:16–17; 12:1–8.

1704. *Pesiq. Rab.* 33:3. In *Gen. Rab.* 39:1 (attributed to a Tanna), he questioned and God revealed himself to him.

1705. E.g., *Dio Chrys. Or.* 11 passim (e.g., 11.154, ridiculing Hecuba's transformation into a dog). For other critics of Greek religion, see, e.g., Grant, *Gods*, 20.

1706. See *Lucian Z. Cat.* 2–5; cf. *Pliny E. N.H.* 2.5.22; *Lucian Indictment 2*; *Jos. Ag. Ap.* 2.245.

fellow slaves to Fate.¹⁷⁰⁷ If Zeus responds that the gods have immortal bliss, Lucian's philosopher reminds him that the gods can be wounded, imprisoned, and tortured in the myths.¹⁷⁰⁸ Poets' myths are fine for literary purposes, Lucian opines, but those who take them seriously act like children or people who are insane.¹⁷⁰⁹ Apollonius allegedly criticized stories of immoral deities as nothing but silly tales for children or old women.¹⁷¹⁰

Some Gentiles were agnostic about the nature of the deity but rejected the multiplication of deities corresponding to human characteristics or needs.¹⁷¹¹ Humans making images in their own likeness could be mocked.¹⁷¹² Some intellectuals might ridicule the mythical portrayals of some immortals staying old while others remained young,¹⁷¹³ their adultery or affairs with mortals,¹⁷¹⁴ their conflicts with one another,¹⁷¹⁵ and so forth. Once Zeus asked Helios to rest from his work as sun god for three days so that Zeus would have a long night to commit adultery.¹⁷¹⁶ On another occasion, Zeus has to explain that there is nothing wrong with lust, when Ixion thinks he is having intercourse with Hera.¹⁷¹⁷

Some ancients questioned how a mortal woman could escape her divine pursuer when even a man is normally stronger than a woman;¹⁷¹⁸ how gods could prove powerless to help beloved mortals;¹⁷¹⁹ how gods could be permanently lame;¹⁷²⁰ how the immortals could enjoy night with Helios among them;¹⁷²¹ or how the twin brothers

1707. Lucian *Z. Cat.* 7–8.

1708. Lucian *Z. Cat.* 8; also in *Sacr.* 5–6; cf. *Z. Rants* 40. For this vulnerability of deities, see, e.g., Hom. *Il.* 5.339–42, 855–59, 870 (Diomedes at Athena's command; cf. 5.130–32, 335–39, 829–30); Ap. *Rhod.* 3.853; Apollod. *Epit.* 4.2; *Bib.* 1.7.1; Libanius *Encomium* 1.10. The bronze giant Talos, who lost all his ichor, died (Ap. *Rhod.* 4.1679–80; Apollod. *Bib.* 1.9.26); Chiron had to trade away his immortality so that he could die rather than endure the pain of his wound (Apollod. *Bib.* 2.5.4); cf. perhaps Polyphemus in Eurip. *Cycl.* 231, 321 (Kovacs, "Introduction to *Cyclops*," 55); on the mortality of some ancient Near Eastern deities, see, e.g., ANET 139–40 (*Ba'al* poems, I* AB, vi, on 139; IAB, ii, on 140); Albright, *Yahweh*, 125–27; Gordon, "Psalm 82," 130–31 (citing UT 19.1816). Such "divine" mortality was rejected by Stoics (e.g., Sen. *Y. Ep. Lucil.* 95.49–50), and writers evaded the problem of such wounded deities by allegorization (Heracl. *Hom. Prob.* 30.1, 4; 31.1, 11; 52.5–6; 53.1).

1709. Lucian *Lover of Lies* 2–5. Lucian proves less generous in *Amber* 3, 5–6, denouncing their lies; cf. also the criticism in Val. *Max.* 4.7.4.

1710. Philost. *Vit. Apoll.* 5.14; cf. Lucian *Amber* 3.

1711. E.g., Pliny *E. N.H.* 2.5.14–16, 19.

1712. Lucian *Sacr.* 11.

1713. E.g., Pliny *E. N.H.* 2.5.17; Lucian *Sacr.* 11.

1714. E.g., Pliny *E. N.H.* 2.5.17; Lucian *Prom.* 17; *Parl. G.* 7; *Lover of Lies* 2; *Dial. G.* 206 (6/2, Eros and Zeus 1); 231 (19/11, Aphrodite and Selene 1); 233–34 (20/12, Aphrodite and Eros 1); 243 (17/15, Hermes and Apollo 3); 245–46 (21/17, Apollo and Hermes ¶¶1–2); 269–71 (2/22, Pan and Hermes 1–2); 272, ¶4; *Dial. S.-G.* 305–6 (11/7, South Wind and West Wind 1); 325–27 (15, West Wind and South Wind 2–3); Philost. *Elder Imag.* 1.8. Some considered it inappropriate for a deity to have sexual intercourse with a mortal (Hermog. *Progymn.* 5, "On Refutation and Confirmation," 11; cf. Philost. *Vit. Apoll.* 6.40). Zeus does manage to restrain himself if the offspring of the union could overthrow him, in Lucian *Dial. G.* 205 (5/1, Prometheus and Zeus 2). Heraclitus evades such charges by allegory (*Hom. Prob.* 68–69, esp. 68.8–9; 69.8–16).

1715. E.g., Pliny *E. N.H.* 2.5.17; Lucian *Dial. G.* 240 (16/14, Hermes and Apollo 2). In Lucian *Dial. G.* 278–80 (24/25, Zeus and Helios 1–2), Zeus is angry at Helios for allowing his son to nearly destroy the world, but (279, ¶2) he forgives him this time. Heraclitus evades this charge by allegory (*Hom. Prob.* 52, esp. 52.4).

1716. Lucian *Dial. G.* 229 (14/10, Hermes and Helios 1), mocking (for a more serious version, see, e.g., Apollod. *Bib.* 2.4.8).

1717. Lucian *Dial. G.* 214–19 (9/6, Hera and Zeus ¶¶1–5). Zeus was angrier in the more serious version (Apollod. *Epit.* 1.20).

1718. Aphth. *Progymn.* 5, "On Refutation," 29S, 13R; cf. Lucian *Dial. G.* 242 (Hermes and Apollo 2). Most mortal objects of Apollo's affection seem to have spurned him (e.g., Apollod. *Bib.* 3.12.5; Ovid *Metam.* 2.603–11; Lucian *Dial. G.* 242 [17/15, Hermes and Apollo 2]; 244 [18/16, Hera and Leto 1]).

1719. Lucian *Dial. G.* 239–40 (16/14, Hermes and Apollo 1–2); Philost. *Elder Imag.* 1.24; Philost. *Younger Imag.* 14; also Jos. *Ag. Ap.* 2.245.

1720. Lucian *Dial. G.* 241 (17/15, Hermes and Apollo 1); 243 (18/16, Hera and Leto 1). Heraclitus evades this by allegory (*Hom. Prob.* 26.1, 7–8).

1721. Lucian *Icar.* 28 (mythographers would have probably replied that Helios was moving back eastward beneath the earth; but he would have trouble making the banquets without reliable assistants).

lovingly could share immortality on alternate days, so that they do not succeed in even seeing each other.¹⁷²² Some also rejected carrying gods on one's fingers (i.e., idolatrous rings)¹⁷²³ and oracles whose replies typically hedged so that they could not be falsified.¹⁷²⁴ Many laughed about Cretans claiming to host Zeus's tomb.¹⁷²⁵ Critics complained about Zeus's weakness, since Hera allured him to sleep on Mount Ida so that she could help the Greeks win a battle.¹⁷²⁶ Philosophers rarely accepted the old myths literally,¹⁷²⁷ and some accused of slander those who had presented the gods as immoral.¹⁷²⁸ Since anything and everything could be personified and deified, why worship any deities in particular?¹⁷²⁹

Without intending ridicule, others recounted (as truth or entertaining stories) how Hermes (as a newborn) stole mortals' property¹⁷³⁰ and killed those who might betray the secret.¹⁷³¹ Deities—often married—could seduce and rape various women¹⁷³² and occasionally boys¹⁷³³ yet slay such mortals if they proved unfaithful.¹⁷³⁴ (Their sexual exploits proved fertile ground for early Jewish and Christian critiques of paganism.)¹⁷³⁵ Hera could jealously avenge her honor in response to Zeus's adultery;¹⁷³⁶ insulted

1722. Lucian *Dial. G.* 286 (25/26, Apollo and Hermes). Athena as an armored female also struck Lucian as funny, in 225 (13/8, Hephaistos and Zeus 1), though not everyone mocked it (e.g., Philost. *Elder Imag.* 2.27).

1723. E.g., Pliny *E. N.H.* 2.5.21.

1724. Lucian *Dial. G.* 244 (18/16, Hera and Leto 1).

1725. Callim. *Hymns* 1 (to Zeus), lines 8–9; Lucian *Sacr.* 10; *Parl. G.* 6; *Tim.* 4; *Z. Rants* 45; *Lover of Lies* 3; *Patriot* 10 (Byzantine); cf. Euhemerus *Sacr. Hist.* 6 (in Grant, *Religions*, 76); Philost. *Vit. soph.* 2.4.569; *Sib. Or.* 8.45–49; Dibelius and Conzelmann, *Pastoral Epistles*, 136.

1726. Heracl. *Hom. Prob.* 39.1 (on *Hom. Il.* 14.347–53); Heraclitus goes on to salvage the story by allegorizing it (*Hom. Prob.* 39.2–17). Cf. 1 Kgs 18:27; contrast Ps 121:3–4.

1727. Grant, *Paul*, 4–5; beyond philosophers, e.g., Libanius *Invect.* 7.2. Allegorizing allowed them to develop acceptable morals (Cic. *Nat. d.* 2.28.70; cf. Proclus *Poet.* 5–6; Jos. *Ag. Ap.* 2.255; Murray, *Stages*, 202; Ferguson, *Backgrounds*, 98); some simply rewrote stories (e.g., Stesichorus's *Recantation*; Pindar *Olympian* 1.52–53).

1728. Dio Chrys. [Favorinus] *Or.* 37.32. Dio Chrys. *Or.* 11.19 complains of Homer's tales of the gods and (11.23) calls him a liar (yet seems to favor Hesiod in 12.23 and exalts Homer as the greatest poet in 18.8).

1729. Lucian *Icar.* 9; *Phil. Sale* 4.

1730. E.g., Ovid *Metam.* 2.685–86; Lucian *Dial. G.* 220 (11/7, Hephaistos and Apollo 1); Philost. *Elder Imag.* 1.26; cf. Lucian *Prom.* 5. He also stole Apollo's property in *Apollod. Bib.* 3.10.2; in 2.1.3, Zeus ordered him to steal a cow. For earlier deities' covetousness, see, e.g., AQHT A (vi); B (*ANET* 151–52); Gordon, *Near East*, 100; Kaiser, "Pantheon," 63 (citing *UT* 75.1.38–39).

1731. Ovid *Metam.* 2.687–707, esp. 705–7 (Mercury turned another into stone, 2.830–32).

1732. E.g., Soph. *Searchers* 212–15 (*SPap* 3:44–45); Eurip. *Antiope* 69–71; *Pirithous* 22–24 (*SPap* 3:124–25); *Alope* frg. 107; *Antiope* frg. 223.72–77; *Archelaus* frg. 228a.15–16; *Danae* frg. 1132.26–34; *Andromeda* frg. 136 (Stobaeus 4.20.42); Menander *Heros* frg. 2 (Stobaeus *Ecl.* 5.20a.21); *Apollod. Bib.* 1.5.1; 1.7.8–9; 1.9.3; 3.2.1 (leading to her death); 3.1.1; 3.4.3; 3.5.5; 3.7.6; 3.8.2; 3.10.1, 3; 3.12.2, 5–6; 3.15.2, 4; *Epit.* 1.9, 22; *Thebaid* frg. 11 (from scholiast D on *Hom. Il.* 23.346); *Cypria* frg. 10 (from Athen. *Deipn.* 334b); frg. 11 (from Philod. *Piety* B 7369); Varro *L.L.* 5.5.31; Ovid *Metam.* 2.714–47; 3.1–2, 260–61; 4.234–44; 5.391–408; 14.765–71; *Sil. It.* 13.615; Lucian *Dial. G.* 250 (23/19, Aphrodite and Eros 1); Paus. 8.25.7–8; Parth. *L.R.* 15.3 (having someone else killed); Ach. *Tat.* 1.5.5–7; Apul. *Metam.* 6.22; Libanius *Speech in Character* 27.3; *Narration* 1; 4.1–2; 17; 31; 32; 39; 41 (cf. *Narration* 3). On very rare occasions, a mortal escaped, outwitting the deity (Ap. *Rhod.* 2.946–54) or outrunning him (Libanius *Speech in Character* 27.4; cf. *Narration* 17). Similar tales are told of mortals later deified, e.g., Heracles (e.g., *Apollod. Bib.* 2.7.4, 7). In Eurip. frg. 925, Hephaestus tried to rape Athena.

1733. For the boy Ganymede (raped by Zeus), see, e.g., Callim. *Epig.* 53; *Apollod. Bib.* 3.12.2; Virg. *Aen.* 1.28; Ovid *Metam.* 10.155–61; Lucian *Parl. G.* 8–9; *Dial. G.* 208–12 (10/4, Zeus and Ganymede ¶¶1–5), esp. 208, ¶1; 213 (8/5, Zeus and Hera ¶2); 214, ¶¶2–3; *Affairs* 14; *Charidemus* 7; Alciph. *Paras.* 23 (Limeterus to Amasetus), 3.59, ¶2; Philost. *Letters* 8 (46); Philost. *Younger Imag.* 8. For Apollo's affection for Hyacinthus, see, e.g., *Apollod. Bib.* 3.10.3; Ovid *Metam.* 10.162–219; Lucian *Dial. G.* 239–40 (16/14, Hermes and Apollo 1–2); 242, 2; 244 (18/16, Hera and Leto 1); Philost. *Elder Imag.* 1.24; Libanius *Narration* 2. Occasionally goddesses or nymphs did the same: for Rhea with Attis as a boy, see Lucian *Sacr.* 7; nymphs in Ap. *Rhod.* 1.1226–39; Ovid *Metam.* 4.368–79; *Sil. It.* 5.15–21; for Dawn's rape of Tithonus, see, e.g., *Apollod. Bib.* 3.12.4.

1734. E.g., Ovid *Metam.* 2.603–11. Apollo regrets it afterward (2.612–13). Cf. Libanius *Narration* 2; 4.2; 32.

1735. E.g., Jos. *Ag. Ap.* 2.244–46, 275; Athenag. *Plea* 20–22; Theoph. 1.9; *Ps.-Clem. Hom.* 4.15.1–19.3.

1736. E.g., Aeschylus *Women of Aetna* frg.; Eurip. *Bacch.* 94–98; Soph. *Searchers* 212–15; Callim. *Hymns* 4 (to Delos), lines 55–58; *Apollod. Bib.* 1.4.1, 3; 3.4.3; Ovid *Metam.* 2.477–88; 3.261–72, 280–309; 4.416–530;

by mortals' neglect¹⁷³⁷ or criticisms,¹⁷³⁸ deities could also plot their death.¹⁷³⁹ Deities could not protect mortals they loved,¹⁷⁴⁰ but they could deceive with supernatural effectiveness.¹⁷⁴¹ Deities could become animals to mate with each other.¹⁷⁴²

Although many normally would not dare complain against the morality of a deity's action,¹⁷⁴³ Greeks could complain about the injustice of their deities' decrees;¹⁷⁴⁴ with an entire pantheon, one could also pit some deities against others¹⁷⁴⁵ (as in the Trojan War)¹⁷⁴⁶ in ways that would have been unthinkable to monotheists. Popular polytheism allowed for competing agendas of various deities.¹⁷⁴⁷ That Zeus had overthrown his own father to become king was widely known.¹⁷⁴⁸ Mortals could also threaten deities with unbelief if they failed to act.¹⁷⁴⁹ Such divine morality, modeled after human desires, in turn became a model for human behavior.¹⁷⁵⁰ Jewish and Christian apologists condemned the morality of pagan deities,¹⁷⁵¹ and early Christian apologists (who were condemned especially for their monotheism) worked hard to distinguish Christianity from the tales of polytheistic deities.¹⁷⁵²

Appian *Hist. rom.* 12.15.101; Lucian *Dial. G.* 207 (7/3, Zeus and Hermes 1); 213 (8/5, Zeus and Hera ¶¶1–2) (of Ganymede); 228 (12/9, Poseidon and Hermes 2); *Dial. S.-G.* 315 (9/10, Iris and Poseidon ¶1); cf. her jealousy more generally in *Hom. Hymns* 3.343–44 (to Pythian Apollo); Sen. *Y. Herc. fur.* 1–29; Libanius *Narration* 12.

1737. E.g., Eurip. *Hipp.* 1–28, 1400–1403 (because deities desire honor, *Hipp.* 8); Ap. Rhod. 3.64–65; nonlethally in Pindar *Hymns* frg. 37; Apollod. *Bib.* 1.9.15. A mortal woman who preferred another to a divine lover might be killed (Apollod. *Bib.* 3.10.3).

1738. Ovid *Metam.* 4.543–62; 5.409–37. A mortal who challenged Apollo was skinned to make a wine bottle (Apollod. *Bib.* 1.4.2; Philost. *Younger Imag.* 2); Athena flayed Pallas alive (Apollod. *Bib.* 1.6.2). A deity could also seek the destruction of the object of his jealousy (Apollod. *Bib.* 2.4.3; 3.14.1; one view in 3.4.4).

1739. Often they inspired mortals with folly that destroyed them (Hom. *Il.* 18.311–13; but cf. also 1 Sam 2:25; 2 Sam 17:14).

1740. E.g., Eurip. *El.* 1298–1300; Apollod. *Bib.* 3.10.3; cf. 1.5.1.

1741. Statius *Ach.* 1.364.

1742. Zeus became a bull to mate with Hera when she was a cow (Aeschylus *Suppl.* 299–301; cf. Poseidon's behavior in *Thebaid* frg. 11, from scholiast D on Hom. *Il.* 23.346). Earlier, Baal apparently turned into a bull to mate with his sister Anath when she became a heifer; Baal 1* AB (v) (ANET 139); Gordon, *Near East*, 99; Albright, *Yahweh*, 128–29; Moyer, "Practices," 25; Kaiser, "Pantheon," 9 (citing esp. *UT* 76), 58, 60, 155–56; cf. perhaps divine bestiality in Gilg. 6.46ff. (ANET 84); that of Helios's daughter Pasiphae in Apollod. *Bib.* 3.1.2–4; 3.15.8; Ovid *Metam.* 8.131–37, 155–56; Libanius *Narration* 21; 22.

1743. Ps.-Callisth. *Alex.* 1.9.

1744. E.g., Eurip. *Orest.* 417–18, 595–96. This seems to exceed sentiments such as those in 2 Sam 6:8; Ps 89:38–49.

1745. E.g., in the Roman-Carthaginian conflict, in Sil. It. 9.438–39; or deities' desire for Attica, Apollod. *Bib.* 3.14.1; conflict between Hephaestus and Hera in Libanius *Narration* 7.1–3; Hephaestus vs. Ares's adultery (Hom. *Od.* 8.266–366; Libanius *Narration* 26.1–2); deities competing for mortals' or others' affections, as in Libanius *Narration* 17.

1746. E.g., Ovid *Tristia* 1.2.4–5. Even if Homer authored both the *Iliad* and the *Odyssey*, it remains noteworthy that the former portrays a much less harmonious pantheon; later Roman sources (e.g., the *Aeneid*) also portray their deities more favorably than in the *Iliad*.

1747. E.g., Aeschylus *Eum.* 179–84, 299–300 (but all deities hate the Furies, 197); Ovid *Tristia* 1.2.4–5; Sil. It. 9.438–39.

1748. E.g., Aeschylus *Eum.* 640–51.

1749. Odysseus in Eurip. *Cycl.* 606–7. In prayer, pagans often accumulated as many names of the deity they were entreating as possible (e.g., Hom. *Il.* 1.37–38, 451–52; 2.412; PGM 4.2916–27; Cleantes *Hymn to Zeus*; more restrained, *ILS* 190) and reminded a deity of favors owed, seeking an answer on contractual grounds, as many ancient texts attest (e.g., Hom. *Il.* 1.39–41; 10.291–94; *Od.* 1.61–62, 66–67; 4.762–64; 17.240–42; Ap. Rhod. 1.417–19; Virg. *Aen.* 12.778).

1750. E.g., Philost. *Vit. soph.* 2.1.554; Ach. Tat. 1.5.5–7; cf. Pindar frg. 199 (from Strabo 17.1.19); Diod. Sic. 1.27.1; Philost. *Letters* 30 (58); Mattingly, *Christianity*, 23. This provided a subject for Jewish and Christian criticism (Jos. Ag. *Ap.* 2.244–46; Ps.-Clem. 4.15.1–19.3). Pagans who advocated imitation of deities, of course, did not cite such examples (e.g., Xen. *Cyr.* 6.2.29; Cic. *Tusc.* 5.25.70; Sen. *Y. Dial.* 1.1.5; 7.8.4; Mus. Ruf. 8, p. 64.14; Epict. *Disc.* 2.14.12–13; Dio Chrys. *Or.* 3.82; Plut. *On Borrowing* 7, *Mor.* 830B; Heracl. *Ep.* 5; Max. Tyre *Or.* 35.2; *Sent. Sextus* 44–45; Libanius *Thesis* 1.3).

1751. E.g., Jos. Ag. *Ap.* 2.232–49, 275; Athenag. *Plea* 20–22; Theoph. 1.9; Tatian *Or. Gks.* 33–34.

1752. See Pelikan, *Acts*, 163, noting esp. Origen's *Contra Celsum* (e.g., *Cels.* 4.5). Pelikan (164) paradoxically employs Acts 14:15–17 to raise the topic of θεῶσις (citing Basil *Holy Sp.* 9.23; Greg. Naz. *Or.* 29.19; Athanas.

Polytheism was more intellectually fashionable in many circles than was monotheism, because it represented the views of the dominant culture.¹⁷⁵³ It was undoubtedly difficult to give up polytheism; deities or spirits were associated with entrances to the home,¹⁷⁵⁴ with trees,¹⁷⁵⁵ and with personified virtues;¹⁷⁵⁶ for Romans, spirits were associated with families and even individuals.¹⁷⁵⁷ Beliefs about and thus feelings involving deities pervaded people's daily lives and habits; their experience seemed continuous and second nature. To give up polytheism was to surrender an entire worldview associated with virtually everything familiar that surrounded its devotees.¹⁷⁵⁸

Jews and Christians challenged not only the multiplicity of deities and myths but also the use of images for deities. Neither in myth nor in cult were cult statues the central element of most Greco-Roman religion¹⁷⁵⁹ the way they had been in earlier Egypt and much of the ancient Near East (inviting the OT polemic);¹⁷⁶⁰ but neither were they mere accessories.¹⁷⁶¹ Intellectuals could normally distinguish between a deity and its statue;¹⁷⁶² such images were simply symbols of, or pointers to, a deeper reality.¹⁷⁶³ The statue should seek to accurately portray the deity's attributes,¹⁷⁶⁴ but statues cannot adequately portray deity, and when in human form, they simply offer humanity's best illustration.¹⁷⁶⁵ Nevertheless, even intellectuals who offered such distinctions might insist that such humanly made images were useful for allowing mortals concrete ways to honor their deities.¹⁷⁶⁶ Though many philosophers held a more consistent system that allowed idols only for focusing thought on the divine, not everyone agreed. (On animal worship, see comment on Acts 7:41.)

Like Paul and Luke, many Jewish people also believed that nature testified to the unity and character of God (cf. Acts 14:17; see comment on Acts 17:22–31). But although early Judaism had many apologists, it was rarely evangelistic as here,

Discourses against Arians 1.43), which, if anything, would be undercut by this text (the topic might be better served by, e.g., 2 Pet 1:4).

1753. This was also true in ancient Israel's Middle Eastern context (Albright, *Biblical Period*, 61, comparing secularism today; idem, *Yahweh*, 264).

1754. See Johnston, "Gates."

1755. On dryads and hamadryads associated with trees in ancient texts, see Gödde, "Hamadryads"; Käppel, "Nymphs"; Bremmer, "Nymph"; associations with spirits seem to have crept into some later Jewish thought (cf. *b. Sanh.* 101a, bar.).

1756. E.g., Dio Chrys. *Or.* 77/78.33; Men. *Rhet.* 1.1, 333.21–24; 2.6, 400.32–401.19; 404.29–405.13 (negatively, 1.1, 342.6–9); cf. Klauck, *Context*, 65; Bloch, "Elpis." Since winds were deified, Fronto (Naber, 211, §7) reasons that smoke and dust are also divine (though one could clearly personify without deifying, e.g., *Rhet. Her.* 4.53.66; Dio Chrys. *Or.* 63–65; 75.5; Philost. *Vit. Apoll.* 4.30). Some rejected such practices as foolish (Pliny E. *N.H.* 2.5.14–15).

1757. For the *genius*, see, e.g., Sen. *Y. Ep. Lucil.* 110.1 (on popular belief); Maharam, "Genius"; this may have influenced some in the eastern Mediterranean as well, through adapting the sense of δαίμονες (cf. popular opinion in Dio Chrys. *Or.* 23.6; Epict. *Diatr.* 1.14.12, 14; Ach. *Tat.* 3.10.1; cf. Diog. Laert. 8.1.32; 9.1.7). For household deities, see, e.g., Klauck, *Context*, 60.

1758. Indeed, as Belayche, "Actors," 278, notes, deities were so many that one could say that "the world is full of gods" (Thales; Cic. *Leg.* 2.26).

1759. Rives, *Religion*, 32–34.

1760. *Ibid.*, 34.

1761. *Ibid.*, 34–36.

1762. Lucian *Portr. D.* 23; cf. Klauck, *Context*, 27; still harsher critiques by Cynics, in Downing, *Cynics*, 213. Indeed, εἰδωλον can refer to simply a phantom (e.g., the Helen made of clouds in Apollod. *Epit.* 3.5 [though a cloud gives birth in 1.20]).

1763. Grant, *Paul*, 4.

1764. Dio Chrys. *Or.* 12.74–75, 77.

1765. Dio Chrys. *Or.* 12.52, 54, 59. Against humanly constructed images, see Iamblichus *Letter* 18.1–3 (Stobaeus *Anth.* 3.11.35).

1766. Dio Chrys. *Or.* 12.60. But a human figure was the best (12.61). For Celsus's defense of worshipping deity images, against the Christian critique, see Cook, *Interpretation*, 91–94.

summoning Gentiles to abandon false gods.¹⁷⁶⁷ Granted, idolaters are sometimes apparently addressed when denounced or mocked (e.g., Isa 44:11; 46:12; *Sib. Or.* 3.547–48), but this occurred mostly in documents that practicing idolaters would never read or hear.¹⁷⁶⁸ The usually in-house polemic of OT prophets was now heard by idolaters themselves.

(5) *Mortals versus the Creator (14:15)*

Mortals' refusal of divine honors was considered virtuous (see comment on Acts 10:26)¹⁷⁶⁹ and is modeled positively by the apostles (Acts 10:26; cf. 3:12) but negatively by a tyrant (12:22–23). A “nature like ours” (the opening three Greek syllables evoking and challenging the crowd's claim in 14:11) means shared humanity, even for great figures; perhaps, by emphasizing their humanity, Luke, like James, also hints again that his audience may emulate many aspects of the apostolic model he presents (Jas 5:17–18).¹⁷⁷⁰ The term was, however, already in circulation in Hellenistic Judaism for shared humanity (4 Macc 12:13) or createdness (Wis 7:3). Most significant, being “humans like” their hearers rhetorically echoes their audience's claim in 14:11, that they have come “like humans.”¹⁷⁷¹ Although ποιέω is a common verb (sixty-eight times in Acts), the speakers may also contrast what the crowd is “doing” with what God did (also in 14:15) in creating the heaven, the earth, the sea, and their contents, so that the crowd returns evil for good.

“Turning” in Luke-Acts (Luke 1:16–17; 22:32; Acts 9:35; 11:21; 15:19; 26:18; 28:27) is equivalent to repentance (see, most clearly, Acts 3:19; 26:20).¹⁷⁷² “Repentance” was an appropriate response to idolatry (e.g., *Jos. Asen.* 9:2); some Egyptian Jews envisioned Egyptian priests someday “turning” to the true God (*Sib. Or.* 5.497).¹⁷⁷³ When the apostles described pagan religion as vain (μάταιος), they echoed a long prophetic tradition of denouncing idolatry, not only in the LXX¹⁷⁷⁴ but also in other expressions of Diaspora Judaism.¹⁷⁷⁵ The epistolary Paul also used such language for idolatry (ἐματαιώθησαν in Rom 1:21).¹⁷⁷⁶

Like Luke here, Paul in his letters also depicts Gentiles' turning to faith as “turning” from idols to the “living God.” The “living God” (here and in 1 Thess 1:9) contrasts

1767. Dunn, *Acts*, 191.

1768. Third-person denunciations are also prominent in the context of some of these references, e.g., Isa 44:9–20; 46:6–7.

1769. Scholars cite many examples (Aelian *Var. hist.* 8.15; Ps.-Callisth. *Alex.* 2.22.12; Conzelmann, *Acts*, 82, 110; Grant, *Gods*, 26). Refusing any kind of honors sometimes led to greater praise in the long run (Val. Max. 4.1.6a); mortals failing to refuse divine honors was wicked (*Jos. Ant.* 19.345–46).

1770. Cf. the conception in Jerome *Homilies on the Psalms* 14 (Bray, *Romans*, 63).

1771. Fournier, *Episode*, 84.

1772. Cf. Luke 17:4. On Luke's use of ἐπιστρέφω, see further comment on Acts 11:21 (for the background in the Hebrew *shuv*, see Dupont, *Salvation*, 71). Jewish usage normally invited turning to God whereas Christians expected turning to Jesus (Acts 11:20–21; Dupont, *Salvation*, 71); in the case of idolatry, however, turning to monotheism is the first step (cf., e.g., 1 Thess 1:9).

1773. Cf. perhaps Philo *Virt.* 175–82 (as understood by Bekken, *Word*, 85–90). Islam later adopted this same tradition of “repentance” from idolatry and of turning to God (Qur'an 39.17).

1774. Lev 17:7 (LXX); 1 Kgs 16:2 (LXX), 13, 26; 2 Kgs 17:15; 2 Chr 11:15 (LXX); Isa 2:20 (LXX); 44:9; Jer 2:5; 8:19 (LXX); 10:3, 15; 28:18 (LXX = 51:18 MT); Ezek 8:10 (LXX); Jonah 2:8; Wis 13:1; 15:8; 3 Macc 6:11; using a different term, Wis 14:14. (In the MT, some of these passages either do not refer to vanity or do not clearly refer to idols, but the concepts are linked even in some passages in the MT; see, e.g., 1 Kgs 16:13, 26; 2 Kgs 17:15; Jer 2:5; 10:3, 15; Jonah 2:8; with a different term, Isa 41:29; 44:9.) The language applied to any kind of deception in which people trusted (e.g., Ps 30:7 [MT 31:7; ET 31:6]; Ezek 13:6–9, 19; 21:29; 22:28; Sir 34:5 [some versions, 31:5]). Cf. also Kelly, *Peter*, 74, on the LXX background for 1 Pet 1:18.

1775. E.g., *Sib. Or.* 3.29 (probably pre-Christian), 547–48 (probably second century B.C.E.). Cf. also “dead” used for the old “gods,” which were really mortal rulers (3.551–54, esp. 554; a euhemeristic interpretation, as for the mortal Zeus reared in Phrygia in 3.140–41).

1776. Cf. the comparable warning that idols lead to μάταια φρονεῖν, thinking vain things (*Sib. Or.* 3.555).

with polytheists' dead gods, as sometimes in the OT (Jer 10:10 [cf. 10:8–10])¹⁷⁷⁷ and early Judaism (e.g., *Jos. Asen.* 8:5). The title “living God” was frequent in early Judaism,¹⁷⁷⁸ and the context of this passage (including the contrast with “vain” things) displays how Luke wants his audience to understand God as “living”: concerned and active for humanity.¹⁷⁷⁹

God is creator of the heaven, the earth, the sea, and everything in them (Acts 14:15).¹⁷⁸⁰ Luke elsewhere reports Paul's offering polytheistic hearers a similar summary of God's creation (17:24) and grounds the threefold summary of God's created realms (plus their denizens) in Scripture (echoed in 4:24). Scripture revealed that God made everything, including the heavens and the earth (Gen 1:1; Isa 42:5; anti-idolatry polemic in Isa 45:8, 12, 18)¹⁷⁸¹ and, when it employs the threefold formula, the sea (Exod 20:11;¹⁷⁸² Neh 9:6; Ps 146:6; cf. Amos 9:6).¹⁷⁸³ Because the same formula appears in Acts 4:24 (from Ps 146:6), it probably reflects Christian liturgical memory (alluded to in Rev 5:13; 10:6; 14:7; 21:1), but Luke might display his cognizance of the context, here as in Acts 4:24. In Ps 146, God is the healer,¹⁷⁸⁴ just as God has performed healing in Acts 14:10. That God made heaven, earth, and sea is a formula that Luke favors (4:24), as already noted, though it was not unique to him among early Christians (Rev 10:6; 14:7; cf. 5:13; 21:1). The epistolary Paul, though not employing this full formula (but cf. 1 Cor 8:5; 10:26; Eph 3:15; Col 1:16, 20; esp. Phil 2:10), also argues about God from creation (Rom 1:20),¹⁷⁸⁵ with moral implications concerning idolatry (1:25).

Though Luke's formula is biblical, Roman poets used similar descriptions of universal sovereignty for the greatest god or gods: God pervades everything, earth and sea and heaven (Virg. *Georg.* 4.221–22);¹⁷⁸⁶ Jupiter shook land, sea, and heaven by shaking his head (Ovid *Metam.* 1.180); Jupiter rules sea and lands and heaven as well as mortals and gods (Hor. *Odes* 1.12.13–18).¹⁷⁸⁷ Orators borrowed the same

1777. The LXX omits Jer 10:10. Cf. the antipagan use in Josh 3:10; 1 Sam 17:26, 36; 2 Kgs 19:4, 16; Isa 37:4, 17; Dan 6:20, 26 (i.e., more than half the OT uses); cf. also 2 Cor 6:16.

1778. *Jub.* 1:25; 21:4; *Sib. Or.* 3.763; 4Q504 1–2 V, 9; 8 (recto) 12; 5Q10 1 4; pervasive in Philo (more than 100, perhaps close to 150, times); Marmorstein, *Names*, 72; cf. *b. Šabb.* 137; *Eruv.* 13b; *Pesah.* 87b; *Yoma* 35b; *Hag.* 12b; *Ned.* 65a; *Git.* 6b; *Qidd.* 36a.

1779. See Dionne, “Figure de Dieu” (also noting the speech's portrayal of God as benevolent and immanent Creator).

1780. A speaker would gesture toward objects of discussion (Shiell, *Reading Acts*, 57–62, esp. 57), and so we might imagine the speaker(s) here gesturing toward heaven and earth (and perhaps south toward the sea; but not being visible, it was probably not necessary). On God as Creator in Luke-Acts, see, e.g., Pilgrim, “Creation” (also treating motifs useful for ecological theology).

1781. Also *1 En.* 101:8, as the basis for sinners fearing God (101:9). Gentiles might recognize the heavenly character of deity (see, e.g., Epict. *Diatr.* 1.30.1; Ach. Tat. 5.2.2; on the superiority of the heavenly realm, e.g., Cic. *Tusc.* 1.19.43; Sen. *Y. Dial.* 12.11.6; Max. Tyre 9.6; Heracl. *Ep.* 5; Philo *Creation* 147) yet insist that one should worship the deity concretely through images and not just in the heavens (Dio Chrys. *Or.* 12.60). Jewish texts often associate God with “heaven” (e.g., 1 Esd 4:58; Tob 10:13; Jdt 6:19; 1 Macc 3:18, 50, 60; 4:24; 3 Macc 7:6; *1 En.* 83:9; 91:7; *Test. Ab.* 2:3 A; Philo *Creation* 82; *Sib. Or.* 1.158, 165; 3.247, 286), especially as “our Father in heaven” (*m. Soṭah* 9:15; *t. Ber.* 3:14; *B. Qam.* 7:6; *Hag.* 2:1; *Pe'ah* 4:21; *Sipra Qed. pq.* 9.207.2.13; *Behuq. pq.* 8.269.2.15; *Sipre Deut.* 352.1.2).

1782. Exod 20:11 is the foundational text (including the sea) followed by the others, offering the Torah's support for Luke's geographic universalism (cf. Slater, “Exodus 20:11,” though he may derive too much from this).

1783. The full formula appears also in anti-idolatry polemic in *Test. Job* 2:3–4 (esp. 2:4: ὁ θεὸς ὁ ποιῶν τὸν οὐρανὸν καὶ τὴν γῆν καὶ τὴν θάλασσαν καὶ ἡμᾶς αὐτοὺς).

1784. Of blind eyes and those bowed down (Ps 146:8), though this is not clear in the LXX.

1785. Also Porter, *Paul in Acts*, 147 (mentioning the Stoic description there).

1786. Familiar language for Virgil: the winds, if unrestrained, would blow away seas, lands, and heaven (*Aen.* 1.58, 280).

1787. Cf. the same idea of universal sovereignty, differently worded, in Hor. *Odes* 3.45–48.

language: Apollo's splendor at his birth filled earth, sea, and heaven (Men. Rhet. 2.17, 439.18–19).¹⁷⁸⁸

Yet Gentile writers also typically treated heaven, earth, and sea as deities in their own right.¹⁷⁸⁹ Perhaps most relevant here, the universal Christian formula contrasts with the traditional belief attributed to many Phrygians, the worship of the earth mother.¹⁷⁹⁰ (Lystra is Lycaonian but close enough to Phrygian culture for this widespread emphasis to be relevant here.) “Mother Rhea” was typically associated with Phrygia;¹⁷⁹¹ it was said that the “mother of the gods” was Phrygian.¹⁷⁹² Isis claims that the Phrygians were the first to worship her as mother of the gods.¹⁷⁹³ Ancient sources often speak of the earth mother or mother earth,¹⁷⁹⁴ “Great Mother,”¹⁷⁹⁵ “Mother Cybele,”¹⁷⁹⁶ “Mother of the gods,”¹⁷⁹⁷ “Mother of all,”¹⁷⁹⁸ or the Idaean Mother.¹⁷⁹⁹ She was hellenized even in Asia, but the mother role was retained.¹⁸⁰⁰ Rhea was mother of Zeus in traditional Greek sources, and Cybele assumed this role.¹⁸⁰¹ A black stone constituted her sacred totem;¹⁸⁰² a pine was sacred to her.¹⁸⁰³ Greeks added the Mysteries, though (given their secrecy) we naturally know little about them.¹⁸⁰⁴

Cybele's cult was traditionally celebrated with ecstasy, shouts, and dancing.¹⁸⁰⁵ Her worshippers used tympana, tambourines, cymbals, and sometimes Phrygian flutes,¹⁸⁰⁶

1788. In Men. Rhet. 2.17, 439.20–21, earth, sea, and heaven showed good omens (the expanded summary of creation thus functioning as a rhetorical flourish). A later magical text could address a deity as “king of the heavens and the earth and all things living in them” (PGM 13.784–85 [PDM 190]; Jewish influence on the language is possible).

1789. Rives, *Religion*, 16.

1790. For specifically Phrygian associations, see, e.g., Eurip. *Bacch.* 58–59, 79; Lucret. *Nat.* 2.611; *Rhet. Her.* 4.59.62; Val. Max. 7.5.2; Sen. *Y. Ep. Lucil.* 108.7; Lucian *Gout* 30–32; *Affairs* 42.

1791. Eurip. *Bacch.* 58–59 (Rhea being Zeus's mother).

1792. Diog. Laert. 6.1.1; cf. *Orph. H.* 27.12. Others, following Hesiod, made Night the mother of deities (*Orph. H.* 3.1). Cybele's music was distinctively Phrygian (e.g., Lucret. *Nat.* 2.618–20); a cult modeled after Cybele's uses Phrygian music in Apul. *Metam.* 8.30.

1793. Apul. *Metam.* 11.4–5. But Isis worship was calmer whereas that of Cybele was wilder (Grant, *Religions*, xxxvii).

1794. E.g., Aeschylus *Suppl.* 890; *Lib.* 44; Lucret. *Nat.* 2.581–99. For earth as mother, see further Aeschylus *Seven* 16; Pindar *Nem.* 6.1–2; *Ol.* 7.38; Ovid *Metam.* 1.393; *Fasti* 2.713–19; Val. Max. 7.3.2; Pliny E. *N.H.* 2.63.154; Suet. *Jul.* 7.2; Philost. *Vit. Apoll.* 1.15; 4 *Ezra* 10:9–14 (in the context of Zion as mother, 9:41–10:24); as nurse, Paus. 1.22.3; Athen. *Deipn.* 10.451E; for Nature as mother, Pliny E. *N.H.* 24.1.1; 37.78.205; Athenians counted the soil as mother (Dio Chrys. *Or.* 64.12). Cf. “Mother Tethys,” personifying the sea (*Sib. Or.* 3.22). On earth as a goddess, see, e.g., Hutter, “Earth.”

1795. E.g., Virg. *Aen.* 10.220 (cf. 10.234); Pliny *Ep.* 10.49.1; *Gr. Anth.* 6.220. Iconography identifies her with Cybele (Uggeri, “Mater Magna,” 459).

1796. Sen. *Y. Troj.* 72; cf. Catull. *Carm.* 63.9.

1797. E.g., Ap. Rhod. 3.716; Sext. *Emp. Pyr.* 3.217; Val. Max. 8.15.3; Pliny E. *N.H.* 2.6.37; Diog. Laert. 6.1.1. Prometheus as a Titan was a child of earth (Lucian *Z. Rants* 1; *Prom.* 3).

1798. *Hom. Hymns* 30.1 (to Earth); Virg. *Aen.* 6.595; *Gr. Anth.* 7.461; cf. Philo *Creation* 133.

1799. Val. Max. 7.5.2; Grattius *Cyneg.* 19–20.

1800. Roller, “Great Mother.” Ramsay, *Other Studies*, 125–59, suggests pagan antecedents to the later veneration of Mary at Ephesus. “Ma” (meaning “mother”) is an Anatolian mother goddess, though this name is not primarily attested in Phrygia (Gordon, “Ma”).

1801. E.g., Mart. *Epig.* 9.39. The Phrygian earth mother was not Dionysus's mother, however (Otto, *Dionysus*, 70). Phrygians may have originally associated Matar (Cybele) with the king (so Bogh, “Kybele”).

1802. Stambaugh and Balch, *Environment*, 136.

1803. Sen. *Y. Troj.* 72. (Attis died beneath a pine; Burkert, *Mystery Cults*, 6.)

1804. Paus. 2.3.4 knew about them but refrained from relating it; Juv. *Sat.* 2.110–16 is eager to denounce them.

1805. See, e.g., Plut. *Dial. L.* 16, *Mor.* 758EF; Burkert, *Religion*, 178; Stambaugh and Balch, *Environment*, 136. See the Galli's ecstatic prophecy in Livy 38.18.9; further discussion on ecstasy under prophetism at Acts 2:16–17.

1806. E.g., Eurip. *Bacch.* 59; Callim. *Iambi* 4.194.106; Catull. *Carm.* 63.8–9, 29; Lucret. *Nat.* 2.618–20; Babr. 141.6–9; Phaedrus 4.1.6–7; Pliny *Ep.* 2.14.13 (implied); Lucian *Dial.* G. 233–34 (20/12, Aphrodite and

the goal being ecstatic possession by the mother of the gods.¹⁸⁰⁷ The ecstasy was not all joyful: the worshipers wailed and mourned¹⁸⁰⁸ in light of the death of Cybele's beloved Attis.¹⁸⁰⁹ Her long-haired followers could lacerate themselves during frenzied worship.¹⁸¹⁰ On her Galli, who castrated themselves in a fit of ecstasy, see comment on Acts 8:27, but many of her followers were women.¹⁸¹¹

Cybele was worshiped widely outside Phrygia¹⁸¹²—for example, probably in Crete.¹⁸¹³ Romans paid respect to the mother goddess,¹⁸¹⁴ though her castrated Galli were objects of disdain (see comment on Acts 8:27); in response to a prophecy, Romans brought her cult to Rome.¹⁸¹⁵ Nevertheless, Roman citizens were originally restricted from the cult; only in the reign of Claudius did the cult of Attis find an official home in Rome.¹⁸¹⁶ From then on, however, Attis's spring festival became popular in Rome.¹⁸¹⁷ See further some discussion of the mother goddess at Acts 19:27.

Luke does not restrict the universal formula to this context and need not have the cult of Cybele specifically in mind. Nevertheless, it may have occurred to some of Luke's ancient audience, and would likely have occurred to Paul's real hearers in Phrygia if he offered the sort of words that Luke describes here. Paul's creator of heaven, earth, and sea would also challenge traditional Greek myth concerning Zeus, who figures here. The usual form of the myth divided the rule of heaven, earth, and sea among Zeus (heaven), Hades (underworld), and Poseidon (sea);¹⁸¹⁸ they had neither a single ruler nor, far less, a single creator-ruler, though Zeus was certainly viewed as supreme and was increasingly viewed as an all-powerful supreme deity.

Even most philosophers would have differed with Paul's claim here (though see comment on Acts 17:24, 29). Although Platonists advocated interest in the supreme good (an approach that later Christian Platonists readily exploited in the service of

Eros 1); *Orph. H.* 27.11; Philost. *Letters* 69 (15); *Gr. Anth.* 6.219–20; for Cybele's "sister," Apul. *Metam.* 8.30; cf. *Lucian Alex.* 9. Such instruments were not, of course, limited to that sphere (e.g., 1 Esd 5:59–60; 1 Macc 4:54; 13:51; P.Hib. 54.13; Ovid *Metam.* 3.532–33; Livy 39.8.8; *Lucian Dance* 68; *Dion.* 4).

1807. *Iambl. Myst.* 3.9. Phrygian music, which was passionate (*Proclus Poet. 5*, K61.27; K62.6; 6, K84.21), could stir a drunken youth to riotous behavior, in contrast to calmer melodies (*Iambl. VP.* 25.112).

1808. *Suet. Otho* 8.3.

1809. Cf. *Catull. Carm.* 63.4–6; *Statius Silv.* 2.2.88; *Lucian Affairs* 42; *Sacr.* 7; *Dial. G.* 233–34 (20/12, Aphrodite and Eros 1); Koester, *Introduction*, 1:191–94; Klauck, *Context*, 120–28. The Attis cult spread widely (Bremmer, "Attis"), though as a Greek, and not Phrygian, invention (Bøgh, "Kybele"); for artistic portrayals from the Roman period, cf., e.g., Godwin, *Mystery Religions*, 116–19; Vermaseren, *Cybele*, 95–96. Contrary to the excesses of the earlier history-of-religions school, Attis was not raised from death (Klauck, *Context*, 122).

1810. *Val. Flacc.* 7.635–36.

1811. *Lucian Affairs* 42; *Iambl. Myst.* 3.10.

1812. There were also other mother goddesses; e.g., *Tac. Germ.* 40, 45; cf. *Jer* 7:18; 44:17. A statue head of Cybele was discovered in Samothrace (Welch, "Statue Head").

1813. Sanders, *Crete*, 37 (but cf. mother goddesses already in Minoan Crete, in Pomeroy, *Goddesses*, 13–14). On the Curetes assisting the mother goddess in Crete, see Strabo 10.3.11; for frenzied mother-goddess worship there, see 10.3.13.

1814. E.g., *Val. Max.* 1.1.1. Romans also had divine mother figures; see Clarke, "Spaces," 271, on Fortuna Primigenia.

1815. *Val. Max.* 7.5.2; 8.15.3; *Sil. It.* 17.1–4 (line 8 calls her Cybele). See also discussion in Uggeri, "Mater Magna," 458.

1816. Grant, *Gods*, 33. Tiberius, however, kept a painting of Cybele's high priest in his bedchamber (Pliny E. *N.H.* 35.36.70), and the temple of the Mother of the Gods (apart from Attis) was already ancient in Rome (*Tac. Ann.* 4.64).

1817. Klauck, *Context*, 124. The mother goddess cult appears even in far-flung Beroea, though the evidence could be as late as the fourth century (or as early as the second; Koester, *Paul and World*, 177–79).

1818. E.g., *Lucian Dance* 37. Zeus also ruled the earth under heaven. Cf. some heavenly, earthly, and chthonic deities in *Hom. Il.* 3.276–78; *PGM* 1.315–16; 17a.2–3 (cf. the three tiers in *Pr. Jos.* 11); heavenly, terrestrial, and marine (*PDM Sup.* 131–34); heavenly, marine, and chthonic (*Jos. Ag. Ap.* 2.240); deities above and below in *Livy* 31.31.3; *PGM* 1.264.

monotheism), some mounted a defense of this doctrine's compatibility with idols. Though Greeks and Romans typically despised Egyptian idolatry's use of animal forms,¹⁸¹⁹ some Platonists contended that the gods liked to sanctify lower (material) forms by using them to signify themselves (Iambl. *Myst.* 7.1; cf. Max. Tyre 2.2, 10).¹⁸²⁰ Thus Porphyry (or a thinker like him) later criticized Christians for insisting on one God; although there was but one supreme deity, he charged, he was not angry with the worship of other gods as well (in Mac. Magn. *Apocrit.* 4.20–23).¹⁸²¹ A complete avoidance of idols would force Christians from public life in their communities, making them dishonorable outsiders;¹⁸²² their strict monotheism was socially incompatible with polytheistic society. Certainly denunciation of other deities does not dispose the crowds to continue favoring the preachers here once it is clear that they are not deities themselves (Acts 14:19).

(6) *God Endured Idolatry (14:16)*

That God permitted¹⁸²³ past eras of wrong behavior probably means that he “overlooked ignorance” (Acts 17:30). Similar language appears in Paul, though directed toward a different context and situation; Rom 3:25 probably includes Jewish sins, forgiven in anticipation of the cross,¹⁸²⁴ whereas both texts in Acts suggest God's tolerating idolatry (in the sense of not wiping out worshipers of such images) because God planned to someday bring salvation in Christ.¹⁸²⁵ The prototype for all of these may be Wis 11:23, where God mercifully overlooks people's sins “for repentance,” probably meaning that God allows them opportunity to repent.¹⁸²⁶

The wording may be somewhat diplomatic, but it reminds us that Paul's ultimate goal was not simply to make a successful oration by rhetorical standards. Rhetoricians advised securing hearers' favor by praising their ancestors (Socratic *Ep.* 28); Paul's measured tolerance of error is hardly praise. God had the right to judge the nations as he decided, since (from a Jewish perspective) God ruled all the nations (Deut 32:8; Ps 145:9; Wis 11:22–24; 1 *En.* 84:2).¹⁸²⁷

(7) *Agricultural Testimony (14:17)*

The rhetorically sensitive would speak of what was esteemed among a given people (Arist. *Rhet.* 1.9.30, 1367b). The common view of nearby Phrygia was that it was fertile (Hor. *Odes* 2.12.22). Although much of Lycaonia was less hospitable for agriculture (Strabo 12.6.1), as noted above, this was a basically rural community (as also noted above), and an urban cosmopolitan speech would have put such an

1819. Pearson, “Idolatry, Jewish Conception”; see comment on Acts 7:22, 41. In the Memphite theology, deities entered idols as their bodies (ANET 5).

1820. Later Christian Platonists were able to adapt this approach to defend the incarnation (and ultimately the use of icons) while retaining Platonic notions. For the early Christian Platonists, cf., e.g., Frend, *Rise of Christianity*, 369–79, 660, 664, 719.

1821. *Porphyry's* 83–88. Cults emphasizing a supreme God with subordinates such as Mithras, angels, or Hermes became popular in late antiquity (Lake, “Proselytes,” 94).

1822. DeSilva, *Honor*, 47.

1823. Apart from Matt 24:43 and 1 Cor 10:13, the term ἐάω is in the NT typically Lukan, though it bears no overriding theological significance there (it simply means “permit” or “not stop”; Luke 4:41; 22:51; Acts 16:7; 19:30; 23:32; 27:32, 40; 28:4).

1824. Cf. Dunn, *Theology of Paul*, 215. This might resemble amnesty for former crimes (Aeschines *Tim.* 39), but perhaps especially the suspension of judgment until atonement (as in *Abot R. Nat.* 39 A, depicting the state between repentance and the Day of Atonement).

1825. If such passages suggest some form of access to God in paganism, Luke's full context is also clear that it is fulfilled only in Christ (cf. Dumais, “Salut”).

1826. The idea that God wants sinners to live and have opportunity to repent also appears elsewhere (Ezek 18:23, 32; *Test. Ab.* 12:13 B).

1827. Dunn, *Acts*, 189. Cf. also 1 Chr 16:31; Pss 47:2, 8; 83:18; 96:10; 97:9; Zech 14:9.

audience off.¹⁸²⁸ Life in rural villages in Asia Minor diverged dramatically from urban life, including in matters of “language and nomenclature, diet and lifestyle, cults and patterns of authority.”¹⁸²⁹ Most of the rural empire was concerned with fertility, and temples included rituals to ensure this.¹⁸³⁰ Greeks invoked Demeter before sowing (e.g., Epict. *Diatr.* 3.21.12).

Although this background may flesh out our picture of Paul’s historical visit to Lystra, scholars debate the extent to which it would inform the hearing of most of Luke’s first audiences. Urban populations sometimes viewed rural dwellers as backward and unlearned (see the commentary introduction),¹⁸³¹ a view also entertained about Christians by some of their educated detractors. If such is the case here, Luke’s apologetic undercuts the view of the missionaries as backward, instead portraying their pagan hearers as misunderstanding (cf. 17:18) but the apostles, like good sages, as trying to explain their identities accurately.¹⁸³² Yet Luke’s audience might not know much about Lystra (though it likely knew of churches in South Galatia, 1 Cor 16:1), and Luke reserves the title “barbarians” for the Maltese (Acts 28:2, 4).¹⁸³³ Although Luke *might* play on the ancient prejudice of rural simplicity, he uses his broad term πόλις in introducing Lystra in 14:6, and the negative behavior he attributes to Lystrans, divinizing mortals, applies not only to barbarians (28:6, in the west) but to urban dwellers as well (10:25; 12:22). It is not stereotypical rural behavior (witness the urban imperial temples) but stereotypical *Gentile* behavior. The fickleness of the masses (14:19) appears most often in ancient literature as a stereotype of *urban* masses.

“Witness” could come through signs as in 14:3, but here it came through creation and God’s bounty, his gifts to all. “Not without witness” is a case of Luke’s frequent use of litotes (12:18; 19:23, 24; 21:39; 27:20).¹⁸³⁴ The testimony of creation (cf. Ps 19:1–6)¹⁸³⁵ made humanity morally responsible (Wis 13:1), as also in Pauline theology (Rom 1:20). In Paul, too, God’s kindness leads to repentance (2:4). Luke undoubtedly condenses a more complete early Jewish and Christian apologetic approach here.

This apologetic developed an idea already present among many philosophers, especially Stoics. Stoics believed that the universe’s order and signs of benevolence

1828. For urban-rural tensions, see MacMullen, *Social Relations*, 15, 30, 32; Lee, “Unrest,” 128; more fully the commentary introduction, Keener, *Acts*, 1:590–96.

1829. Mitchell, *Anatolia*, 1:195.

1830. E.g., in Egypt (Frankfurter, *Religion in Egypt*, 37–46).

1831. Keener, *Acts*, 1:592–93. This was true also in the interior of Asia Minor (Mitchell, *Anatolia*, 1:195).

1832. See more fully Bechard, “Rustics.” The rustics in the passage are manipulated, but in contrast to second-century pagan portrayals of Christian evangelists (Lucian, etc.), “Paul and Barnabas are the victims of this deception not its perpetrators” (Bechard, *Walls*, 431).

1833. Wordelman, “Divides,” 205, 217, complaining that much of the history of interpretation denigrates the Lystrans as “rural” and “Oriental.” We might note, however, the apparent need for interpreters in Acts 14:14; the Greek of Paul’s audience is limited, though Luke does not emphasize this point directly. While Luke admittedly uses “city” loosely even for villages (e.g., 27:8; Luke 1:26; 2:4; 7:11), it would be a strange term if he wished to deliberately *highlight* a town’s rural character. In any case, Luke would be no more anti-rural for noting persecution here than anti-urban for noting it in Ephesus (19:24–29). Historically, Paul suffered both in cities and outside them (2 Cor 11:26). Niang, *Faith*, argues that Paul’s letter to the Galatians (93–108) reflects an anticolonial approach that differs from the traditional Roman bias against Galatians.

1834. On litotes, see, e.g., Rowe, “Style,” 128; cf. *Rhet. Her.* 4.38.50. It is not exclusively Lukan (e.g., Mark 6:4; 1 Cor 9:26; Heb 7:20; 9:7).

1835. I note here the idea, not the terminology, unless one thinks of midrashic linkage with the context; a cognate of “witness” appears in Ps 18:8 LXX (19:8 MT; 19:7 ET), but with reference to the law. The permanence of the moon testifies to God’s eternal covenant with David’s house (Ps 88:37–38 LXX; 89:37–38 MT; 89:36–37 ET). Heaven and earth can testify as witnesses (Deut 4:26; 30:19; 31:28; 2 Esd 2:14; 1 Macc 2:37; Jdt 7:28; 2 Bar. 19:1; 84:2; *Test. Mos.* 3:12; cf. 1Q22 I, 5; 11Q12 5 2), a usage probably originally related to their being called to witness the original covenant with Israel (ancient Near Eastern treaties named witnesses). *Jub.* 4:30 is probably not relevant.

indicate the divine mind that established and sustains it.¹⁸³⁶ One of the Cynic Epistles even employs the same language as here: night and day bear testimony (μαρτυροῦσιν) to God's character, just as the seasons and the fruit-bearing (καρποφοροῦσα)¹⁸³⁷ earth as well as the moon's cycle bear witness (μαρτυρία, Heracl. *Ep.* 4). A Hellenistic Jewish philosopher like Philo could also use such language (*Flight* 184).¹⁸³⁸ Would a Lystran crowd, many of whom spoke Lycaonian as their first language, understand such apologetic bridges to popular Greek philosophy? Perhaps not fully, but it is difficult to think what other bridges might have worked better (or the historical Paul would have known), and certainly Luke's ideal audience would have understood and appreciated those bridges. Philosophic texts, more often preserved than popular ideas, also sometimes attest to ideas more widely held on a popular and rudimentary level.

People valued rain more than other resources as necessary for crops¹⁸³⁹ and sought it by various religious rituals,¹⁸⁴⁰ sometimes including those that were widely viewed as magic.¹⁸⁴¹ Various deities were credited with sending rains,¹⁸⁴² though Zeus (and his local equivalent) was the primary storm god.¹⁸⁴³ (Some also preferred "scientific" theories on rain, such as that it was caused by each of the planets and stars.)¹⁸⁴⁴ God's benevolence in sending the rain and feeding creation is already clear in the OT (Lev 26:4; Pss 145:15; 147:8–9; rain in its [rainy] seasons, Jer 5:24);¹⁸⁴⁵ early Judaism developed the idea further. God alone was in charge of sending rain (1 *En.* 2:3),¹⁸⁴⁶ though he sent rain in response to prayers,¹⁸⁴⁷ sacrifices,¹⁸⁴⁸ the temple service,¹⁸⁴⁹

1836. See Keener, *John*, 341–42, 371–72, 376–77; cf. Diog. Laert. 7.1.134, 147. For the application of this thought to Acts 14:17, see Kee, *Miracle*, 199. Cf. also comments above.

1837. This term and its cognates were "literary, from Pindar onwards" (Bruce, *Acts*¹, 284).

1838. Philo *QG* 3.15 is probably not relevant.

1839. E.g., Plut. *Nat. Phen.* 2, *Mor.* 911F–912D; 1 *En.* 76:4–13; 2 *Bar.* 10:11; *b. Ta'an.* 7ab; *Gen. Rab.* 13:3–4; *Lev. Rab.* 35:8. Cf. learning the value of crops over gold during famine (Max. Tyre 5.1). Naturally rain could have unpleasant aspects, as in the term's other Lukan use (Acts 28:2).

1840. Greeks might undergo rituals (cf. Iambl. *V.P.* 10.51) or require sacrifice to propitiate a deity who sent drought (Paus. 2.29.8; Alciph. *Farm.* 33 [Thallicus to Petraeus], 3.35, ¶¶ 1–2; rejected by Sen. *Y. Nat.* Q. 4.7.3).

1841. E.g., an Egyptian priest in Frankfurter, *Religion in Egypt*, 226 (though this was public); a powerful witch in Ovid *Am.* 1.8.9–10; the hail magician in Iambl. (nov.) *Bab. St.* 10 (Photius *Bibl.* 94.75b). This remains true in many traditional societies (Mbiti, *Religions*, 89, 234–37).

1842. Cf. Parth. *L.R.* 6.6; heroes in Diog. Laert. 8.2.59; Paus. 2.29.8; Philost. *Hrk.* 15.6.

1843. Breytenbach, "Zeus und Gott," thinks that the claim opposes local beliefs about Zeus as controller of weather (and finds other first-century ideas from southern Asia Minor in the passage). For Zeus as a weather deity, see Lucian *Icar.* 25–26; Guthrie, *Greeks and Gods*, 37ff., 125–26; in Anatolia particularly, Rives, *Religion*, 60; for some suggested common traits of some ancient Near Eastern storm deities, see Green, *Storm-God*.

1844. Pliny *E. N.H.* 2.39.105–6; 2.43.112 (giving a much more accurate perspective in 2.42.111). Sen. *Y. Nat.* Q. 4.7.3 rejects the view that incantations can affect rain.

1845. Johnson, *Acts*, 249; Dunn, *Acts*, 191; Mufwata, *Extrémités*, 16. Cf. Pss 65:9; 104, including "gladness" in 104:15. The seasons here could be comparable to the "times" in Acts 17:26 (among other parallels between that speech and this one), but "apocalyptic" seasons are more likely in view there. For God's character, including his benevolence, here, see Dionne, "Figure de Dieu."

1846. E.g., texts about the keys God has not delegated, *b. Sanh.* 113a; *Ta'an.* 2a; *Gen. Rab.* 73:4; *Pesiq. Rab.* 42:7; *Tg. Neof.* 1 on Gen 30:22; *Tg. Ps.-J.* on Deut 28:12; cf. Jos. *Ant.* 18.285; *Sipre Deut.* 38.1.4. In addition to rabbinic texts about the keys, some other texts also linked rain with resurrection (e.g., *b. Ber.* 29a; 33a; *Ta'an.* 2b; 7a; *y. Ber.* 5:2; *Ta'an.* 1:1, §2a; *Gen. Rab.* 13:6; *Deut. Rab.* 7:6). God's sovereignty over rain is also implied by the name of an angel whose name means "rain of God" (1 *En.* 6:7).

1847. Public prayers in *b. B. Meši'a* 28a; holy persons in 1 Sam 12:17–18; Jdt 8:31; Jos. *Ant.* 13.343–46; 14.22; *m. Ta'an.* 3:8; *t. Ta'an.* 2:13; *'Abot R. Nat.* 6 A; *b. Ta'an.* 8a; 19b–20a; 23ab; 24a–26a; *y. Ta'an.* 1:4, §1; 3:9, §§6–8; 3:10, §1; 3:11, §4; cf. 1 Kgs 17:1; 18:41–46; Jas 5:17–18; Evans, "Holy Men"; Vermes, *Jesus the Jew*, 70, 76.

1848. *Pesiq. Rab.* 52:3; cf. *Gen. Rab.* 13:5. Many scholars think that the water-drawing ritual at Sukkoth was meant to secure rain; see Moore, *Judaism*, 2:44–45 (comparing the functions of libations among pagans); Ringgren, *Religion*, 190; Harrelson, *Cult*, 69; Uval, "Streams"; cf. Zech 14:16–19.

1849. *'Abot R. Nat.* 4 A; *b. Ta'an.* 19b, bar.; *Pesiq. Rab.* 52:3.

festivals,¹⁸⁵⁰ and other acts.¹⁸⁵¹ God created people not to care for him but so that God could care for them (*Sipre Deut.* 38.1.3).

A saying that one Gospel reports from Jesus tradition may be relevant: God sends rain on the righteous and the unrighteous (Matt 5:45, with the unrighteous paralleling tax gatherers in 5:46 and Gentiles in 5:47). Luke omits the saying, and so we cannot be certain that he or his ideal audience knew it, but given Matthew's general propensity to preserve Jesus's sayings accurately,¹⁸⁵² it may well have been known. The sentiment was more widespread (e.g., *Sipre Deut.* 38.1.4).¹⁸⁵³

"Filled with food and gladness" indicates God's benevolence even toward those who do not worship him.¹⁸⁵⁴ Luke uses ἐμπίμπλημι with regard to food in Luke 1:53 and 6:25 (cf. also John 6:12), but because "hearts" fits better with "gladness," the expression may be elliptical.¹⁸⁵⁵ "Filling with gladness" here might implicitly point to the higher filling with joy that is available in full submission to God's purposes (Acts 13:52).¹⁸⁵⁶ Seasons dictated the work cycle for the bulk of the empire's population;¹⁸⁵⁷ religiously, they were central in the myths related to the agricultural cults of rising deities.¹⁸⁵⁸ Luke's audience, however, recognized that God ruled the seasons (Gen 8:22; Ps 74:17); some Diaspora Jews interpreted the "times" of Gen 1:14 as the four seasons in a year (Philo *Creation* 59).¹⁸⁵⁹

One exercise for declamation in Greek rhetorical schools was called "Whether the gods exercise providential care for the cosmos";¹⁸⁶⁰ Paul might not have been the first

1850. *T. Sukkah* 3:18; *Eccl. Rab.* 7:14, §3; *Song Rab.* 7:2, §2. On prayers for rain at Sukkoth, *m. Ta'an.* 1:1; *b. B. Meši'a* 28a; *y. Ta'an.* 1:1, §§1–10. In later tradition, God made his decisions concerning rain during this festival; e.g., *t. Roš Haš.* 1:13; *Pesiq. Rab Kah.* Sup. 7:2; *y. Roš Haš.* 1:3, §43; perhaps also *m. Roš Haš.* 1:2 (but cf. *m. Ta'an.* 1:1). Cf. the association instead with God's decrees at the New Year (Rosh Hashanah) in *Sipre Deut.* 40.4.2; *y. Roš Haš.* 1:3, §§45–46. Some came to believe that the water libations at this feast brought on the rains (*b. Ta'an.* 25b).

1851. Almsgiving (*Lev. Rab.* 34:14); repentance (*Gen. Rab.* 13:14); tithes (*Pesiq. Rab Kah.* 1:4); obedience to the Torah (Lev 26:3–4; Deut 11:13–14; *Sipre Deut.* 41.6.4; *Num. Rab.* 3:12). Rain could be withheld because of sins (Deut 28:48; *1 En.* 101:2; *Pss. Sol.* 17:18; *Jos. Ant.* 8.318–19; *b. Ta'an.* 7b; *Lev. Rab.* 35:10) or (apparently) in mourning the temple's destruction (*b. Ta'an.* 19b).

1852. See Keener, *Matthew*, 24–31, and sources cited there; it would be easier to argue for some literary liberties in some of Matthew's narratives (e.g., Matt 27:3–10; see comment on Acts 1:18; though I mean this on a limited scale; see Keener, *Matthew*, 16–24, 32–36).

1853. Later sages regarded rain as a sign of God's beneficence for all people, worthy or unworthy (*y. B. Meši'a* 2:5, §2; 9:5, §1; *Gen. Rab.* 13:6, 15; *Pesiq. Rab.* 48:4; Flusser, *Judaism*, 490–91).

1854. *Sib. Or.* 3.659–60 speaks of God ultimately blessing the earth and making the sea "full of good things" (3.660: τῶν ἀγαθῶν πλήθουσα). In view of ancient parallels, Pervo's suggestion (*Acts*, 359) that Luke's emphasis on creation's goodness reveals closeness to second-century apologists confronting Gnosticism is unwarranted.

1855. Fitzmyer, *Acts*, 532. Luke elsewhere speaks of a heart being "filled" (*Acts* 5:3; 7:23; cf. John 16:6; *Eccl* 9:3). "Food and gladness" may be a hendiadys (Blass, Debrunner, and Funk, *Grammar*, 228, §442.16; Le Cornu, *Acts*, 784), though the expression appears later (Rowe, "Style," 143) and here the nouns lacks a shared definite article.

1856. Such expressions are not uniquely Lukan (John 3:29; 15:11; 16:24; 17:13; Rom 15:13; 2 Cor 7:4; 2 Tim 1:4; 2 John 12), but perhaps the closest (using εὐφροσύνη) is Acts 2:28, again on a different level of joy. Xenophon claimed that the gods supply diverse foods partly for human enjoyment (*Mem.* 4.3.5–6; Conzelmann, *Acts*, 111; cf. 1 Tim 6:17). Writers could associate εὐφροσύνη with God's work (e.g., 1 Macc 3:2) or living virtuously (*Mus. Ruf.* 17, p. 108.7, contrasting living for pleasure, 108.4), though Stoics did not think it essential to a satisfied life (Arius Did. *Epit.* 2.7.6d, pp. 40–41.3; as a good but not one that produces others, cf. 2.7.5g, pp. 32–33.4–5; for its being a goal of virtue, cf. 2.7.5b.5, p. 20.15–16).

1857. On average (depending on location in the empire), farmers needed to work their fields "about 100 days a year" (Jeffers, *World*, 20).

1858. Cf. *Apollod. Bib.* 1.5.3; 3.14.4; Ovid *Metam.* 5.564–71; Gasparro, *Soteriology*, 29, 43–49; Guthrie, *Orpheus*, 55–56. By now it ought to go without saying that such seasonal revivification differs starkly from the Jewish notion of resurrection behind the Christian teaching (treated at greater length in Keener, *John*, 1172–77).

1859. God also provides humanity "with health and food and all other things in due season [κατὰ καιρὸν]" (*Let. Aris.* 190 [Hadas, 175]).

1860. Grant, *Gods*, 49–50 (citing Theon *Progymnasmata* [RG 2:126, line 2, to 2:128, line 1]). Cf. the contrast between Stoic and Epicurean views of providence noted in the excursus on Epicureans at Acts 17:18.

speaker passing through town to address such a question, but his moral application of his conclusion is far more demanding. Greeks attributed such benevolence to deities that were (except in the philosophers) often capricious and unpredictable. Phrygians looked to their goddess of justice for fertility,¹⁸⁶¹ but especially to Zeus.¹⁸⁶² Sycophantic orators even attributed rains and harvests (Men. Rhet. 2.1–2, 377.22–24) and all prosperity (377.20–22) to the emperor. Although Luke's audience would not know this, Paul's reported words are strikingly relevant in their local setting: Phrygian and Pisidian inscriptions praise Zeus Kalakagathios, a deity of good things and fruitfulness.¹⁸⁶³

Luke's audience, however, recognized the one true God as giver of fruitfulness; it was part of his benevolent purpose for creation from the start (Gen 1:12, 29–31). God was sovereign over nature, including annual cycles and fruitfulness (*I En.* 2:1–5:3, esp. 5:2), and agricultural productivity was God's blessing (e.g., εὐλογέω in Deut 28:3–12; *Test. Iss.* 5:4).¹⁸⁶⁴

(8) *Trying to Restrain the Crowd (14:18)*

Great speakers were sometimes thought able to calm riotous crowds (e.g., Diogenes *Ep.* 2). Pervo compares Paul's ability to calm an urban mob (Acts 14:18; 21:40–22:2) to weighty people's ability to calm crowds in fictitious works (Virg. *Aen.* 1.148–53).¹⁸⁶⁵ The comparison is noteworthy, but fictitious works often reflect social reality¹⁸⁶⁶ in that crowds could (eventually) listen to someone they respected (cf. Acts 19:35 and comment there), and in any case Paul only barely restrains them here (and is stoned in the next verse, 14:19). That the crowds were barely restrained suggests that they were more impressed by the apostles' signs than their rhetoric.¹⁸⁶⁷ Luke does not explain how the apostles failed to restrain the crowd's devotion despite denouncing deities. Perhaps, in the confusion, some continued to misunderstand; perhaps some thought them merely a different kind of deity; perhaps the most plausible guess is that some thought that the gods who had come in disguise were trying to remain incognito.¹⁸⁶⁸

IV. ATTEMPTED KILLING (14:19–20A)

So concerned are Paul's Jewish enemies from Antioch and Iconium that he is spreading what they view as false teaching that representatives follow him to Lystra to warn against hearing him. Perhaps learning that locals are trying to honor the apostles as gods, they stir the crowds to reject Paul and Barnabas, perhaps portraying them as sorcerers who would bring dishonor on any deity. Ironically, the apostles,

1861. Mitchell, *Anatolia*, 2:18. Naturally, other peoples also had deities specialized in fertility (e.g., Epict. *Diatr.* 3.21.12; in Roman Egypt, Frankfurter, *Religion in Egypt*, 37–46; cf. Dunand, *Religion en Égypte*, 77–78); on older fertility emphases and practices in agrarian societies, see, e.g., ANET 126–28 (Telepinus), 129–42 (Baal's resuscitation); Harrelson, *Cult*, 12–13; Bright, *History*, 118–19; Moyer, "Purity," 59.

1862. Mitchell, *Anatolia*, 2:23.

1863. Schnabel, *Missionary*, 167, noting also the regional emphasis on Zeus Bronton, patron of agriculture, linked with Hermes. Paul's verb, ἀγαθοεργέω, is rare in extant sources of this period (though it appears in 1 Tim 6:18) but could have been locally appreciated.

1864. Conversely, Israel's normally fruit-yielding ground lay desolate for a set time because of sin (*Sib. Or.* 3.280; cf., e.g., Deut 28:17–18, 23–24, 38–42; Isa 1:7; 62:4).

1865. Pervo, *Profit*, 35.

1866. The passage in Virgil makes an analogy by expressly appealing to what it presents as a known experience, probably in Virgil's own social world, of wise speakers calming mobs.

1867. Among the passages that Porter, *Paul in Acts*, 101, cites as examples of Paul's "convincing" rhetoric, this one alone seems out of place, since the crowds were "barely" convinced.

1868. Deflecting praise was honorable behavior for mortals but would not be deemed necessary for deities, particularly Zeus.

who have insisted vociferously on monotheism, are now stoned for blasphemy. Also ironically, they are stoned, in part, by the very pagans¹⁸⁶⁹ who have blasphemously just tried to worship them.

(1) *Luke's Agendas and Pauline Tradition*

In stoning Paul, his enemies succeeded in what they had merely attempted to do in 14:5, carrying on a pattern of persecution begun in 13:50 (though earlier carried out by Paul himself, 9:4–5). Paul here fulfills Jesus's call to take up the cross daily and follow him, surrendering his life (Luke 9:23; cf. 1 Cor 15:31; 2 Cor 1:9). From a literary perspective, Paul now faces the same sort of persecution in which he had participated at Stephen's death (the stoning in Acts 7:58–59; also “dragging off” in 8:3 and here).¹⁸⁷⁰ The parallel with Stephen's death builds suspense; though Luke's audience probably knew that Paul did not die in Anatolia, readers can to some degree suspend their knowledge of outcomes to enter the story world and appreciate its suspense. For all its narrative value, however, the basis of this account cannot be a Lukan fiction; Paul himself tells us that he was once stoned (2 Cor 11:25), and obviously he had lived to tell about it in that letter.

The text does not indicate that Paul was, indeed, dead;¹⁸⁷¹ Luke may use the incident to parallel other resuscitation accounts¹⁸⁷² (though normally these involve resuscitation through, rather than of, the divine agent), but if so, he remains restrained in his description and apparently follows his source.¹⁸⁷³

Pervo notes that the threat of urban mobs was a handy novelistic device;¹⁸⁷⁴ this observation rightly reminds us that Luke focuses on scenes that will interest his audience. Historians, however, also reported an abundance of urban mobs. As Ramsay MacMullen points out, “Stoning, actual or threatened, [characterizes] all the chief cities of the empire and a chance scattering of the minor ones. It was a common form of group vengeance,” one that children allegedly even practiced in playing.¹⁸⁷⁵ Even if we lacked so many other reports (for stoning in ancient texts, see comment on Acts 7:58), the mob scene here, like the stoning itself, is hardly fictitious. It is difficult to imagine that Paul never faced mobs.¹⁸⁷⁶ “Beaten innumerable times” (2 Cor 11:23), as distinct from five synagogue beatings (11:24) and three public beatings with rods (11:25), suggests mob violence, and stoning itself (explicit in 11:25) more often than not would suggest the same (see comment on Acts 7:58 regarding mobs).¹⁸⁷⁷

1869. The grammatical antecedent of λιθάσαντες is “the Jews,” but from the context it appears that they recruited the crowd's aid.

1870. Spencer, *Acts*, 150. The “dragging” appears elsewhere in the NT in this sense only at Acts 17:6 (John 21:8 and Rev 12:4 use σέρω differently). The crowd may wish to drag Paul out of the city so that the corpse will not defile it; both pagan and Jewish executions were normally outside cities (see discussion below).

1871. See Marshall, *Acts*, 239–40.

1872. Goulder, *Type and History*, 109, finds the death-and-resurrection motif in some accounts of Paul's sufferings in Acts, including here. Not all Goulder's examples are persuasive, though Paul seems to have viewed some of his sufferings as proleptic martyrdoms (2 Cor 1:9–10).

1873. Νομίζω elsewhere in Luke-Acts refers to a false supposition (Luke 2:44; 3:23; Acts 7:25; 8:20; 16:27; 17:29; 21:29), with the probable exception of Acts 16:13. The verb does not always refer to contrary-to-fact suppositions, but it often does (e.g., *Test. Jud.* 19:4).

1874. Pervo, *Profit*, 34–35. If we view Paul's audience as rural, some may have stereotyped poor farmers as harsh (Menander *Dyskolos* 130–31).

1875. MacMullen, *Social Relations*, 66 (citing more than twenty-five primary sources, 171n30 [to p. 66]). Individual public violence also appears commonly in documentary sources (see Bryen, “Visibility”).

1876. One may also recall that even in more recent times, preachers like Wesley and the early Methodists were among those who faced mobs in England and elsewhere.

1877. We sometimes tend to read texts in light of our own culture (hence minimizing persecution), but a more global perspective could help cure this tendency. I regularly receive reports from firsthand contacts in other parts of the world where persecution harsher than in Acts occurs. For that matter, I have personally

Pervo further claims that the sufferings in Acts are not genuine but simply provide chances to display heroism, fitting ancient novels' adolescent worldview of perpetual victimhood.¹⁸⁷⁸ Although some of Pervo's insights may accurately portray at least ancient novels, his negative opinion about recounting sufferings is pure prejudice. As noted above, Luke reports fewer of Paul's sufferings than his own letters do. Luke's purpose is undoubtedly to portray Paul's heroism through his sufferings, but this interest fits a generic purpose much broader than that of novels. As noted in the commentary introduction,¹⁸⁷⁹ historical works also found action and conflict interesting; this included philosophic biographies, which sometimes documented a sage's sufferings (see below), as do Paul's own letters. Recounting triumphs over sufferings might constitute an adolescent luxury for culturally dominant groups that face little oppression, but oppressed groups in much of the world generally find them more meaningful.¹⁸⁸⁰

As tribulation lists testify, people respected the integrity of those who lived sacrificially and suffered for their beliefs.¹⁸⁸¹ Failure to retaliate¹⁸⁸² or even to prosecute oppressors¹⁸⁸³ was a further sign of integrity impressive at least among philosophers. This interest fits well Luke's portrayal of Paul as a model sage. Wounds were also used to point to integrity or heroism,¹⁸⁸⁴ and one who, though wounded, continued to fight could be viewed as heroic (e.g., Philost. *Hrk.* 48.17).

(2) *Opponents Arrive (14:19)*

Enemies from Iconium at first sight make more sense than those from Antioch (Acts 14:19). Pisidian Antioch was more than a hundred miles from Lystra, four or five days' travel, but Iconium was only some twenty miles away. Nevertheless, despite their distance, Lystra and Pisidian Antioch shared a close relationship (see comment on Acts 14:6).¹⁸⁸⁵ Lystra's inscriptions pair it with Pisidian Antioch as a sister colony instead of linking Lystra with the Greek cities more closely located.¹⁸⁸⁶ Lystra's citizens

been beaten for sharing my faith even in the United States (though by individuals using their hands, not by a crowd or with stones).

1878. Pervo, *Profit*, 27. Is Paul here a *theios anēr* who jumps up unharmed or (as Acts 14:22 may suggest) one who suffers but is helped by others to complete his mission (Johnson, *Acts*, 253)?

1879. See, e.g., Keener, *Acts*, 1:69–71.

1880. For that matter, I can testify from personal experience that beatings do happen. In the U.S., I was beaten three times for sharing my faith with individuals, on one occasion accompanied by a threat of murder if that beater saw me again, and had my life threatened on other occasions. I was not stoned, but a Nigerian preacher I met was stoned and left for dead for his preaching (see comment below). Such incidents are not limited to specific professions of faith. For example, a gay man with whom I spoke in the United States was stoned as a boy for his sexual orientation. There are innumerable eyewitness accounts of beatings and other experiences of intolerance globally. It is simply not true that because action makes for a good story, it does not happen in real life.

1881. E.g., Grant, *Paul*, 47 (citing Sen. *Y. Ep.* 20.9; 62.3; 67.14; *Vit. beat.* 18.3).

1882. E.g., Sen. *Y. Dial.* 3.6.5; 4.32.1; Mus. *Ruf.* 10, p. 78.27–28; Plut. *S. Sp.*, Ariston 1, *Mor.* 218A; Max. Tyre 12 passim (e.g., 12.9); Marc. *Aur.* 6.6; Iambl. *V.P.* 10.51; 28.155; 1QS X, 17–18 (cf. Flusser, *Judaism*, 199, 485; but see Stendahl, "Hate"); CD IX, 3–6; *Let. Aris.* 227; *L.A.B.* 8:10; *Jos. Asen.* 23:9; 29:3; *Sipra Qed. pq.* 4.200.3.6 (applicable only for Israelites); cf. Thom, "Akousmata," 111; Fitzgerald, *Cracks*, 103–5; among Christians, see Matt 5:39; Rom 12:17–19; *Acts Pet.* (8) 28; *Acts John* 81.

1883. Mus. *Ruf.* 10, p. 76.16–17; 10, p. 78.7–9, 16–19, 22–26; Iambl. *V.P.* 27.124–26; cf. Suet. *Tit.* 9.1; Lucian *Icar.* 16; Max. Tyre 12.9–10; Philost. *Vit. Apoll.* 8.22; *Vit. soph.* 1.25.532; Diog. Laert. 6.2.54; Matt 5:38–40; 1 Cor 6:7.

1884. E.g., Cic. *Verr.* 2.5.1.3; Ovid *Metam.* 13.262–67; *Fasti* 2.696–99; Val. Max. 7.7.1; Plut. *Alex.* 50.6; Arrian *Alex.* 7.10.1–3; Dion. Hal. *Ant. rom.* 7.62.3; Livy 45.39.17; cf. Sall. *Pomp.* 1–2; Caesar *C.W.* 1.72; Val. Max. 3.2.24; Sil. It. 9.350–51; Gal 6:17. A corpse's wounds could be employed the same way (Ovid *Fasti* 2.849; Plut. *Caes.* 68.1).

1885. See Bruce, *Acts*¹, 284–85 (following Ramsay, *Church in Empire*, 47ff.).

1886. Ramsay, *Galatians*, 224; also Mitchell, *Anatolia*, 1:76 (though warning that their sisterhood says nothing about a common foundation date; they were not "twins").

even erected a statue in Antioch.¹⁸⁸⁷ Likewise, we know of considerable movement along the Via Sebaste and elsewhere because of substantial trade in central Anatolia.¹⁸⁸⁸

If some who opposed Paul in Antioch traversed the Via Sebaste to warn other Jewish communities (extradition by local authorities would not be in view), they might well have recruited willing allies in Iconium and trekked another day on the road on which the apostles departed to Lystra. Some had plotted to stone Paul in Iconium (14:5); now they have caught up with him to accomplish their previously thwarted plan. Paul's Jewish-Christian opponents (2 Cor 11:4–6; Gal 2:4–5; 5:11; 6:12), like Paul himself, moved from place to place; there is no reason to doubt that Paul stirred sufficient animosity to invite a few non-Christian opponents to do the same. That Jewish hearers are not specified in Lystra may suggest that the Jewish community there was small.¹⁸⁸⁹ From Acts 16:1–2, we may infer that at least some Jews lived there, but they were probably few and assimilated; thus Timothy's mother had married a Greek.

The abruptness of the scene is striking: one moment the crowds could barely be prevented from worshipping the apostles (14:18), and the next they seek to kill him (14:19). This mirrors another scene in which some think Paul a murderer under divine judgment (28:4) then almost immediately decide that he is a god instead (28:6). The masses were thought to be fickle,¹⁸⁹⁰ and Luke may be having some fun at their expense (cf. 19:32),¹⁸⁹¹ though in Luke 23:13 he blames the rulers more than Mark's masses (Mark 15:11; also instigated by the rulers) for condemning Jesus. Probably, crowds in the colonies of southern Asia Minor's interior were easily moved by those they respected; the "chief political function" of the *populus* "appears from inscriptions to have consisted in acclaiming its benefactors in the theatre."¹⁸⁹²

This irony in the scene is hard to miss: local Jews join with idolaters to oppose the preacher of monotheism (Acts 14:15–17). (Cf. similarly the attempt of some Ephesian Jews to dissociate themselves from Paul's anti-idolatry preaching in 19:33–34.) Meanwhile Paul is the loyal advocate and courageous proclaimer of the monotheism of Israel's Scripture. Paul, who rejected veneration of anything but God, is now stoned, essentially for blasphemy. His Jewish opponents are comfortably assimilated into their pagan surroundings; *they* are not preaching against idolatry.¹⁸⁹³ Luke consistently portrays the apostolic movement and its leaders as representing the true Jewish message, whereas many others who claim to be its bearers subvert it (cf., e.g., 13:6). Another irony is that stoning was an appropriate penalty for blasphemy (Lev 24:16), yet Paul is the antithesis of blasphemy, having rent his clothes (again the appropriate response) at hearing true blasphemy (Acts 14:14). Had Paul accepted worship, he would have been a blasphemer, but he had rejected the very notion of it.

If any of the apostles' adversaries were familiar with the local language (which Paul did not know, 14:11, 14) or at least local customs (it is not likely that Jews in either Antioch or Iconium would speak Lycaonian, though some others in Iconium would),

1887. Ramsay, *Church in Empire*, 47–50, followed by Bruce, *Acts*¹, 285; idem, *Commentary*, 295.

1888. See Mitchell, *Anatolia*, 1:82.

1889. So Le Cornu, *Acts*, 786.

1890. E.g., Livy 31.34.3; Lucan *C.W.* 3.52–56; Dio Chrys. *Or.* 66; 73.5–7; Pliny *Ep.* 1.5.15–16; Tac. *Ann.* 2.41; *Hist.* 1.32, 45; 3.85; 5.8; further comment at Acts 2:47. The uncertainty of individuals' political fortunes in modern democracy would have been viewed the same way.

1891. Rackham, *Acts*, 234, points out that Gal 1:6 (cf. 4:15–16) suggests the same Galatian trait of fickleness. Such fickleness was far more widespread than Galatia, however (Mark 15:11–14; 2 Cor 7:2).

1892. Levick, *Roman Colonies*, 78–79. Lystra's officials were decurions (*MAMA* 8.12), and its chief magistrates, duumvirs (Levick, *Roman Colonies*, 79).

1893. Cf. also Acts 19:26–27, 33–34. It is conceivable that they responded to a report that local Gentiles had offered Paul worship, but this is not how Luke (our only extant source) tells the story (and it is inconceivable that the epistolary Paul would have permitted such worship).

they would have an advantage over Paul and Barnabas, who were clearly foreigners.¹⁸⁹⁴ Certainly they could pose as locals better than Paul, in any case; Pisidian Antioch and Iconium shared a larger Phrygian cultural heritage with Lystra, and the imperial highway connected these cities.¹⁸⁹⁵

Counteracting the benevolent appearance of a public miracle would not necessarily prove difficult, since supernatural power could derive from various sources. The apostles' adversaries need merely argue that the two were magicians and had been driven out of the other towns for malevolent activity there. By denying the gods (14:15), Paul and Barnabas had already taken themselves out of the divine category and could be seen instead as impious; they had likely compromised local religious leaders' support (such as that of the priest of Zeus in 14:13). Mobs could be easily enough incited against those accused of evildoing; certainly this was true of anyone identified as a thief¹⁸⁹⁶ or of those accused of hoarding during famine or of religiously defiling a community.¹⁸⁹⁷ The Jewish accusers could have persuaded the crowds that Paul not only rejected their gods but also did not serve the Jewish God; they likely argued, or the crowds were ready to infer, the obvious natural conclusion on pagan terms—namely, that the apostles were magicians.¹⁸⁹⁸

Although mob violence could kill people in cities, burials and, where possible, executions were normally outside cities: corpses were unclean.¹⁸⁹⁹ Their close contact with the body and their treatment of it (which could have ruptured internal organs) renders all the likelier their assumption that they are correct in believing Paul to be dead.¹⁹⁰⁰

(3) *Survival (14:20)*

Who are “the disciples” here? It is possible that disciples accompanied Paul and Barnabas from Iconium (14:6), but the narrative suggests a likelier scenario, one implying that Luke has again omitted some details. Perhaps the present participle in 14:7 suggests that Paul had already been preaching in Lystra for some time (though it technically includes at least the lengthy trip to Derbe as well). Presumably he and Barnabas had made disciples there already as they would in Derbe soon after (14:21). They return to strengthen the disciples in 14:22, which again implies evangelistic success there before the more dramatic scene narrated in 14:8–20a.¹⁹⁰¹

1894. One who spoke the local language might expect special hospitality there (Xen. *Eph. Anthia* 3.1).

1895. Hemer, *Acts in History*, 178.

1896. E.g., Alciph. *Farm.* 16 (Pithacnion to Eustachys), 3.19, ¶¶1–2; this still occurs in parts of the world (as I have learned from some Nigerian and Kenyan friends).

1897. MacMullen, *Social Relations*, 66.

1898. So Keener, *Background Commentary*, 363; on magic, see discussion at Acts 8:9–11. The objection to this interpretation—namely, that only Paul and not Barnabas was stoned (Le Cornu, *Acts*, 787)—falters on the fact that Paul was the primary speaker, hence the focus of attention. (It is also not inconceivable that the crowds would have stoned both of them had they been able; but perhaps one example was sufficient to satisfy the mob's rage.) Since the apostles only barely restrained the crowds from sacrificing to them (14:18), the Jewish accusers may have overheard acclamations that sounded blasphemous; but in Luke's condensed story, they ironically are stoning opponents of blasphemy.

1899. See, e.g., Deut 17:5; 22:24; 1 Kgs 21:13; Jos. *Ant.* 4.264; *War* 4.360; *Apoll. K. Tyre* 50; comment on Acts 7:58.

1900. Dragging a body was not respectful behavior (cf. Hom. *Il.* 24.21–22, though employing a different term) and might require special divine help to prevent the corpse from being torn (24.18–20). Luke elsewhere uses the term in a manner that, while implying violence, could result in much less physical damage (Acts 8:3; 17:6; cf. 4 Macc 6:1; Jos. *War* 2.612), but these instances involved people capable of voluntary movement, not one deemed a corpse (cf. dragging of an inanimate object in LXX 2 Sam 17:13; perhaps even the preexecution dragging in Jos. *Ant.* 20.136; *War* 2.491; cf. *War* 4.168; 7.154; probably the preexecution draggings in Jos. *War* 4.359–60, 652). Cf. esp. Philo *Flacc.* 65, 190; Jos. *War* 6.359.

1901. We can hardly blame Luke for focusing on the most graphic incidents, as did most historians and, for that matter, as do even modern journalists.

Although in many cultures, such as those primarily in question, stoning normally is meant to result in death,¹⁹⁰² it does not always do so, even in these cultures. For example, in his younger days, an evangelist in northern Nigeria named Baba Tambaya (Tambaya Jibirin) started churches in areas hostile to the Christian message. Dramatic miracles are reported to have occurred at times, but he also was sometimes stoned. On one occasion Baba Tambaya was stoned and left for dead, but he survived.¹⁹⁰³ Paul notes that he often faced death (2 Cor 1:9–10; 11:23) and that he was stoned (11:25). The purpose of stoning was normally the victim's death; if Paul was stoned and lived to tell about it, Luke's inclusion of at least a terse account of the event seems hardly out of place.

Other ancient (as well as modern) accounts of those wrongly thought to be dead abound. Cicero's brother Quintus "lay unnoticed for dead among the slain" (Plut. *Cic.* 33.3 [*Lives*, LCL, 7:167]). An expression that ancient literature employs to describe this situation is that of someone being "half-dead"—that is, alive but injured and appearing dead (Luke 10:30).¹⁹⁰⁴ Novels often spoke of those apparently dead who then revived (e.g., Char. *Chaer.* 1.4.11–12; 1.8; see comment on Acts 1:3), but sometimes this happened in real life as well.¹⁹⁰⁵

Paul's safe return to the city could involve several factors. In a culture where honor and shame were of major importance, Paul refused to be labeled cowardly for simply abandoning the disciples; thus he returned to the city (cf. Acts 16:40). With no one to stir up a mob action again (14:19), he would probably not suffer harm overnight, especially if his presence was not widely known.¹⁹⁰⁶ In view of the previous miracle (14:10), many residents might have even counted his survival as miraculous (or magical). Paul's desire to show himself alive and to speak with the disciples would also strengthen the church. When a leader fell, troops or other followers often dispersed.¹⁹⁰⁷ But finally, especially if Paul remained injured¹⁹⁰⁸ and evening was approaching, Paul and Barnabas had little choice but to return to the town. They presumably had few other options for lodging for the night, and night travel was dangerous.¹⁹⁰⁹ Derbe was far away (see comment below).

d. Strengthening the Churches (14:20b–23)¹⁹¹⁰

After visiting Derbe, the apostles returned to strengthen the young churches at other locations. Apparently tempers had cooled sufficiently for discreet ministry in

1902. Survivors of severe beatings sometimes died later from injuries (Philost. *Vit. soph.* 2.10.588; Exod 21:18–21), including those who temporarily survived after being left for dead (Cic. *Verr.* 2.5.54.142). Guards beaten or stoned for failure at duty usually died (Polyb. 6.37.1–3), but some did survive (6.37.4–6).

1903. On July 2, 1998, I met and talked with (through a Hausa-speaking friend) Baba Tambaya, now elderly. My translator and informant was Professor Emmanuel Itapson, then my student (during the writing of this commentary my colleague in Hebrew Bible at Palmer Theological Seminary); he was also the son of one of Baba Tambaya's long-term coworkers, and both he and his father knew Baba Tambaya quite well. I also have a more recent oral account of fuller protection during a stoning in Sri Lanka (telephone interview by author, Jan. 10, 2009; but the source required anonymity for safety reasons).

1904. E.g., Callim. *Hymns* 6 (to Demeter), line 59; Livy 23.15.8; 40.4.15; Suet. *Aug.* 6; Corn. Nep. 4 (Pausanias), 5.4; cf. Eurip. *Alcestis* 141–43; Ps.-Callisth. *Alex.* 2.20; the Hebrew equivalent in Bailey, *Peasant Eyes*, 42.

1905. E.g., Pliny E. *N.H.* 7.52.173; see further comment on Acts 9:36–42.

1906. Believing Paul dead, his opponents may have moved on, but since Iconium was a day's walk, they probably also spent the night in town. Since the mob action that they incited was technically illegal, they might not risk it again in the same town. Luke again leaves us unanswered questions, but his account is not implausible.

1907. E.g., Sil. It. 15.807–8; Arrian *Alex.* 4.24.4–5; 4.27.2; Num 27:17; 1 Kgs 22:17; Mark 14:50; John 16:32.

1908. Luke does not specify this point, perhaps in view of the apparently miraculous character of Paul's recovery. If, historically, Paul remained at all injured, however, it could constitute a factor in his return.

1909. See, e.g., Hor. *Ep.* 1.2.32–33; Catull. *Carm.* 62.34–35; Xen. *Eph. Anthia* 2.11; *Sib. Or.* 3.380; *Gen. Rab.* 92:6; MacMullen, *Social Relations*, 4; Le Cornu, *Acts*, 941–42.

1910. The visit to Derbe (Acts 14:20b–21a) precedes the return to strengthen the churches, but the visit is summarized too briefly to provide it a section equivalent to Iconium or Lystra in the outline, and rather than break a section in midsentence, I have kept the Derbe visit with the return.

less public venues; the danger of violence stemmed from mobs, not from ordinary encounters.

I. MINISTRY IN DERBE (14:20B–21A)

Contrary to some earlier identifications,¹⁹¹¹ Derbe (today identified with modern Kerti Hüyük)¹⁹¹² was about sixty miles (96 km.) southeast of Lystra.¹⁹¹³ Because this was more than a day's journey, we should understand εἰς Δέρβην as “for” or “toward” Derbe, instead of suggesting their arrival there the same day.¹⁹¹⁴ Whereas the Via Sebaste from Iconium to Lystra was wide and paved, the road southeast to Derbe likely was unpaved and more difficult.¹⁹¹⁵ Derbe was less advanced than some other cities Paul visited, and it lacks even evidence of signs of a proper Greek polis before Claudius's reign,¹⁹¹⁶ when Annius Afrinus, Galatia's governor from 49 to 54 C.E., praised the town's progress in romanization and honored it with the title “Claudioderbe.”¹⁹¹⁷ It was likely thus experiencing more significant growth during Claudius's reign than it had before, perhaps making it a more appealing site; or perhaps it was appealing simply because it lay southward and a significant distance from the apostles' antagonists. Given its smaller size, its omission in some recollections of the journey (2 Tim 3:11) and the brief summary here of the apostles' visit are not surprising. Nevertheless, the church in Derbe proved significant enough to merit Luke's mention (see comments below).

No laws in Lystra condemned the apostles in Luke's account, and Lystra's decrees would not have directly stopped the preachers from working in Derbe anyway,¹⁹¹⁸ though both Lystra and Derbe belonged to the same Roman province. Antipater the pirate once controlled Derbe, but Rome subdued it (Strabo 12.1.4); it was near Cappadocia, but Amyntas (ruler of Galatia, 12.5.1) ruled it (12.6.3), and so it shared the other cities' Galatian character.¹⁹¹⁹ Nevertheless, one town's local decrees, though perhaps useful to point out elsewhere, lacked legal force in another town.

The successful ministry¹⁹²⁰ in Derbe (Acts 14:21) is suggested by a later representative from there (20:4; cf. 16:1), in a mission that corresponds, in the epistles, to the bringing of an offering to the Jerusalem church by representatives of Gentile churches

1911. Ramsay thought Derbe a rude frontier city with Greek art and influence yet Roman customs income (*Cities of Paul*, 399), but his proposed site, Gudelisin, has proved mistaken.

1912. Or, more specifically, with Devri Şehri (e.g., Schnabel, *Mission*, 1121). The difference between the two, however, makes little difference for our purposes, since they are only ca. 2.5 mi. apart (McRay, *Archaeology*, 240).

1913. E.g., Fitzmyer, *Acts*, 528 (inscriptions in the vicinity mention Derbe); Conzelmann, *Acts*, 112; also Van Elderen, “Archaeological Observations,” 156–61. This site is ca. 13–14 mi. (22 km.) north-northeast of Laranda (modern Karaman) (Conzelmann, *Acts*, 112); it lay on the road between Iconium and Laranda (Schnabel, *Mission*, 1121). Further on Derbe, see Wineland, “Derbe”; Breitenbach, *Provinz*, 165–66; Fant and Reddish, *Sites*, 174–77 (but noting [177] that it has not been excavated); for earlier studies, Mattill and Mattill, *Bibliography*, 205, cite Radet and Paris, “Inscriptions de Pisidie” (1886); Ramsay, “Derbe” (1906); Ballance, “Site” (1957).

1914. Van Elderen, “Archaeological Observations,” 159. Luke, who would have had the accounts orally, may have simply known that Derbe was their next stop, but his wording demands no more than that they left for it the next day (with, e.g., Finegan, *Apostles*, 92).

1915. Witherington, *Acts*, 418.

1916. Mitchell, *Anatolia*, 1:96.

1917. Hansen, “Galatia,” 389; Witherington, *Acts*, 418n250; Mitchell, *Anatolia*, 1:95; but cf. map 6, 1:99 (going through Hadrian's era). Because of its location's commercial viability, it also seems to have been a site for collecting customs taxes (McRay, *Archaeology*, 239, following Ramsay, *Cities of St. Paul*, 385–404).

1918. Stambaugh and Balch, *Environment*, 33, emphasizing the local nature of towns' jurisdictions (which forced Paul's accusers to begin afresh their accusations in each city).

1919. The ruler Antipater Derbetes (Strabo 12.6.3) was on good terms with Cicero, who, as governor of Cilicia (including at the time Lycaonia), traveled in that region (Cic. *Fam.* 13.73.2).

1920. Use of the verb ἐυαγγελίζομαι, “evangelize,” may recall Acts 14:7, but the verb is frequent in Acts (e.g., 13:32; 14:15; 15:35) and need not be connected as closely as Haenchen, *Acts*, 435, suggests.

(2 Cor 8:19–20). This is the only use of the verb μαθητεύω in Luke-Acts, but at least some early Christians used it to refer to becoming a disciple of the Jesus movement (Matt 13:52; 28:19), and the phrase “disciple” appears as often as twenty-six times in Acts, including both recent (Acts 14:20, 22) and more mature (14:28) converts. Since a “disciple” was an adherent,¹⁹²¹ the noun and the verb probably both imply continuing allegiance (cf. 14:22) after the initial “turning to the Lord.”

II. RETURNING TO EARLIER CITIES (14:21B)

That Paul and Barnabas would return to cities where they had begun churches fits what we know of the historical Paul (as well as Luke’s portrait of the apostles; 15:36, 41; 18:23; 20:2–3, 17). He carried concern for his churches continually (2 Cor 11:28–29; 1 Thess 3:5–7) and made plans to visit when possible (1 Cor 4:18–21; 16:3–7; 2 Cor 12:20–13:2; Phil 2:24; Phlm 22),¹⁹²² and they could take great offense if his promise to visit failed to materialize in a timely fashion (2 Cor 1:15–2:1).¹⁹²³ If Paul could not go himself, he sometimes expressed regret (1 Thess 2:17–18), and often he sent others to represent him and to receive firsthand news of the churches’ welfare (1 Cor 4:17; Phil 2:19; 1 Thess 3:5–6). Given Paul’s commitment to produce mature and self-propagating churches, “a follow-up visit would likely have been one of his priorities” (cf. Acts 15:36).¹⁹²⁴ This second visit might be implied by the contrast to his first visit in his mention of an “earlier time” (Gal 4:13),¹⁹²⁵ though this is uncertain.

After Derbe, Paul and Barnabas could have trekked across the Taurus Mountains (cf. Acts 15:41–16:10) to Syrian Antioch via Paul’s hometown, Tarsus (ca. 150 mi., or perhaps a week’s walk, from Derbe),¹⁹²⁶ but they chose to return through the regions where they had already ministered (14:21–26). One could suppose that winter was now approaching, making difficult a journey through the Cilician Gates, but had this been the case, they hardly would have sailed either (14:26). One could suppose that Paul’s previous ministry in Tarsus had made him unwelcome there, but he apparently felt comfortable returning to Cilicia in 15:41. Their purpose instead is to revisit the churches they have planted, churches that could well face persecution as they did when Paul and Barnabas were among them (14:22). Travelers often took detours to honor friendships (e.g., Pliny *Ep.* 7.16.4); one might complain if a friend passed nearby yet did not stop to visit (e.g., Symm. *Ep.* 1.102, affectionately).

Returning to cities where they were persecuted was also an act of courage (honorable from the vantage point of Luke’s audience), as noted in the comment on Acts 14:20. This aspect of their return was probably too obvious to ancient readers to require mention,¹⁹²⁷ but it fit an important virtue of the convinced sage and all who followed the path of wisdom. “Courage” was one of the four Aristotelian virtues, and theorists often articulated it explicitly,¹⁹²⁸ though historians more frequently illustrated it more tacitly. Continuing concern for potentially isolated believers would also be perceived honorably.¹⁹²⁹

1921. See esp. Wilkins, *Discipleship*, esp. 42.

1922. Though this also applied to some churches that Paul had not founded; cf. Rom 1:9–12.

1923. Protests about failures to visit were common, though in contrast to the situation depicted in 2 Corinthians, some appear to have been playful or affectionate; see, e.g., Symm. *Ep.* 1.11.2; 1.102.

1924. Dunn, *Acts*, 192.

1925. So Riesner, *Early Period*, 290; but he uses this connection to suggest that Paul wrote Galatians before his second journey (pp. 290–91).

1926. On the difficulties of crossing the Taurus Range, see, e.g., Hdn. 3.1.4; 3.2.6; 3.3.7.

1927. With C. Williams, *Acts*, 173.

1928. See comment on Acts 8:3; on the four virtues, see comment on Acts 26:25.

1929. Cf. Romans sending a fleet to rescue the survivors of their defeated army (Polyb. 1.36.5).

Still, the opposition to Paul in one of these cities (Acts 14:19) was a mob action rather than an official decree;¹⁹³⁰ in other cities where rulers were also hostile (13:50; 14:5), planned acquiescence with mob action, rather than official policy of persecution, might be in view. Even if rulers wished to restrict the apostles' public preaching, they had not necessarily banished them, or done so with severe penalties (contrast Thessalonica in Acts 17:9–10; 1 Thess 2:18). Ministering through house connections without continued, controversial preaching in a synagogue or marketplace would stir less hostility. Mob violence is often spontaneous and not always repeated if the culture already includes some diversity or experience of foreign elements or elements associated with those bringing that controversial message.¹⁹³¹ Naturally, however, it might have been prudent not to stay too long in any of these towns.

III. PERSEVERANCE FOR THE KINGDOM (14:22)

That Paul went to “strengthen” (cf. Acts 15:32, 41; 16:5; 18:23; Rom 1:11; 1 Thess 3:2)¹⁹³² and “encourage” (cf. Acts 15:32; 16:40; 20:1–2; Rom 12:1; 15:30; 16:17; 1 Cor 1:10; 4:16; 16:15; 2 Cor 5:20–6:1; 1 Thess 4:1, 10; 5:14) believers fits both the Lukan and epistolary Pauls.¹⁹³³ The apostles “strengthen” them by warning them what afflictions to prepare for.¹⁹³⁴

The demand to “continue in the faith”¹⁹³⁵ certainly suits Luke's Barnabas (Acts 11:23) and his Barnabas-Paul team (13:43). It also comports well with the exhortations of Pauline literature and of early Christianity in general. The warning against falling away was pervasive in early Christianity, whether perceived as the danger of apostasy (John 15:5; Rom 11:22; 1 Cor 9:27–10:12; 2 Cor 13:5; Gal 4:19; 5:4; Eph 4:30; Col 1:23; Heb 2:1–3; 3:12–14; 4:11; 6:1–8; 10:26–27, 35, 39; 12:15–17) or as proving lack of conversion to begin with (1 John 2:19).¹⁹³⁶ The alternative to being led astray or falling away was maturation (Heb 5:14–6:2; 2 Pet 1:8–11; 3:17–18; cf. Phil 1:5–7).

Early Judaism commented frequently on apostasy¹⁹³⁷ but was divided in its opinion as to whether apostates could be forgiven if they repented.¹⁹³⁸ Greco-Roman paganism knew many who had become Christians only to reconvert to paganism;¹⁹³⁹ some apostates proved hostile toward Christianity¹⁹⁴⁰ whereas others¹⁹⁴¹ did not.

1930. Dunn, *Acts*, 192, generalizes for all three of the cities.

1931. Thus, e.g., early Methodist preachers in Britain usually experienced less mob violence on return visits. By contrast, missionary reports from nineteenth-century rural China (China Inland Mission) and mid-twentieth-century Hausa villages in northern Nigeria (reports from Evangelical Church of West Africa church planters of that generation) often suggest a much longer period of hostility.

1932. Luke uses ἐπιστηρίζω, and Paul στηρίζω (cf. also Rom 16:25; 1 Thess 3:13; 2 Thess 2:17; 3:3; Luke 22:32).

1933. Dunn, *Acts*, 193.

1934. Cf. 1 Thess 3:4, in Paul's letter probably closest to the period depicted here; cf. preparation for suffering by anticipating it in Galen *Grief* 52, 55–56.

1935. “The faith” is a common expression in early Christianity (in Acts, 6:7; 13:8; 16:5; elsewhere, e.g., Jude 3; Gal 1:23; Col 1:23; 1 Tim 1:2; Titus 1:13; cf. Rev 2:13).

1936. The Johannine approach here might refer not to conversion but to foreknowledge or predestination; cf. John 6:64, 70; 13:18, though the matter is not emphasized in the same way that one finds in the Qumran scrolls.

1937. Marshall, *Kept*, 29–50; I borrow some comments here from Keener, *John*, 696.

1938. Marshall, *Kept*, 46–47, arguing that earlier rabbinic opinion tended against it; cf. unpardonable sins in 1QS VII, 15–17, 22–23 (and possibly 1Q22; 4Q163 6–7 II, 6–7); *Jub.* 15:34; *y. Hag.* 2:1, §9. For deliberate acts of rebellion, see, e.g., CD VIII, 8; X, 3; *y. Šebu.* 1:6, §5. Greeks also felt that those who were once good but became bad merited stricter punishment (Thucyd. 1.86.1); Pythagoreans treated apostates as dead (Burkert, “Craft,” 18).

1939. Nock, *Conversion*, 156.

1940. In a later period, see *ibid.*, 157–60, on Julian the Apostate.

1941. Pliny *Ep.* 10.96 (unless these detainees remain secret Christian sympathizers).

Patron-client relationships based on “grace” (benevolence and gratitude) and mutual “faith” (fidelity) were expected to endure but sometimes did not do so through one party’s failure to persevere in the faith expected of one.¹⁹⁴² One who turned from God at the end of an otherwise good life lost all one’s merits (Ezek 18:24, 26).¹⁹⁴³ Early Christian writers also insisted on perseverance.¹⁹⁴⁴ Perseverance was the normal expectation but could not be taken for granted. Similarly, membership in cultic associations sometimes specified that whoever joined must remain for at least a year.¹⁹⁴⁵

Warning about coming afflictions was important (cf. Prov 22:3; 27:12). It was understood that leaders must not provide false expectations, which only disillusion followers in the long run (Xen. *Cyr.* 1.6.19). Suffering was sometimes necessary to achieve virtue (e.g., Mus. Ruf. 7, p. 58.25–26; frg. 46, p. 140.6; Max. Tyre 34;¹⁹⁴⁶ Rom 5:3–5; Jas 1:2–4).¹⁹⁴⁷ (On testing, see discussion at Acts 5:7–10.) Here the warning includes hope, as in Jewish kingdom tradition: those who suffered martyrdom would “live” with God forever (4 Macc 16:25).

The apostles’ warning about “many afflictions” follows naturally on their own experience of afflictions in these cities, which their converts have witnessed (Acts 13:50; 14:5), most obviously the recent stoning (14:19). It is a subject that could not be avoided and would likely prove relevant for the converts themselves (cf. 1 Thess 1:5–6; 3:3–4). Lukan as it might also be (see comment on Acts 4:27–31), this summary exhortation is also how Paul summarized his own exhortations to new believers, especially in areas that might see further persecution (in Paul’s earliest extant letter, 1 Thess 3:3–4, esp. 3:4, where the imperfect verb probably suggests repeated warning).¹⁹⁴⁸

Paul may have taught from Jesus tradition about the eschatological tribulation (cf. Luke 21:10–24, though from Luke’s perspective much of the experience of that passage may be already past),¹⁹⁴⁹ though a particular agraphon is difficult to pin down. Tertullian reported the tradition that before Mark 14:38 Jesus claimed that “no one can obtain the heavenly kingdom without prior testing” (*Bapt.* 20),¹⁹⁵⁰ but the saying’s authenticity, while not impossible, is uncertain (it could stem from Acts 14:22).

Luke’s view of the kingdom is both present and future, but the emphasis in this passage is futuristic,¹⁹⁵¹ which characterizes most of the language about the kingdom in the Pauline corpus (1 Cor 6:9–10; 15:24, 50; Gal 5:21; Eph 5:5; 1 Thess 2:12;

1942. DeSilva, *Honor*, 149, 151 (applying this pattern to NT models of faith).

1943. Y. Pe’ah 1:1, §30; cf. t. Qidd. 1:15.

1944. E.g., Ambrosiaster *Commentary on Paul’s Epistles* (Vogels, 31–32; Bray, *Corinthians*, 27).

1945. Klauck, *Context*, 50, citing P.Lond. 2710 (from 69–57 B.C.E.). See also the Qumran probation period (1QS VI, 17–21; CD XV, 15; 4Q265 1 II, 4, 7; 4Q266 8 I, 6; 4Q270 6 II, 7; cf. also a year as a disciplinary period in 1QS VI, 25, 27; VII, 3–4, 8, 16; 4Q261 3 4; frg. 4a b5; frg. 6a e2; 4Q266 10 II, 2, 15; 4Q270 7 I, 6).

1946. See discussion in Trapp, *Maximus*, 267–68 (citing, e.g., SVF 2.1152, 1173; Sen. Y. *Prov.* 2.2–7).

1947. Hardships also prepare one to appreciate pleasure or other benefits (Max. Tyre 34.5–6); expecting them might also soften their blow (Eurip. frg. 964).

1948. The inevitability of suffering is common in Pauline tradition (Rom 5:3; 8:17–18; 12:12; 2 Thess 1:5; 2 Tim 3:12).

1949. The end of the times of Gentiles (Luke 21:24) would then be marked by phenomena that Luke probably regarded as future (21:25–36). Paul does use Jesus tradition to speak of the end-time period in 1 Thess 4:15–5:9 (see esp. Wenham, *Rediscovery*; Waterman, “Sources”; for other arguments for authenticity, see Pitre, *Tribulation*, 231–53, 264–91, 348–77). For the eschatological tribulation in early Judaism, see at length Pitre, *Tribulation*, 41–130.

1950. Finegan, *Records*, 134; Jeremias, *Unknown Sayings*, 73. The comparison with the logion in Matt 7:14 and Luke 13:24 (Brown, *Apostasy*, 139) is inadequate. In contrast to sources even at the end of the first century, when some witnesses could remain alive, Tertullian is no longer within living memory of Jesus.

1951. Nolland, “Salvation-History,” 70; Nielsen, “Purpose,” esp. 88.

2 Thess 1:5).¹⁹⁵² (The expression εἰσελθεῖν εἰς τὴν βασιλείαν, “enter into the kingdom,” appears also in Luke 18:17, 25.)¹⁹⁵³ “Tribulation” (θλίψις) is also a term more characteristic of Paul (twenty-two times, most undisputed) than of Luke (though Luke uses it in Acts 7:10–11; 11:19; 20:23), sometimes appearing even in an eschatological sense (probably 1 Thess 3:3; 2 Thess 1:4–6). Pauline language is likewise dominant in Acts 20:18–35, where, as here, Paul addresses believers, as in his letters (but in contrast to most other speeches in Acts).

Many scholars suggest that the passage uses the image of the final, eschatological tribulation that was to precede the Messiah's coming.¹⁹⁵⁴ (The idea of suffering immediately preceding the end is frequent in early Jewish literature;¹⁹⁵⁵ it is sometimes even called birth pangs.)¹⁹⁵⁶ This would fit Luke's eschatology borrowed from the Jesus tradition (Luke 17:31–18:8; 21:12–24).¹⁹⁵⁷ Some claims in the Pauline corpus also may present the eschatological tribulation as preceding the kingdom (1 Thess 3:3; 2 Thess 1:5–7; cf. Rev 1:9), even describing the suffering as part of the Messiah's suffering, and as a prerequisite for the end (Col 1:24; cf. Rev 6:9–11).¹⁹⁵⁸ For Paul, however, the eschatological tribulation is already present (Rom 8:22; 2 Thess 1:4; cf. 1 Tim 4:1–2; 2 Tim 3:1–6), as with others' portrayal of the tribulation (Matt 24:6–8; Rev 1:9; 12:1–6)¹⁹⁵⁹ and the last days (e.g., Heb 1:2; 2 Pet 3:3; see comment on Acts 2:17). (Luke also applies the term for “tribulation” here to the Jerusalem believers' persecution in Acts 11:19 and to Paul's own experiences in 20:23.)¹⁹⁶⁰

IV. APPOINTING LEADERS (14:23)

Paul and Barnabas appointed leaders, here called “elders,” so that the churches could continue to function and grow in the apostles' absence.¹⁹⁶¹ Organizing converts would consolidate the mission's results into self-propagating bodies capable of sustained growth.¹⁹⁶² Gathering converts into churches fits the sociological principle

1952. The kingdom is probably present in Rom 14:17; 1 Cor 4:20–21 (see Donfried, *Thessalonica*, 247–48). Donfried (248–51) points out that Luke's reports of Paul's “kingdom” teaching do fit Paul's letters, which do reflect this aspect of Jesus tradition.

1953. It also appears in Matt 5:20; 7:21; 18:3; 19:22–24; Mark 9:47; 10:15, 23, 24, 25; and even John 3:5.

1954. Lohse, *Colossians*, 70; Mattill, “Way of Tribulation,” 531; Witherington, *Acts*, 428.

1955. E.g., CD IV, 12–13 A; 1QM XV, 1; 4Q162 I–II; 4Q215 1 II; 4QMMT C 21–22; *Jub.* 23:13; *4 Ezra* 6:24; 8:63–9:8; 13:30; *2 Bar.* 26:1–29:3; *Test. Mos.* 7–8; *Sib. Or.* 3.213–15, 635–48, 652–56; *m. Soṭah* 9:15; *Pesiq. Rab Kah.* 5:9; *b. Ketub.* 112b; *Sanh.* 97a; *Gen. Rab.* 97 (NV); *Ecl. Rab.* 2:15, §2; *Song Rab.* 2:13, §4; 8:9, §3; *Pesiq. Rab.* 15:14/15; 31:10; 34:1; 36:1–2; perhaps 4QpPs (according to Allegro, “Light,” 95); cf. *Herm.* 1.4.2.

1956. E.g., 1QH^a XI, 3–18; *1 En.* 62:4; *b. Sanh.* 98b; *Šabb.* 118a. See more fully comment on Acts 2:24 (for the birth pangs image).

1957. The popular notion of Christians escaping final tribulation was unheard of before 1830, lacks a single supporting text when its cited texts are read in context, and contradicts the entire tenor of NT teaching (cf., e.g., Ladd, *Hope*; I addressed the issue more fully, on a semipopular level, in Keener, *Revelation*, passim, esp. 25, 34–35, 60, 75, 153–54, 166, 177–79, 237, 298, 318–19, 324–27, 333, 359–60, 388–89, 455–56, 472, 475).

1958. Cf. Paul's theology of apostolic “tribulation” (2 Cor 1:4, 8; 2:4; 4:17; 6:4; 7:4; Eph 3:13; Phil 4:14), possibly eschatological (Col 1:24; cf. Rev 6:9–11; Gustafson, “Afflictions”; Thompson, “Ephesians iii.13”; Bauckham, “Colossians 1:24”; Bruce, *Apostle*, 139; Stanley, *Resurrection*, 209; Barrett, *2 Corinthians*, 61–62; Lohse, *Colossians*, 70–71; Martin, *Colossians*, 69–70; O'Brien, *Colossians, Philemon*, 77–79). We should note, however, that Judaism meant “birth pangs of the Messiah” as the birth pangs that led to his coming, not his own sufferings. On a suffering Messiah (probably limited to later speculation), see comment on Acts 2:23; excursus on messiahship at Acts 2:36; Keener, *John*, 288.

1959. See Keener, *Matthew*, 577–78; idem, *Revelation*, 292–93, 318–20.

1960. He also applies it to Joseph's sufferings (Acts 7:10) and famine (7:11).

1961. Talbert, *Mediterranean Milieu*, 53, compares with the succession here the succession from the Twelve to the Seven; both cases allow the function of διακονία to continue. For one discussion of authentic tradition in the appointment of elders in this region, see Nellessen, “Gemeinden,” esp. 498.

1962. Cf. Willimon, *Acts*, 150, comparing Francis Asbury's successful organizational skills (Asbury was not noted as a preacher, unlike George Whitefield). American Methodism multiplied to perhaps a thousand

that people are influenced by their social context; this was recognized by Israelite sages,¹⁹⁶³ Gentile sources,¹⁹⁶⁴ and early Christians (1 Cor 15:33; Heb 10:24–25).

Paul's (and perhaps some other early Christian missionaries') way of accommodating this principle would have appeared distinctive. Pagan worship was not structured as a service and, apart from civic festivals, usually focused on an individual's or family's commitments to deities and their temples.¹⁹⁶⁵ (The exception was cultic associations, which do bear resemblances to early Christian worship; on associations, see comment on Acts 2:42.) The term ἐκκλησία was more common for a political assembly than for a religious one, and a gathering lacking statue or sacrifice would either be associated religiously with synagogues or nonreligiously with philosophic schools. Stoics by this period were too high-status to pursue Stoicism's early communitarian ideals; the epistolary (as well as Lukan) Paul surpassed them in attempting to carry out this ideal.¹⁹⁶⁶

Although χειροτονέω can refer to electing in the manner of Greek cities,¹⁹⁶⁷ it also referred to leaders appointing or installing other officials,¹⁹⁶⁸ which (in view of Paul and Barnabas's being the implied subject) must be the case here.¹⁹⁶⁹ The book of Acts, like most Christian sources before the period of Ignatius, reflects diversity in forms of church leadership.¹⁹⁷⁰ Because elders functioned along with the "entire church" (Acts 15:4, 22),¹⁹⁷¹ their function was not hierarchical in the later sense; even apostles shared leadership (cf. 15:2, 4, 6, 22–23; 16:4).¹⁹⁷²

The apostles commended the elders to the Lord, as they themselves had been commended (14:26), in turn passing on the role of spreading the message.¹⁹⁷³ The

times its initial size under his leadership (see, e.g., Noll, *Rise*, 190, 216, 218). Similarly, John Sung, while evangelizing the masses in China, recognized the even greater value of raising up leaders to multiply the effort (*Diaries*, 57, 79).

1963. Pss 1:1, 5; 119:63, 113, 115; Prov 13:20; Sir 6:7–12; 12:13–18; 13:1; *Sent. Syr. Men.* 148–53, 333–35; *Let. Aris.* 130; *m. 'Ab.* 1:6–7; 2:9; *t. 'Abod. Zar.* 1:17; *Sipre Deut.* 286.11.4; *'Abot R. Nat.* 16, §36 B; Ps.-Phoc. 134.

1964. E.g., *Gnom. Vat.* 460 (in Malherbe, *Moral Exhortation*, 110); *Xen. Mem.* 1.2.20, 24; 2.4.1–2.6.39; *Aeschines Tim.* 54–57; *Theoph. Char.* 29; *Rhet. Alex.* 7, 1429a.1–5; *Polyb.* 28.21.2; *Diod. Sic.* 12.12.3; 12.14.1; *Cic. Rosc. Amer.* 14.39; *Sall. Catil.* 14.4; *Sen. Y. Ep. Lucil.* 99.40; 104.20–21; 109; *Mus. Ruf.* 11, p. 84.16–17, 21–22; *Pliny Ep.* 4.27.6; *Arius Did. Epit.* 2.7.11m, pp. 88–89.13–16; *Suet. Claud.* 5; *Crates Ep.* 12; *Socraticus Ep.* 24; *Diog. Laert.* 1.60; *Babrius 9–12*; *Philost. Hrk.* 48.5.

1965. Winter, *Left Corinth*, 133.

1966. Engberg-Pedersen, *Paul and Stoics*, 78.

1967. Cf., e.g., 2 Cor 8:19; *Men. Rhet.* 1.3, 364.1–2; *Iambl. VP.* 35.260; cf. Betz, *Corinthians*, 74 (though noting [75] that Paul appointed Titus; likewise Martin, *Corinthians*, 275–76). Johnson, *Acts*, 254, cites *Plato Laws* 6.763E. On election, see comment on Acts 6:5.

1968. *Jos. Ant.* 6.39, 43; *Philo Jos.* 248; *Mos.* 2.142; cf. Fitzmyer, *Acts*, 535; Johnson, *Acts*, 254. The people did it in *Jos. Ant.* 4.297; 7.8, 10; cf. *Ant.* 4.34, 54; though in some cases (e.g., *Life* 341) such language may appeal primarily to the Greek audience's democratic tradition. Texts also speak of God appointing the person (e.g., *Philo Mos.* 1.162; 2.160; *Rewards* 54).

1969. With most commentators (e.g., Conzelmann, *Acts*, 112). Its later use for ordination (Euseb. *H.E.* 6.43.10) should not be retrojected here (before the prayer and fasting, Larkin, *Acts*, 216), although the idea is probably analogous to Acts 6:5–6a. Later rabbis laid hands on their own disciples to ordain them to the court, but still later rabbis required three judges (*y. Sanh.* 1:2, §13). For laying on of hands, see comment at Acts 6:6.

1970. See, e.g., Vincent, *Philippians, Philemon*, 36–51 ("Excursus: Bishops and Deacons [Phil. 1.1]"), esp. 50–51; Tyson, "Authority in Acts."

1971. Because only the apostles and elders gathered in Acts 15:6, they probably represented the broader church, which could not all meet at one place, especially in private. The "crowd" in 15:12 may refer to that of apostles and elders.

1972. See Spencer, *Philip*, 198; on the egalitarian ideal behind Pauline leadership, cf. Ehrensperger, *Power*, *passim* (esp. 180–200). Garland, "Absence," notes this egalitarian leadership model in Pauline churches and doubts "ordained ministry" there in our usual sense of the phrase; nevertheless, as suggested above, church leadership surely existed as one of the gifts (1 Cor 12:28; Rom 12:8; 1 Thess 5:12; Nardoni, "Concept"), even if this was attached to a person rather than to an office in this period.

1973. One could think that they commended all the believers (cf. Acts 20:32, although Paul is there addressing elders), but the close contextual connection with the apostolic team itself having been commended

term could apply to entrusting a bride to her groom as if a deposit (Tob 10:13), but its most relevant use is that of entrusting a person to God (Luke 23:46; Acts 20:32).¹⁹⁷⁴ The language reflects early Christianity in general and is not exclusively Pauline or Lukan; for example, 1 Peter (which also mentions elders, 1 Pet 5:1) exhorts believers to entrust their lives to God (4:19). On fasting (ideally conjoined with prayer; cf. Acts 13:2–3; Luke 2:37), see comment on Acts 13:2.

Although the short-range results of Paul's mission seem small compared with his later ministry in more cosmopolitan Ephesus or Corinth, this southern Anatolian mission both provided Paul necessary experience and laid the foundation for a growing movement. In Asia Minor, as word spread from the cities, "thousands of rural communities converted *en masse* to Christianity during the third and fourth centuries."¹⁹⁷⁵ Although the church of late antiquity differed much from Paul's simple model of small house churches, it is noteworthy that it shaped Anatolian culture in that period no less than had romanization in an earlier period.¹⁹⁷⁶

v. "ELDERS" (14:23)

Luke calls the leaders whom the apostles appointed "elders." The language of "elders" (whether πρεσβύτερος or occasionally γέρον) would be widely familiar. Egyptian associations could call their leaders "elders."¹⁹⁷⁷ On a larger scale, Greeks could use the term for leaders in a city (Diod. Sic. 21.18.1).¹⁹⁷⁸ A city's elders constituted the influential group known as the *gerousia* in the city gymnasium.¹⁹⁷⁹ Because ἐκκλησία most often was a "town meeting," an assembly ruled by "elders" might lead hearers to think of an alternative civic assembly. Elders could also be the older and wiser members of, for example, the army—leaders whose words were heeded by others.¹⁹⁸⁰

The primary leadership model that the Christians had available to adapt was leadership in the synagogue.¹⁹⁸¹ Synagogues may have borrowed the term from their Greek environment,¹⁹⁸² especially if LXX usage reflects that environment.¹⁹⁸³ As is well known, the LXX uses both ἐκκλησία and συναγωγή to translate the Hebrew *qahal*, for the "community" or "congregation" of Israel in the wilderness (cf. Acts 7:38).¹⁹⁸⁴ Because both terms applied to "assembly" in Greek, and if one wished to distinguish the group from a local synagogue (not necessarily always the case; compare Jas 2:2 with 5:14), the former term might serve as well as the latter, provided no one confused it with town assemblies (cf. Acts 19:39). Since Jewish synagogues (perhaps especially

in 14:26 (a different term, but probably employed basically synonymously) and the fasting (connected with consecration for a mission in 13:2–3) probably suggests that the elders remain in view.

1974. Cf. the people's concern about whom Deborah will "commend" (*commendas*) them to when she dies (*L.A.B.* 33:4).

1975. Mitchell, *Anatolia*, 2:vii.

1976. *Ibid.* (articulating the thesis that Mitchell develops throughout *Anatolia*, vol. 2).

1977. Klauck, *Context*, 46.

1978. Cf. likewise the elders (in this case, γέροντας) as leaders in old Crete (*Arist. Pol.* 2.7.5, 1272a). Elders probably did control more in the idealized past (*Dion. Hal. Demosth.* 3). For examples from Egypt, see Dibelius and Conzelmann, *Pastoral Epistles*, 77.

1979. MacMullen, *Social Relations*, 27, 81; Luke employs this term in Acts 5:21, and it appears more than thirty times in the LXX. The Spartans' council of elders (those more than sixty) was especially noted (e.g., *Aeschines Tim.* 180).

1980. *Hom. Il.* 2.404; *Philost. Hrk.* 21.29. The term ἐπίσκοπος also may reflect secular usage, though again probably via prior Jewish adaptation; see comment on Acts 20:28.

1981. Meeks, *Urban Christians*, 80–81 (rightly noting that synagogues were, in turn, influenced by forms of families and Hellenistic voluntary associations); Maser, "Synagoge und Ecclesia"; Luna, "Reflections."

1982. Goodman, *State*, 119. Cf. Stambaugh and Balch, *Environment*, 49 (for archons).

1983. Deissmann, *Studies*, 154–56 (arguing that the LXX reflects Ptolemaic Alexandrian idiom).

1984. Cf. Bultmann, *Theology*, 1:38; Foakes-Jackson and Lake, "Development," 327–28; Lake and Cadbury, *Commentary*, 54; Richardson, *Theology*, 285; Davies and Allison, *Matthew*, 2:629.

fledgling house synagogues) were the primary model for the house churches,¹⁹⁸⁵ it is helpful to recognize that authorities usually granted synagogue communities some autonomy as ethnic communities. As long as Christians were recognized as Jewish and not repudiated by the recognized Jewish community, they would, ideally, experience the same autonomy.

Given the church's adaptation of synagogue models already effective in Diaspora cities, it is reasonable that it borrowed "elders" from there as well.¹⁹⁸⁶ Diaspora Jewish communities certainly drew on wider models of rule by elders. Our evidence is clearest for the Alexandrian Jewish community, which was ruled by a gerousia, or council of elders, probably with members representing each of the local congregations.¹⁹⁸⁷ "Elders" are also abundantly attested in Diaspora Jewish inscriptions, though their role is not always clear and may have varied (and may sometimes simply designate age with its attendant status and influence).¹⁹⁸⁸ Scholars note the widespread evidence for this office in the Jewish Diaspora.¹⁹⁸⁹ Usually a council of elders, rather than a single elder, exercised their activities in synagogues.¹⁹⁹⁰ That they appear in 1QS VI, 8–9 reinforces the impression that the Jewish usage of "elders" was widespread.¹⁹⁹¹ (For usage in Josephus for rulers of Israel, see comment on Acts 4:5.)

Leaders' usual age was a natural factor in the development of the term's use for leaders. Biblical usage of the title suggests its long history in ancient Israel; there the older male members of a community typically functioned as its de facto community leaders.¹⁹⁹² The usage was natural in a world where respect for elders was part of the broader culture.¹⁹⁹³ In Jewish society, the younger had to respect the elder;¹⁹⁹⁴ in the wider world, young men were to rise before elders to offer their seats.¹⁹⁹⁵ Prominent

1985. On churches following synagogue models, cf., e.g., Maser, "Synagoge und Ecclesia."

1986. Many commentators recognize dependence on Jewish models (Selwyn, *Peter*, 227; Reicke, *Epistles*, 58; Sidebottom, *James*, 61; R. Williams, *Acts*, 97, 109). In Jerusalem (Acts 15:2), the term was also available (see comment on Acts 4:5, 8).

1987. Meeks, *Urban Christians*, 35 (citing Philo *Flacc.* 74, 80 [see also 76]; cf. *Jos. War* 7.412; elsewhere, *Jos. War* 7.47; Libanius *Ep.* 1251); Barclay, *Jews in Diaspora*, 43; cf. Philo *Embassy* 229; *Jos. Ant.* 7.293; 12.138, 142; 13.166, 169; Applebaum, "Organization," 491. Some have extrapolated from this to all Diaspora communities (Kelly, *Peter*, 197), but it certainly was not permitted in Rome (see comment on Acts 28:17). For a discussion of gerousia and gerousiarchs in ancient society, including Jewish inscriptions, see *CIJ* 1:lxv–lxxvi; cf. the feminine usage, 1:67, §95.

1988. In general, see *CIJ* 1:lxvii–lxxxvii. See, e.g., 1:294, §378; 1:432, §595 (transliterated from Hebrew; he was eighty); 1:433, §597 (feminine); 1:426, §581 (feminine); 1:503, §692 (feminine); 2:9, §739 (abbreviated, in Smyrna; cf. Goodenough, *Symbols*, 80); 2:45, §790 (Cilicia); 2:46, §792 (Cilicia); 2:53, §801 (Pontus); 2:76–77, §828a; 2:77, §828b; 2:79, §829; 2:137, §931. In Sardis, see Mitten, "Sardis," 65.

1989. See Applebaum, "Organization," 493–94; Dibelius and Conzelmann, *Pastoral Epistles*, 77 (rightly noting the LXX, though probably overemphasizing the lateness of the epigraphic evidence). It is widely assumed (e.g., Lake, "Twelve," 56).

1990. See Brooten, *Women Leaders*, 53.

1991. See Driver, *Scrolls*, 522 (comparing also CD X, 2; comments on plural leadership among the Essenes in *Jos. Ant.* 18.22; *War* 2.146); cf. Kelly, *Peter*, 197. Rabbis also viewed "elders" as wise (*m. 'Ab.* 5:21), and they often viewed biblical ruling "elders" as sages (*Sipra Qed. pq.* 7.204.3.1; *y. 'Abod. Zar.* 3:1, §2; *Hor.* 3:5, §3; *Lev. Rab.* 11:8).

1992. See, e.g., for Israel, *Exod* 3:16, 18; 4:29; 12:21; 17:5–6; 18:12; 19:7; 24:1, 9, 14; *Lev* 4:15; 9:1; *Num* 11:16, 24–25, 30; 16:25; *Deut* 5:23; 27:1; 29:10; 31:9, 28; *Josh* 7:6; 8:10, 33; *Jer* 29:1; *Ezek* 8:1; for other peoples, *Num* 22:4, 7; locally, *Deut* 19:12; 21:2–6, 19–20; 22:15–18; 25:7–9; *Ruth* 4:2, 4, 9. Cf. later, e.g., *Jos. Ant.* 13.124, 428; *War* 2.267; *Luke* 9:22; 20:1; 22:52, 66; *Let. Aris.* 310; *2 Bar.* 31:1; 46:1; *Acts* 4:5, 8, 23; 6:12. On elders in ancient Israel, see Jacobs, "Leadership."

1993. This is true also in cultures not directly dependent on the ancient Near East or Mediterranean world (cf. Mbiti, *Religions*, 89–90).

1994. *Jos. Ag. Ap.* 2.206; *Ant.* 3.47; *Ps.-Phoc.* 220–22; *4 Bar.* 5:20; among Pharisees, *Jos. Ant.* 18.12. This included rising before elders (*Ps.-Phoc.* 220; *t. Meg.* 3:24; cf. *y. Bik.* 3:3, §§4–5).

1995. E.g., *Xen. Mem.* 2.3.16; *Val. Max.* 4.5.ext. 2; *Plut. S. Sp.*, Lycurgus 14, *Mor.* 227F; cf. Hirschmann, "Greeting," 1023. Roman society also demanded giving way to one's elder (*Cato Coll. Dist.* 10; *Dion. Hal.*

local leaders tended to be those who were aged, as both literary texts¹⁹⁹⁶ and inscriptions¹⁹⁹⁷ indicate. Merely that they were older men was sufficient grounds for showing them respect.¹⁹⁹⁸ Texts also spoke of the elders of Jerusalem (e.g., 2 Macc 14:37; Jdt 6:16) and prominent scholars allegedly sent by the high priest to impress Ptolemy (*Let. Aris.* 32, 39). In Jerusalem they were probably the lay members of the aristocracy who shared power with the priestly aristocrats.¹⁹⁹⁹ This suits the usage in Luke-Acts (see comment on Acts 4:5; 11:30). The leading men in Galilee were the aged (*Jos. Life* 266); local village leaders there were “elders,” just as in most of the ancient Mediterranean world.²⁰⁰⁰

Although exceptions were made for the spiritually mature (1 Tim 4:12), it made sense to select most “elders”—who would normally tend to be older as their title suggests—at least somewhat on the basis of their age, both because of the respect this would entail in the community (see comment above; cf. also comment on Acts 7:58) and because older members of a local community normally knew the community best (*Lysias Or.* 23.5, §167). They were generally considered the wisest.²⁰⁰¹ Not only the factor of age but also the status of heads of stable households, with success in governing their households, would make church leaders more respectable to the broader society, a criterion employed in selecting elders later (1 Tim 3:2, 4–5; Titus 1:6).²⁰⁰²

Other synagogue titles include “archons,”²⁰⁰³ “synagogue rulers” (Luke 8:49; 13:14; Acts 18:8, 17; see comment on Acts 13:15), and (perhaps usually honorary or often patronal) “fathers” and “mothers” of synagogues.²⁰⁰⁴ The usage seems to have varied in vocabulary and especially in function from one location to another. Patrons of associations often exercised some influence, paralleling the use of patronage in the

Ant. rom. 7.47.1); on respect for elders, see also, e.g., *Hom. Il.* 1.259; 23.616–23; *Xen. Cyr.* 8.7.10; *Aeschines Embassy* 22, 25; *Livy* 5.25.3; 6.24.7; *Val. Max.* 2.1.9–10; 2.2.4; *Aul. Gel.* 2.15; *Men. Rhet.* 2.4, 394.22; *Iamb. VP.* 8.37; 16.69; 21.99; 30.180; 33.230; text in *SPap* 3:476f, §116; cf. *Polyb.* 31.24.3; cf. fatherly respect toward even strangers (*Hom. Il.* 24.362, 371, 373; 24.507; *Od.* 7.28, 48; 8.145, 408; 20.199).

1996. E.g., *Arist. Pol.* 2.7.5, 1272a; *Diod. Sic.* 21.18.1; *Dion. Hal. Ant. rom.* 8.15.1; *Jos. Life* 266; *Let. Aris.* 32, 39. See further comment on Acts 4:5.

1997. E.g., *CIJ* 1:294, §378; 1:426, §581; 1:432, §595; 1:433, §597; 2:9, §739; 2:45, §790; 2:46, §792; 2:53, §801; 2:76–77, §828a; 2:77, §828b; 2:79, §829; 2:137, §931; cf. 1:1xxxvi–1xxxvii; *Mitten*, “Sardis,” 65.

1998. E.g., 1 *Pet.* 5:5; *t. Meg.* 3:24; *Abod. Zar.* 1:19; 4 *Bar.* 5:20; *Ps.-Phoc.* 220–22; *Sent. Syr. Men.* 11–14, 76–93 (but cf. 170–72); *Hom. Il.* 1.259; 23.616–23; *Aul. Gel.* 2.15; *Diod. Sic.* 1.1.4; 2.58.6; *Plut. S. Sp., Lycurgus* 14, *Mor.* 227F; *Pythagoras* in *Diog. Laert.* 8.1.22–23.

1999. See *Sanders, Judaism*, 329.

2000. *Freyne, Galilee, Jesus*, 152; cf. *Sanders, Jesus to Mishnah*, 79 (citing *Ezra* 10:14; *Philo Hypoth.* 7.13). *Sanders* allows them this role alongside priests (cf. *Judaism*, 170–71, 182, citing esp. *Jos. Ag. Ap.* 2.187), also a high-status role in many unrelated societies (cf. *Mbiti, Religions*, 88).

2001. E.g., *Aeschines Tim.* 24; *Dion. Hal. Ant. rom.* 8.15.1; *Phaedrus* 4.2.16–19; *Philost. Vit. Apoll.* 6.11; *Vit. soph.* 1.25.543; *Job* 12:12; 32:7. There were exceptions (e.g., *Eccl* 4:13; *Fronto Ad M. Caes.* 3.3).

2002. “Overseers” in these texts is interchangeable with “elders” (*Titus* 1:5, 7); for “deacons,” see 1 Tim 3:12. On successful management of one’s household as a criterion for public leadership in antiquity, see *Isoc. Demon.* 35; *Ad Nic.* 19; *Diod. Sic.* 12.12.1; *Sen. Y. Ben.* 4.27.5; *Plut. Comparison of Aristides and Marcus Cato* 3.1; *Dinner* 12, *Mor.* 155D; *Bride* 144CD; *Alex.* 9.6; *S. Sp., Lycurgus* 21, *Mor.* 228CD; cf. *Eurip. El.* 386–87; *Isoc. Nic.* 41 (*Or.* 3.35); *Marc. Aur.* 1.16.4; *Sipre Deut.* 32.5.12; *Keener, Marries*, 98; *Malherbe, Social Aspects*, 99n21.

2003. See comment on Acts 13:15. Though *Justin* uses “archon” generically, later Roman sources mention only “elders” (*Cod. theod.* 16.8.2; *Applebaum*, “Organization,” 494–95); the title “archon” was dominant in Rome to the exclusion of “elder” (“Organization,” 493). They covered especially the secular part of synagogue business (495).

2004. For fathers (probably honorary, without attached duties, *Leon, Jews of Rome*, 186), see, e.g., *CIJ* 1:xcv–xcvii; 1:66, §93; 1:250–51, §319; 1:360, §494; 1:372, §§508–9; 1:373, §510; 1:393, §533; 1:397, §535; 1:398, §537; 1:462, §645; 1:463, §646; 1:505, §694; 1:520, §720; 2:9, §739. For “mothers of synagogues,” see, e.g., 1:118, §166 (reconstructed); 1:362, §496 (reconstructed); 1:384, §523 (a proselyte); 1:457, §639; *Levinskaya, Diaspora Setting*, 191; more fully, *Brooten, Women Leaders*, 57–72, esp. 57–63; the (much later) *Codex theodosianus* treats it as a real office (*Brooten, Women Leaders*, 65–66); fathers and mothers of guilds could be patrons, but cultic groups, especially Mithraists, may have used them as officers (71).

political system.²⁰⁰⁵ That we do not know what all of the titles meant in any given place, whether in synagogue inscriptions or in first-century Christian texts, is to be expected. As Leon notes, inscriptions list officers of synagogues in Rome but not their functions. “This is hardly surprising, since the members of the community obviously knew what the titles meant and the writers of the epitaphs were not concerned about remote posterity.”²⁰⁰⁶

That early Christians adapted the title “elders” from contemporary Judaism may be regarded as fairly certain; less certain is the date at which they began doing so. These churches were fairly new and probably still rather small,²⁰⁰⁷ though certainly, given the distances traveled, some time had transpired since the apostles first founded these churches, especially in Antioch. Small house churches of new believers had patron families in whose homes they met and probably some senior members who had previously attended synagogue and could offer teachings on Scripture. But would they need “elders”?²⁰⁰⁸ Many scholars doubt it, pointing out that Pauline literature nowhere employs the term for church leaders until the Pastorals (1 Tim 5:17, 19; Titus 1:5; cf. 1 Tim 4:14; 5:1–2) and that otherwise the term appears only in literature often dated after 70 C.E. (Jas 5:14; 1 Pet 5:1, 5; 2 John 1; 3 John 1).²⁰⁰⁹ Because, on the available evidence, I would date James, 1 Peter, and probably the Pastorals (or, at the very least, the traditional material behind them) earlier (a date in the 60s for James and 1 Peter, at least, and possibly for all of them—the 60s being before, I believe, Luke wrote Acts) than do many other scholars,²⁰¹⁰ I find the contrast less striking than do some others; but it does appear noteworthy that Paul does not employ the term in his undisputed epistles (earlier, by any judgment, than the other documents in question).

At the same time, we should not read as much into the debate’s significance as some scholars do. Nearly all agree that Luke exercised the freedom to describe events in his own words; if Luke at some points employed the common language of churches of his day to describe earlier offices, this would not be surprising.²⁰¹¹ If churches in

2005. Chow, *Patronage*, 64–68.

2006. Leon, *Jews of Rome*, 167. Cf. similarly Christian “deacons” in 1 Tim 3:8!

2007. Later regulations prohibited using new converts (1 Tim 3:6), fitting cultural expectations (Suet. *Tib.* 54.1; 1QS VI, 17–18; *t. Demai* 2:12); required them to be tested first (1 Tim 3:10; Cic. *Quint. frat.* 1.1.4.14–1.1.5.15; Colum. *Rust.* 1.8.2; Plut. *Educ.* 7, *Mor.* 4C; Heracl. *Ep.* 9; Gaius *Inst.* 1.199–200; Iamb. *V.P.* 17.71–72; 20.94; 1QS VI, 14–23; *Let. Aris.* 264; *t. Hag.* 2:9; *y. Ta’an.* 4:2, §8); and warned against ordaining them prematurely (1 Tim 5:22). Since the churches had to be governed somehow, however, the apostles may have simply had to pick the most mature converts available, preferably with knowledge of Scripture from backgrounds in the synagogue.

2008. The question contrasts with the situation of the Jerusalem church (Acts 11:30; 15:2–6; 21:18) and probably Diaspora churches that had existed for a long period (20:17) and hence is most relevant to this passage (14:23).

2009. E.g., Conzelmann, *Acts*, 112, 173; Dunn, *Acts*, 186, 193; Weiser, *Apostelgeschichte*, 355; Pervo, *Acts*, 362. Following the usual approach to deuteropauline letters, Bonneau, “Achever,” traces the development of leadership structures through Pauline literature and Acts.

2010. For evidence supporting these dates or for matters related to them, see Guthrie, *Introduction*, 723–46, 749–53, 762–81, 786–88; Charlesworth, *Pseudepigrapha and New Testament*, 86; Davids, *James*, 2–13 (favoring two stages); Martin, *James*, xxxi–xxxii (favoring two editions, lxxvii–lxxviii); Robinson, *Redating*, 118–39, 163–69; idem, *Trust*, 68–69; Mayor, *James*, i–lxxxiv (esp. vii), cxliv–clxxvii; Carson, Moo, and Morris, *Introduction*, 410–14, 421–24; Kelly, *Peter*, 11–15, 29–32; Selwyn, *Peter*, 7–17, 56–63; cf. Taylor, *Atonement*, 34; Moffatt, *General Epistles*, 86; Hunter, *Message*, 22; Johnson, *Writings*, 432–33. I recognize that a larger number of scholars disagree (depending on the documents in question), but I am merely expressing the tentative conclusion from my own study that the available evidence supports this position more readily than not (in order of decreasing probability, for 1 Peter, James, and the Pastorals). At the least, I believe that it deserves a fairer hearing than it is often given.

2011. For the possibility of anachronism, cf. Fitzmyer, *Acts*, 535. That Luke did not mind reshaping language is clear (cf., e.g., Luke 5:19 with Mark 2:4). Though some historians complained about anachronistic language

some locations (e.g., Jerusalem) adopted the title before Pauline churches, churches in the Pauline circle (including Luke's) may have readily adapted the title at a later date.

Although Paul does not employ the term in his extant epistles, his charismatic model of leadership does not necessarily obviate all structure. (Luke's narrative, after all, is hardly lacking in charismatic leadership alongside offices.)²⁰¹² Paul's generally undisputed letters do, in fact, speak of leaders in his churches (see esp. Rom 12:8; 1 Cor 12:28; 16:16; Gal 6:6; Phil 1:1; 1 Thess 5:12–13),²⁰¹³ leaders whom Luke could readily describe in terms employed in much of the rest of the church. In what is probably Paul's earliest extant letter, the leaders teach and “administrate”²⁰¹⁴ (1 Thess 5:12), and warrant honor for their work (5:13).²⁰¹⁵ Paul speaks of the role of “overseer” (ἐπίσκοπος), which the church at some point²⁰¹⁶ began to identify with “elder” (Acts 20:17, 28; Titus 1:5, 7; cf. 1 Tim 3:2; 5:17; 1 Pet 5:1–2 mss). If the difference is more stylistic than a matter of content, Luke's mentor Paul himself would presumably not have objected.

Local churches would need to have some leaders in place, even if such leadership structures evolved in different ways in different locations.²⁰¹⁷ Some institutionalization began occurring in Paul's churches during his ministry there.²⁰¹⁸ Some scholars have even argued that Paul's undisputed letters suggest hierarchical or even monarchical authority,²⁰¹⁹ but I doubt that this is the case either in those letters or (see comment below) here in Acts. Most likely, leadership forms remained in flux for some time, with various titles in use alongside each other,²⁰²⁰ just as titles and offices for syna-

in earlier sources (Vell. Paterc. 1.3.2–3), most do not complain; cf. the use of standard Roman terms (rather than Punic or Samnite terms unintelligible to his audience) in Livy (Laistner, *Historians*, 94).

2012. See Acts 11:27; 13:1; 15:32; apostles alongside elders in Jerusalem; and passages where institutional leaders must be filled with the Spirit (6:3). See also Eckey, *Apostelgeschichte*, 320.

2013. Some scholars also cite 1 Cor 6:5; 2 Cor 8:23, addressing the importance of leaders in a general sense. See also Wenham, “Paulinism of Acts Again”; Eckey, *Apostelgeschichte*, 320; more extensively Clarke, *Leadership* (e.g., 88, 102–3, 130, though he may overstate “stratification”). Given the absence of “elders” in most Roman Jewish evidence, the title may have been inappropriate in Rome; given Paul's tension with much of the Corinthian churches' elite, he may also have been less direct about their leadership structures. But Phil 1:1 (presupposing a mutually understood meaning, now lost to us) reveals that terms such as “overseer” were already in use in his lifetime, though not in the Ignatian sense of “bishop.” Wider use of (city) bishops evolved later (see Lampe, “Patrons,” 496, citing, e.g., Ign. *Phil.* 7–8; Euseb. *H.E.* 5.16.5); subsequent exegetes of the earliest Christian texts have often noted the identity of “bishops” (overseers) and elders there (note Jerome and Wycliffe in Evans, *Wycliffe*, 220).

2014. The term applies to some form of leadership (Rom 12:8; common in the Pastorals, 1 Tim 3:4–5, 12; 5:17; Titus 3:8, 14). Hebrews 13:17 (which I also date earlier than most) speaks of obeying leaders.

2015. This need not mean, as probably in 1 Tim 5:17–18, that they were to receive a stipend (Dibelius and Conzelmann, *Pastoral Epistles*, 78; Kelly, *Pastoral Epistles*, 125; cf. double pay for soldiers, e.g., Livy 40.43.7; Suet. *Jul.* 26.3; Tac. *Hist.* 4.19; Sherck, *Empire*, §49D, p. 92; §117, pp. 159–60), especially if they belonged to the elite already. Paul's defense of pay in 1 Cor 9:4–18 concerns apostles and the model of patronage for sages, not specifically leaders of local house congregations.

2016. Given its role in Israel's history and Jewish settings, one might guess that Jesus's followers used “elder” from a period even earlier than “overseer,” but we lack hard evidence to support this suspicion. Although it cannot be proved from explicit evidence, arguing against it from silence is also problematic (even “overseer” appears only once in Paul's undisputed letters, though its role there suggests that it was more common). Where “overseer” appears, it is in one of the later undisputed letters, allowing for the possibility that offices and their titles evolved over time. Because 1 Tim 5:17 could refer merely to some individuals being more gifted than others, I do not find persuasive the distinction between elders and overseers advanced in Clarke, *Leadership*, 57–58, 87, 185.

2017. See Johnson, *Acts*, 256–57 (also denying the incompatibility of charismatic leadership and structure). In the Pastorals, Paul's agents must appoint elders in each city (Titus 1:5); they must also transmit his teaching to others, as faithful disciples of other Jewish teachers would (2 Tim 2:2).

2018. See esp. MacDonald, *Pauline Churches*, 2–84.

2019. Grant, *Paul*, 24 (citing apostleship in 1 Cor 9:2; 12:28).

2020. As in Acts; see, e.g., Tyson, “Authority in Acts.” Some have even argued that the multiplication of diverse titles as the Christian movement developed may reflect less a normal stage in institutionalization and

gogue leaders varied throughout the Roman world. As Howard Clark Kee points out, the dichotomy between charismatic (hence earlier) and institutional (hence later) leadership articulated by many NT scholars misapplies the categories of Max Weber, for whom the charismatic could continue alongside the institutional.²⁰²¹

5. Return to Antioch (14:24–28)

For a discussion of the regions in Acts 14:24—namely, Pamphylia (on the coast) and Pisidia (to the immediate north, up to the border of Antioch)—and of their relationship to each other, see comment on Acts 13:13–14. Given their proximity to each other, writers naturally treated them side by side.²⁰²² Claudius detached Pamphylia from the province of Galatia at some point during his reign, though Nero or Galba rejoined them.²⁰²³ Pamphylia may have been distinct from Galatia at the time of Paul and Barnabas’s journey, but Luke distinguishes here not the provinces (i.e., not Pamphylia vs. Galatia) but the regions (Pamphylia vs. Pisidia) for geographic specificity. (This practice contrasts with Paul’s preference for provincial titles.) It is possible that even much of Pisidia was detached from Galatia and adjoined to Lycia and Pamphylia by this time.²⁰²⁴

Pamphylia included Perga (13:13), where John Mark left them (also 15:38); some Jewish people from the region had already become believers (2:10), but whether some had returned here (either after Pentecost or after the church’s scattering, 8:4; 11:19) is unclear. Cicero connected the Pisidians and their Pamphylian neighbors, along with the Cilicians, all of whom he previously governed, noting their dependence on augury based on birds’ songs and flight patterns (Cic. *Div.* 1.1.2);²⁰²⁵ others also opined that Phrygians were particularly good at interpreting omens from birds (Dio Chrys. *Or.* 34.5). (Lycaonia, near western Cilicia, was eventually joined to it administratively in the second century.)²⁰²⁶

Luke may note the preaching in Perga here (Acts 14:25) because he omits mention of it earlier (13:13–14). Some scholars have suggested the town’s largely Gentile character, which could explain why Paul and Barnabas might have passed it up initially, yet now prove more ready to minister there, more confident of ministry among Gentiles after founding a church without beginning in a synagogue in Lystra. Perga lay on Pamphylia’s northwestern border, with Attalia on its far southwestern border.²⁰²⁷

Attalia (14:25) was named for Attalus Philadelphus, who founded it in Pamphylia (Strabo 14.4.1).²⁰²⁸ Modern Antalya (now reputed to be Turkey’s eleventh

more a general cultural phenomenon evident in the expansion “of new titles, reflecting increasing specialisation of function,” among cult officials in Ephesus and elsewhere (Horsley, “Inscriptions of Ephesos,” 145–46).

2021. Kee, *Miracle*, 52–54. Weber did not speak of “charismatic” in the sense in which it is applied ecclesiastically today, but (contrary to Paul’s “charismatic” model) some Majority World churches with charismatic leadership are extremely hierarchical (often because of culturally accepted leadership models; cf. Grigg, *Urban Poor*, 181, 188, 250), as was true also of Edward Irving’s Catholic Apostolic movement in the nineteenth century. Charismatic movements are also strong in some churches with hierarchies (e.g., the Roman Catholic and Anglican communions).

2022. E.g., Pamphylia in Pliny E. *N.H.* 5.23.94; Pisidia in 5.24.94; both together in Dio Chrys. *Or.* 35.14.

2023. Levick, *Roman Colonies*, 163–64.

2024. Mitchell, *Anatolia*, 2:154.

2025. Whether Luke uses the title of the old kingdom or of a district in the Roman province Galatia does not produce a significant difference (Lake and Cadbury, *Commentary*, 168).

2026. Bean and Mitchell, “Cilicia,” 330.

2027. See Mitchell, *Anatolia*, map 5, after 1:78.

2028. The same passage in Strabo reports the tradition that some Trojan Cilicians settled in Pamphylia, but probably neither Luke nor his audience would know this (hence no connection to Acts 16:8–9). The

largest city), Attalia lay at the mouth of the Cataractes and was the primary port for Pamphylia.²⁰²⁹ Attalia covered about 205 acres,²⁰³⁰ and parts of the ancient town wall remain.²⁰³¹ Attalia lies on a terrace of “flat limestone” on steep cliffs about 120 feet (37 m.) above the sea. A much later staircase leads from the harbor “up to the town”; “another approach through a cutting in the rock could be from his [Paul’s] time.”²⁰³² Once Paul and Barnabas reached Attalia, then, they had only a brief descent before their sea voyage to the southeast.

High-status Roman presence is attested for Attalia in this period.²⁰³³ The Calpurnii, Italian settlers, constituted Attalia’s most prominent family in the first century. One Marcus Calpurnius Rufus, son of an important imperial priest during Tiberius’s reign, is attested as a senator of high rank during the reign of Claudius.²⁰³⁴ Thus a tomb of the first-century B.C.E. or C.E. Italian type honors a Roman ex-consul, perhaps the same Calpurnius Rufus, a legate of Claudius, though the symbol may have been “added for a later member of his family” (e.g., a certain consul in Hadrian’s time).²⁰³⁵

Although the Via Sebaste ran as far as Perga, it probably did not extend to Attalia (Acts 14:25).²⁰³⁶ But any boats that came as far inland as the river harbor near Perga would not be the large ships more suited for travel to Syrian Antioch, and so Attalia was the correct port for their departure.²⁰³⁷ (Phaselis, with three harbors, was a significant city in this period and was just down the road,²⁰³⁸ but it probably was out of their way by land.) Attalia was a major port for trade between Syria or Egypt and the interior of Asia.²⁰³⁹ Although Luke may have given us only a summary of their itinerary, if the team began their ministry in Cyprus in early spring, they are undoubtedly returning to Syrian Antioch before winter makes travel more difficult.

In a work that emphasizes the continuity of ethnically mixed churches with Israel’s biblical heritage, Paul’s return to Syrian Antioch (14:26)²⁰⁴⁰ reinforces his connection with a center that, in turn, was birthed by the Jerusalem church (11:19–20).²⁰⁴¹ Each of the major “missionary journeys” begins in Antioch, and Paul returns to Antioch

Roman period saw larger walls and towers rebuilt over the older Hellenistic ones around the ancient harbor (Fant and Reddish, *Sites*, 169).

2029. Lake and Cadbury, *Commentary*, 168; Bruce, *Acts*¹, 286; Fant and Reddish, *Sites*, 166. Earlier modern Western sources call the town Adalia; many sources spell the river as “Catarractes.” For further information on Attalia, see Fant and Reddish, *Sites*, 166–72; Schnabel, *Mission*, 1091; on Attalia’s harbor, see Mitchell, *Anatolia*, 1:247.

2030. McRay, *Archaeology*, 240.

2031. Finegan, *Apostles*, 85.

2032. *Ibid.*

2033. From an earlier period, many Italian *negotiatores* had settled there, engaged in commerce (see Levick, *Roman Colonies*, 57, 99). Attalia achieved colonial status at some point (Mitchell, *Anatolia*, 1:77).

2034. Mitchell, *Anatolia*, 1:153, further noting, “The family probably also had interests in Lycaonia, south of Iconium.” This connection would simply illustrate the unity of the region, however, not any contacts for Paul (Luke does not report that he attracted many elite sympathizers there).

2035. Mitchell, “Archaeology,” 170.

2036. French, “Roads,” 52. Perga is 7–12 mi. northwest of Attalia (commentators’ counts vary; see comment on Acts 13:13). Wilson, “Route,” 482–83, argues plausibly that Paul took the central route back from Pisidian Antioch, through the Cestrus Valley, instead of the Via Sebaste, since 14:24 says that they passed through Pisidia, and by this point they might be more concerned with speed than with a paved road.

2037. See esp. Campbell, “Paul in Pamphylia.” As already noted at Acts 13:13, they probably traveled between Perga and Attalia on foot anyway.

2038. Fant and Reddish, *Sites*, 171 (noting a Roman period theater, two baths, and three later agoras; the city was founded in the seventh century B.C.E. and surely had an agora or agoras before or beneath the later ones).

2039. Finegan, *Apostles*, 84–85.

2040. It might be relevant that agents were to report back to the one who sent them (Talbert, *Acts*, 164, cites *Mek.* on Exod 12:1; *y. Hag.* 76d), although the principle in both cases seems straightforward, in any case.

2041. Cf. Alexander, “Mapping,” suggesting that early Christianity functioned as connected networks of local churches with Jerusalem as a symbolic center.

or even Jerusalem itself (Antioch in 14:26; 15:35; 18:22; Jerusalem in 9:26; 11:30; 12:25).²⁰⁴² On “commending,” see comment on Acts 14:23 (though the language differs); compare 15:40, where Antioch again commits (employing the same Greek verb) the new team of Paul and Silas to the Lord’s grace, or generous favor and empowerment.

Reporting God’s mighty works back to the Antioch church (14:27) fits Luke’s pattern of retelling divine deeds within the story (cf., e.g., Luke 9:10; 10:17).²⁰⁴³ Paul and Barnabas attribute these works to God (as in their testimony in Jerusalem, Acts 15:12). Gathering the church (14:27) presumably means by word of mouth, perhaps through sending word to leaders of house churches to contact their members. As suggested above, they may have completed the described journeys in less than a year; by contrast, given the distances covered, Ramsay suggests that the journeys of Acts 13–14 cover at least two and a half years.²⁰⁴⁴ In any case, they had been gone from Antioch for a significant period of time.

To “open” to someone is to welcome them (e.g., a new ruler, 2 Kgs 15:16 MT). The expression “open door” appears for promise of deliverance in Rev 3:8 and is a “characteristically Pauline”²⁰⁴⁵ expression for opportunities for ministry (1 Cor 16:9; 2 Cor 2:12; Col 4:3). But many ancients used “door” figuratively.²⁰⁴⁶ Doors could be employed figuratively for passages to wealth (Lucian *Tim.* 28), prayer,²⁰⁴⁷ or repentance.²⁰⁴⁸ They now remain for an unspecified amount of time (cf. Acts 9:23).

2042. Witherington, *Acts*, 560; Tannehill, *Acts*, 230; Porter, *Paul in Acts*, 173.

2043. On this subject, see Maloney, *Narration of Works*, 117–35. She finds no evidence of pre-Lukan tradition (126), but one wonders how much evidence would remain in any case; and whether or not Luke had specific tradition for this instance, we may at the least regard Luke’s report here as a reasonable historical inference. Travelers carried news to churches (cf. 1 Cor 1:11) and synagogues (see comments in Keener, *Acts*, 1:187–88; cf. also Willis, “Networking”), and Paul certainly had ties with the Antioch church (Gal 2:11; discussion at Acts 15). Cheung, “Acts 14:27–15:35,” argues for a literary unity in Acts 14:27–15:35, united by Paul’s mission reports (14:27; 15:3, 4, 12). Conzelmann, *Acts*, 112–13, suggests that one might expect a dative instead of μετ’ αὐτῶν but that the latter is attested in the LXX and papyri. The completed “work” in Acts 14:26 may refer back to 13:2 (Parsons, *Acts*, 185, suggesting an *inclusio*).

2044. Ramsay, *Pictures*, 134 (estimating their return, “at the earliest, in the autumn of A.D. 48”).

2045. Foakes-Jackson, *Acts*, 129; cf. also Parsons, *Acts*, 204 (adding also a connection with the image in Acts 14:22).

2046. BDAG cites as examples Max. Tyre 19.5d; Iambl. *Myst.* 10.5; see further Plut. *R. Col.* 3, *Mor.* 1108D; Lucian *Tim.* 28; Eunapius *Lives* 494; 1QM XI, 9; *Deut. Rab.* 2:12; *Lam. Rab.* 3:43–44, §9. Epictetus commonly applies it to the opportunity for death, especially suicide (*Diatr.* 1.9.20; 1.25.21; 2.1.19; 3.8.6; 3.13.14).

2047. *Deut. Rab.* 2:12; *Lam. Rab.* 3:43–44, §9.

2048. Again, *Deut. Rab.* 2:12; *Lam. Rab.* 3:43–44, §9.
