3. A theological seed was sown in a hearer that would later be reaped on the road to Damascus (9:4–8).

These effects confirm the wisdom of Gamaliel: if the movement was from God, attempts to suppress it would not ultimately stop it (5:39; cf. 28:31).

The theology of the passage is part of Luke's larger theme of persecution in the setting of proclamation. Stephen valued proclamation above survival (7:51–60), and God vindicated this approach by using the church's persecution to spread it (8:4). This paragraph emphasizes that Stephen's martyrdom "was only the beginning of what would be the fate of many Christians—to be persecuted for their witness to Christ."⁹ If this experience was still mostly foreign to much of Luke's potential audience in Achaia, it was not to his colleagues in Macedonia (1 Thess 1:6; 2:14; 3:3–4; Phil 1:28). Just as some Jewish people understood part of God's purpose for Israel in the Diaspora as a witness to the Gentiles (Tob 13:3, 5),¹⁰ Luke sees the dispersion here as propagating the church.¹¹

The basic events of this paragraph are surely historical.¹² Paul himself admits participation in violent persecution of the Christians, mentioning it fairly regularly in his letters (1 Cor 15:9; Gal 1:13; Phil 3:6; cf. 1 Tim 1:13). Paul treats it as a matter of ironic "boasting" in terms of zeal (Gal 1:13, 23; Phil 3:6) but a matter of shame in light of the truth (1 Cor 15:9).¹³ Thus even those who doubt the Sanhedrin's involvement in Acts 4:3 and 5:40 (and are skeptical of details such as a persecution that scattered everyone but the apostles here) usually concede Luke's perspective on Stephen and Paul.¹⁴

8. Compare how Paul later reaches Rome as a high-status prisoner and symbol of, hence spokesman for, the Nazarene movement rather than as a traveling artisan.

9. Combrink, *Analysis*, 22.

10. For later talmudic evidence, see further Bamberger, *Proselytism*, 156–58.

11. So even with martyrdom in the case of Stephen and in the famous rhetorical dictum of Tert. *Apol.* 50.13. Talbert, *Acts*, 67, also cites Tertullian and similar perspectives in *Diogn.* 7.7–8; Justin *Dial.* 110. The bonding function of suffering (e.g., Phil 1:7, 30; Rev 1:9; Philost. *Hrk.* 20.3) is not emphasized.

12. Haenchen, *Acts*, 298, complains that Saul was just a "youth" in Acts 7:58; but "youth" potentially extended up to forty (see Longenecker, *Acts*, 150) or at least to twenty-eight (see comment on Acts 7:58), and Paul's own writings suggest that he played no small role (Gal 1:13–14).

13. Cf. perhaps Eph 3:8; 1 Tim 1:13–16. See also Légasse, "Career," 380–84 (noting [383–84] that the language of Paul's letters often agrees with Acts even in wording on this point).

14. Sanders, *Jesus and Judaism*, 285.

Although Paul may have been a leader and primary organizer of persecution, he did not act alone; Paul also notes persecution by other Judeans that continued after his own involvement stopped (1 Thess 2:14–16; cf. 2 Cor 11:24, 26).¹⁵ Once some Christian teachings had been caricatured (or the more extreme Christian voices made to appear normative), extremists and political opportunists who viewed them as a threat could act against them; some Jewish ideals praised the execution of apostates (Num 25:7–8; 1 Macc 2:24, 44; 3 Macc 7:14–16).

b. The Great Persecution (8:1)

The “great persecution” (διωγμὸς μέγας) that came on the church may recall Stephen’s recent claim that his accusers’ predecessors “persecuted” (ἐδίωξαν) the prophets (Acts 7:52; cf. Luke 11:49); it also fulfills Jesus’s prediction (Luke 11:49; 21:12, διώξουσιν).¹⁶ It prepares the way for the next occurrence of a cognate term, describing Saul’s own activity (Acts 9:4–5; cf. 22:4, 7–8; 26:11, 14–15); Luke must introduce the idea here to explain the scattering of believers and their message (8:4; picked up in 11:19), which provides the backdrop for Philip’s mission (8:5).

Saul’s “approval” (8:1a) belongs with the preceding paragraph, continuing the thought of 7:58, as mentioned above.¹⁷ Saul’s “approval” of Stephen’s execution (8:1; 22:20)¹⁸ was no less culpable than that of those who stood in continuity with the prophets’ murderers in Luke 11:48 (the only other Lukan reference, to which Luke may allude by using this term; cf. Rom 1:32; 1 Clem. 35.6).¹⁹ Paul clearly did more than approve during the rest of the persecution, however, and he probably participated in Stephen’s death as more than simply an onlooker. He likely belonged to the synagogue faction that opposed Stephen (Acts 6:9; 9:11). Clothing was placed at his feet (7:58), possibly (though not certainly) suggesting his authority (4:35, 37; 5:1), and he quickly emerges as the movement’s leader (8:3).²⁰

c. Who Is Scattered? (8:1)

A major interpretive crux in this passage is what Luke means by “all” the Jerusalem church “except the apostles” (8:1). Few scholars take “all” literally, and most assume that the object of the persecution was the Hellenists.²¹ Luke tells us that the church had been divided (6:1), and the view that the Hellenists alone were persecuted is one common received opinion from F. C. Baur that has remained dominant today (despite rejection of the Tübingen hypothesis in most respects).²² As Marcel Simon puts it explicitly, “When Luke here speaks of the apostles, we are allowed to take it as meaning those following the line of the apostles, the apostolic

15. Most scholars acknowledge some conflict (e.g., Smith, *John*, 292). From Luke’s perspective, some leading aristocratic priests (Acts 22:4–5) are involved; I have argued earlier that this fits the portrait of their abuse of power in other early Jewish sources. The claim that the Pharisees joined (Mason, “Chief Priests,” 152) is not clear here (though probable in Acts 12:3).

16. Paul experiences this toward the beginning of his Gentile mission (Acts 13:50).

17. It must be addressed again here because a commentary must balance other considerations with textual arrangement, and 8:1b is inseparable from the following context.

18. Bruce, *Acts*¹, 180, is right to doubt that the term need imply official activity.

19. Contrast the positive usage for resisting Hellenism in 1 Macc 1:57; 2 Macc 11:24 or God’s failure to approve human sin (*Diogn.* 9.1).

20. Johnson, *Acts*, 141. Paul himself tells us that he advanced beyond his peers (Gal 1:14), which could allow for younger than usual leadership.

21. E.g., Koester, *Introduction*, 2:91; Dunn, *Baptism*, 67n47; Pesch, *Apostelgeschichte*, 1:265; Donaldson, *Paul and Gentiles*, 287; Hengel and Schwemer, *Between Damascus and Antioch*, 137, 403n711 (viewing Luke’s “all” as hyperbolic).

22. For summary, see Hill, *Hellenists*, 5–17 (who disagrees with the view).

group.”²³ It seems natural that the Hellenists would have targeted their fellow Hellenists who had caused them the trouble; certainly, they gave more trouble to Saul after his conversion (9:21) than to the Twelve. Supplemental support for this view might be that Paul claims to be unknown to the churches in Judea (Gal 1:22), which might make sense if he persecuted only the Hellenists who were scattered,²⁴ though one might make the same argument for anyone who was scattered.

But there are problems with this approach, although, in contrast with its most ardent critics, I do believe it likely that the Hellenists were probably a special (albeit not exclusive) target.²⁵ The largest problem is simply what Luke says; if only the Hellenists were scattered, saying “all the church” is an unusual way to specify this (especially if they remained a minority). This seems all the more problematic when we consider that Luke’s narrative focuses on the Hellenists. The second largest problem is that the view as generally formulated overemphasizes the theological difference between the Hebrews and the Hellenists in ways not explicit in the text, usually painting the former as loyal to the temple and the latter as disloyal.²⁶ Did Stephen actually oppose the temple in his Lukan speech, and if not, do we have reason to infer that Stephen historically did so in contrast to Luke’s portrayal?²⁷ And even if we conclude that this inference is reasonable, is it reasonable to further transfer what we infer from Stephen’s speech to all the Hellenists? Though Stephen’s opponents may have done so, they could have transferred it just as conveniently to all the disciples as to the Hellenists alone.

The text that is often used to support the Hellenists’ being particularly objectionable theologically specifies only the Hellenist named Stephen (Acts 6:11–14, which charges Luke counts false, in any case). Certainly Luke’s description of those scattered abroad fits Hellenists (Philip in 8:5–40; others in 11:19), but some others could have scattered in Judea (and probably Galilee) without warranting Luke’s attention.²⁸ Further, that some Christians in Jerusalem retained their property (12:12–13) need not suggest that they were allowed to stay because they were Hebrews. Barnabas was surely from the Diaspora (4:36), and because external evidence suggests his relation to John Mark’s family, which retained property in Jerusalem (12:12–13), this family might have also had Diaspora connections. Perhaps Mark’s mother retained property because of being converted later or perhaps Levitical connections or wealth protected her; but she was probably not allowed to remain simply by being a “Hebrew,” which we cannot be sure she was.

“All the church” is surely hyperbole, as often with Luke’s use of “all” (e.g., Luke 1:6; 2:1; 5:17; 6:17; 7:17; see esp. Acts 1:1 [contrast John 21:25]).²⁹ Not all Christians left, but large numbers did, and Luke specifies no single group. Certainly the Jerusalem church was increasingly nationalistic in Acts 11:3; 15:5 and especially

23. Simon, *Stephen and Hellenists*, 28.

24. Dunn, *Acts*, 105.

25. Hill, *Hellenists*, 19–40, argues against the Hellenist thesis here (why would they scatter in Judea and Samaria?), though he also rejects the persecution (while allowing tensions); cf. Hill, “Division,” 133–38; Skarsaune, *Shadow*, 153; Witherington, *Acts*, 244 (less emphatically).

26. See, e.g., critiques in Esler, *Community*, 140; Bruce, *Peter*, 58.

27. Certainly, Stephen’s enemies in the narrative portray him as opposing the temple, and its guardians may have so construed his words in the narrative; but that is not the best way to read them in light of the rest of Luke’s theology, with which he does not present Stephen as clearly disagreeing.

28. First-century Palestine accepted a degree of Hellenism (Meyers, “Challenge,” though warning that maximum hellenization comes only in the third century), while remaining quite Jewish (Freyne, *Galilee, Jesus*, 138), especially in matters not impinging on ideology (Goodman, *State*, 88, 175). A fairly hellenized Galilean town demanded that some refugees be circumcised (Freyne, *Galilee, Jesus*, 172–73, noting Jos. *Life* 112–13).

29. Cf. also Bauckham, “James,” 429. Cf. discussion at Acts 18:2; Luke’s hyperbolic “all” in Acts 19:10.

by 21:20–24, thus participating in the trends of Jerusalem culture in general in this period.³⁰ But this does not mean that most “Hebrews” remained behind here or that the persecution that transpired this early was limited to the Hellenists (though they were probably its most vulnerable targets, as a cultural minority).

These reservations need not deny that Hellenists may well have been the primary target (in view of 6:9–11; 9:29); further, it is, surely, especially the Hellenists who continued into the Diaspora (11:19). Yet Luke’s wording here suggests that some Hebrews may have been affected as well. Probably Christians were persecuted as Christians for a season (until 9:31), and Hellenists, most of whom needed to go to urban centers where Greek was spoken, went farther (in contrast to Philip; see 11:19–20) and hence were less apt to return later than Hebrews were. Most Hellenists left, probably some “Hebrews” left as well, but many remained and many of the “Hebrews,” scattered in Judea, returned (9:31). Paul claims that Judeans drove believers from Judea (1 Thess 2:14–15), and he claims that he persecuted God’s church (1 Cor 15:9; Gal 1:13).³¹

But why are the apostles explicitly excepted? Some scholars suggest that Saul avoids persecuting the apostles because of his teacher Gamaliel’s words in their favor in Acts 5:39;³² one could also claim respect for them as miracle-working holy men.³³ But ancients more often persecuted ringleaders *first*;³⁴ popularity was far more dangerous politically than obscurity.³⁵ More likely, the situation has simply changed since 5:39, and those wishing to persecute the church have gained the upper hand; large numbers of Christians fled, but the apostles remained and went “underground.” Luke does not claim that the apostles escaped persecution (cf. 4:3, 21; 5:18, 40; 12:2–4) but, rather, that they remained in Jerusalem. This contrasts with the next round of persecution (this one openly governmental), which forced some of the apostles out of Jerusalem (12:17) for a time (cf. 15:2, 4, 6, 22–23; 16:4).³⁶

Luke undoubtedly has reasons for emphasizing that the apostles remained (other than employing them to symbolize the entire “Hebrew” faction). Perhaps Luke wishes to emphasize that they did not leave their posts; they were still contending for the soul of Jerusalem, from which they would presumably rule (Luke 22:30; cf. 1:52). This could present the mother community as retaining (or seeking to retain) its sphere of authority over the believers spreading in the Diaspora;³⁷ certainly some leaders had to remain there for Jerusalem to remain the church’s center (even in Acts 12:17). Luke may record this information also to underline the apostles’ courage (a respected ancient virtue). Conversely, Luke may also wish to emphasize that the expansion beyond Judea was accomplished first not by the apostles (who caught on later, 8:25; cf. 10:28) but by the bicultural precursors of the Diaspora church.

30. Cf. Judge, “Scholastic Community,” 13.

31. See also Witherington, *Acts*, 244. Dollar, *Exploration*, 134, sees “all” as emphatic.

32. Arlandson, *Women*, 182.

33. Witherington, *Acts*, 278n330.

34. E.g., Dion. Hal. *Ant. rom.* 3.40.3; 5.43.2.

35. E.g., Corn. Nep. 1 (Miltiades), 7.5–6; 2 (Themistocles), 8.1–7; 3 (Aristides), 1.1–5; 7 (Alcibiades), 4.1–2; Babr. 4.6–8; 31.23–24; 64.10–11; Phaedrus 1.21.1–2; 2.7.14–15; 3.5.1; 4.6.11–13. Prominence could generate envy, hence enmity, as in Corn. Nep. 5 (Cimon), 3.1; 8 (Thrasylbulus), 4.1–2; 12 (Chabrias), 3.3; 14 (Datames), 5.2; 15 (Epaminondas), 7.1; 18 (Eumenes), 7.2; 10.2; 19 (Phocion), 4.3; 23 (Hannibal), 1.2; Hdn. 3.2.3; Plut. *Demosth.* 26.5.

36. See Bauckham, “James,” 429; Fitzmyer, *Acts*, 397. Luke 13:33 gives Luke a template for focusing on hostility in Jerusalem, though he does not invent it (Rom 15:31; 1 Thess 2:14–15).

37. Le Cornu, *Acts*, 384.

d. Economic Consequences (8:1)

The scattering would have had serious consequences for those who still held property in Jerusalem. Those who abandoned it may have lost it if anyone brought legal action against them and they failed to show up to answer the charges.³⁸ Confiscation of goods was a common penalty attending execution or other sentences of judgment.³⁹ Those condemned as criminals could also lose their property.

If the believers' enemies were satisfied with their flight, or if their identities were not matters of public knowledge to their enemies, presumably they could reclaim property on their return. Even some Judeans may have lost property at this time, increasing the Judean church's poverty (Acts 11:28–29; Rom 15:26–27). Hellenists who had already sold their property to meet the church's needs (Acts 2:44–45; 4:32) may have felt more freedom to disperse, though apparently some of these (4:37) also remained in (or soon returned to) Jerusalem (9:26–27) despite the risks.

e. Stephen's Burial and Mourning (8:2)

Proper burial is important even in Stephen's speech (7:16), but the primary literary allusion is probably to Jesus's burial.⁴⁰ As at Jesus's burial, there is mourning (Luke 23:27, 48); a good and righteous person secures the body (23:50–52) and burial follows (23:53–56). The courage of those who bury Stephen parallels that of Joseph of Arimathea in asking for Jesus's body (23:52).⁴¹ Helping a prisoner or otherwise identifying with a condemned person sometimes proved dangerous (see excursus)⁴² and certainly would have been for Joseph.⁴³ In addition to the parallel between pious people in both narratives burying an executed person, Luke might imply a contrast. These pious men (ἄνδρες) acted like Joseph and Jesus's *women* followers (23:55–24:1; cf. 23:27) but not like the Twelve during the passion narrative (though Luke is less explicit about the contrast than, e.g., Mark 14:50 or John 20:19). But Luke is not simply emphasizing the piety of (presumed) Hellenists at the expense of the Twelve. If Luke recalls here the failure of most of Jesus's male disciples after Jesus's execution, this recollection may also provide a fitting contrast for the Twelve now remaining in Jerusalem when others were fleeing (cf. Acts 8:1).

Who were the devout (εὐλαβεῖς) men who buried Stephen and mourned over him?⁴⁴ Some commentators think that they were pious Jews who did not belong to the Jesus movement, since disciples had fled (8:1).⁴⁵ This is possible; historically, most Jews insisted on proper burial (see the excursus below; esp. Tob 1:12–19; 2:1–8), and those who respected the Christians (Acts 5:13) may have even undertaken an honorable burial for Stephen with mourning (cf. Luke 23:27), especially if it was

38. Cf. the confiscation of property in Heb 10:34, though the Hellenist Christian audience of Hebrews was especially a formerly persecuted church in the Pauline (and perhaps Apollos's) sphere of ministry.

39. Tob 1:20; *Lysias Or.* 18.20, §151; 19.1, §152; 29.9, §182; *Cic. Fam.* 14.4.4; *Quinct.* 15.50–51; *Phil.* 11.6.15; *Rosc. Amer.* 2.6; *Sall. Catil.* 51.43; 52.14; *CPJ* 2:251–52, §445; 2:255–57, §448; *BGU* 5.16.51–5.17.52; *P.Oxy.* 513; *Dion. Hal. Ant. rom.* 4.5.3; 4.15.6; *Appian Bell. civ.* 4.5.31; *Corn. Nep.* 7 (Alcibiades), 4.5 (cf. 6.5); 8 (Thrasylbulus), 1.5; 3.1; 10 (Dion), 7.1; *Dio Chrys. Or.* 5.4.4; *Plut. Sulla* 31.4; *Cic.* 33.1; *Pliny Ep.* 7.19.6; *Tac. Hist.* 2.84; *Suet. Jul.* 14; 17; 82.4; *Max. Tyre* 12.10; *Hdn.* 7.3.2; *Jos. Life* 370–71; *Heb* 10:34. Unofficially, cf. *Jos. Life* 370. This, naturally, applied to the goods of those who fled; cf., e.g., *Corn. Nep.* 23 (Hannibal), 7.7.

40. With Johnson, *Acts*, 141; Lake and Cadbury, *Commentary*, 87.

41. Luke, unlike Matthew and John (which are likely independent), does not explicitly identify Joseph as a disciple. Some thus read Acts 13:29 as applying to Sanhedrists who were not disciples, but see comments there.

42. See Rapske, *Custody*, 388–90.

43. See Keener, *Matthew*, 691, 694; *idem, John*, 1159–60.

44. Having "devout" mourners was important; as an extreme example, in Amoraic haggadah, Jacob insisted that no Gentiles carry his bier lest God's presence depart (*Gen. Rab.* 100:2).

45. Haenchen, *Acts*, 294; Dunn, *Acts*, 106; Witherington, *Acts*, 277.

believed that matters had gotten out of hand at Stephen's hearing and led to a lynching. Luke can apply the title εὐλαβεῖς to religious Jews who were not disciples (Acts 2:5),⁴⁶ and this would not be the only place where he would cite the approval of the people of Jerusalem (2:47). But Luke also uses the term for law-abiding worshipers of Jesus, whether before the passion (Luke 2:25) or afterward (Acts 22:12). Further, he clearly does not literally believe that only the Twelve remained (9:26–27), and the parallel with Joseph of Arimathea, on the one hand, and possibly with the young men who buried the transgressors in 5:6, 10, on the other, might suggest that believers are in view here.⁴⁷

In any case, the proposal that the apostles may not have helped because they disapproved of Stephen's activity (for the reason that he acted rashly in denouncing the temple)⁴⁸ is unlikely. Granted, they seem conspicuously absent at Jesus's burial (Luke 23:50–56)⁴⁹ and fail to pioneer the Samaritan or Gentile missions here (Acts 8:5–13, 26–40). But their first failure was before the resurrection and Pentecost; since then they have acted boldly (4:13; 5:20–21, 28–32, 41). Likewise, they do not specifically disdain Stephen's universal theology; although they do not pioneer the mission to the Samaritans, they quickly approve it (8:14–15) and join in it (8:25). Further, they did not participate in, but did approve, the burial of Ananias and Sapphira (without honor as it may have been; 5:6, 9–10). It was probably more dangerous for the apostles to emerge from hiding than for others (see comment on Acts 8:1).

Some scholars argue that the buriers' mourning for Stephen suggests that behind Luke's court scene lies only a lynching or a court scene that gave way to a lynching without legal approval.⁵⁰ Jewish tradition, at least as we know it from a later period, did not permit open mourning for those executed by approval of a Jewish court (see excursus below). Yet even had the Sanhedrin approved the act (which could at the least be *attributed* to a lynching), it might not have forbidden mourning; unduly severe repression risked a popular backlash and Pilate's consequent intervention. Luke may also report the involvement of these "devout" men to point out their courage in the face of potential danger (see the excursus below).

Excursus: Burial and Mourning Practices and Stephen's Death

1. Varied Burial Customs

Burial customs differed from one culture to another, though Mediterranean cultures shared much in common. Some ancient writers were aware of a diversity of customs among different peoples, even claiming that some peoples deliberately fed corpses to dogs or fish (Sext. Emp. *Pyr.* 3.226–28). Scythians were thought to let bodies rot (Sil. It. 13.486–87). Lucian summarizes, "The Greek burns, the Persian buries, the

46. Cf. also some who argue this case for Joseph of Arimathea.

47. Bruce, *Acts*¹, 181. Munck, *Acts*, 70, provides evidence for both views.

48. Dunn, *Acts*, 106.

49. Though less explicitly so than in Mark (where it contrasts with Mark 6:29); the argument is not entirely from silence, however, resting on contrasts with participants.

50. Lake and Cadbury, *Commentary*, 87; Haenchen, *Acts*, 293–94; Hare, *Persecution*, 23; cf. Jervell, *Apostelgeschichte*, 255.

Indian encases in glass, the Scythian eats, the Egyptian salts.”⁵¹ Philosophers often opined that what happened to the body after death was inconsequential.⁵² Most peoples in the ancient Mediterranean world, however, did insist on burial, whether of the corpse or of its ashes.

Some cremated the dead; the Germans were among those who followed this practice (Tac. *Germ.* 27). Earlier Greeks and others had long burned war heroes and other honorable persons.⁵³ Cremation remained the Roman custom from earlier times well into the second century C.E.⁵⁴ That Jews and Egyptians buried rather than burned corpses was distinctive enough to invite note (Tac. *Hist.* 5.5). Romans allegedly began cremating the dead when they learned that their war dead abroad had been dug up (Pliny E. *N.H.* 7.54.187). Romans widely employed cremation in this period; the Greek East, however, by this period mostly practiced inhumation.⁵⁵ (By 200 C.E., the Eastern custom, which Jews and Christians followed, had prevailed even in the West.)⁵⁶ In Roman ideology, cremation apparently released the soul to the heavens for a blissful afterlife.⁵⁷ Even the Romans, however, apparently accepted burial as incomplete until the cremated ashes were buried beneath earth.⁵⁸

2. Location of and Responsibility for Burials

Greeks by this period had long buried outside cities;⁵⁹ most commonly, plots of graves lined the roads near cities (making them accessible for memorials and sometimes for advertising a family’s status).⁶⁰

Those anticipating death did not leave to just anyone this task of supreme importance. Most often a son was responsible for burying his father.⁶¹ Disciples might well bury a teacher without sons.⁶² Usually the trust was merited, but sometimes it was misplaced; for example, Brutus’s freedman, entrusted with responsibility for burying him properly, allegedly stole his cloak (Val. Max. 5.1.11).

51. Lucian *Fun.* 21 (LCL, 4:127); Hdt. 3.24 attributes to Ethiopians the statement about glass, and this is also one of the burial methods attributed to them in Strabo 17.2.3.

52. E.g., Sen. Y. *Ep. Lucil.* 92.35; see the reported instructions for Diogenes’s corpse in Diog. Laert. 6.2.79; for Socrates’s in Socratics *Ep.* 14; for Menippus the Cynic, Lucian *Dial. D.* 375 (20/10, Charon and Hermes 12–13).

53. E.g., Hom. *Il.* 7.332–35, 409–10; 23.192–225; *Od.* 11.74; Soph. *El.* 757; Thucyd. 6.71.1; Philost. *Hrk.* 31.9; 1 Sam 31:12.

54. E.g., Varro *L.L.* 5.4.23; Terence *Andr.* 129–30; Tac. *Hist.* 2.45; Suet. *Jul.* 84.3; *Aug.* 100.3; Hdn. 3.15.7; Christ, “Consuming Bodies.” On inadvertently incomplete cremations, see Noy, “Half Burnt.” Pythagoras disallowed cremation because of the divinity of fire (Iambl. *V.P.* 28.154). The change apparently stemmed from fashion, not religion (see Nock, *Essays*, 277–307, esp. 306–7).

55. Morris, “Dead”; on Romans, also Kierdorf, “Burial,” 832–33. Sometimes Romans were cremated even in the Greek East (e.g., Hershkovitz, “Cremation”).

56. Klauck, *Context*, 73. For example, we lack evidence for cremation in Greek-period Corinth; but 43 percent of the Roman-period burials are cremations, and it ceased in the mid-second century C.E. (Thomas, “Dead,” 286). On the ancient Christian preference for burial, see also Jones, “Cremation,” 337–38.

57. Thomas, “Dead,” 288, 291, refusing to limit astral immortality to emperors (but was it for everyone?).

58. Dubourdieu, “Dead, Cult of,” 115, citing Cic. *Leg.* 2.56.

59. Burials were outside city walls (4 *Bar.* 7:13; Wilkinson, *Jerusalem*, 146).

60. See Morris, “Cemeteries”; Stambaugh, *City*, 194. For executions outside cities, see comment on Acts 7:58.

61. Tob 4:3–4; 6:15; 4 Macc 16:11; Demosth. *Aristog.* 54; Quint. *Decl.* 302 intro; 302.4. For sons as pallbearers, see Vell. Paterc. 1.11.7.

62. Mark 6:29 (cf. Luke 23:50–53); Iambl. *V.P.* 30.184; 35.252; Diog. Laert. 6.2.78. Likewise, freedmen might do so (Philost. *Vit. soph.* 2.1.565).

3. Burial Preparation

Jewish burial preparation normally included anointing and washing the corpse (*m. Šabb.* 23:5), then wrapping it in shrouds.⁶³ Judeans borrowed pagan models for sarcophagi and coffins but, unlike pagans, used only “geometric and occasional floral designs” to decorate them.⁶⁴ In this period they used ossuaries, boxes for bones fitted into slots in the walls.⁶⁵ Historically, we may presume that Stephen would have been buried in one of these.⁶⁶ Because ossuaries were not used in the Diaspora, Luke’s readers probably would not have visualized Stephen’s burial in this way; in the Diaspora, Jews used “underground tombs, or catacombs, depositing bodies in niches, sarcophagi and coffins.”⁶⁷ But if some of Stephen’s mourners belonged to the synagogue of *libertini* (Acts 6:9), and if, as is quite likely, the *libertini* were Roman citizens (see comment on Acts 6:9), their ancestors may have been familiar with analogous (albeit not identical) customs abroad.⁶⁸

Greek funerals included first the *πρόθεσις* (laying out the body), then the *ἐκφορά* (carrying the body to the tomb), and then either burial or cremation; afterward Greeks ate a funeral banquet.⁶⁹ We do not know the specific cultural background of the devout men who buried Stephen except that they must have been Jewish. If they were Hellenists, there may have been some Hellenistic influence, though we cannot be sure how much.⁷⁰

4. Honorable Burials

Honorable burials could demand great expense, and most ancients deemed the most honorable people worthy of the most lavish funerals.⁷¹ Naturally, philosophers

63. See Safrai, “Home,” 776–77 (citing, e.g., *m. Kil.* 9:4; *Ma’as. Š.* 5:12; *t. Ned.* 2:7; *Nid.* 9:17). Those caring for the corpse would also close its eyes as well as close all orifices to deter swelling (*m. Šabb.* 23:5; *Sem.* 1, esp. 1:4; Safrai, “Home,” 773). More fully on funerals, see Safrai, “Home,” 773–87.

64. McCane, “Burial Practices,” 174.

65. Cf. *m. Sanh.* 6:6; *m. Pesah.* 8:8; *Mo’ed Qat.* 1:5; Meyers and Strange, *Archaeology*, 28. Later rabbis still recalled the earlier custom (*y. Mo’ed Qat.* 1:5, §§4–5). It is primarily first century c.e. (Hachlili, “Necropolis,” 239; idem, “Architecture,” 127; Hachlili and Killebrew, “Customs,” suggest a window perhaps as narrow as 10–70 c.e.). It is rare outside the Herodian and (irrelevant here) Chalcolithic periods (Silberman, “Ossuary”; Carmon, *Inscriptions*, 121); a major change occurred after the fall of Jerusalem (Goodenough, *Symbols*, 1:84–89; Safrai, “Home,” 780). But some evidence may suggest a less significant use for more than a century later (Goodenough, *Symbols*, 1:114; cf. Rahmani, “Customs”; idem, “Remarks”). For a possible contrast between ossuaries and Christian reliquaries, see McCane, “Bones”; for a broader sweep of archaeological data on Jewish burial customs, cf. Puech, “Nécropoles”; Goodenough, *Symbols*, 12:22–39.

66. Most Diaspora immigrants who settled in Jerusalem would have known local customs, and Luke does not specify the background of Stephen’s “devout” mourners, in any case.

67. McCane, “Burial Practices,” 174.

68. Palestinian Judaism in the Hasmonean period may have already borrowed the custom of ossuaries from Roman secondary burial (of ashes in urns or boxes; Levine, *Hellenism*, 67; McCane, “Burial Practices,” 174). For Jewish loculi in Rome, cf. Leon, *Jews of Rome*, 59.

69. Smith, *Symposium*, 40 (following partly Garland, *Greek Way of Death*, 21–37). On Roman funerals, see, e.g., Shelton, *Romans*, 94–96.

70. Cf. possibly Lebram, “Literarische Form” (if the suggestions stand). Levison, “Character,” compares Roman characteristics of David’s mourning in Josephus (*Ant.* 7.1–7, 39–45, 154–56, 250–57); undoubtedly these reflect Josephus’s audience, but perhaps we should also allow for adaptations in Jewish practice of his day.

71. See Cic. *Fam.* 4.12.3; Suet. *Aug.* 100.2–4; Statius *Silv.* 2.1.157–62; Ps.-Callisth. *Alex.* 1.24; Apul. *Metam.* 2.27; Philost. *Hrk.* 51.13; cf. Apul. *Metam.* 9.30; the rich in Polyb. 6.53; Dion. Hal. *Ant. rom.* 6.96.1; Hdn 4.2.2; 1 Macc 2:70; Jos. *Ant.* 9.166; 13.406; *Mart. Poly.* 17; a hero’s burial in the forum in Quint. *Decl.* 329 intro. It was counted a final way of showing love (e.g., Apoll. K. *Tyre* 26). For some Jewish ways of showing honor at burial, see, e.g., Tob 4:17; Jos. *Ant.* 9.166; *Gen. Rab.* 96:5. For funerals of the wealthy being “designed to impress” the populace, see Lintott, *Romans*, 153.

demurred;⁷² Josephus likewise claimed that although the law provided for burial of the dead, it did not demand expensive funerals or monuments (*Ag. Ap.* 2.205). States also provided special honors to those killed in war, because such rites offered an example for subsequent heroism.⁷³ A martyr's honorary burial could propagate the martyr's example, though clearly most disciples did not wish to share Stephen's fate if they could avoid it (*Acts* 8:1; 25:11).

Tombs were normally held inviolable.⁷⁴ Romans were concerned even about moving ancestral tombs, though they recognized that cultures varied on these matters.⁷⁵ Philosophers, however, argued that magnificent tombs proved worthless to the deceased (*Lucian Men.* 17). One philosopher, for example, insisted that dogs and birds be allowed to consume his corpse after death so that he could benefit something living (*Lucian Dem.* 66); the Athenians nevertheless lavished an honorable burial on him (*Dem.* 67).

5. Necessity of Burial

To be left unburied was thought to be horrible, whether for Jews⁷⁶ or for Gentiles,⁷⁷ and was to be avoided by whatever steps were necessary.⁷⁸ Burying one's own dead was among the most sacred of military obligations.⁷⁹ Consumption by birds or dogs was a terrifying fate;⁸⁰ unburied corpses were also thought susceptible to abuse by witches (*Lucan C.W.* 6.626). Many considered lack of burial worse than death itself (see, e.g., Euripides *Suppliants*). Thus Greeks told stories of ghosts beseeching burial of their corpses,⁸¹ without burial it was thought that they could not enter Hades.⁸² Roman households provided burial for their slaves,⁸³ and Rome allowed some associations so that the poor could be assured of decent burial after death.⁸⁴

72. E.g., Philodemus *Death* 30.7–17; 30.36–31.2; 31.5–9; *Iambl. V.P.* 27.122–23.

73. E.g., Xen. *Anab.* 4.2.23; *Lysias Or.* 2.66, §196.

74. E.g., *Diod. Sic.* 17.17.3; *Dion. Hal. Ant. rom.* 8.24.6; 11.10.1; *Quint. Decl.* 299 intro; *Appian Hist. rom.* 8.12.89; *Callim. Aetia* 3.64; *Dio Chrys. Or.* 12.10; *Philost. Vit. Apoll.* 1.24; *Hrk.* 53.23; *Jos. Ag. Ap.* 2.58. See further comment on *Acts* 2:29.

75. *Pliny Ep.* 10.68–69.

76. E.g., *Jub.* 23:23; *Jos. War* 5.514; *Eccl. Rab.* 3:2, §2. The unthinkable case of Lazarus, whose destitution may have prevented burial despite Jewish custom (*Luke* 16:22), reveals a different view.

77. E.g., *Philost. Hrk.* 19.7; 21.6. Philosophers, of course, disagreed (*Epict. Diatr.* 4.7.31; *Socratic Ep.* 14).

78. E.g., *Diod. Sic.* 15.35.1.

79. *Quint. Curt.* 5.4.3; notable when impossible (e.g., *Tac. Ann.* 4.73). It is said that when their army proved negligent in burying their dead, the Athenians executed the generals (*Libanius Anecdote* 2.20).

80. E.g., *Hom. Il.* 22.42–43, 71–76, 335–39, 353; 23:21; 24:211, 411; *Od.* 21.363–64; 22.476; *Aeschylus Suppl.* 751–52, 801–2; *Soph. Antig.* 697; *Eurip. Phoen.* 1650; *Virg. Aen.* 9.485; *Lucan C.W.* 7.825–35; *Proclus Poet.* 6, Bk. 1, K152.2–4; 2 *Sam* 21:10; *Jos. Ant.* 6.187; 8.270, 289, 361, 407, 417; 9.124; 15.289; *War* 4.324; 5.526; 6.367; cf. also being eaten by fish (e.g., *Libanius Comparison* 4.14; see further comment at *Acts* 27:20). The fate was apparently common in war (*Philodemus Death* 33.21–22, dismissing its importance).

81. *Hom. Il.* 23.65–71; *Od.* 11.71–76; *Eurip. Hec.* 47–50.

82. *Hom. Il.* 23.71; *Virg. Aen.* 6.365–66; *Char. Chaer.* 4.1.3; cf. earlier Babylonian fears in Carpenter, "Deuteronomy," 492. Some other traditional societies fear vengeance from the spirits of those improperly buried (*Mbiti, Religions*, 109).

83. *Buckland, Slavery*, 74 (noting that "memorials to slaves are among the commonest surviving inscriptions").

84. E.g., *ILS* 7360a (from Rome); *Horsley, Documents*, 2:49–50, §14.2; *Cary and Haarhoff, Life*, 151–52; *Stambaugh and Balch, Environment*, 125. More recent studies suggest, however, "that this was a secondary function of associations" in this period (*Pearson, "Associations,"* 136); cf. *Rives, Religion*, 125, allowing both burial societies and other associations that included concern for members' deaths. The rich had extravagant burials (as noted above), whereas those of the poor were less adequate (*Libanius Invect.* 6.15) or worse (cf. *Luke* 16:22).

A number of stories could illustrate the importance of burial, but one example of its importance in Judaism is the account (in various versions) of Moses's burial. The Lord himself buried him⁸⁵ in a place that no one knew (Deut 34:6).⁸⁶ Some traditions eventually argued that the burial place God provided him was lavish, with precious stones and pearls;⁸⁷ some added that God also buried Aaron's body;⁸⁸ and some spoke of an argument between Michael and the devil over Moses's body (Jude 9). What is significant here is that although Moses could not enter the promised land, God showed his favor toward Moses by seeing to his burial. This underlines the importance of burial.

6. Refusal of Burial

Sometimes, however, people refused to allow their enemies burial, whether they were personal enemies⁸⁹ or those slain in battle.⁹⁰ One lurid report says that only after heads had rotted until unrecognizable were family members allowed to gather what relics they recognized (Lucan *C.W.* 2.166–68).⁹¹ Those with absolute power were apt to exercise it: when someone pleaded for a burial, Octavian answered mercifully, “The birds will soon settle that question.”⁹² Tiberius had his grandsons killed and their remains scattered (Suet. *Tib.* 54.2); he had others executed, then hurled into the Tiber (61.4), and yet others hurled into the sea (62.2). The wicked, Dio Chrysostom opines, lacked any right to burial (*Or.* 31.28), and he notes the custom denying it to traitors (31.85).

Normally lack of burial was deemed appropriate only for the most heinous sort of crime.⁹³ Greeks may have left murderers unburied (Sen. *E. Controv.* 8.4.intro.), and classical Athenians forbade burial in Attica of anyone banished for treason.⁹⁴ In one incident during the republic, the Romans were so angry that they reportedly had more than four thousand scourged, executed, and then left in the open to be eaten by animals (Dion. Hal. *Ant. rom.* 20.16.2).⁹⁵ Those executed in Rome's state prison

85. Hebrew *qal* third masculine singular, *pace* the more ambiguous translation in the NRSV; cf. *b. Soṭah* 13b (the wings of the Shekinah carried Moses). Later rabbis claimed that God took Moses directly because he had successfully repelled Gabriel and Samael (*Deut. Rab.* 11:10), probably transferring to Moses a story line used of Abraham in *Testament of Abraham*. Suiting his views about mediation of powers, Philo attributes the burial directly to angels (*Mos.* 2.291).

86. That no one knew the place is reiterated in *L.A.B.* 19:12; *Philo Sacr.* 9–10; that it was in Gad is suggested in *b. Soṭah* 13b. God's interest in funerary arrangements also applies to Adam in *Apoc. Mos.* 40:1–2.

87. *Tg. Neof.* 1 on Deut 33:21.

88. *Sipre Deut.* 305.3.2 (not specified in Num 20:28; Deut 10:6).

89. E.g., Soph. *Ajax* 1130–41; Quint. Curt. 7.2.32; Appian *Hist. rom.* 12.16.107; Philost. *Hrk.* 19.6–7. Cf. the advice to forbid funeral rites in Quint. Curt. 8.2.12.

90. Hom. *Il.* 17.126–27, 255, 272; Diod. Sic. 16.16.4. Achilles's anger toward Hector's corpse (Hom. *Il.* 22.395–405; 24.14–18, 21–22) was long remembered (Libanius *Speech in Character* 3.6; *Invect.* 1.19; 2.17; *Encomium* 3.20).

91. Disfiguring a corpse provided a posthumous addition to vengeance (e.g., Apollod. *Bib.* 2.8.1).

92. Suet. *Aug.* 13.2 (LCL, 1:139). An early king crucified the corpses of his enemies and let the birds consume them (Pliny *E. N.H.* 36.24.107); one punishment in Homer was the feeding of someone's raw genitals to the dogs (Hom. *Od.* 18.87).

93. Cf. Lysias *Or.* 19.7, §152; *Vit. Aes.* 132; Char. *Chaer.* 1.5.25.

94. Thucyd. 1.138.6. Cf. later rabbis insisting on “stoning” one who died under the ban (*m. Ed.* 5:6).

95. Cf. also Tiberius Gracchus (Val. Max. 1.4.2); some mutinied soldiers (Appian *Hist. rom.* 3.9.3); those who fled in battle (Dion. Hal. *Ant. rom.* 6.9.4); some disobedient soldiers (Val. Max. 2.7.15–16); a tyrant (Sen. *E. Controv.* 1.7.2; hypothetical; for tyrants' corpses being cast outside the city, see Quint. *Decl.* 274 intro; 274.7; cf. *Decl.* 329 intro); assassinated emperors (Hdn. 8.8.7); parricides (Quint. *Decl.* 299 intro; 299.4, 6); perhaps an adulterer (Quint. *Decl.* 379 intro, though the husband's act here does not preclude subsequent

were normally hurled onto the steps that led to the Capitoline, “then dragged to the Forum with large hooks and thrown into the Tiber river.”⁹⁶ Normally Romans let crucifixion victims rot on their crosses.⁹⁷ Sometimes God also executed judgment in this manner,⁹⁸ though the law forbade Israelites to do so (Deut 21:23; Jos. *Ant.* 4.264–65).

Apart from exceptional crimes of state, it was considered wicked to withhold a body from burial.⁹⁹ Letting his enemies’ corpses rot was attributed to Caesar’s impiety (Lucan *C.W.* 7.809–11). The Carthaginians refused to hand over the corpses of executed captives (Polyb. 1.81.2–3). Cicero alleged that wicked Verres charged parents money for the right to bury their children (*Verr.* 2.1.3.7). Withholding burial even for a wicked person could be considered impious (Appian *Hist. rom.* 12.9.60). Even more impious was a decree to kill anyone who was caught offering burial to those refused it (Philost. *Hrk.* 33.32). This scenario appears in a widely recounted story of antiquity. When the warrior Polynices was dying, he begged his mother and his sister to arrange his burial (Eurip. *Phoen.* 1447–50), but the Theban ruler Creon forbade the burial (*Phoen.* 1627–30) and even mourning (*Phoen.* 1631–34), wishing him to be eaten by dogs (*Phoen.* 1650). So impious was the action¹⁰⁰ that the Argives won Athens’s help in warring against Thebes to recover the bodies (Eurip. *Suppl. passim*).

Conversely, it was considered pious or honorable for a person with authority to grant burial to enemies.¹⁰¹ Normally one granted burial to one’s enemies in war.¹⁰² Roman law officially approved handing over bodies of the executed to relatives or others, with exceptions for some offenses.¹⁰³ Often burial was uninvited but overlooked; many abused Galba’s corpse until a former slave, without facing retribution, provided it a humble burial (Tac. *Hist.* 1.49). Some who would have cast out bodies unburied were restrained by fear of retribution (Suet. *Jul.* 82.4).

Jews did not believe in withholding burial for any circumstances (including the harshest conceivable condemnation of Stephen here); it contradicted their

burial); two evil people (*Apoll. K. Tyre* 50; novelistic, here with biblicalizing language); objects of mob retribution in Iambl. *V.P.* 35.252; or the Christian bishop Polycarp (*Mart. Pol.* 17.2).

96. Rapske, *Custody*, 14 (citing Ovid *Ars* 271–82; Pliny *E. N.H.* 8.145; Dio Cass. 58.1.3; 58.11.3–4; 59.18.3; 60.16.1; 61.35.4; Val. Max. 6.9.13). Those killed in other ways, e.g., Vitellius, could also be dragged and hurled into the Tiber (Suet. *Vit.* 17.2); earlier, see Vell. Patern. 2.6.7. For the exposure of corpses on the “stairs of wailing,” see Barry, “Exposure”; Cadoux, “*Carcer*.”

97. E.g., Petron. *Sat.* 112. Jesus’s case, in Judea, would have been different: Judean custom demanded the burial of the dead (see Deut 21:23; Jos. *War* 4.317; Safrai, “Home,” 774; cf. *m. Sanh.* 6:5; *t. Sanh.* 9:8; Daube, *New Testament and Judaism*, 311; idem, “Gospel and Rabbis,” 342), and Pilate would hardly capitulate to Jerusalem’s elite regarding Jesus’s execution and then antagonize them regarding his burial, which Roman officials sometimes granted anyway (e.g., Philo *Flacc.* 83–84; see Keener, *Matthew*, 693; Brown, *Death*, 1207–9).

98. 1 Kgs 14:13; 2 Kgs 9:10, 34–35; Ps 79:3; Isa 14:20; Jer 14:16; 19:11; 22:19; 1 En. 98:13; 2 Macc 13:7–8; *Sib. Or.* 3.643.

99. E.g., 2 Macc 4:49; Soph. *Ajax* 1326–69; Val. Max. 5.3.ext. 3c; Libanius *Topics* 4.15. Cf. the fate of some falsely accused and condemned (Diod. Sic. 18.67.6); an excessively harsh father who refused his daughter burial (Dion. Hal. *Ant. rom.* 3.21.8). It was also wicked to remove a tomb, especially of a godly person (Callim. *Aetia* 3.64; see comment on Acts 2:29).

100. By refusing to hand over the bodies, they were defying the laws of the gods (Eurip. *Suppl.* 19). Cf. also the observations in Gordon, *Civilizations*, 268.

101. E.g., Hom. *Il.* 7.79, 84, 409–10; Ps.-Callisth. *Alex.* 1.14, 41; Val. Max. 5.1.11; 5.1.ext. 6. Cf. Solon’s prohibition of speaking ill of the dead (Plut. *Solon* 21.1); reverence for the dead was deemed virtuous (Men. *Rhet.* 1.3, 361.17–22; 363.15–17).

102. E.g., Livy 38.2.14; also Hannibal’s behavior (though selective) in Sil. It. 10.518–20; 12.473–78; cf. Paus. 1.32.5. Burial of one’s own dead and of allies was, of course, a duty (Xen. *Cyr.* 5.4.21; Diod. Sic. 20.84.3).

103. See thoroughly Brown, *Death*, 1207–8; also the data in Evans, *World*, 129–30. The tension between the codified emphasis on some laws (Ulpian and Paulus in *Dig.* 48.24) and the divergent earlier practice might, however, stem partly from Christian (hence ultimately Jewish) influence in later sources.

law (Deut 21:23; Jos. *Ant.* 4.265; Ag. *Ap.* 2.211).¹⁰⁴ They could, however, offer burials without honor for those felt to be dishonorable (2 Chr 24:25; Jos. *Ant.* 9.104; *b. Sanh.* 47b). Although Scripture reports only Achan's burning and stoning (Josh 7:25) and a sort of burial beneath stones, Josephus uses his night burial as an example of the ignominious burial appropriate for the wicked (*Ant.* 5.44); he also interprets the requirement for the burial of the wicked in Deut 21:23 as a dishonorable burial (Jos. *Ant.* 4.202). Later Jewish texts develop the theme of dishonorable burials; the corpses of those executed according to God's law should spend a year in a common burial plot, though clearly identified so that they could be reburied in a family tomb a year later (*m. Sanh.* 6:5–7).¹⁰⁵ That these devout men give Stephen an honorable burial with public mourning (on mourning, see comment below) is significant.

7. Mourning

For both Jews and Gentiles, mourning was normally of paramount importance.¹⁰⁶ Nevertheless, mourning customs differed from one place to another no less than burial customs themselves,¹⁰⁷ though some elements were widespread among Mediterranean cultures. Ancients wrote letters and poems of consolation, though speeches may be more relevant here, if any didactic element is.¹⁰⁸ Ancient sources associate a special form of encomiastic funeral oration especially with classical Athens,¹⁰⁹ but other ancients also provided eulogies,¹¹⁰ including Jews.¹¹¹ Romans had funeral orations;¹¹² likewise, a Roman orator could write something to honor a deceased person (Pliny *Ep.* 3.10); a rich father could have memoirs of his son publicly read (4.7.2). Such speeches continued well beyond the period treated here.¹¹³

We cannot say whether mourning at Stephen's death would have included any eulogizing outside of prayers, but if it did, it undoubtedly included praise of his

104. Although changing hanging after death to hanging until death, 11QT LXIV, 7–13a (=4Q254 14 2–4) remains insistent that the corpse should be buried rather than left hanging overnight (Evans, *World*, 120).

105. See discussion in Brown, *Death*, 1209–11; cf. Daube, "Gospel and Rabbis," 342; Bammel, "Trial," 444; Stauffer, *Jesus and Story*, 209. For reburial, see comment on ossuaries, above, on Acts 7:15–16. Tannaim insisted on burying even Gentiles (Crane, "Burying").

106. E.g., *Gen. Rab.* 100:4, 7; *Virg. Aen.* 11.148–50.

107. As ancients recognized, e.g., *Suet. Jul.* 84.5.

108. For mourning poems, see, e.g., *Catullus* 96.1–6; *Stattius Silvae* 2.1; 2.6; 3.3; 5.1 (though one for his own father has greater feeling, 5.3); for letters, see, e.g., *Cic. Att.* 13.20; *Fam.* 4.5; 5.16; *Sen. Y. Dial.* 1.4.5; 6; 11; 12; *Ep. Lucil.* 99.1; *Plut. Consol., Mor.* 608B–612B; *Apoll.*, 101F–122A; cf. *Dio Chrys. Or.* 30. On consolations as a genre, see Kierdorf, "Consolatio."

109. *Men. Rhet.* 2.11, 418.6–9; *Philost. Hrk.* 35.13; cf., e.g., *Thucyd.* 2.43.3; 2.44.1–4. See more fully *Men. Rhet.* 2.11, 418.5–422.4 (on the ultimate dominance of the encomiastic element, 418.14–32); *Loraux, Funeral Oration*; cf. *Dion. Hal. Epid.* 6 (§§277–83). For a brief description, see *Dobson and Hornblower, "Epitaphios."*

110. On eulogistic dirges, *Favez, Williams, and Scheid, "Nenia."* On the consolatory speech, see *Men. Rhet.* 2.9, 413.5–414.30; on the encomium for the deceased, see *Theon Progymn.* 9.4–5. Cf. the related Greek form *epicedion* (Russell, "Epicedion"). Funeral orations were one of the three main forms of epideictic rhetoric (*Aune, Dictionary of Rhetoric*, 145); *Dio Chrys. Or.* 29.2 emphasizes that the eulogy may be brief but should be from the heart.

111. At least hellenized ones and in a later period, e.g., *b. Šabb.* 153a; *Stern, Parables in Midrash*, 124. Some suggest that Athenian funeral-oration practice affected Hellenistic Jewish practice (*Lebram, "Literarische Form,"* on elements of eulogy in 4 Macc 3:19–18:24).

112. *Dion. Hal. Ant. rom.* 5.17.3–4 finds it an especially Roman custom; cf. also *Plut. Caes.* 5.2; *Cam.* 8.3; on Roman funeral orations (in this period including lament, praise, and rhetoric), see *Schiesaro, "Laudatio funebris"; Kierdorf, "Laudatio funebris,"* esp. 298. For the public quality of most Roman textual depictions of mourning, see *Prescendi, "Deuil."*

113. See, e.g., *Nicolaus Progymn.* 8, "On Encomion and Invective," 47, in the fifth century c.e.

martyrdom.¹¹⁴ Mourning customs also typically included considerable display of emotion (such as is implied here).¹¹⁵ Pagans left offerings for deceased relatives,¹¹⁶ a custom known to (but of course not practiced by) educated Judeans (Jos. *Ant.* 19.272; *Jub.* 22:17).¹¹⁷

Palestinian Judaism required burial of the deceased on the day of death, but six days of intense mourning (for a total of seven [*shiva*], hence “sitting shivah”) followed,¹¹⁸ in which the bereaved family members would remain at home while others came to supply food and express sympathy.¹¹⁹ Such intense mourning for at least a week after death is common to various traditional cultures.¹²⁰ The arrival of more distant relatives might also offer special comfort to the closest relatives.¹²¹ Grief was shared within a community; anyone who passed a funeral procession was to join it and share its lamentation;¹²² visiting the bereaved was an important aspect of piety.¹²³

Because bodies decomposed rapidly, mourners had to gather quickly.¹²⁴ Women mourners¹²⁵ were hired to display grief as ostentatiously as possible,¹²⁶ and flutists normally accompanied them.¹²⁷ Later texts probably reflect the earlier view of many religious people in regarding at least two or three mourners (two flutists and one professional mourning woman) as mandatory for the funerals of the poorest person, though a well-to-do person would be able to afford more.¹²⁸ From an early period, mourners in various cultures often afflicted themselves by cutting or growing hair,¹²⁹

114. An easy death was one basis for praise (Theon *Progymn.* 9.19); by contrast, ancient martyr stories show the likely basis for praising Stephen if it was done.

115. E.g., Hom. *Il.* 22.77, 405–7; Aeschylus *Lib.* 22–31, 423–28; Men. *Rhet.* 2.9, 413.13–14; 2 Sam 15:30; 18:33; Ezra 10:1; Esth 4:3; Job 2:12; Ps 6:6; Lam 2:11. This is also true in many traditional cultures (cf., e.g., Mbiti, *Religions*, 200; Simfukwe, “Rites”), versus an unhealthy suppression of grief. One ancient proverb opined that a person experienced a personal death whenever he or she lost loved ones (Publ. Syr. 252); some ancients also believed that one could die from mourning too hard (*Jub.* 34:15).

116. Hom. *Il.* 23.175–76; *Od.* 10.536–37; 11.95–96, 153–54, 390; Thucyd. 2.34.2; Ap. *Rhod.* 2.922–26; Ovid *Metam.* 13.447–48; *Fasti* 2.533–54, 563–70; *Virg. Aen.* 10.517–20; *ILS* 4966 (Sherk, *Empire*, §177B, p. 234); *Plut. Rom. Q.* 86, *Mor.* 285A; *Arrian Alex.* 1.11.5; 2.5.9; *Suet. Calig.* 3.2; *Philost. Hrk.* 21.2; 31.8–9; 52.3; 53.4–5, 8, 12, 15, 23; *Vit. Apoll.* 4.11; *Apoll. K. Tyre* 30–31; cf. Klauck, *Context*, 68–80, esp. 61, 77; Johnston, “Dead, Cult of,” 113; Walbank, “Graves,” 257, 272–73; Thomas, “Dead,” 289–90; Fischer and Tal, “*Totenmahlrelief*”; Smith, *Symposium*, 41–42; Antonaccio, “Hero Cult”; Scurlock, “Ghosts.” For Germanicus (19–20 c.E.), Sherk, *Empire*, §36, pp. 63–72, cites *CIL* 6.911 (31199); *Tac. Ann.* 2.73, 82–3; 3.1–6.

117. On ancestor veneration in various traditional societies, see, e.g., Mbiti, *Religions*, 175, 197, 239–41, 271; for the relationship with kinship organization, see, e.g., Tatje and Hsu, “Variations”; Keesing, “Shrines”; Strauch, “Community,” 45; for kinship’s affecting religion more generally, see, e.g., Orenstein, “Death”; Pereira de Queiroz, “Myths,” 95–96. Such traditions often pose complications for new Christians (cf. Ro, *Alternatives*).

118. The custom is ancient (Sir 22:12; *Jdt* 16:24; Jos. *Ant.* 17.200; cf. *L.A.E.* 51:2; *Apoc. Mos.* 43:3), and the seven days were probably originally related to the isolation period of corpse uncleanness (Num 19:13–20; Jos. *Ant.* 3.262); cf. also seven days of Roman mourning (for the emperor, *Hdn.* 4.2.4; wealthy Romans kept the body for mourning seven days, Jeffers, *World*, 45). Later rabbis did not feel that the mourning period exempted one from most duties except *tefillin* (*b. Ber.* 11a), but popular custom may not have taken this into account.

119. E.g., Jeremias, *Theology*, 132; Sandmel, *Judaism*, 200–201. By the Amoraic period, rabbinic regulations were detailed (*b. Ketub.* 8b and sources in Sandmel, *Judaism*, 201); for reciting mourner’s blessings in the synagogue, see, e.g., *y. Mo’ed Qat.* 1:5, §5.

120. E.g., Mbiti, *Religions*, 197.

121. E.g., *Jub.* 36:22. Near relatives mourned deeply (23:6).

122. Jos. *Ag. Ap.* 2.205; *Abot R. Nat.* 4 A; 8, §22 B; Safrai, “Home,” 778; contrast here the customs in Mbiti, *Religions*, 197.

123. E.g., Sir 7:34–35; *Sem.* 12; Bonsirven, *Judaism*, 151.

124. E.g., *b. Sanh.* 47a.

125. According to rabbis; Jos. *War* 3.437 includes male keeners.

126. E.g., Jos. *War* 2.6; *Ant.* 4.320; *b. Meg.* 3b; *Sanh.* 47a; *Pesiq. Rab Kah.* 15:4; *Lam. Rab.* proem 2; Safrai, “Home,” 778; cf. women’s lamentation in Hom. *Il.* 18.30–31, 50–51; 19.284–85.

127. Jos. *War* 3.437; *m. Ketub.* 4:4.

128. E.g., *m. Ketub.* 4:4. Having one to mourn was very important (e.g., *Gen. Rab.* 100:4).

129. E.g., Job 1:20; Hom. *Il.* 16.844–50; see excursus at Acts 18:18.

wearing sackcloth,¹³⁰ pouring dust on their heads,¹³¹ or even cutting themselves.¹³² As presumably here (μέγαν), mourning could be loud.¹³³

In some cases, mourning—or, in more cases, excessive mourning—was discouraged. Some cultures were thought to avoid most mourning.¹³⁴ Some sought to restrain undue mourning for philosophic reasons.¹³⁵ Instead of encouraging mourning (generally considered psychologically healthier today)¹³⁶ Greco-Roman consolation stereotypically “comforted” a person by discouraging grief.¹³⁷ Do not lament losing the person as if the deceased person’s value to you were only temporary, Seneca the Younger urges (*Ep. Lucil.* 99.4); one should not complain about what is inevitable for all humans (99.7–8).¹³⁸ In his letter of consolation to Marcia, he urges another not to dwell on her departed son (*Dial.* 6.3.3–4); if nature bids sorrow, it must yet be tempered (6.7.1).¹³⁹ Far from bringing back the dead, grief simply brings the mourner closer to death (*Dial.* 11.4.1).¹⁴⁰ A philosopher urges his brother to act philosophically and grieve his wife less (*Philost. Ep. Apoll.* 55). Rhetoricians, too, adopted commonplaces about the uselessness of mourning.¹⁴¹

But although others drew on the language of consolations, not all sounded like Stoics.¹⁴² Mourners on a popular level might acknowledge the inevitability of grief

130. E.g., Baal and Anath g. I* AB (vi) (*ANET* 139); *Jos. Ant.* 2.38; 5.37; 7.40, 154, 327; 8.362, 385; 10.11; 11.221, 223, 256; 12.300; 16.204; 19.349; 20.123; *War* 2.237; *Gen* 37:34; 2 *Sam* 3:31; 2 *Kgs* 6:30; 19:1; *Pss.* *Sol.* 2:21; *Rev* 11:3; *Jos. Asen.* 10:14; *Test. Naph.* 6:8; *Test. Jos.* 15:2; *Asc. Is.* 2:10.

131. E.g., Baal and Anath g. I* AB (vi) (*ANET* 139); 1 *Sam* 4:12; 2 *Sam* 1:2; 15:32; *L.A.E.* C 36:1; see further discussion at *Acts* 22:23.

132. E.g., 1 *Kgs* 18:28; Kaiser, “Pantheon,” 27–28; forbidden in *Lev* 19:28.

133. E.g., *Philost. Hrk.* 35.13; cf. *Gen* 45:2.

134. *Val. Max.* 2.6.7d.

135. See Stowers, *Letter Writing*, 143 (citing, e.g., *Sen. Y. Ep. Lucil.* 99; *Ambrose Epistulae* 39).

136. Cf., e.g., Clinebell, *Care*, 227; Reeves, “Chaplain,” 362; Peretz, “Development,” 13.

137. See Stowers, *Letter Writing*, 142; on stereotyped letters of mourning, see also Lewis, *Life*, 80–81; on status considerations in some Roman examples, see Wilcox, “Rivals.” Thus Seneca notes that one who has encouraged others not to grieve should take one’s own advice (*Dial.* 1.4.5). See also, e.g., Eurip. *Melanippe* frg. 507; but contrast the common sort of sentiments expressed in some tragedies like Eurip. *Oenomaus* frg. 573; *Phrixus* frg. 834. Especially out of greater allegiance to the state, Romans might endure with fortitude the deaths of their sons; see, e.g., *Ovid Fasti* 4.845–48 (though cf. 849–52); *Val. Max.* 5.10.

138. Cf. *Epict. Enchir.* 14. Seneca does allow the expression of grief at the funeral (*Sen. Y. Ep. Lucil.* 99.15), so long as it is not indulged or prolonged (99.16, 26–27). The futility of mourning the inevitable was a commonplace (e.g., *Val. Max.* 2.6.7d; *Sen. Y. Dial.* 1.5.8; cf. *Soph. Ajax* 852; *El.* 1171–73; Eurip. frg. 908b; 1075; *Ino* frg. 418; *Hypsipyle* frg. 757.122–28/921–27); a widower might be told that others had also lost wives (*Eurip. Hippolytus* 834–35; cf. *Pesiq. Rab.* 30:1).

139. It is not nature, he warns, that grief would overwhelm us (6.7.3). Seneca also composed letters of consolation to one Polybius (*Dial.* 11) and, when he was banished unjustly for a time, to his own mother Helvia (*Dial.* 12).

140. In a pseudepigraphic Cynic epistle, Aeschines discourages Socrates’s wife from grieving for him, warning that this would be bad for the children (*Socratic Ep.* 21).

141. Rhetoricians might contend that even the deceased would discourage such mourning (*Men. Rhet.* 2.9, 414.21–23). Theon noted that consolation was one important use of rhetoric (*Progymn.* 8.53), but suggested that rational people were less likely to grieve about what could not be helped (8.55). Cf. also the Jewish philosophic tract *Let. Aris.* 268: reason does not prescribe grief for the dead (cf. *Hadas, Aristees*, 204–5, noting the consolatory commonplace).

142. See, e.g., *Greek Anth.* 7.340; *Plut. Consol., Mor.* 608B–612B (treated in Baltussen, “Grief”), though even here grief must be kept within limits (*Consol.* 2, *Mor.* 608C) and his wife’s refraining from public mourning was good (4, *Mor.* 608F–609A). His condolence letter to Apollonius abounds with stock motifs; thus he includes the example of Pericles, who very wisely refused to mourn his sons (*Apoll.* 33, *Mor.* 118E). Cicero notes that the theme that everyone experiences loss is a consolatory commonplace (*Fam.* 5.16.2) but counters that those without children are better off in the current times of suffering (5.16.3). But while Cicero rhetorically suggests that men should be less prone to grief than women (*Fam.* 5.16.6), he cannot resist it when his own daughter dies (*Att.* 12.38) and cannot understand how people can expect him not to grieve (12.40). Another, who confesses his own grief for her death (4.5.1), urges him to recognize that she has escaped from

and death, yet mourn nonetheless.¹⁴³ Thus Quintilian grieves greatly over his deceased son (*Inst.* 6.pref.). Likewise, Pliny the Younger, annoyed with philosophers' reduction of human mourning to mere economic calculations, questions their humanity (*Ep.* 8.16.3): "A true man," he insisted, "is affected by grief and has feelings, though he may fight them" (8.16.4).¹⁴⁴ Noting that another was consumed by grief (5.16.8), Pliny asked who could blame him (5.16.9), and warned, "If then you write anything to him . . . be careful not to offer any crude form of consolation which might suggest reproof; be gentle and sympathetic" (5.16.10).¹⁴⁵ A consolatory poem urges the bereaved to weep as much as he needs to (Stattius *Silvae* 2.6.12–14).¹⁴⁶ Others in ordinary life sometimes found themselves paralyzed with grief (Symm. *Ep.* 1.54, 83, 101).

Time and gender mattered. An Athenian λόγος ἐπιτάφιος, or encomiastic funeral oration, was to include consolation only if the death was more recent than eight months (Men. *Rhet.* 2.11, 419.2–10). Romans limited to a year the period of mourning by women¹⁴⁷ and considered men's mourning dishonorable (Sen. *Y. Ep. Lucil.* 63.13).¹⁴⁸ Many men regarded mourning as especially womanly business, so that one ancient people (the Lycians) allegedly even wore women's clothes when mourning (to urge the men to finish quickly).¹⁴⁹ Women traditionally beat their breasts¹⁵⁰ or tore out their hair;¹⁵¹ Josephus was aware of the tradition (*Ant.* 4.320).¹⁵² That mourning was especially (though not exclusively) associated with women¹⁵³ makes its association with men in Acts 8:2 all the more emphatic.

Like Greeks and Romans but probably more consistently, Jewish customs affirmed mourning (cf., e.g., Jos. *Ant.* 13.406). The most intense period of mourning was to be the first week (Sir 22:12; Jdt 16:24).¹⁵⁴ At least according to later practices (which probably had not changed substantially), mourners would rend their garments (*Sem.*

the present evil times (*Fam.* 4.5.2–3), noting that time would heal him, but using wisdom can heal him faster (4.5.6). Cicero takes comfort in these words (4.6.1). Others, however, looked to philosophers for comfort about death's meaning (Dio Chrys. *Or.* 27.9).

143. E.g., *Greek Anth.* 7.339, 389.

144. He does console himself that a great person, though deceased, lives on (*Ep.* 2.1.10–11). Consolers often drew on the portrayal of death as sleep (Plut. *Apoll.* 12, *Mor.* 107DE), or on other notions of immortality (Philost. *Ep. Apoll.* 58). Jews with the hope of resurrection might carry this idea further (*Test. Zeb.* 10:1–2; 1 Thess 4:13).

145. A "raw wound," he noted, is not ready for firmness (5.16.10).

146. Likewise, Stattius urges one Melior to go ahead and grieve (2.1.14–15).

147. Greek women normally offered libations for a year (Johnston, "Dead, Cult of," 113, citing Aeschylus *Lib.* 84–164; Soph. *El.* 894–95).

148. Women, Seneca opined, were more deeply wounded by bereavement than were men, just as savages were more wounded by it than civilized persons (Sen. *Y. Dial.* 6.7.3; he is less sexist in 6.16.1). Thus when a man indulged grief, Seneca rebuked him for acting like a woman (*Ep. Lucil.* 99.1–2). Philostratus praises a father who simply lamented his son in three sentences, avoiding "womanish" lamentation (*Vit. soph.* 2.16.597).

149. Val. Max. 2.6.13; the LCL note cites also Plut. *Mor.* 1.13A. Among Germans, lamentation was mostly restricted to women (Tac. *Germ.* 27). Women also dominate mourning in more recent Mediterranean culture (see Pizzuto-Pomaco, "Shame," 51–53). Stoics, however, might seek to reduce even women's mourning (Mus. *Ruf.* 3, p. 40.21–22), because grief was a negative emotion (Arius Did. *Epit.* 2.7.10c, pp. 62–63.3–4).

150. Hom. *Il.* 18.30–31, 50–51; 19.284–85; Menander *Dyskolos* 674; Lucian *Fun.* 12, 19; Philost. *Hrk.* 51.7. For beating the face, see Lucian *Lucius* 14.

151. E.g., Hom. *Il.* 22.405–7 (though also a man in 22.77); Menander *Dyskolos* 673–74; Lucian *Fun.* 12, 16; Philo *Jos.* 16.

152. For tearing clothes, see, e.g., Dio Chrys. *Or.* 46.12; Jos. *Ant.* 2.134; comment on Acts 14:14; dust on the head, see, e.g., Hom. *Od.* 24.316–17; 3 Macc 1:18; comment on Acts 22:23.

153. See, e.g., Jos. *Ant.* 4.320 (Israelite society); Hom. *Il.* 18.30–31, 50–51; 19.284–85; Soph. *Ajax* 580; Eurip. *Herc. fur.* 536; Menander *Aspis* 228; Thucyd. 2.34.4; Cic. *Fam.* 5.16.6; Diod. Sic. 17.37.3; Dion. Hal. *Ant. rom.* 7.67.2; 8.39.1; Livy 26.9.7; Val. Max. 2.6.13; see comment on Acts 9:39.

154. See further Sir 38:16–17; *L.A.E.* 51:2; *Apoc. Mos.* 43:3.

9), “assign someone to attend the corpse continuously” (*t. Šabb.* 17:19), and light candles “at the head or feet of the corpse out of respect” (*m. Ber.* 8:6).¹⁵⁵

8. Prohibited Mourning

Given this emphasis, the prohibition of mourning might seem unthinkable,¹⁵⁶ but it does appear. Tiberius, for example, forbade relatives to mourn for his victims.¹⁵⁷ Even relatives sometimes refused to grieve when those destroyed were the wicked (*Jos. Ant.* 4.53).¹⁵⁸ As noted above, some officials refused burial and consequently public lamentation, but although Jewish people insisted on burial even for the dishonorable, at least later Mishnaic regulations prohibited public mourning for one executed under biblical law (*m. Sanh.* 6:6).¹⁵⁹

Ancients often viewed as heroes those who dared violate prohibitions of burial or mourning. This makes sense in a world where burying others was such an act of piety. Plutarch viewed as noble a victor in battle prepared to relinquish the honor of victory rather than abandon the bodies of two fallen comrades (*Plut. Nic.* 6.5–6).¹⁶⁰ Burying bodies one came across was a good deed for both Gentiles¹⁶¹ and Jews.¹⁶² Later rabbis taught that failure to provide honorable burial and eulogy for a righteous person invited judgment on a land (*y. Yoma* 1:1, §6).

When such acts challenged the will of those in power, they could be costly and demanded great courage.¹⁶³ Those whom Tobit found dead he buried (*Tob* 1:17–18); although this cost him the confiscation of his goods (1:19–20), he continued burying them (2:7–10). A woman who privately buried and lamented an enemy of a ruler (*Dion. Hal. Ant. rom.* 4.40.5) herself died under allegedly suspicious circumstances the next night (4.40.6). Most Greeks knew the story of Antigone’s burial of the dead in defiance of Creon’s decree.¹⁶⁴ Those who buried Stephen would not have risked the wrath of Jewish authorities, who would not have prohibited burial; by publicly lamenting him, however, they expressed great personal courage. Their act would be seen as an act of defiance against those who killed him (whether authorities or vigilantes).

This insistence on burying the dead, whether at small or at great cost, extended especially to those who were highly esteemed. A much later text even claimed that all who mourned righteous Judah ha-Nasi had a share in the world to come.¹⁶⁵ Burial was an essential sign of affection for loved ones (e.g., *Gen* 23), a necessary familial obligation

155. Safrai, “Home,” 774. In some sources, mourners’ blessings would be recited in the synagogue (*y. Mo’ed Qat.* 1:5, §5). Nevertheless, the philosophically inclined urged mourners to leave grief at the tomb, in view of death’s inevitability (*Syr. Men. Sent.* 463–69).

156. It appears as needlessly cruel in *Cic. Pis.* 8.18 (who speaks of the cruelty of forbidding mourning to those one had forced to mourn).

157. *Suet. Tib.* 61.2; cf. *Tac. Ann.* 6.10 (executing an old woman mourning her son’s death); the punishment in *Tac. Ann.* 12.47.

158. Cf. *Dion. Hal. Ant. rom.* 3.21.8. Later, cf. instructions to Muhammad not to mourn the wicked (*Qur’an* 9.84).

159. Most commentators cite this passage (e.g., Strack and Billerbeck, *Kommentar*, 2:686; Haenchen, *Acts*, 293–94; Bruce, *Acts*, 182; idem, *Commentary*, 174).

160. Retrieving bones for burial even from a much earlier battle was a way of recouping group honor (*Dio Cass.* 57.18.1).

161. *Alciph. Fish.* 10 (Cephalus to Pontius), 1.10, ¶4; *Hermog. Issues* 49.15–19; *Libanius Narration* 13.

162. *Ps.-Phoc.* 99 (Hellenistic Jewish); *Tg. Ps.-J.* on *Exod* 18:20; after battle, 1QM VII, 2. Digging up the dead was impious (*Ps.-Phoc.* 100–101), and if one uncovered corpses accidentally, one should cover them again immediately (*Philost. Hrk.* 8.10).

163. Cf. the courage attributed to Ajax in burying Palamedes in *Philost. Hrk.* 33.32–33.

164. *Soph. Antig.* passim; also *Aeschylus Seven*, esp. 1011–47; *Eurip. Suppliants*; *Apollod. Bib.* 3.7.1; the story was echoed later, e.g., *Demosth. Epitaph.* 8; *Libanius Narration* 9; 10.1.

165. *Ecl. Rab.* 7:12, §1; 9:10, §3. Cf. the mourning of all Israel for righteous Mattathias (1 *Macc* 2:70).

(*Test. Job* 39:10 [OTP]/7 [Kraft]). To honor his parents,¹⁶⁶ Tobias had to bury them after their death, regardless of the danger this might entail for him (Tob 4:3–4). Because many were being denied burial, he feared that his own death would precipitate his parents' death from grief, since they had no other son to bury them (6:14).¹⁶⁷ In classical Athens, childless people would adopt sons to have someone to bury them and perform annual rites in their memory (Isaeus *Menec.* 10, 25, 46). Failure to attend to such duties was despicable for a son by birth (e.g., Demosth. *Aristog.* 54) or by adoption (Isaeus *Nicost.* 19) and could call an adoption into question (Isaeus *Astyph.* 4, 7).

9. Who Buried Stephen?

In Stephen's case, those who buried him appear not to be members of his family, unless (if these are Christians) they are members of his *Christian* family (cf. Acts 5:6, 11). Against Diogenes the Cynic, most people believed it important to have someone left behind (even a servant) to provide burial (Diog. Laert. 6.2.52).¹⁶⁸ Disciples often filled this role for teachers, as John the Baptist's did (Mark 6:29). Pythagoras, though a famous teacher in his own right, was said to have traveled to care for his aged teacher, staying with him until his death in order to bury him (Iambl. *V.P.* 30.184; 35.252). Diogenes's disciples fought over the privilege of burying him (Diog. Laert. 6.2.78). Assuming that Stephen may have been too recent a teacher to have accumulated disciples, if the Christian movement even retained this model (Matt 23:7–8; though cf. Saul in Acts 9:25), the pious who buried him may have been any who respected his ministry.

f. Saul's Persecution (8:3)

Just as the disciples had been meeting from house to house (2:46; 5:42), now Saul persecuted them from house to house. Because homes were viewed as private, their violation was more grievous than public arrests; because the domestic sphere was associated especially with women,¹⁶⁹ the mention of this outrage leads naturally to the next one.

Women were less often punished than men, though a number of individual women were.¹⁷⁰ Roman law tended to treat women less harshly than men.¹⁷¹ Indeed, when

166. Many Jewish people regarded this as the supreme commandment (*Let. Aris.* 228; *Jos. Ag. Ap.* 2.206; *Ps.-Phoc.* 8; Moore, *Judaism*, 2:132); see further Keener, "Family," 354–56. For the expectation that sons would bury their fathers, see also Tob 4:3–4; 6:14; 1 Macc 2:70; 4 Macc 16:11; Matt 8:21–22 (and comment in Keener, *Matthew*, 275–76; cf. *Test. Job* 39:10/7; Demosth. *Aristog.* 54).

167. On the depth of this tragedy from the ancient perspective, see also Lysias *Or.* 13.45, §§133–34. Ovid lamented the prospect of dying in a distant land and hence unmourned (*Tristia* 3.3.45–46).

168. Lacking surviving children, Herodes left instructions for his freedmen to bury him, but the entire city came to honor him (Philost. *Vit. soph.* 2.1.565).

169. *Mus. Ruf.* 3, p. 40.10; 1 Tim 5:14; Winter, *Wives*, 160; cf. earlier Hom. *Od.* 1.356–61; Dion. Hal. *Ant. rom.* 10.28.3; Val. Max. 6.3.12; Wagner-Hasel, "Roles: Greece," 741; Lefkowitz and Fant, *Life*, 104, §107. These distinctions were not absolute, however, and Palestinian Jews did not restrict women to the domestic sphere as classical Athenians, at least ideally, recommended (Keener, "Head Coverings," 443; idem, *Paul*, 22–24). Entering homes with women (who are explicitly mentioned here) could be scandalous, but given Saul's zeal for the law, we may assume that he ensured that women were prepared before he and others entered private places.

170. Val. Max. 5.4.7 (cited in Rapske, *Custody*, 247); 9.2.1; Polyb. 5.56.15 (mob action); Quint. Curt. 8.3.15 (light compared with 7.5.40); Plut. *Alex.* 12.1–3 (contrast 11.6); 21.1–3; *Jos. Ag. Ap.* 2.267 (on Athenian execution of women); Ovid *Metam.* 13.497 (among captives; cf. Polyb. 5.111.6, in a camp). The rabbis allow women's execution in theory (e.g., *m. Sanh.* 6:3–4; *Arak.* 1:4; for witchcraft, *b. Sanh.* 67a), but a single incident proved so noteworthy that it recurs, in legendary form, in many later texts (e.g., *Sipre Deut.* 221.1.1; *y. Sanh.* 6:6, §2). Reported capital charges for women most often concerned adultery (Ilan, *Women*, 159–62). Women relatives were allowed to visit a man in prison (Lysias *Or.* 13.39–40, §133).

171. Robinson, *Criminal Law*, 17, 56. Against some studies, Jewish burials seem to have treated both genders equally (Nagar and Torgeë, "Characteristics").

some were executing a tyrant's widow (Jos. *Ant.* 19.190, 193–94), others tried to intercede for her (19.192, 194). This is not to deny exceptions; women were sometimes killed in war,¹⁷² imprisoned,¹⁷³ executed for capital crimes¹⁷⁴ (even occasionally by crucifixion),¹⁷⁵ killed for their husbands' rebellion,¹⁷⁶ or, in an exceptional circumstance, stoned as individuals by mobs of other women.¹⁷⁷ Though Polybius occasionally mentions such women casualties, he complains about historians who overemphasized women's sufferings to stir pathos (Polyb. 2.56.7–8). Tradition claims that Peter's wife was active enough in ministry to be martyred (Clem. Alex. *Strom.* 7.3; cf. 3.6).¹⁷⁸ Men were far more often the targets; thus Sulla was so wicked that "he drew swords even against women, as though the slaughter of men was not enough for him" (Val. Max. 9.2.1 [LCL, 2:309]).

In view of the rest of Luke-Acts, however (cf. esp. Luke 23:55–24:11), this passage probably emphasizes not only Saul's savage hostility to the disciples but also the women disciples' courage and faithfulness.¹⁷⁹ Philosophers often held women capable of the same virtues as men (though in different ways), including courage (Mus. Ruf. 4, p. 48.8),¹⁸⁰ though courage and endurance were considered characteristically masculine virtues;¹⁸¹ as a rule, timidity was more apt to be associated with the stereotype of femininity, and femininity with male cowardice, weakness, or luxury.¹⁸² (At the very least, the etymology for the pervasive virtue ἀνδρεία, "courage," would likely stir mental associations with masculinity.¹⁸³ Plutarch's essay on women's bravery avoids

172. E.g., Polyb. 5.111 (in a camp).

173. Until Constantine's reforms, often with men, predictably often leading to their sexual abuse (Rapske, *Custody*, 279–80, citing numerous texts, most notably *b. Ta'an. 22a*).

174. E.g., Val. Max. 2.5.3; 5.4.7 (for the latter, Rapske, *Custody*, 247; cf. 280).

175. See Ford, "Crucifixion"; in a novel, Xen. Eph. *Anthia* 4.4.

176. Jos. *War* 1.97 (Alexander Jannaeus allegedly having the throats of the wives and children of eight hundred rebel leaders slit as the latter were dying on crosses).

177. Polyb. 5.56.15.

178. Liefeld, "Preacher," 239.

179. See discussion of views concerning Luke and gender in Keener, *Acts*, 1:597–638. Cf. O'Day, "Acts," 307: Saul apparently considered "female Christians . . . as dangerous as male" ones.

180. This was especially applicable to women trained in philosophy (Mus. Ruf. 3, p. 40.33–35). This question is argued both ways by Theon *Progymn.* 10.57–59, 62–65.

181. E.g., Eurip. *Cycl.* 595; *Alc.* 957; *Lysias Or.* 2.25, §193; Apollod. *Bib.* 3.11.2; Polyb. 3.108.5; 38.12.9; Cic. *Fam.* 5.18.1; Val. Max. 3.2.12; 3.8.ext. 3; Mus. Ruf. 9, p. 70.11–12, 24–25; Dio Cass. 58.4.6; Char. *Chaer.* 7.1.8; Philost. *Vit. Apoll.* 4.38; *Hrk.* 35.3; cf. Diog. Laert. 6.2.33, 43. This was true even when a woman exhibited this characteristic (Apul. *Metam.* 5.22); it was applicable to the Amazons (Apollod. *Bib.* 2.5.9; Diod. Sic. 17.77.1), on whom see comment on Acts 8:27 (though *Lysias Or.* 2.5, §§190–91, charges that the Athenians made even Amazons behave according to the weakness of their gender!). War was normally masculine activity (Eurip. *Heracl.* 711), and less "courage" was expected of women than men (Arist. *Pol.* 3.2.10, 1277b).

182. E.g., Hom. *Il.* 8.163; 11.389; 16.7–8; Aeschylus *Prom.* 79; *Suppl.* 951–52; Aristoph. *Lys.* 98; Aeschines *Embassy* 148, 167; Xen. *Lac.* 11.3; Polyb. 6.37.10–13; 30.18.5–6; 32.15.7, 9; 36.15.1–2; 38.12.9; Diod. Sic. 12.16.1; 32.10.9; 34/35.2.22; Dion. Hal. *Ant. rom.* 9.7.2; 10.28.3; Cic. *Verr.* 2.5.31.81; *Mil.* 21.55; *Fam.* 5.16.6; 16.27.1; Virg. *Aen.* 9.617; 12.52–53; Val. Max. 2.7.9; 3.3.ext. 4; 3.7.ext. 8; 9.1.ext. 1, 7; 9.13.praef.; Sen. E. *Controv.* 1.praef. 8–10; Sen. Y. *Ep. Lucil.* 70.6; 78.17; 96.4; 99.1–2; 114.3, 8; Mus. Ruf. 21, p. 128.33–35; Sil. It. 1.445; 9.263; 13.313; Plut. *Alex.* 47.1; *Demosth.* 29.4; Cic. 7.5; 19.5; Dio Chrys. *Or.* 3.34, 70; 62.5–6; 70.2; Lucian *Anach.* 25; *Nigr.* 18; *Fisherman* 31; Aul. Gel. 3.1; 17.21.33; Max. Tyre 19.4; Philost. *Vit. soph.* 2.16.597; *Vit. Apoll.* 1.21; *Hrk.* 23.19; 45.8; Ps.-Callisth. *Alex.* 1.46; cf. Lucian *Dial. D.* 414 (6/20, Menippus and Aeneas 2).

183. Explicit in Plato *Cratyl.* 413E–414A; cf. "be manly" in Hom. *Il.* 15.661, 734. For this virtue, see, e.g., Diod. Sic. 17.45.6; 40.3.6; Arist. *E.E.* 3.1.2–4, 1228a–1228b; Mus. Ruf. 9, p. 74.5–7; Arius Did. *Epit.* 2.7.5b.2, pp. 14.16–16.11; 2.7.5b.1, pp. 12–13.21–22; 2.7.5b.5, pp. 18–19.32–34; Theon *Progymn.* 9.22; Lucian *Par.* 54; Crates *Ep.* 19; Men. *Rhet.* 1.3, 364.17–20; 2.1–2, 369.31–32 (Gauls and Paionians); 372.30–31; Hdn. 8.3.5; Philost. *Hrk.* 21.6; 34.6; Wis 8:7; for texts listing all four traditional virtues (including courage), see comment on Acts 26:25. Roman boys, though born male, had to achieve manhood and valor (Barton, *Honor*, 38–39). The LXX also uses ἀνδρῖνον in exhortations to valor (Deut 31:6, 7, 23; Josh 1:6–9, 18; 10:25; 2 Sam 10:12; 1 Chr 19:13; 22:13; 28:20; 2 Chr 32:7; cf. 1 Macc 2:64), though the verb could also refer to machismo in a negative sense (Sir 31:25 [LXX; some versions, 34:25]).

the term, though Musonius readily applies it to women.)¹⁸⁴ Thus, after twelve years of peace, the Roman senate planned a war to keep their citizens from becoming too effeminate.¹⁸⁵

Ancients praised women who achieved this virtue, all the more because it was not expected of them.¹⁸⁶ We should honor courage, opines Diodorus of Sicily, “even when it is women who display it.”¹⁸⁷ Thus, fearing lest her “female nature” betray her under torture, the wife of a Pythagorean philosopher bravely bit off her tongue and spat it at her persecutors (Iambl. *V.P.* 31.194).¹⁸⁸ The martyr mother in 4 Maccabees proves as “masculine” as the men in the story.¹⁸⁹ A brave woman might prove not to be “womanish.”¹⁹⁰ Men counted it shameful to be beaten by a woman,¹⁹¹ and a woman’s valor would provoke men to display their own.¹⁹² Even though ancients characterized such women as exceptions, they did have to acknowledge the value of courageous women who surmounted the expectations of their culture.¹⁹³ As in reports about early Pythagoreans, Christians seem to have been among the groups that cultivated this commitment among women.

The term used to describe Saul’s persecuting activity, *λυμάνιωμα* (“ravage”), was a strong term that could apply to torture, military devastation, or outrages;¹⁹⁴ it could vividly designate mistreatment, including of Jews.¹⁹⁵ Jewish people understood the reality of persecution, having suffered it from the Ptolemies, Seleucids, and Romans.¹⁹⁶ Whereas Western culture might think of solving the problem of persecution by abolishing the practice for everyone, repressed minorities in history have often internalized the practice of repression and applied it to others when they achieved power (cf. many Christians after Constantine). Jews had experienced persecution from others but also persecuted other Jews.¹⁹⁷ Just as “the Wicked Priest” persecuted the Qumran sect,¹⁹⁸ so “Paul seems to have regarded the early community as a separatist group which must be eliminated.”¹⁹⁹

184. E.g., Mus. Ruf. 4, p. 44.23–35 (see esp. comments by Lutz). Similarly others, including with the Latin equivalent (e.g., Val. Max. 4.6.5, *virilem*; 6.1.1, *virilis*).

185. Polyb. 32.13.6–7.

186. E.g., Xen. *Symp.* 2.12; Diod. Sic. 32.10.9; Dion. Hal. *Ant. rom.* 4.82.3; Ovid *Fasti* 2.847; Livy 2.13.6; Val. Max. 3.2.2, 15; 3.2.ext. 8–9; 4.6.5; 5.4.6; 6.1.1; 8.3.1, 3; Appian *Hist. rom.* 7.5.29; Mus. Ruf. 4, p. 44.25; Plut. *Br. Wom., Mor.* 242E–263C; Pliny *Ep.* 7.19.7; Heliod. *Eth.* 4.21 (though here they remain physically weak); cf. Ap. Rhod. 1.770–73. Juvenal’s misogynist perspective ridicules women for competing with men in strength (*Sat.* 6.246–67).

187. Diod. Sic. 10.24.2. Likewise, “even” women help the enemy soldiers in Dion. Hal. *Ant. rom.* 6.92.6.

188. Plutarch collects many stories of women’s bravery (*Bravery of Women*), but again, these are regarded as (praiseworthy) exceptions, not the norm.

189. Or more so, Moore and Anderson, “Masculinity”; see 4 Macc 15:23, 30; 16:5, 14; cf. likewise 2 Macc 7:21.

190. Val. Max. 3.2.15.

191. Virg. *Aen.* 11.734.

192. Dion. Hal. *Ant. rom.* 4.82.3.

193. That culture was involved should have been evident, since women’s courage was equivalent to men’s among Gauls (Diod. Sic. 5.32.2). That the Amazons reportedly had to maim their male children to keep them from acting manly (Sext. Emp. *Pyr.* 3.217) suggests that even those emphasizing the cultural aspects of gender (e.g., Sextus Empiricus) attached biological significance to it.

194. See Knowling, “Acts,” 210.

195. Conzelmann, *Acts*, 61, cites Claudius’s decree.

196. Kruse, “Persecution,” 775–76.

197. *Ibid.*, 776, cites as examples 1 Macc 2:45–46; Jos. *War* 2.254–57; 4.335–44. This also included the persecution of Jewish Christians (“Persecution,” citing patristic sources and rabbinic texts on the *minim*; for discussion of the latter, see Keener, *John*, 195–203); see further Le Cornu, *Acts*, 387–89.

198. Le Cornu, *Acts*, 388, cites 1QpHab I, 13; V, 9–10; VIII, 8, 16; IX, 2, 9–10; XI, 4–5; XII, 2–3; 4Q171 II, 18–19; IV, 8.

199. Le Cornu, *Acts*, 390.

g. *The Dispersed Spread the Message (8:4)*

Acts 8:4 could be classed either with 8:1–3 or with 8:5–40, since it is transitional (just as all of 8:1–4 is transitional): it addresses both Saul’s persecution and Philip’s ministry, to which Saul’s persecution, ironically, led. That is, Saul was a vessel of God (cf. Acts 9:15; Rom 9:22) before he knew it, though an unwitting agent who merited destruction (cf. Isa 10:5). Philip’s pre-Petrine Gentile mission already betrays the influence of Paul, who will be apostle to the Gentiles!

Whereas Acts 7:54–8:3 has built toward the expectation of the Jerusalem church’s being suppressed by its persecutors, 8:4 provides a surprising turn.²⁰⁰ Because those who are persecuted remain so certain of their message on account of their experience with the Spirit and the Spirit’s people, they carry it everywhere they go. In Luke’s theology, God can sovereignly bring about good from evil, as the Joseph story (cf. Acts 7:9–13; Gen 50:20) and—what is most relevant for his portrait—the passion narrative taught (Acts 2:23–24; 3:18). As Dunn explains here, Stephen’s death proved to be like Jesus’s judicial murder: “The divine purpose overrules human malice to bring to effect the overarching divine plan (2.23; 4.28; 5.38–39).”²⁰¹

Scattering from Jerusalem as a result of Stephen’s persecution proved a major factor in spreading the Jesus movement,²⁰² for which the mere promise of 1:8 had thus far proved less effective. Had the disciples disobeyed Jesus’s teaching in 1:8? Given Acts’ portrayal of them so far as positive (e.g., 1:14–16; 2:14, 42–43; 4:33; 5:12) but as not completely understanding (1:6–7; cf. 10:14–20), it is much likelier that they had simply not understood the mechanism that Jesus intended for their ministry to the nations. Isaiah was clear that Gentiles would be converted; but because Isaiah could be construed to mean that Gentiles would be drawn in by Israel’s exalted glory, some disciples may have insisted that the mission should wait till Israel had accepted the Messiah.²⁰³ In the meantime, they could be a light to the nations in Jerusalem. Only in retrospect would they recognize that the scattering was providential, fulfilling God’s purposes.²⁰⁴

Luke (and the NT) employs the term διασπείρω only here (8:1, 4) and in 11:19,²⁰⁵ which picks up where this statement leaves off; the cognate noun, however, refers to the Jewish Diaspora (διασπορά, Jdt 5:19; 2 Macc 1:27; John 7:35; Pss. Sol. 8:28; 9:2; perhaps Jas 1:1)²⁰⁶ and apparently was applied to early Christians on the analogy

200. This reflects an engaging literary style; cf. the rhetorical παράδοξον in Demet. *Style* 152–53; Quint. *Inst.* 9.2.22–24 (Anderson, *Glossary*, 88).

201. Dunn, *Acts*, 75.

202. With, e.g., Race, “Journeys.” That persecution, ironically, spread the church here was not lost on ancient readers (Chrys. *Hom. Acts* 18; Bede *Comm. Acts* 8.1, citing the principle in Jerome *Commentary on Matthew* 1.10.23 [all in Martin, *Acts*, 89]). Some authors report it happening to some movements since then (e.g., Wesley, *Church*, 45, on the Word of Life Church in China; cf. Yun, *Heavenly Man*, 56; for persecution strengthening the church, *ibid.*, 75).

203. Skarsaune, *Shadow*, 165–66 (observing [166] that Paul inverts this expectation in Rom 11: Gentile conversion will lead to Israel’s repentance). Some might doubt that the apostles would have remained in Jerusalem while also affirming the teaching of Acts 1:8, but for a partial, more recent parallel, Wesley affirmed the value of missions yet wanted to focus first on areas of the British Isles not yet evangelized (Noll, *Rise*, 232).

204. That the scattering providentially spreads the gospel suggests narrative irony (Ray, *Irony*, 64).

205. The verb applies to scattering Israel for judgment until (what would be viewed as) the eschatological regathering in LXX Lev 26:33; Deut 4:27 (cf. 4:30, “last days”); 28:64; Joel 3:2; Isa 11:12; 56:8; Jer 39:37 (32:37 MT); Ezek 11:17; 12:14–15; 17:21; 20:23; 22:15; 34:12; 36:19.

206. Cf. Tob 13:5; Jos. *Ag. Ap.* 1.33; *Gen. Rab.* 73:6. On Diaspora and exile, see some nuanced evaluations of the discussion in, e.g., Trebilco and Evans, “Diaspora Judaism,” 293–94; Bird, *Gentile Mission*, 39–44; Evans, “Exile.” Many commentators view James’s Diaspora as the church (e.g., Ropes, *James*, 118–27; Moffatt, *General Epistles*, 6; Dibelius, *James*, 66; Barth, *People of God*, 14; Laws, *James*, 47–48; Minear, *Images*, 62; Kee,

of that Diaspora (1 Pet 1:1).²⁰⁷ Because the regathering of “scattered” Israel was an end-time phenomenon (see comment on Acts 1:6; among LXX passages that employ *διασπορά*, cf. Deut 30:4; Neh 1:9), the scattering of believers may indicate that the end time has been delayed through Jerusalem’s disobedience (cf. Acts 3:19–21; Rom 11:11–12, 25–32). But in God’s plan, it was so that the Gentiles would hear the word before the end (Acts 1:6–11, esp. 1:8). As Isa 49:6 (quoted at Acts 13:47) declares, God raised up the servant not only to bring back the *διασπορά* of Israel but also to bring salvation to the Gentiles at the ends of the earth.

Luke summarizes the dramatic result (reserving his detailed attention for specific characters). He provides analogous summaries of Jesus’s ministry from place to place (Luke 8:1; 9:6; 20:1). In the Gospel, others are also said to preach good news, whether regarding Jesus’s birth (1:19; 2:10), John’s preaching (3:18), or Jesus’s mission (4:18, 43; 16:16); Luke grounds the activity biblically in Isaiah (4:18; 7:22).

That those scattered went everywhere evangelizing with the message indicates that despite Luke’s focus on some primary figures, he is aware that the Christian movement was spread by large numbers of adherents (also Acts 11:19–24).²⁰⁸ (For the term “evangelize” here, see comment on Acts 5:42.) He is writing not merely a history of the early church or even of its mission but a biographically focused history that parallels major figures with Jesus, underlining the continuity between Jesus’s mission and that of his followers (see Keener, *Acts*, 1:108–15, 555–62). Yet we see that “ordinary” Christians also spread the message, and this was in fact to be expected; in the Roman world, traveling merchants and others often spread their cults in the course of normal geographic relocations.²⁰⁹ Those who traveled with the primary agenda of propagating their views were the minority.²¹⁰

Luke’s account of Stephen is important not only because of his connection with Saul and with the persecution that scattered the church, but also as a foreshadowing of Luke’s apologetic for Paul later in the work. Toward the end of Paul’s life and probably in the aftermath of his martyrdom, Paul had detractors in the churches as well as outside them (Phil 1:7, 12–20; 2:17; 2 Tim 1:8, 16; 4:16). Paul probably used his final hearing to offer his message in some form to the emperor and/or his court (cf. 2 Tim 4:16–18; perhaps earlier, Phil 1:13), as Luke apparently implies (Acts 23:11; 27:24). Some members of the churches may have believed that Paul’s final, bold testimony inflamed Nero’s persecution more fully. In the account of the aftermath of Stephen’s preaching, however, Luke emphasizes that the ultimate outcome of such events was positive. Persecution in response to Stephen’s preaching (explicit in 11:19) scattered the church, but in so doing spread the gospel (8:1–4; 11:19–21). Paul will carry on Stephen’s role as witness (22:15, 20–21), and believers should not despise his legacy.

That the scattered disciples “passed through” or “went everywhere” naturally leads to the specific example of Philip, confirmed by the verbs *διέρχομαι* (at its first

Origins, 149; Davids, *James*, 63–64; less certainly, Sidebottom, *James*, 26), but this is not a foregone conclusion (see Mayor, *James*, 29–31).

207. Cf. Bruce, *Acts* 1, 181: “The new Ecclesia, like the old, was to have its Diaspora (cf. 1 Pet. i.1)” (similarly idem, *Commentary*, 176). Most see this Christian Diaspora as named for a Jewish one (e.g., Moffatt, *General Epistles*, 89–90; Kelly, *Peter*, 40; Harrington, *God’s People*, 83; Minear, *Images*, 62; Aune, *Environment*, 221), much more probable than a borrowing the other way (as in Selwyn, *Peter*, 118–19).

208. With Malherbe, *Social Aspects*, 65 (suggesting also Acts 18:2, 24–28; 28:13–15); see here Lim, “Evangelism,” 355.

209. Liefeld, “Preacher,” 21–22, 26, 151; Bowers, “Propaganda,” 320; Stambaugh and Balch, *Environment*, 42; Klauck, *Context*, 63–64. On Zoilus, cf. Rigsby, “Sarapeum.” Traveling merchants continued to spread their faiths in later history as well.

210. Bowers, “Propaganda,” 318 (though Paul being “almost the only example” is probably an exaggeration). Certainly we do not read of Jewish “missionaries” (see comment on Acts 1:8).

appearances in Acts, 8:4, 40) and εὐαγγελίζω (8:4, 40) framing Philip's ministry (8:5–40); he was one who “went” and preached as he traveled. It is also employed again in the more general mention of the scattered ones who founded Diaspora churches, including Antioch (11:19), and in Paul's itinerant ministry of evangelism and confirmation (13:6, 14; 14:24; 15:3, 41; 16:6; 18:23; 19:1, 21; 20:2).²¹¹ That they continued propagating the word despite knowing of Stephen's fate for the same “offense” testifies to their courage;²¹² their flight from Jerusalem was practical, not cowardly (cf. Acts 9:24–25; 14:6; 20:3; Luke 21:21).

3. Samaria Receives the Word (8:5–25)

Stephen may not have had the Samaritan mission in mind in Acts 7 (see comment there), but for Luke the sort of message reported in Acts 7 helped make such missions theologically acceptable. A kind Samaritan (Luke 10:33–35) and a grateful Samaritan (17:16–18) prefigure the response and acceptance of Samaritans as neighbors (10:36–37; cf. Lev 19:18 with 19:34)²¹³ and hence the beginning of the mission beyond Jerusalem (Acts 1:8).²¹⁴ Luke, who has emphasized ministry to the marginalized throughout his Gospel, portrays Philip's mission to the Samaritans positively.²¹⁵

Luke has prepared his audience for the revival in Acts 8 and also for the involvement of the apostles only after Philip's ministry (8:14). Samaritans competed with Jerusalem, whose temple they resented (Luke 9:52–53; see comment on Acts 7:15–16),²¹⁶ hence provoking the opposition of the disciples (Luke 9:54–55).²¹⁷ To embrace the Samaritans without serious catechesis (at the least, Luke does not mention it) was to agree not to make the temple or Jerusalem, cornerstones of Jewish faith, a matter of division.²¹⁸

In Acts 8:5–13, Luke traces the success of Philip's Samaritan mission (including the discussion of Simon, 8:9–11). Again, signs invite attention for the gospel (8:6–7, 13). In 8:14–17, Jerusalem ratifies (and assumes responsibility for) the Samaritan mission. This passage also emphasizes the importance of the Holy Spirit to complete the mission (cf. 1:4–5). Because this mission has the approval of God and the Jerusalem apostles, the reader can anticipate the same for the Gentile mission that follows.

211. Luke sometimes applies the term “went about” to spreading the good news (Luke 5:15; 9:6; Acts 9:32; 10:38), but it is not a technical term for this (most Lukan references; see Knox, *Jerusalem*, 217–18). Because the Hellenists moved north, Baum, *Gospel*, 145, compares them with Matthew's community, believing that many settled in Palestine north of Jerusalem.

212. Continued activity despite grief might be noteworthy (Sen. E. *Controv.* 4.pref. 4–6) but, in the face of challenges, could be heroic (see comment on Acts 20:24).

213. On the theology of Luke 10:25–37, see, e.g., Keener, “Invitations,” 202–7; on its relevance here (and that of Luke 17:11–19), see Spencer, *Philip*, 62–69. For Jesus's relations with Samaritans as prefiguring the Samaritan mission in Acts, see fully Samkuty, *Samaritan Mission*, 99–121, esp. 121.

214. On the relevance of Acts 1:8 here, see further Spencer, *Philip*, 69–70; Jervell, *Apostelgeschichte*, 254.

215. See Spencer, *Philip*, 32–53. On Philip's mission as a missionary model, see Dormeyer and Galindo, *Apostelgeschichte*, 125.

216. Though cf. the apparent obedience of the Samaritan in Luke 17:12–19 (the shared experience of leprosy apparently had broken down other social taboos).

217. They may have been received in another Samaritan village (Luke 9:56), but Luke (who prefers neat, hence more reader-friendly, chronological schemes) makes no effort to emphasize that point so early in his narrative. On the relevance of Luke 9:51–56, see Spencer, *Philip*, 54–62. Samkuty, *Samaritan Mission*, 125–50, argues that Acts 8:4–25 repeats and reverses many themes in Luke 9:51–56, legitimating the Samaritan mission.

218. Jervell, *People of God*, 126, thinks that the Samaritans' conversion makes them “good Jews,” but Simon's behavior (Acts 8:19; and surprise at the rebuke, 8:24) might count in favor of lack of detailed instruction at this point. See the criticism in Samkuty, *Samaritan Mission*, 193–97.

In 8:18–24, God’s agents have to confront the syncretistic, magical worldview of a convert (cf. 19:18); Luke’s apologetic regularly dissociates the Christian movement from magic.²¹⁹ The passage also emphasizes the necessity of perseverance and that sound understanding of the ways of God’s Spirit is important to avoid syncretism. Conversion by itself, in isolation from the apostolic message, does not guarantee sound understanding or perseverance. Finally, in 8:25, the apostles follow Philip’s example. The Hellenists thus bridge the gap for the Gentile mission. (Philip will also precede Peter in reaching Gentiles; note 8:27–40 before 10:1–11:18.)

Since Luke is not against Peter or the Jerusalem apostles (rather, Peter is a more central character in the book than Philip) and since Luke appears to have met Philip (21:8–10), it is likely that he believes his account of Philip’s inaugurating the Samaritan mission to be authentic. Likewise, he would hardly invent from whole cloth Philip’s ministry to a Gentile (8:26–40), since he already has the standard, institutional version of the earliest Gentile mission in the Cornelius narrative (Acts 10–11). Assuming that Philip was a fairly reliable informant (and he seems to have been trusted by Paul and the Caesarean church, 21:8–10), Luke’s account of Philip’s ministry in 8:5–40 likely is Luke’s rendition of genuine historical tradition.²²⁰ For further arguments for the essential reliability of Luke’s description of Philip’s Samaritan mission, see the introduction to 8:1b–40, above.

Excursus: Samaritans

Scholars have focused considerable effort on reconstructing the character of Samaritans and of Samaritan-Jewish relations.²²¹ Samaritans would be known by at least some people outside Palestine because of the Samaritan Diaspora (on which see comment below). Nevertheless, many Diaspora Christians would know little about Samaritans beyond what they found in the gospel traditions (Luke presupposes knowledge about them, but its essentials might be obtained from reading his narrative through);²²² it may be noteworthy that the NT epistles never allude to them (although even such Gospel staples as Pharisees occur only rarely in relevant passages, Pharisees being only in Phil 3:5). This probably suggests a genuinely Palestinian tradition behind their occurrences in early Christian sources.

Unfortunately, our sources for reconstructing Samaritanism are relatively late, often influenced by the same social currents that shaped late antiquity and early medieval rabbinic Judaism, sometimes including Islamic elements as well.²²³ Thus these

219. Luke’s emphasis is antimagical apologetic rather than any corrective (or the polemical magic charge) against trends in the Samaritan church (contrast Faivre and Faivre, “Rhétorique”).

220. Cf. Kollmann, “Philippus”: although Luke makes Philip transitional, he preserves the tradition that Philip already evangelized Gentiles, and hence Luke probably preserves genuine historical information. Pervo, *Acts*, 203, accepts a Samaritan mission and that Luke’s source (albeit not Philip himself) associated Philip with it.

221. For the emphasis on Samaritan studies, see, e.g., Hjelm, “Samaritans.” For work on the Samaritans, see, e.g., Crown, *Samaritans*; for Samaritanism and Jewish-Samaritan relations, see Samkuty, *Samaritan Mission*, 57–98; in the NT, e.g., Sloyan, “Samaritans”; in Luke-Acts, e.g., Böhm, *Samariem*; in Luke’s Gospel, Samkuty, *Samaritan Mission*, 99–121; in Acts, e.g., Maynard-Reid, “Samaritans”; Samkuty, *Samaritan Mission*, 125–227. I cite other sources in Keener, *John*, 589–613 passim, on which I also draw at points below.

222. See Luke 9:52; 10:33; 17:16. In other Gospel traditions, see Matt 10:5; John 4:4–42.

223. Scott, *Customs*, 199. Cf. also Christian elements in MacDonald, *Samaritans*, 419ff., passim. Thus the danger of reading Samaritan influence in other documents, whether early Christian writers or the Qumran scrolls (e.g., Ford, “Influence”).

sources are mentioned here where they may be relevant, but we should not rely on them more heavily than necessary. Nevertheless, Qumran confirms some readings in the Samaritan Pentateuch, suggesting a measure of continuity of Samaritan tradition.²²⁴

1. Samaritan Relations with Others

The Samaritans were friendly to Herod the Great (e.g., *Jos. War* 1.229), but Herod's benevolence with tax revenues earned him allies even among foreign Gentiles. After one bloody conflict in the mid-first century, Samaritans appealed to the Roman governor of Syria to punish the Jews (*War* 2.239; *Ant.* 20.125); the emperor, however, listened to Agrippa and executed the Samaritan leaders instead (*War* 2.245–46; *Ant.* 20.136).²²⁵

Both in Eretz Israel and in the Diaspora, Samaritans spoke Greek and were substantially hellenized.²²⁶ Even accounting for Jewish propaganda about the Samaritans, which would tend to overemphasize their paganism, Samaritans were probably already hellenized to a fair degree by the first century.²²⁷ Although the “Samaritan city” of Acts 8:5 might be ancient Shechem²²⁸ or some other Samaritan town (see discussion below) rather than Samaria—the latter having become the pagan city Sebaste²²⁹—receptivity to the antics of Simon the sorcerer suggests hellenization. His claim to be “the great power of God”²³⁰ suggests that Simon was in fact adapting some popular religious motifs of the Hellenistic East—all the more likely if the second-century tradition about what this meant²³¹ has any merit. This in turn suggests that despite the Samaritans' alienation from Sebaste (perhaps greater than Galileans' alienation from Tiberias and Sepphoris, Sebaste being more pagan), it had exercised some influence.²³²

224. See, e.g., 4Q158 frg. 6, expanding Exod 20:19–21 (*DSSNT* 201–2).

225. The tradition of resistance against foreign rulers was probably older, as in Judea (Alexander's era in Quint. Curt. 4.8.9; for genuine conflict between Alexander and Samaritans, see Meyers and Strange, *Archaeology*, 74).

226. Van der Horst, “Samaritans and Hellenism.” Cf. the iconographic image reflecting Greco-Persian influence in Bodzek, “Remarks.”

227. Some writers consider the Samaritans syncretistic (e.g., Reicke, *Era*, 27–30), but often so were popular Judaism and Christianity. For Samaritan phylacteries and amulets, see Gaster, *Studies*, 1:387ff. The pagan dedication earlier thought to be from south Samaria (Di Segni, “Toponym”) may be from southern Judea instead (idem, “Palinode”).

228. Bruce, *Acts*¹, 183; idem, *Commentary*, 177; Judge, *Pattern*, 13.

229. E.g., *Jos. Ant.* 15.292–96; Strabo 16.2.34. On Herod's palace there, see Barag, “Castle”; for his temple to Caesar, *Jos. War* 1.403; *Ant.* 15.298; on Sebaste more generally, see, e.g., the survey in Zangenberg, “Samaria,” 426–29.

230. A divine title in PGM 4.640; Luke 22:69; 1 Cor 1:24. “Powerful one of God” would be a more subdued claim (*Jos. Asen.* 4:7), but Simon claims to be an epiphany (see Ramsay, *Discovery*, 117–18; Haenchen, *Acts*, 303). “Great power” may contrast with the apostles' power in Acts 4:33 (cf. power and “great” signs in 6:8; 8:13) and esp. Luke 22:69. The phrase is familiar from Scripture, where God redeemed his people by great power (Exod 14:31; 32:11; Deut 4:37; 9:29; 2 Kgs 17:36; Neh 1:10; in the LXX, Neh 1:10) and created by great power (Jer 27:5; 32:17); cf. Philo *Mos.* 1.111; *Spec. Laws* 1.307; Mark 13:26; *Herm.* 39.11; 43.21; 51.5. The phrase simply refers to a powerful army in 1 Macc 3:10; 10:48, 69; *Jos. Ant.* 8.292; 9.61; 12.236, 329, 341; 13.58; *War* 1.345; *Life* 23, 378; *Ag. Ap.* 1.251.

231. Justin *1 Apol.* 26.3; *Dial.* 120.6; Iren. *Her.* 1.23.2. See Casey, “Simon,” 151–63; Munck, *Acts*, 305–8. A pagan male-female dyad such as the tradition suggests appears in other polemical sources (e.g., Iren. *Her.* 1.1.1; *Pesiq. Rab.* 20:2) and may reflect ideas prevalent among Samaritans influenced by Sebaste's paganism (see Flusser, “Goddess of Samaria,” 18–20).

232. Attempted hellenization began there as early as 2 Macc 6:2, but as in Jerusalem, its success was probably qualified.

Inscriptions from the Mediterranean world and papyri from Egypt reveal that Samaritans were known far from Samaria.²³³ A Samaritan Diaspora is attested,²³⁴ by the fourth century, some Samaritan presence (or merchandise) is attested even in Corinth²³⁵ and somewhat later in Thessalonica.²³⁶ Nevertheless, they were probably not well enough known to explain the prominence of Samaritans in Luke's writings, which seem to presuppose some knowledge of Samaritans from the Jesus tradition (cf. Luke 1:4; hence probably some successes by Jesus and/or his followers).

2. Were Samaritans Gentiles?

Samaritan religion, however, seems rooted in the general fabric of early Judaism before 70 C.E.²³⁷ Samaritans were distinct from Gentiles (Jos. *Ant.* 11.340 counts them as Jewish apostates), and Gentiles would have viewed them, despite some Jewish disclaimers, as a variation within Judaism.²³⁸ Josephus says that Jews complained that Samaritans claimed to be Jews when Jews prospered but (from Josephus's perspective, rightly) admitted that they were different when Jews endured hardship (*Ant.* 9.291; 11.341). (Justin Martyr, who grew up as a Gentile in Samaria, considered both Samaritans and Jews part of historic Israel, distinct from Gentiles [*1 Apol.* 53].)²³⁹ They worshiped the same God as Jews and shared roughly the same Pentateuch (see the introductory section on Acts 7 titled "Acts 7 and the Samaritans" [3.a.iv]). Thus this is not yet fully the "Gentile mission" but a transition toward it (cf. Acts 1:8).²⁴⁰ Even in a much later period, they had their own synagogues;²⁴¹ Samaritan tradition mentioned their own high priests.²⁴² Paganism in the Samaritan region²⁴³ was, undoubtedly, mainly due to Gentiles settled there, especially in Sebaste.²⁴⁴

Later rabbinic opinion as to the degree of Samaritans' Jewishness varied according to rabbi, period, and issue, though none of the rabbis viewed the Samaritans in a positive light. These rabbis sometimes debated whether to treat Samaritans more as Jews or as Gentiles on particular matters.²⁴⁵ But they often considered them impure and would have disapproved of intermarriage with them.²⁴⁶ Some ruled that

233. See Montevicchi, "Samaria e Samaritani."

234. See, e.g., *CPJ* 3:103, §513; 3:105, §514; Kraabel, "Evidence"; van der Horst, "Diaspora"; in Thessalonica, Levinskaya, *Diaspora Setting*, 156; Llewelyn, *Documents*, 8:148–51, §12 (on Delos, third or second century B.C.E.; more recently, allowing Jewish residents while questioning the synagogue, cf. Matassa, "Myth"). Evidence in Thessalonica, Syracuse, and Rome is from several centuries later (Pummer, "Samaritans," 471).

235. McRay, *Archaeology*, 320.

236. See Levinskaya, *Diaspora Setting*, 156, for a bilingual Greek-and-Samaritan inscription (fourth to sixth centuries C.E.), quoting Num 6:22–27.

237. Pummer, "Offshoot"; Crown, "Schism"; Coggins, "Samaritans in Josephus." They probably shared common traditions even in the Persian period (Knoppers, "Gerizim").

238. Coggins, "Samaritans in Josephus"; for common elements, Hjelm, "Samaritans." Many scholars believe that Samaritan and Jewish cults separated only in Hellenistic times (Macchi, "Sacrifice samaritan").

239. Perhaps because of his own upbringing in Neapolis near Shechem (Justin *1 Apol.* 1.2). But while Justin calls himself a Samaritan geographically (*Dial.* 120.6), he was ethnically a Gentile, as he acknowledged (41.3), probably a Roman (see Osborn, *Justin*, 6, from whom I also derived some of the above references).

240. Witherington, *Acts*, 280 (arguing against Johnson, *Acts*, 150), though Witherington's doubt that this ministry leads to the Gentile mission is correct only from the standpoint of those inside the story world, not Luke's overarching perspective. Cf. also Thomas and van Aarde, "Samaria."

241. See Magen, "Bty-knst."

242. Gaster, *Studies*, 493ff.

243. E.g., a Greek pagan prayer for Hadrian in southern Samaria (Di Segni, "Toponym").

244. E.g., Jos. *Ant.* 15.292–96; Strabo 16.2.34; for its temple to Caesar, Jos. *War* 1.403; *Ant.* 15.298.

245. E.g., *m. Demai* 3:4; *y. Ber.* 7:1, §7.

246. E.g., Amoraic comments on *m. Qidd.* 4:3; Anderson, "Samaritan Literature," 1053.

the Samaritans were to be treated like Gentiles in some respects.²⁴⁷ Especially later rabbis could view them as Gentiles²⁴⁸ and as “lion-proselytes,” less than genuine converts to the true Jewish religion.²⁴⁹ Later traditions declare that some rabbis openly contended against the Samaritan claim to descent from Joseph (*Gen. Rab.* 94:7), and some scholars marshal earlier Jewish evidence from the Qumran scrolls for the same idea.²⁵⁰

Nevertheless, most Jewish teachers did not regard Samaritans as fully Gentile, and many rabbinic disputes differ over the degree to which particular laws should treat them as Gentiles or as Israelites;²⁵¹ often they appear as an intermediate class somewhere between these standard categories. Thus an Israelite cannot suckle a Gentile child²⁵² but can suckle a Samaritan;²⁵³ an Israelite should beware of the treachery of Gentile barbers, but Samaritan barbers could be trusted.²⁵⁴ Most rabbinic texts present them not as theological heretics or moral sinners but as schismatics defining their own social group as against Judaism.²⁵⁵

This is not to imply that most Jewish people thought well of Samaritans morally or trusted them. Amoraim give examples of wicked Samaritans (*Lam. Rab.* 1:1, §§14–15). Although Jewish sages might acknowledge Samaritan fidelity to their own interpretation of Torah, some Jewish texts present the Samaritans as sinful; thus Samaria was founded by those who rejected Jeremiah’s call to repentance (*4 Bar.* 8).²⁵⁶ Later rabbis rejected most kinds of testimony from Samaritans.²⁵⁷

3. Conflict between Jews and Samaritans

Judaism mostly looked down on Samaritans. Jewish tradition indicated that hostilities had begun immediately after some Jews returned from the exile;²⁵⁸ although many scholars mistrust the OT account of Samaritan origins (2 Kgs 17:24–33) as polemical,²⁵⁹ it is hard to deny at least the mixing of remaining Israelites with

247. E.g., *t. ‘Abod. Zar.* 2:8. Heave offerings were acceptable from either (*m. Ter.* 3:9). Rabbis felt that Samaritans were liable if their cattle gored Israelite cattle, but not the reverse (*b. B. Qam.* 38b, bar.).

248. *B. Sanh.* 57a, unless “Cuthean” was a censor’s substitute for “goy” here (Soncino trans. n. 5). Some rabbis in *b. Meg.* 25b suspect them of idolatry.

249. *B. Qidd.* 75b (R. Ishmael, vs. R. Akiba); *Num. Rab.* 8:9; cf. Hoening, “Conversion,” 58.

250. See Schuller, “4Q372,” on 4Q372 frg. 1.

251. E.g., *t. Ter.* 4:14; *y. Ketub.* 3:1, §3 (late Tannaitic); *Ber.* 7:1, §7.

252. *T. ‘Abod. Zar.* 3:3; cf. *m. ‘Abod. Zar.* 2:1. Contrast later haggadah concerning Sarah nursing Gentiles (*Gen. Rab.* 53:9; *Pesiq. Rab Kah.* 22:1).

253. *T. ‘Abod. Zar.* 3:1. In 3:1, Israelites could also leave cattle in Samaritan inns because they were not suspected of bestiality.

254. *T. ‘Abod. Zar.* 3:5. They are also more trustworthy than Gentiles in some other respects (*m. Demai* 3:4; *b. Bek.* 11b). People made regular use of barbers (Lewis, *Life*, 136; Goodman, *State*, 59–60; *ILS* 7414), but a hostile one could prove dangerous (Mart. *Epig.* 3.74.1–2).

255. Sonne, “Use,” 154–62. Thus earlier traditions often viewed them as lax Jews (*Deut. Rab.* 2:33).

256. For anti-Samaritanism in Judaism in general, see Dexinger, “Limits.”

257. *M. Giṭ.* 1:5; *y. Giṭ.* 1:4, §2; as also from women (*Jos. Ant.* 4.219; *Sipra VDDeho. pq.* 7.45.1.1; cf. Justin. *Inst.* 2.10.6), slaves (*Jos. Ant.* 4.219; cf. Prop. *Eleg.* 3.6.20), and other groups. In some Amoraic texts, Samaria had its own local *shedim*-demons (Alexander, *Possession*, 29), although these also appear elsewhere.

258. E.g., *Neh.* 4:1–2; *Jos. Ant.* 11.84, 114. Although he seems too skeptical about the biblical schism, Coggins, *Samaritans*, 163–64, is surely right about the continued deterioration of relations through the Hellenistic period to the early first century.

259. E.g., Irudaya, “Samaritans.” In the fifth century B.C.E., Elephantine Jews, whose perspective would have differed from the Jerusalemite settlers, still regarded both Jerusalem and Samaria as Jewish centers (Bright, *History*, 407). But the original report was probably directed generally against Gentiles, not against Samaritans as we know them (see Dexinger, “Limits,” 106–7).

others whom the Assyrians settled there, as this was a standard Assyrian practice.²⁶⁰ In any case, hostility existed by the time of Neh 4:1–2 and is explicit in Sir 50:26.²⁶¹ Later Samaritans raided Judea.²⁶² Judging by Josephus’s rewriting of biblical accounts, more anti-Samaritan retellings of the biblical story were dominant by the first century.²⁶³

In one understanding of the development of Jewish-Samaritan relations, Jews and Samaritans worked together under common pressures between the revolts of 70 and 135, but as Samaritans became increasingly hellenized and syncretistic, second- and third-century rabbis became less tolerant of Samaritans and rejected them as virtual Gentiles by the fourth century.²⁶⁴

4. Animosity against Each Other’s Holy Sites

A major point of contention between Samaritans and Jews concerned their respective holy sites.²⁶⁵ Samaritans regarded Gerizim as “the holiest of mountains” (Jos. *Ant.* 18.85).²⁶⁶ The Judean John Hyrcanus enslaved Samaritans and destroyed the Samaritan temple on Mount Gerizim in 128 B.C.E.²⁶⁷ Scholars have cited some possible archaeological evidence for this destruction,²⁶⁸ but the evidence remains disputed.²⁶⁹ Probably the temple discovered on Tell er-Ras (the northern peak of Gerizim) is a pagan one, the Samaritan temple being on the main summit.²⁷⁰ Excavations have revealed second-century B.C.E. Aramaic and Hebrew inscriptions concerning the sanctuary and cultic dedications; their current state shows that they were deliberately smashed,²⁷¹ presumably out of hostility.

260. See Bright, *History*, 271, 276, 283 (he also cites [276n20] evidence for Mesopotamians resettled at Shechem); cf. Gordon, *Near East*, 235; Yamauchi, *Stones*, 75; for Assyrian architecture in post-fall Israel, see Aharoni, *Archaeology*, 251–53. Sargon II (721–705) explicitly claims to have settled other peoples in Samaria (*ANET* 286); 2 Kgs 17:27 also echoes Sargon’s own characteristic language (Paul, “Diction,” 74). I am thus less inclined to view the Judahite portrait as a purely later construct.

261. Cf., e.g., Tournay, “Polémique” (rightly noting much polemic, esp. Sir 50:26 and later sources; but some connections are strained).

262. Jos. *Ant.* 12.156. Josephus apparently has an extrabiblical, specifically anti-Samaritan source (Marcus, “Schism”).

263. See esp. Thornton, “Anti-Samaritan Exegesis” (noting esp. Jos. *Ant.* 4.200, 203, 305–8; 5.68–70, 115–16, 120–317). For the extant Samaritan version of their origin, see MacDonald, *Samaritans*, 15ff.

264. Friedheim, “Relations judéo-samaritaines.” On Samaritan syncretism in the third century, see Meshorer, “Sacrifice.”

265. Cf., e.g., 4Q372 1 12 (with 4Q371 1, 8, 11, in *DSSNT* 333). It was the major known issue of rift between the groups (see Spencer, *Philip*, 73–75).

266. Rabbis viewed Mount Gerizim as the Samaritan counterpart to the Jewish temple (*b. Yoma* 69a); just as Jewish synagogues often pointed toward Jerusalem (see above), so it is reported that an excavated Samaritan synagogue points toward Mount Gerizim (Goodenough, *Symbols*, 1:262–63). For fuller details on Samaritan loyalty to Gerizim, see sect. 3.a.vi.4, “Samaritans and the Temple,” a subsection of “The Land,” in the introduction to Acts 7:2–53 (pp. 1350–51).

267. Jos. *War* 1.63–66; *Ant.* 13.255–56. By contrast, Antiochus IV had sought to paganize both the temple on Mount Gerizim and the Jerusalem temple (2 Macc 6:2). John Hyrcanus’s act was a pivotal event in the Judean-Samaritan schism (see, e.g., Tharekadavil, “Gerizim”). For the Samaritan tabernacle tradition, see Pummer, “Tabernacle.”

268. See Bull, “Report XII” 41; Finegan, *Archaeology*, 35; Kee, “Tell-Er-Ras”; Garner, “Temples”; Schwank, “Berg”; Seger, “Shechem,” 23; cf. Bull and Wright, “Temples.” The first new temple built on the site was apparently the pagan, Hadrianic one (early second century C.E.).

269. Anderson, “Temple,” doubts its existence; but cf. McRay, “Archaeology,” 96. For other evidence proposed for the Samaritan temple, see Stern and Magen, “Evidence.”

270. Zangenberg, “Samaria,” 424–25. Tell er-Ras would have been visible from Jacob’s well (Bull, “Context,” 59).

271. See Naveh and Magen, “Inscriptions.” Cf. this practice in earlier Israel (Albright, *Yahweh*, 194–95).

According to a Jewish atrocity report, some Samaritans in the early first century defiled the Jerusalem temple one night with human bones; this in turn provided the reason for Jews' prohibiting Samaritans' attendance at the Jerusalem Passover²⁷² (perhaps a current "hot" issue in the original incident behind Luke 9:53). Later rabbis believed that Samaritans could be received back into the covenant only by renouncing Gerizim, affirming Jerusalem, and endorsing faith in the resurrection of the dead.²⁷³ In a later story, a Samaritan mocked a rabbi's destination, Jerusalem; the Samaritan insisted that Gerizim was a holy mountain and Jerusalem a dunghill, and the rabbi retorted that the Samaritan wanted the idols hidden at Gerizim.²⁷⁴ In a similar story, a Samaritan jeered that a rabbi en route to Jerusalem was visiting a dunghill whereas Gerizim alone had not been covered in the flood. The rabbi's ass-driver answered wisely from Scripture, prompting the rabbi to exalt the ass-driver over himself.²⁷⁵

Samaritans' very insistence to be descendants of Israel could have rendered their temple all the more suspect to Jews: although some Jews felt that God allowed Gentiles some leeway, the people of Israel were allowed to worship nowhere but the temple.²⁷⁶ Some Jewish sages prohibited Samaritans from circumcising Israelite boys because they expected them to do it "in the name of Mount Gerizim."²⁷⁷ As noted above, a late tradition allows for the acceptance of Samaritan converts (though none are known) only if they embrace the resurrection and also honor Jerusalem instead of Gerizim.²⁷⁸ In another story, R. Ishmael ben Jose provoked the Samaritans to violence by charging that they worshiped idols under their mountain.²⁷⁹ In one apocryphal story, Samaritans kept the Romans from allowing the Jews to rebuild the Jerusalem temple in Hadrian's reign.²⁸⁰

According to Josephus (a partisan on the Judean side), further conflicts between Jews and Samaritans erupted less than two decades after events depicted here. Galileans typically passed through Samaria en route to festivals in Jerusalem (Luke 9:51–53; John 4:3–4), but some Samaritans (probably hooligans) attacked and killed some of these Galilean pilgrims (Jos. *Ant.* 20.118). Unable to secure satisfactory attention from the Roman governor Cumanus, Jews took matters into their own hands and retaliated against Samaritans (20.121). Cumanus then armed and aided the Samaritans in massacring many Jews (20.122).

272. Jos. *Ant.* 18.30. In view of Num 19:11, Samaritans themselves would hardly have approved of touching human bones, but if they could do it when necessary for funerals (for one later probable Samaritan burial ground, see van den Brink, "Burial Ground"), this "atrocity report" is not impossible. On the genre of oral atrocity reports, see discussion in Bailey, *Peasant Eyes*, 75–77 (noting Luke 13:1); for examples, see, e.g., Jos. *Ant.* 17.237; y. *Sukkah* 5:1, §7; *Ta'an.* 4:5, §10; *Lam. Rab.* 3:51, §9.

273. Le Cornu, *Acts*, 403, noting that Epiphanius (*De mens.* 16.7–9) also believed that Jews recircumcised any Samaritan converts.

274. Y. *Abod. Zar.* 5:4, §3; cf. *Gen. Rab.* 81:3.

275. *Gen. Rab.* 32:10; 81:3. One version of the story concerns R. Jonathan, and the other R. Ishmael ben Jose, both Tannaim; the story was popular, and later tradition settled on R. Jonathan (*Deut. Rab.* 3:6; *Song Rab.* 4:4, §5). Probably in response to the Samaritan tradition in this passage denying that the flood covered Gerizim, R. Levi (third-century C.E. Palestine) denied that it covered Eretz Israel (*Gen. Rab.* 33:6; cf. *Sipre Deut.* 37.3.5). On the low status of donkey drivers, cf., e.g., Diog. Laert. 6.5.92.

276. E.g., *Sipra A.M.* par. 6.187.1.1. God gave Israel the temple (and other gifts) as a reward for worship (*Gen. Rab.* 56:2).

277. T. *Abod. Zar.* 3:13 (the tradition probably stems from ca. 200 C.E.); b. *Abod. Zar.* 27a, bar.; y. *Yebam.* 8:1, §10. One rabbi dissents from the ruling but not from the view that Samaritans circumcise in this name.

278. Bamberger, *Proselytism*, 134.

279. Y. *Abod. Zar.* 5:4, §3.

280. *Gen. Rab.* 64:10.

5. The Languages for Preaching

In what language would the Hellenist Philip have preached to the Samaritans? Most Samaritan villagers spoke Aramaic,²⁸¹ hence the importance of the Samaritan Targum.²⁸² Nevertheless, not only did most of the Samaritan Diaspora in the eastern Mediterranean speak Greek; the Greek inscriptions from Mount Gerizim show that Greek was widespread among Samaritans in the homeland as well.²⁸³ Philip (who later ministered on the hellenized coast, especially Caesarea, Acts 8:40) undoubtedly spoke his first language, Greek, in the town; if Luke implies at all that he ventured into the villages, it was only in the company of two native Aramaic-speakers, Peter and John (8:25).

a. Philip's Success versus Simon (8:5–13)

In 8:5–13, Luke traces the success of Philip's Samaritan mission (including the discussion of Simon, 8:9–11). Again signs invite attention for the gospel (8:6–7, 13); Philip is full of the same signs-producing Spirit as Stephen was (6:3, 8).²⁸⁴ Philip in 8:5 is a specific example of the preachers of 8:4, just as Stephen in 6:8 was an example of the word spreading in 6:7. In both cases, however, Luke offers particularly dramatic examples, not merely random ones (cf. 6:5).

I. "A SAMARITAN TOWN" (8:5)

Most scholars envision here a major Samaritan town rather than the other possibility, Sebaste, a Greek city on the site of ancient Samaria.²⁸⁵ Because the textual reading "the town" is better attested than the anarthrous reading "a town,"²⁸⁶ it is possible that Luke refers to Sebaste, which was perhaps the only "city" in the district; certainly it was the only one of the major cities listed in *Jos. War* 1.156; 2.96–97 that lay in Samaria.²⁸⁷ But an anarthrous reading provides a likelier antecedent for "that city" in Acts 8:8.²⁸⁸

Other arguments work against the need to view Luke's "city" as Sebaste. Luke regularly employs πόλις not only for cities like Jerusalem but also for much smaller towns (e.g., Luke 2:3–4, 11; 4:31, 43; 7:11–12; 9:10) and even small villages (e.g., 1:26, 39; 2:39; 4:29).²⁸⁹ The elevated city of Sebaste was also thoroughly hellenized, a characteristic that does not fit this narrative very well.²⁹⁰ Herod the Great had a palace at Sebaste,²⁹¹ but it was a Greek city, not a Jewish one. Herod also built an Augustus temple for the Gentiles he settled here (*Jos. War* 1.403; *Ant.* 15.298).²⁹² He named

282. Cf. Tal, "Traditions."

283. Van der Horst, "Languages."

284. For the pattern of signs inviting attention, see discussion in Keener, *Acts*, 1:541–49.

285. E.g., Judge, *Pattern*, 13; Munck, *Acts*, 73; Hengel, "Geography of Palestine," 70–76; Johnson, *Acts*, 145; Böhm, *Samaritanien*, 279–308.

286. Metzger, *Textual Commentary*, 355–56, notes the strength of the external evidence (although, on the basis of internal evidence, the editorial committee for the United Bible Societies' *Greek New Testament* preferred the anarthrous reading).

287. See esp. the thorough case of Zangenberg, "Simon Magus," 520–25; noted as a possibility in Barrett, *Acts*, 402. Samaria became Sebaste (*Jos. Ant.* 15.292; *War* 2.69), which remained a "city" (*Ant.* 17.289; *War* 1.64, 229, 299, 403; 2.69).

288. So Metzger, *Textual Commentary*, 355.

289. On reasons for the widespread use of πόλις even for towns that did not share republican governments in the Hellenistic sense, see Judge, *Pattern*, 14. On Luke's wide usage, see Oakman, "Countryside," 170.

290. With Barrett, *Acts*, 402.

291. See Barag, "Castle."

292. Now excavated; see Foerster, "Art," 988–89; McRay, *Archaeology*, 146–47. For archaeological material on Herodian and post-Herodian Sebaste, see, e.g., Cornfeld, *Josephus*, 76–77n403c.

it “Sebaste” (Σεβαστός is Greek for the Latin *Augustus*) in honor of the emperor (*War* 1.403; *Ant.* 15.292, 296; Strabo 16.2.34). But the name “Sebaste” quickly grew popular, leaving behind the older name “Samaria.”²⁹³ Sebaste’s strong walls (Jos. *Ant.* 15.297–98) ran for two miles around the city; two of the city’s towers still remain on the west.²⁹⁴ The city’s main north-south thoroughfare entered its forum on the east and was colonnaded with some six hundred columns.²⁹⁵

Luke refers to ethnically Samaritan people (Acts 8:9, 25), and the designation “that city” (8:8) makes less sense when a city name would have been more appropriate (cf. Luke 9:5; 10:12; 18:3; though cf. also Acts 14:20–21). So compelling is the contrast between the narrative and widespread knowledge about Sebaste that some scholars opt (as some early scribes apparently did) for the less attested anarthrous reading.²⁹⁶ A likelier alternative is that Luke means “the [chief, or capital] city of [the region of] Samaria.”²⁹⁷ Luke’s anarthrous “village of the Samaritans” (Luke 9:52) suggests that Luke knew that the Samaritans had many villages, not just one town. Hengel provides several arguments in favor of a reference to Samaria’s capital city here (rather than Sebaste), of which the most significant follow:²⁹⁸

1. Luke always uses “Samaria” for the region of the Samaritan people (Luke 9:52; 10:33; 17:11, 16; Acts 1:8; 9:31; 15:3), including, inescapably, this context (Acts 8:1, 25).
2. Sebaste was a Gentile city.
 - a. Herod refounded Sebaste on the site of Samaria after more than eighty years of desolation there.
 - b. Its territory was much smaller than that of the Samaritans.
 - c. Sebaste remained on Rome’s side (Jos. *War* 2.406; cf. *Ant.* 17.289), but ethnic Samaritans tried to rebel (*War* 3.307–15).
3. Josephus, like Luke, uses “Samaria” only for Samaritan areas; Sebaste was a different city entirely.
4. Syncretism attached to the later gnostic cult of Simon should not be read back into the Simon account here.²⁹⁹

If the town is not Sebaste, some scholars opt for Gitta, Simon’s reputed birthplace (Justin *I Apol.* 26).³⁰⁰ Hengel thinks that this suggestion is clearly wrong; it was too insignificant, mentioned only in sources about Simon in and after Justin.³⁰¹ More often scholars suggest Shechem, usually claiming that this was the chief town of the

293. Hengel, *Jesus and Paul*, 124; Bruce, *Commentary*, 177. Though Strabo and Josephus know the old name and though Luke might prefer a traditional biblical designation, the biblical title best fits the ethnic people (see below).

294. McRay, *Archaeology*, 145.

295. *Ibid.*, 146.

296. Lake and Cadbury, *Commentary*, 89, noting that in the NT, “Samaria” indicates “the district, not the city,” and that “the city of Samaria” as a city name is awkward Greek.

297. Munck, *Acts*, 73; Hengel, “Geography of Palestine,” 70.

298. *Ibid.*, 70–76.

299. I do see syncretism here, but without strong movements to counter it (such as existed in Judea), one would expect some syncretism on the popular level in heavily hellenized Samaria, possibly some of it from Sebaste (see comment on Acts 8:9–11). Greek paganism appears in Samaritan territory (e.g., Di Segni, “Toponym”).

300. Bruce, *Commentary*, 177; idem, *Acts*!, 183; one suggestion in Lake and Cadbury, *Commentary*, 89. Excavations suggest the multicultural character of this town (Zangenberg, “Samaria,” 419–20). Simon hails from Gitta also in Hippol. *Ref.* 6.2.

301. Hengel, “Geography of Palestine,” 75.

Samaritan people, near Mount Gerizim. It was later refounded as Neapolis (“New City”; modern Nablus),³⁰² which Pliny the Elder in the first century names as one of Samaria’s towns along with Sebaste.³⁰³ This would make good sense of the foreshadowing mention of Shechem in Acts 7:15–16,³⁰⁴ though one wonders why, if Luke knew it to be Shechem, he omits the name here while including it in Acts 7.³⁰⁵

Shechem, however, though prominent earlier, was destroyed in the late second century B.C.E. and never became a genuine Hellenistic polis.³⁰⁶ It did not recover until it was replaced by Roman Neapolis, slightly to the west, under Vespasian.³⁰⁷ Because excavations are incomplete, we cannot yet be certain about the nature of occupation in this period.³⁰⁸ Despite lack of clear evidence for them,³⁰⁹ some inhabitants are likely; nevertheless, a significant city is not.³¹⁰ Certainly it was influential after its refounding in 72 C.E., but then its character was quite different; Justin, who grew up there (*1 Apol.* 1), was a Gentile, likely a Roman by birth.³¹¹ Still, coins so far recovered in Neapolis avoid pagan symbols, in contrast to those from nearby Sebaste.³¹² Whether Luke would have known of Neapolis, built after his visit to Judea and outside his primary geographic range, is uncertain; certainly it did not exist, at least not as Neapolis, during Philip’s early ministry.

Hengel believes that it remained insignificant in this period,³¹³ though limited excavations make this impossible to prove. He suggests instead Sychar (modern Askar),³¹⁴ which may have been an important Samaritan city, was also near Mount Gerizim, and may have already known something of Jesus (John 4:5).³¹⁵ He concludes that Luke refers to this most prominent Samaritan town, whose name Luke either did not know or did not regard as relevant. Luke may have supposed that Samaria had a capital like Judea’s Jerusalem, but whereas he believed that Jerusalem had cities or towns (perhaps suburbs) nearby (Acts 5:16), he knew that Samaria had only villages (8:25).³¹⁶ Whether Shechem or another town is in mind, Luke presumably intends the largest gathering of Samaritans in the region.

302. Lake and Cadbury, *Commentary*, 89; Goulder, *Type and History*, 164. Jos. War 4.449 makes the identification explicitly but also notes that its exact location fell at the Samaritan village of Mabartha.

303. Pliny E. *N.H.* 5.14.69 (employing *oppida*, “towns,” for Neapolis and Sebaste and not the diminutive *oppidula*, which could be used for “small towns”).

304. See, e.g., Spencer, *Philip*, 70–81, 85 (also citing ancient texts that demonstrate Jewish antipathy toward Shechem as a Samaritan site).

305. The allusion to Acts 7:15–16 is still relevant, since Luke would presumably know Shechem to be in Samaritan territory.

306. Ortiz, “Archaeology of Israel,” 106; Zangenberg, “Samaria,” 404, 416; Wahlde, “Archaeology,” 558.

307. Seger, “Shechem,” 23.

308. Ortiz, “Archaeology of Israel,” 106.

309. See, e.g., Zangenberg, “Samaria,” 404, 416; Wahlde, “Archaeology,” 558.

310. One may compare the Greek residents in Corinth between the destruction of old Corinth and the founding of new Corinth; see comment on Acts 18.

311. He calls himself a Samaritan (Justin *Dial.* 120.6), but he was uncircumcised (*Dial.* 28.2), knew nothing of Scripture until adulthood (7.1), and claims to have been a Gentile (41.3; Osborn, *Justin*, 6). For Neapolis as a pagan city, see Zangenberg, “Samaria,” 429–30.

312. Pummer, “Samaritans,” 471.

313. Hengel, “Geography of Palestine,” 73.

314. On which see also Zangenberg, “Samaria,” 416–18; on the identification with Askar, see also Wahlde, “Archaeology,” 557–59.

315. Hengel, “Geography of Palestine,” 74. The sources that he cites are mostly late, but John 4:5 remains relevant, especially if John assumes that some of his audience knows the name of the town. Supporting John’s frequent reliability, see, e.g., Keener, *John*, 3–139; more fully, Bauckham, *Testimony*; Blomberg, *Reliability of John’s Gospel*; for a different perspective, see, e.g., Lincoln, *John*, 26–50. Meier, “Samaritans,” suggests that Jesus was, at the least, not hostile to Samaritans; given the Gentile mission arising from his movement, I suspect that we may grant still more credence to the gospel tradition about Samaritans.

316. Hengel, “Geography of Palestine,” 76. On the many Samaritan villages, see Zangenberg, “Samaria,” 408–11; for “towns,” see 411–12.

II. PREACHING CHRIST (8:5)

Scholars often suggest that the Samaritans may have heard Philip's "preaching"³¹⁷ of Christ (the Anointed One) in terms of their own traditions of the Taheb.³¹⁸ This was the Samaritan concept most equivalent to the Jewish Messiah, but it was quite different from the Jewish concept. Samaritans spoke not of a Davidic Messiah or, indeed, much of an "anointed" ("messianic") agent per se but of the Taheb, the "Restorer," an eschatological prophet like Moses (*Memar Marqah* 2.40.28; 4.12).³¹⁹ Like Moses (see comment on Acts 3:22), the Taheb would also rule.³²⁰ As best we can tell, they believed that the era of divine favor (*rahutha*) ended soon after Moses, in the time of Eli, with Israel's religious practices becoming defiled from Samuel's time onward. The era of divine displeasure (*panutha*) now prevailed, but the Taheb, the prophet like Moses, would restore the era of divine favor.³²¹ So central was the new-Moses idea to the Taheb's mission that the Samaritan Pentateuch adds Deut 18:18 to the Decalogue in the Samaritan Pentateuch version of Exod 20:21b.³²²

Although this may be how the Samaritans initially related to Stephen's message, such niceties were probably lost on Luke's audience and not essential to his point. Josephus, another early writer who fails to specify the nature of their messianic expectation, also attests that they acted as if they expected a messianic figure of some sort (*Ant.* 18.85–87).³²³

But if Philip was a Hellenist, why would he travel to Samaria, and how would he preach there? Samaritans had writings in Hebrew, but in their largest center, they probably knew Greek no less than did Galileans. The influence of Sebaste on Samaria was probably no more direct than that of Tiberias or Sepphoris on rural Galilee and perhaps less. But it may have had *some* influence, and significant evidence indicates that Samaritans, both in the Diaspora and Palestine, used Greek and were hellenized.³²⁴ This may have been less true of the outlying villages around this town, but it was especially bilingual apostles who preached there (Acts 8:25). It is also of note that Samaria welcomed Judeans rejected by fellow Judeans as apostates (*Jos. Ant.* 11.346–47).³²⁵

III. PHILIP'S SIGNS (8:6–8)

Philip's miracles connect him with other leading figures in Luke's story of Jesus and his followers.³²⁶ Clearly, not only the apostles but also other Spirit-filled leaders whom they approved performed signs (Acts 6:8), as well as others who lacked an explicit connection with the Twelve (9:17–18). On ὁμοθυμαδόν, see comment on Acts 2:46. Although signs had been dramatic in Jerusalem (2:43; 3:6–8; 5:5, 10,

317. On the term κηρύσσω, see comment at Acts 5:42, though the term is first used in Acts here in 8:5.

318. E.g., Witherington, *Acts*, 282; Dunn, *Acts*, 108.

319. The *Memar Marqah* texts are from Boring, Berger, and Colpe, *Commentary*, 264–65. This background is regularly noted; e.g., Klausner, *Jesus to Paul*, 295; Cullmann, *Christology*, 19; Teeple, *Prophet*, 63–64; MacDonald, *Samaritans*, 362–63; Bruce, *History*, 37–38; Longenecker, *Christology*, 34; Olsson, *Structure*, 191; Appold, *Motif*, 72. The Mosaic Taheb was the fifth article of the Samaritan creed (Brown, *John*, 1:172).

320. See Dexinger, "Taheb-Vorstellung."

321. MacDonald, *Samaritans*, 15; Bruce, *Books*, 131–32. Bowman, *Documents*, 263–83, collects materials on the Taheb, but our sources are unfortunately quite late (nineteenth century). Purvis, "Samaritans," 183, adds that the Taheb would also be like Joshua.

322. Bowman, *Documents*, 21; Boring, Berger, and Colpe, *Commentary*, 264–65. For the emphasis on Moses in the third- or fourth-century C.E. Samaritan *Memar Marqah*, see Bowman, *Documents*, 253.

323. With Witherington, *Acts*, 282. In Acts, Jesus's followers preach him as "Christ" especially to Jewish hearers (Acts 9:22; 17:3; 18:5, 28; 26:23), and Luke's audience probably assumed that the Samaritans would understand this concept as well.

324. See van der Horst, "Samaritans and Hellenism."

325. Samkutty, *Samaritan Mission*, 154; cf. Talbert, *Acts*, 69.

326. See Spencer, *Philip*, 44–45.

12–16, 19; 6:8; probably 4:33), missiologists typically report them with particular intensity in regions that are being evangelized initially (cf. Rom 15:19).³²⁷ Here (Acts 8:6) God confirms his desire to reach the Samaritans (1:8; cf. Luke 17:16–18).

Because Luke emphasizes exorcisms and the healing of paralysis (Acts 8:7), it is possible that Philip specialized in particular kinds of healing (cf. the plural *χαρίσματα* *ιαμάτων* in 1 Cor 12:9), but it is more likely that Luke reports only the most dramatic examples.³²⁸ Mere pain relief might be of benefit to the sufferers but would be of limited evidential value compared with more obvious signs. Lameness and paralysis were among the dramatic maladies most often reported (along with blindness) at the Asclepius temple,³²⁹ just as Vespasian heals both lameness and blindness in the propaganda in Suet. *Vesp.* 7.2.

More important is that healing of disabled limbs appears in Jesus's summary of his ministry in Luke 7:22, borrowing language from Isa 35:6.³³⁰ Luke provides more-detailed accounts of healings of the "paralyzed" in Luke 5:24–25; Acts 9:33–34 (elsewhere in the NT only at Heb 12:12) and of those unable to walk (*χωλοὶ*) in Acts 3:2–8 and 14:8–10 (another summary statement notes that they were healed through Jesus's ministry, Luke 7:22; they are also among the marginalized affirmed in 14:13, 21).³³¹ On *χωλός*, see fuller comment on Acts 3:2.

Paralysis was also a dramatic ailment inviting a dramatic miraculous cure. Ancient writers classed various ailments under similar titles; one may compare Hippocrates's discussions of *παραπληγία* (and cognates); some of the many afflicted with this during a winter epidemic died (Hippocr. *Epid.* 1.14.1–4); paralysis accompanied various sicknesses (2.2.24; 2.3.1.e; 6.7.1; 7.35).³³² Perhaps partly because of their visibility, the healing of those unable to walk continues to figure prominently in modern miracle reports.³³³

Many people could offer unverified claims of exorcism, but Luke reports dramatic confirmations of the exorcisms here, of the sort that ancients seem to have accepted (Jos. *Ant.* 8.48).³³⁴ The "loud shouts" of subject demons fit the parallel with Jesus's

327. I note reports in new evangelistic settings in Keener, *Miracles*, 30, 260n273, 262, 274, 306, 332–34, 367–68, 383, 384n218, 407, 418, 523, 652, 687n250, 704, 710, 729n113, 741n160, 748, 837n341, 839n357, 845.

328. Though ancient healing reports did know how to simply summarize—e.g., "every kind of sickness" (Strabo 8.6.15; Matt 4:23; 9:35; 10:1).

329. Case, *Origins*, 108; cf. Lake and Cadbury, *Commentary*, 90; see *Epid.* inscr. 4, 9 (in Grant, *Religions*, 57–58). For other healing reports of lameness, see Bultmann, *Tradition*, 232–33 (citing Lucian *Lover of Lies* 11; Suet. *Vesp.* 7; Philost. *Vit. Apoll.* 3.39; IG 4.951.107ff., 110ff., 113ff.; 4.952.86ff., 110ff., 132–33). Vespasian allegedly healed a lame man and a blind man (Suet. *Vesp.* 7.2); a rabbinic parable also joins them (e.g., *b. Sanh.* 91b; Johnston, "Interpretations," 508), and the rabbis often linked these categories (e.g., *b. Ber.* 58b; *Šabb.* 106b; *Ta'an.* 4a; *Ḥag.* 2a; 4a; 6a; *Ketub.* 17a; 39a; *Soṭah* 27a; *B. Qam.* 78b; *Sanh.* 45b; 71a).

330. Because this Q citation is probably authentic, Sanders thinks that the historical Jesus probably did view his miracles in terms of Isa 35 (*Figure*, 168; cf. also Witherington, *Christology of Jesus*, 44). Some apparently already counted as messianic the sorts of works depicted there (Stanton, *Gospel Truth?*, 186–87, cites 4Q521; 11QMelch II, 18); 4Q521 may blend imagery from Isa 35 with Isa 61 and other precedent, perhaps Elijah's miracles (for discussion, see Wise and Tabor, "Messiah"; Tabor, "Resurrection"; Collins, "Works").

331. For the lame as a character type in the LXX, see Roth, *Blind, Lame, Poor*, 107–8.

332. Hippocrates also referred to temporary paralysis of a leg and arm (*παραπληγικός*, *Epid.* 2.2.8).

333. Bush and Pegues, *Move*, 51–52, 56; Chavda, *Miracle*, 12–13 (a number of such healings, in the Democratic Republic of Congo), 146; De Wet, "Signs," 93–94 (following McGavran, "Healing and Evangelization," 294–96; for multiple healings in the Ivory Coast, 1973, involving J. Girard), 94–96 (multiple, in South Africa), 104 (paralysis, Argentina). I also witnessed one such occasion where I knew the parties involved. See further comment on Acts 9:34; extensive discussion in Keener, *Miracles*, 523–36.

334. See Theissen, *Miracle Stories*, 66–67 (citing Jos. *Ant.* 8.48; Philost. *Vit. Apoll.* 4.10, 20; Lucian *Lover of Lies* 16). In modern times, see Hes, "Role," 376.

story.³³⁵ Such behavior characterized later Christian exorcisms, apparently no less publicly and even more forcefully.³³⁶ (On exorcism, see excursus on Acts 16:16; also comment on Acts 5:16.) The spirits’ uncleanness cannot be limited to the Samaritan milieu, given Acts 5:16; Luke 4:36; 6:18. (On unclean spirits, see comment on Acts 5:16.)

Joy (Acts 8:8) is characteristic of conversions in Luke-Acts (see esp. Luke 15:5–7, 9–10, 23–24, 32; Acts 11:23; 13:48; 15:3; cf. Luke 10:20), including in the immediately following account of Philip’s ministry to an African official (Acts 8:39).³³⁷

IV. SIMON THE SORCERER (8:9–11)

This passage (esp. 8:6–13) contrasts Philip, God’s agent, with Simon the magician, probably as part of Luke’s antimagical apologetic. Spencer outlines the contrasts as follows:³³⁸

Simon the Sorcerer	Philip the Evangelist
Works wonders (8:11)	Works wonders (8:6, 13)
Draws crowds (8:9–10)	Draws crowds (8:6–7)
“Heeded” (8:10–11)	“Heeded” (8:6)*
Simon is “great power” (8:10)	Philip performs “great powers” (8:13)
Simon “amazes” Samaritans with his claims and magic (8:9, 11)	Philip’s miracles “amaze” the Samaritans (8:13)

* This connection (through the verb προσέχω) is also recognized by Witherington, *Acts*, 285 (noting that real conversion is therefore implied only at Acts 8:12). Of ten uses of the verb in Luke-Acts, these three constitute the only instance where the term appears more than once in a narrative. Heeding (προσέχοντες) the world leads to destruction (*Test. Job* 33:4).

I would add another contrast, although it is less verbal and more in terms of the larger narrative portrayal: whereas Simon claims to be someone great, seeking his own status (8:9; cf. 8:19), Philip acts only “in the name of Jesus” (8:12, 16). Simon similarly presupposes worldly notions of power (8:19), whereas Philip obeys counterintuitive, countercultural commands (8:26–30). Such contrasts between true and false signs workers evoke biblical portraits of Moses confronting Pharaoh’s magicians (Exod 7:10–12) or Elijah confronting the false prophets on Mount Carmel (1 Kgs 18:21–40).³³⁹ Pagan sorcerers could duplicate some divine signs (Exod 7:11, 22; 8:7), but they could not go beyond a certain limit (7:12; 8:18–19; 9:11). Such reports recognize other forms of spiritual power while underlining the superiority of the true deity’s power. (For a sample of contemporary missiological power-encounter analogies, see comment at Acts 8:13.)

This extended passage (Acts 8:9–24) functions as the first of several confrontations or contrasts with sorcerers, such as Elymas Bar-Jesus (13:6–11), the Philippian slave girl possessed by a divinatory pythoness spirit (16:16–24), and Sceva’s seven sons (19:13–16).³⁴⁰ Not only in Acts but in ancient writers generally, we encounter

335. E.g., Luke 4:33; 8:28; Mark 1:26; 5:7. Later, cf. *Test. Sol.* 6:9.

336. MacMullen, *Christianizing*, 27–28.

337. Most philosophers viewed happiness (εὐδαιμονία, a term absent in the NT) as the goal of virtuous life (e.g., Mus. Ruf. 7, p. 58.13; 17, p. 108.7), the by-product of genuine freedom from constraint (Lucian *Dem.* 19–20); true joy (χαρά) differed from mere laughter and jesting (Dio Chrys. *Or.* 32.99–100). For joy in ancient texts, see Keener, *John*, 580, 1004; in Acts, see the survey in Harnack, *Acts*, 277–81; fuller comment on Acts 13:52.

338. Spencer, *Philip*, 88. Some of these observations overlap in practice. For a different set of comparisons, see Samkutty, *Samaritan Mission*, 161.

339. For Luke’s prophetic characterization of Philip, see Stronstad, *Prophethood*, 91–93.

340. Spencer, *Philip*, 96–98 (96 on Acts 13; 96–97 on Acts 16; 97–98 on Acts 19); Johnson, *Acts*, 11, 153. The first power encounter in Luke-Acts, in Luke 4:1–13, is actually the most dramatic, setting the stage for the others’ success.

magicians like this, rendering the account plausible as well as literarily significant.³⁴¹ Simon is a more nuanced, rounded character than Judas, Ananias, or Elymas; he believes (at least temporarily) and fears divine judgment (8:24).³⁴²

*Excursus: Magic and Magicians*³⁴³

Apart from Simon's conversion, followers of Philip and Simon might have labeled each other magicians and credited their own leader with miracle working.³⁴⁴ Scholars have long labored to distinguish magic from miracle or religion, but the dichotomy is not always a clear one.³⁴⁵ One distinction is that magic conventionally seeks to manipulate spirits or forces whereas religion and miracle do not.³⁴⁶ This distinction does not always hold, however,³⁴⁷ since even some civic religion sought to manipulate deities.³⁴⁸ The use of spiritual power for selfish or nonedifying purposes was another criterion of magic, though again the distinction was not always observed.³⁴⁹

Ancients often used a more subjective criterion,³⁵⁰ labeling supernatural activity in alien social groups as magic in contrast to such activity among themselves.³⁵¹ In general, public, civic activity was viewed as religion; secretive and subversive activity was viewed as magic. Ultimately, a major issue was whether people believed that the power was used for personal advantage or the common good.³⁵² Thus, for Apollonius (*Vit. Apoll.* 1.34), various criteria distinguish magic from miracle working, but most important is the issue of greed. Charges of magic were common against all who did miracles (hence Luke's need for antimagical apologetic, below), but the best answer to them is to keep using miraculous power without seeming to desire it and without

341. Ehrhardt, *Acts*, 43.

342. Focusing on what was negative about a character was considered malicious only if it was not necessary to the telling of the story (Plut. *Mal. Hdt.* 3, *Mor.* 855C).

343. On magic generally, see, e.g., Graf, *Magic*; Aune, "Magic"; Martin, *Religions*, 27–29; MacMullen, *Enemies*, 95–127; Yamauchi, "Magic in World"; in the OT, see, e.g., Van Dam, "Divination," 160–61. For collections or discussions of ancient magical texts, see, e.g., *PGM*; *PDM*; Brashear, "Corpora"; Arnold, "Magical Papyri." Although the papyri are late, they reflect practices attested much earlier (Harder, "Defixio," 176).

344. Reimer, *Miracle*, 2, 245. This is a natural rhetorical pattern that also occurs in modern settings (e.g., Lindsay, *Lake*, 28–29).

345. See Aune, "Magic," 1511–12; Grant, *Religions*, 45–46 (though noting that most magic lacked a religious interest). The cognitive processes involved in magical thinking (see now Czachesz, "Magic and Mind") reflect broader cognitive patterns. Crump, *Knocking*, 169–77, offers helpful distinctions between mainstream magic and mainstream earliest Christian prayer.

346. Thus, e.g., Arnold, *Power*, 19; Klauck, *Context*, 215–18, esp. 218 ("Coercion is typical of magic, and petition typical of religion"); Reimer, *Miracle*, 3–7 (summarizing the view), 250.

347. See Remus, *Conflict*, 52–62; Reimer, *Miracle*, 7–8. Some others, e.g., Smith, *Magician*, 69, go too far. In many societies today, diviners themselves use spirits to divine what spirits are causing problems (see, e.g., Berends, "African Healing Practices," 283; Ritchie, *Spirit*, 24–25); shamans can use power for curing or harming (Peters, *Healing in Nepal*, 61, 63; Ritchie, *Spirit*, 28).

348. See, e.g., rainmaking rituals in *b. Ta'an.* 25b; Moore, *Judaism*, 2:44–45 (comparing the functions of libations among pagans); Ringgren, *Religion*, 190; Harrelson, *Cult*, 69; Uval, "Streams"; I have explored this practice somewhat more fully in Keener, *John*, 723–24.

349. See Remus, *Conflict*, 62–67. The purpose for which spiritual power is employed is a criterion for distinguishing good and bad power in African traditions (Mbiti, *Religion*, 258–59).

350. Modern anthropological approaches seek to avoid imposing modern interpreters' value judgments (Aune, "Magic," 1509).

351. Remus, *Conflict*, 67–72; idem, "Magic or Miracle?"; cf. Reimer, *Miracle*, 8–10 (summarizing the view, but see 10–12). For magicians as deviant from the religious community, see Reimer, *Miracle*, 248. For rival witchcraft accusations more recently, see, e.g., Favret-Saada, *Witchcraft*, 165.

352. See Reimer, *Miracle*, 139–41 (emphasizing the importance of fringe status).

seeming greedy.³⁵³ For Simon, the issue is that Philip's power exceeds his own; for Luke, it is that Philip acts for the true God and Simon does not.

1. Magi and Magic³⁵⁴

When Luke claims that Simon was “practicing magic” (Acts 8:9) and amazing people with his “magical activities” (8:11), Luke employs the more pejorative nuances of this word group. The magi were originally a Medo-Persian class of astrologers and diviners (Hdt. 1.101, 140). Some (especially in the “Pythagorean” tradition) allegedly acquired supernatural powers through initiation into Chaldean wisdom.³⁵⁵ In most accounts, magi hail from Persia or Babylon.³⁵⁶ The Chaldeans and Persians were known in the Roman Empire for divination³⁵⁷ and astrology,³⁵⁸ and Greeks and Romans regularly associated Chaldean magi with magical powers,³⁵⁹ prediction of the future,³⁶⁰ dream interpretation,³⁶¹ or specially regarded wisdom.³⁶² Many used them as religious functionaries.³⁶³ Roman officials are known to have received magi with honor.³⁶⁴

The term μάγος could be used positively, referring to the Persian usage (Philost. *Ep. Apoll.* 17), even in a context where others had employed it negatively (*Ep. Apoll.* 16). Some Egyptian priests became known for working magic outside Egypt and acquired this title.³⁶⁵ In late antiquity, some confused magi with deities.³⁶⁶

353. Ibid., 246. See Acts 3:6. Heintz, *Magicien*, emphasizes ancient polemic against wonder workers as magicians (55–101) and views Luke's portrayal of Simon in this light (102–42).

354. For ancient perspectives on magicians and magi, cf. also Eckey, *Apostelgeschichte*, 190–92; on magi, see also Yamauchi, *Persia*, 467–91.

355. E.g., Val. Max. 8.7.ext. 2; Pliny E. *N.H.* 25.5.13 (skeptically); Lucian *Lover of Lies* 33 (farically); *Phil. Sale* 3 (farically); *Cock* 18; Iambl. *V.P.* 4.19; Philost. *Vit. Apoll.* 1.2, 18, 25–26; Eunapius *Lives* 468; cf. Feldman, “View of Birth.”

356. E.g., Cic. *Leg.* 2.10.26; Philo *Spec. Laws* 3.100; *Good Person* 74; Dio Chrys. *Or.* 36; Lucian *Men.* 6; *Runaways* 8; Diog. Laert. 8.1.3; Char. *Chaer.* 5.9.4; Philost. *Vit. Apoll.* 1.24; *Vit. soph.* 1.10.494; cf. Philost. *Letters* 8 (46); Assyria in Choliambic fragment, Phoenix, 1.Ninos, 1.2, 5 (the fragment appears in *Herodes, Cercidas, and the Greek Choliambic Poets*, LCL, 242–45). On the magi of Persia, see further Olmstead, *Persian Empire*, 28–29, 196, 251, 372, 449, 477–78, 496, 517.

357. Polyb. 34.2.7; Catull. *Carm.* 90.2; Arrian *Alex.* 7.18.2, 4; Apul. *Metam.* 2.12. In Vell. Paterc. 2.24.3, Persian magi predict Sulla's future from marks on his body.

358. Diod. Sic. 1.81.6; 2.31.8; Quint. Curt. 5.1.22; Juv. *Sat.* 6.553–64; Aul. Gel. 1.9.6; 14.1; Ptolemy *Tetrab.* 1.20.43; Philo *Dreams* 1.53; *Sib. Or.* 3.227; *Pesiq. Rab.* 14:8. On the magi and astrology, cf. Yamauchi, *Persia*, 472–74.

359. Lucian *Men.* 6; Char. *Chaer.* 5.9.4. Romans associated the best magic with the East—namely, Egypt and Persia (Klauck, *Context*, 213).

360. Plut. *Alex.* 3.3–4; Arrian *Alex.* 7.16.5; Marc. Aur. 3.3.1; Chaldeans in Plut. *Sulla* 5.5; 37.1. Cf. further Kuhrt, “Mesopotamia,” 61.

361. Hdt. 1.107, 127; 7.12–19; Plut. *Alex.* 18.4; cf. Jos. *Ant.* 10.195–203; Cic. *Div.* 1.46.

362. Diog. Laert. 8.1.3; 9.11.61; Dio Chrys. *Or.* 36.38–48; Plut. *Themist.* 29.4; Lucian *Runaways* 8; cf. Cic. *Leg.* 2.10.26; Philo *Good Person* 74–75; *Spec. Laws* 3.100; Philost. *Vit. Apoll.* 1.24; their silence in Quint. Curt. 4.6.6. Jews may have also viewed their association with dreams as a divine accommodation to pagan inability to hear more clearly (cf. Gnuse, “Dream Interpreter in Foreign Court”).

363. On their involvement in religion, see Xen. *Cyr.* 4.5.14, 51; 7.3.1; 7.5.35, 57; 8.1.23; 8.3.24; Quint. Curt. 3.3.10; 5.1.22; Dio Chrys. *Or.* 49.7; Philost. *Vit. Apoll.* 1.29; Iambl. *V.P.* 4.19; in other cases they appear publicly silent about religion (Philost. *Vit. soph.* 1.10.494). On their involvement with Zoroaster, see, e.g., Dio Chrys. 36.40–41. They are also associated with the Persian (Max. Tyre 2.4) and Zoroastrian (Dio Chrys. *Or.* 36.40) reverence for fire (Iambl. *V.P.* 28.154). Although Zoroastrianism existed, it probably dominated Parthia only later, with hellenized polytheism dominating at this time (see Yamauchi, *Persia*, 396–97; cf. 401, 420); the magi were polytheistic, but eventually Zoroastrianism influenced at least some, perhaps more, of them (Yamauchi, *Persia*, 468–69).

364. Albright and Mann, *Matthew*, 14; Schweizer, *Matthew*, 37.

365. See Frankfurter, *Religion in Egypt*, 226–28, 236 (citing, e.g., Dio Cass. *Hist.* 72.8.4); Rives, *Religion*, 169 (giving the reference as 71.8.4). Quack, “Mages égyptianisés?,” attributes pseudo-Zoroastrian sources in Egypt to possible Persian magi there.

366. See Gallagher, *Divine Man*, 174 (while denying an early Hellenistic conception of the divine man); cf. Philost. *Ep. Apoll.* 16–17. Later Christians countered the pagan divine man of late antiquity with Christian holy men (for Syria in the late fourth through the late sixth century C.E., see Brown, “Syria”). On “divine men,”

The term, however, could be used (like its cognate verb here) by extension for sorcerers and quacks.³⁶⁷ Some ancients regarded the Persian magi as fraudulent,³⁶⁸ connecting negative magic with them.³⁶⁹ Even those who viewed them positively might wish to be dissociated from them.³⁷⁰ Most relevant for audiences for whom the Greek translation of the Bible was normative as Scripture is that the term applies to magicians in Dan 2:2, 10 and, more explicitly, to Daniel's enemies in some other Greek translations.

2. Malevolent Sorcerers versus Charlatans

Some ancients doubted the efficacy of ritual incantations,³⁷¹ but others noted that such formulas were standard in Roman public religion and claimed that they had often proved effective.³⁷² Some magicians were recognized as charlatans.³⁷³ Intellectuals sometimes set out to expose them,³⁷⁴ as in the case of Lucian's opposition to Alexander the false prophet. Alexander allegedly would open sealed questions to the god, then answer them as he thought best (Lucian *Alex.* 20), gaining up to eighty thousand obols a year by this means (*Alex.* 23); when a prophecy failed, he changed it in the records (*Alex.* 27–28). He also found a way to project a voice into a serpent skin (*Alex.* 26) and offered detailed oracles to people who, unknown to the audience, did not exist (*Alex.* 50). Lucian and others trapped him repeatedly (*Alex.* 53–55), but his ilk were probably common.³⁷⁵ Charlatans of various sorts may have even become a standing object of humor.³⁷⁶

Some opined that a truly well-educated person would not succumb to practicing magic.³⁷⁷ But while magic is thought to have circulated especially among the lower classes,³⁷⁸ adept practitioners of magic had to be able to read with sufficient literacy to use and follow the right spells.³⁷⁹

see further discussion in the commentary introduction, Keener, *Acts*, 1:330–34, or in Keener, *John*, 268–70; also, e.g., Blackburn, “ANAPEZ”; Tiede, *Figure*; Holladay, *Theios aner*; Gallagher, *Divine Man*; Pilgaard, “*Theios aner*”; Lane, “*Theios anēr*”.

367. Hermog. *Inv.* 3.10.156; Bruce, *Acts*¹, 184. For negative associations with the magi, see, e.g., Hdt. 3.79–80; Chaldeans in Philost. *Vit. Apoll.* 6.41. Even Philost. *Vit. Apoll.* 1.26 recognizes that their wisdom is not in every matter.

368. Pliny E. *N.H.* 28.12.47; 28.27.94; 28.66.228–29; 29.12.53; 29.20.68; 30.1.1; 30.2.3 (with less hostility, cf. 24.99.156; 24.102.160; 25.5.13); Alvares, “Magus” (proposing one in Chariton).

369. Thus Pliny the Elder treats magic in *N.H.* 30 (after having introduced the issue in 30.1.1), attributing magic's origin to Zoroaster in Persia (30.2.3). Claims against magi as sorcerers were appropriated positively by their advocates several centuries before Luke (see Bremmer, “Birth”).

370. Philost. *Vit. Apoll.* 1.2 (part of his antimagical apologetic, as in 5.12).

371. Pliny E. *N.H.* 28.3.10 notes that many intellectuals doubted them (cf. 28.4.17). Milo doubts magic, unaware that his wife, Pamphile, is a witch (Apul. *Metam.* 2.12); Plut. *Bride* 48, *Mor.* 145C, considers magic and charms foolish beliefs.

372. Pliny E. *N.H.* 28.3.11–13; 28.4.14; 28.5.29.

373. The term γόησις (cf. 2 Tim 3:13), which can mean “magician” (cf. *Test. Jud.* 23:1; Plato *Meno* 80A, figuratively; Philost. *Vit. Apoll.* 7.17; Porph. *Marc.* 33.509), means “impostor” in Babr. 57.13 (cf. deception in 2 Macc 12:24). Some ancients suspected that magic was simply “the illusion of all the greatest liars” (Quint. Curt. 7.4.8 [LCL, 1:153]).

374. See Plato's criticisms as well (*Rep.* 2.364BC).

375. A. M. Harmon in the translator's note in *Lucian*, LCL, 4:173, observes that inscriptions verify Alexander's widespread popularity.

376. Thus Toner, *Culture*, 41, cites the ancient joke about an astrologer who promises a mother that her sick son will live long. When she wants to defer payment until the next day, he protests: “But what happens if he dies in the night?” (*Philogelos* 187; cf. 201–2).

377. Philost. *Vit. soph.* 2.10.590.

378. Aune, “Magic,” 1521; Arnold, *Power*, 19. Its use among those without access to other means of social power is probable, but in Egypt, it apparently at least started with the priests. Kee, *Miracle*, 213, argues that sorcery accusations are more common in upper classes, but they may simply be more commonly preserved there. In many traditional societies, more fortunate and wealthy individuals are more often targeted by jealous witchcraft attacks (Gelfand, “Disorders,” 167).

379. E.g., Lucian *Lucius* 11. Frankfurter, *Religion in Egypt*, 228–29, connects this literacy especially with the priesthood in Egypt. Koester, *Introduction*, 1:201, notes the use of magic among the well educated.

In a reversal of the deceptive-magician theme, Persian magi persuaded their king that a philosopher at his court was just a magician (γόητα, Eunapius *Lives* 466).³⁸⁰ Rabbis also knew of workers of illusions and considered them far less dangerous than genuine sorcerers (*Sipre Deut.* 171.6.1).

3. Gentile Magic in General³⁸¹

Magical papyri flourished most fully in the third century C.E., perhaps partly because Rome decreased the support for other activities of Egyptian priests.³⁸² Some scholars therefore doubt their utility for understanding the first-century world,³⁸³ but magic hardly began in the third century. For example, fifth- to fourth-century B.C.E. Greek magic reflects concepts of nature dominant in that era.³⁸⁴

Society usually viewed magic as subversive and antisocial because it was often used for harm.³⁸⁵ (This remains true in many societies today.)³⁸⁶ Nevertheless, many were fascinated by stories of magic, even when it was considered malevolent.³⁸⁷ Thus Lucian tells of one Lucius who rejected good advice and craved magic.³⁸⁸ His quest is rewarded with the wrong potion, transforming him into an ass,³⁸⁹ with an implied consonant moral. Some officials eventually tried to suppress the flourishing private practice of magic,³⁹⁰ albeit unsuccessfully.

Curse invocations were central to ancient magic.³⁹¹ Virtually anything harmful

380. Some others also accused some philosophers of being frauds (e.g., Diog. Laert. 8.1.41). Arius Did. *Epit.* 2.7.10b, pp. 60–61.1–2; 2.7.10c, pp. 60–61.22–23, warns against γοητεία, which depends on deception (cf. Dio Chrys. *Or.* 16.1; 32.39; Philod. *Crit. fig.* 60.8–12; Lucian *Peregr.* 13).

381. For one survey of nearly twenty recent books on ancient magic, see Cueva, “Texts.”

382. Frankfurter, *Religion in Egypt*, 198–237. Magical powers proliferated in the Greco-Roman period, when ritual prerogatives once limited to Egyptian priests were democratized (Ritner, *Mechanics*, 244–45).

383. Kee, *Miracle*, 52, 288.

384. So Collins, “Cause”; cf. Theissen, *Miracle Stories*, 268. The abusive use of the term “magic” was evolving in the fifth and fourth centuries B.C.E. (Bremmer, “Birth”).

385. E.g., SIG 3.985 (= LSAM 20), lines 12–15, from Asia Minor (Klauck, *Context*, 66); see further Theissen, *Miracle Stories*, 239–42; Yamauchi, “Magic?,” 90; Kippenberg, “Magic.” Magic was thought efficacious even against good persons (Apul. *Metam.* 9.30) and was believed to often employ parts of corpses (Apul. *Metam.* 2.20, 30; cf. PGM 1.248–49; Pliny E. *N.H.* 28.2.4, 7; a crucifixion nail in *m. Šabb.* 6:10). Welch, “Miracles,” 369–71, argues for its illegality, but most of his primary evidence concerns predictions of death.

386. “Black magic” remains antisocial in many societies, although others practiced “benevolent” magic (see, e.g., Kadetotad, “Practices,” 383–84); in many societies, it is used to kill (e.g., Tippet, *Solomon Islands Christianity*, 15) and is thought especially dangerous among co-wives (Stephens, *Family*, 68; Whisson, “Disorders,” 288); for a variety of uses, but especially harmful or selfish, see Mbiti, *Religions*, 196, 200, 203–4, 221, 258, 275, 278, 328; for societies’ condemnation of witches, see, e.g., 209. Through medical diagnosis and rehydration, some persons have recovered after traditional “voodoo death” sequences (Eastwell, “Voodoo Death,” esp. 5). See fuller discussion in Keener, *Miracles*, 47, 803–9.

387. Lucian *Lucius* 4; Apul. *Metam.* 3.19.

388. Lucian *Lucius* 4–5. In *Lucius* 56, he acknowledges the danger of his curiosity.

389. Lucian *Lucius* 13.

390. See Horsley, *Documents*, 1:47–51, §12 (from a prefect in late second-century C.E. Egypt).

391. Klauck, *Context*, 223–26; Harder, “Defixio,” 175; see, e.g., Jordan, “New Curse Tablets.” This is also true in some more recent forms of magic (cf. Mbiti, *Religions*, 276; MacNutt, *Power*, 74–75; Peters, *Healing in Nepal*, 61, 63; Lewis, “Possession,” 189, 214; traditions about sorcerers “sending” spirits in Shorter, *Witchdoctor*, 198). On “the evil eye” (though I have listed together various conceptions of it; some mean only stinginess), see P.Oxy. 292.11–12; Aelian *Nat. An.* 11.18; Pliny E. *N.H.* 7.2.16–18; Aul. Gel. 9.4.8; *b. Ber.* 20a; 55b; *Sanh.* 93a; *Lev. Rab.* 16:8; 17:3; *Num. Rab.* 12:4; *Tg. Ps.-J.* on Gen 42:5; Kern-Ulmer, “Evil Eye”; Dickie, “Evil Eye”; Elliott, “Fear”; Pilch, “Eye”; cf. Bryen and Wypustek, “Evil Eyes.” Rab attributed nearly all diseases to this cause (Yamauchi, “Magic?,” 124). (Appearance in one translation of 4Q477 2 II, 4, 7 is reconstructed.) Cf. the concept more recently in Kadetotad, “Practices,” 384; Mbiti, *Religions*, 259.

could be attributed to magic.³⁹² Erotic charms were meant to secure sexual influence,³⁹³ contrary to novelists' emphasis on female practitioners, they were employed by both genders.³⁹⁴ Some spells were to cheat in sports—for example, a spell to overturn and wreck chariots.³⁹⁵ Other spells were for defensive magic—for protection,³⁹⁶ for example, in childbirth.³⁹⁷ Magic could also be associated with achieving invisibility³⁹⁸ or changing one substance into another.³⁹⁹ Some apparently claimed to be able to procure whatever they wanted by magic.⁴⁰⁰

The means of magic differ in various cultures.⁴⁰¹ Often in Greco-Roman antiquity, magicians were thought to manipulate spirits⁴⁰² and hence (from a strict monotheistic perspective) to traffic in demons.⁴⁰³ Beings intermediate between mortals and deities were most common,⁴⁰⁴ though deities were also involved.⁴⁰⁵ Magic could employ drugs—that is, potions and poisons.⁴⁰⁶ (Josephus in fact interprets prohibition of witchcraft as against those who poison others.)⁴⁰⁷ Potions could be used to make a rival infertile⁴⁰⁸ or (in pure fiction) turn people into beasts.⁴⁰⁹ Witches were also thought

392. Faraone, "Spells." Tombstones might invoke divine vengeance against those thought to have killed through sorcery (Graf, "Death").

393. See, e.g., PGM 13.304; 32.1–19; 36.69–133, 187–210, 291–311, 333–60; 62.1–24; 101.1–53; Pliny E. N.H. 27.35.57; 27.99.125; Philost. *Hrk.* 16.2; *Test. Reub.* 4:9; Frankfurter, "Perils"; Jordan, "Erotic Spell"; cf. Theocritus *The Spell* (GBP 26–39); the charm in Horsley, *Documents*, 1:33–34. In a novel, a witch might attract young men or other things once she had a piece of their hair (Apul. *Metam.* 3.16–18). In more recent societies, see, e.g., Tippet, *Solomon Islands Christianity*, 15.

394. Dickie, "Who Practised Love-Magic?"; Lewis, *Life*, 96, emphasizes male practitioners more; cf., e.g., Quint. *Decl.* 385 intro. Apuleius, in fact, had to defend himself against this charge (Bradley, "Apologia").

395. PGM 4.2211–16. Cf. comment in Rives, *Religion*, 171.

396. See some examples in Whittaker, *Jews and Christians*, 219–20 (along with "black magic"); Faraone, "Stopping Evil"; today, on a popular level, MacNutt, *Power*, 74–75. Cf. Jewish apotropaic use of Scripture in amulets and devices (Lincicum, "Apotropaism").

397. E.g., Dunand, *Religion en Égypte*, 114.

398. E.g., PGM 1.222–31, 247–62 (esp. 256–57); cf. (in farce) Tibullus 1.2.58; further Keener, *John*, 773–74. Similarly, the ring of Midas (Pliny E. N.H. 33.4.8) or Gyges (Lucian *Ship* 42; Philost. *Vit. Apoll.* 3.8).

399. Hom. *Od.* 10.239–40; Ovid *Metam.* 14.414–15; *y. Hag.* 2:2, §5; *Sanh.* 6:6, §2.

400. Lucian *Dem.* 23 (noting that Demonax countered this claim by insisting that he could procure by money what he desired).

401. In some societies, magic can even function by violating taboos, not just by sympathetic magic based on analogy (Makarius, "Violation," esp. 232).

402. See, e.g., PGM 1.88–89, 164–66, 179–85, 252–53; 2.52–54; 4.3043–44; Lucian *Men.* 9; *Alex.* 13; cf. Klauck, *Context*, 228; Nilsson, *Piety*, 171; Smith, *Magician*, 97–99; Arnold, *Power*, 18. For modern shamans manipulating spirits, see, e.g., Shorter, *Witchdoctor*, 178.

403. CD XII, 2–3 (which compares those controlled with demons to necromancers; see also Gaster, *Scriptures*, 85); *L.A.B.* 34:2–3; *b. Sanh.* 67b.

404. Klauck, *Context*, 214.

405. Graf, "Initiation"; e.g., PGM 1.298 (Apollo); 2.98–117 (Osiris); 4.2626–29 (requiring a charm lest one anger Selene when invoking her); 12.67 (gods in general). For attempts to manipulate deities, Pliny E. N.H. 28.4.19.

406. E.g., Diod. Sic. 4.45.3; Philost. *Hrk.* 25.13; *Sib. Or.* 5.165 (Rome's destruction for desiring magic [φαρμακίην]); *Test. Jos.* 5:1 (deadly poisons); 6:1 (love charms in the food); *Herm.* 17.7; cf. Guthrie, *Orpheus*, 17–18 (on Orpheus). Judaism opposed their use (*Sib. Or.* 3.225, probably second century B.C.E.; Gal 5:20; cf. the probably later curse invocation against those who secretly "poisoned" a loved one, in Deissmann, *Light*, 424). Roman law harshly treated poisoning (Grant, *Paul*, 114, citing Paulus *Dig.* 48.19.38.5). Drugs could impair the senses (Isaeus *Astyph.* 37, φαρμάκων). The more general medical sense of φάρμακον (which could mean "medicine" as well as "potion" or "poison") was different (Diod. Sic. 17.31.6; Appian *Hist. rom.* 6.14.87).

407. *Jos. Ant.* 4.279.

408. Eurip. *Andr.* 355.

409. Circe in Hom. *Od.* 10.235–36, 290, 317, 326; Parth. *L.R.* 12.2; cf. Diod. Sic. 4.45.3; probably Symm. *Ep.* 1.47.1. Circe also used potions to bewitch animals (Hom. *Od.* 10.212–13). For magic transforming substances, see, e.g., Ovid *Metam.* 14.414–15; *y. Hag.* 2:2, §5; *Sanh.* 6:6, §2; but deities also transformed substances (Hom. *Od.* 13.162–63) or persons (e.g., Hesiod *Astron.* frg. 3; Apollod. *Bib.* 2.1.3.1; Eurip. *Bacch.* 1330–32; Iugon 1.27).

to change themselves into beasts to accomplish their harmful plans.⁴¹⁰ Astrology is prominent in the magical papyri.⁴¹¹

Magicians were feared for their malevolent activity.⁴¹² Particular magical gestures would betray the activity of harmful sorcerers present during childbirth (Pliny E. *N.H.* 28.17.59). Already Rome's Twelve Tables decreed punishments against those who cast spells against crops or did other magical harm (28.4.17).⁴¹³ Some thought it helpful to slay sorcerers if one were able to catch them.⁴¹⁴ In novels, tremendous power was attributed to the most powerful sorcerers.⁴¹⁵ On "magicians," see further comment on Acts 13:6–8.

4. Magic in Judaism

Educated Jewish people were well aware of magical ideas in the Greco-Roman world.⁴¹⁶ Indeed, Greco-Egyptian magical practices influenced Jewish magic and possibly even Hekhalot texts.⁴¹⁷ Though adapting Greek ideas, Jewish magic probably normally remained monotheistic and did not claim to manipulate God.⁴¹⁸

Many Jews also became known for practicing magic, as Acts suggests (Acts 13:6; 19:13–14).⁴¹⁹ Ancients often associated Moses with powerful magic.⁴²⁰ One of the first alchemists known to us was a Jewish woman named Maria, who believed that God had revealed many alchemical secrets to her.⁴²¹ Polytheistic magical invocations

410. Lucian *Lucius* 54; Apul. *Metam.* 2.30. In more recent magic, see Mbiti, *Religions*, 258 (and cf. 220); Prince, "Yoruba Psychiatry," 92; Umeh, *Dibia*, 132; Nanan, "Sorcerer," 82; cf. also the transformation in Zempleni, "Symptom," 99.

411. Klauck, *Context*, 236; Arnold, *Power*, 28 (citing PGM 4.2490); also PGM 4.651; 13.709–11; 36.330–32; 62.52–75; PDM Sup. 183–84; cf. Apul. *Metam.* 3.15; Ps.-Callisth. *Alex* 1.4, 12; y. *Roš Haš.* 3:8, §§1–2; *CIJ* 2:90–91, §849. This confluence may, however, partly reflect the flourishing of both magical papyri and astrology in the third century C.E.

412. This remains true in many societies that believe that sorcery can kill, seduce, etc. (e.g., Tippet, *Solomon Islands Christianity*, 15).

413. But Rives, "Magic in XII Tables," contends that these early laws were not originally antimagical. In any case, certainly by the first century B.C.E. Roman law condemned magic (Smith, *Magician*, 75–76).

414. Lucian *Lucius* 54.

415. Apul. *Metam.* 2.5; 3.15.

416. See Smith, "Occult in Josephus." Cf. magic in Amalek (y. *Roš Haš.* 3:8, §1), Thessaly (Lucian *Lucius* 4; *Dial. C.* 1 [Glycera and Thais], 281; *Dial. C.* 4 [Melitta and Bacchis 1], 286 [probably]; Philost. *Vit. Apoll.* 8.7), and especially Egypt (PGM passim; PDM passim; "King Cheops and the Magicians" [in Simpson, *Literature of Egypt*, 13–24]; Hom. *Od.* 4.228–34; Lucian *Lover of Lies* 31, 33; Apul. *Metam.* 2.28; Heliod. *Eth.* 6.14; Ps.-Callisth. *Alex.* 1.2–8; *Abot R. Nat.* 28 A; 48, §132 B; b. *Qidd.* 49b; *Sanh.* 67b; *Gen. Rab.* 86:5; *Exod. Rab.* 9:6; 20:19; Tg. Ps.-J. on Gen 49:22–23; Dauphin, "Amulet"; Frankfurter, "Magic"; idem, *Religion in Egypt*, 198–237, esp. 216–17, 228, 236–37; Klauck, *Context*, 213).

417. Lesses, "Speaking with Angels"; cf. Arnold, "Sceva," 18–20.

418. Kern Ulmer, "Depiction of Magic"; cf. the piling up of divine names in *CIJ* 2:62–65, §819. Late fourth- and early fifth-century C.E. amulets in Galilee are syncretistic but remain monotheistic (Kotansky, "Amulet"). *Sefer ha-Razim* probably goes beyond this (Smith, *Magician*, 69, dating it to late antiquity). Signer, "Balance," 112–13, notes that Jewish miracle workers claimed to offer signs: "The very same deeds, when performed by non-Israelites, were considered magic or manifestations of idolatry."

419. E.g., Hengel, *Judaism and Hellenism*, 1:241; Gager, *Anti-Semitism*, 107–10; on the prevalence of Jewish magic, see, e.g., Goodenough, *Symbols*, 12:58–63; Koester, *Introduction*, 1:380–81; Gaster, *Studies*, 1:356ff; Arnold, "Sceva," 10–19. For magic in Hellenistic Judaism and Acts, see, e.g., Casalegno, "Evangelização." For magical interpretations of Jewish rituals in the Christian period, see Bassler, "Interpretations." For Jewish charms and amulets (or those exploiting Jewish elements), see Goodenough, *Symbols*, 2:153–295.

420. Gager, *Moses*, 134–61, esp. 161; Whittaker, *Jews and Christians*, 56–57; Apuleius *Apology*, in Stern, *Authors*, 2:201; PGM 5.107–9; 13.345. Cf. the later *Sword of Moses* text (Harari, "Moses"). Celsus accused Moses of teaching Jews sorcery and apparently the worship of angels; Origen replies that Moses expressly condemned sorcery (*Cels.* 1.26).

421. See van der Horst, "Maria," 679. Just as magicians could use drugs without this making all pharmacists magicians (cf. Ael. Arist. *Def. Or.* 247, §76D, making a similar analogy), alchemy need not have been

mixed with their own deities' names Jewish divine and angelic names, so many magical texts contain Jewish elements.⁴²²

Jewish magic arose before the NT era and expanded rapidly in the period in which magic more generally was growing.⁴²³ Jewish angels are invoked in some magical texts, a practice especially evident after the third century.⁴²⁴ Later magic bowls⁴²⁵ provide incantations to protect from magic.⁴²⁶ Yet incantations were also used to ward off demons in a much earlier period.⁴²⁷ Early sources also employ Scripture in amulets, sometimes in relation to healing (4Q374 line 8).⁴²⁸ Magical beliefs appear in the possibly first-century *Biblical Antiquities* of Pseudo-Philo (L.A.B. 53).⁴²⁹

Many public sources in early Judaism, however, condemned magic.⁴³⁰ Jewish people developed stories about wicked magicians who opposed God's people, expanding biblical reports about Pharaoh's magicians⁴³¹ and adding opposing magicians—for example, a Midianite,⁴³² Egyptian sorcerers in Joseph's day,⁴³³ or Canaanites when Israel entered the land.⁴³⁴

The penalty for sorcery in Judaism was death (Exod 22:18; cf. Deut 13:10; 18:10).⁴³⁵ Seeking to reduce capital offenses, rabbis qualified this penalty as applying only for genuine sorcerers, not just for performers of illusionary tricks.⁴³⁶ Given the frequent association between magic and spirits in paganism, however,

viewed by its practitioners as related to magic (Maria is our first extant source for hydrochloric acid [van der Horst, "Maria"]).

422. E.g. (though some of these may be purely Jewish), *PGM* 1.301–2, 305; 3.405; 4.1200–1204, 2355–56, 3040–41, 3047–48; 5.114–15; 13.327, 815–18; 35.1–42; *PDM* 14.1061–62. Deissmann, *Studies*, 279–93, argues for LXX influence in a magical inscription.

423. On Jewish magic, see, e.g., Schäfer, "Magic and Religion"; in *PGM*, see Betz, "Jewish Magic." For Jewish magic from the late empire to the early medieval period, see Schäfer, "Magic Literature"; mainly medieval and later, Idel, "Magic." In modern times, compare many Yemenite Jews in Israel (Hes, "Role," esp. 370, 374–76).

424. E.g., *CIJ* 2:373–74, §1448; later, 2:90–91, §849. The connection between angels and magic becomes even more dominant in medieval Judaism (Fass, "Angels"). Some Aramaic magic bowls echo curses from Deut 27 (so BM 91767; Morgenstern, "Magic Bowl").

425. All Jewish incantation bowls so far found derive from Mesopotamia, not Egypt (Hunter, "Incantation Bowls"). If this makes them "unrepresentative," it helps them to balance out our other evidence geographically. They are, however, late (popular especially in the fifth through eighth centuries C.E.).

426. E.g., Levene, "Heal"; Isbell, "Story," 13. Cf. further Jewish amulets and other magical sources in the Cairo Genizah (Swartz, "Ritual Procedures"). The "inscribed" skull in Levene, "Inscription," may have been more hostile.

427. As early as 4Q560.

428. See Wise, "Introduction to 4Q374"; for magical use of Scripture in *PGM*, see Judge, "Magical Use."

429. See Jacobson, "Vision." Even in Scripture, God apparently used magical means occasionally, accommodating limited human understanding (Gen 30:37–42 with 31:8–9, 12).

430. E.g., Wis 17:7; Ps-Phoc. 149; 2 Bar. 60:2; 66:2.

431. Exod 7:11, 22; 8:7, 18–19; 9:11; *Jub.* 48:9; CD V, 18–19; *Test. Sol.* 25:4; *Jannes and Jambres* (*OTP* 2:428–42); *Tg. Ps-Jon.* on Exod 1:15; 7:11; 2 Tim 3:13; cf. Pliny E. *N.H.* 30.2.11; Stern, *Authors*, 2:201; Gager, *Moses*, 137–40; Charlesworth, *Pseudepigrapha and New Testament*, 79; Grabbe, "Tradition." L.A.B. 47:1 mentions Jannes, but in the wilderness.

432. L.A.B. 34. L.A.B. 25:12 similarly speaks of pagan healing by the Amorites' idolatrous precious stones.

433. *Tg. Ps-Jon.* on Gen 49:22–23 (cf. Gen 41:8, 24).

434. *Lev. Rab.* 23:7.

435. Also, e.g., *m. Sanh.* 7:10–11; *b. Ber.* 21b (Tannaitic tradition); *Šabb.* 75a; *Yebam.* 4a; *Sanh.* 67a; *y. Hag.* 2:2, §5; *Sanh.* 7:13, §2; for mediums, CD XII, 3; *Sipra Qed. pq.* 9.207.3.3; eternal punishment in 2 En. 10:4. Necromancy was forbidden but was believed authentic (*Gen. Rab.* 11:5; *Pesiq. Rab.* 23:8).

436. So *m. Sanh.* 7:11; *Sipra Qed. pq.* 6.203.2.1–2; *Sipre Deut.* 171.6.1; *b. Sanh.* 67b; cf. mere illusions in *Diogn.* 8.4; *Tert. Test. an.* 57; *Hippol. Ref.* 6.34. On performing illusions, see further *Sipre Deut.* 171.4.1. Amoraim sought to distinguish sorcerers who worked through demons and those who depended only on enchantment (*b. Sanh.* 67b).

it is not surprising that Jewish sources sometimes associated it with fallen angels⁴³⁷ or Satan.⁴³⁸ Judaism also recognized curses as efficacious.⁴³⁹ Witchcraft could cause plagues.⁴⁴⁰ As among Gentiles (above), Amoraic texts sometimes associated astrology with magic.⁴⁴¹

Rabbinic literature reflects widely divergent approaches to magic.⁴⁴² On the one side, most rabbis opposed witchcraft;⁴⁴³ all the world's best magicians could not turn morning to evening;⁴⁴⁴ and Scripture was known to oppose magic.⁴⁴⁵ Some teachers believed that magicians could even produce signs in cosmic bodies (*Sipre Deut.* 84.1.1); others retorted that only a formerly true prophet who later became a false one could do so (R. Akiba, *Sipre Deut.* 84.1.3). Some forbade healing oneself with incantations, though others qualified this prohibition.⁴⁴⁶

On the other side,⁴⁴⁷ some rabbis used or approved the use of some forms of magic.⁴⁴⁸ They may have opposed sorcery yet not the magical “science” of their era.⁴⁴⁹ Thus one rabbi fleeing a lustful married woman used a magical formula to protect himself and finally found refuge with demons.⁴⁵⁰ Another rabbi could cause a field to fill with cucumbers, then reverse it.⁴⁵¹ Still another rabbi created a man and sent him to another rabbi, but because the created “man” could not speak, the other rabbi recognized that he was a fabrication and returned him to dust.⁴⁵² Onqelos brought up Titus from the dead so that he could testify about his torments in Gehinnom (*b. Git.* 56b–57a). It was said that Solomon exploited demons to do his bidding before he sinned.⁴⁵³

Samaritans were no less interested in magic than others.⁴⁵⁴ Early Christian literary sources oppose magic,⁴⁵⁵ but not surprisingly, later Christians on a popular level assimilated some magical traditions.⁴⁵⁶ On false prophets, see comment at Acts 13:6.

437. See *1 En.* 9:6–7; 64:2; 65:6 (cf. the Greeks' Prometheus); *3 En.* 5:9; *Sib. Or.* 1.96; cf. also Orig. *Cels.* 1.60; 2.51; 3.39, 59; Hippol. *Ref.* 6.34.

438. E.g., CD V, 18; *Asc. Is.* 2:5 (this may be a Christian work). Cf. the involvement of spirits of Belial (influencing false prophets) with soothsayer ghosts in CD XII, 2–3; demons in *Test. Jud.* 23:1; *Test. Sol.* 25:3–4.

439. E.g., *Test. Jud.* 11:3–5; *Gen. Rab.* 74:4.

440. *B. Hor.* 10a.

441. Clearly in *y. Roš Haš.* 3:8, §§1–2.

442. Emphasized in Stratton, “Imagining Power.” Some of what we classify as sympathetic magic, the rabbis would not have so classified (Bar-Ilan, “Magic and Religion”).

443. E.g., *b. Sanh.* 65b–66a.

444. *Num. Rab.* 18:4. Just as all the world could not turn a raven's wing white or remove a *yod* from the Torah (*Lev. Rab.* 19:2), or create a single gnat (*Pesiq. Rab.* 43:6).

445. See, e.g., Welch, “Miracles,” 366–67.

446. In *b. Šebu.* 15b.

447. It should be kept in mind, however, that some of the haggadah is tongue-in-cheek, and rarely are the stories told about contemporaries. The genre, then, differs from both historical and novelistic narratives.

448. Cf., e.g., Neusner, *Sat.*, 80. Hayman, “Magician,” argues that the late *Sefer Yešira* even presents God acting as a magician. Cf. whispering charms, apparently accepted in *Lev. Rab.* 9:9 (purportedly Tannaitic tradition). For amulets and protection against magic, see, e.g., *b. Šabb.* 61b; 66b; Goodenough, *Symbols*, 2:163; one could even change a wedding date to evade a witch's spell (*y. Ketub.* 1:1, §2). On some superstitious forms of cures in some rabbinic texts (e.g., *b. Git.* 68b–70b), see the commentary introduction, Keener, *Acts*, 1:417–18.

449. Goldin, “Magic.”

450. So *b. Qidd.* 39b–40a.

451. *Abot R. Nat.* 25 A.

452. E.g., *b. Sanh.* 65b.

453. E.g., *Song Rab.* 3:7, §5; *Pesiq. Rab.* 15:3 (these stories resemble *Test. Sol.* passim).

454. See, e.g., Bowman, *Documents*, 30; see also Müller-Kessler, Mitchell, and Hockey, “Amulet” (though this source is from the fourth or fifth century C.E.).

455. At least among the “orthodox”; e.g., *Did.* 2.2; 3.4; 5.1; *Barn.* 20.1; *Ign. Eph.* 19.3; *Herm.* 17.7; Justin *1 Apol.* 14; *Diogn.* 8.4; Clem. Alex. *Exhortation to the Heathen* 1; *Strom.* 2.1; Tert. *Apol.* 43.

456. Cf. Gitler, “Amulets.”

5. Antimagical Apologetic

Acts likely articulates an antimagical apologetic (see also discussion under Acts 8:20–24).⁴⁵⁷ Those who performed signs and wonders were typically regarded as exploiting bad magic by those who disapproved of their activity.⁴⁵⁸ This was true whether the accusers were Apuleius’s enemies, or rabbis or Celsus attacking Christians. Such interpretations required apologetic counterinterpretations from those under assault. Thus Apuleius contrasts the benevolent power of Isis with the evil magic of Photis’s mistress,⁴⁵⁹ and Philostratus proves embarrassed about magical traditions concerning his hero Apollonius of Tyana.⁴⁶⁰ Both Philostratus and Luke provide antimagical apologetic on their characters’ behalf and oppose “magicians.”⁴⁶¹ Some circles revered (or criticized) Moses as a magician,⁴⁶² which required Philo and Josephus to suppress potential magical associations.⁴⁶³

Rabbis and others charged Jesus and Christians with performing magic.⁴⁶⁴ Celsus associated the miracles of Jesus and his followers with magic.⁴⁶⁵ Likewise, Porphyry attributed them to demons.⁴⁶⁶ Such charges invited apologetic responses. Jesus’s detractors in the Gospel accused him of performing exorcism by demons (Luke 11:15), but the accusation is proved false (11:17–20), and throughout Acts, Jesus’s agents prove to be forceful opponents of magic.⁴⁶⁷

Miracle workers had to avoid being seen as greedy for power or money.⁴⁶⁸ God’s agents have power but not personal wealth (Acts 3:6) and can abandon homes to preach the good news (8:4–5; cf. Luke 5:11; 18:28–30); Simon, by contrast, uses money to seek power for himself (Acts 8:18–20). Simon preaches his own greatness (8:9); Philip preaches Jesus Christ (8:5–6).

457. See Spencer, *Philip*, 99–102; Trémel, “Risque de paganisation”; Agouridis, “Ἀντιμαγικὴ”; Marguerat, *Actes*, 299 (risk of syncretism). Luke may accomplish the distinction partly by connecting miracles with Christology (Marguerat, “Magie, guérison, et parole”); cf. the emphasis on Jesus’s name (Acts 3:6; 4:10, 30; 16:18; 19:13, 17). Aune, *Environment*, 56, suggests that Luke’s “emphasis on the physicality of Jesus’s resurrection” is also part of this, since ghosts or body parts “of those who died violently were thought ‘available’ for facilitating magical feats” (on witches’ use of corpses, see, e.g., Ap. Rhod. 4.51–53; Lucan C.W. 6.538–68, 626; Ovid *Her.* 6.90; esp. Apul. *Metam.* 2.30; in other cultures, e.g., Mbiti, *Religions*, 261; see further Keener, *John*, 1181). But Luke has other reasons for this.

458. See Remus, “Magic or Miracle?”

459. See Schmidt, “Einweihung in Mysterien.”

460. See Raynor, “Moeragenes and Philostratus”; Klauck, *Context*, 169–70. Cf., e.g., Philost. *Vit. Apoll.* 1.2; 4.18; 5.12; 7.17, 39; 8.7. In earlier sources, Apollonius seems to have valued the positive use of the title (Philost. *Ep. Apoll.* 16–17).

461. Reimer, *Miracle*, 249.

462. E.g., Pliny E. *N.H.* 30.2.11 (meanwhile linking him with Jannes [cf. 2 Tim 3:8] and possibly a garbled name of YHWH as well as dating him millennia after Zoroaster though Zoroaster himself can hardly have been much earlier than a millennium before Pliny, at most!).

463. See Gager, “Moses the Magician”; cf. Remus, “Moses.”

464. On Jewish accusations that Jesus was a magician, see also Just. *Dial.* 69:7; *b. Sanh.* 43a; 107b; Klausner, *Jesus of Nazareth*, 27–28, 49–51, 293; Dalman, *Jesus in Talmud*, 45–50; Herford, *Christianity*, 50–62; Gero, “Polemic”; Yamauchi, “Magic?,” 90–91; Horbury, “Brigand,” 183–95; Stanton, *Gospel Truth?*, 156–58; regarding Jesus’s followers, see, e.g., *Eccl. Rab.* 1:8, §3; Dalman, *Jesus in Talmud*, 37–38; Herford, *Christianity*, 211–15; Bagatti, *Church*, 95–96. For a discussion of possible antimagical apologetic in Matthew’s Gospel, see Keener, *Spirit*, 106.

465. Cook, *Interpretation*, 36–39; Origen *Cels.* 1.6; 2.14, 16, 44, 48, 49, 51, 53; 3.1, 5. Pagans often viewed Christian exorcism as Egyptian or Jewish trickery (Edwards, “Exorcisms”).

466. Cook, *Interpretation*, 138.

467. Garrett, *Demise*, 36 (citing Acts 13:10).

468. Reimer, *Miracle*, 139–41, 246. Cf. Jewish miracle workers who avoided wealth (Reimer, *Miracle*, 252). “Good” intermediaries also put themselves in danger, as the apostles do (85).

(1) *Claims about Simon External to Acts*

Evidence suggests that Luke does not fabricate the story, although not all the potential evidence is clearly compelling. “Simon” was a common name (see comment on Acts 1:13), and the confrontation with “Peter” (rather than an explicit “Simon Peter”) indicates that Luke did not simply create the name to contrast with Peter’s (cf. “Paulus” in 13:7, 9). Moreover, Luke does not report a bitter end for Simon (despite the warning in 8:20–23), though this would suit the parallels with Judas and Ananias earlier and the less harsh judgments on Elymas and Sceva’s sons later.⁴⁶⁹

Patristic sources also report traditions about Simon⁴⁷⁰ that may complement Luke’s portrait, but the independence and reliability of these traditions are more questionable.⁴⁷¹ The earliest of these writers, Justin, wrote about a century after Simon’s reported activity in Acts.⁴⁷² Justin claims that Simon came from a Samaritan village named Gitto and performed magic feats in Rome during the reign of Claudius (*1 Apol.* 26.1–6; cf. 56.2).⁴⁷³ Because Justin was from Samaria (*1 Apol.* 1; *2 Apol.* 15), he may have had access to accurate tradition;⁴⁷⁴ Luke suggests, after all, that Simon was locally prominent (Acts 8:9–11), and the lack of other supporting evidence cannot count strongly against this claim (given the scarcity of our evidence from the East).⁴⁷⁵ Some of Justin’s details, however, may be legendary embellishments by Christian Samaritans that grew over a period of a century.⁴⁷⁶ The evidence Justin offers for Simon’s acceptance as a god in Rome is not fabricated but rests on someone’s misinterpretation. He cites a statue on the Tiber inscribed “To Simon the holy God” (*1 Apol.* 26.3); the statue was genuine and has been recovered, but it is to Semon, a Sabine deity (*CIL* 6.657).⁴⁷⁷

Even Justin’s claims about Samaria are questionable; as noted above, his exposure to ethnic Samaritan or Jewish beliefs before his conversion to Christianity was minimal, and so his contact with Samaritans may have been less than the geographical proximity of his birthplace might suggest. He claims that most of the Samaritans still worship Simon as a deity (*1 Apol.* 26; *Dial.* 120.6), which fits nothing of what we know of Samaria from non-Christian sources. His claim that the Samaritan magician Me[n]ander was a disciple of Simon (*1 Apol.* 26; also *Iren. Her.* 1.23.5) is plausible,⁴⁷⁸ though the connection between the two could be based on his sources’ geographic inference and antimagical polemic.

Irenaeus, writing several decades after Justin, claims that Simon, instead of repenting, competed with the apostles, seeking to be worshiped as a god (*Her.* 1.23.1).⁴⁷⁹ He elaborates beyond Justin’s account by claiming (in what may be suspiciously

469. Goulder, *Type and History*, 195.

470. See, e.g., Eckey, *Apostelgeschichte*, 192–95 (e.g., *Iren. Her.* 1.23.2: “father of all heresies,” p. 192; *Tert. Apol.* 13, p. 194); Samkuttly, *Samaritan Mission*, 179–87; Holzhausen, “Simon Magus” (noting [485] that these traditions are not relevant to the *historical* Simon); more extensively, including apocryphal acts through medieval sources, Cartledge, “Rise and Fall.” Philip baptized Simon as Jesus welcomed Judas (*Chrys. Hom. Acts* 18 [Martin, *Acts*, 90]); Peter later confronts the wicked Simon in Rome (Euseb. *H.E.* 2.14 [Martin, *Acts*, 95]).

471. Certainly, later Simonian doctrines cannot be traced back to Simon (Wilson, “Simon,” esp. 491). Pervo, *Acts*, 206–7, allows for some genuine tradition, though embellished in patristic sources.

472. Thus Conzelmann’s apparent preference of patristic sources over Acts (*History*, 126; cf. 71) is surprising.

473. For surveys of the patristic evidence, see Casey, “Simon,” 151–63; Albright, “Simon Magus.”

474. E.g., Hemer, *Acts in History*, 177.

475. Josephus’s attention to the Samaritans focuses particularly on their interaction with Judeans.

476. Fitzmyer, *Acts*, 403, regards the origin in Gitta as an embellishment, though it is the least likely element to have been fabricated (unless from intervillage rivalry). Boismard and Lamouille, *Actes*, 2:178, think that Simon was a pagan worshiper of Selene and practiced hierogamy.

477. Witherington, *Acts*, 283n18.

478. E.g., Ehrhardt, *Acts*, 43.

479. Cf. also the dispute with Peter in Caesarea (*Ps.-Clem. Hom.* 29.1–30.3; 35.1–5; 38.1–43.3; 58.2); for his claims to deity, see, e.g., Hippol. *Ref.* 10.8.

anachronistic language) that Simon presented himself to the Jews as the Son (did they worship the Son?), to the Samaritans as the Father, and to Gentiles as the Holy Spirit (1.23.1).

The claims that Simon was a gnostic⁴⁸⁰ are later than Justin (our earliest postbiblical reference to Simon) and do not warrant reading later Christian Gnosticism back into this figure.⁴⁸¹ (Had Luke known that Simon held some of the sorts of views attributed to later gnostics, which contradict Luke's own historical approach, it seems likely that Simon would have ended more harshly than in the open-ended Acts 8:24.) Other possibilities are likelier than Simon's being gnostic (quite improbable at such an early period):⁴⁸² Simon provided a convenient polemical bogeyman against a local sect of gnostics reputedly associated with a "Simon"; some gnostics appropriated his figure or tradition, and Irenaeus and later Christian writers reacted against this claim;⁴⁸³ or Simon provided the most obvious false prophet with whom later Christians could associate Gnosticism, and some gnostics appropriated the connection for its antiquity. Thus claims that Luke undoubtedly "uses Simon as a symbol of the Gnostic challenge"⁴⁸⁴ or even necessarily as a representative of "incipient Gnosticism"⁴⁸⁵ are too far reaching.

Other later traditions are also questionable, such as Simon's "flying" in Rome, winning fame, but also dying when, in answer to Peter's prayer, Simon's sorcery miraculously failed (*Acts Pet.* 4, 31–32).⁴⁸⁶ Many magicians claimed to be able to fly (see comment on Acts 8:39), but Christian or gnostic tradition may have developed this claim for Simon to counter Philip's aerial mobility in Acts 8:39 (the only case reported in the NT). The claim that he acquired magic in Egypt (*Ps.-Clem. Hom.* 2.22.2–26.5, esp. ch. 24) may rest on inference from the view that magic was especially prominent in Egypt.⁴⁸⁷

(2) *God's Great Power (8:10)*

With Simon's claim to be someone great (Acts 8:9) we may compare Jesus's warning that many would claim, "I am [he]" (Luke 21:8).⁴⁸⁸ Others embraced and propagated the idea that Simon was someone great, possibly in some sort of divine sense. The

480. For this gnostic system, see discussion in Jonas, *Religion*, 103–11; cf. Chadwick, *Early Church*, 37; for the view that some continuity could exist between Simon and the movement that later appropriated his name, see Fossum, "Simon Magus," 780–81. For precursors of the system attributed to Simon in Greek philosophies, see Hippol. *Ref.* 6.4, 6.

481. Yamauchi, *Gnosticism*, 60; Fitzmyer, *Acts*, 403; Witherington, *Acts*, 283; Lüdemann, *Christianity*, 101–2.

482. On the later dating of full Gnosticism, see, e.g., Yamauchi, *Gnosticism*, esp. 170–83; Keener, *John*, 162–69; Smith, *Gnostic Origins*; Wilson, *Gnostic Problem*, 68, 256.

483. Cf. Witherington, *Acts*, 284n18; Maynard-Reid, "Samaria," 1077. Certainly later gnostics were aware of the accounts in this section of Acts; see an example from the *Letter of Peter to Philip*, Nag Hammadi Codex 8 (in Kaler, "Letter").

484. Davies, *Sermon*, 68. Even the claim of G. Klein that Luke uses Simon to argue against contemporary Simonians is unfounded; as Barrett notes ("Simon Magus," 293), Simon's only "followers," like those of Ananias and Sapphira, are whoever follows in "his theological error and moral perversion."

485. Bruce, *History*, 228.

486. Cited in Johnson, *Acts*, 146; Aune, *Dictionary of Rhetoric*, 16. Simon's alleged conflicts with Peter in Rome appear more concisely in Hippol. *Ref.* 6.15.

487. See, e.g., *PDM* passim; Lucian *Lover of Lies* 31, 33; Apul. *Metam.* 2.28; Heliod. *Eth.* 6.14; Ps.-Callisth. *Alex.* 1.2–8; *Abot R. Nat.* 28 A; 48, §132 B; Dauphin, "Amulet"; Frankfurter, "Magic"; idem, *Religion in Egypt*, 198–37; idem, "Ritual Expertise"; Klauck, *Context*, 213; Assmann, "Magic and Theology" (ancient Egypt); and other sources above. Celsus associates Jesus's stay in Egypt with his supposed learning of magic (Cook, *Interpretation*, 32–33).

488. Simon does not make the other part of the claim, that the time is at hand (Luke 21:8), which presumably suited more the period after Jerusalem's fall and suffering generated longing to see the Son of Man (Luke 17:22).

adjective “great” (Acts 8:9–10), though by no means necessarily a divine title, was certainly compatible with divine acclamations (19:28, 34);⁴⁸⁹ it appears in a divine self-claim in *CIJ* 2:54, §802 (“I am the Great One who sits in the heavens”; from Pontus). The title “Great God” could apply to Apollo,⁴⁹⁰ allegedly to the ruler of Persia,⁴⁹¹ to the supreme deity,⁴⁹² and to the one true God.⁴⁹³ Whereas Theudas claimed to be “someone” (Acts 5:36; cf. Gal 6:3 for the idiom), Simon claimed to be “someone great” (Acts 8:9).⁴⁹⁴ Indeed, Simon’s claim, when conjoined with his later request for authority, may echo the character of the devil himself (Luke 4:6–7).⁴⁹⁵

That “small to great” were heeding him reflects a familiar LXX idiom.⁴⁹⁶ Titular acclamations after miracles were common in the Greco-Roman world.⁴⁹⁷ The acclamation’s introductory “This man is . . .” could, as some scholars suggest, point to Simon’s prior claim, “I am . . .”⁴⁹⁸ This would fit some divine claims we note in this section, but it should be noted that οὗτός ἐστιν is frequent in Luke’s style (at least eighteen times in this precise form alone), most often (though by no means exclusively) referring to Christ (the most common subject of speech in Luke-Acts). The claim about Simon directly contradicts claims about Moses (Acts 7:37–38) and his successor, Jesus (9:20).

“Power” may be a divine circumlocution (cf. Mark 14:62, clarified in Luke 22:69 as “power of God”), though Luke characteristically associates the term with miracles (Luke 5:17; 6:19; 8:46; 9:1; Acts 3:12; 4:7, 33; 6:8; 10:38), which is also relevant here (Acts 8:11, 13). “Power” was a divine title in some pagan texts (e.g., *PGM* 4.640, for Helios as the “greatest deity”).⁴⁹⁹ A Hellenistic Jewish writer could speak of God (or possibly a principle God established) as the “one power [δύναμις]” in creation (analogous to the Stoic Logos; *Let. Aris.* 143). God was “the most powerful one” (*fortissimi*, *L.A.B.* 16:5), and in one source Michael addresses God as “your power [κράτος]” (*Test. Ab.* 4:6 A).⁵⁰⁰ Rabbinic texts also sometimes use “power” as a circumlocution for God.⁵⁰¹ Some scholars compare the title for Jesus (1 Cor 1:24),⁵⁰² a useful comparison even though it may have arisen by different means.⁵⁰³ In any case, Simon is clearly wrong to claim the title; God’s power was revealed especially in Jesus.

Or.* 1.165, 268, 282, 316, 323; 2.27, 219; 3.71, 91, 97, 162, 194, 246, 284, 490, 556–57, 565, 575, 584, 656, 657, 665, 671, 687, 698, 702, 717, 740, 773, 781, 784, 818; 4.6, 25, 163; 5.176, 405; 3 Macc 3:36; 7:2; cf. *1 En.* 1:3; *Tob* 13:15; *Sib. Or.* 3.56, 735 (Christian interpolation in 3.776). It probably applies to Jesus in *Titus* 2:13 (Cullmann, *Christology*, 313; Longenecker, *Christology*, 138; Harris, “*Titus* 2:13,” 271; idem, *Jesus as God*, 173–85, esp. 185).

494. Tannehill, *Acts*, 53.

495. Samkuttu, *Samaritan Mission*, 168, developing Garrett, *Demise*, 67; Pesch, *Apostelgeschichte*, 1:276.

496. With Lake and Cadbury, *Commentary*, 90; Jervell, *Apostelgeschichte*, 261 (noting *Gen* 19:11; *2 Kgs* 23:2; *2 Chr* 34:30).

497. See Theissen, *Miracle Stories*, 161.

498. Conzelmann, *Acts*, 63 (citing Origen *Cels.* 7.8–9).

499. Also an inscription cited in Boring, Berger, and Colpe, *Commentary*, 318; Horsley, *Documents*, 3:31–32, §7; and Ramsay, *Discovery*, 117–18; and a powerful but not supreme deity in *PGM* 4.1225–29 (Witherington, *Acts*, 284).

500. Also as “your glory” (*Test. Ab.* 8:3 A; cf. 4:7 B). A lesser title such as “God’s powerful one [δυνατός]” (*Jos. Asen.* 4:7/8) can apply to humans; a prayer could also entreat God’s “great power(s)” (μεγάλ[ας] δυνάμ[εις], *CIJ* 1:519, §719, from Argos in Greece).

501. E.g., *Pesiq. Rab Kah.* 6:4; though *y. Meg.* 1:9, §17, lists it among divine names (e.g., “Most High”) that are not holy. Others mention the rabbinic title (e.g., Lake and Cadbury, *Commentary*, 91).

502. See Goppelt, *Judaism*, 176.

503. Cf. Keener, *Corinthians*, 28.

Following Justin's claim that Samaritans venerated Simon as the highest deity (1 *Apol.* 26.3; *Dial.* 120.6), Haenchen concludes that "the great power" must have been "a Samaritan designation for the supreme deity," so that Simon was claiming to be the highest deity.⁵⁰⁴ In view of *καλουμένη* in Acts 8:10, he suggests that "the great power" may be "an established formula"; Haenchen thinks that "Luke, patently considering it to require an explanation, glosses (wrongly) by appending 'of God.'"⁵⁰⁵ That Luke might gloss such a phrase if he found it in his source is rendered probable by his addition "of God" in Luke 22:69 (contrast Mark 14:62).⁵⁰⁶ But against the *necessary* omission of "of God," it should be noted that the most commonly cited pagan parallel for "great power" as the supreme deity reads fully, "great power of the immortal god."⁵⁰⁷

Many scholars thus think that Simon claimed deity for himself.⁵⁰⁸ He would hardly be the only *μάγος* to be viewed by others as a deity because of wonder-working properties.⁵⁰⁹ Egyptian temple spells may also identify priests with gods on a ritual level.⁵¹⁰ The boundaries between mortal and deity were often blurred in Hellenism (see comment on Acts 14:11), which had intermediate categories and allowed movement from lower to higher. But to "make oneself" something was to claim authority or identity that one did not have;⁵¹¹ to make oneself a deity was universally regarded as an act of foolish, arrogant presumption.⁵¹²

Second-century claims about Simon (and, to some extent, Luke's description) become more intelligible to modern readers against the backdrop of ancient religion. Although we may doubt church fathers' views that Simon himself was a gnostic, their interpretation of him in some other respects comports with the earliest evidence.

(3) Samaritan "Orthodoxy" and Hellenism

Both traditional Semitic and growing Hellenistic influences helped shape the Samaritans' response to Simon. Samaritans certainly affirmed God's oneness (including most of those who were in a later period suspected of tolerating syncretism).⁵¹³ In some respects, Samaritans (who were probably often less cosmopolitan, more rural, and more traditional) were, if anything, more conservative than Judeans, avoiding depictions of animals or people in their mosaics.⁵¹⁴ Despite some Jewish polemic to the contrary, the Samaritans were intensely religious.⁵¹⁵ Palestinian Jews assumed that the Samaritans had their own scribes who interpreted Scripture;⁵¹⁶ they recognized that Samaritans accepted the Torah (though not the prophets), and some even contended

504. Haenchen, *Acts*, 303. See Fossum, *Name*, 171–72, cited in Parsons, *Acts*, 114.

505. Haenchen, *Acts*, 307 (with others, but denying the relevance of 1 Cor 1:24 and the Samaritan Taheb).

506. Also frequently noted; e.g., Lake and Cadbury, *Commentary*, 91; Bruce, *Acts*¹, 185.

507. Horsley, *Documents*, 3:31–32, §7.

508. Lüdemann, *Christianity*, 101–2, thinks that Simon was historically worshiped as a god but that Luke then degrades Simon as a mere "magician." For his claim to deity, see also Ramsay, *Discovery*, 117; Bruce, *Acts*¹, 185.

509. See, e.g., Ps.-Callisth. *Alex.* 1.4. This attempt of an impostor to "make himself" a deity was frequently ridiculed (Max. Tyre 29.4; Boring, Berger, and Colpe, *Commentary*, 283, cite also Porph. *Abst.* 2.42).

510. Frankfurter, *Religion in Egypt*, 229.

511. See Neyrey, "Shame of Cross," 126–27. Any honor claim was open to challenge (cf. Pilch, "Lying," 132).

512. Apollod. *Bib.* 1.9.7; Max. Tyre 29.4; 35.2; Meeks, "Agent," 43; cf. Philo's complaint about Gaius Caligula in Meeks, "Agent," 55; Boring, Berger, and Colpe, *Commentary*, 267–68, cite Jos. *Ant.* 19.4; Suet. *Calig.* 22; see also discussion in Keener, "Subordination," 41–42; idem, *John*, 647–48.

513. See the Shema (from the fourth to the thirteenth centuries) in Davies, "Samaritan Inscription."

514. On the mosaics and other features of Samaritan synagogues, see Pummer, "Synagogue." Jerusalem's urbanization and the larger population of Jews may have contributed to Palestinian Judaism's greater hellenization in some respects.

515. See, e.g., Dar, "Menorot," on the strictness of rural Samaria. I employed these observations earlier in Keener, *John*, 593.

516. *Y. Yebam.* 1:6, §1.

that they were more meticulous with it than Jewish people were.⁵¹⁷ Extant Samaritan texts detail laws on circumcision, the Sabbath, and so forth, though frequently including polemic against Jewish forms of the rituals.⁵¹⁸ Their calendar must have differed (creating tension for Galilean pilgrims passing through Samaria at festival times; e.g., Luke 9:53), but this divergence was inevitable unless they waited for leaders in Jerusalem to announce the sightings of the new moon and accepted their intercalations.⁵¹⁹

The Samaritans may have been fairly hellenized, however, for more than a century.⁵²⁰ Certainly inscriptions show that the Greek language was widely used in Samaria, even though Aramaic was probably the dominant mother tongue.⁵²¹

As noted above in the excursus on Samaritans, *true* Samaritans did not believe in other gods (cf. “power of God,” Acts 8:10) or, insofar as we can reconstruct their views at this period, even other prophets subsequent to Moses.⁵²² But as in Judaism and elsewhere, such views from some of the movement’s official representatives did not prevent popular religion from being susceptible to signs prophets (cf. John 4:19); many disaffected Samaritans, like many disaffected Judeans, were susceptible to exploitive demagogues. One supposed prophet⁵²³ gathered expectant Samaritans on Mount Gerizim and promised to show them the sacred vessels Moses had put under the mountain (Jos. *Ant.* 18.85), leading to the slaughter of many of them at Pilate’s hands (18.87). Those who worked or promised dramatic signs could undoubtedly attract followers in Samaria just as they could in Judea (cf. 20.167–68). That Simon has drawn a following is not, therefore, surprising.

(4) *Syncretism of Deities*

On a popular level, Samaritans may have proved susceptible to syncretic influences that characterized the Greco-Roman world in general,⁵²⁴ though, like Judean and Galilean monotheists, they must have blended these influences into their faith.⁵²⁵

From an early period, Greeks thought deities belonged to all peoples, though different peoples assigned them different names.⁵²⁶ Herodotus may have begun the practice of providing Greek names to foreign deities to explain them to readers.⁵²⁷ But it was the Hellenistic era that led to syncretism on a much wider scale.⁵²⁸ Greek conquest of Persia led to widespread respect for and embrace of Greek gods and consequent mixing of Greek and local elements.⁵²⁹ When Greeks relocated to other countries

517. B. Ber. 47b.

518. Bowman, *Documents*, 299. On the Sabbath, see Weiss, “Sabbath among Samaritans.”

519. Thornton, “Calendar.”

520. Freyne, *Galilee, Jesus*, 182–83 (though the inference from 2 Macc 6:2 would not require rural Samaritans to be as hellenized as urban Jerusalemites).

521. See van der Horst, “Languages.”

522. Bruce, *History*, 37–38; idem, *Time*, 39. If this perspective reflects sufficiently early tradition, perhaps the Samaritans viewed the pseudo-eschatological prophet of Jos. *Ant.* 18.85–87 messianically; the Romans certainly treated him as a political threat.

523. Perhaps envisioned as their eschatological Moses-like prophet, if the Samaritan tradition about this figure is this early. On the Taheb, see discussion above.

524. For paganism in Palestine (related especially to Gentiles there), see, e.g., Grossmann, “Figurine”; Bull, “Mithraic Medallion”; Lease, “Caesarea Mithraeum”; Flusser, “Paganism”; further discussion in Keener, *John*, 1170–72.

525. Although clear synagogue zodiacs are later, first-century Jewish sources also accepted zodiacal and astrological ideas (see excursus on astrology at Acts 2:9–11).

526. Ferguson, *Backgrounds*, 114 (citing Hom. *Od.* 9.552); certainly Homer assumes it in his depiction of the Trojan War; and see also Soph. *Oed. Col.* 42–43.

527. So Hartmann, “Kanttekeningen.”

528. Grant, *Religions*, xxii.

529. Avi-Yonah, *Hellenism*, 29. Indian religion influenced and was influenced by other religious systems (Thapar, *History*, 119, even if overstated).

during the Hellenistic era, they worshiped the local deities, making “Egyptian” and “Oriental” deities more relevant to them.⁵³⁰ Scholars have often portrayed syncretism of various religious systems as one of the most characteristic features of Hellenistic religion.⁵³¹ Thus Syrian deities such as Baal Shamayim were hellenized as Zeus (or later, for Romans, as Jupiter).⁵³²

The theologically pragmatic Romans likewise identified foreign deities with their own,⁵³³ and syncretism remained characteristic of polytheistic religion in the Greco-Roman world.⁵³⁴ A fairly mainstream rhetorician of late antiquity identifies Apollo (Men. Rhet. 2.17, 445.31–32) not only with the Greek sun deity Helios (445.32–446.2) but with the Persian deity Mithras and the Egyptian deity Horus (446.2) and concludes by leaving the ultimate choice of name with the deity himself (446.8–9). Scholars have also claimed such syncretism in the various Mysteries,⁵³⁵ so that, for instance, Dionysus could be identified with Zeus or with Triptolemus.⁵³⁶ Mithraism was also syncretistic.⁵³⁷

Syncretism characterizes magical texts and perhaps the popular practices they reflect. A later chant addressed to Apollo (PGM 1.298) includes invocations of Michael (1.301), Gabriel (1.302), and “Adonai” (1.305);⁵³⁸ the archangel Michael is identified with the Lord Osiris (4.2355–56); and so forth. Some later Christian gnostic groups proved highly syncretistic.⁵³⁹

In Hellenistic and Roman Egypt the mixing of deities became so pervasive (including deities from Palestine and Asia Minor) that even Greek visitors sometimes complained.⁵⁴⁰ The Egyptians themselves hybridized Osiris and Apis into Serapis,⁵⁴¹ an extremely popular cult widely exported.⁵⁴² Plutarch freely identified Greek and Egyptian deities,⁵⁴³ just as he regarded Zeus as the ancestral god of the Persians (*Fort. Alex.* 2.6, *Mor.* 338F).

Some Hellenistic Jews began to participate in the practice,⁵⁴⁴ though usually by the back door through a euhemeristic approach (see discussion at Acts 17:23).

530. Nilsson, *Piety*, 94; Beaujeu, “Cultes locaux,” 440–41; Kákosy, “Egypt in Greek Thought,” 7–9.

531. See Tarn, *Civilisation*, 339 (noting the influence of Stoic allegorization of myths); Grant, *Religions*, xiii–xx, esp. xiii; Martin, *Religions*, 10–11. This was “contact syncretism” rather than “internal syncretism” (Gordon, “Syncretism,” 1462).

532. Cornfeld, *Josephus*, 16; Pfeiffer, *Scrolls*, 135; Klausner, *Jesus to Paul*, 100. Syrians preserved and adapted the ancient cult of Baal/Bel, and some scholars (Flusser, “Paganism,” 1079–80; Oden, “Persistence”) argue that Canaanite religion maintained its identity without fully blending into Greek categories; but where this was true, it would be for cultural more than theological reasons.

533. For discussion, see Girard, “Interpretatio romana”; Rives, “*Interpretatio Romana*.” This identification of deities (at least on the level of names) fits the larger pattern of how Romans negotiated cultural differences (Ando, “*Interpretatio*”).

534. See, e.g., Stambaugh and Balch, *Environment*, 44–45; Koester, *Introduction*, 1:164–67; Finegan, *Records*, 90. By the third and fourth centuries, this was prominent even for Roman Gaul (Hatt, “Syncretisme”). Some speak of a decline of traditional Roman religion (Carcopino, *Life*, 121–27; the decline of traditional religion is overstated in Case, *Origins*, 84–90) and a corresponding openness to Eastern religion (Carcopino, *Life*, 128–35). Cf. comment on pagan inclusivity at Acts 4:12.

535. See, e.g., Reitzenstein, *Religions*, 117–19; Sheldon, *Mystery Religions*, 36–37. One could be initiated into various cults (Whittaker, *Jews and Christians*, 267), though occasionally a cult (e.g., the Zeus cult at Sardis) prohibited its leaders from initiation into other Mysteries (Horsley, *Documents*, 1:21–23, §3).

536. For these particular examples, see Ruck, “Mystery,” 39, 45.

537. On the northern coast of the Black Sea, see Blawatsky and Kochelenko, *Culte de Mithra*.

538. Cf. similarly PGM 3.405.

539. See, e.g., Zoroaster in *Ap. John* 19; *Zost.* 132; the nine Muses in *Apoc. Adam* 81.

540. Lewis, *Life*, 84–87. For examples, see also Arnold, *Power*, 18.

541. Tinh, “Sarapis and Isis,” 101.

542. Condemned in *Sib. Or.* 5.487–88 as not truly a deity (491).

543. E.g., *Plut. Isis* 2, *Mor.* 351CF; 3, *Mor.* 352AB; 78, *Mor.* 382E.

544. True of their artwork (see Avi-Yonah, “Archaeological Sources,” 53); true religiously of the fifth-century B.C.E. Elephantine temple (Bright, *History*, 376) and perhaps in later Egypt as well (Urbach, *Sages*, 1:27–28).

For example, some held that the Greek Atlas, who discovered astrology, was simply Enoch.⁵⁴⁵ Nor did later Christians wholly escape, since pagan substructures in religious thought often persisted after mass transfers of allegiance to the new imperial religion.⁵⁴⁶ But full-scale syncretism may have affected some Samaritans more severely, probably because of the local prominence of Greek Sebaste, at least eventually.⁵⁴⁷ One third-century coin seems to associate YHWH with Zeus Hypsistos and his temple.⁵⁴⁸ (On the tendency toward a sort of philosophic monotheism through the blending of deities, see comment on Acts 17:18, comparing atheism with monotheism in ancient thought.)

(5) *Male-Female Dyads*

This assimilation of deities, especially of female deities, becomes most relevant to the discussion of Simon's claims if we admit patristic claims about Simon's consort, Helena.⁵⁴⁹ Justin (combating a form of Gnosticism obviously later than Simon) claims that Simon's followers revered Helena, a former prostitute, as the first principle or idea emanating from his deity (1 *Apol.* 26). Irenaeus elaborates that Simon bought her as a slave in Tyre, claiming that he conceived her by his mind as the mother of all, creating angels; she was successively reincarnated (*Her.* 1.23.2) until, in a lost form, she was redeemed by Simon and the two together offered salvation. The Middle Platonic idea of buffer emanations is a prominent part of Irenaeus's attack on Valentinian gnostics a few decades later.⁵⁵⁰ The claim that Helena was formerly a prostitute is the sort of discrediting charge that would be reported by his enemies if true, or possibly invented by his enemies if false.⁵⁵¹ Some scholars have seen the use of hierogamy (sacred marriage) elsewhere in ancient literature.⁵⁵² (Many of the pillars of the sacred-marriage concept, however, have been undermined in recent years.)⁵⁵³

Emphasis on a female aspect of the divine grew in time;⁵⁵⁴ the Hellenistic era already had begun assimilating the Greek Demeter with the Egyptian Isis as well

545. Ps.-Eup., via Alexander Polyhistor, in Euseb. *P.E.* 9.17.9; see more fully Koester, *Introduction*, 1:264.

546. See examples of syncretism in Lewis, *Life*, 97, 100.

547. Cf. Di Segni, "Toponym." But some earlier notions of specifically Samaritan syncretism stem from wrongly conflating a pagan temple of Zeus discovered in excavations with the Samaritan temple (Zangenberg, "Samaria," 425).

548. So Meshorer, "Sacrifice."

549. Cf. the similar role for Rutilia in Lucian *Alex.* 39.

550. Cf., e.g., Iren. *Her.* 1.1.1–1.4.5. Neoplatonism stressed emanations (Dillon, *Middle Platonists*, passim; e.g., Proclus *Poet.* 6.1, K88.21–89.2; 134.10–15) and a demiurge (p. 7; cf. Philo *Drunkenness* 30; in reported gnostic systems, cf., e.g., Iren. *Her.* 1.1–3; in later Kabbalah, cf. Ginsburg, *Kabbalah*, 108–9). For Simon supposedly advocating veneration of angels, see Tert. *Praescr.* 33; for Simon and emanations, Hippol. *Ref.* 6.7–8, 13; 10.8; his pairing with Helen, whom he bought from slavery, 6.14.

551. For views of prostitution, see, e.g., Keener, "Adultery," 11–12; McGinn, "Brothel"; idem, "Palatine"; some discussion at Acts 16:15. Upper-class critics would also regard a background in slavery as more demeaning.

552. For a divine marriage, Ephesian coins in Riesner, *Early Period*, 215; the report in Hdn. 5.6.5 (meant to sound appalling); in myth, see Hom. *Il.* 14.294–96; Dio Chrys. *Or.* 36.56; for perspectives on a ritual in Gnosticism, Klauck, *Context*, 496–97; Batey, *Imagery*, 70–76; symbolically, in Philo (Horsley, "Marriage"). Despite concerns below, some evidence remains (Klauck, *Context*, 120, 125).

553. Against earlier speculations (e.g., Reitzenstein, *Religions*, 310–19; cf. perhaps Willoughby, *Initiation*, 136; Ruck, "Mystery," 36, 40; Murray, *Stages*, 32), it is poorly attested as a *ritual* in most Greek religion (Graf, "Hieros Gamos: Term"; Burkert, *Religions*, 108–9; Koester, *Introduction*, 1:177, 193; Wagner, *Baptism*, 73), and the myths do not connect with actual sexual rites (Graf, "Hieros Gamos: Greece"); some reports in antiquity may be polemical (Gasparro, *Soteriology*, 81; Klauck, *Context*, 102). Even the marriage of goddess and ruler at Ur was a legitimation rite, differing from the cosmogenic theogamies of Mesopotamian myths (Renger, "Hieros Gamos"), and even ancient Near Eastern cult prostitution altogether is now debated (Lanci, "Stones," 206–10; cf. Baugh, "Cult Prostitution"; but cf. Val. Max. 2.6.15).

554. See, e.g., Wagner, "Divine Femeness" (for second-century C.E. examples).

as the Syrian Atargatis and Phrygian Cybele.⁵⁵⁵ Ancients universalized the mother goddess figures, identifying Demeter,⁵⁵⁶ Isis,⁵⁵⁷ and even Artemis⁵⁵⁸ and Venus (Apul. *Metam.* 4.30), and also Demeter's daughter Kore ("the girl," a title of Persephone)⁵⁵⁹ with other feminine deities. Isis was assimilated to the "triple face" of Proserpina (Persephone, 11.2), could be called on by a variety of names (11.2), and manifested in herself all gods and goddesses (11.4), though her proper name was Isis (11.5).⁵⁶⁰ Every Egyptian queen was traditionally "an incarnation of Isis," a claim explicitly offered by Cleopatra.⁵⁶¹ Because the witch goddess Hecate was associated also with the earth mother and the moon goddess, she often appears as the "threefold" Hecate, ruling heaven, earth, and sea (*Orph. H.* 1.2);⁵⁶² Jewish people knew such traditions.⁵⁶³

Developing ideas at least as old as the pairing of male heavens with female earth in Babylonian and Greek creation myths,⁵⁶⁴ some ancients developed the assimilation of deities toward a male-female dyadic unity (e.g., Samothracian Mysteries in Varro *L.L.* 5.10.58).⁵⁶⁵ As Irenaeus described Gnosticism, all emanations after the first aeon consisted of two parts each, always a male and a female part (e.g., λόγος and ζωή; ἄνθρωπος and ἐκκλησία; *Her.* 1.1.1).⁵⁶⁶

These ideas likely circulated within the region of the Samaritans, in the Hellenistic city Sebaste, where Kore (identified with Isis and Persephone) was worshiped as the feminine part of deity.⁵⁶⁷ (Herod probably thought Kore more "neutral" for a Hellenistic city than the traditional Isis worship there.)⁵⁶⁸ The idea that Simon was

555. See Martin, *Religions*, 62–72 (Demeter), 72–81 (Isis), 81–83 (Atargatis), 83–84 (Cybele), and esp. 81–84 on "the Universal Goddess"; Rives, *Religion*, 147.

556. E.g., Burkert, *Mystery Cults*, 81 (with Cybele); idem, *Religion*, 178 (even with Aphrodite, a different kind of fertility goddess).

557. With Cybele, e.g., in Godwin, *Mystery Religions*, 121; with Demeter in the aretology in Horsley, *Documents*, 1:11, 17, §2; with the moon (Selene) in Diod. Sic. 1.11.1 (like Osiris as Dionysus in 1.11.3). She apparently absorbs the identity of Semele as Dionysus's mother in *Orph. H.* 42.10. Cf. Bultmann, *Christianity*, 159 (also comparing the later Madonna).

558. With Bendis at Philippi (Abrahamsen, "Reliefs," 61–64) and with Astarte in Cyprus (Budín, "Reconsideration," noting a wider blending of feminine deities elsewhere).

559. Cf. Murray, *Stages*, 45, 86, 170; Otto, *Dionysus*, 184. Kore (e.g., Paus. 8.31.1) became very prominent (see Burkert, *Religion*, 159; the myth in Mylonas, *Eleusis*, passim). See the early Christian critiques in Justin 1 *Apol.* 64; Athenag. *Plea* 32.

560. The deities include (their Greek titles are used here except with Bellona) Cybele, Athena, Aphrodite, Artemis, Persephone, Demeter, Hera, Bellona, Hecate, etc. An even longer list of titles appears in the early second-century C.E. document P.Oxy. 11.1380 (available in Grant, *Religions*, 128–30; Kraemer, *Maenads*, 367–68, §133 [cf. also 368–70, §133]; cf. Moore, "Life," 259). This focus on Isis as the highest deity may be more characteristic of Isis devotees in Apuleius's time than in the first century, but the syncretism was hardly new. For the nature allegory involved, see Burkert, *Mystery Cults*, 82.

561. Collins, "Sibylline Oracles," 358–59; idem, *Sibylline Oracles*, 170–71.

562. See further Ferguson, *Backgrounds*, 178 (citing Hesiod *Theog.* 411ff.; Paus. 2.30.2). Though Dionysus is also τριφυής, threefold (*Orph. H.* 52.5). Hecate was also goddess of the three ways (forks in roads) and had a triple face (Athen. *Deipn.* 7.325A).

563. See *Test. Sol.* 15:4 (probably third century; the note also cites Goodenough, *Symbols*, 2:236).

564. For the universe as a hermaphrodite organism, see Philost. *Vit. Apoll.* 3.34.

565. Dyads were feminine in Pythagorean numerology (cf. Hippol. *Ref.* 1.2). Later rabbis also addressed the dyad of male and female principles (*Pesiq. Rab.* 20:2). If we accept a "triad" of the "Great God," the Great Mother, and a semidivine messenger deity (cf. Mitescu, "Sull'ipotesi"; but beyond the dyad, deities could be linked in various configurations and numbers), it appears only in the second to fourth centuries, well after the completion of Acts. Cf. also the treatment of particular deities as androgynous (Mastrocinque, "Choices," 382). On trends toward a sort of monotheism, see also discussion at Acts 17:18; also Nilsson, *Piety*, 115–24; Winslow, "Religion," 242; Ferguson, *Backgrounds*, 252; Cary and Haarhoff, *Life*, 326–30; Fürst, "Monotheistische Tendenzen."

566. Zoe is daughter of Sophia in *Hyp. Arch.* 95; *Orig. World* 104.

567. So Flusser, "Goddess of Samaria." For the Kore temple, altar, and large stadium on the north and northeast slopes of Sebaste, see Tappy, "Samaria," 467.

568. Magness, "Cults."

the male principle and his consort, Helena, the female⁵⁶⁹ would have suited ideas already available in the region.⁵⁷⁰ How might Samaritans who heard these ideas have adapted and accommodated them within monotheism? Perhaps they associated him simply with the Taheb, the Mosaic restorer,⁵⁷¹ rather than considering him a deity. But concepts widely available help explain the patristic depictions of Simon, regardless of the degree of historical tradition behind them.

V. PHILIP'S CONVERTS (8:12–13)

As elsewhere, Luke continues to emphasize women as well as men (cf. Acts 8:3). Philip's "great miracles" (δυνάμεις μεγάλας, 8:13) here counter Simon's formerly claimed status as the "power . . . that is called great" (δύναμις . . . ἡ καλουμένη μεγάλη) of God (8:10).⁵⁷² That Simon himself is "amazed," rather than "amazing" others (8:9, 11), emphasizes the reversal: the one who valued signs has now been out-signed by a messenger of God's kingdom.⁵⁷³

Mention of the Samaritans' baptism would have astonished Jewish hearers; since male Samaritans were already circumcised,⁵⁷⁴ baptism was sufficient to signal their conversion without raising the kinds of issues that Cornelius's later, uncircumcised baptism did (cf. Acts 10:47; 11:3). Yet Samaritans usually despised Jews, and their conversion to Judaism was rare; after all, from their perspective, it would have been equivalent to becoming traitors to their people. Similarly, many Jews would have been scandalized that Philip (following Stephen's theology) welcomed them to true faith by baptism without requiring Samaritans' confession of loyalty to the Jerusalem temple versus their heretical allegiance to Mount Gerizim.

Philip successfully evangelized Samaritans with the good news of the kingdom (8:12). The kingdom is both present and future in Luke-Acts (see comment on Acts 1:3, 6);⁵⁷⁵ its promise as a future era in Dan 2:44–45 applies to all the earth, which makes it relevant for Samaritans, whatever their status vis-à-vis Judaism. By proclaiming the kingdom, Philip follows the role of the Twelve (Luke 9:2).⁵⁷⁶ That Philip preaches not only the kingdom but also "Jesus's name" emphasizes that the kingdom involves Jesus, the king (see Acts 1:6–11; 3:19–21); both phrases are Lukan ways of speaking about the good news proclaimed by the apostolic church.⁵⁷⁷

Because this passage describes conversion in the same language as elsewhere in Acts, the Samaritans' conversion cannot be viewed as defective.⁵⁷⁸ The response of

569. Hippolytus emphasizes Simon's view of the male-female duality (*Ref.* 6.13) and divinization of himself and Helen (6.14).

570. Flusser, "Goddess of Samaria," 18–20.

571. Grant, *Gnosticism*, 73 (associating him also with the "prophet" of 36 C.E. and arguing that gnostic reinterpretations stemmed from the failure of that eschatological mission); Spencer, *Philip*, 115–22 (contrasting Jesus as the true Mosaic prophet in Acts 7, though Luke does not present Simon as Mosaic).

572. The two terms appear together in Luke-Acts elsewhere only at Acts 4:33; "great" does, however, directly modify "signs" in 6:8; 21:11.

573. With Gaventa, *Acts*, 137.

574. See, e.g., Bowman, *Documents*, 299. Still, Epiphanius (*De mens.* 16.7–9) believed that Jews recircumcised any Samaritan converts to Judaism (Le Cornu, *Acts*, 403).

575. Nolland, "Salvation-History," 70, sees Acts 8:12 as mainly present, but there is not sufficient context here to determine an emphasis one way or the other (Samaritans did have future eschatology).

576. For the good news of God's kingdom, see Isa 52:7; *Tg. Isa.* 40:9 (though Luke draws esp. on Isa 61:1 in his programmatic statement in Luke 4:18).

577. Rhetoricians would consider such expansion with a parallel phrase synonymia, "a form of amplification based on repetition" (Watson, "Speech," 200, citing Cic. *Part. or.* 15.53; Rowe, "Style," 133, citing Demosth. *Fals. leg.* 208; Cic. *Cat.* 2.1.1; Porter, "Paul and Letters," 580, citing Rom 7:15–16).

578. See Russell, "Believed Philip Preaching"; Marshall, *Acts*, 156; Carson, *Showing Spirit*, 144. See esp. Samkuty, *Samaritan Mission*, passim (e.g., 219), who shows that Luke defends rather than reduces the authenticity of the Samaritans' experience.

“joy” also followed Paul’s ministry (Acts 13:48, 52), although he often encountered hostility as well. Philip preached “Christ” (8:5) and “the good news about God’s kingdom” (8:12) precisely as Paul would (20:25; 28:31). Some scholars doubt the Samaritans’ conversion because Luke does not explicitly mention their repentance. But Luke apparently assumes repentance normally where he mentions faith and baptism; although he mentions repentance after 2:38 (in 11:18; 13:24; 14:15; 17:30; 20:21; 26:18), he barely ever does so when describing conversions. If the Samaritans’ conversion is deemed inauthentic because Luke does not employ the term “repentance,” very few converts appear anywhere in Acts. In fact, Luke often fails to narrate even baptism, subsuming the assumption of its occurrence under the mention of faith; he is, if anything, more emphatic here than usual (perhaps for the sake of those inclined to doubt Samaritans’ genuineness).

Luke is clear that the Samaritans “believed”—language that elsewhere indicates saving faith,⁵⁷⁹ especially when baptism follows it (16:31–34; 18:8). (Presumably Philip, one of the leaders assisting the apostles in Jerusalem [6:3, 5], would understand conversion well enough not to baptize the Samaritans before they had expressed faith and repentance [2:38].) Although Dunn suggests that “believe” with the dative implies only intellectual assent,⁵⁸⁰ he has only two examples, neither of which is clear;⁵⁸¹ further, the phrase refers to genuine saving faith in 16:34 and 18:8.⁵⁸² Dunn thinks that they accepted Philip as they accepted Simon and compares their initial faith to that of Simon, who fails to persevere.⁵⁸³ But is *any* conversion in Acts secure without perseverance (cf. 14:22; 20:26–30)? That Simon fails to persevere tells us no more about the character of other Samaritan converts’ faith than Judas’s failure to persevere reveals that of the Twelve (1:17).

As noted above, some scholars argue that Simon was not converted to begin with, since he continues in sin;⁵⁸⁴ Luke says what the Samaritans believed (8:12) but not what Simon believed.⁵⁸⁵ But this is typical Lukan shorthand (cf. 16:32 with 16:31). Faith in response to signs may be only the most basic level of faith in Johannine soteriology, but it is never denigrated by Luke or in most ancient literature.⁵⁸⁶ Like John, however, Luke expects persevering faith;⁵⁸⁷ Simon’s faith is not faulted because of what provokes it but because he becomes distracted by other concerns (cf. Luke 8:13–14). As Barrett puts it, “There is nothing in this verse to suggest that Simon, in his believing . . . and in his receiving baptism . . . , was less sincere or in any way a less satisfactory convert than the other Samaritans.”⁵⁸⁸

The conversion of Simon, even if temporary, demonstrates God’s power in the

579. See, e.g., Acts 4:4; 10:45; 11:17; 14:1–2; 15:7, 9; 16:1; 17:12, 34; 19:16.

580. Dunn, *Baptism*, 65.

581. See the critique of Ervin, *Conversion-Initiation*, 29, noting that πιστεύω takes the dative especially when related to a person (noting [30–32] that when the “Lord” is the dative object, Dunn’s case falls completely apart; cf. Acts 5:14; 13:12; 16:34; 18:8; 27:25 [Paul]).

582. With Marshall, *Acts*, 156 (who contrasts Simon in Acts 8:13, where the dative is not used, in any case). Barrett, *Acts*, 408, finds the dative with the preacher as its object unusual but logical here.

583. Dunn, *Baptism*, 64.

584. Cf. Aug. *Tract. Jn.* 6.18.1–5: Simon could not receive the Spirit at baptism because his heart was deceitful. Bede *Comm. Acts* 8.13 (Martin, *Acts*, 91) allows that perhaps Simon believed but thinks more likely that Simon merely “pretended” to do so in order to learn Philip’s power.

585. Witherington, *Acts*, 288.

586. E.g., Pindar *Pyth.* 4.199–200. See Keener, *John*, 275–77, 325–28.

587. For this theme in John, see, e.g., John 8:31; 15:4–6; Keener, *John*, 277, 746–47, 999–1002.

588. Barrett, *Acts*, 409 (citing also Pesch, *Apostelgeschichte*, 275).

community. Mass conversion to foreign movements⁵⁸⁹ with sharp boundaries often reduces or suppresses traditional shamanism⁵⁹⁰ (although, admittedly, not always immediately; see comment on Acts 19:18). The reversal in the narrative fits the expected pattern in those situations that the missiological literature sometimes calls “power encounters.”⁵⁹¹ Historically, such spiritual confrontations (in the broad sense) are reported of earlier missionaries such as Patrick in Ireland, Columba in Scotland, and Boniface in Germany.⁵⁹² In many traditional societies, such “power encounters” have taken the form of burning fetishes or felling a sacred tree or totem without suffering the promised harmful effects.⁵⁹³

Earlier, Irenaeus attests that many nonbelievers in his day became Christians after experiencing successful exorcisms.⁵⁹⁴ Later, John Wesley was reported to have cast out demons from those involuntarily possessed, yielding deliverance.⁵⁹⁵ Early Methodist preachers in Wesley’s day expelled demons from some who were possessed.⁵⁹⁶ Lutheran pastor Johann Christian Blumhardt undertook a lengthy struggle in prayer until a person believed to be severely possessed and with an occult background was freed; this deliverance affected the entire area and, he believed, broke a spiritual barrier.⁵⁹⁷ Karl Barth found in Blumhardt’s account of exorcism a fitting encapsulation of Christ’s gospel triumph.⁵⁹⁸

Missiologists often cite the relevance of power encounters for reaching cultures today that affirm superhuman powers.⁵⁹⁹ “Power encounters” appear commonly in modern accounts of evangelization,⁶⁰⁰ and both popular and academic literature offer

589. On the usefulness of people movements in missiology, see, e.g., Pothen, “Missions,” 308–11, associating (308) the conversion of more than 70 percent of Indian Christians with people movements and noting (309) that such group conversions maintain the social fabric in a way that individual conversions do not. Laing, “Consequences,” addresses mass movements’ great effect on the character of Christianity in India. On people movements, see comment on Acts 9:35.

590. E.g., Murphy, “Aspects of Shamanism,” 56–57.

591. The term also appears now in some other literature on Acts here (see, e.g., Talbert, *Acts*, 71, 170).

592. De Wet, “Signs,” 87. For Boniface felling Thor’s sacred oak (similar to “trial by ordeal”), see Neill, *History of Missions*, 75; Latourette, *To A.D. 1500*, 348; Tucker, *Jerusalem*, 47.

593. De Wet, “Signs,” 82–83. For the spiritual-power dimension in current missiology more generally (noting negative but especially positive features), see Pocock, Van Rheenen, and McConnell, *Face*, 183–208.

594. Barrett-Lennard, *Healing*, 229. The grandfather of fifth-century historian Sozomen was converted through the family witnessing a Christian instantly exorcise a spirit in Jesus’s name, whereas pagans and others had failed to accomplish this by any means (Frend, “Place of Miracles,” 11, citing Sozomen *H.E.* 5.15.14–17).

595. Tomkins, *Wesley*, 72.

596. Rack, “Healing,” 147–49. For Wesley’s views about the demonic world in their eighteenth-century context, see Webster, “Terrors.” Cf. Baer, “Bodies,” 47, for an early Free Methodist exorcism.

597. Ising, *Blumhardt*, 162–89, with clearly therapeutic results (175–76); cf. the gradual deliverance in 327 (and perhaps 327–28). He did not accept all alleged exorcisms, but eyewitness experience opened him to the reality of some (104). See further Macchia, *Spirituality*, 65–68.

598. Barth, *Dogmatics*, 4.3:165ff., noted in Kauffman, “Introduction,” 7–8.

599. E.g., Hiebert, “Power Encounter,” 56; Musk, “Popular Islam,” 214–15; Parshall, “Lessons,” 255–56.

600. See discussion of power encounters in Keener, *Miracles*, 843–56 (including examples from interviews); examples of reports in Pothen, “Missions,” 305–8; Burgess, *Revolution*, 151; Lees and Fiddes, “Healed,” 25; Daniel, “Labour,” 158–59; Crawford, *Miracles*, 144–45; Koch, *Zulus*, 111, 148, 152, 153, 199, 279; Numbere, *Vision*, 40–41, 125–26, 170; Danyun, *Lilies*, 331; Park, “Spirituality,” 52–53; Fant, *Miracles*, 110–12; Jones, *Wonders*, 104; Dunkerley, *Healing Evangelism*, 86, 169–70; Alamino, *Footsteps*, 34–35; further, De Wet, “Signs,” 91, notes the following for more examples of power encounters: Johnson, “Authority,” 102–11; Klassen, “Fire,” 176–82; in Guatemala, Thomas, “Report,” 252–55; in India, several studies (Devadason, “Missionary Societies,” 179–91; Middleton, “Growth,” 109–11; Sargunam, “Churches,” 194–95; Shinde, “Animism,” 261–62; Zechariah, “Factors,” 122–23, 162–65); in Indonesia, Bruckner, “History,” 137–87; in Mexico, Aulie, “Movement,” 128–85; in Sri Lanka, both Chandy, “Discipling,” 117–36, and Daniel, “Labour,” 147–72; in the Solomon Islands, Tippett, *Solomon Islands Christianity*, 3–19, 42–44, 57–62, 100–111, 190–200; idem, *Verdict Theology*, passim. For some recent power encounters in Asia, see Pothen, “Missions,” 305–8; cf. the summary about the effectiveness of power encounters in Guthrie, “Breakthrough,” 26.

numerous fairly recent examples of such power-encounter claims. Among indigenous movements in early twentieth-century West Africa, Prophet Braide confronted traditional religions and competed with the older powers; on one occasion when the dibia challenged him to see if his God could bring rain, he knelt and began praying, and within five minutes the rains fell.⁶⁰¹ He and William Wadé Harris both succeeded in winning tens of thousands of their fellow Africans to Christianity especially through power encounters.⁶⁰²

When a woman in northern Thailand became the first Christian in her village in 1963, the traditional priest mocked her as she fell sick and apparently died. When the Christians who had joined her prayed, however, she recovered and began telling villagers “their previously unknown secrets”; the priest’s son became a Christian and eventually an elder in that church.⁶⁰³ In Myanmar, it is reported that a village priest close to death was healed and converted.⁶⁰⁴ Among the Kankana-eyes tribal group in the northern Philippines, healings have converted families and sometimes communities.⁶⁰⁵ An Indonesian witch doctor reports that she was supernaturally converted through a vision and abandoned everything she had for the gospel.⁶⁰⁶ Another Indonesian minister reports witnessing significant numbers of witch doctors becoming followers of Christ and burning their apparatus used for sending curses.⁶⁰⁷

During the healing campaign of black South African evangelist Isak Thlape in Viljoenskroon in 1978, an influential shaman knotted many charms into his own hair, then joined the healing line so that he could see what was happening. When Thlape prayed, everyone in line fell to the ground at the same time—including the shaman. He was semiconscious for more than five minutes, and when he recovered full consciousness he found “that all his hair into which the amulets and charms were knotted, had literally fallen out of his head.” He quickly became a public follower of Christ.⁶⁰⁸ Readers in contexts of confrontation with traditional power religions thus find valuable relevance in ancient power encounters such as those described in Acts or other narratives—for example, Exod 7:10–12.

b. God and Jerusalem Confirm the Samaritans’ Conversion (8:14–17)

In Acts 8:14–17, Jerusalem ratifies (and assumes responsibility for) the Samaritan mission. This passage also emphasizes the importance of the Holy Spirit to complete

601. Koschorke, Ludwig, and Delgado, *History*, 223–24.

602. Hanciles, “Conversion,” 170. On Harris in this regard, see also Shaw, *Awakening*, 56; Bartels, *Roots*, 174–78.

603. Remaining an elder at the time of writing in Gardner, *Healing Miracles*, 138.

604. Khai, “Pentecostalism,” 269.

605. Ma, “Encounter,” 136; see more fully Ma, *Spirits*; elsewhere in the Philippines, note exorcisms in Cole, “Model,” 264; Johnson, *History in Philippines*, 77–78.

606. Knapstad, “Power,” 83–85 (based on his interview with her); regarding Indonesia, cf. also Wiyono, “Timor Revival,” 278–79, 282; York, “Indigenous Missionaries,” 250–51; Tari, *Wind*, 37–40.

607. Tandi Randa (DMin graduate, Asbury seminary), interview, May 23, 2012; follow-up correspondence, May 25–26, 2012. In the West, we mostly avoid today the terminology “witch doctor,” but because the accounts involve those locally known for “witchcraft,” in that culture involving curses to harm others, I have retained the nomenclature of the reports as they were given to me.

608. De Wet, “Signs,” 84–85, noting (91n2) that the evangelist narrated the event to him and eyewitnesses later confirmed it. Pothen, “Missions,” 189, reports that in Gujarat and Maharashtra in the 1980s, many sorcerers turned instead to Christ; Kisau, “Acts,” 1333, suggests this as a goal in Africa, and Baker and Baker, *Miracles*, 53, note occasions (six former shamans in one church). Asian evangelist Vasanth Edward, report to author, March 10, 2007 (about events of the preceding weeks), notes that one day he warned against witchcraft; one woman, long paralyzed by witchcraft, was healed as she heard this message, and that night someone known for witchcraft died, which led to many conversions. Stories abound of witch doctors who converted and surrendered fetishes (e.g., Braun, *Here*, 160).

the mission (cf. 1:4–5). Because this mission has the approval of God and the Jerusalem apostles, the reader can anticipate the same for the Gentile mission that follows. The passage illustrates that Spirit reception (in the Lukan sense) is not limited to a single pattern, and it helps prepare the narrative for the confrontation with Simon in 8:18–24.

I. APPROVING THE SAMARITAN MISSION (8:14)

As in 11:1, word reached Jerusalem and invited the attention of the church there.⁶⁰⁹ It arrived in Jerusalem without Philip going back there. (He does not seem to have reported back later in 8:40 either, but as one of the Hellenist leaders he may have remained a special target in Jerusalem.)⁶¹⁰ Yet any disciple traveling through Samaria to Jerusalem would have brought the news to the Jerusalem church, and this probably would have happened soon after Philip's popularity spread there (8:6).⁶¹¹ (This situation contrasts with the conversion of the African official in 8:26–40, where word would not reach Jerusalem unless from Philip's testimony in Caesarea or if the official someday made another long pilgrimage to Jerusalem.)

Later the Jerusalem church sent Barnabas to check on the church in Antioch, and Barnabas endorsed the work there (11:21–22). Here we find the same pattern for Samaria; apparently the Jerusalem church felt responsibility to make sure that what was propagated in the name of the Jesus movement was genuinely from God, but its chief representatives in this period were ready to embrace activities that they discerned were from God's Spirit. This contributes to Luke's picture of the apostolic unity of the early Christian mission in the midst of its cultural diversity. Depending on how we construe the sequence of 8:14–16, the narrative may also exemplify the apostles' concern about a report that baptized people had not received the Spirit's empowerment; such empowerment was crucial for believers (1:4–8), and the apostles probably expected it to normally accompany conversion (2:38–39).

That Peter and John traveled together fits the usual pattern of ministry companions elsewhere in Luke-Acts (3:1–4; 11:30; 13:2; 15:39–40);⁶¹² it also fits Paul's testimony that they were two of the three most prominent leaders in the Jerusalem church (Gal 2:9). That the approval comes from John as well as Peter might speak particularly loudly given Luke's portrayal of John's anti-Samaritan sentiments earlier (Luke 9:54).⁶¹³

Because the post-Pentecost apostles are (mostly) reliable characters for Luke's audience, their approval of the Samaritan mission is important to show the earliest church's unanimity on this important step toward the Gentile mission. More important than their ratification of the mission, of course, is God's direct evidence that accompanies it in Acts 8:17: the coming of the Spirit (for this as a sign of God's approval, see 10:45, 47; 11:15–18).⁶¹⁴ Luke carefully documents how the Jerusalem church recognized each

609. The claim that "Samaria" received the word could be typical Lukan hyperbole, or it could mean "Samaritans as distinct from Jews" (Lanski, *Acts*, 324).

610. In any case, no one appears to have complained about some not reporting back as if it were the standard expectation. Paul returns to Antioch, but only periodically, and his reports in 15:3–4, 12, are testimonies, not time cards or work reports.

611. Travelers did bring news regularly (Eurip. *El.* 361–62; Demosth. *Ep.* 5.1; Cic. *Att.* 2.11; Sen. *Y. Ep. Lucil.* 47.1; P.Oxy. 32; Apul. *Metam.* 1.26; Apoll. *K. Tyre* 8), and even later Diaspora churches were certainly networked (1 Cor 1:11; Phil 2:19, 23; Col 1:7–8; 4:7; see Bauckham, "Gospels," 33–44; Thompson, "Internet").

612. Though not indicated for Peter in Acts 9:32–43, he had some local companions available when needed (10:23; 11:12).

613. Cf. Witherington, *Acts*, 285–86 (who suggests that John would want to verify matters).

614. Cf. *ibid.*, 289. Jervell, *Luke and People of God*, 115, 127, emphasizes the apostolic ratification and argues that Luke addresses Christians skeptical about the Samaritan mission; this might fit the Jerusalem church even as late as the early 60s but not the audience I have deemed likeliest. Certainly it was controversial

stage in the church's expansion, showing the continuity between the original apostolic mission and the Diaspora church of his own day.⁶¹⁵ Some scholars suggest that the apostles' real intention was to maintain authority over the new mission,⁶¹⁶ a motive unfortunately often attested in the history of Christian missions.⁶¹⁷ Whether this was a prominent motive or not (it is not clear, and Luke certainly has no reason to emphasize it for his Diaspora audience), the earliest church probably assumed that the apostles would lead the movement, and hence provide it unity, until Christ's return (Luke 22:30).

II. NEEDING THE SPIRIT (8:15–16)

The lack of reception of the Spirit (Acts 8:15–16) naturally concerned the Jerusalem church, for the Spirit was a necessary sign of divine sanction.⁶¹⁸ This initial absence may have indicated, however, that God also desired the Jerusalem church's sanction.⁶¹⁹ Whatever the reason, that the Spirit is apparently received subsequent to conversion here has occasioned considerable discussion.

Historically, various groups have advocated a second experience of the Spirit, often citing this passage, including Anglo-Catholics and Catholics with their views of confirmation; Puritan and Reformed Sealers; Wesleyan, Holiness, and Keswickian groups; and classical Pentecostals.⁶²⁰ Other traditions' accusations that proponents of the second-experience traditions reflect bias are essentially *ad hominem*, since one could suggest such an accusation in either direction. What is often attributed to the "bias" of such traditions could simply reflect a legitimate observation about the text uncovered in the history of interpretation, an observation that contradicts a "bias" read into Luke from an inflexible application of Pauline theology.

Many scholars today also argue that Luke allows for receiving the Spirit subsequent to conversion.⁶²¹ (In most cases they refer to a particular experience of the Spirit releasing a dimension of power for a particular aspect of ministry and are not suggesting that Luke, if pressed, would necessarily repudiate Paul's broader sense of "receiving the Spirit.") Others rightly respond that much of Acts appears to support the reception of the Spirit with conversion (2:38; 10:44–48; cf. Luke 3:16). A single passage supporting subsequence (if that is all there is) might therefore seem a weak foundation for explaining all of Lukan (or early Christian) pneumatology. Nevertheless, it would be sufficient to call into question the frequent practice of assuming that we understand Luke's pneumatology fully by reading into it Paul's. Further examination below calls into question the premise that only a single passage allows for subsequence, although simultaneity may constitute Luke's (apparently as well as Paul's) ideal.

in the early period and required legitimation (see Lindemann, "Samaritaner," for John and Luke-Acts; in Acts 8, Samkuty, *Samaritan Mission*, 188–221).

615. Johnson, *Acts*, 11 (citing Acts 8:14; 11:1–18, 29–30; 12:25; 15:2; 18:22; 19:21; cf. 21:17–21).

616. Ehrhardt, *Acts*, 45–46.

617. E.g., Neill, *History of Missions*, 190–94 (seventeenth-century papal restrictions on the successful Jesuit mission in China), 515–16 (among later Protestants).

618. Caird, *Apostolic Age*, 71.

619. Such reasoning suggests that the delay was theologically abnormal; it also indicates, however, that it is ontologically possible (see discussion below).

620. See Lederle, *Treasures*, 5; Dayton, *Theological Roots*, 36–37; also Bruner, *Theology*, 323–41 (citing Wesley, Finney, Torrey, Andrew Murray, A. J. Gordon, and F. B. Meyer). For one defense of the confirmation position, see Adler, *Taufe*; idem, *Pfingstfest* (summarized and critiqued by Turner, *Power*, 53–55). By the early third century, Tertullian mentions a Spirit-imparting rite accompanying baptism (*De Bap.* 8), and in the Western church confirmation emerged as a distinct sacrament before the close of the first millennium (Bonnah, *Spirit*, 181–82).

621. Menzies, *Development*, 248–60; idem, *Empowered*, 204–25 (on this passage, 204–13); Cho, *Spirit and Kingdom*, 146–48; Franklin, "Spirit-Baptism"; Wyckoff, "Baptism," 426–37; Palma, *Spirit*, 107–32. For a survey of scholarly views, see, e.g., Turner, "Significance of Receiving."

As noted above, James D. G. Dunn has argued that the conversion of the Samaritans was inadequate until the Spirit was given.⁶²² This approach, if followed to its logical conclusion, would suggest that it is possible to embrace God’s message joyfully, believe, and be baptized (elsewhere normal means of conversion in Acts) yet require the imposition of apostolic hands to produce genuine conversion.⁶²³ Dunn appeals to what he sees as irregularities in the account to question the Samaritans’ conversion.⁶²⁴ He thinks the Samaritans superstitious and influenced by magic, yet as already noted (see the excursus on magic at Acts 8:9), the same could be true for much of the ancient world, including Ephesus (Acts 19:18–19), where Luke indicates that some believed and received the Spirit (19:1–6). As noted above, Dunn argues that “believe” with the dative object implies merely intellectual assent, but in fact Luke normally employs the dative with this verb when the object of faith is a person, not thereby indicating the faith as defective (16:34; 18:8; 27:25).

Further, the apostles accepted Philip’s baptism of the believing Samaritans because the apostles do not, in contrast to 19:5, rebaptize those who were baptized without faith in Christ. Other scholars have pointed out weaknesses in Dunn’s argument on this passage, suggesting that he has read the theology of other NT voices into it (this suggestion is ironic, since he has elsewhere been a major advocate for listening to the divergent theology of various NT voices).⁶²⁵

More commonly, scholars argue that 2:38–39 states the norm, which must be assumed unless stated otherwise, but that 8:15–16 represents a very exceptional (but genuinely exceptional) situation.⁶²⁶ Why would Luke have to mention that they did not “receive the Spirit” at baptism unless this was the normal expectation (8:16)?⁶²⁷ Why might this delay have occurred? The most common and plausible explanation is that God waited for apostolic ratification to maintain the unity of the Jerusalem and Samaritan churches.⁶²⁸

Others contend that subsequent narratives in Acts qualify how we should read 2:38–39.⁶²⁹ In either case, however, the delay inadvertently demonstrates that early Christians were aware of anomalies and that the gift of the Spirit (in the Lukan sense that focuses especially on prophetic empowerment) was ontologically distinguishable—and at least on occasion at a time different—from conversion. Further, Luke clearly

622. Dunn, *Baptism*, 55–72; cf. idem, “Baptism.”

623. Happily, other passages in Acts prevent us from making this a standard paradigm for conversion. Yet, as suggested below (and in Keener, *Gift*, 163–66), the larger context of Acts protects us from assuming that Luke must be depicting conversion here.

624. Dunn, *Baptism*, 55–72. For one especially thorough refutation, see Ervin, *Conversion-Initiation*, 28–32 (though on some other passages I find Dunn’s points stronger); for a survey of Pentecostal responses to Dunn, see Atkinson, “Luke-Acts.” Fee, *Gospel*, 96–99, 117–19, who identifies baptism in the Spirit with conversion, nevertheless finds Dunn’s argument here problematic (arguing instead that Samaritans lacked the experiential dimension of their conversion). Most commentators do not follow Dunn here.

625. E.g., Pinnock, “Foreword,” vii. Most Pentecostal scholars emphasize the diversity of NT theology at this point (see the discussion of Pentecostal hermeneutics in Stronstad, *Scripture*).

626. Turner, *Power*, 348, 360–75; idem, *Gifts*, 44–45; idem, “‘Spirit’ as Power,” 337–39; Bruner, *Theology*, 177–80; Ladd, *Theology*, 346; Kistemaker, *Acts*, 302. Gangel, *Acts*, 123, recognizes subsequence here but attributes it to the “transitional” era described, instead of thinking that Luke would expect it in the later church.

627. See, e.g., Turner, *Gifts*, 45. The “not yet” and “only” are significant (Bruner, *Theology*, 178; Spencer, *Philip*, 213).

628. See Marshall, *Acts*, 157–58; Das, “Acts 8”; Green, *Spirit*, 167–68; Deere, *Power of Spirit*, 237; cf. Johnson, *Acts*, 148. Some have also argued that Luke distinguishes two kinds of baptism, only one of which receives the Spirit (a view summarized, and rightly criticized, in Samkutty, *Samaritan Mission*, 171–72), but this explanation introduces into early Christianity a different baptism (against the principle of Occam’s razor) for which we lack concrete evidence.

629. E.g., Cho, *Spirit and Kingdom*, 146; cf. Samkutty, *Samaritan Mission*, 173–74.

does affirm empowerments of the Spirit subsequent to conversion even when it is clear that the recipients had already received the Spirit's empowerment (4:8, 31; 13:9). The Spirit falls before (10:44) or after (8:16–17), and sometimes roughly simultaneously with (19:6), baptism; as many scholars observe, Luke provides variety rather than a single normative pattern of initiation-conversion.⁶³⁰

If Luke associates the Spirit with empowerment rather than conversion (and he most often does, as his Jewish contemporaries most often did),⁶³¹ reception of the Spirit subsequent to conversion does not contradict Paul or others who associate the Spirit with conversion.⁶³² (Luke probably uses the expression “receiving the Spirit” differently from Paul, because his emphasis differs, focusing on empowerment more than on new life.)⁶³³

In fact, one could argue for some subsequence even in most cases of the first mention of people receiving the Spirit;⁶³⁴ in 2:4, 8:16–17, 9:17, and (by at least a few minutes)⁶³⁵ 19:6, receiving the Spirit followed faith, being absolutely simultaneous with it only in 10:44 (see comments ad loc. on these passages). To argue that 2:4 was merely an exception could make sense, if this were all one needed to argue; by contrast, to argue that up to 80 percent of the initial reception passages are exceptions renders the word “exception” meaningless.⁶³⁶ Rather than seeing all these cases as exceptions, it may be more fruitful to view them as illustrations—of the variety of early Christian experience. Acts 2:38 provides the theological norm or ideal but does not constitute an inalienable rule.⁶³⁷ Or perhaps it suggests that all of the gift

630. With Witherington, *Acts*, 289; idem, *Doctor*, 109; cf. similarly Gaventa, *Acts*, 139; Stagg, *Acts*, 197; Hertig, “Mystery Tour,” 110 (Luke may be less interested in articulating a norm than in showing God's unpredictable power); Wall, “Acts,” 139; Yong, *Spirit Poured*, 118; Williams, *Systematic Theology*, 3:44; F. Martin in *Acts* (ACCS), 139; Talbert, *Acts*, 31; Chance, *Acts*, 134. Even many charismatic scholars treat all occasions of filling subsequent to conversion as exceptions (Green, *Thirty Years*, 259–60), an approach that appears to make far too much of Luke's narrative exceptional; conversely, those who overemphasize instances marked with tongues (see comment on Acts 2:4) appear to place too much weight on “initial” fillings in Acts, which seems to neglect the importance of “subsequent fillings” (hence continuing experiences of empowerment) sometimes mentioned (esp. Acts 4:31; probably 4:8; 13:9). For the value of literary variation, see Aul. Gel. 1.4; Max. Tyre 21.4; Anderson, *Glossary*, 53–54, 114; Nock, “Vocabulary,” 137; Cic. *Or. Brut.* 46.156–57; *Fam.* 13.27.1. One should merely take care to avoid “improper” synonyms (Rowe, “Style,” 123–24); for ancient discussion of synonyms, see, e.g., Porph. *Ar. Cat.* 68.5–27.

631. See introductory comments in Keener, *Acts*, 1:520–24, 534–37. Although one cannot infer the sense of empowerment from the laying on of hands in Acts 8:17 (this is not the only function of hand-laying in Luke-Acts, e.g., Luke 4:40; 13:13; cf. Samkutty, *Samaritan Mission*, 40–41), one can infer it as at least part of Luke's point on the basis of his central pneumatological emphasis (Acts 1:8). The Samaritan Christians become thus not merely objects of ministry but ultimately fellow ministers; this expectation of spreading Spirit empowerment, and hence multiplied ministry through indigenous churches, helps explain both earliest Christianity's phenomenal growth rate and that of some Christian movements today that share the same expectation. Of course, we should not infer from Luke's emphasis here that the apostles neglected teaching, which Luke and his apostolic protagonists also value (cf. Acts 2:42; 5:42; 18:11; 20:20).

632. Cf. Menzies, *Empowered*, 230.

633. The expression is the same as at Acts 2:38 and should be interpreted according to the empowerment depicted in that context (1:8; 2:4, 17–18), not according to Paul's somewhat different usage of the same expression (1 Cor 2:12; Gal 3:2).

634. I focus for the moment on the “first” mention because this is the one we would normally identify with conversion if, in fact, Luke always mentioned receiving the Spirit in terms of conversion. Some treat the passages with intervals as “the invariable pattern” (e.g., Stronstad, “Baptized,” 168–69).

635. A few minutes would not disconnect receiving the Spirit from the “conversion process” but could weaken an ontological connection between saving faith and receiving the Spirit in whatever sense in which Luke means the latter experience.

636. As I suggested earlier in Keener, *Gift*, 162.

637. Some scholars, who interpret Acts 2:38 in light of subsequent occasions, even view repentance and baptism merely as prerequisites (and in view of 10:44–48, baptism is not always that), negating a direct temporal connection, though I have treated it here as a norm or ideal (see comment on Acts 2:38).

becomes available in *principle* at conversion, but Luke's narratives illustrate that some *experience* the needed empowerment aspect subsequently.

The Samaritans were already converted; in Luke's theology, though it was normal to anticipate the Spirit with baptism (2:38), prayer often preceded the coming of the Spirit (e.g., Luke 11:13; Acts 1:14). Prayer, along with ministry of the word, was central to the apostolic mission (Acts 6:4),⁶³⁸ and the apostles prayed for the Samaritans (8:15). These Samaritans were surely converted: Samaritans "believed" what Philip preached, and they received baptism (8:12); further, apostolic baptism presupposed confessing Jesus's name (2:21, 38; 22:16).⁶³⁹ The apostles came to impart the Spirit, not to preach (or do miracles) again for Philip's converts and, most significantly, not to rebaptize them (contrast 19:3–5).⁶⁴⁰ It is clear that they did not regard Philip's gospel (8:12) or work as defective.⁶⁴¹ Although the conversions were authentic, however, the Samaritan converts had not yet "received the Spirit."

That the apostles imparted the Spirit⁶⁴² no more demeans Philip's ministry than the apostles' initial failure to reach the Samaritans demeans theirs; their works were complementary.⁶⁴³ Granted, receiving the Spirit at conversion seems to have been the norm and the ideal (2:38), but this is not the only passage to diverge from the ideal (cf. 10:44–48, where the Spirit falls before baptism). Spencer argues that Philip acts as a forerunner and Peter as a culminator, the way John's water baptism prepared the way and served as prototype for Jesus's Spirit baptism (Luke 3:16; Acts 8:12, 15–17).⁶⁴⁴ The passage does suggest, however, that baptism in Jesus's name, like John's baptism, does not *directly* effect the coming of the Spirit (Acts 8:16; cf. 19:5–6; Luke 3:16).⁶⁴⁵

All other extant first-century Christian writers who explicitly address the subject associate reception of the Spirit with conversion (e.g., Rom 8:9; 1 Cor 12:13; Gal 3:2; Eph 4:30; Heb 6:4; 1 Pet 1:2; cf. John 7:39; Jude 19). This is probably also true for Luke on the general theological level (Luke 3:16; Acts 2:38), although in his focus Luke more often associates the Spirit with empowerment to speak for God, which at least sometimes occurs clearly subsequent to conversion (e.g., Acts 4:8; 13:9). But we face two differences between Luke's reports and other claims. First, Luke is recounting not simply the theological ideal but the experience of early Christians; he is the only NT writer to do so, and therefore his voice should be weighed very seriously when one considers the experience of the early Christians.

Second, Luke emphasizes, even in the context to which the paradigmatic text 2:38 refers, a particular aspect of the Spirit's ministry, especially prophetic empowerment (1:8; 2:17–18). In a related approach, some scholars suggest that the Samaritans

638. Johnson, *Acts*, 148. For the importance of prayer in such a mission, one need only compare the privileged role of God's intimates in OT ministry to outsiders (Gen 20:7; Exod 8:8–13, 28–31; Job 42:8; cf. Acts 5:12–13; 8:24; Jas 5:16; *Lev. Rab.* 5:4).

639. With Ervin, *Conversion-Initiation*, 29–30.

640. Witherington, *Acts*, 286; Ervin, *Conversion-Initiation*, 29–30.

641. Turner, *Power*, 363–67; Witherington, *Acts*, 286; D. Williams, *Acts*, 156. Many commentators thus affirm that the Samaritans were already converted (e.g., Arrington, *Acts*, 88).

642. For Bede *Comm. Acts* 8.14 (Martin, *Acts*, 92), only the apostles and bishops (i.e., their successors) can impart the Spirit; cf. today Fitzmyer, "Role of Spirit," 182, who contends that the Spirit is given in Acts only when at least one of the Twelve or one of their delegates is present. (Is Paul a delegate of the Twelve in Acts 19:6?) Since Acts mostly concerns apostles, this criterion might seem difficult to falsify, but Ananias's role in 9:17 does just that; again, Luke's narratives do not fall easily into most subsequent patterns prescribed for them.

643. See Spencer, *Philip*, 189.

644. *Ibid.*, 220–41 (also [234–40] comparing Apollos as evangelist in Acts 18:25–27 and Paul as apostle imparting the Spirit in 19:6). Philip also acts as forerunner in bringing the message to the Gentiles (8:26–39; 10:1–11:18) "and even in preaching along the coastal plain (8.40; cf. 9.32–43)" (Dunn, *Acts*, 103, concurring with Spencer).

645. See Spencer, *Philip*, 240.

lacked not the Spirit *per se* but the external signs of the Spirit, such as in 10:46; 19:6.⁶⁴⁶ Thus John Chrysostom opines that “it was the Spirit of signs that they had not received” and the subsequent manifestation of the Spirit of signs that provoked Simon’s solicitation.⁶⁴⁷ This is why Luke can also mention fillings subsequent to an initial one (4:8, 31; 13:9): his focus is on empowerment for speaking God’s message, not on the Spirit’s role in what some other NT writers would call regeneration. Although he does not emphasize this activity to the exclusion of other components, it is noteworthy that in contrast to John (e.g., John 3:5–6) and Paul (e.g., Rom 8:9; Gal 3:2), he rarely associates the Spirit with God converting an individual (most obviously excepting Luke 3:16 and Acts 2:38, on which see comment below).⁶⁴⁸

Thus Luke need not deny the Spirit’s involvement in conversion,⁶⁴⁹ but in his own volumes he emphasizes “receiving the Spirit” as prophetic empowerment, which, at least in this instance (and probably some others), occurs subsequent to conversion.⁶⁵⁰ That is, he focuses on receiving the Spirit for the task promised in Acts 1:8, namely, power to speak Christ’s message across cultural barriers.⁶⁵¹ (I believe this the likeliest interpretation in light of Acts as a whole, although arguments can be marshaled against it.)⁶⁵² Another scholar rightly observes that those who wish to make “receiving the Spirit” either always the conversion experience or always subsequent to conversion err by treating the expression as “a *terminus technicus* that always has the same meaning.”⁶⁵³ Early Christian terminology need not fit the neater categories of some subsequent theologies.⁶⁵⁴

Even Luke 3:16 and Acts 2:38, the programmatic statements that indicate that conversion initiates the believer into the experience of the Spirit, cannot limit the Spirit to the experience of conversion (in light of background and the context of Acts 2:38).⁶⁵⁵ These key passages refer to the entire sphere of the Spirit’s work, into which the believer is *initiated* at conversion. Yet Luke’s focus is not the Spirit’s activ-

646. Calvin, *Acts*, 236 (as cited in Hertig, “Mystery Tour,” 110; Peterson, *Acts*, 286); D. Williams, *Acts*, 156 (though not suggesting a universal pattern, and unpersuasively depending on the anarthrous use of “Spirit”); Kistemaker, *Acts*, 301 (again not suggesting a universal pattern); Packer, *Acts*, 65 (suggesting that tongues were lacking here). For phenomena at times indicating the Spirit’s activity, see also Marshall, *Theology*, 177. Such signs may not have come on every occasion anyway (see comment on Acts 2:4), but they were frequent and they characterized power for cross-cultural witness (Acts 1:8).

647. Chrys. *Hom. Acts* 18 (Martin, *Acts*, 93).

648. See more fully my argument in Keener, *Gift*, 52–57, 157–68; for John and Paul, see 139–40, 154–57; for the image of baptism in the Spirit in John 3:5, see Keener, *John*, 546–52.

649. This is not to suggest, with Beasley-Murray, an implicit reception at conversion predicted in Acts 2:38–39; the reception here fits 2:38–39 (Turner, *Power*, 368–69), especially as it is spreading “afar off” (2:39).

650. See, e.g., Kilgallen, *Commentary*, 66 (Luke does not address the baptismal gift of the Spirit known to us from other sources but the prophetic aspect of the Spirit). Kilgallen writes from a Catholic perspective; Pentecostals likewise usually see this as a Spirit experience distinct from conversion (also a Spirit experience; Atkinson, “Responses”; Cho, *Spirit and Kingdom*, 146; Menzies, *Empowered*, 204–13). Turner, “Interpreting,” sees one gift of the Spirit that includes both salvation and empowerment.

651. Luke is aware that the Spirit was active before Acts 1:8 and Pentecost (see, e.g., Luke 1:15, 41, 67; 2:25–27), even though, unlike Matthew (Matt 10:20), he does not specify the Spirit’s activity for the disciples earlier, maintaining his chronological focus (Luke 12:12 is future; cf. perhaps Luke 16:16).

652. One possible argument against this position is that Luke does not narrate subsequent evangelism by the Samaritans but narrates it only by the apostles in Acts 8:25 (see Walton, “Acts,” 29). But Luke’s focus turns quickly to Simon, and his source—especially if Philip soon left Samaria—may not have provided much direct information about Samaritan self-propagation (though cf. 9:31; 15:3).

653. See Carson, *Fallacies*, 46–47, including critique.

654. Luke, like many other ancients (including Plato; Max. Tyre 21.4), allowed freedom in terminology (against many other ancients, including the precursors of much later systematic theology).

655. For background, especially the prophetic associations of the Spirit in biblical and early Jewish sources, see, e.g., Menzies, *Development*, 53–112; Keener, *Spirit*, 10–13; Turner, *Power*, 86–104; for the context of Acts 2:38, see discussion there.

ity in conversion, which he nowhere specifically mentions, but empowerment for a believer's continuing proclamation of Christ. This empowerment could belong to a larger theological sphere of the Spirit's activity implicitly embraced in conversion without being completely experienced then. Just as Paul's thesis that the believer is dead to sin (Rom 6:2–11; Gal 2:20; 6:14) must be actualized in believers' lives (the nature of Paul's argument even in these passages suggesting that this behavioral actualization is yet to fully happen), this full access to the Spirit's power may be fleshed out in subsequent experiences, which are what are apt to appear in Luke's narratives. Luke focuses on the empowerment dimension of the Spirit, which, though theologically implicit in conversion, might be experienced subsequently.

Modern theological discussion about timing can distract us from hearing Luke's own theological emphasis here. Regardless of the timing, this narrative (with apostles diligently seeking to ensure the outcome in Acts 8:15–16) is as emphatic as 1:4–5: the Spirit's empowerment is not optional for the Christian life, and the need for such empowerment must be attended to urgently. If Luke speaks of empowerment here, he also indicates that the believers in Samaria, like the later Gentile Christians, become not mere beneficiaries of Jerusalem's ministry but themselves empowered agents for the spreading of the word.⁶⁵⁶ That is, despite Luke's biographic focus on several key figures, his missiology includes the empowerment of all new indigenous churches for self-propagation and partnership in mission.⁶⁵⁷

III. BAPTISM IN JESUS'S NAME (8:16)

Scholars sometimes make much of baptism εἰς Jesus's name. Because εἰς τὸ ὄνομα appears in commercial transactions for something transferred to a person's account, the expression may refer to one becoming Christ's property.⁶⁵⁸ Others have compared a Semitic expression attested in rabbinic texts, interpreting the phrase as meaning “with reference to Jesus's name.”⁶⁵⁹ While Luke and his source (if Philip) may be only secondarily influenced by Semitisms, the sense “with reference to” or “for” was not unacceptable in Greek (cf. perhaps baptism for repentance in 2:38); the sense would also work in 19:3–5.

The force of prepositions was weakened in Koine, however, and so we probably should not make much of the difference, given Luke's usage of ἐπί Jesus's name in 2:38⁶⁶⁰ and εἰς his name in 8:16; 19:5. As Larry Hurtado argues, the different Greek prepositions Luke employs probably reflect the same Semitic expression, and all simply “indicate that the rite is done with primary reference to Jesus.”⁶⁶¹ See further discussion at Acts 2:38.

IV. RECEIVING THE SPIRIT (8:17)

Few expected the Spirit to be conferred widely in this age, still fewer through these human agents, and—worst of all—Jewish people had no expectation that this would happen among Samaritans! Some other features of the text appear more debatable.

656. Cf. Luke 8:39, where Jesus sends an apparent Gentile, with little prior instruction, to testify of God's works to him. But in Acts, Jew and Gentile are brought together, and more teaching is available.

657. Cf. Wall, “Acts,” 139, accurately: without this empowerment, the Samaritans cannot “participate fully in the community's missionary vocation” (citing Acts 1:4–8).

658. Bruce, *Acts*¹, 187; Tobin, *Rhetoric in Contexts*, 199 (noting BDAG 713; TDNT 5:245); cf. Martin, *Worship*, 127.

659. Hartman, “Name of Jesus,” 439–40 (citing *leshem in b. Pesah.* 60); Le Cornu, *Acts*, 129–30 (see comment on Acts 2:38).

660. The preposition εἰς may have appeared awkward in Acts 2:38 because Luke must employ it with ἄφεσιν a few words later.

661. Hurtado, *Lord Jesus Christ*, 201.

Several times in Acts the Spirit is conferred through laying on hands (8:17–18; 9:17; 19:6).⁶⁶² That this factor is not mentioned in every case warns against our inferring a mandatory rite in this period,⁶⁶³ but neither can we neglect the significant proportion of occurrences of conferring the Spirit that are conjoined with laying on of hands. Conzelmann thinks that laying on hands “must have been customary at baptism” but admits that his first explicit source is a century after Luke (Tert. *Bapt.* 8.1–2).⁶⁶⁴ (Even in a later period, Ambrosiaster notes that God sometimes imparts the Spirit without the laying on of hands.)⁶⁶⁵ Rackham suggests that in ordinary cases such as Acts 8:17 and 19:6 (Acts 2 and 10 being extraordinary), the Holy Spirit was bestowed through laying on hands; this was, he opines, “the beginning of the church’s rite of confirmation.”⁶⁶⁶

Although both sorts of practices naturally evolved from the sorts of practices Luke describes (see esp. 19:6), more chronologically relevant precedents exist. Laying on hands here evokes blessing (Luke 18:15–16; Gen 48:14).⁶⁶⁷ It is not for ordination (Acts 6:6), but it does involve empowerment here (cf. 1:8; Num 27:23; Deut 34:9).⁶⁶⁸ Laying on hands is linked explicitly here with prayer (Acts 8:15; cf. 6:6; Matt 19:13).⁶⁶⁹ It is doubtful that we should think of the practice as conferring conversion (though it might confer some benefits theologically implicit in conversion). It is, rather, an action often associated with “transfer” of the Spirit’s activity through confident prayer.

Simon somehow “saw” that people received the Spirit, and this reception was dramatic enough to provoke his desire for the gift (Acts 8:18).⁶⁷⁰ Thus Dunn suggests that “Luke has in mind here an eye-catching display of ecstasy,” presumably the same mark of receiving the Spirit as in other “initial” receptions in Acts—namely, tongues speaking (2:4; 10:45–46; 19:6).⁶⁷¹ This would mean “that *in every case* where Luke describes the giving of the Spirit it is accompanied and ‘evidenced’ by glossolalia.”⁶⁷²

662. For one discussion of postbaptismal imposition of hands for the Spirit, see Coppens, “Imposition,” 423–32.

663. Kistemaker, *Acts*, 302, noting numerous exceptions.

664. Conzelmann, *Acts*, 65. Fitzmyer, *Acts*, 406, much more helpfully cites Acts 19:6.

665. Ambrosiaster *Commentary on Paul’s Epistles* (CSEL 81:34; Vogels, 34; Bray, *Corinthians*, 30).

666. Rackham, *Acts*, 116–17. Fitzmyer, *Acts*, 406, regards this as a natural (but later) development of the laying on of hands at baptism. Barrett, “Simon Magus,” 292–95, doubts any rite here, noting that the polemic against Simon’s attempt to treat the Spirit commercially or magically militates against any possibility of controlling the Spirit or subjecting its reception to human stimuli.

667. See also 1Qap Gen^a XX, 22, 29; *Jos. Asen.* 8:9; 21:6; Acts 13:3; cf. Vermes, *Jesus the Jew*, 240n35 (citing 2 Kgs 5:11 LXX). For healing, cf. Flusser, “Laying-On of Hands”; see further discussion at Acts 6:6.

668. Turner, *Power*, 371–73, doubts empowerment for mission here, but missiology is central to Acts and also to its pneumatology (Acts 1:8). For empowerment with a ministry gift at something like ordination, see 1 Tim 4:14.

669. Laying on hands is associated with prayer, which is associated with receiving the Spirit (see Hull, *Spirit in Acts*, 104–5, 109, citing Aug. *Bapt.* 3.16, on laying on hands’ association with prayer).

670. Some scholars regard outward manifestations of the Spirit as an early trait because they are non-Pauline (Ramsay, *Pictures*, 59), but while Paul may not associate them specifically with receiving the Spirit, he does not ignore their connection with the Spirit (1 Cor 12:4, 7–11; 1 Thess 5:19–20; cf. Gal 3:5).

671. Dunn, *Jesus and Spirit*, 188; see also Chrys. *Hom. Acts* 18; Carson, *Showing Spirit*, 145; Rackham, *Acts*, 116; Haenchen, *Acts*, 304; Arrington, *Acts*, 89; Palma, *Spirit*, 152–53 (and sources he cites); Stronstad, “Baptized,” 174–75; Magruder, “Reading” (esp. 299); Starmer, “Co-Laborers,” 232 (plausibly noting that readers will fill the silences from the previous and subsequent occasions in Acts); cf. Stonehouse, *Areopagus*, 80 (“prophecy and tongues”); Faw, *Acts*, 104–5 (tongues, prophecy, or ecstatic praise); Packer, *Acts*, 65. Kistemaker, *Acts*, 303, also suggests signs but “perhaps in the form of miracles”; yet did the Samaritans receive “miracles” (different from those in Acts 8:6–7, which Simon had already witnessed [8:13]) in the laying on of hands to receive the Spirit? Twelftree, *People*, 88, allows for any ecstatic behavior (for Luke’s theology more generally, 98–99).

672. Dunn, *Jesus and Spirit*, 188.

He notes that this pattern comports well with the classical Pentecostal position that “Luke *intended* to portray ‘speaking in tongues’ as ‘initial physical evidence’ of the outpouring of the Spirit.”⁶⁷³ Nevertheless, it is far more likely that Luke uses tongues as a narrative evidence for reception of the Spirit than that he implies that tongues must *always* accompany reception of the Spirit.⁶⁷⁴ We must also entertain the possibility that given Luke’s use of tongues speaking to symbolize cross-cultural empowerment (see comment on Acts 2:4), he would mention it in each case available, and hence in this instance, where he does not mention its occurrence, he lacks a definite tradition of it or expectation that it occurred in every instance.⁶⁷⁵ Whether the response was tongues, prophecy, ecstatic worship, or overwhelming joy, the Spirit’s reception was clearly evidenced, probably with an emotive component.⁶⁷⁶

c. Confronting Simon’s Syncretism (8:18–24)

In 8:18–24, God’s agents have to confront the syncretistic, magical worldview of a convert (cf. 19:18);⁶⁷⁷ Luke’s apologetic regularly dissociates the Christian movement from magic. The passage also emphasizes the necessity of perseverance and that sound understanding of the ways of God’s Spirit is important to avoid syncretism. The act of conversion by itself, in isolation from transformation through the apostolic message, does not guarantee sound understanding or perseverance.

I. MONEY AND MAGIC (8:18–19)

Simon still seeks personal advantage in a conventional way, following the traditional magical worldview; Philip and the apostles experienced signs in conjunction with their proclamation of Christ rather than their own interests. Luke often associates the gift of the Spirit with prayer to God (as in 8:15); the divine Spirit is emphatically to be received as a gift from God (8:20; cf. 8:17; comment on Acts 2:38), not something that can be achieved or acquired by human means. The attempt to buy spiritual power fits the milieu of magicians who traded in magic formulas (cf. 19:19); magicians sought to buy power.⁶⁷⁸ Temples also sold priesthoods, though this could

673. *Ibid.*, 189.

674. See *ibid.*, 189–91.

675. Keener, *Gift*, 179–80. It has, however, been argued conversely that Luke treats tongues like baptism; it is mentioned in enough cases that we should assume it elsewhere (e.g., Horton, *Spirit*, 156; cf. Wyckoff, “Baptism,” 441). This is a plausible argument, but given the limited samples that Luke provides, it would merely prevent us from concluding that Luke rejected the necessity of tongues occurring at Spirit baptism. It would not, on the other side of the matter, guarantee that Luke is *teaching* that it must occur on every occasion (and if Luke does not teach this, we lack early attestation for the view, since, as all parties acknowledge, no other extant early Christian author teaches it).

676. Insofar as the Spirit in Luke’s emphasis involves prophetic empowerment (Acts 2:17–18), it seems expected that believers who receive this empowerment are able to, and presumably sooner or later will, speak by the Spirit’s inspiration. For Luke, the most fundamental expression of this empowerment he emphasizes is witness (1:8).

677. For Luke’s concern about syncretism, see also Klauck, *Magic*, 54. The question is generally a live one in missiological settings addressing conversion (see, e.g., Luzbetac, *Church and Cultures*, 239–48), though it can be discerned in the West no less than elsewhere (Peel, “Christianization,” 448–49).

678. See also Reitzenstein, *Religions*, 31; Garrett, *Demise*, 70; cf. the association of magic with greed in Reimer, *Miracle*, 246. Goppelt, *Times*, 93, views this as a result of Simon’s “Hellenistic syncretism.” He may have craved especially the ability to reproduce the manifestations (Bruce, *Commentary*, 183); for how a pagan would have heard “holy spirit,” see Strelan, “Holy Spirit” (and cf. Keener, *Acts*, 1:530–32). In a modern example, a traditional sorcerer who lost his power in a power encounter reportedly tried to buy it back (Lindsay, *Lake*, 28). Barrett, “Simon Magus,” 292–95, while noting specifically magical and commercial abuse, broadens the principle to any attempt to control the Spirit (“The church possesses the inestimable privilege of having the Spirit as its guide and defender, but it has the privilege as a gift which it may depend on but cannot control, and never possesses in its own right” [295]).

be viewed as corruption if they sold them without proper regard for the first rights of a city's hereditary elite.⁶⁷⁹

No society's cults have proved invulnerable to the temptation of greed,⁶⁸⁰ but the apostles could not risk the church's corruption. The commonness of charlatans⁶⁸¹ forced sincere sages to take special care about how they would be perceived (cf., e.g., 2 Cor 2:17; 1 Thess 2:1–12; see comment on Acts 20:33–35). By showing that the disciples performed miracles without payment (cf. Acts 3:6), Luke differentiates the apostles from magicians.⁶⁸² Others also condemned desiring a good gift for impure motives⁶⁸³ or using divinely given gifts for making money.⁶⁸⁴

In addition to his role as one of the sorcerers of Luke-Acts, Simon is also one of its examples of an apostate and (implicitly) one used by Satan, comparable to Judas and Ananias (Acts 1:18; 5:3; cf. Luke 8:12–14; 22:31–34):⁶⁸⁵

Judas (Luke-Acts)	Ananias (Acts)	Simon (Acts)
Satan entered (Luke 22:3)	Satan filled heart (5:3)	(Magus, 8:9)
Greed (Acts 1:18)	Greed (5:2–3)	Monetary problems (8:18–19)
Condemned (Acts 1:18–20)	Condemned (5:5)	Condemned unless he repents (8:20–23)

As the sin of Ananias could have marred the benefits of the Spirit movements in Acts 2:44–45 and 4:32–35 if not confronted and terminated, Simon presents the threat to the purity of the Samaritan “Pentecost.”⁶⁸⁶ Luke apparently expects Satan to attempt (5:3) to contaminate revival movements. Thus the elders were warned to keep guard against false teachers (20:28–30); subapostolic Christians warned against prophets who sought to receive payment (*Did.* 11.4–6).

In 8:19, Simon employs “authority” (ἐξουσία) the same way it appears in magical documents.⁶⁸⁷ Many ancients recognized that desire for “power” was pervasive (in a political sense, Tac. *Hist.* 2.38), but magicians exhibited a special desire for it through magic.⁶⁸⁸ Missiologists have drawn parallels with contemporary power-encounter situations: sometimes spiritists, observing Pentecostals' signs, have embraced their message; on other occasions, like Simon, they have simply sought to learn and incorporate their power.⁶⁸⁹

679. Horsley, “Inscriptions of Ephesos,” 148 (citing *I. Eph.* 1a.17–18, 19ab). For purchasing priesthods, see also Derrett, “Simon Magus,” 61; Fitzmyer, *Acts*, 401; Kistemaker, *Acts*, 304; Larkin, *Acts*, 129 (citing 2 Macc 4:7–10 and following Derrett, “Simon Magus,” 61, in citing *SEG* 4.516B.35–36); Bock, *Acts*, 333 (adding 4 Macc 4:17–18).

680. In ancient Israel, cf. 1 Sam 2:13–16; Isa 56:11; Jer 6:13; 8:10; Mic 3:5, 11. Rackham, *Acts*, 115, cites Gehazi as background for exploiting ministry for profit (2 Kgs 5:20–27). A serious problem in the medieval church was the purchase of church offices (see, e.g., Keen, *Medieval Europe*, 76; Hahn, “Simony”), which we, not surprisingly, call “simony.” Some modern shamans also seek to buy spiritual power (see Elkins, “Sacrifice,” 325, on sacrifices).

681. For charlatans and insincere or hypocritical sages, see, e.g., Philod. *Crit. frg.* 60.8–12; Mus. Ruf. frg. 50, pp. 142, 144; Dio Chrys. *Or.* 35.4; Plut. *Lect.* 12, *Mor.* 43F; Lucian *Peregr.* 13; *Dial. D.* 374 (20/10, Charon and Hermes 10); Phaedrus 1.14.17–18; Jos. *Ant.* 17.327; 2 Cor 2:17; Liefeld, “Preacher,” 272–84; see further comment on Acts 20:33–35.

682. With Klauck, *Magic*, 21 (noting also the refusal to accept fees even as late as *Acts Thom.* 20).

683. E.g., *y. Hag.* 2:1, §9.

684. Barrett, *Acts*, 414 (citing Soph. *Oed. tyr.* 387–89; Plato *Laws* 10.909AB).

685. See Spencer, *Philip*, 89, 122–26; Johnson, *Acts*, 152. On the theme of apostasy in Luke, see further Brown, *Apostasy*. This pattern speaks against the likelihood that the conflict between Peter and Simon was added after Luke, though by itself it does not resolve its historicity (cf. Boismard and Lamouille, *Actes*, 3:119).

686. Cf. the counterattacks of evil after God's blessings in the curses of Gen 3:1–24; 9:21–27.

687. Ramsay, *Discovery*, 124.

688. For power in magic, see Arnold, *Power*, 36–37, 73–74; cf. *Pr. Jos.* 17.

689. Johnson, “Authority,” 108 (reporting on Brazilian spiritists); Merz, “Witch.”

II. CONFRONTING DEPRAVITY (8:20–23)

One common ancient criterion for distinguishing miracle workers from sorcerers was that the latter were greedy for gain;⁶⁹⁰ the apostles reject wealth here whereas Simon depends on it.⁶⁹¹ The condemnation of greed in Acts 8:20–23 fits a motif that runs throughout Luke-Acts (see comment on Acts 2:44–45; 3:6; 20:33–35).⁶⁹² One cannot serve both God and Mammon (Luke 16:13), and those prominent in a community have special accountability before God (12:41–48). Like Ananias, who loved money, Simon was in danger of destruction (Acts 5:3–5).⁶⁹³ Luke normally uses *voμίζω*, “suppose,” for contrary-to-fact conditions (Acts 7:25; 14:19; 16:27; 17:29; 21:29; Luke 2:44; 3:23), though not quite always (Acts 16:13).

Peter’s language in 8:20 could resemble a curse formula (an appropriate response to a magician);⁶⁹⁴ for example, one could curse a witch by praying that her cup be full of “gall.”⁶⁹⁵ Some scholars thus see it as a sort of statement of excommunication (cf. 1 Cor 5:5).⁶⁹⁶ One might also think of Peter pronouncing judgment, as on Ananias and Sapphira, yet without the same immediate effect (5:4–5, 9–10). The language resembles that found in some later Greek translations of Daniel (including the optative for wishing; Dan 2:5 Theodotion; cf. 3:96 Theodotion).⁶⁹⁷ Peter values and guards God’s holy “gift” (the Spirit, Acts 2:38; cf. 10:45; 11:17)⁶⁹⁸ the way devout Jewish people sought to value and guard God’s “gift” of the law.⁶⁹⁹

Peter goes on to declare (8:21) that Simon has no “lot” (*κληρος*) in this matter (*λόγῳ*, perhaps “message”)—that is, no share in the ministry (cf. “lot” in 1:17, 25–26)⁷⁰⁰ and perhaps no share in the kingdom (26:18).⁷⁰¹ Part (*μερίς*) here seems roughly synonymous, as a “share” in something (Luke 10:42; cf. 2 Cor 6:15; Col 1:12). The terms “part” and “lot” are coupled especially in biblical descriptions of the Levites (Deut 10:9; 12:12; 14:27, 29; 18:1),⁷⁰² but they also apply to possession of the land (Josh 18:6; 19:9; cf. Neh 2:20) and are natural synonyms to employ in parallelism (Isa 57:6; Jer 13:25).⁷⁰³

Simon had no share in the matter because his heart (cf. Ananias’s in Acts 5:3) was not “straight.” A “straight heart” and some people being “straight in heart” reflect familiar LXX idiom (2 Kgs 10:15; Pss 7:11 [7:10 MT]; 10:2 [11:2]; 31:11 [32:11];

690. Reimer, *Miracle*, 139–41, 246.

691. Cf. Cyril Jer. *Cat. Lect.* 16.10 (Martin, *Acts*, 95): Simon did not realize that the money mattered nothing to the apostles.

692. As is often recognized; e.g., Witherington, *Acts*, 286.

693. For money and *ἀπώλεια*, see, e.g., Sir 29:10; 31:6; 1 Tim 6:9; 2 Pet 2:3. For judgment in Acts, see Morris, *Cross in New Testament*, 112–13.

694. See Haenchen, *Acts*, 304; Conzelmann, *Acts*, 66 (citing PGM 1.114); *y. Ma’as. Š.* 4:6, §5, reports a rabbi’s curse against a deceptive Samaritan, but Luke treats Simon as a false prophet, not as a Samaritan *per se* (Acts 8:9–11; cf. 13:6). Wenkel, “Speech-Acts,” compares other imprecations in Acts demarcating their objects from God’s genuine servants (see esp. 13:10–11; 23:3; one may compare also 5:3–5).

695. Tibullus 1.5.50 (Latin *felle*, “gall”).

696. Marshall, *Kept*, 97; cf. Haenchen, *Acts*, 305; Crowe, *Acts*, 57. Explicit curse texts do not deliver the object to Satan (Garland, *1 Corinthians*, 171), but some do to destroying deities (e.g., SIG² 813–15, in Grant, *Religions*, 47–48).

697. C. Williams, *Acts*, 116; Conzelmann, *Acts*, 66. The phrase *εἰς ἀπώλειαν* appears about twenty-five times in the LXX.

698. To be contrasted with magic, which can be bought or manipulated (Johnson, *Acts*, 149).

699. On which see, e.g., Moore, *Judaism*, 398; comment on Acts 2:38.

700. Johnson, *Acts*, 149 (comparing *λόγος* for the apostolic ministry in Acts 6:4); Witherington, *Acts*, 286.

701. Cf. Haenchen, *Acts*, 305.

702. Dunn, *Acts*, 112: “But unlike the Levites . . . , it is not a special commission from God which excludes Simon but his own attempt to manipulate God.” Others also cite Levitical language (e.g., Lake and Cadbury, *Commentary*, 94).

703. Cf. Clark, “Construction,” regarding rhetorical balance and litotes.

35:11 [36:11]; 36:14 [37:14]; 63:11 [64:11]; 72:1 [73:1]; 77:37 [78:37]; 93:15 [94:15]; 96:11 [97:11]; 124:4 [125:4]); in Ps 77:37 LXX (78:37 MT), the description is negated to apply to the wicked, as here.⁷⁰⁴ False teachers make straight ways crooked (Acts 13:10).

Peter's command to repent (Acts 8:22) fits the apostolic and preapostolic model in Luke-Acts (2:38; 3:19; 17:30; 26:20; Luke 3:3, 8; 5:32; 24:47).⁷⁰⁵ The command to repent "if possible," employing εἰ with the future subjunctive, "indicates a possible, but far from certain condition"; adding ἄρα "strengthens the measure of doubt."⁷⁰⁶ Although some early Christians allowed for the possibility of repentance after turning away (Jas 5:19–20), at least some believed that, at some level, the unbelief involved in apostasy became irreversible and apostates became incapable of genuine repentance.⁷⁰⁷ Significantly here, Peter's confrontation of greed in Samaria parallels his earlier treatment of greed in the Jerusalem church, valuing the spiritual purity of the Samaritan revival on the same level as that of the earlier Jerusalem revival.⁷⁰⁸

The terms χολή and πικρία (Acts 8:23) appear together in the LXX for both evil (Deut 29:17 [29:18 ET]; 32:32) and suffering (Lam 3:15, 19). The bitter⁷⁰⁹ gall⁷¹⁰ probably suggests paganism; Deut 29:18 refers to poisoning by the apostate following other gods (cf. the allusion in Heb 12:15);⁷¹¹ Deut 32:32 refers to pagan nations. The phrase "bond of unrighteousness" reflects Isa 58:6, where one act of righteousness is to "release the bonds of injustice [σύνδεσμον ἀδικίας, the only LXX text employing both terms]"; the Greek term there translated "release" (λύω) can also mean "destroy," perhaps suggested in Peter's condemnation.⁷¹²

III. SIMON'S REPENTANCE? (8:24)

Irenaeus claims (*Her.* 1.23.1) (and Justin certainly implies) that Simon did not repent.⁷¹³ Whether early Christian tradition would have preferred a story about repentance or needed a figure such as Simon with which to condemn heretics (or simply responded to gnostic appropriation of Simon) is hard to say.

Judgment "coming on" one was a familiar biblical idiom (e.g., Acts 13:11; Isa

704. Scholars often cite esp. Ps 78:37 (Bruce, *Commentary*, 184n38; Haenchen, *Acts*, 305; Dunn, *Acts*, 112).

705. To "repent from [ἀπό]" some wickedness is not Lukan (nor does it occur elsewhere in the NT), but see *Jos. Asen.* 9:2 (turning from false gods); Jer 8:6 LXX. Cf. Ambrose *Concerning Repentance* 2.4.23 (Martin, *Acts*, 94): even Simon was given a chance to repent and hence given hope of forgiveness.

706. Witherington, *Acts*, 287n30 (with Moule, *Idiom Book*, 158); for the possible use of ἄρα for emphasis, cf. Blass, Debrunner, and Funk, *Grammar*, 191, §375; Dana and Mantey, *Grammar*, 242. In Luke's theology, of course, one can repent from magic (Acts 19:18–19; Garrett, *Demise*, 148; Parsons, *Acts*, 117).

707. Heb 6:4–6; 10:26–31; cf. 2:2–3; 3:14; 12:16–17; 1 John 5:16.

708. See esp. Samkutty, *Samaritan Mission*, 225.

709. Luke uses a cognate for Peter's own repentance, weeping "bitterly," in Luke 22:62, but the LXX link is much stronger and likelier. Gall was notoriously bitter (Hom. *Il.* 16.203).

710. Some used χολή in relation to wrath, similar to the noun χόλος and the verb χολάω, on which cf., e.g., Arius Did. *Epit.* 2.7.10c, pp. 60–61.11; 2.7.10e, pp. 62–63.16. Stoics could conjoin χόλος and πικρία in a list of anger terms (2.7.10b, pp. 58–59.34).

711. Commentators often cite esp. Deut 29:17 LXX (29:18 ET; Lake and Cadbury, *Commentary*, 94; Bruce, *Commentary*, 184n37; Marshall, *Acts*, 159; idem, "Acts," 572; Conzelmann, *Acts*, 66, noting the paraphrase in 1QS II, 11–12; Dunn, *Acts*, 112; Chance, *Acts*, 135).

712. Others (e.g., Samkutty, *Samaritan Mission*, 167; Chance, *Acts*, 135; Marshall, "Acts," 572) also note the likely connection to Isa 58:6, and Samkutty, *Samaritan Mission*, 167, adds a connection between this Isaiah passage and Luke 4:18–19. Isaiah 61:1 does not employ σύνδεσμος; but it speaks of "captives," and the language can at least illustrate that Simon, unlike the Samaritans as a whole, had not yet experienced the liberation of Luke 4:18–19.

713. Cf. also the dispute with Peter in Caesarea (*Ps.-Clem. Hom.* 29.1–30.3; 35.1–5; 38.1–43.3; 58.2) and their later confrontation in Rome (*Acts Pet.* [2]4–[8]29).

34:5; Ezek 5:16; 30:4; Amos 5:9; 8:11).⁷¹⁴ By asking for prayer when confronted with judgment, Simon may evoke the similar request of Jeroboam I to the prophet who confronted him (1 Kgs 13:6; Jeroboam did not, however, repent).⁷¹⁵ Perhaps still more closely, Simon's language may recall Pharaoh's request that Moses, who has access to Israel's God, pray to him (Exod 8:8, 30; 9:28; 10:17). Such intercessory prayers could prove efficacious; thus an angel appears to Heliodorus and says to thank Onias: God has delivered Heliodorus's life because of Onias's prayers (2 Macc 3:33).

Neither Jeroboam nor Pharaoh genuinely repented, but it remains possible that by recognizing the apostles' superiority to himself in the matter of prayer (contrast Acts 8:18–19), Simon may indicate repentance.⁷¹⁶ (Subsequent tradition, emphasizing the protognostic "Simon Magus," would not view the repentance as permanent, but Luke leaves the matter ambiguous, as, for example, in the open end of Luke 15:31–32.)⁷¹⁷ The prayer of a righteous person for someone could bring blessings⁷¹⁸ and even forgiveness,⁷¹⁹ though there were limits to God heeding prayers for forgiveness.⁷²⁰

d. Apostles Continue Samaritan Ministry (8:25)

In Acts 8:25, concluding Luke's section on Philip's Samaritan mission, the apostles follow Philip's example. Luke now makes clearer the hints throughout the preceding narrative: the Hellenists bridged the gap for the Gentile mission. (Philip will also precede Peter in reaching Gentiles; note 8:27–40 before 10:1–11:18.)

Once the apostles had seen what God was doing among the Samaritans, they immediately joined the mission and preached⁷²¹ further among the Samaritans on their return trip to Jerusalem. They not only ratified Philip's ministry but learned from his example, just as they had shared their authority with him in 6:6. Probably the large majority of Samaritans lived in villages,⁷²² whatever the πόλις of 8:5 is; indeed, villages constitute "the most characteristic form of rural settlement across Western Asia."⁷²³

Some scholars suggest that Philip returns to Jerusalem with the apostles (despite the dangers, 8:25), since the road he will travel on his next journey leads from Jerusalem (8:26).⁷²⁴ Philip, who might speak only Greek, may have been unable to minister in the Samaritan villages, but perhaps he accompanies the Aramaic-speaking apostles now among the villages.⁷²⁵ Yet 8:26 does not *necessarily* claim that Philip starts his

714. One could even speak of a judgment of *gall* (χόλος; cf. 8:23) coming upon one (ἤξει ἐφ', *Sib. Or.* 1.165), though this is coincidence.

715. Cf. also Zedekiah and others requesting Jeremiah's prayers (Jer 37:3; 42:2).

716. The Western text adds his tears here (Bruce, *Acts*, 73), though these need not guarantee repentance (Heb 12:17). Wall, "Acts," 140, contrasts Peter's words to Ananias and suggests a more hopeful "prognosis" for Simon. Though condemning Simon, Peter nevertheless invites forgiveness (cf. Fabien, "Conversion de Simon").

717. Simon's repentance might serve Luke's literary purposes if he could record it, but given the parallels with Judas and Ananias, so would his failure to repent.

718. Luke 18:15–16; Jas 5:16; *Gen. Rab.* 100:7; *Lev. Rab.* 5:4; 16:8.

719. Gen 20:7; Exod 8:8, 28; 12:32; Job 42:8; 2 *En.* 7:4; *Test. Job* 42:8; 43:15–17/12–13; *Gen. Rab.* 59:1; cf. 1 John 5:16; *Sent. Sext.* 373–75.

720. Exod 32:32–33; Jer 7:16; 11:14; 14:11; 15:1; 1 John 5:16; 2 *En.* 7:5; cf. Ezek 14:14, 20.

721. Although Luke's use of διαμαρτύρομαι (here; Acts 2:40; 10:42; 18:5; 20:21, 23, 24; 28:23) is often emphatic (as one expects for this term; cf. BDAG), it seems difficult to regard his rare use of μαρτύρομαι as less emphatic (e.g., 20:26; 26:22); occasionally this is true also of μαρτυρέω (Acts 23:11, where it is probably interchangeable with διαμαρτύρομαι), but at other times, he employs it more specifically for others' attestation of a person (Luke 4:22; Acts 6:3; 10:22; 16:2; 22:5, 12; 26:5) and God's testimony (Acts 13:22; 14:3; 15:8).

722. On the many Samaritan villages, see Zangenber, "Samaria," 408–11. For a full survey of our current knowledge of Samaritan villages, see also the careful and detailed work of Schnabel, *Mission*, 765–69.

723. Moore, "Villages," 301.

724. Fitzmyer, *Acts*, 407.

725. Others have also suggested that "they" might include Philip (Longenecker, *Acts*, 156). Aramaic was the dominant language in Samaria, though Greek is also well attested (van der Horst, "Languages"). In

journey in Jerusalem (especially if μεσημβρίαν means “south”), only that he is to find the road that leads south from there, perhaps because he knows this road from his former residence in Jerusalem. In any case, he will now head in the opposite direction (south rather than north) from Jerusalem and carry the good news beyond Samaria to “the ends of the earth” (1:8; 8:27).

4. The Pious African Official’s Conversion (8:26–40)

One may title this section “The African Treasurer’s Conversion” to convey the primary new content of the account, or one could equally well title it “Philip and the Ends of the Earth” to show its connection to its larger context in Acts. In this passage, Luke emphasizes that God so desires to reach the ends of the earth that he contrives extraordinary means to accomplish it (such as the angel, the Spirit’s confirmation, and the coincidence of the appropriate Scripture text). As is common in Acts, the text invokes Scripture’s witness.

a. Introduction

The narrative moves quickly from Samaria to a representative of the “ends of the earth.” Some other Hellenistic historians arranged their material geographically; such an approach arises naturally from Philip’s mission in Acts 8.⁷²⁶ Because 1:8 places “ends of the earth” after the Samaritan mission, this narrative provides a miniature proleptic fulfillment of 1:8.⁷²⁷ Granted, Philip does not travel geographically to the ends of the earth;⁷²⁸ but as 2:5–11 provides a proleptic fulfillment, so does 8:26–39. Some scholars argue that Luke reserves fulfillment of the “ends of the earth” for his chief protagonist, Paul (13:47),⁷²⁹ yet even Paul provides no more than proleptic fulfillment (see comment on Acts 1:8; 28:16–31).⁷³⁰

Clearly “Ethiopia” was one of the primary locations envisioned when people spoke of the “ends of the earth” (see discussion at Acts 1:8);⁷³¹ it fits the mission of salvation to the “ends of the earth” (Isa 49:6; 62:11; Acts 13:47).⁷³² Indeed, if we accept Luke’s possible allusion to the queen of Sheba in the Candace (see comment below), his claim that she came from the “ends of the earth” (Luke 11:31, though the term is πέρας, as in Matt 12:42 [Q]) would surely be more than coincidence. As Luke adds

Alexander’s time, Aramaic was dominant there (Meyers and Strange, *Archaeology*, 74). At least in the second century B.C.E., Hebrew and Aramaic apparently remained cultic languages (Naveh and Magen, “Inscriptions”); later, for Aramaic vernacular rendering of the Torah, see Tal, “Traditions.”

726. Witherington, *Acts*, 290.

727. Ibid.; Spencer, *Philip*, 151–52; Hengel, *Acts and History*, 80; Martin, “Chamberlain’s Journey,” 116–18; Gaventa, *Acts*, 145; Pervo, *Dating Acts*, 32; idem, *Acts*, 221; Marguerat, *Actes*, 20; cf. Thornton, “End of the Earth” (but contrast Melbourne, “Acts 1:8”); as a model for the mission to the peoples, cf. Lindemann, “Anfänge.”

728. Emphasized by Talbert, *Acts*, 74.

729. Matson, *Conversion Narratives*, 97. Spencer, *Philip*, 151–52, allows that Paul fulfilled it more fully, but still sees it here.

730. One could use representative fulfillment to make much larger claims (e.g., Col 1:23); likewise, Josephus boasts of Rome’s conquest of “Africa” as a whole (*War* 2.382), though this is certainly hyperbole (characteristic of conquest lists as far back as ancient Egypt; cf., e.g., Kitchen, *Reliability*, 174, 178; stelae in Simpson, *Literature of Egypt*, 335–97).

731. E.g., Martin, “Chamberlain’s Journey,” 118–19; Thornton, “End of the Earth”; Scott, “Horizon,” 536; Hengel, *Acts and History*, 80; Parsons, *Acts*, 119 (citing, e.g., Hom. *Il.* 23.205–6; Strabo 1.2.27–28; 2.2.2); Peterson, *Acts*, 291. Witherington, *Acts*, 290, cites Hdt. 3.25.114; Strabo 1.1.6; 1.2.24; Philost. *Vit. Apoll.* 6.1; cf. Hom. *Od.* 1.23, and he argues that *no* one would have viewed Rome as the *ends* of the earth.

732. Witherington, *Acts*, 291.

“north and south” to the Q tradition in Luke 13:29 (par. Matt 8:11–12), so here Philip journeys first north to Samaria and then south toward Ethiopia.⁷³³

Although this commentary retains the Greek name “Ethiopia” because it is used by Luke and most Greek sources as well as many translations, this usage risks confusing modern readers.⁷³⁴ We think of “Ethiopia” as the nation in the horn of Africa, but the Greek term applied to all of Africa south of Egypt, especially ancient Cush (Kush), or Nubia.⁷³⁵ Likewise, this commentary employs “Nubia” in its modern sense as including Meroë rather than in the usual Greco-Roman sense as the border between Egypt and Meroë, between Aswan and the Nile’s Fourth Cataract.⁷³⁶

I. LITERARY FEATURES

One complex structural suggestion for this passage (starting in Acts 8:25) is an elaborate chiasmus, the hub of which is the discussion of Isa 53:7–8.⁷³⁷

Acts 8:25

- A to Jerusalem
- B and many Samaritan villages
- C evangelized

8:26

- D spoke to Philip
- E go on the way

8:27

- F and behold, a eunuch

8:29

- G the *Spirit* said to Philip

8:31

- H *went up* to sit with him

8:32

- I but the *περιοχή* of Scripture

8:32–35

- J Isa 53:7–8 and discussion

8:35

- I' from this Scripture

8:39

- H' *went up* from the water
- G' *Spirit* of the Lord snatched Philip
- F' the eunuch did not know him anymore
- E' he went his way

8:40

- D' but Philip was found at Azotus
- C' evangelized
- B' all the cities
- A' came to Caesarea

733. Felder, *Waters*, 13.

734. Unseth, “Semantic Shift,” suggests a more accurate (if cumbersome) translation, “Meroë in northeast Africa.”

735. Already emphasized in Abbott, *Acts*, 101 (1876).

736. Morkot, “Nubia.” This Lower Nubia (especially around the First and Second Cataracts) was prosperous; Isis worship remained prominent at Philae until supplanted by Christianity by the time of Justinian (ibid.).

737. Spencer, *Philip*, 132 (following others). Cf. the less extensive chiasmic proposals in Meester, “Philippe et l’eunuque”; idem, “Pèlerin d’Éthiopie”; Marguerat, *Actes*, 303; see also the interesting structure in Wall, “Acts,” 142.

Not every element is persuasive; the asymmetry is noticeable when entire verses are unaccounted for while individual words are highlighted elsewhere. But the proposal does at least reveal the repetition of dominant ideas and suggests that Acts 8:25 and 8:40 geographically frame this story.⁷³⁸

Philip’s ministry here follows a model of the risen Jesus, just as Stephen’s death imitates Jesus’s martyrdom. A number of parallels exist with Luke 24:13–35:⁷³⁹

Jesus in Luke 24	Philip in Acts 8
First (narrated) resurrection appearance in Luke;* converts two disciples to resurrection faith	First conversion story of a Gentile in Acts
Begins traveling with two disciples on (Emmaus) road (24:15)	Begins traveling with God-fearer on road (8:29; road specified in 8:26)
They are journeying toward home (24:13)	The official is journeying toward home (8:28)
Jesus opens the conversation with a question (24:17)	Philip opens the conversation with a question (8:30)
Jesus asks about what they are already discussing (24:17)	Philip asks about what he is already reading (8:30)
Jesus explains the Scriptures to them (24:27)	Philip explains this Scripture and others to him (8:35)
Jesus explains Scriptures “beginning with” Moses and the prophets (24:27)	Philip explains Scripture “beginning from” a passage in Isaiah (8:35)
Jesus explains that his <i>death</i> and resurrection were God’s plan (24:14, 18–27)	Philip begins with Jesus’s passion (8:32–33)
The disciples urge him to stay with them (Luke 24:29)	He invites Philip into his chariot (8:31)
Jesus vanishes (24:31)	Philip is snatched away and the eunuch no longer sees him (8:39)
Their hearts burn when he explains Scripture (24:32), and they go to the apostles (24:33)	The eunuch goes home to Ethiopia rejoicing (8:39)
Jesus reappears among the disciples (Luke 24:36)	Philip finds himself elsewhere for ministry (8:40)

* Thus Luke does not *narrate* Jesus’s prior resurrection appearance to the women, though other sources indicate that the tradition of its priority was widely known (Luke does grant them first reception of the news, Luke 24:4–7, 23; possibly, 24:24 implies that they saw Jesus). Resurrection appearances invited a new level of faith (perhaps comparable to conversion here).

Some material reflects recurrent Lukan motifs or themes, attested even in Luke’s programmatic scene. As Abraham Smith rightly points out, “the mention of the prophet Isaiah, the act of reading, the presence of the Spirit, the use of a book, the emphasis on foreigners—all remind the authorial audience of the Nazareth scene where the Spirit-filled Jesus reads from Isaiah the prophet and announces a ministry of beneficence toward all persons, including Gentiles (Luke 4:16–30).”⁷⁴⁰

II. HISTORICAL QUESTIONS

How historical is this narrative? Some scholars argue that it reflects the style of legend,⁷⁴¹ but this is a subjective judgment, given the use of narrative techniques by historians as well as storytellers and novelists.⁷⁴² As Barrett points out, “There is no means of checking the historicity of the narrative unless it can be assumed that angels do not exist or that they do not order missionaries about or provide transport for

738. O’Toole, “Philip and Eunuch,” sees the chiasmus only at the beginning and end; cf. Pervo, *Acts*, 223.

739. Several of these are from Spencer, *Philip*, 141–42, or also appear there; Spencer also includes others that I find less convincing, such as connecting breaking bread (Luke 24:30) and baptism (Acts 8:38), which (in contrast to later eucharistic practice) Luke does not seem to connect regularly. Cf. also Schreiber, “Verstehst du denn?”

740. Smith, “Understand,” 63.

741. Dibelius, *Studies in Acts*, 15; Conzelmann, *Acts*, 67–68.

742. See discussion in the commentary introduction (Keener, *Acts*, 1:63–64, 67, 71–72, 81–82).

them.⁷⁴³ These are philosophic a prioris, not historical data, particularly when we consider that inscriptions, dream handbooks, and magical papyri attest that Luke's contemporaries, rightly or wrongly, assumed and reported such events not only in novels but in their own real world.

Goulder at least offers a more objective basis when he suspects the story “of being completely mythical” because so many details are symbolic;⁷⁴⁴ but parallels among different accounts in Plutarch show that stories laden with narrative connections and allusions could have historical bases.⁷⁴⁵ Often people engaged in fanciful tales about distant lands beyond the realm of corroboration (cf., e.g., the later *Wonders beyond Thule* by Antonius Diogenes), but Luke's account takes place in the Roman province of Syria, not a distant land. Often people confused material about distant lands (e.g., the “Ethiopian” Troglodytae with northern Troglodytae, or cave dwellers),⁷⁴⁶ but others reported data accurately, and Luke's report matches these more accurate reports.

On the other side of the argument, the Candace is clearly a historical personage (or dynastic title), in contrast to mythical Memnons and exotic novelistic details such as appear in Heliodorus's *Ethiopica*.⁷⁴⁷ But just as these details are known to us, they could also have been known to Luke⁷⁴⁸—though Luke probably could not have known so readily which kinds of details were historical and which were not. Further favoring the account is its very tension with Acts 10; the church's “official” story of the first Gentile convert is Cornelius, and Peter's authority behind that conversion proves useful for Luke's purposes (cf. 15:7–11), so that neither Luke nor his sources would have lightly invented this account.⁷⁴⁹ If Philip did meet a pilgrim from Nubia, such a pilgrim might well have been a person of means to make such a journey.⁷⁵⁰ If Philip was Luke's oral source, as 21:8–10 probably suggests (see introduction to 8:5–40),⁷⁵¹

743. Barrett, *Acts*, 422.

744. Goulder, *Type and History*, 195.

745. See discussion in the commentary introduction (Keener, *Acts*, 1:568–74, esp. 571–74). Even in true accounts today, such literary features can simply highlight material by selection, organization, and arrangement rather than by fabrication.

746. Morkot, “Troglodytae.” Quint. Curt. 4.7.18 refers to the Troglodytae as Arabians south of the Ammon oracle, with Ethiopians to its east; in 4.7.19, the Ethiopians to the west are called “snub-nosed.” For the basic accuracy of Luke's information, in contrast to genuinely novelistic accounts, see Keener, “Official,” esp. 6–20, which uses some of the same material as in this chapter.

747. Cf. Evans, *World*, 9–10, who contrasts the verisimilitude of the Gospels and Acts, which address real historical people (such as Antipas or Pilate) and customs, on the one hand, with much of what appears in later apocryphal gospels, on the other.

748. Thus *pace* Klausner, *Jesus to Paul*, 297n8, it would *not* “have been difficult to fabricate deliberately” (cf. the novelistic use of the Candace in De Weever, “Candace,” noted in Smith, “Understand,” 64); he is likely correct, though, about Philip as Luke's source.

749. See Lüdemann, *Christianity*, 105, for a historical nucleus here (both because of tension with Acts 10 and because this fits the Hellenists' activity); Keener, “Official”; cf. Spencer, “Waiter”; Kollmann, “Philippus.” None of this is to deny that Luke uses this story, once he has it, to good purpose, so that the Hellenist Philip provides a transition to Peter's official ministry and prefigures the “ends of the earth” to the south, a direction in which Luke's narrative (which will follow Paul to the heart of the empire in which Luke's audience lives) will not move. Attentive scholars often seek to balance Luke's use of the story in his larger narrative with his avoidance of upstaging the Cornelius narrative (see, e.g., Shauf, “Eunuch”).

750. Whether he was really a eunuch is harder to test, but if the person was of such means as to be an official of the Candace, the eunuch claim makes sense; further, it would explain why the traveler would make such a long journey to Jerusalem yet not be a proselyte (his Gentile character again being a component that Luke would not invent, given the Cornelius story). Although the eunuch claim implicitly fits Isa 56, it remains plausible historically as well.

751. If one imagines a meeting between Philip and the apostle known as a major leader in the Gentile mission, one could well imagine Philip turning the conversation to his own encounter with a Gentile (had such an event occurred) before Paul's conversion and the more widely known “official” story of Cornelius.

Luke may have known and wished to reveal to his audience an event that prefigured the church’s official story in Acts 10.

It is likely that Luke does select details to use the parallel to good effect, especially in terms of the divine arrangements for the encounters:

Acts 8:26–40	Acts 10
Angelic revelation with absurd command and geographic specificity (8:26)	Angelic revelation with absurd command and geographic specificity (10:5–6)
The recipient’s compliance (8:27a)	The recipient’s compliance (10:7; cf. 10:20–21)
High-status representative of a foreign government (8:27)	High-status (by local standards) representative of a foreign government (10:1)
Description of the foreigner’s office (8:27)	Description of the foreigner’s office (10:1)
Reading Scripture (8:28; cf. worship in Jerusalem, 8:27)	Praying to Israel’s God (10:2, 30)
The Spirit speaks to God’s agent (8:29)	The Spirit speaks to God’s agent (10:19; 11:12)*
Offering Philip a seat beside him (treating him as a peer, 8:31)	Treating Peter with respect (too much, in fact, by prostrating himself; <i>perhaps</i> relevant, 10:25)
The official’s invitation (8:31, 34)	The centurion’s invitation (10:22, 33)
Philip’s preaching (not narrated, 8:35; cf. 8:30–33)	Peter’s preaching (10:34–43)
The narrative concludes with the Gentile’s baptism (8:38)	The narrative concludes with the Gentile’s baptism (10:48)
The Spirit snatches away Philip; the official has joy (8:39)	<i>Possibly</i> parallel: the Spirit falls on Cornelius’s household (10:44–47)
Philip ends up in Caesarea (8:40)	The Cornelius narrative begins in Caesarea (10:1)

* This parallel is no minor one: despite implications in Acts 2:17–18 that the Spirit speaks regularly (and despite the Spirit speaking in Scripture, 4:25; 28:25; cf. in prophecy, 20:23; 21:11), Luke specifically depicts the Spirit “speaking” (with λέγει) only in 8:29; 10:19; 11:12 in this section of Acts (later, in confirming the call of Barnabas and Saul to the Gentiles, 13:2, probably prophetically).

Of course, the accounts also have clear differences. For example, in one, the agent moves toward a southern coastal city, and in the other, north; in one, the angelic revelation comes first to God’s agent (Philip), and in the other, to the person (Cornelius) needing the agent (Peter); Scripture plays a central and explicit role only in the former account (the royal official was likely far more literate than the centurion). The parallels do not require Luke to conform all his prior material to an identical pattern but reveal his consistent interest in the key divine role in the Gentile mission, a role as relevant to Philip’s story as to Peter’s better-known official version.

III. BIBLICAL BACKGROUND

Greeks and Romans had a tradition of “noble barbarians,” which they often applied to certain peoples (e.g., Ethiopians,⁷⁵² Scythians,⁷⁵³ and some Germans⁷⁵⁴) as a foil by which to criticize their own peoples. But whatever Gentiles’ selective respect for particular outsiders to the empire, specific biblical models are more relevant.

Israel’s Scriptures often mention “Ethiopia.” Ethiopia lay at the ends of the world (Esth 1:1; 8:9; Ezek 29:10; Zeph 3:10); God was sovereign over Ethiopia’s history as over Israel’s (Amos 9:7).⁷⁵⁵ The prophets spoke of God’s people being gathered

752. For Ethiopians as barbarians, see, e.g., Lucian *Dial. S.-G.* 324 (14, Triton and Nereids 4).

753. Those in the Mediterranean world generally thought some Eastern “barbarians,” particularly the Scythians, to be savage and murderous (2 Macc 4:47; 3 Macc 7:5; 4 Macc 10:7; Jos. *Ag. Ap.* 2.269; Hdt. 1.15; 4.66, 76), but some viewed Scythians as noble barbarians (e.g., Anacharsis *Ep.* 9; Strabo 7.3.7). See the excursus below.

754. E.g., Tac. *Germ.* passim.

755. Like Caphtor, Cush (Nubia; English translations often have “Ethiopians”) may be chosen as an example here because of its geographic remoteness (rather than complexion; so Snaith, *Amos, Hosea, Micah*, 49; cf. McKeating, *Amos*, 67).

from distant nations (Isa 11:11), even beyond Ethiopia's rivers (Zeph 3:9–10).⁷⁵⁶ Although the prophets may have been thinking especially of Diaspora Jews, on first-century presuppositions this gathering would have to include Gentile converts who had *become* Diaspora Jews. Egypt and Ethiopia would also submit to Israel's God (Pss 68:31 [67:32 LXX];⁷⁵⁷ 87:4 [86:4]); again, a first-century reading could apply this to conversion and salvation reaching the nations.⁷⁵⁸ Early Jewish Christians may have understood the story of the court official, like those of other early Gentile converts, as part of (or a prototype of) the pilgrimage of Gentiles to Jerusalem in the end time. Because this official had come to Jerusalem to worship, he might especially fit this portrayal (Ps 72:10–11; Isa 2:2–3; Mic 4:2–3).⁷⁵⁹

Given the many Elijah and Elisha allusions in Luke-Acts (see comment on Acts 1:8–11), a number of Elijah allusions are possible here, though not all need allude exclusively to Elijah. As Stephen and Philip patterned their ministry after Jesus and various other biblical predecessors, so Philip emulates Elijah here.⁷⁶⁰

Elijah	Philip (Acts 8)
Sent on a mission by an angel (2 Kgs 1:3, 15; cf. 1 Kgs 19:5–7)	Sent on a mission by an angel (8:26)
Hears from God in the desert (1 Kgs 19:4)	Philip obeys God in a “desert” region (8:26)
Elijah meets a pious official (1 Kgs 18:3–7)	Philip meets a pious official (8:27–28)
He runs with a chariot (1 Kgs 18:46)	He runs with a chariot (8:29–30)*
Some think that Elijah can be carried off by the Spirit, and eventually he is carried away (1 Kgs 18:12; 2 Kgs 2:11, 16)	The Spirit carries Philip away (8:39)

* Strelan, “Running Prophet,” finds other allusions besides that to Elijah. Because we may expect that the African official's chariot was moving at a more leisurely pace than Ahab's, the parallel need not imply miraculous speed on Philip's part as it may have on Elijah's part. Some have associated Elijah running (cf. also Jos. *Ant.* 8.346) with runners before chariots (cf. 1 Sam 8:11; 2 Sam 15:1; 1 Kgs 1:5; Jos. *Ant.* 6.40), but this seems unlikely (and is even less likely in Acts 8).

Most of the parallels may be coincidental; “desert,” for example, appears more than three hundred times in the LXX, and many prophetic figures sojourned there, including Moses (e.g., Exod 3:1, 27; 18:5; Lev 7:38; Num 1:1; 9:1, 5) and, more recently, John (Luke 1:80; 3:2; 7:24) and Jesus (4:1, 42; 5:16; 9:12). The strongest (and most exclusively Elijah-related) parallels are those of running with the chariot (Acts 8:30) and especially being carried away by the Spirit (8:39). Although these do not suggest an entire narrative composed to emulate the Elijah narrative, they do support some allusions to Elijah here. Some scholars add parallels with Elisha, though none of these are exclusive or compelling enough to be certain.⁷⁶¹

756. E.g., Johnson, *Acts*, 158; Hengel, *Acts and History*, 80; Reeves, “Eunuch,” 116.

757. Many have seen this background (e.g., Haenchen, *Acts*, 310; cf. Bruce, *Acts*¹, 191; Hengel, *Acts and History*, 80; Martin, “Chamberlain's Journey,” 109–10; African-American preachers in Williams, “Acts,” 227–28), including in antiquity (Bede *Comm. Acts* 8.26a [L. Martin, 81; Martin, *Acts*, 97]).

758. Augustine read the text this way (Martin, “Chamberlain's Journey,” 115–16), as did Euseb. *H.E.* 2.1.

759. Cf., e.g., Hirth, “Königin von Saba” (emphasizing also the queen of Sheba allusion). Ps 72:10 may not be eschatological, but it certainly emphasizes gifts from Seba and Sheba.

760. Rackham, *Acts*, 121; Johnson, *Acts*, 158; Spencer, *Philip*, 136; Bruce, *Commentary*, 186; Bruce, *Acts*¹, 190 (noting also Jonah 1:2; 3:2). Some of the proposed parallels cited in Spencer are too strained to place in the table, such as sacrifice at the narrative's center (Acts 8:32–35; 1 Kgs 18:20–40), the provision of water (Acts 8:36; 1 Kgs 18:41–45; if miraculous provision is meant, parallels in Gen 21:19, Exod 17:6, Num 20:11, or Judg 15:19 may be closer), and Obadiah helping prophets (1 Kgs 18:4, 13) and the official reading them (Acts 8:28). Noontime (1 Kgs 18:26–29; possibly Acts 8:26) is not strained but may be too pervasive in texts to offer a substantial parallel by itself.

761. Spencer, *Philip*, 136–40, cites these but is more critical of their value than is Brodie, “2 Kgs 5 as Component.” For Luke's prophetic characterization of Philip, see Stronstad, *Prophethood*, 91–93; for Naaman allusions, see also more recently Schöpflin, “Heilung.”

Elisha (2 Kgs 5)	Philip (Acts 8:26–40)
Naaman is a foreign official in a chariot (5:9, 21, 26)	The eunuch is a foreign official in a chariot (8:27–29, 38)
Naaman supervises money (cf. 5:5)	The official is the queen's treasurer (8:27)
Naaman is immersed in water (5:14)	The official is immersed in water (8:38)
Naaman must be persuaded to wash (5:1–13)	By contrast, the African official is eager for baptism (8:36)
Providential guidance (5:2–3)	Providential guidance (8:26–34)

One expects most officials of status to ride in chariots, and the OT provides many examples of officials riding (e.g., Gen 41:43; 1 Sam 8:11; 1 Kgs 1:5; Jer 22:4), a practice that presumably would be no different for foreign officials. (Likelier than an allusion to Naaman in this narrative, though not incompatible with it, would be an allusion to the queen of Sheba, via the Candace; see comment below.)⁷⁶² Further, Naaman was a general, *not* a treasurer; access to resources again characterizes many officials and others who can travel abroad, not exclusively Naaman. Many Lukan narratives include baptisms without allusion to 2 Kgs 5. Providential guidance appears often in both Luke-Acts and the OT. Because the Gospel's programmatic statement mentions Elisha's healing of Naaman (Luke 4:27), it may provide one intertextual element in the background, but it should not be overemphasized. Although Brodie's keen recognition of possible connections is praiseworthy, Witherington warns that the accumulation of these parallels to argue that they were created as fiction is problematic.⁷⁶³

1. *Pace* Brodie, rhetorical handbooks employ this kind of imitation for *speeches*, not narratives.
2. The speeches use historical examples as models more than fiction (Quint. *Inst.* 2.4.20).
3. Acts 8 differs substantially from 2 Kgs 5 (though it does resemble 1 Kgs 18).

One character this story must have recalled for Luke's informed audience was the pious Ethiopian eunuch official who proved to be one of Jeremiah's only allies (Jer 38:7 [45:7 LXX]). It is probably no coincidence that the only Cushite individual depicted in detail in the OT also is a eunuch.⁷⁶⁴ Ebedmelech continued to appear positively in Jewish tradition.⁷⁶⁵ Luke's biblically informed audience might also think of other Africans in Scripture.⁷⁶⁶

The most obvious theological background, however, is Isa 56:3–5, which speaks of God providing special blessing to foreigners and eunuchs.⁷⁶⁷ Though eunuchs were

762. The chariot here notwithstanding; but although the queen of Sheba narrative mentions no chariots explicitly, her large retinue (1 Kgs 10:2; 2 Chr 9:1) might be presumed to include vehicles in addition to camels.

763. Witherington, *Acts*, 291. For that matter, the potential range of biblical allusions is so great that if one were to insist that Luke composed pure fiction based on such sources, one might be tempted to associate several of these texts with one another or some prototype; but such a relationship is unnecessary. The canon is too large, and the repertoire of details relevant to officials too ample, to demand allusions to all such texts.

764. See Scott, "Horizon," 534; Goulder, *Type and History*, 175.

765. Cf. 4 Bar. 3:12–15, 21–22; 4 Bar. 5 (though renaming him "Abimelech"); Jos. *Ant.* 10.122–23; later, *Apost. Const.* 7.10. *Sipre Num.* 99.3.2 is positive but denies that he was actually Cushite (black African), wrongly claiming that the title was merely an analogy for someone distinct from others.

766. For discussion of Africans in Scripture, from various viewpoints, see, e.g. (among many others), Adamo, "Africa"; idem, *Africa*; Copher, "Presence in Bible"; idem, *Studies*; Felder, *Waters*, esp. 12–36; Hays, "Cushites"; Usry and Keener, *Religion*, esp. 60–82; Yamauchi, *Africa*.

767. See, e.g., Pesch, *Apostelgeschichte*, 1:289; Martin, "Chamberlain's Journey," 108–9; Williams, "Acts," 227; Faure, *Pentecôte*, 115; Buttica, *Identité*, 220–21. For Luke (cf. Luke 3:8), one could be part of God's people without circumcision (as for Paul, Rom 2:29; 4:12; 11:17; Gal 3:7), but this was not the inherited view in contemporary Judaism.

excluded from the covenant (Deut 23:1), Isaiah claims that those who have obeyed God's commandments will have a name better than Israelites. That Luke quotes from this very servant section of Isaiah in this passage (Isa 53:7–8 in Acts 8:32–33) reinforces the likelihood of this allusion.⁷⁶⁸ The Hellenistic Jewish work *Wisdom of Solomon* also develops the imagery of Isa 56:4–5, promising a special reward in God's temple for the righteous eunuch (Wis 3:14).

IV. LUKE AND AFRICA

In contrast to some later readings, Luke runs against the grain of his own focus (from Jerusalem to Rome) to point out that the first Gentile convert was an honorable official from Africa.⁷⁶⁹ This narrative hints at future ministry outside the empire's borders, while also more generally introducing, through Philip, the ministry to Gentiles that will be ratified by Peter and carried forward through Paul.

(1) *Tension between the Treasurer and Cornelius?*

Some scholars do not think that the African is a Gentile here, as they doubt that Luke would allow this tension with Cornelius's conversion.⁷⁷⁰ But this is a private event unknown or relatively unknown to the church in Jerusalem; its theological importance is that the Spirit acts ahead of the apostles (as in Samaria, Acts 8:12, 14; and Antioch, 11:19–24), whereas the theological importance of Cornelius's conversion is that the Jerusalem church knows of and comes to approve of the event (11:18; as in Samaria, 8:15–17).⁷⁷¹ (In Luke's narrative, although both the eunuch and Cornelius are God-fearers, Cornelius is also less biblically literate, hence further from Judaism, than this Bible-reading official; see 10:25.)⁷⁷² For this African official as the first fully Gentile convert, see discussion on "eunuch" below.

Given the threefold repetition of Cornelius's conversion later, some scholars doubt that Luke gives this African official much significance. But while his significance differs from that of Cornelius (the latter represents the official story), he is no less significant. He is the first fully Gentile Christian, and Luke in a sense allows him to chronologically "trump" the official story even though Luke's own focus is the gospel reaching Rome.

The arrangement of surrounding material also underlines the significance of this account in the plot of Acts.⁷⁷³ Indeed, some find literary connections between Cornelius and the African official; most obviously, they are conversion stories about high-status individuals,⁷⁷⁴ the sort Luke prefers to recount (e.g., 13:12; 17:12). In a sense, both "are royal representatives," though for rulers of different empires.⁷⁷⁵ The African official's

768. Moessner, "Script," 231, sees it as further confirmation of Luke's use of Isaiah's servant section. Jesus's quotation in the temple (Luke 19:46; Mark 11:17) is even closer, from Isa 56:7, though curiously Luke (like Matthew) omits Mark's explicit mention of Gentiles, emphasizing more the judgment of Jer 7:11. Cazeaux, *Actes*, 339, emphasizes the centrality of the servant in Israel's Scriptures and the effect on the nations of the servant's redemptive sufferings.

769. Church fathers, often orators strongly concerned with moral models, emphasized the official's virtue and devotion to God (Chrys. *Hom. Gen.* 35.4; Bede *Comm. Acts* 8.27a [Martin, *Acts*, 97–98]), including his humility though he was an official (Chrys. *Hom. Gen.* 35.5; *Hom. Acts* 19; Athanas. *Fest. Let.* 19.5 [Martin, *Acts*, 98–99]). Readers in a different era, with different questions, thus tended to view Luke's portrayal of him favorably.

770. Haenchen, *Acts*, 314; Boismard and Lamouille, *Actes*, 2:58–59.

771. See Tannehill, *Acts*, 110; Spencer, *Philip*, 186–87; cf. Watson, *Gentiles*, 61.

772. Likewise, the African official was likely not a proselyte because he could not be one, whereas Cornelius had simply chosen not to be one (though perhaps for military reasons).

773. See the careful study of Smith, "Understand," 54–62. Noting Meroë's military strength, Smith also cautiously suggests (65–66) an implicit parallel with Cornelius's role.

774. See *ibid.*, 65–68.

775. *Ibid.*, 69.

conversion is an early part of a larger series of conversions, soon followed by that of Saul (9:5–9), who will evangelize the Gentiles (9:15); by some mass conversions in 9:35, 42; and finally by that of Cornelius and his household (10:44–48).⁷⁷⁶ Far from competing with the Cornelius narrative, this official's account "anticipates all those from 'the ends of the earth,'" including Cornelius and the Gentile mission.⁷⁷⁷

Scholars differ on the function of this narrative vis-à-vis Africa. Cain Hope Felder argues that though Luke appreciates Africans (13:1), his emphasis on Cornelius's conversion (10:1–11:18; 15:7–9) leads to a relative de-emphasis of this first Gentile convert. He sees Theophilus as a "Roman official," which makes sense of Luke's apologetic concerning Rome, but complains that this feeds Europeans' claims of divine preference for themselves.⁷⁷⁸

By contrast, James Scott reads Luke's "table of the nations" (2:9–11) in light of OT models and concludes that Philip's ministry to the African official here represents the Hamitic mission to the south⁷⁷⁹ and hence does not "compete" theologically with the Japhetic mission.⁷⁸⁰ "If the Book of Acts unfolds along the lines of the Table of Nations," he suggests, "then Philip's transitory mission to the Ethiopian eunuch occupies a more important place in the structure of Acts than is usually appreciated."⁷⁸¹ Because this convert was an official of the queen, readers would expect his influence to continue the spread of the gospel in Ethiopia.⁷⁸²

None of these three missions is considered already completed, but rather somewhere between just beginning (Ham), well under way (Shem), or nearing completion (Japheth?). The crucial link between all three missions is clearly the Stephen Circle.⁷⁸³

(2) Why Does Luke Not Include More about Africa?

Some scholars have complained that Luke focuses on the movement of the gospel toward Rome instead of tracing its further development toward the south. Luke might be faulted for such shortsightedness were his goal a survey of the spread of the gospel in every direction and were he privy to all such information. But Luke sets out only to offer a sample, one most relevant to his own churches and their background and future in the Gentile mission. From his sample we can suggest other samples that might offer similar models for our own or other audiences, but we should keep Luke's audience in mind.

Several considerations are relevant here. First, Luke traveled with Paul—and Paul's goal included Rome. Historically, we know that Paul reached Rome, and the "we" narrative's author (most likely Luke) arrived with him. Second, as a historian Luke is interested in reporting historical information. We know that he did so: the gospel did spread in Rome (cf. Paul's letter to the Romans; also his mixed reception there, Phil 1:13–18). By contrast, the gospel is not *attested* as spreading in Nubia until centuries later. Granted, our sources for Nubia in this period are very incomplete, but so were Luke's. Further, Luke's knowledge of even this encounter was incomplete; he had

776. With Gaventa, *Acts*, 140. The three individual conversions include representatives from Ham (the African), Shem (Saul), and Japheth (Cornelius).

777. *Ibid.*, 145 (following idem, *Darkness*, 106–7).

778. Felder, *Waters*, 47–48; idem, "Racial Ambiguities," 22–23; cf. also Martin, "Chamberlain's Journey," 120.

779. Scott, "Horizon," 537. Schmidt, "Bekehrung," sees a southward journey as a reversal of the expectation of the nations' ingathering to Jerusalem.

780. Scott, "Horizon," 535.

781. *Ibid.*, 533.

782. *Ibid.*, 535.

783. *Ibid.*, 544. I am less confident that Luke viewed the mission to Rome as nearly complete; even the conclusion of Acts represents only *proleptic* fulfillment.

just one report, presumably from Philip, who probably did not hear from the official again. Perhaps Philip, or Luke, could not pronounce the official's name well enough to record it accurately, if Philip knew or remembered it.

Finally, we should keep in mind the limits of Luke's geographic purview. Luke writes as a citizen of the eastern Roman Empire,⁷⁸⁴ for whom his voyages to Judea and Rome constituted major travel; his audience was primarily interested in the world of which it was a part. He welcomes the report of the Nubian official but cannot easily travel to Nubia himself to discover more. Meroë was almost a thousand miles south of the Egyptian coast. Although it is true that the Nile current would have expedited the official's travel north, and the winds his voyage south, the cataracts at Aswan made for an arduous journey.⁷⁸⁵ Nubia's representation in Luke's narrative at all, and particularly in providing the first Gentile Christian, is highly significant.

(3) *Presuppositions Involved in the Contrast*

A problem not always explicit in the discussion of "Africa" versus "Europe" is that our modern geographic categories are deeply (if understandably) anachronistic;⁷⁸⁶ scholars' approaches sometimes vary on the basis of their interpretive goals. After the Islamic Arab conquest, Middle Eastern culture dominated northern Africa; in the Roman period, it remained part of a primarily Mediterranean cultural sphere (albeit with clear ties to the south).⁷⁸⁷ Nubia, the African kingdom in view here, was neither primarily Mediterranean nor Middle Eastern but an indigenously and traditionally African culture, albeit with trade connections to the north, south, and east. If we think in terms of continents rather than cultural spheres, as readers do who associate ancient Greece and Rome with a concept of "Europe" that includes northern Europe, we accept a category much more arbitrary for social significance. (The Jewish people and the first Jesus movement were largely "Asian," though Jewish people were widely scattered in the Roman world as well; see comment on Acts 16:8–9.)

A reader-response approach rightly reveals how texts have been misread to privilege Eurocentric readings, but how Luke's first hearers would have understood him, which is our primary interest here, is a very different question. Although categories such as "Europe" and "Africa" were accepted Greek categories (see comment on Acts 16:8),⁷⁸⁸ Rome controlled a Mediterranean empire and was much closer to the life of northern Africa than to that of northern Europe.⁷⁸⁹ Luke's interests are not "European" in the modern sense; they are Mediterranean, especially eastern Mediterranean and (because of its impact on the eastern Mediterranean) focused partly on Rome itself.⁷⁹⁰ The eastern empire is the world of Luke's audience, which is why he writes in Greek

784. Luke can depict the Roman Empire as the οἰκουμένη (Luke 2:1; Acts 11:28; 17:6; 19:27; 24:5), though he is capable of a broader usage (cf. Luke 21:26; Acts 17:31).

785. Yamauchi, *Africa*, 165.

786. Whether we think in terms of cultural or geographic spheres is an essential question (see more detailed discussion of this methodological consideration in Usry and Keener, *Religion*, 16–18, 52–58, 83, 111, but esp. 41–44).

787. For Roman contact (especially in the west) see Huss, "Africa: Province."

788. Europe, Asia, and Africa were the three parts of the world (e.g., Cic. *Rosc. Amer.* 31.103; Pliny E. *N.H.* 3.1.3), the Mediterranean Sea being the divider. Lacking proportionate maps, Pliny emphasized that Europe was the largest of the three (3.1.5; 6.38.210).

789. See Usry and Keener, *Religion*, 27, 32. Nevertheless, they regarded Asia and some other provinces as more civilized than Spaniards, Africans, and Gauls (Cic. *Quint. frat.* 1.19.27).

790. Because Rome became a new center, replacing Jerusalem, Luke could be thought to undermine his universalism (Martin, "Chamberlain's Journey," 120). But because Rome stood for the antithesis of the theological centralization that Luke's audience found in Jerusalem, it would not subvert his universalism for his first audience; this would come only when Rome (or any other city except the "city of God," as Augustine put it) would become a new theological center, a post-Lukan development by anyone's dating.

and focuses on Paul's journeys. Further, although Luke, like most writers (ancient or modern, popular or academic), writes for a particular "target audience," he does not actually suppress information about Africa. Those who note the emphasis on Rome are correct; Luke emphasizes Rome as the geographic goal of his work because he writes for an audience in the Roman Empire⁷⁹¹ (for that matter, probably especially in Greece and Macedonia, and hence in what the residents defined as Europe).⁷⁹² But he offers clues of the mission elsewhere despite his focus on what is most relevant to his audience.

(4) *The First Gentile and the African Mission*

Luke certainly does not emphasize Cornelius as the first Gentile convert; otherwise he would not mention the African official. Cornelius was the first Gentile convert publicly ratified by the apostles and the Jerusalem church; in contrast to the Samaritan mission (Acts 8:14–25), Philip's ministry to the Ethiopian was not confirmed and perhaps not even known by the apostles. That Luke nevertheless places Philip's story (with Philip's other stories) earlier in the narrative is a sign of the significance he attributes to it.⁷⁹³ The account of Cornelius is significant for Luke not so much in terms of the conversion of the first Gentile but in terms of the (temporary) conversion of the Jerusalem church's attitude toward Gentiles. Given Luke's overall emphasis on the Spirit's agenda of cross-cultural mission (1:8), the Spirit's involvement here (8:29, 39) may emphasize the importance of evangelizing Africa beyond the boundaries of the empire.⁷⁹⁴ It thus provides a prototype for subsequent chronicles of the expansion of the Jesus movement in Africa⁷⁹⁵ or, by extension, other parts of the world.

Christianity flourished in Nubia several centuries later, which led to a powerful and well-documented Christian kingdom that survived nearly a thousand years till finally crushed by Islamic invaders.⁷⁹⁶ Like Axum, "Nubia was one of the few countries in the ancient world that was converted to Christianity without a prior experience of Roman rule" after the Roman Empire's christianization.⁷⁹⁷ Yet we have no early record of the gospel spreading widely in Nubia as a result of this official's witness (despite early Christian tradition of the eunuch's ministry, possibly inferred from this passage).⁷⁹⁸ Why might this be? Certainly we could not expect Luke to travel to Meroë (given the hazards and distance mentioned above) to locate an unnamed Ethiopian official

791. Rome's conquests had deliberately forced all its empire to focus on Rome, as was widely acknowledged (Dion. Hal. *Anc. Or.* 1.3).

792. See discussion in Keener, *Acts*, 1:429–34, 517; comment on Acts 16:10; idem, "Asia and Europe."

793. Cf. Bruce, "Philip and Ethiopian," 377, who rightly argues that Luke preserves both Philip's personal account of his freelance evangelism and the official Jerusalem account.

794. With Witherington, *Acts*, 293; Meester, "Philippe et l'eunuque."

795. Cf. Keener, "Aftermath of Eunuch," 113–19; Melbourne, "Gospel in Africa," 19–28.

796. See Roeder, "Geschichte Nubiens," 76–79; Adams, *Nubia*, 400, 417–18, 438–45, 539–44, 553; Trigger, "Ballana Culture," esp. 117; Michalowski, "Christianity in Nubia"; Jakobielski, "Christian Nubia," esp. 223; Bowers, "Nubian Christianity"; Taylor, *Egypt and Nubia*, 63–65; Isichei, *History*, 30–31; Irvin and Sunquist, *Earliest Christianity*, 293–94; Usry and Keener, *Religion*, 35–38; Keener and Usry, *Faith*, 15–16; cf. Olsen, "Nubia." Christian refugees may have also fled there during second- and third-century persecutions in Egypt (Ullendorf, "Candace and Queen of Sheba," 53), and a lamp fragment in Greek from 450 to 500 probably refers to a new convert to the Christian faith (Fulco, "Lamp") then spreading there.

797. Isichei, *History*, 31; see similarly Adams, *Nubia*, 435. On ancient theology in Axum and Nubia, see the discussion in the profound work of Oduyoye, *Hearing*, 26–28. Supporting use of Axumite context for early Christianity, see Byron, "Redrawing."

798. Iren. *Her.* 3.12.8; 4.23.2; Cyril of Jerusalem *Lecture* 17.25; Ephrem the Syrian *Pearl: Seven Hymns on the Faith* 3.2; Euseb. *H.E.* 2.1.13; Barrett, *Acts*, 422; Crocker, "Meroë and Eunuch." Ullendorf, "Candace and Queen of Sheba," 55, cites apocryphal acts where "Candacis," Philip's eunuch convert, welcomed the apostle Matthew, who then baptized the king of Ethiopia.

who might not even be alive probably more than two decades after Philip's encounter and attempt to verify Philip's account. Nor can we be sure how many people even an official might have converted (in practice in any given kingdom, despite many notable successes of officials' evangelism through history). Meroë's polytheistic priests were said to have once been more powerful than its kings (Diod. Sic. 3.6.1–2); although this report, if true, did not apply to the current era (3.6.3), we may suppose that a Christian (or a Jewish God-fearer) would have limited public influence against the state religion (cf. 2 Kgs 5:18).

We also would expect, however, limited long-range effect from Meroë in general in this period. Though the Roman Empire would remember the Candace whose empire repelled Roman aggression in the time of Augustus, Meroë was now in decline.⁷⁹⁹ It began declining by the middle of the first century C.E., "almost certainly" because of "the rise of a rival trading empire, with its centre at Axum."⁸⁰⁰ The Nuba people invaded this kingdom in several waves, and the Axumites finished Meroë off in the mid-fourth century C.E. or at least contributed to that civilization's ultimate collapse.⁸⁰¹ Ironically, in the same century the Axumites began to be converted in large numbers to the Christian faith,⁸⁰² and after one or two centuries the same began to happen among the peoples inhabiting the domain once ruled by Meroë.⁸⁰³

b. Divinely Arranged Encounter (8:26–31)

In obedience to an "absurd" angelic command and the Spirit's voice, Philip encounters a God-fearing African official who is not yet a full proselyte. He "happens" to be reading a passage that is a primary messianic text for the Jesus movement and invites Philip's exposition. The accumulation of divinely orchestrated events indicates that God wanted this foreigner to hear this gospel; he will be not only the forerunner of the African mission but, as the first Gentile convert, the forerunner of the Gentile mission in general.

I. ON THE ROAD TO GAZA (8:26)

Philip receives supernatural guidance, an activity that pervades Luke's narrative,⁸⁰⁴ usually (in keeping with his theme) around the focus of mission (e.g., Acts 10:15, 19; 13:2, 4; 16:6, 10).⁸⁰⁵ Commands from angels also appear with some OT figures,⁸⁰⁶ including Elijah,⁸⁰⁷ as noted above. (Revelations from angels are also frequent in

799. Already noted in Pliny E. *N.H.* 6.35.186–87, who observes that in older times, Meroë could have mustered 250,000 armed men (6.35.186) but that Ethiopia was now weakened by division (he claims forty-five other kings [6.35.187]).

800. Oliver and Fage, *History of Africa*, 28. Axum's coins resemble Alexandrian currency (see Mlasowsky, "Axum," 433).

801. Oliver and Fage, *History of Africa*, 29; Morkot, "Axumis"; idem, "Ethiopia"; idem, "Meroe." See Ezana's claim in Burstein, *African Civilizations*, 97–100 (and cf. 79–100 passim); cf. Welsby, *Kingdom of Kush*, 199–200.

802. See Adams, *Nubia*, 386–88; Neill, *History of Missions*, 52–53; Isichei, *History*, 46–47; Yamauchi, *Africa*, 173–78; Keener and Usry, *Faith*, 16–18; Usry and Keener, *Religion*, 38–40; Burton, *Blessing*, 136–37.

803. On Nubian Christian civilization, see, e.g., Adams, *Nubia*, passim, esp. 435, 539–44; Isichei, *Christianity in Africa*, 31; Taylor, *Egypt and Nubia*, 64; Yamauchi, *Africa*, 179–81; Davidson, *Africa in History*, 102; Du Bois, *World and Africa*, 186; Keener and Usry, *Faith*, 15–16.

804. See Spencer, *Philip*, 154–55. For divine guidance in this scene, see, e.g., Miller, *Convinced*, 182–86; among other themes in Kowalski, "Exegese."

805. Sometimes the relationship with mission is less obvious (e.g., Acts 11:28; 12:8), but such examples nevertheless belong to a larger narrative that concerns mission.

806. E.g., Gen 16:9; 19:15; Num 22:32, 35; Judg 6:14; 13:13–14; among prophets, e.g., 1 Kgs 13:18 (false, in this case); Zech 1–6 passim.

807. 1 Kgs 19:5, 7; 2 Kgs 1:3, 15. Elijah appears somewhat like an angel himself in later rabbinic sources (e.g., *b. Ber.* 4b; 6b; *Sabb.* 33b; *Deut. Rab.* 5:15; *Tg. Rishon* on Esth 4:1).

postbiblical sources,⁸⁰⁸ including throughout apocalyptic literature.)⁸⁰⁹ See further comment on Acts 27:23. An “angel of the Lord” is a frequent character in Luke-Acts (Luke 1:11; 2:9; Acts 5:19; 12:7, 23); it need not be the same angel in every instance, but at least in one case, the angel was afterward identified as Gabriel (Luke 1:19).

(1) *The “Absurd Command”*

One outstanding feature of the narrative is its “absurd command,” the sort that in the Bible demanded faith of its recipient.⁸¹⁰ This pattern also appears in subsequent Jewish literature. When the Lord’s angel sends Habakkuk to Babylon, this is an absurd command because the prophet does not know where Babylon is (Bel 34–35); the angel has to carry him there (to bring Daniel his dinner, Bel 36).

“Absurd commands” appear elsewhere in Acts (Acts 5:20; 10:13–20; 20:22–23; 21:4–14), and the theme of obeying or opposing divine guidance appears throughout (e.g., 4:19–20; 5:29, 32–33, 39; 7:51).⁸¹¹ “Arise and go” was, to be sure, an appropriate command for a prophet to the nations (cf. Jonah 1:2; 3:2;⁸¹² on this characteristic Lukan language, see comment on Acts 9:11). But a “desert” caravan route was hardly a promising, significant forum for a prophet or an evangelist. If we read “midday” (as may be more likely; see below), this was hardly a time to be traveling on the road; as the hottest time of day, it was used especially for resting (Gen 18:1; 2 Sam 4:5; Song 1:7); see comment below on travel at noon. One would also not expect to find the eunuch and his companions traveling then (depending on how late after noon he meets them). This too is an “absurd command.”⁸¹³

The narrative might imply one other “absurd” aspect of the command even when it is being vindicated. The official had undoubtedly spent considerable time in Jerusalem, yet God apparently did not send him the gospel in Jerusalem, where the apostles resided (Acts 8:14, 25); instead God sent one of the dispersed Hellenists to meet him outside the city. But perhaps we should not make too much of this in its narrative context; much of the Jerusalem church had been scattered and the apostles had been driven underground (8:1).⁸¹⁴

(2) *Travel at Noon?*

Whether we should read *μεσημβρίαν* as “midday” or “south” is disputed. Certainly “south” fits the context of a road “from Jerusalem to Gaza” (8:26).⁸¹⁵ Other scholars,

808. E.g., *Jub.* 4:21; 32:21; *Test. Reub.* 5:3; *Test. Jud.* 15:5; 21:5; *Test. Levi* 2:9; *b. Ber.* 51a; *Ned.* 20ab; *Gen. Rab.* 50:2; *Ps.-Eup.* in Euseb. *P.E.* 9.17.9; cf. Derdekeas in *Paraphrase of Shem* 1 and passim; sources in Daniélou, *Theology*, 140.

809. E.g., *1 En.* 1:2; 18:14; 21:5, 9; 24:6; 27:1; 32:6; 61:3; 67:12; 71:3, 14; 72:1; 74:2; 75:3; 80:1; 93:2; *4 Ezra* 4:1; *5 Es.* 15, 31; 10:29; *2 Bar.* 55:3; 63:6; *3 Bar.* 1:3, 6, 8; 2:4–5; 3:1; 4:2, 7, 8, 10; 5:3; 6:5, 8, 10, 13; 7:1, 6; 8:4, 5; 9:3, 8; 10:5, 9; 11:1, 2, 4; 12:3; 14:2; 17:2; *Rev* 1:1; cf. also the observation of angelic mediation in Russell, *Apocalyptic*, 242–43; Morris, *Apocalyptic*, 35, 91; Aune, *Dictionary of Rhetoric*, 34–35; cf. the literary function of Hermes in Dio Chrys. *Or.* 1.69. Sometimes they are sent in response to prayers (e.g., *4 Bar.* 6:1–2; Johnson, *Prayer*, 63–65).

810. See Van Unnik, “Befehl an Philippus”; Witherington, *Acts*, 294. With explanations attached, see, e.g., *Exod* 14:15–16; *Josh* 3:12–13; *1 Kgs* 17:3–4, 9, 13–14; 18:1, 41; *2 Kgs* 6:9, 32; without recorded explanations, e.g., *Gen* 22:2; *Exod* 4:4; *1 Kgs* 18:8, 19, 43–44; 19:19; *2 Kgs* 4:4; *5:10*. Popular miracle accounts report these today as well (e.g., Koch, *Zulus*, 239).

811. See Van Unnik, “Befehl an Philippus.” One may compare Jewish attitudes toward apparently absurd commands in the law (Grant, *Judaism and New Testament*, 61).

812. Bruce, *Acts*¹, 190. This is for a mission that Luke regards as a northern mission parallel to the southern one, in Luke 13:29 (the Q-parallel in Matt 8:11 has only east and west, probably illustrated by the magi and the centurion).

813. Spencer, *Acts*, 90; Van Unnik, “Befehl an Philippus.”

814. Cf. also Chrys. *Hom. Acts* 19: Philip was sent to a “desert” area to protect him from persecution.

815. Sánchez de Toca, “*Μεσημβρίαν*.”

however, prefer “noon” because of the sense of the term in 22:6 (the only other NT use; cf. the supernatural guidance also at 10:9).⁸¹⁶ The lexical evidence may favor the latter interpretation: of twenty-five uses in the LXX, twenty-three refer to “noon”⁸¹⁷ and only two to “south” (Dan 8:4, 9). Thus readers might more likely assume “noon” unless context dictated otherwise; a reference to Ethiopia could thus dictate otherwise, but whether a southward road would do so remains debated. (Then again, when the noun appears with this preposition, it may mean “south,” as in Jos. *War* 3.460; 5.347, 505; Philo *Dreams* 1.175; *Gaius* 89; yet it remains “noon” in Philo *Dreams* 1.202. A double entendre is possible, though Luke, unlike John, follows the rhetorical caution not to overuse them.)⁸¹⁸ In Zeph 2:4, God threatened the desolation of Gaza, paralleling it with judgment on other Philistine cities, including Ashdod (LXX “Azotus”; cf. Acts 8:40) “at noon.”⁸¹⁹ In its context, God would destroy the nations to the north (Zeph 2:13) and also Ethiopia to the south (2:12); all coastlands⁸²⁰ would bow to God (2:11), and God would ultimately exalt Israel among the nations (3:20), bringing his remnant from beyond Ethiopia (3:10). If any one text is in view here (a point that is uncertain), Luke may suggest a reversal of Zephaniah’s judgment.⁸²¹

The narrative suggests divine vindication of the angel’s “absurd command,” particularly if Luke specifies the time as “noon.” This hour would be hot.⁸²² Thus at midday one would temporarily break from most agricultural work,⁸²³ from hearing legal cases,⁸²⁴ from hunting,⁸²⁵ from allowing animals to graze,⁸²⁶ and sometimes from battles.⁸²⁷ (One of the few exceptions to midday breaks was the urgency of the harvest.)⁸²⁸ As the hottest time of day, it also made people thirsty⁸²⁹ and invited wild animals to drink in the shade.⁸³⁰

One would not expect anyone to travel at noon, but a covered carriage (see comment on Acts 8:28) probably mitigated the heat, and shade might not have been available anyway (contrast likely 8:36); in any case, Philip soon discovers a person traveling. Philip may have also supposed, after meeting him, that the official would

816. Spencer, *Philip*, 156; Hengel, “Geography of Palestine,” 52.

817. Gen 18:1; 43:16, 25; Deut 28:29; 2 Sam 4:5; 1 Kgs 18:26–27; 21:16; 2 Kgs 4:20; Pss 36:6 (37:6 MT); 54:18 (55:18); Song 1:7; Job 11:17; Isa 18:4; 58:10; 59:10; Jer 6:4; 15:8; 20:16; Amos 8:9; Zeph 2:4; Sir 34:16 (31:16); 43:3.

818. For the caution, see sources in Anderson, *Rhetorical Theory*, 283–85; cf. idem, *Glossary*, 91–92, 93.

819. In the context, Gaza is abandoned (though this is not same term for “deserted” in the LXX; instead, in the LXX, it is more like “snatched away as plunder”). This context involves judgment against the Philistines (Zeph 2:5); Judah will possess the coast (2:6–7).

820. One could construe this to include Gaza, but in the LXX, it is simply “islands.”

821. Marshall, “Acts,” 573, notes the interest of Clarke, “Septuagint,” 101–3, in these very parallels but moderately suggests that Luke might shape the narrative with a view to Zeph 3:10, not simply midrashically composing around it. Some have suggested an ancestral reason for Zephaniah’s special interest in Cush (Zeph 1:1; Rice, “Roots”).

822. E.g., Aeschylus *Seven* 430–31 (compared with lightning!); Soph. *Antig.* 416; Ap. Rhod. 2.739; 4.1312–13; Ovid *Metam.* 1.591–92; Sen. *Y. Nat. Q.* 4.2.18; Libanius *Encomium* 7.11 (shade); Sir 43:3; Jos. *Asen.* 3:2/3:3. See further comment on Acts 26:13.

823. Colum. *Arb.* 12.1; Longus 2.4.

824. Sus 7 (= Dan 13:7 LXX); Aul. Gel. 17.2.10. Cf. also breaks from school at noon (Watson, “Education,” 312).

825. Ovid *Metam.* 3.143–54; Philost. *Hrk.* 11.7.

826. Virg. *Georg.* 3.331–34; Longus 1.8, 25.

827. Livy 44.35.20; 44.36.1–2. Because of this practice, guards might be caught unprepared at midday (Thucyd. 6.100.1). One might exercise then, however (Tac. *Ann.* 14.59).

828. Virg. *Georg.* 1.297–98; for another case of urgency, see Acts 26:13.

829. Livy 44.36.1–2; Longus 3.31; Philost. *Hrk.* 15.6; cf. John 4:6–7.

830. Ovid *Metam.* 10.126–29; also people (Alciph. *Farm.* 9 [Pratinas to Epigonus], 3.12, ¶1); cf. Philost. *Hrk.* 3.2 for watering plants then (in the dry season).

not object to traveling at noon, since Ethiopians were assumed (by others) to be more inured to heat than peoples to their north.⁸³¹

Another vindication of this command is probably the exactness of its timing. It is possible that Luke meets the eunuch more than a day later, farther on the road toward Gaza (this would probably make more sense of Acts 8:40, though it need not do so). If, however, the narrative makes any specific sense of “noon,” perhaps Philip meets the eunuch soon enough after the latter’s departure from Jerusalem to make noon departure a major factor in meeting him.⁸³² Luke is unclear how long they talk before the eunuch is persuaded and they encounter water (8:35–36), but that the eunuch continues on his way in 8:39 suggests that it is not yet near sundown. Even if the commands seem absurd, Philip obeys,⁸³³ providing a model of obedience to the Spirit in evangelism; God confirms this model by vindicating his command.

(3) *The Road to Gaza*

Why does the angel specify the road from Jerusalem to Gaza? Commentators usually note that there were two roads leading south from Jerusalem.⁸³⁴ If Philip took the wrong route, he would have missed the encounter.⁸³⁵ One route led through Bethlehem and Hebron, joining the main coastal road south of Gaza (though less traveled routes from Hebron presumably could reach the coast more quickly). The other turned more quickly to the west and hence joined the coastal road before Gaza. Some scholars prefer the road through Hebron despite its joining the coast after Gaza,⁸³⁶ but the other road, which led to the later Roman Eleutheropolis (Bet-Govrin, or Betogabris), seems more likely.⁸³⁷ Since the angel specifies that the road goes as far as Gaza, Philip may not expect to travel beyond this; the shorter route to the coast may have taken less time and thus may be more likely.⁸³⁸ Both routes, in any case, led to the coastal road, which stretched from Tyre in the north to Egypt in the south.

Scholars also debate which noun “desert” modifies: does Luke refer to a desert road or “deserted” Gaza? Both nouns are feminine, and hence either could function as the antecedent of αὐτή. Many think application to the road is more likely.⁸³⁹ If Luke refers to the road, some think he refers to its extension beyond Gaza;⁸⁴⁰ the route as far as Gaza was not through a desert,⁸⁴¹ but Strabo claims that the way from Gaza southward is “barren and sandy” (Strabo 16.2.32) as one heads south toward Egypt

831. Thus the novelistic Philost. *Vit. Apoll.* 6.8 suggests that the “naked philosophers” of Ethiopia are not very impressive because their land is too hot to wear clothes anyway. Readers would often think in terms of lands being too hot or cold (cf., e.g., Men. Rhet. 1.2, 347.13–16, 31–33; 348.4–7; 351.2, 10–11).

832. This would also be the case if it allows Philip to arrive after the eunuch’s caravan’s midday rest in a village or shady area, but it is less probable, since the eunuch would likely have traveled as much as four hours before that rest.

833. Perhaps “by now . . . used to the Lord’s surprises” (Faw, *Acts*, 105).

834. Lake and Cadbury, *Commentary*, 95; Bruce, *Acts*¹, 190. Roman milestones attest each road (see Cadbury, *Acts in History*, 63).

835. Bruce, “Philip and Ethiopian,” 378.

836. Bruce, *Acts*¹, 190 (but Bruce seems to have reversed this position later).

837. Cadbury, *Acts in History*, 63; Bruce, “Philip and Ethiopian,” 378; cf. Le Cornu, *Acts*, 413 (noting that the “Sea Road” passed through Lydda farther north; cf. Acts 9:32, 38). The site was occupied in the Herodian period (Monson, *Map Manual*, sect. 15.2.218).

838. Conversely, though routes to the coast from Hebron would be less traveled and less safe, they might better qualify for the title “desert” (if the adjective applies to the road).

839. Bruce, “Philip and Ethiopian,” 378; cf. Rainey, “Gaza,” 417.

840. Lake and Cadbury, *Commentary*, 95; C. Williams, *Acts*, 119; Munck, *Acts*, 78.

841. Fitzmyer, *Acts*, 411–12. Romans were able to build roads through a variety of inhospitable, including desert, terrains (see Roll, “Roads”).

and, beyond it, Ethiopia (16.2.31).⁸⁴² Roads through deserted territory or land filled with wild animals were less favored than others.⁸⁴³ This description could be Luke's way of explaining that the angel specified more clearly which road to take: the less traveled, less likely one under normal circumstances.

Others think that it is more likely Gaza that is "deserted" here.⁸⁴⁴ A city destroyed by war might well lie deserted (ἔρημος) until rebuilt (Strabo 8.6.23; cf. 13.1.51).⁸⁴⁵ If Luke's "desert" refers to Gaza, scholars usually aver that he refers to the ruins of old Gaza;⁸⁴⁶ some early interpreters of the passage held this view.⁸⁴⁷ Jews earlier sacked the city (Jos. *Ant.* 13.358–64; *War* 1.87), but Gabinius rebuilt Gaza in 57 B.C.E. during his tenure as governor of Syria (cf. *Ant.* 14.76, 87–88).⁸⁴⁸ New Gaza was hardly "deserted" in this period. Some have suggested that Luke refers to its state while he was writing, after it was sacked about 66 C.E. (*War* 2.460),⁸⁴⁹ but Luke nowhere so refers to other cities ravaged by the war, and coins show that even that city quickly revived.⁸⁵⁰ The newer Gaza was closer to the Mediterranean, but Strabo claims that the older one "remains uninhabited" (μένουσα ἔρημος, Strabo 16.2.30 [LCL, 7:277]).⁸⁵¹ Another geographer dated to the same period also "places 'deserted Gaza' between Ascalon and 'New Gaza.'" ⁸⁵² Luke could thus be clarifying that he knows that the Gaza on this route, a bit more than two miles inland,⁸⁵³ was mostly deserted and should be distinguished from newer settlements nearby.

Another possibility is that Luke, like the LXX (which renders *negev* by ἡ ἔρημος) and some other writers, simply thinks of the *negev* (Judean south) as "desert"; Gaza borders the Negev.⁸⁵⁴ As Arrian put it, Gaza "was the last town on the edge of the desert on the way from Phoenicia to Egypt," and the approach to it even from the sea was covered with "deep sand."⁸⁵⁵

Luke and his audience would be most familiar with cities such as Gaza and Azotus (Ashdod, 8:40) from the LXX, where they were "former Philistine strongholds."⁸⁵⁶

842. Later Ethiopian tradition about Ethiopia controlling Gaza aside, an inhabitant of "Syrian" Gaza appears as black (μέλας) in Dion. Hal. *Lit. Comp.* 18; but Greeks applied such designations at times to many peoples to their south, including Egyptians (see below).

843. See Galen 10.633 in Sherk, *Empire*, §123, p. 164. The Greek term can signify land barren of people, not necessarily vegetation (e.g., Eurip. *Hypsipyle* frg. 752h.14; Acts 1:20).

844. E.g., Pythian-Adams, "Deserted 'Gaza'"; C. Williams, *Acts*, 119; Bruce, *Acts*¹, 190; Haenchen, *Acts*, 310; Witherington, *Acts*, 294. Cf. Fitzmyer, *Acts*, 412 (allowing the possibility but also allowing for Luke's "defective" geography in unfamiliar regions).

845. Such was a tragic fate for a city (Rev 18:2; Mus. Ruf. 14, p. 92.19).

846. Lake and Cadbury, *Commentary*, 95; Munck, *Acts*, 78; Barrett, *Acts*, 1:423; Witherington, *Acts*, 294.

847. So Bede *Comm. Acts* 8.26B (Martin, *Acts*, 97) (citing Jerome *De situ et nominibus locorum hebraicorum* [PL 23:899]).

848. Archaeology might suggest that Josephus exaggerates the extent of Gaza's destruction (Hoover, "Coinage"). Some writers place the new town south of the old one (Strabo 16.2.30), but others contradict this (Diod. Sic. 17.49; Arrian *Alex.* 2.26; so Rainey, "Gaza," 417). It was earlier destroyed and repopulated as a fortress under Alexander of Macedon (Arrian *Alex.* 2.27.7), who besieged it (Quint. Curt. 4.6.7), had tunnels dug beneath its walls (4.6.8), and killed its leader by an agonizing death (4.6.25–29).

849. Cf. Lake and Cadbury, *Commentary*, 95; C. Williams, *Acts*, 119 (though both mention this only as an option).

850. For the continuance of new Gaza, see Rainey, "Gaza," 417.

851. Bruce, "Philip and Ethiopian," 378. For Gaza being a "coastal" city, see Pliny E. *N.H.* 5.14.68.

852. Lake and Cadbury, *Commentary*, 95 (citing GVSGM 4:39).

853. Arrian *Alex.* 2.26.1 places it twenty stadia inland (also Lake and Cadbury, *Commentary*, 95). Strabo 16.2.30 places the same Gaza seven stadia inland; ancients did not possess odometers.

854. Scott, "Horizon," 537 (citing also Diod. Sic. 18.6.4).

855. Arrian *Alex.* 2.26.1 (LCL, 1:213). Undoubtedly the primary source for Lake and Cadbury, *Commentary*, 95; Haenchen, *Acts*, 310. Gaza appears as a Judean seaport in *Let. Aris.* 115.

856. Spencer, *Philip*, 153. The early Philistines apparently adopted Canaanite religion (Aharoni, *Archaeology*, 188).

Gaza was under the jurisdiction of the Roman province of Syria at this point, though Herod had previously ruled it in connection with Idumea.⁸⁵⁷ Jewish people lived in Gaza, though especially after Jerusalem's destruction.⁸⁵⁸ Ashkelon, which was nearby (Strabo 16.2.30), was heavily hellenized and romanized but retained its older Phoenician flavor;⁸⁵⁹ it also had a Jewish population.⁸⁶⁰ Thus Philip, while still in areas where other Jews lived, was ministering in heavily Gentile areas.

One reason for mentioning Gaza, though the road continued beyond it, may be to imply a play on words; oracles often had ambiguous double meanings.⁸⁶¹ The term "Gaza" appears only twice in the NT, and it is probably more than coincidence that these are in these two successive verses (Acts 8:26–27): Γάζα is the city Gaza (twenty-two times in the LXX) but, as a common noun, is also the Greek word for a royal treasure (six times in the LXX; a Persian loanword).⁸⁶² Later Ethiopian tradition even interprets "her treasury" in this verse as "administrator of Gaza," claiming that Solomon had earlier given Gaza to the queen of Sheba as a gift and that this administrator was therefore heading there.⁸⁶³ Thus by sending Philip toward Gaza (beyond which lay desert region and then Egypt and Ethiopia), the angel was also sending him toward "[the one in charge of] the treasury."⁸⁶⁴

II. THE OFFICIAL'S NATION (8:27)

Luke depicts succinctly Philip's response to the command, "Get up and go" (8:26): "After he got up, he went" (8:27a). The command fits biblical and Semitic idiom as well as Luke's own style presumably informed by such idiom (see comment on Acts 9:11); Philip's obedience, even to an "absurd command," matches other biblical examples, such as Abram's going out "as God said," after God told him to go out (Gen 12:1, 4). Only the account's hearer who has already heard the story once knows just how much is really at stake in this obedience: the beginning of Gentiles coming to faith.

Although later history has led readers to identify Ethiopia with the current state of that name (including the region of ancient Axum and later Abyssinia) and the Greek term would not have excluded this, that nation is not directly in view here (central as Axum became in Christian history by the early 300s). The Greek title "Ethiopia" technically included all of Africa south of Egypt,⁸⁶⁵ but the Candace's title has con-

857. Stern, "Province," 340; for screening out Josephus's bias in its relation with Judea, see Rosenfeld, "Josephus and Coast." In earlier times, too, Gaza was viewed as part of Syria, but its people were regarded as more loyal to each other and courageous (Polyb. 16.22a.2). Nabateans had also long made use of Gaza as a port (Patella, "Gaza," 162).

858. See *CIJ* 2:155, §967; Goodenough, *Symbols*, 1:223; Rainey, "Gaza," 418 (also noting that Jerusalemites were sold as slaves there after Bar Kokhba's revolt).

859. See Stager, "Eroticism at Ashkelon." For Greco-Roman architecture there, see Schloen, "Ashkelon," 223; on paganism there, see also Flusser, "Paganism," 1086; Kushnir-Stein, "City Goddess"; some Isis worship is suggested in Bricault, "Deities."

860. Goodenough, *Symbols*, 1:219–21. Ashkelon's relations with Jewish neighbors were apparently positive under Herod but degenerated toward the time of the revolt (Fuks, "Antagonistic Neighbours").

861. See comment and sources in Keener, *John*, 856–57. For wordplay, see, e.g., *Rhet. Her.* 4.21.29–4.22.31; Rowe, "Style," 132 (citing Thucyd. 2.62; Aug. *Ep.* 143.4); Anderson, *Glossary*, 91–92, 93, 127; for examples of wordplay, see τρυφᾶν and τρέφειν in Mus. Ruf. 9, p. 70.28, 31; Porter, "Paul and Letters," 580 (on Phil 3:2–3); Anderson, *Rhetorical Theory*, 227 (on Rom 1:20).

862. Cf. Witherington, *Acts*, 296n66, also suggesting the wordplay; Pervo, *Acts*, 224.

863. *Kebrā Nagast* 33, end (in Ullendorf, "Candace and Queen of Sheba," 54; Bruce, "Philip and Ethiopian," 385).

864. This wordplay could help explain why "desert," if modifying Gaza, is added in a statement separate from the commission; the eunuch was *not* "desert," for the prophet declared that a faithful eunuch would not be a dry (infertile) tree (Isa 56:3).

865. It included other Ethiopians besides Meroë (Diod. Sic. 3.8.1; also Hdt. 3.17–24; 4.183 in Snowden, *Blacks in Antiquity*, 105). Egypt itself included a range of peoples (Leahy, "Diversity in Egypt") and complexions

vinced nearly all scholars that the Nubian kingdom of Meroë is specifically in view here.⁸⁶⁶ James Bruce discovered Meroë in 1722, and John Garstang's work (1909–14) identified the site archaeologically.⁸⁶⁷

(1) *Meroë's Location*

Meroë's Nubia was what was then a black African kingdom between Aswan and Khartoum, the two leading cities of which were Meroë and Napata; it had endured since about 760 B.C.E. and since at least the early third century B.C.E. had ruled from its capital in Meroë.⁸⁶⁸ Even under Napata, Meroë was a significant site; it was founded by 1000 B.C.E. and expanded significantly about 590 B.C.E. At about one square mile (2.59 sq. km. or 640 acres), it is, apart from Egyptian cities, "the earliest large-scale city" we know of in Africa.⁸⁶⁹ People in the Mediterranean world often spoke of Ethiopia as near Egypt (Plut. *Exile* 7, *Mor.* 601DE) or directly south of Egypt (Jos. *Ant.* 2.239; *War* 4.608; Appian *Hist. rom.* pref. 9;⁸⁷⁰ *Juv. Sat.* 10.150)⁸⁷¹ and also described Meroë as south of Egypt (Μερόν, Arrian *Ind.* 25.7).⁸⁷² Even a later novelist who fictionalized freely about Ethiopia recognized its capital as Meroë (Heliod. *Eth.* 9.16, 20, 24; 10.3, 5).⁸⁷³

Meroë was between the Nile's Fifth and Sixth Cataracts, four miles (6.4 km.) north of modern Kabūshīyah in the Sudan—that is, some two hundred miles south of modern Egypt and one hundred miles northeast of Khartoum. The fame of Nubia and its location indicate that this official "had traveled no small distance, and was an official of no minor kingdom."⁸⁷⁴ Any of Luke's contemporaries who derived information from sources such as Herodotus might in fact expect Meroë to be nearly a two months' journey south of Elephantine, and more exotic expanses yet two months farther south (Hdt. 2.29–32).⁸⁷⁵ Given the length of the journey in each direction,

(Trigger, "Nubian, Nilotic?," 27; Usry and Keener, *Religion*, 62–68, esp. 66), though Greeks distinguished Egypt from the rest of Africa, by which they especially meant the rest of North Africa (Rives, *Religion*, 71). Nevertheless, Nubia had sometimes dominated Egypt, including under the current kingdom (e.g., Hawass, "Nubia," 171; Kitchen, *Orient*, 82–84; Snowden, *Color Prejudice*, 25–26).

866. E.g., Lake and Cadbury, *Commentary*, 95; Haenchen, *Acts*, 310; Bruce, *Acts*¹, 190–91; idem, *Commentary*, 186; Munck, *Acts*, 78; Eckey, *Apostelgeschichte*, 202–3. For Meroë as Ethiopia in early imperial sources, see, e.g., Losch, "Kämmerer der Königen," 499 (citing Lucan *Phars.* 10.219–331; Sen. *Y.Nat. Q.* 6.8); cf. Roeder, "Geschichte Nubiens," 72–76.

867. O'Connor, "Meroë," 472. For the archaeology of nearby Axum, see Isaac, "Ethiopia."

868. Noted by most of the commentators above. See esp. Leclant, "Napata and Meroë"; Hakem et al., "Napata and Meroë." For the transfer of sovereignty from Napata to Meroë as late as 270 B.C.E., see O'Connor, "Meroë," 472.

869. O'Connor, "Meroë," 472.

870. Appian also mentions that it is higher in elevation than Egypt. They were near the Nile, which originated in Ethiopia (Sil. It. 3.265; Dio Chrys. *Or.* 32.38; Philost. *Vit. Apoll.* 6.26; Philost. *Elder Imag.* 1.5, 7). The three-continent geographic scheme would place Egypt in "Africa," but some (e.g., Sall. *Jug.* 17.3–4; Pliny E. *N.H.* 5.9.47) placed it in Asia (albeit adjoining Africa, *N.H.* 5.9.48).

871. Thus a plague beginning there spread to Egypt and thence to Greece (Thucyd. 2.48.1; cf. Libanius *Speech in Character* 24.5). They were thought the people to the farthest south (Paus. 1.33.3–6).

872. The boundary came up to the Nile's First Cataract in Augustus's day (Losch, "Kämmerer der Königen," 479).

873. Heliodorus depicted it as a triangular island surrounded by three navigable rivers, including the Nile (*Eth.* 10.5), but claimed that it was so big that it looked like a mainland (10.5); others claimed that a river surrounded Meroë (Vitruv. *Arch.* 8.2.6). The island did, indeed, lie "between the White Nile, the Blue Nile, and the Atbara River" (Yamauchi, *Africa*, 165). Nero's expedition claimed that the town Meroë lay a full seventy miles from the entrance to the island (Pliny E. *N.H.* 6.35.185). Some claimed that Phaethon died on an Ethiopian island and was worshiped there (37.11.33, rejecting the claim).

874. Witherington, *Acts*, 295; cf. likewise Yamauchi, *Africa*, 145.

875. See also Snowden, *Blacks in Antiquity*, 105. Pliny E. *N.H.* 2.112.245 estimates 705 mi. from the Ethiopian coast to Meroë, and 1,250 from Meroë to Alexandria; in 6.35.184, he notes that Nero's scouting expedition reported 945 mi. from Syene to Meroë and 360 mi. from Nabata to Meroë; in 6.35.189 he claims

the official presumably remained at least a month in Jerusalem after coming,⁸⁷⁶ which could suggest at least a quarter of a year for the journey⁸⁷⁷ and perhaps considerably more. For an official with important duties (and perhaps political considerations in the court), this was no small sacrifice and expression of devotion.⁸⁷⁸

(2) Information and Myths

Some scholars contend that Luke includes the story of the African official because he was “exotic,” being from far away,⁸⁷⁹ but whatever appeal a remote land might have for the story, Meroë was a real place, and Luke does not elaborate at any length on the location. Whereas many ancients indulged in wild speculations about exotic distant lands, both fictitious and real, Luke, as a good historian, avoids adding speculations. Based on their knowledge of the Sahara, some Romans thought that Ethiopia and the interior of Africa were mainly desert (Sen. *Y. Nat. Q.* 3.6.2; *Dial.* 5.20.2) and that just as much sand lay between Ethiopia and Egypt (*Nat. Q.* 1.pref. 9); all knew that it was hot (Arrian *Ind.* 6.7).⁸⁸⁰ Some thought that Ethiopia north of Meroë lacked trees (Pliny *E. N.H.* 12.8.19) except for those yielding cotton (13.28.90).⁸⁸¹ For lack of better information, many writers compared Ethiopia to India, comparing their rains and crocodiles (Arrian *Ind.* 6.8); India was sometimes counted as eastern Ethiopia.⁸⁸² But an expedition sent in the time of Nero noted that desert began giving way to foliage around Meroë, with more forest and even elephant and rhinoceros tracks (Pliny *E. N.H.* 6.35.185).

In contrast to information and plausible surmises, some exotic “knowledge” was pure invention designed to “sell” on a popular market.⁸⁸³ Polybius complained about the fables invented by various writers about Ethiopia (Polyb. 3.38.1, 3) and other distant locations (34.5.1–12; 3.57.1–59.9, esp. 3.57.1–9; 3.58.2) in his day. Thus the Ethiopians were said to mine metal by pulling it up only by magnets (Sil. It. 3.266–67).⁸⁸⁴ Arrian complained that others spoke of water monsters and griffins in India, plus ants that mined gold for Indians, and other unverified fantasies (*Alex.*

a three days’ journey from Napata to the Red Sea, and in 6.35.196 he claims twenty-four days’ sailing plus six days’ land journey from Meroë to the Ethiopian Ocean (“all” agreeing this to be 625 mi.). Note the fanciful proportions of Ethiopia in *b. Pesah.* 94a; *Ta’an.* 10a; *y. Ber.* 1:1, §12; *Song Rab.* 6:9, §3.

876. If he came for Passover, he would likely stay for Pentecost; if he came for the autumn festivals, he might stay during the winter (a difficult delay for an official), though winter travel would be less difficult once he passed the Judean hill country for Gaza and Egypt.

877. Le Cornu, *Acts*, 417. For travel alone, 20 mi. a day would yield nearly three to four months, but some of the travel, especially on the Nile, may have been faster than this.

878. Noted also by ancient commentators, e.g., Chrys. *Hom. Gen.* 35.4; cf. Bede *Comm. Acts* 8.27a (Martin, *Acts*, 97–98).

879. Pervo, *Dating Acts*, 32; idem, *Acts*, 221. For my argument against this view, see also Keener, “Official.”

880. Vitruv. *Arch.* 8.2.7 opined that Africa had few rivers because it was hot and moisture comes from the north.

881. Pliny *E. N.H.* 12.8.17 notes that Hdt. 3.97 attributes ebony to Ethiopia, but with Virgil *Georg.* 2.116–17, he attributes it to India.

882. The southeast corner of the world, i.e., India, was called east Ethiopia, as opposed to the southwest, which was Libya (Ptolemy *Tetrab.* 2.3.60, following Hom. *Od.* 1.23–24, in contrast to Ptolemy *Geography*); the region was thought to generate much drought and heat (1 *En.* 76:5). In Philost. *Vit. Apoll.* 2.18, the sun rose near India and set near Ethiopia; in *Vit. Apoll.* 6.1, India covered the entire southeast region of the world, and Ethiopia all the southwest. Cf. “black” people of the eastern dawn (Eurip. *Phaethon* frg. 771.2–4).

883. Some stories told to Herodotus fit this description (see Hdt. 3.17–24; 4.183 in Snowden, *Blacks in Antiquity*, 105); certainly, novelistic works (e.g., Ps.-Callisth. *Alex.* 3.21; Heliod. *Eth.* 10.4–5) and rabbinic speculations (e.g., *b. Pesah.* 94a; *Ta’an.* 10a; *y. Ber.* 1:1, §12; *Song Rab.* 6:9, §3; cf. similarly fanciful dimensions in Heliod. *Eth.* 10.5) do. Cf. *Tg. Šeni* on Esth 1:2, where the queen of Sheba was from an exotically distant country without war, whose foundations were as old as Eden.

884. Somewhat more plausibly, their companion Nubians wore no armor but linen, including on the head, and they tipped their javelins with poison (Sil. It. 3.269–73).

5.4.3). One swift monster held native to Ethiopia supposedly had a lion's body with a human face, and three rows of teeth useful for eating humans.⁸⁸⁵ Ultimately writers often mixed genuine and fictitious information, lacking resources to distinguish them: thus Ethiopia produced not only hyenas and monkeys but also “winged horses armed with horns.”⁸⁸⁶

Pliny the Elder offers some of the most thorough information about what the Roman world thought of Meroë in Luke's era. In *Natural History* 6.35.178–80, he lists towns and peoples reported south along the Nile to Meroë but notes (6.35.181) that most no longer exist, as attested by Nero's scouts who found there only desert. While researching his work on Ethiopia, one Greek writer allegedly lived in Meroë for five years (6.35.183). Nero's scouts found few buildings in Meroë (6.35.185); although it apparently had a sizable population, it was probably more rural.

The Roman world claimed knowledge of some other African, “Ethiopian” regions in addition to Meroë. Besides northern African regions (see comment on Acts 13:1) and Axum, these included explorations in western Africa in the second century B.C.E. (Pliny E. *N.H.* 5.1.9–10). Discoveries included forests (5.1.9), rivers with crocodiles (5.1.9–10), and, among coastal peoples, the “Ethiopian Daratitae” (*Aethiopas Daratitas*, 5.1.10; using “Ethiopia” for all of sub-Saharan Africa). Elsewhere in Africa, after a desert and the Egyptian Libyans, came the “white Ethiopians” and, after them, “the Ethiopian clans of the Nigritae, named after the river.”⁸⁸⁷ But the further Pliny moves from his known world, the less certain (and often more skeptical) we can be of his information. He speaks of mute, snake-eating cave dwellers (5.8.45);⁸⁸⁸ the naked Gamphasantes (5.8.45); the Blemmyae, whose mouth and eyes are (utterly fancifully) on their chests (because they lack heads, 5.8.46); and leather-footed people who crawl rather than walk, along with Satyrs and other creatures (5.8.46).

Even around Meroë, Pliny assures us, strange peoples lived: on the east, some flat-faced peoples lack noses; some had neither mouth nor nostrils but one opening both for breathing and for sucking in fluids through “oat straws,” using gestures instead of speech (6.35.187–88). Likewise (but now again more reliably), some also report a race of Pygmies closer to where the Nile originates (*Pygmaeorum*, 6.35.188).⁸⁸⁹ All quadrupeds around “Nubian Ethiopia” (*Nubaei Aethiopes*), including elephants, lacked ears; a still more distant people “have a dog for a king and divine his commands from his movements” (6.35.192 [LCL, 2:481]).⁸⁹⁰ Some plants around Meroë were useful medicinally whereas others caused suicidal madness.⁸⁹¹ A mineral category

885. Pliny E. *N.H.* 8.30.75 (attributing this “information” to Ctesias).

886. Pliny E. *N.H.* 8.30.72 (LCL, 2:53).

887. Pliny E. *N.H.* 5.8.43 (LCL, 2:249, 251); the river is the Niger (among African tribes, called *Tarraelii* and *Oechalicae*, 5.8.44), though not necessarily the modern river by this name. “Niger” was a common river name, perhaps partly because, in the Libyan language, *gher* (or *ghir*) applied to “any flowing waters” (Huss, “Niger”); on the Latin “Niger,” see comment on Acts 13:1.

888. Unfortunately, following Hdt. 4.183. Pliny the Elder deals further with the *Trogodytae*, cave dwellers, at *N.H.* 6.34.169; beyond Meroë, all were cave dwellers (6.35.189). In 5.5.34, cave dwellers lived seven days to the southwest of Libyan desert dwellers who built houses of salt; Rome's only contact with the cave dwellers was carbuncle imported through Ethiopia. Reports of “cave dwellers” might confuse the “Ethiopian” *Trogodytae* with northern *Troglodytae*, or cave dwellers (Morkot, “*Trogodytae*”). Cf. Agatharchides (fig. 21) on the snakebite-immune *Psylli* (Brown, *Historians*, 190).

889. Beyond Meroë, Philost. *Vit. Apoll.* 6.25 lists nomadic Ethiopians (living in wagons!), elephant hunters, cannibals, and pygmies. There were also people who were “shadow-footed”; nevertheless, the travelers found hospitality in a village there (6.27). Most tales of Pygmies are fictitious, but they apparently lent their title to the central African peoples called this today (Bloch, “Pygmies”).

890. Some ideas, such as that of a ruling dog, may have grown from outsiders' views of sacred totems, but plainly, Pliny's sources are not fully accurate.

891. Pliny E. *N.H.* 24.102.163; cf. 27.1.2; detailed in 27.3.11–12.

including diamonds was found in mines near Meroë (37.15.55), though also in India and Arabia (37.15.56).

How might Luke's audience have pictured the African official? Although everyone knew of Africa south of Egypt, some of the most widely circulated stories about particular Africans south of Egypt belonged to myth and legend. One of the most popular characters was Memnon, though his Ethiopia was placed in the "east," the land of the dawn.⁸⁹² (Some later writers, however, also associate him with Egypt.)⁸⁹³ Dawn (Ἠώς), a goddess who lived in the east, consorted with the mortal Tithonus and bore him two sons, including Memnon, in Ethiopia (Hesiod *Theog.* 984–85; Apollod. *Bib.* 3.12.4).⁸⁹⁴ Memnon was black (*nigri*, Virg. *Aen.* 1.489);⁸⁹⁵ Odysseus claimed that Memnon was the handsomest man he had ever seen (Hom. *Od.* 11.522). By all accounts, he was a mighty warrior, yet finally he was killed by Achilles (Apollod. *Epit.* 5.3).⁸⁹⁶ In some versions, after Achilles slew Memnon, Zeus made the latter immortal (*Aethiopsis* 1–2).⁸⁹⁷ Pliny the Elder reports the view of some that birds fly annually from Ethiopia to fight over Memnon's grave at Troy and that another source claims that the birds do the same around his palace in Ethiopia (*N.H.* 10.37.74).⁸⁹⁸ For centuries his death remained a subject for Greek art and rhetorical descriptions (Philost. Elder *Imag.* 1.7).

Some ancients suggested that the Ethiopians originated astrology.⁸⁹⁹ Others claimed that they stole their wisdom from India (Philost. *Vit. Apoll.* 6.11), from which they were expelled for murdering many Indians, including King Ganges, the river's son (3.20). Ethiopian sages could make the trees salute Apollonius (6.10); after Apollonius argues that the Indian sages are superior to them (6.5–11), the youngest of the Ethiopian sages follows him as a disciple (6.16). Some opined that Ethiopians were as wise because of their warm climate as Scythians were fierce because of their harsh climate.⁹⁰⁰

The Roman public proved infatuated with stories about Ethiopia after the return of Nero's expedition (61–62 C.E.).⁹⁰¹ By contrast, Luke (unlike, e.g., Heliodorus) does not even describe Ethiopia; Philip does not journey to Ethiopia to meet him. We know that Nubians are a *real* people (unlike Amazons; see discussion below) and the Candace was a *real* queen. Comparison with ancient fictions shows us that

892. E.g., Sil. It. 3.332–34; Sen. Y. *Troj.* 10. For fragments of the *Aethiopsis*, including dealing with Memnon, see *GEF* 108–17. On Memnon, see also Scherf, "Memnon."

893. See Rose and March, "Memnon" (citing Paus. 1.42.3).

894. In less detail, also Ovid *Pont.* 1.4.57; *Am.* 1.8.3–4; Philost. Elder *Imag.* 1.7.

895. Further, Ovid *Am.* 1.8; *Pont.* 3.3.96–97. But his mother, Aurora (the Latin name for Eos, "Dawn"), as a goddess, had golden hair (Ovid *Am.* 1.13.2). In Philost. Elder *Imag.* 1.7, his skin has a trace of ruddiness mitigating the black. Greek vase paintings portray him according to Greek heroic conventions but often his attendants as black Africans (Rose and March, "Memnon").

896. Also Pindar *Nem.* 3.62–63; 6.49–53; *Isthm.* 8.55; Pliny E. *N.H.* 6.35.182; Dio Chrys. *Or.* 11.114, 117; for his war exploits, e.g., Philost. Elder *Imag.* 2.7. His mother then mourned him (Ovid *Am.* 3.9.1–2). For his armor made by Hephaestus, see *Aethiopsis* 1.

897. Excerpted, and hence preserved, in Proclus *Chrestomathia* 2 (in Hesiod, LCL, 506–7; also *GEF* 113). A revisionist version claims that the Memnon slain at Troy was a Trojan (Philost. *Hrk.* 26.16–17), though Memnon of Ethiopia ruled during the Trojan War, and is worshiped in Ethiopia and Egypt (26.16; cf. similarly Philost. *Vit. Apoll.* 6.4).

898. On this myth, see further Scherf, "Memnonides." Memnon's statue in Ethiopia could speak and was so realistic that it helped Eos to stop mourning her son (Callist. *Descr.* 9; cf. more cautiously Tac. *Ann.* 2.61: when struck by sunlight, the statue offered sounds resembling a voice).

899. Lucian *Astr.* 3, suggesting also (*Astr.* 5) that they passed it to Egyptians; but Lucian is being satirical in this essay.

900. Pliny E. *N.H.* 2.80.189.

901. Klauck, *Magic*, 25–26 (following Plümacher, *Lukas*, 12–13). Josephus may play up the exotic character of the queen of Sheba's visit (cf. Begg, "Visit").

Nubia would be of interest to Luke's audience, but unlike some other locations that fictitious reports claim, Nubia was not fictitious. Far from indulging in speculations about distant lands, Luke stays close to the most sober model of historiography. Though he could not have known which reports of his contemporaries were reliable and which were not, what he reports does not contradict what we know.

(3) *Exotic Analogies*

Many Greeks had long enjoyed speculating about distant, exotic lands where life differed from what was known, as far as imagination could allow. Comparison with some other peoples helps set their speculations about Ethiopia in context. In the far north lived the Hyperboreans,⁹⁰² who enjoyed such longevity that finally, when they tired of living, they would banquet and then hurl themselves into the sea.⁹⁰³ Another people in the distant north lived in the remote location of Thule (possibly Iceland or Norway) at the ends of the earth;⁹⁰⁴ one first-century writer calls Thule the farthest of lands (Sen. *Y. Med.* 379).⁹⁰⁵

Likewise, some claimed that India had rivers of milk, honey, wine, and olive oil⁹⁰⁶ and people ate the lotus, which grew without need for cultivation;⁹⁰⁷ their Brahman sages drank from the "fountain of truth," making them incapable of lying.⁹⁰⁸ Ants larger than foxes dug gold, and at midday, when the ants retreated underground because of the heat, Indians stole their gold, which often led to battles with the ants.⁹⁰⁹ Less fantastically, some claimed a powerful king there⁹¹⁰ or estimated 118 peoples in India.⁹¹¹

Speculation (mixed with more accurate knowledge)⁹¹² had also been rife about the Scythians, because they were remote enough⁹¹³ that knowledge about them was limited (though by this period it was more accurate than before Alexander's conquests). Their remote land provided the scene for Prometheus's torture in some sources.⁹¹⁴ Because of their distance in the cold north⁹¹⁵ and the east,⁹¹⁶ they are naturally linked with

902. Cf., e.g., *Epigoni* frg. 5 (so Hdt. 4.32) and in Hesiod frg. 150.21 M.–W. (so *GEF* 59).

903. Pliny E. *N.H.* 4.12.89, though himself unsure if the reports were correct.

904. See Warmington and Millett, "Thule."

905. Pliny E. *N.H.* 4.16.104 makes it the land farthest north.

906. Dio Chrys. *Or.* 35.18 (noting that all flow one month of the year only for the king, as his tribute). In contrast to Hebrew idiom (e.g., Exod 3:8, 17; 33:3; Lev 20:24; Num 16:13–14; Deut 6:3; 26:9; 27:3; 31:20; Josh 5:6; Job 20:17; Ezek 20:6, 15; Sir 46:8; cf. echoes in Bar 1:20; 2 Esd 2:19; *Barn.* 6.8, 10, 13), this claim appears intended literally.

907. Dio Chrys. *Or.* 35.19. The trees brought their fruit down to whoever wished to eat (35.21).

908. Dio Chrys. *Or.* 35.22. On the Brahman "gymnosophists," see comment on Acts 7:58.

909. Hdt. 3.102–5 (claiming that he learned this from the Persians); Dio Chrys. *Or.* 35.23–24.

910. In Cyrus's day in Xen. *Cyr.* 2.4.1–8; Alexander later reportedly met one.

911. Arrian *Ind.* 7.1. See further Pliny E. *N.H.* 6.21.56–60. He writes on northern India (6.21.61–64), on regions around the Ganges (6.22.65–70), on the Indus (6.23.71–72), on races beyond the Indus (6.23.73–79), on some islands off India (6.23.80), and on Taprobane (what is now Sri Lanka) (6.24.81–91).

912. For some modern research, see, e.g., Minns, *Scythians*; briefly, Yamauchi, "Scythians," 13–15; Bredow, "Scythae."

913. On their remoteness, see, e.g., Aeschylus *Seven* 728, 817; Cic. *Nat. d.* 2.34.88 (mentioned alongside Britain); Ovid *Tristia* 1.3.61; 3.3.46; 3.4.49; 4.6.47; 5.2.61–63; 5.10.13–14; *Pont.* 2.1.66; 2.7.31; 3.2.46; 3.5.45; 4.14.14; Pliny E. *N.H.* 2.67.167; Jos. *Ag. Ap.* 1.64. Legendary Colchis is portrayed as Scythian in Val. Flacc. 1.745; 3.496, 653; 5.525; 6.7, 428; 7.42; 8.209; Libanius *Speech in Character* 1.3; 17.2; so also Tauri in Ovid *Pont.* 3.2.45. Hdt. 4.11 recounts divergent versions of the Scythians' origin. In Jos. *Ant.* 1.123, they are Magog.

914. E.g., Aeschylus *Prom.* 2; Apollod. *Bib.* 1.7.1; Mart. *Epig.* 11.84.9.

915. The cold north in Lucan *C.W.* 1.18; Photius *Bibl.* 166.109a (summarizing from Antonius Diogenes *Wonders beyond Thule*); the north wind is "Scythian" in Lucan *C.W.* 5.603; its farthest border is icy in Ovid *Metam.* 8.788–89; the "icy" Scythian in Hor. *Odes* 4.5.25. It was perpetually cold there (Virg. *Georg.* 3.349–83).

916. Associated with the east in Ovid *Fasti* 3.719. They roamed the northern part of Asia and the northeast quarter of the world (Ptolemy *Tetrab.* 2.3.60). The northeast was one "edge of the earth" (Cic. *Agr.* 2.19.52).

Hyperboreans⁹¹⁷ and Indians.⁹¹⁸ Scythia was too cold for thunderbolts, just as Egypt was too hot for them.⁹¹⁹ One plant there reportedly preserved one from hunger and thirst so long as one kept it in the mouth.⁹²⁰ In their land, a wild country,⁹²¹ one hairy animal changed its color to blend in with its surroundings.⁹²²

The Scythian tribes were innumerable, and the Parthians did not outnumber them.⁹²³ Scythians were rightly known to be nomads,⁹²⁴ not interested in farming⁹²⁵ or trade.⁹²⁶ Because they were accustomed to a nomadic lifestyle, living in cities could ruin their health.⁹²⁷ The Scythians were known for their ferocity in battle⁹²⁸ (though not for their military discipline)⁹²⁹ and for rejecting the Greek lifestyle.⁹³⁰ Greeks thus counted them barbarous⁹³¹ and indeed unlearned and ignorant (i.e., of what Greeks considered knowledge).⁹³² Unlike “civilized” Greeks, Scythians drank their wine straight, unmixed with water;⁹³³ a Greek was said to have gone insane from drinking too much strong wine with Scythians.⁹³⁴ More commonly, they were said to drink primarily milk,⁹³⁵ especially mares’ milk;⁹³⁶ some claimed that they subsisted primarily on mares’ milk.⁹³⁷ They wore animal skins, said to be woven from foxes and mice.⁹³⁸ Some Greeks had claimed that they shared wives in common, but Herodotus disagreed.⁹³⁹

917. Proximity to the Hyperboreans is probably implied in Iambl. *V.P.* 19.90.

918. Sext. Emp. *Pyr.* 1.80 (contrasting them physically); Ptolemy *Tetrab.* 2.3.60; Mart. *Epig.* 4.28.4; Suet. *Aug.* 21.3 (“nations known to us only from hearsay” [LCL, 1:153]); cf. Philo *Dreams* 2.59.

919. Pliny E. *N.H.* 2.51.135. They are contrasted with Egyptians also in Philo *Mos.* 2.19; Max. Tyre 23.4.

920. Pliny E. *N.H.* 25.43.82.

921. Aristoph. *Birds* 941.

922. Philo *Drunkness* 174.

923. Pliny E. *N.H.* 6.19.50 (the former claim is likely, the latter implausible). For various groups of Scythians, see, e.g., Jos. *War* 7.90, 244. They are linked poetically with Parthians as Rome’s enemies in Hor. *Odes* 4.5.25; Lucan *C.W.* 2.552–53 (and actually were Rome’s enemies in Jos. *War* 7.89).

924. Aeschines *Embassy* 78; Hdt. 1.15; Pindar *Hyporchemata* frg. 105b; Hor. *Odes* 1.35.9–10; 4.14.42; Strabo 11.6.2; Arrian *Ind.* 7.2; Lucian *Icar.* 16; *Fly* 9; *Carousal* 13.

925. Dio Chrys. *Or.* 64.14; Max. Tyre 23.4.

926. Dio Chrys. *Or.* 36.5.

927. Philost. *Vit. soph.* 2.5.572 (which suggests that some Scythians had begun doing so by the late second century C.E.). Well before this time, some Scythians were thought to have settled in Palestine’s Scythopolis (Pliny E. *N.H.* 5.16.74; cf. Flusser, “Paganism,” 1065–68).

928. E.g., Thucyd. 2.97.5–6; Corn. Nep. 1 (Miltiades), 3.4 (they beat back Darius); Mart. *Epig.* 10.62.8; Tac. *Hist.* frg. 7 (feared even by Alexander); Max. Tyre 23.4 (known as warriors); Philost. *Hrk.* 28.12 (killing Cyrus); Jos. *Ant.* 18.97.

929. Cf. Celtic warriors, viewed as disorderly and undisciplined (Polyb. 3.78.5; 3.79.8). They were thought prone to anger (Sen. *Y. Dial.* 4.15.1). The Medes defeated them, however, in Hdt. 1.104.

930. Hdt. 4.76, 79; Dio Chrys. *Or.* 32.44. Historically, despite their rejection of Greek lifestyle, their aristocrats wore jewelry that Greeks had designed for them (Bouzek, “Scythians,” 504); their land produced emeralds (Mart. *Epig.* 4.28.4). Aeschines denounces Demosthenes for Scythian, non-Greek ties (*Embassy* 78, 172–73, 180).

931. E.g., Aristoph. *Acharn.* 704; Philo *Embassy* 10; cf. Horsley, *Documents*, 1:16–17, §2.

932. Thucyd. 2.97.6; Lucian *Critic* 2–3. A “Scythian reply” was short and rough, as in Aelian *Farmers* 14 (Cnemon to Callipides).

933. Athen. *Deipn.* 427AB, 432A. Athenaeus notes with amazement that even their wives do it (*Deipn.* 432A).

934. Hdt. 6.84.

935. Max. Tyre 21.6 (noting that some other Scythians drink only water).

936. Cf. Philo *Contempl.* 17 (adapting Hom. *Il.* 13.5–6). That they drank much mares’ milk and made food from it is likely.

937. Hesiod *Cat. W. E.* 39–40 (from Strabo 7.300, 302). Some ancients said that they drank fermented mare’s milk “from bowls made of human skulls,” as well as the blood of the first enemy killed in any battle (so Olmstead, *Persian Empire*, 148).

938. Sen. *Y. Ep. Lucil.* 90.16.

939. Hdt. 1.216.

Some associated them with cruelty,⁹⁴⁰ so that a mother who murdered her children could be called a “savage Scythian”;⁹⁴¹ warriors who had not killed at least one enemy were disgraced at an annual feast;⁹⁴² some even portray them as cannibals.⁹⁴³ Related to the tale of Iphigeneia, they were sometimes said to practice human sacrifice.⁹⁴⁴ They were said to worship a scimitar.⁹⁴⁵ When their fathers became aged, they allegedly cut their throats;⁹⁴⁶ they let bodies rot openly rather than bury them.⁹⁴⁷ Herodotus accuses them of plundering a temple (angering the deity)⁹⁴⁸ and claims that when they ruled Asia for twenty-eight years, they wasted it with their plundering; finally some Medes made them drunk and slew them.⁹⁴⁹ Yet sometimes their simple, barbaric lifestyle was presented as virtuous and noble,⁹⁵⁰ as in the case of the articulate spokesman whom Greek writers used for them, Anacharsis.⁹⁵¹ Though poor, they were at least free.⁹⁵² Scythians were especially associated with horses⁹⁵³ and archery;⁹⁵⁴ some texts about them pair both together.⁹⁵⁵ To aid in their riding, Scythians avoided using swaddling clothes.⁹⁵⁶ Scythians were considered neighbors and associates of the fierce Amazons.⁹⁵⁷

Another major area of exotic geographic speculation concerned the renowned Amazons themselves,⁹⁵⁸ though by this period (when more geography was known) they are more often mentioned with regard to the past. Amazons were, in short, the opposite of what Greek men thought of women—a fertile ground for their imagination. It was thought that Amazons had once subdued much of Asia and Europe (Diod. Sic. 2.44.2–3);⁹⁵⁹ it was more difficult for more recent people to believe such reports, one historian opines, because their strength had died out (2.46.6).

Most ancient historians and other writers took for granted the historical

940. 2 Macc 4:47; 3 Macc 7:5; Apollod. *Epit.* 6.26; Cic. *Pis.* 8.18; Plut. *Fort. Alex.* 1.5, *Mor.* 328C; Lucian *Dial. C.* 10 (Chelidonium and Drosis ¶4), 307; Jos. *Ag. Ap.* 2.269; cf. Philost. *Letters* 5 (41). So also the Getae, with whom Ovid links them (*Pont.* 2.7.31). This includes scalping (Hdt. 4.64; 4 Macc 10:7).

941. Char. *Chaer.* 2.9.3.

942. Hdt. 4.66.

943. Pliny E. *N.H.* 6.20.53; 7.2.9 (on many, not all, Scythian tribes; for other cannibals farther east, see 6.20.55); Philost. *Hrk.* 57.9. When wronged by Cyaxares, they allegedly cooked a boy and fed him to Cyaxares, escaping before the latter realized what had occurred (Hdt. 1.73; cf. the story of Pelops).

944. Sext. *Emp. Pyr.* 3.208 (cf. the Tauri in 1.149); Lucian *Sacr.* 13.

945. Lucian *Z. Rants* 42.

946. Sext. *Emp. Pyr.* 3.210.

947. Sil. It. 13.486–87.

948. Hdt. 1.105.

949. Hdt. 1.106.

950. E.g., Strabo 7.3.7. Lucian also uses them thus in *Toxaris* passim.

951. Anacharsis *Ep.* 9 (advocating simplicity); Fronto *Ep. graec.* 1.5; Max. Tyre 25.1; Diog. Laert. 1.101–5; cf. Paus. 1.22.8. Supposedly, he was hellenizing the Scythians (*Gr. Anth.* 7.92) but was killed by his brother for being too pro-Greek (Hdt. 4.76; Diog. Laert. 1.102).

952. Arrian *Alex.* 4.11.9 (not subdued by Persians); Max. Tyre 23.4 (because they were warriors).

953. E.g., Pliny E. *N.H.* 7.2.17.

954. E.g., Aeschylus *Lib.* 161; Hdt. 1.73; Hor. *Odes* 3.8.23–24; Ovid *Pont.* 1.1.79; 1.7.9; 2.1.65 (cf. 3.5.45); Lucian *Nigr.* 36–37.

955. E.g., Dio Chrys. *Or.* 13.32 (as with Indians).

956. Hippocr. *Airs* 20.13–15. Swaddling clothes were usual in the Mediterranean world; see, e.g., Pindar *Nem.* 1.38; *Pyth.* 4.114; Apollod. *Bib.* 3.10.2; Soranus *Gynec.* 2.9.14–15; 2.19.42 (39.111); Men. *Rhet.* 2.1–2, 371.19; Philost. *Vit. Apoll.* 5.15; Philost. *Elder Imag.* 1.26; Philost. *Younger Imag.* 5; Heliod. *Eth.* 2.31; Libanius *Narration* 24.2; Wis 7:4; Hurschmann, “Swaddling Clothes”; Croom, *Clothing*, 119–20; Safrai, “Home,” 766.

957. E.g., Isoc. *Panath.* 193; Hdt. 4.111–17; Diod. Sic. 4.27.2; Sen. Y. *Troj.* 12; Statius *Theb.* 5.144; Philost. *Hrk.* 57.9. Cf. Lefkowitz, *Women in Myth*, 22.

958. Cf. the Amazon statue found in Corinth (Sturgeon, “Amazon”).

959. More fully, see Diod. Sic. 2.44.2–46.6.

authenticity of the Amazons.⁹⁶⁰ Herodotus assumes the existence of Amazons.⁹⁶¹ Xenophon did not see any Amazons in the East but notes that some of his comrades captured a man with weapons like those attributed to the Amazons.⁹⁶² Pompey's Asian captives included women thought to be Amazons, but it was uncertain whether they belonged to a separate kingdom or their local translators simply called any warrior women "Amazons."⁹⁶³ Later, Strabo still apparently believes in Amazons but thinks that, despite various claims, no historian in his day, in fact, knows their location.⁹⁶⁴ Arrian reports that some in Alexander's day claimed the existence of Amazons⁹⁶⁵ but suspects that they must have died out by Alexander's day, since he did not run into them.⁹⁶⁶ In the second century C.E., Pausanias still treats them as real figures, citing earlier historians.⁹⁶⁷ Some philosophers depended on their authentic existence for their argument.⁹⁶⁸

Others proved more skeptical about their existence, though sometimes because such warlike women seemed to them unthinkable.⁹⁶⁹ Although Greek art contains many Amazons, they do not appear in the art of other peoples, for whom Amazons would also have been a matter of interest.⁹⁷⁰ Clearly Amazons exercised the Greek imagination, but because they are attested primarily in stories from centuries earlier, and then primarily in exotic distant locations, we have little historical data to work from.

Amazons were known for their bravery,⁹⁷¹ and some philosophers used their example to demonstrate the potential of women.⁹⁷² In war, they were men's "equals";⁹⁷³ some opined that they were warlike because they were daughters of Ares.⁹⁷⁴ It was said that their right breast was seared when they were infants so that they could use their right arm in war like men (using their left breast to nurse infants).⁹⁷⁵ Like other Eastern peoples, they were mounted⁹⁷⁶ archers.⁹⁷⁷ Supposedly they procreated with a neighboring tribe, raising the girls themselves and allowing that tribe to raise

960. E.g., Lefkowitz, *Women in Myth*, 22–23; in Greek historians, see Sobol, *Amazons*, 81–90; in literature and art, 91–112. For the question of their actual existence, see *ibid.*, 113–47, doubting that historicity can be proved either way (147). Accounting for their origin in Greek sources is speculative, since "they left behind no artifacts, no cuneiform tablets, no ruins" (139).

961. E.g., *Hdt.* 4.111–17.

962. Xen. *Anab.* 4.4.16 (the weapons are not all that distinctive). Amazons' supposed location changed as Greek geographic knowledge expanded (van der Horst, "Amazons," 28).

963. Appian *Hist. rom.* 12.15.103. Since local language was presumably translated into Greek and Latin, it may be the translators who explained the warriors as "Amazons."

964. Strabo 11.5.1, 4.

965. Arrian *Alex.* 4.15.4. Some ancients claim that the Amazon queen came to meet Alexander (Diod. Sic. 17.77.1; uncertainly, Plut. *Alex.* 46.1–2) or sent tribute (Ps.-Callisth. *Alex.* 3.26, an unreliable source). In *Pesiq. Rab Kah.* 9:1, a place inhabited only by women, possibly in Africa, dissuades Alexander from warring with them.

966. Arrian *Alex.* 7.13.4–6.

967. Paus. 1.2.1.

968. E.g., Crates *Ep.* 28. The artistic portrayal of Pericles fighting Amazons in the historical period (Plut. *Per.* 31.4) is an artistic recollection of Theseus's and the Athenians' battle with them.

969. Tatian *Or. Gks.* 32.

970. Lefkowitz, *Women in Myth*, 22.

971. E.g., Diod. Sic. 17.77.1; cf. Libanius *Speech in Character* 12.2.

972. Mus. Ruf. 4, p. 44.33; Crates *Ep.* 28.

973. Hom. *Il.* 3.189; 6.186; Crates *Ep.* 28.

974. Ap. Rhod. 2.987–91; Philost. *Hrk.* 57.3.

975. Apollod. *Bib.* 2.5.9; Strabo 11.5.1. This theory connected with an etymology of their name (Philost. *Hrk.* 57.6, believing that they nursed infants with mares' milk [like Scythians]). Cf. the Androgyni, who had one male and one female breast (Pliny E. *N.H.* 7.2.15).

976. E.g., Philost. Elder *Imag.* 2.3. They were like any other women except when mounted (Philost. *Hrk.* 57.12).

977. Pindar *Ol.* 13.87; Philost. *Hrk.* 57.3.

the boys.⁹⁷⁸ Some ancients claimed that they were taller and more beautiful than ordinary women.⁹⁷⁹

Unfortunately, most Greek narratives treat them as enemies and hence employ their reputation as powerful warriors as a foil for various reported Greek victories over them.⁹⁸⁰ Thus the great Achilles slew Penthesileia but, seeing her beauty afterward, regretted it.⁹⁸¹ The Amazon queen represented the final barrier to Troy's capture.⁹⁸²

Amazons were associated with the founding and naming of Ephesus⁹⁸³ and Smyrna⁹⁸⁴ and may have links with Artemis.⁹⁸⁵ Interest in Amazons apparently remained in Ephesus;⁹⁸⁶ some statues of Amazons were dedicated in Ephesus's temple of Artemis.⁹⁸⁷ The question of the Amazons' original location is more complicated. Aside from their proximity to the Scythians (a very general indicator), there was ambiguity about their exact location once the geography of their original alleged region became known. Strabo noted the different locations given but felt that few reputable historians still knew where they were.⁹⁸⁸ (One writer even locates them in Thrace, which appears relevant only because it was north and east of Rome.)⁹⁸⁹ One novelistic writer places them on an island across the river Amazon.⁹⁹⁰ Diodorus thinks that the Libyan Amazons preceded the Asian ones but died out before the Trojan War.⁹⁹¹

The Amazons spawned (or amplified) tales of other warlike women,⁹⁹² including the Lemnians⁹⁹³ and various individuals;⁹⁹⁴ some Amazons and Scythians allegedly

978. Strabo 11.5.1; Philost. *Hrk.* 57.4–5. Alternatively, they maimed male children to prevent them from becoming manly (Sext. *Emp. Pyr.* 3.217). They were “husbandless” (Aeschylus *Suppl.* 287), spurned marriage (Staius *Ach.* 1.352–53), and hated all men (Aeschylus *Prom.* 723–24).

979. Ps.-Callisth. *Alex.* 3.27.

980. E.g., Lysias *Or.* 2.4–6, §§190–91 (noting that the Athenians made them like others of their gender); Demosth. *Epitaph.* 8. Reported victors over them included Heracles (Apollod. *Bib.* 2.5.9; Dio Chrys. *Or.* 63), Bellerophon (Hom. *Il.* 6.186; Pindar *Ol.* 13.87; Apollod. *Bib.* 2.3.2), Theseus (Apollod. *Epit.* 1.16–17; Plut. *Thes.* 26–28; for their battle with Athens, also see Isoc. *Panath.* 193), and others. They were the hardest women to conquer but not really very difficult (Dio Chrys. 4.73). Cf. Pomeroy, *Goddesses*, 23–25; interpretation of portraiture of defeated Amazons noted in Lopez, *Apostle*, 44; Taussig, “Melancholy,” 284–87.

981. Apollod. *Epit.* 5.1; Lycophron *Alex.* 995–1001; *Aethiopsis* 1 (GEF 111); Libanius *Speech in Character* 12; *Encomium* 2.21; *Invect.* 1.22; cf. Dio Chrys. *Or.* 11.117. Philost. *Hrk.* 57.15–17 seems to revel in the gory description of Achilles's ghost slaughtering the Amazons who invaded his island, mangling them mercilessly. Along the same troublesome lines, 23.27–28 also emphasizes the beauty of another fallen warrior queen stirring the Achaians.

982. Sen. *Y. Troj.* 243 (cf. 12–13). They came, like Memnon, toward the war's end (Dio Chrys. *Or.* 11.117).

983. Strabo 11.5.4; Pliny *E. N.H.* 5.31.115. For the naming, see Strabo 12.3.21.

984. Strabo 11.5.4; Pliny *E. N.H.* 5.31.118; Tac. *Ann.* 4.56. For the naming, see Strabo 12.3.21. They sail from Ephesus in Plut. *Gk. Q.* 56, *Mor.* 303DE.

985. Pomeroy, *Goddesses*, 5. At least one scholar thinks Artemis's many “breasts” were sacrifices from Amazons (noted without approval in Sobol, *Amazons*, 111), but this is very unlikely (see comment on Acts 19:27).

986. Cf. a person named Ἀμαζόνοχος in *I. Eph.* 941. Cf. Taussig's association of a powerful Amazon with Asia's precolonial past (“Melancholy,” 286, citing Kahl, *Galatians Re-imagined*, 31–204).

987. Pliny *E. N.H.* 34.19.53.

988. Strabo 11.5.1.

989. Sil. *It.* 2.73, 80.

990. Ps.-Callisth. *Alex.* 3.25.

991. Diod. *Sic.* 3.52.1–3; they were near Ethiopia (3.53.4); cf. possibly an allusion to African Amazons in *Pesiq. Rab Kah.* 9:1. On the Libyan Amazons, see Sobol, *Amazons*, 19–31 (much more is reported in Asia; see 32–77).

992. E.g., Quint. *Curt.* 5.6.18 (alongside their husbands); Philost. *Hrk.* 23.26–27. For another warrior queen, Rhodogoune, see Philost. *Elder Imag.* 2.5; for Queen Semiramis of Assyria, see, e.g., Juv. *Sat.* 2.108.

993. E.g., Ap. *Rhod.* 1.609–19; Apollod. *Bib.* 1.9.17; Val. Flacc. 2.196–241 (after slaying their husbands, they replaced them as rulers, 2.307–10); cf. discussion in Dräger, “Lemnian Women.” Some women also conspired to murder their husbands in historical times (Val. Max. 2.5.3, claiming at least 170 conspirators).

994. E.g., Virg. *Aen.* 11.734; Philost. *Hrk.* 28.9, 12. Cf. also Atalanta (Apollod. *Bib.* 3.9.2). The goddess Athena is also portrayed in warlike and masculine terms, without embarrassment; Aeschylus *Eum.* 734–41; Lucian *Dial. G.* 225 (13/8, Hephaisotos and Zeus 1).

mated and produced a nation where husbands and wives went to war together.⁹⁹⁵ Historically, certainly there were women who aided in battles;⁹⁹⁶ Rome even knew some women gladiators⁹⁹⁷ (one of whom was nicknamed Amazon).⁹⁹⁸ Tacitus also reports a German people among whom women were believed to rule,⁹⁹⁹ as well as a British warrior queen (noting that Britons did not discriminate by gender in assignment of the royal office).¹⁰⁰⁰ All such reports, both the historical and fictitious ones, were objects of fascination in the androcentric Greco-Roman world.¹⁰⁰¹

(4) *The African's Color*

Most obviously, Luke's audience would assume that the Ethiopian was black.¹⁰⁰² Although this feature might seem irrelevant to the story for some modern readers,¹⁰⁰³ it was a primary element of most Mediterranean conceptions of Ethiopians¹⁰⁰⁴ (like the whiteness of Scythians), though lacking the connotations attached by modern notions of race. (Texts sometimes contrasted Scythians with Ethiopians as the northern and southern extremes of peoples.)¹⁰⁰⁵ "Black" complexion was the most common defining feature of Ethiopians in ancient Mediterranean literature.¹⁰⁰⁶ Diaspora Jewish texts and later rabbis both work from the assumption that "Ethiopians" are "black."¹⁰⁰⁷ So pervasive was the characteristic that people used Ethiopians as a symbol of something black.¹⁰⁰⁸ Black complexion was linked with flat noses, woolly hair, and broad lips and feet as characteristics of African Ethiopians.¹⁰⁰⁹ Woolly hair

995. Hdt. 4.111–17.

996. E.g., Dion. Hal. *Ant. rom.* 6.92.6; Livy 2.13.6; Appian *Hist. rom.* 7.5.29. Lefkowitz and Fant, *Life*, 21, §39, cite also Plut. *Mor.* 24SCF.

997. E.g., Tac. *Ann.* 15.32; Suet. *Dom.* 4.1.

998. See Sherk, *Empire*, §172E, p. 226 (the opponent, Achillia, may have been so nicknamed because of Achilles's defeat of an Amazon).

999. Tac. *Germ.* 45; elsewhere, German women watched the battle and spurred their men to valor (*Germ.* 7–8). Ant. Diog. *Thule* 109b claimed a place in northern Spain where women were the warriors and men attended to domestic activities.

1000. Tac. *Agr.* 16, on Boadicea.

1001. Greeks generally thought it terrible to be ruled by women (Aeschylus *Seven* 712; cf. Isa 3:12).

1002. Hardly a new observation (see, e.g., Abbott, *Acts*, 101, in 1876). For approaches to race in classical studies, see, e.g., Snowden, *Blacks in Antiquity*; idem, *Color Prejudice*; idem, "Black-White Relations"; McCoskey, "Imperative" (on one course design). Ethnicity is a social construction, not genetic, but it is also "a real social factor" (Barreto, *Negotiations*, 54) in how peoples relate to one another, as anyone involved, for example, in ethnic conflicts or wars can testify. Barreto notes that ethnicity as we know it is a modern conception, but one that modern readers cannot avoid (*ibid.*, 29–45, esp. 29–31, following esp. Buell, *Race*, 13–21).

1003. Its relevance to most modern readers, at least in the United States, would probably be more racialized than in antiquity, given the modern Western (e.g., Usry and Keener, *Religion*, 21–22, 78–79; and often) and medieval Arab (Lewis, *Race and Slavery*, passim, esp. 45–48, 89–93; Gordon, *Slavery*, passim, esp. 102–3; Talib, "Diaspora," 721–22; Usry and Keener, *Religion*, 88–90) racial stereotypes.

1004. Martin, "Chamberlain's Journey," 110–11, thus complains about most commentators' "glaring lack of concrete descriptive detail" here, "surprising in view of the prodigious classical evidence." Traditionally, Western scholars treated Africa's countryside as African but its cities (and Egyptian civilization) as classical; Nubia's cities, however, were no less "African" than its countryside (LaViolette and Fleisher, "Archaeology," 333).

1005. E.g., Pliny E. *N.H.* 2.80.189. On some rabbis perhaps substituting "barbarians" for Ethiopians (cf. Col 3:11), Goldenberg, "Scythian-Barbarian." Texts also contrast Scythians and Indians (light and dark; Sext. Emp. *Pyr.* 1.80).

1006. E.g., Petron. *Sat.* 102; Lucian *Indictment* 6; Lucian *Patriot* 4; Heliod. *Eth.* 4.8; Hippol. *Ref.* 4.6; cf. Juv. *Sat.* 6.600. Statius *Theb.* 5.427–28 describes them as *rubentum*, "red," but this was rare. Their immutable blackness seems to have been proverbial (Jer 13:23; Lucian *Book-Coll.* 28).

1007. E.g., *Gen. Rab.* 73:10; 86:3. *Sib. Or.* 3.322 even speaks of Ethiopians' "black blood" (αἷμα κελαινόν).

1008. Philo *Alleg. Interp.* 2.67; *Apoc. Mos.* 35:4; 36:2–3; perhaps *Martyrdom of Bartholomew*. A dark-colored citron was called "Kushite" (*m. Sukkah* 3:6).

1009. Diod. Sic. 3.8.2; [Virg.] *Moretum* 32–35; Sext. Emp. *Eth.* 3.43; Lucan *C.W.* 10.131–32. Cf. the "snub-nosed" group of Ethiopians in Quint. Curt. 4.7.19. A dark Egyptian might also have thick lips (Lucian *Ship* 2).

is a fairly common description, distinguishing African “Ethiopians” from the dark but straight-haired Indian variety.¹⁰¹⁰

Mediterranean peoples sometimes attributed Ethiopians’ complexion to their skins being burned by the sun.¹⁰¹¹ Thus Pliny the Elder opined that certainly “Ethiopians are burnt by the heat of the heavenly body near them, and are born with a scorched appearance, with curly beard and hair” whereas peoples of the north are frosty white; only in the center of the world (i.e., Pliny’s region) were people normal and healthy, with better intelligence and governments.¹⁰¹² Many peoples of north and south were also considered unusually tall, in contrast to Mediterranean peoples, who essentially regarded themselves as the norm.¹⁰¹³

Yet many ancients understood that ideals of beauty varied from one culture to the next.¹⁰¹⁴ Thus it was thought that Nubians preferred women as dark as possible and Persians preferred them as light as possible.¹⁰¹⁵ Scholars often suggest that in ancient Egypt women lightened their skin whereas men darkened theirs.¹⁰¹⁶ (From my very limited acquaintance with Egyptian artwork, I would guess that this practice was particularly characteristic of Old Kingdom Egypt;¹⁰¹⁷ where lighter women appear with darker men later,¹⁰¹⁸ this must be balanced with darker women alongside lighter men.¹⁰¹⁹ The realism of Amarna period artwork may have been short lived,¹⁰²⁰ but it suggests that the average complexions for both genders in daily life were reddish brown.)¹⁰²¹ Stoics

1010. See Snowden, *Blacks in Antiquity*, 6.

1011. Ovid *Metam.* 1.235–36; Lucan *C.W.* 10.221–22; Sil. It. 3.268–69; Sen. *Y. Nat. Q.* 4.2.18; Philost. *Vit. Apoll.* 2.18; cf. Egyptians in Aeschylus *Suppl.* 155; and a dark-tanned Israelite in Song 1:5; cf. possibly Apul. *Metam.* 11.5 (but this may refer to “east Ethiopian” Indians).

1012. Pliny E. *N.H.* 2.80.189–90 (LCL, 1:321). Thus the north and south poles were too cold, and the equator too hot, but the temperate zones were habitable (Heracl. *Hom. Prob.* 50.2–5, following Eratosthenes). Later Arabs often adopted this approach, except with themselves in the middle; e.g., in 828–89 C.E., Ibn Qutayba, *Al-Ma’arif* (ed. Tharwat ‘Ukasha; 2nd ed.; Cairo, 1969), 26 (as cited in Lewis, *Race and Slavery*, 46); Sa’id al-Andalusi (died 1070), in *Tabaqat al-Umam* (ed. L. Cheikho; Beirut, 1912), 9 (as cited in Lewis, *Race and Slavery*, 47–48); Ibn al-Faqih al-Hamadani, in *Mukhtasar Kitab al-Buldan* (ed. M. J. de Goeje; Leiden, 1885), 5:162 (as cited in Lewis, *Race and Slavery*, 45–46). For such environmental determinism as a factor in “proto-racism,” see Isaac, “Proto-racism”; also Niang, “Seeing,” 163–64 (citing Isaac, *Invention of Racism*, 149–68).

1013. Pliny E. *N.H.* 2.80.189.

1014. E.g., Dio Chrys. *Or.* 21.16–17.

1015. Sext. Emp. *Eth.* 3.43.

1016. Cosgrave, *History of Costume*, 26; Gordon, *Civilizations*, 230–31 (comparing also Cretan paintings and, with regard to men, Etruscan paintings).

1017. Fitting examples in Aldred, *Egypt*, 108; Smith, *Art and Architecture*, plate 29; Groenewegen-Frankfort and Ashmole, *World*, plate 6; Harris, *Art*, plate 5; Stewart, *Pyramids*, 66; Forman, *Art*, 49, plate 35. On conventions for coloring in art, see Harris, *Art*, 19.

1018. Cottrell, *Egypt*, plate facing p. 174.

1019. See, e.g., Quirke and Spencer, *Museum Book*, 152–53 (Eighteenth Dynasty); Harris, *Art*, plate 22A; James, *Egypt*, 23. For other women comparable in hue to the men, see Ruffle, *Egyptians*, 184, 185; Woldering, *Art*, 87, 91, 93, 111, 112, 113, 132, 133, 162 (all from the 1300s to 1400s B.C.E.); Quirke and Spencer, *Museum Book*, 140–41; Cottrell, *Egypt*, 204; Stewart, *Pyramids*, 131, 116; James, *Egypt*, 154; Jordan, *Egypt*, 105 (Middle Kingdom, before 1600 B.C.E.), 148–49, 193 (New Kingdom); Smith, *Art and Architecture*, plates 74 (also in Forman, *Art*, plate 41), 141, 151, 164; Harris, *Art*, plates 21B, 24AB, 33–35. Some women are clearly black even by traditional racial definitions (e.g., Ruffle, *Egyptians*, 147; Woldering, *Art*, 94; Smith, *Art and Architecture*, plate 144; Groenewegen-Frankfort and Ashmole, *World*, plates 13, 15). Queen Nefertari was clearly dark (e.g., Corzo, *Wall Paintings*, 8, 27, and passim; Smith, *Art and Architecture*, plate 159B; light brown in Woldering, *Art*, 134).

1020. Forman, *Art*, 33–37; Groenewegen-Frankfort and Ashmole, *World*, 62. Egyptians were aware of, and capable of, reproducing various shades of colors (Ruffle, *Egyptians*, 129, 159; Harris, *Art*, plate 22A); one may also compare the consistent colorations of deities, e.g., dark green for Osiris (Quirke and Spencer, *Museum Book*, 29, 220; Woldering, *Art*, 139; cf. Ruffle, *Egyptians*, 181, 192) or blue for the Nile god (Quirke and Spencer, *Museum Book*, 16).

1021. In their own artwork, especially in the realistic Amarna period, some Egyptians are black (e.g., Ruffle, *Egyptians*, 120–21, 147, 202–3; cf. very dark brown in Quirke and Spencer, *Egypt*, 12; Aldred, *Egypt*,

regarded complexion as a matter of complete indifference, so that neither paler nor darker (λευκότητα και μελανότητα) skin was preferable.¹⁰²² People treated as a freak one man supposedly half-black and half-white.¹⁰²³ But a wise sage was said to have identified an unusual woman (who was allegedly black from head to breast and white from there down) as a special beauty, as she would have been in India.¹⁰²⁴ One could conceive of an Ethiopian supposing that all people were “black” (μέλανας), though more prudent Ethiopians would reject the verdict from one who had never been abroad.¹⁰²⁵

“Black,” however, was a relative term, sometimes applied to whatever was not white (Philo *Abr.* 10). People from the north sometimes called darker peoples to their south “black,” whether in Gaza (Dion. Hal. *Lit. Comp.* 18), in Egypt,¹⁰²⁶ or among other African peoples such as Libyans¹⁰²⁷ and Mauretanians.¹⁰²⁸ (Another southern people, undoubtedly dark by Mediterranean standards, was called “white Ethiopians” by virtue of the object of their comparison.)¹⁰²⁹ This was truest of Indians, who were sometimes called “black” (Arrian *Ind.* 1.2 [μέλανες]; Philost. *Vit. soph.* 1.8.490; cf. *Sib. Or.* 11.68–69).¹⁰³⁰ Their land was sometimes compared to¹⁰³¹ or confused with¹⁰³² Ethiopia, and they were sometimes compared to or confused with Ethiopians.¹⁰³³ Greek observers distinguished them physically especially because Indians were more apt to have straight hair and less flat noses (Arrian *Ind.* 6.9).¹⁰³⁴

Complexion varied by gradation from lighter in the north to darker farther south along the Nile.¹⁰³⁵ This was true even in Nubia itself.¹⁰³⁶ Thus Philost. *Vit. Apoll.* 6.2

131); most are dark red to reddish brown (Woldering, *Art*, 24, 26, 90, 110, 112, 139, 205; Ruffle, *Egyptians*, 40–41, 129, 140–41, 144; Quirke and Spencer, *Museum Book*, 12, 19, 20–21, 25, 26, 27, 55, 75, 87, 91, 142–43; Jordan, *Egypt*, 136, 153; Cottrell, *Egypt*, plates 66, 109, 110, 112, 113–17, 126, 129; Stewart, *Pyramids*, 32, 43, 70, 112–13, 115–17, 121, 130; Aldred, *Egypt*, 39, 105, 108, 128–29, 132; James, *Egypt*, 90–91, 118–19, 163; Smith, *Art and Architecture*, plates 58A, 64, 94, 107, 109, 141, 162–63; Forman, *Art*, plates 18, 21, 27–28, 32, 45, 48, 58, 62, 69, 74, 77, 85–86). Most portraits in the Roman period are of Greeks, but native Egyptians remain darker (Quirke and Spencer, *Museum Book*, 57; James, *Egypt*, 74). In all periods, Egyptians appear darker than typical western Asiatics (Semites), such as the Syrians (Quirke and Spencer, *Museum Book*, 199; Smith, *Art and Architecture*, plates 105, 106, 160A; cf. Woldering, *Art*, 166). Cf. one exploratory investigation in Usry and Keener, *Religion*, 65–66.

1022. Arius Did. *Epit.* 2.7.7b, pp. 46–47.5.

1023. Lucian *Prom. in Words* 4. Cf. the alleged “exotic” tastes of some wealthy Romans for persons of “foreign color” or deformities in Quint. *Decl.* 298.12.

1024. Philost. *Vit. Apoll.* 3.3.

1025. Lucian *Hermot.* 31.

1026. E.g., Aeschylus *Suppl.* 154–55; Isaeus *Dicaeog.* 40 (an “Egyptian” named Μέλας); Lucian *Ship* 2 (also for a boy’s plaited hair, *Ship* 3; an older Egyptian’s curly hair, *Ship* 6). Egyptians were in fact a mixture of Asian and African peoples (see, e.g., LaSor, “Egypt,” 32; Taylor, *Egypt and Nubia*, 7; for their culture, Wilson, *Culture of Egypt*, 16–17, 27, 145).

1027. In “inner” Libya (*Sib. Or.* 11.289), though Egyptian Jews seem to have included among its peoples “dark-skinned Ethiopians” (Ezek. *Trag. Exag.* 60–65, esp. 61–62).

1028. Sil. It. 7.682–83 (*nigra*). On Roman Mauretania (mostly the current location of Morocco and western Algeria), see Huss, “Mauretania,” esp. 495–96; for archaeology, Niemeyer, “Mauretania: Archaeology.”

1029. Pliny E. N.H. 5.8.43 (Latin *Leucoe Aethiopes*, transliterated from Greek).

1030. In Callist. *Descr.* 4, an Indian is fairly (but not completely) black. Dark complexion also characterized another eastern (though not southern) people in Greek legend, the Colchians (Pindar *Pyth.* 4.212).

1031. E.g., Arrian *Ind.* 6.8; Xen. *Eph. Anthia* 4.1. Both were near the sun (Ovid *Metam.* 1.778); also linked as farthest extents southward (Esth 1:1; 8:9; Jos. *Ant.* 11.33, 186, 216, 272).

1032. E.g., *Sib. Or.* 5.206; 11.61–79, esp. 62, 64–65; cf. Strabo 1.2.

1033. E.g., Philost. *Hrk.* 8.5; *Tg. Jer.* 13:23 (changing “Ethiopian” to “Indian”).

1034. Arrian *Ind.* 6.9 also claims that north Indians more closely resembled Egyptians. Cf. further Snowden, *Blacks in Antiquity*, 6. Callist. *Descr.* 4, unusually, gives even the Indian woolly hair.

1035. Trigger, “Nubian, Nilotic?,” 27; cf. similarly Du Bois, *World and Africa*, 103; in Egyptian art, see, e.g., Quirke and Spencer, *Museum Book*, 209; James, *Egypt*, 199. Against those who argue that the range of ancient Egyptian complexions is that of average Western “whites,” see Usry and Keener, *Religion*, 65–66; against those who argue that this observation is biologically significant, see 66–68.

1036. Taylor, *Egypt and Nubia*, 7; cf. Trigger, “Nubian, Nilotic?,” 33.

claims that dwellers in marshes between Egypt and Ethiopia are not completely black (μέλανες); they are not as black (μελαίνονται) as the Ethiopians but are so more than the Egyptians. And even a black (μέλανα) Ethiopian sage was thought able to blush (6.12). Apart from Ethiopians, “blackness,” like other colors, was understood in relative terms, a practice carrying into a later period as well, when Arabs considered themselves “black” compared with the Persians (who were “red”) but “red” or “white” compared with Africans, whom they considered black.¹⁰³⁷

Ancient Mediterranean literature uses Africa south of Egypt as the standard of blackness for skin.¹⁰³⁸ Nor would Luke’s audience likely wonder to which Ethiopia he referred; the direction of the official’s journey, the standard use of “Ethiopia” in Greek literature of this period, and the queen’s title all specify the kingdom Luke has in mind here.

Ancients tended not to racialize differences in the modern sense; certainly they did not have three or four clearly defined races (a modern legacy of nineteenth-century ethnocentric anthropology,¹⁰³⁹ now repudiated by most physical anthropologists).¹⁰⁴⁰ Nor did they divide humanity only into “black” and “white” categories (a legacy primarily of the Western slave trade and ideologies generated to justify it;¹⁰⁴¹ these were partly inherited from earlier Arab models).¹⁰⁴² Greeks and Romans, who often first met black Africans as mercenaries, generally did not reflect severe color prejudices by later standards.¹⁰⁴³ The negative associations of dark or black in antiquity related to the contrast between day and night, not to complexion¹⁰⁴⁴ (see extended comment on Acts 1:10); they appear even in some traditional African cultures.¹⁰⁴⁵

This is not to deny the dominance of ethnocentrism but to reject that it was informed primarily by complexion.¹⁰⁴⁶ Mediterranean ancients recognized various physical traits of different peoples (e.g., *PGM* 5.257–59, 289–90)—for example, that the Gauls were tall, “white,” and blond (Diod. Sic. 5.28.1) or the Germans red-haired (Sen. *Y. Dial.* 5.27.3).¹⁰⁴⁷ Intellectuals considered such differences merely characteristic of different peoples.¹⁰⁴⁸ Views of blacks ranged from negative (e.g.,

1037. Lewis, *Race and Slavery*, 22. But Arabic *sudan* (“black”) applied only to Ethiopians or peoples south of the Sahara (50). Arab artwork depicted Arabs as white and African slaves (plates 1–10, 16, 19), battle enemies (plates 11–15), and also the Prophet’s companion Bilal (plate 18) as black. The “blackening” of faces in hell in Qur’an 39.60 does not concern complexion (cf. 80.41).

1038. Snowden, *Blacks in Antiquity*, passim.

1039. See Clarke, *Wrestlin’ Jacob*, 108–12; Livingstone, *Defenders*, 59–64; Jordan, *Burdens*, 99–110; Renfrew and Bahn, *Archaeology*, 371.

1040. Trigger, “Nubian, Nilotic?,” 27; Renfrew and Bahn, *Archaeology*, 168, 371; Mack, *Race*, 57–58; Olsen, “Race,” 360; Usry and Keener, *Religion*, 78–79.

1041. Cf. Clarke, *Wrestlin’ Jacob*, 108; Livingstone, *Defenders*, 59–60; Felder, *Waters*, 37.

1042. See Lewis, *Race and Slavery*, 53, 56, 59, 77.

1043. Snowden, “Black-White Relations”; Snowden, *Color Prejudice*, passim; but for greater ambiguity than Snowden’s work affirms, see Barreto, *Negotiations*, 8, following especially Dench, *Asylum*, 8–9. Evidence shows that some did exist, but not much compared with later eras (Frost, “Attitudes toward Blacks”).

1044. The rare association was speculative; e.g., Philost. *Vit. Apoll.* 2.19, supposing that Indians may prefer black to white because their own color is dark; or pertaining to a particular case, e.g., *Martyrdom of Bartholomew*.

1045. White is associated positively with the spirit world in various traditional African societies (Mbiti, *Religions*, 73, 277; Isichei, *History*, 64).

1046. E.g., Spawforth, “Race.” This may be true even in a terrible case such as Appian *Bell. civ.* 4.17.134, where Roman soldiers hacked to death an unfortunate Ethiopian whom they chanced upon, supposing him a bad omen, but they probably would have done the same to an albino or anyone viewed as unusual by their standards. For “proto-racism,” see discussion in Isaac, “Proto-racism.”

1047. That Ethiopians were “black” and woolly-haired contrasted with Germans and Gauls being white-skinned and straight-haired (Ptolemy *Tetrab.* 4.10.203); cf. the contrast between Ethiopian and German complexions in *m. Neg.* 2:1 (with Israelites in between, cf. *m. Bek.* 7:6).

1048. E.g., Sen. *Y. Dial.* 5.27.3; Sext. *Emp. Eth.* 3.43; *Pyr.* 1.79–80; cf. Porph. *Isag.* 12.25–13.3. Cf., e.g., Cleopatra’s attendants as differing in complexion and hair types (Lucan *C.W.* 10.128–30).

Virgil [*Moretum*] “to the admiring (the dignified negroid head-vases of Attic Greek pottery, or the Mauretanian with skin ‘like Corinthian bronze’ of a Roman epitaph, *SEG* 40.397).”¹⁰⁴⁹ By contrast, Romans sometimes expressed distaste for the pallor and height of northern barbarians (Caesar *Gall. W.* 2.30.4; 4.1.9).¹⁰⁵⁰

(5) *Jewish Sources on Africa and Black Complexion*

Luke’s ideal audience would understand “Ethiopia” from the LXX if nowhere else; it normally rendered “Cushites” as “Ethiopians” and “Cush” as “Ethiopia” (forty-four times, though not for Cush himself, in Gen 10:6–7; 1 Chr 1:8–10).¹⁰⁵¹ Even had they heard nothing else about “Ethiopia” (which is quite unlikely), they would have known of Nubians from the LXX.

Jewish views varied. Since Greeks believed that Ethiopians and Egyptians started circumcision,¹⁰⁵² Jewish apologists claimed that these peoples learned it from Moses.¹⁰⁵³ Tharbis, the daughter of the Ethiopian king, fell in love with Moses (Jos. *Ant.* 2.252) when he was besieging Meroë as an Egyptian prince (2.249); she aided his conquest, and he married her (2.253; cf. Num 12:1). Josephus believed that the queen of Sheba was ruler of Egypt and Ethiopia (Jos. *Ant.* 8.159, 165, 175),¹⁰⁵⁴ a woman interested in philosophy, and otherwise praiseworthy (8.165). At times Ethiopia was among Israel’s many enemies (Jos. *Ant.* 8.292–94; 2 Chr 12:3; 14:9–13; 16:8), but the Nubian prince of Egypt, Tirhakah, was allied with Hezekiah (2 Kgs 19:9; Isa 37:9;¹⁰⁵⁵ cf. Jos. *Ant.* 10.17). Ethiopia could be linked with Gog and Magog (*Sib. Or.* 3.319–20; cf. Ezek 38:5), but all Gentiles would face eschatological judgment.

Rabbinic literature seems more ambiguous.¹⁰⁵⁶ Rabbis could tell of a wise African king who instructed Alexander the Great to avoid materialism (*Pesiq. Rab Kah.* 9:1). Later rabbis viewed unusually dark skin (by Judean standards), along with albino skin, as praiseworthy signs of God’s creative variety, explicitly distinct from disabilities,¹⁰⁵⁷

1049. Spawforth, “Race.” While acknowledging some early, positive views, Parsons, *Body*, 132, cites two texts as negative toward Ethiopians (Hdt. 1.134, merely citing others’ view about distant peoples more generally; Ps.-Arist. 812a12–13, about Egyptians and Ethiopians being cowardly). Other texts, however, aver the opposite (including about Egyptian courage).

1050. Spawforth, “Race.”

1051. For Cush as “Ethiopia” in Greek, see also Jos. *Ant.* 1.131. “Cush” might be related to the Egyptian and Ethiopian terms for the people; see Hansberry, *Africa*, 8–9. For Africans in the Bible, see, e.g., Adamo, “Africa”; Yamauchi, *Africa*; Hays, “Cushites.”

1052. Noted also in Jos. *Ag. Ap.* 1.169–70; for the Greek view, see Hdt. 2.104; Diod. Sic. 1.28, 55 (*OTP* 2:899 n. s). Egyptians apparently claimed that Ethiopians learned it from them (Jos. *Ant.* 8.262). Egyptian priests (and in this period, only the priests; see Lewis, *Life*, 92) were circumcised (P.Tebt. 293.11–22; Jos. *Ag. Ap.* 2.141) and had to have circumcision affidavits (Frankfurter, *Religion in Egypt*, 199n4).

1053. Artapanus in Euseb. *PE.* 9.27.10. For Egyptian ideas as borrowings from Jewish figures, see comment on Acts 17:19. But Josephus knows Herodotus’s claim that Syrians (Jews) obtained it from Egyptians (*Ag. Ap.* 1.169; cf. Hdt. 2.104; Diod. Sic. 1.28.3).

1054. For support, see Green, “Queen”; on Josephus’s treatment of this narrative, cf. also Begg, “Visit.” Origen and Jerome viewed her as a black African (Felder, *Waters*, 12–13; Snowden, *Blacks in Antiquity*, 202–3); Luke’s contemporaries viewed her as African (Jos. *Ant.* 8.159, 165, 175; *Liv. Pr.* 1.8/12 [Schermann, §24, p. 76, lines 13–14]; Scott, “Horizon,” 536n203); Twelfth Dynasty Egyptian sources are said to speak of a Saba as capital of Cush, i.e., as Meroë (Adamo, “Africa,” 139; cf. Jos. *Ant.* 2.249). Both Ethiopian and Arabic (Manson, *Sayings*, 91) traditions about her claim her for themselves; for further discussion, see Kitchen, *Reliability*, 116–20; Felder, *Waters*, 22–36; Hansberry, *Pillars*, 33–58; Adamo, “Africa,” 137–44; Sanders, “Biblical Perspective.” In any event, southern Arabia (the most frequent site reconstructed for historic Saba, or Sheba) overlapped ethnically with eastern Africa (cf. Rashidi, “Africans in Civilizations,” 22–29; though not so much Nubia; cf. Felder, *Race*, 16).

1055. On Tirhakah, see Yamauchi, *Africa*, 125–37; Kitchen, *Orient*, 82–84; idem, *Reliability*, 16; Bright, *History*, 299–306.

1056. Positively, later rabbis claimed that God blessed the descendants of Heth with the good land, Africa, for honoring Abraham (*Mek. Pisha* 18.8–11). Negatively, they associated drunkenness especially with Ethiopia (*b. Qidd.* 49b; like magic with Egypt).

1057. *T. Ber.* 6:3; *b. Ber.* 58b; *y. Ber.* 9:1, §16.

but such characteristics also disqualified from the priesthood as blemishes (*m. Bek.* 7:6). An apparently Tannaitic tradition also claimed that Ham was punished (for having intercourse on the sacred ark) with black skin (*b. Sanh.* 108b, bar.; *y. Ta'an.* 1:6, §8), though this idea may resemble Greco-Roman conceptions of Ethiopians' "burnt" skin. But its date and narrower audience make rabbinic literature less relevant to understanding how Luke's ideal audience would have heard this passage.

III. THE OFFICIAL'S JEWISH STATUS (8:27)

No one can dispute that this official was a devout fearer of Israel's God; the question is his official status as Jew or Gentile. The issue of whether this African official was a full convert to Judaism offers a major interpretive crux in the narrative; if he was not a full convert to Judaism, he represents the first Gentile convert to the Jesus movement.

(1) *Worshipping God*

The African official had come to Jerusalem to worship.¹⁰⁵⁸ Perhaps some of Luke's first audience would have thought of the legendary piety that Greeks sometimes attributed to Ethiopians (*Hom. Il.* 23.206–7; *Diod. Sic.* 3.2.4),¹⁰⁵⁹ believing that they merited visits from and banquets with the gods (*Hom. Il.* 1.423).¹⁰⁶⁰ In a later novel, "Queen Kandake of Meroë" (whom the author identifies with Semiramis) tells Alexander the Great not to "think the worse of us for the color of our skin. We are purer in soul than the whitest of your people" (*Ps.-Callisth. Alex.* 3.18).

Some ancient writers claimed that all Africans (including Ethiopians), Indians, and Arabians worshiped only one god, the horned Amun, whom they identified with Jupiter (*Lucan C.W.* 9.511–21).¹⁰⁶¹ Although Ammon was probably an important deity in Meroë,¹⁰⁶² Ethiopians undoubtedly worshiped many gods (*Diod. Sic.* 3.6.1).¹⁰⁶³ Meroë did indeed boast a huge temple to the Egyptian god Amun; it was 450 feet (137 m.) long.¹⁰⁶⁴ Outside Meroë was "a so-called Temple of the Sun" approached by a route used for religious processions.¹⁰⁶⁵ One of the temples along this route held a statue of Augustus, though apparently as plunder from Aswan in 23 B.C.E.¹⁰⁶⁶

Meroë was too far from Jerusalem, however, for the official to be merely a tourist there; this official came to worship God and, having an Isaiah scroll (8:28), must have

1058. Bruce, *Acts*¹, 191, notes that προσκυνήσων is a future participle "indicating purpose, rare in NT outside Lk.-Ac."; for this verb, the only other future participle is in Acts 24:11, describing the purpose of Paul's visit to Jerusalem (cf. the idea, expressed differently, in 7:7).

1059. Note also the description of the people as ἀμύμονας, "blameless," in *Hom. Il.* 1.423; it was also widely held that Ethiopians possessed great longevity (*Sen. Y. Dial.* 5.20.2).

1060. Also *Sil. It.* 12.605–6; *Statius Theb.* 5.427–28; *Lucian Prom.* 17; *Sacr.* 2; *Indictment 2*; *Patriot* 4. Cf. visits from Poseidon in *Hom. Od.* 1.22; 5.282. Poseidon had a daughter in Ethiopia and hence was very involved locally (*Apollod. Bib.* 3.15.4).

1061. Stories of Alexander's visit to the Libyan temple of Ammon had made this god common knowledge. *Orig. Cels.* 5.34, 37, 38 claims that those in Meroë worship only Jupiter and Bacchus.

1062. Nero's expedition claimed a major temple of Ammon (*Hammonis*) in Meroë proper and many shrines for Ammon throughout the surrounding area (*Pliny E. N.H.* 6.35.186). Less reliably, Ethiopians were said to live to the east and west of the Libyan oracle (*Quint. Curt.* 4.7.18–19).

1063. Some ancients thought that they worshiped Day (an Epicurean in *Lucian Z. Rants* 42, also thinking that Persians worshiped fire, and Egyptians water), probably on the basis of the prominence of sun worship or (more likely) their association with the dawn in Greek myth. In *Philost. Vit. Apoll.* 6.4, they worship Helios (the sun), Dawn, and Memnon. In *Strabo* 17.2.3, they worship Heracles, Pan, Isis, and "some other, barbaric god"—a nameless god.

1064. O'Connor, "Meroë," 472; Lohwasser, "Meroë," 717. Pyramid tombs of early rulers (O'Connor, "Meroë," 473) also suggest Egyptian connections.

1065. O'Connor, "Meroë," 472; cf. Lohwasser, "Meroë," 717 (on Temple M 250). On worship of the sun elsewhere in antiquity, see, e.g., Carbó García, "Sol Invictus"; sources in Keener, *Acts*, 1:919n630.

1066. O'Connor, "Meroë," 473. By contrast, we know little about pre-Christian Axumite religion (Heldman, "Axum," 240).

been committed to the Jewish faith. How he heard of the Jewish faith is not easy to answer. There had been Semitic-speaking Jews in Elephantine, near Aswan, at least as early as the fifth century B.C.E. (cf. also Jer 44:1), and at least some in Ethiopia as well.¹⁰⁶⁷ (The legend that the royal house of Ethiopia descended from King Solomon's son through the queen of Sheba¹⁰⁶⁸ is attested too late to be plausible;¹⁰⁶⁹ some Jewish influence in this period is not implausible, although, if it was significant, one wonders why Josephus and Philo would not mention it.) Trade in Alexandria certainly could have brought him into contact with the Jewish community (and further trade there would have made a detour to Jerusalem comparatively short).

(2) *Proselyte or God-Fearer?*

Was the official a full proselyte (see comment on Acts 6:5) or only a God-fearer (see comment on Acts 10:2)? Some scholars doubt that Luke portrays him as a Gentile God-fearer;¹⁰⁷⁰ they protest the tension this would create with Cornelius's conversion. But as argued in this section's introduction, this official's conversion is a private event unknown or relatively unknown to the church in Jerusalem, in contrast to the later matter, which was debated by the Jerusalem church (Acts 11:3–18).¹⁰⁷¹ Others object that only a full proselyte would likely have an Isaiah scroll.¹⁰⁷² But since God-fearers attended synagogues, where Torah (often the LXX) was read, possession of such a scroll would signify not one's circumcised status but one's wealth. Could not wealth secure an Isaiah scroll in Alexandria or Jerusalem? (And would not one who took time and expense for the journey be more likely to purchase a scroll regardless of his precise convert status?) The official is not a nonproselyte because of lack of full commitment, like most God-fearers; he simply was not able to become a full convert by virtue of his being a eunuch (Deut 23:1).¹⁰⁷³ Further, special arrangements were sometimes made for both converts and God-fearers of high status, as may be seen from discussions surrounding the conversion of the royal house of Adiabene (e.g., *Jos. Ant.* 20.41).¹⁰⁷⁴

To some degree, the debate may be semantic; the official was Jewish in his faith and may have seen himself as faithful to Judaism; certainly his fellow Nubians would have viewed his Jewish religious commitment as notable.¹⁰⁷⁵ But while he was more "Jewish" than Cornelius (cf., e.g., Acts 8:28 with 10:25),¹⁰⁷⁶ befitting the progression

1067. See, e.g., Youngblood, "Ethiopia," 196. Isaac, "Identity," defends connections from the First Temple period.

1068. Although the *Kebra Nagast* dates to the fourteenth century C.E., versions in various languages attest that its contents are older (Reeves, "Eunuch," 116–17, citing Pritchard, *Solomon*).

1069. The legend of a Solomonic royal house in Abyssinia is apparently a later cultural apologetic (Irvin and Sunquist, *Earliest Christianity*, 474).

1070. E.g., Haenchen, *Acts*, 310; Boismard and Lamouille, *Actes*, 2:58–59; Simon, *Stephen and Hellenists*, 32; Jervell, *Apostelgeschichte*, 270–71.

1071. See Tannehill, *Acts*, 110; Spencer, *Philip*, 186–87.

1072. Haenchen, *Acts*, 310; Soards, *Speeches*, 205n45 (noting personal conversation with R. E. Brown); Le Cornu, *Acts*, 420 (though [416] she takes him as a literal eunuch).

1073. Exceptions to normal rules in that context (Deut 23:3) were made for Ruth, but the explanation was that she was a Moabitess rather than a Moabite (*m. Yebam.* 8:3; *Sipre Deut.* 249.1.1–2; *Pesiq. Rab.* 49:2). It should go without saying that Jews did not castrate their own children.

1074. On this conversion see, e.g., Schiffman, "House of Adiabene" (Josephus may have used the account to show Jews' acceptance of Gentiles); Neusner, "Conversion." Probably Ethiopians, like Libyans, were also treated under the more lenient proselyte laws for Egyptians (*y. Sabb.* 5:1, §2).

1075. I am grateful to Robert M. Johnston and Keith Burton for dialogue on this point.

1076. The Cornelius story, however, moves beyond this one sufficiently by virtue of being the church's official account and hence the one involving the conversion of the church's perspective. Some compare Peter's greater reticence with Cornelius, overcome only by a vision and a word from the Spirit, but two factors should be kept in mind: first, Luke portrays Philip, as a conspicuous example of the bicultural Hellenists, crossing

of events in Acts, he was also a step beyond the Samaritans, the account of whose conversion preceded his. For reasons noted below, the guardians of temple Judaism, following the letter of the Torah, could not have admitted him past the Court of the Gentiles.¹⁰⁷⁷ And as noted below, interested Gentiles often visited the temple but could not proceed even to the Court of Women.¹⁰⁷⁸

If the official is a full proselyte, the present narrative does not advance very much the depiction of the promised universal mission (1:8) beyond the Samaritan mission (8:5–25);¹⁰⁷⁹ proselytes had already joined the church in 2:10 and even achieved leadership positions in 6:5. Nubia was not represented among hearers at Pentecost, but other parts of Africa were (2:10). If the official was a genuine eunuch, however, he was not a full proselyte, a point we must explore before returning to the question of his status with respect to Judaism.

(3) A Genuine Eunuch?

Part of the debate concerns the sense of “eunuch”; if it means merely “high official” rather than “castrated man,” then the man could indeed be a full proselyte.¹⁰⁸⁰ Frequently the LXX uses εὐνοῦχος to mean “official,” though never for anyone who is clearly able to produce children.¹⁰⁸¹ But in other texts the term may indicate (as normally in Greek) “eunuchs,” especially where (as here) foreigners are involved¹⁰⁸² or (as here) they are working in relation to royal women;¹⁰⁸³ the Jewish Greek texts closer to Luke’s time also prefer this usage (Wis 3:14; Sir 20:4; 30:20), and some texts, in a manner similar to the one here in Acts, depict divine reversal of the marginalization inherent in the position (Isa 56:3–4; Wis 3:14). “Eunuchs” could also be slaves not only of kings¹⁰⁸⁴ but of people who did not belong to the royal household (e.g., Jos. *Life* 429).

The arguments in favor of this man’s being a eunuch (and hence merely a God-fearer) are stronger than those favoring his being a full proselyte. First, Luke has already mentioned a proselyte in 6:5; if this narrative does not move further toward

barriers ahead of the apostles (with a Gentile as with the Samaritans); second, Philip is sent by an angel and also hears from the Spirit.

1077. This is not to suggest that anyone was checking whether anyone entering the temple was a eunuch but merely to suggest how Luke’s ideal audience, knowing the LXX, would view him vis-à-vis the Pentateuch. Of course, this audience also knew Isa 56, where eunuchs and foreigners could transcend the pentateuchal prohibition; but that text concerns what would be viewed as an eschatological restoration rather than the current Levitical norm, and appeal to that text reinforces the point that this eunuch is *also* a foreigner. Although Philo seems to have been more lenient (QE 2.2, cited by Watson, *Gentiles*, 75–76), the potential exception for Izates (Jos. *Ant.* 20.38–44) concerns a king, not normal practice, and Philo’s approach contradicts a more literal reading of Scripture.

1078. See discussion of the barriers at Acts 21:28; the barriers, warning signs, and even the narrative in Acts 21 make little sense if God-fearing Gentiles did not visit (and experience restriction to the [massive] outer court). On ancient tourism, see, e.g., Weeber, “Travels,” 876–77.

1079. Pace Bruce, *Commentary*, 190 (who thinks that this narrative advances the depiction of the mission either way). It would advance it geographically but not with regard to the broader mission to the Gentiles.

1080. E.g., Larkin, *Acts*, 133.

1081. For texts where it may refer to officials, see LXX Gen 39:1; 40:2, 7; 1 Sam 8:15; 1 Kgs 22:9; 2 Kgs 8:6; 9:32; 20:18; 23:11; 24:12, 15, 19; 2 Chr 18:8; Jer 36:2 (29:2 MT); 48:16 (41:16); 52:25. Cf. *Jub.* 34:11; 39:2, 14. Some later interpreters understood Potiphar as divinely castrated (*Tg. Ps.-J.* on Gen 39:1).

1082. With foreign influences (2 Kgs 9:32; 23:11); associated with foreigners (as a parallel marginal group, Isa 56:3–4); in a foreign land (perhaps 2 Kgs 20:18); or, as here, when the eunuch is a foreigner, often including foreign officials (Esth 1:10; 2:21, 23; 6:2, 14; 7:9; 12:1, 3, 6 LXX; perhaps, but not necessarily, Gen 39:1; 40:2, 7).

1083. Esth 1:12, 15; 2:3, 14–15; 4:4–5; cf. Jdt 12:11; just possibly Jer 29:2.

1084. For kings, e.g., *Mart. Is.* 3:11; Jos. *Ant.* 6.41; 8.403–4; including Herod’s household, 16.230; 17.44; *War* 1.488, 511; for Cleopatra, Paus. 1.9.2; for the emperor’s son’s household, Tac. *Ann.* 4.8, 10. For wealthy houses, *Test. Jos.* 12:1; 16:2–6.

the Gentile mission than that incident, it probably would not merit so much space in Luke's narrative. Luke knows how to speak of "proselytes"; that he does not do so here suggests that he does not intend a proselyte.

Second, many of the texts that describe eunuchs as officials refer to literal eunuchs; the eunuch who ruled for the young Ptolemy in Caesar *C.W.* 3.108 was likely a literal one, entrusted as the boy's tutor;¹⁰⁸⁵ some ancients felt that eunuchs were the most highly trusted members of the Persian court because they lacked children and "family ties" to compete with their allegiance to the king (Helioid. *Eth.* 8.17).¹⁰⁸⁶ The use of castrated men in royal service continued in that region until relatively recent times.¹⁰⁸⁷

Third, the lexical evidence does not unambiguously favor the term meaning *only* "official," often even when it includes officials. The Hebrew *saris* was originally a court title, but by late Hebrew (and even by Isa 56:3–5), it was "purely physiological."¹⁰⁸⁸ Sometimes in the LXX the term clearly indicates castrated persons (Isa 56:3–4; Jdt 12:11; Wis 3:14; Sir 20:4), especially the Persian officials who might come in contact with the king's harem (Esth 1:10, 12, 15; 2:3, 14, 15, 21, 23; 4:4, 5; 6:2, 14; 7:9).¹⁰⁸⁹ Despite some circles of eunuchs around other rulers, eunuchs did not hold an official office by virtue of their eunuch state outside Persia (and even there were genuinely castrated).¹⁰⁹⁰ The only other NT use suggests castration (Matt 19:12). Whereas the LXX sometimes changes "eunuch" to "official" (Jer 41:19 [34:19 MT], δυνάστης), here the man is called a "eunuch" in addition to being called an official (δυνάστης, in the NT only here and Luke 1:52; 1 Tim 6:15), which would surely be redundant if not understood in the more common sense by this period.

Fourth, Luke identifies him as an official once but as a eunuch five times (four times after this verse; Acts 8:27, 34, 36, 38, 39).¹⁰⁹¹ It is clear where he places emphasis in terms of the man's identity for his purposes in the narrative. How else could Luke have made the claim any clearer?

Fifth and probably most important, this official is a servant of the queen, who handled the kingdom's secular affairs but was also married to a king (see comments below). Outside the empire, many kings desired officials relating to queens or harems to be eunuchs (Philost. *Vit. soph.* 2.12.593);¹⁰⁹² Luke's audience would probably be familiar with this pattern at least with regard to reports about the East (where even many of the king's attendants unrelated to the harem were eunuchs).

One could suggest that the eunuch was born in the Jewish faith before being castrated, but as Judaism (unlike pagan worship) is not attested in Meroë in this period,¹⁰⁹³

1085. Cf. Polyb. 28.21.1 (a eunuch so close to the king that he persuaded him to surrender his kingdom).

1086. Persians used eunuchs as treasurers (Conzelmann, *Acts*, 68, citing Plut. *Demetr.* 25.900); other castrated males also held high positions in Eastern courts (Johnson, *Acts*, 155, citing Hdt. 8.105; Philost. *Vit. Apoll.* 1.33–36; Kee, *Every Nation*, 110, 319n31, citing Diod. Sic. 11.69.1; 17.5.3). Persia had apparently long used eunuchs (Plut. *Mal. Hdt.* 13, *Mor.* 857BC), and those sent to Persia as captives or tribute were sometimes made eunuchs (Jos. *Ant.* 10.33, 186; see Guyot, "Eunuchs," 172); thus *y. Šabb.* 6:9, §3, assumes that Daniel's three friends, as officials, were eunuchs but claims they were healed in the furnace (Dan 3:25).

1087. Bruce, *Acts*³, 225; Gordon, *Slavery*, 92–93.

1088. Barrett, *Acts*, 424–25.

1089. Jos. *Ant.* 11.191, 200–201, 223–24, 227–28, 260–61, 266. For eunuchs as Queen Jezebel's servants, see Jos. *Ant.* 9.122; for Mariamne's, 15.226; some of Cleopatra's attendants, Lucan *C.W.* 10.133–34; for a slave guarding his Roman mistress, Ovid *Am.* 2.3. When this was applied to human guardians of a female goddess statue, some protested (Heraclitus *Ep.* 9).

1090. Guyot, "Eunuchs," 173.

1091. See Spencer, *Philip*, 166–67; idem, *Acts*, 93; Dollar, *Exploration*, 147; D. Williams, *Acts*, 161; cf. Klauck, *Magic*, 25 (cf. also Reeves, "Eunuch," 117–18, although he paradoxically thinks the eunuch to be Jewish!).

1092. See, e.g., Dunn, *Acts*, 114; Spencer, *Philip*, 166–67; idem, *Acts*, 93; Witherington, *Acts*, 296.

1093. One scholar has suggested to me that the eunuch was born a Jew, before being eunuched (despite Deut 23:1), on the basis of the tradition of long-standing Judaism in Ethiopia. He noted that the character of

it is far likelier that he encountered it in Egypt, where it is well attested. Moreover, even being born a Jew would not readily overcome his eunuch status for guardians of the temple.¹⁰⁹⁴ Thus most scholars conclude, as I do, that this official was in fact castrated,¹⁰⁹⁵ and most thus view him as an uncircumcised God-fearer.¹⁰⁹⁶

(4) *Castration and Status*

Although an official who was castrated clearly fell into a different and more honorable category than, for example, the Galli who mutilated themselves in honor of the Anatolian mother goddess Cybele,¹⁰⁹⁷ castration was normally not an honorable state.¹⁰⁹⁸ (People regularly ridiculed the Galli,¹⁰⁹⁹ especially with regard to their self-castration.¹¹⁰⁰ They were counted effeminate,¹¹⁰¹ a characteristic that most Mediterranean men viewed negatively for men.) In earlier times rulers could use castration to punish particular sexual crimes.¹¹⁰² Most of humanity was said to despise eunuchs,¹¹⁰³ although Cyrus of Persia allegedly thought otherwise, comparing their usefulness to that of gelded animals.¹¹⁰⁴

A eunuch was reckoned such a bad omen that a superstitious person seeing one might retrace his steps and restart his day to evade the bad luck.¹¹⁰⁵ When one king

Ethiopia's Jewish heritage is neither Pharisaic nor Essene, which suggests that it preexisted the divisions between the Pharisees and Essenes. But Josephus shows that these sects together constituted less than 1 percent of even Palestinian Judaism, and so, even after their divisions (but outside the reach of later rabbinic influence), we need not expect their features; we also know of large numbers of Jewish converts in other regions, including Arabia, before the spread of Islam yet after this eunuch. In any case, while scholars debate the precise degree of antiquity for the traditions behind the medieval *Kebrä Nagast*, their "Ethiopia" is not this official's Meroë, where pagan temples have been unearthed.

1094. In the few texts that address the issue, even a Jew by birth who was born with crushed testicles was considered excluded from the covenant (*Sipre Deut.* 247.1.1–2; *y. Šabb.* 19:3, §3; cf. *Matt* 19:12).

1095. E.g., Johnson, *Acts*, 155; Spencer, *Acts*, 93; idem, *Philip*, 166–72, esp. 172; Conzelmann, *Acts*, 68; Polhill, *Acts*, 224; Barrett, *Acts*, 425; Witherington, *Acts*, 296; Dollar, *Exploration*, 147; Gaventa, *Acts*, 143; Parsons, *Body*, 133–34; idem, *Acts*, 119–20; Peterson, *Acts*, 293.

1096. E.g. (besides sources just cited), Hort, *Judaistic Christianity*, 54; Lenski, *Acts*, 337; Arrington, *Acts*, 91; Kisau, "Acts," 1314; Bock, *Acts*, 347; Talbert, *Acts*, 76; Chance, *Acts*, 136; Schmidt, "Bekehrung"; Arnold, "Acts," 286; Green, "Acts," 747.

1097. On their self-castration, see, e.g., Ovid *Fasti* 4.237–44; Epict. *Diatr.* 2.20.17; Pliny E. *N.H.* 11.109.261; cf. Val. Flacc. 7.635–36; *Rhet. Her.* 4.59.62; *Gr. Anth.* 6.220; Gasparro, *Soteriology*, 26–28, 53; for religious castration more generally, see Nock, *Essays*, 7–15. Romans "romanized" the cult of Cybele, not using a eunuch for *archigallus* (Nock, "Developments," 499). Some think that bull testicles were offered for those who did not want to castrate themselves (Koester, *Introduction*, 1:193). Their state was also associated with Attis in *Catull. Carm.* 63.5, 12, 34.

1098. For the stigma, see, e.g., Dio Chrys. *Or.* 33.39; Spencer, *Philip*, 166–72; Guyot, "Eunuchs," 173; Parsons, *Body*, 134–36; idem, *Acts*, 120. It was a disadvantage but not a merited one (Phaedrus 3.11.6–7). Cf. their earlier exclusion from the priesthood in Assyria in Carpenter, "Deuteronomy," 498.

1099. E.g., Sen. *Y. Ep. Lucil.* 108.7; Mart. *Epig.* 7.95.15; Lucian *Alex.* 13. On the Galli, see further briefly Heinze, "Galli"; e.g., Ovid *Fasti* 4.361–64; Babr. 141.1–2; Hdn. 1.11.2. Some of them may have turned to homoerotic pleasure (cf. Lucian *Lucius* 35–41, though this is satire; also Taylor, "Subcultures," but subsuming them all too readily in the category of gay). Their begging (e.g., Phaedrus 4.1.4–5) sometimes brought them into competition with Cynics (Diogenes *Ep.* 11).

1100. E.g., Sen. *Y. Dial.* 7.26.8; *Juv. Sat.* 2.110–16 (cf. 6.514–16); Lucian *Syr. G.* 51; cf. Lucret. *Nat.* 2.614–15; Hor. *Sat.* 1.2.120–21 (where it is probably implied); Mart. *Epig.* 1.35.15; 3.24.13; 3.91; 9.2; 13.64. Nevertheless, in Strabo's time, the temple of Artemis still had virgins and eunuchs as priests (Strabo 14.1.23; on vestal virgins, see comment on Acts 21:9); in contrast to the Galli, such priests were respectable.

1101. E.g., *Iambl. Myst.* 3.10; *Catull. Carm.* 63.6, 27; on their being viewed as half-male and half-female, see Vermaseren, *Cybele*, 96–101; cf. Parsons, *Body*, 134–35. Constructing a cultural relativism, Sext. *Emp. Pyr.* 3.217 contends that the goddess approves their effeminacy. Hester Amador, "Queers," argues that ancient heterosexist norms informed critiques of eunuchs.

1102. "The Middle Assyrian Laws," tablet A, 20 (ANET 181).

1103. Xen. *Cyr.* 7.5.61.

1104. Xen. *Cyr.* 7.5.62.

1105. Lucian *Critic* 17.

castrated another ruler's son out of jealousy,¹¹⁰⁶ the young man would certainly have wanted vengeance.¹¹⁰⁷ Julius Caesar counted castration worse than death, a loss of manhood (*Alex. W.* 1.70).¹¹⁰⁸ The younger Seneca mocked the effeminacy of an official publicly escorted by two eunuchs.¹¹⁰⁹ The elder Seneca complained about some perverted rich men who had castrated youths to entertain their lusts; they want as “few men to exist as possible” (*Controv.* 10.4.17 [LCL, 2:441]).¹¹¹⁰ Later emperors made such castration of slaves illegal, with serious penalties attached for violations.¹¹¹¹ Some philosophers regarded those who castrated others as committing a crime against nature.¹¹¹²

Calling a man a “eunuch” was an insult against his manhood (cf. Gal 5:12), indicating, for example, that he would be easily beaten in battle.¹¹¹³ Castration was thought to remove a man's status as a male,¹¹¹⁴ and eunuchs were considered neither men nor boys (nor, for that matter, women);¹¹¹⁵ one lacking some male traits might be subject to ridicule as a eunuch.¹¹¹⁶ Eunuchs (at least those made so before puberty) tended to have shriller voices and other effeminate characteristics;¹¹¹⁷ Mediterranean men tended to look down on effeminacy as a vice among other adult men.¹¹¹⁸ (Given the status tensions, not everyone would have appreciated Luke's portraying this man as a protagonist in his narrative.)¹¹¹⁹ Others considered eunuchs lacking in self-control (Dio Chrys. *Or.* 4.35); desperate to prove their virility, they would (so Dio claimed) lie with women, albeit unproductively (4.36).¹¹²⁰

1106. From jealousy because his concubine had praised the other's appearance (Xen. *Cyr.* 5.2.28).

1107. Xen. *Cyr.* 5.2.29; 5.3.8. On wanting vengeance, see also Philost. *Vit. soph.* 2.4.569.

1108. Some rabbis also considered it worse than death (*y. Šabb.* 19:3, §3); it functions as a judgment in Jos. *Ant.* 10.33 (cf. 10.186).

1109. Sen. *Y. Ep. Lucil.* 114.6.

1110. On dealers who catered to this segment of the slave market, using especially depilatories but also castration, see Bradley, *Slaves*, 115 (and his citations in Mart. *Epig.* 9.6; Juv. *Sat.* 6.373). Cf. sexually used eunuchs in Herod's household in Jos. *Ant.* 16.230–31; 17.44; *War* 1.488. Greeks adopted from Persians the use of eunuchs as luxury slaves in an early period (Guyot, “Eunuchs,” 172–73). Alexander reportedly loved a eunuch boy, though some Persians seem to have ridiculed the sexual use of eunuchs (Quint. Curt. 6.5.23; 10.1.25; 10.2.26–27, 29).

1111. Robinson, *Criminal Law*, 51–53 (Domitian and especially Hadrian). Bosworth, “Vespasian,” thinks that Vespasian, however, participated in this trade (using Suet. *Vesp.* 4.3, which might be interpreted otherwise). Domitian apparently had a favorite eunuch (Henriksen, “Earinus”).

1112. Heraclitus *Ep.* 9. Josephus charged that one who castrated himself was already effeminate in soul (*Ant.* 4.291).

1113. Virg. *Aen.* 12.99, *semiviri* (“half-man”); Statius *Ach.* 2.78.

1114. E.g., Lucan *C.W.* 10.133–34; Epict. *Diatr.* 3.1.31. On the half-male, half-female status of the Galli, see Vermaseren, *Cybele*, 96–101.

1115. E.g., Philost. *Vit. soph.* 2.4.569; not a man in Babr. 54.4; ambiguous status in Libanius *Speech in Character* 26.3.

1116. Philost. *Vit. soph.* 1.25.541. Cf. the female equivalent for women who failed to reach puberty (cf. Lev, “Aylonit”).

1117. Dio Chrys. 62.6; Lucian *Eunuch* 9 (beardlessness); Jos. *Ant.* 4.290; Guyot, “Eunuchs,” 173; Le Cornu, *Acts*, 416 (noting lack of beards, etc., in *b. Yebam.* 80b); they might calm down yet remain hard workers (Xen. *Cyr.* 7.5.62). Castrated animals grew heavier and gentler (Lucian *Lucius* 33; Galen *De semine*; cf., in persons, perhaps Pers. *Sat.* 5.185–89); castration in a younger animal produces a “larger adult with more female characteristics” (Schneider, “Castration,” 1188, citing Arist. *Hist. An.* 545a; 590a; 631b–632a; etc.). Philost. *Hrk.* 8.12 describes such animals as “eunuchs.”

1118. E.g., Cic. *Phil.* 3.5.12; Val. Max. 9.1.ext. 7; Sen. E. *Controv.* 1.pref. 8–10; 2.pref. 1; Sen. *Y. Ep. Lucil.* 114.3; Mus. Ruf. 1, p. 34.8–10; 11, p. 84.4–6; Plut. *Themist.* 6.1; Cic. 7.5; Dio Chrys. *Or.* 3.56; 77/78.36–37; Suet. *Aug.* 68; Lucian *Lucius* 36–37; *Ship* 27; *Peregr.* 19; *Posts* 33; *Tim.* 28; *Dem.* 12, 15, 18, 50; *Nigr.* 18; *Cynic* 17; Philost. *Vit. Apoll.* 1.19; 4.21, 27; *Ep. Apoll.* 63; Jos. *Ant.* 19.29–31, 53.

1119. Gaventa, “Daughters,” 57, suggests that, given the bias against eunuchs “in a world that worried very much about preserving the male from any hint of effeminacy,” Luke's focus on him would not reinforce the ideology of masculinity.

1120. Whether a eunuch lying with a married woman constituted adultery was a cause for debate (Hermog. *Issues* 60.20–61.1), but castration clearly did not eliminate desire (Epict. *Diatr.* 2.20.19; Libanius *Speech in Character* 26.1–2).

One of Lucian's essays illustrates the savage treatment a eunuch might receive from opponents, particularly because of his gender-ambiguous status. A speaker opposing a particular eunuch's receiving an academic position contended "that a eunuch was neither man nor woman but something composite, hybrid, and monstrous, alien to human nature" (*Eunuch* 6).¹¹²¹ The other replied that eunuchs ought not be excluded from philosophy, "in which even women had a part" (*Eunuch* 7). Debate ensued as to whether eunuchs ought to be allowed to oversee boys (*Eunuch* 8), to which the eunuch replied that eunuchs would be less likely to incur blame than others, certainly less than Socrates (*Eunuch* 9). Then one claimed that the eunuch was really a man who had started pretending to be a eunuch to escape an adultery charge (*Eunuch* 10), whereupon some joked that he should be made to lie with a woman while the eldest judge should observe to determine whether he was a eunuch (*Eunuch* 12).

Even high-ranking officials suffered a stigma for this condition.¹¹²² Although eunuchs seem to have achieved increasing acceptability and prominence from the second to the fourth centuries C.E.,¹¹²³ achieving significant positions of influence in the imperial court, this state remained dishonorable even in the late empire.¹¹²⁴

Whereas Gentiles might honor a high official who was castrated (without respecting his castrated state), ancient Israelite law made no distinction among reasons for castration. Despite Isaiah's promise for the future (Isa 56:3–5), in the present eunuchs were marginalized in the Israelite cult (Deut 23:2).¹¹²⁵ Some foreigners who were not fully Jewish discovered, on their arrival in Jerusalem, that they could not enter the temple or eat of sacrifices they had sponsored.¹¹²⁶ Because eunuchs could not become full proselytes, they were always outsiders, though some accommodations were presumably made for a person of prominence.¹¹²⁷ A high official who was also castrated thus experienced serious status inconsistency.¹¹²⁸ What provided advancement in Meroë prevented full assimilation in Judaism.¹¹²⁹ By emphasizing that the official is a "eunuch" (unnamed but five times called by this title), Luke highlights his marginal status in Judaism and hence the crossing of a new barrier in Acts.¹¹³⁰

IV. THE OFFICIAL'S SOCIOECONOMIC STATUS (8:27)

Luke often reports on prominent persons, since they are key models in a socially top-down culture. Although the official has status inconsistency with regard to Judaism (economically high but less positive as a eunuch), in terms of his socioeconomic status within his own ancient and respected nation, he is one of the most prominent individuals Luke reports. The official is a treasurer, and not merely of any kingdom or ruler but of the powerful Candace of Meroë.

1121. LCL, 5:337.

1122. Spencer, *Philip*, 167–68 (citing Hdt. 8.104–6; Lucian *Eunuch* 6).

1123. Stevenson, "Rise of Eunuchs."

1124. See Hunt, "Eunuchs."

1125. Cf. Jos. *Ant.* 4.290–91; Philo *Spec. Laws* 1.325; *m. Yebam.* 8:2; 1QSa II, 5–6; 4QMMT B 39–44. Some Jews considered castration worse than death (*y. Šabb.* 19:3, §3; *Yebam.* 8:1, §11); castration was one of the worst possible crimes (*Gen. Rab.* 34:8); one who eunuched himself was counted as if he had murdered his own children (Jos. *Ant.* 4.290). The piercing of a single testicle or cutting off the penis would exclude one from the congregation (*Sipre Deut.* 247.1.1–2).

1126. Talbert, *Acts*, 76, rightly cites Jos. *Ant.* 3.318–19; *War* 6.426–27. Luke himself testifies to hostility toward foreigners' entrance (Acts 21:28–29; Chance, *Acts*, 136).

1127. For one prominent (but converting) foreigner's temple visit, see Jos. *Ant.* 20.49. The rabbis did allow some privileges for any eunuch (Le Cornu, *Acts*, 416, cites *m. Yebam.* 8:4–6).

1128. On status consistency, see, e.g., Lenski, "Status Crystallization."

1129. See Spencer, *Acts*, 93; idem, *Philip*, 168–69.

1130. Luke also challenges the prejudice against eunuchs (with Parsons, *Body*, 141), which is linked with anti-Gentile prejudice in Isa 56:3–8.

(1) *A Meroitic Treasurer*

Greeks probably envisioned Ethiopia sometimes on the analogy of another great empire they knew outside the Mediterranean world—namely, Persia. They believed that Persian rulers sometimes employed eunuchs as treasurers.¹¹³¹ The keeper of a Persian king's treasure might well be supposed to know what went on in the king's court.¹¹³² The position also required great trust; some treasurers exploited their position to personal advantage.¹¹³³ (Presumably, since this treasurer was permitted to undertake such a long journey away from his work, he was trusted and favored [cf. Neh 2:6–8].)

To supervise the queen's wealth was no small matter, given the famous wealth of Meroë.¹¹³⁴ (This is all the more the case if Luke links the Candace with the queen of Sheba; see 1 Kgs 10:1–2, 10.) Although Meroë historically had relied on livestock both “for subsistence and trade,”¹¹³⁵ Meroë by this period also had a well-known “iron-smelting industry.”¹¹³⁶ Trade, however, offered special abundance (leaving little surprise that a royal treasurer would be able to speak Greek with Philip). Although plunderers ravaged much of Meroë's wealth over the centuries, excavators have found many expensive imports as well as hoards of gold jewelry.¹¹³⁷ As the link between the Mediterranean world and Egypt, on the one hand, and the wealth of Africa's interior, on the other, Meroë was strategically positioned for trade.¹¹³⁸

Meroë's artwork reveals its position among various cultures; it betrays “an eclectic mixture of pharaonic Egyptian, Greco-Roman and non-Egyptian African elements.”¹¹³⁹ Before Meroë became a kingdom, earlier Nubian empires in the region existed. Nubian civilization stretches back to perhaps before 3000 B.C.E.,¹¹⁴⁰ and Nubian kings sometimes ruled Egypt (and vice-versa), among them the OT king Tirhakah.¹¹⁴¹ Greeks apparently had widespread contacts with Africa south of Egypt as far back as the Minoan period.¹¹⁴²

Such contacts with the northern Mediterranean world were even more prominent in the Roman imperial period.¹¹⁴³ Meroë was never isolated. Ancient Egypt continued

1131. Plut. *Demetr.* 25.5 (cited in Lake and Cadbury, *Commentary*, 96; Conzelmann, *Acts*, 68).

1132. Corn. Nep. 14 (Datames), 5.3.

1133. E.g., Aeschines *Tim.* 56; see further comment on Acts 6:3.

1134. With also Smith, “Understand,” 64. On Cush's economy (including in the Meroitic period), see esp. Welsby, *Kingdom of Kush*, 153–76. Among legendary portraits, Ethiopians valued gold less than Mediterranean peoples valued lead (Hdt. 3.23; Dio Chrys. *Or.* 79.3).

1135. Gifford-Gonzalez, “Pastoralism,” 199.

1136. Childs and Herbert, “Metallurgy,” 280 (noting its existence from perhaps the third century B.C.E., and the use of copper as early as ca. 3000 B.C.E.). Because of hard rock, miners dug shafts, into which they then descended to procure ore, raising it in baskets (283).

1137. O'Connor, “Meroë,” 473.

1138. See Adam with Vercoutter, “Importance of Nubia.” Pliny E. *N.H.* 6.35.18 claims that another island joined with Meroë's own to form a harbor; Philost. *Vit. Apoll.* 6.2 claims that Ethiopia-Egypt trade was more equitable than Greek trade.

1139. Taylor, *Egypt and Nubia*, 54.

1140. E.g., Hawass, “Nubia,” 170; Taylor, *Egypt and Nubia*, 9; O'Connor, “Nubia,” 47; cf. Felder, *Waters*, 8–9; Adam with Vercoutter, “Importance of Nubia.” As early as 1912, see Roeder, “Geschichte Nubiens,” 57–60, on the fourth millennium B.C.E.; 60–68, on the third and second millennia B.C.E. (though he betrays nineteenth-century racial categories, e.g., 68, 81–82). On Nubia before Meroë's kingdom, see esp. Sherif, “Nubia before Napata”; also, e.g., Taylor, *Egypt and Meroe*, 9; O'Connor, “Nubia,” 47; Youngblood, “Ethiopia,” 193–96. Greeks also recognized the Nubians' antiquity (Diod. Sic. 3.2.1).

1141. On Tirhakah, see Yamauchi, *Africa*, 125–37; Kitchen, *Orient*, 82–84; idem, *Reliability*, 16; Bright, *History*, 299–306. Alexandrian Jews knew of the earlier wars between Egypt and Ethiopia (*Let. Aris.* 13; cf. *Jos. Ant.* 2.239–41) and of Ethiopians' rule (*Sib. Or.* 3.160; cf. 2 Kgs 19:9; Isa 37:9).

1142. See Hansberry, *Africa*, 37–39. For the history of Greek contact with Africa, see the survey in Huss, “Africa: Discovery”; for Greek sources in translation, see Burstein, *African Civilizations*, 23–52.

1143. See Taylor, *Egypt and Nubia*, 48; Burstein, *African Civilizations*, 53–75; cf. Yamauchi, *Africa*, 165–66; Seidlmayer, “Nubia,” 869. Although Wheeler, *Beyond Frontiers*, 95–114, addresses trade between Rome and Africa, it offers little on Ethiopia or Nubia (except p. 116); cf. Carandini, “Pottery.”

to influence it, but so did the Ptolemaic dynasty, the Romans, and central Africa; still, its art, architecture, and many of its gods are distinctive.¹¹⁴⁴ Ethiopia was considered a source for ebony (Paus. 1.42.5) and ivory,¹¹⁴⁵ though at this time some elephants also inhabited North Africa.¹¹⁴⁶ Even those writing fictitious geography recognized the strategic location for trade (cf. Xen. Eph. *Anthia* 4.1).

Meroë was known for its wealth (Diod. Sic. 1.33.1–4);¹¹⁴⁷ hence a novelist could claim that Ethiopians cared little for gold or jewels, heaps of which the royal palace had in storage (Helioid. *Eth.* 9.24).¹¹⁴⁸ Not far from Meroë was the strategic horn of East Africa, from which the Axumite empire would eventually rise to challenge Meroë's dominance. Ships trading in Roman Egypt would make "a two year round trip" along the coast of eastern African "as far south as Zanzibar," purchasing "ivory, tortoise shell, myrrh and incense" en route.¹¹⁴⁹

Although Luke presents Jesus as the savior of the oppressed (Luke 4:18), he also portrays him as the redeemer of rich oppressors and other people of wealth (5:29; 7:2–5, 36; 18:29–30; 19:2–10; 23:50–53; Acts 4:36–37; 10:1–7; 17:4).¹¹⁵⁰ (People of means could demonstrate repentance by sharing with those in greater need; see comment on Acts 2:44–45.) This court official is another example of a person of high socioeconomic status in his society.¹¹⁵¹ Emphasizing how a group's "special claims have met with approval from respectable people" was a major component of apologetic in the Roman Empire.¹¹⁵²

(2) Queen Candace

Presumably the queen whom the official served worshiped traditional deities of Meroë; nevertheless, she (and perhaps her society) must have known and tolerated Jewish faith. The treasurer could hardly have taken an excursion for months, along with his presumed entourage, without the queen's approval (cf. Neh 2:5–8).

Most scholars, including nearly all commentators on Acts,¹¹⁵³ hold that "Candace" (pronounced *kan-dak'e*) was not the queen's name but her dynastic title, presumably comparable to "Pharaoh" or "Ptolemy";¹¹⁵⁴ Pliny the Elder claims that this name was passed on to each queen ("through a succession of queens for many years," *N.H.*

1144. Hawass, "Nubia," 171.

1145. It had access to elephants (Sen. Y. *Ep. Lucil.* 85.41; Pliny E. *N.H.* 8.13.35; Juv. *Sat.* 10.150; Helioid. *Eth.* 10.5) and ivory (Polyb. 34.16.1; Pliny E. *N.H.* 8.47). One could also secure these from India (e.g., Catull. *Carm.* 64.48; Pliny E. *N.H.* 8.11.32; Dio Chrys. *Or.* 79.4), and ivory was more available in Egypt (at least by the period of Philost. *Vit. soph.* 2.21.603). For luxury goods from Ethiopia, as from India, see Clem. Alex. *Instr.* 3.2.

1146. Cf. Weeber, "Environment," 1007; Bauckham, *Climax*, 357; Simpson, "Bone," 346; Schneider, "Ivory."

1147. See also Taylor, *Egypt and Nubia*, 46–47; Crocker, "Meroë and Eunuch."

1148. Cf. also Helioid. *Eth.* 10.5 for its marvelous fertility, including three-hundredfold harvests.

1149. Kraybill, *Cult and Commerce*, 104; cf. Reynolds, "Africa"; for details on the first-century mariners' guidebook for this voyage, including the merchandise acquired there (such as spices, ivory, and tortoise shell), see Casson, *Mariners*, 203–4. Unfortunately, the coast's strategic location rendered it useful for the subsequent centuries of slave trade (Gordon, *Slavery*, 116–29). Jos. *Ant.* 8.181 may imply slaves (though these do not appear in Josephus's biblical source).

1150. The emphasis on the poor continues in second-century sources (*Did.* 5.2; 13.4; *Barn.* 20.2; *1 Clem.* 15.6; 52.2; *Ign. Phil.* 2.3; *Herm.* 51.5–8), but they also encourage good relations between the poor and the rich (*1 Clem.* 38.2).

1151. Johnson, *Acts*, 158; Spencer, *Philip*, 159–60; Hengel, "Geography of Palestine," 62; Witherington, *Acts*, 71, 295.

1152. Johnson, *Acts*, 158 (citing, as an example, Jos. *Ag. Ap.* 1.176–212).

1153. E.g., Lake and Cadbury, *Commentary*, 96; Haenchen, *Acts*, 310; Bruce, *Commentary*, 186; Munck, *Acts*, 78; Conzelmann, *Acts*, 68; Jervell, *Apostelgeschichte*, 271; Marguerat, *Actes*, 306. Much earlier, see also Bede *Comm. Acts* 8.27b (L. Martin, 82).

1154. Cf., e.g., Paus. 1.8.6, commenting on the line of Ptolemies (with distinct individual surnames).

6.186).¹¹⁵⁵ Although Greek and Roman authors thought it a proper name, it is a Meroitic construction, *kdke* or *ktke*, from “woman” (*kd*) and the titular suffix *-ke*.¹¹⁵⁶ Historically, we know of several Candaces from the late first century B.C.E. to the mid-first century C.E.; the title seems to stop in the mid-first century C.E.,¹¹⁵⁷ suggesting that Luke’s tradition predates that time (unless our data are simply incomplete, or, as is plausible, he simply employs a title from older literature).

Because the kings were considered sons of the sun god (similar to ancient Egypt’s pharaohs), Bion of Soli claims that they did not specify their fathers, but only their mothers, the mother of each king being called the Candace (*Aethiopica* 1).¹¹⁵⁸ Because of the king’s holiness, it was thought, the queen was then left with tasks of secular administration.¹¹⁵⁹ Nero’s scouting expedition claimed that a queen ruled Meroë.¹¹⁶⁰ As late as Eusebius, the Roman Empire believed that queens ruled in Meroë (Euseb. *H.E.* 2.1.13).¹¹⁶¹

The Greco-Roman conceptions of this queen were not entirely accurate (and we should note that Luke does not specify these for the queen), but they were close enough for ordinary purposes.¹¹⁶² Nubian society was not matriarchal, but its queens were wealthy and did exercise significant power, sometimes as regents for sons.¹¹⁶³ William Adams argues that the name Candace appears to have been “a corruption of a Meroitic title (*kdke*) which was borne by all the royal consorts or queen-mothers of Kush; it does not specify a queen regnant.”¹¹⁶⁴ From a minimalist perspective (i.e., on the basis of only the extant evidence and not inferences from it), though “at least five queens” reigned directly “during the latter centuries of the Kushite dynasty,” no two of these known queens are known to have “reigned in succession, and it is not certain that they bore the title *kdke*.”¹¹⁶⁵

Did Luke’s informant (with many, I think Philip likely) know the details of the Candace, or did Luke fill in this information relevant to the official’s position on the basis of the popular Greco-Roman view of his era? “Candace” was the title by which she was known to the Greco-Roman world, and Adams concurs that it was apparently related to the indigenous Nubian title for all queens. Further, this eunuch could work for her without implying that no king held power at the same time;¹¹⁶⁶ there

1155. LCL, 2:477. Often noted, e.g., Abbott, *Acts*, 102 (in 1876); Bruce, *Commentary*, 186n43 (citing also Strabo 17.1.54; Dio Cass. 54.5.4).

1156. Lohwasser, “Kandake.”

1157. Yamauchi, *Africa*, 171.

1158. Lake and Cadbury, *Commentary*, 96; Bruce, *Commentary*, 186n43.

1159. Bruce, *Acts*’, 191; Longenecker, *Acts*, 159; Larkin, *Acts*, 132. Examining also novels, De Weever, “Candace,” 530, notes that in Ps.-Callisthenes’s *Alexander Romance*, “Candace, rather than her adult son, rules the country.”

1160. Pliny E. *N.H.* 6.35.186, *regnare feminam Candacen*; undoubtedly true in the generation of their visit.

1161. Johnson, *Acts*, 155.

1162. Cf. the Nubian inscription noting the reigning queen in 13 B.C.E. (Deissmann, *Light*, 352; Bruce, *Acts*’, 191).

1163. Adams, *Nubia*, 260. He notes cases of patrilineal and possibly some matrilineal succession but points out that brother-sister marriages may have been common. These were also common in Egypt; see, e.g., Diod. Sic. 1.27.1; Sext. Emp. *Pyr.* 1.152; Ptolemy *Tetrab.* 4.10.203; Lewis, *Life*, 43–44; in the Ptolemaic royal house, e.g., Paus. 1.7.1; Lucian *Icar.* 15; in royal houses of the East, see, e.g., Hdt. 3.31; Plut. *Alex.* 30.2, 5; Jos. *Ant.* 20.18. Ptolemy *Tetrab.* 2.3.70 notes that they were common in Egypt and the rest of Africa even in royal families. Matrilineal society (which is rarer but not uncommon; e.g., Bohannon and Middleton, “Introduction,” xii; for examples, Fortes, “Kinship”; Schusky, *Variation*, 12–14; MacGaffey, “Structure”; changing in Phiri, “System,” 274) is not, in any case, necessarily matriarchal in authority (e.g., often the wife’s brother retains authority over her, Ottenberg, *Double Descent*, 229) or even matrilineal (e.g., Schusky, *Variation*, 15–18; Grunlan and Mayers, *Cultural Anthropology*, 180).

1164. Adams, *Nubia*, 260.

1165. *Ibid.*

1166. E.g., even a general could have his own treasurer (Aeschines *Tim.* 56).

can be no question that the queen mothers in this period held significant political power.¹¹⁶⁷ Even at this point, where we could readily forgive Luke if he (like some other historians) were slightly confused, his sparse report does not clearly conflict with so-far-known facts.

Still, it is not impossible that this Candace was also a queen regnant. Some scholars have suggested that a Candace named Amanitare (25–41 C.E.) ruled in this period.¹¹⁶⁸ The newer chronology identifies a different queen for this period, for whom the particular title “Candace” is not yet attested; she may have borne this title (alongside a name, like other Candaces), or Luke may simply employ the title familiar to a Greco-Roman audience (or to his source). “Candace” was probably the queen mother’s title, and we know of four queen mothers who ruled (holding the title *qore*, “ruler”) in this period: Queen Amanirenas (both *qore* and *kdke*, Candace), in the final third of the first century B.C.E.;¹¹⁶⁹ the prosperous Queen Amanishakheto (also bearing both titles), traditionally dated from the late first century B.C.E. to the early first century C.E.; Queen Amanitare, mentioned above, coregent reigning with King Natakamani, now dated from 12 B.C.E. to 12 C.E.;¹¹⁷⁰ and Queen Nawidemak, ruling in the first half of the first century C.E. The Candace here might thus be Queen Nawidemak, who is attested as *qore* and hence ruled Nubia.¹¹⁷¹

Although we lack portrayals of these queens to match more detailed portraits of, for example, the Caesars, Meroë’s art typically depicts the queens as laden with jewels and many-fringed robes and as notably corpulent; their wide girth, probably intended as a display of prosperity, persisted in representations from the third century B.C.E. to the fourth century C.E.¹¹⁷²

(3) *Mediterranean Perspectives on the Candace*

For Luke’s audience, this queen unquestionably held high status. Roman sources claimed that Augustus defeated the Candace’s troops, but this is likely one of the empty claims of victory common among losers in antiquity.

The concessions of a Roman emperor to the Ethiopian Candace must have resulted from a different set of circumstances. . . . Reliefs on the temple of the sun at Meroë depicting bound prisoners under the feet of a conquering king are perhaps a record of some of the Roman captives taken by the Ethiopians. It is likely that Candace did not return all the statues of Caesar which the Ethiopians had torn down, for a splendid head of Augustus . . . , apparently buried ceremonially as an important trophy, was discovered in excavations at Meroë.¹¹⁷³

Rome continued diplomatic relations with Meroë, working together in the time of Nero¹¹⁷⁴ and even in later times after the kingdom’s strength vis-à-vis Axum was waning.¹¹⁷⁵

1167. See Hakem, “Napata and Meroë,” 302–4; Oliver and Fage, *History of Africa*, 32. Cf. the high status of queens in some traditional African societies, including the Amhara (Mbiti, *Religions*, 234, 243).

1168. E.g., Larkin, *Acts*, 132; Crocker, “Meroe and Eunuch,” 67. Sen. Y. *Nat. Q.* 6.8.3 mentions a “king” in Ethiopia, but this is a few years later, in Nero’s reign.

1169. Yamauchi, *Africa*, 171 (noting that she may be buried in Barkal pyramid 4).

1170. *Ibid.*

1171. *Ibid.*, 172 (noting her burial in Barkal pyramid 6).

1172. *Ibid.* (following Kendall, “Ethnoarchaeology,” 655).

1173. Snowden, *Blacks in Antiquity*, 133. For Augustus’s exaggerated account of victory, see *Res Gestae* 5.26.

1174. See Sen. Y. *Nat. Q.* 6.8.3; further Losch, “Kammerer der Königen,” 495. On Nero’s expedition, see, e.g., Pliny E. *N.H.* 6.35.178–85.

1175. See Snowden, *Blacks in Antiquity*, 133–36.

Novelists also seem to have preferred alliances with Ethiopian queens to battling them.¹¹⁷⁶ In a work praising Alexander, a novelist portrays the Candace as extremely tall, looking like “a demigod”; she proves smarter than Alexander and freely tells him so (Ps.-Callisth. *Alex.* 3.22).¹¹⁷⁷ Greek and Latin sources tend not to describe the Candace’s color, since it may be assumed from her being Ethiopian,¹¹⁷⁸ but it is certainly only some of the later European romances that portray her as European.¹¹⁷⁹ Another Greek novel, set in the Persian period, makes Ethiopia’s queen, Persinna, the priestess of the moon (Heliod. *Eth.* 10.4) and attributes to her a revelatory dream (10.3); like all women, she was barred from attending special sacrifices lest she accidentally defile them (10.4). The story’s heroine, her daughter, is nearest to the throne for succession (10.12, 15).

Earlier Greeks recognized strong women like the Amazons (Aeschylus *Suppl.* 287) from Libya (*Suppl.* 279), the Nile (*Suppl.* 281, Egypt), Cyprus (*Suppl.* 282), and the land near Ethiopia (*Suppl.* 286). Another island kingdom in the Nile was ruled by a queen (Pliny E. *N.H.* 6.35.191).¹¹⁸⁰ Some claimed the existence of Libyan Amazons earlier than the Asian ones (though they died out before the Trojan War; Diod. Sic. 3.52.1–3).¹¹⁸¹

Greeks and others of lighter complexion sometimes viewed men and women of dark complexion as beautiful.¹¹⁸² A famous Ethiopian woman was Andromeda, who was (in some versions of the story) black.¹¹⁸³ Perseus found and rescued her in Ethiopia¹¹⁸⁴ and asked her hand in marriage.¹¹⁸⁵ Andromeda and her mother had earlier incurred Poseidon’s anger by vying with the Nereids in beauty (Apollod. *Bib.* 2.4.3).¹¹⁸⁶ Because she was “Ethiopian,” one would normally assume that she was black. Heliodorus, however, counters that whereas most Ethiopians are black, Andromeda was white (*Eth.* 10.14–15).¹¹⁸⁷ (Tastes for beauty are often ethnocentric,¹¹⁸⁸ and reports of their

1176. Ps.-Callisth. *Alex.* 3.19–21; cf. Jos. *Ant.* 2.252–53 (less helpfully to the other Ethiopians). This approach does not stem from favor toward women in general; both Achilles and Theseus supposedly slaughtered Amazons freely (e.g., Plut. *Thes.* 26–28).

1177. Also emphasized by Du Bois, *World and Africa*, 140. The image of the Candace also appealed, as a model, to African-American educator Nannie Helen Burroughs, who opined that these Africans knew how to obey a woman (Sanders, “Biblical Perspective,” 127).

1178. See De Weever, “Candace,” 533.

1179. See *ibid.*, 537, 540–44.

1180. Romans also noted a people in Egypt with ruling queens (Pliny E. *N.H.* 6.23.76) and mentioned other barbarian queens (e.g., Tac. *Agr.* 16; an even more broadly egalitarian tribe in Tac. *Germ.* 45). For another non-Amazon warrior queen, see Philost. *Elder Imag.* 2.5 (Rhodogoune). Other peoples also seemed fascinated by Cleopatra (e.g., *Sib. Or.* 11.254–59) and the power of queens in old Egypt (Diod. Sic. 1.27.2), which was great (Manetho *Aeg. fig.* 10 [from the Armenian version of Euseb. *Chron.* 1, p. 96], frg. 20–21). Polyb. 22.20 does portray Attalid queens as exemplary, virtuous women (Verner, *Household*, 65–66).

1181. For more on Libyan Amazons, see Sobol, *Amazons*, 19–31 (the Asian variety were far more prominent, 32–77). In *Pesiq. Rab Kah.* 9:1, a place populated entirely by women, possibly in Africa, dissuades Alexander from attacking them.

1182. E.g., Song 1:5; Aeschylus *Suppl.* 154–55; see esp. Snowden, *Blacks in Antiquity*, 105, 154, 178–79, 198–99. Note esp. Hdt. 3.20 on the handsome Ethiopian men (Snowden, *Blacks in Antiquity*, 105).

1183. E.g., Pliny E. *N.H.* 6.35.182. She became famous as a constellation (e.g., Aratus *Phaen.* 354).

1184. Ovid *Metam.* 4.669–71; Lucian *Hall* 22; *Dial. S.-G.* 323 (14, Triton and Nereids 3); [Eratosthenes] *Catasterisms* 15, 17 (in Euripides, LCL 7:130–31); Eurip. *Archelaus* 228a.10–11.

1185. Ovid *Metam.* 4.700–705.

1186. See also some of this story line in Ovid *Metam.* 4.665–803; Libanius *Narration* 35. A Nereid in Lucian *Dial. S.-G.* 324 (14, Triton and Nereids 4) complains that this was especially inappropriate behavior for barbarians, i.e., non-Greeks.

1187. Despite his interest, Heliodorus’s approach to Ethiopia was not altogether positive; he believed that they practiced human sacrifice as an ancestral custom (*Eth.* 10.9). Some others also made Andromeda fair-skinned (Philost. *Elder Imag.* 1.29, remarking that most of the other Ethiopians looked alike). For the range in portrayals of Andromeda’s complexion, darker toward this period than earlier, see Snowden, *Blacks in Antiquity*, 152–58.

1188. I document heavily here because I am forced to disagree with Snowden, *Blacks in Antiquity*, 179, that preference for blackness or whiteness was roughly equal. Most peoples tend to be ethnocentric, though certainly many Greeks did appreciate dark beauty (noted above).

heroes, deities, and those praised for beauty reveal that many Greeks preferred blond hair¹¹⁸⁹ and pale skin,¹¹⁹⁰ including being “white-armed.”¹¹⁹¹ Yet they also commonly preferred a trait said to be more common among Ethiopians¹¹⁹²—namely, tallness.)¹¹⁹³

The attitudes of Jewish sources toward Nubian women varied. Josephus accepted that Moses had a Nubian wife (Num 12:1), and further claimed that she was a princess (Jos. *Ant.* 2.252).¹¹⁹⁴ For later rabbis, by contrast, she was not really Cushite (Nubian); rather, the text simply meant that as Nubians had skin different from others, so Zipporah the Midianite differed from all others by her superior beauty.¹¹⁹⁵

This queen’s gender obviously did not marginalize her from power;¹¹⁹⁶ even supporters of patriarchal tradition generally made exceptions for women of rank, especially members of the royal household (e.g., Philo *Embassy* 320). This was even easier for foreign queens, such as Boadicea¹¹⁹⁷ and the mythical Dido as founder of Carthage;¹¹⁹⁸ one may compare the Greeks’ mythical Amazons (see extensive comment above). Greeks considered as great the role of Persia’s queen mother, before whom people prostrated themselves (Aeschylus *Pers.* 150–57); as mother of Xerxes, she was mother of a god (*Pers.* 157). The Greco-Roman world knew that Egypt had long boasted

1189. E.g., Hom. *Il.* 1.197; Eurip. *El.* 515, 521–23; *Herc. fur.* 993; *Hipp.* 220, 1343; *Iph. Aul.* 758, 1366; Ap. 1191. Hom. *Il.* 5.314; *Od.* 18.198; 19.60; 23.240; Pindar *Paeans* 6.87; *Pyth.* 3.98–99; *Hymns* 1.29.5–6; Catull. *Carm.* 63.8 (a contrast with Attis’s blood in 63.7); Lucian *Judg. G.* 10; *Demosth.* 19 (a bride); in Homer, quite commonly of Hera (*Il.* 1.55, 195, 208, 572, 595; 5.711, 755, 767, 775, 784; 8.381; 14.277; 15.78, 92, 130; 19.407; 21.377, 418, 434, 512; 24.55; followed in Lucian *Gout* 93–94); or of Helen (Hom. *Il.* 3.120; *Od.* 22.227), Andromache (*Il.* 6.371, 377; 24.723), and Nausicaa (*Od.* 6.101, 186, 251; 7.12; her maidens, 6.239; her mother, 7.233). Cf. fair-ankled in Hom. *Od.* 11.603 (quoted in Dio Chrys. *Or.* 74.16) and white feet (Eurip. *Bacch.* 862–64).

1192. Among Ethiopians, see Snowden, *Blacks in Antiquity*, 105 (citing Hdt. 3.20).

1193. Hom. *Il.* 3.167 (contrast Odysseus in 3.193, who seems to have grown by the second volume!); *Od.* 1.207, 301; 3.199; 6.276; 8.19–20; 9.508; 10.396; 13.289; 15.418; 18.195; 21.334; Xen. *Oec.* 10.2; *Anab.* 3.2.25; *Cyr.* 4.4.3; 5.1.5; 5.2.7; Arist. *Rhet.* 1.5.13, 1361b; Apollod. *Bib.* 2.4.9; Cic. *Cael.* 15.36; Corn. Nep. 17 (Agesilaus), 8.1; Catull. *Carm.* 86.1; Ovid *Am.* 3.3.8; Sen. *Y. Nat. Q.* 4A.pref. 8; *Ep. Lucil.* 66.26; Plut. *Lyc.* 17.4; *Alex.* 21.3, 5; *Cim.* 5.3; *Arist.* 17.7; *Div. V.* 33, *Mor.* 568A; Arrian *Alex.* 5.19.1; Longus 1.16; 2.23; Char. *Chaer.* 2.5.2; Philost. *Vit. soph.* 1.21.515; 1.25.450; 2.1.552; *Hrk.* 10.4; *Hdn.* 4.9.3; 6.4.4; Eunapius *Lives* 467, 481, 487; 11Q5 XXV, 9–10; Artapanus in Euseb. *P.E.* 9.27.37; Jos. *Asen.* 1:4/6, 5/8; *Pesiq. Rab Kah.* 17:6. One might pretend to be taller by stretching on one’s toes (Sen. *Y. Ep. Lucil.* 111.3); a short man might need a short woman (Xen. *Cyr.* 8.4.20). One need not be tall by modern Western standards to qualify by ancient Mediterranean standards (cf., e.g., Nagar and Torgeë, “Characteristics”).

1194. For discussion, see comment on Acts 7:22; Rajak, “Moses in Ethiopia”; Runnalls, “Ethiopian Campaign.” Iren. *Her.* 4.20.12 uses her as a type of the Gentile church.

1195. *Sipre Num.* 99.3.2; *Tg. Neof.* 1 on Num 12:1. Philo *Alleg. Interp.* 2.67 allegorizes her positively (but cf. his negative allegorization of Ethiopia, 1.68).

1196. See Arlandson, *Women*, 117.

1197. Tac. *Agr.* 16.

1198. Virg. *Aen.* 1.340–64, 446. Attributing Carthage’s founding to a woman may have demeaned it in Roman eyes, but the attribution is more crucial for the tragic prefiguring of Carthage’s hostility toward Rome and the latter’s triumphant destiny.

powerful queens who sometimes ruled.¹¹⁹⁹ Egyptian and Macedonian culture may have each contributed to the prominence of Ptolemaic women; for example, Caesar left both the younger son and the elder daughter (the final Cleopatra) of Ptolemy in charge of Egypt (Caesar *Alex. W.* 1.33).

(4) *Queen of the South?*

Luke's biblically informed audience, however, might think especially of the queen of Sheba, who came to Jerusalem nearly a millennium before this queen's official did so.¹²⁰⁰ Luke's audience might think of her especially because she is the only other person designated as "queen" in his work (Luke 11:31; though cf. Acts 25:13); depending on which Meroitic royal woman was in view, it may even be possible that Luke favored this term to draw attention to his earlier usage. She came from the "ends of the earth" (Luke 11:31, though using a different term than Acts 1:8), just as Philip was now evangelizing someone from the "ends of the earth" (see comment on Acts 1:8). Luke calls her not "queen of Sheba" but (following Q; Matt 12:42) "queen of the South";¹²⁰¹ many would join the kingdom from the "south" (Luke 13:29, Luke's probable addition to Q's "east and west") and no place was farther south in Greek thought than "Ethiopia."¹²⁰²

Probably because of her honorable response to Solomon, Jewish tradition magnified the queen of Sheba's power, extending her rule to Ethiopia. She ruled Egypt and Ethiopia (Jos. *Ant.* 8.159, 165) and could be called simply "Queen of Ethiopia" (8.175). Josephus calls Saba (Sheba) Ethiopia's royal city, which he claims was later renamed Meroë (2.249).¹²⁰³ Another document claims that Solomon received gold from "Ethiopia," presumably identifying it with Sheba.¹²⁰⁴ Later Ethiopians naturally also identified the queen of Sheba with a queen of Ethiopia (*Kebrā Nagast* ch. 33, end).¹²⁰⁵

The queen of Sheba, who traveled a great distance to hear Solomon's wisdom, would serve as a prosecution witness against unrepentant Israel (Luke 11:31).¹²⁰⁶ Likewise, this representative of a later queen, as the first Gentile Christian, proved that the rejection by much of Jerusalem (Acts 7:51–52; 8:1) would disqualify only those who rejected the message, not the message itself. The gospel announced that someone greater than Solomon had come (Luke 11:31; Matt 12:42). By recalling biblical accounts of the queen of Sheba and Jeremiah's Ethiopian ally in Judah's royal

1199. Manetho *Aeg. frag.* 10 (from the Armenian version of Euseb. *Chron.* 1, p. 96), 20–21 (from Syncellus and the Armenian version of Eusebius); Iambl. (nov.) *Bab. St.* 20 (Photius *Bibl.* 94.77b).

1200. For proposed allusions here, see, e.g., Hirth, "Königin von Saba." Some later Jewish traditions amplify her paganism (*Test. Sol.* 19:3; still later, cf. her response to Solomon in Qur'an 27.22–44), but this is irrelevant here.

1201. Cf. "king of the south" in Dan 11:9, 11, 14, 25, 40; i.e., the Ptolemaic ruler of Egypt (11:8).

1202. If Acts 8:26 speaks of going "south" (a matter much debated; see comment above), it would be the only relevant reference in Acts to "south" (elsewhere in the NT, Luke 12:55; Acts 27:13; 28:13; Matt 12:42; Rev 21:13), but it would also be the only possible NT instance of "south" that uses a term different from all the others.

1203. Scott ("Horizon," 536n203) notes that Silberman, "Queen of Sheba," "considers Josephus idiosyncratic at this point," but counters that *Liv. Pr.* 1:8 confirms the connection between the queen of Sheba and Ethiopia. By contrast, in the probably third-century *Test. Sol.* 19:3, she is an arrogant witch forced to bow before Solomon.

1204. *Liv. Pr.* 1:12 (Schermann, §24, p. 76, lines 13–14, on Isaiah).

1205. Bruce, "Philip and Ethiopian," 385; Ullendorf, "Candace and Queen of Sheba," 54–55.

1206. So also Jonah's Ninevites (Luke 11:29–30, 32), who would condemn Israel (11:32); cf. possible Jonah parallels in Acts 27. The south (Ethiopia) and west (Rome) received the gospel, but Israel proved disappointing. Using a group's receptive representative to testify against the excuses of the group on the day of judgment, as Jesus does in Q, fits Jewish tradition (*Abot R. Nat.* 6 A; 12, §30 B; *b. Yoma* 35b; 3 *En.* 4:3; for Gentiles specifically, see *Lev. Rab.* 2:9; *Pesiq. Rab.* 35:3; Keener, *Matthew*, 368); the principle of a successful member of a group removing the group's excuses was also more generally intelligible (e.g., Plut. *Coriol.* 1.2; Max. Tyre *Or.* 1.9).

court, Luke connects the events of the gospel's initial spread with the faith of Gentiles earlier in salvation history.

V. THE ENCOUNTER (8:28–31)

When Philip comes alongside the official's carriage, he hears him providentially reading from a passage in Isaiah, and the official welcomes Philip's help in understanding the passage. One depending on God's providential guidance would recognize that the timing was no coincidence (cf., e.g., 2 Kgs 8:4–5).¹²⁰⁷ Also, the passage may remind those involved in the mission (Acts 1:8) that God has already worked before their arrival (cf. also the readiness of Cornelius in ch. 10).

(1) *The Chariot and the Scroll* (8:28–29)

Most travelers, like Philip, moved on foot, but persons of greater means used donkeys or, more expensively but quickly, horses or even camels. Those with the most resources, like the man portrayed here, could undertake their journeys “in chariots or carriages pulled by mules or horses.”¹²⁰⁸ Traditionally, racing chariots were drawn by four horses.¹²⁰⁹ We should not, however, think here of ordinary chariots or the racing chariots most familiar to modern readers from films about the Roman Empire.¹²¹⁰ Drawing on Celtic models, designers improved traveling carriages significantly in imperial times.¹²¹¹ These varied from simple models (with wheels “permanently fixed to the axle”) to (more likely for a wealthy official) elaborate, expensive wagons (with twelve spokes on the wheels).¹²¹² A wealthy man might exhibit his wealth by traveling in a carriage with four wheels (Eunapius *Lives* 468).¹²¹³

Scholars sometimes suggest a four-wheeled covered wagon, at times adding that it might be pulled by oxen,¹²¹⁴ though donkeys and mules were also used for transport on Roman highways (and camels for deserts).¹²¹⁵ Such a carriage would allow for more luggage, make travel more comfortable, and perhaps increase the distance

1207. One may compare similar accounts today from those who share the same premises (e.g., Jackson, *Quest*, 75).

1208. Stambaugh and Balch, *Environment*, 38. Within a city, they could use even litters, a luxury item borrowed from Hellenism (Hurschmann, “Litter”), but this would be impractical for a long journey such as this one. Roman laws seeking to limit luxury had prohibited women from using animal-drawn wagons in cities (Livy 34.1.3), and Claudius apparently reinforced the need for litters in Italy (Suet. *Claud.* 25.2; Raepsaet, “Land Transport,” 208).

1209. Pindar *Ol.* 2.5; *Pyth.* 2.4; 10.65; probably implied in *Nem.* 3.74. For earlier Egyptian war chariots (presumably similar to the Ethiopian variety), see Littauer and Crouwel, “Chariots,” 888–89.

1210. BDAG notes a traveling chariot (as distinct from a war chariot), citing Dio Chrys. *Or.* 64 [14].20; Apollod. *Bib.* 3.5.7.5; also Gen 41:43; 46:26; Jos. *Ant.* 8.386. To these one might add 1 Kgs 1:5; 1 Esd 3:5–6; cf. perhaps God's chariot in Sir 49:8; Jos. *Ant.* 7.378. The Josephus reference (*Ant.* 8.386, with 8.380–87 *passim*, 415–17) could be a war chariot (as in 2.324; 5.64–67, 128, 177, 199, 206–7; 6.97, 130; 7.99; 8.41, 254, 378; 9.54–55, 76, 97, 114–34; 10.77; *War* 6.298; for Ethiopian war chariots, *Ant.* 8.292); much better would be 2.90; 7.194, 345; 8.186, 221; 19.6; perhaps 8.183.

1211. Raepsaet, “Land Transport,” 204.

1212. *Ibid.*; in contrast to rustic and two-wheeled carriages was “the comfortable and expensive *carruca dormitoria*” (207). For drawings of various models of carts in the period, see 205–6. Four-wheeled transport vehicles seem to have been common, but two wheels also persisted (see Libanius *Descr.* 2.6).

1213. In the diagrams in Raepsaet, “Land Transport,” 205–6, the more complex carriages also have two wheels on each side.

1214. Bruce, *Commentary*, 186; Witherington, *Acts*, 297; Larkin, *Acts*, 133. Carriages could use one, two, or four horses (Raepsaet, “Land Transport,” 202), with two horses (or mules) being most common (203); four-wheeled wagons are attested in the ancient Near East as early as the third millennium B.C.E., providing a more comfortable, albeit slower, means of transport (Littauer and Crouwel, “Chariots,” 892). For wheeled transport vehicles (for goods) in the Roman period, see, e.g., the summary in Dorsey, “Travel,” 895.

1215. Applebaum, “Economic Life,” 685–86 (citing *m. B. Meši'a* 1:6; 5:5; *B. Bat.* 2:14); also horses (Weeber, “Travels,” 872).

one could travel.¹²¹⁶ (The eunuch probably would use this carriage only as far as Alexandria, taking a boat south from there.) The driver might well be in the front, with plenty of room for the official and his guest in the back.¹²¹⁷ In such a vehicle sometimes there might be only one attendant, though a wealthy official might have more; there would thus normally be room for a guest such as Philip.¹²¹⁸ This sort of vehicle was not, however, most often called a “chariot” (ἄρμα), as here;¹²¹⁹ that Luke employs this term here might reinforce his allusion to the Elijah narrative, in which Elijah outran Ahab’s chariot (1 Kgs 18:44–46; *Jos. Ant.* 8.346).¹²²⁰

It is not only the chariot but his leisure in it (Acts 8:28, indicating a driver, as in 8:38) and its spacious sitting area (8:31) that reveal the official as a person of wealth and status. The Isaiah scroll demonstrates the same point. Someone traveling with a servant or servants and his own Isaiah scroll was undoubtedly fairly wealthy,¹²²¹ which underlines more dramatically his status as a royal treasurer (8:27). With literacy perhaps averaging no more than 20 percent even among eastern Mediterranean urban dwellers who knew Greek,¹²²² this foreigner must have come from an elite class in Nubia, which afforded him education. In the Mediterranean world, most wealthy people had readers;¹²²³ since we do not know the size of the possible entourage, we cannot be certain whether this official’s wealth was expressed by a literate servant or by his own literacy, but in either case, even the wealthy who used readers were themselves literate (see comment on Acts 8:31).

Further, a royal treasurer with means to travel such a long distance in comfort might also have companions or servants traveling with him, for the sake of safety on the road. Although they would presumably travel only during the day, robbers were a serious enough problem¹²²⁴ that obviously wealthy persons¹²²⁵ might undertake long journeys most safely in caravans; it is thus possible that some other wagons from his party (or perhaps other travelers, though this would be less likely at “noon”) were also traveling with him. Later rabbis, at least, would have found praiseworthy the official’s passing his journey in study of Scripture.¹²²⁶

1216. Rapske, “Travel,” 9. For space to read in larger carriages, and even sleep space in the finest models, see Weeber, “Travels,” 872.

1217. Also Faw, *Acts*, 106.

1218. Ramsay, *Discovery*, 314. Smaller war chariots of the epic age held two riders in each (e.g., Pindar *Nem.* 4.30).

1219. Though traveling chariots are noted above, “chariot” does not seem to be a long-range luxury vehicle’s most common title.

1220. See comments above, in the introduction to Acts 8:26–40, under “Biblical Background.”

1221. The servants may be safely inferred from his ability to read while the carriage moved (cf. also Acts 8:38; Spencer, *Acts*, 92). Possibly some individuals have scrolls in 1 Macc 1:57 (unless they had simply removed them from public places for safekeeping, 1:56–57), but they may be wealthy citizens of their Judean communities.

1222. Scholer, “Writing,” 1283; Gamble, “Literacy,” 644; see, in greater detail, Harris, *Literacy*.

1223. E.g., Cic. *Fam.* 7.1.3. Cf. similarly the literate elite’s use of scribes for writing; e.g., Cic. *Fam.* 16.14.1–2; 16.22.1.

1224. Cf., e.g., P.Oxy. 1408.11–21; Hom. *Il.* 3.10–11; Phaedrus 4.23.16; Ach. Tat. 2.16.2; 2.18.5; 3.9.3; 2 Cor 11:26; *m. Ber.* 1:3; *b. ’Abod. Zar.* 25b; *Ber.* 11a; *B. Qam.* 116b; *Pesiq. Rab Kah.* 27:6; *Gen. Rab.* 75:3; *Exod. Rab.* 30:24; cf. further sources in Friedländer, *Life*, 1:294–96; Goodman, *State*, 55. Sometimes they murdered their victims (*Gr. Anth.* 7.310, 516, 581, 737; Xen. *Eph. Anthia* 4.3; *Gen. Rab.* 80:2; 92:6), and they were generally feared and hated (Hor. *Ep.* 1.2.32–33; Apul. *Metam.* 8.17; 1 Esd 4:23–24; *Sib. Or.* 3.380; *Jos. Ant.* 14.159–60, 415, 421; 20.5, 113, 124; *Life* 105; *Tr. Shem* 6:1; 7:20; *b. Sanh.* 108a; *Lev. Rab.* 9:8). Cf. the use of desert police in Egypt (Lewis, *Life*, 141).

1225. The poor may have been less frequent targets (Dio Chrys. *Or.* 7.9–10).

1226. For emphasis on traveling with those who hold divine favor, see *t. ’Abod. Zar.* 1:17; *Šabb.* 17:2; on finding a good traveling companion to talk with, see Aul. Gel. 17.14.4; cf. Babr. 15.1–4; Plut. *Cic.* 39.4; Hock, *Context*, 28; for discussing Torah, *b. Soṭah* 49a (for speaking always of Torah, in accordance with Deut 6:7, see, e.g., *b. Yoma* 86a; *Soṭah* 46b). Cf. Lake and Cadbury, *Commentary*, 96 (following Strack and Billerbeck, *Kommentar*: rabbis required reading Torah aloud on journeys); Barrett, *Acts*, 428 (citing *b. ’Erub.* 54a; cf. *’Ab.* 3:8).

(2) *Running to Obey the Spirit* (8:29–30)

That it is “the Spirit” that tells Philip to join the chariot is no less significant than that “the Spirit” will tell Peter to accept and accompany Cornelius’s messengers (10:19–20).¹²²⁷ In both cases, the Spirit helps God’s agent violate conventions and expectations at strategic moments to fulfill God’s mission.¹²²⁸ This is not to suggest that the Spirit works only rarely and only at strategic salvation-historical moments (hardly an accurate reflection of early Christian pneumatology)¹²²⁹ but to notice that Luke’s narrative focus keeps to reporting his theme: the Spirit empowers Christ’s witnesses to cross cultural barriers with his message (1:8).

For some Jews it would have been culturally difficult to approach an obvious foreigner on the road, especially before Philip hears him reading Scripture and surmises that he is a God-fearer.¹²³⁰ Luke’s ideal audience will recall that Jews were not to “associate” with foreigners (10:28, the only other text in biblical or early Christian Greek employing precisely the same two verbs, προσέρχομαι and κολλάομαι, including the latter, rarer verb for Philip’s “joining” or “attaching” himself to the chariot here).¹²³¹ Hellenists, however, may have had more experience with idolatrous Gentiles (at least the first-generation immigrants would), and so the bicultural Hellenists formed a natural bridge for the Gentile mission (see comment on Acts 6:1). Whatever the natural tendencies, Philip obeys the Spirit; this fits the theme of obedience to supernatural guidance in Luke-Acts.¹²³²

Although other Elijah allusions may suggest an allusion to Elijah outrunning Ahab’s chariot here (1 Kgs 18:44–46),¹²³³ we need not think that this chariot was moving at a rapid pace. Like most of the best of long-distance land transportation, the carriage could probably travel only twenty-five to thirty miles a day.¹²³⁴ (A pedestrian might average just twenty; for Philip to overtake the chariot from behind probably means that he is moving quickly.)¹²³⁵ That the official is reading reinforces the point; no matter how smooth the road might have been by ancient standards (and we may

1227. On the Spirit’s activity as a narrative “character” here, see, e.g., Hur, *Reading*, 242. The attempt to coalesce the Spirit here with the earlier angel (Haya-Prats, *Believers*, 38) misses the parallel in 10:19; 11:12 (in view of Luke’s most common use of “Spirit”); Luke appeals to multiple confirmations here.

1228. For the Spirit and “guidance” in Acts, see discussion in Warrington, *Discovering*, 63–65 (noting Acts 8:29; 10:19; 11:12; 13:4; 15:28; 16:6–7; 20:22–23). For obvious matters, no guidance is needed (e.g., 10:47; 11:23; 12:10–11; 16:10), but convention made this case less than obvious.

1229. Rather, Philip’s heeding the Spirit’s voice functions as a model (with, e.g., Bede *Acts* 8.29 [Martin, *Acts*, 98; L. Martin, 83], taking the voice as internal). To suppose that Luke would limit acts of the Spirit to those that he specifically narrates not only argues from silence in a short monograph but also ignores Luke’s paradigmatic depiction of the era of the Spirit (Acts 2:17–18), which he can at most illustrate. His depiction is representative, not comprehensive, and if Luke limited the Spirit’s activity *only* to his emphasis on witness (which he does not; e.g., 9:31; 11:28; 13:52; 21:4, 11) he would believe less about the Spirit’s activity than does his hero Paul (e.g., Rom 9:1; 15:13; 1 Cor 2:12–14; 12:4–11). On the Spirit speaking in some early Christian literature, see, e.g., Rom 8:16; John 16:13–15; Rev 2:7; 14:13; 22:17; Keener, *John*, 1038–39 (cf. 234–51; also the prophetic association of the Spirit, noted in the commentary introduction, Keener, *Acts*, 1:534–37). By contrast, many Jewish sources from this era played down dialogues with God even in biblical narratives (Koskeniemi, *Miracle-Workers*, 294).

1230. We cannot know how far they were from Jerusalem along the road at this point, that distance also perhaps affecting perceptions of a foreigner’s intentions.

1231. See Foakes-Jackson, *Acts*, 92, overemphasizing the point.

1232. See Spencer, *Philip*, 154–55. On the Spirit’s activity in this passage in light of Lukan pneumatology as a whole, see Casalegno, “Espírito disse a Filipe.” Some modern charismatic Christians also claim incidents of supernatural guidance in the service of evangelism (e.g., Pullinger, *Dragon*, 143, 176; Keener, *Gift*, 44).

1233. See comments above, in the introduction to Acts 8:26–40, under “Biblical Background.”

1234. Rapske, “Travel,” 9.

1235. Alternatively, the chariot may have passed Philip already, or it may have entered this road recently from another one.

especially doubt its smoothness if they had already passed Gaza, though this is less likely), reading would be more easily done at a fairly leisurely pace (though carriage travel did “permit reading”).¹²³⁶

If Philip approaches from behind, he would still need to run to catch up (Acts 8:30). Running could be considered indecorous,¹²³⁷ especially for a respectable older man;¹²³⁸ by contrast, this would probably be viewed as honorable behavior for an athletic young man (as Philip may well have been),¹²³⁹ though it would not entail the miraculous speed perhaps envisioned for Elijah. If Philip found the official early after starting out and the noonday heat had not yet subsided (cf. comment on Acts 8:26 for this possibility, though Luke is not clear how far Philip traveled before sighting the chariot), this is also an act of obedience in the face of effort.¹²⁴⁰ Running may also imply eagerness, as when the loving father embraced his lost son (Luke 15:20) or Peter ran to the tomb (24:12). Compare the command in Zech 2:3–4.

(3) *Discussing the Official’s Readings (8:30–31)*

Recognizing the foreigner reading Isaiah (particularly a passage Christians regarded as messianic; see comment on Acts 8:32–33) would signal to both Philip in the narrative world and Luke’s audience how providential the arrangement was.¹²⁴¹ (Ancients recognized such connections. Thus, for example, when a future king in one story happened to be reading something relevant exactly when someone proposed a way to recover his kingdom, he concluded that a deity had arranged this omen.)¹²⁴² Reading Scripture is precisely what one would expect a well-to-do God-fearer with leisure to be doing (Jos. *Ant.* 20.44).

Asking the man if he understood what he was reading suggests a familiar method for joining conversation, both in Luke-Acts (see esp. Luke 24:17–19, 25–26; on literary connections with that passage, see introduction to this section) and in the broader culture.¹²⁴³ The wording in Greek is paronomasia, a wordplay: γινώσκεις ἃ ἀναγινώσκεις.¹²⁴⁴ Some scholars suggest that it may also reflect the familiar “contrast between reading and understanding” in Jewish thought.¹²⁴⁵ That Philip essentially offers to help the man interpret what he is reading would probably commend him

1236. Lake and Cadbury, *Commentary*, 96 (citing Pliny *Ep.* 3.5).

1237. E.g., Dio Chrys. *Or.* 32.52. It was accepted for noble causes, such as running to hear a Torah teacher (y. *B. Meṣi’a* 2:11, §1; *Hor.* 3:4, §4), encountering a loved one after a long or dangerous absence (Gen 33:4; Tob 11:9–10; Luke 15:20; Livy 4.40.3; Appian *Hist. rom.* 2.5.3), meeting a king (*b. Ber.* 58a), or an emergency (*Apoll. K. Tyre* 25).

1238. Bailey, *Peasant Eyes*, xv.

1239. In Acts 21:9, two decades later, he has young daughters. Cf. Luke 24:12; John 20:4 (cf. also 1 John 2:14); see comment in Keener, *John*, 1184, 1230–31 (noting, e.g., Jos. *Life* 15; Hom. *Od.* 5.388–89, 399, 438–41; 7.276–77, 280–81; 23.23–38; Philost. *Hrk.* 27.1–13); Keener, “Vigor.” This emphasis could appeal to a Greek audience, which probably would have culturally valued bodily health (Platonic dualism aside).

1240. Presumably Philip, since he was traveling, might have with him his heavier outer cloak, since this was used for sleeping at night (Deut 24:13); it is not among the prohibited items for missionaries in Luke 10:4 (cf. Mark 6:8–9).

1241. With also Chrys. *Hom. Acts* 19. God’s sovereign arrangement of encounters also appears in Luke’s Scripture (e.g., Gen 24:14–27; 29:5–6; 37:15–17, 25; 40:3; Exod 2:5–6). Le Cornu, *Acts*, 424–25, surmises that the official was reviewing the week’s haftarah reading, but it seems unlikely that such readings had yet been standardized.

1242. Philost. *Vit. Apoll.* 2.32.

1243. Casual conversation functions as an instrument of religious invitation in Philost. *Hrk.* 1.1–5.6 (though this pagan work may betray the influence of Christian models); more generally, see, e.g., Keener, *John*, 468–69 (regarding politeness and hospitality conventions). A conversational, dialogical approach need not prove antithetical to seeking conversion (cf. Gaventa, “Witnessing,” noting that the real focus is God’s activity); Kowalski, “Exegese,” uses Acts 8:30 as a model for communication.

1244. Bruce, *Commentary*, 187n46; Barrett, *Acts*, 428.

1245. Barrett, *Acts*, 428 (following Daube, *New Testament and Judaism*, 434); cf. also Philo *Spec. Laws* 1.214.

to the official: a Jew knowledgeable enough to help him and neither intimidated by his obvious status nor put off by his apparent foreignness.¹²⁴⁶

READING

How would Philip hear the man reading?¹²⁴⁷ Most reading in antiquity was done aloud;¹²⁴⁸ some even regarded exceptions such as Ambrose (*Aug. Conf.* 6.3) as unusual.¹²⁴⁹ There is a fair amount of evidence for quiet reading with lips moving,¹²⁵⁰ but this was not the most common method;¹²⁵¹ because ancients used continuous script instead of dividing words or punctuating, reading aloud was important to catch the flow of thought.¹²⁵² Ancient writers expected their works to be read aloud,¹²⁵³ and hence some even designed them for pleasant sounds and melodic recitation.¹²⁵⁴ Reading aloud helped children memorize, an important skill since they would have to recite from memory.¹²⁵⁵ Sources suggest that students normally learned the Torah out loud as well.¹²⁵⁶ Even had reading been done aloud only occasionally (which is not the case), it would indicate why Luke need not explain why this reading is done aloud.

Given the likely bumps of even the smoothest carriage ride on the best of roads, it would be possible for a servant to be reading to the official;¹²⁵⁷ some of the wealthy in the empire might have their own readers as well as scribes.¹²⁵⁸ But Luke's wording in both Acts 8:28 and 30 probably suggests that the official himself is reading, which underlines this official's skill and intellectual curiosity.¹²⁵⁹ Scripture scrolls could be cumbersome; they were not wide, but they could be up to 145 feet (44 m.) long,¹²⁶⁰ so that one would need to hold the scroll with one hand while unrolling it with the

1246. Emphasizing the anticipated negative answer, Miller, *Convinced*, 184–86, views it as an “insulting query” (186), though providential. Offering offense to such a dignitary may have been possible, but a foreigner so easily put off would probably not have come to Jerusalem; and given the complexities of the passage, even a Jew might have answered negatively.

1247. The older skepticism of Lake and Cadbury, *Commentary*, 96, about “educated Greeks and Romans” being unable “to read silently” is refuted by some ancient sources (see below).

1248. Accurate reading aloud was part of basic grammar education (Heath, *Hermogenes*, 11; cf. McNelis, “Grammarians,” 286). On differences between ancient and modern reading patterns, see Johnson, “Sociology of Reading.” People also memorized by reciting aloud rather than reading silently (Small, “Orator,” 202, citing Quint. *Inst.* 11.2.33).

1249. Cadbury, *Acts in History*, 18; Hendrickson, “Ancient Reading,” 192–93; Ferguson, *Backgrounds*, 98; Hanson, *Acts*, 110; Johnson, *Acts*, 155; cf. Witherington, *Corinthians*, 44; Harvey, *Listening*, 52; Aune, *Dictionary of Rhetoric*, 130, 397.

1250. Slusser, “Reading Silently,” cites Cyril Jer. *Procatechesis* 14 (on women ca. 350 C.E.; were women required to keep silent?).

1251. Gilliard, “More Silent Reading,” argues that reading aloud was not unusual; for evidence from classical Athens through the empire, see Burfeind, “Philippus” (with seven examples); Gavrilov, “Techniques”; for Roman poets (e.g., Ovid *Am.* 1.4.19–20), see Benediktson, “First Silent Reader.” It did happen, but reading aloud was far more common.

1252. Gamble, “Literacy,” 647; Harvey, *Listening*, 53; Bruce, *Commentary*, 187. Torah was read aloud (*m. 'Ab.* 6:5 [Danby, 6:6]; *b. Erub.* 54a); those who read consonantal scripts such as Hebrew would certainly have had to read aloud.

1253. For public recitations, see esp. Starr, “Reading Aloud”; Carcopino, *Life*, 193–201.

1254. See Gerhardtsson, *Memory*, 163–67, on the rabbis.

1255. Cf. Townsend, “Education,” 145.

1256. Talbert, *Acts*, 76 (citing *m. 'Ab.* 6:6 and also noting that rabbis often studied Torah on journeys; for discussion, see Keener, *Acts*, 1:589).

1257. Burfeind, “Philippus,” includes this among examples of being read to.

1258. E.g., Cic. *Fam.* 7.1.3; for a close scribe, see, e.g., 16.14.1–2; cf. also public readers in court settings (e.g., Isaëus *Pyrr.* 37–38) and religious settings (1 Esd 8:19). An awkward speaker could use a professional reader to deliver his work in public (Suet. *Claud.* 41.2). Use of scribes and readers did not reduce the prestige of the elite who could read and write (cf. McDonnell, “Writing”).

1259. Cf. Luke 4:16–17, where Luke presents favorably Jesus reading from Isaiah (albeit with messianic understanding, 4:21, in contrast to here).

1260. Le Cornu, *Acts*, 419.

other as one moved forward. Depending on the size of the carriage, the official may have had a servant to aid in unrolling the scroll. People traveled with scrolls,¹²⁶¹ and although some sages (at least in later sources) discouraged removing them from the Holy Land, it is doubtful that most people heeded this concern.¹²⁶²

LANGUAGE

Meroë had its own language, with (by this period) an alphabetic script.¹²⁶³ The official was probably not reading a scroll in Meroitic, but would he be reading it in Hebrew? If Philip was primarily Greek-speaking, how could he talk with the Ethiopian or understand that he was reading from Isaiah? It is possible that Philip could have known enough Hebrew to recognize a Scripture text, but it is probably too much for us to expect a Nubian God-fearer to read Hebrew poetry as well as converse with Philip in (presumably) Greek.¹²⁶⁴ Luke's Greek audience would know that Ethiopians were not normally among Greek-speaking peoples (cf. even northern Africans in Acts 2:10; the association with foreign languages in *Sib. Or.* 3.516). Even if Philip was a first-generation immigrant to Jerusalem and happened by chance to be from Alexandria, he probably was ignorant of the Egyptian language in the countryside and would surely be ignorant of Nubian languages many weeks' journey southward.

No person of means, however, would come from Ethiopia to Jerusalem without a translator or some knowledge of language. As a presumably educated member of the Nubian elite, this treasurer would likely speak several languages, including those relevant for trade ties with places such as Greek-speaking Alexandria in Egypt, to Meroë's north.¹²⁶⁵ Greek appears in Nubian inscriptions, including one mentioning the queen in 13 B.C.E.¹²⁶⁶ Coins from nearby Axum, dated before Ezana's conversion (in the early fourth century), use Greek inscriptions as well as a Roman design and a gold standard.¹²⁶⁷ An earlier king of Meroë appearing in Greek sources is said to have had a Greek education, which suggests one or more teachers of Greek there.¹²⁶⁸ Certainly knowledge of Greek would have been essential in relations with Ptolemaic Egypt,¹²⁶⁹ and in this period the ruling elite in Egypt, as in much of the eastern empire, continued to speak Greek.

Would Philip the Hellenist have recognized the words of Isaiah if they were being read in Hebrew, especially with a less familiar Nubian accent? It is possible that the official was reading Hebrew in a manner similar to the readings in Jerusalem, but it is no less possible that he was reading the Greek version, which prevailed in Alexandria and in most of the Mediterranean Diaspora.¹²⁷⁰ Although Jerusalem's own scribes

1261. *Ibid.*, 420, cites *m. Yebam.* 16:7; *y. Soṭah* 41a.

1262. Le Cornu, *Acts*, 420, citing *y. Sanh.* 3.6.21d.

1263. Hawass, "Nubia," 171; cf. the use of Egyptian hieroglyphs and its own alphabet in Seidlmayer, "Nubia," 869. From no later than the mid-second millennium B.C.E., Meroitic, apparently a north Sudanese language like Nubian, used "18 single-sound characters (15 consonants and 3 vowel signs) and 4 syllabic signs in a hieroglyphic form and the usually employed cursive form" (Lohwasser, "Meroitic").

1264. Fitzmyer, *Acts*, 412–13, thinks the scroll "in Hebrew, or less likely Greek." But while Hebrew Torah scrolls may have been preferred, MSS of the LXX show that Greek versions also existed, and if some people needed Greek scrolls, this official may have been among them. Admittedly, multilingualism is common (even among those lacking formal education), a pattern characteristic of much of the past generation in Africa (my wife, who is educated, speaks five languages).

1265. Cf. Philost. *Vit. Apoll.* 1.32, where the Persian king knows Greek fluently.

1266. Wilcken, *Chrestomathie*, 4.11 (followed by "the Lord Hermes!"); Deissmann, *Light*, 352.

1267. Heldman, "Axum," 239.

1268. Welsby, *Kingdom of Kush*, 194–95, noting Diod. Sic. 3.6.3 and an alphabet inscribed perhaps for educational purposes.

1269. Welsby, *Kingdom of Kush*, 67.

1270. Cf. LXX quotations in Asian Jewish funerary inscriptions (Trebilco, *Communities*, 58–84, esp. 60–78). Most of the LXX was in wide circulation long before this period (cf. Lewis, *Life*, 28–29; on the legend of its

probably did not produce biblical scrolls in the native language of Meroë, they would undoubtedly provide some in Greek,¹²⁷¹ whether for Jerusalem’s “Hellenists” (see comment on Acts 6:1) or for eastern Mediterranean Diaspora pilgrims.

Further, the treasurer undoubtedly passed through Alexandria on his way to Jerusalem, and wealthy Jews’ scrolls there would have been mostly in Greek. If he is reading in Greek, the official’s confusion is all the more understandable; the extant form of the LXX at this passage differed from the Hebrew and was confusing.¹²⁷² One might also point out that Greek was likely not his first language (in contrast to many members of urban elites in the eastern Mediterranean); but if he knows it well enough to converse intelligently with Philip, a reading knowledge would probably come even more easily. (Certainly there is no lapse in Greek fluency in his reported words; see comment on Acts 8:31.) Whatever the language the official was reading in, Luke reports the conversation in Greek and hence follows the LXX, as he normally does.

In Acts 8:31, the official uses sophisticated Greek, demonstrated in “the optative with ἄν”;¹²⁷³ because good writers sought to present speakers realistically (and Luke elsewhere does so, limiting Semitisms, e.g., primarily to particular settings), Luke portrays this Gentile as extremely well educated, articulate even in a language that was not his mother tongue.

The official wants someone to “lead” him.¹²⁷⁴ For an official to invite one into his chariot was to confer a great honor on him.¹²⁷⁵ This member of a royal court asks Philip to guide him in understanding Scripture; although wealthy people and kings hired sages and tutors, this reflects honor and certainly honors Philip’s knowledge and competence in this area above the official’s own. Such humility¹²⁷⁶ may flow partly from status inconsistency: though the official was of high status in his own culture, he was marginal in the world of his faith (especially if he was a literal eunuch). Yet Luke can use his humility toward Philip to encourage his own status-inconsistent audience: they may belong to a faith socially marginal in the empire, but various people of high status, including this official, listened to their spokespersons.

origin [*Let. Aris.* 301–11; *Jos. Ant.* 1.10–11; 12.48–49, 57], e.g., Greenspoon, “Mission”), although variants show divergent forms.

1271. Le Cornu, *Acts*, 419, notes that later rabbis wanted Torah scrolls written in Assyrian Hebrew script (*t. Sanh.* 4:7–8) but that some allowed for use of Greek, sometimes alongside Hebrew (*m. Meg.* 1:8; 2:1–2; *t. Meg.* 4[3]:13). For the sages’ approval of Greek translation, see also *Abot R. Nat.* 37, §94 B; *b. Meg.* 9a; *y. Meg.* 1:9, §4; *Gen. Rab.* 36:8 (though they favored the later work by Aquila, *y. Meg.* 1:9, §4; *Qid.* 1:1, §13; *Gen. Rab.* 70:5; 93:3; *Song Rab.* 1:3, §3; cf. changes that the LXX made, according to *y. Meg.* 1:9, §14). Even if the sages’ concerns are this early (the Torah sounded less pleasant in Greek, Sirach prol.), surely merchants and probably some scribes would have ignored them, given the prevalence of the LXX in Alexandria and trade ties between that massive Jewish center and Jerusalem.

1272. Ramsay, *Pictures*, 64–65.

1273. Barrett, *Acts*, 428: the construction by this period was viewed as “old-fashioned . . . or as a mark of education . . . ; certainly it is a sign of conscious style (cf. 17.18; 26.29; see Blass, Debrunner and Funk, *Grammar*, §385.1).”

1274. The term can apply to leading on a road (e.g., Luke 6:39; Rev 7:17; perhaps relevant to this road scene), but often it applies to leading in wisdom or moral rightness (Johnson, *Acts*, 156, cites LXX Pss 5:8; 22:3; 26:11; 72:24; 118:35; Eccl 2:3; Wis 9:11; 10:10; John 16:13; Rom 2:19; see also Wis 7:15). Philosophers spoke of deities (Epict. *Diatr.* 2.7.11; 3.21.12; Xen. *Cyr.* 7.1.10; cf. the δαίμων in Marc. Aur. 5.26–27; Iamb. *V.P.* 1.2; an angel in *Test. Benj.* 6:1) or reason (Plut. *Lect.* 1, *Mor.* 37E; Crates *Ep.* 31) as guides.

1275. 2 Kgs 10:15–16; Philost. *Vit. soph.* 1.488.

1276. Also Chrys. *Hom. Gen.* 35.5; *Hom. Acts* 19; Athanas. *Fest. Let.* 19.5 (Martin, *Acts*, 98–99). Chrys. *Hom. Gen.* 35.5 praises the official for inviting a lowly Jew into his chariot; more to the point (given the official’s devotion to the law) is the invitation to a pedestrian with obviously less means. Yet the official might expect a Jew who volunteers his knowledge in Scripture (as in Acts 8:30) to help him in the faith, probably more than (or at the very least, in addition to) his own attendants who were with him for the long journey. Seating arrangements also reflect a teacher’s status (Acts 22:3; Luke 10:39); most of the official’s attendants may be walking.

c. Scripture about Jesus the Servant (8:32–33)

Against some scholars, Luke applies the text quoted here, Isa 53:7–8, directly to Jesus instead of merely making a type or an analogy.¹²⁷⁷ This is not merely a righteous sufferer in general (as Luke could evoke with some other biblical citations; cf. comment on Acts 1:17, 20), since the official specifically asks of *whom* the text speaks.¹²⁷⁸

I. CORRELATIONS WITH JESUS

Jesus does not open his mouth (Acts 8:32)¹²⁷⁹ because he accepts his death as God's plan (2:23).¹²⁸⁰ In light of Luke's teaching elsewhere, the servant's "humiliation" invites his exaltation (cf. Luke 1:48; 3:5; 14:11; 18:14). The term used here for "humiliation" (ταπείνωσις) also connects Jesus, who is God's "servant" (a title in the Isaian passage's context), with Mary, the Lord's "servant," on whose ταπείνωσις (the only other Lukan use of the exact term) God looked favorably (cf. discussion at Acts 20:19, where Paul serves humbly).¹²⁸¹

Luke could understand the servant's "justice taken away" (Acts 8:33) as either Jesus's unjust condemnation (3:13–15; Luke 22:66–71; 23:23–24) or God's removing his condemnation by vindicating him.¹²⁸² In view of his life being "taken from the earth,"¹²⁸³ the former probably remains the primary sense, though the latter may be offered as a secondary wordplay. Luke includes the line about "explaining" (διηγέομαι bears this sense in Acts 9:27; 12:17; Luke 8:39; 9:10) the servant's "generation" (γενεά); Luke normally applies the noun γενεά to Jesus's wicked temporal "generation" (Luke 7:31; 9:41; 11:29–32, 50–51; 17:25; 21:32; Acts 2:40).¹²⁸⁴

The only other mention of a single "lamb" in Luke-Acts is the Passover lamb in Luke 22:7; the paschal lamb may have coalesced in early Christian thought with Isa 53:7.¹²⁸⁵ (Luke 22 also includes a saying that resembles a Markan saying alluding to

1277. Bock, *Proclamation*, 227–30. Appeal to a charismatic peshet technique at Qumran (Hill, *Prophecy*, 100) reads "charismatic" interpretation into both this Acts text and the Qumran scrolls. For the importance of this passage (and Acts 8 more generally) for Luke's theme of Scripture fulfillment (and no partiality), see Fabien, "Interprétation."

1278. Though Parsons, *Luke*, 104, and idem, *Acts*, 121, interestingly suggests that the foreign official himself (cf. Acts 8:34) may have been able to identify with the exclusion and subsequent exaltation of the servant here. Those who see new-Moses imagery in Isaiah's servant (Koester, *Paul in World*, 98) could connect this passage with the new Moses and servant of Acts 3:13, 22–23. For discussion of how the Isaian servant passages cohere, cf. comment on Acts 3:13; comment in Keener, *Matthew*, 273, 360–61.

1279. Although one might suppose a contrast with Philip opening his mouth (Acts 8:35), if there is any connection it is probably just one phrase suggesting the next (which Luke employs elsewhere, Luke 1:64; more relevant, Acts 10:34; 18:14).

1280. Tannehill, *Acts*, 111.

1281. Czachesz, "Logic," draws attention to the humiliation-exaltation pattern in Luke-Acts.

1282. Tannehill, *Acts*, 111; Gaventa, *Acts*, 144. A midrashic interpreter might associate the removal of "his judgment" with the removal of God's eschatological judgment on the people (Luke 10:14; 11:31–32); but "justice" (11:42) makes better sense here, and Luke (unlike Matthew) rarely uses midrashic wordplays. This sense would also fit Luke's emphasis on justice and concern about injustice (see, e.g., Luke 4:18–19).

1283. Some take this phrasing, too, as ambiguous (lit. "taken up from the earth"), allowing for the ascension (Acts 1:9–11; cf. Gaventa, *Acts*, 144; Wall, "Acts," 144), but this proposal, though possible, would again be at most the secondary sense (cf. *Pss. Sol.* 13:10/11). Interestingly, Bede *Comm. Acts* 8.33a applies Jesus's "judgment being taken" to a miscarriage of justice, but in 8.33c he applies Jesus's life's removal to his relocation to heaven. In any case, the variations in interpretive possibilities help explain the official's perplexity!

1284. Given Luke's usage, it is not impossible that Luke thinks here of Jesus's followers as Jesus's "people" in a sense (cf. γενεάν in Luke 16:8; Hamm, *Acts*, 45: "his growing band of post-Easter disciples, now including this eunuch"), but this is not very likely (at least, Luke has offered few clues). The original point was presumably that the servant's posterity was cut off because he died before he could have heirs, a matter of shame in the culture nevertheless reversed by God's exaltation (Isa 52:13; 53:10, 12). Some suggest that here the term applies to the servant's "family history" (see BDAG, definition 4), meaning that no one would regard him highly.

1285. Cf. Keener, *John*, 453–54.

Isa 53.)¹²⁸⁶ Sheepshearing was a familiar image because wool was a familiar substance.¹²⁸⁷ Although linen was becoming more dominant, wool was still used (see comment on Acts 1:10), and so, presumably, the cosmopolitan official would know it well despite its warmth for his region.¹²⁸⁸

II. THE ATONING SERVANT?

Luke's appeal to a servant context to which he has earlier made allusion reinforces the importance of this passage for understanding Luke's approach. (On Luke's use of "servant" passages in Isaiah, see also comment on Acts 3:13.) Further, contrary to what some scholars have argued, the concept of vicarious atonement was available in Judaism in this period.¹²⁸⁹

Many scholars stress Jesus's obedience or submission to suffering rather than vicarious atonement here,¹²⁹⁰ which could reflect the apocalyptic-sapiential tradition that looks on the fate of the persecuted wise man.¹²⁹¹ The quoted verses indicate a theology of Jesus's suffering but, indeed, not necessarily *vicarious* suffering.¹²⁹²

Yet are we to think that Luke knows only the verses that he cites here? Some doubt that early Christian authors¹²⁹³ expected their ideal audiences to recognize contexts, but Luke probably not only knew the context himself but (given the familiarity of the passage in early Christianity)¹²⁹⁴ expected his ideal audience to recognize it as well. If *testimonia* stand behind this quotation, the entire context may be implied; certainly Luke knew the context (Isa 52:13 in Acts 3:13; Isa 53:12 in Luke 22:37).¹²⁹⁵ Rhetoricians instructed students not to quote the entire passage if it was well known (Men. Rhet. 2.9, 413.30–31); writers also could assume a certain level of knowledge on the part of educated readers (Dion. Hal. *Isaeus* 14).¹²⁹⁶

Jewish authors frequently assumed knowledge of context.¹²⁹⁷ Because the law of tassels (Num 15:37–41) and Korah's rebellion (16:1–3) are near each other,

1286. Compare Mark 14:24 and esp. Mark 10:45 with Luke 22:27 (discussion in Keener, *Matthew*, 487–88, 631–33; cf. now Pitre, *Tribulation*, 416–17).

1287. See, e.g., Pliny E. *N.H.* 8.73.190–93; 8.74.194–97; Fronto *Ad M. Caes.* 1.8.3; Croom, *Clothing*, 26; Bauckham, *Climax*, 364–65.

1288. Linen was more common in Egypt (Cosgrave, *History of Costume*, 20) and presumably Nubia as well; but dyed garments tended to be woolen (Croom, *Clothing*, 26). Linen helped reduce perspiration (Ezek 44:18).

1289. See, e.g., 4 Macc 17:22; Kim, "Atonement"; cf. Kim, "Targum Isaiah 53." For the sacrificial value of death in the OT, see also Green, "Death," 208.

1290. E.g., Zehnle, "Salvific Character" (salvific but not atonement); cf. Jones, "'Servant' in Luke-Acts," 158–59.

1291. Decock, "Isaiah 53:7–8."

1292. Bruce, "Philip and Ethiopian," 382.

1293. Whether Paul (Tuckett, "Paul and Ethics") or Jesus (Mead, "Opinion," challenging Edgar, "Respect"); but this may underestimate memory skills for oral cultures.

1294. It was also familiar in early Judaism (see, e.g., Tångberg, "Justification"; Betz, "Servant Tradition") and is found in early haftarah readings (for seder 36; Le Cornu, *Acts*, 425, citing both a genizah manuscript and *b. Meg.* 24a, bar.), though excluded from later haftarah readings, undoubtedly in response to Christian apologetics.

1295. Bruce, "Philip and Ethiopian," 381–82; cf. Seccombe, "Luke and Isaiah"; Longenecker, *Exegesis*, 90–92, and sources cited there; Peterson, *Acts*, 295; for Luke's use of Isaiah's servant, see also Morris, *Cross in New Testament*, 141–42; (though he might appeal to psalms for the suffering image more often; cf. Jipp, "Messiah"). *First Clement*, which cites these verses of Isa 53 (*1 Clem.* 16.7), reproduces the entire context (16.3–14). Bos, "Prophet," uses Acts 8:32–33 to explain and illustrate hermeneutically how christological reading need not neglect the original context.

1296. Even allusions can sometimes evoke the general tenor of the context (e.g., tragedy; suggested in Trzaskoma, "Chariton and Tragedy" [for Char. *Chaer.* 2.9.3; 3.8.8; 3.10.6; evoking, e.g., Soph. *Ajax* 550–51; Eurip. *Her.* 1307–8]).

1297. Instone-Brewer, *Techniques*, esp. 167 (noting every case examined; cited in Pao, *Isaianic Exodus*, 29, though he suggests [n. 149] that this may not apply to "non-scribal exegetical traditions").

Pseudo-Philo makes the former the cause of the latter (*L.A.B.* 16:1). Although rabbis did not always assume a passage's context,¹²⁹⁸ they sometimes did.¹²⁹⁹ Thus, for example, one Tanna quotes part of Ps 1:1, assuming without repeating the context of meditating in the Torah (*m. 'Ab.* 3:2). Another passage quotes part of Exod 20:20, and a reference just beyond the quoted part appears in the explanation (*y. Qidd.* 4:1, §2).

Clearly, early Christians did understand Isa 53 as messianic prophecy,¹³⁰⁰ and the idea was widespread enough that Luke could not have been unaware that Isaiah was being used this way. Yet Luke not only fails to polemicize against this common idea but elsewhere does use a part of Isa 53 that would suggest atonement (Isa 53:12 in Luke 22:37).¹³⁰¹ Why appeal to a section of Scripture pregnant with vicarious imagery¹³⁰² and so often mined by early Christians for its applicability to atonement? Luke does not emphasize Jesus's vicarious death like some other NT writers (e.g., Paul in Rom 5:6–10; cf. also 1 John 2:2; 4:10), but neither does he appear to disagree with it,¹³⁰³ and some scholars find sufficient data to believe that he accepted it.¹³⁰⁴

This differed from what is thought to be the usual Jewish interpretation of the passage. There are some early messianic-type applications of the passage,¹³⁰⁵ and so it is possible that interpreters abandoned this approach in response to Christian usage.¹³⁰⁶ But it is hard to be sure even of this, given the scarcity of our sources. And even when the later Targum on Isa 52:13 and 53:4 applies it to the Messiah (perhaps in response to Christian claims?), the suffering applies only to other kingdoms (*Tg. Isa.* 53:3) or Israel (*Tg. Isa.* 53:4). (See comment on the servant at Acts 3:13.)

d. Eagerly Embracing the Message (8:34–39)

The official's intelligent question (Acts 8:34) immediately invites Philip's preaching of the good news of Jesus to him (8:35). Likewise, the official himself requests

1298. Rabbis often simply read tradition into passages, e.g., *y. Ber.* 2:2, §5; *Gen. Rab.* 44:7; Moore, *Judaism*, 1:428.

1299. Hilton and Marshall, *Gospels and Judaism*, 63 (citing *y. Ber.* 2:8).

1300. E.g., Matt 8:17; 1 Pet 2:22–25; 1 Clem. 16.3–14; Barn. 5.2; Poly. Phil. 8.1; Justin 1 Apol. 50; Dial. 13, 43; cf. Mark 10:45; 14:23; John 12:23, 32; Rom 4:25; Phil 2:7; cf. Taylor, *Atonement*, 14; Cullmann, *Christology*, 64–65; Higgins, *Son of Man*, 43; Jeremias, *Theology*, 292–93; Davies and Allison, *Matthew*, 3:95–97; Osborn, *Justin*, 103. The Peshitta may reflect a very unbiased Christian interpretation (Greenberg, "Indications").

1301. Larkin, "Old Testament as Key."

1302. Bright, *History*, 358–59, claims an almost unanimous consensus that Isa 53 is vicarious. For corporate personality in Isa 53, see Bright, *History*, 359; comment on Acts 3:13.

1303. He could not but have known of it. Belief in vicarious atonement was part of the larger Jewish milieu as well (see Daube, *New Testament and Judaism*, 11; Kim, "Atonement," esp. 143–45; Büchler, *Atonement*, 178). It is hardly plausible that the early Jewish sources (e.g., 4 Macc 6:27–29) derived it from the Christians (although later rabbis might or might not react against them). Rabbinic tradition mostly develops biblical teaching on the atonement sacrifice but emphasizes intention more (Neusner, "Sacrifice"; idem, "Sin, Repentance"). Atonement was also intelligible to Greeks (Hengel, *Atonement*, 28). For early Christianity, see, e.g., Morris, *Cross in NT*; some essays in Hill and James, *Glory*; despite concerns in some of modern theology, some other theologians continue to argue for a nuanced form of the view (e.g., Boersma, *Violence*; McKnight, *Community*).

1304. On Luke's theology of the atonement, see Peterson, "Atonement Theology," esp. 70 (noting dependence on Isa 53; surveying Luke's often proclaiming forgiveness in the setting of the cross and resurrection; and discussing Acts 20:28); Carpinelli, "Memorial" (noting specifically Lukan cultic motifs alluding to biblical atonement rituals); Parsons, *Luke*, 135 (following helpfully Moessner, "Christ," esp. 167); Zyl, "Meaning" (noting its salvific value). Cf. Park, *Herem*, 177–78 (though the connection with Canaanite kings in 149–53 based on contexts of some LXX vocabulary in Acts may be oversubtle).

1305. Qumran may use it in conjunction with the messianic era; Isa 53:5 might appear in 4Q521 2.7–8, 11–12, along with Isa 35:5–6; 61:1; with 2 III, 2 alluding to Mal 4:5–6 (Evans, "Messianic Apocalypse," 696 [on 4Q521]). Some also argue that Qumran applies the servant to the community's founder (Betz, "Servant Tradition"), and justification by the servant to themselves (Tängberg, "Justification").

1306. So, e.g., Bruce, *Acts*³, 227–28; idem, *Acts*¹, 193, noting the excision of precisely this portion from the later haftarah.

baptism (8:37) and orders the chariot to stop so he can enter the water (8:38). Much of the action is driven by the official (as in 8:31) or by God (8:26, 29, 39); apart from Philip's question in 8:30, Philip simply obeys and follows the lead of God and the official (8:27, 30, 35, 38, 40). The official's reading Isa 53 at the precise time of Philip's arrival (Acts 8:28–33) also points to divine coordination of the human behavior here. Just as Peter could justify his mission to Cornelius as obedience to God's command (both directly, 11:9, 12, and through obviously fortuitous circumstances, 11:13–16), Philip's mission bore God's initiative and approval.

I. EXPLAINING SCRIPTURE (8:34–35)

In 8:34 the official asks Philip of whom the text speaks. Joachim Jeremias identifies three traditional Jewish interpretations of the servant, though not all are demonstrably pre-Christian: Israel, the prophet himself (though esp. using Isa 49:5; 50:10), or some other individual.¹³⁰⁷ Some of the servant material in Isaiah appears in the first-person singular (49:5; 50:4–5), and prophets could describe themselves in this manner (Jer 11:18–20).¹³⁰⁸ The Qumran *Peshar Habakkuk* applies Habakkuk's words to individuals;¹³⁰⁹ later rabbis applied Isa 50:6 to the prophet himself (*Lev. Rab.* 10:2, even more surprisingly applying Mic 5:1 to Micah). But because other verses refer plainly to Israel (e.g., Isa 41:8–9; 44:1–2, 21; 45:4; 48:20; 49:3) and some appear to distinguish the servant from Israel (Isa 49:5–7; 53:4–6), it is hardly surprising that the official was confused. (For a messianic reading of the servant's mission possible for Luke's setting, see comment on Acts 3:13.) For Luke's audience, however, it will be clear that the prophet does not speak concerning himself. Those who spoke concerning themselves were false leaders (note *ἑαυτοῦ* in 5:36; 8:9; cf. Luke 9:23; 16:15; 20:20), and the prophets spoke concerning Jesus (Luke 24:27, 44; Acts 3:18, 24; 10:43; 26:22; 28:23).

As Philip expounds Scripture (Acts 8:35), the informed reader may well think of another reading scene, Luke's programmatic scene in his Gospel where Jesus applies the Isaiah scroll to his own ministry.¹³¹⁰ One might start from an interlocutor's objections, making this the beginning of one's account (*ἀρχὴ τοῦ λόγου*, Philost. *Hrk.* 7.12); "beginning" from the start is also a familiar Lukan way of putting matters (Acts 1:22; 10:37), including how he presents Scripture exposition in a more directly parallel scene (Luke 24:27).¹³¹¹

II. THE OFFICIAL'S BAPTISM (8:36–38)

The first Gentile conversion story, this narrative is part of a much larger body of conversion accounts in Acts.¹³¹² The Nubian official's saving faith may recall that of another Nubian eunuch official in Jer 39:18 (46:18 LXX).¹³¹³ At the point of his baptism, the eunuch, previously excluded from full initiation into Judaism through

1307. Jeremias, "Παῖς," 684–89.

1308. Witherington, *Acts*, 299.

1309. Fitzmyer, *Acts*, 414 (citing 1QpHab II, 1–15).

1310. Cf. Darr, "Watch How You Listen," 90.

1311. Cf. also Parsons, *Luke*, 105. For the road to Gaza passage as parallel to the road to Emmaus passage, see "Literary Features" in my introduction to Acts 8:26–40.

1312. Matson, *Conversion Narratives*, 11, assigns to them more than a quarter of Acts' narrative. For conversion narratives in Luke's Gospel, see Méndez-Moratalla, *Paradigm*. Henderson, "Baptized," focuses on the conversion aspect of the narrative (though probably playing down too much the "Ethiopian" and "eunuch" significance).

1313. Scott, "Horizon," 534 (the LXX language for "saving I will save" is effective, though there it refers to the sword and Acts 8:36 lacks the same terminology; the LXX does use, however, a form of *πεῖθω* instead of the expected *πιστεύω*).

circumcision, is now welcomed into the eschatological heart of Judaism (via the other Jewish initiatory rite, baptism, on which see comment on Acts 2:38).

The Nubian treasurer’s “What prevents [κωλύει] me from being baptized?” is a natural question, given his background. Some scholars have viewed this as a liturgical question asked of those seeking baptism, given its use with baptism in Acts 10:47.¹³¹⁴ But the issue in both cases is not a general “If anyone has objections” (as at modern Western weddings) but the controversial issue of uncircumcised Gentiles being baptized (see 11:17),¹³¹⁵ a point quite important to Luke (cf. ἀκωλύτως, the final word in 28:31).¹³¹⁶ Further, it is not the ministrant but the candidate who asks the question here,¹³¹⁷ and the expression τί κωλύει “seems to be a fairly common idiom whose meaning differs little from Why not?”¹³¹⁸

Some, especially Stoic philosophers, used κωλύω to refer to no one’s being able to hinder one’s obedience to the divine will.¹³¹⁹ More important is that it applies to the threat of exclusion in several passages in Luke-Acts. In the Gospel of Luke, Jesus opposes disciples who exclude others not part of their group (Luke 9:49–50), teachers of the law whose teaching keeps others from the kingdom (11:52), and disciples who exclude children (18:15–17); this principle carries over into God’s not excluding Gentiles in Acts (Acts 10:47; 11:17).¹³²⁰

Scholars today are accordingly more skeptical that this question represents a liturgical formula.¹³²¹ The parallel with Acts 10 suggests not an earlier liturgical pattern (however useful some may find it as a foundation for a later one) but the parallel between the two “first Gentile conversions”: the chronologically first account that Luke has and the first one recognized through an official debate of the Jerusalem church.

The real issue is that this African God-fearer has been denied full conversion to Judaism, offered through circumcision (see comment on Acts 15:1) and baptism (see comment on Acts 2:38).¹³²² If Philip “started” with Isa 53 (Acts 8:32–35), Luke’s biblically informed audience would not be surprised if his exposition reached the relevant passage about God accepting foreigners and eunuchs just three chapters later (Isa 56:3–8).¹³²³ Now the eunuch puts the matter to the test. Depending on the nature of his castration, he might have even been physically incapable of being circumcised (more likely he was simply ritually prohibited because of removal of the testicles), but Christian baptism¹³²⁴ would be available to him (and less painful to

1314. Cullmann, *Baptism*, 71–80 (citing also some possible patristic evidence); cf. Anderson, *Mark*, 247; Haenchen, *Acts*, 313; Bruce, *Commentary*, 231n60. *Ps.-Clem. Hom.* 13.5.1 does involve baptism, but it surely depends on the model stemming from Acts.

1315. Barrett, *Acts*, 432.

1316. The verb appears twelve times in Luke-Acts, about half the NT uses; the adverb appears only in 28:31 in the NT.

1317. Bruce, “Philip and Ethiopian,” 383–84.

1318. Barrett, *Acts*, 432 (citing Plato *Euthyphro* 9D; *Jos. War* 2.395; an analogous Latin construction in *Virg. Aen.* 5.631; *Petron. Sat.* 104, 127).

1319. E.g., *Test. Job* 3:7/6; *Mus. Ruf.* 16, p. 104.30 (cf. 11, p. 80.27); *Epict. Diatr.* 1.25.3; 2.17.22; 2.19.32; 4.13.24 (cf. also 1.12); *Marc. Aur.* 3.12. The Stoic use applies primarily to being unhindered if one desires nothing but God’s will.

1320. Cf. also Spencer, *Philip*, 183–85.

1321. E.g., Lewis, “Mark 10:14”; Bruce, “Philip and Ethiopian,” 383–84; Barrett, *Acts*, 432.

1322. Cf. also Spencer, *Philip*, 183. Removal of the penis would render circumcision physically impossible, but castration normally involved only the testicles (e.g., *Dio Chrys. Or.* 33.39; *Soranus Gynec.* 2.17.40 [37.109]) and hence would exclude circumcision for ritual, rather than physical, reasons.

1323. Even skipping ahead to suitable passages would not be prohibited, even during public readings of the prophets (Abrahams, *Studies* [1], 8–9, citing *m. Meg.* 4:4); later rabbis warned against skipping backwards, however (*b. Meg.* 24a). In later haftarah readings, if the reading of ten verses ended on a sad note, the reader would, for his final words, skip as far as necessary to end on a happy note (Patte, *Hermeneutic*, 40).

1324. Perhaps some Jewish baptisms apart from proselyte baptism would have been available.

him) either way.¹³²⁵ This step, in the case of one barred from circumcision, prefigures the church's decision in favor of accepting Gentile converts without circumcision (cf. Acts 11:18; 15:29).¹³²⁶

The question of where the eunuch sighted water may interest us but is not relevant to Luke's narrative, since it is unlikely that Luke himself knew the site and unlikelier still that his audience would have recognized any name had he given it.¹³²⁷ Writers list four primary alternatives:¹³²⁸

1. Wadi el-Hasi, near the coast north of Gaza, supported by tradition¹³²⁹
2. Ein ed Dirweh, on the southern road from Jerusalem to Hebron, in the hill country
3. Ein Hanniya, just west of Ein Yael (below)
4. Ein Yael, only five miles south of old Jerusalem on the northern and most direct route between Jerusalem and Gaza (that it was paved [helpful for chariots] and people appear to have lived there in this period also favors it)

Which of these views is likeliest depends on other reconstructions: how far was Philip on the road from Jerusalem to Gaza, and had he passed Gaza (and hence needed an oasis in the desert) or was he in a well-watered region? These are questions for which the text, our only early source, provides no answers. Springs and possibly wadis appeared within visual range of both roads that Philip could have taken.¹³³⁰ Further, the terrain has changed over two millennia, and so other sites that may have once presented themselves may be no longer available. Any location is therefore a guess.

Some think that Luke might envision "a pool or even a stream . . . or possibly a small oasis (if he thought of it as a desert road—8.26),"¹³³¹ but if the official knew and approved of Judean tradition, he would probably at least have waited for a place with running water¹³³² and a volume of more than forty *se'ahs*.¹³³³ The tradition of any site

1325. Gage and Beck, "Barren Woman and Eunuch," argue that his conversion symbolically reverses his sterility.

1326. Detractors in Acts 11:3 and 15:5 might have protested, but practitioners on the "mission field" such as Philip and Paul were far enough removed from potential protests to pursue the Spirit's leading without immediate concerns about such constituencies.

1327. Perhaps even Philip, had he had occasion to travel the road again after two decades, would not have been able to distinguish one site from another. But even if he could identify it by sight, it is unlikely that he or the official, neither of whom often traveled in that region, would know the site's name; and Luke does not report from Philip even the official's name. There were Jewish settlements at some oases (for late Roman and Byzantine En-gedi, see Hirschfeld, "En-Gedi").

1328. Conzelmann, *Acts*, 69; Larkin, *Acts*, 135; esp. Rapuano, "Ein Yael?," 48. There also are some mikvaot, presumably for pilgrims, on the road south from Jerusalem (Amit, "Miqveh Complex"; Peleg and Amit, "Another miqveh"; further from the road, Zissu and Ganor, "Horvat 'Ethri"). Bede *Comm. Acts* 8:36a (following Jerome *De situ et nominibus locorum hebraicorum* [PL 23:882AB]) notes a spring at the foot of a mountain at the twentieth milestone when one travels from Helia to Hebron.

1329. Bruce, *Acts*¹, 194: "This place is still pointed out, whether rightly or wrongly who shall say?" The well "lies between Eleutheropolis and Ashkelon, according to the *Itinerarium Antoninianum* 32" (Conzelmann, *Acts*, 69). Supporting this site, see esp. Horton and Blakely, "Behold, Water!" (noting that as pointed out in 1838, the site fits clues in the text, such as an obvious site with fresh water on the old road).

1330. Le Cornu, *Acts*, 433.

1331. Dunn, *Acts*, 115. Even baptism in public baths could be possible (cf. Acts 2:41; comment on Acts 18:8; 19:5; Meeks, *Urban Christians*, 237n49).

1332. Later rabbis allowed only a small part of drawn water (*m. Ter.* 5:6; *'Ed.* 1:3; 7:3–4; *Miqw.* 2:3ff.; 3:1–4; 4:1–5; 5:1–6; *t. Miqw.* 2; *'Ed.* 1:3; *Sipra Sh. par.* 9.118.1.1; *b. Šabb.* 16b; 65a; 144b; *Pesah.* 17b, 34b; *Bešah* 18; *Giṭ.* 16a; *Mak.* 4a; *Bek.* 55b; *y. Ter.* 4:12, 5:7); for archaeological confirmation that this reflects more widespread and early tradition, see Avigad, *Jerusalem*, 139; Pearlman, *Zealots*, 180–81; Yadin, *Masada*, 166; Hachlili and Killebrew, "Saga," 44, 46.

1333. Cf. Le Cornu, *Acts*, 433. Later rabbis demanded forty *se'ahs* (*m. Miqw.* 2:1–2; 7:6–7; *t. Ber.* 2:12; *Sipra VDDen. pq.* 6.9.7.1; *Sipra Sh. par.* 9.118.1.1; *Sipra Zabim pq.* 6.158.2.1–2; *b. Ber.* 22ab; *Qidd.* 66b, 79a;

apart from those nearest Jerusalem would surely be later local inference or boasting, since haggadah abhors a vacuum; no accidental local witnesses of the event would have understood and preserved it, and Philip the evangelist is unlikely to have revisited the site simply to signal its location for later pilgrims. If we read “noon” and assume that the “absurd command” is explained by Philip’s encounter, however, a site near Jerusalem is likelier than the farther sites.¹³³⁴ Coming on water at precisely this time (especially if “desert” refers to the road, 8:26, though this would imply a site farther south) shows God’s sovereign timing, just as Philip’s meeting the African official did.¹³³⁵

There is no catechetical or trial period as in later Christian practice, though neither is there opportunity for one here (8:39). Acts 8:37 may have answered the church’s need for at least elementary questioning,¹³³⁶ but Philip has engaged the man in a lengthy conversation from Scripture, and Luke is more content to trust Philip’s sense from the conversation that has been going on (8:35–36).¹³³⁷ Metzger rightly points out, “There is no reason why scribes should have omitted the material, if it had originally stood in the text.”¹³³⁸ All the earliest Greek manuscripts omit 8:37, as do the third- and fourth-century Coptic manuscripts, fifth-century Syriac manuscripts, the Ethiopic manuscripts, and even the majority of the Byzantine lectionary readings. Though manuscripts including it have also a wide geographic distribution (including to the north [e.g., the Armenian and Georgian] and west [the Italic]), the only early support appears in Old Latin manuscripts; they begin appearing in Greek under the influence of Latin, notably in a sixth- or seventh-century manuscript in Greek and Latin.¹³³⁹ The wide range of variation even among the manuscripts that include them is common among passages interpolated at a late date. Church fathers quote the passage widely (Iren. *Her.* 3.12.8), but what probably began as oral tradition and marginal notations took some time to work its way into the text.

The eager official appears to drive the action here; Luke reports Philip’s cooperation but not his speech (there is little likelihood that 8:37 is original).¹³⁴⁰ That both “descended”¹³⁴¹ into the water in Acts 8:38 is in keeping with the Jewish custom of immersing proselytes (see comment on Acts 2:38) and John’s pattern of baptism in the Jordan (Luke 3:3, 7, 21). One could supervise ritual immersions without entering the water oneself, but given John the Baptist’s pattern in the Gospel, we might well take for granted Philip’s presence without its explicit mention. Luke’s specification of both descending into the water (8:38) is emphatic, since the implied subject of the

Erub. 35b; *Pesah.* 109; *Yoma* 31; *Zebah.* 22a; *Hul.* 31a; *y. Hag.* 2:5, §3), so that the water covered the body (*m. Miqw.* 9:1–4; *Sipra Zabim* pq. 6.158.2.1–2, 3.5; *b. Hul.* 10a, 106b; *Qidd.* 25a).

1334. This could favor Ein Yael, with Rapuano, “Ein Yael?” and Larkin, *Acts*, 135.

1335. Witherington, *Acts*, 294.

1336. Contrast Carson, “Acts 8:37,” who thinks that Constantine ordered the verse omitted to make Cornelius the first convert, but this leaves the silence of early Egyptian sources implausible. Bede *Comm. Acts* 8.36b–38 acknowledges the textual variation but also thinks that the line was removed (“through scribal error” [L. Martin, 84–85; quote, 85]).

1337. Cf. Klauck, *Magic*, 28. Though some (I believe wrongly) question whether the Samaritans were genuinely converted, and hence object to Philip’s readiness to baptize in Acts 8:12, they normally do not repeat that questioning here; it would run counter to the supernatural character and positive function of the narrative.

1338. Metzger, *Textual Commentary*, 359.

1339. An earlier Greek and Latin text (Codex Bezae) omits them (Ladd, *Criticism*, 68). But 88 may be fifth century; E is from the sixth. This is a later Western expansion than the generally (on Acts) expansive Western tradition.

1340. See also Parsons and Culy, *Acts*, 167; esp. Metzger, *Textual Commentary*, 359–60.

1341. The presence of the same verb at Acts 8:26 (signifying there the geographic and perhaps theological elevation of Jerusalem) is likely coincidence; Luke employs καταβαίνω some thirty-two times; it was natural language for descending into an immersion pool (though, in the NT, cf. only John 5:7; in other baptismal contexts, the Spirit descends, Matt 3:16; John 1:33).

plural verb would have been sufficient to make the same point. Perhaps (though it is difficult to be certain) Luke explicitly mentions their joint descent to emphasize that Philip participated in the water alongside the official instead of simply supervising him, as was common in baptisms; being in the water together placed them on the same level before their Savior. Or perhaps Luke emphasizes the official's humility (though it is difficult to envision how a first-century Jewish immersion could have been undertaken without him entering the water).

If Philip met the official on the same day as he departed (cf. Acts 8:26), then, given the eunuch's continued journey in 8:39, the hour must be early to mid-afternoon. Depending on the time of year and which road they took (see discussion at Acts 8:26; the Judean hills would be cooler than the coastal plain, and they may still be near Jerusalem), the water might have been refreshingly cool in contrast to midday heat or perhaps unpleasantly cool.¹³⁴² But the text does not provide enough details to resolve the question; the function of proselyte baptism was conversion, not momentary refreshing.¹³⁴³

III. THEIR PARTING (8:39)

The closing verses of the section (8:39–40) recall earlier joy at conversions (8:8, 39) and frame Philip's recorded ministry with "passing through evangelizing" (8:4, 40).¹³⁴⁴

Pagan Greeks might think of invisibility in their stories. The helmet of Hades caused invisibility,¹³⁴⁵ and deities could shroud themselves¹³⁴⁶ or their favorite mortals¹³⁴⁷ in mist or a cloud to render them invisible. Greek folklore also assumed that deities assumed various familiar shapes to communicate with people or to disguise themselves or escape;¹³⁴⁸ Jewish texts speak of the disguises of angels¹³⁴⁹ and sometimes of God disguising mortals;¹³⁵⁰ Jesus himself is unable to be recognized at times after the resurrection (Luke 24:16).

Philip, however, does not become invisible or wear a disguise here; he is carried away. Divinely aided transport of some sort appears in various ancient sources.¹³⁵¹ Deities were thought able to fly when needed (Hom. *Od.* 1.319–20; Eurip. *Bacch.* 655) and could also lift favorite mortals out of danger¹³⁵² or carry them off by means of

1342. Ancients appreciated hot water for bathing (Xen. *Mem.* 3.13.3; Ap. Rhod. 3.272–73; Vitruv. *Arch.* 5.10.2; Sen. *Y. Nat.* Q. 3.24.2–3; Petron. *Sat.* 72; Forbes, *Technology*, 6:43–57; in Palestine, Cornfeld, *Josephus*, 482, 488), and hot springs were often used therapeutically (e.g., Vitruv. *Arch.* 8.3.4; Pliny E. *N.H.* 31.31.59–61; Plut. *Sulla* 26.3; Soranus *Gynec.* 1.15.49; Philost. *Hrk.* 23.30; others in Keener, *Matthew*, 158, esp. nn. 247–49).

1343. The Essenes, who emphasized purity, allowed one to descend to bathe even on the Sabbath where one finds water (CD XI, 1).

1344. Tannehill, *Acts*, 112.

1345. E.g., Aristoph. *Acharn.* 390; Soph. *Inachus* frg. 8, 26 (*SPap* 3:24–25); Apollod. *Bib.* 2.4.2.

1346. E.g., Hom. *Il.* 16.788–89; 17.551–52; Ovid *Metam.* 12.598–99; Sil. It. 9.488. They could also escape by flying over walls (Eurip. *Bacch.* 655, reflecting staging limitations).

1347. E.g., Hom. *Il.* 3.381; 5.23, 344–45; 20.321, 443–46; 21.597–98; 24.334–38; *Od.* 7.14–17, 41–42; 13.189–93; Soph. *Ajax* 70, 83–85; Eurip. *Hel.* 44–45; *Iph. Taur.* 27–30; *Orest.* 1629–36; Ap. Rhod. 3.210–13; 4.647–48; Virg. *Aen.* 1.411–14, 439–40; 12.52–53, 416; Ovid *Metam.* 5.621–24; 12.32–34; 15.538–39; Philost. *Vit. Apoll.* 4.16; Apollod. *Bib.* 3.6.8; Sil. It. 9.484–85. Mist was also used to conceal horses (Hom. *Il.* 5.776; 8.50) or to rape mortals (Ap. Rhod. 1.218; cf. Ovid *Metam.* 1.601–6); transformations also concealed mortals (Hom. *Od.* 16.454–59; Ovid *Metam.* 8.851–54, 872–74); cf. temporary invulnerability (Apollod. *Bib.* 1.9.23).

1348. E.g., Hom. *Il.* 4.86–87, 121–24; Apollod. *Bib.* 2.4.8; 3.8.2; 3.10.7; 3.12.6; 3.13.5; see the much fuller listing of sources in the comment on Acts 1:3 (Keener, *Acts*, 1:667–68). They could also disguise the appearance of mortals (e.g., Hom. *Od.* 13.397–99) and become invisible (*Il.* 5.845).

1349. See Gen 18; Tob 5:4–6, 12; 9:1–5; 12:19; Philo *Abr.* 114; *Sipre Deut.* 38.1.4; y. *Pe'ah* 3:8, §3; Heb 13:2; cf. Judg 6:22; 13:20–23; Luke 24:16, 31. Also Satan in *Test. Job* 6:4; 17:2/1; 23:1; cf. *Pesiq. Rab Kah.* 26:2. 1350. *L.A.B.* 12:1; 61:9; 64:4.

1351. On instant teleporting, see, e.g., Philost. *Vit. Apoll.* 8.10–11; a Greek source in Bultmann, *Tradition*, 238n1; or (for Pythagoras teaching in two locations simultaneously) Iambl. *V.P.* 28.134; in Jewish circles, see John 6:21; Verman and Adler, "Path Jumping"; cf. *Gen. Rab.* 59:11; and further discussion below.

1352. Hom. *Il.* 20.325–27 (if redactional, it is still pre-Christian); *Cypria* 8 (as summarized in Proclus *Chrestomathia*, which the editor supplements by Apollod. *Epit.* 3.1–33; *GEF* 75).

the winds.¹³⁵³ A deity could also lend a mortal means for flight; Athena gave Perseus winged feet.¹³⁵⁴ Later sources claimed that Abaris flew on a magic arrow¹³⁵⁵ and gave one to Pythagoras so that he could do the same;¹³⁵⁶ Protesilaus, a semidivine hero, was said to lift off the ground when running (Philost. *Hrk.* 13.2–3). Witches, too, were thought to fly at night,¹³⁵⁷ and one deliberately fantastic tale speaks of seeing the Hyperborean magician flying in daylight.¹³⁵⁸ Apparently such claims were familiar enough for magicians that one curious about magic might wish to see someone flying (Lucian *Lucius* 4).¹³⁵⁹ Brahman sages could levitate two cubits off the ground as part of their homage to the sun (Philost. *Vit. Apoll.* 3.15, 33).¹³⁶⁰

Philip does not fly or levitate; he is carried, which appears in some of the Greek stories above but is more dominant in Jewish accounts. In Jewish sources, Baruch was carried away by a strong spirit (or wind) in 2 *Bar.* 6:3 (though the sense may be visionary).¹³⁶¹ In a clearly early and widespread story, the angel of the Lord lifted Habakkuk by his hair, bringing him to Babylon to bring Daniel his dinner (Bel 36). Such Jewish sources could claim dependence on biblical tradition: Ezekiel was carried away by the Spirit (albeit in visions; Ezek 3:12, 14; 8:3; 11:1, 24; 43:5).¹³⁶² Relevant in view of other probable Elijah parallels in the story (see comment on running to the chariot at Acts 8:29–30) is that some thought that Elijah could be carried from one place to another (1 Kgs 18:12) and eventually he was, indeed, caught up, albeit to heaven (2 Kgs 2:11; cf. comment on Acts 1:8–11 for ancient analogies, though Luke does not provide sufficient literary parallels to Jesus’s ascension here to provide any direct connection with that). Later rabbis spoke of sages teleported from one place to another or the earth contracting, sometimes resembling broader Greco-Roman ideas.¹³⁶³

Luke emphasizes the eunuch’s joy, which occurs in conjunction with some other conversions in Luke-Acts (e.g., Luke 15:5–10, 32; Acts 8:8; 16:34; see comment on Acts 8:8). Because the eunuch’s reception of the Spirit is not narrated, some scholars think that his “rejoicing” is intended to signify reception of the Spirit.¹³⁶⁴ Paul and

1353. Philost. *Hrk.* 25.10.

1354. E.g., Lucian *Dial. S.-G.* 323 (14, Triton and Nereids 2).

1355. Iambl. *V.P.* 28.136.

1356. Iambl. *V.P.* 19.91; 28.140. Pythagoras was also able to be in two places at once, though the locations were days apart (Iambl. *V.P.* 28.134, 136; cf. John 6:21).

1357. Lucian *Dial. C.* 1 (Glycera and Thais), 281.

1358. Lucian *Lover of Lies* 13.

1359. The mistress would turn into a bird (Lucian *Lucius* 12). For other sources, including Lucian’s Hyperborean magician, see Blackburn, “ΑΝΑΠΕΣ,” 190. Note the same claim about Simon; see comment on Acts 8:9–11. On witches’ (and shamans’) flight in some unrelated traditions, see, e.g., Filson, “Analysis,” 76.

1360. Attempts to verify levitation have so far tended only to disconfirm it (see Benson, *Healing*, 166), though cf. McClendon, *Events*, 216–17 (including a case he witnessed on 217, while allowing for the possibility of fraud; cf. another’s claim on 144–45; idem, *Healing*, 59).

1361. Perhaps most interesting is that 4 *Bar.* 6:1–2 has Jeremiah’s Ethiopian eunuch, here called Abimelech, taken by an angel to find Baruch; but 4 *Baruch* is too late and not widely enough read to reflect a tradition used by Acts here, and the parallel is not close.

1362. Cf., e.g., 1 *En.* 14:25; 71:1 (his spirit), 5–6; 87:3; 2 *En.* 7:1 (by angels); 2 *Bar.* 6:3–4; *Test. Ab.* 8:3 B (by Michael, bodily, i.e., while still alive); Rev 4:1; 17:3; 21:10; *Odes Sol.* 36:1; *Herm.* 1.1.1; 1.2.1. Cf. also sources in Furnish, *II Corinthians*, S25; Keener, *Revelation*, 170.

1363. See Verman and Adler, “Path Jumping” (citing *b. Sanh.* 95ab; *Yebam.* 116a; also medieval “path jumping”; cf. Philost. *Vit. Apoll.* 4.10.363–64); *Gen. Rab.* 59:11. Cf. also Muhammad’s “Night Journey” (Qur’an 17.1), traditionally interpreted as a miraculous flight from Mecca to Jerusalem; modern claims of rapid teleporting, e.g., Yun, *Heavenly Man*, 39. The surmise of Blaiklock, *Acts*, 81 (cf. Peterson, *Acts*, 297; cf. perhaps Mark 1:12), that the Spirit merely urged Philip to withdraw is a naturalistic modern reading that likely would have eluded Luke’s audience. For some modern claims of supernatural relocation, see, e.g., Llewelyn, “Events,” 260; Koch, *Revival*, 145–46; Wiyono, “Timor Revival,” 288; Sithole, *Voice*, 178; Yun, *Heavenly Man*, 39; Kay Fountain, interview, Jan. 29, 2009.

1364. Lampe, *Seal*, 65.

occasionally Luke associate the Spirit with joy (Acts 13:52; Rom 14:17; 15:13; Gal 5:22; 1 Thess 1:6), yet the Samaritans received joy without the full ministry of the Spirit (Acts 8:8, 15).¹³⁶⁵ Was Philip unable to impart the Spirit through the gospel and baptism without the laying on of apostles' hands (8:15–17; cf. 2:38)? If so, we may doubt whether the official, lacking the Spirit, could accomplish much evangelism in his homeland (1:8), and Luke's own generation would also fail in its implied task. But even when apostles are present, the reception of the Spirit is usually not narrated (e.g., in 2:41, despite the likelihood that this happened [2:38]; also 16:33–34), yet when the Spirit was not received, this deficiency was thought worthy of immediate attention (8:15–16). Thus Luke presumably expects us to assume that the African official did receive the Spirit.¹³⁶⁶ Certainly we are not left to doubt whether the Spirit was active through Philip, since it was the Spirit who initiated the encounter (8:29) and the Spirit who in this same verse carried Philip away (8:39).

If, as suggested above, the African official was not a full proselyte, he might have felt disappointed that he could not enter the temple beyond the outer court; his high status in his own society did not translate much into high status in his adopted faith.¹³⁶⁷ Now, however, his visit to Jerusalem has proved amply rewarded by Israel's God. As noted above, his rejoicing parallels that of the Samaritans during their conversions (8:8).

Later traditions elaborate on the eunuch. The most plausible among them is that he became a missionary to his own people (Iren. *Her.* 3.12.8). Later Epiphanius claimed that the eunuch preached in Arabia Felix and the coasts of the Red Sea and was martyred and that his tomb worked miracles; other apostles also allegedly preached in Nubia.¹³⁶⁸ But these traditions probably simply seek to fill some of the many gaps in our knowledge.

e. Philip's Continuing Ministry (8:40)

Luke frames Philip's ministry with "passing through" and "evangelizing" (Acts 8:4, 40). The only other conjoining of διέρχομαι and εὐαγγελίζω in Luke-Acts (or the NT) is the apostles' mission in Luke 9:6, which shows that Philip carries on this line of work (perhaps, but not necessarily, also suggesting that the apostles should have continued to do the same). Because preaching the gospel on the way to one's destination resembles the summary of continuing ministry in Acts 8:25, it frames Philip's climactic ministry to the African official and caps off each of the two sections on Philip's ministry with continuing ministry (even though 8:25 may refer only to that of Peter and John).

The summary of 8:40 reveals that Philip's evangelistic mission extended throughout the coastal plain en route to Caesarea; Luke has simply provided the most dramatic (and in terms of the Gentile mission, foundational) example in more detailed form.¹³⁶⁹ "Azotus" is the ancient Philistine city of Ashdod (twenty-four times in the LXX),¹³⁷⁰

1365. Also Spencer, *Philip*, 215.

1366. Some later MSS and patristic tradition sought to make this more explicit; see Crehan, "Confirmation of Eunuch."

1367. Esler, *Community*, 154–57. Luke thus had to address the centrality of the temple in Acts 7 before the conversion of Samaritans and God-fearers in Acts 8.

1368. Lake and Cadbury, *Commentary*, 98.

1369. Spencer, *Philip*, 152–53. We cannot be sure whether Philip provided details on the rest, but if not, he offered, presumably, his "best story." By itself, that Philip "found himself" at Azotus perhaps could simply mean that he went there (Turner, *Grammatical Insights*, 158; for the idiomatic use of this verb in the passive voice, common in the LXX [e.g., Gen 2:20; 18:29–32; Exod 9:19; 1 Sam 25:28; Mal 2:6], cf. Luke 9:36; 17:18; Acts 5:39, though not in the Diaspora parts of Acts), but in view of Acts 8:39 the *means* of his arrival presupposed in 8:40 remains dramatic.

1370. E.g., Jdt 2:28; 1 Macc 4:15; 5:68; 9:15; 10:77–78, 83–84; 14:34; 16:10. Ancient Ashdod comprised some ninety acres, including twenty for the citadel (Kitchen, *World*, 12).

a well-planned town in Hellenistic times.¹³⁷¹ Azotus was about 2.5 miles (or about 4 km.) from the sea, nine miles (or 15 km.) from Ashkelon, twenty miles northeast of Gaza (about a day's walk from there), more than thirty miles (more than a full day's walk) "almost due west of Jerusalem," and "about halfway between Gaza and Joppa."¹³⁷² This might suggest that Philip and the eunuch were farther along the road than one would guess if it were still near "noon" (8:26); then again, we need not suppose that the Spirit carried him only nearby (cf., e.g., Ezek 8:3).¹³⁷³ The coastal towns between Azotus and Caesarea included Yavneh, Antipatris (Acts 23:31), Lydda, and Joppa (9:32–43; 10:5–23).¹³⁷⁴ Because some of these towns soon appear in Peter's ministry, Philip again functions as a forerunner of Peter's ministry, as he did in Samaria.¹³⁷⁵ The reader is thus not surprised to find disciples in Lydda (9:32) and Joppa (9:36) later;¹³⁷⁶ as the Jerusalem church heard of revival in Samaria (8:14), it presumably had also received word of the believers there. Samaritans settled in Caesarea in later centuries, perhaps because of the magnet of urbanization, but there is no clear evidence for them in the first century, and so it is not clear that Philip stops in Samaria because of his previous evangelistic success with Samaritans.¹³⁷⁷

Jewish people knew that many Gentiles lived in these cities, both from the familiarity of names such as Azotus and Gaza in the LXX and from subsequent Jewish sources. *Lives of the Prophets* (Jonah) 10:1 has Jonah from the "Greek" city of Azotus; though destroyed by Jonathan Maccabeus (1 Macc 10:84; 11:4), it was later restored by Rome.¹³⁷⁸ Herod left it to his sister Salome along with Yavneh (also mixed but more Jewish); in 67 Vespasian deported Jews from both cities (Jos. *War* 4.130).¹³⁷⁹ Luke would be well aware that Gaza, Azotus, and Caesarea had large Gentile populations,¹³⁸⁰ and this is his point: the Hellenist Philip is evangelizing in mixed areas, paving the way for the subsequent ministry of Hellenists in Acts 11:20.¹³⁸¹

Caesarea also proves strategic for the Gentile mission (10:1, 24; 11:11), and Philip apparently finally settles there (21:8).¹³⁸² Although he is therefore probably in Caesarea when Cornelius is converted, on that occasion God sends one of the Twelve, who can make the case successfully in Jerusalem for accepting Cornelius as a fellow Christian (11:4–18).

1371. Dever, "Ashdod," 270.

1372. Quotes from Fitzmyer, *Acts*, 415; some of the other data from Hengel, "Geography of Palestine," 53 (also in Bruce, *Acts* 1, 195). On Ashkelon and Gaza, see also comment on Acts 8:26.

1373. The road "to Gaza" could simply specify his (and the eunuch's) destination, in contrast to Paul's "approaching" Damascus around noon (Acts 22:6).

1374. Witherington, *Acts*, 300. Most are named in Pliny E. *N.H.* 5.14.68 (along with Samaria!).

1375. Witherington, *Acts*, 301; cf. Dormeyer and Galindo, *Apostelgeschichte*, 161–62.

1376. With Lake and Cadbury, *Commentary*, 99.

1377. See Levine, *Caesarea*, 107–12, 107. Outsiders might suppose their proximity (Pliny E. *N.H.* 5.14.69).

1378. Hengel, "Geography of Palestine," 53–54.

1379. See *ibid.*, 54. It was probably more Jewish than Ashkelon and Gaza farther south (see Avi-Yonah, "Geography," 102).

1380. With Spencer, *Philip*, 153. Luke's ideal audience knew enough Scripture to recognize Philistine associations with the former and, at least after its first reading of Acts, would know of the latter (Acts 10:1). On Gentile populations in Palestine, see further comment on Acts 10:1.

1381. The later apocryphal *Acts of Philip* goes further, without restraint, recounting Philip's fictitious travels in Galilee (*Acts Phil.* 1), from Athens to Parthia (*Acts Phil.* 2), then from Parthia to Azotus (*Acts Phil.* 3–4) (Aune, *Dictionary of Rhetoric*, 18).

1382. At least for a base of operation (Luke 10:5–9); but as Paul's ministry goes from stationary (Acts 13:1) to mobile (13:4), Philip's ministry may also change—in his case, in the opposite direction.

SAUL BECOMES A NEW WITNESS (9:1–31)

Luke earlier shifted from introducing a young persecutor (7:58–8:3) to describing a representative of those he scattered (8:4–40), indicating that God was using the persecutor to disperse the message beyond Judea and fulfill God’s plan in spite of him (cf. 26:14). Nevertheless, Philip, not Saul, was the focus of Acts 8. At this point, however, Luke’s narrative returns to the persecutor, converting him into a willing participant in his mission. Although the mission will ultimately be to the Gentiles, Luke focuses on Saul’s beginning among his own people, where he is located, and then in Jerusalem.¹

1. Saul’s Conversion and Call to the Gentiles (9:1–19a)

God, who is sovereignly bringing about the Gentile mission despite his church’s resistance (cf. 10:14, 28; 11:3, 8), not only converts a persecutor (9:1–9) but calls him to be a special agent of his mission (9:15), just as God called some biblical prophets in earlier theophanies. The Lord’s summary of Paul’s mission (9:15, proclaiming Jesus’s name to Gentiles, kings, and Israelites) and coming sufferings (9:16; this includes his captivity in Acts 21–28) foreshadows most of the rest of Acts (esp. Acts 13–28).²

a. *Jesus’s Theophany Blinds and Converts Saul (9:1–9)*

Jesus’s glory, revealing his divine identity, blinds his persecutor, Saul. Realizing that he has been fighting the Lord he claimed to be serving, by persecuting the pious remnant with whom the Lord is identified, Saul repents and obeys.

I. INTRODUCTION

Why does Luke place Paul’s conversion at this point in his narrative?³ It appears here immediately after the first Gentile’s conversion (8:26–40) but immediately before Peter’s Judean mission (9:32–43), which leads to Cornelius’s conversion, apparently more widely known in the early Christian movement (10:1–11:18).⁴ It holds a strategic position in the narrative’s logic: the conversion of the apostle to the

1. In Pauline terms, Saul moves from an involuntary to a voluntary doer of God’s will (cf. Rom 9:22–23; 1 Cor 9:16–17). As in Acts, Paul apparently starts with his own people (cf. Rom 1:16), including in Jerusalem (15:19), and was converted near Damascus (Gal 1:17; cf. 2 Cor 11:32).

2. Paul’s conversion is naturally chronologically ahead of the “Pauline” section, but it is also good organization; Luke introduces the character in advance (Talbert, *Acts*, 82, cites Lucian *Hist. 55* for linking sections by overlapping material).

3. The placement is especially significant if Luke inserts the conversions of Paul and Cornelius into the midst of a “continuous Hellenist source” found in Acts 6–8 and 11:19–30 (Dunn, *Acts*, 76).

4. Cf. Fitzmyer, *Acts*, 143; Dunn, *Acts*, 76. Paul also functions as a historic link between the later Gentile church, on the one hand, and the Twelve and Jesus, on the other (Slater, “Presentation of Paul”). On conversion stories as a genre, cf. Aune, *Dictionary of Rhetoric*, 111–13; for various Jewish and Greek examples, see,

Gentiles. It thus stands as one of three almost consecutive conversion stories (minus the material in 9:32–43 that prepares for Peter’s ministry to Cornelius): the African official, Paul, and Cornelius.⁵

We cannot be certain of the chronology here; Luke, like other historians, struggled with arrangement, seeking to balance the need to follow the stories of characters and regions with the need to follow chronology. Saul’s Damascus mission could have preceded the revival in Samaria⁶ and the conversion of the eunuch, if Luke simply wished to follow up the second of the seven leaders from 6:5, after Stephen’s death before recounting Saul’s conversion. Luke traces the positive effects of Saul’s persecution (8:4) before recounting his conversion, thereby underlining how futile was his resistance; it was pointless for him to kick against the goads (26:14).

This is a strategic section of Acts, which includes two events that Luke ultimately reports three times: the conversions of Paul (9:1–8; 22:4–16; 26:6–18) and Cornelius (10:1–48; 11:5–15; 15:7–9). Ancient storytellers often delighted in following Homer’s lead by reporting stories within stories, but Luke mainly repeats and develops the same ones; in its later retellings, the account of Paul’s conversion becomes the longest substory within Acts’ longer plot.⁷ Sometimes deliberately and sometimes simply because three was a small plural number, rhetoric often used triplets.⁸ The accounts in this section show God surprising his people by lavishing mercy on the unexpected, whether a former persecutor (9:13–14, 26) or Gentiles (10:14; 11:3). Though initially resistant, God’s church does learn (9:17; 10:28; 11:18)—at least temporarily (15:5).

(1) *Comparing Luke’s and Paul’s Accounts*

Although Luke naturally includes many details that Paul does not, since he is writing historical narrative rather than narrative examples of points in epistles, his claims are confirmed at numerous points by Paul’s own writings.⁹ Luke claims that Jesus revealed himself to Paul unexpectedly near Damascus and called him to preach to Gentiles. Paul makes the same claims. Whatever else he may have “received” as tradition from others (cf. 1 Cor 11:23),¹⁰ he received his gospel not this way (Gal 1:11–12) but through a revelation of Jesus Christ (1:12), presumably meaning a revelation the

e.g., Diog. Laert. 6.5.87; Diogenes *Ep.* 38; *Sipre Num.* 115.5.7; further, Keener, *Matthew*, 153, 476 (though these might also be compared with “call” stories).

5. Given the table of nations tradition in Acts 2:9–11, one might think of these as representatives from Ham (the African official), Shem (Saul), and Japheth (Cornelius) respectively; but Luke values Paul as apostle to the Gentiles, and so ministry to Gentiles is the theme that binds the three examples together. Luke’s Gospel also includes “conversion narratives” (see, e.g., Luke 5:8; 19:1–10; cf. 8:38–39; 15:7, 10), as well as nonconversions (e.g., 18:18–23) and examples of both together (7:36–50; 8:12–15; 17:11–19; 23:39–43).

6. We need not infer this, however, from Saul failing to pursue the Jesus movement into Samaria. Saul’s interest was in stopping it among Jews (cf. Chance, *Acts*, 146); there were Jewish synagogues in Damascus, but not likely among less urbanized Samaritans (who had their own, alternative synagogue).

7. Cf. Rosenblatt, “Narration,” 105. Commentators regularly note the triple repetition of Paul’s conversion (e.g., Langner, *Hechos*, 327). Repetition is often deliberate; thus Schultze, “Cincinnatus,” 404–5, argues that Dionysius repeats the story of Cincinnatus’s plowing twice deliberately rather than ineptly. For repetition for reinforcement in rhetorical expansion, see Hermog. *Inv.* 2.7.120–21; cf. Proclus *Poet.* 6.2, K171.1–5.

8. Aune, *Dictionary of Rhetoric*, 473 (noting twenty triplets in Jude); cf., e.g., Peter’s denials (Luke 22:34, 61) and (as repetition for reinforcement, as here) visions (Acts 10:16; 11:10).

9. Cf. also Ware, *Synopsis*, §99, pp. 180–85; §162, pp. 290–93; §163, pp. 292–97; noting divergences but finding correlations more striking, Campbell, *Deliverance*, 145–47.

10. Paul may use the language of tradition in 1 Cor 11:23 (with, e.g., Hunter, *Gospel according to Paul*, 41; Davies, *Paul*, 248; Cullmann, *Early Church*, 73; Beus, “Traditie”; Farmer, “Peter and Paul,” 54–55; Gerhardsson, *Memory*, 321; Cerfaux, *Church*, 257; Koenig, *Hospitality*, 49n41).

content of which was Jesus Christ (1:16).¹¹ This fits the context (1:15–16) and other Pauline passages (1 Cor 9:1; 15:8).¹² As noted above, Paul did not solicit the revelation; it came freely by divine grace (Gal 1:15),¹³ a point for which Luke may well depend on Paul's own perspective.¹⁴

Further, it came in the context of his call to preach among Gentiles (Gal 1:15–16; Acts 9:15; 26:20). This occurred somewhere near Nabatean Arabia near Damascus (Gal 1:17) and in the period when he was persecuting Christians (1:13). Paul himself claims to have experienced a “revelation” of Christ (1:12, 16) and (more explicitly than Luke here or in Acts 22:6–7; 26:13–14; but see 9:17; 22:14–15; 26:16) to have *seen* Jesus (1 Cor 9:1) in a sort of belated resurrection appearance (1 Cor 15:8).¹⁵ Paul's letters compare it to the resurrection appearances that the other disciples experienced (1 Cor 15:8),¹⁶ though Luke's account might make Paul's experience more theophanic and less personal than that of the disciples in Luke 24.¹⁷

Lüdemann complains that if Luke really had traveled with Paul, we should expect more information “about Paul's early days.”¹⁸ But Acts implies that Luke was not with Paul during his early days (the “we” begins only in Acts 16:10); further, Acts compresses considerable material into a small space, and so there is much missing we would like to know more about. What Acts does recount of Paul's early days some other scholars find doubtful because it is more than what Paul tells us!¹⁹ Acts recounts Paul's conversion, however, as Paul does; Luke undoubtedly heard Paul recount this numerous times, if the relatively few autobiographic notes in Paul's writings are any indication (1 Cor 15:8–9; Gal 1:12–16; Phil 3:6; cf. 1 Tim 1:13).²⁰

11. In 2 Cor 12:1, the revelations may be “from” the Lord, but one need not draw too sharp a distinction or exclude the Lord from also being often the content (Lincoln, *Paradise*, 73), as also sometimes (but not always) in Acts. Or Paul might claim the Lord as their primary content, as in the example in Acts 12:8–9 (Keener, *Corinthians*, 238).

12. Others also note light that Paul's letters shed on his encounter with Christ (Matlock, “Road”) or how it influenced his theology (Kim, *Origin*).

13. Augustine also emphasized Paul's conversion as a model of grace, following the testimony of the letters (Pelikan, *Acts*, 121, citing Aug. *C. du. ep. Pelag.* 1.19.37; see 1 Tim 1:15–16), though he did not pattern his own conversion after it (Asiedu, “Self,” on *Ep. 22*; *Conf.* 8.12.29). For suggested reasons for Augustine's frequent emphasis on Acts 9:4, see Guevin, “Saul.” For this experience's possible influence on Paul's subsequent formulation of reconciliation to God, see Kim, *New Perspective*, 214–38.

14. Hengel and Schwemer, *Between Damascus and Antioch*, 41–42, contrasting the revelation to Cornelius for his pious works (Acts 10:2–4).

15. Others also note the mutual corroboration of the sources (e.g., Hemer, *Acts in History*, 182; Hengel and Schwemer, *Between Damascus and Antioch*, 41). Some argue that the apocryphal *Acts of Paul* knows only Gal 1, not Luke's account of Paul's conversion (Rordorf, “Conversion”). For one comparison of the different Lukan Acts accounts of Paul “seeing” Christ, plus those in Paul's letters, see Diefenbach, “Sehen.”

16. Haacker, *Theology*, 9.

17. Hengel and Schwemer, *Between Damascus and Antioch*, 39, argue that even Paul's letters assume seeing Christ in his “glorified” state (Phil 3:21; cf. Rom 8:11, 18; citing [42] 2 Cor 4:4–6). The language of “revelation” (Gal 1:12, 16) probably supports this thesis. Even the context quickly following 1 Cor 15:8 specifically depicts resurrection corporality as glorified.

18. Lüdemann, *Christianity*, 6.

19. Townsend, “Acts 9:1–29,” 97–98, compares Luke's elaboration beyond Paul's own testimony to the very tradition that Paul denies in Gal 1:11–20, but the mirror-reading procedure in Gal 1 is disputable. Pervo, “Converting,” prefers Paul, and naturally we should recognize that Luke tells the story his own way (note, e.g., parallels with other Lukan revelations, e.g., Luke 2:9). Nevertheless, anyone who heard Paul speak (see our comment on Acts 16:10) or used such hearers as a source would have access to Paul's basic conversion story, which Paul apparently retold (see esp. 1 Cor 15:9 and Phil 3:6, probably both assuming his hearers' prior knowledge). Thus one may note differences while also underlining some common features between the accounts (as in, e.g., Towey, “Damascus”).

20. Note that Paul sometimes addresses his past persecutions (1 Cor 15:9; Gal 1:13) and conversion by revelation (1 Cor 15:8; Gal 1:12, 16) together, suggesting that the latter terminated the former. Paul

(2) *Luke's Three Accounts*

Although the basic picture is secure, a comparison of the three accounts of Paul's conversion in Acts raises questions concerning some of the details:²¹

- Who fell (Acts 26:14; 9:4, 7)?
- Did they all hear Jesus (9:7; 22:9)?²²
- Ananias's role is omitted in Acts 26 (where it is less relevant).
- Did the commission come on the road (26:16–18), through Ananias (9:15–17), or in Jerusalem (22:21)?²³

That Luke is the author of all three accounts shows how far our modern concern for details (particularly displayed in redaction criticism of the Gospels, including my own work there) is from Luke's own agenda as an ancient historian.²⁴ Ancient historians were less concerned with the consistency of "minute details" than we are today.²⁵ The words of dialogue, however, are virtually identical (9:4–6; 22:7–10; 26:14–16), suggesting a rigorous preservation of the story's core.²⁶ Additional expressions, such as "kick against the goads" (26:14), are possible paraphrases to amplify the point (an acceptable rhetorical technique).²⁷

Are Luke's changes among these accounts deliberate clues for how his audience should interpret them? Since ancient audiences would hear the work read, they might not catch such subtle "clues" on the first reading, but because they would hear the work read more than once, they might well catch such differences. The narrator speaks "as an objective observer and teller" in Acts 9, providing various perspectives in the later accounts.²⁸ Ancient historians sought to present speeches appropriate to the speakers, and Paul's retellings of his conversion fit this pattern.²⁹

This difference does not require us to think that Luke portrays the later accounts as inaccurate. The reports by Lysias and Festus differ from the reliable narrator's description, and these may well be "slanted for the speaker's benefit"; we need not, however, suppose the same for Paul's conversion accounts. Paul is one of Luke's most "reliable" characters and is next to Jesus perhaps the reliable character par excellence (with a few possible exceptions, such as 15:39). The differences are too minor and do

occasionally included other autobiographic elements, especially—though not exclusively—from his earlier years (2 Cor 11:32–33; Gal 1:17–2:14).

21. Dunn, *Acts*, 117. For fuller comparison tables of the three accounts and their differences, see Marguerat, *Actes*, 319–22; Dormeyer and Galindo, *Apostelgeschichte*, 333–34; Eckey, *Apostelgeschichte*, 210–12; Chance, *Acts*, 404–5; also comparisons in Baptist, "Conversion." For Luke's narrative portrait of Paul's conversion in Acts as a whole, see Calambrogio, "Saulo."

22. Discussed from an early period; Martin, *Acts*, 103n2, cites Didymus (PG 39:1672); Chrys. *Hom. Acts* 47.

23. On this question, all three are possible, but Paul has reason to delay mentioning his call until Acts 22:21 in that speech, where it could provoke his audience if he has not yet built sufficient rapport (and even, apparently, if he has!).

24. Dunn, *Acts*, 117. In 1876, Abbott, *Acts*, 111, contended that of all the comparisons, only four constituted discrepancies, "and these present no serious difficulties, except to those who desire to find contradictions in Scripture, or who needlessly multiply them by a theory of verbal inspiration, such as the Scriptures nowhere claim."

25. Witherington, *Acts*, 311.

26. Dunn, *Acts*, 121.

27. On amplification, see, e.g., *Progymn.* 4.37–42, 80–82; Heath, "Invention," 95; Anderson, *Glossary*, 26–29. Witherington, *Acts*, 311, regards "kick against the goads" as a likely example of Luke's "literary freedom."

28. Rosenblatt, "Narration," 104–5.

29. See Spencer, "Approaches," 402–3 (following Kurz, *Reading Luke-Acts*, 125); cf. also Witherington, "Editing," 335–44; Chance, *Acts*, 404.

not present Paul as dishonestly seeking to make himself look better at the expense of truth.³⁰ Further, as speeches, the accounts in Acts 22 and 26 follow rhetorical conventions less applicable to Luke's narrative in Acts 9;³¹ it was also rhetorically proper to select the elements and slant appropriate to the particular audience in view.

Some suggest that the three accounts show development, although scholars differ concerning what is developed.³² Whether the narratives show linear development is not clear, but clearly they are meant to be read as part of the larger unified work, since each narrative includes some details missing in the other accounts. The differences thus leave "a cumulative effect."³³ The same may be said for the two versions of Jesus's ascension (Luke 24:44–53; Acts 1:6–11), which provide different details, use different words, but recount the same event, at the same time revealing the broad latitude of literary freedom Luke apparently expected his audience to allow him. As Pheme Perkins puts it: "When Luke repeats an episode, he gives the reader a different version. Usually that version contains new information that is appropriate to the particular setting in the story."³⁴ Those who regularly heard the Scriptures would have understood this way of hearing narrative repetition; for example, the report of Joseph's brothers in Gen 47:3 adds new information to the author's bare narration in 42:11, yet 44:19 reveals that it should be understood as a legitimate part of the original incident. Luke complements each report with the others, minimizing repetition except of central features that cannot be omitted.

Ancient literary and writing techniques help explain both Luke's method and his first audience's likely understanding of his work. Aune suggests that Luke implicitly uses a procedure more explicitly employed by other historians—namely, that of presenting varying versions of an event from different sources and letting the reader decide.³⁵ But such a procedure is effective in Greco-Roman historians only when explicit, mentioning the variation among sources; otherwise it looks as if the writer was not paying attention to his story.³⁶ Luke does have variations, but they are not substantial enough (at least in the accounts of Paul's conversion) to constitute divergent "versions." A more helpful approach in this case is "recitation composition." In a rhetorical culture, variation is valued; thus there is often extensive verbatim agreement, but also variation, with "no commitment to verbatim copying."³⁷ Cicero acknowledged that he and other orators sought rhetorical variation when restating the same matter or reusing a term or expression.³⁸

30. Tannehill, *Acts*, 321. Selecting the most useful points for narration differs from fabricating them. As Luke is a reliable narrator, the converted Paul is (usually) a reliable character, and Jesus (always) is. Retellings in slightly different words are also accepted in Luke's Bible (e.g., Gen 41:3 with 41:19).

31. With Witherington, *Acts*, 666.

32. E.g., Witherup, "Functional Redundancy" (Paul's development as a witness); Reymond, "Paul sur le chemin" (from the story of a man to a Jew to a people).

33. Witherington, *Acts*, 666. On the complementary nature of the different reports, cf. also Hedrick, "Paul's Conversion/Call," 432; cf. Pervo, "Converting."

34. Perkins, *Reading*, 255–56.

35. Aune, *Environment*, 135 (citing Hdt. 3.3; 4.11, 179; 7.150, 167, 214; Polyb. 1.36.4; Dion. Hal. *Ant. rom.* 4.2.1).

36. Apparently ancient Israelite practice was more like what Aune suggests here (e.g., in multiple versions of David's preregnal story); but even here the ultimate desired effect could well be cumulative, most clearly with the two creation accounts laid side by side in Gen 1–2, both of which the author employs theologically.

37. Robbins, "Writing," 155 (more fully, 146–55, critiquing earlier forms of redaction criticism); cf. Blomberg, *Gospels*, 157–58; for parallel stories in the ancient Near East, cf. Knoppers, "Problem." Anyone who has endured messengers' verbatim presentations in some classical texts will appreciate this emphasis. Repetition of refrains was a different matter; see, e.g., Catull. *Carm.* 62.4–5, 10, 19, 25, 31; comment on Acts 6:7.

38. E.g., Cic. *Fam.* 13.27.1; *Or. Brut.* 46.156; 47.157. For one example, cf. the varied terms for "listen" in Xen. *Anab.* 5.1.8–10.

Scholars differ as to the sources of the three accounts of Paul's conversion. Some think that Luke heard other stories besides Paul's and may not have known Paul's firsthand.³⁹ Hedrick regards Acts 9:1–19 as "a traditional miracle story of Paul's conversion that has been adapted as a commissioning narrative by Luke," 22:4–16 as "Luke's edited version of the traditional legend," and 26:12–18 as "Luke's own abbreviated composition."⁴⁰ Witherington notes that all three reveal Luke's style and argues that Luke was present for Acts 26 (the author of the "we" narrative presumably remained in Judea between 21:8–18 and 27:1–2) and probably had information from Paul for Acts 9 and 22.⁴¹ Luke could have been present in Acts 22 but probably was not, especially if he was (as I think most likely) ethnically Gentile and we accept his implication (ἐνόμιζον) that Trophimus was not with Paul during the riot (21:29).

(3) Date

The date of Paul's conversion has generated considerable discussion based on varied chronologies of the rest of Paul's life.⁴² For a sample, Robert Jewett provides the following chronology (I have omitted some of his dates):⁴³

- Conversion: August to October 34 C.E.
- Three-year span (Gal 1:18): 34–37
- Escape from Aretas: August to October 37
- Fourteen years (Gal 1:21): 37–51
- Paul's arrival in Corinth: January to February 50
- Departure from Corinth: mid-July to late August 51
- Apostolic conference: August to October 51⁴⁴

He allows eighteen months for resurrection appearances (on the basis of early Christian and gnostic sources) and hence dates Paul's conversion to October 3 or 8, 34.⁴⁵ This chronology, however, is likely too tight. A larger number of scholars date the resurrection to 30 rather than 33, and this allows more time for Pauline chronology.⁴⁶ Thus Riesner argues for Jesus's crucifixion on April 7, 30 C.E.; for Stephen's persecution probably about 31/32, and for Paul's conversion probably in the second year after Jesus's crucifixion (31/32).⁴⁷ (Ramsay suggests Paul's conversion in 32 C.E. on

39. Lake, "Conversion," 188–95. He prefers Paul's own account; but for problems in comparing Acts and Pauline letters, which belong to different genres and often reflect different concerns, see, e.g., the commentary introduction, Keener, *Acts*, 1:231–33, 409, esp. 231–32; Hillard, Nobbs, and Winter, "Corpus"; and Wenham, "Corpus." As to one's own account always being most reliable, there are points where I would trust ancient historians regarding Augustus over his *Res Gestae* (including material in Suetonius that few of Augustus's contemporaries dared write), and even the adulations of Ovid and Virgil contain some relevant material.

40. Hedrick, "Paul's Conversion/Call," 432. Pervo, *Acts*, 236, argues that Luke in Acts 9:1–19a adapts a source.

41. Witherington, *Acts*, 309. See similarly Bock, *Acts*, 350; allowing for variation and adaptation, Marshall, *Acts*, 167.

42. For a thorough review of views from the 1600s through the twentieth century, see Riesner, *Early Period*, 3–28 (7–28, on the twentieth century). Hengel, *Pre-Christian Paul*, 138–39n279, prefers Riesner's defense of the traditional chronology (as against Lüdemann).

43. Jewett, *Chronology*, 99.

44. Most scholars date this conference to the late 40s (e.g., Lake and Cadbury, *Commentary*, 86).

45. Jewett, *Chronology*, 100 (dating [29] Jesus's passion to 33 C.E.). Campbell, "Anchor," suggests 33 C.E.; Kistemaker, *Acts*, 19, suggests 35 C.E. For discussion of the duration of resurrection appearances, see comment on Acts 1:3.

46. Stauffer, *Jesus and Story*, 8, dates the crucifixion to 32 C.E.

47. Riesner, *Early Period*, 35–58, esp. 57–58, for Jesus's crucifixion; 59–63, for Stephen's persecution; 64–74, for Paul's conversion. Lake and Cadbury, *Commentary*, 86, suggest 29–32 C.E. if Galatians means

January 19, the traditional day,⁴⁸ but apart from this substantially later tradition, we cannot render so specific a guess.) Further, people counted by parts of years, so that three years (Gal 1:18) might mean little more than a year (at minimum) and three and fourteen (Gal 2:1) might be reckoned inclusively; these observations require “a total period of at least twelve and not more than seventeen years.”⁴⁹ The chronology becomes unduly tight again only for those who seek to date Stephen’s martyrdom to the interregnum after Pilate’s recall in 36.⁵⁰ Most scholars agree that Paul must have been converted in the early 30s, since he was in Corinth in 50 or 51 (Acts 18:12) and Gal 1:17–2:1 allows only so much leeway even in the most compressed reading of the chronology.⁵¹

(4) Various Explanations

Readers have approached Paul’s conversion from various angles.⁵² Enlightenment scholarship tried to explain Paul’s conversion experience as ecstatic and solely internal, attributing it to some psychological abnormality or a hallucination.⁵³ By itself, this experience would not explain the independent and roughly simultaneous revelation to Ananias (Acts 9:10–16), but since Paul himself does not record that, it is often dismissed as part of Luke’s apologetic.⁵⁴ Although psychoanalytic approaches to Paul’s conversion have not vanished,⁵⁵ they generated more attention in their heyday.⁵⁶ Richard Rubenstein explains Paul’s vision as “an instance of hallucinatory wish fulfillment”; though not pathological, it is common under stressful conditions, such as the noonday heat (cf. Acts 26:13).⁵⁷ Others have claimed that Paul was neurotic, prompting the reply that Paul’s unusual characteristics reveal

seventeen years, 32–34 C.E. if it means fourteen years. Witherington, *Acts*, 88–90, suggests Paul’s conversion in 34 C.E., his first visit to Jerusalem about one and a half years later in early 37, then the second visit in 48, but I am inclined, with Riesner, to date Paul’s conversion earlier. The earliest suggestion for Paul’s conversion date is Vardaman, “Lectures” (esp. 3:10–11, 13), arguing for 25 C.E. (to my knowledge, no one else argues this).

48. Ramsay, *Other Studies*, 363.

49. Koester, *Introduction*, 2:102.

50. Cf., e.g., Moody, “Chronology,” 230, though he probably rightly includes the three years in the fourteen.

51. E.g., Lake and Cadbury, *Commentary*, 86; Dahl, *Studies*, 2.

52. For a survey, see Corley, “Interpreting Paul’s Conversion.”

53. See summary, *ibid.*, 13–15. Lightning striking Paul could have produced all the phenomena in Acts and Paul’s letters (Bullock, “Converted by Lightning?”)—except the content of the revelation. Other countervailing factors (such as likely travel conditions and Paul’s companions) could be more readily explained differently or would have to be dismissed (possibly a case of dismissing data incongruent with the hypothesis). One might also wonder if Luther’s call experience during a storm has affected some readers’ perception of Paul’s story.

54. From a literary standpoint, it matches the paired revelations of Acts 10:3–6 and 10:10–16; a theist, however, could counter that Luke reports legitimate patterns in divine activity (undoubtedly Luke’s own perspective). As one among many potential examples, my wife had experiences in Africa confirming the possibility of simultaneous and independent revelatory experiences.

55. Cf., e.g., Clerget, “Lumière”; Ellens, *Light*, 109 (though Ellens avoids reductionism). In response to (but without discounting) Lüdemann’s view that Paul was emotionally conflicted about persecuting Christians, Wedderburn, *Beyond Resurrection*, 76, notes that the hard evidence that we do have (Paul’s descriptions of his pre-Christian life) shows little anxiety.

56. Segal, *Convert*, 294, notes that psychoanalytic studies of Paul tend to suffer from worse bias than other psychoanalytic studies of conversion.

57. Rubenstein, *Paul*, 48. Pilch, *Visions*, 69–70, suggests either travel (e.g., “road trance”) or (more likely) intense concentration, but Paul was not likely meditating as he traveled. Various stimuli can generate trance states in normal people (Lewis, *Ecstatic Religion*, 39); psychiatrists can induce them without mystical explanations (*ibid.*, 40), and various cultures interpret them differently (41, 44). Cognitive neuroscience shows that one need not reject vision reports as ahistorical literary devices (Pilch, “Trance Experience”; *idem*, *Flights*, 216–30).

his genius, not neurosis.⁵⁸ (In response to a more neurological approach based on epilepsy, Paul's visions do not resemble those experienced in epileptic seizures, contrary to a view once often held.)⁵⁹

As cultural standards of acceptability have changed, so have psychological and social approaches to conversion, although many insights offered along the way have often been applicable to converts. William James argued that conversions are often of one previously unhappy⁶⁰ and that they are a normal adolescent phenomenon.⁶¹ Robert Thouless viewed Saul's persecution of Jesus's followers as a form of unconscious resistance to what threatened his previous belief system.⁶² Thouless argues against the durability of adolescent conversions⁶³ but links Paul's adult conversion with other more durable adult conversions.⁶⁴ Whether general modern Western patterns shed much light on conversions in other settings may be explored, but they explain neither all the dimensions of every specific case nor Paul's revelatory experience near Damascus.⁶⁵

The exclusively psychological explanations have traditionally failed, in part because they rest on faulty premises, such as the alleged harshness of Jewish faith, the deeper spirituality of Hellenism, or repressed guilt for persecuting Christians.⁶⁶ W. G. Kümmel's argument that Rom 7 is not autobiographical was meant to target and demolish precisely the argument that guilt drove Paul's conversion (cf. Phil 3:4–6).⁶⁷ It is also

58. Copestake, "How Neurotic?," replying to Barker, *Church's Neurosis*.

59. Ramsay, *Teaching*, 306ff. Psychomotor epilepsy does have some neurological similarities to trance states (Prince, "EEG," 122–24), but so do sleepwalking (124–25) and even (more distantly) REM sleep (Bourguignon, "Introduction," 14; cf. Prince, "EEG," 131).

60. James, "Self," 122–23. Many converts have explored various solutions to metaphysics or other religious options (Campbell, *Deliverance*, 134–35, noting Dawson, "Movements," 120). While many lack satisfying group attachments, they are often gradually socialized into the new group before conversion (Campbell, *Deliverance*, 132–33).

61. James, "Self," 125. More recent studies confirm that many converts are young and educated (Campbell, *Deliverance*, 134).

62. Thouless, "Psychology," 138. On resistance to conversion, see also Pasquier, "Experience," 196–97.

63. Thouless, "Psychology," 142, suggesting that they involve feelings rather than behavior (though psychology today offers a more positive role for emotions, sometimes connecting them with cognitive faculties; see Elliott, *Feelings*, 19–48). Following ideas more dominant in his day, Thouless contends that adolescent conversion relates to repressed sexual impulses (Thouless, "Psychology," 142), because adolescents are taught to feel guilty about sex (143; on adolescent sexual development, see also, e.g., Dominion, *Growth*, 34–35). Although some have associated Paul's preconversion struggle with sexual temptation (see Gundry, "Frustration," 233), most find the purported evidence too ambiguous (e.g., Johnson, *Romans*, 121; Schreiner, *Romans*, 369; Das, *Debate*, 216; Jewett, *Romans*, 448, 465); some even think that association of the evil impulse primarily with sexual sin is distinctively Babylonian (Rosen-Zvi, "Yeser"), though I am less convinced (besides the *Midrash Rabbah*, cf. similar language in the hellenized *Testaments of the Twelve Patriarchs*). Ancient adolescence also included sexual temptation (see comment on Acts 7:58), but the possibly relatively early age of marriage in Palestinian Judaism (cf. *Test. Levi* 9:10; *m. 'Ab.* 5:21, 32; *b. Qidd.* 29b–30a; Cohen, *Law*, 297–98; elsewhere *CIJ* 1:409, §553; but contrast Philo *Creation* 103; *Test. Iss.* 3:5; Thornton, "Bachelors"; Jeffers, "Families," 134–35) may have limited its impact.

64. Thouless, "Psychology," 144. Thouless emphasizes the value of mature, "mystical" conversions (145–46). That Paul may have been younger than some of Thouless's adult convert examples (see comment on Acts 7:58) need not detain us here, since in Paul's culture his contemporaries achieved adulthood at the age we define as adolescence. Again reflecting on modern Western culture, Hiltner, "Theology," 179, views conversion in one's thirties as particularly valuable, suggesting (190) its importance for a mature life.

65. Citing studies, Oates, "Conversion," recognizes various kinds of conversion (e.g., 162–63) and avoids reductionism. In terms of the basic psychological structures, he notes (165–67, esp. 167) conversions to secular ideas also.

66. Munck, *Salvation*, 11–13; Hurtado, "Convert" (emphasizing the christological focus of Paul's experience). Despite his better scientific grounding, even Segal, *Convert*, 289, cites frequent conversion factors that do not easily apply to Paul if he was satisfied before his conversion with his performance of the law (as it appears in Gal 1:14; Phil 3:6).

67. Kümmel, *Römer* 7, in Corley, "Interpreting Paul's Conversion," 14–15. Most contemporary scholars, whether they regard Rom 7 as autobiographical or not, deny that it is Paul's *preconversion* view of his condition

virtually impossible to apply effectively and extensively the psychoanalytic method (and most other psychological exploratory methods, useful as they may be on living subjects) to someone who has been dead for two millennia, especially when the person has left us only bits of autobiographic material.⁶⁸

Social-scientific explanations of conversion today tend to be “less pathological” and “more sympathetic” than in the past and are less reductionist (neither purely cognitive nor purely affective).⁶⁹ The last few decades have witnessed a shift from psychology to sociology for models of conversion because, its advocates urge, it is more quantifiable.⁷⁰ A potential weakness in this approach is that the preestablished categories are limited and they look only for anthropological continuity, not possible theological discontinuity. Provided we take into account the approach’s limits, however, it provides useful insights. We look at some of this discussion further below in section I.a.i.8, “Calling or Conversion?”

Our modern explanations reflect a worldview quite different from that of Luke’s first audience. Ancients were familiar with conversion and conversion stories, which appear in both Jewish and broader Greco-Roman sources.⁷¹ Both Jewish proselytism and Greek philosophic conversion entailed moral and long-term change, as in Acts;⁷² outsiders would have objected not to the “formal components” of Christian conversion but only to its “object/content.”⁷³ Most important is that ancients were more open to the possibility of divine and angelic encounters, and even some who disagreed with parts of Paul’s theology may have nevertheless granted the reality of his experience (Acts 23:9).⁷⁴

Many pagans took for granted the postmortem ascent of the soul,⁷⁵ although often more quickly for those not excessively burdened down by earthly interests;⁷⁶ some philosophers, most commonly later Platonists, prepared for such ascents by “ascending” out of bodily attention into contemplation of the divine.⁷⁷ Some also sought various forms of visionary ascents while alive.⁷⁸ Ascension claims were apparently familiar enough to warrant parody.⁷⁹

(e.g., Enslin, *Ethics*, 12–13; Bornkamm, *Paul*, 125; Blank, “Mensch”; Bultmann, *Old and New Man*, 16, 33, 45; Ridderbos, *Paul: Outline*, 129–30; Sanders, *Paul and Judaism*, 478–79; Wenham, “Tension,” 83–88; Stowers, “Self-Mastery,” 537; Gundry, “Frustration,” 228–29, 238; Fee, *Paul, Spirit, and People*, 134–35; pace, e.g., Rubenstein, *Paul*, 11). Still, Qumran texts show that claims to perfect obedience and consciousness of sin may coexist (Campbell, *Deliverance*, 139).

68. See esp. Segal, *Convert*, 299.

69. Donaldson, *Paul and Gentiles*, 302.

70. Segal, *Convert*, 16.

71. See, e.g., MacMullen, “Conversion”; Nock, *Conversion*; briefly, Talbert, *Acts*, 83–85. See further Keener, *Matthew*, 150–51, 153–55, 276–77, 476. This is not to claim that all conversions match ancient models; for studies of conversion in modern experience, see, e.g., Eigo, *Experience*; Gillespie, *Dynamics* (for both sudden and gradual transformation); among nineteenth-century slaves, see Sanders, “Slavery and Conversion.” Scholars offer various other conversion stories as analogies (for one, see Theissen, “Nasir Khusraw”).

72. Talbert, “Conversion in Acts.” Segal, *Convert*, 182, argues that while Paul’s Gentile converts had a moral transformation, for Paul himself, conversion involved other factors.

73. Talbert, “Conversion in Acts,” 153.

74. For ancient views of superhuman activity, see briefly the commentary introduction, Keener, *Acts*, 1:325–50, esp. 346–50.

75. E.g., *Book of Dead Sp.* 7, 145–46; Plut. *Isis* 78, *Mor.* 382F–383A; Max. Tyre 10.3 (cf. 9.6; 11.11); Heracl. *Ep.* 5; Frankfurter, *Religion in Egypt*, 261–62; Aune, “Duality,” 228. The soul returns to its place of heavenly origin (e.g., Max. Tyre 41.5; Men. *Rhet.* 2.9, 414.21–23); this can be portrayed as divinization (Men. *Rhet.* 2.9, 414.25–27).

76. E.g., Cic. *Resp.* 6.26.29; *Tusc.* 1.31.75 (cf. 1.19.43).

77. E.g., Max. Tyre 11.10; 21.8; Porph. *Marc.* 6.103–8; 7.131–34; 10.180–83; 16.267–68; 26.415–16.

78. E.g., PGM 4.930–1114; 12.325–34; 77.1–5; Lucian *Icaromenippus*; Lincoln, *Paradise*, 83.

79. Esp. Lucian *Icar.* passim (balanced by a descent to Hades in *Menippus*).

Although later rabbinic traditions develop the theme in great detail,⁸⁰ the original story of Moses's heavenly ascent probably did circulate in the first century.⁸¹ For other spiritual "explorers," the goal of visionary states culminated in the vision of the throne chariot;⁸² although rabbinic reports are later,⁸³ early stages of such pursuits seem to appear at Qumran,⁸⁴ and many scholars infer them from throne visions in apocalypses. On the throne chariot and other visionary claims, see further comment in the excursus on visions and dreams at Acts 2:17. (For Jewish visionary travel or ascents, see also, more briefly, comment on Acts 8:39.)

Some scholars have viewed Paul as a mystic visionary who was converted during one of his *merkabah* experiences⁸⁵ or propose that *Merkabah* mysticism provided at least the framework for his experience.⁸⁶ Certainly such a context could have rendered it intelligible among some of his contemporaries. And certainly, Paul's letters do include mysticism⁸⁷ in the general sense of the expression (in terms of visionary experiences of Christ, not absorption or dissolution of identity).⁸⁸

Paul's reported spiritual experiences as a believer give no indication, however, as to whether he was involved in mysticism, and specifically *Merkabah* mysticism, before his conversion.⁸⁹ Moreover, mysticism in general, and *Merkabah* mysticism in particular, is not the only way visions may occur.⁹⁰ (The Hebrew Bible, most notably,

80. E.g., *b. Šabb.* 88b; *Lev. Rab.* 1:15; *Pesiq. Rab.* 20:4; 3 *En.* 15B:2; though cf. the impossibility of such ascents for mortals in *b. B. Mešī'a* 94a (possibly reflecting early antimystic polemic). For Moses's heavenly ascents in rabbinic texts, see further Meeks, *Prophet-King*, 205–9; for his ascent at the end of his life, 209–11; in Samaritan literature, 241–46. Angelic opposition to Moses's ascent in later sources (e.g., *Exod. Rab.* 42:4; *Pesiq. Rab.* 20:4) may reflect gnostic and other mythical patterns of powers in the heavenlies opposing the soul's ascent (Schultz, "Angelic Opposition"), found earlier in Egyptian afterlife conceptions.

81. Aristob. frg. 4 (Euseb. *P.E.* 13.13.5); cf. *L.A.B.* 12:1. Halperin, "Ascension," compares heavenly invasion myths (e.g., Isa 14:12–14; his rooting in a model of childhood development is less palatable). For Moses's mystic ascents in various early Jewish sources, see, e.g., Meeks, *Prophet-King*, 122–25, 141, 156–58.

82. See, e.g., *b. Hag.* 13a, bar.; 14b, bar.; Safrai, "Education," 960; Scholem, *Trends*, 42.

83. On the rabbinic tradition's development, see Neusner, "Merkabah Tradition."

84. Dupont-Sommer, *Writings*, 333–34; Davila, "4Q534"; Dimant and Strugnell, "Vision," citing 4Q385 4. Some scholars suspect some *Merkabah* speculation even in the LXX (Halperin, "Midrash").

85. See esp. Segal, *Convert*, 34–71 (for *merkabah* visions, see 39–52). Some think the connections between Paul and *Merkabah* mysticism clear (Bowker, "Visions"), but see discussion below. Segal, *Convert*, seems eager (see esp. p. 71) to contrast Paul's subjective revelation with the more objective experience of other apostles, who passed on traditions from Jesus himself. This may be because, in his view, they were more tolerant of the law; in my reading, however, Paul himself did not reject the law but rejected only pride in status based on it (or anything else) before God.

86. Cf. Bowker, "Visions"; cf. Kim, *New Perspective*, 174–76; idem, *Origin*, 252–53; contrast Schäfer, "Journey"; for a Jewish context including such rabbinic sources and apocalyptic sources, see Young, "Motif."

87. See, e.g., Thuruthumaly, "Mysticism"; Mary, *Mysticism*; Verlaquet, "Mystique" (also noting how mystics such as Mechthild of Magdeburg have understood Paul).

88. For the shortcomings of "mysticism" language, see Campbell, *Union*, 412. Even Philo's mysticism did not involve complete union with God (Winston, "Philo's Mysticism"), but some Jewish mystics may have sought closer identification with deity (cf. Morray-Jones, "Transformational Mysticism"; Paul did embrace transformation into the divine image and a degree of identification with Christ, but not a dissolution of the distinction between Creator and created). For Philo and others, mysticism also remained compatible with philosophy, including Platonism (e.g., Philo *Spec. Laws* 3.1; Plut. *Isis* 77, *Mor.* 382D).

89. We lack any indication of fasting and other ritual preparations characteristic of *merkabah* ascents in Paul's encounter (Philip, *Pneumatology*, 179–81).

90. Segal, *Convert*, 52, notes that "visions normally took place in religiously altered states of consciousness." Yet most religions (not simply *Merkabah* mysticism) treat mystic, revelatory states as positive (see Ludwig, "Altered States," 88). Pilch, "Call" (and idem, "Apostle"), emphasizes Paul's "altered states of consciousness," while appealing to a wider range of human experiences than *Merkabah* mysticism. Such visions could be experienced as real; one account even claims that the imaginary monk on which a Westerner in Tibet meditated became so real that sometimes others also could see the monk image until, after six months of intense concentration, she was able to suppress it (Ashe, *Miracles*, 144–45). See discussion of visionary states in Keener, *Miracles*, 870–84.

reports large numbers of divine and angelic encounters long before this mysticism is attested).⁹¹

Visions, like other spiritual experiences, could be solicited and sought. For example, Egyptian priests requested the deity to manifest himself.⁹² Those seeking revelations from Trophonius at his oracle followed specified procedures.⁹³ Magical texts give instructions for securing visions or divinatory revelation.⁹⁴ Some ancients fasted for revelations.⁹⁵ One trajectory of Jewish ascent traditions, found in the Hekhalot literature (the antiquity of which is debated),⁹⁶ provides instructions on how to participate in ascents.⁹⁷ Although Paul reports visions, including at least one visionary ascent (2 Cor 12:1–4), the emphasis apparently rests (as elsewhere in his theology) on the agency of the Spirit (cf. Rev 1:10; 4:2; 17:3; 21:10) rather than on instructions for ascent.⁹⁸ Paul’s “caught up” in 2 Cor 12:2 may specifically contrast with solicited revelations.⁹⁹ More important is that his report of his conversion (which is surely not the same event reported in 2 Cor 12:2–4)¹⁰⁰ certainly indicates that it was not solicited. He was, after all, at the time of his conversion engaged in persecuting the side he afterward joined (1 Cor 15:8–10; Gal 1:12–16).

Further, although we may speak of Paul’s “vision,” we should be clear what we mean. Paul does not confuse his transforming encounter with Christ (comparable to others’ experiences of resurrection appearances, 1 Cor 15:5–8) with a subsequent heavenly journey in 2 Cor 12:2–4.¹⁰¹ Because Paul’s companions experienced the light and (by whatever manner) the sound, Luke (who used theophanic language) portrays this experience as more than a vision despite visionary elements.¹⁰² Like Luke, Paul himself speaks of meeting Christ (1 Cor 15:8) in a manner distinct from his later visions (2 Cor 12:1). (For Paul’s visions, see also comment on Acts 26:16.)¹⁰³

91. Philip, *Pneumatology*, 194–95, points out that the closest parallels are with OT call narratives (see discussion below).

92. Plut. *Isis* 9, *Mor.* 354D.

93. Max. Tyre 8.2.

94. *PGM* 4.930–1114. For magic to receive revelations, see, e.g., *PGM* 77.1–24, specifically 1–5.

95. E.g. (among Christians), *Herm.* 1.3.10; see comment on Acts 13:2.

96. One might argue that the lack of early attestation reflects the secret character of transmission (Séd, “Traditions secrètes,” following *t. Hag.* 2:2), but this only means that we cannot verify their antiquity either way. Throne visions themselves are earlier, as already noted above, but this does not mean that all later Hekhalot traditions are.

97. See Himmelfarb, “Ascent”; cf. possibly magical preparations in Swartz, “Angels.”

98. Cf. Ezek 1:26–28; 2:2; Isa 6:1–5; the Spirit also carries the visionary in 1 *En.* 71:5 (Similitudes); *Herm.* 1.1.1; 1.2.1 (obviously echoing Ezekiel or Revelation here); *Odes Sol.* 36:1. On the Spirit in Paul’s experience (in contrast to most *merkabah* experiences), see Philip, *Pneumatology*, 181–82. This would fit earliest Christianity’s pervasive emphasis on the activity of the Spirit (cf., e.g., Fee, *Presence*; idem, *Spirit*; Keener, *Spirit*); on the inspiring role of the Spirit in these passages in Revelation, see Bauckham, “Spirit”; idem, *Climax*, 150–51; Hill, *Prophecy*, 90.

99. With Alexander, “Introduction,” 247; Bruce, *Corinthians*, 246; cf. Furnish, *II Corinthians*, 525.

100. Knox, “Reflections,” 110, who once identified them, retracted his view. The revelation in 2 Cor 12:2–4 was a secret one, in contrast to his conversion, and belonged to a larger series of visions of his as a believer in Jesus (12:1).

101. Philip, *Pneumatology*, 177n43, suggests that Segal does make this confusion (but Segal, *Convert*, 37, does admit that the experience in 2 Cor 12 could be postconversion). Although there are more similarities between *Merkabah* mysticism and 2 Cor 12:2–4 than between the former and Paul’s conversion, *Merkabah* connections have been disputed even with regard to 2 Cor 12:2–4 (Schäfer, “Journey”; still, they are plausible; see, e.g., Morray-Jones, “Paradise”). Segal (“Resurrection”) identifies Paul’s resurrection appearances with apocalyptic visions and hence contrasts them with the Gospels’ physical resurrection, but some apocalyptic notions of resurrection are quite corporal (e.g., 2 *Bar.* 50:2).

102. Craig, “Resurrection,” 50.

103. Paul’s distinctive revelations led to tension with early Christians who did not share them (cf. Sim, “Appearances”); on visions and revelations in Paul, see, e.g., Ware, *Synopsis*, §110, pp. 198–201. Later gnostics also

However we choose to explain Paul's experience, he was thoroughly convinced that he had experienced a divine encounter, enough to move from being persecutor to joining a persecuted sect (Gal 1:12–13).

(5) *A Parallel in Joseph and Aseneth?*

Paul claimed a direct divine encounter, something not claimed by most converts to Judaism, to philosophy, or from one Jewish sect to another. There are a few exceptions, the closest (aside from the Merkabah proposal) being in *Joseph and Aseneth*, an Alexandrian Jewish work, from which Johnson cites some apparently impressive parallels with Luke's account of Paul's conversion:¹⁰⁴

<i>Joseph and Aseneth</i>	<i>Acts</i>
Aseneth repents with seven days of fasting (10:17) and prayers (12:1–15)	Saul repents with three days of fasting (9:9)
The heavens open, revealing a light (14:2)	A heavenly light flashes around Saul (9:3)
Aseneth falls on her face (14:3)	Saul falls to the ground (9:4)
An angel calls, "Aseneth, Aseneth" (14:4, 7)	Jesus calls, "Saul, Saul" (9:4)
She asks, "Who are you?" (14:5, 8; 15:12)	Saul asks, "Who are you?" (9:5)
He claims to be chief of God's host (14:8)	Jesus replies that he is Jesus (9:5)
He tells her to arise and he will give her a message (14:8)	He tells him to arise and he will receive instructions (9:6)
She washes her face (14:15)	Saul is baptized (9:18) and "washes" away sins
She receives a prediction (15:2–6)	Ananias has a prediction for Paul (9:15–16)

Not all the parallels are compelling, even if we do date *Joseph and Aseneth* before Acts (which is not impossible but is unlikely).¹⁰⁵ Given some of the more concrete yet potentially incidental parallels, some of the others simply follow as natural descriptions of this kind of reported event. Fasting often accompanies repentance, but the sequence differs in the two accounts. The double name and the heavenly light and voice are not surprising in divine-call accounts (resembling earlier biblical models), of which each is only one example among several (i.e., neither need be dependent on the

developed the apocalyptic/mystical aspect of Paul (see esp. *Apocalypse of Paul* in NHL 239–41). Some gnostic texts developed early Egyptian mortuary rituals for a heavenly ascent (Frankfurter, *Religion in Egypt*, 261).

104. Johnson, *Acts*, 167–68, cites revelatory conversions in 4 Macc 4:1–14 and esp. *Jos. Asen.* 10:17–15:6. See also Pervo, *Acts*, 234–35, citing Burchard, *Dreizehnte Zeuge*, 90–91 (Pervo also notes differences).

105. Most think this work non-Christian Jewish (Collins, "*Joseph and Aseneth*"; Koester, *Introduction*, 1:265); for a survey of proposed dates, with openness to an early date, see Humphrey, *Joseph and Aseneth*, 28–38, and the sources she surveys. If, as is likely, it comes from Egypt, its latest possible date if it is not a Christian work is the second decade of the second century (Burchard, "Introduction," 187); if it is non-Christian, its peaceful appraisal of Egyptian culture may suggest that it was written before the beginning of severe anti-Semitism (West, "*Joseph and Aseneth*," 79–80; Doran, "Narrative Literature," 290), which might well make it even pre-Christian. It is a Greek romance (e.g., West, "*Joseph and Aseneth*"; Doran, "Narrative Literature," 290–91), but this need not make it late, since extant samples of the genre need not constitute its earliest (nonextant) exemplars. Nevertheless, a Christian reading is also quite plausible (e.g., Kraemer, *Aseneth*; I owe this source to Humphrey). Levi as a prophet (*Jos. Asen.* 22–26) might not sound Christian, but Christian material in *Testament of Levi* shows that Jewish Christians did appreciate the figure of Levi. Moreover, apparently Christian material does not stand out as if interpolated: *Jos. Asen.* 13:13 sounds like virgin birth typology; *Jos. Asen.* 14 resembles Acts 9; Joseph appears in *Jos. Asen.* 14 like Jesus in Rev 1:13–16; there are the putting off and putting on of tunics in conversion. *Joseph and Aseneth* contains possible typology of Christ and the church: it speaks of preparation for marriage since eternity (*Jos. Asen.* 15; also 21:3); Aseneth is the City of Refuge, and her virgins are pillars therein (Aseneth the bride as a type of the heavenly Jerusalem? *Jos. Asen.* 17; again in 19:8–9); Joseph imparts the spirit of life to her by his breath (19:11; cf. John 20:22) and may function as a type of Christ (he is called Son of God several times and portrayed like Helios earlier in the book). *Jos. Asen.* 16 includes the bread of life, cup of immortality, ointment of incorruptibility (cf. anointing in later baptisms), and the sign of the cross made by blood. Still, the story line may be older (Gen 41:45, 50; 46:20; *Jub.* 34:20; cf. variants in *Test. Jos.* 20:3), and Philo had already perfected the art of allegory.

other). Falling on one's face was a standard response to awesome divine revelations.¹⁰⁶ "Who are you?" is an obvious question when one is encountering an unexpected revealer,¹⁰⁷ though for different reasons (Aseneth because she does not understand, Saul because he cannot conceive).

Given the likelihood that proselyte baptism was fairly widely known,¹⁰⁸ Aseneth's merely washing her face is, in fact, a disappointing "parallel" to Saul's baptism; we might have hoped for more. Predictions are common in divine calls (see Jer 1:5, 7–10, 14–19). The cumulative weight of the parallels, especially the stronger ones, may suggest dependence on a common pattern. What the parallels especially emphasize, however, is that many of the features we encounter in the narrative are those we would expect when discussing an experience involving both conversion and a revelatory call.

(6) Revelatory Calling

The elements that most distinguish Paul's conversion story from the majority of others are the revelatory features; that is, what is most distinctive about these accounts is that they focus on Paul's divine encounter and calling. Once viewed from this perspective, they fall naturally into the pattern of divine-call accounts in the OT (Isa 6:1–13; Jer 1:4–19; Ezek 1:1–3:15; cf. Exod 3:1–4:17; Judg 6:11–24).¹⁰⁹ That is, the work that shapes the remainder of Paul's function in Acts, his life mission, is inaugurated in this scene similarly to the call narratives for the biblical prophets for whom a calling is recorded (especially Moses, Isaiah, Jeremiah, and Ezekiel).¹¹⁰ Some of those inaugural calls (Moses, Isaiah, and Ezekiel) occurred in theophanies, as here. Moses's experience has just been narrated (Acts 7:30–34), as has that of Abraham (7:2–3, relevant for Paul also leaving his community and venturing where God leads him). The context of Isaiah's call will also be important to Luke (28:26–27).

This passage (Acts 9:10–19) and others in Acts (e.g., 18:7–11) evoke OT commissioning accounts (and may reflect their literary influence).¹¹¹ (Such commissioning narratives are so important to Luke that according to some counts, he includes as many in his two-volume work, as broadly defined, as in the entire OT.)¹¹² Both Paul's letters and Luke depict Paul's conversion and call experience in ways that recall Jeremiah (see comment on Acts 9:15). Paul's experience resembles that of OT prophets, whose credentials rested on their charismatic experience of divine calling rather than on hierarchical authority.¹¹³ This resembles one qualifying method

106. See, e.g., Dan 8:17–18; 10:9–10; Ezek 1:28; Tob 12:16; *Jub.* 18:10; *1 En.* 14:13–14; 89:30–31; 102:1; 4 Macc 4:11; and other texts below.

107. E.g., Gen 32:29; Exod 3:13; Judg 13:17–18; *Herm.* 25.3; in a negative case, 11Q11 V, 6. For the commonness of similar questions in antiquity (about origin), see Keener, *John*, 556. In divine revelations, the revealer often identified himself, rendering the question unnecessary (e.g., Gen 17:1; 35:11; 46:3; 28:13). Luke parallels his own account of Cornelius here more than his narrative of Paul's conversion parallels *Joseph and Aseneth* (Marguerat, *Actes*, 325).

108. See, e.g., Epict. *Diatr.* 2.9.20; Keener, *John*, 446–47; idem, *Spirit*, 64; Rowley, "Baptism"; White, *Initiation*, 78–79; Schiffman, "Crossroads," 128. See fuller comment at Acts 2:38.

109. See also Ukachukwu Manus, "Conversion Narratives"; cf. Munck, *Acts*, 82; Bruce, *Apostle*, 75; Ehrensperger, *Power*, 83–85. Continued repetition of a divine call appears also in the Isis cult in Apul. *Metam.* 11.19.

110. Also for other figures, such as Gideon and (before their births) Ishmael and Samson.

111. See in detail Hubbard, "Commissioning Accounts." For OT call and commissioning accounts, see, e.g., Phinney, "Narratives."

112. See Estrada, *Followers*, 41 (following Mullins, "Commissioning Forms," 609–10). For one comparison with the commission accounts in later apocryphal acts (noting the typical actantial structure), see Czachesz, *Commission Narratives*.

113. Cf. Hill, *Prophecy*, 12 (on the prophets).

for some shamans in traditional religions (others being hereditary profession and “personal ‘quest’”).¹¹⁴ Gentiles, too, could understand resting a missionary vocation of sorts on a theophany.¹¹⁵

Paul, like Luke, associates his calling with his conversion experience (Gal 1:12–16);¹¹⁶ though Luke unfolds various elements of the calling in different retellings (Acts 9:15–16; 22:21; 26:16–18), it is Paul’s calling as apostle to Gentiles that makes the story so important to Luke’s theme as to require its threefold repetition. It provides the climax of Paul’s speech in 22:17–21 (where it provokes renewed hostility) and the basis for his mission and his opponents’ hostility in 26:19–23.¹¹⁷ (Since Luke’s retellings can be brief, as in 15:7–8, we might even think of Saul’s conversion being recounted four times [see 9:27; cf. 9:21]. But Luke avoids repetition by merely summarizing.)

(7) Paul’s Theological Reversal

Although purely psychological explanations of Paul’s conversion are not adequate, it is helpful to examine elements of transformation implied in our historical information about Paul’s conversion. Gager argues that Paul’s conversion fits a paradigm for values reversal; since following the law once led him to reject Christ, he rejected the law after following Christ.¹¹⁸ Donaldson likewise suggests that Paul perceived Jesus and Torah as rival ways to define covenant membership before his conversion and hence simply shifted loyalties to Jesus against the law afterward.¹¹⁹ Current readings of Paul’s letters, however, reveal that he did not reject the law nearly so much as scholars, especially in some earlier traditions emphasizing theological discontinuity, have supposed.¹²⁰

Nevertheless, Paul’s new view of Christ must have demanded a radical rethinking of his approach to the law, eschatology, and everything else (cf. 2 Cor 5:16–17).¹²¹ Many scholars suggest that if Paul’s Jewish heritage provided most of the structures for his thought as a believer in Christ, his revelation of Christ provided much of the

114. Eliade, *Rites*, 87; cf. idem, *Shamanism*, 3–66 (for diverse approaches); Filson, “Analysis,” 74; Walsh, *Shamanism*, 49–56; Mbiti, *Religions*, 89, 218, 226; Horton, “Possession,” 34; Verger, “Trance,” 51; Peters, *Healing in Nepal*, 62; for misfortune followed by a message from a medium confirming a call to be a medium, see, e.g., Tanner, “Theory,” 275. Lewis, *Ecstatic Religion*, 37, notes that mystical “call” experiences appear in some form of many major religions as well as in tribal religions (including Eskimo shamans, the focus there); in Majority World Christian movements, see, e.g., Akinwumi, “Idahosa”; Dayhoff, “Vilakati”; Hayes, “Mthembu”; Khai, “Pentecostalism,” 269 (the vision of Kam Cin Hau in Myanmar); Lynch-Watson, *Robe*, 18 (Sadhu Sundar Singh, Dec. 17, 1904, previously hostile to Christians). Dreams are often involved in callings (many Catholic and Protestant clergy in Africa; Sundkler, *Bara Bukoba*, 98, cited in Shorter, *Witchdoctor*, 153; in Zionism, Daneel, *Zionism*, 13–14) and are sometimes factors in the rise of new religious movements (Lanternari, “Dreams”; Shorter, *Witchdoctor*, 153).

115. Talbert, *Acts*, 82, cites Eurip. *Bacch.* 467–70 (spreading Dionysus’s new religion based on a claimed theophany of Zeus).

116. On the language of “conversion,” see discussion below.

117. For the emphasis on Paul’s call (as opposed to his “conversion”), see Stendahl, *Paul*, 7–16.

118. Gager, “Notes on Paul’s Conversion.” Cf. similarly, regarding the law for salvation, Sloan, “Paul and Law”; Murphy-O’Connor, *Paul*, 19.

119. Donaldson, *Paul and Gentiles*, 185.

120. See, e.g., Rhyne, *Faith*; Longenecker, *Paul*, passim; cf. Nanos, *Mystery*; for one mediating approach, see Thielman, “Law”; see fuller comment at Acts 13:39.

121. Cf., e.g., Hengel and Schwemer, *Between Damascus and Antioch*, 13; cf. Keck, *Romans*, 174, on Gal 2:19. Davies, *Paul*, 216, sees Paul as a Pharisee who believed that the messianic era had come (cf. Davies, *Introduction*, 27–28; earlier Ramsay, *Other Studies*, 89–90). As a Pharisee and persecutor of Christians, Paul undoubtedly had some knowledge about Jesus before his conversion, though he had disagreed with claims about him (see, e.g., Murphy-O’Connor, “What Paul Knew”). The idea that Paul was acquainted more personally with Jesus (cf. Ramsay, *Teaching*, 21), however, cannot be based on 2 Cor 5:16 (see sounder approaches in, e.g., Haacker, *Theology*, 147; Furnish, *II Corinthians*, 330; Kreitzer, *Corinthians*, 107–8; Lambrecht, *Second Corinthians*, 95–96; Scott, *Corinthians*, 134; Betz, “Christuserkenntnis”; pace, e.g., van Unnik, *Tarsus*, 54).

content.¹²² This claim can, of course, be overstated; Paul's Christian theology was not complete at conversion but undoubtedly developed as he grappled with his mission.¹²³ Further, because apostolic tradition already was circulating and few primary elements of Paul's theology proved unique, it might be more accurate to claim that his encounter brought him to accept the content that already existed.¹²⁴

But even so, some components associated particularly with Pauline theology may involve meditating on his experience.¹²⁵ This would undoubtedly include his approach to the law, as scholars have often contended. If Paul's own zealous pursuit of the law's righteousness had found him fighting against God (cf. Acts 5:39; 26:14),¹²⁶ there was something flawed about pursuing the law's righteousness by that means (cf. Rom 9:30–32); but for Paul, the problem is not the law but any human approach to righteousness not dependent on God's climactic revelation in Christ. (More broadly, Paul emphasizes dependence on Christ and the Spirit for everything significant; see comment below.) Paul's attempts to achieve righteousness by his interpretation of the law's standard produced only hubris; God revealed himself to Paul not because of, but in spite of, Paul's behavior (1 Cor 15:9–10; Gal 1:12–16; Phil 3:6, 9; cf. Rom 2:23; 3:27).¹²⁷

Paul's letters reveal a theology consistent with this approach. If righteousness was no longer a goal but a gift, subsequent acts of righteousness were themselves fruit, and service to God thus flowed from further "gifts" of the Spirit and Christ working in him (Gal 5:22–23; Rom 12:3, 6–8; 1 Cor 12:4–11; Col 1:29). God birthed new creations in his image through the pattern of Christ as divine wisdom (2 Cor 4:4–6; 5:17; Col 1:15; 3:9–11). Paul celebrates such ideas more than any other NT author (though the Fourth Gospel reflects some of them), and Luke himself seems aware of this (Acts 13:38–39).

Sandmel suggests that the law was a "problem" to Paul but not to all Judaism; his personal solution came in his conversion, but it was his personality that made him "first the persecutor and then the convert."¹²⁸ Paul's writings need not imply, however, that the law was a problem to him before his conversion. If psychoanalytic approaches fail partly for lack of information, we do have sufficient psychological evidence at least to affirm something about a persecutor who converts to what he persecuted: he is likely a person of strong conviction both before and after conversion, with clear-cut and

122. See Kim, *Origin*; Ladd, "Pensée de Paul"; idem, *Theology*, 366–69; Thrall, "Origin," 304–16, esp. 315. Cf. Sanders, *Jesus and Judaism*, 21; White, "Image."

123. See Räisänen, "Conversion and Development." Various scholars have critiqued Kim not for associating his theology with the Damascus experience but for apparently implying that this theology was "fully formed" at that point (e.g., Philip, *Pneumatology*, 171–72); but Kim now nuances more clearly what he meant by his original argument, contending that Paul's theology was implicit in his conversion yet may have developed over time (*New Perspective*, 4, 165–74). Dunn, *New Perspective*, 36–38, does not insist that justification by faith is a late development in Paul's theology.

124. For this accurate balance, see also, e.g., Obijole, "Influence of Conversion."

125. Kim, *Origin*, 268, argues thus for Christ as God's image, which he developed along the lines of Jewish Wisdom ideas (Wis 7:26; Philo) as well as Adam (Gen 1:26; cf. Kim, *New Perspective*, 175); for unmerited reconciliation with God, see Kim, *New Perspective*, 214–38.

126. Neither Gal 1:13–14 nor Phil 3:6 explicitly connects Paul's zeal for (his misinterpretation of) the law with his background as a persecutor of disciples, but the mention of these elements together in both cases probably suggests that such a connection existed in Paul's preconversion perspective.

127. At the heart of Paul's theology of dependence on Christ is avoidance of boasting in earthly matters and of human competition (esp. Rom 2:17, 23; 3:27; 4:2; 1 Cor 1:29, 31; 3:21; 4:7; 2 Cor 10–12 passim; Phil 3:3–9). Although the *New Perspective* rightly emphasizes the role of Jewish ethnic particularism, those who find a broader principle are also correct (cf. Rom 11:20–22).

128. Sandmel, *Genius of Paul*, 25. Others also have recognized that Paul was a distinctive sort of convert (e.g., Donaldson, *Paul and Gentiles*, 303).

passionate beliefs.¹²⁹ Still, Luke's Paul is more complex and ambiguous than many later Christian readers recognize.¹³⁰

Why had Paul persecuted Christians? Intra-Jewish conflict was common¹³¹ and had sometimes led to violence. For example, the temple hierarchy had persecuted Essenes.¹³² Raymond Brown summarizes examples of sectarian violence: the high priests persecuted the Essenes (cf. 4QpNah I, 5–6; CD I, 14–21); John Hyrcanus destroyed the Samaritan sanctuary and later crucified eight hundred (probably including some Pharisees); Pharisees incited violence in 135–67 B.C.E.¹³³ Maccabean literature shows that some praised violence against apostates;¹³⁴ indeed, 1 Maccabees uses Phinehas, who stayed God's judgment on Israel by killing the sinful, as a pattern for Maccabean zeal (1 Macc 2:26; 3:8).¹³⁵ Later rabbis also claimed that an early sage ordered eighty women in Ashkelon executed for sorcery and immorality.¹³⁶

Granted, large-scale, planned, violent persecution is better attested in the pre-Roman period, political factors (i.e., Roman rule) being one obvious reason for the difference. Violence does occur in the first century, but less regularly; the sporadic violence in *Jos. Ant.* 20.213 was apparently spontaneous, and the assassination in 20.163 was attributed to personal animosity and bribery. Far more common are violent attacks, in which not only Josephus's "robbers" but even young Sadducees participated, in the years leading up to the revolt against Rome; yet these were not organized from the top down, because in this period those at the top needed to maintain Roman order.

Yet Paul's epistolary admissions are explicit, and he certainly had plenty of respected precedent for persecuting those viewed as a threat to the faith. Such persecution was far more difficult under Roman rule, but if Pilate was "looking the other way" between 31 and 36 C.E., when his own political situation was more precarious,¹³⁷ some individuals (such as the young Paul) may have taken advantage of the new situation

129. Some note that his epistles show ability to nuance and entertain various aspects of a case, but his soteriology remains typically binary (one is either "in" or "out"; e.g., Rom 1:17–18; 2:7–8; 5:12–21; 1 Thess 1:9). Then again, such binary structures with nuancing for practical reality are hardly uniquely Pauline (see, e.g., the proposed Stoic structure in Engberg-Pedersen, *Paul and Stoics*; various binary structures, including Qumran and Johannine dualism and antitheses in Jewish Wisdom literature, in Keener, "Spirit Perspectives").

130. See Brawley, *Centering on God*, 148–58, esp. 158 (though Paul may be more "flatly" positive than Brawley suggests).

131. E.g., Pharisaic conflict with Sadducees (e.g., *Jos. Ant.* 18.17; *m. Yad.* 4:7; *t. Hag.* 3:35; *Nid.* 5:3; *'Abot R. Nat.* 5 A; 10 B; *b. Nid.* 33b; *Sukkah* 48b); members of the priestly aristocracy came to blows with each other in the first century (*Jos. Ant.* 20.213). Later some even claimed Shammaite murder of Hillelites (allegedly Tannaic tradition in *y. Sabb.* 1:4; but cf. Sanders, *Jesus to Mishnah*, 87–88). See further Keener, *Matthew*, 351–53, some of which is employed below.

132. 1QpHab VIII, 8–12; IX, 4–7; XII, 5; 4QpNah I, 11. This was, admittedly, earlier: the "Wicked Priest" has been identified with Jonathan (Rost, *Judaism*, 163), John Hyrcanus (Brownlee, "Messianic Motifs," 13–15), or "the false priesthood of the Temple at any time between the Maccabean period and the fall of the Hasmonean dynasty" (Fritsch, *Community*, 83–84). Some identify the "Young Lion" of 4QpNah I, 5 with Alexander Jannaeus (Allegro, "Light," 92; Eisenman, *Maccabees*, 35); some hold that a specific identification is impossible (Rowley, "4QpNahum"); and others even identify him with Pontius Pilate (Thiering, *Gospels and Qumran*, 70, with little support). As the original Teacher of Righteousness became a model for the future one (CD VI, 10–11) and the title probably applied to all his successors (Buchanan, "Office"), the identity of the original Wicked Priest may have applied to the priesthood in perpetuity. Some scholars find clues of Essene antagonism toward Pharisaism (Roth, "Subject Matter of Exegesis," 65; idem, "Reference"; Dupont-Sommer, *Manuscripts*, 33) or Pharisaic or rabbinic opposition to the Essenes (Lieberman, "Light," 396–400). The rabbis nevertheless reflect legal or cultural traditions often shared with Qumran, though reasons for such parallels are debated (e.g., Baumgarten, "Qumran Studies," 256; Neusner, "Testimony"; Schiffman, *Law*).

133. Brown, *Death*, 393–95.

134. With Witherington, *Acts*, 302; Hengel, *Pre-Christian Paul*, 63–65.

135. See Goulder, *Type and History*, 11–12.

136. Urbach, *Sages*, 1:572 (though it is not clear that all approved; see *m. Sanh.* 6:4).

137. After the fall of Sejanus, his patron in Rome.

to reinstate ancient models of zeal they considered biblical (e.g., Num 25:7–13; 2 Kgs 10:16; Ps 106:30–31).¹³⁸ Revolutionary movements shortly before and after this period suggest a continuance of pockets of violent resistance. That is, apart from government action, individuals instigated violence in this period, and Paul was one such individual.

More important is that intra-Jewish violence not officially sanctioned by the government continued; Josephus faced life-threatening opposition from rivals within his own social class (e.g., *Life* 272–75, 302–3). The ideal of executing offenders against the law surely survived even if the practice normally could not, because Jewish revolutionaries killed those they regarded as Roman collaborators before and after they seized control of Jerusalem in the revolt of 66–70.¹³⁹ Even a municipal aristocracy could certainly sanction the application of corporal punishments under Jewish law (see 2 Cor 11:24); letters such as those Paul requested from the high priest need not have explicitly endorsed the lengths to which Paul might wish to carry them (even apart from what our sources suggest about the corruption and abuse of power among some members of the priestly elite).

Mainstream Judaism emphasized toleration, but toleration had its limits, and different individuals recognized different limits. Granted, most Jews did not view the Jesus movement as apostate, and some (especially outside Jerusalem) condemned the temple no less harshly than did Stephen. But those were the views of others; Paul had his own, strict views,¹⁴⁰ and perhaps suppression of Nazarenes was part of a personal crusade that also advanced his status among his zealous colleagues (cf. Gal 1:13–14), though he presents his motives as God-fearing (Phil 3:6; cf. 1 Tim 1:13).

Beyond this, scholars have offered various theories. Some propose that his eschatology had invited such activity. Perhaps he shared, and hence labored according to, a widespread view that sins and false teaching could delay the final redemption, though apostasy was part of the messianic travail.¹⁴¹ Paul's Hellenism and Roman citizenship might have also motivated him as well as given him a greater sense of legal security for his actions. That he and fellow Hellenists felt that they had something to prove in terms of orthodoxy and hence were exceptionally motivated to persecute "apostate" Hellenists makes some psychological sense, though (especially given the fragmentary and chronologically distant character of our sources) it cannot be proved.

There may have been more personal reasons, though this, too, is at best a vague possibility (one could argue as easily that the same connections would have deterred, rather than motivated, his persecution). Saul may have had some friends or distant relatives who were Nazarenes before him; given the history of the movement, they, too, would have been in Jerusalem (cf. perhaps Rom 16:7, though probably this is not relevant).¹⁴² Whether these were relatives who moved to Jerusalem along with the

138. Some examples were, however, "zeal without knowledge" (Num 11:29; 2 Sam 21:2), as Paul later believed (Rom 10:2).

139. E.g., Jos. *War* 4.140–41, 146, 196; cf. also Witherington, *Acts*, 303. The rabbis reveal little of this; the failure of the Judean revolt probably discredited such sentiments, which were probably never shared by most of the surviving Pharisees, in any case (especially aristocrats such as Gamaliel II and probable advocates of peace such as Johanan ben Zakkai).

140. For one attempt to understand how Paul would see the Jesus movement differently from the way he would view other more mainstream Jewish sects, see Nock, *Paul*, 64, 73–74.

141. Longenecker, "Hope," 23. On the necessity of extirpating dangerous teaching, cf. Stauffer, *Jesus and Story*, 208–9.

142. Rom 16:7 would be relevant only if Paul does not intend the term only as "fellow Jews" (as in Rom 9:3); given the number of other fellow Jews in the list in Rom 16, the term might be more specific here (as Bauckham, *Women*, 170, concedes, though applying it to fellow Jews; for the view that they were Paul's physical kin, cf. Ambrosiaster *Comm.*, on Rom 16:7). Yet Paul mentions a number of "kinsmen" in Rom 16:11,

entire family from Tarsus (cf. Acts 23:16), relatives who were not enslaved with Paul's immediate ancestors (and hence not Roman citizens),¹⁴³ or relatives who migrated from elsewhere in the Diaspora¹⁴⁴ is unclear. If Rom 16:7 is relevant at all (again, it very likely is not), at some point some kin were apparently imprisoned (Rom 16:7), but even if they were close kin and not simply fellow Jews we cannot be sure that it was in Jerusalem or that Paul had anything to do with it; if their family shared the high status or even citizenship of Paul's family, it would have complicated any efforts to prosecute them.¹⁴⁵ As (probably) Hellenists they may well have left Jerusalem during the persecution of Acts 8:1–4. Such clues are tantalizing from a historical perspective; we cannot even be certain that Paul knew they were Christians at this time.

Wright suggests that Paul's hostility to Gentiles may be explained by his affiliation with the Shammaite branch of Pharisaism, then dominant, despite his studying under the Hillelite Gamaliel.¹⁴⁶ If Saul could later repudiate his anti-Christian views, he could have easily, in an intellectual climate moving in a different direction, rejected his teacher's views.¹⁴⁷ (He remained, at least, a Pharisee, though this was apparently also his father's affiliation, perhaps explaining the choice of teachers [23:6].) But if this is the case, he could have also selectively rejected the views of his minority Hillelite school if he belonged to it. We cannot conclude to which of the Pharisaic schools Paul adhered on most issues or even that Gamaliel himself would have remained as tolerant as he appears in 5:34–39 (if Luke knew that Gamaliel later took a harder stance, would he have reported it?). Much of Paul's background and psychological motivation is impossible to reconstruct with any substantial measure of certainty.

(8) *Calling or Conversion?*

Krister Stendahl rightly challenges the traditional view that Paul “converted” from “Judaism” to “Christianity,” surely an anachronistic understanding of early Christianity.¹⁴⁸ However later Christians may have viewed him, Paul believes that he continues to remain faithful to his Jewish heritage and that it is those who do not join him whose

21, and so either he had many relatives with Greek names who immigrated to Rome or (much more likely) he means the term broadly, e.g., for a household in Benjamin (see also discussion at Acts 3:16) or simply (as above) for fellow Jews.

143. The ancestral “Pharisees” in 23:6 may well be a generalizing plural, but if not, Paul would have likely had ancestors who were Pharisees *before* the move from Tarsus (unless we should think that his grandfather resettled the entire family from there and converted to Pharisaism before his death [on aged people migrating, cf. comment on Acts 6:1]; this is not impossible but, in view of average longevity, less probable). But Pharisees are virtually unknown in the Diaspora, though they existed before Pompey and the possible enslavement of Paul's ancestors.

144. In Rom 16:7, “Andronicus” is a good Hellenist name, and “Junia” (certainly a woman; see, e.g., Epp, *Junia*) is a Latin name—in fact, a praenomen—probably indicating Roman citizenship (Judge, *Rank*, 36n18), fitting the “synagogue of freedpersons” (Acts 6:9). But if the two are a married couple, we cannot be sure which was Paul's relative by birth, if either (see note above). Bauckham, *Women*, 165–86, identifies Junia with Joanna of Luke 8:3; 24:10 (this would locate her in Galilee rather than Jerusalem, making relations with Paul highly unlikely); on her Roman name, see Bauckham, *Women*, 182–85.

145. On the difficulty of prosecuting those with higher status (though more explicit in the early second century), see, e.g., MacMullen, *Social Relations*, 40; Winter, *Welfare*, 111–13; idem, *Left Corinth*, 44, 60; Rapske, *Custody*, 56–62; Mitchell, “Rich”; Jos. *Ant.* 19.12–14; Juv. *Sat.* 3.140–46; Suet. *Aug.* 5; Claud. 15.4; Dig. 47.21.2 (though later rabbis would have disapproved, *t. Sanh.* 1:7–8; *'Abot R. Nat.* 20, §43 B; so also others on an ideal level, e.g., Suet. *Tib.* 33). Family ties need not have deterred prosecution for following heresy (Deut 13:6), though in practice it is possible; many viewed prosecution of kin as shameful, but they might express such sentiments in court (e.g., Isaicus *Cleon.* 6.35).

146. Wright, *Founder*, 26–30. He sees Paul's later Christian views as closer to Hillel as a *result* of his conversion, not because of his previous commitment (30).

147. For modern examples, one thinks of E. Stauffer or Norman Perrin rejecting their teacher's views.

148. Stendahl, *Paul*, 7, rightly placing the emphasis on his calling; followed by many others, e.g., Roetzel, *Paul*, 10–12; Ashton, *Religion*, 75–76; cf. Hollander, “Bekering”

faith is inauthentically Jewish.¹⁴⁹ He was not converted “from one religion to another, since he considered Christianity to be the true Judaism”; rather, “he was converted from one understanding of righteousness to another—from his own righteousness of works to God’s righteousness by faith (Rom. 9:30ff.).”¹⁵⁰ This narrative retains elements of earlier biblical call narratives (already echoed in earlier Lukan stories concerning Mary and Peter) not found in some of Luke’s conversion stories.

Nevertheless, conversion is also an appropriate way to describe a central component of Paul’s experience. Although Paul was not converted to another religion, he was converted to a new way of life and thinking (as well as from one Jewish sect to another).¹⁵¹ Even his letters might suggest continuing remorse (1 Cor 15:9), and Luke claims that he was baptized (Acts 9:18), a mark of conversion to Judaism (see comment on Acts 2:38). Recent scholarship tends to accept the designation “conversion” for Paul’s experience, while retaining Stendahl’s insight about the continuity of Paul’s Jewish self-identity.¹⁵² It constituted “a reconfiguration rather than a repudiation of his essential Jewishness.”¹⁵³ We should reject the common dichotomy (“Was Paul ‘called’ or ‘converted?’”) and recognize that Paul was both converted (Phil 3:4–11; Acts 9:1–18) and called (1 Cor 9:1; 15:8–11; Gal 1:11–23; Acts 22:10, 14, 17–21; 26:4–20).¹⁵⁴ Luke certainly views Paul’s transformative encounter as a conversion, presenting it according to his pattern of conversion stories and placing it between the conversion of the African official and that of Cornelius.¹⁵⁵

Segal argues persuasively for Paul as a convert in the sociological sense, noting that sudden converts often have strong convictions.¹⁵⁶ Some arguments for this view are too weak to bear any weight; for example, Segal suggests that radical antitheses such as those in Rom 5:12–21 and 1 Cor 15:42–49 fit the either-or mentality of a convert.¹⁵⁷ But apocalyptic literature abounds with vertical dualism, and Paul’s contrasts function as good rhetorical antithesis.¹⁵⁸ Some arguments also may be too determined by the cultures from which the examples are drawn or by circumstances different from Paul’s.¹⁵⁹ Nevertheless, Segal’s discussion raises valuable questions. Did Paul need to

149. Sandmel, *Genius of Paul*, 62 (himself naturally demurring from Paul’s perspective).

150. Ladd, *Theology*, 368.

151. Dunn, *Acts*, 119–20; similarly, Parsons, *Acts*, 135; Peterson, *Acts*, 303; using the sociological definition, Campbell, *Deliverance*, 166. Those approaching Paul’s letters from a sociological standpoint (Segal, *Convert*, 32–33; Elsdon, “Converted”) argue that they do employ the rhetoric anticipated for conversion claims.

152. Donaldson, *Paul and Gentiles*, 17, 302; Roetzl, *Paul*, 10–14; Bock, *Acts*, 349; Talbert, *Acts*, 83; and sources below.

153. Donaldson, *Paul and Gentiles*, 49.

154. Haacker, *Theology*, 9–10 (noting also both aspects in 1 Tim 1:12–16); Elsdon, “Converted.”

155. For a comparison of this conversion account with others in Acts, see esp. Kern, “Conversion”; Miranda, “Chiamata di Paolo”; Saout, “Annonce.”

156. See Segal, *Convert*, passim (see esp. 288–99). More widely on psychological and other approaches to conversion, see Brandt, “Retournement” (highlighting esp. the case of Peter in Luke-Acts); discussion from social identity theory, initiation rituals, and other anthropological material in Lamoreaux, “Identity.”

157. Segal, *Convert*, 65–66. On the antithesis between flesh and spirit, see p. 71; yet this dualism appears at Qumran (though we might view those who joined the Essenes as “converts” in some sense; Duhaime, “Dualisme,” associates it with their “sectarian” identity) and, as a contrast between flesh and God’s Spirit, already appears in Gen 6:3; Isa 31:3. More general anthropological dualism pervaded Judaism by this period (see, e.g., *1 En.* 102:5; *t. Sanh.* 13:2; *Jos. Ag. Ap.* 2.203; Keener, *John*, 553–54; esp. Gundry, *Sōma*, passim). Pauline moral dualism resembles Stoic, Qumran, and especially wisdom perspectives (see Keener, “Spirit Perspectives”).

158. See, e.g., *Rhet. Alex.* 26, 1435b, lines 25–39; Dion. Hal. *Lysias* 14; Anderson, *Glossary*, 21–22; Rowe, “Style” 142; Black, “Oration at Olivet,” 87; Cosby, “Language,” 216; Keener, *Corinthians*, 131–34.

159. In modern Western studies, conversions are particularly common in emotional settings among young adolescents, especially those prone to guilt, with men about six times as likely to experience crisis conversions as women (Segal, *Convert*, 287–88). Cognitive converts tended to be older, with more gradual conversions (288). Yet it is difficult to expect a “gradual” conversion after an encounter such as the one Paul claims, at any age. Moreover, ancient “conversions” did not all follow the pattern that Segal depicts (see Nock, *Essays*, 469–80).

take a while after his conversion to sort out his theology, as scholars often suggest?¹⁶⁰ What influence did the Christian community in Damascus and/or Nabatea play in helping to solidify Paul's faith?¹⁶¹

Segal mistrusts Luke's and Paul's interpretive grids for Paul's conversion, noting that the structure of conversion is often stereotyped according to the values of the community into which one converts.¹⁶² Paul, however, converted to Christ before being socialized into his community.¹⁶³ Segal thinks Luke even less trustworthy, for depicting Paul's conversion in prophetic terms;¹⁶⁴ yet as many point out, Paul also uses prophetic language,¹⁶⁵ and it is natural that this would be the grid to which both authors would appeal.¹⁶⁶ Although conversion differs substantially from brainwashing,¹⁶⁷ Segal notes that converts (as opposed to lifelong believers) tend to engage in "biographical reconstruction," using the language of "self-transformation," as in Paul's letters.¹⁶⁸ He suggests that converts' new communities exert such strong interpretive influences that one cannot take at face value converts' depictions of their preconversion lives.¹⁶⁹ Certainly Paul's postconversion view of preconversion life under the law differed from his preconversion understanding of it,¹⁷⁰ but memory studies also show that the gist of information remains accurate despite the mind's interpretive grids.¹⁷¹

Some argue that Christ replaced Torah but that Paul's preconversion view of Gentile conversion remained intact. On this view, Paul was involved in a different kind of "Gentile mission" before his conversion, advocating that Gentiles become full

160. Sudden converts often take longer to accept beliefs of sects, retaining as many mental reservations and doubts as before; gradual converts are more accepting, having more time to internalize the new beliefs (Segal, *Convert*, 288). (Conflict with doubts for several years remained, to some extent, in my own experience as a sudden convert from atheism.)

161. The highest commitment usually takes place after sudden conversions followed by "other members' thorough education to the values of the group," establishing the new believer in the community's plausibility structures (Segal, *Convert*, 74). I am not convinced that this would work as well in the case of those converted to a belief rather than to a new community (as initially in Paul's case); despite "reeducation," I always wanted more proof.

162. Segal, *Convert*, 17. Thouless, "Psychology," 141–42, argues that converts often overemphasize preconversion sinfulness (as sometimes seen in child converts).

163. On conversion and social networks, Douglas Campbell cites, among other studies, the seminal Lofland and Stark, "Conversion"; Stark and Bainbridge, *Religion* (critiques of some aspects of these works appear, e.g., in Snow and Phillips, "Model"; Bruce, *Choice*; Norris and Inglehart, *Sacred*); for proposed relevance to Paul, see Campbell, *Deliverance*, 129–32. While group attachments and prior socialization may be common features of conversion in many cultures, however (and may even constitute a factor for Augustine's conversion; see Campbell, *Deliverance*, 282), they do not fully fit Luke's or Paul's views of Paul the persecutor. My own conversion from atheism illustrates that conversions do occur without such prior attachments, though (better fitting what the common pattern would predict; cf. Campbell, *Deliverance*, 132–33) my subsequent socialization was admittedly not easy.

164. Segal, *Convert*, 21, 29.

165. Note even Segal himself (*ibid.*, 70), acknowledging that "Paul's language constantly invokes the concept of prophetic commissioning" (in addition to entailing conversion).

166. As to whether this approach is unreliable because it represents Paul's ancestral faith, one can make this assumption only on the prior assumption that either the God of Israel did not reveal himself in this manner or this God would not have done so to Paul. And even on nontheistic premises, writers can describe an experience in prophetic language without inventing the data they thereby arrange and interpret.

167. Segal, *Convert*, 290, noting that those who depict conversion as brainwashing usually display an antireligious bias.

168. *Ibid.*, 28.

169. *Ibid.*, 29 (following Brian Taylor).

170. Cf. Rom 7:7–25; Phil 3:7 with Gal 1:14; Phil 3:6.

171. See Bauckham, *Eyewitnesses*, 333–34. For what it is worth (a single case study counts as merely anecdotal evidence), however my postconversion community shaped my interpretation, I have clear and detailed memories of my preconversion life and conversion experience. Like Paul, I came to the community only after conversion; the community helped shape my early faith, but there were too few other "converts" in the community—and none from my background—to help shape the telling of my narrative.

proselytes by circumcision instead of remaining God-fearers (on the basis of a literal reading of Gal 5:11).¹⁷² He would thus be comparable to Eleazar in Adiabene (Jos. *Ant.* 20.38–48, esp. 20.43–46).¹⁷³ He also took the strictest Jewish view of Gentile salvation, one that required Gentiles' conversion; he carried this perspective into his Christian work after his conversion to Christ.¹⁷⁴ This is all very possible, though our sources are not clear regarding (or interested in) Paul's views about Gentiles before his conversion.¹⁷⁵ If Paul experienced any psychological struggle over the Gentile mission, Luke neglects depicting it.¹⁷⁶ But given all that Paul had to relearn, this may have been just one piece among many.

(9) *Theology and Structure*

What is Luke's theology in the passage? He emphasizes God's sovereignty in converting the persecutor (cf. 2 Macc 3:24–36).¹⁷⁷ Further, he emphasizes that Paul's Gentile mission was God's idea, God's initiative, and ultimately God's accomplishment.¹⁷⁸ Gamaliel warned that one could not prevent the realization of God's central purposes (Acts 5:39); now this thesis is demonstrated in the life of one whom Luke will later identify as Gamaliel's student (22:3).¹⁷⁹ Perhaps Luke highlights Paul as persecutor in part to emphasize that Christ can save anyone, even the most hostile (cf. 1 Tim 1:16, which in context suggests that even false teachers can repent; 1:13, 20).¹⁸⁰ Probably Luke highlights Peter's confession of his sinfulness at his "conversion"/calling (Luke 5:8, 10) in part to prepare the way for Paul's conversion.¹⁸¹ Jesus deliberately chose "sinners" and ordinary people as his disciples (5:8, 27; 6:15; 19:8–9); the real test was whether they would forsake all (5:1, 28; 19:8) or betray him (6:16). Paul plainly forsook all (Acts 9:18, 20, 24–25, 29). Whereas one might expect Stephen or Philip to emerge as leader of the Gentile mission in Luke's narrative, with Saul last of all, Luke's theology agrees with Paul's that God chooses whom he will (cf. Luke 5:8, 10; Acts 15:7; perhaps 7:21–27). As in the claim of 1 Tim 1:16, this mercy is a model for those who would follow;¹⁸² Luke uses Paul's life as a model for the Gentile mission, a technique that Paul would have undoubtedly approved of (1 Cor 4:16; 11:1; 1 Thess 1:6).¹⁸³

172. Brändle and Stegemann, "Formation," 122–23. This view does not argue for an ancient Jewish "missions movement," now largely doubted, but simply that many successfully sought proselytes; see discussion at Acts 1:8.

173. Donaldson, *Paul and Gentiles*, 78.

174. Donaldson, "Convert," 81–82. On proselytism as necessary for salvation in one model of Jewish soteriology, see idem, *Paul and Gentiles*, 54–60. I regard this point as stronger than the claim that Paul sought proselytes before his conversion.

175. Thus, e.g., Ashton, *Religion*, 98, finds Donaldson's proposal here attractive but remains unpersuaded.

176. It might have proved useful for his narrative parallels in view of Jesus's struggle in Luke 22:42; but it would not fit Jesus's interest in Gentiles, shown from the start (Luke 4:25–27). Ancients regularly emphasized and perceived the tragic conflict of characters' internal values in their narratives, though without having to spell these out explicitly (Barton, *Honor*, 272; in the OT, see, e.g., Gen 22:1–19).

177. Implicitly, perhaps partly in response to his people's prayers (cf. Luke 6:28).

178. Paul's call here fits Luke's mission theology elsewhere as well as Paul's own; see Kowalski, "Widerstände."

179. Johnson, *Acts*, 166.

180. God's desire for the wicked to repent—and promise to receive them—also appears in the prophets (Ezek 18:21–23, 27–28).

181. Narratives of God's calling also tended to expose humans' inadequacy (Exod 3:11; Judg 6:15), including morally (Isa 6:5, 7), but Paul as a persecutor pushes that category much further (cf. 1 Cor 15:9).

182. Contrast the response of Greek "heroes" to insults, usually by violently killing their challengers (e.g., Paus. 3.16.2–3; 4.3.1; *Aethiopsis* 1 [Achilles killing Thersites]).

183. Sages could use their own lives as models for imitation (Diogenes *Ep.* 14; Diog. Laert. 7.1.10–11; cf. Xen. *Apol.* 16; 4 Macc 9:23; other examples in Stowers, *Letter Writing*, 100–101, 114 [e.g., Sen. *Y. Ep. Lucil.* 6.5]), though usually not as explicitly as Paul (contrast, e.g., Sen. *Y. Dial.* 7.18.1). It was understood

One suggestion for the passage's structure is chiastic:¹⁸⁴

- A Paul plots against disciples in Damascus (Acts 9:1–2).
- B Paul sees a vision, is blinded, fasts (9:3–9).
- C Ananias sees a vision and is sent to Paul (9:10–14).
- D Christ foretells Paul's mission (9:15–16).
- C' Ananias reports the vision to Paul (9:17).
- B' Paul's sight is restored; he eats (9:18–19a).
- A' Paul preaches Christ in Damascus, and members of the Jewish community plot to kill him (9:19–25).

As often in proposed chiastic structures, the asymmetry is problematic (i.e., A is two verses whereas A' is seven; B is seven verses whereas B' is two; C is five verses whereas C' is one), and the dominant elements are selected on the basis of where parallels appear. More serious is that this proposed structure omits 9:26–30. Nevertheless, at least the inverted parallelism between Paul's mission to persecute and his experience of persecution, and between his being blinded and its undoing, appears plausible. That Paul's call would be at the heart of the narrative fits Luke's theology as well as Paul's perspective on his experience (Gal 1:15–16).

II. COMMISSIONED BY THE HIGH PRIEST (9:1–2)

Luke's mention of the high priest's role here serves multiple literary functions: it connects this persecution with a major enemy of Jesus and an opponent of the Jerusalem church; it reveals Paul's influence and status in the Jerusalem elite;¹⁸⁵ and it prepares for Paul's defense later in the book by undermining some of his accusers.¹⁸⁶ Luke later makes good use of Paul's commission from the chief priestly circle; when the leading priests later accuse Paul, he not only attributes it partly to Sadducean bias against his Pharisaic resurrection views (Acts 23:6–8) but indicts the Sadducean class as accessories in his only genuinely legal offense. Rome rarely meddled with local judgments against local persons, but it would have little tolerance when this judgment extended to extrajudicial lynchings; it is thus significant that Paul links his own participation with such behavior to a commission from the very ruling priestly class that accuses him (26:10, 12).

(1) *Saul's Hatred* (9:1)

The language of "breathing threats" is idiomatic¹⁸⁷ and evokes OT images of breathing anger (cf. Job 4:9; Ps 18:15; Ezek 13:13; 21:31; 22:20–21).¹⁸⁸ The language of "threat" (ἀπειλή) is also common in 3 and 4 Maccabees;¹⁸⁹ in one of these passages, the threats (4 Macc 4:8) are met with a terrifying vision that leads to the persecutor's

that disciples would imitate sages (cf. Xen. *Mem.* 1.2.3; Sen. E. *Controv.* 9.3.12–13; Lucian *Peregr.* 24; *Dem.* 2; Philost. *Vit. Apoll.* 5.21; *b. Ber.* 62a; Fiore, "Exemplification," 233–34).

184. Bligh, *Galatians*, 95.

185. Although this is a Lukan emphasis, I do not mean to imply that Luke fabricated the idea (cf. Gal 1:14 and comment on Acts 22:3).

186. Note the helpful plural "high priests" in Acts 9:14, 21; 26:10, 12, even though Luke's narrative specifies only a single high priest's involvement and only as a letter of recommendation. Acts 9:14 and esp. 9:21 heighten the chief priests' responsibility, but because these comments appear in the mouths of less directly informed characters, Luke assumes less direct narratorial responsibility for their precision.

187. See BDAG; Bock, *Acts*, 354.

188. Cf. Bruce, *Acts'*, 196. These probably relate to a Semitic expression (cf. Meshah's Moabite inscription).

189. 3 Macc 2:24; 5:18, 30, 33, 37; 4 Macc 4:24; 7:2; 8:19; 9:32; 13:6; 14:9. Elsewhere in the LXX, Job 23:6; Prov 17:10; 19:12; 20:2; Isa 50:2; Hab 3:12; Zech 9:14; cf. also *Pss. Sol.* 17:25.

repentance (4:11–14).¹⁹⁰ Earlier the apostles, threatened by the Sanhedrin, prayed that God would notice their enemies’ “threats” (Acts 4:29; elsewhere in NT only Eph 6:9); here God notices their enemies’ threats again.

“Threats and murder” need not suggest that Saul actually killed the disciples; the terms together probably function as a hendiadys, hence “threats of murder.”¹⁹¹ Whether Saul was involved in carrying out any of these threats (apart from Acts 7:58 and as an intended recipient in 9:24, 29) is unclear here (but cf. 22:4; 26:10). Whatever the case, however, the text suggests irony: normally one is thrown into prison for murder (Luke 23:19, 25; cf. the commandment in 18:20),¹⁹² yet Saul, the one threatening murder, is himself hypocritically imprisoning others (Acts 8:3; 9:1–2; 22:19). The “threats,” too, might simply provoke believers to pray for greater boldness (Acts 4:29, the other use of ἀπειλή in Luke-Acts).¹⁹³ Yet Saul, who opposes “the disciples of the Lord,” will soon receive a disciple (9:10), join the disciples (9:19), make disciples (9:25), and find some skeptical that he is really a disciple (9:26).¹⁹⁴

(2) *Saul’s Commission (9:1–2)*

Both Luke (8:3) and Paul (Gal 1:13–14) suggest that Paul was a leader in the persecution, not simply an obscure part of a larger movement to which his activities were a mere addendum (cf. Acts 9:31). Paul’s letters indicate that some significant persecution continued in Judea even after his conversion (1 Thess 2:14–16), a perspective compatible with but not specifically confirming Luke’s claim that members of the aristocratic priesthood were involved (Acts 26:10 may be a generalizing plural, since the high priest in view no longer remained in office, or it may point to more general support).¹⁹⁵ (For the value of this portrayal for Paul’s later reversal of charges against his accusers in Acts, see comment on 26:12.)¹⁹⁶

Even Luke, however, does not claim that the high priest or his colleagues initiated this mission of persecution. In Acts, Saul initiated it, and the high priest merely offered supporting letters, which may have asked local synagogues’ cooperation in assisting Jerusalemites’ discipline of errant members (see discussion below). Saul’s conversion and exit from the scene seems to have inaugurated a more peaceful period for the church (9:30–31).

Luke may portray Paul as something like an agent of the high priests, a claim that does not diminish his own status. Letters of recommendation would not necessarily imply historically that the priests conceived of the persecution; Paul may have

190. See Johnson, *Acts*, 162, who emphasizes this allusion. Accounts of (a proportionately small number of) persecutors converted through visions circulate today as well (e.g., Bush and Pegues, *Move*, 140–41; Rutz, *Megashift*, 31; also a report I heard from someone I knew well, who reported being close to the source, in northern Nigeria in summer 2000, before some Christians began to retaliate after later massacres); persecutors have also converted through more traditional means (e.g., in Sung, *Diaries*, 161).

191. Witherington, *Acts*, 315. Saul was part of the group accused (on a corporate level) of Jesus’s murder (Acts 7:52, 58).

192. For homicide in Roman law, see Robinson, *Criminal Law*, 41–46 (noting [45] some accepted justifications, of which the closest here [but not very close] would be killing a “deserter” to the enemy).

193. For the verb, see Acts 4:17, to which 4:29 alludes. Elsewhere in the NT, the noun appears only at Eph 6:9 (for the verb, cf. 1 Pet 2:23), though it appears in later Hellenistic Jewish works, esp. in 3 Maccabees (3 Macc 2:24; 5:18, 30, 33, 37) and 4 Maccabees (4 Macc 4:24; 7:2; 8:18–19; 9:32; 13:6; 14:9), where, with the possible exception of 4 Macc 13:6, it refers to harsh pagan persecutors of God’s servants.

194. “Disciple” may be Luke’s terminology to establish continuity with Jesus’s first disciples in the Gospel (Trebilco, “Self-Designations,” 37).

195. Sadducean participation in the persecution is more compatible with our sources than the idea that primarily Pharisees were involved, though Paul was a Pharisee.

196. The high priestly class proved complicit in Paul’s only mission that by Roman standards was truly illegal. For Luke’s apologetic for Paul’s innocence, see Keener, “Apologetic”; idem, *Acts*, 1:223–24, 445–49.

conceived it and simply obtained a chief priest's endorsement of his general mission. Luke, however, makes good use of the priestly connection, as already noted. Elsewhere a person "sent" (ἀπέστειλεν) authoritative letters by messengers (e.g., 1 Macc 1:44); the high priest himself could send (ἀποστείλαι) exemplary representatives (*Let. Aris.* 32, 40).¹⁹⁷ Often those sent as envoys of the later rabbinic leadership in Judea were respected scholars.¹⁹⁸ Some scholars think that when Paul claims to be "not an apostle of men" in Gal 1:1 (cf. 1:12), he contrasts his apostleship with his former role, when he was a persecutor of the church (cf. 1:13).¹⁹⁹ Whether the Galatians knew enough of Paul's story already to infer this connection is unclear, but the contrast is at least consistent with the perspective of one who was formerly an "apostle of men."

The concept of a commissioned messenger, authorized by a sender, was not restricted to Judaism.²⁰⁰ When Caesar sent (ἀποστέλλω and cognates) a governor or representative, the representative was both authorized to act on Caesar's authority and responsible for carrying out his wishes.²⁰¹ Philosophers could send disciples to teach in their stead and act as their representatives.²⁰² Greeks could likewise associate such sending with cultic or revelatory purposes. Temples could send representatives—for example, the envoys dispatched by the hierophant of Eleusis to seek contributions for the shrine.²⁰³ Hermes, as messenger of the gods, was sometimes "sent from heaven."²⁰⁴ Epictetus advised that the genuine Cynic was a messenger sent from Zeus to people to show them their depravity.²⁰⁵

An equivalent custom existed in ancient Israelite circles as far back as Proverbs²⁰⁶ and eventually became formalized under Jewish law. Although we cannot determine the date at which some aspects of the custom of agency became law, the custom's practice in surrounding cultures suggests that the Jewish custom is older than the rabbinic sources that comment on it. Thus, for instance, both Roman and Jewish law recognized the function of proxies, or intermediary marriage brokers, in betrothals.²⁰⁷ (This sort of custom occurs fairly commonly in societies where parents must negotiate the terms of marriage contracts.)²⁰⁸ Although Jewish law did not require agents in betrothals,²⁰⁹ they were clearly common,²¹⁰ and rules were created regulating their conduct.²¹¹ Agents were also used in divorce²¹² and business.²¹³ Other evidence indicates that the practice was early. The language of agency might appear in Qumran halakah.²¹⁴ Eventually the Nasi

197. In a more historical example from the relevant period, Josephus acted on orders from the Jerusalem Sanhedrin (*Life* 62).

198. *Y. Sanh.* 1:2, §10; cf. De Ridder, *Discipling*, 125–26.

199. Cf. also Dio's contrast between charlatans and divine callings (Malherbe, "Gentle as Nurse," 215).

200. Here I borrow material from Keener, *John*, 310–13 (see further also 314–15, not used here).

201. Cf. *Jos. Ant.* 18.1, regarding Quirinius; 18.265, regarding Petronius; for the Latin equivalent, see *Pliny Ep.* 10.18.190–91.

202. Zeno in *Diog. Laert.* 7.1.9.

203. Mylonas, *Eleusis*, 244. One may also compare traveling holy men seeking to spread their cults abroad, although the establishment generally viewed them as charlatans (Stambaugh and Balch, *Environment*, 42).

204. *Cornutus Summ.* 16 (Lang, 20, lines 18–19), in van der Horst, "Cornutus," 169.

205. *Epict. Diatr.* 3.22.23; cf. 4.8.31.

206. E.g., *Prov* 10:26; 13:17; 22:21; 25:13; 26:6.

207. See Cohen, *Law*, 295–96 (citing *Ulp. Dig.* 23.1.18); cf. Friedländer, *Life*, 1:234.

208. See examples in Jochim, *Religions*, 164; Gelfand, "Disorders," 158; Mbiti, *Religions*, 179.

209. *M. Qidd.* 2:1.

210. E.g., *b. Qidd.* 43a; *Exod. Rab.* 6:3 (a parable attributed to R. Meir); 6:4.

211. *T. Yebam.* 4:4.

212. *B. Git.* 23a; *Qidd.* 43a.

213. Assumed in the parable in *Gen. Rab.* 8:3.

214. Cf. CD XI, 2, 18–21; certainly messengers, at least, were known (1Q20 XX, 18; 4Q169 3–4 II, 1; 4Q200 4 7).

sent “envoys” to the Diaspora, a practice attested in the church fathers and Roman law as well as rabbinic literature;²¹⁵ but earlier texts attest the same practice of the high priest.²¹⁶

That this sort of agency provides a contrast with Paul’s “apostleship” in Gal 1:1 is, as already mentioned, not implausible, since many scholars have connected the practice of agency with a major background for the early Christian concept of apostleship.²¹⁷ The agent was viewed as the apostle’s prototype at least as early as Jerome²¹⁸ and was recognized by Lightfoot in the nineteenth century, in part through his vast knowledge of patristic sources.²¹⁹ Many other scholars reject this background,²²⁰ but on the whole the arguments do favor it.²²¹

Although Luke’s text allows the interpretation that Paul was the high priests’ “agent” (he claims to act on their authorization and commission, Acts 26:12), letters of recommendation also could serve as endorsements without implying agency (see discussion below). In the text, Paul takes the initiative and secures the authorization; if he has become an “agent” for the high priest here, it is apparently only because he secured the latter’s backing for a mission he conceived. Nevertheless, Luke portrays some aristocratic priests’ complicity and general approval; the letters somehow serve the function of securing Damascus synagogues’ cooperation in rounding up followers of the Way (9:2), which implies that they would at least construe the letters as commissioning Paul. The leaders’ desire to weaken the movement appears earlier in the text and could also have been a factor influencing Saul (cf. 5:17, 21, 27; 7:1), against Gamaliel’s former tolerance (5:34–39).

(3) Access to the High Priest (9:1–2)

Which high priest does Paul consult? The answer to this question depends on the chronology one favors for Paul’s career; Caiaphas remained high priest from 18 to 36 C.E., and Jonathan son of Ananus held authority briefly in 36–37 (Jos. *Ant.* 18.95). Given the chronological observations above, Caiaphas surely remained high priest at this point. The high priest’s identity, however, is not relevant to Luke’s account; Luke mistrusts the high priestly class as a whole (cf. Acts 23:14–15; 25:2–3). Moreover, in Acts, as noted above, this persecution abroad is Saul’s agenda, and the high priest merely approves his initiative.²²² If the high priest was morally committed to Paul’s agenda, he was best served by leaving the details, and hence potential liability, to Paul.²²³ Because letters constituted public approval (cf. Acts 9:14), Luke would not envision them explicitly endorsing extrajudicial lynchings; rather, they must have merely endorsed Saul’s mission of bringing fugitive Jerusalemites home for interrogation (cf. 22:5; 26:12).

Saul’s access to the high priest seems startling for a “young man” (7:58),²²⁴ particu-

215. Safrai, “Relations,” 205 (citing, e.g., Epiph. *Her.* 25.11; Euseb. *Comm. Is.* 18:1; *Cod. theod.* 16.8, 14).

216. 2 Macc 1:18; cf. 1 Macc 15:17; *Let. Aris.* 32; Safrai, “Relations,” 204–7. But the “apostles” of *CJ* 1:438, §611, might simply be “messengers of the congregation” in question (1:439; see *m. Ber.* 5:5).

217. E.g., Rengstorf, *Apostolate*, 27; Dix, *Ministry*, 228–30; Wanamaker, “Agent”; Witherington, *Christology of Jesus*, 133–35; Meier, *Matthew*, 115; Grayston, *Epistles*, 125; Hunter, *Romans*, 24; Héring, *First Corinthians*, 1; Ladd, *Theology*, 381; Bruce, *History*, 184. It is probably fair to claim that this is the majority view (so Davies and Allison, *Matthew*, 2:153).

218. Jerome *Comm. Gal.* 1.1 (cited by Dix, *Ministry*, 228).

219. Lightfoot, *Galatians*, 93–94 (citing Epiph. *Her.* 30).

220. E.g., Richardson, *Theology*, 324; Malan, “Apostolate,” 57.

221. See fuller discussion in Keener, *John*, 311–13.

222. Fitzmyer, *Acts*, 422–23.

223. Cf. Le Cornu, *Acts*, 1262–63, who notes that later rabbinic law convicted of murder only someone guilty of the act (*Yad*, Murder 3:10–11; though divine accountability went further, *Yad*, Murder 2:2). But this may reflect the tradition of Pharisaic leniency.

224. Some time (though not much, in view of Pauline chronology) may have now passed; but “young man” need not mean “youth” in the modern sense (see comment on Acts 7:58).

larly a Hellenist (6:9) and a Pharisee (23:6).²²⁵ (Historically, Paul may have finished the bulk of his education only recently—see the mention of his peers in Gal 1:14—and hence might be in his late teens or early twenties.) But Saul must have had some high status (see comments below), and this may not have been his first mission (cf. Acts 26:11, though this might well be a generalizing plural).²²⁶ One who was young but had achieved many successes could be thought more inclined toward greater (and sometimes excessive) ambitions if they were suggested to him (Polyb. 5.102.1).

Saul was surely from a well-to-do family if he studied under Gamaliel, who was of high status and wealthy (Acts 22:3). Though Gamaliel was himself a Pharisee, his family became highly respected members of the municipal aristocracy (5:34; cf. Jos. *Life* 190, 309; *Ant.* 20.213, 223; *War* 4.159). The outcomes of Paul's trials later in Acts, despite condemnation from the municipal aristocracy, suggest high status (Acts 24:22, 27; 26:1, 31–32). Paul was born in Tarsus but was reared in Jerusalem (22:3); his family probably moved to Jerusalem when he was quite young, because his father was apparently a Pharisee (23:6, though see discussion there) and this movement is not known outside Palestine (and was concentrated in Jerusalem). Although one cannot rule out that Paul's nephew, like Paul himself, could have been sent to Jerusalem, it seems likelier that his sister's family (23:16) lived there, which in turn suggests that the family as a whole likely immigrated to Jerusalem.²²⁷ As Roman citizens in Jerusalem, Paul's family probably exercised some influence; a Roman citizen might also have the least to fear from Roman questions about any lynchings that might occur.²²⁸

Paul's letters address only his religious and not his social status at the time of his conversion, but they are consistent with Luke's picture. Paul was "advancing" in Judaism (Gal 1:14), which, along with his zeal for ancestral traditions and accurate interpretation, probably suggests good Jewish training (his Pharisaism [Phil 3:5] makes Jerusalem the probable site).²²⁹ His letters betray a better-than-average Greek education as well, with at least some training in rhetoric (albeit not a specialist's proficiency).²³⁰ Such training was not available to everyone, and such factors suggest that Paul belonged to a wealthier-than-average family.

(4) Letters of Authorization (9:2)

Letters from Jerusalem to the Diaspora are attested over a long period.²³¹ Official letters from a person in an office to others also in office were often posted in public locations, which made them a readily recognizable letter form.²³² Here, however, the letters are letters of recommendation that Paul carries.

Those who carried letters from a high official acted on that official's authorization (1 Esd 4:61; Neh 2:7, 9). Letters of recommendation of various sorts reflect a pervasive custom (Rom 16:1–2; 1 Cor 16:15–18; Phil 2:29–30; 4:2–3; 1 Thess 5:12–13;

225. One could send letters even through a Gentile, though some scrupulous priests avoided it (*t. Šabb.* 13:11), but this is not the same as endorsing them with letters of recommendation (see discussion below).

226. Rapske, *Custody*, 100 (the caveat about the generalizing plural, however, is mine).

227. Other relatives may have either moved with them or already been there, welcoming them when they arrived (cf. possibly Rom 16:7, but note my serious reservations offered above). Other, more distant relatives in Jerusalem were not necessarily Roman citizens, however, a benefit apparently conferred after enslavement in the Diaspora (see comment on Acts 6:9).

228. Disciplines short of execution, such as beatings, were permitted at the discretion of local authorities; cf. *m. Mak.* 3:10–12; *t. Tem.* 1:1; *Sipra Qed.* pg. 4.200.3.3; *Sipre Deut.* 286.5.1; Applebaum, "Organization," 496.

229. Cf. also Rom 15:19; Gal 1:17, explored more fully below. See also comment on Acts 22:3.

230. See Hock, "Paul and Education"; discussion at Acts 22:3.

231. Bauckham, "James," 423–24, cites the Elephantine papyri (fifth century B.C.E.) and 2 Macc 1:1–10.

232. Aune, *Environment*, 164–65.

Phlm 8–17; Heb 13:17; 3 John 12);²³³ thus, for example, leaders in Jerusalem sent letters confirming Josephus in his authority (Jos. *Life* 310–11).²³⁴ Sometimes people of rank sent such letters for their clients or others to provide them “credentials for some activity rather than merely to introduce” them.²³⁵ In general, travelers could carry letters of recommendation so that the receiver would know to welcome them.²³⁶

Some comments about the context of recommendation letters can illustrate their general function, although many of the specific elements mentioned here (perhaps especially in formal Roman letters) would not appear in the high priest’s letters for Paul. Recommenders placed their own credibility on the line when writing such letters,²³⁷ but they socially indebted to themselves those so recommended.²³⁸ Appeal to the potential benefactor’s generosity was a natural element in many recommendation letters.²³⁹ Further, when two people shared a mutual friend, *they* became friends, part of the same in-group.²⁴⁰ The receiver of the recommendation would act on the basis of the receiver’s relationship with the recommender, and hence recommendations might spell out the beneficiary’s relationship with the recommender.²⁴¹ By generosity to the beneficiary, the benefactor displayed friendship with the recommender²⁴² and also guarded the recommender’s honor in the eyes of the beneficiary.²⁴³ When the letter’s receiver was of the same (rather than lower) social station as the recommender, the receiver might express or anticipate reciprocity for the favor done.²⁴⁴

Despite conventional forms, writers could prove creative in articulating reasons for receiving the recommendations.²⁴⁵ Powerful writers sometimes claimed that the person on whose behalf they wrote was more deserving than any other (cf. Phil 2:20) or that this beneficiary was a particularly special one—even when they had written

233. E.g., Cic. *Fam.* 7.5.2–3 (with 7.6.1; 7.7.1; 7.8.1; 7.10.3); 13.1–79 (all of *Fam.* 13 except 13.68); Socratics *Ep.* 28; cf. Men. *Rhet.* 2.5, 397.21–24; see esp. Kim, *Letter of Recommendation*, passim (for NT examples, 119–20; for papyri, 150–238); also Agosto, “Conventions,” 70–117; Keyes, “Letter of Introduction”; Marshall, *Enmity*, 91–129, 268–71; more briefly, Stowers, *Letter Writing*, 153–65; Aune, *Environment*, 166–67; Malherbe, *Social Aspects*, 102; Keener, *Corinthians*, 166–67.

234. For a later rabbinic example, see, e.g., *y. Mo’ed Qat.* 3:1, §2.

235. Stowers, *Letter Writing*, 153. Writers normally interceded for the third party to establish his positive relationship with the receivers or secure him some other favor with them (*ibid.*, 155); they also often identify the sender with the one recommended (Malherbe, *Social Aspects*, 102–3, citing P.Oslo 55).

236. E.g., Lucian *Lucius* 2.

237. E.g., Pliny *Ep.* 2.9.2. Although writing many letters, Cicero assures his receiver that he is sensitive to his reputation and thus does not recommend indiscriminately (*Fam.* 13.48.1). Thus some letters are worded more cautiously (e.g., *Symm. Ep.* 1.72).

238. E.g., Pliny *Ep.* 2.13.9; 3.2.6; 3.8.2.

239. E.g., Cic. *Fam.* 13.44.1; Pliny *Ep.* 10.4.1; 10.94.3; 10.120.2; Phlm 14.

240. Malina, *Windows*, 48.

241. E.g., P.Oxy. 292; Cic. *Fam.* 13.3.1; 13.5.3; 13.44.1; Dio Chrys. *Ep.* 2; Pliny *Ep.* 2.13.7, 10; 3.2.4; 7.16.5; 10.4.1, 4; 10.5.1; 10.11.1; 10.87.1; 10.94.1; Fronto *Ad Ant. Pium* 9.2. For the papyri, see further Kim, *Letter of Recommendation*, 37–42. Cf. the recommendee’s readiness to depend on the recommender’s relationship with the receiver of the letter (e.g., *Symm. Ep.* 1.70; 1.81; 1.106; 1.107).

242. So explicitly in Pliny *Ep.* 10.4.6; see also *Symm. Ep.* 1.30; 1.71. In some parts of the world today, such social demands lead to considerable corruption; this was true in Rome as well, but ethical constraints did impose some limitations.

243. E.g., Cic. *Fam.* 1.3.2. Cicero’s letters of recommendation often ask the benefactor to *prove* to the recommended person how good a recommendation Cicero had written on the recommended one’s behalf and how influential Cicero had been for good (e.g., Cic. *Fam.* 13.19.3; 13.20.1; 13.26.4; 13.30.2; 13.35.2; 13.36.2; 13.44.1; 13.45.1; 13.46.1; 13.49.1; 13.58.1; 13.77.2; 13.78.2); cf. also *Symm. Ep.* 1.93; 1.106. For correspondents proving their love, cf., e.g., *Symm.* 1.14.1; 1.27; 1.43.2; 1.87; 1.98; 2 Cor 8:24.

244. E.g., Pliny *Ep.* 2.13.1–2; 3.2.1; 4.4.2–3; 7.31.7. If the letter receiver’s status was less, the receiver would respond especially with gratitude (Fronto *Ad Ant. Pium* 9.1). Gratitude was critical, both for the recommender and for the beneficiary (e.g., Cic. *Fam.* 13.3.1; Pliny *Ep.* 4.12.1, 5–7).

245. E.g., Pliny *Ep.* 3.3.5; 6.8.1–2, 5. Articulating reasons was essential (Dio Chrys. *Ep.* 1; esp. Pliny *Ep.* 2.13.11).

many other such letters with superlative claims.²⁴⁶ They could also request that the beneficiary be treated as if the beneficiary were in fact the recommender.²⁴⁷ Or they could simply request that the letter recipient receive well its bearer.²⁴⁸ Sometimes, at least in later times, they might assert that the receiver already knew the worth of the one recommended, or that no letter was really necessary.²⁴⁹

Among Romans of rank, such letters were often only one²⁵⁰ to four paragraphs in length. At least in Egypt, the usual structure of letters of recommendation was as follows:²⁵¹

1. Opening
 - a. Salutation formula
 - b. *Formula valetudinis*
2. Background
 - a. Identification formula
 - b. Background proper
3. Request period
 - a. Request clause
 - b. Circumstantial clause
 - c. Purpose or causal clause
4. Appreciation
5. Closing
 - a. Closing *formula valetudinis*
 - b. Closing salutation

The letters usually began by identifying the person recommended and designating the person's relationship to the sender;²⁵² for Saul, then, it would be a great honor to carry such a letter (cf. Gal 1:1, 14). Later, as an apostle "not from men" but from Christ (1:1), Paul would eschew dependence on such letters of recommendation (2 Cor 3:1–3).²⁵³ (Even when Paul writes recommendations in his letters, the basis differs from that in most other letters of recommendation.)²⁵⁴

(5) *Extradition Requests Here? (9:2)*

People of higher rank expected subordinates to obey their letters (e.g., 1 Kgs 21:8; Esth 1:22; 8:10; 9:20, 30; 1 Macc 1:44). But is obedience demanded here? Some scholars have argued that the high priest had extradition rights for Judean fugitives

246. E.g., Cic. *Fam.* 3.1.3; 13.1.5; 13.5.3; 13.18.2; 13.19.1; 13.26.1; 13.32.2; 13.34.1; 13.35.1; 13.36.1–2; 13.39.1; 13.45.1; 13.51.1; 13.78.2.

247. E.g., P.Oxy. 32; Cic. *Fam.* 13.5.3; cf. 1 Cor 16:10; Phlm 17; Kim, *Letters of Recommendation*, 7, 37–42.

248. See, e.g., P.Grenf. 2.77.34–38 (from the third or fourth century C.E.). Officials could also use public recommendations to commend their friends (e.g., P.Lond. 1912.105–8).

249. E.g., Symm. *Ep.* 1.22; 1.67; 1.75; 1.81. In *Ep.* 1.63, Symmachus claims that he recommends one for the letter receiver's benefit; in *Ep.* 1.94, he hopes his letter adequate to communicate the recommendee's merits; in *Ep.* 1.104, the recommendee is better than the letter is able to convey.

250. For one paragraph, see, e.g., Cic. *Fam.* 13.45–49.

251. Kim, *Letter of Recommendation*, 7 (mostly using his words). Paul's letters do not share this form (128), but most Christian letters of recommendation from Egypt do (99–118); for the eighty-three letters that Kim analyzed, see 156–238.

252. *Ibid.*, 37–42.

253. Paul does send his own recommendations, usually embedded in larger letters; see *ibid.*, 120; Agosto, "Paul and Commendation," esp. 110–28. But like some philosophers (Diogenes *Ep.* 9; Epict. *Diatr.* 1.9.27, 33–34; 2.3.1–2; cf. 4.12.12), he did not want to depend on them for himself.

254. See esp. Agosto, "Paul and Commendation," 127: Paul commends especially on the basis of work in the church rather than of social connections. But even with Paul, such connections remain; e.g., Rom 16:2; Phil 2:22, 30; Phlm 10–13.

that would be respected by rulers in the region.²⁵⁵ This may have been true in the second century B.C.E. if we may trust our sources on this point; the Romans granted Judea extradition rights from Egypt's ruler (1 Macc 15:21),²⁵⁶ and Julius Caesar presumably reconfirmed these rights in 47 B.C.E. by making the high-priestly family ethnarchs over all Jews and arbiters of Jewish customs (Jos. *Ant.* 14.189–95). Rome also granted King Herod extraordinary rights for extraditing fugitives from the region of his jurisdiction (*War* 1.474, acknowledging this situation as unusual).²⁵⁷

In this period, however, Judea had a Roman governor.²⁵⁸ Even if Pilate in Caesarea remained aloof from the Jerusalem aristocracy's affairs, other governors were under no legal or political obligation to another city's aristocracy. The letters, however, are not to local governments but, as Luke expressly claims, to synagogues (Acts 9:2).²⁵⁹ Local Jewish communities retained rights to practice their own customs as ethnic conclaves in foreign cities;²⁶⁰ consequently, they would be able to continue practicing disciplines in their own synagogues (Luke 21:12; Matt 10:17; 2 Cor 11:24) so long as no one renounced Judaism and complained of subsequent abuse.²⁶¹ Just as Alexandrian Jews had an ethnarch and Nabateans in Damascus had an ethnarch (2 Cor 11:32), Damascene Jews would possess a measure of autonomy. Most synagogue leaders would have acted out of respect for the high priest.²⁶² If conflicts arose, local municipal authorities probably would have (though need not have) chosen to defer to the rights of minority communities in disciplining their own members.²⁶³ In this case, they may have secured the cooperation of other groups as well (2 Cor 11:32).

But at minimum, the letters could encourage support less forcefully, simply commending Paul (see discussion of recommendation letters, above) and authorizing his mission in more basic ways. Saul and his companions would not have the advantages

255. E.g., Reicke, *Era*, 149; Bruce, *Apostle*, 72.

256. Bruce, *Apostle*, 72, noting that the author Lucius (1 Macc 15:16) is presumably Lucius Caecilius Metellus, consul in 142 B.C.E. Not all accept as certain the document's authenticity (Wallace and Williams, *Acts*, 52, who favor unofficial action here).

257. Bruce, *Apostle*, 72; idem, *Commentary*, 193; Johnson, *Acts*, 162 (providing the information but not committed to the conclusion). Cities normally agreed to extraditions only if they were on good terms (Livy 41.23.1–5; Dio Chrys. *Or.* 38.41–42).

258. Some argue that Damascus may not have even been under direct Roman rule in this period (see Barrett, *Acts*, 446); for further discussion, see excursus on Nabateans at Acts 9:23.

259. With Barrett, *Acts*, 446. Haenchen, *Acts*, 320–21n3, has therefore misread Acts (in averring that Luke read the Maccabean situation into it) no less than its attempted defenders above. For influential festal letters uniting Jewish communities, see Whitters, "Observations" (citing Esth 9:20–32; 2 Macc 1:1–9; 1:10–2:18; Elephantine's "Passover Papyrus"; and later 2 *Bar.* 78–87); for some early encyclical letters from sages, see Aune, *Environment*, 185.

260. E.g., Jos. *Ant.* 14.213–16, 223, 227, 242, 245–46, 258, 260, 263; 16.162–65; see discussion in Sanders, *Judaism*, 212; Rabello, "Condition"; Rajak, "Charter."

261. For a discussion of proper scourgings as outlined in *m. Mak.* 3, cf. Gallas, "Fünfmal."

262. Many scholars doubt that the high priest exercised authority over other Diaspora Jews; others argue the contrary (Bruce, *Commentary*, 193) or against doubting Luke without firm evidence (Munck, *Acts*, 81). I doubt that the high priest had in the Diaspora any legal authority recognized by the empire; nevertheless, the effectiveness of the temple tax (Jos. *Ant.* 18.312) and the biblical and Maccabean roles for the high priesthood indicate the respect and influence that he commanded (rightly, Dunn, *Acts*, 120–21; Witherington, *Acts*, 316; Haenchen, *Acts*, 71). Nevertheless, later rabbinic arguments about the Sanhedrin's Diaspora influence (*m. Mak.* 1:10, cited in Rapske, *Custody*, 101; *t. 'Or.* 1:8; *Sanh.* 3:10; *Sipre Deut.* 59.1.2; 188.1.2; perhaps *y. B. Qam.* 4:1, §3; *Git.* 5:6, §3; cf. negative relations in *t. 'Abod. Zar.* 4:6) are uncertain for their own period and certainly cannot be retrojected into Paul's (see Keener, *John*, 212–13). And even later rabbis allowed courts outside the land (*t. Sanh.* 3:10).

263. This may have been especially the case if Damascus's minority communities had influential ethnarchs, as at least the Nabateans seem to have had; see comment on Acts 9:23–24. Cf. Campbell, *Deliverance*, 147: "With the permission of the local authorities, the Jerusalem authorities could have claimed jurisdiction over Jews in other regions. . . . Moreover, the 'letters' in question may have been 'requests' rather than 'orders' and Luke a little hyperbolic at this point."

of travel given to those traveling on Rome's business,²⁶⁴ but letters of recommendation from the high priest would guarantee them aid along the way from local Jewish communities. The objects of Saul's quest would not be local Jewish Christians (he and his allies may well have hoped there were none) but fugitives from Jerusalem, where the high priest exercised direct civic authority.²⁶⁵

Synagogues appear often in Luke-Acts, but the reference to their involvement in persecution here (cf. Acts 22:19; 26:11) partly fulfills the warning of Luke 21:12: soon after Jesus's ministry but before predicted wars and earthquakes (21:10–12), his followers would be handed over to synagogues for discipline. "Binding" free people was a terrible insult to their dignity (Polyb. 1.69.5; see comment on Acts 21:33–34). That women were also targets indicates the vicious lengths to which Saul went to eradicate the movement (cf. Val. Max. 9.2.1); see comment on Acts 8:3.

(6) "The Way" (9:2)

"The Way" as a title for the Christian movement appears only in Acts (Acts 9:2; 19:9, 23; 22:4; 24:22; possibly in 16:17; 18:25–26; 24:14) but probably reflects genuine tradition about one of the movement's titles for itself, probably in a Semitic context. It does not seem to have been used much by the later Gentile church, of which Luke was a part, at least if we may infer from the silence of other early Christian sources.²⁶⁶ The movement is related to the narrow "door" of salvation (Luke 13:24–25; cf. Matt 7:13–14) and to "the way of peace" (Luke 1:79), the Lord's way prepared by John (1:76; 3:4), "the way of God" (20:21, despite the speakers), and "the way of righteousness" (Matt 21:32; cf. Acts 13:10; 16:17).²⁶⁷

The "way" was the right moral path or lifestyle in which the upright would walk.²⁶⁸ Occasionally philosophic schools could be compared to roads or ways.²⁶⁹ The expression is, however, more pervasive in Jewish sources. Thus Scripture speaks of the way of righteousness, justice, and so forth.²⁷⁰ This expression appears also in early Jewish literature,²⁷¹ especially the Qumran texts.²⁷² In these texts it refers to the way of the

264. On which see Casson, *Travel*, 188; cf. 197. Paul's companions could have been Levite police delegated to him (e.g., Lenski, *Acts*, 357) but may have simply been other young and zealous members of the Hellenist synagogue (6:9) who shared his commitments.

265. With, e.g., Lake and Cadbury, *Commentary*, 100. It is possible that these events occur before the Samaritan and Gentile conversions in Acts 8 and hence too early for many local conversions to have occurred; otherwise, they may occur only shortly later.

266. We still read of a moral "way" (of love, Ign. *Eph.* 9.1), the two ways as moral paths (*Did.* 1.2; 4.14; 5.1; *Barn.* 5.4; 11.7; 19.1–2, 12; 20.1; *Herm.* 35.2), the "way of truth" (*1 Clem.* 35.5), the "way of righteousness" (*Barn.* 1.4; *2 Clem.* 5.7), and Jesus as the "way of salvation" (*1 Clem.* 36.1), but all these ideas are attested in the NT as well (e.g., "way of truth," 2 Pet 2:2; "of righteousness," 2:21).

267. On the sense in Matt 21, see, e.g., Jeremias, *Theology*, 46; Gundry, *Matthew*, 423; Keener, *Matthew*, 509. Addressing an Indian context, Pathrapankal, "Way," suggests that Luke's presentation of the movement as a "way" (as opposed to the institutional church) may help in some interreligious discussion and proclamation.

268. Although the Jewish sources below are Luke's primary context, analogous ideas about a "way" appear elsewhere, e.g., the Chinese *tao*, as in Confuc. *Anal.* 40 (6.15); 104 (6.18).

269. Lucian *Hermot.* 15, 25–27, 30. Cf. pedagogic or epistemological approaches in Plato *Phileb.* 16BC; Epict. *Diatr.* 1.4.29; Marc. Aur. 6.22; Iamb. *V.P.* 19 (on which see Dillon and Hershbell, "Introduction," 28).

270. E.g., Exod 18:20; 32:8; Deut 8:6; 9:16; 10:12; 11:22, 28; Ps 23:3; Prov 2:8; 8:20; 12:28; 16:31; Isa 30:11, 21; 33:15; 40:14; 42:24; 48:17; 58:2; 63:17; 64:5; cf. Wis 5:6. The expression is particularly prominent in the wisdom tradition, with more than seventy references to "ways" as behavior in Proverbs alone.

271. E.g., *Jub.* 20:2; 23:20–21; *1 En.* 82:4; *4 Ezra* 5:1; for "ways" as behavior, see, e.g., Tob 1:3; *Jub.* 20:2; 23:20–21; 4Q400 1 I, 14; *Sib. Or.* 3.233. Charles, *Jubilees*, lxxxiv, notes esp. *Jub.* 23:20. Cognate expressions remain in Islamic Arabic (see Bishop, *Apostles*, 107–8); Bruce, *Acts*¹, 197, also compares the Indian *pathin* and *mārga* and the Chinese *tao*.

272. E.g., CD I, 11, 13, 16; II, 3; 1QS IX, 18–21; X, 21; XI, 13; 1QSa I, 2; 1QH^a XII, 18–25; XIV, 10, 23–24; 1Q22 II, 8; 4Q185 1–2 II, 1–2, 4; 4Q260 V, 1; 4Q400 1 I, 14; 4Q405 23 I, 11; 4Q429 4 I, 10; 4Q473 1; 4Q511 2 I, 6; 11QT LIV, 17.

community, who are “the perfect of way.”²⁷³ In 1QS IX, 17 those who have chosen the way (of truth and righteousness) are part of Isaiah’s highway in the wilderness (Isa 40:3), quoted in 1QS VIII, 14²⁷⁴ and alluded to in IX, 19–20.²⁷⁵ Fitzmyer points out that the origin of Acts’ “absolute use” of the term was unknown until the discovery of the Qumran scrolls, which use it “to designate the mode of life of the Essenes.”²⁷⁶ Rabbis spoke of “the way” of the Torah (*b. ’Ab. 6:4, bar.*);²⁷⁷ this expression fit their image of *halakah*, proper behavioral “walking.”²⁷⁸

Whereas the usual Jewish use focused on ethical wisdom and orthopraxy (albeit defined differently by various Jewish sects), the Jesus movement made obedience to Christ part of its orthopraxy.²⁷⁹ The Christ claim of Jesus’s followers was the distinctive element by which they defined themselves as heirs to the way of truth and righteousness as distinct from others.²⁸⁰ Analogously, the highly sectarian Essenes regarded their “way” as normative, including for Israel.²⁸¹ God would judge the nations in battle by “the perfect of way” (1QM XIV, 7); Jews saved in the end time would be those who joined their ranks, for other Jews would prove apostate and suffer judgment with the nations.²⁸² Some other early Christians also employed “the way” in exclusivistic terms.²⁸³

It seems significant that Paul ends up converting to the Way “on the way” (ἐν τῇ ὁδῷ, Acts 9:17, 27; κατὰ τὴν ὁδὸν, 26:13) to Damascus, although Luke omits the opportunity to connect the two in immediately adjacent verses (he could have mentioned the “road” in 9:3 or in the context of 22:3, or the movement by that name in the context of 26:13).²⁸⁴

(7) Damascus (9:2)

Travel was popular in the Roman world and was undertaken with a degree of safety and efficiency unrivalled in subsequent centuries until the steamers.²⁸⁵ To

273. 1QM XIV, 7; 1QH^a IX, 36; 4Q403 1 I, 22; 4Q405 13 6; 4Q491 8–10 I, 5; cf. 1QS IV, 22; VIII, 25; XI, 11, 17; 1QH^a XX, 34; 4Q404 2 3; 4Q405 3 II, 13.

274. Also in the fragmentary 4Q176 1–2 I, 7; 4Q259 III, 5. On Isa 40:1–11, esp. 3–5, in Luke-Acts, see Pao, *Isaianic Exodus*, 37–69; for the “way,” 59–68. For Isaiah’s highway for the exiles’ return to Zion, see Isa 35:8; 40:3; 42:16; 43:16, 19; 49:11; 57:14; 62:10; cf. 19:23; it evokes the earlier exodus (51:10; cf. e.g., Exod 13:21; Deut 1:31; Jos. *Ant.* 3.18).

275. Note the “way of truth” in 1QS VIII, 13; 4Q259 III, 4 (ways of truth in 1QS IV, 17; 4Q213 4 5; 4Q416 2 III, 14; 4Q418 9 15); 4 *Ezra* 5:1. Qumran documents also refer to the “two ways” of Deut 11:26–28, between which they must choose (4Q473 1).

276. Fitzmyer, “Christianity in Light of the Scrolls,” 240 (citing also CD I, 13 and other texts). McCasland, “Way,” suggests that Christians derived the term from Qumran by way of John the Baptist, but the sapiential usage is common enough that this may not be necessary. On the term in the Scrolls, see also Zon, “Droga.”

277. See also Ps 119:32; Jer 5:4–5; 2 *Bar.* 44:3; 4 *Ezra* 7:79; *Lev. Rab.* 29:5; *Exod. Rab.* 30:12.

278. Cf. also Foakes-Jackson, *Acts*, 77–78. For behavioral “walking,” see also 1 *En.* 91:19; 94:1; *Jub.* 21:2; 25:10; 1QS III, 9, 18; IV, 6, 12; V, 10; VI, 2; IX, 8, 19; CD II, 15–16; VII, 4, 6–7; VIII, 9; 1 *Cor* 7:17; *Gal* 5:16, 25; 6:16; *Phil* 3:17–18; *Col* 1:10; 2:6; 1 *Thess* 2:12; 4:1.

279. Cf. Witherington, *Acts*, 584, who contrasts the early Christian conjunction of right belief and practice with Jewish orthopraxy and Greco-Roman ritual; cf. Pao, *Isaianic Exodus*, 67.

280. The implicit exclusivism in the “way” claim may be illustrated also by the “two ways” model, which was widespread (e.g., Sen. *Y. Ep. Lucil.* 8.3; *Diogenes Ep.* 30; *Deut* 30:15; *Ps* 1:1; *Test. Ash.* 1:3, 5; *m. ’Ab.* 2:9; *Did.* 1.1–6.2; *Barn.* 18.1–21.9; see some additional sources in Keener, *Matthew*, 250) and with which Luke was familiar (*Luke* 13:23–27; cf. *Matt* 7:13–14).

281. The Qumran community viewed itself and its lifestyle as the “way” (e.g., 1QS IX, 17; X, 21; 4Q403 1 I, 22).

282. Cf. 4QpNah IV, 3. Other Jews also could acknowledge some of their compatriots as apostate (1 *Macc* 1:51–53) or even expect apostasy of most in the end time (*Test. Iss.* 6:1), but the Essenes were more sectarian, usually identifying their own community with the true remnant of Israel (Flusser, *Judaism*, 49).

283. See esp. *John* 14:6, characteristically applying it christocentrically (see Keener, *John*, 940–43).

284. Others view “the way” even as a unifying theme (including words such as πορεύομαι and διέρχομαι) through Luke-Acts (Geiger, “Weg”; cf. Combet-Galland, “Voyage,” emphasizing passages focused on roads, e.g., *Luke* 9:51–19:28; 24:13–35; *Acts* 8:26–40). Still, travel was common.

285. Malherbe, *Social Aspects*, 62–63; see more extensive discussion of travel in antiquity in the commentary introduction, Keener, *Acts*, 1:585–89.

reach Damascus from Jerusalem, one would travel the Great North Road;²⁸⁶ it lay on the trade route from the Parthian east to Egypt in the south. The distance was not short; Damascus was about 135 miles north of Jerusalem, a journey of roughly six days by foot.²⁸⁷

How Paul and his companions traveled is disputed. It seems unlikely that one traveling such a distance with the high priest's blessing (9:1–2) and coming from a wealthy family (cf. 22:3) would have made the trip on foot, whether he owned animals or rented them.²⁸⁸ Further, if his mission was so urgent as to require travel even at midday (22:6), surely he would have taken faster transport than walking if it were available to him. Riding a horse could easily double or triple the distance one could travel on foot in the same amount of time.²⁸⁹

The narrative, however, seems to picture the journey differently. In favor of walking one can cite Paul's being led by the hand in 9:8, though one could counter that it would undoubtedly be dangerous for him to ride while blind, whether or not most of his companions were mounted.²⁹⁰ More explicitly in favor might be his companions' "standing" (9:7), so that Luke might envision them on foot; even if "standing" in 9:7 is simply Luke's editing of his tradition (cf. 26:14), it indicates how he viewed the journey. If Luke's apparent perspective here is accurate, it suggests that the high priest may have authorized the mission (9:1–2), but he certainly did not provide for it. This possibility would reinforce the claim that the mission was Paul's agenda (9:1)—though, even so, his lack of transport seems extraordinary. The journey would be a long one by foot, requiring many nights spent at villages along the way.

Both Acts and Paul (Gal 1:17, which claims that he "returned" there, esp. *πάλι*) state that Paul was in Damascus after his conversion (which presumably happened near there, 2 Cor 11:32) before traveling again to Jerusalem.²⁹¹ Tradition places Paul's encounter at Kaukab, "where 'the Way of the Sea' crosses a very slight ridge" roughly twelve miles south of the city.²⁹² Many scholars, ignoring Acts, claim that Paul's pre-conversion persecution of Christians occurred in Damascus. But pure dismissal of a source (Acts) that is so often confirmed by Paul's letters where we can test it, including in this context,²⁹³ is unwarranted and arbitrary, a contrast to classicists' use

286. Fitzmyer, *Acts*, 423 (and the sources he cites). Ramsay, *Pictures*, 100, speaks of "the way of the Sea" (of Galilee). The alternative to this coastal route was through Samaria and Gadara (mentioned noncommittally in Blaiklock, *Acts*, 87).

287. Barrett, *Acts*, 447; Witherington, *Acts*, 316. See also Finegan, *Apostles*, 58 (estimating 130–150 mi., i.e., 200–240 km.): "Beside the present road from Quneitra, 6 mi (10 km) south of Damascus, a Christian shrine atop a hill called Kaukab (Celestial Light) marks the traditional site where Paul fell to the ground."

288. Modern Protestants usually doubt that he was on a horse, whereas Catholics think that he fell off (influenced by Renaissance paintings); both are usually influenced by how they have heard or seen the story (see Dougherty, "Did Paul Fall?").

289. Rapske, "Travel," 9.

290. If we did conclude that he traveled only by foot, as on many of his later travels, it would at least explain why word reached the saints in Damascus before he arrived (Acts 9:13–14); but if Saul publicized his mission in Jerusalem (even to disciples there who were soon after released) before going, word could have spread ahead of him.

291. With Riesner, *Early Period*, 263; Hemer, *Acts in History*, 182; Witherington, *Acts*, 316, 321; Dunn, *Acts*, 121.

292. Ramsay, *Pictures*, 100. Whether the site is correct or not, it bears much likelier claim to having been preserved (because Paul remained in the vicinity for some time) than the site of the eunuch's baptism in Acts 8:36 (see comment there).

293. See discussion in Keener, *Acts*, 1:237–50. One cannot guarantee that Luke always had sufficiently detailed information, but Luke is our fullest source and likelier to be correct than arguments from Paul's silence against him, given how often he is correct. Given the significance of Damascus in both sources and other correspondences, Luke can hardly be accused of simply compensating for lack of information by randomly inventing it.

of comparable sources. The persecution likely happened in the same place as his advancement in Judaism (Gal 1:13–14), where he obtained his Pharisaic training (Phil 3:5–6), which would be in Jerusalem.²⁹⁴ One cannot use Gal 1:22 to deny that Paul had been in Judea, because the same context notes that he had spent at least some time there (1:18, before 1:23)²⁹⁵ and that he had persecuted Christians there (1:23).²⁹⁶ Until the time of Ignatius, none of our sources specify that Jews persecuted Christians as a group in Syria (including Damascus); rather, Judea is mentioned (1 Thess 2:15).²⁹⁷

Like Iconium, Damascus may have exaggerated its antiquity;²⁹⁸ it nevertheless is quite old.²⁹⁹ It was a fairly wealthy city located on trade routes with the East, and most ancient authors claimed that it belonged to the Decapolis League (Pliny E. *N.H.* 5.16.74).³⁰⁰ Like most ancient cities, it embraced multiple deities; it housed the massive temple of the Damascene Jupiter (the old Syrian deity Hadad-Ramman), the largest temple we know of in Roman Syria, recently built.³⁰¹ Although Damascus belonged to the Decapolis in this period, Rome later incorporated it into the province of Syria under Trajan (98–117 C.E.); Trajan's successor, Hadrian, named it a metropolis.³⁰²

(8) *Jews in Damascus* (9:2)

Most relevant for this account (e.g., Acts 9:22–23) is that many Jews and also proselytes³⁰³ lived in Damascus; Josephus (who sometimes exaggerates numbers) claims that a generation later ten to twenty thousand were slaughtered as a result of the Judean war (Jos. *War* 2.561; 7.368; cf. *Life* 27).³⁰⁴ Some estimate that some thirty to forty thousand Jews lived there in this period; in the Middle Ages, estimates of the Jewish population varied from some three thousand (plus four hundred Samaritans) to ten thousand.³⁰⁵ That Luke mentions multiple synagogues here (Acts 9:2, 20; also in Jerusalem [24:12; 26:11] and Salamis [13:5]) but usually a single “synagogue” in other cities suggests that he is well aware of the large Jewish community in Damascus.³⁰⁶

294. Hengel and Schwemer, *Between Damascus and Antioch*, 36–37.

295. *Ibid.*, 38 (suggesting, with, I believe, a weaker case, that Paul had persecuted and driven out only Hellenists, so that others there would not know him, 37).

296. It may also be noteworthy that the church grew rapidly during this period (cf. Acts 9:31), and Paul's own chronology leads us to suppose that up to three years passed between his persecuting role and his visit to Jerusalem (Gal 1:18), and additional years in Syria and Cilicia (Gal 1:21; cf. 2:1). Many of the church members thus may have been added after Paul's initial departure from Jerusalem.

297. Hengel and Schwemer, *Between Damascus and Antioch*, 90.

298. Ramsay, *Pictures*, 355.

299. Finegan, *Apostles*, 56 (arguing that it is attested in third-millennium B.C.E. Ebla tablets and later Egyptian and Hittite records; it was conquered by the Aramaeans ca. 1200 B.C.E.); Pitard, “Damascus,” 103, suggests that its first attestation is in the fifteenth century B.C.E., when it was an important caravan center (Albright, *Biblical Period*, 8).

300. It was part of Syria from 64 B.C.E. but retained “municipal independence as part of the Decapolis” (Witherington, *Acts*, 316).

301. Pitard, “Damascus,” 104, noting inscriptions from 15/16 and 37/38 C.E. The temple was ca. 156 by 97 m., with an outer court of ca. 360 by 310 m. Further on Damascus, see Blaiklock, *Cities*, 13–17; Patella, “Damascus.”

302. Finegan, *Apostles*, 57.

303. Josephus claims that many Gentiles' wives favored Jewish religion (*War* 2.560). For sympathizers to Judaism in the empire, see Hengel and Schwemer, *Between Damascus and Antioch*, 61–70; for the attractiveness of Judaism in Syria, pp. 76–80.

304. Noted by most commentators, e.g., Lake and Cadbury, *Commentary*, 100; Bruce, *Commentary*, 194; Carter and Earle, *Acts*, 125; Fitzmyer, *Acts*, 436; Hengel and Schwemer, *Between Damascus and Antioch*, 51–52; Barrett, *Acts*, 447. Estimates that Jews were a fifth of the eastern Mediterranean population may well be too high (Stambaugh and Balch, *Environment*, 47), but there were certainly large numbers in Damascus.

305. Hengel and Schwemer, *Between Damascus and Antioch*, 54. On the Jewish community in Damascus, see further 55–61. Those who estimate Damascus's total population at 45,000 (such as Stark, *Cities*, 36) would need to estimate the Jewish population much lower.

306. Hengel and Schwemer, *Between Damascus and Antioch*, 51, 54.

It is possible that many Essenes settled in Damascus in an earlier period, likewise refugees from the Jerusalem high priesthood (see CD VI, 5, 19; VIII, 21; XIX, 34; XX, 12),³⁰⁷ but many scholars interpret the *Damascus Document's* reference to the city symbolically.³⁰⁸

Some later Jewish and Muslim traditions attribute to the city special eschatological significance, Islamic tradition specifying that Jesus will destroy the antichrist there. The tradition might stem from the Christian community there; some suspect pre-Christian tradition about its eschatological significance,³⁰⁹ but its antiquity is harder to demonstrate.

Luke's claim that Christians already had settled in Damascus is historically probable. It does not fit his scheme in Acts 1:8 and so is not likely his invention;³¹⁰ also, we know from Paul's letters that he was engaged in persecuting Christians in the period when he was converted in or near Damascus (Gal 1:13–17). Some scholars argue that the dispersed disciples in Damascus are Hellenists;³¹¹ it is reasonable that at least many of those who traveled so far were. Damascus's synagogues probably exhibited the usual tolerance of ancient Judaism; only an outsider such as Paul could stir up the persecution, and perhaps only an outspoken "zealot" such as Paul would bring persecution of himself there.³¹²

A generation later, when Damascenes and other Syrians suspected their Jewish population of siding with the Judean revolt, attention turned also to the Ἰουδαῖζοντες there (Jos. *War* 2.462–63, 465). This phrase very likely includes pagan sympathizers but, if so, even more likely includes monotheistic Gentile Christians, who would still be viewed as a part of Judaism.³¹³ Although Jesus's followers in Damascus would mostly be ethnically Jewish at the time of this account (perhaps three years after Jesus's resurrection), they eventually would have attracted God-fearers, just as local synagogues in Damascus were doing in large numbers.³¹⁴ Given the ultimate decision of most of the Jesus movement not to require circumcision for Gentile converts, it seems likely that they would have attracted an even larger number of full converts than the rest of the Jewish community did.

III. SAUL'S THEOPHANY (9:3–6)

Jesus appears to Saul with a bright light, charges Saul with persecuting him, and gives him instructions that he must now obey. The form of revelation is sufficiently close to biblical accounts of angelophanies and especially theophanies to leave Saul no doubt what has taken place.

307. See Riesner, *Early Period*, 238. Cf. 4Q266 3 II, 12; 3 III, 20; 4Q267 2 12; 4Q269 4 II, 1.

308. Rabinowitz, "Reconsideration of 'Damascus'"; Jaubert, "Pays de Damas"; Wieder, "'Damascus' and Redemption" (though the allusion to Gen 14; *Gen. Rab.* 42:2 is questionable); cf. the appraisals of Gaster, *Scriptures*, 74–76; Milikowski, "Again: DAMASCUS." Essenes reportedly settled in many cities, not just one (Jos. *War* 2.124; Hippol. *Ref.* 9.15). The use of "Damascus" to suggest that Paul studied at Qumran and there believed Jesus (Trudinger, "Damascus Road") appears fanciful.

309. Bruce, *Apostle*, 76–79, esp. 77. Riesner, *Early Period*, 238, argues that the messianic king would come from there according to CD VII, 14–18 (at the least, the house of David exiled there would be restored).

310. Légasse, "Career," 387.

311. With Hengel and Schwemer, *Between Damascus and Antioch*, 85 (against the proposal that they represented an alternative Jesus movement in Galilee, a proposal that lacks the support of concrete evidence); cf. also Samuel, "Acts of Philip," 52.

312. So Hengel and Schwemer, *Between Damascus and Antioch*, 90 (noting persecution only in Judea in 1 Thess 2:15). The argument rests partly on silence, but it does fit the narrative; had believers there been more widely persecuted, we might have expected such a mention (esp. at Acts 9:24–25, where others would also be in danger).

313. Hengel and Schwemer, *Between Damascus and Antioch*, 53.

314. *Ibid.*, 83 (adding that the Jesus tradition offered no reason to be stricter about Gentiles than other Jews were). For sympathizers to Judaism in the empire, see 61–70; for the attractiveness of Judaism in Syria, 76–80.

(1) *Appearances* (9:3)

Paul himself claims to have experienced a “revelation” of Christ (Gal 1:12, 16) and (more explicitly than Luke here or in Acts 22:6–7; 26:13–14; but see Acts 9:17; 22:14–15; 26:16) to have *seen* Jesus (1 Cor 9:1) in a sort of belated resurrection appearance (1 Cor 15:8); Gal 1:16 associates this with Paul’s call to the Gentiles, as does Luke (cf. Acts 9:6, 15–16; 26:17).³¹⁵

Pagans were familiar with apparitions of deities³¹⁶ (see fuller comment on Acts 1:3), sometimes with light shining around them³¹⁷ and sometimes with a light shining around mortals as a sign of divine favor.³¹⁸ (Dream-visions were probably a more common form of apparition in this period.)³¹⁹ In most of these epiphanies, deities used forms familiar from their statues, and the dead resembled their prior appearance,³²⁰ but whether or not Paul had known Jesus’s preresurrection appearance (cf. discussions on 2 Cor 5:16),³²¹ Jesus appears here quite differently from the way he appeared before his resurrection.³²² Jewish readers would be more familiar with the sorts of revelations in apocalyptic literature, which Munck summarizes as follows:³²³

1. A bright light (*1 En.* 14:17–21; Ezek 1:26–28; cf. Dan 7:9–10; *1 En.* 71:2, 5–6)³²⁴
2. A vision of God enthroned (*1 En.* 14:18–20; Ezek 1:26–28)
3. The recipient falling to the ground (*1 En.* 14:13–14; Ezek 1:28)
4. The recipient raised to his feet (*1 En.* 14:24–25; Ezek 2:1–2)
5. A call to prophesy (*1 En.* 15–16; Ezek 2:3–7; Isa 6:8; Jer 1:9–10; cf. *1 En.* 71:14–16)

315. Others also note the mutual corroboration of the sources (e.g., Hemer, *Acts in History*, 182). Kremer, “Wiedergabe,” argues that Luke uses the triple account of Paul’s conversion to help interpret the Lukan “Easter gospel.”

316. E.g., Epid. inscr. 3, 4 (Grant, *Religions*, 56–57); Dionysus in Otto, *Dionysus*, 74–78; also of demigods (Philost. *Hrk.* 4.2). Sometimes the apparitions were shown to be false (e.g., the spirit of a low-status deceased gladiator impersonating Apollo through an Egyptian’s magic, Eunapius *Lives* 473).

317. E.g., Sil. It. 13.640–42; cf. Zeus turning to lightning in Lucian *Dial. G.* 228 (12/9, Poseidon and Hermes 2); glowing with fire in Aristoph. *Lys.* 1285; the shining of Helios (PGM 4.635–38) or Mithras (PGM 4.696–99, 703–4); the construction of the Eleusis sanctuary for initiates to experience light in Clarke, “Spaces,” 262 (noting architectural accommodations to this suggested in Clinton, “Epiphany,” 85–101). A windstorm always accompanied the appearance of Achilles’s ghost in Philost. *Hrk.* 22.2.

318. Xen. *Cyr.* 4.2.15; Val. Max. 1.6.1, 2; Heliod. *Eth.* 10.9; cf. fire blazing from Achilles in Hom. *Il.* 18.205–6.

319. See Graf, “Epiphany,” 1122, on Hellenistic and imperial cults.

320. *Ibid.* But contrast Proclus *Poet.* 6.1, K114.3–4.

321. Cf., e.g., van Unnik, *Tarsus*, 54; but as already noted, “according to the flesh” modifies the verb (e.g., Davies, *Paul*, 195; Stanton, *Jesus of Nazareth*, 89–91; Betz, “Christuserkenntnis”), and probably Paul simply refers to his former perspective, which denied Jesus’s messiahship (with, e.g., Scott, *Corinthians*, 134; Bruce, *Message*, 27).

322. Though Jewish people sometimes expected the resurrection body to appear initially like the person at death (2 Bar. 50:2–4; *Gen. Rab.* 95:1; *Eccl. Rab.* 1:4, §2; perhaps Mark 9:43, 45, 47).

323. Munck, *Salvation*, 31–32 (following others); for eschatological glory, cf. also texts in Cerfaux, *Church*, 39. See other texts cited in Keener, *Matthew*, 437–38; *idem*, *Revelation*, 94–96.

324. Light was useful in theophanies because it attracted attention (4Q377 2 II, 7–8). Angels and archangels sometimes appear as brighter than the sun in Jewish texts (Dan 10:6; Rev 10:1; 2 *En.* 19:1; 3 *En.* 18:25; 22:4–9; 26:2–7; 35:2; *Test. Ab.* 7:4; 13:1 A; *Jos. Asen.* 14:9; *Apoc. Zeph.* 6:11–15). The righteous after death (4 *Ezra* 7:97) or in the eschatological time (see 1 Cor 15:53; Phil 3:21; 2 Bar. 51:3) would shine in the same way, as could Noah (1 *En.* 106:2, 10; 1QapGen. Apoc. II), Abel (*Test. Ab.* 12:5 A), Enoch (1 *En.* 71:11; 2 *En.* 22:10; 3 *En.* 15:1), Zion in a vision (4 *Ezra* 10:25), and God himself (Dan 7:9–10; 1 *En.* 14:18–20; 46:1; 71:10; 3 *En.* 28:7). After Moses beheld God’s glory, his own face shone with that glory (Exod 34:29–35; cf. L.A.B. 12:1; 19:16; *Abot R. Nat.* 13, §32 B; *b. B. Bat.* 75a).

Some scholars compare especially Ezekiel's vision,³²⁵ noting that Israel's obstinacy had not changed;³²⁶ but while these allusions are likely, Saul's experience echoes a variety of biblical theophanies³²⁷ and other call narratives.³²⁸ These probably include especially those accompanied by admissions of inadequacy (Exod 3:11; 4:10;³²⁹ Isa 6:5; Jer 1:6; cf. Judg 6:15)—except that Paul has proved more inadequate and unworthy than all of his predecessors by actively *opposing* the revealer. The OT theophany probably freshest in the minds of Luke's audience would be the one given to Moses (Acts 7:30–34); as Christ repeats some of Moses's mission (7:37), he now calls Saul in a manner that recalls Moses's call.

Divine glory would evoke a variety of associations for an early Jewish audience. For example, in the exodus, God's "glory" led his people.³³⁰ As in the Hebrew Bible (Isa 60:1–3), Judaism continued to associate an ultimate revelation of "glory" with the eschatological time.³³¹ "Glory" when applied to God may invite comparison with the related Jewish concept of Shekinah,³³² which appears especially in rabbinic literature. These texts personify the Shekinah but do not hypostatize it; it functioned essentially as a circumlocution for God,³³³ indicating his nearness.³³⁴ God himself could be addressed as "Glorious One"³³⁵ or called "the Glory of the World."³³⁶ God's presence could be banished by sin³³⁷ or invited by merit.³³⁸ Although these associations can vary widely, they typically involve the divine.

325. See Kim, *New Perspective*, 174–76.

326. Boismard and Lamouille, *Actes*, 2:122–24.

327. Biblical theophanies are rehearsed or developed in early Jewish texts (e.g., *Test. Job* 42:3/2), though emphasis on mediation (cf., e.g., discussion in Keener, *John*, 349–50) has reduced the emphasis on theophanies (apart from throne visions) in the present. On theophanies, see concisely Aune, *Dictionary of Rhetoric*, 459.

328. For parallels with OT prophetic calls, see, e.g., Philip, *Pneumatology*, 194–201; on call narratives in Scripture, see concisely Aune, *Dictionary of Rhetoric*, 85. Less close is Jos. War 3.351–54 (cited by Le Cornu, *Acts*, 495).

329. Cf. other objections in Exod 3:13; 4:1, 13.

330. Exod 13:21; 40:36–38; Neh 9:12; Ps 78:14; *Mek. Shir.* 3.67ff.; *Pesiq. Rab Kah.* Sup. 5:1; cf. Ps 80:1; Isa 63:14; Urbach, *Sages*, 1:43 (citing *Sipre Num.* 80, 84). Glory, of course, had always been associated with that event (e.g., 2 Macc 2:7–8; *Pss. Sol.* 11:2–6). From at least the second century, however, rabbinic tradition indicated that the Shekinah also participated in Israel's captivity in Egypt and Babylonia (*Mek. Pisha* 14.87ff.; *Mek. Besh.* 3.82–83; *Sipra Behuq.* pq. 6.267.2.6; *Sipre Num.* 84.4.1; *y. Ta'an.* 1:1, §10, citing a Tanna; *Exod. Rab.* 15:16; *Num. Rab.* 7:10; *Lam. Rab.* 1:5, §32; cf. Cohen, "Shekhinta"; as late as the Zohar, cited in Siegel, "Israel," 106).

331. E.g., CD XX, 25–26; 1QM XII, 12; 4Q174 1 I, 5; *Sib. Or.* 3.282; *Lev. Rab.* 1:14; *Num. Rab.* 21:22; *Deut. Rab.* 6:14; *Esth. Rab.* 1:4. Some eschatological-glory texts refer to a new exodus (e.g., Isa 40:5; 2 Macc 2:7–8; *Pss. Sol.* 11:6; *Pesiq. Rab Kah.* Sup. 5:1).

332. Abelson, *Immanence*, 380–82, notes that although Kabod (glory) sometimes is identified with Shekinah, they are not always the same; but he feels that δόξα in the NT covers the semantic range of both terms (380).

333. E.g., *Num. Rab.* 20:10; see Kadushin, *Mind*, 223–26 (against medieval philosophers); cf. Abelson, *Immanence*, 98–134, followed also by Isaacs, *Spirit*, 25–26. In one late personification, the departing Shekinah kissed the walls of the temple (*Lam. Rab.* proem 25).

334. Kadushin, *Mind*, 226–29; cf. Abelson, *Immanence*, on the Shekinah as the "immanent God" (117–34).

335. E.g., 1QM XII, 10. God's face was "glorious" as he led Israel out of Egypt (*1 En.* 89:22).

336. Marmorstein, *Names*, 88, finds it especially in the Targumim; for "glory of the Lord" as a divine circumlocution, see, e.g., *Tg. Neof.* 1 on Gen 1:17, 28; 2:3; 9:27; 11:5; 17:22; 18:33; 22:14; 28:16; *Tg. Neof.* 1 on Exod 17:7, 16; 19:11; 33:23; *Tg. Ps.-J.* on Gen 17:22; 18:1, 33; 28:13; *Tg. Onq.* on Lev 9:4. Rabbis disputing an interpretation of R. Isaac, a second-century Tanna, call God "The Glory of the Life of all worlds" (*Gen. Rab.* 100:5).

337. E.g., 'Abot R. Nat. 38 A; *Sipra Qed.* pq. 8.205.2.1; *par.* 4.206.2.6; *Sipre Deut.* 258.2.3; 320.2.1; *b. Ber.* Sb; *Roš Haš.* 31a; *Šabb.* 33a; 139a; *Yebam.* 64a, bar.; *Yoma* 21b; *y. Sanh.* 8:8, §1; *Deut. Rab.* 5:10; 6:14; *Ruth Rab.* 1:2; cf. *Sipre Num.* 1.10.3; Urbach, *Sages*, 1:286–87 (citing *Mek. Pisha* 5); pagan deities in Ovid *Fasti* 1.247–50; *Plut. Themist.* 10.1; so with Wisdom (*Wis* 1:4; 6:12–25, esp. 23; cf. *Wis* 7:25–26; *Babr.* 126). The Shekinah was progressively banished from and then reintited to earth ('Abot R. Nat. 34 A; *Pesiq. Rab Kah.* 1:1; *Gen. Rab.* 19:7; *Song Rab.* 5:1, §1); because of sin, his tabernacle or temple was necessary to bring his presence (*Pesiq. Rab.* 7:4). For the Shekinah's continuing with Israel's people even when they sin, see Abelson, *Immanence*, 135–42.

338. Especially on the clouds of glory in the wilderness or revealed to Moses: *Sipre Deut.* 305.3.1; 313.3.1; 355.6.1; *Gen. Rab.* 60:16; *Exod. Rab.* 45:5; *Num. Rab.* 19:20; *Song Rab.* 4:5, §2; 7:6, §1; cf. *Pesiq. Rab.* 10:2 on a later period.

That Christ appears to Paul in the form of a theophany makes his glory comparable to the Shekinah and suggests Luke's comfort with portraying the exalted Christ as divine (Acts 2:21, 38);³³⁹ some scholars also see this revelation as the beginning of Paul's meditation on Christ's deity³⁴⁰ (though Paul was probably not the first or only early Christian thinker to conceive of this idea).³⁴¹ Some believe that Paul's mention of Christ's light in 2 Cor 4:4–6 may stem from this experience³⁴² (although Paul's immediate source may include a midrash on Gen 1).³⁴³

Luke's literary context is important for grasping his point. Although the biblical theophany recently narrated in Acts was the one given to Moses, Peter and his companions had received a theophany like Moses's when seeing Jesus transfigured on the mountain (Luke 9:32–35).³⁴⁴ The most recent such christophany was to Stephen in Acts 7:55–56; it provoked his martyrdom at the hands of Saul's compatriots. Now Saul himself receives such a vision, and it recalls the Stephen story in other respects as well. Saul's vision occurs not in Jerusalem but en route to Damascus (9:3; cf. Gal 1:17); Stephen had insisted that revelations were not limited to the Holy Land (Acts 7:2, 30, 33, 48–50). Jesus's "Why do you persecute me?" alludes directly to Stephen's warning about his people's persecuting the prophets, with continuing resistance in Stephen's own day (7:52). Jesus's church is thus like the prophets of old (Luke 6:22–23). Luke's Saul, though converted "belatedly" (cf. 1 Cor 15:8), stands in continuity with Peter and Stephen and the prophets.

Some other details simply reveal characteristic Lukan vocabulary for revelations, as we would expect. Elsewhere Luke uses "suddenly" (Acts 9:3; 22:6) for another revelation (Luke 2:13; elsewhere he employs it only in Luke 9:39); much more important is that though Luke describes light "from heaven" only in the accounts of Paul's conversion (Acts 9:3; 22:6; 26:13), that light's shining accompanies other divine revelations (such as the angelic appearance in 12:7; glory shining in Luke 2:9). The verb for the light's flashing about (περιαστράπτω) recurs only in Acts 22:6 (though it appears in the angelophany that stops a persecutor in 4 Macc 4:10). But "flash" (ἀστράπτω) appears in the angelophany at the empty tomb in Luke 24:4 (and for lightning compared to Christ's return in 17:24).

(2) *Struck Down* (9:4)

Prostration, often in terror, was a standard response to theophanies (e.g., Ezek 1:28), angelophanies (e.g., Dan 8:17), and Christ's glory (Matt 17:6; Rev 1:17).³⁴⁵ In most such encounters, the Lord or an angel tells the prostrated person to stand up (e.g., Ezek 2:1; Dan 8:18; Matt 17:7) or at least not to fear (e.g., Rev 1:17);³⁴⁶ that no such command follows immediately here probably signifies that Paul is genuinely in

339. Witherington, *Acts*, 316n47.

340. Kim, *Origin*, 268.

341. See Keener, *John*, 298–310; esp. Hurtado, *One God*, passim.

342. Dunn, *Acts*, 121 (though noting that glory appears often in heavenly visions, cf. Acts 7:55); Riesner, *Early Period*, 237 (following Kim, *Origin*, 5–13).

343. Possibly Gen 1:27 (with Wis 7:25–26) in 2 Cor 4:4, followed (more certainly) by Gen 1:3 (blended with Isa 9:1) in 2 Cor 4:6; cf. Matera, *II Corinthians*, 102, 104; Ridderbos, *Paul: Outline*, 71; Riesner, *Early Period*, 237–38 (suggesting that the use of Isa 9:1 LXX applies the light of creation to a light among *Gentiles*).

344. For Moses parallels in the transfiguration tradition, see esp. Moses, *Transfiguration Story*. For his shining, see Exod 34:29–35; cf. *L.A.B.* 12:1; 19:16; *Abot R. Nat.* 13, §32 B; *b. B. Bat.* 75a. For Moses-Sinai and transfiguration themes in Philo, see Moses, *Transfiguration Story*, 50–57; in Josephus, 57–61; in Qumran, 61–66; in other sources, 66–83.

345. Before a spectacular vision (1 *En.* 14:14; 2 *En.* 21:2; 4 *Ezra* 10:30); especially before the Lord (1 *En.* 60:3; 71:2, 11; 2 *En.* 22:4) or before an angel (4 *Ezra* 4:12; *Test. Ab.* 9:2 A; *Jos. Asen.* 14:10–11). Terror is to be expected in such circumstances (e.g., 1 *En.* 102:1). For prostration in prayer, see, e.g., *Test. Ab.* 18:10 A.

346. E.g., 1 *En.* 60:4; 71:3; 2 *En.* 22:5; 4 *Ezra* 10:30; 2 *Bar.* 13:2; see further discussion below.

trouble. (He is told to arise only in Acts 9:6, after hearing the message.) Early Jewish Christians might have thought of the story in 2 Macc 3:28–29, where a persecutor was overthrown by a theophany and fell.³⁴⁷ Likewise, the appearance of a heavenly host struck down Apollonius “half-dead” when he was preparing to desecrate the temple (4 Macc 4:11). (“Half-dead” was a common expression that often signified that the person appeared outwardly to be dead.)³⁴⁸

Elsewhere in Acts, others who opposed God or his church (Judas, Ananias and Sapphira, and later Herod Agrippa I) died for their sin (Acts 1:18; 5:5, 10; 12:23), creating a reader expectation that is subverted in this case.³⁴⁹ It may perhaps function as a testimony that Saul acted in ignorance (cf. Acts 3:17; 1 Tim 1:13; Gen 20:5) but especially to God’s mercy and providential plan (cf. 1 Tim 1:16). God will overcome opposition to his movement by one means or another (Acts 5:39).

(3) Heavenly Voice (9:4)

A Jewish audience might think of the heavenly voice in some Jewish traditions, developed in the later rabbinic *bat qol*,³⁵⁰ but its antiquity seems assured in view of sufficient analogues in a wider range of early Jewish³⁵¹ and, to a much lesser extent, other Mediterranean³⁵² literature (cf. Dan 4:31). Later rabbis considered the *bat qol* subordinate to Scripture and prophecy,³⁵³ but a person experiencing the voice conjoined with the Shekinah would likely regard it as even more compelling than prophecy without such phenomena.

In the later rabbis, a *bat qol* could come in Aramaic;³⁵⁴ the voice here especially

347. See Conzelmann, *Acts*, 73 (his “thrown down, but not converted” is true in the sense of proselytism, but the persecutor’s view of Israel’s God was certainly “converted”); cf. the idea in Gaventa, “Overthrown Enemy” (cf. perhaps also Marguerat, *Actes*, 329, though idem, *Historian*, 195–96, attributes this to Luke’s source rather than to his own literary purpose; idem, *Actes*, 325, finds stronger parallels in Cornelius’s Lukan conversion [I do not find the parallels incompatible]); Yamazaki-Ransom, “Antiochus,” 118, compares Antiochus’s belated plea in 2 Macc 9:17. Windisch and others emphasized this connection by 1932 (see Windisch, “Christusepiphanie”; noted by Hedrick, “Paul’s Conversion/Call,” 416). Cf. later stories celebrating the conversion of persecutors (Bamberger, *Proselytism*, 244, citing *b. ’Abod. Zar.* 18a). Some Romans also envisioned reversed epiphanies, in which a deity might (in a dream) withdraw support for an emperor (see Hekster, “Epiphanies”).

348. Luke 10:30; Callim. *Hymns* 6 (to Demeter), line 59; Livy 23.15.8; 40.4.15; Corn. Nep. 4 (Pausanias), 5.4; Suet. *Aug.* 6; cf. Eurip. *Alc.* 141–43; Ps.-Callisth. *Alex.* 2.20; Bailey, *Peasant Eyes*, 42; Robertson, *Luke*, 97.

349. Allen, *Death of Herod*, 129–30 (suggesting [129] also that Saul may now die instead as God’s agent, Acts 9:15). This was also the most common expectation in other Jewish literature (Haacker, *Theology*, 9), though cf. 2 Macc 3:35–36.

350. E.g., *m. ’Ab.* 6:2; *Pesiq. Rab Kah.* 11:16, 23; 15:5; *b. B. Bat.* 73b; 85b; *Mak.* 23b; *’Erub.* 54b; *’Šabb.* 33b; 88a; *Soṭah* 33a; *y. Ber.* 1:3, §4; *Pe’ah* 1:1, §15; *Soṭah* 7:5, §5; *Lev. Rab.* 19:5–6; *Eccl. Rab.* 7:12, §1; 9:10, §3; *Lam. Rab.* proem 2, 23; 1:16, §50; *Ruth Rab.* 6:4; *Song Rab.* 8:9, §3; *Tg. Neof.* 1 on Gen 22:10; 27:33; 38:25; *Tg. Neof.* 1 on Num 21:6; *Tg. Ps.-J.* on Gen 38:26; *Tg. Ps.-J.* on Num 21:6; *Tg. Ps.-J.* on Deut 28:15; 34:5.

351. *Jos. Ant.* 13.282–83; Artapanus frg. 3 in Euseb. *P.E.* 9.27.36; *Sib. Or.* 1.127, 267, 275; 2 *Bar.* 13:1; cf. Johnson, *Prayer*, 62–63.

352. Outside early Judaism, potential parallels are weaker but can be noted, e.g., Plut. *Isis* 12, *Mor.* 355E; *Mart. Pol.* 9.1; from terrestrial locations in Dion. Hal. *Ant. rom.* 1.56.3; 5.16.2–3; 8.56.2–3; Val. Max. 1.8.5; 2.4.5; 7.1.2; Lucan *C.W.* 1.569–70; Plut. *Cam.* 6.1; 14.2; Philost. *Hrk.* 18.4. For other superhuman, but not divine, speech, cf. talking serpents in Arrian *Alex.* 3.3.5; the speech of all beasts in the golden age in Babr. prol. 5–7. Most regarded talking trees and animals as fictitious (Phaedrus 1.prol.; contrast talking birds in Statius *Silv.* 2.4.1–2; Pliny E. *N.H.* 10.117), although, when animals speak, it is a serious omen (Hom. *Il.* 19.404–7; Livy 24.10.10; 27.11.4; 35.21.4; 41.13.2; 41.21.13; Val. Max. 1.6.5; Appian *Bell. civ.* 4.1.4; Lucan *C.W.* 1.561). They appear even in Jewish texts, in addition to Scripture (Gen 3:1–5; Num 22:28–30; on the latter, cf. *Gen. Rab.* 93:10; *Tg. Neof.* 1 on Num 22:30); note that the talking tree of *Test. Ab.* 3:1–4 A; 3:1–4 B might evoke Greek examples such as Dodona’s oak (Allison, “Tree”; cf. Apollod. *Bib.* 1.9.16; Ap. Rhod. 1.526–28; Dion. Hal. *Epid.* 1.258–59).

353. See, e.g., *b. B. Meši’a* 59b; *Song Rab.* 8:9, §3. Rabbis sometimes claimed that the *bat qol* became active before the Spirit of prophecy departed from Israel (*b. Pesah.* 94a; *Hag.* 13a; *Sanh.* 39b), and they occasionally associated it with the future as well (*Lev. Rab.* 27:2; *Pesiq. Rab Kah.* 17:5).

354. E.g., *b. Soṭah* 33a; *Song Rab.* 8:9, §3.

addresses Saul not in Greek but in Aramaic or Hebrew, implied by the form Σαούλ (as in Acts 9:17; 13:21; 22:7, 13; 26:14, instead of the usual Σαῦλος, forty-three times in Acts) and also later explicitly noted in 26:14.³⁵⁵

(4) *The Voice's Charge* (9:4)

The double naming of Saul would further secure his attention. People could repeat names for endearment (e.g., Cic. *Quint. frat.* 1.3.1) or rhetorical pathos (Demet. *Style* 5.267; cf. 2 Sam 18:33; 19:4). In early Jewish literature, God (*Apoc. Mos.* 41:1) or an angel (*Jos. Asen.* 14:4 MSS; 14:6) sometimes addresses people in this manner at special moments.³⁵⁶ Most important is that God sometimes addressed his servants this way in biblical theophanies, such as when God restrained Abraham from sacrificing Isaac (Gen 22:11), renewed his promise to Jacob (46:2), and—most relevant here—appeared to Moses in the burning bush to call him (Exod 3:4) and called Samuel (1 Sam 3:10).³⁵⁷ (Later rabbis interpreted the doubling of names in these cases as expressions of endearment or, less plausibly, claims that it was the same person both before and after the revelation.)³⁵⁸ Doubled names appear twice in Luke's Gospel in tender reproofs to individuals (Luke 10:41; 22:31) and once to Jerusalem (13:34; Q material also in Matt 23:37).³⁵⁹

It is undoubtedly the question “Why are you persecuting me?” (Acts 9:4)³⁶⁰ that throws Paul into confusion about the identity of the voice in 9:5.³⁶¹ By speaking for Jesus (7:56) and closely imitating his example (7:59–60), Stephen shared in Jesus's death (Luke 9:23; 14:27); persecuting Stephen was thus persecuting Jesus, and the same principle would apply to the many believers' suffering that Luke only summarizes. In Paul's own developed theology, Christ's unity with his suffering church means that Christ suffers with his people (cf. Rom 8:26) just as they share in his sufferings (cf. 8:17; 2 Cor 1:5; 4:10–11; Phil 3:10; Col 1:24). (The unity of Christ and his church is a major Pauline emphasis, exemplified by Paul's “in Christ” terminology³⁶² and his

355. Haenchen, *Acts*, 685.

356. Bruce, *Acts*¹, 198, cites also 4 Ezra 14:1 (“Ezra, Ezra”); 2 Bar. 22:2 (“Baruch, Baruch”), following Dalman, *Jesus-Jeshua*, 18; cf. also Johnson, *Acts*, 435. The repetition of the title in *Pesiq. Rab Kah.* 18:5 may reflect respect or (probably) emotion. Repetition of names sometimes was hostile, as in some examples of epanalepsis in Hermog. *Method* 9.424–25 (citing Hom. *Il.* 5.31; Demosthenes *Or.* 22.78; 23.210). For the emphatic repetition of words more generally in epanalepsis, see Rowe, “Style,” 129–30 (Demosth. *Cor.* 208); Porter, “Paul and Letters,” 579 (citing Phil 2:8); Black, “Oration at Olivet,” 86 (citing Quint. *Inst.* 8.3.51; Mark 13:8, 12); for the consecutive repetition of words for emphasis, as here, see Parsons, *Acts*, 341–42 (citing Phoebammon *De figuris* 1.3).

357. That such texts are in Luke's mind may be suggested by the response of Ananias (contrasted with Paul's here), “Here I am,” as in Gen 22:11; 46:2; Exod 3:4; cf. 1 Sam 3:4–8. Luke has narrated the revelation to Moses recently, in Acts 7:31–34. Scholl, *Apostelgeschichte*, 68, develops the connection here especially with Gen 46:2–3.

358. *T. Ber.* 1:14; *Sipra VDDen. par.* 1.1.4.3–4. In one tradition, some claims in Isaiah (such as “Awake, awake,” Isa 51:9, 17) were doubled to show Isaiah's special empowerment (*Pesiq. Rab Kah.* 16:4); similar doubling (“Listen! Listen!”) appears in Cic. *Phil.* 2.17.43 (in Rowe, “Style,” 130).

359. Also, less relevant here, once when the disciples call on Jesus in distress (Luke 8:24).

360. For Luke, the διωγμός began in Acts 8:1 (with Paul becoming one of the leaders apparently in 8:3) but had earlier roots (7:52).

361. Statues were often not identified (Dio Chrys. *Or.* 31.91–92), but people would often recognize familiar figures; in visions, characters were sometimes labeled or explained (e.g., Rev 17:5; 19:11–13).

362. Taken relationally, see Dunn, *Theology of Paul*, 396–401; more mystically, Deissmann, *Paul*, 135–38; Mary, *Mysticism*, 15–28; Wikenhauser, *Mysticism*, 21–33, 50–65, 110–11; Hatch, *Faith*, 38–39; for exegetical examination of the range of usage, see Campbell, *Union*, 67–199. Others view it as corporate in light of Jewish models (Gibbs, *Creation*, 132–33; Richardson, *Theology*, 250), e.g., comparable to the solidarity of the exodus community (cf. Davies, *Paul*, 103–4) or Israel (cf. 85); on analogy with solidarity with Adam (cf. 1 Cor 15:22; Ridderbos, *Paul: Outline*, 60); or “in [the body of] Christ” (Manson, *Paul and John*, 67). Engberg-Pedersen, *Paul and Stoics*, 70, compares identification with wisdom; identification with a deity appears in Egyptian

“body” metaphor,³⁶³ though his most explicit uses of the latter apply especially to the unity of the Christian community.)³⁶⁴

Jesus suffered in the Gospel; in Luke’s second volume, where the church carries forward Jesus’s mission (see comment on Acts 1:1), he suffers through the church. Jesus taught that however one treated the agents who represented him, one treated him (Luke 10:16; cf. Matt 10:40; John 13:20); this also applied to how one treated children and those who seemed least in his kingdom (Luke 9:48; cf. Mark 9:37; Matt 18:5). The idea of Christ’s ministers as his representatives appears outside Luke-Acts in Matt 10:40–41; 25:40, 45; and 2 Cor 5:20–21; it reflects the standard notion of agency, where treatment of envoys constitutes representative treatment of those who sent them.³⁶⁵ In Scripture, God counted the treatment of some individuals or groups as treatment toward himself (Exod 16:8; 1 Sam 8:7; Prov 19:17; Zech 2:8). Letters of recommendation, such as Paul carried (Acts 9:2), often identified the recommended person with the recommender;³⁶⁶ but if the high priest has somehow identified Paul with himself, Christ more eloquently identifies his suffering church with himself here.

Paul’s conversion will change him from one persecuting those who represent Christ to one who himself is a persecuted representative of Christ. Becoming part of the people persecuted with Christ will also entail Paul’s facing persecution (Acts 9:16); as Christ shares his agents’ sufferings, so his agents share in sufferings directed toward him. Luke probably heard Paul recount his conversion more than once (likely once even during Paul’s defense before Agrippa in 26:10–18 or, if Luke was excluded from being present, at least in the report of it afterward), and an encounter like this one could have contributed to some elements of Paul’s theology.³⁶⁷ Later Paul writes of sharing Christ’s sufferings (2 Cor 1:5; 4:10–11; Phil 3:10; cf. Rom 8:17). When Paul suffers for the same mission for which Christ suffered, he experiences more of what Christ suffered and more of Christ’s mission, hence of Christ working in him and intimacy with Christ (cf. Col 1:24–29).

(5) *The Voice’s Identity* (9:5)

The particular wording of Paul’s response might be Lukan style (cf. Acts 10:4, “What is it, Lord?”);³⁶⁸ regardless of the question of pre-Lukan tradition, we must

immortality ritual as well (*Book of Dead* passim, e.g., Sp. 30, part P-2; Sp. 43a, part P-1; Sp. 43b; Sp. 79, part S-2; Sp. 85a, part S-1; Sp. 131, parts P-1–2, S-1; Sp. 145–46; PGM 1.178–81; outside immortality, cf. PGM 1.251–52; 4.169–70, 186–87, 385–90; PDM Sup. 131–32, 163, 183; Apul. *Metam.* 11.24), but this is ritual magic, not the result of the Spirit’s indwelling or incorporation at conversion.

363. Cf. Bede *Comm. Acts* 9.4 (Martin, *Acts*, 104; L. Martin, 87), noting here that the church is Christ’s body.

364. In this case, the many proposed Jewish analogies are less compelling than the standard Gentile usage for a community, starting with Menenius Agrippa (Dion. Hal. *Ant. rom.* 6.86.1–5; Livy 2.32.9–12; Plut. *Coriol.* 6.2–4; Dio Cass. 4.17.10–13); after him, many compared the state to a body (e.g., Sall. *Ep. Caes.* 10.6; Cic. *Resp.* 3.25.37; Phil. 8.5.15; cf. Arist. *N.E.* 1.7; *Test. Naph.* 2:9–10). Stoics compared even the universe to a cohesive body (Sen. *Y. Ep. Lucil.* 95.52; Epict. *Diatr.* 1.12.26; Marc. Aur. 7.13; cf. Diod. Sic. 1.11.6).

365. E.g., Diod. Sic. 4.10.3–4; Jos. *Ant.* 8.220–21; see more fully Keener, *John*, 310, 313–14; on sending, see discussion above. Later rabbis deemed agents equivalent to the senders themselves (*m. Ber.* 5:5; *t. Ta’an.* 3:2; *b. Naz.* 12b).

366. E.g., Kim, *Letters of Recommendation*, 7, 37–42; P.Oxy. 32. As suggested above, Paul later becomes an “apostle of Christ” rather than of people (Gal 1:1).

367. For this as one source for Paul’s view of “the solidarity of Christ and Christians,” see also Longenecker, *Paul*, 204 (following Robinson, *Body*, 58); Kim, *Origin*, 253. By contrast, Lampe, “Lukan Portrait of Christ,” 174–75, doubts any suggestion of a mystical union here (rightly emphasizing more Luke’s emphasis on those who speak in Christ’s “name,” Acts 3:6, 16), arguing that “this is certainly a different doctrine from that of Paul.”

368. An appropriate expression of astonishment (Mark 1:27) but also a normal question (Acts 23:19; Eph 4:9; Gen 21:17; Josh 15:18; Judg 1:14; 18:23; 1 Sam 1:8; 2 Sam 14:5; in response to a vision, Zech 6:4).

ask how it functions within the narrative world of Acts.³⁶⁹ Confusion about who speaks appears also in response to an angelic revelation in *Joseph and Aseneth* (*Jos. Asen.* 14:5, 7), though probably because the specified recipient is unfamiliar with biblical tradition. Saul also has reason to be uncertain about precisely who is speaking; perhaps an angel addresses him (cf. Acts 23:9). “Lord” is certainly more dramatic than “Sir” in this instance (an acceptable translation of the vocative κύριε in some contexts)³⁷⁰ but does not yet for Paul necessarily imply that he addresses God himself.³⁷¹

Nevertheless, even the angel of the Lord spoke for God in the first person in some OT passages,³⁷² and so Jesus’s words must stun Saul, whatever their source.³⁷³ Normally such revelations in the OT were theophanies, but the call is not like that given to Moses or Samuel, despite the element of surprise contained in each of those accounts. How could *God* say that Saul was persecuting him? Genuinely believing that he was doing right by the standards he knew (cf. also Phil 3:6), Saul would more likely expect God to *commend* him for what he was doing. This was a stark revelation: in his fervor for the righteousness he thought he achieved by the law, he found himself opposing God. It is not surprising that Paul developed a clearer understanding of the inadequacy of legal achievement for righteousness than did some of his contemporaries (see discussion above in the introduction to this narrative, sect. 1.a.i.7: “Paul’s Theological Reversal”).

The phrase “I am Jesus, whom *you* are persecuting” includes two emphatic pronouns; because the person would be assumed in the verbs (εἰμί, διώκεις), the ἐγώ and σύ are superfluous (cf. Acts 9:4) except for the purpose of emphasis (the repetition of “persecute” in 9:4–5 is also rhetorically emphatic, analogous to rhetorical antistrophe).³⁷⁴ Self-identification by an “I am” oracle is relevant in a theophany (cf. 7:32; Gen 15:7; 17:1; 26:24; 28:13; 31:13; 35:11; 46:3; Exod 3:6, 14–16). The emphatic “you” presumably penetrates Saul’s secure sense of righteousness. If any experiences helped shape Paul’s subsequent theology, an experience identifying Christ as the exalted Lord would certainly be among them³⁷⁵ (although there is no evidence that this christological identification proved controversial among his fellow followers of Jesus).

369. Walaskay, *Acts*, 228, compares Jacob asking his adversary’s name (and the adversary not answering; Gen 32:29). Jacob’s subsequent limp (Gen 32:31; which he compares with Saul’s blindness in Acts 9:8) illustrates the danger in theophanies.

370. See, e.g., Dickey, “Κύριε” (for respect, not full submission). Apart from a theophany or analogous supernatural experience, the vocative was simply a respectful title (e.g., *Test. Ab.* 2:7; 18:4 A). This use was appropriate even for a relative of higher rank (e.g., P.Oxy. 1231, 26; *SPap* 1:338–39, lines 1, 24; P.Giss.Univ. 21.11; *Jos. Asen.* 4:5/7; 4:9/12; cf. the Latin complimentary title more generally in Fronto *Ad am.* 1.25).

371. Pace Johnson, *Acts*, 163, who insists on its full divine force: “Saul does not yet know it is *Jesus* who is Lord, but he recognizes that he is involved in a theophany!” One could address a revealing angel as κύριέ μου (*Test. Ab.* 14:1; 15:4 A; 8:9; 10:1; 11:1; 12:3 B; *Test. Job* 3:5), although this usage is not common. But Paul must ultimately think of a sort of theophany here.

372. E.g., Gen 16:10; 22:12; Exod 3:2–10; Num 22:35; Judg 2:1; 6:22; 13:18, 22. On other occasions the angel speaks for the Lord as distinct from him (e.g., Gen 16:11; Judg 6:12; Zech 1:12). Gideon addresses the Lord’s angel as “Sir” before recognizing his identity (Judg 6:13, 15), but as God himself afterward (Judg 6:22).

373. In contrast to Saul here, Luke and his audience understand the vocative “Lord” for Jesus (Acts 1:6, 24; 4:29; 7:59–60; 9:10, 13; 10:14; 11:8; 22:8, 10, 19; 26:15); it applies to merely an angel in 10:4, but Cornelius may not understand the difference fully (cf. 10:25–26).

374. On antistrophe, see, e.g., Anderson, *Glossary*, 23; Rowe, “Style,” 131; Porter, “Paul and Letters,” 579; Lee, “Translations: Greek,” 779; Black, “Oration at Olivet,” 86. Given typical sorts of answers examined in conversation analysis (cf., e.g., examples in Person, “Analysis,” 88), Jesus’s answer to Saul would be quite shocking.

375. For Paul’s subsequent theology of Jesus’s “lordship,” see, e.g., Hurtado, “Lord”; Longenecker, *Christology*, 120–36.

(6) *Instructions to Saul (9:6)*

Recipients of superhuman revelations typically fell on their faces,³⁷⁶ and supernatural revealers often told the recipient to stand on his or her feet and/or to stop fearing.³⁷⁷ Here, however, Saul is promised more instructions later; like most theophanies, this one does not waste words. By telling Saul to enter the city and await further instructions, Jesus is also indicating that he has matters in place already in Damascus. Jesus already knew arrangements for the Passover meal (Luke 22:10–12), and his disciples found it as he had promised (22:13); he knew arrangements for the donkey for the triumphal entry (19:30–31), and his disciples found it as he had promised (19:32). So here Jesus sends Saul into the city, where he will find the situation to be as Jesus promised.

The message to Saul will probably dictate the terms of his repentance (cf. “fruits of repentance,” Luke 3:8), completing his conversion process: “what thing you must do” (ὃ τί σε δεῖ ποιεῖν) alludes (more explicitly in light of the question in Acts 22:10) to Luke’s standard soteriological question. Thus, later in Acts, Paul’s jailer asks him, “What must I do to be saved?” (τί με δεῖ ποιεῖν ἵνα σωθῶ, Acts 16:30). Earlier in Acts, when the crowds ask, “What ought we to do?” (τί ποιήσωμεν,³⁷⁸ 2:37), Peter calls for repentance and baptism in Jesus’s name (2:38). Paul, who will fast until his baptism (9:9, 18), probably shows correct understanding of the first part of Peter’s twofold “formula” (i.e., repentance).³⁷⁹

But what are the “fruits of repentance” (Luke 3:8) in his case? When the crowds ask John, “What ought we to do?” (τί . . . ποιήσωμεν, 3:10), the particular responses differ in detail according to the person’s means and profession (3:11–14). The general response to these questions is to share possessions (3:11; 18:18–22) and to have faith in Jesus (Acts 16:31), apparently confirmed by baptism (16:32–33). We know nothing of Paul’s possessions, but clearly he trusts in Christ, whatever the personal cost, and accepts baptism (9:18).

But what is the *particular* response to Paul’s own case, in addition to such general considerations? If the narrative is specific on this point, Paul’s calling is part of his required obedience to Christ (cf. 9:15; also Paul’s view, 1 Cor 9:16–17), and one element of it probably³⁸⁰ echoes the voice on the road: “how much he *must* suffer” (ὅσα δεῖ αὐτὸν . . . παθεῖν, Acts 9:16).

IV. RESPONDING TO THE THEOPHANY (9:7–9)

Saul’s companions cannot see the vision (9:7); by contrast, Paul, who sees the theophany, can see nothing else afterward (9:8–9). His refusal to eat or drink (9:9) constitutes a culturally understood form of mourning and repentance, broken only when he is welcomed into Christian fellowship through baptism (9:18–19).

376. Gen 15:12; 28:17; Dan 8:17–18; 10:9–10; Ezek 1:28; 43:3; Tobit 12:16; *Jub.* 18:10; *1 En.* 14:13–14; 60:3; 71:2–3, 10–11; 89:30–31; 102:1; *2 En.* 1:8; 20:2; 21:2; 22:4; 4 *Macc* 4:11; 4 *Ezra* 4:12; 5:14; 10:30; *Jos. Asen.* 14:10–11; *Test. Job* 3:4/5; *Apoc. Zeph.* 6:9–10; Matt 17:6; Rev 1:17; cf. Exod 34:30; *PGM* 4.725.

377. E.g., Ezek 2:1–2 (cf. 43:5); Dan 8:18; 10:11–12; Tob 12:17; *1 En.* 60:4; 71:3; *2 En.* 1:8; 20:2; 21:3; 22:5; *3 En.* 1:7–9; 4 *Ezra* 5:15; *2 Bar.* 13:1–2; *Jos. Asen.* 14:8/7, 11; Matt 17:7; Rev 1:17; cf. *PGM* 1.77–78.

378. The aorist active subjunctive, which focuses not so much on the future time element (Robertson, *Grammar*, 18.2.1.c.α, p. 848) but is “closely allied” with both the future indicative and the imperative (19.2.1.a–b, pp. 924–25); Robertson classifies Luke 3:10 (below) as “deliberative” (19.2.3.c, p. 934).

379. Fasting often shows repentance; see comment on Acts 9:9.

380. Luke uses δεῖ twenty-two times in Acts, but this is the first use since Acts 5:29 and the last use until 14:22 (the latter, coincidentally, also speaks of suffering for the kingdom). Apart from 27:21–26, in no other place in Acts do two instances of δεῖ occur so close together.

(1) *The Companions' Partial Experience (9:7)*

Although the text is not clear, Saul's companions (9:7) were *probably* more than simply travelers finding safety in numbers.³⁸¹ They could be members of the Levitical temple guard, but it is unlikely that the high priest delegated a force to Saul (and also unlikely that, if he had, Luke would have found no reason to mention it). Most likely, they are fellow Hellenist zealots defending the temple against the Jesus movement. Their failure to see Jesus here (9:7) may contrast with Paul's sight of Jesus and his blindness in 9:8.³⁸²

The clearest apparent contradiction among narratives of Paul's conversion is 9:7's claim that his companions "heard" the voice as compared with 22:9's claim that they did *not* "hear" it.³⁸³ Some scholars seek to resolve the difference by appealing to classical usage: ἀκούω with the genitive (as in 9:7) means to "hear a sound" whereas with the accusative (as in 22:9) it means to "hear with understanding."³⁸⁴ Luke, however, does not observe this distinction in his writings (e.g., Luke 2:47; 6:18, 47),³⁸⁵ and it appears that the LXX, other NT writers, and Epictetus also do not.³⁸⁶ It is possible that Luke, who sometimes archaizes, may employ classical usage, yet inconsistently, and that he therefore does so here.³⁸⁷ But this is at best a possible solution. (With or without appeal to classical usage, Luke could have simply used ἀκούω inconsistently.³⁸⁸ Some early interpreters also harmonized the passages by suggesting that others heard the sound but only for Paul did it communicate distinct words.)³⁸⁹

Yet another possible solution may also rise from the genre of Acts as ancient rather than modern historiography. Ancient historians fleshing out minor details of a simpler account might flesh it out differently on different occasions. Such variation could also function as a deliberate rhetorical device; Tannehill suggests that when recounting events that he has treated before, Luke likes "to vary details and emphasis" and sometimes goes further than modern readers feel comfortable with, creating conflicts for attentive readers.³⁹⁰ The difference is less consequential than modern arguments often make it (cf. comment on Acts 22:9); it is certainly less than many differences between accounts of the same events in Josephus's *War* and his *Antiquities of the Jews*. That Josephus composed differently even in such elite works, each potentially read by the same audience as the other, suggests that ancient audiences normally saw little problem with, and probably often expected, such rhetorical variation. This proposed

381. Pace Lake and Cadbury, *Commentary*, 101; also pace Dunn, *Acts*, 122, if I understand him correctly here.

382. Nevertheless, Gaventa, *Acts*, 150, makes too much of a distinction between perception here (θεωρέω) and physical sight in Acts 9:8–9 (βλέπω). The semantic ranges of the terms overlap too much for the distinction (e.g., "seeing" signs in 8:6, 13).

383. Conzelmann, *Acts*, 71, attributing one account to Luke's desire to provide further witnesses and the other to his desire to reserve it for Paul only. Ancient commentators also noticed the discrepancy (Martin in *Acts* [ACCS], 103n2, cites Didymus and John Chrysostom).

384. Moulton, *Grammar*, 1:66 (cited in Fitzmyer, *Acts*, 426); Turner, *Grammatical Insights*, 87–90; cf. Bruce, *Commentary*, 197. For hearing without understanding, see John 12:29.

385. Luke uses the verb with the genitive and accusative basically interchangeably (see Bratcher, "Acts ix.7").

386. See Moehring, "Acts IX 7."

387. Witherington, *Acts*, 312–13. A possible distinction between the genitive (with content) and the accusative (without content) hearing of the voice might be suggested by hearing with the accusative in Acts 9:4. Cf. Steuernagel, "ΑΚΟΥΟΝΤΕΣ." Perhaps the voice they heard was Paul's answering the other one (Chrys. *Hom. Acts* 19, 47), but the definite article in Acts 9:7 points back to the same voice as in 9:4 (Witherington, *Acts*, 313).

388. Conzelmann, *Acts*, 71, doubts that there is a difference between the genitive and the accusative use with the verb.

389. Arator *Acts* 2 (Schrader, 86–87); Bede *Comm. Acts* 22.9 (Martin, *Acts*, 270).

390. Tannehill, *Acts*, 10 (n. 6 compares Paul's colleagues standing in Acts 9:7 and falling in 26:14).

solution may be right or wrong in the present instance, but it certainly falls within what was allowed in ancient historical writing.

Selective revelation (cf. Acts 10:40–41) was a divine prerogative.³⁹¹ In Dan 10:7, only Daniel saw the vision; others felt dread and ran off.³⁹² Some rabbis thought that when God spoke to Moses, he alone heard it despite its might.³⁹³ Because his companions experienced the light and (by whatever manner) the sound, Luke portrays this experience as more than a vision despite visionary elements.³⁹⁴ Like Luke, Paul himself speaks of meeting Christ (1 Cor 15:8) in a manner distinct from his later visions (2 Cor 12:1).

(2) *Physical and Spiritual Blindness (9:8)*

Blindness was apparently common in antiquity.³⁹⁵ Although, according to legend, Homer had been blind,³⁹⁶ blindness was considered a terrible malady. One senator who had gone blind had to be persuaded not to end his life (Suet. *Aug.* 53.3); most men who became blind could not earn wages, and this produced difficult situations for their wives (e.g., Tob 2:10–11).³⁹⁷ Physicians associated blindness with various ailments. Sickness could “darken” vision (Hippocr. *Reg. Ac. Dis.* 7); an epileptic attack could cause sudden blindness (Hippocr. *Epid.* 2.5.11); one could also experience temporary blindness while walking, after surviving a quartan fever (7.45).³⁹⁸ If an eye ruptured, it would be difficult to fix; if it then putrefied, the person would go blind (Hippocr. *Prorr.* 2.19). (Physicians often treated eye problems with eye salves.)³⁹⁹

Blindness could also, however, stem directly from divine judgment, according to ancient ideology (e.g., Hom. *Il.* 6.139). Blindness was often associated with sin or preventable failures.⁴⁰⁰ Thus one source suggests that a person was struck blind because he failed to perform sacrifices properly,⁴⁰¹ though some thinkers did object that blindness could come on anyone.⁴⁰² Occasionally judgments came for looking

391. When Athena seized Achilles in Hom. *Il.* 1.194–200, he alone saw her; Barrett, *Acts*, 452, cites also Hom. *Od.* 16.154–63; cf. also the divinized Apollonius in Philost. *Vit. Apoll.* 8.31. See further comment on Acts 10:41; Keener, *John*, 975, 1186.

392. Johnson, *Acts*, 163, compares also Deut 4:12; Wis 18:1 (so also Marshall, “Acts,” 576, though cf. 597); Boring, Berger, and Colpe, *Commentary*, 319, rightly cite Num 22:22–35 and also the later *Tg. Ps.-J.* on Gen 22:10.

393. *Sipra VDDen. pq.* 2.2.1.19; 2.2.2.1.

394. Craig, “Resurrection,” 50.

395. With, e.g., Toner, *Culture*, 132. An estimated 87 percent of the world’s visually impaired people today live in the Majority World (Brown, Mory, Williams, and McClymond, “Effects,” 868), often in conditions probably comparable to those of Mediterranean antiquity.

396. E.g., Proclus *Poet.* 6.2, K175.3–5; Lucian *Indictment* 1 (playing on physical and moral senses of blindness); but the fictitious protagonist in Lucian *True Story* 2.20 can recognize (from looking at him in the afterlife) that Homer was not blind, and some others rejected the claim that he was born blind (see Vell. *Paterc.* 1.5.3, charging proponents of the view with lacking all senses).

397. Cf. the difficult situation for Sitis in *Test. Job* 21–23, though blindness is not what disabled Job here.

398. As already noted, the argument that Paul had epilepsy is not well founded. Nor would Paul have been traveling soon after a fever, although malaria attacks can recur under stress and heat (cf. Acts 26:13).

399. E.g., Epict. *Diatr.* 2.21.20; 3.21.21; *m. Šabb.* 8:1; *b. Šabb.* 108b; *Lev. Rab.* 12:3; *Deut. Rab.* 8:4; *Lam. Rab.* 4:15, §18; cf. Tob 11:11–13 (on which see Kollmann, “Offenbarung”); Horsley, *Documents*, 3:56, §17; Hemer, *Letters*, 196–97; esp. Berger, “Kollyrium.” For wax salves, see Pliny E. *N.H.* 22.56.117; for the use of hemlock, 25.95.153. For eye specialists, see, e.g., Xen. *Hell.* 2.1.3; for the danger of performing eye operations in earlier times, see Hamm. 215–18, 220; for the story of a physician using destructive eye salve to destroy a tyrant’s eyes, see Dion. Hal. *Ant. rom.* 20.5.2–3; Diod. Sic. 22.1.2; Appian *Hist. rom.* 3.9.2.

400. In many cultures, some associate another’s affliction with specific avoidable causes to reduce the observers’ anxiety (cf. Job 6:21); see, e.g., Mbiti, *Religions*, 272–75.

401. Dion. Hal. *Ant. rom.* 16.3.1. Tiresias’s blindness was judgment from Hera (Ovid *Metam.* 3.335). In one inscription, a daughter suffered blindness because her father failed to fulfill his vow (Toner, *Culture*, 30, citing TAMV 1.509). For blindness as punishment, see further Hartssock, *Sight*, 68–72.

402. E.g., Plut. *Profit by Enemies* 5, *Mor.* 88F.

on images; Ilus was blinded for looking on the Palladium but regained his sight after propitiating Athena (Plut. *Par. St.* 17, *Mor.* 309F); the demigod Protesilaus used his own apparition to blind a barbarian who troubled him (Philost. *Hrk.* 4.2).⁴⁰³ Jewish literature provides many examples of the connection;⁴⁰⁴ one who saw a blind, lame, or otherwise seriously afflicted person should praise God as the righteous judge.⁴⁰⁵

Jewish readers knew of miraculous blindings for judgment (Gen 19:11), including a temporary one in a context that also plays on spiritual sight (2 Kgs 6:17–20).⁴⁰⁶ Visions of the divine did not normally result in blindness in ancient literature,⁴⁰⁷ but ancients knew the danger of staring at the sun or close encounters with lightning. (Luke attributes Paul's blindness directly to the intensity of the light; see Acts 22:11.)⁴⁰⁸ Luke's own audience may think of Zechariah's being temporarily muted for disbelieving a revelation (Luke 1:20),⁴⁰⁹ but Paul's disobedience has been more severe than Zechariah's unbelief (which was more like Abraham's and Sarah's, Gen 17:17; 18:12). (His companions are here speechless [9:7], but probably from astonishment rather than judgment; cf. 21:14; Luke 14:4; 20:26.)

Later in Luke's narrative, another opponent of the truth who is spiritually blind is physically blinded temporarily as judgment (Acts 13:11). Ironically, Paul's blinding leads to enlightening (cf. 26:18), followed by further spiritual visions (9:12, probably not part of the present vision). Although his companions did not see the revelation (9:7), he lacked natural vision, and so they had to lead him by the hand (9:8; 22:11; cf. 13:11; Luke 6:39, 41–42). (The blind are often depicted as needing to be led by the hand.)⁴¹⁰ Another irony remains: Saul had come to "lead" Jesus's followers "bound" from Damascus as captives (9:2, 21), but he, now vanquished, must be "led by the hand" and "led into" Damascus (9:8).

Luke would not be the first ancient author to play on physical and spiritual blindness in his sources.⁴¹¹ Greek and Roman tradition could play on the irony of the spiritual sight of a blind seer such as Tiresias;⁴¹² one Greek philosopher allegedly blinded himself

403. For blindings by Isis, see Heyob, *Isis*, 65 (citing Ovid *Pont.* 1.1.53–54; Juv. *Sat.* 13.93; she also cites claims of eye healings); by Ceres, see Val. Max. 1.1.ext. 5.

404. E.g., *b. Ta'an.* 21a. See fully Davies and Allison, *Matthew*, 2:135.

405. *T. Ber.* 6:3; *b. Ber.* 58b. The response was to be the same, however, for bad news to oneself (*m. Ber.* 9:2).

406. For temporary blindness to turn a writer from profaning God's law by secular use of it, see *Let. Aris.* 316. Blindness as a temporary judgment (reversed at repentance) also appears occasionally in modern missionary accounts (see McGee, "Radical Strategy," 91–92, citing Crawford, *Shantung Revival*, 35). In Trousdale, *Movements*, 28, a nocturnal revelation of Jesus left the recipient converted but physically blind.

407. Washing one's eyes and face after a vision seems to have been a fairly common procedure, as in Eunapius *Lives* 464 (Wright, LCL, 391n2, cites as analogues Aristoph. *Frogs* 137–38; Aeschylus *Pers.* 201).

408. See Ephrem Syr. *Hom.* 26.1–2 (Martin, *Acts*, 271). If no one blames the sun for damaging eyes that look on it, neither should the Lord be blamed for Paul's blindness (*Hom.* 27.2–3 [Martin, *Acts*, 295]). But blindness from light and from judgment need not be incompatible. Looking at bright light can produce photoretinitis, sometimes temporary but often permanent, burning the retina (Wilkinson, *Healing*, 159).

409. On ancients either muted or suddenly freed from being mute by anger, see Val. Max. 1.8.ext. 3–4. Greeks sometimes observed muteness to follow fourteen days of fever (Hippocr. *Reg. Ac. Dis.* 28) and sometimes treated it by bloodletting (Hippocr. *Reg. Ac. Dis.* 6; *Epid.* 2.5.7). In Zechariah's case, people may assume that κωφός includes deafness as well (Luke 1:22, 62; cf. BDAG).

410. E.g., Dio Chrys. *Or.* 62.1 (figuratively); guide in Quint. *Decl.* 297 intro; 297.8, 13; see further comments on Acts 13:11.

411. Here, see also comments in Hartsock, *Sight*, 187–88; elsewhere, see, e.g., John 9:39–41; Porph. *Marc.* 18.307. On blinding and seeing in ancient literature, cf. also Rosaeg, "Blinding"; Hartsock, *Sight*, 73–81; in the OT and Tobit, Hartsock, *Sight*, 102–24. I adapt comments here primarily from Keener, *John*, 796.

412. E.g., Soph. *Oed. tyr.* 371, 375, 402–3, 419, 454, 747, 1266–79; Ovid *Metam.* 3.336–38, 525; Apollod. *Bib.* 3.6.7. Cf. discussion in Heinze, "Teiresias"; cf. Phineus in Ap. Rhod. 2.184, 195–96; Apollod. *Bib.* 1.9.21; Marcus Perperna in Val. Max. 8.13.5; Homer in Proclus *Poet.* 6.2, K175.3–5. Lest one assume that Luke's use of the figure required his creation of Paul's blindness: his predecessors who played on spiritual blindness and sight did not likely invent the blindness of Tiresias or their other characters in their tradition.

physically to make his mental contemplations more accurate.⁴¹³ But Gentile sources more frequently employed blindness figuratively for intellectual, rather than moral, faults,⁴¹⁴ and the Jewish tradition provides a more direct source for Luke's irony.⁴¹⁵ A passage offered by Isaiah the prophet about spiritual blindness was adopted by Luke as his closing programmatic text (Isa 6:9–10 in Acts 28:26–27),⁴¹⁶ but the image was common in the biblical prophets (Isa 29:9; 42:18–19; 56:10; Jer 5:21; Ezek 12:2) and the Jesus tradition (cf. Matt 15:14; 23:16; Mark 4:12; 8:17–18; perhaps Luke 4:18) and appears in other early Jewish sources.⁴¹⁷

(3) *Entering Damascus* (9:8)

Saul obeyed the vision and entered Damascus. One could argue that he had to enter this nearby city after a long journey anyway, obedience aside, especially now that he could not see; but his three days of dry fasting (Acts 9:9; see comment there), conjoined with his praying (9:11) and expectation of fulfillment of another vision (9:12, 17), indicate that he now recognized Jesus as the true Lord. He merely awaits the external confirmation of baptism (9:18).

Saul stayed with one Judas (a common name in this period; see 9:11), presumably because arrangements had already been made there⁴¹⁸ or because Saul carried a recommendation for lodging there from the high priest or someone else influential. Given Saul's status and that of his backers, Judas may have also been a person of status in the Damascene Jewish community. (This might explain the brevity of directions to the house of Judas [a common Jewish name] on Straight Street [usually thought to be a long street].⁴¹⁹ That Ananias knows immediately of which Saul the Lord speaks in 9:11–13 suggests that either "from Tarsus," or the name of his host, or both indicated the particular Saul's identity.) Despite one early conflating tradition,⁴²⁰ Judas was probably not a Christian;⁴²¹ had he been, Ananias might not have needed a vision to locate Saul.

(4) *Saul's Fast* (9:9)

A person who was sick might be unable to eat (cf. comment on Acts 27:33), but Luke does not expect his audience to infer that Paul was unable to eat because of

413. Democritus in Aul. Gel. 10.17.1.

414. E.g., Epict. *Diatr.* 1.18; Plato *Rep.* 6.484BD; Catull. *Carm.* 64.207–9; Iambl. *V.P.* 6.31; 32.228; inferior thoughts about the divine in Porph. *Marc.* 18.307. The impious cannot judge piety, for the blind would call seeing blindness (Heracl. *Ep.* 4). Plato's Socrates maintained that he exposed the ignorance of those who claimed knowledge (Plato *Apology* in Bruns, *Art.* 45); less relevant would be some philosophers' teaching on the deceitfulness of the senses (Plato *Phaedo* 83A; contrast Arist. *Soul* 3.1, 424b; Sen. *Y. Dial.* 5.36.1; 7.8.4; Diog. Laert. 7.1.52, 110; *Let. Aris.* 156; Philo *Spec. Laws* 4.92; *Conf.* 19; Heb 5:14). Many writers shared an emphasis on moral discernment (Cic. *Off.* 3.17.71; *Leg.* 1.23.60; Sen. *Y. Ep. Lucil.* 45.6; Epict. *Diatr.* 1.4.1; 1.7.8; 2.3.1; Marc. Aur. 2.1, 13; 4.41; 9.1.2; Diog. Laert. 7.1.122). Greeks usually viewed "sin" less in stark moral terms than did most of Judaism (Eurip. *Hipp.* 615; Arist. *N.E.* 4.3.35, 1125a; Nock, "Vocabulary," 137).

415. Cf. the blind seer in 1 Kgs 14:4–6; the clearer play on sight and blindness in 2 Kgs 6:17–18. The language would surely be intelligible in a very hellenized Jewish framework (e.g., Philo *Creation* 53, 66).

416. Also prominent in the Jesus tradition (Luke 8:10; Mark 4:12; Matt 13:14–15; John 12:40).

417. *1 En.* 99:8; 4Q424 1 3; 4Q434 1 I, 3–4; Wis 2:21; Rom 1:21; Eph 4:18; *Test. Levi* 13:7; *Exod. Rab.* 30:20. Rabbis also played parabolically on the contrast between seeing and blindness (*y. Pe'ah* 8:9 in Montefiore and Loewe, *Anthology*, 411).

418. Bruce, *Commentary*, 198.

419. One cannot, of course, press much certainty into this apparent brevity: possibly, few Jews lived on this street (if the Jewish quarter lay elsewhere), and there is no reason to suppose that Luke, who often abbreviates, or even his source, would have supplied full directions.

420. Hengel and Schwemer, *Between Damascus and Antioch*, 374n432, note an unpublished Coptic version of *Acts of Paul* that implausibly identifies this Judas with Jesus's brother.

421. With *ibid.*, 81.

physical complications from the Damascus road encounter. Grief also led to physical inability or volitional refusal to eat, and this is surely the case here. Learning Jesus's true identity has transformed Paul's own self-identity from God's righteous servant to the basest of rebels against God.

Paul apparently fasts in repentance. Like other writers, Luke often mentions "eating" and "drinking" together (Luke 5:30, 33; 7:33–34; 10:7; 12:19, 29, 45; 13:26; 17:8, 27–28; 22:30; Acts 10:41) but only rarely (in Acts 23:12, 21)⁴²² negatively, for *avoiding* eating and drinking. Luke does not employ here his customary language for "fasting" conjoined with prayer (Luke 2:37; 5:33–35; 18:12; Acts 13:2–3; 14:23; cf. 27:9), though clearly Saul is praying (Acts 9:11) and even receiving visions (9:12). Luke may be using the different terminology only for variation, but given his overall pattern, it may be that he emphasizes a different kind of fasting with a different objective than in most cases. It is possible that his adversaries later abstain, at least in part, as a vow of mourning over the corruption of Israel. Whether this is the case or not, it is likely that Saul is here mourning his own sin, following a traditional Jewish method of repentance (at least as early as "the fast," cf. 27:9).

Devout people could undertake fasts for various reasons (see comment on Acts 13:2–3); the reason here is likely penitence. Fasting was a means of mourning (Judg 20:26; 1 Sam 31:13; 2 Sam 1:12; 1 Chr 10:12), especially for the self-humbling involved in repentance (1 Sam 7:6; 2 Chr 20:3; Ezra 8:21–23; Jer 14:12; 36:9; Joel 1:14; 2:15; Jonah 3:5; Zech 8:19); sometimes its function in self-humbling was coupled with prayer for a specific request (2 Sam 12:16; *Tg. Rishon* on Esth 1:9). Greeks also knew fasting as a sign of mourning.⁴²³ Alexander was so troubled about having killed Clitus (while drunk) that he refused to eat or drink for three days,⁴²⁴ and he refused to eat or care for his body for two days after his friend Hephaisstion's death (Arrian *Alex.* 7.14.8). Another mourned three days without food because of deprived love (Eurip. *Hipp.* 275). Three days was the length of time spent in dry fasting by Queen Esther (Esth 4:16). More than three days of dry fasting can be dangerous, although Aseneth, in one Hellenistic Jewish romance, *Joseph and Aseneth*, abstained from food and drink for seven days as she mourned, repenting of idolatry (*Jos. Asen.* 10:1/2, 10/11, 17/20). Some Christians later (possibly following the Lukan tradition of Paul's fast, but probably following the more general use of fasting for mourning and repentance) urged that fasting should precede baptism (*Did.* 7.4).

Some scholars suggest that Luke specifies three days to connect Paul's blindness and restoration with the time between Jesus's death and resurrection.⁴²⁵ The text, however, connects the three days most explicitly with the fasting, and (as already noted) three days was a common duration for fasts.⁴²⁶ Had Luke intended an analogy with resurrection (in itself a not implausible suggestion), perhaps we could have

422. Where some zealous adversaries want to kill Paul, who is here repenting of the same sort of zeal.

423. See also Hom. *Il.* 19.156, 206–14; *Od.* 4.787–90; Soph. *Ajax* 324; Eurip. *Med.* 24; Ap. Rhod. 1.1071–72; Dion. Hal. *Ant. rom.* 3.22.1; Ovid *Metam.* 14.423–25; Arrian *Alex.* 4.9.4; Apul. *Metam.* 2.24. Some used abstinence from food, but not water, as a means to reduce fever (Epict. *Diatr.* 2.14.21).

424. Arrian *Alex.* 4.9.4; cf. his seclusion for three days in Quint. Curt. 8.2.11.

425. Papadopoulos, "Σαῦλος," arguing that, historically, the lightning on the road detached Saul's retina and that even after healing, his vision remained weak enough to require scribe assistants. But such assistants were common; the illiterate needed help (e.g., P.Tebt. 104.40; P.Lond. 1164 [h], line 30), but (closer to Paul's case) those who could afford them used them on a different level (e.g., Cic. *Att.* 14.21; Dio Chrys. *Or.* 18.18; Fronto *Eloq.* 2; *Ad M. Caes.* 5.26); on Paul's use of a secretary, see Richards, *Letter Writing*, *passim*.

426. Again, Arrian *Alex.* 4.9.4; Eurip. *Hipp.* 275; Esth 4:16; cf. (involuntarily) 1 Sam 30:12; *Jos. Ant.* 6.360. Also *Test. Jos.* 3:5; *As. Mos.* 9:6; cf. 2 Macc 13:12; perhaps *Jos. Ant.* 11.134 (though the fast itself may not be three days); Philo *Contempl.* 35; *Decal.* 45.

expected him to connect the three days more explicitly with regaining sight, not just with the duration of blindness.⁴²⁷

b. Paired Visions Confirm Saul's Call (9:10–19a)

Paired visions to Ananias and Saul underline the dramatic nature of Paul's transformation (Acts 9:13–14), reveal the centrality and confirm the veracity of his calling (9:15–16), and lead to Saul's restored vision and empowerment by the Holy Spirit for his mission (9:17–19a). Clearly "the Lord" has revealed himself to Saul,⁴²⁸ but the instrumental role of the community of disciples,⁴²⁹ especially as exemplified in Ananias, should not be underestimated. Rather than expend space narrating all of Ananias's involvement here, Luke reserves some material for Paul's account of the event in 22:12–16, where Ananias's scrupulous observance of the law makes him a particularly ideal witness on behalf of Paul's calling. As Cornelius is directed to a messenger of the gospel rather than given the saving message directly, so Saul here is confirmed in his new faith through Ananias.

I. SENT TO SAUL OF TARSUS (9:10–12)

Saul's vision in 9:4–6 is matched by Ananias's in 9:10–16, which is further matched by a vision telling Saul of Ananias's arrival, narrated only indirectly in 9:12.⁴³⁰ If more skeptical ancients could explain a single person's vision psychologically, such explanations would falter with paired visions to different individuals. Doubling a vision or dream even to one individual made it emphatic (Gen 37:7, 9; 41:1–7),⁴³¹ but paired visions or dreams given to different individuals were recounted as the strongest evidence (cf. Judg 7:9–15).⁴³² Thus, for example, God speaks to both Moses and Aaron with complementary messages (Exod 4:27–28). Complementary visions appear several times in Luke's accounts: Zechariah and Mary (Luke 1:8–38), Saul and Ananias (Acts 9:1–16), and Cornelius and Peter

427. This is merely an argument from probability, since Luke often fails to conform to our expectations on such matters.

428. "Lord" appears in various cases: "nominative (9:10, 11, 17), genitive (9:1, 28, 31), accusative (9:27, 35, 42), and vocative (9:5, 10, 13)," albeit not the dative (Parsons, "Progygnasmata," 60n50, noting [60] that orators would repeat a term in different inflections to identify the subject of speech). In Paul's speech in Acts 26, the inflection criterion suggests God as the subject (p. 58).

429. Parsons, "Progygnasmata," 60, and idem, *Acts*, 130, notes "disciple" in the accusative plural in Acts 9:1, the nominative singular in 9:10, the genitive plural in 9:19, the nominative plural in 9:25, and the dative plural and nominative singular in 9:26 (also noting that the emphasis differs in Paul's later reports of the event).

430. Luke employs the term ὄραμα only in his second volume, including for Moses's revelation (Acts 7:31), Saul's conversion and call (9:10, 12), Cornelius's conversion account (10:3, 17, 19; 11:5), Paul's night visions (16:9–10; 18:9), and something that Peter wrongly assumed a night vision (12:9).

431. Cf. also Polyb. 10.4.5; Val. Max. 1.7.7; the inscription in Horsley, *Documents*, 1:29–32, §6; cf. perhaps Rev 7:1–8, 9–17; in the ancient Near East, see Walton, "Genesis," 129–30. Military operations are likewise most safely conducted, Polybius opines, with the confirmation of double, rather than merely single, signals (Polyb. 9.17.9–10, commenting on the failure of 9.17.1–8).

432. E.g., Plut. *Alex.* 24.3; Val. Max. 1.7.3; Apul. *Metam.* 11.13. Boring, Berger, and Colpe, *Commentary*, 319–20, cite Epid. inscr. 21; Parsons, *Acts*, 129, cites Dion. Hal. *Ant. rom.* 1.57.4; Jos. *Ant.* 11.327; Jos. *Asen.* 14–15; *Herm. Vis.* 3.1.2; Apul. *Metam.* 11.1–3, 6, 21–22, 26–27; Heliod. *Eth.* 3.11–12, 18; Char. *Chaer.* 1.12; for other examples, see Wikenhauser, "Doppelträume" (cited in Brawley, *Luke-Acts and Jews*, 59, noting esp. Livy 8.6.8–16; Dion. Hal. *Ant. rom.* 1.55–59). For a different but analogous sort of double oracle, see Val. Max. 1.6.3; cf. the double working in Tob 3:7, 16–17. Some modern popular literature claims such paired revelations: e.g., Yun, *Heavenly Man*, 28–30, 123, 263–64; Tari, *Breeze*, 25 (three people having the same vision simultaneously), 42–43 (the entire group having the same vision simultaneously); Sithole, *Voice*, 157–58 (multiple persons with the same revelatory dream independently); MacNutt, *Angels*, 41–42; cf. Crandall, *Raising*, 17–18; Long and McMurry, *Collapse*, 54–55; Trousdale, *Movements*, 22; a parapsychological explanation for one non-Christian example, Emmons, *Ghosts*, 46.

(10:3–16).⁴³³ In each case the individuals are brought together afterward, confirming the independent visions (Luke 1:39–56; Acts 9:17–18; 10:17–44). It is of interest, however, that this is the only one of the three paired visions in which it is Jesus appearing (though of course this would not have been possible in Luke 1:11). Luke has already prepared his audience for numerous visions in the announcement of the era of the Spirit in Acts 2:17.

One may note some parallel features in the visions, features that call attention to Luke’s desire that we parallel them. Some of the parallels (such as both being named when addressed) are simply standard in vision reports; the contrasts underline the contrast between a disciple’s obedience and Saul’s disobedience.

Ananias	Saul
“Ananias” (Acts 9:10)	“Saul, Saul” (Acts 9:4)
Expression of submission (9:10)	Accusation of wrongdoing (9:4–5)
Recognition of the Lord (9:10)	Inquiring who is this Lord (9:5)
“Rise and go” to where Saul is staying (9:11)	“Rise” and go into the city (9:6)
Jesus tells Ananias about Saul (9:11)	Jesus has told Saul about Ananias (9:12)
Ananias is sent to restore sight (9:12)	Saul’s vision has blinded him (9:8)
Jesus sends Ananias to his former persecutor (9:13–14)	Saul is restrained from persecuting Christians (9:4–5) and will himself suffer (9:16)
Ananias obeys (9:17)	Saul obeys (9:8)

(1) *Jesus Appears to Ananias (9:10–11)*

As in the vision to Saul, this vision opens by calling the recipient’s name (9:10), as also in 10:3 (cf. 9:4). We should not be surprised to encounter another Ananias, given the commonness of the name.⁴³⁴ It is the Greek form of the biblical “Hananiah” (thirty-two times in the LXX; e.g., of one of Daniel’s compatriots, Dan 1:6–11, 19; 1 Macc 2:59), and it appears frequently in early Judaism (e.g., *Jos. Ant.* 20.34–35; see comment on Acts 5:1).⁴³⁵ (Thus even those prone to overemphasize the symbolic use of names need not seek literary contrasts with the more negative characters in Luke-Acts who share this name.)

Just as God used Stephen and Philip in some ways in advance of the Twelve, God here uses an otherwise unmentioned disciple (Luke’s description of him as “a certain disciple” indicates that he did not expect his audience to know about him). Although Acts focuses on particular characters, paralleling his historical monograph with his biographic first volume, Luke is well aware that many followers of Jesus were engaged in spreading the word (Acts 8:4; 11:19) and that all should have experienced the empowerment of 2:17.⁴³⁶

Ananias’s response to the calling of his name is appropriate for traditional biblical piety: “Behold, I” (Ἴδοὺ ἐγώ) often translates the traditional biblical Hebrew phrase often rendered “Here I am.” When God calls some servants by name, they

433. See Green, “Repetition,” 293; Brawley, *Luke-Acts and Jews*, 59–60. Cf. also the parallels between the heavenly revelations from the angel of the Lord in Gen 21:17–18 and 22:11, 17–18 (cf. also Gen 16:11–12; 17:19); note the two or three sets of paired dreams in the Joseph story (37:6–10, arousing envy; 41:1–7; cf. 40:5–19).

434. Rabbi Jose b. Hanina (a Palestinian Amora) agreed that one could not tell whether a person would prove good or bad on the basis of the name (*Gen. Rab.* 71:3).

435. E.g., *CIJ* 1:244, §310 (in Greek); 2:155, §967 (Greek and Aramaic); *CPJ* 1:165–66, §24. The name was more popular in Palestine and appears in shortened form as “Annas” (see comment on Acts 4:6; Williams, “Names,” 85). Pervo, *Acts*, 237, offers good arguments for Ananias’s being in Luke’s source rather than Luke’s invention.

436. Cf. Bruce, *Commentary*, 201, who notes that this presentation challenges any “rigidly formal” notion of apostolic succession assumed to happen invariably in the same manner.

respond, “Here I am,” either with the same Greek expression in the LXX (Gen 22:1, 11)⁴³⁷ or with the same thought in the Hebrew (31:11;⁴³⁸ 46:2; Exod 3:4; cf. 4 *Ezra* 14:2).⁴³⁹ When God calls for a volunteer to serve him, Isaiah responds, “Here I am” (Isa 6:8). A closer verbal parallel in Greek is Mary’s “Behold, [I am] the Lord’s servant” in Luke 1:38.⁴⁴⁰ Whereas Abraham (who says, “Here I am,” in Gen 22:1) apparently heeds the call to sacrifice Isaac without complaint (22:2–3), Moses (who says, “Here I am,” in Exod 3:4) raises objections to his call (3:11–4:13). Ananias will not object as strenuously as had Moses, but he *will* ask an astonished question (Acts 9:13–14).

“Arise” (9:11) was common after a vision⁴⁴¹ but makes sense especially when one is being commanded to act.⁴⁴² “Arise and go” connects Ananias’s mission with Paul’s (9:6, in different words; 22:10, using the same terms); it is also familiar Lukan idiom (the terms appear together in Luke 1:39; 15:18), especially in a command of Jesus requiring faith (Luke 17:19) or a commission to go forth for a divine task (Acts 8:26–27; 10:20), as here.⁴⁴³ Where he must go and to whom is specified by the rest of Jesus’s words here.

(2) *Saul from “Tarsus” (9:11)*

Although only Luke mentions Paul’s origin in Tarsus (repeated several times, 9:11; 21:39; 22:3; cf. 9:30; 11:25),⁴⁴⁴ it is rarely disputed today.⁴⁴⁵ This is partly because Luke lacks sufficient reason to have invented this (rather than another) site. Tarsus was prominent (cf. 21:39), but why would Luke have invented an origin there rather than in some more famous city (with a strong Pauline church), such as Ephesus or Corinth, which would have also provided more literary unity to his work? (Luke tells us virtually nothing of Paul’s ministry in Tarsus except whatever we might surmise from 9:30 and 11:25.) Paul’s connection with Jerusalem is much more critical for Luke’s account.⁴⁴⁶

Further, people were named by places of origin (e.g., Mary of Magdala and Simon of Cyrene) only once they had left the places of their birth; the title does not indicate

437. Cf. 4Q225 2 II, 9; Philo *Dreams* 1.195.

438. Cf. 4Q364 frg. 4b, e.2.22.

439. This was a standard, respectful way to respond to superiors (Gen 27:1; 37:13 [cf. Philo *Worse* 5, 10]; 1 Sam 3:4–6, 8, 16; 22:12) or others (Gen 22:7 [heightening the pathos by its contrast with 22:1, 11]; 27:18; Tob 2:3; 6:11); for submission to another’s will, 1 Sam 14:43; 2 Sam 15:26; Jer 26:14; for the response to a voice that proved to be God’s, 1 Sam 3:4–8 (also 4Q160 1 4). That Luke has some such call scenes fresh in his mind is suggested by the doubling of name in Gen 22:11; 46:2; Exod 3:4; Luke reports such an event in Acts 9:4.

440. Despite parallels with or birth announcement narratives, Stock, “Berufung,” shows that Luke 1:26–38 has significant parallels with a *call* narrative; it provides a seminal call narrative for Luke-Acts.

441. E.g., Ezek 2:1; 2 *En.* 22:5; 2 *Bar.* 13:2; see comment on Acts 9:4.

442. “Arise and go” is a common phrase (e.g., 2 Kgs 8:1; Jer 18:2; Mic 2:10; *Jub.* 27:10; 31:1; *L.A.E.* 2:4; 9:3; *L.A.E. C* 6:1; 36:1; *Ahiq.* 3.8–9; Philo *Posterity* 76; *Dreams* 1.189).

443. With this wording, nowhere in the NT outside Luke-Acts (cf. Luke 5:24). The exact wording is familiar from the LXX (Haenchen, *Acts*, 323; see Gen 22:3; 24:10; 2 Sam 15:9; Tob 8:10; of these, Gen 22:3 is particularly relevant, given “Here I am” in Gen 22:2; Acts 9:10).

444. Supposed traces of Cilician dialect in Paul’s letters (Jerome *Ep.* 121; Förster, “Sprach Paulus”) do not appear sufficient by themselves to make the case.

445. Légasse, “Career,” 366; Porter, *Paul in Acts*, 104; Hengel and Schwemer, *Between Damascus and Antioch*, 150 (noting that scholars selectively skeptical of Paul’s Judean background therefore welcome Luke’s accuracy about Tarsus; also Hengel, *Pre-Christian Paul*, 2); cf. Ramsay, “Tarsian Citizenship” (cited in Fitzmyer, *Acts*, 427). The other two Jewish “Pauls” we know of were also from Asia Minor (Sardis and Aphrodisias; Bauckham, “Latin Names,” 207). The probably Palestinian tradition of Galilee (as in Murphy-O’Connor, *Paul*, 2; Jerome *On Illustrious Men* 5A; Kovacs, *Corinthians*, 1) first appears much later and does not as easily explain Paul’s facility with Diaspora life (see also Saffrey, “Juif”). Paul’s own letters confirm Luke’s picture of a Diaspora background for Paul (Huttungen, “Stoic Law,” 39).

446. Légasse, “Career,” 366.

how many years (probably not many) that Paul had spent there.⁴⁴⁷ Finally, arguing from silence on the basis of what Paul's occasional letters omit is a precarious exercise. Thus, for example, had not Paul had incidental reason to mention his Pharisaism in Phil 3:5, we would lack explicit Pauline corroboration of this feature of Luke's presentation.

Luke's audience, if attentive, might recall Luke's earlier mention of Cilicia (Acts 6:9) when it hears of Saul's background in Tarsus, at least in its second or third hearing of the work. Most educated readers of antiquity knew that Tarsus was capital of Cilicia.⁴⁴⁸ In contrast to conditions in western Cilicia, Tarsus lay in the part of Cilicia that was much more densely populated than most of the rest of Asia Minor.⁴⁴⁹ Tarsus was widely engaged in trade and hence widely known; it lay on the main trade route from west to east, since the two major eastern routes coalesced just fifty miles east of Tarsus.⁴⁵⁰

(3) *Political and Economic Life of Tarsus*

Many scholars argue that these trade connections led to a synthesis of Eastern and Western cultures.⁴⁵¹ Tarsus was the center of the cult of Sandan (or Sandas), whom the Greeks identified with Heracles but whose iconography indicates his more Eastern character.⁴⁵² (Nevertheless, the earlier claim that Sandan was a dying-and-rising deity has proved false,⁴⁵³ nor do we have explicit evidence for mystery cults in Tarsus.)⁴⁵⁴ Heracles was named as Tarsus's "founder" (Dio Chrys. *Or.* 33.47).⁴⁵⁵ Yet not only these more distinctive traditions but a variety of cults, especially Greek but also more recent imports, also flourished there. Gözlu Kule, a site in the southeast part of Tarsus, is one of the few parts of the city for which we have access to remains from the period. It has yielded many Hellenistic and Roman terra-cotta figurines, often of mythical personages or deities such as "Aphrodite, Apollo, Artemis, Athena, Dionysos, Harpokrates, Isis, and Serapis."⁴⁵⁶ These match well with an outsider's perspective concerning Tarsians' objects of worship: Apollo, Athena, Heracles, Perseus, and others.⁴⁵⁷ We also know that at some time Tarsus embraced the official imperial cult.⁴⁵⁸ Against some earlier scholars, however, few scholars today find any trace of syncretism with Tarsian cults in Paul's letters.⁴⁵⁹

Tarsus held some of the coast. The river Cydnus was navigable inland from the sea to the city (Val. Max. 3.8.ext. 6),⁴⁶⁰ and it flowed through the midst of the

447. See van Unnik, *Tarsus*, 49–50.

448. E.g., Xen. *Eph. Anthia* 2.13; Dio Cass. 47.30.1; Dio Chrys. *Or.* 33.17; 34.7; cf. Jos. *War* 7.238; Philost. *Vit. Apoll.* 1.12. See further Ramsay, *Cities of Paul*, 191–98; Eckey, *Apostelgeschichte*, 225–26; Hengel, *Pre-Christian Paul*, 1–4; for bibliography, see Fitzmyer, *Acts*, 427–28; esp. Böhlig, *Geisteskultur von Tarsos*; very helpfully, Jones, *Cities of Provinces*, 192–209. For Tarsus's prestige and status among cities of Asia, see Neyrey, "Location of Paul," 271; comment on Acts 21:39.

449. Schnabel, *Missionary*, 41, following Hild and Hellenkemper, *Kilikien*, 23, 99.

450. Charlesworth, *Trade Routes*, 79 (cf. 82–84); Finegan, *Light from Past*, 253.

451. Ramsay, *Pictures*, 348, argues that this happened here "more fully than in any other city" (probably an exaggeration, in view of stronger candidates such as Antioch).

452. Gill, "Religion," 90; Walton, "Sandas"; Müller, "Sandon" (Tarsus's patron deity, also linked with Zeus and Baal, p. 954); on the indigenous deity Tarku, see Chilton, *Rabbi Paul*, 9–12. The oracular shrine of Amphiaraus was also in Cilicia, though not in Tarsus (Philost. *Hrk.* 17.1).

453. Hengel and Schwemer, *Between Damascus and Antioch*, 167.

454. *Ibid.*, 168.

455. When Tarsus supposedly regards Apollonius as a "second founder" (Philost. *Vit. Apoll.* 6.34), Philostratus probably is comparing Apollonius with Heracles.

456. Finegan, *Apostles*, 55. The figurines also include animals and people, and they were often realistic.

457. Dio Chrys. *Or.* 33.45, probably less than a half century after Paul's death. For Perseus as a possible founder, see Amm. Marc. 14.8.3, in Müller, "Sandon," 954.

458. Klauck, *Context*, 323–24 (citing Price, *Rituals*, catalogue nos. 154–56).

459. Hengel, *Pre-Christian Paul*, 4.

460. See also Jones, *Chrysostom*, 71 (citing Dio Chrys. *Or.* 33.2, 17, 24, 29).

city.⁴⁶¹ Philostratus, portraying a youth in first-century Tarsus, presents Tarsians as always sitting along the Cydnus.⁴⁶² Tarsus was so active in trade that it maintained agent offices in other major commercial cities to act as local consulates for its citizens there.⁴⁶³ Such trade connections naturally provided the city great wealth (a situation that may have affected the background of Paul's family before their immigration to Jerusalem). A classicist notes the praise of Tarsus's prosperity in Dio Chrysostom, who was writing in the late first century:

Tarsus of Dio's day was highly prosperous (*Or.* 33.2), the largest city of Cilicia (*Or.* 34.7), full of splendid buildings (*Or.* 33.18). It . . . lay in the middle of a very fertile plain (*Or.* 33.17, 24, 28). Its extensive territory stretched north to the foothills of the Taurus (*Or.* 33.2) and south to the sea (*Or.* 34.8), though in Dio's time some of this coastal area was claimed by another city, Mallos (*Or.* 34.45–46). Among the main products of Tarsus' territory flax was particularly important, and the city contained a large number of linenworkers (*Or.* 34.21).⁴⁶⁴

Some think the linen-working trade there a background for Paul's tentmaking skills (but see comment on Acts 18:3). The city was a "great city" (Dio Chrys. *Or.* 33.17), the greatest of Cilicia, a "metropolis" from the start and bearing Augustus's favor (34.7).⁴⁶⁵

Archaeological work in Tarsus has been relatively sparse, since modern Tarsus overlies (by 6 m., or 20 ft.) most of its ancient counterpart,⁴⁶⁶ but what excavation has been done does tend to confirm that it was "no insignificant city" (Acts 21:39). The city had three major gate complexes, the Mountain, Valley, and Sea Gates.⁴⁶⁷ Both the massive temple and the late Roman colonnaded street with basalt paving and canals to drain rainwater⁴⁶⁸ date from after Paul's era, but they illustrate an important city. Certainly Tarsus was among the Asian cities competing in public-works projects by the early second century (Dio Chrys. *Or.* 40.11).⁴⁶⁹

The city had long been hellenized. Some Greeks had lived in Tarsus for six centuries before Alexander, but after he conquered the Cilician Gates in 312, the Greek presence intensified.⁴⁷⁰ Coins attest that hellenization began in the fourth century

461. Quint. Curt. 3.5.1. Tarsians apparently boasted about this river flowing through their city (Dio Chrys. *Or.* 33.17). The Cydnus was especially noted for the clearness of its water and lack of torrents (Quint. Curt. 3.4.8); its reputation for cold (3.4.9; 3.5.3; Strabo 14.5.12) might apply to any water in the vicinity (Rolfe in *Quintus Curtius*, LCL, 1:90 n. b).

462. Philost. *Vit. Apoll.* 1.7 (the youth, Apollonius, left for a smaller town, despising urban luxury, 1.7; later, 6.34, the Tarsians liked him). Although Philostratus's portrait of first-century Tarsus probably derives from his own early third-century setting, this is a local trait apt to persist over time. The Cydnus may have been especially appealing in summers, said to be quite hot in this part of Cilicia (Quint. Curt. 3.5.1); it was said to have so tempted Alexander (3.5.2).

463. Casson, *Travel*, 129.

464. Jones, *Chrysostom*, 71. For its fertility, see also Strabo 14.5.1.

465. Dio's favorable claims may be mitigated by his admission in *Or.* 34.38 that he has acted the part of a demagogue, but the admission itself is probably rhetorical exaggeration. For the "metropolis," see also *Jos. Ant.* 1.127.

466. Finegan, *Apostles*, 54; Fant and Reddish, *Sites*, 325.

467. Finegan, *Apostles*, 54, noting that part of the Sea Gate remains. The supposed tomb of Sardanapallus probably belongs instead to "a Greco-Roman temple"; a deep well, where local tradition surmises that Paul drank, remains (54).

468. See Mitchell, "Archaeology," 190. For a summary of 1990s archaeological publications on Cilicia, see 188–91.

469. For the emphasis on public works in this period, see, e.g., Pliny *Ep.* 10.37.1; 10.116.1. Royal patrons had long counted public works among their achievements (e.g., 1 Kgs 22:39; 2 Kgs 20:20; Suet. *Tib.* 47; *Calig.* 21; note especially Herod the Great in McRay, *Archaeology*, 95, 129–49).

470. Magness-Gardiner, "Cilicia," 10. The Persians sought to burn Tarsus to keep its resources from falling into Alexander's hands (Quint. Curt. 3.4.14), and so Alexander, checking their intentions, entered Tarsus as its deliverer (3.4.15).

B.C.E., and Antiochus IV accelerated this process.⁴⁷¹ In time, Tarsus revised its history to claim mythical Greek heroes as its founders, overlaying older Anatolian traditions with Greek names.⁴⁷²

For more than a century Tarsus had held close ties with Rome (though not always to Rome's satisfaction). Tarsus was about ten miles inland, probably, in part, originally to avoid the pirates who plagued the coast.⁴⁷³ Pompey's defeat of Cilician pirates in 67 B.C.E. encouraged Roman interests, and Cilicia became a Roman province in 64 B.C.E.⁴⁷⁴ Cicero had governed Cilicia (Cic. *Fam.* 13.67.1, 51 B.C.E.) and hence mentioned Tarsus, where he lived, frequently in his writings;⁴⁷⁵ he sought to keep peace with neighboring peoples less friendly to Rome than Cilicia was (Plut. *Cic.* 36.1–2). Divided into factions, Tarsus proved less loyal to Cassius in the Roman civil war of 43 B.C.E. than he had hoped (Cic. *Fam.* 12.13.4); he enslaved some free people to raise money, but the suicides of many of these forced him to relent (Appian *Bell. civ.* 4.8.64).⁴⁷⁶ Augustus, however, found the inhabitants loyal to his cause and rewarded them by confirming for them the status of a free city originally conferred on them by Marc Antony (Dio Chrys. *Or.* 34.7–8, 39).⁴⁷⁷ This status granted local autonomy and sometimes could exempt a city from Roman taxation (Cic. *Verr.* 2.3.6.13), although it is not clear that it always did so.⁴⁷⁸ A number of important Tarsians who supported victorious factions in Rome probably also achieved Roman citizenship as a reward for their allegiance.⁴⁷⁹

Cilicians, however, acquired a reputation for viciousness (Plut. *Caes.* 2.1). Some of this reputation may have stemmed from prejudice toward western Cilicia (Cilicia Trachea), which was mountainous, poor, and quite unlike fertile Tarsus; whatever the other particulars, however, the province had a reputation for its pirates (though these were suppressed in the first century B.C.E.).⁴⁸⁰ But the bad reputation extended to Tarsus as well. Tarsus shared a reputation for immorality with other major Eastern cities;⁴⁸¹ Dio Chrysostom condemns its moral decadence (*Or.* 33–34 passim, esp. 34), and so, reportedly, did Apollonius of Tyana (Philost. *Vit. Apoll.* 6.34). Moving from

471. See Fitzmyer, *Acts*, 427. The coins appear early; Alexander established the mint at Tarsus (Magness-Gardiner, "Cilicia," 10).

472. Jones, *Chrysostom*, 72 (citing Dio Chrys. *Or.* 33.1, 45, 47; 34.48).

473. Blaiklock, *Cities*, 19. For Tarsus being "inland," see, e.g., Pliny E. *N.H.* 5.22.91–92.

474. On these pirates, see Casson, *Mariners*, 177–83; on Cilicia, see Bing, "Cilicia," and sources cited there; for Pompey's defeat of the pirates, esp. on the Cilician coast, see, e.g., Vell. Paterc. 2.32.4; more fully, Tröster, "Hegemony." Caesar's tale of his conflict with Cilician pirates advertised himself (see Osgood, "Caesar"), probably ultimately useful in propaganda against Pompey. For a brief history of Cilicia, see Schnabel, *Missionary*, 41, citing at greater length Mutařian, *La Cilicie*.

475. E.g., Cic. *Fam.* 2.17.1; 3.8.6 (assizes there), 10; 3.11.1 (receiving letters from there).

476. Could Paul's family have been enslaved here rather than taken by Pompey from Jerusalem?

477. For Tarsus as a "free" city, see also Pliny E. *N.H.* 5.22.92. See further Jones, *Chrysostom*, 72; Ramsay, *Cities of Paul*, 197; cf. also Dio Cass. 47.31; Appian *Bell. civ.* 5.7; Ferguson, *Backgrounds*, 32.

478. See Spawforth, "Free Cities."

479. Ramsay, *Cities of Paul*, 198 (who suggests that Roman Tarsians of Paul's era would bear Roman names of their patrons: Gnaeus Pompeius, Gaius Julius, or Marcus Antonius); Fitzmyer, *Acts*, 427 (citing Dio Chrys. *Or.* 34.23). It is doubtful that many Jews would have been included in this franchise.

480. Harrill, "Asia Minor," 133; Souza, "Pirates"; see claims in *Res Gestae* 5.25; Vell. Paterc. 2.126.3 (for pirates surrounding Sextus Pompey, see Vell. Paterc. 2.73.3; for Julius Caesar's earlier encounter with pirates near Rhodes, see Suet. *Jul.* 4; Plut. *Caesar* 1.4; 2.4). On the "wild" part of Cilicia's population, see, e.g., Tac. *Ann.* 12.55 (during Claudius's reign). Cilicia's client kings were forced to choose sides in the conflict under Tiberius, 2.78, 80. Apparently a few pirates persisted in the Mediterranean later; see Weeber, "Travels," 870; cf. hypothetical ones in Max. Tyre *Or.* 5.7; Quint. *Decl.* 257 intro; 342 intro; 388 intro; Lucian *Dial. D.* 450 (24/30, Minos and Sostratus 1); Alciphron *Fish.* 8 (Eucolymbus to Glaucē), 1.8; in later novels, Ach. Tat. 5.18.4; Xen. Eph. *Anthia* 3.8; Heliod. *Eth.* 1.28; *Apoll. K. Tyre* 32, 44.

481. Jones, *Chrysostom*, 72–73.

hints about their gait (Dio Chrys. *Or.* 33.52), Dio charged that the sound particular to Tarsians revealed that they were androgynes and hence to be viewed as effeminate or worse (33.54–63).

Dio (not known for sparing other cities either) accuses Tarsians of riotous insolence, reckless folly, “scorn for all that is honourable,” and their treatment of nothing as shameful (Dio Chrys. *Or.* 33.50).⁴⁸² The rival Cilician towns just east of Tarsus, Aegae and Adana, he claims, rightly reviled it (33.51); if all their neighbors detested them, perhaps it was because Tarsus really *did* abuse its prominence (34.10, 14, 27).⁴⁸³ He charged that Tarsians were divided among themselves, needing concord (34.17–19); he doubted (hyperbolically) that one could find even two Tarsians who shared a common mind (34.20). If there is anything to Dio’s report of such division, it might warn us against inferring too much about Paul from his Tarsian background!

(4) *Tarsus and Education*

Paul’s Gentile context in Tarsus, at least after his conversion and resettlement there (Acts 9:30), should have included an abundance of exposure to public philosophy and rhetoric, which also may have influenced local synagogue teaching.⁴⁸⁴ Strabo contends that Tarsus was the greatest philosophic center of his day (Strabo 14.5.13): “The people at Tarsus have devoted themselves so eagerly, not only to philosophy, but also to the whole round of education in general, that they have surpassed Athens, Alexandria, or any other place that can be named where there have been schools and lectures of philosophers.”⁴⁸⁵ He further notes that in contrast to most university cities, it is the natives, and not foreigners drawn by its reputation, who proved zealous for learning; but many of its natives went abroad to study.⁴⁸⁶ Many famous philosophers, including many Stoics,⁴⁸⁷ were originally from Tarsus (Strabo 14.5.14–15).⁴⁸⁸ Augustus’s teacher Athenodorus, a Stoic, was from there, and Augustus entrusted him with administrative reforms there (e.g., Dio Chrys. *Or.* 33.48; Lucian *Oct.* 21).⁴⁸⁹

In addition to philosophers, the city boasted a famous Greek grammarian of the first century B.C.E.⁴⁹⁰ It also had “all kinds of schools of rhetoric” (Strabo 14.5.13). In a much later period, it remained a major center for sophists along with Rome and Antioch (Philost. *Vit. soph.* 2.5.571, 577).⁴⁹¹ It was among the small minority of communities (along with Athens, Antioch on the Orontes, Alexandria, Pergamum, and Cos) to have a library, already in the Hellenistic period (330–133 B.C.E.).⁴⁹² We may

482. LCL, 3:321 (Cohoon and Crosby). Dio mastered rhetorical *parrēsia*.

483. Dio admitted that some accusations were false (*Or.* 34.43) but pointed out that it was excessive pride to require other Cilicians to come to Tarsus for litigation and sacrifice (34.47). The statement about sacrifice is likely hyperbolic; cf. the temple of Asclepius in Aegae in Philost. *Vit. Apoll.* 1.7.

484. Hengel and Schwemer, *Between Damascus and Antioch*, 169 (contrasting the unlikely proposed religious backgrounds, 167–68).

485. LCL, 6:347; this passage is often noted (Nock, *Paul*, 22; Porter, “Paul and Letters,” 534; Culpepper, *School*, 141; Adinolfi, “Tarso”; Conzelmann, *Acts*, 75). Some add Dio Chrys. *Or.* 33.48; 44.3. Ramsay, *Cities of Paul*, 231, doubts that Tarsus was in fact one of the greatest, though it was important.

486. Ramsay thinks that Paul was one of the young scholars who went to study abroad (*Discovery*, 134); I have argued, by contrast, that the entire family probably came (Acts 23:6, 16).

487. E.g., the Stoics Heraclides and Antipater (Diog. Laert. 7.1.120), and possibly Chrysippus himself (7.7.179). Culpepper, *School*, 141, adds Barea Soranus (citing *Juv. Sat.* 3.116–17).

488. Culpepper, *School*, 141, adds that Apollonius of Tyana studied near there (Philost. *Vit. Apoll.* 1.7).

489. See Ramsay, *Cities of Paul*, 217; Bruce, *Acts*, 208; Jones, *Chrysostom*, 72. Further on philosophy in Tarsus, see Chilton, *Rabbi Paul*, 22–24; cf. Glover, *Paul*, 5–23 *passim* (sometimes simply on philosophy in general).

490. Montanari, “Artemidorus.”

491. Cf. also Philagrus “of Cilicia” (Philost. *Vit. soph.* 2.8.578).

492. Christes, “Education/Culture,” 827–28.

also infer the significant academic strength of Tarsus's citizen body from an oration that Dio Chrysostom thought suitable to give there: his *First Tarsic Discourse* (*Or.* 33) is full of classical quotations, presupposing his audience's familiarity with "Greek poetry and myth and history" alongside the older indigenous backgrounds.⁴⁹³

Such training (or more likely its Jewish equivalent) presumably would have affected Paul only at the most primary level, since his family probably moved to Jerusalem when he was young (Acts 22:3; cf. 23:16),⁴⁹⁴ but it might also suggest that he could have grown up in a very educated family, which often affects learning no less than schooling.⁴⁹⁵ (Even had the family not moved, Tarsians, more often than residents of other cities, tended to receive their advanced education abroad, and we would expect this practice especially for zealous Jews seeking Jewish learning.)⁴⁹⁶ Such academic excellence would also affect the public reputation of Tarsus, and hence what both Luke's audience and characters in the narrative world would think of Paul's training (cf. 18:4, on Apollos hailing from Alexandria; on Tarsus's honor, see also comment on Acts 21:39).

Because Cilicia adjoined Syria, it is not surprising that many Jewish people lived there, as ancient sources confirm (Philo *Embassy* 281; *CIJ* 2:39–48, §§782–95).⁴⁹⁷ (Because Tarsus had long been divided into civic "tribes," some scholars suggest that some Tarsians may have treated the Jews as such an entity,⁴⁹⁸ though this is questionable, since they were not considered indigenes.) Cilician imports to Judea probably began with Jewish farmers in the region.⁴⁹⁹ As noted at Acts 6:9, Cilician Jews maintained contacts with Jerusalem (see *CIJ* 2:137, §931).⁵⁰⁰ In the first century the Cilician king even converted to Judaism temporarily (for the brief period that his marriage to Berenice lasted, on whom see comment on Acts 25:13; *Jos. Ant.* 20.145–46). Cilicians tended to be less hostile toward Jews than Syrians were (*Jos. War* 1.88). By some point before the time of Constantine, inscriptions indicate that coastal Cilician Jews were fully integrated into the rest of Cilician society;⁵⁰¹ given the fragmentary state of our information, this verdict probably also represents the status of Tarsian Jews in an earlier period.⁵⁰² Some Jewish interpreters conflated Tarsus with the western port to which Jonah had sought to flee (*Jos. Ant.* 9.208), but Luke makes nothing of that potentially fertile connection.

493. So the translator, Cohoon, LCL, 3:335.

494. Van Unnik, *Tarsus*, 49, doubts that he was more than ten when he immigrated. Compared with those of Jerusalem, Tarsus's distinctive traits would exert little influence on Paul (Philip, *Pneumatology*, 127). Unwilling to depend on the Tarsus connection, Shea, "Educating," insists that one must infer Paul's education only from what he writes.

495. Thus cf., e.g., ancient comments about securing educated nursemaids (see comment on Acts 7:21). The education there had been available only to the higher class, but this fits Luke's portrait of Paul (Ramsay, *Cities of Paul*, 227–28).

496. Cf. Aune, *Dictionary of Rhetoric*, 342 (citing Strabo 4[14].5.13); see further comment at Acts 22:3.

497. See further Ramsay, *Cities of Paul*, 169–73 (citing third-century accounts); Stern, "Diaspora," 147–48 (citing also *Epiph. Her.* 30.11.2 from a later period; inscriptions from the Augustan period of a sect influenced by Judaism; and evidence from various towns); Chilton, *Rabbi Paul*, 12–14; and esp. Hengel and Schwemer, *Between Damascus and Antioch*, 158–67. On the settlement there in 171 B.C.E., see Ramsay, *Cities of Paul*, 180–86. Jewish Tarsian citizens were later viewed as allies of the Judeans who revolted in 66 C.E. (*Philost. Vit. Apoll.* 6.34; Ramsay, *Cities of Paul*, 178–79). Some cite 2 Macc 4:30–31 for the Jewish settlement there, although it does not specify this.

498. Chilton, *Rabbi Paul*, 8. On "tribes" in cities, see comment on Acts 26:7; but would resident aliens be so enrolled?

499. Applebaum, "Social Status," 716 (citing *m. Ma'as.* 5:8; *Neg.* 6:1; *t. Šeb.* 5:2).

500. In the Amoraic period, some Palestinian rabbis discoursed in Tarsus (*Pesiq. Rab Kah.* 5:17).

501. Williams, "Jews of Corycus."

502. Further on Tarsus, see, e.g., Glover, *Paul*, 5–23; Blaiklock, *Cities*, 18–21; esp. Fant and Reddish, *Sites*, 322–28; Chilton, *Rabbi Paul*, 3–24; Gasque, "Tarsus."

(5) *Straight Street (9:11)*

Most streets in pre-Hellenistic cities would be winding, narrow, and easy to become lost in; such cities grew haphazardly, in contrast to the ideal of Hellenistic urban planning, where streets crossed the straight main street at right angles.⁵⁰³ Though Damascus was one of the empire’s oldest cities, its construction on relatively even ground facilitated its transformation to the newer standards of Greek and Roman design. The spacing of streets reflects this pattern: east-west streets lie more than “300 ft (100 m) apart,” with north-south streets “about 150 ft (45 m) apart.”⁵⁰⁴

Many argue that “Straight Street” was the large east-west street,⁵⁰⁵ then colonnaded and with large porches on each end. This street remains today in the eastern section of Damascus’s Old City and is called *Derb el-Mustaqim*.⁵⁰⁶ Finegan surveys the remains:⁵⁰⁷

The main east-west street, the Roman *decumanus maximus* and the “street called Straight” of Acts 9:11, is plainly recognizable in the present Midhat pasha and Bab Sharqi streets, which run directly through the Inner city, parallel to the Barada River, for a distance of nearly 1 mi (1,600 m). In Roman times this street was 50 ft (15 m) wide and bordered with colonnades, consisting of two rows of Corinthian columns on either side.

The eastern city gate (the Bab Sharqi, the Sun Gate or East Gate), which opens to the street, had three arches. Of the seven Roman gates, only this one, probably dating to the second century C.E. in its current form, remains.⁵⁰⁸ It had a large central entrance flanked by two smaller ones; the central entrance opened onto the street, 13.68 meters wide, and the other entrances led to sidewalks beside the street.⁵⁰⁹ Two arches to the west suggest a minor directional shift; if this was Straight Street, it was not really straight.⁵¹⁰ One of the arches, about 2,000 feet (600 m.) west of the East Gate and roughly halfway along the street, probably commemorated Pompey’s conquest and hence was standing in Paul’s day.⁵¹¹

The house where, traditionally, Paul stayed is close to the street’s western end.⁵¹² There were no signposts designating streets, but they had names and locals knew them; once one found the correct street, one asked for a particular house by the name of its owner.⁵¹³ It is also possible that Luke or his source abbreviates the directions (since they were no longer relevant many years later). (Against the traditional identification of Straight Street, in late Greek *ῥύμη* was often a narrow street or alley; for a major

503. Jeffers, *World*, 51. Cary and Haarhoff, *Life*, 104, say that planners designed most streets to be straight and narrow. Roman influence also spread paved streets, projects to which patrons often donated (Owens, *City*, 157).

504. Finegan, *Apostles*, 61.

505. On main streets, see, e.g., Scott, *Customs*, 240; Owens, *City*, 113, 131; Watson, “Cities,” 214; Kraybill, *Cult and Commerce*, 211; Pliny *Ep.* 10.98.1.

506. Lake and Cadbury, *Commentary*, 102; Fitzmyer, *Acts*, 427 (whose transliteration I follow); on the same street, Abbott, *Acts*, 113; McRay, *Archaeology*, 233–34.

507. Finegan, *Apostles*, 61, noting that archaeologists have uncovered some street columns while others appear “in the bazaar shops” alongside the street, which is now just a quarter of its Roman width.

508. *Ibid.*

509. Pitard, “Damascus,” 104 (noting that the gate, though refurbished in the early third century C.E., probably dates to the early first century C.E.).

510. *Ibid.*

511. Finegan, *Apostles*, 61.

512. Lake and Cadbury, *Commentary*, 102.

513. See Ling, “Stranger in Town.” A barbershop, hub of local gossip, was a good place to discover where people lived (*Lysias Or.* 23.3, §166).

street, we might expect πλατεῖα.⁵¹⁴ But the distinction was not pervasive enough to count securely against the tradition. Would an alley monopolize such a prestigious title?)⁵¹⁵ Traditions such as the site of the house may or may not have been preserved by the early Christian community there, but a street's name might well persist.

Travelers normally preferred accepting hospitality, where it was available, to staying at inns; this was especially true of Jewish travelers (see comment on Acts 16:15).⁵¹⁶ Here, as regularly in Acts, a host is named, perhaps suggesting the virtuous nature of that activity (cf. Acts 9:43; 10:6; 11:3; 12:12; 16:14–15, 25–34, 40; 17:5–9; 18:1–4, 7; 21:8–14, 16; 27:1–3; 28:1–10).⁵¹⁷

Tradition might support the idea that Ananias, like Judas, lived near “Straight Street,” shortening the distance he needed to travel (for whatever this might be worth). The traditional site of Ananias's house is north of the street's eastern end (traditionally, Paul stayed on the western end). We would expect both homes in mainly Jewish areas, but below this site is a temple dedicated to Jupiter-Hadad, possibly (from the lettering) from the second century C.E. The contours of subsequent Jewish settlement must have changed, however, after the massacres of thousands of Jews a generation after Paul's conversion (see Jos. *War* 2.561; 7.368; comment on Acts 9:2). Some scholars suggest that pagans may have dedicated this temple over a Christian holy site.⁵¹⁸ Yet the accuracy of this tradition remains uncertain; Christians often “recouped” earlier pagan holy sites (hence the later church on the site, though this could stem from the Ananias tradition).

Why does Luke specify the particular street in this case? Elsewhere, revelations might include sufficient directions for travelers to find their way (cf. Acts 10:6)—“Judas” was, after all, a common name and hence could hardly specify the house's location in Damascus by itself.⁵¹⁹ But the street's name in this case may have also supplied Luke a fortuitous opportunity for a literary connection: those who twisted God's “straight” road (13:10) must be blinded (13:11), but the kingdom mission of true prophets entailed straightening that road again (Luke 3:4–5). Saul has turned to the Lord's right path, to “the Way” (Acts 9:2).⁵²⁰

(6) Ananias's Mission (9:12)

Prayer (9:11) is connected with a vision here (9:12), as often in Luke-Acts (cf. Luke 1:10; 3:21; 9:28; Acts 10:2–4, 9–10, 30; 22:7; cf. Luke 22:44; Acts 10:3–4).⁵²¹ The vision sounds like instructions subsequent to the Damascus road encounter

514. See BDAG; for πλατεῖα, see, e.g., Esth 6:9, 11 LXX; Tob 13:17. The two appear together in summary fashion in Luke 14:21; Luke uses ῥύμην in Acts 12:10 for what was probably historically a significant route to the Upper City, but he may not have known this. Rohrbaugh, “Pre-industrial City,” 144, notes that poor and nonelite people lived along the narrower lanes, which were often “little more than open sewers, so narrow that donkeys could not pass along them.” Goodman, *State*, 30, also notes that groups of homes often were on alleys off main streets.

515. Moulton and Milligan, *Vocabulary*, 564–65, include as definitions “street” (e.g., “Royal Street,” BGU 4.1037.16, from 47 C.E.; “public street” from P.Ryl. 2.156.4, first century C.E.) as well as “lane” (e.g., “blind alley,” P.Oxy. 1.99.9, from 55 C.E.); a distinct diminutive, apparently retaining diminutive force, is also attested (P.Meyer 20 verso 5, from the early third century C.E.). LSJ also allows both senses.

516. See, e.g., Hock, *Social Context*, 29, 79nn28–29; Koenig, *Hospitality*, passim.

517. Koenig, *Hospitality*, 87.

518. Finegan, *Apostles*, 62. Against early Christian tradition (see comment on Acts 9:24–25), one would normally presume that Ananias lived in the Jewish rather than the Nabatean quarter. (The exception might be if he too faced danger among his people; yet if he maintained Jewish purity practices, he would need to secure food in the Jewish quarter or have friends to secure it for him.)

519. See Williams, “Names,” 89–90; further comment on Acts 1:13.

520. In Acts 9:11, in contrast to the other texts, Luke uses ῥύμην, following his source for the nature of the street, but his mention of its name is nevertheless suggestive.

521. Lake and Cadbury, *Commentary*, 103.

(though that, too, was a “vision,” Acts 26:19), none of the accounts of which report these words; Jesus has promised subsequent instructions (9:6; 22:10). For the laying on of hands here, see comment on Acts 9:17.

The restoration of Saul’s sight (9:12, 17) is a major part of Ananias’s commission here. In addition to Saul needing his physical sight back to fulfill his own mission, the healing of his sight provides a further confirmation of divine activity surrounding Saul’s calling. It also may symbolize his spiritual transformation; Jesus blinded the one who thought he saw, so he might see anew (see comment on Acts 9:8; cf. John 9:39–41).

II. RESOLVING ANANIAS’S CONCERN (9:13–16)

Astonished at the commission, Ananias offers the warning he has already received about Saul’s commission against Jesus’s followers (Acts 9:13–14). In Luke’s account, Jesus responds not with a report of Paul’s conversion but with a more detailed articulation of Saul’s calling (9:15–16).

(1) *Ananias’s Concern (9:13–14)*

Reports traveled quickly, both by letters⁵²² and by word of mouth;⁵²³ apparently Saul’s mission was well known in Jerusalem, and travelers, both Christian and otherwise, had brought news to Damascus ahead of him (cf. 9:21). Because Ananias knew of Saul only indirectly, some scholars doubt that he was originally one of the fugitives from Jerusalem (Acts 8:1–4; cf. Gal 1:23).⁵²⁴ This doubt may be correct, but it is also possible that he left before Saul became widely known as a major leader of the persecution (cf. Acts 7:58). Not everyone who fled initially would know the names of all their persecutors, and certainly most would not recognize Saul by sight if they had not been arrested by him (Gal 1:22).⁵²⁵

In contrast to Paul’s apparently immediate compliance (Acts 9:8),⁵²⁶ Ananias has a question.⁵²⁷ Ananias is not unwilling to obey (he does in fact obey, 9:17), but he is interested in clarification (just like Paul in 22:19–20, who by contrast must be *dis-suaded* from danger). God often sent prophets into situations that could be dangerous; for example, God sent Elijah to Ahab after some three years of successful hiding (1 Kgs 18:1), and Elijah obeyed (18:2). But many who heard God’s call could raise objections (e.g., Exod 4:10; Acts 10:14) or at least questions⁵²⁸—sometimes even

522. E.g., Cic. *Fam.* 2.4.1; 14.1.6; 15.18.1; *Att.* 1.1, 3; 2.11; 6.3, last ¶; 9.15; 10.4, end; 12.12, end; *Quint. fratr.* 2.12.5; Pliny *Ep.* 2.11.24; 2.12.7; 4.11.15; 5.5.1; 5.17.1, 6.

523. E.g., P.Oxy. 32; Eurip. *El.* 361–62; Pindar *Nem.* 5.2–3; Cic. *Fam.* 1.6.1; 3.1.1; 9.2.1; 12.30.3; Diogenes *Ep.* 20; Apul *Metam.* 1.26; *Apoll. K. Tyre* 8; Ezek 24:26; Jos. *Ant.* 18.104; *y. Hag.* 2:1, §10; 1 Cor 1:11; Col 4:7. On the rapid spread of rumors, see comment on Acts 19:10.

524. Bruce, *Commentary*, 199.

525. Cf. Campbell, *Deliverance*, 146–47: “conceivable in an age when figures were known largely by reputation and not visually,” especially if Saul’s Judean persecution was limited to Jerusalem. (My wife notes a man who infected women with HIV in her hometown in Congo; those who did not have a television did not know what he looked like.) Hengel, *Pre-Christian Paul*, 24, notes that he knows very few of the sixty thousand residents of Tübingen (roughly ancient Jerusalem’s population) and knows “only a tiny proportion of the teaching staff of the university ‘by sight.’” After Paul’s conversion, the account of it probably became widely reported (Gal 1:23); conversions of celebrities or others respected by a dominant and/or hostile culture provide a minority culture with apologetic value (even if they are also often doubted initially, Acts 9:26).

526. Paul does ask a question (Acts 9:5) but does not question the orders received in 9:6.

527. Marguerat, *Historian*, 195–96, suggests that although Luke’s tradition may employ the overthrown-enemy motif, Luke’s own purpose is more complex: Jesus does triumph over the enemy, persuading him at once, but takes longer to persuade Ananias (here) and other disciples in Acts 9:26–27! For resistance in both 9:13–14 and 10:14, see also Park, “Barriers” (further applying the pattern to cross-cultural settings).

528. Le Cornu, *Acts*, 498, compares those reluctant to preach to audiences that they expected to be hostile (Exod 3:11; 4:10–11; 6:12; Jer 1:6–7; Jonah 1:1–2). For dialogues in dreams and visions, see Parsons, *Acts*, 312 (citing, e.g., Gen 20:3–8; 31:10–13; 46:2–6; Hom. *Il.* 23.64–119; *Od.* 4.786–841; 20.1–55).

after saying, “Here am I” (Exod 3:4), as Ananias had (Acts 9:10). What the Lord tells Ananias differs starkly from the reports he has heard, and so some assurance may be in order (cf. Judg 6:36–40; 7:10–14). The structure of the dialogue is thus consonant with call and commissioning narratives in the earlier Scriptures.

“The saints” may have applied especially as a title for believers in Jerusalem (Rom 15:25–26, 31; 1 Cor 16:1; 2 Cor 8:4), as here (cf. Acts 26:10).⁵²⁹ But Luke, like other early Christian writers, also uses it more generally (Acts 9:32, 41; cf. Luke 9:26), for those set apart in Christ (Acts 20:32; 26:18), and here for those who call on Jesus’s name (as in 2:21; cf. comment there). Jewish tradition recognized that God had sanctified Israel—that is, set Israel apart for himself;⁵³⁰ some early texts associate this setting apart with God’s commandments.⁵³¹ On “holy ones,” see further the comment on Acts 20:32 or 26:18.

(2) *Vessel to the Nations* (9:15)

Responding directly to Ananias’s concern, Jesus explains that he is sending Ananias to Saul not because of Saul’s former commission from the high priests (9:14) but with a new one from himself (9:15). Instead of inflicting suffering on those who bear Christ’s name (9:14), Saul himself will now suffer for this name (9:16).⁵³² The Lord has the right to choose the instruments he wishes, and Ananias is not reported to offer further objections after hearing the Lord’s explanation (9:17).

The term σκευός applies to any sort of instrument, but since this one “will carry” (βαστάσαι) something, perhaps “vessel” is the likeliest translation.⁵³³ Paul is a “vessel,”⁵³⁴ a term that Greeks sometimes applied metaphorically to the body (1 Thess 4:4)⁵³⁵ but that here applies to a utensil used by God (cf. Rom 9:21–23; 2 Cor 4:7; 2 Tim 2:20–21).⁵³⁶ Because the term appears only five times in Acts and three of the others involve Peter’s vision soon afterward (Acts 10:11, 16; 11:5), it is possible that Paul’s status as a “vessel” is connected with the bringing in of Gentiles; this suggestion is difficult to prove, however, since other echoes of his calling are lacking in Peter’s vision. “Vessel of choice” is a Semitism for a vessel that God has chosen; like the vessel image itself, it emphasizes God’s sovereignty in choosing and working through this person.⁵³⁷ In keeping with both a Lukan theme and his Pauline apologetic, one could not complain that the Lord chose a “sinner” (cf., e.g., Luke 5:8).

529. Witherington, *Acts*, 318; especially Trebilco, “Self-Designations,” 45–49.

530. E.g., *Jub.* 22:29; 30:8; 1QS VIII, 21; IX, 6; 1QM XIV, 12; *Wis* 18:9; 3 Macc 6:3; *Exod. Rab.* 15:24; cf. 1QM IX, 8–10; 1 Cor 1:2; 1 *Clem.* 1.1.

531. E.g., *Jub.* 2:19, 21; 15:27. Among later texts, see, e.g., *b. Ber.* 33b. Jewish blessings regularly praised God for sanctifying his people through the commandments that he had given them; these blessings usually included a reaffirmation of the particular commandment that the person was fulfilling (e.g., *t. Ber.* 5:22; 6:9, 10, 13, 14; *b. Ber.* 51a, bar.; 60b; *Pesah.* 7b; *Šabb.* 137b; *y. Sukkah* 3:4, §3; *Pesiq. Rab.* 3:2).

532. Ray, *Irony*, 64, finds here an example of narrative irony.

533. Johnson, *Acts*, 165. Pots could be inscribed, but the verb may suggest the container’s *contents*.

534. The common suggestion (Conzelmann, *Acts*, 72; Hanson, *Acts*, 115; Johnson, *Acts*, 165) of a background in Jer 50:25 (27:25 LXX) works much better for Rom 9:22 (instruments of wrath) than here. Augustine *Sermon* 332.2–4 (Kovacs, *Corinthians*, 4) compares Rom 9:22 with the present text. Some also compare the later *Ps.-Clem. Rec.* 3.49.

535. E.g., 4 *Ezra* 7:88; *Test. Naph.* 2:2; apparently Marc. Aur. 3.3.2; 12.2 (perhaps 8.27). A wife may be compared to a vessel in *y. Ketub.* 1:1, §4; perhaps 4Q416 2 II, 21 (Strugnell, “Wives”; but see Kister, “Parallel”); *Pesiq. Rab Kah.* 11:24; *y. Šabb.* 10:5; a couple in Plut. *Bride* 3, *Mor.* 138EF.

536. For people as instruments of others, Fitzmyer, *Acts*, 428, cites also Polyb. frg. 13.5.7; 15.25.1. Cf. also individuals in God’s hands (2 *Clem.* 8.2), similar to Jeremiah’s pot; the body (in a dualistic sense) in *Barn.* 7.3; 11.9; 21.8; *Herm.* 33.2; people as potential utensils for God in *Herm.* 43.13; empty idols in *Diogn.* 2.2–4; other comparisons with vessels, *b. Ber.* 17a; 40a; *Gen. Rab.* 14:7.

537. Cf. here Marshall, “Acts,” 576. Much of Scripture reflects such a theme (e.g., Gen 6:8; 12:1–3; 18:19; Deut 7:6; Neh 9:7; Ps 78:70), as also in Luke-Acts (Luke 6:13; Acts 1:2, 24; 10:41), though it also portrays

A vessel does not belong to itself but is an instrument of another, employed wholly for another's purposes; in antiquity, ordinary clay pots (as opposed to expensive metal ones) were fragile, quickly broken, and hence replaceable.⁵³⁸ The prophets spoke of nations as vessels in God's hands that he could use as he desired (Isa 29:16; 41:25; 45:9; 64:8; Jer 18:6; 50:25 [LXX 27:25]; 51:20 [LXX 28:20]), an image Paul himself adopts (Rom 9:21). As noted above, vessels could carry (βαστάζω) contents (though more naturally one might speak of carrying a vessel, e.g., Luke 22:10; the verb usually connotes something burdensome, e.g., 14:27), but vessels could also include writing, sometimes specifying contents or ownership.⁵³⁹ Paul here bears a name, for which believers may be called to suffer (Luke 21:12).

Although the more surprising element for characters in the narrative world would be the Gentile mission, the calling here explicitly includes the "children of Israel"; the Gentile and the Jewish missions are complementary for Luke, not contradictory.⁵⁴⁰ But Paul is especially noted as a distinctive apostle of the Diaspora mission, notably among Gentiles. Both Luke and Paul associate Paul's Damascus encounter with his commission to the Gentiles (Acts 26:17; Gal 1:15–17).⁵⁴¹ His mission to the Gentiles, or "the nations," recalls Jeremiah's calling as a "prophet to the nations" (Jer 1:5), a text also alluded to by Paul himself with reference to his ministry (Rom 11:13; cf. 1 Tim 2:7).⁵⁴² Like Paul, Luke seems to understand Paul's call in terms of Jeremiah's call narrative. God knew Jeremiah before forming him and called him before birth (Jer 1:5; Gal 1:15–16).⁵⁴³ God tells Jeremiah not to fear, because he is with him to rescue him (Jer 1:7–8, 19; cf. Acts 18:9–10; 26:17);⁵⁴⁴ Jeremiah would build, plant, and tear down (Jer 1:10; cf. 2 Cor 10:8).⁵⁴⁵ The commission to make Christ known to both Israel and Gentiles (Acts 9:15) may also reflect Isaiah's servant passages (Isa 42:6; 49:6), as in Acts 13:47.⁵⁴⁶

Although Paul was not the first to evangelize Gentiles (Acts 8:27–39; 10:28–43; 11:20), he advanced the Gentile mission more than others and historically viewed it as a task the Lord had especially appointed for him (Rom 1:5; 11:13; 15:16, 18; Gal 1:16; 2:7–9; Eph 3:1–8, esp. 3:2–3, 8; Col 1:25–27; cf. 1 Tim 2:7).⁵⁴⁷ This is not to imply that Paul began with a comprehensive plan. The full contours of Paul's calling undoubtedly took years to develop; thus, for example, his later views on matters such as circumcision and food laws were not all revealed in his initial calling.⁵⁴⁸ Nor

God working with human obedience and disobedience (for Jewish understandings of chosenness, see the excursus "Providence, Fate, and Predestination" at Acts 2:23).

538. Cf. Fitzgerald, *Cracks*, 167–68; Keener, *Corinthians*, 174, on 2 Cor 4:7. See the comparison between foolish people and cracked vessels in Plato *Gorg.* 493A; Heracl. *Ep.* 8; perhaps Epict. *Diatr.* 2.4.4. But God uses broken vessels in *Pesiq. Rab Kah.* 24:5 and humble vessels in *Sipre Deut.* 48.2.7.

539. For commercial vessels, see Moulton and Milligan, *Vocabulary*, 618 (though most writing on ostraca was simply recycling the surface).

540. With Dunn, *Acts*, 123; cf. Bovon, *Studies*, 31.

541. See further Riesner, *Early Period*, 235–36.

542. Cf. Munck, *Acts*, 82; Stendahl, *Paul*, 8; Bruce, *Apostle*, 75; Young and Ford, *Meaning*, 70; Gorman, *Apostle*, 57; Ehrensperger, *Power*, 84–85. Cf. also Kim, *New Perspective*, 101, though emphasizing Isa 42:6–7 here. Cerfaux, *Church*, 177–78n3, emphasizes Isa 49:1–6 instead.

543. See also Bruce, *Apostle*, 146.

544. This promise is not, however, unique to Jeremiah (see comment on Acts 18:9–10).

545. Jeremiah is a pillar (Jer 1:18), but Gal 2:9 applies this image to others, following a familiar ancient image of strength or importance (Pindar *Ol.* 2.81–82; Cic. *Verr.* 2.3.76.176; Ps 144:12; 1QSa I, 12; 2 Bar. 2:1; 4 Bar. 1:2; 'Abot R. Nat. 25 A; Jos. *Asen.* 17:6 MSS; *Gen. Rab.* 43:8; 75:5; *Tg. Ps.-J.* on Gen 46:28; 49:19; on Exod 15:15; on Num 20:29).

546. Cf. Munck, *Acts*, 82; Bruce, *Apostle*, 146.

547. Stendahl, *Paul*, 15, contends that Paul's identity as apostle to the Gentiles was central in his theology.

548. Dollar, *Exploration*, 163–65.

is it clear that he was evangelizing Nabatean Gentiles as early as Gal 1:17;⁵⁴⁹ Gentiles were available in Damascus if this was his interest.⁵⁵⁰ Paul evangelized all the nations not directly but representatively (cf. Rom 15:19); he reached strategic centers from which the gospel could spread.

The mention of “kings” recalls Jesus’s promise that his disciples would testify before kings and governors (Luke 21:12–15), fulfilled more than once in Acts (Acts 13:7–12; 24:10–25; 26:2–29).⁵⁵¹ Courage to speak boldly before kings was praiseworthy among Greeks (Men. Rhet. 2.3, 386.7–9) and Jews alike (Ps 119:46; cf. 119:23, 161). Whatever Paul may have thought of the commission (especially in view of Acts 9:16), he dare not refuse it (cf. 1 Cor 9:17). To refuse a commission, like refusing any other gift, could insult the giver, leading to serious consequences (Cic. *Fam.* 14.3.1, in exile because he offended Caesar).

Many years intervene between the time of receiving the calling to the Gentiles and its fulfillment in the “missionary travels” reported by Luke (cf. Acts 13:2; Gal 1:18–2:1),⁵⁵² although Luke, perhaps more interested here in narrative action, does not highlight the duration (cf. “many days” in Acts 9:23).

(3) *Paul’s Future Sufferings (9:16)*

Like the promises about Paul’s mission in 9:15, the promise of his sufferings foreshadows in summary fashion much of the rest of the story in Acts. (It may also provide a model, since Jesus’s mission should be expected to entail facing hostility; Luke 9:23, 57–62; 14:26–35.)

Luke here allows for further, complementary revelation about Paul’s calling (the Lord will “show” him what he must suffer), which Luke at least partly explains in Acts 22:18–21. Ὑποδείξω, the term for “showing” Saul what he must suffer, can connote warning (Luke 3:7; 12:5) or offering an example (6:47; Acts 20:35); either sense is appropriate here, but certainly Saul has a concrete example in the suffering of Jesus and the followers who bear his name (Acts 9:4–5). In any case, Saul will suffer for the name he “bears” (9:15), the name he once opposed (26:9).

Saul had persecuted the church, whose Lord shared their sufferings (9:4); now he would share the sufferings of Christ. Ananias was concerned that Saul came to inflict suffering on those calling on Jesus’s name (9:14); the Lord now explained that instead Saul himself would⁵⁵³ suffer for this name (9:16). The term πάσχω in Luke-Acts almost always refers to Christ’s own passion (Luke 9:22; 17:25; 22:15; 24:26, 46; Acts 1:3; 3:18; 17:3; the exceptions are here, Luke 13:2, and Acts 28:5). Saul thus has his own early passion prediction (cf. Luke 9:22; 17:25),⁵⁵⁴ although his death will not be narrated in Acts. The fulfillment begins as early as Acts 9:29. Paul’s sufferings are thus not unique but reflect Jesus’s call to take up the cross daily and follow him,

549. As some argue, e.g., Murphy-O’Connor, “Paul in Arabia”; idem, “Doing in ‘Arabia?’” See fuller discussion at Acts 9:23–25.

550. Dollar, *Exploration*, 163–64.

551. Paul started to speak but was unable to in Acts 18:14. If we count the promise more widely, there are many other “officials” (e.g., 4:8).

552. As often noted; e.g., Thomas, “Worshipping,” 130.

553. On δεῖν in this context, see comment on Acts 9:6. The term functions as a rhetorical authenticating device in Luke-Acts, invoking divine necessity (Rothschild, *Rhetoric of History*, 185–212), and is especially helpful when—as here—the narrative would seem improbable (Rothschild, *Rhetoric of History*, 97, noting parallels in other literature). Paul’s subsequent sufferings are neither divine judgment nor an accident, despite his detractors, but belong to God’s plan, as part of his call.

554. Also Tannehill, *Acts*, 114. On parallel figures in Luke-Acts, see the discussion in the commentary introduction (Keener, *Acts*, 1:555–62).

giving up life (Luke 9:23; 14:26; cf. 1 Cor 15:31; 2 Cor 1:9).⁵⁵⁵ Demosthenes at the end of his life allegedly lamented that if he had known the sufferings entailed in public service, he would have preferred death to public service (Plut. *Demosth.* 26.5); Paul, however, knows the cost from the start. Having deeply repented (cf. Acts 9:9) for having persecuted God's people (9:4–5), he now is committed to do whatever necessary to promote the truth (cf. Gal 1:23). Some later rabbis recognized that the prophetic calling necessarily included a call to suffer.⁵⁵⁶

Luke's narratives of Paul's sufferings probably serve the same basic function as the suffering catalogues in the Corinthian correspondence and in stories of philosophers: they portray one whose character has been tested and comports with his teaching.⁵⁵⁷ A sage's sufferings tested the genuineness of his commitments (e.g., Diog. Laert. 6.2.38; 6.2.74; 6.8.100). Luke is not arguing that Paul now experiences punishment for his past misdeeds, but there does remain an irony in the persecutor now joining the ranks of the persecuted.⁵⁵⁸

Excursus: Meritorious Suffering in Judaism

Among various perspectives on suffering among Luke's contemporaries was a view that it was meritorious, a view that some members of Luke's real audience may have connected with this passage (though it is by no means clear that Luke envisioned the point so narrowly).

Judaism, especially in its later, rabbinic form, developed the idea of meritorious suffering.⁵⁵⁹ In earlier texts, God punished his people when they sinned, lest the judgment build up against them as among other nations that would be destroyed (2 Macc 6:13–17). The righteous are grateful for the Lord's discipline because it is only for a time (*Pss. Sol.* 3:3–4; cf. 13:8); God blesses them by disciplining them to turn them from sin (10:1–3).⁵⁶⁰ God punished his own people Israel for their sins so they might be forgiven in the end (2 *Bar.* 13:9–10). The same sort of ideas apparently existed at Qumran.⁵⁶¹

Later, in the rabbis, Israel's sufferings drew God's attention and favor.⁵⁶² Sufferings,

555. Thus Paul's Roman custody should not be used to discredit his mission, a recurrent point in Luke's larger apologetic for the Gentile mission (cf., e.g., Keener, "Apologetic").

556. Urbach, *Sages*, 1:560.

557. See most fully Fitzgerald, *Cracks*, passim.

558. For such a turn from a literary perspective, cf., e.g., Joseph adding silver to the sacks of his brothers who sold him for silver (Gen 42:35; 44:1–2) or testing how they will respond to the enslaving of Rachel's other son (44:17), inviting them to believe that God is exposing their sin (42:28; 43:23; 44:16). Paul comes close to suffering for the same charges as Stephen (Acts 6:13; 21:28).

559. For a survey of rabbinic texts on suffering, see, e.g., Montefiore and Loewe, *Anthology*, 541–55; also treated by many others, e.g., Marmorstein, *Names*, 60, 193; Davies, *Paul*, 262–65; Bonsirven, *Judaism*, 20, 29, 81, 111, 114–16; Urbach, *Sages*, 1:270, 445. *Pace* Urbach, Sanders, "Suffering," argues that Akiba saw suffering as, in part, punishment (cf. also Laytner, "Suffering"). See further, e.g., *b. Ber.* 63a and references below. The concept of meritorious or atoning suffering was also intelligible to Greeks (so Hengel, *Atonement*, 28).

560. God judged Israel rightly (*Pss. Sol.* 8:23–32), but Israel will not be judged at the end (8:33). After the righteous were disciplined briefly, they would receive God's benefaction (*Wis* 3:5). For earlier conceptions of suffering (linked with sin, enemies, or other sources), see Thomas, "Suffering" (esp. 759–63).

561. Cf. 1QS VIII, 4; 1QpHab VIII, 1–3; possibly 4Q183 1 II, 7 (if it means that they paid their debt of judgment by suffering).

562. E.g., *Mek. Bah.* 6.142–43 (Lauterbach, 2:247), making them beloved by God.

some opined, appeased God even more than offerings did.⁵⁶³ The sufferings of the righteous in this life often constituted their share of punishment to free them from greater punishment in the world to come.⁵⁶⁴ (The blessings of the wicked likewise compensated them in this life so that they would have no reward in the coming world.)⁵⁶⁵ Thus a wicked tax collector who had done one righteous deed received a blessing in this life before being damned, whereas a righteous man suffered in this life for his one misdeed and entered life.⁵⁶⁶ Often something belonging to a person would perish instead of the person, God counting this possession as standing for the person himself.⁵⁶⁷ Even posthumous suffering, such as the stoning of a coffin⁵⁶⁸ or the corpse's decomposition,⁵⁶⁹ could atone for sin and bring forgiveness.

Israel received God's blessings only after sufferings,⁵⁷⁰ and suffering was a special gift for Israel;⁵⁷¹ Israel was punished for its sins while other nations enjoyed comfort,⁵⁷² and Jerusalem received 90 percent of the world's suffering.⁵⁷³ Present sufferings promised rewards in the world to come;⁵⁷⁴ thus one should rejoice over suffering in this life because it produced forgiveness.⁵⁷⁵ "Beloved is suffering," said the rabbis, because God's name rested on the one who suffered.⁵⁷⁶ Thus Abraham sought affliction,⁵⁷⁷ and its increase kept the world from being punished as severely as in earlier times.⁵⁷⁸ It is said that Abraham prayed for old age to come into being, Isaac for suffering, and Jacob for sickness;⁵⁷⁹ illness was thought to purge away sin.⁵⁸⁰ It was said that Samson prayed for victory on the basis of one eye⁵⁸¹ and that the temple's destruction settled Israel's account of sin.⁵⁸² An Amora nevertheless prayed that God would forgive his sins without afflictions.⁵⁸³ Martyrs could enter the life of the coming world even without confessing their sins,⁵⁸⁴ and

563. *Sipre Deut.* 32.5.2. Such a view would have been convenient, since the temple had long since been destroyed. The death of the righteous atoned for Israel's sins no less than did Yom Kippur (*Pesiq. Rab Kah.* 26:11).

564. So *Sipre Deut.* 307.3.2–3; *'Abot R. Nat.* 28, 39 A; 44, §123 B; *b. Qidd.* 40b; *Šabb.* 30b; *Lev. Rab.* 27:1; 32:1; *Lam. Rab.* 3:3, §1; 3:18, §6; 3:22, §8; *Midr. Pss.* 90:11; *Tg. Qoh.* 8:14; cf. *Lev. Rab.* 9:1. This was especially the case with particularly grievous sufferings (*b. Ber. Sab.*; *'Eruv.* 41b); God was especially stringent with the very righteous (*b. B. Qam.* 50a; cf. *y. Hag.* 2:2, §5; *Sanh.* 6:6, §2), but God would reward them for their sufferings (*Pesiq. Rab Kah.* 24:2).

565. So *Sipre Deut.* 307.3.2–3; *'Abot R. Nat.* 28, 39 A; 44, §123 B; *b. Qidd.* 40b; *Šabb.* 30b; *Lev. Rab.* 27:1; *Tg. Qoh.* 8:14; cf. *Lam. Rab.* 1:5, §31.

566. So *y. Hag.* 2:2, §5; *Sanh.* 6:6, §2.

567. So *Pesiq. Rab Kah.* 24:17.

568. E.g., *b. Ber.* 19a.

569. E.g., *b. Sanh.* 47b.

570. So *Sipre Deut.* 32.5.10; *b. Ber.* 5a; *Exod. Rab.* 1:1. For the idea that suffering was sometimes connected with the formation of a community, see Leaney, "Significance."

571. So *Exod. Rab.* 30:13.

572. *Sipre Deut.* 43.10.1.

573. *'Abot R. Nat.* 48, §132 B. But in one rabbi's opinion, the golden calf merited Israel's suffering until the resurrection (*'Abot R. Nat.* 34 A).

574. *Sipre Deut.* 310.4.1.

575. E.g., *Sipre Deut.* 32.5.5. Enduring them joyfully invites deliverance for the world (*b. Ta'an.* 8a).

576. *Sipre Deut.* 32.5.8.

577. So *Song Rab.* 3:6, §2. He suffered during circumcision to increase his reward (*Song Rab.* 4:6, §1); on Abraham's sufferings in view of future reward, see also *Midr. Pss.* 90:11.

578. *Sipre Deut.* 311.1.1.

579. So *b. Sanh.* 107b; *Gen. Rab.* 65:9; 97 MSV. The broader and earlier tradition attributed pain and sickness to Adam's sin (*L.A.E.* 30–34; *Apoc. Mos.* 5–8). Some stories toned down the effects of old age, e.g., for Jacob (*Jos. Asen.* 22:7, some mss); in *Sib. Or.* 1.299–304, there was neither old age nor sickness in the years immediately following the flood.

580. E.g., *Gen. Rab.* 62:2; *Pesiq. Rab.* 22:5.

581. So *Num. Rab.* 9:24 (saving for the coming world the reward for his other eye).

582. *Ruth Rab.* proem 7; *Lam. Rab.* 4:22, §25.

583. So *b. Ber.* 17a.

584. *Eccl. Rab.* 4:1, §1.

martyrdom could secure for righteous Gentiles a place in the world to come.⁵⁸⁵ Later, among Christians, only martyrs would sit on Christ's right; others would sit on his left.⁵⁸⁶

Already in pre-Christian sources, the sufferings of the righteous could also atone for others, bringing them various blessings. God's elect at Qumran atoned for sin by their sufferings (1QS VIII, 3–4).⁵⁸⁷ Some also pleaded that their martyrdom constitute a sacrifice to appease God's wrath and turn back his judgment on the nation as a whole.⁵⁸⁸ (A related conception is that for Israel to be forgiven, the perpetrators of heinous offenses, such as intermarriage with unconverted Gentiles, must be executed.)⁵⁸⁹ The rabbis, however, elaborated further. Even just one drop of blood from a righteous prophet atoned for all Israel.⁵⁹⁰ Thus R. Judah ha-Nasi suffered with a toothache for thirteen years because he was not kind to a calf; meanwhile no animals died in Israel, nor did any women miscarry.⁵⁹¹ Moses's death redeemed the wilderness generation for the world to come, and Hosea's father's death in exile would restore the ten tribes to the land.⁵⁹² See also comment on martyrdom and views about its atoning value at Acts 7:58–60.

Luke's view of suffering here is more closely connected with sharing Christ's sufferings (e.g., bearing the cross, Luke 9:23; 14:27), but some of these elements of ancient Jewish conceptions of sufferings may help us appreciate what some of Luke's first audience may have heard more sensitively than purely modern Western assumptions would.

III. SAUL'S RESTORATION (9:17–19A)

Ananias, one of the former objects of persecution, now comes as Jesus's agent to the former persecutor so that Saul will receive sight, be filled with the Spirit, and (assuming that Ananias shared the report of Acts 9:15–16, as 22:14–16 suggests) receive further confirmation of his calling.

(1) *Ananias's Mission (9:17)*

That Ananias went as the Lord commanded him (9:17), despite initial concerns of danger, fits repeated biblical models (e.g., Gen 12:4; Exod 4:27; Judg 6:27); the command itself is another "absurd command" (see comment on Acts 8:26; cf. 5:20). He provides a model of courage in the face of fear.⁵⁹³ Courage was one of the Aristotelian tradition's widely appropriated four virtues⁵⁹⁴ and is widely praised in ancient literature.⁵⁹⁵ Ananias's words in Acts 9:17 confirm that he believes what Jesus has told him (and that Jesus told him more than Luke narrates in his report of the vision); despite his initial objection, that he went indicates his trust, even before he can witness that Saul has been blinded. (Like some other early Christian writers, Luke often uses ἀποστέλλω for divine commissions [e.g., 7:35].)⁵⁹⁶

585. *Sipre Deut.* 307.4.2.

586. *Herm.* 1.3.2.

587. Suffering also invites God's deliverance in 1QpHab VIII, 2.

588. See 2 Macc 7:37–38 (on which see Schenker, "Martyrium"); 4 Macc 17:21–22 (on which cf. Grappe, "Intérêt"). Cf. also Thoma, "Frühjüdische Martyrer." Silberman, "Challenge," suggests that the atonement of martyrdom in *Pesiq. Rab Kah.* 26 may respond to Christian claims.

589. *Jub.* 30:14–17.

590. So *y. Sanh.* 11:5, §4.

591. So *y. Kil.* 9:3, §4; *Gen. Rab.* 96:5, some mss.

592. *Pesiq. Rab Kah.* 24:9.

593. See Barber, "Courage of Ananias."

594. On these, see comment on Acts 24:25, which provides references for some of these sources.

595. See comment on Acts 8:3, with a number of sources.

596. On the likely background of this concept, see Keener, *John*, 310–15.

Some scholars doubt Ananias's historical role here, pointing out that Paul received his gospel directly from Christ (Gal 1:12). But the grounds for this skepticism are problematic. Granted, Luke makes good use of Ananias's orthodoxy to connect Paul with the Jerusalem tradition (Acts 22:12), but an apostle (or other earlier-named character, such as one of the Seven) would have done better⁵⁹⁷ had Luke simply been inventing stories.⁵⁹⁸ When he focuses so much on major characters, why create a new character here who is significant only in reports of Saul's conversion? Further, Paul also has an apologetic agenda in Galatians that leads him to emphasize the independence and equality of his own revelation, playing down intermediaries.⁵⁹⁹

Ananias, however, does not in fact bring Paul the gospel here, in any case. Paul already knew something of Christian beliefs before his conversion (Acts suggests that at the least he had heard Stephen's speech, probably in addition to interrogating believers [cf. 7:58; 8:3; 9:2; 22:4; esp. 26:11]); he embraced them when confronted by the revelation in 9:5 (on the genuineness of Saul's conversion at that point, see comment on Acts 9:8). Luke claims that Ananias learns of Paul's calling (9:15), but Luke also claims that Paul learned of it directly from the Lord (26:16–18).⁶⁰⁰ In Acts as well as in Galatians, Paul can omit Ananias from the testimony (26:18–19). Ananias's role is to confirm the vision, reverse the blindness, and offer baptism, not to supplant direct revelation.

(2) Filled with the Spirit (9:17)

That Paul should be "filled with the Spirit" here is critical for his mission both from the standpoint of Luke's portrayal (cf. 1:8; 13:4, 9, 52; 16:6–7; 19:6)⁶⁰¹ and from Paul's own (cf. Rom 15:16, 19; 1 Cor 2:4; 7:40; 2 Cor 3:3–18; Gal 3:2–5; Eph 3:5; 1 Thess 1:5).⁶⁰² Whether the laying on of hands here is intended to confer healing (as in Luke 4:40; 5:13; 13:13),⁶⁰³ the Spirit (as in Acts 8:17; 19:6), or both is debated, but given the laying on of hands for initial reception of the Spirit in most cases of such reception that were anticipated (i.e., except 2:4; 10:44) and the possible symbolic imparting of a fuller dimension of the Spirit in 6:6, the Spirit is probably at least part of the reason for laying on hands here. If the recent impartation of God's Spirit through the apostles' hands to the Samaritans would have seemed astonishing to outsiders, this impartation through an otherwise obscure believer to the movement's best-known persecutor would have appeared more so!

Did Paul have a glossolalic experience at this time, as reported in 2:4, 10:47, and 19:6? Some scholars infer that he did.⁶⁰⁴ From his own writings we know that he did

597. Pace Fitzmyer, "Role of Spirit," 182, an apostle is not always present. Chrys. *Hom. Acts* 20 (Martin, *Acts*, 107) also notes that a nonapostle lays hands on Paul, suggesting that this is to humble Paul (plausible, though no apostles were in Damascus, in any case), but he doubts that Paul was filled with the *signs-working* Spirit at this point.

598. Paul's point in Galatians may be especially the lack of *apostolic* mediation (Gal 1:12; 2:6–9), as often noted (e.g., D. Williams, *Acts*, 173). Moreover, Gal 1:12 speaks of the origin of Paul's *gospel*, which he may have received by revelation on the Damascus road (implicit in the experience of Acts 9:4–6; see Kim, *Origin*; cf. idem, *New Perspective*, 4, 165–74; Bruce, *Apostle*, 80), whereas Acts 9:15 refers to confirmation of Paul's calling (Witherington, *Acts*, 314).

599. Given the Twelve's year or more of discipleship with Jesus, Paul's claims in this regard probably were a "hard sell," except perhaps among his own circle.

600. Noted also by Witherington, *Acts*, 314.

601. The Spirit is not mentioned with special frequency in Paul's ministry in Acts but appears in most of the crucial turning points in his ministry there (Porter, *Paul in Acts*, 93–94).

602. Fee, "Conversion," connects the centrality of the Spirit in Paul's theology with his dynamic conversion encounter with Christ. (On the Spirit in Paul, see, e.g., Fee, *Presence*; Paige, "Spirit").

603. See Hull, *Spirit in Acts*, 102–3; Turner, *Power*, 376–77. With blindness, cf. Mark 8:23, though Luke omits that story (cf. Luke 18:42).

604. E.g., Arrington, *Acts*, 100.

pray in tongues, even more than most glossolalists in Corinth (1 Cor 14:18), as well as engaged in what we might call mystical experiences (2 Cor 5:12; 12:1–4). Because we have tentatively located Luke’s audience especially in Achaia and (most directly) Macedonia, we would expect both Luke and much of his audience to be aware of Paul’s experience, especially if Paul was the one who first informed Corinthians about the gift (as is likely).

Given Luke’s emphasis on tongues as a sign of cross-cultural empowerment, however, it may appear surprising if this experience happened to his apostle to the Gentiles already on this occasion and Luke does not pause to record it here.⁶⁰⁵ One might thus surmise that (from a historical standpoint) Paul’s practice of tongues began on a later occasion. We cannot, however, argue too much from Luke’s abbreviated narrative; he narrates not even Paul’s reception of the Spirit, for whatever reasons, but only his baptism (Acts 9:18).⁶⁰⁶ Moreover, Luke hardly needs to narrate here what he employs elsewhere as a sign of cross-cultural empowerment (see discussion at Acts 2:4); Paul is his example par excellence of the Gentile mission, and so those who read about his being “filled with the Spirit” can infer that he certainly did receive cross-cultural empowerment.

This text is one locus for the debate as to whether baptism in the Spirit can occur subsequent to conversion.⁶⁰⁷ In contrast to 8:15–17, however, this text is less relevant for the debate; the expression “filled with the Spirit” appears for subsequent empowerments of the Spirit as well as “initial” ones (4:8, 31; 13:9). It may have some bearing (as an “initial” experience) because it is the first mention of the Spirit in connection with Paul. But would this mean, as some argue, that Paul was fully converted only here?

Part of the answer depends on what we mean by “conversion”; he recognized and submitted to Jesus’s authority (9:5–6, 8), deeply repented (9:9), and apparently continued to receive and submit to revelations from Christ (9:12). He had not, however, undergone the official early Christian act of conversion in baptism (9:18).⁶⁰⁸ We might argue whether he had experienced spiritual regeneration or forensic justification before his baptism, but these are largely Pauline or Johannine categories, not Luke’s own. Luke speaks of Spirit empowerment primarily in terms of empowerment for mission (1:8), not regeneration.⁶⁰⁹

605. One could argue that, like some other historians, Luke plays down this element so as not to offend rationalistic readers (tongues perhaps being a specially offensive category, cf. 1 Cor 14:23); but Luke does not mind reporting miraculous phenomena even for Paul (and his summary of tongues experiences is also more positive than Paul’s assessment of the Corinthian practice).

606. It is possible that the experiences were simultaneous, which might be Luke’s ideal (Acts 2:38). The way the narrative reads, Paul may have even received the Spirit before baptism, as in 10:44–47 (cf. Bruce, *Commentary*, 201n36), but Luke has so compressed the action that one cannot be sure (cf. Acts 22:16). In any case, Luke reports Ananias’s mission, which includes that Paul will be filled (9:17), and presumably expects his audience to understand this mission as fulfilled (Escobedo, “Lens,” 142).

607. In favor, see, e.g., Franklin, “Spirit-Baptism”; Ervin, *Conversion-Initiation*; Cho, *Spirit and Kingdom*, 148–50; Miller, *Empowered for Mission*, 168; against, see esp. Dunn, *Baptism*, 38–102, for Acts (90–102 for summary; 73–78 on Acts 9).

608. Turner, *Power*, 375, also concedes “that Paul had probably come to christological faith” but argues that “his conversional *commitment* was yet to be formalised in baptism”; see esp. Acts 22:16.

609. See the commentary introduction (Keener, *Acts*, 1:520–24; some early Jewish sources associate the Spirit with purification [532–34], but most with inspiration [534–37]). In contrast to Acts 1:8, this passage does not specify the purpose, but it may be inferred (in conjunction with 1:8) in its proximity to Paul’s call (9:15) and perhaps also his quickly subsequent activity in 9:20 (cf. Miller, *Empowered for Mission*, 173). That Luke’s reports occasionally deviate chronologically from his own pattern in Acts 2:38 (see comment on Acts 8:14–17) does suggest a distinction between ontology and official pronouncement, the former potentially preceding the latter. (Thus, in the language of other early Christian theology, Paul may have already been “regenerated” by faith.) But this is incidental to his interest and not primary.

Had Luke framed Paul's experience in such terms, we might view his initial salvific faith as preceding the baptism and filling by a few days. But the modern debate (and distinction between initial and subsequent fillings) may try too hard to formalize Luke's categories; for Luke, the more central emphasis was that disciples depend on the Spirit, not how many encounters with the Spirit they ought to have (perhaps the more the better, at least when needed). Insofar as we are concerned with the question, however, Paul's being filled with the Spirit here, a charismatic-prophetic empowerment, is associated not with his conversion but with equipping for his call.

(3) "Brother" Saul (9:17)

Part of the debate about the timing of Paul's conversion has hinged on what Ananias means by "brother."⁶¹⁰ Insofar as ancient Mediterranean society was group oriented,⁶¹¹ close bonds within groups would lend themselves to fictive kinship ties.⁶¹² (Thus, for example, one could think of an older woman affectionately as "mother.")⁶¹³ The concept of fictive kinship is widely recognized in anthropological literature.⁶¹⁴ Patterns of such language vary throughout the world.⁶¹⁵ In one culture, children may call their mother "sister" if they all live with her parents;⁶¹⁶ a people might employ one kind of language for biological relationships to designate another;⁶¹⁷ many societies apply sibling language to certain parallel cousins;⁶¹⁸ in some societies spouses apply sibling terms for each other;⁶¹⁹ and so forth. In many cultures those who describe others with kinship terms feel as close to them as to natural kin.⁶²⁰

Central as sibling language is to Pauline ethics,⁶²¹ kinship language was in no wise "uniquely Christian."⁶²² Literal genetic brotherhood created special bonds,⁶²³ making it

610. This is too much theology to have depend on such a debatable point, but Luke provides us few other clues; answering such later theological questions, important as they might appear to us, was not his agenda.

611. Malina and Neyrey, *Portraits*, 154–69.

612. See *ibid.*, 160–61; cf. Malina and Pilch, *Acts*, 189; *idem*, *Letters*, 362–63. For documentation of fictive kinship language in the papyri, see Dickey, "Terms"; for extension of kinship language to more distant kin, see, e.g., Hierocles *Siblings* (Stobaeus *Anth.* 4.84.23).

613. See Lucian *Lucius* 4; *Gen. Rab.* 47:3; Rom 16:13 (on which cf., e.g., Theodoret of Cyr *Interp. Rom.* on Rom 16:13; IER, Migne PG 82 col. 221; Bray, *Romans*, 374); cf. 1 Tim 5:2; Horsley, *Documents*, 4:34, §9; for unofficial adoptive relationships, see, e.g., Virg. *Aen.* 9.297; Ps.-Callisth. *Alex.* 2.20; John 19:26; for respected public titles, Hemelrijk, "Kinship."

614. Though some conclusions drawn from this terminology are debated (e.g., Nerlove and Romney, "Sibling Terminology"; Faris, "Sibling Terminology"; on such terminology producing transference, cf. Hsu, "Effect").

615. E.g., Murdock, "Patterns"; Vatuk, "Reference"; cf. Barnard, "Universal Systems." In my wife's culture, young children respectfully call mothers, maternal aunts, and other close caregivers "mothers," distinguishing them each by their given name (e.g., "Mama Médine"), though there is no doubt as to who is the actual mother.

616. Buchler and Selby, *Kinship*, 35 (in the Cayman Islands).

617. Cook, "Conversion," 195.

618. E.g., Fields and Merrifield, "Kinship," 27.

619. Haas, "Sibling Terms" (on southeast Asia; this is a generational description [232] and only in a rare society produces confusion [234]); cf. Song 4:9; Tob 5:20; 8:4, 7; *Jub.* 27:14, 17; Ovid *Metam.* 1.351 (but she was his cousin); Sen. *Y. Phaed.* 611; P.Oxy. 528.1–2; 744.1; P.Hamb. 86.2; PSI 209.1; also Egyptian love songs in ANET 467–69 (although, in some of the Egyptian sources, the sibling terminology may well reflect genetic reality).

620. E.g., Ballweg, "Extensions."

621. See Aasgaard, "Role Ethics"; Tonlieu, "Family"; Horrell, "Ἀδελφοί" (esp. on the undisputed Paulines); Paddock, "Family Language" (contrasting Paul with Plutarch and others); cf. Bony, "Ecclesiologie, II"; *idem*, "Ecclesiologie, III" (kinship language); Taylor, "Reciprocity" (inviting a sibling kind of love). Lucian *Peregr.* 13 mocks Christians for following Jesus's "sibling" teachings and hence sharing possessions.

622. Pace Witherington, *Corinthians*, 92 (on the uniqueness of Christian usage of kinship for shared faith). "Beloved brother" may have originally developed from Christian usage (Nobbs, "Brothers," esp. 150).

623. E.g., Xen. *Mem.* 2.3.4; Mus. Ruf. 15, p. 100.3–16; deSilva, *Honor*, 166–70 (citing esp. Arist. *N.E.* 8.12.3, 1161b 30–35; Plut. *Br. Love* 1, 2, *Mor.* 478CD, 479A, 480BC); in practice, see Dixon, *Roman Mother*, 19

ideal as a figure for other close relationships. Thus intimate friends were like brothers.⁶²⁴ For example, in one letter of recommendation, Cicero urges, “I love Pomponius Atticus as a second brother.”⁶²⁵ Likewise, Ahiqar tells a friend that he cares for him the way one “would care for his own brother.”⁶²⁶ Just as friendship language was employed in military alliances, allies⁶²⁷ sometimes used the language of brotherhood.⁶²⁸ Mystery cults spoke of co-initiates as “brothers”;⁶²⁹ the language was also common in many other associations.⁶³⁰ Greek intellectuals spoke of all humanity,⁶³¹ or at least one’s fellow citizens,⁶³² as sharing kinship on a general level.⁶³³

Sharing common character and conviction also created fictive kinship.⁶³⁴ Such titles designated affection:⁶³⁵ one could love those with whom one grew up as one’s sisters;⁶³⁶ one could generously display affection by means of the term “brother” even to a stranger to whom one wished to show hospitality.⁶³⁷ More important here is that Jewish people could address fellow Jews as brothers.⁶³⁸ As rabbis called their masters “fathers” and their disciples “children,”⁶³⁹ they naturally could call another rabbi “brother.”⁶⁴⁰

Outside the vocative, Luke usually uses the term technically to refer to believers (e.g., 1:14–15; 9:30; 10:23; 11:1, 12, 29; 12:17; 15:1, 3, 22–23, 32–33, 40; 18:18, 27; 21:7, 17; 28:14–15), including new believers (14:2; 15:36; 16:2, 40; 17:6, 10,

(citing *CIL* 6.9868, 12564, 22423); cf. affectionate amplification of kinship language in Cic. *Quint. frat.* 1.3.3, 10; fictive kinship language in Diod. Sic. 17.37.6.

624. E.g., Eurip. *Iph. Taur.* 497–98; Plut. *Many Friends* 2, *Mor.* 93E; Pliny *Ep.* 7.23.1; Marc. Aur. 1.14. According to many ancient Mediterranean ideals, a brother was better than a good friend (Mus. Ruf. 15, p. 100.6–8; but contrast Prov 18:24; 27:10). But evidence for a suggested practice of formal “brother” adoptions (especially in an erotic context) is at best quite sparse in the Roman period (Shaw, “Brotherhood”).

625. Cic. *Fam.* 13.1.5 (LCL, 3:13). Symmachus employs “brother” for friends abundantly, often in letters of recommendation (*Ep.* 1.28; 1.43; 1.63; 1.70; 1.90.1; 1.91; 1.94).

626. *Ahiq.* 49, col. 4 (*OTP* 2:496). Cf. Stowers, *Letter Writing*, 62, commenting on ZPE 22 (1976): 51 (a late second-century C.E. papyrus): “Since brother is often used loosely for friends it is impossible to determine the exact relationship with certainty.” It appears in a loose, nonfamilial, and nonreligious sense in Egypt (e.g., *CPJ* 3:41, §479, third or fourth century C.E.; cf. “sister” as wife in Egypt, in sources noted above).

627. Or potential allies (cf. 1 Kgs 20:32–33; 1 Macc 10:18).

628. 1 Macc 12:6, 10, 21; 14:20, 40. Curty, “Parenté,” suggests that the language might stem from the ambiguity of the Hebrew term for “brother” as “relative” (comparing 2 Macc 5:9), but it makes sense on Greek premises also. For ancient Near Eastern application to fellow kings, see, e.g., 1 Kgs 20:32; kings writing to Pharaoh in Pfeiffer, *Tell el Amarna*, 45–46.

629. Burkert, *Mystery Cults*, 45 (citing Andocides *Myst.* 132; Plato *Ep.* 7.333E; Plut. *Dion* 56; Sopatros [*Rhet. Gr.* 8:123, line 26]); Deissmann, *Studies*, 87–88. Cf. συνετελέσθην in Dio Chrys. *Ep.* 5, to Sabinianus, for “co-initiated.”

630. Harland, *Associations*, 31–33; idem, “Dimensions”; for parental language, idem, “Mothers’ and Fathers.”

631. Diod. Sic. 1.1.3; Libanius *Anecdote* 2.2 (Diogenes); Philost. *Ep. Apoll.* 44.

632. Men. *Rhet.* 2.4, 394.21–23.

633. Zeno held that only “the good” (the wise) were relatives (Engberg-Pedersen, *Paul and Stoics*, 74–75, citing Diog. Laert. 7.32–34); but in general, members of Greek philosophic schools tended to relate to each other more in the language of friendship than in that of kinship (Stowers, “Resemble Philosophy?” 100).

634. DeSilva, *Honor*, 194 (citing esp. 4 Macc 13:24–26; Philo *Virt.* 195; *Spec. Laws* 1.316–17).

635. Affection, not equality (i.e., not contradicting authority in the community; Clarke, “Brother,” 156–58; idem, *Leadership*, 93). Papyri often use it unequally (e.g., an older brother as “my lord brother,” 158–60), and Plutarch’s *On Brotherly Love* emphasizes loving despite inequality (160–63); thus “brotherly love is concerned with mutuality, rather than equality” (164).

636. *Jos. Asen.* 17:4.

637. *Test. Ab.* 2:5 B.

638. Tob 5:10; 6:10; 7:3; 2 Macc 1:1; 1QS VI, 22; 1QSa I, 18; 1QM XIII, 1; XV, 4; fellow Essenes in Hippol. *Ref.* 9.15. Cf. Skemp, “Ἀδελφός,” who argues that sibling language in Tobit supports endogamy within Judaism and one’s kin group.

639. E.g., *Sipre Deut.* 34.3.1–3, 5; 305.3.4; cf. 4 *Bar.* 7:24; Porph. *Marc.* 1.6–8; see further Keener, *John*, 922.

640. *Sipre Deut.* 34.5.3; *b. ’Abod. Zar.* 18a, bar.

14), though he recognizes that this pattern is based on Jewish usage for fellow Jews (22:5; 28:21). That the use for fellow Christians and (especially when addressing crowds) fellow Jews is so similar merely emphasizes how little the later separation between “Israel” and “church” should be read back into Luke.

What does the term mean in 9:17? It could simply mean “fellow Jew,” as often in the vocative (2:29, 37; 3:17; 7:2; 13:15, 26, 38; 22:1; 23:1, 5, 6; 28:17);⁶⁴¹ but Luke applies this title to non-Christian Jews especially for addressing large audiences (except in traditional material in Luke 6:41–42; plus this use also applies to Christian audiences),⁶⁴² and it hardly fits the intensity of the encounter for Luke’s audience in Acts 9.⁶⁴³ Although “brother” has many possible senses and the ethnic sense remains possible here, probably Ananias comes as one with whom Paul shares the faith (Luke 8:21; 14:26; 22:32), on the basis of what Jesus has told him (Acts 9:11–16; cf. 22:14–16).⁶⁴⁴ Ananias is thus welcoming explicitly a fellow believer who needs to hear this affirmation.

(4) *Saul’s Sight Restored (9:17–18)*

Restoration of his sight provides Saul a further confirmation in addition to the paired visions concerning Ananias’s mission to him (9:10, 12).⁶⁴⁵ The healing of blindness appears on other occasions in Luke-Acts, by chance all referring to Jesus’s ministry (Luke 4:18; 7:21–22; 18:42–43). The restoration of sight to one who has learned his lesson resembles the restoration of Zechariah’s speech in Luke 1:64.⁶⁴⁶ Jesus’s mission includes sight to the blind (e.g., Luke 18:42–43), especially in the Isaian messianic summaries (4:18; 7:22). Luke can also employ this imagery to challenge the spiritually blind (Q material in 6:39–42).⁶⁴⁷

Ancients frequently believed that, under extraordinary circumstances, blind persons could be supernaturally healed;⁶⁴⁸ thus some contended that Isis both cured eye diseases and made blind,⁶⁴⁹ and in a list of healings at Epidaurus, the lame and blind appear in a summary (perhaps as the most dramatic of cures).⁶⁵⁰ In a later report, some Brahmans healed a man whose eyes had been put out (Philost. *Vit. Apoll.* 3.39). The Jesus tradition multiply attests reports that Jesus healed some blind people;⁶⁵¹ there the opening of blind eyes, like the healing of the lame, is a sign of the messianic era (Isa 35:5–6; Luke 7:22).

641. So Dunn, *Baptism*, 74.

642. In Acts 1:16; 6:3; 15:7, 13; it applies to Jewish audiences more only because they are addressed more frequently. But these references are so much like other addresses to Jews that we might translate “friends,” “comrades,” not yet pressing the distinction between “Jews” and “disciples, whether Gentiles or Jews,” too far. In any case, vocative addresses to crowds differ from the affectionate personal address to a fellow believer (Acts 21:20).

643. The same cannot be pressed for Paul’s recounting of the same story for a mostly non-Christian Jewish audience in Acts 22:13.

644. With, e.g., Lake and Cadbury, *Commentary*, 104.

645. On the signs confirming the message in Luke-Acts, see 4:29–30; 14:3; further discussion in the commentary introduction, Keener, *Acts*, 1:542–44, 546–49.

646. Such a loosening of the tongue could constitute a sign to Israel, as in Ezek 24:26–27. The loosening of the tongue in 1 En. 106:3, 11 is of the infant Noah; Aesop’s muteness is healed in *Vit. Aes.* 6–8.

647. Tabitha’s eyes were “opened” in resuscitation (Acts 9:40), an event that could also generate symbolic analogies, but the connection is probably too tenuous to suggest a deliberate narrative connection.

648. Witherington, *Christology of Jesus*, 170–71, cites, e.g., Tob 11:10–14; *SIG* 1173.15–18; *SIG* 3.1168; see also *IG* 4.951.120–21 (quoted in Whittaker, *Jews and Christians*, 212). Some Jews believed that Amorite precious stones could give sight to the blind (*L.A.B.* 25:12).

649. Horsley, *Documents*, 1:15, §2.

650. Epid. inscr. 4 (Grant, *Religions*, 57). In Epid. inscr. 4, Asclepius cuts open an eye and pours in medicine; in inscr. 9, he again opens eyes and pours in medicine.

651. Also Witherington, *Christology of Jesus*, 170, citing Mark, John, and Q (the Matthean summary and uniquely Markan examples that he cites do not add to these).

In later centuries, reports of blindness being supernaturally healed continue in a wide range of sources.⁶⁵² Today such reports continue to remain common, especially in much of the Majority World, where medical treatment by Western means is often less available.⁶⁵³ In some cases I know the eyewitnesses personally.⁶⁵⁴ Such claims also occur in the West.⁶⁵⁵ Some of these phenomena seem difficult to explain on naturalistic terms, but explaining them is beside the point here. More critical for NT scholars is to note that such phenomena are widely claimed by firsthand sources and hence it is not imperative to deny the possibility of firsthand claims for such phenomena in the first century, however we may choose to explain them.⁶⁵⁶

Luke's description of the healing (Acts 9:18)⁶⁵⁷ fits ancient medical texts, although it is by no means limited to them; from both medical and other literature, one gathers that the "scales" were something like a scab. Hippocrates once uses *λεπίς* to describe the removal of a "scab, caused by burning in a medical operation, from the eyelid."⁶⁵⁸ Luke's audience might think most naturally of the imagery in the story of Tobit, whose eyes had been "whitened" with blindness (Tob 2:10); there the angel Raphael came to "scale away" (*λεπίσαι*) the whiteness, or film (3:17). After Tobit's son Tobias anointed his eyes, he rubbed them (11:11–12), and the whiteness "scaled" (*ἐλεπίσθη*) from his

652. See here discussion in Keener, *Miracles*, 511–14.

653. E.g., Brown, Mory, Williams, and McClymond, "Effects" (providing medical documentation; see further Brown, *Testing Prayer*, 194–233); Ramirez, "Faiths," 94–95; Ma, "Vanderbout," 130, 132; idem, "Encounter," 137; Castleberry, "Impact," 108, 112; Wiyono, "Revival," 286; Sung, *Diaries* (mostly in 1930s China), 28, 36, 56, 111 (multiple cases), 116 (multiple cases), 153 (a girl in Singapore), 158 (multiple cases), 161 (four cases); Harris, *Acts Today*, 22–23; Menberu, "Mekonnen Negera" (in Ethiopia); Negash, "Demelash" (in Ethiopia, 1991); De Wet, "Signs," 93–94 (in the Ivory Coast, 1973), 94–96 (in South Africa), 104 (in Argentina), 121–23 (in Indonesia); Protus, "Latunde" (after fasting, as here, and washing with water, as in John 9:7); idem, "Chukwu" (healed from blindness after a priest sprinkled on him consecrated water); Chavda, *Miracle*, 122–23 (a seventy-year-old woman, healed completely on her seventh, persistent entreaty); Baker and Baker, *Enough*, 145, 169, 174, 182 (with further accounts of eyes white with blindness changing color as they were being healed, 76, 171–72, 173; idem, *Miracles*, 189); idem, *Miracles*, 8, 39–40, 68, 78 (often), 108, 113, 159, 160, 192, 193 (partial healing); Chevreau, *Turnings*, 19, 166–67 (partial damage); Clark, *Impartation*, 21 (tunnel vision), 121, 125, 133, 166, 169 (several), 211 (six instances, including one case where new corneas and pupils were formed); idem, *Mind*, 53 (also [36] healing of lesser visionary impairment, so that glasses were not needed); Wagner, *Acts*, 202. (I recognize that not quite all the above locations are Majority World or are weak in medical resources.) See further discussion in Keener, *Miracles*, 514–20 (and for the West, 521–22).

654. E.g., Bungishabaku Katho (university president, Democratic Republic of Congo), interview, March 12, 2009; Flint McGlaughlin (Director of Enterprise Research at the Transforming Business Institute, Cambridge University), personal correspondence, Feb. 6–7, 2009 (on an event in India also attested by Robin Shields, personal correspondence, Feb. 7, 8, 2009); Gebru Woldu (Ethiopia), interview, May 20, 2010; Gary A. Dickinson (Congo), personal correspondence, June 3, 2010. Other interviews include Chester Allan Tesoro (Philippines), interview, Jan. 30, 2009; Bruce Collins (concerning an experience in Kenya), phone interview, April 11, 2009; Jacob Beera (India), personal correspondence, Nov. 2, 2009; for a nonblindness eye condition, Joy Wahnefried (United States), personal correspondence, Nov. 4, 5, 6, 8, 20, 26, 2009 (with documentation dated June 8, 2006; Oct. 16, 2009; cf. Brown, *Testing Prayer*, 129–31). Cf. Keener, *Miracles*, 752–56.

655. Parker, "Suffering," 216 (a firsthand account); Gardner, *Healing Miracles*, 31–35 (where the sight returned to better than its pre-accident state, 34; cf. also the medically inexplicable disappearance of a scar in the eye, 15); Harris, *Acts Today*, 8, 18, 28–29, 47–49, 82, 159–60; Jackson, *Quest*, 254–55; cf. cataracts in Ogilbee and Riess, *Pilgrimage*, 43; historically, Duffin, *Miracles*, 61.

656. This is intended as an argument against the a priori assumption that such claims can never stem from eyewitnesses, not an argument against specific literary claims as to whether a particular healing claim is traditional or redactional.

657. Luke's "like [*ὡς*] scales" fits his usual historical caution (cf., e.g., Luke 3:22; 10:18); similes (e.g., 11:44; 17:6) were common enough in ancient literature and rhetoric (see, in some detail, Anderson, *Glossary*, 79–81).

658. Hobart, *Medical Language*, 38–39, noting this use for the verb and also the more regular use of *λεπίς* for scales or particles falling off the body in skin diseases (cf. "leprosy"). Cf. also *squama* in eyes in Pliny E. N.H. 29.8.21 (Fitzmyer, *Acts*, 429). Hartsock, *Sight*, 191–92, notes that the language is not specifically medical (preferring dragon associations, 192–95).

eyes (11:12 LXX).⁶⁵⁹ Medically, if the text refers to something like actual scales, it could involve “the crusts of dried secretion” building up around his eyes while he was blind.⁶⁶⁰

(5) *Saul’s Baptism and Restoration (9:18–19a)*

Saul “rises” and is baptized,⁶⁶¹ fitting the instructions in Acts 22:16 (as if Luke knows a fuller conversion narrative—whether written or, more likely, oral—but parcels out different elements of it to different locations). Damascus offered an abundance of locations for baptisms, regardless of the physical or volitional availability of any Jewish mikvaot.⁶⁶² Perhaps the most obvious location is the river Barada, which runs east-west through Damascus, close to Straight Street.⁶⁶³

For taking food when encouraged (as often in ancient texts, e.g., *y. Ber.* 2:7, §3), cf. also Acts 27:36. As here, eating offers strength (cf. Acts 27:33–34; 1 Sam 14:29–30). Yet Paul’s taking food here also signifies something further. Food connotes fellowship in Luke-Acts, including with Gentiles (Acts 11:3); that others eat with Paul indicates their new relationship as siblings in Christ (cf. 9:17).

2. Saul Begins Ministry and Faces Conflict (9:19b–31)

In 9:19–30, Luke offers a first sample of Saul’s controversial ministry. As predicted (9:16), the converted persecutor faces persecution. He faces opposition from his own people in both Damascus (9:19b–25) and Jerusalem (9:26–30). In both cases, his fellow Jewish followers of Jesus help him escape.

a. *Opposition to Ministry in Damascus (9:19b–25)*

On Damascus, see comment on Acts 9:2. From Paul’s writings, we gather that Luke omits most details concerning a formative period in Paul’s life here, a period that Luke, if he knows of it, might consider less strictly relevant to Paul’s call to the Gentiles. Nevertheless, Luke preserves enough of the details to provide a fitting parallel between Jesus and his apostle to the Gentiles. If we compare the programmatic scene of Luke’s Gospel, Jesus faces similar opposition. Witherington sketches out the parallels:⁶⁶⁴

Jesus in Luke 4:16–30	Paul in Acts 9:20–25
Opens ministry with a message in a synagogue	Opens ministry with messages in synagogues
Audience is astonished (4:22)	Audience is astonished (9:21)
Is this not the son of Joseph? (4:22)	Is this not the one who opposed Christians? (9:21)
Jesus escapes violent response (4:28–30)	Paul escapes violent response (9:22–25)

659. Tob 11:13 in the NRSV. Most recognize the imagery of Tobit here (Lake and Cadbury, *Commentary*, 104; Haenchen, *Acts*, 325; Bruce, *Commentary*, 201n35; Fitzmyer, *Acts*, 429). The LXX elsewhere uses the noun for scales (Lev 11:9–12; Deut 14:9–10) and the verb for peeling back (Gen 30:37–38) or prying loose (1 Macc 1:22).

660. Wilkinson, *Healing*, 159.

661. Some have argued that Paul was a special case, remaining unbaptized like the first apostles, and that Luke demotes him and separates him from the first apostles by giving him subsequent believers’ baptism (see discussion in Fuller, “Baptized”), but this view, though not historically impossible (given the not unexpected silence of Paul’s letters on the subject), dismisses Luke’s testimony on the basis of the weakest of speculations. Paul was a subsequent believer and would hardly have been treated differently.

662. Our most abundant evidence for mikvaot is from Jewish Palestine, and Acts 9:20–23 does not suggest that they would have been available for Paul’s immersion as a member of the Jesus movement, in any case.

663. On this river, see, e.g., Finegan, *Apostles*, 58 (noting that the oldest part of Damascus lay on the river’s south side, in what is the southeastern part of the modern city).

664. Witherington, *Acts*, 320. See further Neiryneck, “Luke 4,16–30,” 359–63.

The specific component of opposition to ministry to the Gentiles, though important in Luke 4:25–27, is not repeated here, whether because Luke will treat it later (Acts 22:21–22) or because he simply had no historical tradition that Paul made an issue of his calling to Gentiles at this point.⁶⁶⁵

I. COMPARING PAUL AND LUKE

Although they write from quite different perspectives (making Luke’s dependence on Galatians here doubtful), the autobiographic *narratio* of one of Paul’s own letters confirms the outline of Luke’s account here, casting light on the accuracy of Luke’s sources even this early in Paul’s career. Despite differences in detail (noted in comments on verses in Acts), this passage (and some that follow) comports well with the one passage offered in Paul’s letters that provides a secure, extended chronological sequence for his life (the events whose sequence is explicit or strongly implied specifically in Gal 1–2 are asterisked):

Event in Galatians	Gal 1:17–2:1 (and other epistles fitting Galatians’ chronology)	Acts 9:19–30; 15:2 (Acts 9:27 presumably corresponds with Gal 1:18–19)
*Paul persecuted Christians	Gal 1:13–14; cf. 1 Cor 15:9; Phil 3:6; 1 Tim 1:13	Acts 7:58; 8:1–3; 9:1–2
*Conversion near the city of Damascus	Gal 1:17 (implied)	Acts 9:3, 19
*Conversion through encountering the risen Christ	Gal 1:12; cf. 1:15–16; 1 Cor 15:8	Acts 9:3–6
*Time in Arabia	Gal 1:17; cf. 2 Cor 11:32	—
*Damascus three years later	Gal 1:17	Acts 9:23 (“many days later”)
Escapes Damascus, let down in a basket from the wall	2 Cor 11:32–33	Acts 9:25
*Visits Jerusalem	Gal 1:18–19	Acts 9:26–29
*Syro-Cilicia	Gal 1:21	Acts 9:30 (Caesarea, probably briefly; Tarsus); 11:26; 13:1 (Syrian Antioch)
Syrian Antioch as Paul’s home base (or at least a place where his ministry is accepted on a par with Peter’s)	Cf. Gal 1:21; Gal 2:11 (Paul a well-known minister in Antioch)	Acts 11:26; 13:1; 14:26; 15:22–23, 30, 35; 18:22
Evangelism in and near the southern part of the province of Galatia	Gal 4:13–14; cf. 1 Cor 16:1; cities in 2 Tim 3:11	Acts 13:14–14:24
Troubles with Judaizers in Antioch	Gal 2:11–14 (by implication; this event probably occurs after 2:1–10)	Acts 15:1–2
*Return to Jerusalem after fourteen years’ absence†	Gal 2:1	Acts 15:2 (some scholars prefer Acts 11:30)

† Riesner, *Early Period*, 232 (noting that the Antioch incident of Gal 2:11–12 could be chronologically before the Jerusalem Council of Gal 2:1–10 but that this is debated; Paul is certainly in Antioch earlier, Acts 11:26; 13:1; 14:26).

From Paul’s writings we learn that Luke compresses the narrative here so as to omit parts of three years (a total of one to three years) of events not relevant to his story (if Luke knew of this period). Such compression or omission was acceptable historical and rhetorical practice.⁶⁶⁶ Luke’s narrower purpose and theme do not allow

665. Since Paul was addressing synagogues initially (Acts 9:20), he had no reason to raise the Gentile issue unless he specifically wished to provoke hostility; his claims about Jesus would prove controversial enough here. His commitments apparently develop by 22:21.

666. See Satterthwaite, “Acts,” 345 (citing esp. Lucian *Hist.* 56–57; cf. also *Hist.* 27–28; Cic. *De or.* 3.27.104–5; 53.202–3; Quint. *Inst.* 8.4; Longin. *Subl.* 11–12). The concise summary in Libanius *Narration*

space to narrate every detail of Paul's life, even if he knew all of it.⁶⁶⁷ Some scholars have also argued plausibly that Luke simply did not know of this period and that unlike hagiographers a century later, he omitted, rather than invented, what he did not know.⁶⁶⁸ (Oral history always leaves large gaps; this is the nature of oral history, and omission is much better historiography, by modern standards, than fabricating data to fill such gaps would be.)⁶⁶⁹ More often Luke provides us details missing in Paul's letters, but the reverse is true in this instance.

What Luke omits is not, strictly speaking, part of the "teaching" of Acts to which a commentary must attend, but because Acts is a historical monograph (and because commentaries on Acts also serve those interested more generally in the history of early Christianity), it also makes sense to compare fuller historical data where it is available. (One may compare Luke's compression of material in Acts 20:1–5, the historical details of which we may fill in amply from the Corinthian correspondence.) What Paul's writings add are especially some of the details behind Luke's "many days" in 9:23.

Paul declares that after being in Nabatean Arabia, he *returned* to Damascus (Gal 1:17, *πάλιν ὑπέστρεψα*), implying that he had been there before, apparently before he went off to Arabia after his conversion.⁶⁷⁰ His conversion was apparently between just more than one and up to three years (parts of each of three years) before going to Jerusalem, apparently from Damascus (1:18). How much time he spent in Nabatea and how much in Damascus is unclear, though Paul sounds as though more of the time was spent in Damascus after his return from Nabatea (which would suggest a gradual, rather than sudden, escalation of the hostility in Acts 9:19–24). Did Paul go to be disciplined by Jewish believers in Nabatea shortly after his conversion (cf. 9:20, "immediately") because of initial hostility in the Damascus synagogues (cf. 9:21), which he later expected to have died down? Or (though this is not a mutually exclusive option) did he attempt to begin fulfilling his call by trying to evangelize Nabatean Gentiles (which might fit the theme of Gal 1:16–17), something Luke would have reason to omit if it was unsuccessful?

Neither Paul nor Luke satisfies our curiosity here, but if Paul spent a long time in Damascus after being in Nabatea, the opposition turned deadly only after his return (Acts 9:23). Thus it is possible that Luke omits a relatively brief foray into Nabatea,⁶⁷¹ and Paul's longer Damascus ministry afterward is covered in the "many days" of 9:23. Still, Paul's Nabatean ministry must have been long enough, at least, to provoke the hostility of the Nabatean community in Damascus (2 Cor 11:32).

Galatians' "Arabia" is generally understood with reference to the Nabatean Arabs, whose territory ran east and south of Damascus, running south of Judea. See fuller

27 conspicuously connects events that in mythical legend spanned over a decade. Laistner, *Historians*, 58–59, notes that Sallust telescoped events in his historical monographs (though perhaps not in his larger works where more space was available); cf. also, e.g., Matt 8:5–6 with Luke 7:3–5; Matt 9:18 with Mark 5:23, 35.

667. With, e.g., C. Williams, *Acts*, 23.

668. Hengel and Schwemer, *Between Damascus and Antioch*, 106 (contrasting *Acts of Paul* and the *Pseudo-Clementines*, which omit gaps).

669. *Ibid.*, 106; Hengel notes (385n554) that his 1992 obituary on classicist G. Zuntz included information on his early life that even Zuntz's daughter did not know, but that the biographic information still had gaps, even with help from "the family and from older friends." My wife, a historian by training, has faced the same problem when researching even some recent Congolese ministers whom her family knew.

670. The aorist, as opposed to the imperfect, suggests that he returned to Damascus only at the end instead of using it as a periodic base for reaching Nabatea; one should not press too much from Koine verb tenses if other evidence points elsewhere, but in this case, we have little other evidence.

671. Bede *Comm. Acts* 9.26 (Martin, *Acts*, 112) suggests that Luke may have omitted mentioning Nabatea because Paul did not preach much there (an idea that he finds suggested also by Acts 26:20).

comment on these and Nabatean opposition at Acts 9:23–25 below. Luke is aware of at least the Ituraeans, an Arab people (cf. Luke 3:1).⁶⁷²

II. SUCCESS IN THE SYNAGOGUES (9:19B–22)

Paul is “with the disciples” for some time (Acts 9:19b) before he begins preaching. Perhaps he is learning from them before preaching (something Paul would not have emphasized in Gal 1:12); in this case, his learning from them would highlight how quickly Paul went from solely learner to especially teacher (cf. “his disciples” in Acts 9:25). Whether it suggests learning or not, it does suggest becoming part of the Christian community.⁶⁷³ The phrase also contrasts the welcome he received from disciples in Damascus with the mistrust he later encountered in Jerusalem, where he had been known as a persecutor (9:26). Perhaps most clearly, it emphasizes that these believers welcomed him (as the apostles did in 9:27–28 once they could trust him) despite his past as a persecutor (cf. Luke 6:27–29; 11:4; 17:3–4), an attitude illustrated elsewhere in Acts (e.g., Acts 21:8).

Paul preaches Jesus as God’s Son in the synagogues, which, like Ananias and his “many” oral sources (9:13), had already heard of Paul’s mission. Paul’s practice of starting in the synagogues here (9:20) sets a pattern for his ministry in the rest of Acts (13:5, 13–16; 14:1; 17:1; 18:4; 19:8; cf. 16:13, 16; 28:17).⁶⁷⁴

(1) *Son of God* (9:20)

C. H. Dodd sees this summary of Paul’s teaching as authentic, arguing that “Son of God” is part of the Pauline kerygma not stressed in the kerygma of Acts’ speeches; notably, Paul is the first person in Acts to proclaim Jesus as “God’s Son.”⁶⁷⁵ This perspective is mostly right but needs to be nuanced. It is not Paul’s most characteristic title for Jesus by any means (“Lord” appears more than ten times more frequently),⁶⁷⁶ but “Son of God” is indeed a Pauline expression (Rom 1:4; 2 Cor 1:19; Gal 2:20; Eph 4:13), even more common as simply “Son” or “his Son” (Rom 1:9; 5:10; 8:3, 29, 32; 1 Cor 1:9; 15:28; Gal 1:16; 4:4, 6; Col 1:13; 1 Thess 1:10).⁶⁷⁷

Luke speaks of Jesus as God’s Son in Luke 1:32, 35 and also includes earlier gospel tradition to this effect in 3:22; 4:3, 9, 41; 9:35; 10:22; 22:70 (which Luke is ready to comment on theologically, 3:38). Luke clearly affirms the idea but never introduces it into speeches or the direct speech of characters in Acts except at Acts 9:20, the exegesis in 13:33, and possibly by implication in 20:28 (depending on the variant reading).⁶⁷⁸ (These other speeches are also attributed to Paul.)

Thus Dodd seems to be right, for the most part, that this is a Pauline expression here. Yet it can be explained in one of two ways. The first is that Luke knew directly from Paul or from another source that Jesus’s sonship was central to Paul’s preaching in Damascus. The second is that Luke may have simply known it to characterize Paul’s Christology in general and uses the practice of *prosopopoeia* to provide a realistic summary of what Paul would have taught in Damascus. (If Luke traveled with Paul or knew those who did, he could provide realistic speech in character for

672. On Ituraeans, see Healey, “Ituraea.”

673. Cf. Acts 14:28 (using instead *σὺν*, as in Mark 8:34); perhaps Luke 22:11.

674. Johnson, *Acts*, 170. For this pattern, see esp. comment on Acts 13:5.

675. Dodd, *Preaching*, 25.

676. See Hengel, *Son*, 7–10, esp. 7; Longenecker, *Christology*, 98.

677. On “Son” in Paul, see, e.g., Hurtado, “Son”; Witherington, “Christology,” 109.

678. If we accept Acts 8:37 as authentic, Luke’s eunuch apparently learned about Jesus’s sonship shortly before Paul’s preaching (and we cannot test Philip’s idiom from sources external to Acts), but the variant is almost certainly inauthentic. Matera, *Theology*, 67, notes that Luke identifies “Son of God” with “Christ” (Luke 4:41), preferring the latter title in Acts.

him.) Prosopopoeia and ethopoeia were favorite rhetorical exercises, and some writers excelled in this skill; for example, Alciphron wrote letters as if from fishermen, farmers, parasites, or courtesans.⁶⁷⁹ In either case, Luke seems to reflect knowledge of Paul's usage here.

Excursus: Son of God

What did Paul mean by calling Jesus God's Son? Luke evokes earlier use of the title in his Gospel (Luke 1:32, 35) but later supplies the exegesis behind the Christology in Acts 13:33, which he also attributes to Paul.⁶⁸⁰ Speaking of God's Messiah as his "son" may not have been common in early Judaism, but it was certainly intelligible.⁶⁸¹

Scripture and Jewish tradition apply the "son of God" title to those who belong to God,⁶⁸² to Israel (most commonly),⁶⁸³ and to a righteous person in general.⁶⁸⁴ Favorite members of Israel—for example, Moses—could be called God's "son";⁶⁸⁵ in another rabbinic text, a heavenly voice identifies a beloved rabbi as his son.⁶⁸⁶ Angels, too, could be called "sons of God,"⁶⁸⁷ although, given that angels were not human and "son of God" bore many other senses, probably no Jew would interpret a human as "God's son" in the angelic sense without an explicit statement to that effect in the narrative.⁶⁸⁸ Yet the problem with most "son of God" parallels, both Hellenistic and Jewish, is that early Christians controversially proclaimed Jesus as not merely *a* son of God, but *the* Son of God, his beloved and unique Son.⁶⁸⁹ How did the early Jesus movement employ the title?

Often the most appropriate background of the term when applied to Jesus was the specific sense "Messiah." This need not rule out figurative nuances of sonship such as obedience, submission,⁶⁹⁰ intimacy, and delegated authority,⁶⁹¹ which would

679. On prosopopoeia and related exercises, see, e.g., Rowe, "Style," 144; fuller comment in the commentary introduction (Keener, *Acts*, 1:284–86).

680. Cf. Knowing, "Acts," 238.

681. I have abbreviated what follows from Keener, *John*, 294–96, 401–2 (more broadly, see also 291–94 on the Hellenistic usage).

682. Hengel, *Son*, 21–23.

683. Longenecker, *Christology*, 97, cites Exod 4:22–23; Hos 11:1; Isa 1:2; 30:1; 63:16; Jer 3:19–22; Tob 13:4; Sir 4:10; Pss. Sol. 13:9; 17:27–30; 18:4; *Jub.* 1:24–25; 2:20; 1QH^a XVII, 35–36; Wis 11:10; *m. 'Ab.* 3:15; *Sipra Behuq.* pq. 2.262.1.9; *Sipre Deut.* 43.16.1; 45.1.2; 96.4.1; 308.1.2; 352.7.1; 'Abot R. Nat. 35, §77; 44, §124 B; *b. Šabb.* 31a, 128a; *Pesiq. Rab Kah.* 9:5; 14:5; *Exod. Rab.* 46:4–5; *Num. Rab.* 5:3; 10:2; *Deut. Rab.* 1:6; 3:15; 7:9; *Lam. Rab.* proem 23; *Lam. Rab.* 3:20, §7; *Pesiq. Rab.* 27:3. Besides these, cf. the singular in Exod 4:22; Hos 11:1; Wis 18:13; *Sipre Deut.* 43.8.1; *b. Šabb.* 31a; *Yoma* 76a; *Exod. Rab.* 15:30; *Lev. Rab.* 10:3; *Num. Rab.* 16:7; *Deut. Rab.* 2:24; 10:4; *Lam. Rab.* proem 2; *Lam. Rab.* 1:17, §52; *Song Rab.* 2:16, §1; *Pesiq. Rab.* 15:17.

684. Wis 2:13, 16, 18; 5:5; cf. 4Q416 2 (+ 4Q417) II, 13 (in DSSNT 384); 4Q418 81 5; Vermes, *Jesus the Jew*, 195–97.

685. *Sipre Deut.* 29.4.1, a parable. *1 En.* 105:2 could refer to God's son but most likely (106:1) refers to Enoch's son Methuselah.

686. *B. Ber.* 7a (R. Ishmael); *y. Mo'ed Qat.* 3:1, §6 (R. Eliezer); cf. Honi in *b. Ber.* 19a; *y. Ta'an.* 3:10, §1; cf. *b. Sukkah* 45b (R. Simeon ben Yohai). On "charismatic rabbis," see Vermes, *Jesus the Jew*, 210–11; but Witherington, *Christology of Jesus*, 153, correctly notes that the expression, when applied to "charismatic rabbis," is not used as distinctively as in early Christianity.

687. Vermes, *Jesus the Jew*, 200. Cf. El's court in Parker, "Sons of Gods," 794–95.

688. Later rabbinic polemic explicitly emphasizes that the "son" of Dan 3:25 was merely an angel (*y. Šabb.* 6:9, §3).

689. So also Hengel, *Son*, 24, on Greek usage.

690. Hooker, *Preface*, 55–65, sees this sense (which is plausible), rather than messiahship, in Paul, but the options are not mutually exclusive (cf. Rom 1:4).

691. See Harvey, *History*, 172–73.

be part of the metaphor in a Jewish context. Nathan's oracle in 2 Sam 7:14 (cf. 1 Chr 17:13; 22:10; 28:6) indicated that God would adopt David's royal descendants (his "house," 2 Sam 7:11), starting with Solomon, as his own sons, perhaps borrowing this special status from Israel (Exod 4:22) and from divine adoption of kings in other ancient Near Eastern cultures.⁶⁹²

The temple cultus came to celebrate this promise (Pss 2:7; 89:26–29);⁶⁹³ the prophets reminded God's people of the qualification of obedience (cf. 2 Sam 7:14b), even suggesting that the tree would become a stump and the house a tent until a time of restoration came (Isa 11:1; Amos 9:11). But the prophets also recognized the promise to David (e.g., Isa 55:3; Jer 33:17–26; Ezek 34:23–24; 37:24–25; Zech 12:10), sometimes fulfilled in his lineage or his ultimate descendant, who would rule forever, in Isaiah's words, as a "mighty God" (Isa 9:6–7), a title applied in the context to YHWH himself (10:21; cf. Jer 23:5–6, but note Jer 33:16; Zech 12:8).⁶⁹⁴

Although hope for an eschatological anointed leader or leaders ran high, and the Davidic Messiah remained prominent in many expectations, a description of him as "son of God" was no more common than was people's having in mind Dan 7 when they used the more generic expression "son of man."⁶⁹⁵ But in at least some circles, 2 Sam 7:14 was interpreted with direct reference to the Davidic Messiah as "son of God" (note some clear Qumran examples).⁶⁹⁶ Some other texts (e.g., 4Q369 I II, 6–7⁶⁹⁷ and, according to some views, also 4Q246 II, 1)⁶⁹⁸ have been thought to apply the phrase similarly.⁶⁹⁹ Hints may be found that others also understood Ps 2 messianically in the period of formative Christianity.⁷⁰⁰ As in the NT generally (Rom 1:3–4; Heb 1:5; 5:5), the OT title applied especially to enthronement rather than birth (see comment on Acts 13:33).

692. Dahood, *Psalms*, 11–12; cf. de Vaux, *Israel*, 109; Harrelson, *Cult*, 86–87; Fossum, "Son of God," 788.

693. See Bright, *History*, 225.

694. Given the prevalence of divine kings in parts of the ancient Near East (de Vaux, *Israel*, 111; even Akhenaton in "The Amarna Letters" passim [ANET 483–90]), one sin to which Israel's and Judah's rulers had not succumbed (de Vaux, *Israel*, 113), one may question whether Isaiah would have risked implying that God would be Israel's ultimate Davidic king if that was not what he meant (*pace* Berger and Wyschogrod, *Jewish Christianity*, 43; on the structure, cf. de Vaux, *Israel*, 107; Kitchen, *Orient*, 110). This idea admittedly lacks parallels elsewhere in the Hebrew Bible, but explicit messianic material is scarce in it to begin with. (*Tg. Isa.* 9:6 deliberately alters the grammar to distinguish the Davidic king from the Mighty God.)

695. Before the Qumran texts, indeed, scholars generally agreed that first-century Judaism did not employ "son of God" as a messianic title, in contrast to some OT usage (see Conzelmann, *Theology of Luke*, 76–77; Jeremias, *Parables*, 73; Montefiore, *Gospels*, 1:85; Stevens, *Theology*, 104–5). Bultmann, *Theology*, 50, does recognize its use in OT messianic vocabulary before its later Hellenistic "mythological" sense.

696. 4QFlor I I, 10–11; 1QSa II, 11–12; see Longenecker, *Christology*, 95; Stanton, *Gospels*, 225; García Martínez, "Sonship"; further on 4QFlor, see Brooke, "4Q174." Vermes, *Jesus the Jew*, 198–99, rightly notes that 1QSa (1Q28a) II, 11–12 is not as clear as 4QFlor; Hengel, *Son*, 44, also cites a Daniel apocryphon as yet unpublished at the time of his book. 4Q174 I I, 10–11 uses 2 Sam 7:11–14 in an explicitly messianic context (4Q174 I I, 11–13; the passage may also stress, as Bergmeier, "Erfüllung," argues, the eschatological elect and their temple).

697. See Evans, "Son"; idem, "Prayer of Enosh" (including 4Q458); Abegg, "Introduction to 4Q369," 329.

698. Collins, "Son of God"; and, noting also the close parallels with Luke 1:33–35, both Evans, "Son of God Text" (on 4Q246), and Kuhn, "Son of God." Fitzmyer, "Son of God," applies it positively to a coming ruler but not in a messianic sense.

699. But recovery of the context in the latter case (4Q246 I, 5–9; II, 2–3) suggests to some that 4Q246 is simply polemic against pagan claims for divine sonship (Fabry, "Texte"; Cook, "4Q246").

700. Cf. Bons, "Psaume 2." *Pss. Sol.* 17:23 uses Ps 2:9 in a messianic passage, although "son" (2:7) is not mentioned. Gero, "Messiah," finds "son of God" in 4 *Ezra* (cf. also 4 *Ezra* 13:37, 52), but more scholars think that the Greek behind the passage read "servant" (Jeremias, *Parables*, 73n86); the Ethiopic, an Arabic version, and the Armenian omit "Son" (*OTP* 1:537 n. e).

(2) His Hearers' Amazement (9:21)

Although one should not read too much into such a common phrase (roughly eighteen times in Luke-Acts), the repetition of οὗτός ἐστιν from Acts 9:20 soon afterward in 9:22 may connect Paul (and his imminent sufferings; see 9:16) with the Christ whom he proclaimed (9:20). The phrase has not appeared since 8:10, nearly fifty verses (roughly nine hundred words) earlier, but after occurring three times in these three successive verses (roughly sixty-seven words total) does not appear again until 10:36, roughly fifty-seven verses later (roughly one thousand words later). Perhaps for them Saul is the issue, whereas for Saul, Jesus is the issue.⁷⁰¹

More critical is that the audience of Jesus's inaugural sermon in Luke's Gospel responded with similar questioning ("Is this not Joseph's son?" Luke 4:22), based on authentic tradition (Mark 6:3).⁷⁰² Employing his historian's freedom to summarize in his own words, Luke parallels the response to Paul with that to Jesus. This does not require us to doubt that Paul's hearers responded in this way. Whether Luke has a source (probably Paul himself) or simply infers that people responded this way, the inference certainly would seem to be a legitimate one.⁷⁰³

Paul himself reports to the Galatians the similar amazement of Judean Christians at his conversion (Gal 1:23–24) and may well have reported the surprise of hearers in Damascus as well (or at least approved of such an inference on Luke's part). In favor of Luke perhaps reporting speech based on even Paul's very words (heard from Paul's subsequent preaching or other sources), the only other NT use of ποροθέω is Paul's report of his persecution of Christians (Gal 1:13) and his summary of Judean believers' response to his persecution (1:23). In any case, its only appearances in the LXX (another possible source if Luke knows 4 Maccabees) are in the relatively late 4 Macc 4:23; 11:4, reporting Gentile persecution of Jews. That Paul's persecution of those he thought unfaithful to Judaism should be described (by himself and by Luke) in terms some Jews used to describe pagan repression of Judaism is the epitome of irony, but in keeping with the thought of both NT writers.

Given that Luke omits the role of Aretas's ethnarch (2 Cor 11:32),⁷⁰⁴ Luke surely emphasizes the tragic-ironic Jewish character of Saul's opposition here, as in Jerusalem (Acts 9:29). This emphasis belongs to Luke's overall picture of the shift in focus from heritage to mission; Israel retained privilege and priority, but frequent rejection justifies preaching to the Gentiles as well.

(3) Saul's Success (9:22)

That Saul kept "increasing in strength"⁷⁰⁵ recalls earlier Lukan characters, John (Luke 1:80) and Jesus (2:40, 52). The disciples were also increasing (probably numerically) in Acts 6:1. The phrase might also suggest rhetorical strength for the debates (cf.

701. One could argue that the term was simply on Luke's mind; but the correspondence between 9:20 and 9:22, at least, must be deliberate, with roughly equivalent force in these instances.

702. On the level of Luke-Acts, the question of Acts 9:21 functions rhetorically (on the ancient use of rhetorical questions, see, e.g., Rowe, "Style," 139–40).

703. In northern Nigeria in July 2000, I was told of a jihadist who had recently planned to lead a surprise attack on Christians but had been converted by a dream (in which Jesus appeared to him) the night before the planned attack. Naturally, according to this report, this conversion did not go over well with his previous comrades, and he was now said to be in hiding in the home of someone known to my informant. Similarly, Trousdale, *Movements*, 164–65, recounts the public preaching of a converted persecutor and the potentially fatal hostility he suffered. Segal, *Convert*, 25, notes that those from whose religion one is converted always resent the conversion.

704. Despite his usual interest in rulers, where he has sources about them (cf. Luke 2:1–2; 3:1–2).

705. The particular term appears nowhere else in Luke-Acts but is common in Pauline literature, where it applies to Abraham's faith (Rom 4:20), Paul's ministry (Eph 6:10; Phil 4:13; 1 Tim 1:12; 2 Tim 4:17), and an exhortation to Timothy (2 Tim 2:1). It appears in some MSS of Judg 6:34 (for Gideon; cf. Johnson, *Acts*,

18:24). Paul’s successful debates here foreshadow those of himself (19:9–10) and others (18:28) later in Acts, such debating being a strategy probably learned from Stephen (6:10; cf. 7:2–53, 58). Damascus had a massive Jewish community (see comment on Acts 9:2; on κατοικέω, see comment on Acts 2:5).

III. SAUL ESCAPES THE FIRST PLOT (9:23–25)

Even if the synagogues of Damascus had not been persecuting Jesus’s followers, Paul’s radical allies in Jerusalem (cf. 6:9–10) would know of his conversion, and some might well seek action against him. Some “plotted together” (συνεβουλεύσαντο) to kill him;⁷⁰⁶ although this is Luke’s only use of the term, the reader might think of the cognate verb in 5:33, where the apostles’ audience “wished” (ἐβούλοντο) to kill them, and other plots against him using different vocabulary (e.g., 23:12–15). Luke does not tell us how Paul “learned” of the plot (cf. likewise 20:3), but presumably, either it was an open threat (cf. perhaps 9:29–30) or a “leak” occurred (cf. 23:16, 30).

Just as the Pentecost crowd was divided (2:13, 41–42), so some Jews in both Damascus and Jerusalem heeded Paul (cf. “his disciples” in 9:25) whereas others plotted against him (9:23, 29; cf. “suffer” in 9:15).⁷⁰⁷ Nonbelieving Jewish opposition to Paul’s ministry becomes a pattern in much of the rest of Acts (13:45, 50; 14:2, 19; 17:2–5; 18:4–6; 19:9), though this picture should not be exaggerated (the response is positive in 17:11, unstated in 13:5; 17:17, and negative but shared with Gentiles in 14:5). Even where the recorded response is negative, much of the synagogue, indeed, followed Paul (17:4; 18:7–8; 19:9). The scandal is not that no Jews believed but rather that so many did not; for Luke, this simply continued the biblical pattern that God’s covenant people often had failed to heed God through history.

(1) Comparing Luke’s and Paul’s Accounts

Paul’s own writing confirms the accuracy of the basic event briefly reported by Luke here; in fact, Luke’s account here is closer to Paul’s description than usual when both mention the same event, possibly suggesting that Paul often recounted this story.⁷⁰⁸

The one significant difference between the two accounts, however, is the identity of Paul’s opposition:

Acts 9:23–25	2 Cor 11:32–33
Jews plotted to kill Paul (9:23)	Ethnarch tried to seize Paul (11:32)
Jews were watching the gates (9:24)	Ethnarch was guarding the city (11:32)
Let down in a basket from a wall (9:25)	Let down in a basket from a <i>window</i> in a wall (11:33)

The mention of a window in one case but not the other is not significant; if we should envision a house on the wall,⁷⁰⁹ a “window” in the wall is a reasonable specification of how they lowered him “through” a wall here.⁷¹⁰ Windows came in various shapes and sizes, but many were large enough to fit a person through (see extended comment

171). If it involves the Spirit (cf. Acts 1:8; 10:38; Parsons, *Acts*, 133, and Peterson, *Acts*, 313, both citing Judg 6:34; 1 Chr 12:18), it may suggest growth beyond Acts 9:17.

706. For the sense “plotting together” here, BDAG compares Jos. *Ant.* 8.379; *Test. Jud.* 13:4; in a somewhat different construction, Matt 26:4.

707. Spencer, *Acts*, 100.

708. Riesner, *Early Period*, 261–62. *Peristasis* catalogues sometimes inserted isolated episodes; this particular one may appear in 2 Cor 11 because Paul’s “lowering” balances his exaltation to heaven in 12:1–4 (cf. *Early Period*, 261). Paul’s lowering here employs the same term as in the large sheet lowered in the vision of Acts 10:11; 11:5, but this may not be significant (Luke 5:19).

709. So Bruce, *Corinthians*, 245.

710. This is a possibility whether we read διά with the genitive here as instrumental or with reference to place. The window might even project out from the wall, as in some houses in the region that were observed in the nineteenth century (Abbott, *Acts*, 115).

at Acts 20:9). Even in homes, however, windows open to the street tended to be on upper floors or high on the first floor, to avoid unwelcome ingress;⁷¹¹ on the wall, the basket would need to be let down from a potentially dangerous distance.

The opposition, however, requires further comment. Perhaps Luke altered the ethnarch to the Jewish community to fit a pattern of opposition to the gospel in his work;⁷¹² but we should remember that Luke elsewhere reports Gentile opposition as well, sometimes even partly because Paul is Jewish (Acts 16:20; 19:26, 33–34). If both sources of hostility existed (for various reasons), Luke might well mention only the one (even the possibly lesser one) that fit his account best, given the abbreviated form of the entire story in Acts. That is, Luke’s focus on Jewish opposition here fits his interests, but while this could mean that he invented it, it need not do so. In this case it seems likely that Luke has some reason to envision a significant Jewish component to the oppression (see the discussion and excursus below).

Should we be surprised if Paul’s radical change of mission and his preaching in the synagogues engendered some hostility? We know from Paul (from the same context, in fact) that he had been beaten in synagogues multiple times (2 Cor 11:24; cf. 11:26). (Far from exaggerating Jewish hostility, Luke omits these five synagogue beatings mentioned by Paul, which were received before the period depicted in Acts 20.)⁷¹³ Plausible motives are indeed easier to find for the Jewish opposition in Luke’s account than for the Nabatean opposition in Paul’s (though this is largely because of lack of information about the latter). As a Pharisee (Phil 3:5) and one advancing in Judaism (Gal 1:14), Paul was from Judea, not from Damascus; he was in the process of persecuting Jesus’s followers (1:13) when he had an encounter with Christ somewhere near Damascus (to which he “returns” after his foray in “Arabia,” 1:16–17). If Paul had any allies among fellow Jews in Damascus at all in his mission of persecuting Jesus’s followers, it is patently likely that he would inherit some opponents when he was converted.

There is no reason, however, that Jewish and Nabatean opposition could not make “common cause.”⁷¹⁴ It would be politically savvy for a Nabatean ethnarch to accommodate Jewish concerns⁷¹⁵ (or vice versa); if some of Jerusalem’s official Jewish leadership approved of a crackdown (as suggested in Acts 9:2), as Luke suggests, we might expect even further incentive to cooperate. If Paul incurred one group’s hostility, it is plausible that it would have sought the political help of other local factions.⁷¹⁶ As is the case in 9:26–30 when compared with Gal 1:17–20,⁷¹⁷ both Luke and Paul pursue their own emphases in recounting the event.

711. Note Herr, “Window,” 1068. One could have windows on each floor of a house later embedded into a new city wall (Packer, “Housing,” 80).

712. Harding, “Historicity of Acts”; Haenchen, *Acts*, 331.

713. Also Witherington, *Acts*, 322–23; cf. Ravens, *Restoration*, 247–49. It can be argued that beatings are not the same as death threats, but Paul’s writing also suggests the sense that he sometimes faced mortal danger from some of his people (Rom 15:31; cf. 2 Cor 11:26; 1 Thess 2:15); he sometimes also faced mortal danger from unspecified (but apparently Gentile) sources (2 Cor 1:8–10).

714. Fitzmyer, *Acts*, 434; Bruce, *Commentary*, 204; Hemer, *Acts in History*, 182.

715. Thrall, *2 Corinthians*, 770–71; cf. Matera, *II Corinthians*, 273. Although I am less convinced than most that the ethnarch governed Damascus, the case would be no less true for an ethnarch governing only the Nabateans there. A generation later, Damascenes suspected not only Jews but apparently their “sympathizers” (Hengel and Schwemer, *Between Damascus and Antioch*, 52, cite Jos. War 2.462–65), but in this generation, they were still accumulating sympathizers.

716. Luke later supports the portrayal of Paul as a political “hot potato” whose conviction would have functioned as a favor to a powerful political constituency (Acts 24:27; 25:9).

717. See Dunn, *Acts*, 126.

Excursus: Nabatean Opposition

Luke tells us only of Jewish opposition, but Paul's own recounting of the events reported here includes Nabatean opposition (2 Cor 11:32–33); those who knew much of Damascus might also infer Paul's contact with Nabateans there (some discussion of the Nabateans is also important for the mention of Arabia in Gal 1:17, noted above). Although discussing Nabateans does not therefore directly affect our understanding of Luke's message here, it does affect our reconstruction of the history for which some readers use Acts and Acts commentaries. (It is more explicitly relevant to the text at Acts 2:11, and so the reader unpersuaded of its relevance here may use this digression to illumine that passage exclusively if desired.) In principle it could also bear on the question of Luke's historical accuracy, which affects our understanding of a major part of Luke's purpose in writing (Luke 1:1–4; though in the final analysis it is best seen simply as something that Luke leaves out as less relevant to his story; see discussion on Luke's "many days" at the introduction to Acts 9:19b–25).

1. Traditional Nabateans

Josephus and others reckoned Nabateans among the Arabs (Jos. *Ant.* 13.10, 179).⁷¹⁸ Nabateans began as a small tribe but surpassed other Arab tribes because they could procure water in the desert; Petra was the center of their kingdom, and they controlled a caravan route that stretched especially to Damascus in the northeast and Sinai in the southwest.⁷¹⁹ Strabo claims that the Arabian region stretched as far south as adjacent to Ethiopia, with farmers in the northern regions and tent dwellers in the barren south (Strabo 16.4.2);⁷²⁰ many camel traders traversed the region (16.4.23). Others also defined Arabia broadly, covering various regions and tribes (e.g., Pliny *E. N.H.* 5.12.65–6.32.162), including tent-dwelling nomads (5.15.72; 6.32.143) but also town dwellers in Petra (6.32.144).

Nabateans controlled the trade in "spices from the Far East" and aromatic plants from South Arabia, and they were known for trade "as far east as Han dynasty China, which knew Petra as Rekem."⁷²¹ According to Strabo, they had few slaves and held common meals (with limits on drinking), but they did not eschew all possessions like the Essenes (Strabo 16.4.26). Pliny the Elder claims that Arabs wore turbans or

718. Josephus makes them his prime example of Ishmaelites (Millar, "Ishmael"). Patella, "Edom," suggests that the Edomites were absorbed into them. Though part of Edom bordered "Arabia" (Jos. *Ant.* 5.82; cf. Arab connections in 14.10; 16.292; 20.5; *War* 2.76), Edomites were Idumeans (*Ant.* 2.1), who were force-converted to Judaism (13.257; cf. 13.395; *War* 2.96, 566).

719. See Negev, "Understanding Nabateans"; for their water conservation, cf. also Lawlor, *Nabataeans*, 76–81; briefly, Tarn, Gray, and Spawforth, "Arabia," 135; for Petra's hydraulic engineering, see Bedal, "Desert Oasis"; Lindner and Hübl, "Daughter" (at nearby Sabra, Lindner, "Water Supply"); cf. Parr, "Dating" (arguing that Petra's hydraulic engineering could be as late as the mid-first century C.E. rather than some decades earlier); for their advanced technology, see also Hammond, "Patterns." (Petra apparently even had gardens; Macaulay-Lewis, "Pots.") Petra imported Eastern goods also via a Nabatean settlement in northwestern Arabia (Cockle, "Leuce Come"). On Petra more generally, see also Belt, "Petra."

720. Nabatean trade in the Arabian Peninsula is well known (e.g., Parr, "Arabian Peninsula," 163), and they controlled the only genuine kingdom in the northern Arabian Peninsula (Pahlitzsch, "Arabia," 940).

721. Graf, "Nabateans," 84 (noting inscriptions also found in places such as Rhodes and Rome); for Nabatean trade, see also Lawlor, *Nabataeans*, 68–76 (for their agriculture, 81–85; though their soil was said to be mostly barren, Pliny *E. N.H.* 5.12.65). Some of the Arabian luxury trade, however, apparently shifted to alternate routes to bypass Nabatea (Parker, "Transjordan," 237). Pliny complains about the wealth that southern Arabia ("Arabia Felix") acquired through trade (*N.H.* 12.41.82–84, esp. 84; for spices, 83; cf. 5.12.65).

left their hair uncut; most wore mustaches, but some retained beards as well (*N.H.* 6.32.162). Some stereotypes were negative. Many Nabateans had become pirates and brigands until suppressed by Roman soldiers in Syria (Strabo 16.2.20; 16.4.18, 21); Pliny thought that half remained brigands while the other half engaged in trade (*N.H.* 6.32.162).⁷²² Strabo complains that they deliberately deceived and misled the Romans till a deceptive guide was beheaded (Strabo 16.4.22–24); not good fighters, they were, he contends, “hucksters and merchants” (16.4.22–23).⁷²³

2. Nabatea and Damascus

Why would a Nabatean ethnarch be in Damascus, and over how many people would he assert authority? “Arabs” traditionally lived outside Damascus, especially in the mountainous regions (Strabo 16.2.20); the “Arabian mountains” stood above Damascus (16.2.16). Paul’s forays into “Arabia” could have gone much farther than this. Some ancient writers included in Arabia (a term often used broadly) not only traditional Nabatea but also all the cities of the Decapolis.⁷²⁴ Although Pompey politically “liberated” the Decapolis from Nabatean and Judean rule, the ties remained, and Trajan incorporated the region into a new Roman province called Arabia in 106 C.E.⁷²⁵ Especially if Paul spent time among urban Nabateans, he may have passed through the cities of the Decapolis.⁷²⁶ The entire area to the east of Judea could be described as Arabia (*Tac. Hist.* 5.6).

But we need not simply envision Jews guarding the inside of the gates and Nabateans the outside;⁷²⁷ many Nabateans also lived within Damascus. Excavations show a Nabatean settlement, originally outside Damascus’s walls, that came to be inside the new walls of the first century B.C.E. This became a Nabatean quarter, the name of which was preserved as late as the fourteenth century; it lay in the northeastern part of the city, between the Saint Thomas Gate and the old East Gate.⁷²⁸

Nabateans had trading colonies in Gerasa and elsewhere, and the ethnarch could represent Nabatean interests as leader of Nabatea’s trading colony in Damascus.⁷²⁹ This ethnarch would represent the Nabateans who controlled most caravan routes and hence would impact the economic life of Damascus. This evidence attests that the Nabatean ethnarch could have been very influential, a fact that would prove

722. Pliny’s bitter words about their accumulation of wealth through trade reflects partly his aristocratic disdain for the ethics of acquiring wealth through trade but also his disdain for Rome’s trade deficit: he complained that Romans made Arabs wealthy by buying expensive luxuries whereas the Arabs bought nothing from Rome.

723. Babr. 57 claims that Arabs (Ἀραβες) are all liars. “Arabians” also appear negatively in *Jos. Ant.* 15.123–24, 130, and their military skills thus in 14.31.

724. Riesner, *Early Period*, 256–57 (including East Jordan in *Let. Aris.* 119; *Jos. War* 1.89; 3.47; 5.160; *Ant.* 8.179; *Ag. Ap.* 1.133; 2.25; including even Damascus itself, *Justin Dial.* 78.10; followed by *Tert. Adv. Jud.* 9; *Marc.* 3.13). Cf. Pliny E. *N.H.* 5.16.74 (where Damascus belongs to the Decapolis); North, “Damascus.”

725. Parker, “Decapolis,” 129. See also Bowersock, *Arabia*.

726. See Ciampa, “Decapolis,” 268. Some emphasize Pella (Bietenhard, “Dekapolis”).

727. A view also doubted by Barrett, *Acts*, 466; Jewett, *Chronology*, 31; Riesner, *Early Period*, 84–85; pace Haenchen, *Acts*, 332n2. These scholars point out that if the Nabateans were a threat only outside the city, Paul would have been safer remaining inside (unless, as is possible, he had need to travel outside anyway). Guarding all seven of Damascus’s gates would demand no small contingent, and it would be easier if the interested Nabateans lived in the city.

728. Riesner, *Early Period*, 86; Le Cornu, *Acts*, 511. On ethnic enclaves within ancient cities, see, e.g., Rohrbaugh, “Pre-industrial City,” 144 (although this idea would be familiar to many urban audiences today).

729. Riesner, *Early Period*, 85–86, pointing out that the title “ethnarch” functioned this way for analogous Jewish officials (*Jos. Ant.* 14.117; Strabo 17.1.13); Knauf, “Ethnarchen”; cf. Bruce, *Apostle*, 81; idem, *Corinthians*, 245.

dangerous for Paul especially if some of his activity was in Nabatea. It is interesting, for what it is worth, that the pre-Arabic tradition for the site of Ananias's house is in this Nabatean quarter.⁷³⁰

Scholars differ in their understanding of the Nabatean ethnarch, other than concurring that there was one because in this period Paul, who was in a much better position to know than we or any of our other limited sources, reports that an ethnarch of Aretas governed the Nabateans in Damascus (2 Cor 11:32).⁷³¹ Aretas IV Philopatris reigned from 9/8 B.C.E. to about 40 C.E.⁷³² Because no coins of the emperor Gaius Caligula appear in Damascus, many think that Aretas ruled the city about 37 to 39 C.E.; Caligula changed earlier policies for client kings.⁷³³ (Some date the beginning of Aretas's rule even before Caligula, since the Roman coins break off about 34 to 62.)⁷³⁴ Classicists sometimes argue for this view on the basis of Paul's claim in 2 Corinthians.⁷³⁵ But this date is later than the Pauline chronology in Galatians suggests is likely,⁷³⁶ and reads more into Paul's language than is warranted. Further, there is no evidence that Nabateans controlled Damascus; neither the lack of Gaius's coins⁷³⁷ nor Paul's claims that an ethnarch exercised authority there need imply this conclusion.⁷³⁸

Damascus had a Nabatean ethnarch precisely because it contained a Nabatean minority community with its own rights.⁷³⁹ Just as the "ethnarch" of Jewish people in Alexandria did not rule all Alexandria but governed only its massive Jewish population,⁷⁴⁰ we would expect the ethnarch for Nabatea in Damascus to govern only the significant community of Nabateans there.⁷⁴¹ Those rights need not officially include arresting

730. Riesner, *Early Period*, 86. As noted above, the tradition may or may not be correct on this point; although a Jew could live in the Nabatean quarter, this seems statistically less probable than in the Jewish quarter, unless opposition to Jesus's followers was stronger there.

731. The Greek term "ethnarch" might be Paul's, but Nabateans did borrow titles for officials (e.g., chiliarchs and hipparchs) from Greek (Graf, "Nabateans," 83).

732. Riesner, *Early Period*, 75–77 (citing Jos. *Ant.* 16.294). On Aretas IV, see Lawlor, *Nabataeans*, 103–18 (noting [118] that the evidence is insufficient to decide the extent of his control over Damascus in this period).

733. Thrall, *2 Corinthians*, 766–70; Jewett, *Chronology*, 31–33; Bruce, *Apostle*, 81; Fitzmyer, *Acts*, 433 (tentatively); Taylor, "Ethnarch"; Hemer, "Observations," 4 (tentatively); Furnish, *II Corinthians*, 521 (as one among several possibilities); Barrett, *2 Corinthians*, 303 (as a possibility); idem, *Acts*, 466, though noting that the ethnarch, watching the city (2 Cor 11:32), might be operating outside it (cf. Barrett, *2 Corinthians*, 304; the same allowance is made by Héring, *Second Corinthians*, 87–88). Barrett also notes the view that Jewish Damascenes accused Paul to the ethnarch (citing Pesch, *Apostelgeschichte*, 315). Witherington, *Acts*, 80–81, accepts this view as plausible but notes that neither Acts nor Paul requires Aretas to be in authority. Campbell, "Anchor," suggests that Aretas took control in 36 C.E. after defeating Herod Antipas; but the connection between the events does not necessarily follow, and even 36 does not fit Pauline chronology easily (Campbell's chronology leaves little time for extended ministry in Antioch between Damascus and Cyprus).

734. E.g., Finegan, *Apostles*, 57; Hemer, *Acts in History*, 164 (tentatively); cf. Hemer, "Observations," 4; Héring, *Second Corinthians*, 87–88; Vardaman, "Life," 71–72 (arguing for Aretas IV's controlling Damascus till 37 C.E.). But as Wallace and Williams, *World*, 166, note, in view of the scarcity of evidence, this is at best an argument from silence.

735. See Healey, "Aretas"; Jones, Kuhrt, and Spawforth, "Damascus."

736. Given the association of Paul's earliest experience with Damascus in Gal 1:17, "this problem of chronology affects" Paul's account more than Luke's (Fitzmyer, *Acts*, 433). Some argue that Aretas controlled Damascus earlier (cf. Ramsay, *Other Studies*, 364).

737. The lack of coins is an argument from silence (though a stronger one than some if surrounding years have sufficient coins).

738. With Riesner, *Early Period*, 80–89.

739. *Ibid.*, 85–86.

740. See Jos. *Ant.* 14.117; 19.283. The Jerusalem high priest had been "ethnarch" of Judeans generally (13.214; 14.148, 151, 191, 194, 196, 200, 209, 211, 226, 306, 314, 317; 1 Macc 14:47; 15:1–2) but, as a leader of the Jewish people, not of Gentile cities where they resided; more broadly, Archelaus in *Ant.* 17.317; *War* 2.93, 115 (cf. also Ego, "Ethnarchos," 85), though here the ethnarch is apparently connected, rather than identified, with Aretas.

741. Cf. Matera, *II Corinthians*, 273.

those who are not members of one's own community, but ancient literature is full of groups acting in their own interests without official permission to do so. Particularly if local Nabateans and Jews colluded, their joint political interests could prove too compelling to make interference politically advantageous (if other authorities were even cognizant of the events); Paul was plainly making more politically influential enemies than friends.

Whether or not the Nabatean ethnarch ruled the city (archaeology might eventually settle the question), Damascus appears to be a less strictly policed environment in this period than many other parts of the empire,⁷⁴² a place where the Jewish community could cooperate with Jerusalem's high priest in arresting fugitives (Acts 9:2) and Nabateans could seek to arrest Paul.

Aretas was a Roman client king and, though less directly under Rome's control than most others, recognized Roman authority. Rome's Pompey had subdued an earlier Aretas, king of the Nabatean Arabs, in 63 B.C.E. (Appian *Hist. rom.* 12.16.106);⁷⁴³ now they were subject to Rome (Strabo 16.4.21). The emperor Augustus reluctantly confirmed the rule of Aretas IV two years after he began ruling Nabatea (Jos. *Ant.* 16.353–55).⁷⁴⁴ Aretas IV and Herod Antipas, tetrarch of Galilee, had a conflict that would have destroyed Antipas's kingdom but for Roman intervention.⁷⁴⁵ Nabatea remained powerful in the early Roman Empire,⁷⁴⁶ and tensions between Aretas and Antipas made Jewish-Nabatean cooperation all the more important.⁷⁴⁷ Such tensions may have also made the meddling of a Jewish preacher like Paul more problematic, if that was what Paul was doing (see discussion below). Jewish documents in Nabatean and other evidence (see discussion below) confirm close ties between the peoples.

3. Paul's Business in Nabatea

What was Paul doing in this region? Perhaps some believers who were scattered in hellenized Decapolis cities (Acts 8:4) welcomed their former persecutor to protect him from persecution in Damascus while his faith was growing (although he says, with good reason for his argument, that he consulted with no one, Gal 1:16). Yet some contend that Paul preached to the Nabateans, following his "Gentile mission" from the start.⁷⁴⁸ A number of scholars argue that if Paul incurred the hostility of the Nabateans (and hence that of the Nabatean ethnarch in Damascus, 2 Cor 11:32), it was probably "not by meditating in the desert . . . , but by preaching in flourishing Hellenistic cities such as Petra, Gerasa, Philadelphia, and Bostra, whose remains have recently been excavated."⁷⁴⁹ Despite Nabatea's topography, travel in much of

742. Finegan, *Apostles*, 57, claims that Roman coins break off from 34 to 62 C.E. This could at least suggest more local control and less Roman interference.

743. "Aretas" was a common name among Nabatean kings (see, e.g., Jos. *Ant.* 13.360, 392, 414; 14.14, 124; BDAG cites also inscriptions).

744. Riesner, *Early Period*, 76. Augustus had planned to bestow the region on Herod, but permitting Aretas to retain it proved more politically viable (because Aretas had already acted and Herod was aged, with potential complications concerning his heirs).

745. Jos. *Ant.* 18.109–16; cf. Kraeling, *John the Baptist*, 89.

746. See Fiema, "Roman Petra."

747. Judea and its Arab neighbors also had long-standing trade ties (e.g., *Let. Aris.* 114).

748. Murphy-O'Connor, "Paul in Arabia"; idem, "Doing in 'Arabia?"; cf. Bruce, *Corinthians*, 245.

749. Meeks, *Urban Christians*, 10; cf. Schnabel, *Missionary*, 63; Campbell, *Deliverance*, 145; more tentatively, cf. Bruce, *Commentary*, 204. Kim, *New Perspective*, 103, suggests that Paul interpreted his mission partly in light of Isa 42:11, hence to bring Kedar to God; Kedar was linked with Nebaioth (60:7) and hence, by at least some Jews, with the Nabateans (Jos. *Ant.* 1.220–21).

the Decapolis would have been facilitated by an adequate road system.⁷⁵⁰ Petra itself lay on (and hence controlled) two major routes, the one from Palmyra to Syria and the other leading to Gaza.⁷⁵¹

Nabatea's sedentary cities were geographically accessible and strategic. King Aretas lived in Petra ("Rock"), a steep, fortified site in the midst of the desert but with springs and gardens inside (Strabo 16.4.21).⁷⁵² If art, inscriptions, massive building projects, and architecture are clues, his reign was a high point of Nabatean civilization.⁷⁵³ The Nabateans did experience some challenges in this period when Arabian desert tribes seized control over the northern trade route between India and Arabia.⁷⁵⁴ But Nabatea had grown in prosperity, as may be illustrated by excavations of one spacious mansion (more than 1,000 sq. m.) with a scenic view.⁷⁵⁵

Some scholars suggest the possibility of missionary ventures there that were unreported by Luke because unsuccessful.⁷⁵⁶ Yet ministry in Nabatea would not have begun with, and perhaps never included, ethnic Nabateans. Among the many foreigners in Petra (Strabo 16.4.21) were many Jews.⁷⁵⁷ The Babatha archive and other Jewish sources employ not only Aramaic and Greek but also Nabatean, demonstrating significant Jewish and Nabatean contact in the region.⁷⁵⁸ The entire Decapolis area's "Hellenistic Jewish communities . . . with their God-fearing Gentile associates would have been attractive contexts for his ministry."⁷⁵⁹ Given Paul's practice of starting with the Jewish community (see comment on Acts 13:5), even his call to the Gentiles probably would have led him to the Nabateans only afterward at most, or through Jewish contacts there.

Nabateans themselves may have offered a more difficult beginning, being polytheistic.⁷⁶⁰ Strabo reports that they daily worshiped the sun, offering libations and

750. E.g., the Gerasa-Pella road, restored ca. 162 C.E. (see Atallah, "Milestone"); more generally, see Roll, "Roads." In addition, the ancient "king's highway" led south to the Gulf of Aqaba (Podella, "King's Highway").

751. Pliny E. *N.H.* 6.32.144 (estimating 600 mi. to Gaza; he says that Petra lies in a valley surrounded by impassable mountains).

752. All members of the royal family held office, according to seniority (Strabo 16.4.25). For a map of Petra based on excavations, see Kanellopoulos, "Plan." Trajan later refounded Bostra as Arabia's Roman capital (Healey, "Bostra," 254).

753. Riesner, *Early Period*, 76. For impressive Nabatean architecture and landscaping, see, e.g., Schmid, "Wadi Farasa Project"; Joukowsky, "Petra Great Temple"; the architecture reflects considerable Hellenistic influence, adapted for temples and tombs hewn from rock (Graf, "Nabateans," 82). Other possibly pre-Pauline Nabatean architecture reveals Greek, Roman, and various Eastern influences (Bikai, Kanellopoulos, and Saunders, "Beidha"). Nabateans settled into a sedentary lifestyle only over an extended period, however (Twaissi, "Edom").

754. Riesner, *Early Period*, 76. Although there was extra coinage in 18–40 C.E., it had diminished silver content.

755. On which see Kolb, "Mansion." On their prosperity due to caravan trade, see Kraeling, *John the Baptist*, 88–89; on their trade and relations with others, see also Matthiae, "Nabatäer."

756. Witherington, *Acts*, 321n71.

757. Roman soldiers, merchants, and other foreigners are attested in Nabatean Bir Madhkur, northwest of Petra (Smith, "Bir Madhkur Project"). Jewish contacts with Nabatea were long-standing (see, e.g., Kraeling, *John the Baptist*, 89); Meshel, "Rock," argues that the Hasmonians and Herod adapted Nabatean techniques for their own desert fortresses.

758. Hengel and Schwemer, *Between Damascus and Antioch*, 112.

759. Ciampa, "Decapolis," 268 (emphasizing an overlap of Nabatea with the Decapolis), following Hengel and Schwemer, *Between Damascus and Antioch*; cf. Watson, *Gentiles*, 72 (though unnecessarily doubting Paul's earlier call to Gentiles [70]; if Paul looked to the OT for models, he would recognize that many callings were fulfilled only over time). For one discussion of Paul's activity there, see Hengel, "Paul in Arabia."

760. See Riesner, *Early Period*, 258–60. Hengel and Schwemer, *Between Damascus and Antioch*, 120, argue that the various tribes worshiped their own "tribal deities" but as virtual agents of a supremely powerful deity. On Nabatean religion, see Lindner, "Heiligtum"; Jones, "Petra Inscription"; for their national deity Dushara, see Rives, *Religion*, 64; for traditional fertility practices, el-Khouri, "Fertility."

incense on housetop altars (16.4.26).⁷⁶¹ Perhaps more dependable is that the earliest extant Nabatean Aramaic inscriptions are religious, in a shrine honoring an earlier king Aretas in 168 B.C.E.;⁷⁶² a number of Nabatean temples remain,⁷⁶³ including one with dining halls and anthropomorphic statues of deities.⁷⁶⁴ At least by the early second century, a period of greater Roman control in the region, the Roman emperor was also worshiped in Petra.⁷⁶⁵ Outsiders often held views of Nabatean culture that looked negative to their critics.⁷⁶⁶ According to Strabo (but this is probably slander), brothers shared wives and other property and also slept with their mothers, counting as adultery only one from outside the family (Strabo 16.4.25).⁷⁶⁷ Some claimed that they buried their dead as if they were dung (Strabo 16.4.26).⁷⁶⁸

Language might also pose a potential barrier, though Paul could have found people who understood him. Although most Nabatean inscriptions are in a Nabatean form of Aramaic, Nabateans seem to have traditionally spoken an ancient dialect of Arabic,⁷⁶⁹ attested in their names;⁷⁷⁰ other inscriptions, however, are in Greek.⁷⁷¹ By the early second century C.E., Greek “replaced Nabatean as the official language,” and hellenization began before this.⁷⁷² If Paul ministered among them, he probably focused on their more hellenized cities.

4. Preaching among Nabateans?

Richard Bauckham makes the interesting case that Paul may have initially planned to fulfill his call to the nations by going east.⁷⁷³ Paul may have started ministry among the Nabatean “Arabs” (though Gal 1:17 does not specify what he was doing there); they mainly spoke Aramaic, and there were Jewish communities among them (cf.

761. Max. Tyre 2.8 claimed that Arabs worshiped “a square stone” (Trapp, 22); could this be related to the objects in the pre-Islamic *qubbah* (cf. Morgenstern, “Ark,” 216; Cross, “Tabernacle,” 60; Wright, *Archaeology*, 65; de Vaux, *Israel*, 296–97; Gordon, *Near East*, 145n12)?

762. Negev, “Nabatean Inscriptions,” 81.

763. E.g., Joukowsky, “Petra Great Temple”; Eddinger, “Nabatean/Roman Temple”; Atiat, “Sanctuary.” On worship of Isis as Petra’s protectress, see Schluntz, “Protectress.”

764. See McKenzie, Gibson, and Reyes, “Reconstruction.” On local sculpture style, see McKenzie, “Sculpture.” Hengel and Schwemer, *Between Damascus and Antioch*, 120, argue that traditional Nabatean deities were more Semitic than the hellenized interpretations of traditional deities in Damascus. They also argue (123) for the existence of triads of deities in Syria and Arabia (but these belonged to larger pantheons).

765. Bodel and Reid, “Dedicatory Inscription.”

766. Some regarded Arabs as “exotic” Eastern peoples; thus, by eating the innards of serpents they learned the language of birds and hence could predict the future (Philost. *Vit. Apoll.* 1.20).

767. Arabs, like Medes, were conversely known for completely covering their bodies (Dio Chrys. *Or.* 35.3). The claim that they slept with their mothers may be adapted from Greek and Roman views of Persian mother-son marriages (e.g., Catullus 90.1–4; Sext. *Emp. Pyr.* 1.152; 3.205; Ptolemy *Tetrab.* 4.10.203; Philo *Spec. Laws* 3.13; Dio Chrys. *Or.* 10.30; 21.5; Tatian *Or. Gks.* 28; Tert. *Apol.* 9.16).

768. For authentic Nabatean burial practices, see Perry, “Life and Death.”

769. Healey, “Nabataeans.”

770. Graf, “Nabateans,” 83–84.

771. Drijvers, “Inscriptions,” 165. Many inscriptions from this period are by soldiers in Greek and Latin (Negev, “Nabatean Inscriptions,” 81). Nabateans borrowed their titles for most officials from Greek and Latin (Graf, “Nabateans,” 83).

772. Garnsey and Saller, *Empire*, 189. The language of 140 sixth-century C.E. papyri found is Greek, but the local vernacular may have remained preclassical Arabic (Lehtinen, “Petra Papyri”). Greek culture flourished in Roman-period Decapolis, sometimes in Roman forms (see Segal and Eisenberg, “Sussita-Hippos,” noting Hippos’s Roman architecture in the early empire). For Nabateans’ relations with Rome over the centuries, see, e.g., Barrett, *Oil Lamp*.

773. Bauckham, “East Rather Than West?,” 171–84. If Paul wanted to go to Spain at the world’s western end (Rom 15:24, 28), he may have also wished to go east.

Acts 2:11).⁷⁷⁴ If Paul left Nabatea for Damascus (Gal 1:17), it was not initially to travel to Jerusalem (1:18), for which shorter routes were available, but to follow “the other main route from Damascus: the caravan route north-east to Palmyra and thence to Mesopotamia.”⁷⁷⁵ The road east from Damascus led to the Jewish communities of Babylonia, but the Nabateans, who had come to oppose him (2 Cor 11:32), controlled all the northeast and southern routes, so that Paul could only return to Jerusalem.⁷⁷⁶

This argument coheres with the evidence of Paul’s early years, but because that evidence is scant, the argument is accordingly speculative. If Paul could slip away to Jerusalem, where he would face danger (Acts 9:29), could he not have slipped eastward in a caravan, facing danger along the way but more likely unnoticed? More important is that Paul’s facility in Greek, his Roman citizenship, and his facility in Greco-Roman culture qualified him especially for a westward mission; the Twelve and other Aramaic-speakers would have done just as well for Babylon.⁷⁷⁷

As already noted, others dispute the idea entirely that Paul preached among Nabateans. Paul could have preached to Jews among Nabateans, could have gone as a recluse for a time,⁷⁷⁸ or could have been disciplined by Jewish believers in the Hellenistic cities there.⁷⁷⁹ If Ananias’s house was in the Nabatean quarter⁷⁸⁰ and Paul escaped from there (an argument admittedly heavily dependent on subsequent tradition), Paul would hardly have taken refuge in the Nabatean quarter if it was hostile to him. But if Damascus’s large and politically powerful Jewish community (see comment on Acts 9:2) opposed Paul (9:23–24) and discovered him taking refuge in the Nabatean quarter,⁷⁸¹ it might have negotiated with the Nabatean ethnarch.⁷⁸² In the end, we cannot be certain that Paul preached among the Nabateans or that this was the basis for their hostility; it simply remains a very plausible hypothesis. In my opinion, the likeliest reading of the evidence is that Paul preached not only in the synagogues in Damascus (9:20) but also among Jewish people in the outlying areas, including during an extended trip there.

What is important to our discussion of Acts is that Paul’s comment about Nabatean opposition is compatible with the Jewish opposition.⁷⁸³ This is true whether we think that the Nabateans acted to curry favor with the Jewish community or because of their own hostility toward Paul.⁷⁸⁴ The Nabatean ethnarch had good reason to cultivate positive relations with Jews during the king’s conflict with Antipas in this period (in-

774. *Ibid.*, 176.

775. *Ibid.*

776. *Ibid.*, 177. One of the most important routes between Damascus and the Gulf of Aqaba was the “king’s highway” (Podella, “King’s Highway”).

777. Cf. 1 Pet 5:13, but this probably stands for Rome. For “Babylon” as a cipher for Rome, cf. 4Q163 6–7 II, 4–5; frg. 8–10; 4Q386 1 III, 1–2; *Sib. Or.* 5.143, 159–60 (contrast 5.434–46); 4 *Ezra* 3:28, 31; 2 *Bar.* 67:7; Rev 14:8.

778. The first two suggestions appear in Riesner, *Early Period*, 260.

779. If Paul was disciplined by associates of Ananias and if the latter lived in the Nabatean quarter as Riesner thinks (*ibid.*, 86; but we cannot be sure), a connection of this sort is reasonable (though hypothetical).

780. See Riesner, *Early Period*, 86. The thesis is open to question, since Ananias, being Jewish, would more likely live in a Jewish area (Le Cornu, *Acts*, 511) unless he, too, faced hostility from his people, of which Luke offers no clue.

781. Paul’s “Arabia” does not, however, mean only this, since he afterward “returned” to Damascus (Gal 1:17).

782. Riesner, *Early Period*, 88–89.

783. Also Fitzmyer, *Acts*, 434; Bruce, *Commentary*, 204; Hemer, *Acts in History*, 182; contrast Barrett, *Acts*, 466 (who thinks joint action unlikely).

784. Even as resident aliens, synagogue communities could participate in the larger life of their cities at times (see Harland, *Associations*, 200–210).

deed, some deserters from Antipas's army helped the Nabateans devastate his army, *Jos. Ant.* 18.114).⁷⁸⁵ Still, Arabs displayed notable animosity toward Judea during the Judean revolt against Rome a few decades later (*Tac. Hist.* 5.1).

If, by contrast, Paul worked among the Nabateans, this alone could have proved sufficient to generate Nabatean hostility; but even this work need not have remained isolated from a larger context as suggested above. Wherever else Paul preached, he certainly preached in Jewish communities. Because any work among Nabateans would have begun with Jews among them (see above), it is reasonable that Jewish and Nabatean opposition would have been united, though Paul saw the Nabatean threat as deadlier or at least on a higher official level (2 Cor 11:32–33). Luke articulates a pattern of rejection in the synagogues and keeps his narrative less complicated by focusing on that frequent opposition; although Paul tells us nothing of it in Damascus, he does recount an abundance of Jewish opposition (Rom 15:31; 2 Cor 11:26; 1 Thess 2:14–16; cf. 1 Cor 1:22–23), clearly some of it in periods like this one, which Luke simply summarizes (2 Cor 11:24).⁷⁸⁶

(2) *Paul's Escape* (9:24–25)

That the plot against Paul did become known to him emphasizes God's repeated protection of him (as in Acts 20:3, 19; 23:16, 30; cf. 1 Sam 19:2, 11; Esth 2:22; more peripherally, cf. Jer 11:18–20; Job 5:12–13).

Watching the gates both "day and night" (Acts 9:24) entails careful guarding, recognizing that Paul might escape at any time. City gates were closed at night,⁷⁸⁷ but presumably individuals traveling alone could exit smaller doors there with permission from guards. (On the phrase "day and night," see comment on Acts 20:31.) Even if people were watching, however, a night escape would be more difficult to observe (9:25).⁷⁸⁸ Those who wished not to be observed typically acted at night or in darkness.⁷⁸⁹ Thus honorable sages normally would not commence a journey at night, whether to avoid danger (which was common at night)⁷⁹⁰ or to prevent scandal generated by suspicions about secretive, immoral behavior.⁷⁹¹

Despite volunteer adversaries watching the gates both day and night (9:24), a night escape (9:25) would be more difficult to see if from a different location; such escapes were generally safer (cf. 17:10). Especially if those guarding the gates were near the gates, they would not see the parts of the walls away from the gates (particularly, as noted, at night).⁷⁹² Paul's friends probably learned this method of escape from their

785. Riesner, *Early Period*, 89.

786. Cf. also Witherington, *Acts*, 322–23.

787. For an extreme case, see Hermog. *Inv.* 2.6.118–19. During war, gates might be closed even during the day (Dio Chrys. *Or.* 36.16) to prevent enemies from gaining entrance (Polyb. 4.18.2, 4); certainly it was imprudent to open them at night (Sen. E. *Controv.* 5.7). For gates to be open always implied peace (Isa 60:11; Rev 21:25).

788. Cf., e.g., *Jos. Ant.* 18.159; Philost. *Hrk.* 31.6.

789. E.g., Judg 6:27; 1 Sam 28:8; 2 Kgs 25:4; 4Q183 II, 4–6; Soph. *Ajax* 47; *Antig.* 494; *El.* 1493–94; Eurip. *El.* 90; *Iph. Taur.* 1025–26; Aeschines *Tim.* 9–10, 12; Livy 27.5.18; Ovid *Metam.* 7.192; Dio Chrys. *Or.* 33.52, 60; Lucian *Icar.* 21; *Phal.* 1; Hermog. *Issues* 50.14–16; Max. Tyre 19.4; *Gen. Rab.* 74:7; *Pesiq. Rab.* 8:2.

790. Especially from thieves and robbers (Hor. *Ep.* 1.2.32–33; Catull. *Carm.* 62.34–35; Xen. Eph. *Anthia* 2.11; *Sib. Or.* 3.238, 380; *Gen. Rab.* 92:6), when they were also considered most potentially deadly (Exod 22:2; Schieman, "Furtum," 627, citing Twelve Tables 8.12–13); this was a danger even in towns (Stambaugh, *City*, 201; Jeffers, *World*, 61).

791. Le Cornu, *Acts*, 941–42 (*y. Sanh.* 11.3.30b; *Tanḥ.* 26c; *Der. Er. Zut.* 6:1; *b. Erub.* 85b; *Yoma* 21a).

792. The skepticism of Barrett, *Acts*, 466, that an escape across the walls would be missed by guards outside demands sufficient distance from the walls as well as visibility (of both terrain and light).

Scripture (Josh 2:15, where the window is also in a wall; 1 Sam 19:12).⁷⁹³ Luke's audience might also think of the friends who lowered the paralytic to Jesus (Luke 5:19), though both of Luke's accounts are pre-Lukan (Mark 2:4; 2 Cor 11:33) and Luke does not make any such connection clear.⁷⁹⁴

Given the context in 2 Cor 11:33 (11:23–33, esp. 11:30), Paul may have thought of this escape as humiliating,⁷⁹⁵ something like a retreat.⁷⁹⁶ (Some scholars view it as the opposite of the Roman honor for the first soldier over an enemy city's wall, the *corona muralis*.)⁷⁹⁷ Having to escape through a hole certainly was considered cowardly behavior (Epict. *Diatr.* 4.1.167). The humble way Paul must leave Damascus contrasts starkly with the arrogant way he first approached it.⁷⁹⁸ Still, others may have appreciated the ingenuity used to evade the aggressors.⁷⁹⁹

The pre-Arabic tradition for the site of Ananias's house places it in the Nabatean quarter against the Hellenistic-Roman period city wall.⁸⁰⁰ It is possible that this story gave birth to the tradition,⁸⁰¹ but if the tradition for the site is authentic, it is possible that it was even Ananias's house from which Paul escaped.⁸⁰² Once Paul removed far enough from the city walls, he could head toward Jerusalem on foot⁸⁰³ while his enemies continued to be distracted with keeping him in Damascus; it is a reasonable guess, given concerns for hospitality and the dangers of night travel, that some Jewish believers from Damascus might have also been waiting for him outside the city and accompanied him for the first night.⁸⁰⁴ Because many cities had outgrown

793. The method was intelligible; cf., e.g., one rescued by being raised up a wall with a rope tied around his waist (Plut. *Sulla* 28.7; cf. Jer 38:12–13). Ultimately following Wettstein, other commentators (e.g., Furnish, *II Corinthians*, 523; Danker, *Corinthians*, 186) list Athen. *Deipn.* 5.214a; Plut. *Aem. Paul.* 26.2 for escapes through walls. For similar concealment in earlier texts, cf. the Trojan horse (Hom. *Od.* 4.271–89) or men concealed in baskets on donkeyback in the Egyptian Tale of the Taking of Joppa (Gordon, *Civilizations*, 264–65). Subsequent escapees have also been lowered from windows, whether because informed by the biblical account or independently (e.g., John Hut in Williams, *Radical Reformation*, 226).

794. The paralytic was justified by faith and let down (Luke 5:19–20) in the face of religious opposition (5:21); but the latter did not precipitate the former, and despite many parallels between Luke and Acts, stories in Luke lack clear allusions in Acts. The other use of the verb for “letting down” in Luke-Acts is Acts 10:11 and (retold) 11:5; if there is a connection, it is tantalizingly weak.

795. So Lincoln, *Paradise*, 75; Bruce, *Corinthians*, 245. Some contrast this descent with Paul's heavenly ascent in 2 Cor 12:2–4 (Lincoln, *Paradise*, 84–85).

796. Cf. the contrast between Hannibal's current confidence and his former escape from a city at night (Polyb. 1.23.4).

797. E.g., Judge, “Boasting,” 47; Witherington, *Corinthians*, 458–59; Peterson, *Eloquence*, 123; these commentators cite Polyb. 6.39.5; Livy 6.20.8; 10.46.3; Aul. Gel. 5.6.16. It was made of gold (Polyb. 6.39.5). Some have even suggested that Paul's opponents in Corinth used this story against him (Trocmé, “Rempart”); given its climax of (or afterthought to) his list of sufferings, however, and his lack of explicit defense here in a section elaborating a defense, this proposal seems unlikely.

798. Carson, *Triumphalism*, 128.

799. Cf. the tale of Johanan ben Zakkai's escaping Jerusalem in a coffin (e.g., *Abot R. Nat.* 4 A; 6, §19 B; further below). Although Jews would be more familiar with the method of escape (down a wall), given canonical models, it was intelligible to Gentiles (see examples in Danker, *Corinthians*, 186).

800. Riesner, *Early Period*, 86. The Greek city wall and the Roman wall that probably followed it would have been rectangular, in contrast to the current oval wall built in the twelfth century (Titard, “Damascus,” 104).

801. Why would Ananias, a Jew, live in the Nabatean quarter? If he faced persecution from other Jews, it is possible, but the Damascus synagogues apparently depended more on outside advocates to organize persecution (Acts 9:2).

802. Many ancient homes, however, used city walls as a “rear house wall” (Jeffers, *World*, 68–69).

803. Cf. the officer who escaped through enemy lines “by disguising himself as a peasant and using his knowledge of the district” (Tac. *Hist.* 3.59 [LCL, 1:429]). Paul would presumably at least know the road by now; he may have been blind coming into the city, but his times among Nabateans should have oriented him to the area.

804. They could also have been believers outside the city proper. Probably, as with most cities, more people lived in houses in the surrounding countryside than within the city walls (cf. Watson, “Cities,” 214).

their walls,⁸⁰⁵ Paul's friends would have to select carefully the site of his descent; landing in a populated area might make his escape more difficult to detect from afar but more apt to be noticed from nearby. Lowering a basket, however, would not appear suspicious, in any case (and especially in a populated area), so long as someone below could signal when to lower it and discern when to take Paul from it. Perhaps he might also wear dark clothing and perhaps also something like a turban⁸⁰⁶ that would cover much of his face.

The σφυρίς or σπυρίς is a large, round, plaited basket, often used for fish (cf. Mark 8:8, 20, not in Luke); the expression in 2 Cor 11:33 (σαργάνη) could be a wicker-work basket but also a woven container that could hold hay, straw, wool, and the like.⁸⁰⁷ Both passages presuppose that the container was large and sturdy enough to lower Paul discreetly in it. Moses was rescued in a sort of “basket” (though because θίβις is a different term, it is unlikely that Paul's “basket” is intended as an allusion to Moses).⁸⁰⁸ Later tradition claims that Johanan ben Zakkai escaped watchful eyes in Jerusalem by being carried out in a coffin.⁸⁰⁹

The phrase “his disciples” appears nowhere else in Acts.⁸¹⁰ Philosophers had disciples—that is, those who learned from them and (ideally) became adherents of their distinctive schools.⁸¹¹ The same basic concept is evident in various early Jewish sources.⁸¹² Some scholars suggest that the master-disciple relationship may be evident as early as Proverbs and Sirach⁸¹³ and probably the Prophets as well.⁸¹⁴ Certainly early Judaism assumed that the prophets had disciples.⁸¹⁵ Early Pharisaic teachers had disciples;⁸¹⁶ rabbis emphasized making disciples.⁸¹⁷

Perhaps we could think of some disciples of Paul from before his conversion who

805. E.g., Stambaugh, *City*, 191, on imperial Rome (so that a mile away from the walls now counted as part of the city); Rohrbach, “Pre-industrial City,” 144 (noting, among those outside most city walls, members of some ethnic groups, tanners, merchants, beggars, prostitutes, and other less desirable residents).

806. Something like the turban was already worn among Arabs (so Pliny E. *N.H.* 6.32.162), although the modern version seems to stem from the fifteenth century. The conical caps of early Persians, sometimes wrapped with additional strips of cloth, might represent an early version. Travelers in the desert might well wear face cloths for protection, in any case.

807. Bruce, *Commentary*, 204n46. Bede *Comm. Acts* 9.25B (Martin, *Acts*, 110) suggests that such baskets usually were made of palm leaves and rushes (but goes on to allegorize). On smaller, less relevant kinds of baskets, see, e.g., Hirschmann, “Kalathos”; idem, “Kanoun.” Ladders could also be used (e.g., *b. Ber.* 33a; *ʿErub.* 84a; 85a; 89b; *Pesah.* 112b; *B. Bat.* 22b; cf. *y. ʿErub.* 9:1, §3; *Apoll. K. Tyre* 43) but may have been less accessible and more difficult to lower and raise inconspicuously.

808. The Hebrew for Moses's basket includes a wordplay with Noah's ark (see, e.g., Sarna, *Exodus*, 28).

809. E.g., *ʿAbot R. Nat.* 4 A.

810. One could argue that it is an error for “the disciples,” but a scribal error would likelier go the other direction.

811. E.g., *Mus. Ruf.* 1, p. 36.6–7; *Lucian Alex.* 2; *Diog. Laert.* 8.1.39; 9.1.4–5; *Philost. Vit. Apoll.* 5.21; cf. Liefeld, “Preacher,” 222–25. For exceptions, see *Dio Chrys. Or.* 4.14; 12.13.

812. In Philo, see Robbins, *Jesus the Teacher*, 94–97; in Josephus, see 97–99; cf. “disciples of the law” in the Diaspora (*CIJ* 1:79, §113; 1:136, §193). For adherents of schools in this period, see, e.g., Shammaites and Hillelites (e.g., *m. Ber.* 1:3; *Demai* 3:1; *t. Šabb.* 1:16; *ʿEd.* 2:3; *Pesiq. Rab Kah.* 6:4; *b. Ber.* 23b; *Šabb.* 14b; *Bešah* 20b; *y. Qidd.* 1:1, §8).

813. E.g., Gilbert, “École.” In contrast to Sirach, Proverbs may be questionable, since “my son” was merely part of the Egyptian wisdom genre's format of a king allegedly addressing his son.

814. Cf. 1 Sam 19:20; 2 Kgs 2:3–15; 4:38; 6:1; Isa 8:16; on ancient discipleship, see in greater detail Wilkins, *Discipleship*, 43–91.

815. E.g., CD VIII, 20–21; *Mek. Pisha* 1.150–53; *ʿAbot R. Nat.* 11, §28 B; *Tg. Jon.* on 1 Sam 19:23; 2 Kgs 6:1; 9:1, 4.

816. *Jos. Ant.* 15.3, 370.

817. E.g., *m. ʿAb.* 1:1; especially among Hillelites (*ʿAbot R. Nat.* 3 A; 4, §14 B). Such disciples were highly regarded (*m. Hor.* 3:5) and were supposed to reproduce their mentors' teaching (*Sipre Deut.* 48.2.3, 6). On the importance of this relationship, see Neudecker, “Relationship”; Gerhardsson, *Origins*, 16–17. Cf. different details in Keener, *Matthew*, 152–54, 476.

had accompanied him to Damascus, though it would seem quite odd that Luke does not honor Paul by describing his companions thus in 9:7 or the parallel texts. Given the forcefulness of his christocentric preaching, however, and the original basis for Paul’s trip to Damascus, it seems more probable that they were Jewish believers in Jesus whom Paul had been teaching, whether he started teaching them before or after his conversion and whether they became believers before or after his teaching. Although it indicates that Paul’s mission was “not . . . unfruitful,”⁸¹⁸ it also may suggest that Paul, as a former disciple (Acts 22:3), had assumed the role of a Christian rabbi or sage. Undoubtedly he had the educational credentials to present himself as such (cf. 22:3).

Lack of such language as “rabbi” for Christian teachers elsewhere in the NT and opposition to it in Matthew’s very Jewish Gospel (Matt 23:8) may suggest that it was a model Paul later had to abandon (though he frequently mentions his “children” [e.g., 1 Cor 4:14–17], a good rabbinic description of disciples in some sense).⁸¹⁹ Luke might prefer not to elaborate on an activity that Paul later abandoned. Dio Chrysostom claimed that he did not acquire “disciples” because he had nothing to teach them (*Or.* 12.13; cf. 12.15–16), though such “humility” is probably less relevant to Luke’s presentation.⁸²⁰ In any case, the dissonance with the rest of Acts and, so far as we can tell, mainstream early Christianity suggests that the statement reflects genuine early tradition about Paul.

More important from a literary perspective is that it appears ironic that one who had first gone to Damascus to persecute “disciples” now has embraced these disciples as his own.⁸²¹ Moreover, Paul’s initial experience in Damascus was being “with the disciples,” welcomed by them (Acts 9:19); now his ministry has added to their number.

b. Opposition to Ministry in Jerusalem (9:26–30)

The persecutor from Jerusalem now faces persecution there and barely escapes Stephen’s fate at the hands of his former “zealot” compatriots. Like 9:19b–25, this section also prefigures the shape of Paul’s ministry among his own people. Ironically, as in 9:24–25 (and, in a different sense, 9:17–18), it is members of the group he formerly persecuted who now save his life (9:30).

I. PARALLELS WITH DAMASCUS MINISTRY

Paul’s experience in Jerusalem turns out to parallel his experience in Damascus: his conversion seems too astonishing; he preaches boldly; he faces threats; and he escapes. Scholars have suggested some detailed parallels:⁸²²

Event	Acts 9:13–25 (Damascus)	Acts 9:26–30 (Jerusalem)
Reticence to believe Saul	9:13–14	9:26
Reassurance	9:15–16	9:27
Saul’s association with disciples	9:19b	9:28a
Saul’s bold preaching	9:20–22	9:28b–29a
A plot against him	9:23–24	9:29b
Paul’s escape	9:25	9:30

818. Bruce, *Commentary*, 204n45.

819. For “children” as a title or analogy for students, see, e.g., 4 *Bar.* 7:24; *Sipre Deut.* 34.3.1–3, 5; 305.3.4; *b. Pesah.* 112a; *Šabb.* 25b; 31a; *Pesiq. Rab.* 21:6 (Moses to Israel); 51:1; Eunapius *Lives* 486, 493. For teachers as fathers, see, e.g., 2 *Kgs* 2:12; 4 *Bar.* 2:4, 6, 8; 5:5; *t. Sanh.* 7:9; Matt 23:9; Philost. *Vit. soph.* 1.490; 1.25.536, 537; *Iambl. V.P.* 35.250; in second- to fifth-century Christian usage, see Hall, *Scripture*, 50.

820. Dio’s claim to know nothing was modeled after that of Socrates (Dio Chrys. *Or.* 12.14), whom Dio in fact surely considered wise.

821. Gaventa, *Acts*, 154. Because Luke employs μαθητής so frequently (twenty-eight times) in Acts, however, we cannot be certain that the connection is deliberate.

822. Fitzmyer, *Acts*, 438; and Talbert, *Acts*, 88, both following Gill, “Structure of Acts 9.”

The events are parallel because of Saul's conversion and evangelistic zeal; although we might well therefore expect such events in both locations, Luke underlines the parallel by choosing to record the same sorts of details in both places.

II. COMPARING LUKE AND PAUL

Although Luke structures his material to parallel events in Damascus, he draws from genuine tradition. Paul mentions this trip to Jerusalem in his own correspondence (Gal 1:18–19), incidentally corroborating the major point in Luke's narration.⁸²³ That Paul must have evangelized here as Luke claims is clear from Paul's own claim that he began his ministry in Jerusalem (Rom 15:19);⁸²⁴ although he probably preached earlier in and around Damascus (cf. Gal 1:17), Jerusalem took pride of place as the theological starting point.

Acts 9:26–30	Gal 1:17b–19
Paul went from Damascus to Jerusalem (9:25–26)	Paul went from Damascus to Jerusalem (1:17b–18)
Barnabas made the introduction to the disciples (9:26–27)	— (though Paul's letters attest Barnabas's prominence)
Paul met the apostles (9:27)	Paul met Cephas and James (1:18–19)
Paul continued in association with the apostles (9:28)	Paul stayed with Cephas fifteen days (1:18)
Paul's stay was apparently relatively brief (9:29–30)	Paul's stay was brief (1:18)

Apart from omissions that betray different emphases, the one element of Paul's account that contrasts starkly with Luke's is Paul's claim that he met only Peter and James (Gal 1:18–19) whereas Luke claims he met the "apostles."⁸²⁵ Paul's claim could be understood as a polemic against the tradition later followed by Luke here, but this solution does not comport well with how frequently the majority of elements in the two narratives correspond. The difference between the two accounts need not reflect polemic; in addition to reflecting the distinct interests of the two authors, the different narration fits Luke's tendency to generalize and summarize. The more complete Jerusalem endorsement of Paul's ministry probably came later (Gal 2:2, 7–9), but the present occasion may (with Acts 15:25–26) serve this rhetorical function for Luke.

Some other elements that are prominent in one account (such as persecution in Acts and meeting with Peter in Galatians) are omitted by the other, as one would expect from different writers making different points. Luke, like other ancient historians, "is summarizing and generalizing a great deal of data in a small space."⁸²⁶ Paul is emphasizing his lack of dependence on the prior apostles, and his oath in Gal 1:20 might suggest that some questioned his own account of matters, perhaps because some of "the facts were . . . ambiguous."⁸²⁷

Although both Paul and Luke are sincere, the former emphasizes his independence from Jerusalem and the latter his continuity with it.⁸²⁸ Luke is summarizing, not fabricating; although on this occasion Paul presumably met only with Peter and James (as he claims in Gal 1:18–19), Luke is not freely inventing material for his apologetic,

823. See further esp. Hengel and Schwemer, *Between Damascus and Antioch*, 133–42.

824. On Paul starting in Jerusalem, see also Donaldson, *Paul and Gentiles*, 278.

825. Bruce, *Commentary*, 206, suggests that this is probably a "generalizing plural." Reconciling Acts and Gal 1:17–18 was an issue for John Chrysostom in *Cat. Act.* 15.2–4 (Martin, *Acts*, 181).

826. Witherington, *Acts*, 325n88.

827. Johnson, *Acts*, 174.

828. *Ibid.* (noting that these divergences further underline "the essential historicity of those points held in agreement"); cf. Dunn, *Acts*, 118, 126.

since by his day specifying “Peter and James” would probably sound more authoritative than simply generalizing “the apostles” (cf. Acts 15:6–13).⁸²⁹

III. TRYING TO JOIN THE DISCIPLES (9:26)

Both Acts and Paul testify that Paul went from Damascus to Jerusalem (Gal 1:17–18; Acts 26:20);⁸³⁰ Paul may have already viewed Jerusalem as the place to start the mission (Rom 15:19; cf. Acts 1:8).⁸³¹ Because the Nabateans “controlled the caravan routes that passed through the Sinai or the Arabian desert to the south, as well as the routes to the east,”⁸³² a journey to Jerusalem also might be safest; Paul had relatives there and had grown up there. Yet Paul certainly would have to expect to face hostility there as well. If we take seriously both Paul’s chronology (Gal 1:17–2:1) and Luke’s claim that he faced Jewish opposition in Damascus (Acts 9:23), the historical Paul must have anticipated some opposition; word would have traveled from Damascus not only to Christians but to their enemies. Even without either of these elements, Paul might hope to testify (as he did in 22:3–21) and plead his case (cf. 26:2–23) but would have to wonder how his former colleagues in persecuting Nazarenes would respond to him.

That Jerusalem’s Christians are afraid of Paul is understandable, though it does not suit the philosophic ideal of a wise sage that Luke may later apply to Paul (e.g., 20:24; 27:21).⁸³³ Ironically, people were earlier afraid to associate (κολλᾶσθαι) with the Christians in Jerusalem (5:13), and it was the hostile authorities who feared rather than the disciples (5:26). Here, however, the disciples (plainly meaning all the Christians, 6:1–2, 7; 9:1, 10, 19, 38; 11:26, 29; 13:52; distinct from the “apostles,” 9:27) are reticent to let Paul associate (κολλᾶσθαι) with them because they (for a very different reason) fear him.⁸³⁴

Their skepticism concerning Paul seems more plausible on Luke’s vague chronology of Paul’s conversion (“after many days,” 9:23) than in Paul’s two years or so (see comment on Acts 9:23).⁸³⁵ Surely they would have heard of his conversion by now from travelers from Damascus, as Damascus believers had learned quickly of Paul’s mission (9:13).⁸³⁶ Disciples in Damascus—at least the ones Paul had made (9:25)—risked their own safety to help him, but disciples in Jerusalem were afraid to associate with him.

829. Hengel and Schwemer, *Between Damascus and Antioch*, 139 (their argument that Paul must have been at least accepted by the apostles for Gal 1:23–24 to be true is less convincing).

830. Despite disagreement on the identification of Gal 2:1–10 with either Acts 11:30 or Acts 15, nearly all agree that the visit of Gal 1:18–24 is the same as Acts 9:26–30 (e.g., Morgado, “Paul in Jerusalem”); for some differences of perspective, see comment on Acts 9:30.

831. Riesner, *Early Period*, 263. C. Williams, *Acts*, 23, suggests Luke’s emphasis on the gospel going from Jerusalem, but it was Paul’s as well.

832. Riesner, *Early Period*, 262 (noting that Paul thus could not carry out a mission in those regions once he incurred their opposition). Nabatean graffiti appear along the Negev and Sinai caravan routes as well as in the Arabian Peninsula (Drijvers, “Inscriptions,” 165).

833. On sages’ discouragement of fear, see, e.g., Mus. Ruf. 8, p. 66.10 (though Musonius frankly admits that even sages struggled to fulfill this ideal, 6, pp. 54.35–56.7). Marguerat, *Historian*, 195–96, suggests that God continues to overcome the resistance of his own followers (in this case, in their fear to trust Saul’s conversion) even after having overcome Saul, their enemy.

834. Luke did not believe that the basis for such “association” always accorded with God’s will (cf. Acts 10:28).

835. Barrett, *Acts*, 460–61, suggests that they would have doubted only “his theological understanding of the Christian faith” rather than his conversion.

836. Paul speaks of their glorifying God because of his conversion (Gal 1:24), but this was *after* he had visited Jerusalem (1:18–24). (Hengel and Schwemer, *Between Damascus and Antioch*, 137–38, think that people may have feared his theological extremism, that he would attract trouble, or that his proximity raised the stakes for those who had merely heard from a distance.)

The problem of the disciples in Jerusalem, however, is not one of information, since Paul certainly claims to be a disciple here; it is one of trust. (In Acts, ironically, the plural participle of “believing,” used here, normally designates “believers,” albeit in Jesus.) We should remember that some of the Jerusalem disciples had suffered at Paul’s hands, as had fellow disciples close to them. They may have believed, despite reports from the smaller Christian community in Damascus, that he was a spy;⁸³⁷ Paul himself later uses this image figuratively for those he counts as false Christians (Gal 2:4).⁸³⁸ Meanwhile, and far more dangerously, Saul will have real enemies among his former allies (Acts 9:29).

IV. BARNABAS INTERCEDES (9:27)

Although feared by the majority of Christians (9:26), Paul is introduced to the leaders, the apostles, by Barnabas (9:27). This comports with the basic outline of his own account, where he meets only with a small group (Peter and James in Gal 1:18–19), though Luke reports the encounter more generally as concerning the “apostles.”⁸³⁹ Early interpreters seeking to reconcile the accounts sometimes noted that “the historian, for conciseness, often omits incidents and condenses the times.”⁸⁴⁰

As others narrated the works of God or Christ (employing this verb, Luke 8:39; Acts 12:17; cf. Luke 9:10; Acts 8:33), so Barnabas here testifies on Saul’s behalf. That he was already favorably known to the apostles (as shown in Acts 4:36) cannot have hurt his testimony. That Barnabas and Paul came to be closely associated through later ministry together (11:25, 30; 12:25; 13:2, 7; 14:12) is clear from Paul’s own writings (Gal 2:1, 13; 1 Cor 9:6). Both Paul (2 Cor 5:19–20; Phil 4:3) and Greco-Roman ideology appreciated agents of concord who reconciled opposing factions.⁸⁴¹ A friend was one who shared one’s confidences,⁸⁴² sorrows, and dangers;⁸⁴³ Barnabas here becomes a staunch ally of Paul, coming to his aid in a friendship that endures at least until Acts 15:39.

Barnabas is also a fairly consistent character in Acts: as he here defends Paul against detractors, he later defends Mark against Paul (15:37); he welcomes Paul in his

837. Despite the proximity of this report to Paul’s being let down (Acts 9:25), and the possible common background of both in Josh 2:1–16, Luke makes nothing of the possible connection (he could have specified it with explicit wording related to spying as in Josh 2:1). The disciples could think of “spies” against Jesus (Luke 20:20).

838. He might reverse and reapply the image once applied to himself, but the image was common enough that this suggestion is at most a possibility like any other speculation. For the widespread use of spies, see, e.g., Hom. *Il.* 10.326–27, 465–514; Xen. *Cav. Com.* 4.16; Cyr. 6.1.39–43; 6.2.2, 11; Caesar *Sp. W.* 13; Tac. *Hist.* 2.34 (and deserters); Ps.-Callisth. *Alex.* 1.42; Gen 42:9–34; Num 13:2–32; 14:7, 36, 38; Josh 2:1; 7:2; Judg 1:24; 18:2, 14; 1 Sam 26:4; 2 Sam 10:3; 1 Chr 19:3; 1 Macc 5:38; 12:26; 4Q365 32 3–4; *Jub.* 42:5; *Test. Sim.* 4:3; *Jos. Ant.* 7.118; 13.175; 15.285, 289, 295, 366; 16.236; 18.321, 323; *War* 1.318, 492; 2.491; *Sipre Deut.* 344.3.2; *b. Me’il.* 17a; see further Richmond, “Spies”; Onken and Umbach, “Espionage”; cf. Epict. *Diatr.* 4.13.5; Campbell, “Exploratores,” 277.

839. One cannot dismiss the meeting with Barnabas on the grounds that he was later an “apostle” (1 Cor 9:5–6; cf. Acts 14:4); he was not one of the Jerusalem apostles, which is Paul’s point (Hengel and Schwemer, *Between Damascus and Antioch*, 140), and probably not yet designated an apostle before his sending out in Acts 13:2–4; cf. 14:4, 14).

840. Chrys. *Hom. Acts* 21 (Martin, *Acts*, 112); see also Bede *Comm. Acts* 9.26 (Martin, *Acts*, 112).

843. E.g., Isoc. *Demon.* 25; Val. *Max.* 4.7.pref.; even to die together (Eurip. *Orest.* 1069–74, 1155; *Iph. Taur.* 674–86; Char. *Chaer.* 4.3.5; 7.1.7; cf. *Sent. Syr. Men.* 406–7; *Syr. Men. Epit.* 22–23) or for one another (Diod. *Sic.* 10.4.4–6; Epict. *Diatr.* 2.7.3; Val. *Max.* 2.6.11; 4.7 passim, e.g., 4.7.2; Mus. *Ruf.* 7, p. 58.23). See more fully Keener, *John*, 1004–6.

ministry in Antioch (11:22–25).⁸⁴⁴ Here he reports that Paul has “spoken boldly” (ἐπαρρησιάσατο), as Luke reports of Peter (2:29; 4:13), Apollos (18:26), and the Spirit-empowered church (4:29, 31), and as he often reports concerning Paul himself later (13:46; 14:3; 19:8; 26:26; 28:31); Paul did so “in the name of the Lord” just as the authorities recognized that the Jerusalem apostles had done (4:18; 5:40). Given the unfortunate parting of the ministry team in 15:39 and Luke’s focus on Paul, it is unlikely that Luke would have simply invented the report of Barnabas befriending and aiding Paul.

V. SPEAKING BOLDLY (9:28)

Paul continued to speak “boldly” in the Lord’s name in Jerusalem exactly as in Damascus (9:27; cf. 9:20); this was a mark of being filled with the Spirit (4:29, 31) and continues to characterize Paul to the end of his ministry (13:46; 14:3; 19:8; 26:26; 28:31; cf. 2 Cor 3:12; Eph 6:19–20; Phil 1:20; 1 Thess 2:2). For the meaning of παρρησία and its cognate verb, see comment on Acts 4:13. Given both Paul’s account of Judean churches’ unfamiliarity with him by sight (Gal 1:22) and the disciples’ initial fear of him (Acts 9:26), most of his preaching was undoubtedly evangelistic. Given Paul’s firsthand knowledge of the depth of hostility against vocal followers of Jesus, this preacher “in the Lord’s name” is clearly completely devoted to Jesus, aware of Jesus’s warning that Paul will suffer “for my name” (9:16).

Luke does not mention much time being spent with disciples beyond Barnabas and the “apostles” (9:27), though clearly some others knew Paul (9:30). That Paul was “going in and out”⁸⁴⁵ with the apostles suggests that he was welcomed into their company; though Paul’s writings claim that he knew only Peter and James personally at this point (see comment on Acts 9:27), Paul and Luke may both imply that Paul was accepted as something of a colleague in ministry. (Peter, as leader of a growing movement, would hardly give Paul fifteen days without somehow recognizing his importance, which may be part of Paul’s point in recounting their time together in Gal 1:18.)

Paul’s own account of this trip to Jerusalem suggests that any time he spent preaching there must have been brief, since he saw only two of the leaders of the Jerusalem church (Gal 1:18–19). Nevertheless, it does not necessarily exclude such preaching, as if Galatians “hardly allows time” for these events.⁸⁴⁶ In Galatians, Paul had reason to emphasize the brevity of his stay, and the “fifteen days” are only the amount of time he stayed with Peter (though Paul does suggest that this was the main purpose for his visit). We should not be surprised if Paul’s preaching in Jerusalem, which appears in Acts, was likewise necessarily short lived (see comment on Acts 9:29).

VI. ARGUING WITH HELLENISTS (9:29)

If Paul’s boldness in Acts 9:28 resembles Peter’s in 4:13, his debating recalls Stephen (the only analogous use of the verb in Luke-Acts is 6:9). He once helped fellow Hellenists to kill Stephen, and many in antiquity believed that God repaid evildoers with the same suffering they had given others (e.g., Esth 9:25).⁸⁴⁷ Although this idea of suffering need not be in view here, the reversal of Saul’s state is significant. By

844. For Barnabas as a mediating character in both Acts and Paul’s letters, see, e.g., Öhler, *Barnabas*.

845. Lake and Cadbury, *Commentary*, 106, regard this as “a Semitism for free intercourse.” See comment on Acts 1:21; for the biblical echo, see further Keener, *John*, 811; cf. *Jub.* 35:6–7; *1 En.* 71:8; *2 En.* 16:1.

846. Hanson, *Acts*, 117.

847. See, e.g., Diod. Sic. 20.62.2; *Jub.* 4:32; 35:10–11; more fully, comment on Acts 3:2.

taking “the role of the fallen Stephen,” Paul again experiences the fulfillment of the warning of suffering in Acts 9:16.⁸⁴⁸ Especially if Luke anticipates any first-time hearers still unaware that Saul is Paul (13:9), the parallel will especially build suspense as to Saul’s likely fate.

Jerusalem Hellenists were, if anything, probably more zealous for the traditions than many other Jerusalemites were; that they had left their homelands to settle in Jerusalem shows “that they were not average Jews.”⁸⁴⁹ (On the identity of the “Hellenists,” see discussion at Acts 6:1.) That Paul was their former ally and probably a member of their synagogue (6:9–10) made the situation all the more desperate; whereas one should seek to honor one’s hometown by one’s behavior,⁸⁵⁰ Paul had embarrassed his associates. That they sought to “attack” him fits the pattern in Acts;⁸⁵¹ “kill” recalls most recently 9:23, reminding the reader that Paul is so radical that he will preach openly regardless of the cost to his life—just like Stephen. In so doing, Paul merely follows and models Jesus’s teaching (e.g., Luke 9:23; 14:27). Apparently before the confrontation ends with his being sent away, he knows that his testimony will be rejected (Acts 22:18).

Historically, it is likely that Paul would have sought to correct the falsehoods about Christ he had once propagated, after he realized his error (cf. 1 Cor 15:9; Gal 1:13–14). Some might question whether he did so in Jerusalem (Gal 1:18–19 might be used to argue against it, but cf. 1:23), but one of his own letters shows that he clearly did preach Christ’s good news “beginning in Jerusalem” (Rom 15:19).

On the historical level, would any of Paul’s relatives who may have lived in Jerusalem (cf. Acts 23:6, 16) have repudiated him at this point? There is no reason to assume that they must have done so (cf. 23:16). Though much public sentiment in Jerusalem concerning the Jesus movement seems to have moved from favorable (2:47; 5:13) to unfavorable (12:3) after Stephen’s death,⁸⁵² some Pharisees (perhaps including some relatives; cf. discussion at Acts 23:6) may have held to Gamaliel’s more tolerant line (5:34–39), disapproving of Paul’s previous excesses in persecution. They may have also listened to his testimony (if not already turned against it by intervening reports) or even heard earlier reports from his companions on the road to Damascus. But Paul’s family members in Jerusalem were probably also part of the synagogue from which the persecutors originated (6:9), and we cannot be sure where they stood regarding the Jesus movement.⁸⁵³ The likeliest guess is that they would have remained publicly silent

848. Tannehill, *Acts*, 114.

849. Skarsaune, *Shadow*, 154 (comparing [n. 13] “present day English-speaking Brooklyn Jews, settling in Jerusalem’s ultra-orthodox quarters”).

850. E.g., Philost. *Ep. Apoll.* 44, 47, 69.

851. Although ἐπιχειρέω has a broader sense of “undertake” (e.g., Luke 1:1; Acts 19:13; 2 Macc 2:29; 7:19; 10:15), it can mean “attack,” even in the same document (e.g., 2 Macc 9:2; cf. Men. Rhet. 2.1–2, 375.15–17; cf. the idiom “lay hands on,” e.g., John 7:30).

852. Though the evidence of Acts 12:3 also reflects a period of broader changes, when nationalism was becoming increasingly prominent.

853. If Luke knew that Paul was rejected by his family, he had good reason to report it (Luke 12:53; 14:26; 18:29; 21:16; cf. 2:48), but Paul may have chosen never to mention it (cf. 18:20), so that Luke may not have known. Those converted to radical philosophies such as Cynicism (Alciph. *Farm.* 38 [Euthydicus to Philiscus], 3.40, ¶1) or Essenism (4Q477 2 II, 8 if its sense resembles that in II, 6) might reject earthly families. Indeed, even Socrates (Xen. *Apol.* 20), Stoics (Mus. Ruf. 16, p. 102.14–16, 21–31; p. 104.30–32), Pythagoreans (Iambl. *V.P.* 34.246; 35.257), and others (Lucian *Hermot.* 23) recognized a higher allegiance; Romans also valued duty to the state above family (Val. Max. 2.2.4). Some Judeans, however, would consider Paul a traitor to Judaism regardless of his relation with his family (cf. Barclay, “Paul among Jews”). Some attacked Christianity for valuing spiritual above natural families (Mac. Magn. *Apocrit.* 2.7–12); others similarly attacked converts to Judaism (Tac. *Hist.* 5.5).

during the opposition⁸⁵⁴ and perhaps experienced some public shame,⁸⁵⁵ but some of his family, at least, continued to value him (23:16). Unless they openly converted, it is unlikely that they would face persecution (apart from gossip); if they were of high social status, they may have been persecuted only if, like Paul, they were speaking out.⁸⁵⁶

Paul does not mention opposition on this occasion in his account in Galatians, but there he describes only his relationship with the Jerusalem church (Gal 1:18–19). He elsewhere may suggest that he was among the evangelists driven from Judea (1 Thess 2:14–15, if “us” in 2:15 literally includes Paul;⁸⁵⁷ cf. Acts 8:1–4). Opposition could have risen relatively quickly if Paul was preaching publicly (Acts 9:28) and if Paul’s former allies had already learned of his turnabout in Damascus, as they surely would have.⁸⁵⁸

VII. ESCAPING JERUSALEM TO TARBUS (9:30)

As disciples had to help the bold preacher escape Damascus (9:25), so believers now aid his flight from Jerusalem (cf. 17:10, 14; 19:30–31). In the larger context of Luke’s narrative, a vision in the temple presumably helped persuade Paul to leave (22:18), since he was otherwise unwilling to go (22:19–20);⁸⁵⁹ including that information may help protect Paul’s honor further. Historically, the relative brevity of Paul’s stay in Jerusalem after his conversion is suggested by the fact that most churches in Judea did not know him by sight (Gal 1:22)⁸⁶⁰ and especially by the fact that he stayed with Peter only fifteen days though this relationship was a major purpose of his visit (1:18). Paul probably traveled overland by road (note *κατήγαγον*)⁸⁶¹ to Caesarea on the coast (cf. Acts 21:15–16; 23:23, 33; on Caesarea, see comment on Acts 10:1). Luke might imply that Paul spent some time ministering in Caesarea before leaving, because Luke mentions (in probable Lukan hyperbole) that Paul ministered in “all Judea” before reaching the Gentiles (26:20), but a wider Judean ministry might fit better if it at least includes the journeys in 11:30 and 12:25, a suggestion that could also comport better with Judean believers’ lack of direct relationship with Paul in

854. Relatives normally sought to conceal other relatives’ behavior that would shame the whole family; hence the concern of Jesus’s family in Mark 3:20–31 (cf. Malina, *Windows*, 80).

855. Family strife is attributed to a demon in *Test. Sol.* 18:15; is part of Socrates’s tests of endurance in Sen. *Y. Ep. Lucil.* 104.27; and is the cause of a young man’s suicide in Val. Max. 5.8.3. Betrayal by relatives was considered particularly heinous (cf. slaughter by relatives in an evil time, Diod. Sic. 17.13.6; Appian *Bell. civ.* 4.4.18; *Hist. rom.* 7.5.28; Lucan *C.W.* 2.148–51; Ovid *Metam.* 1.144–48; Sen. *Y. Ben.* 5.15.3; Jos. *War* 6.208–12).

856. Cf. comments on Paul’s *possible* (albeit not probable) relatives in Rom 16:7 under “Paul’s Theological Reversal” in the introduction to Acts 9:1–19a; cf. also believers still meeting in Mary’s apparently well-endowed home in 12:12–13.

857. Instead of being a generalizing plural. In favor of its including Paul, he specifically uses “they” in the context when not including himself. As in Damascus, Jerusalem might account for one or more of his synagogue beatings (2 Cor 11:24).

858. Although it can only be speculation at this remove, it would fit human behavior (including in religious circles) if his previous progress beyond peers (Gal 1:14) generated jealousy and hence facilitated later enmity (as well as esteem for his gifts, facilitating recognition of how dangerous he would be).

859. Chilton, *Rabbi Paul*, 84, thinks that this Gentile commission made Paul less welcome with the Jerusalem church. But mainstream Jewish teaching did not oppose making proselytes, nor do we have reason to believe that Paul would have raised circumcision as an issue at this point. The Jerusalem church may have been ready for Paul’s departure, but in order to reduce conflict with their peers, conflict that they would not readily court after Stephen’s martyrdom and Saul’s earlier persecution of them. Granted, if historically Peter had opposed Paul’s Gentile mission here, Luke would not have reported it, but Paul might well have, especially in view of Peter’s own change of heart reported in Acts 10 and Peter’s support in Gal 2:8–9.

860. Although we might distinguish “churches of Judea” from those in Jerusalem (C. Williams, *Acts*, 23; Bruce, *Commentary*, 207), this distinction may characterize Luke (Luke 5:17; 6:17; Acts 1:8; 2:14; 8:1; 26:20; cf. Matt 2:1; 3:5; 4:25) more than Paul (cf. Rom 15:31). We should not deny that Paul’s persecution occurred in Judea simply because of Gal 1:22, since, presumably, Paul was able to arrest only a fraction of the disciples.

861. Contrast perhaps 28:12, but here Paul is the active indicative verb’s object.

Gal 1:22. From Caesarea Maritima on the coast, one could easily catch a ship sailing north along the coast of Syria toward Cilicia.

The believers “sent away” (ἐξαπέστειλαν) Paul, perhaps with someone accompanying him (as in Acts 17:14–15; he was probably accompanied at least en route to Caesarea).⁸⁶² We cannot be certain (especially if he had relatives in Jerusalem) that he lacked resources, but it is also possible that their “sending” him included paying the cost of his voyage to Tarsus.⁸⁶³ Whether Paul had had property of his own that might have been confiscated while he was away in Nabatea, after word of his behavior got back to Jerusalem, is hard to say; we do not even know for sure to what extent persecution may have continued in his absence (cf. 9:31; though he also seems not to have been the only persecutor, 1 Thess 2:15).⁸⁶⁴

If they sent him to Tarsus, his hometown, rather than to some other community where they themselves had contacts (e.g., Barnabas’s Cyprus, Acts 4:36), then presumably Paul retained some relatives in Tarsus (see comment on Acts 9:11; 21:39). Although it has been argued above that some of Paul’s family settled in Jerusalem (23:6, 16; otherwise he was simply sent there for advanced study, as Tarsians often went abroad for such study), he probably had other relatives in Tarsus.⁸⁶⁵ Family friends might also receive him if he could count on the name of his family, though Luke’s emphasis is on his new, spiritual family sending him on, rather than his genetic family in Jerusalem.

Whereas Paul’s earlier years in Tarsus may have been too few (see comment on Acts 22:3) to have provided extensive training for his future ministry among Greeks, this period would have been more influential.⁸⁶⁶ Tarsus was a great intellectual center, especially in this period (see more fully comment on Acts 9:11), though it was declining by the end of the first century.⁸⁶⁷ Paul’s call to the Gentiles would probably encourage him to learn their culture during this period (9:15; Gal 1:16), and even Pharisaic tradition apparently encouraged accommodating local customs that did not violate Torah.⁸⁶⁸

Luke does not mention missionary work during this period of Paul’s life,⁸⁶⁹ but it seems unthinkable, in view of Acts 9:20, 22, and 27–28, that he would neglect at least the Jewish community of Tarsus, and Paul appears to imply his preaching in this period in Gal 1:21–23.⁸⁷⁰ It seems likelier than not that Paul may have helped start the

862. On the greater dangers especially as far as Antipatris, see comment on Acts 23:31–32, though that situation reflects a more volatile period.

863. So Malherbe, *Social Aspects*, 68. Cf. Rom 15:24, 28; 1 Cor 16:6; 3 John 6 (though not always; cf. 1 Cor 16:11). If Paul was well liked, people might count it an honor to show him hospitality (cf., e.g., Pliny *Ep.* 6.28.2; Lucian *Dem.* 63; *Lucius* 3; *Affairs* 9; *Jos. Asen.* 3:2–3/3–4).

864. His relatives’ property would not have been confiscated, and they may have been willing to help him escape privately; but Luke tells us only of the help of the disciples here in contrast to Acts 23:16. We should not infer from this later silence that the Jerusalem church did not want to help him in Acts 23 (this would virtually imply that it wanted him dead!), since it seems unlikely, despite the church’s size, that many of its members would have been privy to this information (unless the church associated not only with Pharisees [15:5] but with this particular group of assassins).

865. Chilton, *Rabbi Paul*, 87, suggests that he returned to his aged parents and that he (now about thirty) could take over their trade. His parents’ residing there makes better sense of his long stay there versus his failure to visit Jerusalem from Damascus—unless (as is likely) Jerusalem remained too dangerous for the former persecutor. From Acts 23:6, I think it likelier that his father (even if not his grandfather; “son of Pharisees” may be a generalizing plural) had settled in Jerusalem, though the case is not certain.

866. Cf. Malherbe, *Social Aspects*, 35.

867. See Rapske, *Custody*, 74–75.

868. Cf. the proverb (possibly cited at least as early as R. Meir in the late second century) in *Exod. Rab.* 47:5.

869. Philosophic students were sometimes urged to learn to practice the discipline before attempting to teach it to others (Epict. *Diatr.* 4.8.35–36).

870. If Paul preached all around Jerusalem (Rom 15:19) and was in Syria and Cilicia (Gal 1:21), he surely preached in the latter as well (Hengel and Schwemer, *Between Damascus and Antioch*, 156). Schnabel,

churches of Cilicia later mentioned (Acts 15:23, 41),⁸⁷¹ possibly suggesting that they were in Paul's sphere of ministry. Still, lack of mention of church-planting ministry there during Paul's early Asian ministry (13:13–14:25; contrast Barnabas's homeland of Cyprus in 13:4–12; 15:39) might suggest that he had not been well received by everyone there (perhaps supplying some of the beatings of 2 Cor 11:23–25 omitted by Luke). Although Luke mentions only Tarsus here, it is not impossible that Paul would have also spearheaded, influenced, or been involved in outreach to other cities in Cilicia with Jewish communities.⁸⁷² Given the link between the Cilician Tarsus and Jonah's "Tarshish" in popular thought,⁸⁷³ some hearers may have envisioned Paul's migration there as foreshadowing his Gentile ministry (as Jonah evangelized Nineveh, Luke 11:32); Luke makes nothing of this, however, nor is Paul's return to his home area compared or contrasted with Jonah's flight from God's will.⁸⁷⁴

Paul's own writings seem to confirm that he left for Cilicia (whose most prominent city was Tarsus) after his brief stay in Jerusalem (Gal 1:21).⁸⁷⁵ Paul's mention of Syria as well as Cilicia in that passage could be explained in several ways compatible with Acts 9:30. First, Syria is a location where he may have stayed briefly en route to Cilicia after Caesarea (at the least, ships would stop at various ports along the way, though this would probably be too insignificant to warrant mention). Second and more significant, it may refer to his later ministry in Antioch (11:26; 13:1), which Paul seems to assume that his Galatian audience knew was a base of operation for him (Gal 2:11). Third, even though both locations are articular in Gal 1:21 (hence the phrase there is not technically a hendiadys), Syria and Cilicia were linked administratively in this period as a single Roman province, making it natural to mention them together (see also comment on Acts 23:34–35).⁸⁷⁶

Given Luke's emphasis on placing the kingdom before family (Luke 9:59–62; 18:29; 21:16), his silence about abandonment of Paul by a wife (which would have probably happened during the three years of Gal 1:17–18 if it occurred) probably speaks against its likelihood. Marriage was the norm for young Jewish men, especially according to later rabbis.⁸⁷⁷ But it was not as mandatory in this period as later rabbis made it (there were many exceptions, almost certainly including John and Jesus),⁸⁷⁸ and Paul may have been still a young man (cf. comment at Acts 7:58) at this point.

Missionary, 260, offers reasons why Paul would have preached in Tarsus, including local connections, local citizenship that offered some protection, a Jewish community, and the city's strategic significance.

871. See esp. Wilson, "Cilicia" (suggesting six primary cities in which Paul may have begun churches, including Tarsus and Adana); Hengel and Schwemer, *Between Damascus and Antioch*, 157. Riesner, *Early Period*, 250–51, brilliantly argues that Paul's mission started at Tarsus to follow the sequence of Isa 66:19 (its Tarshish was interpreted in the NT period as Cilician Tarsus; Jos. *Ant.* 1.127; 9.208), but other elements in the sequence seem too incongruent with Paul's ministry to support this interpretation. (Others think that Paul applied Isa 66:19 to the original Tartessus in Spain [Jewett, *Romans*, 924, following Aus, "Plans," 240–41].)

872. See Schnabel, *Missionary*, 69, noting (from east to west) "Anazarbos, Mallos, Soloi, Sebaste, Korykos, Seleucia and Olba."

873. Hengel and Schwemer, *Between Damascus and Antioch*, 175; Le Cornu, *Acts*, 521 (citing Jos. *Ant.* 1.127; 9.208; Tg. *Jon.* on Gen 10:4; Tg. 1 Chr. 1:7; Gen. Rab. 37:1; y. Meg. 71b).

874. Hengel and Schwemer, *Between Damascus and Antioch*, 176, note that Paul went to Tarsus for reasons opposite those of Jonah—to preach.

875. As often noted (e.g., Hanson, *Acts*, 117; Hemer, *Acts in History*, 182–83; Chilton, *Rabbi Paul*, 83).

876. Green, "Syria and Cilicia"; cf. Ramsay, *Galatians*, 275–79. One governor in this period was Polemo, though probably briefly (in 41 C.E.; Dio Cass. 60.8.2; Dmitriev, "Grant"). Syria was adjacent to Cilicia's eastern border (cf. Pliny E. *N.H.* 5.18.80; 5.22.91; Dio Cass. 47.30.1; 48.41.2).

877. For marrying, see, e.g., Jos. *Ant.* 4.290; *m. Yebam.* 6:6; *Pesiq. Rab Kah.* 22:2; *Gen. Rab.* 23:4; 34:14; for marrying young, see, e.g., Ps.-Phoc. 175–76; *m. 'Ab.* 5:21; *b. Qidd.* 29b–30a; see further discussion in Keener, "Marriage," 681–84.

878. See Keener, "Marriage," 682–83; McArthur, "Celibacy"; Thornton, "Bachelors."

Some scholars believe that Paul must have been married to be a member of the Sanhedrin and hence vote against Stephen (Acts 26:10), but he was almost certainly not a member of the Sanhedrin (cf. comment on 26:10) and likely was never married.

Luke leaves Saul in Tarsus,⁸⁷⁹ where Barnabas later retrieves him in 11:25. Because of the competing demands of chronology, geography, and biography, historians could not follow all stories the entire way through. Luke uses geography to connect interrupted stories, so that he picks up Paul in Tarsus (11:25), Philip in Caesarea (8:40; 21:8), and the implied author of 16:10 in 20:5.⁸⁸⁰ It was customary to “return to the point” after a digression.⁸⁸¹ In a different way than do predictions and foreshadowings of suffering, such shifts in focus can create suspense; ancient storytellers and writers might tease their audiences with promises of developing a topic more fully later (e.g., Philost. *Hrk.* 25.16–17).

c. Temporarily Positive Conclusion (9:31)

If Luke will end his entire work on a positive note (instead of Paul’s execution, Acts 28:30–31), we should not be surprised if he ends various sections positively, too, in accordance with his theme (cf. 1:8; 28:31) that nothing will stop the gospel. This verse summarizes the preceding section (on summary statements, see comment on Acts 2:41–47; 6:7); ancient speakers and writers often recapitulated the substance of what they had treated so far, sometimes long before the end of their work.⁸⁸²

This verse serves a transitional function to the next section but is also a positive conclusion to 9:1–30. In this respect it is comparable to 12:24. In the latter case, the church has peace because God strikes the persecutor dead; in the present case, the church has peace because God converts the persecutor. God is sovereign in how he brings peace about, but in every case in Acts, persecutions are local or temporary. Devastating as they may prove to the disciples who experience them, they belong to a larger picture of God’s work in history, which ultimately prevails.

Although 9:32–43 will continue with the Judean ministry (as part of the Petrine material that leads into the Cornelius story), Luke is preparing to transition into the evangelization of Gentiles. What he immediately summarizes, however, is not so much the Judean and Samaritan mission but the way God ended the persecution by converting the chief persecutor (ending the Pauline material until 11:25).⁸⁸³ The idea of a period of peace after testing and before the next period of testing was familiar from Scripture (Judg 3:11; 5:31; 8:28) and probably Luke’s perspective on Jesus’s

879. The complaints of some scholars that Luke says little about Paul’s stay in Tarsus (and hence had something to hide) argue from silence, ignoring (1) Luke’s space constraints in one volume to cover everything (even had he omitted speeches, which few historians would consider); (2) Luke’s focus on reaching Rome; (3) his focus on the Gentile mission from Antioch; and (4) his historiographic commitment not to report information that he lacks (as opposed to novelistic fabrication; he has much more information for Paul’s mission in Acts 13–28). Still, it is not impossible that Paul made himself unwelcome in Tarsus for some time afterward (until 15:41).

880. Cf. Tannehill, *Acts*, 112, 124. Witherington, *Acts*, 326, compares here Hellenistic historians’ arrangement “κατὰ γένοϋς, on the basis of regions and to some extent on the basis of ethnic groups who live in those regions or locales.”

881. E.g., Xen. *Hell.* 7.4.1; Polyb. 3.9.6; 3.39.1; 3.59.9; 31.30.4; Dion. Hal. *Lysias* 13; Cic. *Fin.* 2.32.104; *Or. Brut.* 43.148; *Att.* 7.2; Val. Max. 4.8.1; Mus. Ruf. 1, p. 34.34; Dio Chrys. *Or.* 12.38; 36.7 (after 36.1–6); Max. Tyre 19.1 (returning to 18.9); Philost. *Hrk.* 20.1 (after 18.6–19.9); cf. introductions to digressions, e.g., Thucyd. 1.23.6; Polyb. 3.2.7; Pliny E. *N.H.* 28.1.1 (introducing a digression consuming all of *N.H.* 28–32); Tac. *Hist.* 2.2.

882. E.g., Demosth. *Fals. leg.* 177 (though the speech runs to 343). On recapitulation, see the excursus on summary statements at Acts 2:41–47 (Keener, *Acts*, 1:992–93); comment on Acts 28:16–31.

883. Lake and Cadbury, *Commentary*, 107, by contrast, think that the verse introduces Peter’s ministry in Acts 9:32–43.

own ministry (Luke 4:13–14). More generally, Luke’s language evokes earlier biblical descriptions of God giving his people rest from all their enemies.⁸⁸⁴

Luke here uses “church” in a much broader way than merely the local assembly in Jerusalem,⁸⁸⁵ suggesting that the expanding Christian movement carried with it its concept of the disciples as God’s “assembly.” The Greek term could designate any gathering,⁸⁸⁶ even an army (Dion. Hal. *Ant. rom.* 6.94.1), but would probably remind most Greek hearers unfamiliar with Judaism or the Christian movement of a citizen assembly.⁸⁸⁷ Luke’s ideal audience, however, was steeped in the LXX (and, as Paul’s letters indicate, by now conventional Christian usage); they would recognize the traditional label for God’s community. Analogously, the Essenes described themselves as the *qahal*,⁸⁸⁸ the Hebrew term for God’s congregation in the exodus narrative, which the Greek versions translate as ἐκκλησία, or “church.”⁸⁸⁹

That the church “continued”⁸⁹⁰ in fearing the Lord suggests continuity with Acts 5:5, 11; that it was “built up” while enjoying peace could suggest internal cohesion and unity (cf. Rom 14:19; 1 Cor 8:1, 10; 10:23; 1 Thess 5:11)⁸⁹¹ but probably indicates spiritual or numerical growth (cf. 1 Cor 14:3–5, 12, 17, 26; 2 Cor 12:19; 13:10) now that persecution has stopped.⁸⁹² Biblical tradition already spoke of “building up” the community of God;⁸⁹³ Qumran texts indicate that the usage remained familiar among Jesus’s contemporaries.⁸⁹⁴

Luke mentions the three major areas of greater Judea west of the Jordan: Judea, Galilee, and Samaria.⁸⁹⁵ Some scholars suppose that by mentioning Galilee before Samaria, Luke thinks that the former is nearer Judea than the latter,⁸⁹⁶ but whatever one’s view of Luke’s geographic skills outside Judea proper, such a conclusion is hardly warranted from evidence as scant as the sequence in which he names the regions. If he

884. Deut 12:10; 25:19; Josh 21:44; 2 Sam 7:1, 11; 1 Kgs 5:4; 1 Chr 22:9, 18; 2 Chr 14:7; 15:15; cf. Neh 9:28; Esth 9:17. Cf. perhaps 4Q174 1 I, 7.

885. Cf. comment in Hunter, *Message*, 69.

886. Cf. Deissmann, *Light*, 112–13.

887. Including in republican Rome (Dion. Hal. *Ant. rom.* 6.87.1; 7.17.2; 11.50.1) and Jerusalem (Jos. *War* 4.162). See comment on Acts 19:32, 39.

888. With, e.g., Albright and Mann, *Matthew*, 121; Brown, Donfried, and Reumann, *Peter*, 92; Harrington, *Matthew*, 29.

889. Frequently noted; e.g., Bultmann, *Theology*, 1:38; Foakes-Jackson and Lake, “Development,” 327–28; Lake and Cadbury, *Commentary*, 54; Richardson, *Theology*, 285; Meeks, *Urban Christians*, 79; Davies and Allison, *Matthew*, 2:629; cf. 1 Macc 2:56.

890. Πορευομένη is probably used here for manner of life, comparable to Heb. *halakah* (see Bruce, *Acts*¹, 209).

891. For political use of the term in ancient literature, see esp. Mitchell, *Rhetoric of Reconciliation*, 99–101 (citing Soph. *Antig.* 559–662; Xen. *Cyr.* 8.15; Dio Chrys. *Or.* 38.15; 48.14; Ael. Arist. *Or.* 23.31, 62; 24.8, 32–33; Cic. *Amic.* 7.23; and 1 Corinthians *passim*), despite its rarity in inscriptions (Winter, *Welfare*, 175). For the metaphoric sense of οἰκοδομέω (“edify”) in Luke-Acts, see Luke 6:49; esp. Acts 20:32 (though Luke usually employs the term literally).

892. “Comfort” (παράκλησις) here refers to encouragement (Acts 15:31), not exhortation (13:15), perhaps (but not necessarily) as a foretaste of eschatological hope (Luke 2:25; 6:24). Luke rarely couples the Holy Spirit with nouns of comfort in this manner, but cf. Luke 4:14 (power); Rom 15:13, 19, 30; 2 Cor 13:14; Eph 4:3; Phil 2:1; 1 Thess 1:6.

893. E.g., Ruth 4:11; Pss 51:18; 69:35; 147:2; Jer 1:10; 24:6; 31:4, 28; Ladd, *Theology*, 109; Keener, *Matthew*, 428; cf. Prov 9:1.

894. 4QpPs 37 (4Q171) III, 16; Jeremias, *Theology*, 168.

895. Ancient writers emphasized cities more than regions in the imperial period (Judge, *Pattern*, 20–21), but Luke is certainly capable of noting both (he knows “provinces,” Acts 23:34; 25:1; specifically, e.g., Achaia, 18:12, 27; 19:21; Asia, 6:9; 16:6; 19:10; Macedonia, 16:9–12; 18:5; Pontus, 18:2; and Bithynia, 16:7).

896. Conzelmann, *Acts*, 75 (comparing Pliny E. *N.H.* 5.70); on Luke’s lack of firsthand acquaintance with Judean geography, see esp. Bechard, “Judea,” 682–83 (comparing various other distant non-Judean authors, in contrast to Josephus). The same misinterpretation is often offered for Luke 17:11.

has any rationale at all for the sequence, he could arrange them according to popular Judean views of their Jewish orthodoxy, wishing to keep the predominantly Jewish areas together. Another passage (Acts 15:3–4) provides better evidence that Luke recognized that one could reach Jerusalem from Samaria to its north.⁸⁹⁷

Peace in these regions suggests that the period of persecution that scattered believers in Judea and Samaria (8:1) had ended for the moment, allowing Peter's travels (9:32–43; previously the apostles alone were not scattered, 8:1). It also suggests that the church is now established in the "Judea and Samaria" part of Jesus's words in 1:8, paving the way for the mission to the ends of the earth.

Others doubt that the apostolic movement spread much in Galilee in this period because Luke mentions it only here.⁸⁹⁸ But Luke knew far more than he was able to narrate, and his urban Mediterranean focus left Galilee behind once Jesus began his journey to Jerusalem (though the disciples remained "Galileans," 1:11).⁸⁹⁹ As in Paul (and in contrast to Matthew and Mark, which may be more rooted in conservative Galilean Christian perspectives [perhaps including the originally Galilean Jerusalem apostles] than either Luke or Paul was), Luke's Palestinian geography is Jerusalem-centered.⁹⁰⁰ It was from Jerusalem that the Hellenists provided a bridge to the Gentile mission, on which he focuses, and it is in Jerusalem rather than Galilee that he finds Paul. If we take into account the *Tendenz* of both Paul and Luke, we need not exclude Galilean churches, which Luke does mention at least here. Archaeology supports churches in Galilee (at least from a later period), and the successes reported in the Gospels makes their presence likely.

Excursus: Galilee

Whereas we have dealt elsewhere with Samaria (see comment at Acts 8:5), Galilee merits brief discussion here.⁹⁰¹ Although not prominent in Acts (and, when mentioned there, it usually refers to the disciples or Jesus's mission from the Gospel; Acts 1:11; 2:7; 10:37; 13:31; cf. 5:37), it is common in Luke's Gospel (Luke 1:26; 2:4, 39; 3:1; 4:14, 31; 5:17; 8:26; 13:1–2; 17:11; 22:59; 23:5, 6, 49, 55; 24:6).⁹⁰² Galilee served a positive theological role in the Synoptics in general,⁹⁰³ which may reflect the strength of the Christian movement in the region where Jesus had ministered.⁹⁰⁴

897. Hengel, "Geography of Palestine," 69.

898. Barrett, *Acts*, 1:473; Witherington, *Acts*, 326. But even if we distrust some of Luke's assumed geography, we need not distrust his explicit information here (Patzia, *Emergence*, 87).

899. See discussion on different Gospel writers' Jerusalem and Galilean perspectives at Acts 1:8.

900. Hengel, "Geography of Palestine," 35n32, compares the centrality of Jerusalem (Rom 15:19–21, 30; 1 Cor 16:3; Gal 1:17–18; 2:1) and Judea (Rom 15:31; 2 Cor 1:16; Gal 1:22; 1 Thess 2:14) for Paul and his lack of mention of Galilee (though the movement would not have invented its obscure Galilean origins).

901. I borrow the material below from Keener, *John*, 228–31. On Galilee, see fuller discussions in, e.g., Freyne, *Galilee, Jesus*; idem, *Galilee and Gospel*; Horsley, *Galilee*. Many emphasize the light that a Galilean context could shed on Jesus's ministry (e.g., Freyne, "Jesus and Archaeology"; idem, "Geography"; Reed, *Archaeology*; Sawicki, *Crossing Galilee*; Race, "Influence").

902. Luke does not include Mark's postresurrection emphasis on Galilee, however; see comment on Acts 1:4.

903. Freyne, *Galilee, Jesus*, 50–68, 82–90, 103–15.

904. For a survey of the abundant archaeological evidence, see Saunders, "Synagogues"; Meyers, "Judaism and Christianity," 69, 71. Much earlier, Julian the Apostate repeatedly calls Christians "Galileans" (see Stern, *Authors*, 502–72 passim); cf. Epict. *Diatr.* 4.7.6. His purpose was to emphasize their cultural inferiority (Judge, *Athens*, 222). But while some construct a Galilean "community" for Q, its Galilean features likely simply represent authentic Jesus tradition (Dunn, *Perspective*, 27), whether composed in Galilee or not.

Although Josephus claims three million residents in Galilee in 67 C.E. (*Life* 235; *War* 3.43), some scholars propose that his 60,000 recruits from there may suggest a likelier population of perhaps 750,000 (*War* 2.583).⁹⁰⁵ Others offer even lower estimates,⁹⁰⁶ but some of these figures may overestimate the extant data we have to work with. Galilee seems to have been densely populated with villages.⁹⁰⁷

1. Ethnicity

Following Schürer, many scholars supposed that Galileans, having converted to Judaism little more than a century before Jesus, were not very Judaized; by 1941 Grundmann took this thesis so far as to argue that Jesus was not Jewish.⁹⁰⁸ But whereas Jewish literature describes the force-converted Idumeans as half-Jews, it never does the same regarding Galileans.⁹⁰⁹ This may be partly because Galilee had mainly been resettled by Judeans after the Hasmonean conquests; archaeological surveys indicate that the area became heavily populated only after the Judean conquests.⁹¹⁰

Gentile cities abounded around Galilee,⁹¹¹ and social intercourse occurred.⁹¹² Upper Galilee had robust commercial ties with Tyre.⁹¹³ But Gentiles did not predominate,⁹¹⁴ and Greek cultural influence was far less in Galilee's villages than in urban Jerusalem before 70 C.E.⁹¹⁵ Whereas the Golan included both Jewish and Syrian elements, Lower Galilee was nearly completely Jewish by the time of Josephus.⁹¹⁶ And whereas Lower Galilee may reflect more hellenized art and speech because of its contact with larger cities,⁹¹⁷ it has been questioned whether it was appreciably more hellenized in other respects.⁹¹⁸ The theater of Sepphoris seated only four thousand and hence, at most, half of Sepphoris's own population; it was not intended for, nor did it likely attract, Galilean villagers.⁹¹⁹ In the first half of the first century, the theater seated at most

905. Avi-Yonah, "Geography," 109.

906. Hoehner, *Antipas*, 291–95, suspects roughly 200,000 (about 266 persons per square mile). Multiplying the number of known settlements (from literary or archaeological sources) by Galilee's population density in the late nineteenth century, Goodman, *State*, 32, suggests 300,000.

907. Freyne, *Galilee, Jesus*, 144 (citing the 204 villages in Jos. *Life* 235).

908. Freyne, *Galilee, Jesus*, 2 (citing Grundmann, *Jesus der Galiläer*, from 1941). Schürer's construct is now recognized as fallacious (Reed, *Archaeology*, 53–54). Most readers will not need to be reminded of the dominant ideology in the time and place in which Grundmann was writing. Larger worldviews have long shaped constructs of Galilee (see Moxnes, "Construction").

909. Freyne, *Galilee, Jesus*, 169.

910. *Ibid.*, 170; Reed, *Archaeology*, 52; see also Cromhout, "Judeans." For some Jewish habitation in the second century B.C.E., see Syon, "Evidence."

911. Freyne, *Galilee, Jesus*, 143–44. For an earlier period, see esp. 1 Macc 5:15. Gentile sites cluster on Galilee's perimeter (Reed, *Archaeology*, 51–52).

912. Goodman, *State*, 41–53; Stambaugh and Balch, *Environment*, 93; cf. Overman, "Archaeology."

913. Vale, "Sources."

914. See Eddy and Boyd, *Legend*, 116–19, and the sources they cite (esp. Jonathan Reed, Mark Chancey, Sean Freyne, and Eric Meyers).

915. See Levine, *Hellenism*, 94–95; Strange, "Galilee," 395–96; Chancey, *Galilee*; Gregory, "Galilee." Pace Mack, Crossan, and others, we lack evidence for a significant Cynic presence in Galilee (Eddy, "Diogenes," 463–67; Boyd, *Sage*, 151–58; the contrary response of Seeley, "Cynics," is helpful on details but does not affect this general picture).

916. Goodman, *State*, 31–32.

917. Meyers, "Regionalism"; cf. Crossan, *Jesus*, 19.

918. Goodman, *State*, 88–89.

919. Horsley, *Galilee*, 250–51, also commenting on the lack of public baths in the villages. Public baths were a necessity for urban Hellenists (e.g., Diog. Laert. 6.2.40; Mart. *Epig.* 12.82; Paus. 2.3.5; Apul. *Metam.* 2.2; Yegül, "Complex"; among Palestinian Jews, cf. *t. Ber.* 2:20; *B. Qam.* 9:12).

2,500 (the date of its earliest construction is debated).⁹²⁰ Urban centers, whether in Galilee or in Judea, tended to be more hellenized in language and, in some respects, in culture (see comment on Acts 6:1).

2. Orthodoxy?

Although Galileans were clearly Jewish, they were not well respected by all Judeans. They appear negatively in some rabbinic texts.⁹²¹ Opposition derives especially from later Babylonian texts⁹²²—notably after the Palestinian rabbis had settled in Galilee following the abortive Bar Kokhba revolt of 132–35 C.E.—but some earlier rabbinic texts also question Galileans’ observance of the law.⁹²³ According to the rabbis, regional differences helped determine whether one could trust that food had been properly tithed⁹²⁴—perhaps because not everyone followed rabbinic interpretations of the law. But first-century sources indicate Galileans’ loyalty to the law (cf., e.g., *Jos. Ant.* 20.43),⁹²⁵ and later Palestinian sources can approve Galilean customs even though they differed from the norms of, for instance, R. Akiba.⁹²⁶

Archaeology confirms Galilean Jewishness and “orthodox” practice.⁹²⁷ Stone vessels, which are less susceptible to impurity,⁹²⁸ predominate, common even in pre-70 Sepphoris.⁹²⁹ Jewish purification pools are common, again even in Sepphoris; so are Jewish burial practices such as ossuaries.⁹³⁰ Studies of Galilean bones show pork-free diets, and pig remains are missing in pre-70 Jewish Galilee.⁹³¹

Some scholars argue that charismatic teachers, less amenable to traditional restrictions than Pharisaic scribes were, may have been more common in Galilee than Pharisees.⁹³² Galileans were loyal to the Jerusalem temple but not particularly to the Pharisees or their successors (probably accounting for some subsequent calumnies).⁹³³ Regional bias may have blended with class bias, an urban Jerusalem elite mistrusting the education of rural clients on its frontier.⁹³⁴ Galilean respect for Jerusalem in Josephus warns us not to press matters too far, but regional prejudice

920. Evans, *World*, 28 (though his references to theatrical allusions in Jesus’s teaching on 28–30 do not appear persuasive).

921. E.g., *b. Erub.* 53b; *y. Hag.* 3:4, §1; Freyne, *Galilee, Jesus*, 1–2.

922. Freyne, *Galilee, Jesus*, 216–17.

923. Although most of the texts cited by Vermes, *Jesus the Jew*, 54, do not support his case, *m. Ned.* 2:4 does. The Palestinian Amoraic account of Johanan ben Zakkai’s rejection in Galilee might also be instructive (*Jesus the Jew*, 56–57).

924. *T. Demai* 1:10. Most cities and regions in the empire had some idiosyncratic traditions (e.g., Paus. 2.1.1).

925. Malinowski, “Tendencies”; Horsley, *Galilee*, 152–55; cf. Mayer, “Anfang”; Manns, “Galilée”; Meyers and Strange, *Archaeology*, 37–38, 45; Dunn, “Synagogue,” 207–12.

926. *y. Roš Haš.* 4:6, §1. That halakic customs varied is clear (e.g., *y. Ketub.* 4:14, §1, following *m. Ketub.* 4:14; *y. Ned.* 2:4, §3).

927. See, e.g., Reed, *Archaeology*, 44–51; Dunn, “Synagogue,” 207–12.

928. Cf. Reed, *Archaeology*, 44–45; Reich, “Jars”; Safrai, “Home,” 741; Avigad, “Flourishing,” 59; idem, *Jerusalem*, 183; cf. Schwank, “Wasserkrüge”; Magen, “Yrwslym”; Gal, “T’syyt.”

929. Reed, *Archaeology*, 49–51, esp. 49 on Sepphoris; Evans, *World*, 24–25. Cf. John 2:6.

930. Reed, *Archaeology*, 49; he deals with the usefulness of these in identifying Jewish sites (45–47) and Jewish burial practices (47–49); on purification pools, see also Evans, *World*, 25; for menorahs, 25; for coins, 25–26.

931. Reed, “Contributions,” 53; Evans, *World*, 24.

932. Vermes, *Jesus and Judaism*, 5, 153n8; Davies, *Setting*, 450; Liefeld, “Preacher,” 144.

933. See Freyne, “Religion.” For Galilean loyalty to Jerusalem, see esp. *Jos. Life* 198.

934. Urban dwellers could despise rural dwellers as uneducated, especially if from less respectable regions (*Aelian Farmers* 20 [Phaedrias to Sthenon], end). See the commentary introduction, Keener, *Acts*, 1:590–96.

seems to have served some polemical value among Galilean Christians and the Judean elite.⁹³⁵

Josephus indicates that most Galileans were loyal to Jerusalem and the priesthood.⁹³⁶ Although Jerusalem exercised no political control over Galilee, he shows that its status as Judaism's center gave it special influence.⁹³⁷ Yet even in the second century, Galilee did not accept the rabbis' leadership.⁹³⁸ The rabbis tried to control Galilean Jewry purely in religious matters, but Galileans generally did not accommodate them even here.⁹³⁹ The rabbis' idealism concerning tithes probably did not commend itself to more agrarian peasants.⁹⁴⁰ Galileans apparently shared with Judeans religious customs and some elements of material culture, but they differed in some other aspects of culture, such as wealthy Jerusalemites' decorations and foreign styles.⁹⁴¹ That is, they were likely more culturally conservative, rather than more liberal, than Judeans.

3. Revolutionaries?

"Judas the Galilean" (Acts 5:37), leader of the infamous and ill-fated tax revolt during Jesus's childhood, was naturally considered Galilean.⁹⁴² This does not, however, mean that Galileans were particularly predisposed toward revolution, as some scholars have suggested.⁹⁴³ Zeitlin and others have argued that Josephus used "Galilean" as a revolutionary rather than geographical title,⁹⁴⁴ but this approach omits a significant body of evidence.⁹⁴⁵

When Josephus's rhetoric is taken into account,⁹⁴⁶ Galilee was clearly unprepared at the time of the first revolt; it hardly proved an ideal base for Zealot sympathizers.⁹⁴⁷ Sepphoris, in fact, refused to join the revolt of 66–70, perhaps recalling its earlier destruction under Varus. Further, the messianic uprisings of the Samaritan, Theudas, and the Egyptian prophet that Josephus reports neither transpired near Galilee nor boasted explicit Galilean support.⁹⁴⁸

4. Distinctions within Galilee

Literary and archaeological sources both suggest a cultural distinction between Upper Galilee (the Golan) and Lower Galilee. The latter included larger and more culturally mixed urban areas; although most of its inhabitants lived in villages, the wider cultural diversity in Galilee's cities must have regularly influenced the villages.⁹⁴⁹

935. Cf. Malina, *Windows*, 62.

948. *Ibid.*, 195; Witherington, *Christology of Jesus*, 88–90.

949. Freyne, *Galilee, Jesus*, 171.

Nevertheless, Galilee as a whole had some homogenous cultural characteristics.⁹⁵⁰ Moreover, archaeological and literary evidence confirm that the heavy population of Lower Galilee was primarily rural and agricultural,⁹⁵¹ and villages, despite cultural influences, were mainly autonomous politically and economically.⁹⁵² Differences and hence misunderstandings between rural and urban Mediterranean culture were pronounced⁹⁵³ despite the influence of the latter on the former.⁹⁵⁴ This clash between urban and rural life obtained in Galilee as well.⁹⁵⁵ At the same time, it should not be exaggerated.⁹⁵⁶

950. Reed, *Archaeology*, 215–16.

951. Freyne, *Galilee, Jesus*, 144–45, citing *Jos. Life* 58; cf. Freyne, “Galileans.”

956. Reed, *Archaeology*, 97.

PETER'S MINISTRY BEYOND JERUSALEM (9:32–12:24)

Except for the preparatory digression on the events in Antioch (11:19–30), this section emphasizes key events¹ beyond Jerusalem. Although Jerusalem remains the theological and institutional center for the movement, the significance of any “center” is decreasing. Peter, the leading Jerusalem apostle, ministers elsewhere in Judea (as earlier in Samaria in 8:14–25; see 1:8) and ultimately finds Jerusalem unsafe (12:1–24, esp. 12:17). The lengthy center of this section (10:1–11:18) concerns ministry to the Gentiles, epitomized in this case by an officer of the occupying army in Judea’s Roman administrative center.

In the “Hellenist” transition between the Jerusalem church and Paul’s ministry (Acts 6–12), Luke prepares for the focus on Paul (Acts 13–28) by alternating between Saul (7:58–8:3; 9:1–31; 11:19–30) and Peter (8:4–40, with Philip; 9:32–11:18; 12:1–24) after Saul is introduced in 7:58–8:3.²

1. Or, in the case of Acts 9:32–43, prominent sample events indicating Peter’s Judean ministry.

2. Allen, *Death of Herod*, 130–31. This shifting of focus between characters appears not only in novels (see Pervo, *Mystery*, 72), which relevantly illustrate Luke’s popular storytelling style, but also in historiography (see, e.g., Jos. *Ant.* 18.194; Dion. Hal. *Pomp.* 3; see the commentary introduction, ch. 6, sect. 2.g [Keener, *Acts*, 1:193–94]).

HEALINGS ON THE COASTAL PLAIN (9:32–43)

Luke surveys Peter's ministry on the coastal plain, focusing on two healings. The signs reported in this section draw attention to the gospel on the Judean coast (9:35, 42), just as analogous apostolic signs have done in Jerusalem (5:12–16). Luke thereby emphasizes that the locus of divine activity belongs not to a place (Jerusalem or the temple) but to Christ's agents who carry on his work.

Following the frequent pattern of Jesus's ministers in Acts recapitulating elements of Jesus's ministry, Peter's ministry here provides parallels with that of Jesus in the Gospel. Scholars naturally often compare the healing of the paralytic (Luke 5:18–26; Acts 9:33–35) and the raising of Jairus's daughter (Luke 8:40–56; Acts 9:36–42)¹ or (less closely) the healing of the paralytic and the raising of the widow's son (Luke 7:11–16).² Echoes of Elijah and Elisha stories here (e.g., 1 Kgs 17:17–24; 2 Kgs 4:32–37) portray Peter as in continuity with them.³ The accounts also suit Luke's narrative approach in that he often pairs miracle stories, parables, and other stories to include both a man and a woman.⁴

Luke surveys powerful miracles here to show that we can trust the Peter who gets the vision in Acts 10. He *merely* summarizes these impressive miracles because of his interest and probably because of that of his sources: his focus must be the encounter with Cornelius, which offered a significant turning point in the direction of the early Christian mission.

The geography is significant. Luke's geographic perspective on Palestine is as sketchy as that of most other ancient writers, especially concerning the places he had not visited personally.⁵ His portrayal of the coastal plain, however, is "completely correct,"⁶ fitting his claim to have traveled by road from Caesarea to Jerusalem (Acts 21:15–17).⁷ The most important cities on the coastal plain that were nearly completely Jewish were Lydda and Joppa. The distance directly northwest from Jerusalem down to the mainly

1. Karris, *Invitation*, 110. Pervo, *Story*, 36, compares Luke 8:40–56.

2. Witherington, *Acts*, 327.

3. Most commentators note the parallels (e.g., Jervell, *Apostelgeschichte*, 298; Pervo, *Mystery*, 85–86). Early Jewish writers retold these biblical stories (see Koskenniemi, *Miracle-Workers*, 290); later Christian wonderworkers also followed the model of Elijah (see Frankfurter, *Religion in Egypt*, 20).

4. Marguerat, *Actes*, 348; Witherington, *Acts*, 328; see comment on Acts 1:14. Witherington, *Acts*, 330–31, argues that Luke portrays Tabitha's story as more significant than that of Aeneas, fitting Luke's pattern. For a number of linked words and patterns clearly connecting the two miracle stories in this section, see Parsons, *Acts*, 137.

5. Hengel, "Geography of Palestine," 27, 78. For other writers confused on Palestine's geography, see 29–30, citing Strabo 16.2.16–46, esp. 16.2.21, 28–29, 34; Pliny E. *N.H.* 5.66–73; Tac. *Ann.* 12.54.2; Ptolemy *Geog.* 5.15.1–7 (= 5.16.1–10 [Nobbe]); *Let. Aris.* 115–18; Ps-Hecataeus in Jos. *Ag. Ap.* 1.196–97; Philo *Prov.* 2.107 (= Euseb. *P.E.* 8.14.64). As Hengel also notes ("Geography of Palestine," 30–31), eyewitnesses did better (e.g., 1–2 Maccabees; the military source in Polyb. 5.61.3–62.6; 66.1–72.12).

6. Hengel, "Geography of Palestine," 59.

7. *Ibid.*, 27.

Jewish area of the coast to Lydda, the “first large Jewish place in the plain,” was about twenty-five miles (cf. Jos. *War* 2.244). Joppa, the only important Jewish port (though it became less important after Caesarea’s founding), was eleven miles farther in this direction.⁸ Beyond this lay Caesarea (cf. Acts 10:1, 5), thirty miles north along the coast. In contrast to Philip’s ministry (8:40), Peter’s is limited to Jewish cities and to already established churches.⁹ Peter’s ministry to Jewish circles fits the picture of Gal 2:7 but makes all the more significant his involvement in the Cornelius story in Caesarea, though Philip had already ministered there.

Recollection of the locations and, in contrast to most miracle reports in Acts, the names of those healed suggests particularly vivid reminiscences, perhaps still told by Christians on the coastal plain through which Luke traveled to Jerusalem.¹⁰ (As noted below, the Christian presence in Lydda apparently remained strong much later, including in the second century.) Some scholars concur that Peter stayed in Lydda and Joppa as part of his Jewish mission (Gal 2:7) but doubt the miracle reports.¹¹ Yet it is difficult to see why these particular traditions would be preserved apart from the miracle reports that are central to them; Peter must have traveled many places (1 Cor 9:5).

1. Healing Aeneas at Lydda (9:32–35)

The healing at Lydda draws attention to the gospel (Acts 9:35), just as apostolic signs in Jerusalem did (5:12–16). By recounting this healing and extending the geographic frontiers of the pattern of signs bringing attention to the message, Luke emphasizes that the locus of divine activity belongs not to a place (Jerusalem or the temple) but to Christ’s agents who carry on his work.

a. Saints in Lydda (9:32)

Peter came to “saints” in Lydda, which could mean devout Jews (e.g., LXX Pss 33:10 [34:10 MT; 33:9 ET]; 82:4 [83:3]; Dan 7:18, 21) but which Luke elsewhere uses for Christians (Acts 9:13, 41; 26:10), the likely sense here. (On κατοικέω, see comment on Acts 2:5.) Probably he is following up the fruits of Philip’s labors (8:40) as he did in 8:14–16.¹² Lydda was significant as a place where Jerusalemites could connect with the coastal road south to Gaza and Egypt, about a day’s journey (ca. 25 mi. due northwest of Jerusalem).¹³ It was the Sharon plain’s most significant Jewish city, added to Judea from Samaria (1 Macc 11:34 [cf. 10:30; 11:28]; Jos. *Ant.* 13.127).¹⁴ It had long been a Jewish city (1 Macc 11:34) whose men attended Jerusalem’s feasts (Jos. *War* 2.515). Like Joppa, Lydda was one of the ten or eleven governmental districts of Judea in this period (3.55; Pliny E. *N.H.* 5.15.70).¹⁵

8. *Ibid.*, 59. Bruce, *Acts*¹, 211; idem, *Commentary*, 211, argues that Gentiles also lived here; surely there were more per capita than in Jerusalem in any case.

9. See Hengel, “Geography of Palestine,” 60. Later rabbis debated whether Israelites or Gentiles were predominant in the Holy Land (*y. Demai* 2:1 [22c]).

10. Cf. Polhill, *Acts*, 246; Dunn, *Acts*, 129. All of Acts 9:32–11:18 is Peter material; although it could be collected from disparate anecdotes about him (Crowe, *Acts*, 70), the vivid memories probably suggest authentic, pre-Lukan connections among the stories.

11. Lüdemann, *Christianity*, 123.

12. With, e.g., Fitzmyer, *Acts*, 444; Witherington, *Acts*, 328.

13. Le Cornu, *Acts*, 413, 526 (citing *m. Ma’as.* š. 5:2).

14. For its significance, see also Jos. *Ant.* 14.208, 412; *War* 1.302; 2.244, 567. For its nearness to Samaria and its size, see also *Ant.* 20.130; *War* 2.242; for its Jewishness, *War* 2.515. Le Cornu, *Acts*, 526, cites in addition *b. Meg.* 4a; texts about Lod in 1 Chr 8:12; Ezra 2:33; Neh 7:37; 11:35.

15. As often noted (e.g., Lake and Cadbury, *Commentary*, 108; Johnson, *Acts*, 177).

Josephus calls Lydda a κώμη, or “village,” but almost a city and large enough to be a city (*Ant.* 20.130);¹⁶ like Joppa, it was known not to have the republican government and civic rights characteristic of a Greek πόλις.¹⁷ Lydda acquired a reputation for wine, figs, linen (with a guild of *tarsiim*), and the making of pottery.¹⁸ By surrendering to the Romans, it was spared the destruction suffered by Jerusalem and some other locales (*War* 4.444), and it eventually became a center of rabbinic thought.¹⁹ After taking the town in 68 C.E., Vespasian established there Jews he considered still faithful to Rome.²⁰ This was probably the largest Jewish town soon after 70 C.E., and R. Gamaliel taught there before moving to Yavneh.²¹ Perhaps two centuries after Peter's visit, Lydda was sufficiently hellenized to bear the Greek name Diospolis (“Zeus's City”), but it was quickly christianized.²²

b. Aeneas's Sickness (9:33)

Luke does not explain the details of Peter's contact with Aeneas, but pious Jewish people did normally visit the sick;²³ this was also a standard Gentile custom.²⁴ Some scholars think that Aeneas was a Gentile because of his name. The name “Aeneas” could be Jewish, however; it appeared among Palestinian Jews as early as the time of Hyrcanus I (*Jos. Ant.* 14.248) and continued through the Judean-Roman war (*War* 5.326–28) and as late as the fourth century (*CIJ* 2.1209) and (less surprisingly) in the Diaspora (*CPJ* 1.24.23).²⁵ Indeed, before Acts 10, a Gentile in Peter's ministry is extremely unlikely (Acts 10:28), and Aeneas would have warranted specific mention as such if he had been one. Lydda was a mostly Jewish town (see comment on Acts 9:32).

Because the Trojan Aeneas was the legendary ancestor of the Roman people,²⁶ some suggest that the name could, like Troas in 16:8, foreshadow the Gentile mission.²⁷ This is, however, at best speculation here; although Luke often omits the names of

16. See Hengel, “Geography of Palestine,” 59; Barrett, *Acts*, 480. Though less significant for trade than maritime centers such as Joppa or Caesarea, it apparently had its share of merchants (*m. B. Meši'a* 4:3 apparently critiques them for defrauding) and was well known into later times (e.g., *Lam. Rab.* 3:9, §3).

17. Judge, *Pattern*, 13 (following Jones, *Cities of Provinces*); cf. Hengel, “Geography of Palestine,” 60.

18. Le Cornu, *Acts*, 527 (citing *m. Kelim* 2:2; *t. Ma'as.* Š. 5:15; *b. Naz.* 52a; *Beṣah* 5a; *Roš Haš.* 31b); she offers that *tarsiim* may suggest Diaspora Jews from Asia Minor, who were commonly linen workers.

19. Le Cornu, *Acts*, 527 (citing *m. Roš Haš.* 1:6; *Ta'an.* 3:9; *B. Meši'a* 4:3); *m. Yad.* 4:3; *b. 'Erub.* 53b. For the later rabbinic center there, see, e.g., *y. Sanh.* 3:5, §2; *Pesiq. Rab Kah.* 18:5.

20. Pahlitzsch, “Lydda.”

21. Rosenfield, “M'ndw.” Because Lydda was larger than Yavneh and became the primary rabbinic center after Bar Kokhba, Oppenheimer (“Jewish Lydda”) even thinks that leadership was concentrated at Lydda in the so-called Yavneh period (though this may be going too far).

22. Lake and Cadbury, *Commentary*, 108 (identifying it with the biblical Lod, 1 Chr 8:12; Neh 11:35; cf. *Ezra* 2:33; *Neh* 7:37); Fitzmyer, *Acts*, 444.

23. *Sir* 7:35; *4 Bar.* 5:22–23; 7:37; *'Abot R. Nat.* 30; 41 A; *Sipre Deut.* 32.5.12; *b. 'Abod. Zar.* 18a, bar.; *Gen. Rab.* 13:16; *y. Hag.* 2:1, §10; *Tg. Ps.-J.* on *Exod* 18:20; *Tg. Job* 2:11; *Apoc. Zeph.* 7:4–5; *Matt* 25:36; *Jeremias, Parables*, 207; van Unnik, “Teaching of Good Works,” 96–97; Jones, *Parables*, 258–59; Keener, *Matthew*, 605; Le Cornu, *Acts*, 529–30 (citing *Sir* 7:35; *Gen. Rab.* 49:4; *Soṭah* 14a; *Ned.* 39b–40a; *B. Qam.* 100a; *B. Meši'a* 30b).

24. See, e.g., *Thucyd.* 2.51.5–6; *Val. Max.* 2.5.2; *Babr.* 103.6–8; *Suet. Tib.* 51.2; *Claud.* 35.1; *Fronto Ad M. Caes.* 4.2.1; 5.10–11; *Philost. Vit. Apoll.* 7.30; cf. *Xen. Hell.* 2.1.15; *Pliny Ep.* 7.23.1; 9.13.4; *Diog. Laert.* 1.70; *Friedländer, Life*, 1:210–11.

25. Williams, “Names,” 110; cf. also Kee, *Every Nation*, 125; Marshall, *Acts*, 178.

26. Cf., e.g., *Tac. Ann.* 4.9; esp. *Virg. Aen. passim*. On Aeneas, see, e.g., Dowden, “Aeneas.”

27. Reardon, “Homings to Rome,” goes further, suggesting a connection with the narrative's specifically Rome-ward direction. Yet “Jason” in Acts 17:6 hardly evokes the northeast (Colchian) direction of Apollonius of Rhodes's (or Valerius Flaccus's) *Argonautica* for the narrative. Still, Christians would recognize the name “Aeneas,” though some scholars overstate the connection; Georgi, “Aeneas und Abraham,” and Elliott, *Arrogance*, 136–41, even think that Paul's audience in Rom 4 may have compared Abraham with Aeneas, Rome's founder; cf. also the approach in Harrison, *Authorities*, 321.

those who are healed (e.g., 3:2–11; 4:14, 22; 14:8–10; 16:16–18; most healings in the Gospel and all summary statements), he is not averse to naming them (cf. 13:8, 11; 28:8), most relevant in this context (9:36).²⁸ What can be argued is that as he moves toward Joppa (9:36) and especially Caesarea (10:1), Peter, like Philip before him, is moving in “increasingly more Hellenized territory,”²⁹ with broader exposure to a more cosmopolitan world. A Greek or Roman name is therefore hardly surprising here (e.g., “Dorcas” in 9:36).

Luke often mentions the duration of a sickness, whether eighteen years (Luke 13:11), twelve years (8:43; cf. Mark 5:25), more than forty years (Acts 3:2; 4:22), or eight years, as here.³⁰ The point of mentioning the duration is to underline the reality of the sickness and hence the reality of the miraculous healing (see comment on Acts 4:22). Aeneas’s lower body could have been paralyzed from an accident that injured his spinal cord, or from tuberculosis affecting the spinal cord, or from other ailments.³¹ The most common cause of paralysis is stroke,³² but falling from a roof or other problems could have caused the infirmity as well.³³ Although caregivers could massage the paralytic with olive oil (a remedy also applied to other ailments), no other sustained treatment for the condition was known.³⁴ Those with disabilities were often viewed negatively (see comment on Acts 3:2; cf. other healings of this disability in 8:7). But unlike some infirmities emphasized in the gospel tradition, paralysis did not make one impure.³⁵

c. The Healing (9:34)

The command to rise and make a bed (στρωσον) for himself could mean either to prepare his bed for sleeping (which may seem odd in view of 9:33, but cf. commands related to beds in Luke 5:24; John 5:8) or to prepare his couch for eating (cf. Luke 22:12; this idea may seem irrelevant, but cf. commands to feed one just healed, 8:55).³⁶ Presumably he had been lying on a bed. The poorest of Romans had, if only a single piece of furniture, a bed;³⁷ rabbis likewise considered it an essential piece of furniture.³⁸ Some poor Judeans might have only a bedroll that doubled as their coat,³⁹

28. It seems plausible that he hears local reports that include the names of earlier church members, in contrast to those healed in transitory evangelistic efforts, but the memory of names in his sources often is probably simply haphazard.

29. Witherington, *Acts*, 330.

30. Noted by Hobart, *Medical Language*, 40 (though to emphasize Luke’s medical interest, which is a possible but hardly necessary corollary). One could read the Greek in this case as “since eight years old,” but this is less likely (cf. Luke 8:43 and contrast Luke 8:42; Acts 4:22; see Bruce, *Acts*¹, 210).

31. Wilkinson, *Healing*, 162; cf. idem, *Health*, 88, for “some disease or injury of the central nervous system”; for tuberculosis, see also Larkin, *Acts*, 150 (following Harrison, “Disease,” 958).

32. Le Cornu, *Acts*, 529 (noting that the more severe the stroke, the more severe the paralysis is apt to be).

33. Ibid. notes injuries as the cause of paralysis in *b. Hul.* 51a.

34. Ibid. (citing *t. Šabb.* 12:11; *y. Ma’as.* Š. 2.1.53b; *Git.* 69b).

35. Ibid., 531. Qumran, however, restricted even this (see CD XV, 16–17; 1QSa II, 2–8; 1QM VII, 4; 4Q266 8 I, 8; 4Q270 6 II, 8; Berthelot, “Infirmes”).

36. Cf. Marshall, *Acts*, 178–79; Johnson, *Acts*, 177. For “preparing” something to lie on, cf. also the LXX uses of στρωννύω (Esth 4:3; Isa 14:11; Jdt 12:15); Mark also used the term for spreading garments to pave Jesus’s entrance to the city (Mark 11:8). In contrast to Luke 5:24, Peter could not tell Aeneas to go home, since he was already there.

37. Carcopino, *Life*, 33–34. For a photograph of a bedframe (1.10 by 2.12 m.; a child’s in the same room is 0.7 by 1.20 m.; both preserved in ash from Herculaneum), see Wallace-Hadrill, *Houses*, 97, figure 5.2. Greeks, too, considered a bed essential (Hurschmann, “Furniture,” 623).

38. Safrai, “Home,” 735–36; Le Cornu, *Acts*, 530 (noting that only the poorest slept on the floor, *t. Ketub.* 6:8; *b. B. Meša’* 113b). But the rabbis tended to speak for a more elite circle, the poor being more common.

39. Cf. Exod 22:27; Deut 24:12–13; Lane, *Mark*, 470. Sleeping on bare ground was discouraged (*b. Ber.* 62b).

but while Aeneas was surely unemployed at this point, relatives might help. More permanent beds, such as someone bedridden eight years would have probably used, included canopies to ward off mosquitoes and other insects.⁴⁰ We cannot be certain, however, what he had available.

Miracle stories normally recounted acts that demonstrated that a healing or exorcism was genuine (e.g., Luke 4:39; Acts 3:7–9).⁴¹ (This pattern seems inherent in the demand of the genre miracle account regardless of specific cultural parallels.)⁴² The emphasis on the miracle's suddenness also fits the Gospels' and other ancient sources' miracle accounts (Luke 4:39; 5:13, 25; 8:44, 47, 55; 13:13; 18:43; Acts 3:7; 5:10; 16:26; cf. Luke 22:60; Acts 12:23; 13:11); emphasizing that the miracle occurred immediately helped rule out coincidence or other rationalistic explanations as factors.⁴³

The claim that Jesus is the one performing the healing reminds Luke's audience that Jesus, though exalted, remains active in Acts; the apostles' works are, in fact, Jesus's works in and through them.⁴⁴ This is also the sense of the use of Jesus's name for healing, on which see comment on Acts 3:6. The healing of people paralyzed or unable to walk also features prominently in many modern accounts of God's activity and especially frequently in the Majority World,⁴⁵ including in evangelism modeled after methods in Acts.⁴⁶ (In one report, to take but one example not initially intended as evangelism, a Christian doctor, recognizing that the North Indian patient's legs,

40. Le Cornu, *Acts*, 531. Safrai, "Home," 736, provides many sources: on large beds, see *t. Ned.* 2:7; on smaller beds, *Abot R. Nat.* 6A; *b. Sanh.* 20a; on canopies, *b. Sukkah* 10b–11a; 26a; *Nid.* 17a. Although Aeneas's lack of ability to work may have made purchase of an expensive bed difficult, the extended kin network might view his relative comfort as an important investment. But although Lydda had resources, we cannot know what resources were available to this family.

41. See, e.g., *Jos. Ant.* 8.48; Keener, *Matthew*, 283.

42. Cf., e.g., the healing of paralyzed children, converting most of the village, in Anderson, *Pelendo*, 58–60 (cf. other healing accounts, 99–100, 121–22, 129–33); the healing of a paralyzed woman in Rabey, "Prophet," 32.

43. See esp. Theissen, *Miracle Stories*, 66 (adding to earlier commentators Lucian *Lover of Lies* 7; *Lex.* 12; *Disowned* 5; *True Story* 1.40; 2.41; *Charon* 7; *Lucius* 12; Antiphanes frg. 154, *Metragyrtes*; *PSI* 4.435; and the stereotypical formula in, e.g., *PGM* 3.35–36, 84–85, 123–24; 4.122, 153, 1593, 1924, 2037, 2098, 2911–12; 7.248, 254, 259, 331, 373, 472–73, 993; 8.52, 63, 84; 12.58, 81, 143, 396).

44. With Gaventa, *Acts*, 162; Marguerat, *Actes*, 350; cf. Warrington, "Healing Narratives."

45. E.g., Khai, "Pentecostalism," 270; Ma, "Encounter," 137; idem, "Vanderbout," 129–32; Daniel, "Labour," 160; Filson, "Study," 154; Green, *Asian Tigers*, 108–9; Alamino, *Footsteps*, 15–16, 46; Bush and Pegues, *Move*, 51–52; Sung, *Diaries*, 44, 48, 56 (many cases), 91, 111 (multiple cases), 121, 134, 135, 140, 162; Osborn and Osborn, *Evangelism*, 1:930, 938, 944; 21:368, 369; 21:370 (three cases); 21:400; 22:65 (about six cases); 22:66 (two cases); 22:67; 22:68 (two cases); 22:779; 22:784; 23:440 (three cases); 23:441 (three cases); 23:592; 23:597 (two cases); 23:716–17 (multiple cases); Baker and Baker, *Enough*, 168–69 (beginning to walk immediately after the command to rise, for the first time in two years, in Mozambique, though strength apparently came less immediately); idem, *Miracles*, 9 (two cases), 40 (after a crippled foot for ten years); Clark, *Impartation*, 143, 170; Chevreau, *Turnings*, 105–6, 142; Menberu, "Mekonnen Negera" (the healing during prayer of someone bedridden for eight years in Ethiopia); Odili, "Osaale" (healing after twenty years' paralysis from stroke); Bernard Luvutse, personal correspondence, Aug. 17, 2006; Steve and Sheila Heneise, interview, April 5, 2009; personal correspondence, Aug. 20–21, 2008; Jacob Beera, personal correspondence, Nov. 2, 2009; a woman paralyzed from birth in Mina KC (interview via John Lathrop, March 2, 2010); Gebru Woldu, interview, May 20, 2010; Eliseo Navarro Jordan, interview, Aug. 7, 2010 (with follow-up Aug. 23, 2012); Lindsay, *Lake*, 30–31, 49, 57; Hickson, *Heal*, 29, 43–44, 53, 62–66, 71, 75, 76, 78, 85–87, 124, 128, 141–42, 148, 151, 159, 162, 176, 180, 191, 196, 205–6, 217–18 (in newspapers, 120, 122, 123, 130–35, 140, 152–53). Those who have the time would find many of these stories intriguing (e.g., in Hickson, *Heal*, 205, the formerly disabled twelve-year-old who announced to his four-year-old cousin, "Look, I can walk"). See more fully the discussion in Keener, *Miracles*, 523–36.

46. E.g., De Wet, "Signs," 94–95, 114; Edmunds, "Sick"; cf. claimed healings in Buckingham, *Daughter*, 128, 133, 187–88; Chavda, *Miracle*, 12–13 (in Congo-Kinshasa), 146 (in the U.S.); in other Western accounts, Heron, *Channels*, 142–43; Todd Hunter, phone interview, Jan. 5, 2009; an instant healing of a damaged leg, reported to me by Bill Jackson, interview by author, Nov. 13, 2007. In earlier history, cf. Coptic Christian examples of healing of this ailment (Godron, "Healings," 1213).

paralyzed in a permanently sitting position, were inoperable, simply prayed for him, and the man was instantly healed.)⁴⁷

I myself witnessed a man command a woman to walk in the name of Jesus; she had complained of inability to walk since I had known her, but to her surprise and mine she found herself able to walk at that moment and from that time forward. My point is that, against some critics' assumptions, such experiences reported by dependable eyewitnesses do occur, even though scholars may differ among themselves as to the causes.⁴⁸

d. Many Turn to the Lord (9:35)

The mass turning to the Lord⁴⁹ compares with people glorifying God after another paralytic's healing (Luke 5:26). Here, however, the commitment runs deeper; the apostles solidified the work begun by Jesus. "Turning to the Lord" was the language of national repentance in the prophets;⁵⁰ although the term for "turning" had other, more mundane uses (e.g., Acts 9:40), it could serve technically to indicate such repentance (Luke 1:16–17; Acts 3:19; 26:18–20; 28:27),⁵¹ and Luke uses it in a similar description in Acts 11:21.⁵²

Sharon is the coastal plain that can be said to stretch as far north as Mount Carmel (cf. 1 Chr 5:16; Song 2:1; Isa 35:2; 65:10);⁵³ Josephus and the LXX (except in Josh 12:18; 1 Chr 5:16; Isa 33:9) usually render it "the plain," "the thicket," or by other titles, but Luke reproduces the Greek transliteration of the Hebrew expression here.⁵⁴ (This may reflect Luke's oral source for this information.) Lydda was "at the foot of the Shephelah" and could not "always be clearly distinguished from the plain of Sharon";⁵⁵ see comment on Lydda at Acts 9:32.

That "all" turned may be typical Lukan (and general ancient literary) hyperbole (see, e.g., comment on Acts 3:24; for success, cf., e.g., Luke 3:21). Certainly in a later period (albeit probably especially after an influx of Judeans in the wake of Jerusalem's devastation), many rabbinic voices critical of early Christians lived there. Thus, for example, some early second-century critics were apparently from there;⁵⁶ rabbinic tradition also associates the "deceiver" Ben Stada, likely a Christian,⁵⁷ with Lydda, a

47. Bush and Pegues, *Move*, 56.

48. I report the incident in more detail in Keener, *Miracles*, 737–38.

49. Far from being anomalous, mass people movements have often characterized the spread of Christianity (Neill, *History of Missions*, 31, 235, 257, 364, 405, 446, 479–81; Kraft, *Christianity in Culture*, 365, 371; Hanciles, *Beyond Christendom*, 87–89; Noll, *Shape*, 34–35; for examples, see Khai, *Cross*, 130–31; Devadason, "Missionary Societies," 224–30 [esp. 228; cf. 22–23]; Wiyono, "Timor Revival," 276; among the Nagas, Philip, "Growth," 162–64; Longkumer, "Study"; among Karens, Say, "History"; for some other rapidly growing religious movements, cf., e.g., Hesselgrave, *Movements*). Other ancients also could characterize entire cities rather than simply individuals (see, e.g., Isa 13:1–19:25; Mic 1:10–15; Luke 10:13; Heracl. *Ep.* 9).

50. E.g., Isa 6:10; 19:22; 31:6; 44:22; 59:20; Jer 3:12, 14, 22; 4:1; 18:11; 25:5; 26:3; 35:15; 36:3, 7; 44:5; Lam 3:40; Ezek 3:19; 13:22; 14:6; 18:23, 30; 33:9, 11; Hos 12:6; 14:1–2; Joel 2:12–13; Zech 1:3–4; Mal 3:7; for Gentiles, cf. Isa 45:22; Jonah 3:8. See comment on Acts 2:38; 3:19.

51. Cf. Luke 17:4; 22:32; Acts 14:15; 15:19; 2 Cor 3:16; 1 Thess 1:9; Jas 5:19–20. The biblical text in Acts 28:27 might function as Luke's paradigm for the notion.

52. Cf. also Dupont, *Salvation*, 71, 79.

53. Eusebius of Caesarea claimed that it stretched from Caesarea to Joppa, but Jerome included in it Lydda, Joppa, and Yavneh (Hengel, "Geography of Palestine," 59).

54. See Lake and Cadbury, *Commentary*, 109. Rome ceded this territory to Judea in 47 B.C.E. (see Udoh, "Plain").

55. Hengel, "Geography of Palestine," 59 (citing *Jos. Ant.* 15.33, 41).

56. Schwartz, "Peter," 413; also Strack, *Introduction*, 113, citing *b. Šabb.* 111a, though probably wrongly identifying R. Tarfon with Justin Martyr's debate partner Trypho.

57. Although *b. Sanh.* 67a identifies Ben Stada with Jesus, earlier sources probably refer to Jewish Christians instead (Schwartz, "Peter," 396).

tradition that some scholars associate (perhaps overzealously) with Peter's ministry there.⁵⁸

Rabbinic complaints about the movement's success in Lydda, however, probably reflect the enduring influence of the Jesus movement there. Under extraordinary conditions, we have sufficient reports of entire towns being converted in more recent times⁵⁹ so as to suggest that a massive conversion is plausible. Such growth is especially documented in response to signs, both in earlier centuries⁶⁰ and more recently.⁶¹

2. Raising Tabitha at Joppa (9:36–43)

As with the healing at Lydda (Acts 9:32–35), so in the resuscitation at Joppa a dramatic sign draws attention to the gospel (9:42). Joppa also offers a temporary base for Peter's ministry (9:43; cf. Luke 10:7–9), again illustrating the trajectory of the apostolic movement away from Jerusalem alone (Acts 1:8). Luke often pairs stories about men (e.g., 9:32–35) and women (e.g., 9:36–42), including in resuscitation narratives, such as a mother's son (Luke 7:11–16, only in Luke) and a father's daughter (8:49–56).

a. Literary Parallels

Scholars often note the close parallels between the raising of Tabitha in Acts and the raising of Jairus's daughter in the Gospel (Luke 8:40–42, 49–56).⁶² Elijah and Elisha also raised children from death in ways similar to the Gospel account; their ministries provide one important paradigm for signs in Jesus's and his followers' ministries (see comment on Acts 1:8–11). Some parallels (e.g., prayer) are to be expected (especially given Luke's emphasis on this motif); others (e.g., a northern location)⁶³ do not appear strongly significant. Some other parallels are more noteworthy; for example, though upper rooms may have been a common place to keep bodies until burial, their appearance in Scripture is relatively rare, and the upper rooms in the Elijah and Elisha narratives are not used for undertaking (1 Kgs 17:19; 2 Kgs 4:10).⁶⁴

58. Schwartz, "Ben Stada and Peter"; idem, "Peter" (citing *m. Sanh.* 7:10; *t. Sanh.* 10:11). Coincidentally, rabbis could also experience miraculous phenomena there in the tradition (*Pesiq. Rab.* 32:3/4).

59. One may also compare many people movements (e.g., Neill, *History of Missions*, 31, 235, 257, 364, 405, 446, 479–81), as mentioned above. In the nineteenth century, note, e.g., Finney's revival in Rochester, NY (cf., e.g., Hardman, *Awakeners*, 183); in the past generation, note, e.g., some villages in the Hebrides (e.g., Peckham, *Sounds*, 69); Nagaland in northeast India; over the past century, much of sub-Saharan Africa (with Islam showing comparable expansion rates in many regions).

60. E.g., accounts regarding Columba (Latourette, *To A.D. 1500*, 344; Tucker, *Jerusalem*, 41). For church growth in Acts associated with miracles, see Hardon, "Miracle Narratives."

61. Wood and Wood, "Preparation," 61 (for eyewitness testimony concerning a village in Togo, October 1979); Hickson, *Heal*, 137, 141; Pothen, "Missions," 189–90 (on the Filadelfia movement in 1980s Gujarat and Maharashtra); Stephen, "Church," 58 (suggesting the cause of more than 40 percent of Christian converts in Nepal); Bergunder, "Miracle Healing," 297–98 (India); Baker and Baker, *Enough*, 74–76 (including resuscitations), 171, 173; Clark, *Impartation*, 209; De Wet, "Signs," passim (for the breadth of his research, see 92), esp. 1–2 (John Lake, in South Africa), 89 (in Madras, following Sargunam, "Churches," 194), 110–11 (among Nishi tribals in India, following Cunville, "Evangelization," 156–57), 114 (in Sri Lanka, following the eyewitness, Daniel, "Signs and Wonders," 105–6), 119–21 (in the Philippines). Among oral reports I collected are two dramatic accounts from Dr. Douglass Norwood (June 6, 2006). For the resultant conversion of the healed individuals or their families or immediate acquaintances, see, e.g., Hickson, *Heal*, 75, 86, 88, 128–29.

62. E.g., Hays, *Moral Vision*, 122; Boismard and Lamouille, *Actes*, 2:125–26 (also noting the parallel with 2 Kgs 4:24–35).

63. Cf. Witherington, *Acts*, 327, on the correspondence with the tradition of northern prophet-healers.

64. For one comparison of Acts 9:36–42 and 20:7–12 with 1 Kgs 17 and 2 Kgs 4, noting the different emphases of each, see Stipp, "Vier Gestalten"; cf. Weiser, *Apostelgeschichte*, 238; Chance, *Acts*, 162; for a comparison of Acts 9:37–41 with 1 Kgs 17, 2 Kgs 4, and Luke 8, see Marguerat, *Actes*, 353.

Luke 8:40–42, 49–56; cf. 7:11–16*	Acts 9:36–42	1 Kgs 17:9–10, 17–24	2 Kgs 4:8, 32–37
Apparently Capernaum (8:40; cf. Matt 9:1, 18)	Joppa, a northern seaport (9:36)	Zarephath near Sidon (17:9–10)	Shunem (4:8), in the hill country of Issachar (cf. Josh 19:18; 1 Sam 28:4)
Jairus's daughter dies, apparently from sickness (8:42)	Tabitha dies from sickness (9:37)	The boy dies from sickness (17:17)	The boy dies from sickness (possibly heatstroke, 4:19–20)
Comes to Jesus (8:41)	Peter is sent for (9:38)	— (Elijah is staying there)	Elisha is sent for (4:22–28)
Those around Jairus's household weep (8:52)	Tabitha's advocates weep (9:39)	The widow's complaint (17:18)	The woman's complaint (4:28)
Keeps most people out (8:51)	Puts everyone out (9:40)	Elijah acts in private (17:19)	Elisha shuts the door (4:33)
—	Peter kneels and prays first (9:40)	Elijah prays (17:20–21)	Elisha prays (4:33)
Jesus raises a widow's son (7:14–15); also a community benefactor's daughter (8:54–55)	Peter raises a benefactor of widows (9:37)	Elijah raises a widow's son (17:23); the widow is his benefactress (17:9–16)	Elisha raises the son of a woman (4:34–37) who is his benefactress (4:9–11)
"Arise" (7:14; 8:54)	"Arise" (9:40)	—	—
Takes by hand (8:54)	Takes by hand (9:41)	Stretches on the child to impart life (17:21)	Stretches on the child to impart life (4:35)
—	She opens her eyes (9:40)	—	The boy opens his eyes (4:35)
A resuscitated boy or girl sits up (7:15; 8:55)	She sits up (9:40)	—	—
Jesus hands resuscitated person to his mother (7:15; cf. 8:56)	Peter hands her over to her (widowed) dependents (9:41)	Elijah presents boy to widowed mother (17:23)	Elisha presents boy to mother (4:36)
The parents are amazed (8:56); the people are amazed (7:16)	The people believe (9:42)	The mother believes more fully (17:24)	(The mother is respectful, 4:37; she already had faith)
—	Upper room (9:37)	Upper room (17:19, 23)	Upper room (4:10–11, 32)

* For comparisons between the raisings of this passage, Luke 7:11–17, and Acts 20, see, e.g., Lindemann, "Einheit," 243–48. Hill, *Prophecy*, 53, rightly points to many similarities between Luke 7:11–17 and 1 Kgs 17:7–24; but Drury, *Design*, 71, implausibly attributes the story in Luke 7:11–17 to a midrashic weaving together of the story of Jairus's daughter and 1 Kgs 17:8–24 (doubting the use of 2 Kgs 4).

b. Historical Tradition

Luke clearly underlines parallels with earlier raisings in biblical history and the ministry of Jesus. Yet like Luke's internal parallels in general, these parallels need not mean that Luke invents the event he is paralleling.⁶⁵ Indeed, Mark's biblical framing of mostly undisputed Jesus tradition, Matthew's biblical framing of Markan narratives, Qumran's biblical interpretation of historical events, and other analogies warn us that biblical allusions or literary models do not require us to assume that stories are simply invented without historical basis.⁶⁶

Given the name, location, and vivid details, some scholars allow that the story reflects historical tradition, but they question the details of Tabitha's raising in view of

65. See the commentary introduction, Keener, *Acts*, 1:562–64, 569–74; on biblical models, esp. 573–74 and comment on Acts 7:8 and 7:9–16. Again, I have found such patterns in accounts today that are genuinely true but where the true material has been selected in a way that highlights the parallels (including in accounts I know firsthand). A professor of creative nonfiction notes that people writing and recounting their own experiences often discover patterns (Fields, "Story," 40); highlighting connections is part of the process of good narrativization.

66. See Allison, *Jesus*, 389 (following here also Goodacre, "Scripturalization," including 40; Le Donne, *Historiographical Jesus*, e.g., 52–59, 115–36).

the echoes of the raising of Jairus's daughter and how both reports echo the miracles of Elijah and Elisha.⁶⁷ One wonders why the story would be preserved at all without the raising,⁶⁸ but the assimilation of details could make sense. Luke uses different verbs, however, and the parallel in Acts is closer to Mark (cf. Mark 5:40–41); further, Peter, like Stephen in Acts 7:56–60, may deliberately imitate his mentor here (the rareness of raisings might invite all the more careful imitation). Luke also passes up the opportunity to repeat various details, such as Jesus's exhortations not to fear (Luke 8:50) or weep (8:52). Thus, although historians had considerable freedom on such details, we cannot be certain to what extent Luke exercises such liberty here.

That he believed that the resuscitation took place, however, should no more be doubted⁶⁹ than the confidence of many later in history⁷⁰ and today⁷¹ who believe that they have seen—and who have offered eyewitness evidence for—analogue miracles, whatever alternative explanations different observers might suggest for the same events. These claims occur in India⁷² and elsewhere in Asia,⁷³ Africa,⁷⁴ and Latin America.⁷⁵ In

67. Dunn, *Acts*, 129.

68. Normally *inventing* a significant event, such as a raising, goes beyond the liberties historians would feel comfortable taking.

69. Price, *Son of Man*, 20–21, rejects ancient resuscitation accounts because people are not raised from the dead today. He literally refers to “the rotting dead,” perhaps not referring to any kind of corpse, but there is only one account of such a late resuscitation in Scripture (John 11:39–44), and some of today's accounts do involve those dead for two or more days (e.g., Bush and Pegues, *Move*, 118–19; cf. Tari, *Wind*, 76–78; Miller and Yamamori, *Pentecostalism*, 152). Some sociologists of religion have also warned against ruling out such claims on the basis of ideological bias (Miller and Yamamori, *Pentecostalism*, 153).

70. Iren. *Her.* 2.31.2 claims that the gathered church in his day “often” accomplished such resuscitations (following the example of Jesus and the apostles); later, Augustine *City of God* 22.8 (claiming attesting eyewitnesses); Herum, “Theology,” 63; Straight, *Miracles*, 135–37; Wesley, *Journal*, Dec. 25, 1742; Gardner, *Healing Miracles*, 84–85. In popular sources, see, e.g., Lindsay, *Lake*, 12–13, 32–33 (she remained well at the time of Lindsay's writing, twenty-five years after the event; cf. Maxwell, *African Gifts*, 40); Smith Wigglesworth (fourteen occasions) in Pytches, “Anglican,” 194; a 1907 account from the western United States (reported in Wacker, *Heaven Below*, 67).

71. Many of these surface in popular Christian literature, e.g., an example in Lewis, *Healing*, 64–65; a baby in Osborn and Osborn, *Evangelism*, 1:940–41; Wagner, *Acts*, 476–77 (and less dramatically, 321–22); Wilkerson, *Beyond*, 14–21, 25–32 (esp. 32), 47–54 (esp. 53), 56–58, 89–97 (esp. 94–95), 97–104 (esp. 101–3; his father-in-law's story), 105–6 (17.5 hours after being pronounced dead, without breathing), 107–9 (esp. 108), 109–14 (esp. 113–14); Clark, *Impartation*, 203; Johnson, *Mind*, 122 (the cited witness claiming that the woman's eye, torn out in the accident, also “was back in its socket”; also a testimony on his church website, posted June 22, 2007); a doctor's testimonies in Leclair, “Cardiologist”; Rutz, *Megashift*, 3–14, 21–22, 29–34, 79, 104–5 (collecting many claims); Rumph, *Signs*, 155–73 (including a small number of North American examples); Harris, *Acts Today*, 98–99, 101–3; see also McGee, *People of Spirit*, 524–25. Cf. also physicians in Stegeman, “Faith”; Mervin Ascabano, personal correspondence, Feb. 6, 2009; Chauncey Crandall, phone interview, May 28, 30, 2010. For a range of historical and modern accounts, see further Keener, *Miracles*, 543–79.

72. E.g., De Wet, “Signs,” 110–11 (following Cunville, “Evangelization,” 156–57); three accounts in Bush and Pegues, *Move*, 57–58, 59, 60; Thollander, *Mathews*, 88 (through Mathews [the book's informant], a boy who died from drowning three hours earlier; later, two reported raisings through others). Miller and Yamamori, *Pentecostalism*, 152, note several reports in addition to those cited below.

73. E.g., Khai, “Pentecostalism,” 270 (a raising through the prayers of Baptist minister Lang Do Khup in Myanmar); Gardner, *Healing Miracles*, 138 (a woman in northern Thailand in 1963, with Robin Talbot and his wife, Overseas Missionary Fellowship missionaries, as witnesses); Tari, *Wind*, 76–78 (Timor, Indonesia); Wilkerson, *Beyond*, 77, 81–83 (also in Timor, a four-year-old boy, dead four days, p. 81; an infant restored, 82; etc.), 83 (Philippines); cf. Pullinger, *Dragon*, 224–25 (secondhand, of a boy pronounced dead in two hospitals).

74. E.g., Tarr, *Foolishness*, 329–30 (plus personal correspondence, Oct. 20, 2010); Anderson, *Pelendo*, 69–70; Trousdale, *Movements*, 137–39; Deere, *Power of Spirit*, 123–24 (citing Garnett, *Duma*, 40ff.). In Mozambique, see Sithole, *Voice*, 73, 176; Baker and Baker, *Enough*, 74–76; idem, *Miracles*, 89 (at least fifty-three by 2007), 169; also in Clark, *Impartation*, 207, 209 (perhaps fourteen cases in Mozambique through the Bakers' extended ministry since 1998); cf. also interviews concerning one of these resuscitations on the Wanderlust DVD “Finger of God.”

75. E.g., Sánchez Walsh, *Identity*, 43–44; Bomann, “Salve,” 195–96; Chesnut, *Born Again in Brazil*, 86; Gardner, *Healing Miracles*, 139–40.

some cases I know the witnesses personally,⁷⁶ and in many others where reports have come to me I have at least interviewed witnesses.⁷⁷

One may disagree about how to explain the claims, but one cannot simply act as if they are not offered.⁷⁸ For example, one book documents a boy in Kinshasa, Congo, returning to life hours after being pronounced dead and left in the morgue, at the moment of being prayed over.⁷⁹ Mozambique provides several recorded examples. While Pastor Surpresa Sithole was praying for comfort for the family twelve hours after a six-year-old girl's death and holding the child's hand, he reports that she returned to life, which had a dramatic impact on the village.⁸⁰ One pastor's wife is said to have raised three persons from the dead, praying over the corpses as she was washing them for their funerals. The first was a three-month-old girl who had died from dehydration caused by cholera; after being raised, she remained alive and healthy. The other two, a girl of five months and a middle-aged woman, had died of malaria.⁸¹ Mozambican pastor Jorge was said to have raised seven from the dead, some after a more extended period of prayer, some fairly quickly, one two days after death. He seemed surprised at the foreign interviewer's interest, since his movement apparently did not consider such activity unusual.⁸²

In another case, local residents (including the Hindu village elder) in India affirmed that a woman who returned to life after being pronounced dead (with no breathing or pulse), and several hours after a pastor had begun praying over her, had been raised from death.⁸³ Another pastor in India prayed for a girl who allegedly “not only was dead but actually had worms coming out of her nose”; after about half an hour of prayer, she returned to consciousness and shared her postmortem experience. This generated “considerable attention in the community and was written up in the local papers, resulting in this pastor being visited by various government officials.”⁸⁴

Philip Jenkins notes that house church Christians in China have many testimonies of the dead being raised.⁸⁵ A Three-Self pastor also reports such an event in his church courtyard.⁸⁶ After noting the raising (and healing) of a dead woman in Ethiopia, the

76. E.g., J. Ayodeji Adewuya (a New Testament professor from Nigeria), personal correspondence, Dec. 14, 2009; Leo Bawa (Nigeria), personal correspondence, Aug. 10, 2009; Gebru Woldu (Ethiopia), interview, May 20, 2010; Elaine Panelo, interview, Jan. 30, 2009 (Philippines); James Watson, correspondence, Nov. 27, 2009 (with Dr. Deborah Watson, Nov. 30, 2009; United States); from Congo: Antoinette Malombé, interview, July 12, 2008 (confirmed with an independent eyewitness, Ngoma Moise, phone interview, May 14, 2009); Jeanne Mabilia, interview, July 29, 2008; Albert Bissouessou, interviews, July 29, 2008 (by myself); Dec. 17, 2009; Julienne Bissouessou, interview, Dec. 15, 2009 (by Dr. Emmanuel Moussounga); cf. briefly Keener, “Comparisons,” 3. More recently, my Indonesian neighbor Yusuf Herman shared supporting photographic evidence (July 10, 2011) and assisted me in interviewing a person (Dominggus Kenjam) who reported dying and being raised (Aug. 7, 2011); also note André Mamadzi (interview, Yaoundé, Jan. 17, 2013).

77. E.g., Chester Allan Tesoro, interview, Jan. 30, 2009 (Philippines); Iris Lilia Fonseca Valdés (Cuba), interview, Aug. 11, 2010; Shelley Hollis (Sri Lanka), phone interview, Jan. 10, 2009. See further sources and discussion in my *Miracles*, 536–79, 752–58.

78. Writers who have denied that such accounts are offered today (e.g., Bishop, *Healing*, 231; Jeffries, “Healing,” 71) have been misinformed on this point.

79. Chavda, *Miracle*, 9, 13–15, 131–41 (see esp. 137–41), including photographs of the raised boy and his earlier death certificate (between pp. 78–79), as well as his address (140); also mentioned in Brown, *Testing Prayer*, 111, 113; Deere, *Power of Spirit*, 204–6.

80. Sithole, *Voice*, 72–74; Clark, *Impartation*, 209; cf. Chevreau, *Turnings*, 54 (where Surpresa notes that it has happened to him only once). Pastor Surpresa is a colleague of the Bakers (noted in, e.g., Baker and Baker, *Enough*, 72, 150; idem, *Miracles*, 25–26, 37, 63; Chevreau, *Turnings*, 54, 135).

81. Chevreau, *Turnings*, 53–54, from his interviews with Florinda, wife of Pastor Antonio Tanueque.

82. *Ibid.*, 54–56, including more names and details.

83. Miller and Yamamori, *Pentecostalism*, 151–52.

84. *Ibid.*, 152.

85. Jenkins, *New Faces*, 114. Earlier, see, e.g., Sung, *Diaries*, 43 (but only for an hour), 45 (but secondhand), 59 (secondhand, after a day of death).

86. Lambert, *Millions*, 109, citing both his personal interview and articles. He notes another resuscitation in answer to prayer, after two days of death, published in 1990 in a Three-Self Patriotic Movement (TSPM) bulletin in Beijing (Lambert, *Millions*, 118–19).

researchers cite a major Ethiopian church leader's claim that such raisings are common there.⁸⁷ As noted above, a number of my own friends, relatives, and acquaintances claim to have witnessed such events firsthand; one involved the raising of my sister-in-law after three hours. Even if one attributes all such claims to misdiagnosis and coincidence, one should not doubt that many others would find at least some of these claims convincing, or that many come from sincere eyewitnesses. There is no reason to deny that such experiences could have also characterized the early Christian movement, just as many of their sources claim.⁸⁸

c. *Tabitha of Joppa (9:36)*

Joppa was under twelve miles—perhaps a four or five hours' walk—from Lydda.⁸⁹ This is important because custom (and climate) required urgent burial; those seeking Peter could reach him quickly (see comment on Acts 9:38). Joppa was also near Yavneh, which was relatively close to Azotus and Ashkelon (Strabo 16.2.28–29; Pliny E. *N.H.* 5.14.68), a region that Luke has associated with Philip's ministry (Acts 8:40). Joppa was roughly halfway between Jerusalem and Caesarea, about fifty kilometers (30 mi.) from each, a location important for trade.⁹⁰ It had long been an important seaport,⁹¹ though it had recently been surpassed by Caesarea. Because it was a boundary between primarily Jewish and more Gentile territory, Peter's mission beyond it will advance the plot laid out in 1:8.⁹²

Joppa (modern Yaffa, today united with Tel-Aviv) controlled one of the ten or eleven administrative districts of Judea (Jos. *War* 3.56; Pliny E. *N.H.* 5.15.70).⁹³ Once a Philistine city, it was later hellenized and used by Ptolemies and Seleucids;⁹⁴ it was now, however, predominantly Jewish.⁹⁵ Judeans seized it from the Philistines in 148 B.C.E.,⁹⁶ and it remained under their power for most of the remaining period before direct Roman rule of all Judea.⁹⁷ Pompey did detach it from the province of Judea (Jos. *War* 1.156; *Ant.* 14.76), but it was ceded to Judea by Rome in 47 B.C.E.⁹⁸ Its Jewish loyalties led to its capture and destruction⁹⁹ by Rome; its inhabitants continued to offer resistance until this became impossible (*War* 3.414–27). Luke's audience may have known of Joppa's recent destruction,¹⁰⁰ but this knowledge is less obvious than in the case of Jerusalem (Luke 21:6), and the narrative provides no clues suggesting that he expects this inference.

87. Bush and Pegues, *Move*, 52, citing the general secretary of Evangelical Church Fellowships of Ethiopia.

88. See discussion in Keener, *Miracles*, 536–79.

89. See, e.g., Monson, *Map Manual*, 13-1. The road would be good; Lydda lay on the road from Caesarea to the inland town of Antipatris (Dar and Applebaum, "Road," 91). Both lay on the coastal plain, with Joppa nearer the lower coast (see, e.g., Cleave, *Satellite Atlas*, 1:46–47); for an aerial photograph, with a marking for the fairly straight Roman road, see 2:128.

90. The Judean hills would obstruct any view of Jerusalem, *pace* Strabo 16.2.28.

91. E.g., 2 Chr 2:16; Ezra 3:7; Jonah 1:3; *Let. Aris.* 115; Strabo 16.2.28; Jos. *Ant.* 14.76; 15.217, 333; *War* 1.156, 396, 409.

92. Reimer, *Women*, 33; cf. the emphasis on boundary tensions and transitions in Erichsen-Wendt, "Tabitha."

93. Pliny E. *N.H.* 5.14.68 elsewhere calls Joppa a Phoenician city, perhaps following an earlier source. On Joppa, see further Blaiklock, *Cities*, 68–71; plans for excavations in Peilstöcker, "Archaeology."

94. Pagan associations include the mythical chaining of Andromeda there (Strabo 16.2.28; Jos. *War* 3.420).

95. Hengel, "Geography of Palestine," 60. Contrast the idea that it was a Greek city (cf. Barrett, *Acts*, 482, citing Jos. *War* 3.56), unless the claim simply implies its hellenization (as in Jerusalem). Its inscriptions are 90 percent Greek, about 12 percent more than in Rome or Beth She'arim and 55 percent more than in Jerusalem (Levine, *Hellenism*, 182).

96. See 1 Macc 10:76; 12:33; 13:11; Jos. *Ant.* 13.91–92, 180, 302, 215, 395.

97. Commentators (e.g., Lake and Cadbury, *Commentary*, 109) often note much of this. It appears to be a free city in Jos. *Ant.* 14.202.

98. See Udoh, "Plain," on Jos. *Ant.* 14.205–8; cf. also 13.261.

99. Jos. *War* 2.507–9; 3.414, 417, 427–28.

100. Reimer, *Women*, 34.

Luke might explicitly use the name “Tabitha” because it evokes the Aramaic *talitha* in Mark 5:41, an account with which he parallels his report here. But the proposal that he or his source invented the name on the basis of that story¹⁰¹ is more difficult to sustain: why would a storyteller (or presumably Luke himself, who specializes in narrative parallels) wish to transpose even the name? And why would Luke “parallel” the name here and then omit it in his own retelling of Mark’s account (Luke 8:54)?

More telling is that Luke had read Mark and would know that *talitha* was not a proper name, since Mark explicitly translates it. “Tabitha” is Aramaic for “gazelle” and is related to the Hebrew name “Zibiah” (2 Kgs 12:1; 2 Chr 24:1).¹⁰² It is a rare Aramaic name but appears, along with the masculine “Tabi,” as “generic slave names” in Gamaliel II’s household.¹⁰³ “Dorcas” was likewise Greek for “gazelle”¹⁰⁴ (a much more comprehensible translation than in Acts 4:36) and functioned as a Greek name (cf. Jos. *War* 4.145; the first-century B.C.E. name in *Gr. Anth.* 5.182).¹⁰⁵ Luke’s note need not indicate that “Dorcas” was an additional name for Tabitha (although it is plausible that she might have used the Greek name in some settings)¹⁰⁶ but, rather, that the common Greek name “Dorcas” was the Greek equivalent of the much rarer Aramaic name “Tabitha.”¹⁰⁷

d. Tabitha’s Good Deeds (9:36)

By calling Tabitha “a certain female disciple” (and elaborating on her good works) Luke honors her above Aeneas, whom he designates only “a certain man.”¹⁰⁸ This is his only use of μαθήτρια (though the masculine plural “disciples” elsewhere in Acts seems equivalent to “saints” and “Nazarenes” and would include both genders), but the concept of women as disciples likely appears also in Luke 8:2–3; Acts 16:14–15; 17:34; and especially Luke 10:39. Luke’s use of the term here presumably indicates the same as what μαθητής indicated for a male disciple: an adherent of the Jesus movement and Jesus tradition whose faith was demonstrated by good works.¹⁰⁹ Various readings through history have recognized Tabitha, as well as Peter, as a positive model here (e.g., John Chrysostom¹¹⁰ and Virginia Broughton).¹¹¹

101. Smith, *Magician*, 95, arguing that “the storyteller” mispronounced *talitha* and then “mistook [it] for a proper name.”

102. Lake and Cadbury, *Commentary*, 110; Fitzmyer, *Acts*, 445. Chrys. *Hom. Acts* 21 (NPNF 11:137) unfortunately allegorizes the name: “As active and wakeful was she as an antelope.” Bede *Comm. Acts* 9.36 (Martin, *Acts*, 115–16; L. Martin, 91) also allegorizes, though (as allegory always risks) differently. There is no need to find allegorical significance (cf. Strelan, “Tabitha,” on gazelles symbolizing proselytes); granted, some later rabbis, while recognizing gazelles as biblically clean (Deut 12:15, 22; 14:4–5; 15:22; 11Q19 LII, 11; LIII, 4) though not domesticated (*b. Mak.* 18b; *Zebah.* 34a), found them somehow unclean (*b. Hul.* 28a; Gentiles could eat of them, *b. Bek.* 33a), used in comparisons with the clean and unclean (*b. Yebam.* 73b; *Mak.* 20a); though wild, a gazelle could be crossed with a goat to yield a domesticated koy (*b. Yebam.* 113a). But gazelles were also images for swiftness (*m. ’Ab.* 5:23; *b. Soṭah* 13a); for the land of Israel (*b. Roš Haš.* 13a); and apparently (most relevant for naming of a child) youthful beauty (Song 2:9, 17; 4:5; 7:3; 8:14; *b. Ketub.* 17a).

103. Williams, “Names,” 96 (citing *y. Nid.* 1:5; 2:1; see also *Lev. Rab.* 19:4). This was also the name of some Amoraim (Le Cornu, *Acts*, 535, citing *b. Roš Haš.* 22a; *Meg.* 6b).

104. E.g., Athen. *Deipn.* 9.397A; Deut 12:15, 22; 14:5; 15:22; Song 2:9; 4:5; 7:3; 8:14; Sir 27:20. Witherington, *Acts*, 331n16, notes, “It was not uncommon in the Roman era to give women the names of female animals, especially slave women.” On gazelles, see Hünemörder, “Gazelle” (the “dorcas gazelle” appeared as a form of antelope in the Middle East and North Africa [716]).

105. For examples of the Greek name, see Williams, “Names,” 103; Horsley, *Documents*, 4:177–78.

106. Barrett, *Acts*, 483, suggests that “in the mixed society of Joppa both names . . . would be in use.” Possibly her parents formed the name as an Aramaic equivalent to the Greek name Dorcas, known in their community.

107. Williams, “Names,” 103; cf. Kurzinger, *Apostelgeschichte*, 40. This seems clear from Luke’s wording.

108. With, e.g., Spencer, *Acts*, 106–7. Calvin emphasized Tabitha more “than many of his male contemporaries” did and more than some modern scholars as well (Anderson, “Reading Tabitha,” 118–19). For ancient medical gender-specific constructs of illness, see Weissenrieder, *Images*, 298–302.

109. Cf. Reimer, *Women*, 34–35.

110. Anderson, “Reading Tabitha,” 115–17.

111. *Ibid.*, 124 (an African-American evangelist in 1907 who read Tabitha as a missionary).

Luke's phrase "full of good and charitable works" fits one of his ways of expressing virtues (using πλήρης; cf. Acts 6:3, 5; 11:24), though only in Tabitha's case is the virtue summarized as "good and charitable works."¹¹² God favors such behavior (10:4, 31). (For giftedness in charity, cf. Rom 12:7–8.) Particularly significant is that Luke often stresses Jesus's demand (Luke 11:41; 12:33; 18:22) and some followers' fulfillment (19:8; 21:1–4; Acts 10:4; 11:29; 20:35; 24:17).¹¹³ This expression includes but need not be limited to her ministry to widows (Acts 9:39), an issue for which Luke has special concern (6:1), especially in his first volume, where he addresses the marginalized of Israel (Luke 2:37; 4:25–26; 7:12; 18:3–5; 20:47; 21:2–3).¹¹⁴ Many Jewish women engaged in charitable service.¹¹⁵ Her role as benefactor guaranteed her special status in the assembly of disciples in Joppa, and some scholars suggest that, in a patronage society, it could have given her special rank as well.¹¹⁶

c. Preparing the Body (9:37)

In view of Acts 9:36, dying from sickness (as here) cannot imply lack of piety (cf. 2 Kgs 13:14). Greeks and Romans (typically female relatives) washed corpses before burial;¹¹⁷ they also bathed wounds¹¹⁸ and anointed corpses.¹¹⁹ Jewish tradition also had adopted the anointing and washing of corpses (*m. Šabb.* 23:5).¹²⁰

Burial was expected to be carried out as soon as possible (Acts 5:6–10). Judean traditions emphasize the urgency of burial.¹²¹ If we may trust rabbinic sources on

112. "Good works" is more characteristic of Pauline literature (cf. Eph 2:10; for "every good work," 2 Cor 9:8; Col 1:10; 2 Thess 2:17; in the singular, Rom 2:7; 13:3; Phil 1:6), especially the Pastorals (1 Tim 2:10; "every good work," 1 Tim 5:10; 2 Tim 2:21; 3:17; Titus 1:16; 3:1); and 1 *Clement* (33.7; 38.2; "every good work," 2.7; 33.1; 34.4).

113. Cf. here also Tannehill, *Acts*, 45. In the NT, only Luke employs ἐλεημοσύνη in the plural (but see also *Did.* 15.4), and only here and in Acts 10:2, 4, 31; 24:17. The term is frequent in the LXX, but especially in later books, particularly Tobit (Tob 4:7–16; 12:8–9; 13:8; 14:10–11; often in the plural, 1:3, 16; 2:14; 3:2; 14:2) and Sirach (Sir 3:14, 30; 7:10; 12:3; 16:14; 17:22, 29; 29:8, 12; 35:2; 40:17, 24; in the plural only in 31:11); in the plural also in Ps 102:6 (103:6 ET); Prov 14:22; 15:27; Dan 4:27.

114. After noting her function as a model disciple, O'Day, "Acts," 310, complains that Luke calls the apostles' ministry to widows a "ministry" (Acts 6:1–2) but hers only "good works." But although Luke does not employ ἔργον as much as Pauline literature does, the term is significant: Luke 24:19 (pl.; Jesus); Acts 7:22 (pl.; Moses); 13:2 (sing.; Paul's apostolic ministry); 14:26 (sing.; Paul's apostolic ministry); 15:38 (sing.; Paul's apostolic ministry); 26:20 (pl.; discipleship); cf. ἐργαζόμενος in Acts 10:35 (discipleship). "Alms" appears in Luke 11:41; 12:33 (for discipleship); Acts 3:2–3, 10; 24:17; in this context, 10:2, 4, 31, where it is highly valued in the Cornelius story. Διακονία, "ministry," is a form of "service" and applies to preaching ministry (Acts 20:24; 21:19; Judas's apostolate, 1:17, 25) and corporate service to the poor (6:1, 4; 11:29; 12:25), and once for a matron feeding guests (Luke 10:40). The contrast is thus not helpful. Reid, "Power," 87, goes further, complaining that Luke seeks to mask widows' power (see discussion at Acts 6:1).

115. See Safrai, "Home," 762–63 (citing, e.g., *b. Ketub.* 106a; *Sanh.* 43a). For comments on Tabitha's charity and other, broader sorts of "good works," see Reimer, *Women*, 36–41, 262.

116. Spencer, *Acts*, 108 (suggesting that she headed the assembly). For the prominent status of patronesses for early Christian assemblies, see, e.g., Keener, *Paul*, 240. On patronesses, see also Pomeroy, *Goddesses*, 200; Hemelrijk, "Patronesses"; Winter, *Left Corinth*, 199–201; comment on Acts 16:15; 17:4. Nevertheless, patronage in the more technical sense is questionable in the Greek East outside colonies (see, e.g., MacGillivray, "Patronage," 46–54).

117. Hom. *Il.* 18.345, 350; 24.582; Eurip. *Phoen.* 1667; Virg. *Aen.* 6.219; 9.487; Ovid *Metam.* 13.531–32; Apul. *Metam.* 9.30. Women attended bodies even of male relatives (Isaeus *Philoct.* 41; *Ciron* 22).

118. Virg. *Aen.* 9.487; Ovid *Metam.* 13.531–32.

119. Hom. *Il.* 18.350–51; 24.582; Virg. *Aen.* 6.219; Mart. *Epig.* 3.12; *Test. Ab.* 20:11 A; for ointments in embalming, e.g., Hdn. 4.2.8; Hagner, *Matthew*, 758, cites P.Oxy. 736.13; Artem. *Oneir.* 1.5; Gen 50:2 LXX. For mention of both bathing and anointing, Lucian *Fun.* 11; Klauck, *Context*, 72 (adding the use of flowers). For some other references, see Conzelmann, *Acts*, 77; Barrett, *Acts*, 483 (including Plato *Phaedo* 115A); cf. Johnson, "Dead, Cult of," 113; in traditional African societies influenced by Islam, cf. Mbiti, *Religions*, 329 (on uncleanness taboos in African traditional societies more generally, cf. Adogbo, "Pollution"). Romans often assigned the washing and anointing to a slave of the undertaker (Stambaugh, *City*, 150).

120. See further discussion in Safrai, "Home," 776 (citing *Lev. Rab.* 34:10; *Ruth Rab.* 2 in the Amoraic period); much later, see Maimonides *Yad. Abel* 4.1 (cited by Lake and Cadbury, *Commentary*, 110).

121. Safrai, "Home," 774 (citing *t. Neg.* 6:2; *'Abot R. Nat.* 35 A; 39 B; *b. B. Qam.* 82a).

this point, even outside Jerusalem it was considered disrespectful to leave a corpse unburied overnight; it was “permitted only if more time was needed for the preparation of shrouds or a coffin.”¹²² The first week following the death was the period of the most intense mourning both among Romans¹²³ and among Jews.¹²⁴ That Peter is urged to come quickly (9:38) is not surprising. Raisings, however, normally required urgency (2 Kgs 4:29; cf. John 11:21–24, 39); people may have considered decomposition to be too late.¹²⁵

Though it was customary to bury corpses immediately, people may have sometimes prepared them in upper chambers.¹²⁶ The upper room here specifically recalls those in the raising stories in both 1 Kgs 17:19, 23 and 2 Kgs 4:10–11 (with 2 Kgs 4:21), which are meant to parallel each other.¹²⁷ The Elijah story is mentioned in Luke’s programmatic scene (Luke 4:25–26) and hence provides an obvious subtext. The resurrection story in Acts 20:7–12 also includes an upper room (20:8), which may allude back to this one (but must be mentioned, in any case, to explain the injury, 20:9).¹²⁸

Although Romans undoubtedly received guests especially on the ground floor, the design of well-to-do Roman homes suggests that at least Romans (who heavily emphasized patronage) might expect even upper rooms to be seen by guests.¹²⁹ Judeans built upper rooms because of new family members, guests, and tenants and perhaps occasionally even for meetings of the sages¹³⁰ (for the last, see comment on Acts 1:13). One might build such a chamber for a son’s new marriage,¹³¹ but such rooms were also provided for daughters (especially childless ones) returning home after being widowed.¹³²

f. Requesting Peter’s Coming (9:38)

Luke emphasizes that Lydda was near Joppa because custom demanded rapid burial of the corpse, as Luke’s audience would presumably know.¹³³ Word about healing sanctuaries and miracles traveled quickly, generating many petitioners;¹³⁴ word of Peter’s miracle in Lydda (9:34) surely would have reached Joppa (cf. 9:35), as well as of Peter’s presence in Lydda (“when they had heard that Peter was there”). Parents or others sometimes sent to miracle workers requesting them to come and perform

122. Safrai, “Home,” 774 (citing here *m. Sanh.* 6:5; *Sem.* 11:1).

123. Jeffers, *World*, 45; cf. *Hdn.* 4.2.4.

124. Sir 22:12; Jdt 16:24; Jeremias, *Theology*, 132; Sandmel, *Judaism*, 200–201; cf. *L.A.E.* 51:2; *Apoc. Mos.* 43:3; John 11:19; cf. also other cultures (e.g., Mbiti, *Religions*, 197).

125. On urgency and claims of miraculous resuscitation generally, see Keener, *Miracles*, 538–39.

126. For corpses being prepared in either upper or lower chambers, see comment on Acts 9:39 below.

127. The term ὑπερῶν appears twenty-two times in the LXX, and so these uses account for nearly one-fifth of them. Commentators often note the allusion (Karris, *Invitation*, 110; Reimer, *Women*, 51).

128. The only other use of ὑπερῶν in the NT is Acts 1:13, which probably recalls Luke 22:12 (despite the different term).

129. Balch, “Paul, Families, and Households,” 265 (commenting on decorations there; for the penetration of at least Greek architecture as far as Galilee, see Meyers, “Gendered Space,” 51–58). In other cases, Romans easily converted upper rooms into living space (Wallace-Hadrill, *Houses*, 108).

130. Le Cornu, *Acts*, 535 (citing Jdt 8:5 [relevant to widowhood?]; *m. Šabb.* 1:4; *B. Meši’a* 10:2; *B. Bat.* 1:4; *b. Ketub.* 50b; *Menah.* 41b). Cf. Hillel sitting in the roof window in *b. Yoma* 35b.

131. Cf. Safrai, “Home,” 732–33. On newlyweds initially living with the husband’s family cf. also, e.g., Derrett, *Audience*, 38; Blue, “House Church,” 185n255.

132. Le Cornu, *Acts*, 536 (citing *m. B. Bat.* 6:4; cf. *m. Ketub.* 12:3; *t. Ketub.* 11:5–7). For a corpse being left temporarily in either an upper or a lower room, cf. Sanders, *Jesus to Mishnah*, 185.

133. Safrai, “Home,” 774, esp. n. 7; cf. *b. Sanh.* 47a. Greek funerals allowed one or two days for burial (Klauck, *Context*, 72; perhaps in a cooler region).

134. See Theissen, *Miracle Stories*, 72 (citing NT references and Paus. 2.26.5); cf. 51 (citing oracular referrals).

healing.¹³⁵ The sending of two men¹³⁶ parallels the sending of three men in 10:5–8; were they expecting resurrection or comfort (cf. John 11:3)?

The partly parallel account in Luke 8:41 is a request for healing, but the daughter is not yet dead (8:42); the implied request in 2 Kgs 4:28, however, is for resurrection. Likewise, the messengers of Luke 7:4 “urged” (παρεκάλουν) Jesus to come for healing, as the two men here urged (παρακαλοῦντες) Peter to come.¹³⁷ The wording of the request might suggest hesitation.¹³⁸ That the corpse has not yet been buried, despite the time required for the messengers’ journey and Peter’s, probably confirms that they seek more than comfort.¹³⁹ Perhaps the petitioners would waver because the request was so enormous or out of respect for the famous apostle (cf. 1 Cor 1:12; 3:22; 9:5; 15:5), who, though nearby, might face many other requests. Peter might hesitate because of responsibilities elsewhere (cf. Luke 4:43);¹⁴⁰ he does, however, come (Acts 9:39).

g. Benefactress of Widows (9:39)

The widows’ weeping shows Tabitha to be an endearing person who was very special to them (cf. comment on Acts 20:37–38). Most ancient Mediterranean cultures expected women in particular to offer lamentation for the dead (e.g., Cic. *Fam.* 5.16.6; Thucyd. 2.34.4; see comment on Acts 8:2), and deceased women were also objects of mourning.¹⁴¹ Many also treated widows as objects of compassion. Their mourning (cf. Luke 7:12) would generate special pathos; they would know it and perhaps exploit it to good effect here (cf. Luke 18:3–5),¹⁴² and Luke would also expect his audience to recognize this effect as well.

Although some scholars (arguing from the definite article and the distinction from the saints in Acts 9:41) have suggested that this is an order of widows that assists her, it is more likely that these widows are dependent on her here,¹⁴³ as the widow in Luke 7:12 would have been dependent on her deceased son, deepening the sense of tragedy. (They may be distinguished from the “saints” in 9:41 to increase the pathos.)¹⁴⁴ Three fifth-century papyri speak of Christian women who support widows, but reading this data back into the first century seems precarious.¹⁴⁵ It is possible that Luke implies a

135. Theissen, *Miracle Stories*, 49 (citing *b. Ber.* 34b; Lucian *Lover of Lies* 11; Philost. *Vit. Apoll.* 4.10); in early Christian literature, cf. *Acts John* 19.

136. “In accordance with Jewish custom” (Reimer, *Women*, 42); cf. *y. Roš Haš.* 2:8, §4; quite abundantly, Liefeld, “Preacher,” 225–27; Mark 6:7; Luke 10:1; Acts 13:2. For double messengers, see Hom. *Il.* 1.320; 9.182; cf. Gordon, *Near East*, 110.

137. The request not to “delay” or “hesitate” (ὀκνήσης) was familiar language in urgent requests to come (Num 22:16; Jdt 12:13; cf. Tob 12:13) as well as an invitation to visit the sick (Sir 7:35).

138. Barrett, *Acts*, 484.

139. For oblique, polite Middle Eastern requests, see, e.g., John 1:38; 2:3.

140. Greek moralists warned against needless delay (e.g., Hesiod *W.D.* 410, 413; Arius Did. *Epit.* 2.7.11s, pp. 100–101.24–35; cf. also Prov 3:28).

141. Romans offered orations only for older women until the death of Caesar’s wife (68 B.C.E.), after which they also offered them for young women (Plut. *Caes.* 5.2); before ca. 396 B.C.E., they allegedly offered them only for men (Plut. *Cam.* 8.3).

142. The bereavement of a father could also generate pathos (e.g., Quint. Curt. 6.10.30–32), but for the entreaties of women (often widows or others in grave need) securing what they need (and often getting away with requesting what men did not dare), see Luke 18:2–5; Aeschines *Embassy* 148 (similarly other dependents, 179); Dion. Hal. *Ant. rom.* 8.44.1–8.54.1; Tac. *Ann.* 16.10; Plut. *Coriol.* 34.1–2 (despite the cost, 36.4); *Alex.* 12.3; 21.1–3; 39.7; 2 Sam 14:1–21; 20:16–22; 1 Kgs 1:11–16; 2:17; Matt 20:20; Bailey, *Peasant Eyes*, 134; Dixon, *Roman Mother*, 179. Erker, “Voix dangereuses,” suggests that in Rome, women’s mourning sometimes even carried political power. Women’s intercession was often effective, but not always (Sherk, *Empire*, §3, p. 7).

143. Johnson, *Acts*, 178, lists both options.

144. Cf. “saints and apostles” in Rev 18:20; of course, in either view, καί does not always connect mutually exclusive categories (see, e.g., Blass, Debrunner, and Funk, *Grammar*, 227–29, §442).

145. Thurston, *Widows*, 32–33.

special group of widows here, but even if this is the case, it is unclear whether “they were nurses and professional mourners, or simply recipients of charity”; either way, Tabitha had taken responsibility for them.¹⁴⁶ On the whole, it seems safer to read no more into the text than Luke would probably assume his first audience to have gathered, though the significant possibility of an order of widows as early as 1 Tim 5:3–16¹⁴⁷ admittedly leaves open what that may have been.

Tabitha was probably the widows’ benefactor, a model suggested by other ancient evidence both inside and outside early Christianity (cf. 1 Tim 5:16).¹⁴⁸ Widows were often counted as legally defenseless because they lacked a husband to fight for their cause.¹⁴⁹ (This would prove especially true of widows who failed to remarry, following some minority ideals of the era.)¹⁵⁰ Caring for widows was an important component of genuinely practical piety (e.g., Deut 24:19–21; Job 29:13; Isa 1:17, 23; Jas 1:27).¹⁵¹ Widows appear regularly throughout Luke’s Gospel (Luke 2:37; 4:25–26; 7:12; 18:3; 20:47; 21:2–3) and fit the Gospel’s heavy emphasis on the marginalized (see esp. 4:18; 6:20; 7:22).¹⁵² In Acts, they appear here and in Acts 6:1 but are not as prominent as in the Gospel (the second volume emphasizing ethnic more than economic marginalization).

Perhaps Tabitha made garments (cf. Prov 31:19–24) for a living,¹⁵³ but this would also prove a useful form of charity (cf. 31:20); on charity, see comment on Acts 3:2. (Some scholars compare Tabitha to Priscilla and Lydia, who also dealt with textiles,¹⁵⁴ but Lydia sold expensive fabrics, and Paul and Aquila also manufactured, although probably with leather.)¹⁵⁵ Jewish women’s garments, at least insofar as we may infer from a later painting farther east in Dura-Europos, probably roughly matched the Syrian style (perhaps because of the painting’s location):

... an ankle-length undertunic with wide, elbow-length sleeves and a shorter tube-dress over the top, fastened on the left breast. They have a hip-length veil over their heads,

146. Ibid., 34.

147. See *ibid.*, 36–55, esp. 44–46; Scott, *Pastoral Epistles*, 57; Pelser, “Women,” 105; Verner, *Household*, 164–65; Keener, *Marries Another*, 90–91. Others doubt such an order in this period (Fee, *Timothy*, 85; Winter, *Welfare*, 63). In the second century, see Thurston, *Widows*, 56–91.

148. See Verner, *Household*, 139. Parsons, *Acts*, 139, suggests plausibly that if she made the garments herself, she was not wealthy but gave from her poverty (cf. Luke 21:4).

149. E.g., Deut 27:19; Isa 1:17, 23; 10:2; 4 Ezra 2:20; cf. Deut 10:18; Pss 68:5; 146:9; Prov 15:25; Jer 7:6; 22:3; CD VI, 16; Jos. *Ant.* 4.240; *Sib. Or.* 3.242; 2 *En.* 50:5. Exceptions of women who pleaded their cases were noteworthy; see Val. Max. 8.3; Luke 18:3.

150. See, on these, e.g., Luke 2:36–37; 1 Tim 5:9 (perhaps); Ovid *Her.* 1.81–84; Val. Max. 2.1.3; Char. *Chaer.* 3.6.6; Jdt 8:4; 16:22; cf. further Pomeroy, *Goddesses*, 149–50, 161; Gardner, *Women*, 50–51; Verner, *Household*, 62–63; Maclean and Aitken, *Heroikos*, liv; Safrai, “Home,” 788–89; Keener, *Marries Another*, 93–94. Some sources even praise those who committed suicide at a spouse’s death (see comment on Acts 16:27). But in this period, the culture more often demanded remarriage (Suet. *Aug.* 34.1; *t. ‘Abod. Zar.* 2:7; *‘Abot R. Nat.* 3 A; *y. Ketub.* 9:8, §4; see further Dixon, *Roman Mother*, 22, 24, 71–103; Rawson, “Family,” 31; Gardner, *Women*, 82; O’Rourke, “Law,” 180; Keener, “Marriage,” 680–82; Harrell, *Divorce*, 58; Safrai, “Home,” 788; Ilan, *Women*, 148–49; earlier, Plut. *Lys.* 30.5; *Cam.* 2.2).

151. See discussion at Acts 6:1.

152. Green, “Good News,” argues that for Luke, the “poor” are those with “low social status,” which would certainly apply here.

153. Cf. Reimer, *Women*, 43. Most garments were made at home (Le Cornu, *Acts*, 538, citing *m. Ketub.* 5:5, 9; cf. Prov 31:13, 19, 21–22, 24).

154. Spencer, “Cloth,” 134–54. On women as weavers, see Stambaugh, *City*, 99; see more generally Treggiari, “Jobs for Women.” Architecture does not suggest strict limits on women’s activity even in Galilee (Meyers, “Gendered Space,” 68).

155. See comment on Acts 18:3. Ancients might connect Lydia and Priscilla as “businesswomen,” but even so, Lydia’s clientele are more explicitly of high status.

and their mantles (decorated with L-shapes) are wrapped round their hips with the top part folded over, although it is not clear how this is fastened.¹⁵⁶

Widows, at least, might not wear the head coverings unless they so wished.¹⁵⁷

That the widows showed the garments to Peter¹⁵⁸ is intended to increase the pathos,¹⁵⁹ especially given the use of the middle participle, which might suggest that the garments that they showed him were the garments they were wearing¹⁶⁰ and at least suggests that they were displaying them “with pride, or satisfaction.”¹⁶¹ (The public reader of Acts would likely seek to communicate this pathos with gestures and inflection while reading the work.)¹⁶² Pathos and pity for the powerless (such as widows) provided important components of entreaties and were used even to sway courts.¹⁶³ Showing the garments might also show how much they all needed Tabitha, so that raising her would constitute a benefaction not only to herself but to all her beneficiaries.

Peter's benefit to the widows by restoring her might evoke the resurrecting of widows' sons (hence future providers) in 1 Kgs 17:23 and Luke 7:15; the benefit is not only to the person raised but to the survivors dependent on the person. (Readers of Acts will be well aware that Peter's benefaction tended to be miraculous rather than directly financial; see Acts 3:6; 4:9.) It also would answer any residual suspicion that Peter and the apostles had genuinely neglected widows in 6:1.¹⁶⁴

Bringing Peter to the upper room would make him ritually impure even before he takes Tabitha's hand (9:39). Corpse uncleanness was the severest form of uncleanness, lasting seven days (Num 19:11–13), and in much contemporary Jewish belief it was propagated even by overshadowing.¹⁶⁵ (Greeks could understand this, since Greeks also believed that death made mourners unclean.¹⁶⁶ Visitors to the

156. Croom, *Clothing*, 132 (noting that they could wear colorful clothes except for red). The veil may reflect the specifically Eastern milieu of the painting (see Keener, “Head Coverings”). For Jewish garments, see, e.g., Goodenough, *Symbols*, 9:168–74; Croom, *Clothing*, 130–32 (noting the similarity to Greek styles, 131); on the sort of garments noted here, see comment on 7:58; on the sort of χιτῶν worn by women, see Cosgrave, *History of Costume*, 44.

157. See discussion in Keener, “Head Coverings,” 445–46; for further on ancient head coverings, see Llewellyn-Jones, *Tortoise*.

158. Concerned for homiletic application, Chrys. *Hom. Acts* 21 thinks that this feature was recorded to highlight Tabitha's example, as a model of caring for the poor.

159. Cf. Libanius *Topics* 3.2 (though this passage might imply displaying torn clothing reflecting mourning, just as people sometimes displayed their wounds to generate pathos; see sources in Keener, *John*, 1202; comment on Acts 20:19). My wife tells of an earlier custom that she learned about in rural Congo and according to which mourners would wave something that the deceased had given them, or would at least name the gifts (although this belonged to a practice of artificially inflating grief).

160. Marshall, *Acts*, 179; Fitzmyer, *Acts*, 445; Larkin, *Acts*, 152; Parsons, *Acts*, 139.

161. Barrett, *Acts*, 485 (noting that the middle of this verb is more frequent than the active and need not imply that they were wearing them).

162. For grief gestures, see Shiell, *Reading Acts*, 71–74, who notes the gesture of moving one's hand toward one's cheek (71; found in artwork and Terence, 74). See 87–89 for “rules for evoking emotion in vocal inflection,” esp. 88 for grief: muffled and suggesting tears (Quint. *Inst.* 11.3.64).

163. See, e.g., Lysias *Or.* 32.11–18, §§506–11; Val. Max. 8.1.abs.2. Some, e.g., Cato, objected to this means of emotional appeal (e.g., using children; Fronto *Ad M. Caes.* 3.20).

164. On this point, see Spencer, “Neglected Widows.”

165. E.g., *m. Kelim* 1:4; *Ohal.* 2:1; cf. Luke 10:31–32; *b. Bek.* 29b; *Ber.* 19b; *B. Meši'a* 114b; Sanders, *Jesus to Mishnah*, 34, 232; Borg, *Conflict*, 104–5; on the emphasis in *m. Ohal.*, see Maccoby, “Corpse.” On corpse uncleanness, see esp. Sanders, *Jesus to Mishnah*, 184–92; on the issue in Tiberias, see Jos. *Ant.* 18.38; Levine, “Purification.”

166. Klauck, *Context*, 72 (noting that even Artemis had to avoid this in Eurip. *Hipp.* 1437–38). Some Gentile traditions associate burial with impurity (cf. Pythagorean tradition in Iambl. *V.P.* 35.256; in some traditional cultures today, see, e.g., Radcliffe-Brown, “Taboo,” 73; Mbiti, *Religions*, 198), though others considered this

house of mourning sprinkled themselves with water when they departed, but close relatives required more elaborate purification after a few days.)¹⁶⁷ Thus, according to early Jewish exegesis of Num 19:14, being in the same room with a corpse could make one unclean; indeed, the uncleanness of either upper or lower rooms might contaminate the entire house (4Q284 4;¹⁶⁸ *m. Naz.* 9:2; *Ed.* 3:1; *’Ohal.* 2:4; 7:2–3; *t. ’Ohal.* 11:10).¹⁶⁹

For purposes of mourning, Jewish people had to incur such uncleanness; nevertheless, for Luke’s purposes, Peter’s involvement here (though he touches her only after raising her, Acts 9:40–41) may foreshadow Peter’s involvement with apparent Gentile impurity in 10:23, 48 (cf. 11:3), though ultimately God declares it not really impure (10:15, 28; 15:9). By crossing such purity barriers to bring restoration, Peter follows Jesus’s example (Luke 5:13; 8:44–48, 51, 54).¹⁷⁰ (See further Peter’s sojourn with a tanner in 9:43, associated with carcasses.)

h. Raising Tabitha (9:40)

Peter follows Jesus’s example in the Gospel, both “putting out” the others (Luke 8:51)¹⁷¹ and commanding Tabitha¹⁷² to “rise” (8:54).¹⁷³ Pagan signs and magic were best performed in private,¹⁷⁴ but the motivation behind Jesus’s and Peter’s putting people out (aside from the messianic secret for the former) might have been to avoid the presence of skepticism (cf. Mark 6:5–6).¹⁷⁵ Most clearly, putting others out at least echoes the privacy of the resuscitations in 1 Kgs 17:19 and 2 Kgs 4:33.

superstitious (Theophr. *Char.* 16.9). Some regarded placing the emperor’s statue near a tomb to be sacrilegious (Pliny *Ep.* 10.81.2; but Trajan dismisses this view, 10.82).

167. Kierdorf, “Burial,” 832 (in some regions, the third day; in others, the ninth). Adler, “Tombs,” suggests that Jewish baths found beside tombs also addressed corpse impurity.

168. Qumran sectarians were particularly stringent regarding ritual purity (see, e.g., Harrington, “Holiness”).

169. See further Sanders, *Jesus to Mishnah*, 185 (noting also the passage of uncleanness between upper and lower rooms in *t. ’Ohal.* 5:9; cf. *m. ’Ohal.* 5:5). For the same reason, people marked graves to prevent others from unknowingly contracting impurity by overshadowing them (e.g., *m. Mo’ed Qat.* 1:2; *Ma’as. Š.* 5:1; *Šeqal.* 1:1; *b. B. Meši’a* 85b; *y. Mo’ed Qat.* 1:2, §7; *Ma’as. Š.* 5:1, §6; for other warning markers, see *t. Ma’as. Š.* 5:13), as Luke may know (Luke 11:44). Even a piece of bone could communicate corpse impurity (4QMMT B 72–74; cf. *m. Yad.* 4:6). In the stricter 11QT L, 10–18, a miscarrying woman who enters a home defiles (with corpse impurity) anything in its earthen vessels (Charlesworth, “Sketch,” 96).

170. Weissenrieder, *Images*, 248–49, 303, accepts the purity associations in Luke 5:12–16 and 17:11–19 but doubts that Luke envisions them in 8:43–48. Luke does not emphasize the specific language of impurity there (and, with Weissenrieder, does use medical language, 250–56), but he seems to write for an ideal audience familiar with Levitical rules (e.g., Luke 2:24). For the historical Jesus’s contacts with the unclean, see Holmén, *Covenant Thinking*, 233–37; but in a sense, Jesus removed impurity rather than contracted it—and hence opposed impurity more successfully than his contemporaries who sought to avoid it when possible.

171. Conservative concerns about a man being alone with a woman (see comment in Keener, *Acts*, 1:636; or here taking her by the hand) would undoubtedly need to be dismissed in the case of a corpse being raised.

172. Witchcraft specified the name so that the spell did not affect the wrong corpse (Apul. *Metam.* 2.30; but this is to steal a corpse), and magical texts often designate which person of a particular parentage (e.g., PGM 36.82–83). But addressing the deceased by name or title appears in many nonmagical accounts (John 11:43; cf. Luke 7:14; 8:54), fitting the language of healing by command (see comment on Acts 3:6).

173. This is not to imply that Luke exploits all possible parallels; Luke does omit Mark’s Aramaic *talitha*, which would have well paralleled Tabitha’s name; nor does Peter keep the raising secret as Jesus does in the case of Jairus’s daughter. The comments of Weissenrieder, *Images*, 256–67, esp. 263–67, regarding virgins’ hysteric illnesses and a version of the story of Jairus’s daughter would not apply to Tabitha.

174. Theissen, *Miracle Stories*, 61 (citing Ovid *Metam.* 7.255–57; Lucian *Lover of Lies* 16; Apul. *Apol.* 42; PGM 3.616–17; 12.36–37; for cultic healings, cf. Epid. inscr. 11; SIG³ 3.1173); for witchcraft, cf., e.g., Ovid *Am.* 1.8.13–14.

175. Practices vary among modern practitioners; only 30 percent of healers surveyed in Tilley, “Phenomenology,” 546, felt that the presence of nonbelievers was problematic; I also noted onlookers in Keener, *Miracles*, 559, 561, 710.

Peter knelt¹⁷⁶ to pray before commanding Tabitha to rise. Jewish people commonly associated pious prayer with healings,¹⁷⁷ though in the Gospels Jesus typically commands rather than prays at the time of the healing.¹⁷⁸ That Peter prays first distinguishes this account from the otherwise very similar report of the raising of Jairus's daughter;¹⁷⁹ it may imply that Peter, unlike his Lord, needs further preparation for his initial resuscitation (cf. Mark 9:29), or it may simply echo 1 Kgs 17:20–22 and especially 2 Kgs 4:33.¹⁸⁰

That she opens her eyes first might be “a reversal of the first act of preparation for burial, closing the eyes of the deceased”;¹⁸¹ more clearly, however, it recalls 2 Kgs 4:35, where it is one of the first signs of awakening.¹⁸² She “sat up,” just like the formerly dead young man in Luke 7:15; both verses use ἀνεκάλισεν, the only uses of ἀνακαθίζω in the NT.¹⁸³

Luke's literary models are, as already noted, biblical and the gospel tradition, but understanding other resuscitation stories from antiquity will help us better appreciate how various real first-century hearers may have encountered Luke's report.¹⁸⁴ Although some ancients told resuscitation stories with a degree of skepticism, most of the ancient Mediterranean world, including reports from the Hebrew Bible, accepted that raisings sometimes occurred.¹⁸⁵ (Some ancients were selective in what they would accept; Pliny the Elder, for example, doubted ancient reports that certain herbs brought people back to life.)¹⁸⁶ Reports appear commonly enough in both Greek¹⁸⁷ and Jewish¹⁸⁸ sources, though the records tend to follow the reported events by a much greater span of time than those in the Gospels.¹⁸⁹

Many of these accounts have nothing in common with the earliest extant Christian reports. Thus, for example, Gentiles spoke of witches resuscitating the dead,¹⁹⁰ using drugs and various occult means (drilling holes to pour in hot blood, the moon's poison, the froth of dogs, and the like).¹⁹¹ Witches also worked at night when no one could see them,¹⁹² for their works were considered impious and worthy

176. “Placing the knees” appears to be a “Latinism” (Barrett, *Acts*, 387, citing Ovid *Fasti* 2.438); certainly Luke employs it often (Luke 22:41; Acts 7:60; 20:36; 21:5; elsewhere *Herm.* 1.3; 5.2; 9.5; not in the LXX, Philo, or Josephus; see comment on Acts 7:60). Is his model for kneeling prayer in Acts Jesus (Luke 22:41), the language from Mark 15:19?

177. Theissen, *Miracle Stories*, 65 (citing 1 Kgs 17:21; *b. Ber.* 34b; *Ḥag.* 3a; cf. Plut. *Pyrr.* 3.7–9); Aune, “Magic,” 1533–34.

178. Aune, “Magic,” 1533–34.

179. Rackham, *Acts*, 145.

180. For σῶμα as corpse, as here, cf. Luke 17:37.

181. Larkin, *Acts*, 152 (citing *m. Šabb.* 23:5; *Sem.* 1:4).

182. With Reimer, *Women*, 51.

183. It does not appear in the LXX. Hobart, *Medical Language*, 11, provides examples in the intransitive sense in the medical literature.

184. Because we have already identified closer literary models, these analogies tell us more about widespread human aspirations concerning cures for death than about any sources of Luke.

185. Meier, *Marginal Jew*, 2:773.

186. Pliny E. *N.H.* 25.5.13–14 (against such fanciful claims as in Apul. *Metam.* 2.28).

187. E.g., Apollod. *Bib.* 2.5.12; 2.6.2; 3.3.1; 3.5.3; Bultmann, *Tradition*, 233–34; Blackburn, “ΑΝΑΠΕΣ,” 190, citing, e.g., Pliny E. *N.H.* 7.124; Apul. *Florida* 19). Often even deities proved unable to resuscitate the dead (Ovid *Metam.* 2.617–18; 4.247–49).

188. Fairly rarely in the rabbis but elsewhere in Jewish (*Test. Ab.* 18:11 A; 14:6 B) and Christian (*Acts John* 47, 52, 73–80; *Acts Pet.* [8] 28) sources. Cf. 1 Kgs 17:17–24; 2 Kgs 4:18–37.

189. Cf., e.g., Harvey, *History*, 100, on the differences.

190. E.g., Ovid *Am.* 1.8.17–18; Heliod. *Eth.* 6.14–15. In a Latin novel, an Egyptian magician could reportedly resuscitate a corpse (Apul. *Metam.* 2.28), although the person might not wish to leave Hades (2.29; cf. 1 Sam 28:15).

191. Lucan *C.W.* 6.667–775. Cf. the use of Gorgon's blood in Apollod. *Bib.* 3.10.3; an herb in Apollod. *Bib.* 3.3.1. Cf. charlatans in Lucian *Alex.* 24; *Lover of Lies* 26 (Conzelmann, *Acts*, 77).

192. Ovid *Am.* 1.8.13–14.

of death.¹⁹³ They also spoke of unaided, natural resuscitations,¹⁹⁴ such as the ex-consul who revived on the funeral pyre but was then burned alive (Pliny E. *N.H.* 7.52.173). Novelists favored especially the reviving of those only apparently dead (*Apoll. K. Tyre* 27).¹⁹⁵ Somewhat more analogously, Greeks had stories of heroes who resuscitated the dead, such as Asclepius,¹⁹⁶ Heracles,¹⁹⁷ Dionysus,¹⁹⁸ and, in historical times (albeit recorded a century or more after the personages' decease), Empedocles¹⁹⁹ and Apollonius.²⁰⁰

In one story, God raised people in answer to the prayer of Abraham.²⁰¹ Later rabbis also told stories of earlier rabbis who miraculously raised the dead.²⁰² Traditions indicate a popular belief that at least on some occasions, Jesus raised the dead.²⁰³ It may be significant that third-century rabbis acknowledged these raisings but attributed them to necromancy;²⁰⁴ but they may well be responding to later Christian claims from the Gospels rather than to the traditions behind the Gospels. Resuscitations became particularly popular in the later apocryphal acts, for example, *Acts John* 47, 52, 73–80;²⁰⁵ but whereas an apostle such as Peter can resuscitate the dead (as here), a magician such as Simon could at best fake it (*Acts Pet.* [8] 28). Resuscitations also feature in some modern accounts of Christian expansion.²⁰⁶ Raising the dead is paired with healing the sick in the eschatological time in a Qumran fragment,²⁰⁷ but this might refer to the final resurrection.²⁰⁸

i. Presentation and Response (9:41–42)

Peter follows Jesus's example in taking Tabitha by the hand (Luke 8:54), an act that required faith (as in Acts 3:7). Jesus and others used touching for resuscitation and other healing miracles (Luke 7:14).²⁰⁹ In contrast to Jesus's ministry in the Gospel, however, there is here (Acts 9:41–42) no messianic secret (cf. Luke 8:55); after the resurrection, Jesus's identity and mission were to be publicized (Luke 24:47–48).

193. Heliod. *Eth.* 6.14–15.

194. Val. Max. 1.8.12; 1.8.ext. 1; Pliny E. *N.H.* 7.52.176–79 (some of these accounts appear more plausible than others). Pliny also claims that Hermetimus often traveled outside his body until his enemies burned his body to prevent his soul's return (*N.H.* 7.52.174).

195. For this novelistic motif in detail, see Bowersock, *Fiction as History*, 99–119, esp. 104–10; cf. Perkins, "Fictive *Scheintod*" (surprisingly also finding political symbolism). Fake death is a comic motif (e.g., Menander *Aspis* 112–13, 343–87). Because Jesus's resurrection is no mere resuscitation, the parallels are more relevant for discussing resuscitation narratives as here.

196. Aeschylus *Ag.* 1022–24; Eurip. *Alc.* 124–30; Apollod. *Bib.* 3.10.3; Paus. 2.26.5; 2.27.4; Lucian *Dance* 45; Panyassis frg. 5, in Sext. *Emp. Math.* 1.260.

197. Apollod. *Bib.* 2.5.12; 2.6.2; Libanius *Narration* 15.

198. Apollod. *Bib.* 3.5.3. Cf. the mysterious resuscitation of Protesilaus in Philost. *Hrk.* 2.9–11.

199. Diog. Laert. 8.2.59.

200. Philost. *Vit. Apoll.* 4.45. Philostratus reduces Apollonius's activity to this, as part of his antimagical apologetic (Klauck, *Context*, 174).

201. *Test. Ab.* 14:11–15 A (his earlier prayer had killed them, 10:6–11). See further 18:11 A; 14:6 B.

202. E.g., *b. B. Qam.* 117a; *y. Šeb.* 9:1, §13.

203. Meier, *Marginal Jew*, 2:773–873.

204. Stauffer, *Jesus*, 101, unconvincingly seeks to make Luke 16:31 an early response to that charge.

205. See more fully Achtemeier, *Miracle Tradition*, 182 (citing *Acts John* 23, 24, 47, 51, 75, 80, 82–83; *Acts Thom.* 33, 53–54, 81; *Acts Pet.* 27–28; and other examples). The report in Papias frg. 6 (from Euseb. *H.E.* 3.39) apparently belongs to the apostolic period, the source being Philip's daughters.

206. E.g., Rabey, "Prophet," 32 (Simon Kimbangu); Akinwumi, "Idahosa"; Menberu, "Mekonnen Negera"; Rutz, *Megashift*, 21–22. On other modern raising claims, see discussion at the introduction to the section.

207. 4Q521 2 II, 12. Cf. Le Cornu, *Acts*, 1388; 4Q521 may blend imagery from Isa 35 with Isa 61 and other precedent, perhaps Elijah's miracles (for discussion, see Wise and Tabor, "Messiah"; Tabor, "Resurrection"; Collins, "Works").

208. Cf. 4Q521 7 + 5 II, 6, 8; the context does involve physical death (4Q521 7 + 5 II, 5, 11).

209. Theissen, *Miracle Stories*, 62 (citing Philost. *Vit. Apoll.* 4.45; Ovid *Fasti* 6.753–54).

The presentation²¹⁰ to the widows contrasts with the messianic secret. More significantly, it also fits the pattern of handing the resuscitated person over to the mother (1 Kgs 17:23; 2 Kgs 4:36–37; Luke 7:15),²¹¹ reinforcing the picture of the church as spiritual family (Luke 14:26; 18:29–30; see comment on Acts 9:17). Tabitha had cared for these widows as if they belonged to her family (cf. 1 Tim 5:16); Peter understood that they would now receive her as a part of their family.²¹² As in Luke 7:15, dependents receive back their means of support.

The response (Acts 9:42) fits many of Luke's summaries (6:7; 9:31), especially the recent 9:35. Although this miracle is more dramatic, Joppa was large, and Luke's summary here is more restrained and less hyperbolic than in 9:35 ("many" as opposed to "all"). Although the word's spreading everywhere in response to signs is a frequent Lukan motif (e.g., 19:17–20), it is difficult to imagine that a miracle such as this one would not become widely known. If Tabitha's own deeds of kindness (9:36) had made her well known, interest in her welfare would have spread the word all the more.

The designation of "saints and widows" may suggest two groups (especially since both groups are prefaced with distinct definite articles rather than grammatically linked by a common article). Naturally, widows are part of the larger group of "saints" (cf. "saints and prophets" in Rev 11:18; 16:6; 18:20, 24), but they are designated separately because they fulfill a distinctive role in this narrative. From a literary perspective (and a rhetorical perspective within the narrative world), they add pathos; Tabitha also had a special ministry to them. Luke may be aware of the special ministry role (particularly in prayer) available to otherwise unoccupied widows in some developed Pauline churches (1 Tim 5:5).²¹³

j. Staying with a Tanner in Joppa (9:43)

Although he has recently come from fruitful ministry in Lydda (Acts 9:32, 35, 38), Peter naturally stays on in Joppa after Tabitha's resuscitation to follow up on the new interest that this event has generated (9:41–42). Luke reports Peter's stay in Joppa to prepare for the next scenes (10:5–6).

It was customary to name people by their occupations, as funerary inscriptions attest.²¹⁴ This was true for tanners no less than for others (e.g., *ILS 7555*, from Rome). Tanners produced the sort of leather useful for shoes,²¹⁵ and their mention may prepare the reader for another (probably) leatherworker in Acts 18:3 (see comments below); like most other trades, many would also work from their home (or live above their workplace), presumably the reason for mentioning the trade here. One might have expected Peter, staying near the sea (10:6, 32), to have lodged with a fisherman, someone of kindred occupation (cf. Luke 5:2–3);²¹⁶ fishermen in Joppa had something of a kinship organization there.²¹⁷ But we should remember that Jesus instructed his

210. The verb *παρίστημι* carries this sense also in Acts 23:33 (but not in a celebratory sense there).

211. Handing a healed person over to relatives also appears in Luke 9:42; Philost. *Vit. Apoll.* 4.45 (Theissen, *Miracle Stories*, 68).

212. When no family members were available, others near a person could see to burial and other such matters (cf. Mark 6:29); this applied to the family of Christians (Acts 5:5, 10).

213. Some scholars make this prayer focus a point of comparison with Rome's vestals (cf. Hardy, "Priestess").

214. Stambaugh and Balch, *Environment*, 117. Parsons, *Acts*, 140, also shows that when Luke notes a character's profession, it becomes significant for the narrative (Acts 8:9, 27; 10:1; 13:6; 16:14; 18:3; 19:24), and that Luke reiterates this one (10:6, 32).

215. Stambaugh, *City*, 152.

216. Cf. Xen. Eph. *Anthia* 5.1, where a poor fisherman by the sea provides hospitality and lodging to an honored guest.

217. Applebaum, "Economic Life," 68Sn5 (citing *CIJ* 2.945).

followers to stay wherever they were offered hospitality (Luke 9:4; 10:5–8); perhaps like Jesus, Peter had no other place to lay his head (9:57–58).

Throughout the Mediterranean world, tanners were among the despised trades. Many scholars argue that they were usually among groups that had business in cities and hence needed to be near them, yet were located at the edge of town or outside the walls: “ethnic groups,²¹⁸ tanners, and traders (along with the more commonly noted beggars and prostitutes).”²¹⁹ Some members of the elite stereotyped them as particularly crude, along with smiths,²²⁰ and even some nonelite persons viewed them as liars, along with, but even worse than, workers in crafts.²²¹ If for no other reason, their odor required most tanneries to reside on towns’ outskirts.²²² Polite Roman society looked down on tanners as well as smiths and butchers,²²³ though it is doubtful that workers from these groups shared outsiders’ opinions (see comment on Acts 18:3).²²⁴

That professional Jewish teachers shared such scruples comes as no surprise, especially given the association of tanning with carcasses (regarding corpses, see comment on Acts 9:39).²²⁵ To keep “the camp” holy, the sages decided that one “should not recite the Shema standing beside a chamber pot, nor enter a bath or a tannery with scrolls or phylacteries in hand.”²²⁶ People needed tanners, chamber pots, and baths, but they were all profane.²²⁷ The Mishnah reports that tanneries, like graves, were permitted not within cities but only outside (*m. B. Bat.* 2:9).²²⁸ Judean professionals despised the odors associated with tanners so much that the rabbis ruled that a tanner must grant his wife a divorce if she could not endure it (*m. Ketub.* 7:10),²²⁹ though certainly tanners would not have agreed with these judgments! They were both “suspected of immorality” and associated with a trade involving foul odors; Peter was thus residing “in a low class area, and with one of very doubtful repute in Jewish eyes.”²³⁰

218. Many cities had quarters for various ethnic groups (certainly Jews were prominent in Alexandria and many other predominantly Gentile cities), and so this item, at least, must be qualified.

219. Rohrbaugh, “Pre-industrial City,” 145 (cf. 144); also 135 (following Sjoberg, *Preindustrial City*, 97–100); cf. 2 Kgs 7:3; Neh 13:15–16, 19–20.

220. Libanius *Or.* 15.77, as cited and applied in Toner, *Culture*, 142.

221. Toner, *Culture*, 29, citing Aesop *Fable* 103 (which probably stems from nonelite circles).

222. Anderson-Stojanovic, “Leather,” 339.

223. MacMullen, *Social Relations*, 115. Lucian *Phil. Sale* 11 counts them among low-class occupations with little education (alongside carpenters and fish sellers).

224. Cf. MacMullen, *Social Relations*, 120 (tombstones advertise even occupations despised by the elite). For tanners’ guilds, see Anderson-Stojanovic, “Leather,” 339.

225. See Jeremias, *Jerusalem*, 304 (citing, e.g., *t. Ketub.* 7:11; *b. Qidd.* 82b, bar.; *Pesah.* 65a, bar.); see further *m. Šabb.* 1:2; *Meg.* 3:2; *Kelim* 15:1. Similarly, in *‘Abot R. Nat.* 36 A, butchers held no share in the world to come! In practice, however, skinning beasts in the marketplace was more honorable than depending on charity (Moore, *Judaism*, 2:177, citing *b. B. Bat.* 110a; *Pesah.* 113a). Gentile tanners were worse (*m. Šabb.* 1:8), and Simon is surely not Gentile (cf. Acts 10:28, Peter’s later realization).

226. *Sipre Deut.* 258.1.1 (Neusner, 1:187).

227. That tanners were restricted from tanning on the Sabbath (*t. Šabb.* 8:23) indicates that they were not altogether forbidden to do it; allowances could be made for them (*m. Kelim* 26:8).

228. Jeremias, *Jerusalem*, 6 (*m. B. Bat.* 2:9 also requires that tanneries be on Jerusalem’s east side, i.e., downwind from the city, as Danby points out). Akiba develops this further in *b. B. Bat.* 25a (Basser, “Allusions,” 98, citing it for a different purpose).

229. Barrett, *Acts*, 486 (citing also, on the uncleanness or odor of tanneries, *m. Šabb.* 1:2; *Meg.* 3:2; *B. Bat.* 2:9; *b. Pesah.* 65a; *Qidd.* 82b).

230. Barrett, *Acts*, 486 (though he concludes [487] that this “residence with the tanner” is not greatly significant). Fitzmyer, *Acts*, 446, and Parsons, *Luke*, 158, note the scorning of trades because of their odors (citing, for later sources, Strack and Billerbeck, *Kommentar*, 2:695). Many commentators suggest tanners’ uncleanness (Harnack, *Acts*, 85; Lake and Cadbury, *Commentary*, 111–12; Bruce, *Commentary*, 213n68; Johnson, *Acts*, 179; Talbert, *Acts*, 92–93; Chance, *Acts*, 163), though the sources are more explicit about odors. Regardless of ritual uncleanness, Chrys. *Hom. Acts* 21 (Martin, *Acts*, 117) suggests that Peter’s staying with a tanner (rather than with someone prominent) showed his humility (a “working-class apostle,” we might say).

That the tannery was near water (Acts 10:6, 32) may have allowed more purification (both hygienically and ritually);²³¹ some rabbis thought a tannery in Sidon clean because it was near a river (though others disagreed, *t. 'Ohal.* 18:2). But such a location was not uncommon for tanneries in general,²³² and this did not keep them from being marginalized from mainstream society throughout the Mediterranean world:

Tanning was a complicated and smelly business. The hides of animals were tanned using tannic acid, which was extracted from lime, from the juice of certain plants, or from the bark of trees. Tanners often worked by the seashore to facilitate the disposal of chemicals and because they used salt water in the tanning process. Because of the very unpleasant odors the work generated, its practice was not allowed in cities.²³³

The location by the sea would make it easier to find the tanner's home, though other tanners may have also lived and worked in the same district (the title "tanner" may have thus helped inquirers looking for him, Acts 10:6, 32).²³⁴ The place would stink, but as a fisherman (who also would have cut many dead fish), Peter might be accustomed to the odor (and to the social disdain of the elite if he had found it noteworthy).

Although Luke does not despise trades (16:14; 18:3),²³⁵ he and his audience would surely know that this was a traditionally despised one. The uncleanness of this profession, in the eyes of some contemporaries, develops a theme in the Gospel (e.g., Luke 3:12; 5:27–30; 7:29, 34; 15:1–2) and provides a noteworthy transition to Peter's ministry to an "unclean" Gentile in Acts 10:28–43. That Peter would defend biblical kosher practices on a tanner's roof (10:14) might strike some as ironic, but his location suggests that he had fewer cultural hurdles to cross at this point than some more elite contemporaries did.²³⁶ The specification of Simon the tanner's trade may also pave the way for Paul as a leatherworker in 18:3. Leatherworking produced fewer odors and would prove less offensive than tanning, but Paul is a far more central character in Luke's history, and so it would be helpful to prepare Theophilus or other high-status members of Luke's ideal audience for Paul's manual labor in whatever ways possible.

231. Similarly, fullers needed water for processing wool; cf. the canal for fullers in the Syrian stela, 73–74 c.e., in Sherk, *Empire*, §174, p. 231 (for the process, see, e.g., Stambaugh, *City*, 151–52; Wallace-Hadrill, *Houses*, 139; Pekridou-Gorecki, "Fulling"). Fullers not only cleaned but had a function in textile production (Wilson, "Fullonica"; Pekridou-Gorecki, "Fulling," 576; Croom, *Clothing*, 24). Their use of sulfur (Pliny E. *N.H.* 35.50.175) and urine (Pekridou-Gorecki, "Textiles," 345) associated them with unpleasant odors (cf. Bradley, "Fullonica" [though overemphasizing their importance to civic space; Flohr, "Fullones"]). Indeed, they reportedly later nicknamed their urine repositories "Vespasians" in response to that emperor's tax on them (Toner, *Culture*, 168, citing Suet. *Vesp.* 23 [for the tax]; Dio Cass. 65.14.5). In Judea and Galilee, cf. *t. Miqw.* 4:10 (Jeremias, *Jerusalem*, 18); perhaps Mark 9:3. It was a common occupation (Lewis, *Life*, 136).

232. Tanneries in Rome were especially alongside the Tiber (Stambaugh, *City*, 152).

233. Jeffers, *World*, 28.

234. For members of related trades living near each other, see discussion at Acts 18:3. Jewish tanners may have worked in an area different from Gentile ones, but Joppa was predominantly Jewish in this period.

235. Emphasized by Lake and Cadbury, *Commentary*, 111–12 (their citation of Acts 19:27 does not help).

236. Cf. Spencer, *Acts*, 113; comments in Green, "Acts," 748.

A ROMAN OFFICER ACCEPTED BY THE CHURCH (10:1–11:18)

In this section, a Roman officer is welcomed into God's people without being circumcised first (i.e., without converting to ethnic Judaism in the way prescribed by law and tradition). Although Cornelius is not the first Gentile convert (Acts 8:26–40), his symbolic role here is quite significant.¹ It is in this extended section that God leads first Peter (10:46–47) and then the Jerusalem church (11:18) to officially recognize that God has brought an uncircumcised Gentile into God's covenant people. Cornelius's role is, moreover, useful for advancing Luke's narrative beyond where it has already gone ethnically. Whereas Jews had little reason to resent Nubians (8:27–39), they had considerable cause for offense with Romans;² yet Cornelius foreshadows where Luke's narrative is moving (28:16–31).³

God confirms this plan through paired visions (10:1–8; 10:9–16; cf. similarly 9:1–19); through the Spirit's leading (10:19–20; 11:12); and, most decisively, through endowing the Gentiles with God's promised Spirit (Acts 10:44–48; 11:15–17; cf. 2:39; Gal 3:14). These signs confirm that it was the very God who had once sealed his covenant with circumcision who now adopted⁴ these uncircumcised seekers into his covenant. If God accepted them, his people dare not count them unclean (Acts 10:15, 28; 11:9; 15:9).

1. Introduction

This introduction addresses especially questions of Luke's theology but also (related to the work's genre) questions about the narrative's historicity. Other introductory issues, such as background on Caesarea (10:1); the "Italian cohort" (10:1); centurions (10:1); God-fearers (10:2); Cornelius's household (10:2); and so forth will be treated under the texts where they first appear.

1. On his positive characterization in Acts, see, e.g., Green, "Cornelius," 243–44.

2. For Judeans, a Roman centurion, like a tax collector, is an extreme example: if tax collectors can be saved (e.g., Luke 5:27, 29; 7:29, 34; 15:1; 18:13; 19:2; linked with soldiers in 3:12–14) or if Roman soldiers can, then anyone can be saved (for the principle, cf. 1 Tim 1:15–16).

3. His function thus parallels that of the centurion in Luke 7:2–10: a positive and God-fearing (cf. Luke 7:4–5) Gentile "exception" who serves as a harbinger for future exceptions. Luke's favorable portrayal of the Roman military may reinforce his apologetic objective, reminding Rome that Christians offer no threat to security (Mauck, *Trial*, 224), an issue important in the years leading up to and following 70 C.E.

4. "Welcomed" and "embraced," though accurate, do not capture the sense of divine initiative as well as Pauline images such as "adopted" or "grafted" here.

a. *The Message*

The issues the story was addressing were burning ones. Given the severity of Gentile anti-Semitism in Luke's environment and the recent events of the war in Jerusalem (on the dating that we have deemed most probable),⁵ the relations of Gentile believers to their Jewish heritage would be a matter of grave concern to Jewish and Gentile Christians as well as to inquirers and opponents.⁶ In Luke's day, a debate also raged in the wider Jewish community: the principle of hating the enslavers of one's people was widespread (including beyond the Jewish community, e.g., Thucyd. 2.68.9), but Rome's defenders, such as Josephus, undoubtedly articulated a minority⁷ Judean position in seeing God's favor on Rome. Less controversially, Josephus spoke, as here, of God's favor toward virtuous Romans (e.g., *Ant.* 18.282, 305–9).

The importance of this account for Luke's larger story is clear from the fact that it, like Paul's conversion narrative (Acts 9:1–18; 22:3–21; 26:9–18), is repeated three times (10:1–48; 11:5–16; 15:7–11).⁸ Nor is the repetition coincidental; it bears signs of deliberate literary artistry.⁹ Although the African official's conversion is significant for Luke as the story of the first Gentile convert, Luke's target here is also the conversion of Jerusalem Christians' perspective.¹⁰ The Jerusalem church may well have been unaware of the eunuch;¹¹ Luke may have learned of him only from Philip himself (cf. 21:8). In any event, Philip was not one of the Twelve and did not eat with the eunuch, nor did the official live in the Holy Land (and hence risk further contact with Judean Christians) as Cornelius did.¹² The conversion of Cornelius, by contrast, would establish a precedent, one that many of Peter's colleagues would consider dangerous.¹³

Because Luke has apparently interwoven discrete blocks of material in his work (as historians sometimes had to do), it is possible (though hardly certain) that unnamed Hellenists evangelized Gentiles before Peter did (11:19–21).¹⁴ Again, however, they did not speak officially for the Jerusalem church the way that Peter did. For Luke, it was apostolic ratification that proved decisive, confirming the continuity between Jerusalem (and the church's Jewish heritage stressed in the Gospel) and the Gentile mission (stressed in Acts). The conversion of Cornelius is thus a major turning point in the work's plot development.¹⁵ The issue is not just a Gentile's conversion but, as already noted, the *church's* fuller conversion to Jesus's agenda in 1:8 (as happens again in Acts 15).¹⁶

5. See fuller discussion in Keener, *Acts*, 1:383–401.

6. Cf. Daniel, "Anti-Semitism," 65. Thus the issue is relevant however we reconstruct Luke's first-century audience.

7. Although the revolt of 132–35 C.E. was not unprovoked, it probably reflected the continuance of undercurrents of opposition.

8. See, e.g., Witherington, *Acts*, 73 (who also cites Paul's trial narrative; but there it is multiple hearings rather than three narrations of one hearing). Counting only those in Acts 10–11, Marguerat, *Actes*, 366, finds four accounts of Cornelius's vision (10:1–6, 22, 30–32; 11:13–14); on its significance, see, e.g., 369. In particular, Eisen, *Poetik*, highlights the narrative's significance as part of the "middle" of Acts (see esp. 169–87).

9. See Witherup, "Cornelius Over Again."

10. Others also speak of the "conversion" of Peter or the church here (e.g., González, *Acts*, 136; Van Engen, "Peter's Conversion," 135–36). Cf. further Tiede, "Conversion," noted below.

11. E.g., Dunn, *Acts*, 131; Green, "Acts," 749.

12. Cf. Witherington, *Acts*, 359; Spencer, *Philip*, 86–87.

13. Watson, *Gentiles*, 61, speaks of this narrative's "paradigmatic significance" as the (official) "origin of the Gentile mission."

14. That it is possible (but not certain) is often recognized (e.g., Bruce, *Peter*, 26–27; Dunn, *Acts*, 132–34).

15. Some earlier interpreters also approached this story as pivotal for salvation history (e.g., Newton, *Observations*, 136).

16. Cf. Tiede, "Conversion." Djomhoué, "Histoire," sees the story's point to be not so much conversion as reconciliation (exemplified in Cornelius and Peter).

The marvel here is not that a Gentile becomes a believer (proselytes were already accepted even in leadership as early as 6:5) but that he becomes a believer without the normal process of conversion to Judaism by circumcision first—and the Jerusalem church is forced by God to accept this practice. Although Luke portrays the matter starkly in terms of Gentiles' salvation (11:18),¹⁷ the vast majority of Jews allowed that some Gentiles would be saved, whether by keeping only a few commandments or, according to stricter views, by becoming full proselytes.¹⁸ Whatever the ideas of the characters within the narrative world (who could be stricter than other Jews, by historical recollection or by Luke's literary design), Luke's point goes beyond the mere observation that Gentiles can be saved. The narrative's striking point may be not that Gentiles can be saved as isolated individuals (or even as "exceptions," without circumcision, as Peter's detractors in 11:18 may concede) but that God has "given" (cf. 3:16; 4:12) or provided "repentance" to them as a group, as also to Israel (5:31). This point appears in 11:18 but is clearest in 15:11: Jew and Gentile alike are saved through grace, the same way.¹⁹

In Luke's narrative, the apostles already appear to know something of a Gentile mission (Luke 24:47; Acts 1:8; 3:25–26),²⁰ but it is hardly their focus. They appear to be waiting for the church to be established fully in Jewish areas of Judea, Galilee, and (since Acts 8:5–25) Samaria (9:31).²¹ Just as table fellowship with marginalized groups within Israel was an issue in the Gospel (Luke 5:29–30; 15:2), table fellowship between Jew and Gentile becomes a central question in this story (Acts 11:3) and in the momentous decision (for which it serves as a precedent, 15:7–9, 14) in 15:20.²²

God, rather than Peter, is clearly the initiator here (10:13–20, 28, 44–47), as Peter is later more than happy to emphasize to his detractors (11:7–12, 17).²³ Indeed, despite Peter's earlier centrality, his primary function at this climactic point in the narrative is to introduce the Gentile mission and in 15:7–11 to confirm it. It can be said that Cornelius's conversion and baptism constitute Peter's most "decisive contribution to Luke's history," after which Luke's attention turns quickly to Paul.²⁴ Once the church becomes open to Gentiles, Luke is ready to recount Paul's ministry to Gentiles, which will consume more of his account.²⁵ Cornelius represents Rome, the heart of the world of Luke's audience, and foreshadows where the narrative is headed (28:16–31). As Peter "opened a door of faith to Jews on the day of Pentecost," he "now performs the same service for Gentiles."²⁶

17. Cf. perhaps likewise Acts 15:1 with Gal 3:29; 6:12; many believe that Paul's opponents in Galatia required circumcision for membership in God's people, not for escaping eschatological wrath (see comment on Acts 15:1).

18. See discussion at Acts 15:1; the options are summarized best in Donaldson, *Paul and Gentiles*, 52–69.

19. Cf. esp. Jervell, *Luke and People of God*, 65; Knox, *Jerusalem*, 150.

20. Historically, Luke is likely right about this: it is so pervasive in our sources as to have good claim to being primitive (Matt 24:14; 28:19; Mark 13:10; 16:15; Rom 15:8–9; cf. Rom 1:5; 11:11–13; Col 1:23); it is Luke, in fact, who reports the most resistance to the idea (though cf. Matt 10:5–6; 15:24). Whatever may be said of Acts 1:8, it is difficult to restrict Luke 24:47 to Diaspora Judaism.

21. Cf. Tannehill, *Acts*, 134–35.

22. Cf. discussion in Blue, "Influence," 490–94; Talbert, *Mediterranean Milieu*, 172–73. On table fellowship in the Gospel, see, e.g., Smith, "Fellowship"; on Jesus's opposition to Pharisaic purity regulations, including in table fellowship, see esp. Borg, *Conflict*, 73–121.

23. With Gaventa, *Acts*, 173.

24. Dupont, *Salvation*, 24.

25. González, *Acts*, 136, compares Paul's conversion from persecuting God's servants in Acts 9 to the Jerusalem church's conversion from excluding Gentiles, both receiving a fuller understanding of the gospel.

26. Bruce, *Peter*, 25. Cf. the image of Peter's "keys" (Matt 16:19), which, despite some traditional Protestant polemic, is probably authentic (see the case in Davies and Allison, *Matthew*, 2:609–15; Hagner, *Matthew*, 465–66; Keener, *Matthew*, 423–28).

Peter's reluctance might be something Luke would not want to invent (and which is incidentally supported by Gal 2:12–13), but it serves an important purpose for Luke when he finds it in his tradition. It was not the apostles' predisposition but only an act of God that brought the church to embrace the Gentile mission. The narrative thereby points to the divine goal of the church's ethnic and cultural unity in diversity (to borrow a complementary Pauline image, Rom 12:4–6; 1 Cor 12:12–30).²⁷

b. Biblical Allusion?

Though direct echoes are lacking, some scholars suggest that Peter's location in Joppa may providentially recall Jonah's story, the accumulation of parallels to which here is suggestive:²⁸

Jonah (book of Jonah)	Peter and Cornelius (Acts)
Joppa (1:3)*	Joppa (9:43)
God overcomes messenger's reluctance (1:17)	God overcomes messenger's reluctance (10:16)
"Arise and go" (3:2)	"Arise and go" (10:20)
Report of Gentiles' faith (3:5)	Report of Gentiles' faith (10:43)
Hostile response (from Jonah, 4:1)	Hostile responses (from Peter, church, 10:14; 11:2)
God's response (4:2–11)	God's response (10:15; 11:17–18)

* This may be the clearest echo if any appear; Joppa appears only four times in the traditional OT (Josh 19:46; 2 Chr 2:15; Ezra 3:7), though more when Maccabean literature is included (1 Macc 10:75–76; 11:6; 12:33; 13:11; 14:5, 34; 15:28, 35; 2 Macc 4:21).

Whether Luke's audience would immediately recall this story in particular is unclear; Luke could certainly have made it clearer by more direct allusions or even citations (like the Ezekiel allusion in Acts 10:14–15). At the same time, Jonah was the clearest OT example of a reluctant, nationalist Israelite missionary to the Gentiles,²⁹ and so at least some of Luke's audience might compare the accounts.

c. Structure

The narrative alternates between scenes surrounding Cornelius and Peter in 10:1–43, so that Gaventa suggests the following structure:

Visions	Cornelius	10:1–8
	Peter	10:9–16
Journey and Welcome	Cornelius	10:17–23a
	Peter	10:23b–29
Speech	Cornelius	10:30–33
	Peter	10:34–43
Confirmation	Holy Spirit	10:44–48
	Community	11:1–18

I do not believe that the structure carries into 11:1–18; although it is persuasive in 10:1–43, the Spirit's outpouring (10:44–48) is probably part of 10:34–43, and 11:1–18 does not fit the pattern. The threefold alternation between Cornelius and

27. In the spirit of the text, Jiménez, "Spirit," employs the text as a model for approaching cultural diversity and dealing with cultural conflict.

28. Wall, "Son of Jonah"; Green, "Repetition," 293; Spencer, *Acts*, 112; Royer, "God Who Surprises"; Oxley, "Certainties."

29. Perhaps inverting Balaam, the reluctant Gentile prophet on behalf of Israel, but meant especially to challenge nationalistic exclusivism (cf. also Ruth).

Peter, however, enlivens the narrative with paired visions, paired testimonies, and finally the gospel message.³⁰

d. Historicity?

Scholars dispute the measure of historicity in the story.³¹ Thus some allow that Peter may have been involved in a Gentile's conversion in Caesarea, but because Peter went mainly to Jews (Gal 2:7–8), they contend that later Petrine Christians going mainly to Gentiles developed this story.³² Further, the church's resolution in Acts 11:18 seems to contradict the need to revisit the matter in Acts 15.³³

A focus on Israel, however, no more precluded Peter's ministry to Gentiles than Paul's focus on Gentiles (Gal 2:7–8) precluded the reverse (1 Cor 9:20; 2 Cor 11:24). Perhaps the members of the Jerusalem church could accept Cornelius's conversion as a single incident without assuming that they were opening floodgates to welcome uncircumcised Gentiles.³⁴ More clearly, nationalism was rising in the church as well as in Jerusalem's culture in general in the years following Agrippa I's reign; the Jerusalem church was no more immune to a shift from liberal to conservative, or conservative to liberal, elements than are nonmonolithic church bodies or political institutions today.³⁵

Whatever the case, Luke certainly selects the details that he will emphasize according to his agenda here as elsewhere in his work. Although the debate in Acts 15 need not conflict with 11:18, it is likely that Luke's concise and triumphant summary of the church's opinion in 11:18 overstates the historical degree of consensus; even if all those who spoke openly voiced support for Peter, tradition typically dies harder than this, and those who fail to speak when perceiving themselves in a minority often work to build support for their position afterward. What we can say from Paul's writings is that Peter at a later point continued to accept eating with Gentiles (Gal 2:12)—and that he was concerned about offending a sizable part of the Jerusalem church that expressed serious qualms with it (later in 2:12).³⁶

Some scholars argue that the grammatical and syntactical peculiarities of Acts 10:1–11:18 suggest a source, possibly Luke's "Petrine or Caesarean source, material which he derived while there."³⁷ But Acts does not readily yield to such stylistic

30. It might also function as threefold confirmation (as in the threefold repetition in Acts 10:16; 11:10), but this is not likely. Lists of three (e.g., *m. 'Ab.* 2:1; 3:1; *'Abot R. Nat.* 4, §17; 31, §68 B) and sets of three admonitions (e.g., *m. 'Ab.* 1:1, 4–8, 10, 15–17; 2:10) were common among rabbis, but they were more obvious. A rhetorical thesis ideally should have three illustrations to support it (Quint. *Inst.* 4.5.3; alluded to in Pliny *Ep.* 2.20.9; cf. Cic. *Quinct.* 10.35; *Mur.* 5.11), but again this is not clear here.

31. In contrast to the unofficial account in Acts 8:26–40, it may constitute an official "foundation story" for the Gentile mission (cf. Wilson, "Urban Legends"), but note that whereas many of Livy's foundation stories are mythical (because addressing many centuries past, unlike Luke), Livy takes them over directly from his sources. "Foundation story" identifies an account's purpose, not its historical reliability. Shea, "Imitating," 51–58, finds many points of similarity between Acts 10:1–11:18 and Virg. *Aen.* 8 (she summarizes the latter, 52–58).

32. Lüdemann, *Christianity*, 132–33.

33. Haenchen, *Acts*, 356 (apparently approving Preuschen's skepticism in *Apostelgeschichte*, 69).

34. Cf. Hill, *Hellenists*, 123.

35. For an example, many conservative Christian groups in the United States that welcomed or accepted women pastors in the early twentieth century, when they often seemed exceptional, became far more resistant to them by the end of that century (see, e.g., Robert, "Introduction," 15–21; cf. Blumhofer, *Sister*).

36. In support of Peter's reticence to break kosher restrictions (Acts 10:14) and of the account in 10:44–48, Dunn argues that Peter remained hesitant to eat with Gentiles even later (Gal 2:11–12) and notes that 10:44–48 does not fit Luke's favored sequence (2:38; Dunn, *Acts*, 133). Dibelius, *Studies in Acts*, 109, argues that Luke did not invent the story, because his additions clash with his tradition; this approach expresses more confidence in our ability to distinguish sources than is common today. See Watson, *Gentiles*, 63–64, for one critique of Dibelius.

37. Witherington, *Acts*, 344–45 (doubting Dibelius's skepticism of the vision and emphasis on uncleanness, since Luke omits Mark 7:1–23).

measures, and any such identification of sources appears highly speculative.³⁸ Others argue plausibly that Luke's informant was Philip, since he had settled in Caesarea (8:40; 21:8); as he omitted his own presence after 8:40, so he omits mentioning himself here even after Peter's arrival in 10:24.³⁹ But the Peter material starts before Caesarea (9:32–43), though the Caesarean church may well have learned of it, and those who see literary disjunctions between the "Hellenist" material (6:1–8:40 and 11:19–21, possibly much from Philip)⁴⁰ and this account (10:1–11:18) would find attribution to Philip problematic. Whoever the informant(s), this was probably remembered as "a major turning point" in the life of the church of Caesarea, a turn of events that Philip, being one of their leaders (8:40), would have approved.⁴¹ Paul's extensive stay in Judea, presumably with Luke's company much of the time, would have afforded Luke ample opportunity to learn the local church's stories.

2. A Roman Officer's Vision (10:1–8)

Cornelius has a vision in 10:1–8, which will be paralleled by Peter's vision in 10:9–16 (just as the paired visions of Paul and Ananias confirmed each other). These paired visions arrange for a Jew to bring the gospel to a Gentile without the prior step of the latter's circumcision.

a. Cornelius (10:1–2)

Before examining the story, we need to investigate various elements of Luke's description of Cornelius's background relevant to his portrayal of his actions. It is important to survey information about Caesarea, particularly the Roman military presence there; obtain some understanding of centurions' status; discuss Cornelius's household; and investigate the meaning of "God-fearers."

I. CAESAREA (10:1)

Luke knew Caesarea well and explicitly mentions it frequently (8:40; 9:30; 10:1, 24; 11:11; 12:19; 18:22; 21:8, 16; 23:23, 33; 25:1, 4, 6, 13)—of cities in Palestine, second only to Jerusalem.⁴² Luke undoubtedly knew many stories of the church there from his time in Judea. Although his presence is not explicit in Caesarea after 21:16, he apparently spent more than a year (up to two years) in Judea with Paul (23:33–27:1), and since Paul was in Caesarea and Luke had acquaintances who may have lodged him there (21:8–10), Caesarea was likely his home base. The attentive reader will also recall that Philip preached in Caesarea before Peter did, acting as his forerunner.⁴³

Caesarea was formerly a place named Strato's Tower. The Palestinian coast offers few adequate natural harbors south of the Bay of Haifa, but starting in the third century B.C.E., Phoenicians founded a small harbor at Strato's Tower, a Ptolemaic enclave later subdued by Alexander Jannaeus and then liberated by Pompey.⁴⁴ From

38. With Gaventa, *Acts*, 162.

39. Ramsay, *Pictures*, 88–90.

40. If, as already argued, Luke was Paul's traveling companion (see comment on Acts 16:10), Paul would be the likeliest source for the Antioch material in Acts 11:22–30 and 12:25–13:3; if Luke worked from memory here of past conversation, its sketchiness would not be surprising.

41. See Witherington, *Acts*, 352. The later reports in *Apost. Const.* 6.2.8; 6.3.12 depend heavily on Acts; Ps.-Clem. *Rec.* 10.55; *Hom.* 20.13 are late and novelistic.

42. Cf. Hengel, "Geography of Palestine," 56.

43. Dormeyer and Galindo, *Apostelgeschichte*, 161–62.

44. Hengel, "Geography of Palestine," 55; Finegan, *Apostles*, 184. On Strato's Tower from its founding in the early third century B.C.E., see Arav, "Straton's Tower"; for the Persian and Hellenistic periods, Levine,

about 22 to 10 or 9 B.C.E., Herod the Great refounded and rebuilt the site, renaming it Καισάρεια, Caesarea, to honor the emperor Augustus (Jos. *Ant.* 15.293; 16.136).⁴⁵ The artificial harbor there (cf. Jos. *Ant.* 15.332–440)⁴⁶ was larger than Athens’s Piraeus (15.332; cf. comment on Acts 17:16) and made the city a major mercantile force on the coast.⁴⁷ Whereas earlier construction techniques especially exploited natural shelters, it was only in the Roman period, when “concrete which could set underwater” was developed, that workers could attempt such “ambitious offshore constructions” as at Caesarea.⁴⁸

After Jerusalem’s destruction, a foreign writer praised Caesarea as the largest and strongest city in Palestine (Philost. *Ep. Apoll.* 11).⁴⁹ The area displayed much wealth; one may take as an example a country villa, three miles east of the city, that contained 150 rooms, perhaps belonging to a member of the Herodian dynasty.⁵⁰

Although well known, this city would not feel culturally welcoming to a Galilean or even the average Jerusalemite. By this period, Gentiles dominated the city (Jos. *War* 3.409);⁵¹ the patron deity, as of many other cities in the East, was the goddess Fortune.⁵² Although Jewish inhabitants controlled more of the city’s wealth (*War* 2.268)⁵³ and claimed that Herod, its builder, was a Jew, the Syrian “Greeks” who lived there argued that its statues and temples indicated that it was designed for Greeks (2.266). And indeed, the city held magnificent temples and a theater⁵⁴ (though Jewish Sepphoris also held the latter). The city functioned as a Hellenistic republic, and the Roman prefect of Judea resided there between 6 and 41 C.E. and after 44.⁵⁵ Still, evidence shows that some Gentiles did convert to Judaism in and around Caesarea.⁵⁶

In fact, tensions often ran high between Jew and Gentile in Caesarea, making the location of Cornelius’s conversion all the more remarkable. In times of conflict, the

Caesarea, 5–10. Further on Caesarea, see Holum, “Caesarea”; Patella, “Caesarea Maritima”; McRay, *Archaeology*, 139–45; Bull, “Caesarea”; Hohlfelder, “Caesarea”; Vann, “Construction”; earlier, Negev, “Caesarea”; Blaiklock, *Cities*, 72–76; for its history under Rome and Agrippa II, see Levine, *Caesarea*, 18–29; and further discussion at Acts 23:23.

45. Cf. Pliny E. *N.H.* 5.14.69. For details on his building there, see Jos. *Ant.* 15.331–32 (the work being completed in 16.136); *War* 1.408–14; for archaeological material, see Cornfeld, *Josephus*, 80–83; Holum, “New Dig.” For a summary, Levine, *Caesarea*, 11–14. For a “Sebaste” (named for Augustus) near Caesarea, see Jos. *Ant.* 16.13; *War* 1.551; 2.288; for the Sebaste in Samaria as named for Augustus, see *War* 1.403.

46. See, e.g., Raban et al., “Harbours.” For the earlier access of Strato’s Tower for ships, cf. Strabo 16.2.27. Designers would choose natural harbors when available, building harbors only when necessary (Vitruv. *Arch.* 5.12.1–2).

47. E.g., Dor lay in the immediate vicinity (cf. Stern, Berg, and Sharon, “Tel Dor”), but it declined after Caesarea Maritima’s rise after ca. 22 B.C.E. (Raveh and Kingsley, “Status of Dor”).

48. Souza, “Harbours,” 667.

49. Aelia Capitolina (on the site of Jerusalem) took 120 hectares, and Caesarea, 95; other cities (Sepphoris at 60 and Tiberias at 40 hectares) were smaller (Horsley, *Galilee*, 166).

50. Hirschfeld and Vamosh, “Estate.”

51. For paganism there, see, e.g., Lease, “Caesarea Mithraeum”; Bull, “Mithraic Medallion”; Gersht, “Reader of Scroll”; nearby, Hirschfeld and Peleg, “Gemstone.” Caesarea’s “Tiberium,” however, may have been simply a lighthouse (so Alföldy, “Tiberiëum”). For predominantly Gentile areas of Palestine (which typically included many Jewish residents), see, e.g., Hirschfeld, “History of Town-Plan”; for pagan inscriptions even in predominantly Jewish areas, see, e.g., di Segni, “Giv’at Seled Cave.”

52. Depicted on a coin commissioned by Agrippa I; Carmon, *Inscriptions*, §211 (English, p. 100; Hebrew, 216). Although we lack evidence for a cult of Tyche there, she appears on many city coins, often assimilated to the Roman Fortuna or to Dea Roma (Gersht, “Tyche”).

53. Cf. a Roman estate from this general period, probably owned by a wealthy Jewish family, in Hirschfeld and Birger-Calderon, “Estates near Caesarea.”

54. Cf., e.g., McRay, “Caesarea Maritima,” 176; Holum, “Temple Hill.” The theater seated 4,500 (Finegan, *Apostles*, 185), and the amphitheater’s arena was larger than Rome’s later Colosseum (186).

55. See Judge, *Pattern*, 13. The prefect took over Herod’s old palace (on which see Burrell, Gleason, and Netzer, “Seaside Palace”).

56. E.g., Horbury, “Inscription.”

Roman auxiliaries, which were mainly Syrian, would side with the local Syrians against the Jewish residents (*War* 2.267–68).⁵⁷ Josephus estimated that Syrians in Caesarea massacred twenty thousand Jews in a single hour in 66 C.E. (2.457), provoking Jewish slaughter of Syrians elsewhere (2.458). Despite Josephus's pro-Jewish position, it is clear from reading him that "the Jews initiated the struggle and on a number of occasions escalated it" by claiming the city to be theirs.⁵⁸ (See further comment on the conflict at Acts 23:23.) In a later period,⁵⁹ Jews continued to live in Caesarea (e.g., *y. Demai* 2:1), and it included an influential rabbinic school.⁶⁰ But Gentiles predominated, and rabbis felt its produce could be safely assumed untithed.⁶¹ It was in such a city that a major Gentile conversion was about to take place.⁶²

II. THE MILITARY PRESENCE IN CAESAREA (10:1)

Some scholars doubt that Roman soldiers would have been stationed in Caesarea at the time Luke describes in Acts 10 and hence are skeptical of Luke's reliability on this matter. Haenchen, followed by some others, argues that no Roman soldiers would have lived there during Agrippa's rule (from 41 to 44 C.E.) and that the event Luke describes must have occurred in this period.⁶³ Roman legions certainly did not exist in Palestine during this period, but if Haenchen means that no Gentile auxiliaries were stationed there (under Agrippa's authority), his claim would be remarkable, for such a supposition flies in the face of explicit contrary evidence from Josephus, a writer who was alive and present in the period described. This question will be addressed in two parts. First, does the Cornelius narrative occur during Agrippa's reign? (I will suggest that it may, but need not, have done so.) Second, what was the military presence in Caesarea at the time?

(1) *During Agrippa's Rule?*

Arguments exist for dating Cornelius's conversion before, during, and after Agrippa's rule. Agrippa's rule is mentioned in 12:1–23, and so it appears that Luke's story does not follow Agrippa's death. But this conclusion need not certainly follow (probable as it is); Luke could have moved a later story earlier in his narration⁶⁴ (so that Peter's Gentile mission and Jerusalem's approval precede the Gentile ministry of the anonymous believers of 11:20). Peter's "tour" of coastal cities (starting in 9:32) occurs only after his return to Jerusalem (8:25), and in 12:17 he left for "another

57. Although there is some evidence for some Jewish auxiliaries under Rome (cf. *Jos. Ant.* 15.317; 18.84; *CPJ* 2, §229), other sources seem to support their more common exemption; see evidence in Kraft, "Judaism on Scene," 86–87. Syrian recruits were sometimes considered the least disciplined and the most discontent and prone to mutiny (*Fronto Pr. Hist.* 12).

58. Levine, *Caesarea*, 29. On Jewish-Gentile conflict there, see further the summary, 29–31; for the war, 31–33.

59. On Caesarea as a second-century Roman colony, see *ibid.*, 34–45; in the third and fourth centuries, see 46–61.

60. See, e.g., *y. Hal.* 1:1, §2; *Or.* 2:8 (some mss, 2:10); *Bik.* 3:3, §9; *Šabb.* 1:1, §§2, 15; 1:2, §1; 1:4, §3; 2:5, §§1–3; 6:1, §10; 7:2, §1; 13:1, §1; 14:4; 19:3, §3; *Erub.* 1:1, §§10, 13; 2:4, §1; *Pesaḥ.* 1:3, §3; 3:3, §2; 8:8, §3; *Ma'as.* Š. 2:1, §5. It is a part of "Israel" (albeit not very orthodox) in *Song Rab.* 1:6, §1.

61. *Y. Demai* 3:3; cf. *t. Demai* 3:14. Cf. pagan themes on second- and third-century C.E. sarcophagi there (Gersht, "Dionysiac Sarcophagi").

62. Caesarea functions as an intersection of East and West in both Josephus and Acts (so Painter, "Caesarea"), helping point Luke's narrative toward Rome.

63. Haenchen, *Acts*, 360; cf. Conzelmann, *Acts*, 81. Perhaps Haenchen excludes only legionaries rather than auxiliaries, and hence cohorts of Roman citizens rather than noncitizens, but it is difficult to see how such a claim would call Luke's narrative into question. I have responded to Haenchen's argument in Keener, "Troops," which adapts and expands some of the following material.

64. Conzelmann, *Acts*, 81, notes that the dating is not certain and that Luke could have transferred it from a different time.

place.” Thus some scholars suggest that “the *cohors Italica* may have come in with the reconstitution of the province in 44” and the story may be dated to that time.⁶⁵

The Gentile mission, however, should have been well under way in Antioch by then and not merely beginning; thus another alternative seems somewhat likelier and is plausible given our lower Pauline chronology: that the events here occur before Agrippa’s rule began in 41 C.E.⁶⁶ Still, let us assume for the sake of argument that the events occur during Agrippa’s rule; even if this meant that he had his own Jewish soldiers in Caesarea, the area would retain many former soldiers who were from the area or who had settled there. Yet even if we further excluded the possibility of soldiers settled there, literary evidence indicates that Gentile soldiers lived in Caesarea then as they did afterward (albeit not legionaries in either case).

(2) *Soldiers in Caesarea*

Literary evidence indicates that in most of the early first century, Caesarea held a cavalry unit and five infantry cohorts of auxiliaries; archaeological evidence also shows an increasing Roman presence and influence.⁶⁷ Further, an explicit passage in Josephus describes Gentile soldiers already stationed in Caesarea at the close of Agrippa’s rule.⁶⁸

If the Cornelius story is set in Agrippa’s time, it is relevant that Josephus indicates the presence of Gentile soldiers during that time. Many soldiers in Caesarea and Sebaste during Agrippa’s time hated Agrippa; they were nearly relocated after his death but were allowed to remain, being very attached to the locale. Caesarea and Sebaste ungratefully rejoiced at Agrippa I’s death (*Jos. Ant.* 19.356); the numerous soldiers there went to his house and carried out images of his daughters, which they then abused on top of brothel houses (19.357).⁶⁹

The emperor Claudius was angry about this report (19.361) and ordered Fadus there in order to punish Caesarea and Sebaste for their insults both to the deceased Agrippa and to his living daughters (19.363). He then ordered that the soldiers in Caesarea and Sebaste be removed to Pontus, being replaced by Roman legionaries stationed in Syria (19.364). But these soldiers managed to persuade the emperor to allow them to stay; Josephus concludes that these same soldiers later led to disasters for his people (19.365).⁷⁰

It is virtually impossible lexically to deny that Josephus refers to soldiers in Caesarea during this time.⁷¹ Even if we were to argue that these soldiers must have been angry because of disfranchisement from active service under Agrippa (which the text does not indicate),⁷² they would be soldiers nonetheless (we cannot allow Josephus to employ that language and then forbid it to Luke).⁷³

65. Smallwood, *Jews*, 147n13.

66. With, e.g., Levinskaya, “Cohort,” 106; Bruce, *Acts*¹, 215; Munck, *Acts*, 92; Le Cornu, *Acts*, 820.

67. In addition, for Roman-style artwork in the Herodian period, see Ovadiah, “Pavements”; cf. a Roman villa even in the countryside (though in the late second century; Edelstein, “Villa outside Jerusalem”).

68. Speidel, “Army,” argues for Roman soldiers in Judea even in 41–44 C.E. (so Levinskaya, “Cohort,” 106–7).

69. The exact meaning of the abused images may be debated, but it does not affect the present point.

70. Given the dates, it is unlikely that many of these soldiers would remain active during the Judean war just more than two decades later, the years of service normally being twenty. But the same sentiments would have been passed down to newer recruits.

71. *Jos. Ant.* 19.357 employs *στρατεύομενοι*, a verb that BDAG defines as “do military service, serve in the army” (or “engage in a conflict”). Josephus employs the verb 143 times, normally in military contexts. More clearly still, it is the military cohorts (*σπείρας*, to be replaced by legionary *στρατιώτας*, 19.364) stationed in these cities who are nearly moved (19.364–65).

72. The proposal would be unlikely, in any case. The emperor forced Agrippa to desist from expanding Jerusalem’s city wall, out of concern for preventing the accumulation of independent power (*Jos. Ant.* 19.326–27; *War* 5.152). The emperor surely would have allowed Agrippa his own elite guards, but to deactivate Rome’s auxiliaries (as opposed to allowing Rome to transfer them elsewhere) would be seen as meddling in the affairs of the Syrian legate. Kingship afforded greater independence for Herod than for Agrippa (cf., e.g., *Jos. Ant.* 19.327; *War* 5.152).

73. Nor can we easily attribute Josephus’s portrayal of Gentile soldiers in Caesarea to his apologetic bias; why would he invent Gentile soldiers who hated a Jewish king? If he was prone to invent all such

From Josephus's account we learn that the soldiers stationed in Caesarea felt very attached to the locale; although the climate was pleasant, we may surmise that many were recruits from this area or had entered into unions with local women. We may also surmise their hostility against Agrippa I in particular and Judaism in general.

In general, soldiers often became attached to local areas. By the second century, soldiers were usually recruited locally and stationed in a single location;⁷⁴ such stability was less characteristic in the first century but more common than in earlier times. Military camps were often closely connected with their locales. In peacetime, soldiers could function as builders and engineers; some projects were solely for their own benefit⁷⁵ but others (like bridges and roads) would ultimately generate more civilian use.⁷⁶ Rome also used military engineers and soldiers to help local public projects.⁷⁷ Localities helped supply army camps, in turn helping to stimulate local economies.⁷⁸ Temporary settlements (*canabae*) often grew around army camps, including merchants, artisans, and women who often bore children to the soldiers.⁷⁹ It appears that the soldiers stationed in Caesarea felt at home there and wished to remain there.

What we know of Gentile soldiers in Caesarea underlines the special character of Cornelius's conversion. During the later governorship of Felix, Jews provoked Syrians in Caesarea (Jos. *Ant.* 20.175). The Syrians had less wealth than Jews there, but counted on connections with the soldiers stationed there, most of whom were from either Caesarea or Sebaste (20.176). Conflict escalated, and when the Jewish side refused to desist, Felix set his soldiers against the crowd and let them plunder the homes of well-to-do Jewish citizens (20.177). From this we may gather that, within a few decades of Cornelius's encounter with Peter, the majority of the Gentile soldiers in Caesarea were anti-Jewish, or at least would prove pro-Syrian if a conflict between the two groups arose. They also had local ties.

(3) A Retired Soldier?

Even if the events occurred in 41–44 C.E., and even if we (against the evidence of Josephus) deny the possibility of active Gentile soldiers residing there in that period, Cornelius could well be a retired soldier (who may have served in the region) who settled in Caesarea, as his own home (perhaps in Caesarea rather than an adjoining camp) and the presence of family might suggest (see comment on soldiers' families at Acts 10:2). Romans had traditionally provided land grants for veterans (sometimes—especially in earlier times—in a colony but sometimes on their own).⁸⁰ Although land grants were not systematic, they continued until the second century C.E.⁸¹ By this period, cash gifts appear more common than land grants (at least for common soldiers), but soldiers, in any case, usually preferred to settle “near their last camp” rather than in a veteran colony.⁸² Centurions became members of the equestrian

opposition, we could then explain away the entire conflict by which he explains the war, an approach that is not plausible.

74. Campbell, *Army*, 212.

75. *Ibid.*, 120–21 (noting that they had to build their own fortresses, water supplies, and so forth).

76. *Ibid.*, 121. They could also sell their products locally.

77. *Ibid.*

78. *Ibid.*, 140.

79. *Ibid.*, 141 (noting that the camp commander decided the location of the *canabae*, whether a mile distant or directly beside the camp).

80. C. Williams, *Acts*, 134; Barrett, *Acts*, 499; Dunn, *Acts*, 135; on land grants for veterans, see esp. comment on Acts 16:23.

81. Campbell, “Veterans.”

82. Thompson, “Military,” 994 (though noting [993] that centurions often remained in the army for their entire lives); Campbell, *Army*, 212. They do not seem to have been especially involved with local politics, and

order when they retired, which could further explain Cornelius's prominence here.⁸³ Although veterans could choose to remain as reservists⁸⁴ and Rome would recall veterans to war in emergency situations (e.g., the civil wars of the first century B.C.E.), they normally spent their retirement in peace (Cic. *Phil.* 5.16.44).

Luke apparently does not envision Cornelius as retired unless (as is possible) the soldier mentioned in Acts 10:7 is also retired or Cornelius hired him as a part-time worker, but one could argue that Luke's sources reflect a retired centurion. Some scholars have even argued, on the grounds that Archelaus's and Agrippa's auxiliaries both passed into Roman service (in 6 and 44 C.E., respectively; cf. *Jos. Ant.* 19.364–65), that Cornelius belonged to an auxiliary unit later absorbed into Roman service and attached to the Italian cohort in Syria.⁸⁵ (Nevertheless, if so, I would argue from *Ant.* 19.356–65 that these units already consisted of Gentiles.)⁸⁶

When all has been examined, it is difficult to see why anyone would find impossible Luke's portrait of a Gentile centurion becoming a Christian unless one was driven by implacable skepticism. Whether the Gentile was ethnically Roman (a matter Luke does not explicitly address) is a separate question.

(4) Italian Cohort

Commentators often identify the "Italian cohort" here with the Cohors II miliaria italica civium romanorum voluntariorum (quae est in Syria),⁸⁷ apparently an auxiliary unit of archers (*ILS* 9168).⁸⁸ Given our current limited surviving information from antiquity, this is a reasonable surmise (though no more than a surmise).

But just as some are skeptical of troops in Caesarea during Agrippa's reign, some are skeptical that the Italian cohort was dispatched to the East this early, since it is first attested clearly in an inscription of 69 C.E. (*ILS* 9168).⁸⁹ This objection is, however, a very weak argument from silence, given the sporadic nature of our epigraphic evidence (we know little about the units in Judea in this period and no names for the period 38–41 C.E., which is the period somewhat most likely here).⁹⁰ Given our scant information, that they are mentioned at all, in fact—and as in Syria (rather than in the West) and only three decades from the period Luke portrays—may support Luke's portrait.⁹¹

Another inscription in the region that mentions an Italian cohort (*CIL* 11.6117) is of uncertain date, but the location is helpful. We have no evidence that this unit was located outside this province, and hence did not have a presence in Caesarea, at

it is not clear to what extent they contributed to stimulating local economies or to romanization (Campbell, *Army*, 222–23).

83. Ferguson, *Backgrounds*, 38; Stambaugh and Balch, *Environment*, 34. This claim might refer particularly to legionary centurions.

84. Campbell, "Vexillum." For calling up veterans in times of earlier, severe military crises, see Vell. Paterc. 2.111.1; 2.113.1; in the most severe emergency, like Hannibal's invasion, fewer soldiers were mustered out or settled abroad (Vell. Paterc. 1.15.1). Neither sort of situation would prove relevant to Cornelius in Caesarea at this date.

85. Witherington, *Acts*, 347 (though allowing that the account may refer to 39–40 C.E.).

86. Jewish soldiers were rare in Roman armies (see Kraft, "Judaism on Scene," 86–87; Applebaum, "Legal Status," 458–60).

87. Bruce, *Acts*, 215; Haenchen, *Acts*, 346; Smallwood, *Jews*, 147; Barrett, *Acts*, 499; Fitzmyer, *Acts*, 449 (citing *CIL* 6.3528; 11.6117).

88. Barrett, *Acts*, 499; Fitzmyer, *Acts*, 449; cf. D. Williams, *Acts*, 186 (following Sherwin-White, *Society*, 160). Scholars usually assume that this inscription refers to the same "Italian cohort" as in another inscription in this region (*CIL* 11.6117).

89. Haenchen, *Acts*, 360.

90. See also Witherington, *Acts*, 346.

91. Probably the earlier approach of Ramsay, *Bethlehem*, 261–62; cf. also D. Williams, *Acts*, 186.

this time. In any case, even if Luke reports a different cohort in a different location or period, we cannot argue that there was only one cohort so named (we know, in fact, of two Italian cohorts).⁹² There were in fact even different legions with the same names in different places and at different times: Nero's *Legio I Italica*, recruited from Italians about 66 C.E. and sent to Gaul in 68;⁹³ the *Legio II Italica* and the *Legio III Italica*, both raised a century later;⁹⁴ and so forth. The animal symbols for *Legio I Italica* were the boar and the bull; for *II Italica*, the she-wolf, the ibex, and the stork; and for *III Italica*, the stork.⁹⁵ Legions had distinctive animals on their standards;⁹⁶ auxiliary cohorts also had their own identifying emblems.⁹⁷

If Cornelius is a retired member of a cohort not in Caesarea (explaining why it is so significant to identify his cohort), the objection would be irrelevant. (I think his retired status only one, and not the strongest, possibility among several, but it should be entertained no less seriously than the mere dismissal of the cohort's presence on the basis that it is not attested till 69 C.E.) If this is an auxiliary cohort, the name would not involve the legion, though some might wonder how "Italians" would end up in an auxiliary cohort (rather than a legion) in Syria. Then again, Cornelius could be lent from a legionary cohort yet be commanding auxiliary troops. There is too much that we do not know; Luke likely was better informed than we are.

Although it remains debated how legions received their names, it is possible that the names reflect the origin of the legions' recruits; that this was probably at least sometimes the case would be valuable to Luke, who wants this narrative to point toward Rome. Yet Luke could employ the name symbolically, whatever its source. Some scholars suggest that the Ninth Legion adopted the names "Macedonica" and "Hispana" because of courage displayed during campaigns in Macedonia and Spain; because it was called Macedonica when this legion was in Pannonia in 30–40 C.E., however, the title more likely implies that the troops were drawn from Macedonia at that time. It was called Hispana when it was in Britain probably because many recruits were from Spain, though it had not served in Spain for more than sixty years.⁹⁸ There was probably not a single rule for names, however. Units could be named for earlier commanders, for districts, or for the weapons they used (e.g., "the archers"), and the emperor's name might be added (e.g., I Augusta Thracum).⁹⁹

A Roman legion, with a nominal six thousand troops (but actually generally closer to five thousand),¹⁰⁰ consisted of ten cohorts, each of which in turn consisted of six centuries (on centuries, see comment below on centurions).¹⁰¹ The first cohort was twice as large as any of the others and included "headquarters personnel, clerks, technicians, medical personnel, supply personnel," and a *haruspex* to examine omens.¹⁰² Other cohorts were supposed to include about 600 soldiers, though they could have

92. Levinskaya, "Cohort," 107–8. The location of one cohort is uncertain until the second century (124), and that one is equally possible (125).

93. Campbell, "Legion," 839.

94. *Ibid.*, 840; Campbell, *Army*, 363–64 (dating them to 165–66 C.E.).

95. Le Bohec, "Ensigns," 993–94.

96. *Ibid.*, 993–95.

97. *Ibid.*, 995.

98. West, *Inscriptions*, 35, on no. 54.

99. Campbell, "Auxilia," 420.

100. Ferguson, *Backgrounds*, 38; Campbell, "Legio," 358.

101. Jones, "Army," 194; Malherbe, "Life," 8. Cohorts replaced an older military unit, the maniple (Campbell, "Manipulus"). Other sources give six tribunes commanding cohorts with 480–500 soldiers. Millitary cohorts may postdate the 40s (Levinskaya, "Cohort," 125).

102. Jones, "Army," 194. Fitzmyer, *Acts*, 449, notes that σπεῖρα usually is the Latin *cohors* (Polyb. 11.23.1), but argues that it can sometimes be a *manipulus* (Polyb. 6.24.5).

fewer at given times (cf. 505 troops in *BGU* 696.11–15, from 156 C.E.; but more were added later), and cohorts may have often been smaller in this period (see comment on Acts 23:23).¹⁰³

Whereas Rome's legate in Syria had ample troops,¹⁰⁴ the usual prefect in Judea had less than a legion; this required his dependence on Syria's governor in times of crisis.¹⁰⁵ During most periods, Judea's prefect had one cohort in Jerusalem and five in Caesarea.¹⁰⁶

(5) *Cornelius and Rome*

Was Cornelius a Roman citizen? Some scholars note that the presence of relatives in Caesarea (Acts 10:24) suggests that he may have been a provincial.¹⁰⁷ These could be simply local in-laws, but there are other reasons to believe that Cornelius is from the East. New recruits for auxiliaries sometimes took a Roman cognomen when enlisting, although they did not become citizens (and hence take a Roman praenomen and nomen, from the reigning emperor's name) until retirement.¹⁰⁸ Conversely, Cornelius had been a common Roman name especially since 82 B.C.E., when Publius Cornelius Sulla freed ten thousand slaves who then adopted the name from his *gens*.¹⁰⁹ It suggests to many that even if Cornelius was attached to one of the largely Syrian auxiliary units, he may have been himself a Roman citizen.

Well into the first century A.D., Roman citizen soldiers maintained the old tradition of referring to one another by *praenomen* and *nomen*, not by *cognomen*. Because of the small number of *praenomina* [*sic*], in practice this meant using primarily the *nomen*. Such a practice would also make clear his Roman citizen status since it identified the Roman family through which he was enfranchised, such as Corneli or [in 27:1] Julii.¹¹⁰

Although a person could receive citizenship for a variety of reasons, it seems statistically more probable, given the family name, that "he was a non-Roman ethnically who was a Roman citizen because an ancestor had come under the patronage of a Cornelius, probably a general but possibly a Cornelian slave-owner."¹¹¹ Some scholars argue that his centurion rank probably also suggests that he or his ancestors became citizens at some point before he became a centurion.¹¹² Not all centurions in the auxiliaries were

103. Even during the republic, the size of legions varied (Roth, "Legion," notes that the standard was 4,800, but the number could be expanded to 5,280; Campbell, "Legion," 839, has 4,200 to 5,000 in the early republic).

104. For the normal organization of legions under Roman governors, see Stambaugh and Balch, *Environment*, 18.

105. In other settings, too, a legate rather than a proconsul might control a legion (see Tac. *Hist.* 4.48, in Vespasian's era).

106. See Jos. *Ant.* 19.364; further comment in, e.g., Jones, "Army," 197; Reicke, *Era*, 140; Stambaugh and Balch, *Environment*, 34. Against the overestimates of Roman "occupation" sometimes assumed, see the cautions of Sanders, *Jesus to Mishnah*, 17.

107. Witherington, *Acts*, 347n82.

108. Jeffers, *World*, 203–4. Some argue by contrast that the use of a nomen without cognomen particularly characterized military usage in this period (e.g., D. Williams, *Acts*, 185–86).

109. Many commentators (Bruce, *Acts*¹, 214; idem, *Commentary*, 214n1; Conzelmann, *Acts*, 81; Fitzmyer, *Acts*, 448–49; D. Williams, *Acts*, 185; Bock, *Acts*, 386). If he was descended from one of these freedmen, he would be a Roman citizen (with, e.g., Witherington, *Acts*, 346). He would not, however, be a freedman himself (*pace* some commentators' wording), since former slaves were excluded from the military (Finley and Treggiari, "Freedmen").

110. Jeffers, *World*, 206–7; cf. Hemer, *Acts in History*, 177. Luke's usage matches first-century expectations (see Jeffers, *World*, 204–5). Because "Cornelius" was not part of a current emperor's name, this could not be simply this centurion's retired name.

111. Jeffers, personal correspondence, Dec. 19, 2005.

112. Fitzmyer, *Acts*, 449; Campbell, personal correspondence, June 16, 2006 ("There were no non-citizen centurions"). Higher officers were normally Roman equestrians (Campbell, "Auxilia").

in fact Roman citizens, but some were, since “many auxiliary centurions were citizen legionaries promoted to the position,” and Cornelius’s name indicates citizenship.¹¹³ For that matter, any auxiliary who was not a citizen would become one on retirement;¹¹⁴ but his citizenship does not require us to suppose that Cornelius must have been retired. Some scholars point out that members of the “Italian cohort” would have been Roman citizens;¹¹⁵ this claim could be quite relevant here, although the citizenship (and the title “Italian”) might apply to the original cohort rather than to its current membership.

It is possible (though not the only possibility) that Cornelius was lent as a low-ranking officer from the legion. A legionary centurion could be placed in charge of some auxiliaries (Pliny *Ep.* 10.77.1). Another possibility also remains. Roman military historian John Brian Campbell kindly responded to an inquiry about the possibility of Cornelius being lent from the legion:

From time to time centurions were put in command of small bodies of troops separate from their legionary command (as you suggest); for example, they might be seconded to command a detachment of part of a cohort of auxiliaries on special guard duties etc.¹¹⁶ Furthermore, centurions because of their standing came to fulfil a kind of administrative role in small local areas (we sometimes find the phrase “centurion of the region”). . . . In this way centurions sometimes came to have a kind of justice of the peace role.¹¹⁷

Campbell suggests very tentatively that Cornelius may have been sent here “with some kind of special military or civilian responsibility, possibly because there had been numerous complaints about the local auxiliaries.”¹¹⁸ Luke elsewhere assumes centurions among troops stationed in Judea (Luke 7:2–6; 23:47; Acts 21:32; 22:25–26; 23:17, 23; 24:23; 27:1), and the only one named also has a Roman name (Acts 27:1).¹¹⁹ In the final analysis, Cornelius is probably a Roman citizen, and (more important) Luke’s audience would almost surely assume him to be a Roman citizen. What matters still more for our purposes, however, is that for Luke’s audience, both his name and his office make him a representative of Rome.

Cornelius is undoubtedly associated with auxiliaries here. Before the Judean-Roman war,¹²⁰ Judea had no legion, and hence Rome’s soldiers there were mostly local

113. Campbell, personal correspondence, June 19, 2006. Some auxiliary officers were also promoted to legionary centurion roles (Campbell, *Army*, 47), presupposing (or granting) their citizenship.

114. Campbell, “Auxilia,” 420; Witherington, *Acts*, 347. Jeffers, personal correspondence, Dec. 19, 2005, notes that he is not aware of auxiliaries receiving citizenship before retirement, although this does not mean that it never could have happened. Probably Claudius (the next emperor) was the first to issue official diplomas attesting that individual, serving auxiliaries held citizenship (Campbell, *Army*, 193–94). Achieving it for family members required a special grant (e.g., Pliny *Ep.* 10.106).

115. See Levinskaya, “Cohort,” 108.

116. See likewise Campbell, *Army*, 47. Such duties could be relevant in Caesarea, especially given the many prisoners held there (cf. Jos. *Ant.* 20.215).

117. Campbell, personal correspondence, June 16, 2006. He suggests this as a possibility in part because Cornelius appears to have some local status (idem, personal correspondence, June 19, 2006); cf. the soldier sent in Acts 10:7 (but perhaps as a guard). His many “friends” and “relatives” (10:24) could simply reflect the long-term resident status of most of the soldiers stationed in Caesarea, but if Cornelius worked his way up to centurion status before being lent from the legion, he may not have been there as long.

118. Campbell, personal correspondence, June 16, 2006. Given tensions with the soldiers stationed in Caesarea, as already noted, this suggestion is a plausible one. He thinks that Acts’ author rightly understood Cornelius’s status even if the cohort with which he associates him may have been in that area only later.

119. Josephus, too, assumes centurions in Judea (e.g., *Ant.* 17.199, 282; *War* 2.63, 319), at least some of whom have Roman names (e.g., *War* 2.298).

120. For (later) archaeological evidence for the Sixth Legion, see Hershkovitz, “Cremation”; Tsuk, “Aqueduct.” Later Palestinian rabbis demonstrated knowledge of Rome’s legions (tradition possibly as early as the second century C.E. in *Gen. Rab.* 94:9).

non-Roman Gentile auxiliaries, mostly Syrian (cf. Jos. *War* 2.268).¹²¹ At Augustus's death, Rome had twenty-five legions and about 150,000 troops, too small to hold the empire by themselves. It therefore depended also on a provincial force of roughly equivalent size;¹²² during the period described in Acts, most of these auxiliaries "retained their national character and were stationed not far from their homes."¹²³

Certainly auxiliary units, like legions, had centurions,¹²⁴ and such centurions were valued.¹²⁵ (Retired auxiliaries received citizenship rather than land grants.¹²⁶ But they would normally settle on land, in any case.) Some might count against this view Cornelius's Roman name. But as already noted, a Roman name need not make him a legionary; one could argue that he could have adopted this name when he received Roman citizenship on retirement, or when enlisting (without citizenship),¹²⁷ or for some special service, or because it was a hereditary grant in his family,¹²⁸ or perhaps because he was borrowed from the legion to oversee an auxiliary century. In any case, an auxiliary centurion was a better position than a regular legionary.

Even had the recruits belonged to legions (and hence would have been citizens), we should expect most of them to be non-Italian ethnically (aside from a possibly special case such as the "Italian cohort"). Whereas most soldiers in the western legions were Italian before the Flavian period, those in the Greek-speaking East were drawn largely from the eastern provinces; most soldiers in first-century legions in Egypt, for example, came from Asia Minor, Syria, or Egypt itself.¹²⁹ They held citizenship as freedmen or received it on enrollment.¹³⁰ Most auxiliaries, however, received citizenship only on their discharge (after twenty to twenty-five years of military service);¹³¹ on the different case of some centurions, see comment above.

Although Luke's audience may not know that most of the Roman auxiliaries in Caesarea were Syrian (Jos. *War* 2.268), Luke was undoubtedly aware of it from his involvement with them (cf. Acts 24:23) and hence had reason to emphasize that Cornelius belonged to the "Italian cohort" (though his name alone might suggest for Luke's narrative purposes, whether or not his rank would, the claim that he was a Roman citizen). This auxiliary force was probably originally recruited in Italy, though replacement soldiers, by now the majority, were presumably local.¹³² Other scholars have argued that both known "Italian cohorts" were, though auxiliary units, citizen cohorts and hence analogous to legionaries.¹³³ Wherever its individual soldiers were

121. Cf. Jeffers, *World*, 177; cf. also 206; Munck, *Acts*, 92; Witherington, *Acts*, 346 (following Millar, *Near East*, 44, 60).

122. Stevenson, "Army," 228.

123. *Ibid.*, 230 (see, e.g., Tac. *Ann.* 4.46; on auxiliaries in general, see 228–32).

124. Parker and Watson, "Centurio," 311 (though noting that the higher-ranking among them lacked special titles); Campbell, "Auxilia," 420; *idem*, "Centurio," 127.

125. Trajan grants the request of an auxiliary cavalry unit's centurion for his daughter's citizenship (Pliny *Ep.* 10.106–7).

126. Campbell, "Veterans."

127. Sometimes those enlisting as auxiliaries received Roman names (Jeffers, *World*, 203). The problem in this case is that "Cornelius" is a family name (Jeffers, personal correspondence, Dec. 19, 2005).

128. Suggested in Jeffers, personal correspondence, Dec. 19, 2005.

129. Stevenson, "Army," 226–27; Campbell, "Legion," 839.

130. Cf. Stevenson, "Army," 226; Jones, "Army," 191.

131. Stambaugh and Balch, *Environment*, 31; cf. *ILS* 1986; *CIL* 16.1. From the late first century, legionaries served twenty-five years (Campbell, "Legion," 839).

132. Jeffers, *World*, 206; cf. Haenchen, *Acts*, 346n1; Dunn, *Acts*, 135. Barrett, *Acts*, 499, is, however, right to say that we do not know what the connection with Italy was.

133. Levinskaya, "Cohort," 108 (noting that under Augustus their donative was that of legionaries; Tac. *Ann.* 1.8). She contends that they were Roman citizens, but with the appropriate qualification "at least when these were originally raised."

from, the cohort's title would hint at Luke's agenda.¹³⁴ Cornelius is not simply a "random" Gentile; he represents the heart of the empire, as centurions necessarily did (Luke 7:8).

Although Luke can present Roman armies as agents of judgment (Luke 21:20, 24)¹³⁵ and of injustice (23:11, 36),¹³⁶ he respects God-fearing (3:14; 7:9) or just (23:47; Acts 23:10–30; 27:1–43) individual soldiers. Soldiers and tax gatherers could do their jobs provided they did not abuse their positions (Luke 3:13–14; cf. 20:22–25). If Luke was a physician as tradition claims,¹³⁷ it might be noteworthy that each cohort probably included four physicians.¹³⁸ Luke himself would not have been a military doctor, even if stationed near Philippi (he could not freely travel with Paul during his twenty years of military service), but he may have encountered some appreciation for his profession during Paul's custody, when he presumably visited Paul regularly.

III. CENTURIONS (10:1)

It was common to name people by their occupations (e.g., Acts 9:43);¹³⁹ Luke names Cornelius as a centurion. As already noted, Luke does not seem to pass judgment on this profession,¹⁴⁰ though it is possible that receptive Roman soldiers appear in his narrative in a manner comparable to tax collectors, underlining the extensive reach of the gospel. Tribunes commanded cohorts, but they generally gained their office by their equestrian status and, like most other higher officers, lacked previous military experience.¹⁴¹

Centurions, however, offset the inexperience of higher officers; many or most had worked their way up through the ranks.¹⁴² It could take as many as twenty years for a common soldier to become a centurion.¹⁴³ (In this period, some equestrians also became centurions for the sake of the pay and retirement prospects;¹⁴⁴ a number were also former Praetorians. But these were not the majority, and most were probably quickly promoted.)¹⁴⁵ These formed, in a sense, the backbone of the Roman army, and they were the legion's "most important tactical officers."¹⁴⁶ Traditionally, the best

134. From the standpoint of Jews in the East, "Italians" could stand for Romans (*Sib. Or.* 3.353–55, 464, though these are pre-Christian).

135. Cf. Walaskay, *Came to Rome*, 45–48 (citing Luke 19:41–44; 21:20–24; 23:27–31).

136. Luke does, however, omit the Roman soldiers' abuse in Mark 15:16–20 (despite Luke 23:11, 36).

137. See the commentary introduction, Keener, *Acts*, 1:410–11, 414–16; on physicians, 416–22.

138. See in abundant detail Friedländer, *Life*, 1:169.

139. Stambaugh and Balch, *Environment*, 117.

140. Hedrick, "Samaritan," 133, even notes that soldiers in Luke 3:14 (and implicitly here) do not change their profession (though one wonders how they could have done so legally) and, by comparing the Good Samaritan parable, suggests that use of force may be ethically appropriate on behalf of the helpless (she asks [129] how the Samaritan could have helped had he arrived during the robbery). The need for just force to prevent genocide may indeed go beyond the situations envisioned or addressed in Jesus's nonresistance instructions. But while Hedrick makes a logical inference on the basis of the texts, Luke does not seem to directly *teach* this.

141. Stevenson, "Army," 226; Jones, "Army," 201. See further comment on Acts 21:31, although Lysias will prove to be an exception to the general practice (see comment on Acts 22:28).

142. E.g., Stevenson, "Army," 226; Jones, "Army," 203; Friedländer, *Life*, 1:194. The exceptions were those of higher birth (even some *equites*) who began as centurions but would be quickly promoted beyond this rank (Stevenson, "Army," 226; Campbell, *Army*, 46). But Campbell, *Army*, 47, notes centurions' "above-average education" and benefits that left them "little in common" with rank-and-file soldiers. (Regarding a degree of literacy for even some ordinary soldiers, at least in the West, see Evans, *World*, 69, on tablets from Vindolanda.)

143. Thompson, "Military," 993.

144. Parker and Watson, "Centurio," 311; Campbell, "Centurio," 127. Cf. Severus's later "equestrian"-like treatment of soldiers, including centurions (Hdn. 3.8.5).

145. Campbell, "Centurio," 127.

146. Ferguson, *Backgrounds*, 38; cf. Bruce, *Commentary*, 215. They normally knew the sympathies of the other soldiers (e.g., Tac. *Ann.* 2.76) and are often noted as key officers (e.g., 3.74; 4.3).

soldiers became centurions (Polyb. 6.24.1); they were chosen not for their eagerness to attack but for preferring death to retreat (6.24.9).¹⁴⁷ The position was honorable for one of low birth, who might protest being demoted from the rank of centurion to that of a common soldier (Dion. Hal. *Ant. rom.* 9.39.1). A centurion had assistants covering paperwork and other duties.¹⁴⁸

The first centurion of the six in each cohort outranked the others, who may have held relatively equal rank vis-à-vis each other apart from seniority.¹⁴⁹ The senior centurion in each legion was called the *primus pilus* or *primipilus* and his office the *primipilatus*; he could achieve this office in his sixtieth year, when many others were retiring, and could retire after a year as a wealthy equestrian.¹⁵⁰ The *primus pilus* commanded the first century in a legion's first cohort and functioned as the legate's chief advisor.¹⁵¹ The legate's advisory council of centurions was called the *primi ordines*, the members of which were the first cohort's centurions, possibly in addition to the senior centurions of the other cohorts.¹⁵² Since Judea lacked a legion, it would contain no centurion of this high rank.

A century held sixty to eighty men (no longer the hundred presumably enrolled in the earliest times);¹⁵³ this would have been true also for auxiliary units.¹⁵⁴ A century consisted of ten *contubernia*. Two centuries could be treated together as a maniple for billeting, but the maniple lacked tactical significance.¹⁵⁵

Despite its sacrifices, military service was a preferred occupation.¹⁵⁶ To join a Roman legion, one had to be a Roman citizen, normally nineteen to thirty-five years old (though sometimes as young as fourteen), and physically fit (strong and usually at least nearly five feet tall).¹⁵⁷ Roman military training was harsh and included twenty-mile-a-day marches carrying full supplies.¹⁵⁸ Such troops were not always friendly to local peoples;¹⁵⁹ some Romans complained that their armies were employed genocidally at times (presumably outside the empire's boundaries; Sen. Y. *Ep. Lucil.* 95.30). Soldiers sometimes exploited local residents¹⁶⁰—for example, by beating an old man (P.Graux 4, from 248 C.E.). But as noted above, they also provided frequent economic and domestic interchange with local communities.

147. Normally there were two trained as centurions per company in case one died (Polyb. 6.24.3–7); the second was what Roman sources called the *optio* (see Thompson, "Military," 993).

148. Thompson, "Military," 993.

149. Campbell, *Army*, 46. Old centurions might be assumed particularly loyal (cf. Tac. *Ann.* 2.55).

150. Friedländer, *Life*, 1:194; Jones, "Army," 202; Thompson, "Military," 993; Campbell, "Primipilus." For the "first" centurion's higher role than that of other centurions, see, e.g., Vell. Pat. 2.112.6.

151. Jones, "Army," 202; this was no small office, often producing intimate friendship with the superior (cf. Pliny *Ep.* 10.87.1) and mentioned alongside tribunes (Tac. *Ann.* 4.73). On experienced centurions advising higher officers more generally, Campbell, *Army*, 47. The *primus pilus* was also in charge of the legion's eagle (Campbell, *Army*, 47).

152. Including the other senior centurions, Stevenson, "Army," 226; excluding them, Parker and Watson, "Centurio," 311; presumably Campbell, *Army*, 46–47.

153. In Greek, cf. the similar diminution of the "hecatomb" (cf., e.g., Heliod. *Eth.* 3.1). For eighty by the late republic, see Campbell, "Centurio," 127; idem, "Centuria: Military."

154. Campbell, "Centuria: Military," 127.

155. Jones, "Army," 194. Thus we should not read it into the "two centurions" at Acts 23:23.

156. See Friedländer, *Life*, 1:191. For the Roman army during the imperial period, see sample sources in Shelton, *Romans*, 252–67; esp. Campbell, *Army*.

157. Jones, "Army," 205–6.

158. *Ibid.*, 206.

159. See Friedländer, *Life*, 1:192.

160. E.g., P.Hal. 1, lines 166–85 (pre-Roman); PSI 446; Polyb. 9.26; Appian *Bell. civ.* 5.3.18; Apul. *Metam.* 9.41; Hdn. 2.3.4; 2.5.1; Jos. *Life* 244. On the use of extortion, cf. Jeffers, *World*, 176; perhaps Luke 3:14 (cf. here Campbell, *Army*, 178, §295).

Luke seems to deliberately parallel this centurion with Q's centurion in Luke 7:2–10,¹⁶¹ possibly by adapting some details in each.¹⁶² The different locations indicate different centurions (7:1–2 at least implies Capernaum), but Luke is more interested in the parallel than in their identity. The centurion in Luke 7 functions as a “good Gentile,” an exception that opens the possibility for others to come (cf. 23:47); Cornelius in Acts functions the same way.

Luke 7	Acts 10
Supplicant is centurion (7:6)	Supplicant is centurion (10:22)
Has a slave (7:2)	Has a household of some sort (10:2, 24), including servants (10:7)
Pious regarding Jewish law (7:3–5)	Pious regarding Jewish law (10:2)
Centurion recognizes barrier between Jew and Gentile (7:6–7)	Peter recognizes barrier between Jew and Gentile (10:28)
Man of God willing to come to him (7:6)	Man of God willing to come to him (10:23, 29, 33)
Messengers, intermediaries praise centurion (7:3, 6)	Messengers praise centurion (10:22)
Miracle of healing sought and granted (7:7, 10)	Salvation sought (11:14); outpouring of Spirit granted (10:44)

Historically, the Gospel's centurion in Capernaum may have been part of Antipas's local army; Antipas used Roman terminology for his soldiers.¹⁶³ Luke certainly understands and portrays him, however, as a Gentile (Luke 7:5, 9), as does Matthew (Matt 8:10–12), our other extant source.¹⁶⁴ This picture would not surprise most readers in the eastern Mediterranean world, where retired soldiers could live (see comments above) and civilians sometimes encountered individual soldiers not on duty. On a local level, a centurion could exercise high authority,¹⁶⁵ especially if he was the highest-ranking representative of Rome whom most villagers or townspeople regularly encountered. Locals would sometimes encounter individual soldiers in areas that held Roman troops (cf. P.Graux 4; the poor man's encounter with a legionary in Apul. *Metam.* 9.39). When they were at peace, soldiers could be engaged in “guard duty, patrols, foraging expeditions, . . . and manning outposts.”¹⁶⁶ And again, we could be dealing with a retired centurion. A Roman bathhouse not far from the remains of Capernaum's first-century synagogue might suggest a Roman resident who lived in or near the Jewish town,¹⁶⁷ and there were probably others.

161. The basic parallel is noted by others, e.g., Watson, *Gentiles*, 62–63 (adding historical skepticism, but if anything, Luke could have augmented Q to match Cornelius here); Bruce, *Commentary*, 215; Munck, *Acts*, 93. Luke might characterize the encounter between Peter and Cornelius as the outworking of what Jesus had done during his ministry (Wilk, “Apg 10,1–11,18,” 616).

162. We should note, however, that Luke does not exploit the opportunity to parallel every point (indeed, Acts 10:1–48 is not a healing story at all), which suggests historical limits to his adaptation. Further, rather than Luke adding intermediaries in Luke 7:3, 6 to parallel messengers in Acts 10:5–8, 22 (where the messengers are not really intermediaries though they similarly praise the centurion's piety), Matthew may omit them, as he does Mark's messengers in Matt 9:18 (cf. Mark 5:35; Keener, *Matthew*, 302; Marshall, “Historical Criticism,” 131).

163. Jeffers, *World*, 178. On the use of Greek and Roman terminology for Jewish units, see, e.g., Jos. *Life* 242; Keener, *John*, 1078–79; Catchpole, *Trial*, 149; Blinzler, *Trial*, 64–65.

164. With many, I attribute their common source here to Q which I deem (based on arguments offered elsewhere) pre-Markan.

165. E.g., *Sipre Deut.* 309.1.1. Cf. *CIJ* 2:132, §920 (a centurion of a locale in Egypt, though this is fourth century); also appeals to centurions for justice in some Egyptian papyri (which eventually created problems; see P.Oxy. 1101, 367–70 C.E.). For centurions functioning as local judges, Campbell, *Army*, 171–75, cites *ILS* 5950 (from 37–41 C.E.); P.Oxy. 2234 (from 31 C.E.); P.Ryl. 2.141 (from 37 C.E.); P.Mich. 175.

166. Thompson, “Military,” 995.

167. Riesner, “Synagogues in Jerusalem,” 203–4.

IV. CORNELIUS'S HOUSEHOLD (10:2)

Luke emphasizes households, including households as a basis for reaching communities (Luke 10:5; Acts 16:15; cf. 2:46; 5:42)¹⁶⁸ and households coming to faith (Acts 16:15, 31–34; 18:8; cf. Luke 19:9).¹⁶⁹ Luke also emphasizes Jesus's staying in homes more than do the other evangelists.¹⁷⁰ Households were apparently often converted along with the *paterfamilias* in early Christianity (cf. Rom 16:10, 11; 1 Cor 1:16; 16:15–16; 2 Tim 4:19), though some members of Christian households were not (Phlm 10; for the probably common reverse situation, cf. 1 Pet 3:1).¹⁷¹

Luke's emphasis on households, however, invites us to consider what he might mean here by a "household." A Roman definition of *familia*, in the narrowest sense, included all members directly under the father's *potestas*, or power (wife, children, sons' children); more broadly, all relatives through male blood (e.g., brothers' children); and, most broadly, slaves.¹⁷² Typically Romans lived only in nuclear households, however, not with extended families.¹⁷³

(1) Infant Baptism?

Who is included in Cornelius's "household" here? The later Christian theological question of infant baptism has raised the question of whether young children were present at household baptisms in Acts.¹⁷⁴ Young children were apparently initiated into the cult of Dionysus (e.g., Pseudo-Theocritus *Bacchanals*), but this was not true for other Mysteries.¹⁷⁵ Whereas the Eleusinian Mysteries initiated foreigners, women, and slaves, children were initiated only very rarely.¹⁷⁶ Ultimately the question is a moot one for Luke himself, since young children are not in his purview in Acts.¹⁷⁷ In his second volume (in contrast to the Gospel), he mentions few children; the probably somewhat older children are engaged in what were usually judged more adult activities (Acts 2:17; 16:16–18; 21:9).¹⁷⁸ Against Pelikan's own ecclesial tradition (though it does not rest its case on NT support), Pelikan notes Luke's silence on children's baptism even when Luke summarizes "men and women" baptized in Samaria (8:12), though he mentions "wives and children" in a nonbaptismal setting (21:5).¹⁷⁹

Apart from Jeremias, the vast majority of scholars have concluded that the household conversion passages are not clear enough to address infant baptism,¹⁸⁰ but the question of who might be present at the baptisms remains a legitimate (if ultimately largely insoluble) one historically. Barrett argues that since the household members

168. See further Matson, *Conversion Narratives*, 40–44.

169. All four of the "household" conversions in Acts occur in economically established homes that "could be expected to have included slaves and servants" (Malherbe, *Social Aspects*, 73).

170. See Matson, *Conversion Narratives*, 53–83, persuasively.

171. See Meeks, *Urban Christians*, 75–76; on 1 Pet 3, see Balch, *Wives*, passim.

172. Garnsey and Saller, *Empire*, 127 (citing Ulp. Dig. 50.16.195).

173. Garnsey and Saller, *Empire*, 129 (citing evidence for all social classes, though their evidence for the well-to-do is probably stronger). Even most slaves (at least those attested in inscriptions) lived in nuclear families (Martin, "Slave Families," 208), but extended families do appear (208–13).

174. Some opine cautiously that they may have been (e.g., Hanson, *Acts*, 127, noting Acts 11:14).

175. Ferguson, *Backgrounds*, 209.

176. Klauck, *Context*, 99.

177. The issue arose from practical questions of high infant mortality and uncertainty about the fate of the unbaptized (see Rawson, "Death," 295, also noting second- and third-century funerary monuments showing children in a happy afterlife).

178. Robbins, "Location," 316.

179. Pelikan, *Acts*, 241, also noting that faith often explicitly precedes baptism in Acts.

180. See the summary in Fee, *Corinthians*, 62n72; earlier, e.g., Abbott, *Acts*, 178; recently, see, e.g., Twelftree, *People*, 100. Somewhat differently from the usual division of views, Caird, *Language*, 81, argues for baptism only of converts, albeit with their households; yet he denies that children in already-converted households needed baptism.

“share Cornelius’s attitude to religion” (cf. 10:2, where his household also fears God), they must be “of an age to do so consciously.”¹⁸¹ This is a reasonable surmise if children are present, though it is difficult to know if they would have been. One argument that leads nowhere is based on an attempted distinction between two Greek words generally rendered “house.” Thus A. Strobel argued that whereas οἰκία can include slaves, οἶκος (the term here) applied to family members with legal rights (i.e., not minors or slaves).¹⁸² Scholars have shown, however, that this claim does not hold in Greek literature;¹⁸³ most important, Acts always employs οἰκία for buildings.¹⁸⁴

Where families were present, they normally shared the religion of the head of the household; this was expected of wives (Plut. *Bride* 19, *Mor.* 140D), and so the many women who flirted with other religions often contributed to household tension (Juv. *Sat.* 6.489, 511–29, 542–47).¹⁸⁵ But whether Cornelius, as a Roman centurion, would have even had a wife, much less children, is open to at least some debate unless he was retired.¹⁸⁶ Conversely, it is not impossible that Cornelius had taken a local woman as a concubine.

(2) *Soldiers, Marriage, and Concubinage*

Roman law from Augustus onward prohibited soldiers from marrying, and Roman camps lacked domiciles for wives; any children born to their unions with local concubines were thus counted illegitimate and not Roman citizens.¹⁸⁷ It is even possible that any marriage that did exist at enlistment was dissolved.¹⁸⁸ The military did not need to take local attachments into account when transferring troops, although this transfer became less common in later times.¹⁸⁹ By such arrangements, soldiers were supposed to bond most closely with their fellow soldiers instead of risking loyalties outside the military.

The duration of soldiers’ service makes it clear how difficult this inability to legally marry would have been. In this period soldiers normally served a minimum of twenty years, often from about age seventeen to thirty-seven; the period was extended to twenty-five years under Hadrian.¹⁹⁰ Centurions sometimes chose to stay longer, as career soldiers (one had been in the army more than thirty-six years in Caesar *Afr. W.*

181. Barrett, *Acts*, 501.

182. Strobel, “Houses” (cited in Theissen, *Setting*, 114n37).

183. Theissen, *Setting*, 83–87; Verner, *Household*, 8–9 (contrasting Latin); Fee, *Corinthians*, 62n72.

184. Barrett, *Acts*, 501; see Acts 4:34; 9:11, 17; 10:6, 17; 11:11; 12:12; 17:5; 18:7; with the only questionable use οἰκία for a building (Winter, *Left Corinth*, 208–9, though many of his distinctions [206–11] are oversubtle).

185. Witherington, *Corinthians*, 102, cites this usual (though not inflexible) pattern to support the possibility of infants and children being baptized. The role of a male head of household in family religion also appears in many traditional societies (Mbiti, *Religions*, 84).

186. A local Jewish wife would help explain his God-fearer status. A Jewish woman might seem less likely to be a concubine (see discussion on concubines below), but insofar as concubinage was viewed by locals as a marriage with economic but no Roman legal benefits (and non-Roman locals were not under Roman law anyway), this remains possible.

187. Stevenson, “Army,” 227–28; Gardner, *Women*, 58; O’Rourke, “Law,” 181–82; Campbell, *Army*, 151; for popular knowledge that marriage was not for soldiers, see, e.g., Quint. *Decl.* 306.17. More than four thousand offspring of Roman soldiers with Spanish concubines in 171 B.C.E. were counted illegitimate (Livy 43.3.2). Thus even a high officer, at least in the more rigid past, might count it below his dignity to take for himself a female captive (Plut. *S. Rom.*, Scipio the Elder 2, *Mor.* 196B).

188. Jones, *Empire*, 155–56.

189. Campbell, *Army*, 152.

190. Friedländer, *Life*, 1:192; Stevenson, “Army,” 227 (though noting that some complained they had been kept thirty to forty years under Tiberius). In earlier times, only sixteen years were demanded (Polyb. 6.19.2) except in times of special danger (6.19.4); the early first-century figure was sixteen years plus four years “as reservists” (Thompson, “Military,” 993–94; cf. gratuities in 6 C.E. for those with at least twenty years’ service in *Res Gestae* 3.17). Mortality was high, probably most often from natural causes (on the latter, cf. Hope, “Trophies”); but it seems that the majority did survive (see *Res Gestae* 1.3 with the LCL note).

45). Because centurions were “often transferred from one legion to another,”¹⁹¹ forming long-term local relationships might be particularly difficult for them.

Nevertheless, the official policy was rarely enforced. Soldiers formed marital unions with provincials, which the women often found economically suitable.¹⁹² Such unions could include “dowries from their wives’ parents.”¹⁹³ Many soldiers probably considered themselves married, regardless of official rules, especially as legions became increasingly stationary in later times.¹⁹⁴ *Tariff* lists reveal that the authorities knew that soldiers and sailors had attachments to local women.¹⁹⁵ Concubinage was unofficially permitted, and even the general Vespasian had a concubine (Suet. *Vesp.* 3).¹⁹⁶ Legionaries in Cologne married locals (Tac. *Hist.* 4.65).¹⁹⁷ These unions lacked some securities that legal Roman marriage would have protected.¹⁹⁸ Once a soldier was discharged, however, his children were sometimes or perhaps even often retroactively legitimated as a reward to the soldier provided he sought it for the children of no more than one concubine.¹⁹⁹ Claudius made the same grant to soldiers who had served twenty-five years or more.²⁰⁰

Roman law later noted that emperors typically allowed veterans to legally marry foreigners, counting (subsequent) offspring as Romans (Gaius *Inst.* 1.57). But what of offspring born during one’s term of service in the provinces? Even in earlier times, generals sometimes pardoned soldiers who stole away from camp nocturnally because of romance (Plut. *S. Rom.*, Fabius Maximus 4, *Mor.* 195EF). In the late second century, Severus granted soldiers “the right to live at home with their wives,” legally ratifying a widespread existing situation but further weakening traditional military discipline (Hdn. 3.8.5 [LCL, 1:309]).

Roman law did recognize concubinage, but the loss of rank incurred by the woman generally led men to seek concubines of lower rank.²⁰¹ Concubinage as a substitute for marriage was common in the early empire²⁰² and perhaps especially dominant among slaves and freedpersons.²⁰³

A man could legally hold only one concubine, however, and not concurrently with a wife.²⁰⁴ (This rule involves only Roman law, however; some other cultures

191. Jones, “Army,” 203. So also Stevenson, “Army,” 226 (but noting exceptions).

192. That soldiers had prostitutes and other women was public knowledge (see, e.g., Höcker, “Prostitution,” 60), requiring toll fees at customs stations (*IGRR* 1.1183 in Sherck, *Empire*, §106B, p. 149).

193. Jones, *Empire*, 156 (the form often being “interest-free loans”).

194. Campbell, *Army*, 152, noting military families “in nearby *canabae* or other settlements.” This would presumably already be true in places such as Caesarea, where Josephus indicates the soldiers’ local attachments.

195. Lewis, *Life*, 141 (*OGIS* 674 = *IGRR* 1.1183, from 90 C.E.).

196. Schieman, “Concubinatus,” 682. An officer praises Tiberius’s moderation in usually pretending not to see infractions (Vell. Paterc. 2.114.3).

197. Epitaphs from Roman Algeria indicate that although soldiers (and other romanized men) nearly always married romanized local women in some areas, intermarriage with nonromanized women was higher in other areas (13.2 percent in the sample; Cherry, “Marriage”).

198. In the second century C.E., soldiers could bequeath property but only to those of their own nation (*BGU* 5.34), and their children could inherit if they died intestate only if of the same nation (*BGU* 5.35). Cf. Thompson, “Military,” 994.

199. See *BGU* 140.10–33; *ILS* 1986; *CIL* 16.1, 42; *FIRA* 1.78; Sherck, *Empire*, §111, p. 154; Gardner, *Women*, 143; O’Rourke, “Law,” 182. An auxiliary in 131 C.E. is happy with his daughter’s birth (*BGU* 1690), and Rome might grant an auxiliary centurion’s request for his daughter’s citizenship (Pliny *Ep.* 10.107).

200. See Llewelyn, *Documents*, 6:148, §19.

201. Buckland, *Roman Law*, 128.

202. Gardner, *Women*, 57.

203. *Ibid.*, 58 (also noting that the men were more often the partners with higher status).

204. Buckland, *Roman Law*, 128. Concubinage was prohibited during marriage (Paulus *Sent.* 2, in Lefkowitz and Fant, *Life*, 193, §196; cf. Gardner, *Women*, 56–57); a married man’s concubine was considered dishonorable, at least traditionally (Aul. Gel. 4.3.3).

allowed different practices.)²⁰⁵ In these circumstances, the children were related to the mother but not legally related to the father, though he could bequeath to them property provided that it did not infringe on the rights of legitimate heirs.²⁰⁶ The offspring's lack of claim on an estate sometimes made concubinage preferable to a second marriage for a man with heirs.²⁰⁷

Auxiliaries like Cornelius, many of whom served near their homes (see discussion above), may not have faced the same restrictions as legionaries. "Senior officers and *auxilia*" could live with their wives before the time of Severus.²⁰⁸ Those who were not Roman citizens did not have legal marriages regulated by Roman law anyway and hence might have less immediate concern with regulations about their children's "legitimacy" (though the children born after they acquired citizenship on retirement would have higher status and be able to inherit by Roman law).²⁰⁹ As suggested above, however, Cornelius may be a Roman citizen at this point (Luke certainly views him this way). If, as some scholars have suggested (see above), Cornelius was retired, regulations against having a family would not affect him, regardless of his auxiliary or citizen status. Given the official rules, however, it may have seemed discreet for Luke the apologetic historian to remain vague about Cornelius's household even if (and this is uncertain) he knew more details; an earlier source might also be discreet or uninformed.

(3) *Servants*

Slaves were also considered a part of the household²¹⁰ and hence could be in view here (cf. two οἰκέται, household servants, in Acts 10:7; cf. Luke 7:2). These were probably not among his "relatives" in Acts 10:24, but since he called the latter together, they seem not to have been staying with him (again suggesting that he was retired or else came from local stock, even if as a citizen, unless they were in-laws).²¹¹ (For much more extensive background on slavery, see the lengthy excursus at Acts 12:13.) Could a Roman soldier have afforded many slaves? Most could not. "The highest paid of the rank and file Roman soldiers . . . would have had to spend nearly one third of a year's salary to buy even the cheapest slave."²¹² A common soldier under Augustus received 225 denarii a year (Tac. *Ann.* 1.17; 300 denarii under Domitian at the end of the century, Suet. *Dom.* 7.3),²¹³ which had to pay for their own clothing,

205. Royal houses of the East, especially Persian (Athen. *Deipn.* 13.556b–557e) but occasionally Judean (Jos. *Ant.* 13.380; *War* 1.97; cf. 1.511; Jeremias, *Jerusalem*, 90; but these were not positive examples), were known to have multiple concubines. Multiple concubines appear to be presupposed in Ps.-Phoc. 181; the rabbis refer to concubinage, but in biblical times (Safrai, "Home," 748).

206. Buckland, *Roman Law*, 129. Eventually sons in such unions, by entering the military, could receive "rights of succession" (129).

207. Harrell, *Divorce*, 30–31.

208. Whittaker in *Herodian*, LCL, 1:309n5.

209. On status in mixed unions, see comment on Acts 16:1–3; briefly, Keener, *Marries Another*, 59–60.

210. E.g., Pliny *Ep.* 9.36.4; Barrow, *Slavery*, 22–64; Judge, *Pattern*, 31; Verner, *Household*, 30, 33; Falk, "Law," 509.

211. Luke seems to prefer the term for distant relatives (Luke 1:58; 2:44; 14:12; 21:16; cf. Rom 9:3; 16:7, 11, 21; 2 Macc 5:6); it is doubtful that he would use a term with this root for freedpersons.

212. Verner, *Household*, 61. This appears to have been a dramatic increase over the much lower prices during early Roman expansion reported in Grant, "Economic Background," 104.

213. For inflation, see Lewis, *Life*, 208, where the daily pay of a legionary rose from 2.5–3.3 drachmas in the first century to 4.2–5.5 in the second and 8.3 in the third (comparable wages for harvesters rose from .3–.5 to .8–2.0 in the second and 2.0–2.3 in the third), not at all comparable to the inflation of costs: a male slave cost an average of 1,200 drachmas in the second (Lewis lacks data for the first) and 1,960 in the third (female slaves, 950 in the first, 1,200 in the second, and 3,000 in the third). Cf. the earlier figures in Polybius's time: two obols daily for an infantry soldier, four for a centurion, and a drachma for a cavalryman (Polyb. 6.39.12); cavalry might receive more than centurions, who received only double infantry's wages in that period (Livy

weapons, and food, though the highest-paid soldier earned nearly three times this (675 under Augustus; 900 under Domitian).

Most centurions, on the other hand, earned 3,750 denarii a year (i.e., sixteen to seventeen times the common soldier's pay; 5,000 denarii under Domitian); the highest-ranked centurions earned 7,500 a year (10,000 under Domitian); and the *primus pilus* would earn 15,000 during his year of service (20,000 under Domitian).²¹⁴ Thus, according to another estimate, the base pay of centurions was fifteen or more times the salary of the average legionary.²¹⁵ By average living standards in the empire, Cornelius, like the African official (Acts 8:27) and some others in Luke's account, was of high status, analogous to Theophilus.²¹⁶ If an inscription is correctly reconstructed, we read of an early first-century C.E. centurion in active duty with freedmen (*CIL* 13.8648; *ILS* 2244).

Pay for auxiliaries was even lower: some estimate 200 denarii a year "for elite troops, 150 for cavalry, 100 for infantry,"²¹⁷ or roughly five-sixths a legionary's pay.²¹⁸ (Auxiliary horsemen did better.)²¹⁹ Still, fifteen times the base pay would be more than 1,000 denarii annually, probably more than six times the sort of wages an Egyptian peasant could earn even during harvest (by far the most lucrative time of year). If Cornelius was a Roman lent from the legion to supervise some local soldiers (as some think), his pay could have been higher. Sometimes wages were delayed, which generated unrest,²²⁰ as Luke must have known (Luke 3:14). Particularly foolish leaders also might deprive retiring centurions of rank or lower their retirement payment to save money (Suet. *Calig.* 44.1), but these were all exceptional situations. Rome normally preferred to keep all its soldiers content.

Slaves generally ranged in price from around 750 sesterces (187.5 denarii) to as high as 700,000 sesterces (175,000 denarii), with 2,000 as a general standard.²²¹ Whatever the relative wages of soldiers and the price of slaves, some recruits held slaves, at least in periods and places of lax discipline. Thus one earlier general improved military discipline by requiring soldiers to carry their own supplies, without using slaves or pack animals (Val. Max. 2.7.2). Many servants accompanied Roman armies (e.g., Vell. Paterc. 2.82.3, though not specifying private owners),

40.43.7). Cf. legionary pay records from 81 C.E. in Sherk, *Empire*, §94, pp. 135–36; development of costs in Le Bohec, "Soldiers' Pay."

214. Jones, "Army," 208; Jeffers, *World*, 176. Cf. Dobson, "Centurion or Officer?" (cited by Jeffers); Ferguson, *Backgrounds*, 39. For estimated daily rations, see Garnsey and Saller, *Empire*, 88–95. (Soldiers also received on rare, special occasions an additional bonus, a *donativum* [Campbell, "Donativum"; Weiss, "Donativum"]; but this could not be predicted.)

215. Jones, "Army," 202–3 (the *pilus primus* more than sixty times higher), also noting that centurions sometimes gained more wealth by bribery and corruption; Campbell, "Centurio," 127. The base wages were five times higher than a praetorian soldier's, and ten times higher if the centurion belonged to the first cohort (Parker and Watson, "Centurio," 311).

216. Noted by Witherington, *Acts*, 71; Hengel, "Geography of Palestine," 62.

217. MacMullen, *Social Relations*, 94 (admitting that the estimates are conjectural), followed by Jeffers, *World*, 176. Stambaugh, *City*, 356n41, gives the range of 100–200 denarii per year for auxiliaries.

218. Campbell, "Auxilia," 225 (750 sesterces a year under Augustus); cf. more generally Jones, "Army," 196.

219. Receiving 300 *sestertii* in 38 C.E. (Speidel, "Pay Scales"; a *sestertius* [sesterce] is about a quarter denarius).

220. Cf. Xen. *Anab.* 7.6.11–22; 7.7.48; Polyb. 5.50.1; 11.25.8–10; Diod. Sic. 27.4.3; 33.22.1; Suet. *Aug.* 17.3; Jos. *Life* 78, 244. Soldiers also had access to plunder during war (Xen. *Anab.* 5.3.4; 6.6.37; *Cyr.* 7.3.1; Polyb. 9.26; Dion. Hal. *Ant. rom.* 8.57.1; Livy 40.43.7; 41.11.8; 45.35.6; Val. Max. 4.3.10; Appian *Hist. rom.* 7.1.2; Plut. *Cam.* 7.4–5; *Coriol.* 10.2; Arrian *Alex.* 7.5.4; Tac. *Hist.* 4.60; Suet. *Jul.* 26.3; 38.1; Philost. *Hrk.* 31.4; 48.5; cf. Appian *Hist. rom.* 6.10.60) and might even wish to preempt a surrender (Tac. *Hist.* 3.19; cf. 3.60) or conquer friendly peoples (Suet. *Jul.* 54.1–2) for this reason. But Cornelius is at peace (when such plundering was negatively viewed, e.g., Caesar *C.W.* 3.31). For a sample pay order for (earlier) soldiers' wages, see *BGU* 1749.

221. Stambaugh, *City*, 154.

though aristocrats apparently did not take their household servants to the battle-front (Vell. Paterc. 2.114.2). The Gospel's centurion also has a servant (Luke 7:3).²²² The narrative of Acts suggests that Cornelius has more than two servants (Acts 10:7; see comment there), whatever their status, but we cannot say to what extent his "household" includes more than these. Soldiers also could keep in contact with relatives during their years of service and, at least conceivably, settle together when they retired.²²³ But again, we cannot do more than speculate on whom Cornelius's household contained.

V. GOD-FEARERS (10:2)

As he did with the African official (8:26–40), Luke focuses here on a particularly virtuous Gentile "in order to choke at source every conceivable objection to the Gentile mission."²²⁴ In both cases, he makes fairly clear that the convert in view was a devout sympathizer but not a full (circumcised) convert. That Luke omits use of "proselyte" here (in contrast to 2:10; 6:5) is significant;²²⁵ Cornelius is another example of the sort of convert introduced in 8:27, though it is toward the people Cornelius represents (more than is the case with the African official) that the narrative of Acts will point (28:14–31).

(1) During Worship

That both Cornelius (10:2–3) and Peter (10:9) experienced their revelations during prayer fits the emphasis on prayer in Luke-Acts. More important, this spiritual setting specifically emphasizes that the revelations are truly divine, since the God of Israel would not have allowed those seeking him to be led astray. That Cornelius gave alms may recall most recently Tabitha (9:36; on the term, see comment there) but also the entire theme on economic sharing in Luke-Acts (e.g., Luke 3:11; 12:33; 14:33; 18:22; Acts 4:32–35; 6:1–3; 11:29–30; see comment on Acts 2:44–45; 3:2). That God takes note of such offerings (Acts 10:4) also fits the previous teaching of the work (Luke 11:41; 21:3; cf. perhaps 1:6, 10–13).

The designation "continually" may allude to language such as that of the incense offering in Exod 30:8,²²⁶ the lamp in the tabernacle (Lev 6:13; 24:2–4), or other analogous ritual acts of devotion (e.g., Lev 6:20).²²⁷ Some such allusions also appear in prayer as a "memorial" in Acts 10:4 (see comment below). The LXX consistently employs the Greek expression used here (διὰ παντός) to translate *tamid*, which appears in a large number of cultic passages.²²⁸ It may indicate, by analogy, observance of the regular hours of prayer,²²⁹ of which the ninth hour (10:3, 30) was one.

222. Matthew's wording is more ambiguous, but Luke does not adjust the term to fit Acts 10 here, since his term for "servant" here is a different one.

223. See Lewis, *Life*, 22, for a letter from one soldier about to retire to a brother already discharged.

224. Klauck, *Magic*, 32.

225. Cf. Spencer, *Acts*, 110.

226. C. Williams, *Acts*, 134–35.

227. Rituals repeated frequently and regularly could be called continual and unceasing even though they did not occur every moment (e.g., Plut. *S. Sp.*, *Lycurgus* 22, *Mor.* 228D). Jewish references to continually praying (e.g., *Let. Aris.* 196; 1 Thess 5:17) probably similarly do not mean continuously without rest; rabbis counted attempts to pray nonstop throughout the day impractical (*t. Ber.* 3:6).

228. For a sample (most from Johnson, *Acts*, 182), see Exod 25:29–30; 27:20; 28:30, 38; Lev 24:2, 8; Num 4:7; 28:10; 2 Sam 9:7, 10; 1 Chr 16:37, 40; 2 Chr 9:7; Pss 15:8 (16:8 ET); 24:15 (15:15); 33:2 (34:1); 34:27 (35:27); 37:18 (38:18); 39:12 (40:11); 50:5 (50:8). Its usage is not, of course, exclusively cultic (cf. Acts 2:25; 24:16) and can apply to other forms of worship (Luke 24:53; Heb 13:15; cf. 9:6).

229. So Jeremias, *Theology*, 188. Le Cornu, *Acts*, 552, compares regular prayers (citing *m. Ber.* 1:1–2; 4:1; 6:1–4; 8:1, 5) but wonders how much a God-fearer would have known or practiced.

(2) A Class of “God-Fearers”?

Scholars long spoke of a class of Gentile sympathizers, not yet full proselytes, called “worshippers” of God, drawing in part on Luke’s portrait in the book of Acts.²³⁰ In the 1980s some scholars, most notably A. T. Kraabel, doubted Luke’s picture of a class of uncircumcised Gentile sympathizers and denied that they were ever called “God-fearers,” arguing that Luke merely creates this class for his literary agenda.²³¹ Although it has long been recognized that Luke has a literary agenda in using the God-fearers to transition to Gentile Christianity,²³² such a literary strategy does not necessarily deny that he could reflect earlier Christian missions strategy (which could be his source). Further, since Luke fails to explain the God-fearers, how would his audience know what they were intended to represent if they corresponded to nothing in their world? Greco-Roman historians may not have always achieved historical precision, but at the very least they certainly strove for historical verisimilitude.

Perhaps the expression used for “fearing God” or “God-fearer” is not a technical one in this period; certainly, at the least, it has a variety of other uses (including sometimes in Luke-Acts; Acts 13:16; Luke 18:2, 4; 23:40).²³³ In addition to “one who fears God” (φοβούμενος τὸν θεὸν; cf. Acts 10:22; 13:16, 26), Luke uses other language for those who fear God, employing two essentially synonymous expressions: “reverent” (σεβόμενος; cf. 13:43; 17:4, 17) and “devout” (εὐσεβής and cognates; cf. 10:7).²³⁴ What could he mean by such expressions? Expressions about “fearing” God (using various verbs) certainly were not limited to Gentile sympathizers. Jewish people treated fearing God as an essential virtue,²³⁵ often praising a person who was θεοσεβής,²³⁶ including in funerary inscriptions.²³⁷ Jewish people usually spoke of all the righteous or wise fearing the Lord (e.g., Sir 2:15; Pss. Sol. 2:33; 12:4; 15:13)²³⁸ and of “sinners” not doing so (e.g., 1 En. 101:9). Like Greeks,²³⁹ they valued the virtue of piety toward the divine.²⁴⁰ They could use such expressions to describe the entire Jewish people (e.g., εὐσεβέων, Sib. Or. 3.573, probably second century B.C.E.)²⁴¹ or the particularly pious (Jos. Asen. 4:7/9; cf. 4 Macc 9:7); Qumran texts apply the expression to members of the community.²⁴²

230. Nock, *Christianity*, 2.

231. See Kraabel, “Disappearance”; idem, “Lutherans in Acts”; MacLennan and Kraabel, “Invention”; recently, cf. White, *Origins of Architecture*, 1:89, 183n102.

232. Schweizer, “Concerning Speeches,” 214; cf. Gager, “Gentiles and Synagogues.”

233. Lake, “Proselytes,” 85–87; Barrett, *Acts*, 500; Witherington, *Acts*, 341–44.

234. Philo regarded εὐσεβεία as the foundational virtue (Sterling, “Queen of Virtues”). Although εὐλαβής and its cognates carry a similar semantic range, Luke always applies εὐλαβής to Jews (Acts 2:5; 8:2; 22:12; Luke 2:25).

235. E.g., Sir 1:11–30; 25:10–11; 34:13–15 (34:14–16 NRSV; 31:13–15 in another version); Tob 4:21; 4 Macc 15:8; *Let. Aris.* 95, 159, 189; *Test. Jos.* 10:6; *Test. Benj.* 3:4; *Syr. Men. Epit.* 2, 9; *y. B. Meši’a* 2:5, §2; cf. commands to fear God in *Test. Levi* 13:1; *Test. Jos.* 11:1; *Sent. Syr. Men.* 9; *m. ’Ab.* 1:3. It is equivalent to loving God in Sir 34:16 (31:16).

236. Such as Abraham (*Test. Ab.* 4:6 A).

237. E.g., *CIJ* 1:365, §500.

238. Also, e.g., *1 Clem.* 21.7; 45.6; *Herm.* 26.2; 37.1, 5; 45.4; 77.2.

239. E.g., *Pyth. Sent.* 11 (in Malherbe, *Moral Exhortation*, 111); εὐσεβεία in Men. Rhet. 1.3, 361.17–19; 2.1–2, 368.17–20; Burkert, *Religion*, 272–74. Stoics classified εὐσεβεία as a form of justice (Arius Did. *Epit.* 2.7.5b.2, pp. 14–15.18–19) and defined it (2.7.5b.2, pp. 16–17.13) as proper knowledge of how to serve the gods.

240. E.g., εὐσεβεία in *Test. Iss.* 7:6/5; *Let. Aris.* 2, 131, 179, 210, 229; 2 Pet 1:3–7. It describes Ptolemy in *Let. Aris.* 42, 261. In Jewish names, see, e.g., *CIJ* 1:79, §113; 1:80, §114; 1:260, §§330–31; 1:261, §332.

241. Cf. *CIJ* 2:14, §748 (from Miletus); but Baker, “Theatre,” suggests that “God-fearers” here refers to the cult of Theos Hypsistos (Jews being related to, but not identical with, them).

242. Romaniuk, “Crainte” (though De Vries, “Fear of God,” challenges his view on the source of Qumran’s fear of punishment); cf. Driver, *Scrolls*, 520.

Although such expressions were not limited to Gentile sympathizers, they were appropriate enough to them.²⁴³ Such expressions at times also could apply to proselytes (τοὺς σεβουμένους, *Test. Jos.* 4:6) and Gentile sympathizers who respected Jews (θεοσεβής, *Jos. Ant.* 20.195; cf. 14.110),²⁴⁴ though not exclusively or technically so. Although such expressions thus could apply to pious Jews as well as Gentiles (even in Acts 13:16),²⁴⁵ it is not accurate to claim that they never apply to Gentiles.

Even if the particular expression did not apply (which is debatable, as we will see below), the existence of Gentile sympathizers (with varying degrees of commitment) who were not full converts or adherents to Jewish ways of life is difficult to dispute.²⁴⁶ Many Jews (e.g., *Jos. Ant.* 20.41) apparently welcomed many “natural law” proselytes without articulating a name for them.²⁴⁷ Gentiles also recognized a category of Jewish sympathizers who had not yet undergone proselyte baptism (Epict. *Diatr.* 2.9.20) and that such “Sabbath-fearers” often formed a bridge of toleration that led their children into full conversion (*Juv. Sat.* 5.14.96–106).²⁴⁸ Luke could have taken the phrase from the LXX to describe a category of people that did exist without the title having been widespread.²⁴⁹ But eventually even the term may have become a semitechnical one, and its occasional usage both in later rabbis and in Acts, which cannot depend on later rabbis, may be more than coincidental.²⁵⁰

In the final analysis, even Kraabel's argument against the terminology has proved unconvincing.²⁵¹ As G. H. R. Horsley points out, Kraabel argues from silence: “The absence of reference in the inscriptions from six major Diaspora synagogues, only one of them of the first century, scarcely justifies a denial. ‘Sympathisers’ were presumably not [after all] accorded any status in Judaism.”²⁵² Subsequent archaeological discoveries have challenged Kraabel's argument most fully; as numerous scholars have emphasized, the Aphrodisias²⁵³ inscription notes more than fifty donors, apparently

243. Clements, “Background,” 209–16, suggests that the emphasis on fearing God in OT wisdom texts (209–12) and wisdom texts' universalism (212–16) already set the stage for this development.

244. On *Jos. Ant.* 20.195, see, e.g., Lifshitz, “Sympathisants”; cf. further Das, *Debate*, 77–79. Feldman in *Josephus*, LCL, 10:104–5 n. d, doubts that this Josephus passage employs the term “technically,” and is likely correct in this assessment. Though Josephus attests nonproselyte sympathizers, his definitions of such categories are not consistent from one work to the next (Cohen, “Respect for Judaism”).

245. Cf. Wilcox, “God-Fearers—Reconsideration.”

246. See, e.g., Finn, “God-Fearers Reconsidered” (citing considerable evidence, even if the designation was not yet “technical”); Overman, “Neglected Features”; Hengel and Schwemer, *Between Damascus and Antioch*, 61–70; the evidence in Feldman, “Omnipresence”; Siegert, “Gottesfürchtige”; Liebeschuetz, “Influence”; Das, *Debate*, 79–81, 111–12. Some philosophers were experimenting with forms of monotheistic expression; see comment on Acts 8:10; also others (e.g., van der Horst, “New Altar?”).

247. Donaldson, *Paul and Gentiles*, 60–65 (noting that they were not fully members of Israel). Many apparently viewed welcoming interested Gentiles as fundamental to Judaism (cf. *Jos. Ag. Ap.* 2.210, interpreting biblical *gerim* [“strangers”] as converts).

248. See Whittaker, *Jews and Christians*, 34n1; Moore, *Judaism*, 1:325. Others cite Dio Cass. 60.6.6; Suet. *Dom.* 12.2 (Segal, *Convert*, 94). Gentile adherence to the synagogue was diverse, displaying a range of attachments (note Barreto, *Negotiations*, 101, following Collins, “Symbol,” 184).

249. Overman, “Neglected Features”; cf. Das, *Debate*, 73–74.

250. Cf. Lifshitz, “Sympathisants”; Bamberger, *Proselytism*, 135–38; Hoenig, “Conversion,” 65–66; cf. *Pesiq. Rab.* 43:4. Eventually Amoraim required semiconverts to decide because Roman and Christian challenges made them more a danger than a benefit (Bamberger, *Proselytism*, 289).

251. E.g., Gager, “Gentiles and Synagogues” (though arguing that Luke invented their rapid conversion); Trebilco, *Communities*, 145–66; Segal, *Convert*, 93–94. Mitchell, *Anatolia*, 2:32n179, notes that Kraabel is increasingly outnumbered on this issue.

252. Horsley, *Documents*, 3:54, §17. Whereas uncircumcised sympathizers were more apt to hold higher status in Gentile society, proselytes held higher religious status in Judaism (Le Cornu, *Acts*, 317).

253. On the Carian city of Aphrodisias, see briefly Reynolds, “Aphrodisias”; Kaletsch, “Aphrodisias”; Schnabel, *Mission*, 1246–47; archaeology in Smith, “Aphrodisias” (distinct from the Aphrodisias in Hild, “Aphrodisias”).

Gentiles, described as θεοσεβεις.²⁵⁴ If one argues that a third-century inscription (or later)²⁵⁵ is too late to shed light on Luke's usage, we may note that most of Kraabel's material is also later. We may also respond that neither Luke nor the inscription can depend on each other, which suggests the likelihood of a common (even if not technical) usage already understood in Luke's day. Luke in any case expected his language to be intelligible to his audience without explanation.

(3) Soldiers' Religion

Cornelius's Jewish piety is respected and accepted but probably not orthodox and certainly not on the level of a proselyte.²⁵⁶ Evidence allows for varying degrees of commitment on the part of sympathizers, much of it from those who did not attend synagogue.²⁵⁷ Soldiers seem to have had many feast days, most of which were religious in nature.²⁵⁸ The later spread of Mithraism²⁵⁹ testifies to the spiritual hunger of these generally uprooted men,²⁶⁰ its spread is associated particularly with the Roman army in later centuries²⁶¹ (though limited to particular regions).²⁶² In Dacia, for example, Mithraic materials appear especially around military installations, both legionary and auxiliary.²⁶³ The cult was associated especially (albeit not exclusively)²⁶⁴ with males,²⁶⁵ which may have facilitated (or perhaps stemmed from) soldiers' involvement. Mithras worship probably also appeared in Caesarea itself in the third century.²⁶⁶ This is not

254. Tannenbaum, "God-Fearers"; Feldman, "Sympathizers"; Levinskaya, "Inscription and Problem"; idem, *Diaspora Setting*, 51–82 (cf. also 105–26); van der Horst, "Aphrodisias"; Gempf, "God-Fearers"; Trebilco and Evans, "Diaspora Judaism," 286–87; Trebilco, "Communities," 566; Noy, "Inscriptions," 540; Segal, *Convert*, 94; Matthews, *Converts*, 66; Das, *Debate*, 75–77; Judge, *Athens*, 121–29. The inscription certainly employs the term in the Lukan sense even if also using it more ambiguously (Murphy-O'Connor, "Lots of God-Fearers?"; cf. Koch, "God-Fearers").

255. Bonz, "Inscriptions," argues that one inscription is fifth century and refers to a pious Jew, although the other may be a third-century Gentile. Gilbert, "Administration," suggests that Jews would have more favor in the fourth than in the fifth century.

256. See comment on Acts 10:25. Evidence for Jewish soldiers is sporadic at best (see Kraft, "Judaism on Scene," 86–87; Applebaum, "Legal Status," 458–60; cf. perhaps *CIJ* 1:52, §79); Roman soldiers ate a great deal of pork (Polyb. 2.15.3). There were more Jewish soldiers in Ptolemaic Egypt (*Let. Aris.* 13; *CPJ* 1:11–13, 147–78).

257. Cf. Siegert, "Gottesfürchtige"; Lake, "Proselytes," 96. Some ethnic Gentiles who viewed themselves as more faithful adherents to Judaism called themselves Jews apparently without conversion (see Kraemer, "Meaning of 'Jew'"; for the designation more generally, see comment on Acts 28:19).

258. Ehrhardt, *Acts*, 54 (following Fink, Hoey, and Snyder, "*Feriale Duranum*," though there may have been fewer in Luke's day).

259. Comparatively little is known because the cult was secretive (Burkert, *Mystery Cults*, 42) and it did not attract as much literary attention as some alternative cults. A Persian cult, it never succeeded in Greece (Klauck, *Context*, 148); Herodotus thought Mithra a goddess (Hdt. 1.131.3), and in the Greek world Mithraic worship seems limited, with isolated exceptions, to Persian families (Gordon, "Mithraism," 394). It had seven stages of initiation (Burkert, *Mystery Cults*, 7). For the cult's astrological associations, see, e.g., Apul. *Metam.* 11.22; Angus, *Mystery-Religions*, 165; Sheldon, *Mystery Religions*, 33–34; Koester, *Introduction*, 1:372–74; in magic, cf. *PGM* 4.620–70. Identified with Helios (Ptolemy *Tetrab.* 2.3.64), Mithras was portrayed as young and blond (*PGM* 4.696–99) with lightning in his eyes and stars on his body (4.703–4). On the bull-slaying ritual, see, e.g., Hinnells, "Reflections," esp. 311; Burkert, *Mystery Cults*, 7.

260. Ehrhardt, *Acts*, 54.

261. As widely noted (e.g., Gager, *Kingdom*, 134; Burkert, *Mystery Cults*, 7, 42; Koester, *Introduction*, 1:372–74; Gordon, "Mithraism," 396); see esp. Serban and Baluta, "Mithraism"; Daniels, "Army." One third-century Mithraeum in Spain might be in a centurion's home (Alvar, Gordon, and Rodríguez, "Mithraeum at Lugo").

262. See this cautionary note by Nock, "Genius of Mithraism," 113; esp. Daniels, "Army," 273. Even some of the evidence that we do have may reflect recruits from areas where it was more common (cf. Frank, *Aspects*, 50).

263. Serban and Baluta, "Mithraism," 578.

264. David, "Exclusion."

265. Many scholars claim that it was for males (Gager, *Kingdom*, 133; Martin, *Religions*, 114; Drijvers and de Jong, "Mithras," 580), with a few exceptions (Klauck, *Context*, 141, 148). Griffith, "Women," contends that women were not involved but finds symbols of the "female principle."

266. See Lease, "Caesarea Mithraeum"; Bull, "Mithraic Medallion," 190 (third or fourth century); Flusser, "Paganism," 1099 (ca. 200 c.e.). Given the date, Charlesworth, *Pseudepigrapha and New Testament*, 82, warns

to imply that any soldiers noted in Acts followed Mithraism. Although the empire already had contact with Mithraists,²⁶⁷ it does not seem to have spread in the empire before the second century²⁶⁸ (and, against some earlier speculation, certainly cannot be supposed to have influenced first-century Christian thought).²⁶⁹

At the same time, many soldiers were not above sacrilege if the occasion invited it (Hdn. 4.4.5). But most important in this case (because it applied to all Roman soldiers), soldiers had to swear a sacred oath (a *sacramentum*) to the emperor, and units engaged in “official religious activities” together.²⁷⁰ The eagle of each imperial legion, carried by the *aquilifer*, clutched the bolt of Jupiter in its talons; another soldier, the *imaginifer*, carried the emperor's image; legionary emblems could include deities.²⁷¹ Soldiers could worship privately whatever deities they wanted, so long as it did not interfere with discipline, but the imperial cult pervaded communal military life.²⁷² Like God-fearers in Aphrodisias, Cornelius would have to participate in the official cult,²⁷³ which could help explain why he bows to Peter inappropriately in Acts 10:25.

What is Luke's literary agenda in mentioning “God-fearers”? Some suggest that Luke addresses Jewish Christians: the many “God-fearer” converts resemble the

against overemphasizing the later Caesarea Mithraeum's relevance. For some Roman soldiers worshipping Christ in third-century Palestine, see Tzaferis, “Inscribed.”

267. Grant, *Gods*, 40 (citing Plut. *Pomp.* 24.5; Dio Cass. 63.5.2). Later forms may have absorbed motifs from a wide range of sources, including Christianity (Latourette, *First Five Centuries*, 247), though even then it remained quite distinct (see, e.g., Mattingly, *Christianity*, 5). Griffith, “Mithras,” argues (from Statius *Theb.* 1.717–20) that at least some in Rome apparently knew of it by 79 C.E.; Beck, “Mysteries,” argues for its presence among Commagenian soldiers before the end of the first century. Gordon, “Mithraism,” 395, concedes that Mithraism existed even before this time but notes that its first attestation (in the source behind Plut. *Pomp.* 24) was quite different from the cult known to us from the Flavian period. Persians and others from the East, of course, worshiped Mithras well before the second century (Reitzenstein, *Religions*, 23; Tarn, *Civilisation*, 341; Grant, *Gods*, 40, citing Plut. *Pomp.* 24.5; Dio Cass. 63.5.2), but Decharneux, “Cult,” 104, suggests that Roman usage may have domesticated Mithraism against Parthia. Names appear to attest at least some Mithras worship in Achaemenid Persia (Campos Méndez, “Dios Mithra”). For (later) evidence from Dura, see, e.g., Cumont, “Mithraeum”; Francis, “Graffiti.”

268. Grant, *Gods*, 40–41; cf. “Mithras,” 74; Cary and Haarhoff, *Life*, 343; Rives, *Religion*, 141 (starting at the end of the first century). Use of Mithraic caves (on which see Campbell, *Iconography*, 6–11), as Mithraists called them (cf. discussion in Gordon, “Mithraism,” 394; Rives, *Religion*, 125), belongs especially to the second through fourth centuries (Burkert, *Mystery Cults*, 2; on caves in ancient religion, see also Keener, “Cave”); although Mithras is known from the Bronze Age, “the characteristic mysteries” do not predate 100 C.E. (Burkert, *Mystery Cults*, 6–7; cf. Nock, *Christianity*, 58). With or without Christian competition, Mithraism would not have survived (Bianchi, “Epilegomena,” 879).

269. Some have argued that Christianity and Mithraism competed in later centuries (Latourette, *First Five Centuries*, 28–29; Gager, *Kingdom*, 133), but others contend that even in the later period, their competition was limited (see Martin, “Mithraism”); similarities are also limited (Nock, *Christianity*, 29; Mattingly, *Christianity*, 5). Some suggest that the fourth-century inscription promising immortality may reflect Christian influence (Grant, *Hellenism*, 18); in any case, Mithraism was a highly syncretistic movement (cf. data in Blawatsky and Kochelenko, *Culte de Mithra*). Later Christian and Mithraic iconographies have some resemblances (Demian, “Mithras and Christ”), but these may derive from a common source (Gervers, “Iconography,” 598). Mithraism may have adapted the Lord's Supper (cf. Justin 1 *Apol.* 66; cf. also the second-century cup in Beck, “Ritual,” though one ought not to infer much from a cup); Cumont's reading of the Mithraic meal in eucharistic terms has been seriously questioned (see Yamauchi, *Persia*, 517).

270. Jones, “Army,” 212; on the oath, see further Pliny *Ep.* 10.52, 100; Watson and Spawforth, “*Sacramentum*.” Epict. *Diatr.* 1.14.15 admonishes others to swear allegiance to God as Caesar's soldiers do to Caesar. Were auxiliaries less strictly bound, or would Cornelius view the activities as mere formalities (cf. 2 Kgs 5:18–19)? But probably he would escape such questions only at retirement. Public figures avoiding the oath could be noted and accused (Tac. *Ann.* 16.22, under Nero).

271. Le Bohec, “Ensigns,” 993, 995 (citing for the *aquilifer* Tac. *Ann.* 1.39.4; *Hist.* 1.56.2; 2.89.1; cf. *ILS* 2338–42). Auxiliary cohorts would also be exposed to paganism.

272. Campbell, *Army*, 127; for primary sources covering soldiers' religion, see 127–36.

273. Levinskaya, *Diaspora Setting*, 121.

kind of Gentiles already acceptable to Judaism, so why not welcome them into the church?²⁷⁴ More scholars think that Luke's audience is predominantly ethnically Gentile; many of these, however, may have been God-fearers. Others, perhaps more dominant by this period, would have at least identified with them. Whatever Luke's audience, however, God-fearers, like proselytes (6:5) and Hellenists (Acts 6–8), provide useful transitions to the Gentile mission.²⁷⁵ The church's bridge to Gentiles did not arise in a vacuum but owed much to Jewish connections and apologetics that had been growing for centuries.²⁷⁶

b. Cornelius's Encounter (10:3–8)

An angelic visitor during prayer instructs Cornelius how to secure the true knowledge of God that can save him and his household (cf. 11:14). In 10:7–8, Cornelius immediately obeys.

I. ANGELIC VISITOR DURING PRAYER (10:3)

Cornelius is presumably in prayer when the vision takes place; sometimes Luke's abbreviation of his material leaves connections unclear (10:4 is not quite explicit), but that the appearance occurs during prayer is clear in 10:31 and is strongly implied in the timing of 10:3. Luke has already introduced the ninth hour as one of the hours of prayer observed in the temple (3:1).²⁷⁷ The angel's use of the term "memorial" (10:4) may respond to Cornelius's regular times of prayer, which can be described as "remembering" in prayer.²⁷⁸ An angelic revelation at this hour of prayer in the temple recalls the opening vision of Luke's work, Gabriel's announcement of John's birth at the hour of incense offering in the temple (Luke 1:10–11);²⁷⁹ this too is a critical point in salvific history.

An angel reveals the truth of God to a seeker in *Test. Job* 3 (cf. 2:3–4) and perhaps the gospel to the world in Rev 14:6, though these documents are probably of later date than our narrative. Jewish apocalyptic literature regularly speaks of revelations from angels (cf. Rev 1:1).²⁸⁰ Those who founded various groups (e.g., associations or clubs) sometimes claimed divine sanction through dreams, visions, or oracles. "The point of making such a claim is that the divine sanction for the association's founding

274. Jervell, "Church," 20.

275. Valuable though the comparison might be for recognizing Luke's appreciation for the socially marginal, Schweizer's comparison of God-fearers with the Gospel's Galileans ("Concerning Speeches," 214) may overestimate both their centrality and their orthodoxy. Flusser, *Judaism*, 630, believes they kept the Noahide laws, hence the relevance of Acts 15:20 (see comments there) in instructing them.

276. Despite his undue historical skepticism, Kraabel is correct that Luke has a literary agenda; Kraabel views this agenda as explaining how Christianity maintained a Jewish heritage while becoming a Gentile religion ("Disappearance"; MacLennan and Kraabel, "Invention"; it might be better expressed as becoming a faith that welcomed Gentiles).

277. The hours of prayer also carried over into early Christianity (*Did.* 8.3; Tert. *Fasting* 10; see Jeremias, *Theology*, 188; Oesterley, *Liturgy*, 125). On the hours of prayer, see Jeremias, *Prayers*, 69–73; further comment on Acts 3:1. Luke's indication of approximation, "about," is characteristic of his estimates (see comment on Acts 1:15; 2:41).

278. E.g., 1 Macc 12:11; Rom 1:9; 2 Tim 1:3; cf. 1QM XVI, 3–4; XVIII, 4. Paul's references may allude to the formal prayer times (Hawthorne, *Philippians*, 16–17), though the terminology *μνησθῆναι* could simply mean "making mention" (Bruce, *Thessalonians*, 11; Robinson, *Ephesians*, 278–79). God also "remembers" Cornelius's piety (Acts 10:31), as prayers sometimes invited (1Q34bis 1 + 2 6; 4Q508 2 2; 4Q509 131–32 II, 5; 2 Bar. 84:10).

279. Dunn, *Acts*, 136. One might be tempted to contrast favorably Cornelius's vision of an angel with Peter's vision of a sheet, but the descent of the latter from heaven may mitigate this, as does Peter's experience in 12:7–11 (and possibly his other presumed angelic visions; cf. 12:9). In any case, Cornelius's angelic visitation, like those of Luke 1:11, 26; 2:9, offers him a significance some might not have expected for Gentiles.

280. E.g., 1 En. 1:2; 72:1; 74:2; 3 Bar. 1:8; see further comment at Acts 8:26.

would then be seen as beyond dispute.”²⁸¹ The Gentile mission, Luke emphasizes, is God's idea.

II. ACCEPTABLE OFFERINGS (10:4)

That Cornelius is terrified (ἔμφοβος) is to be expected in the case of a revelation,²⁸² including the first one in Luke's work (Luke 1:12; for another allusion to Zechariah, see comment on Acts 10:31). Luke elsewhere employs ἔμφοβος for responses to divine revelations, whether of angels (Luke 24:5) or of the risen Christ (24:37; Luke's only other use is Acts 24:25). “What is this [about]?” seems a natural reaction,²⁸³ but in Luke's (or Cornelius the God-fearer's) composition seems particularly appropriate for a response to a surprising angelic revelation (Zech 1:9, 19; 4:4–5, 13; 5:6; 6:4).²⁸⁴ (Cf. Saul's related question in 9:5, “Who are you, Lord?”)

The angel, however, immediately assures Cornelius that God is pleased with him. As two forms of pious deeds, prayers and alms often appear together in early Jewish sources.²⁸⁵ Early Jewish tradition claimed that angels saw people's good deeds and brought their prayers²⁸⁶ to God (Tob 12:12–13, 15) and that the prayers counted as a “remembrance” (12:12). When the angel declares that Cornelius's prayers (and especially alms, cf. Acts 10:31) have risen²⁸⁷ as a “memorial” to God, the angel alludes to a concept widely known in early Judaism. Prayer itself could count as a “memorial” before God (Tob 12:12), but given the common cultic usage, prayer as a memorial might evoke a wider range of cultic imagery.

Some biblical offerings were called “memorials,”²⁸⁸ language that was sometimes transferred to times of prayer in early Judaism (see comment on Acts 10:3).²⁸⁹ It also applied to the high priest's continual representation of Israel's tribes before God (Exod 28:12, 29; 39:7; cf. Sir 45:9, 11) and to atonement funds for Israel (Exod 30:16; Num 31:54). Scripture compared prayer to offerings to God (Ps 141:2) and spoke of spiritual sacrifices (Pss 50:14, 16, 23; 51:16–17, 19; 69:30–31; Hos 6:6; Mic 6:6–8).²⁹⁰

281. Witherington, *Acts*, 341.

282. For fearing at a revelation, cf., e.g., Dan 7:15; PGM 4.725 (in Mithraism); Rev 1:17; and sources cited for falling to the ground at Acts 9:4.

283. The idiom may convey surprise (cf. Exod 16:15; Mark 1:27; John 16:17–18; 1 Cor 10:19), although it does not always do so (Acts 23:19; 1 Cor 14:15, 26; Eph 4:9); response to a subordinate's request is irrelevant (Josh 15:18; Judg 1:14; 2 Sam 14:5; 1 Kgs 1:16; 2 Kgs 4:2; 6:28; Esth 5:6; 7:2). Le Cornu, *Acts*, 554, compares the simple son's question at Passover (*Mek. Pisha* 18; cf. Deut 6:20), but this is too specific.

284. Cf. Ezek 37:18; also Philo's translation of Moses's and Jacob's “Here I am” in response to divine revelation in *Dreams* 1.194 (on Exod 3:4), 196 (on Gen 31:11; cf. 46:2).

285. Le Cornu, *Acts*, 551; cf. Keener, *Matthew*, 207 (citing *y. Ta'an. 2:1, §9; Pesiq. Rab Kah. 28:2; Eccl. Rab. 7:14, §1*). Luke here develops Cornelius's character (Parsons, *Acts*, 143, citing *Rhet. Her. 4.50.63* and noting also synonymia; see discussion of “character” at Acts 24:5).

286. Luke employs προσευχή in the plural only here and in 2:42, but it is frequent elsewhere in early Christianity.

287. Prayers are compared to incense rising before God in Rev 5:8; 8:4 (the fragrance of offerings rises before God, e.g., Gen 8:21; *Jub. 6:3–4*). Some traditions also speak of angels presenting prayers before God (Tob 12:15; Rev 8:3–4), though here the angel merely announces their effect.

288. Lev 2:1, 9, 16; 5:12; 6:15; Num 5:15, 26; Sir 38:11; Philo *Names* 234, 249; *Dreams* 2.71; cf. 4Q512 29–32 10; 11QT XX, 11; perhaps 1QS X, 5; 1QM VII, 13; 11QT XIX, 9; XXV, 3; XXVII, 5, 9; XXXIX, 9; 11Q20 III, 26; IV, 21; VII, 24.

289. Cf. also remembrance (though this may simply mean “mention”) in prayer, e.g., Rom 1:9; Eph 1:16; Phil 1:3; 1 Thess 1:2; 2 Tim 1:3; Phlm 4; cf. Luke 23:42; and God “remembering” his people, Luke 1:54, 72; Heb 6:10.

290. Cf. also Pss 107:22; 116:17; Jer 6:20; 7:22; Amos 4:4–5; 5:25–27; Jonah 2:9; but sacrifices of thanksgiving were compatible with thank offerings (Lev 7:12–15; 22:29). For de-emphasis on traditional sacrifice, cf. Ps 40:6. Most commentators recognize the relevance of the OT passages (e.g., Lake and Cadbury, *Commentary*, 113; C. Williams, *Acts*, 135; Fitzmyer, *Acts*, 451; Johnson, *Acts*, 183, citing also 1QS VIII, 1–9; 4QFlor 1 I, 1–6; Marshall, “Acts,” 577, citing also 1 En. 99:3).

Jewish tradition developed these emphases more fully; they became particularly helpful after the temple's destruction²⁹¹ but were already widespread in Judaism, especially Diaspora Judaism²⁹² and Qumran,²⁹³ before that time. (Some thinkers also rejected animal sacrifices,²⁹⁴ and some Gentiles were ambivalent or negative toward traditional sacrifices.)²⁹⁵ Perhaps because Cornelius, as a Gentile, was barred from the Court of Israel in the temple, "spiritual" sacrifices were of special relevance to him.²⁹⁶

III. SEND FOR PETER (10:5–6)

The command to send to another for further instructions resembles the recent command to Paul to await further instructions in Damascus (Acts 9:6). Not only Jews²⁹⁷ but also Gentiles would have grasped without difficulty the concept of sending to hear an oracle or prophet;²⁹⁸ they often claimed that divine revelations referred them to particular healing sanctuaries²⁹⁹ or healers.³⁰⁰ By directing Cornelius to seek the saving message from Peter rather than communicating it directly, the present revelation retains the usual pattern of God bringing the message through human agents (see 1:8).³⁰¹

Although it also makes historical sense in terms of population and proximity to Caesarea, it might be significant that Peter has his vision in Joppa, where Jonah went to sail to Tarshish (Jonah 1:3); like Jonah, Peter will initially object to a call to Gentiles, particularly to a call to the very nation that has been oppressing Israel the most. (Some scholars also draw connections between the book of Jonah and Acts 27; perhaps the Jonah narrative is part of Luke's biblical subtext for the Gentile mission, but if it is at all, it is not very prominent.)³⁰²

291. See, e.g., 'Abot R. Nat. 4 A; 8, §22 B; *Pesiq. Rab Kah.* 6:3; 16:7; 24:5; *b. Ber.* 15a; *Sanh.* 43b; *Gen. Rab.* 34:9; cf. *Sipre Deut.* 32.5.2. Cf. even eschatologically in *Pesiq. Rab Kah.* 9:12.

292. See esp. *Let. Aris.* 234; *Sir* 35:1–3 (32:1–3); *Wis* 3:6; cf. *Jdt* 16:16; *Jos. Ag. Ap.* 2.137–39; *Sent. Sext.* 47; among Gentiles, cf. *Isoc. Ad Nic.* 20; *Porph. Marc.* 11.191–98; 16.278–81; cf. Stern, *Authors*, 1:8–11.

293. At Qumran, cf. CD XI, 21 (citing Prov 15:8; but cf. CD XI, 17–18); 1QS III, 4, 6–9, 11; VIII, 3; IX, 4–5; X, 6 (*terumah*); 4Q403 1 I, 39–40; Ps 154:10–11 (11QPs^a 154; cf. 5ApocSyr Ps 2, in *OTP* 2:619–21). Some contend that Essenes were even less comfortable with the temple than Josephus suggests (*Ant.* 18.19) and hence were compelled to develop the notion of spiritual sacrifice (Nolland, "Misleading Statement"; cf. Flusser, *Judaism*, 39–40, 43); certainly they emphasized law keeping more than temple sacrifices (cf. Arnaldich, "Sacerdocio"; Gärtner, *Temple*, 30, 44–46).

294. E.g., *Sib. Or.* 4.29–30; among Gentiles, *Heliod. Eth.* 10.9; especially among Pythagoreans (Philost. *Vit. Apoll.* 1.1, 31–32; 4.11; 5.25; 8.7; *Ep. Apoll.* 27; *Diog. Laert.* 8.1.22; *Iambl. V.P.* 11.54; 18.85; 24.108; 28.150). The few animal bones at Qumran do not indicate regular sacrifices there (Duhaime, "Remarques"; Laperousaz, "Dépôts"). Sanders, *Judaism*, 53, argues that Philo was wrong to suppose that Essenes were against animal sacrifices (*Good Person* 75), even though some people were. Heger, "Prayer," contends that the view that Essenes replaced sacrifice with prayer simply reads later rabbinic sentiments into the Qumran scrolls.

295. Some felt that deities desired less sacrifice or no sacrifice (*Dio Chrys. Or.* 13.35; *Lucian Dem.* 11; *Max. Tyre* 2.1–2; *Porph. Marc.* 17.282–84; *Pyth. Sent.* 20; for the composite Stoic position, cf. *Plut. Stoic Cont.* 6, *Mor.* 1034C; *Diog. Laert.* 7.1.119); others mocked sacrifice altogether (e.g., *Lucian Sacr.*).

296. Cf. Witherington, *Acts*, 348.

297. At least on the basis of Scripture; cf. 1 Sam 9:9; 1 Kgs 22:5; 2 Kgs 3:11; 22:13, 18; 2 Chr 18:4; 34:21, 26; Jer 21:2; 37:7; Ezek 20:1. Cf. perhaps 2 Bar. 34:1; but in this period, it was apparently more common to seek guidance through Scripture (cf. 1 Macc 3:48).

298. Cf. already 2 Kgs 1:2, 6, 16; *Jos. Ant.* 9.20, 26; for Israel's God, 2 Kgs 8:8; *Jos. Ant.* 9.88–89.

299. Theissen, *Miracle Stories*, 51, cites SIG³ 1173; *Ael. Arist. Or.* 2.83, 103; *Epid. inscr.* 48.

300. Theissen, *Miracle Stories*, 51, cites *Tac. Hist.* 4.81; *Suet. Vesp.* 7; *Dio Cass.* 65.8; *Philost. Vit. Apoll.* 1.9; 4.1. For a twentieth-century example of a vision or dream leading someone to a church where the person was converted, see McGee, *People of Spirit*, 432.

301. Paul is a partial exception in Acts 9:4–5, but even there he needs further instruction and initiation (9:6). Reports of revelations to non-Christians today also often include sending to specified believers (e.g., Pankau and Siemon-Netto, "Revolution," 45).

302. Perhaps Luke knew that Paul later went to Spain (*Rom* 15:24, 28; *1 Clem.* 5.5–7; see comment on Spain at Acts 1:8), or thought of connections between Tarshish and Tarsus, but he never exploits these

The angel necessarily provides a way to locate Peter in the large city of Joppa (10:6). Just as Ananias's vision instructed him to find Saul at Judas's house on Straight Street (9:11), the angel provides Cornelius directions here (Simon the tanner's home, near the sea). That both individuals named in the vision are called Simon is probably not what a mere storyteller would create, but it reflects the reality that "Simeon," especially through its Greek analogue "Simon," was "the commonest male name by far in 1st-century Palestine."³⁰³ Identifying Simon by his trade would help a visitor to find him (especially if members of the trade lived in the same district, as was common; see comment on Acts 18:3), but it also invites Cornelius's humility if he cooperates, since tanners were not of high status anywhere in the Roman world (see comment on Acts 9:43).

That the house is by the sea fits the need of water for tanning and cleaning (see more detailed comment on this point at Acts 9:43), but it was not a necessary location and might possibly differentiate Simon's place from the Gentile tanning district (if it was located elsewhere; Joppa was predominantly Jewish in this period).³⁰⁴ Apart from its being near the sea, we cannot further specify its location today.³⁰⁵

IV. OBEYING THE ANGEL (10:7–8)

The centurion immediately obeyed the angel's orders—an obedience he would have learned well as part of Roman discipline (cf. Luke 7:8).³⁰⁶ (A connection with Roman discipline need not be in view specifically here, however, since all individuals in Acts obey their visions [e.g., Acts 9:11–17; 16:9–10; esp. 26:19]; but in this context some others question them [10:14; cf. 9:5, 13–14].) That Cornelius sends two servants is not surprising; messengers often traveled in pairs, when available, especially over significant distances.³⁰⁷ A third member increases safety, particularly given his training as a soldier, and especially if the journey will include a night.

The servants here are probably household slaves. On the money necessary to acquire them, see comment at Acts 10:2; for a discussion of slavery, including household slavery, see the excursus on slaves and slavery at Acts 12:13. Despite what we today recognize as the unjust inequity of the system, some masters and household slaves became very close (as in Luke 7:2–3).³⁰⁸ Well-treated servants on missions did not

connections. The term Tarshish appears twenty-eight or twenty-nine times in the OT, often for a distant and/or wealthy mercantile place; only two references are in Jonah.

303. Williams, "Names," 93. Haenchen, *Acts*, 347, opines that "Peter" is used to distinguish Simon from his host; although this might be true within the story world, Luke calls the apostle "Peter" far more often, a name that would have easily distinguished him. Thus it is not impossible that Luke includes "Simon" here from his oral source, although we cannot be certain at this remove. Cf. the first naming of "Paul" in a context with another "Paul" (Acts 13:7–9).

304. Hengel, "Geography of Palestine," 62, suggests that Luke mentions it to show that "Peter really had reached the ultimate border of Judaea."

305. The traditional site of Simon's home has a freshwater spring, useful for tanning, and the sea waves beat against its low wall (Abbott, *Acts*, 123); but were this site correct, the sea would likely have eroded it away long ago.

306. Centurions were expected to obey unquestioningly, and questioning invited a reprimand (Caesar *Gall. W.* 1.40). To the centurion's zeal to obey, Abbott, *Acts*, 125, compares receiving the kingdom like a child (Luke 18:17) and contrasts Naaman (2 Kgs 5:12).

307. On paired messengers, see, e.g., Gordon, *Near East*, 110; my comment on Acts 13:5. Witnesses might also travel in pairs (e.g., *y. Roš Haš.* 2:8, §4); some also preferred two travelers because of safety in numbers (the tradition attributed to R. Meir in *Eccl. Rab.* 4:9–10, §1).

308. E.g., Statius *Silv.* 2.6; cf. Philo *Decal.* 167. Some servants were said to prove extremely loyal, sometimes even at the risk or expense of their own lives (Appian *Hist. rom.* 7.1.2; 8.3.17; *Bell. civ.* 4.4.26; Val. Max. 6.8.1–4; Mart. *Epig.* 3.21; Suet. *Aug.* 16.3; Tac. *Hist.* 4.50)—though the reverse is much more difficult to attest (cf. sacrificing one's servants in Plut. *Alc.* 21.2–4). Emphasis on slave loyalty served the purposes of the elite who generated the texts (so Bradley, *Slaves*, 37).

usually run off, and Cornelius’s “household” seems to have shared his faith (Acts 10:2); he thus has little reason for concern about their simply deciding not to return, and this is not the likely reason for the soldier accompanying them.³⁰⁹

Just as centurions were expected to obey their superiors, whatever a centurion or other Roman officer commanded, soldiers were obligated to obey superiors out of obedience to Rome’s authority, which stood behind them (cf. Luke 7:8).³¹⁰ The presence of the soldier seems to suggest that Cornelius remained on active duty instead of being retired, but it is possible that the soldier was “a military orderly” who was “part of his household.”³¹¹ If other reasons are compelling for viewing Cornelius as retired (a matter of debate, as already noted), we should remember that most troops were from the area (see comment on Acts 10:2). It might therefore be possible for some to quarter in their own homes and others in other local homes,³¹² though this might be a breach of camp discipline.³¹³ It is also possible that the soldier is retired and maintains loyalty to his centurion (for some soldiers’ loyalty to their centurions, see, e.g., Tac. *Hist.* 2.60), that he is hired to work for him part-time (presumably with the knowledge and perhaps complicity of his superiors), or that he simply acts as a coreligionist.

Barrett allows that if Cornelius was retired, he “might have retained on a private basis the services of a soldier” who was also now only a reservist or retired;³¹⁴ he thinks that τῶν προσκαρτερούντων, “attending on him,” may suggest retirement.³¹⁵ One wonders why Cornelius would hire (or perhaps at least provide room and board for) a soldier when he already had servants,³¹⁶ but soldiers might be better qualified for guard duty,³¹⁷ and where labor was cheap, hiring a soldier for this role (instead of buying and feeding an additional slave) could make sense. Sending a soldier as a guard with those who would be traveling at night (on one reading of Luke’s chronology) would also make sense. But because Luke does not specify “the soldier who worked for him,” his language might imply that Cornelius had more than one at his disposal and chose a “pious” one who would be most disposed toward, and best perform, such a mission. We simply lack sufficient evidence for more than guesswork here. Correspondingly, we do not know the extent to which the soldier wears any military attire;³¹⁸ but in contrast to the troubles of a generation later, the appearance of a soldier traveling on the coastal plane at this time might inhibit rather than invite attack.

That the soldier is devout suggests a common bond between the two. Because centurions were responsible for discipline and could beat soldiers with vine staffs,

309. Some slaves, of course, did run off (e.g., Cic. *Quint. frat.* 1.2.4.14; Verr. 2.1.33.85; Dio Chrys. *Or.* 66.2), but most who were trusted on their holders’ business did not do so (Cic. *Fam.* 13.45.1; Stambaugh, *City*, 149). See further discussion of slavery and escapes in the excursus at Acts 12:13.

310. On that passage, cf., e.g., Haslam, “Centurion.” One did, however, need to command individuals specifically rather than employ a general “Let someone do such-and-such” (see Xen. *Cyr.* 5.3.49–50).

311. Witherington, *Acts*, 348.

312. This is a speculative proposal that may be either confirmed or refuted by concrete archaeological or literary data that I do not currently have available, but it on the whole seems more unlikely than probable.

313. We have reason to believe that discipline was not strictly enforced in Caesarea (*Ant.* 19.357–59, 365), but we lack sufficient information to be certain whether that would be the case here, or whether Luke could expect his audience to accept that possibility.

314. Barrett, *Acts*, 503.

315. *Ibid.*, 504 (comparing Demosth. *Neaer.* 120: “servants who remained . . . in employment”).

316. Unless their common piety, which is mentioned here, endeared this particular soldier to him, which is possible.

317. Cf. Pliny *Ep.* 10.19.1–2; but also cf. 10.20.1.

318. Presumably even if in service he would not be dressed in full battle gear (undoubtedly not carrying the heavy infantry shield and probably not even wearing a breastplate or helmet) or parade regalia, but probably would at the least wear his belt over his military tunic, with a weapon attached to the belt.

they were typically hated; in mutinies, centurions were sometimes assassinated.³¹⁹ That the two are coreligionists, however, probably suggests a friendlier relationship. The sending of these messengers may recall those sent to Peter in Acts 9:38.

3. No Longer Unclean: Peter's Vision (10:9–16)

Peter's vision emphasizes that Gentiles whom God has accepted are no longer unclean. Through paired visions (10:1–8; 10:9–16) and the Spirit's voice (10:19–20; 11:12), God persuades Peter to be his agent to Cornelius.³²⁰

a. Introduction

Just as Ananias and Paul received complementary visions (9:3–6, 10–16; esp. 9:12), so do Peter and Cornelius (10:3–6, 10–16). Complementary or doubled visions reinforce their validity,³²¹ when experienced by two different persons, such visions rule out error through a single individual's excessive subjectivity.³²² That the two events that Luke repeats three times in Acts each involve such complementary visions underlines his view of the events' importance for salvation history.³²³

A dramatic revelation, confirmed by circumstances and a matching revelation, thus provides a new grid for understanding God's plan for his people.³²⁴ Although later rabbis insisted that traditional interpretations took precedence over apparently divine interventions (such as miracles and heavenly voices),³²⁵ and even most Christians dared not let an experiential hermeneutic run amok (Gal 1:8; Col 2:18; 1 John 4:1–6; Rev 2:14, 20),³²⁶ duly confirmed revelations played a central role in readjusting the church's approach to biblical tradition. Further, later rabbis aside, most Jews (and others in antiquity) would undoubtedly have thought twice before contradicting an explicit voice from heaven. It is notable that Jesus is not mentioned in this revelation;³²⁷ Luke perhaps intends to avoid a Jewish observer skeptical about Jesus arguing, "The error of following Jesus leads to the error of embracing Gentiles." Instead, the wisdom of heeding God's revelation leads to both following Jesus and embracing Gentiles.

This account of sending Peter to a Gentile household is significant not only by virtue of its placement but also by virtue of its structure. Various call narratives in Acts

319. Le Bohec, "Disciplina," 538 (citing Tac. *Ann.* 1.17.4; 1.18.1; 1.23.3–4; 1.32.1).

320. For patristic and medieval reception of Acts 10:9–16, see the survey in Candiard, "Vision."

321. See Val. Max. 1.7.7; Horsley, *Documents*, 1:29–32, §6; Brawley, *Luke-Acts and Jews*, 59–60 (citing Livy 8.6.8–16; Dion. Hal. *Ant. rom.* 1.55–59); Johnson, *Acts*, 182 (citing Ach. Tat. 4.1.4–8; Apul. *Metam.* 11.6, 13, 22); cf. Eckey, *Apostelgeschichte*, 252; in the ancient Near East, see Gordon, *Near East*, 134, 139. See fully comment on Acts 9:10–16. MacDonald, *Imitate Homer*, 19–65, more narrowly compares the visions of Cornelius and Peter with *Iliad* 2, noting that the twin visions fit the dream and portent, with the motifs following the dream's sequence (55; on the dream and portent, 23–28). Although MacDonald argues for distinctive features in Homeric story found in Acts (56–64), I do not find these distinctive; such features as "command to the mortal" (60) are common in ancient texts, the sequencing fits what one would expect in any such revelatory report, and we have closer examples of paired visions in antiquity.

322. Cf., e.g., Val. Max. 1.6.3; 1.7.3; Exod 4:27–28; Judg 7:10–14.

323. Dibelius, *Studies in Acts*, 111–13, thinks this vision Luke's own composition. But while Luke makes good use of it, visionary experiences are known in early Christianity (2 Cor 12:1–4), and the content here is much more specific than in Cornelius's vision; we cannot therefore be sure that Luke lacks tradition here.

324. Cf. Alexander, "This Is That," on the flexible hermeneutic here. Tyson, "Coming to Dinner," thinks that Peter or others claimed that a heavenly voice authorized him to decide about food purity.

325. So, e.g., R. Joshua in *b. B. Mešī'a* 59b; *y. Mo'ed Qaṭ.* 3:1, §6.

326. What Peter already knows of God's will creates cognitive dissonance with the new revelation, a tension between sources of authority gradually resolved in the narrative (and James's biblical argument in Acts 15:15–18; see further Brown, "Resonance Perspective").

327. Unless implied in Peter's "Lord" in Acts 10:14; but given the wider use of the title in Acts, this is unclear.

reflect characteristics of OT commissioning accounts (e.g., Acts 26:16–18), but this one may include more elements characteristic of OT accounts than the others. One scholar finds here several discrete elements typical of OT commissioning accounts:³²⁸

1. Introduction (10:9–10a)
2. Confrontation (10:10b–12)
3. Commission proper (10:13)
4. Protest (10:14)
(commission repeated, 10:15–16)
5. Reaction (10:17a)
6. Commission (10:19–20)³²⁹
7. Reassurance (10:20)
8. Conclusion (10:21–23)

Whether Luke patterns the narrative in all respects after OT commissioning accounts may be debated, but the narrative here does follow the frequent OT pattern of protesting one's call or commission (Exod 3:11–4:13; Judg 6:15; Jer 1:6; cf. Isa 6:5). Peter's protest against eating unclean food in Acts 10:14 especially echoes that of Ezekiel in Ezek 4:14, though here the protest is against a specific command, not a general commission. (In the Ezekiel text, unlike here, God makes a concession, replacing human dung with cow's dung as fuel [4:15].) That God commissions Peter (whom Paul recognizes as an apostle to Jews, Gal 2:7–8) to go to the Gentiles here fits Luke's theme of underlining the continuity between the Jewish and the Gentile missions (cf. Acts 9:15).³³⁰

What had Peter learned (Acts 10:33–34)? Tannehill argues that Peter already knew that Gentiles could be saved (Luke 24:47; Acts 1:8; 2:39; 3:25–26); what he learns in this passage is that they are not unclean (Acts 10:28; 15:9). By removing this social barrier to table fellowship with Gentiles, God makes possible mission to the Gentiles.³³¹ Even in Lev 11, the purpose of the kashrut was at least partly to separate Israel from the nations (11:44–45).³³² Gentiles regularly complained about Jews' unwillingness to eat with Gentiles,³³³ a primary reason for which was the desire to avoid *κοινοφωγία*, eating unclean food.³³⁴ The invitation to eat thus develops the theme of table fellowship found in the Gospel,³³⁵ just as the church's hostile response (Acts 11:3) reflects that of the Pharisees in the Gospel (Luke 5:30; 15:2).

328. Hubbard, "Commissioning Accounts," 188–89 (finding three full commissioning accounts in the Gospel, only this one in Acts, and only this one including all seven elements).

329. A different one than in Acts 10:13, but with the same point.

330. Cf. Refoulé, "Discours de Pierre."

331. Tannehill, *Acts*, 134–37.

332. On this purpose, see deSilva, *Honor*, 260–62, 264, 273, and esp. 280 (developing esp. Douglas, *Purity and Danger*; idem, "Abominations"). Gentiles viewed Jews' sitting apart at meals as hateful separatism (Tac. *Hist.* 5.5); some Egyptians thought that Jewish food habits were constructed against those of Egyptians (Jos. *Ag. Ap.* 1.239). Hellenistic Jewish apologists presented the purpose of the food laws as self-mastery (see Stowers, *Rereading of Romans*, 60–61).

333. Sevenster, *Anti-Semitism*, 139, cites Diod. Sic. 34.1; Jos. *Ag. Ap.* 2.258; Philost. *Vit. Apoll.* 5.33; Justin (Marcus Junianus Justinus) *Historiae Philippicae* 36.2; Tac. *Hist.* 5.5. Jos. *Asen.* 7:1 presents eating with Egyptians as an abomination to a pious Jew (reversing Gen 43:32). Jos. *Ant.* 11.346 complains that Judeans wishing to "eat unclean food" defected to the Samaritans.

334. Sevenster, *Anti-Semitism*, 139. Although the Seleucids in Judea imported Rhodian wine, the observant Hasmonians seem to have regarded foreign wine as impure (Avigad, *Jerusalem*, 79), and many near Jerusalem may have gone to special lengths to preserve the purity of wine and oil (if the interpretation of Adler, "Adjacent," is correct).

335. See, e.g., Neyrey, "Ceremonies," 378.

b. The Setting (10:9–10)

Peter receives his vision during prayer at noon on the rooftop. Each of these features is significant. This was no secretive experience in Peter's sleep at night, which would be more readily questioned (see comment on Acts 26:26); it was in the brightness of day (cf. comment on Acts 26:13) and in a public location—that is, on a rooftop (Luke 12:3). Most of all, the vision comes during the prayer to God, both offering a model regarding the importance of prayer and vindicating this significant vision against charges of spiritual unreliability.

I. REVELATION AT NOON (10:9)

Like Cornelius (Acts 10:30), Peter receives his vision while in prayer. In contrast to the ninth hour in 10:3, noon was not a fixed prayer time.³³⁶ Rather, it was a time for rest³³⁷ and food (10:10).³³⁸ Peter is not fasting (10:10), but he uses part of this siesta time³³⁹ for prayer while others prepare the food. This prayer outside the fixed times fits the apostolic schedule of prayer along with ministry of the word (6:4); Peter clearly spent much of his time in prayer (cf. the behavior of “the pious of earlier times” in *b. Ber.* 32b, bar.).

That this vision occurred when Cornelius's messengers were drawing near the city (Acts 10:9) provides another example of providential timing (as in 8:29–30; 9:9–12). The noon revelation connects Peter's vision of mission to the Gentiles with that of Paul (26:13, 16–18; cf. 22:6, 10) and probably Philip's call to evangelize the first Gentile (8:26). Such midday revelations (balancing nocturnal ones, such as 16:9; 18:9; 23:11; 27:23) in broad daylight might help Luke guard against accusations of Christian claims being about false or immoral things hidden from public view (see comment on Acts 26:26). Perhaps the emphasis is also on the preacher's willingness to go at an unusual and difficult (hot) time of day.³⁴⁰

Noon was also not a usual time for travel (10:9; see comment on Acts 8:26); but neither was departure on the same day after the ninth hour (10:3)—that is, 3:00 p.m. (A messenger needing to leave might grow anxious close to 4:00 p.m., as in Fronto *Ad M. Caes.* 1.3.9; it would be difficult to go far before nightfall.)³⁴¹ Since the messengers are near the city, it makes more sense to continue than to seek shade outside, but in view of Acts 26:13 (where Paul was approaching Damascus), noon travel may be one way Luke can depict the urgency of a mission (cf. another way in Luke 10:4, end).

Although Luke's audience probably would not know the distance the messengers traveled, the distance would also suggest haste to any readers who might have been familiar with the distances, as Luke himself likely was.³⁴² From sometime after 3:00 p.m. (Acts

336. See Jeremias, *Prayers*, 79; Haenchen, *Acts*, 347. Some mention the possibility that it functioned as an optional and third hour (citing Ps 55:17; Dan 6:10; Lake and Cadbury, *Commentary*, 114; Dunn, *Acts*, 136–37).

337. E.g., Polyb. 9.17.3; Sil. It. 13.637–38; Plut. *Themist.* 30.1; Heliod. *Eth.* 4.8; Xen. *Eph. Anthia* 1.13; Philost. *Hrk.* 11.7; 16.3; 2 Sam 4:5. See further documentation at Acts 26:13.

338. E.g., Suet. *Claud.* 34.2; Alciph. *Paras.* 1 (Trechedeipnus to Lopadecthambus), 3.4, ¶1; cf. 1 Kgs 20:16. See further documentation at Acts 26:13. Some other commentators also recognize the connection with dinner (Conzelmann, *Acts*, 81; Fitzmyer, *Acts*, 454).

339. Cf., e.g., Suet. *Vesp.* 21; *Vit. Aes.* 6; on siestas, see further comment on Acts 26:13. Normally, however, the siesta was after lunch rather than before it (several hours in *Test. Ab.* 5:2 A).

340. Even in winter, the coastal plain would not be cool like Jerusalem. Spencer, *Acts*, 112, finds symbolic significance in midday's being the brightest point, fitting an enlightening vision (cf. Acts 9:3); the connection is especially logical in 26:13 (cf. light in 26:13, 18, 23), though Luke does not employ narrative symbolism as much as John (John 3:2, 19–21; 11:10 with 13:30).

341. Cf. John 1:39, where 4:00 p.m. is too late and hence requires hospitality so that the disciples can spend the night (Morris, *John*, 157; Keener, *John*, 470–71).

342. Luke seems to know, and probably traveled, this route to Jerusalem (Acts 21:15–17); he also presumably remained in or near Caesarea for up to two years (23:23, 33; 24:27; cf. 21:18; 27:1). The coastal road was easy to travel (cf. *Lam. Rab.* 3:9, §3, on the road between Lydda and Jerusalem).

10:3) to roughly noon the next day was a relatively brief time to cover roughly thirty miles.³⁴³ It was not, however, impossible “for a Roman soldier who is used to marching, and able-bodied slaves.”³⁴⁴ A mission urgent enough to send them out after 3:00 p.m. might well have entailed traveling even after sundown,³⁴⁵ though this was done under only the most urgent of circumstances (cf. Acts 23:31; Luke 24:29). On the other hand, some scholars argue that the “next day” refers to the day after the messengers started, not the day after Cornelius’s vision.³⁴⁶ This would allow the same rate of travel as in Acts 10:23–24 and makes better sense of the four days in 10:30. It does not appear the most natural way to take Luke’s words here (cf. Origen *Cels.* 2.1) but is possible (perhaps especially on the historical level) in view of his frequent abbreviating technique.

II. HOUSETOPS (10:9)

Palestinian homes had flat roofs, which were sometimes leveled by pushing back and forth a flat stone with a long handle, or a log.³⁴⁷ Rooftops served various purposes, such as drying vegetables or storing items (Josh 2:6),³⁴⁸ drying washed or dyed textiles,³⁴⁹ sleeping (1 Sam 9:26; cf. Tob 9:9–10),³⁵⁰ eating,³⁵¹ recreation and obtaining a better view (2 Sam 11:2; 18:24; cf. Dan 4:29; Jos. *Ant.* 6.49), and talking with neighbors (Luke 12:3;³⁵² private conversation in 1 Sam 9:25; cf. mourning in Isa 15:3; Jer 48:38).³⁵³ Although Luke transforms the roof of earlier Jesus tradition (Mark 2:4) to fit his northern Mediterranean setting,³⁵⁴ changing the tradition here would prove too problematic.

Excavations show that many poor houses had “inadequate ventilation and tiny windows” whereas rooftops offered “privacy and . . . cooler temperatures.”³⁵⁵ Some scholars envision an awning for shade that would keep the site cool,³⁵⁶ arguing that it would be too hot otherwise.³⁵⁷ This suggestion is fairly likely for the hotter summer

343. Bock, *Acts*, 387, has 31 mi.

344. Hengel, “Geography of Palestine,” 62, who cites a 45-mi. march in twenty-eight hours (with three hours’ rest for night) in Caesar *Gall. W.* 7.40–41; 27 mi. in one night (despite harsh conditions) in Plut. *M. Ant.* 47.2; the 42 mi. from Sebaste to Jerusalem in a day (Jos. *Ant.* 15.293; cf. *Life* 266–70).

345. Cf. Haenchen, *Acts*, 347: “The messengers walk throughout the night (with, of course, pauses for rest).”

346. Lake and Cadbury, *Commentary*, 114; C. Williams, *Acts*, 135; Conzelmann, *Acts*, 81.

347. Le Cornu, *Acts*, 558 (noting that rainwater went into the gutters). Galilean homes could be small, clustered around courtyards (Goodman, *State*, 30–31); a Judean tanner’s home by the sea might be more independent and spacious. Rabbi Meir counted homes as a common domain for purposes of calculating Sabbath travel, when roofs of the same height adjoined each other, but the sages disagreed (*m. Erub.* 9:1). On the simple construction of village roofs, see, e.g., Evans, *World*, 13–14 (regarding Nazareth); for the strength of roofs to support weight, see Cotter, *Miracle Stories*, 98–100, and sources she cites.

348. See, e.g., *b. Beṣah* 26b; *Meg.* 28a; *B. Qam.* 29a; *Šabb.* 45a; *Menah.* 86a. Cf. drying grapes in the sun (Aelian *Farmers* 1 [Euthycomides to Blepaeus]); for drying olives, see Goodman, *State*, 31. Le Cornu, *Acts*, 559, cites *t. Ma’aš.* 2:9 (drying figs on the roof), 10 (eating them there), 19 (storing onions, dried figs, or carobs there); *t. Šeb.* 1:12 (growing aloes there).

349. Stambaugh, *City*, 152.

350. Cf. celebration of booths there (Neh 8:16; 11QT XLIV, 7); but it was not usually comfortable (Prov 25:24; cf. 21:9).

351. See *t. Pesah.* 6:11; perhaps relevant here (Acts 10:10).

352. Probably visiting neighbors or others is also implied in the parapet of Deut 22:8; 11QT LXV, 6.

353. Sometimes house roofs were joined, “creating, as still seen in Mediterranean cities, a separate domain above the street, despite the frequent lack of solidarity underfoot” (Goodman, *State*, 31).

354. Luke’s “tiles” fit northern Mediterranean roofs (Luke 5:19) but not the story (such a roof would probably collapse; cf. Aristoph. *Clouds* 1486–89).

355. Stambaugh and Balch, *Environment*, 83; cf. perhaps Judg 3:20–25, though this is not a roof but an upper room (ὑπερφῶν, as in Acts 9:37, 39; for roof chambers, see also 3Q15 X, 1; 11QT XXXI, 6–7).

356. Haenchen, *Acts*, 347; Hanson, *Acts*, 121. Perhaps in this case it would consist of tanners’ leather (Blauklock, *Acts*, 95).

357. Lake and Cadbury, *Commentary*, 114.

months, but the heat might be more appreciated in the cool of fall or winter.³⁵⁸ It was believed that fishermen, unlike some other people, were well inured to the heat of the sun and warmed themselves by it on the decks of their boats;³⁵⁹ this is perhaps relevant for Peter (Luke 5:2–3).

Thus one could be found on a rooftop for various reasons (Luke 17:31).³⁶⁰ But one important use was for worship or prayer if occasion or disposition so warranted,³⁶¹ though not always to the true God (2 Kgs 23:12; 2 Chr 28:4; Jer 19:13; 32:29; Zeph 1:5). People also apparently used roofs for Torah study.³⁶² With houses built adjacent to one another in most cities (though we cannot be sure that this fits Simon's house "near the sea"), most afforded little privacy.³⁶³ Simon's might be larger than average (and its odor might have spaced other homes farther than average), but given Peter's presence, it probably also had more visitors than most (cf. perhaps Acts 10:23), and the roof might afford an opportunity for more private prayer, a practice he could have learned from Jesus (cf. Luke 4:42; 6:12; 9:28; 22:41; for learning from Jesus's prayer, cf. 11:1).

One could ascend to the roof by means of a ladder (*t. Erub.* 7:10; *y. Erub.* 9:1), but Palestinian homes frequently had an external staircase (Mark 13:15).³⁶⁴ Spencer suggests that the Lord here "exposes hypocrisy on a rooftop," as promised in Luke 11:37–12:3, but here "not of the Pharisees, . . . but of his own leading apostle!"³⁶⁵ Whether Luke's mention of the housetop evokes all the nuances of this precise allusion, however (he also employs the term in Luke 5:19; 17:31), is unclear. What is clear is that Peter's vision will be meant for public disclosure. If whatever is heard in inner rooms is proclaimed on housetops (Luke 12:3), how much more what is heard on a housetop.

III. TRANCE BEFORE LUNCH (10:10)

The term for "hungry" (πρόσπεινος) is a biblical hapax legomenon and extremely rare in extant literature; it appears once in a sixth-century quotation (Aëtius Amidenus p. 74, 26) of a first-century C.E. medical writer (Demosthenes Ophthalmicus; BDAG), which coheres with traditions about the author being a physician if (as we think likely) other grounds exist for the identification.³⁶⁶ The shared use by itself would not, however, indicate that the term is a specifically medical one. Yet even if the

358. See Le Cornu, *Acts*, 559. Winter rains would not prevent urgent travel between Caesarea and Joppa, though this would not be the ideal traveling season.

359. Alciop. *Fish.* 15 (Nausibius to Prynnaeus), 1.12, ¶¶2–3; cf. Luke 5:2–3.

360. Used for urban warfare against aggressors below in Xen. *Anab.* 5.2.22–23; Thucyd. 2.4.2; Jos. *Ant.* 13.138, 140; cf. 14.459; *War* 4.25–28.

361. *B. Ketub.* 104a; *y. Ta'an.* 1:4, §1; 3:8, §2; *Pesiq. Rab Kah.* 24:18; cf. *Jdt* 8:5. Sarah so employs her upper chamber (ὑπερφῶν) in Tob 3:17, though this was not a roof (also Dan 6:10). Probably most rabbis would have disapproved a standing posture for prayer on the roof (cf. *t. Ber.* 3:17). Lane, *Mark*, 470, also affirms that roofs were often used for prayer. Some scholars have suggested that the roof could be used here because the tanner's house was unclean (cf. Nodet, "Humanity"); it may have been unclean (see comment on Acts 9:43), but purists might respond that Peter was already unclean by his residence there or that the roof was itself unclean.

362. Le Cornu, *Acts*, 559, cites, e.g., *m. Erub.* 10:3; *Šabb.* 5b; perhaps *b. Yoma* 75b (where one apparently hears a child reading Scripture). See also *b. Erub.* 97b.

363. Wilkinson, *Jerusalem*, 29; Goodman, *State*, 30–31; Freyne, *Galilee, Jesus*, 153; Lewis, *Life*, 65, 67; for cities of the empire in general, see MacMullen, *Social Relations*, 63, 68; Jeffers, *World*, 68–69. Moreover, villages and towns in the Galilean countryside often lay close together (Goodman, *State*, 29; Horsley, *Galilee*, 190).

364. See Jeffers, *World*, 68; Stambaugh and Balch, *Environment*, 83; on stairs to a roof, see also 11QT XLII, 7–10. These roofs typically consisted of beams crossed by smaller pieces of wood, then covered with branches and finally clay (Jeffers, *World*, 68)—not the Greek sort that Luke expects his audience to assume (Luke 5:19, in contrast to Mark 2:4).

365. Spencer, *Acts*, 112.

366. C. Williams, *Acts*, 135; esp. Bruce, *Acts*¹, 217 (citing the doctor Demosthenes in Aëtius Amidenus 7.33).

term is a technical one, Luke's audience would grasp the import from the related and frequent verb πεινάω in view of the rest of the sentence (he wanted to eat). Peter's hunger is a very human trait, perhaps unusual for divine men but not for other heroic protagonists;³⁶⁷ certainly Luke found it acceptable even for the Lord (Luke 4:2).

Noon was also a natural time for hunger, given the frequent pattern of eating then after a hard and full morning of work.³⁶⁸ The midday meal tended to be light, often ending at noon but starting roughly an hour earlier;³⁶⁹ if Peter has not eaten, he will naturally be hungry. That others were preparing the meal could refer to the meeting of his needs in Simon's home by local Christians, or women in Simon's family (cf. Luke 4:39; 10:40), or both working in concert.³⁷⁰ Sharing meals was a common form of hospitality central to early Christians' fellowship together (Acts 2:42, 46). Although Palestinian homes often had fire pits in the floor for cooking or heating, poor ventilation in homes often invited the use of ovens in the outdoor courtyard when it was not the rainy season;³⁷¹ either could be in view here.

If the meal was being prepared before the unexpected guests arrived, and the home provided them lodging (10:23a), the food that was already prepared would probably be shared (especially after the vision in 10:10–16), or all would wait until more food was prepared. In any case, Peter would not eat it without his guests eating, whether they ate together or separately. Gentile guests would lack the sort of dietary restrictions Jews observed.

Although Luke can use ἔκστασις in its more common sense, for astonishment (Luke 5:26; Acts 3:10; cf. Mark 5:42; 16:8), he also employs it for Paul's vision in Acts 22:17, as here (10:10; 11:5). The language undoubtedly alludes to foundational visions earlier in Israel's history and prehistory (Gen 15:12; cf. 2:21).³⁷² It provides an example of the visions and dreams promised in Acts 2:17. Because Peter saw the heavens opened (10:11; cf. Luke 3:21; Acts 7:56), this may be the sort of vision said to be experienced with eyes open (Num 24:4, 16; possibly *1 En.* 1:2).³⁷³ (On "ecstasy," see excursus on prophecy at Acts 2:17–18.)

c. The Vision (10:11–16)

Peter sees a sheet let down from heaven with a "mixed bag" of animals, apparently both clean and unclean. Although the heavenly voice orders Peter to slaughter and consume the food God has provided, Peter objects; it violates his understanding of

367. Ancient narratives sometimes portrayed even deities as hungry (cf. Ovid *Metam.* 6.366, where Latona loses hunger temporarily only because of anger). Exhaustion indicates mortality (Plut. *Table* 8.1.3, *Mor.* 717F, on Alexander; cf. Plut. *Flatt.* 25, *Mor.* 65F). Plutarch portrays Lysimachus's surrender because of thirst as a sign of weakness (*S. Kings*, Lysimachus 1, *Mor.* 183E; cf. Char. *Chaer.* 3.3.17). Rabbis felt that one should avoid interruptions to prayer or study, however (*m. 'Ab.* 3:7; *t. Ber.* 3:20; *b. Ber.* 32b–33a, bar.; *Exod. Rab.* 9:3; cf. *t. Ber.* 2:6).

368. E.g., Alciph. *Paras.* 1 (Trechedeipnus to Lopadecthambus), 3.4, ¶1; see also Stambaugh, *City*, 200 (citing Plut. *Mor.* 726E). Lake and Cadbury, *Commentary*, 115, knew the Roman custom but were uncertain of evidence in the East. See fuller note above on Acts 10:9.

369. Smith, *Symposium*, 20–21; cf. Sallares, "Meals" (earlier Greek and contemporary Roman meals occurred about midday).

370. For culinary diversity, see discussion on cookbooks in Gutsfeld, "Dishes"; but such diversity depended on wealth (cf. Acts 3:6). A distinguished guest might require special care at noon (Philost. *Vit. Apoll.* 3.26).

371. Jeffers, *World*, 68; Safrai, "Home," 733 (citing *m. Ned.* 5:1; cf. *Kelim* 5:1). If the latter is in view, it would presumably need to be far enough from, or shielded from, winds from the sea.

372. Hobart, *Medical Language*, 41, compares the use in medical writers, but it is hardly limited to them (cf. the cognate verb in 2 Cor 5:13; some twenty-seven times in the LXX; eighteen times in Philo; also Jos. *Ant.* 17.247). Philo construes the LXX use in Gen 2:21 as a trance (*Alleg. Interp.* 2.31; *Heir* 257); naturally also the case with Abraham (*Heir* 249, 258, 263); for the prophets, see *Heir* 265.

373. This interpretation of *1 En.* 1:2 works better with Isaac's translation (p. 13) than with Knibb's (p. 57).

Scripture, another source of God's word. God is insistent, creating a conflict that the narrative afterward resolves.

I. A SHEET FROM HEAVEN (10:11)

Explanations of Peter's experience vary. Some ancients expected to experience divine revelation only during contemplation of the perfect realm beyond the heavens (Max. Tyre 11.10). Some modern interpreters prefer psychologizing explanations—namely, that the proposed awning or the ships' sails offshore provided a basis for Peter's vision of the sheet.³⁷⁴ It is not impossible that such sights provided a stimulus for the visual effects in his trance, but such stimuli are hardly necessary; they are unavailable for comment in most visions in Acts or elsewhere (and hence are not necessary to the experience) and in any case were not part of Luke's point.

Likewise, one could attribute the diverse array of potential meat to Peter's hunger, but animals are common in apocalyptic visions, where they often symbolize various nations.³⁷⁵ Dogs, which were unclean, might symbolize Gentiles³⁷⁶ or other oppressors³⁷⁷ or wicked persons,³⁷⁸ and ancient thinkers (especially Gentiles) used "beasts" (including "dogs")³⁷⁹ for unthinking, irrational people led by their passions.³⁸⁰ (For

374. Listed as "not impossible" by Barrett, *Acts*, 506; mentioned with perhaps greater skepticism by Bruce, *Commentary*, 218. Ship's apparatus, including gear (cf. Acts 27:17) and sails, could be called σκεῦος (BDAG cites, e.g., Arrian *Peripl.* 5.2); more important, a sail was often called an ὀθόνη (BDAG lists, e.g., Lucian *Z. Rants* 46; *True Story* 2, 38; *Test. Zeb.* 6:2; *Mart. Pol.* 15.2); linen was used for both sails and theater awnings (Pekridou-Gorecki, "Linen," 620; for sails, Schneider, "Rigging," 593), though a tanner might have animal hides for awnings (Blaklock, *Acts*, 95). A fisherman would be quite familiar with sail scenes. But Luke offers merely a simile, in any case (on which figure see Anderson, *Glossary*, 38, citing Demet. *Style* 80, 89, 160, 273; on broader comparisons, cf. Anderson, *Glossary*, 79–81). One might also connect the tanners' setting for animal hides (Acts 9:43; 10:6) with the command to slay the animals, but Peter's use is to be for food, not the animals' hide. If anything, the "linen" would connect with Jesus's resurrection (cf. the cognate term in Luke 24:12; the tradition appears also in John 19:40; 20:5–7) or signify the value of the setting (Jos. *Ant.* 5.290; 12.117).

375. E.g., Dan 7:3–8; 1 En. 89–90; 4 Ezra 11:39–40; Rev 9:3–10; 13:2; cf. Ford, "Animal Symbolism." Bede *Comm. Acts* 10.12 (Martin, *Acts*, 127) construed the animals as all nations. Animals stand for Israel's righteous in 1QpHab XII, 4 but for wicked Gentile rulers in 4QpNah (= 4Q169) 3 + 4 I, 1–6, 9 (Le Cornu, *Acts*, 563). For animal symbolism in Zoroastrianism (e.g., reptiles, insects, and various other "evil" creatures), see Moazami, "Evil Animals"; for a range of figurative uses in biblical prophets, see Klingbeil, "Animal Imagery." Cf. the figurative individual use in Gen 49:8, 14, 17, 21, 22, 27; *L.A.B.* 24:6.

376. Although, *pace* some commentators (Beare, *Philippians*, 103; Brandon, *Zealots*, 172–73; Theissen, *Gospels*, 62n1), this is not well attested in specific early Jewish sources (Abrahams, *Studies* [2], 195; Johnston, "Interpretations," 596; Vermes, *Religion*, 89). Manson, *Sayings*, 174, cites esp. 1 En. 89:10, 42–43, 46–47, 49; 90:4, though dogs are merely one animal among many here and are mentioned ad hoc (cf. 3 Bar. 3:3); for some other scant references, cf. *t. Beṣah* 2:6; Smith, *Parallels*, 167; on associations with Rome, cf. Hayward, "Pseudo-Jonathan."

377. Pss 22:16; 59:6, 14.

378. E.g., *Exod. Rab.* 9:2. Cf. their association with sexual immorality in *y. Ta'an.* 1:6, §8; *Gen. Rab.* 36:7; Rev 22:15 (though there were good dogs, e.g., *y. Ter.* 8:7; see Keener, *John*, 804; Schwartz, "Dogs"). Miller, "Dogs," points out positive OT uses (such as Job 30:1).

379. E.g., Mus. Ruf. 18B, p. 116.14; Dio Chrys. *Or.* 77/78.29; Plut. *Bride* 7, *Mor.* 139B; cf. Lucian *Book-Coll.* 30. "Dog" was a familiar insult, e.g., Hom. *Il.* 8.527; 9.373; 11.362; 20.449; 22.345; *Od.* 17.248; 22.35; Callim. *Hymns* 6 (to Demeter), line 63; cf. the female derivative in Hom. *Od.* 11.424; 18.338; 19.91. For its application to Cynics, see comment at Acts 14. They were associated with anger (Callim. *Minor Poems* 380), immorality (Theophr. *Char.* 28.3; Plut. *Bride* 7, *Mor.* 139B), uncleanness (Mart. *Epig.* 1.83), lack of bowel control (Phaedrus 4.19), and attachment to dung and sniffing other dogs' rear ends (1.27.10–11; 4.19); more commonly they were linked with birds as scavengers that devoured unburied corpses (e.g., Hom. *Il.* 17.127, 255, 272; 22.42–43, 66–70, 335–36, 339, 348, 353; 23.21, 183–87; 24.211, 411; *Od.* 3.258–60; 21.363–64; 22.476; Eurip. *Phoen.* 1650; Appian *Bell. civ.* 1.8.72; Lucan *C.W.* 7.829). Cf. further comment in Keener, *Matthew*, 416–17.

380. E.g., Lysias *Or.* 2.19, §192; Xen. *Hiero* 7.3; *Mem.* 2.3.4; *Rhet. Alex.* pref. 1420ab.4–5; Dion. Hal. *Epid.* 2.262; Cic. *Rosc. Amer.* 22.63; *Mil.* 12.32; 31.85; *Pis.* 1.1; *Sest.* 7.16; Philod. *Crit. frg.* 52.2–3; Sen. *Y. Ep. Lucil.* 95.31; 103.2; Mus. Ruf. 10, p. 78.27–29; 14, p. 92.21–22; Epict. *Diatr.* 2.9.3, 5; 4.1.127; 4.5.21; Plut. *Cic.* 46.4;

the example of wolves, see comment on Acts 20:29.) But apocalyptic usage of animal images in general is far more relevant for understanding Peter's Jewish vision than would be any one of these specific Jewish metaphoric examples noted above.

The "heaven" or "heavens" opening is common in visions or revelations of God (Acts 7:56)³⁸¹ because heaven was associated with the dwelling place of God (cf. Luke 6:23; 10:20; 12:33; 18:22; 22:43; Acts 2:2; 7:49; 11:9–10), of the exalted Jesus (Luke 24:51; Acts 1:10–11; 2:34; 3:21; 7:55–56; 9:3; 22:6), and of angels (Luke 2:15; 15:7; 22:43); sometimes it was even a surrogate name for God (15:18, 21; 20:4–5; cf. 18:13).³⁸² Thus both Jesus (3:21) and Stephen (Acts 7:56) experienced the heavens opened. That something related to the "unclean" Gentile mission would descend from "heaven" might surprise Peter more than it would the repeated hearer of Luke-Acts; the Spirit supporting the Gentile mission came from heaven (Luke 3:22), and fire on non-Jews, desired by Galilean nationalists, would not (9:54).

The "vessel" (σκεῦος, Acts 10:11, 16; 11:5) might allude to Paul's mission to the Gentiles, since he is described as a "vessel" in 9:15,³⁸³ but the term is appropriate for (among other items) culinary receptacles,³⁸⁴ and the long-range Gentile mission is hardly limited to Paul. The great sheet (ὀθόνην μεγάλην) might evoke a tablecloth³⁸⁵ (though the LXX never uses this term; cf. Num 4:7; Isa 21:5). The use of tablecloths is well documented in Coptic Christian Egypt³⁸⁶ and in medieval Europe of the eleventh and twelfth centuries.³⁸⁷ I have not, however, found extensive literary evidence in Mediterranean antiquity;³⁸⁸ perhaps this stems from the perishable character of cloth and the lesser attention given in literature to the low and comparatively small tables used beside diners' couches.³⁸⁹ (Still, we know of expensive tabletops with

Statecraft 5, *Mor.* 802E; *R. Col. 2, Mor.* 1108D; Dio Chrys. *Or.* 8.14–15, 21; 32.26, 62; Max. Tyre 15.2; 33.7–8; Diogenes *Ep.* 28; Marc. Aur. 3.16; 4.16, 28; Porph. *Marc.* 29.463–65; Eunapius *Lives* 472; Ps.-Callisth. *Alex.* 3.2; 1 Cor 15:32; 2 Pet 2:12; cf. Plato *Prot.* 324B; Plut. *Demosth.* 26.4; 4 Macc 14:14, 18; 4 Ezra 8:30; tyrants in Philost. *Vit. Apoll.* 7.30; 4 Macc 12:13; cf. also Malherbe, "Beasts" (on hedonists). Animals lack much reason (Polyb. 6.6.4; Cic. *Fin.* 2.14.45; 2.33.109–10; *Tusc.* 1.33.80; *Off.* 1.4.11; Arius Did. *Epit.* 2.7.8, pp. 52–53.3–4; Ael. Arist. *Def. Or.* 403, §137D; Max. Tyre 6.1–4; for some reason, cf. Mossman, "Plutarch on Animals") and rhetorical ability (Ael. Arist. *Def. Or.* 379, §126D; 398, §135D; *Panath.* 2, 150D); the bodily element of humans is the part shared with animals (Epict. *Diatr.* 1.3.7, 9; Max. Tyre 7.5; 33.7–8; *Sipre Deut.* 306.28.2).

381. See Ezek 1:1; Luke 3:21–22; Mark 1:11; Matt 3:16; John 1:51; Rev 4:1; 11:19; 15:5; 19:11; 4Q213 1 I, 18; 3 Macc 6:18; 2 Bar. 22:1; *Test. Levi* 2:6; 5:1; *Test. Ab.* 7:3 A; *L.A.E.* 35:2; *Jos. Asen.* 14:2/3; 3 *En.* 31:2; cf. 1 *En.* 14:15; Lentzen-Deis, "Motiv."

382. E.g., Dan 4:26; 1QM XII, 5; 1 *En.* 6:2; 13:8; 83:9; 3 Macc 4:21; Rom 1:18; Diod. Sic. 40.3.4; cf. *m. 'Ab.* 1:3; *t. B. Qam.* 7:5; *Sipra Behuq.* pq. 6.267.2.1; *Sipre Deut.* 79.1.1; 96.2.2; *b. Ta' an.* 14b; *Pesah.* 66b; *'Abod. Zar.* 18a, bar.; *Mo'ed Qat.* 17a; *B. Qam.* 76a; *Nid.* 45a; *Num. Rab.* 7:5; *Ruth Rab.* 7:1; *Ecl. Rab.* 7:8, §1; 7:27, §1; 9:12. "Received into heaven" (10:16) could echo Jesus's exaltation but probably reflects not so much analogy as Luke's style for depicting anything returning to heaven.

383. The apostle to the Gentiles also was "let down" in a basket in Acts 9:25—perhaps viewed by some of his detractors as a dishonorable escape, just as this food is viewed as dishonorable. But any connection (as with Luke 5:19) is tantalizingly weak.

384. See BDAG (for containers of various kinds, including culinary ones, citing, e.g., Aristoph. *Thesm.* 402; Xen. *Mem.* 1.7.5; Aelian *Var. hist.* 12.8; Hdn. 6.7.7; *Jos. Ant.* 7.106; 8.89).

385. Later rabbis used the image of a "set table" with respect to how Moses should explain God's judgments (Exod 21:1; Spero, "Judgments"). Unless this notion was widespread, though, we could not expect Luke to know or allude to it.

386. California Academy of Sciences, <http://www.calacademy.org/research/anthropology/coptic/coptic/Coptweav.htm> (updated May 3, 2004; accessed May 5, 2004; apparently since discontinued). On Coptic textiles in general, see Rutschowskaya et al., "Textiles"; Carroll, *Looms* (for tablecloths, esp. as evidenced in art, see 9).

387. Pritchard, "Textiles," 366–69.

388. The reference (*mappas*) in Pliny E. *N.H.* 19.4.19 is not to tablecloths in the modern sense but to table napkins. Its use may be taken for granted in *m. Šabb.* 21:3.

389. Cf. Carcopino, *Life*, 34; on the low, shared dining tables, cf. Jeffers, *World*, 39; Smith, *Symposium*, 26; Dupont, *Life*, 98–99 (these are in Diaspora settings, but Judeans also shared tables; cf. *m. 'Ab.* 3:3). Even in dry areas, we often have only fragments of fabric from excavations (cf., e.g., Aharoni, *Archaeology*, 136–37).

decorated edges, for example, in wealthy areas of pre-70 Jerusalem.³⁹⁰ Expensive tables might suggest covers.)³⁹¹ We do know that some of the wealthiest households in late antiquity used purple table covers as well as couch covers;³⁹² undoubtedly, less exotic table covers existed as well. But the sheet need not be a tablecloth.

The sheet's "four corners," conjoined with ἐπὶ τῆς γῆς, might represent the universality of all peoples.³⁹³ Although this association is not impossible, it is probably safest to see it simply as reflecting the quadrilateral character of most sheets (cf. Deut 22:12).³⁹⁴ Although Peter is on the roof, not the ground per se, "earth" belongs with the verb, not with the corners.

II. A MIXTURE OF ANIMALS (10:12)

Luke uses biblical idiom, such as "birds of the air," representing the LXX's "birds of heaven" (more than forty times combined with "creeping things" in summaries of creation, Gen 1:20, 26, 28, 30; and of a destructive reversal of creation, Gen 6:7; 7:23; Hos 2:12, 18; 4:3; Ezek 38:20). Likewise, the LXX often defines "creepers" (ἐρπετὰ) or (more often) "beasts" (θηρία, Acts 11:6) as "of earth."³⁹⁵ Lists of animals often appear together, though the three listed here appear in Rom 1:23, the only other NT use of τετράπους.³⁹⁶

Some Gentiles, especially Egyptians (Rom 1:23; see comment on Acts 7:41), were thought to worship such creatures. But God creates all these things (Gen 1:20–30); God then plans to destroy them (6:7; 7:21, 23) but brings representatives of all of them together in the ark (6:7, 19–20; 7:14; 8:1, 17–19). These representatives include both clean and unclean (7:2, 8), though only the clean could be sacrificed (8:20; hence the extra in 7:2).³⁹⁷ Given the pervasive use of this language in the Noah narratives of Genesis, the location of Simon's house as near the sea (Acts 10:6, 32) might possibly support in the sheet from heaven an allusion to Noah's ark.³⁹⁸ Noah was, after all, considered the common ancestor of Jews and Gentiles (see comment on Noahide laws at Acts 15:20). This allusion might be lost on much of Luke's audience, however, and perhaps is even too much to expect from Luke himself; at the very least, the vivid LXX language might recall God's sovereignty and concern for all creatures, as well as Levitical purity considerations.

390. Killebrew, "Furniture," 360. Most of the scarce furniture surviving from ancient Greek and Roman homes is elegant (Cary and Haarhoff, *Life*, 102); for expensive tables, cf., e.g., Hom. *Od.* 10.354; 15.137; Hdt. *Hist.* 1.181.5; Aristotle *Oec.* 1353b.20; Strabo 15.3.7; b. *Šabb.* 119a; *Ketub.* 67b; 77b; *Ta'an.* 25a.

391. Nevertheless, even expensive tables may not have had them; cf., e.g., Ovid *Ars.* 1.638.

392. Croom, *Clothing*, 27 (citing Amm. Marc. 26.8.8; elsewhere one reads 16.8.8; cf. linen cloths of some sort in 30.1.22). For couch covers, see, e.g., Catullus *Carm.* 64.

393. Cf. Isa 11:12; Rev 7:1; 20:8; *Test. Ash.* 7:3/2; *Tg. Ps.-J.* on Exod 39:10. Some church fathers compared these to four corners of the earth (e.g., Bede *Comm. Acts* 10.11B; Arator *Acts* 1; Aug. *Serm.* 203.3 [all in Martin, *Acts*, 126–27]). If we associate ἀρχαῖς with "rulers," one could even think of Judaism's "four kingdoms" over Israel, but Luke's sense of the term as simply "corners" appears elsewhere (BDAG offers Hdt. 4.60; Diod. Sic. 1.35.10).

394. Some might be tempted to associate the four corners with those of the prayer shawl (Jewish tunics had four corners with tassels, Croom, *Clothing*, 131), but in Peter's day, the tzitzit were attached to regular garments, not specifically a tallit; the tallit was not yet connected specifically with prayer (Le Cornu, *Acts*, 562).

395. Acts 11:6 adds "beasts" to the list in 10:12, making a fourfold formula there, with "of the earth" moved back to the first element. The LXX frequently lists "beasts" with "birds" and "creepers"; see LXX Gen 1:30; 7:14, 21; 8:1, 17, 19; Ps 148:10; Hos 2:14, 20; 4:3; Ezek 38:20.

396. This similarity may be coincidental; τετράπους appears more often in the LXX, and Jas 3:7 lists birds, creepers, and "beasts" (as in Acts 11:6) without τετράπους. Haenchen, *Acts*, 348, thinks that the similarity "shows that such lists were customary."

397. Rules identifying animals clean for consumption may be related to animals clean for sacrifice (Houston, "Foods," 330–31).

398. Selwyn, *Peter*, 333, thinks that Peter's vision recalled Noah's flood and came to be associated with baptism. The term for "cloth" was often used for sails, though as we have noted, this usage is not decisive.

More important, the appearance of “all” animals in the sheet probably suggests that they cannot be limited to either clean or unclean.³⁹⁹ But some, at least, must be unclean (certainly the ἐρπετὰ),⁴⁰⁰ which explains Peter’s reticence to eat them. The other, clean animals are not necessarily irrelevant either. It is probably not that Peter does not know how to butcher them in a kosher manner, in contrast to his tanner host; this ignorance would seem strange for a fisherman.⁴⁰¹ But if clean animals are present, their mixture with the unclean might seem to contaminate them for a strict observer of kashrut.⁴⁰²

Jewish people had preferred death to eating “common” (κοινά) food (1 Macc 1:62; cf. Dan 1:8–16; priests in Jos. *Life* 14).⁴⁰³ They were to abstain from Gentile pollutions (4 Bar. 7:37), and some later rabbis cited instances of judgment due to eating Gentiles’ foods (*Song Rab.* 7:8, §1).⁴⁰⁴ Avoiding table fellowship with Gentiles was a major issue (see comment on Acts 10:23; 11:3); Gentiles also viewed it as a sign of separatism and hatred of humanity.⁴⁰⁵ Jewish people protested that their separation (χωρισμός, “division”) from particular foods did not keep them from being good citizens, against those who claimed that it made them haters of humanity or disloyal (3 Macc 3:3–7, esp. 3:4, 7).

That Jews avoided pork, for example, was widely known (and derided)⁴⁰⁶ and diverged greatly from standard practice among most Gentiles⁴⁰⁷ (though there were exceptions).⁴⁰⁸

399. Witherington, *Acts*, 349; contrast Marshall, *Acts*, 185 (who suggests that all were probably unclean). Cf. the gathering of both clean and unclean animals into the ark (Gen 7:8–9).

400. For their uncleanness, see Lev 11:20–21, 23, 29, 31, 41–44; 20:25; 22:5; Deut 14:19; yet they were among God’s good creations (Gen 1:20–21, 24–26, 30), useful for humans (1:26, 28).

401. That is not to imply that fish are present. Haenchen, *Acts*, 348, notes that fish are unmentioned and would be difficult to contain in the sheet.

402. Cf. *b. Nid.* 4a; Lev 7:19; 11:32; but cf. limits in *m. Zebah.* 11:8. Certainly anything touching their carcasses became unclean (Lev 11:24–25, 27–28, 31–38); an unclean person makes clean food unclean (*b. Zebah.* 106a; cf. *Hag.* 24a). What Egyptian priests regarded as defiling to eat they also avoided touching (Frankfurter, *Religion in Egypt*, 199); some cults required abstention from touching pigs (Diod. Sic. 5.62.5; Hdn. 5.6.6).

403. The application of κοινός to foods represents a distinctively Jewish usage (so Jewett, *Romans*, 859).

404. The strictest may have even avoided eating with menstruants (*t. Šabb.* 1:14, R. Simeon ben Eleazar, citing a much older rule), although it is difficult to see how the majority of Palestinian Jews, with one-room homes, could have avoided this.

405. E.g., Tac. *Hist.* 5.4–5; Philost. *Vit. Apoll.* 5.33; cf. Cic. *Flacc.* 28.69; see comment on Acts 16:20.

406. E.g., Epict. *Diatr.* 1.22.4 (cf. 1.11.12–13); Plut. *Table* 4.4.4, *Mor.* 669C; Juv. *Sat.* 6.160; cf. Jos. *Ant.* 2.137; Leary, “Pork and Proselytes”; Leon, *Jews of Rome*, 39; Sanders, *Figure*, 37; Whittaker, *Jews and Christians*, 73–80; Gager, *Anti-Semitism*, 57; Sevenster, *Anti-Semitism*, 136–39. In Plut. *Table* 4.5, *Mor.* 669E–671C, Gentiles debate the reasons for Jewish abstention; the thought of consulting someone Jewish seems not to have occurred to them. Jewish texts also address avoidance of pig (e.g., *Sipra* A.M. *pq.* 13.194.2.11), even in magical texts (*PGM* 4.3079–81); some scholars suggest original health associations with the prohibition (Albright, *Yahweh*, 177–78). Pig bones have turned up in excavations from later Sepphoris (Groh, “Jews and Christians,” 89); but these could come from Gentiles (like those at Masada, Zias, “Bones”), and such bones are missing in pre-70 strata (Reed, “Contributions,” 53). (Dionysiac imagery in Sepphoris stems from the late second or early third century C.E.; see, e.g., Dunbabin, “Dionysus.”) Pig remains are also missing from pre-70 Jerusalem (Bar-Oz et al., “Garbage”). Jewish practice of kashrut remained known in later centuries (e.g., Qur’an 6.147) and perhaps influential (16.115).

407. E.g., Ananius frg. 5; Alciph. *Farm.* 29 (Comarchides to Euchaetes), 3.73, ¶1; Athen. *Deipn.* 9.376D; 9.396B; 14.655F–656B; especially in Rome, King, “Diet”; MacKinnon, “Hog.” “Clean” foods in Lev 11 mostly corresponded to the diet in Bronze and Iron Age Palestine, except for pork (though even that declined; Houston, “Foods,” 330). In sacrifices to particular deities, see, e.g., Phaedrus 5.4.1; Guthrie, *Orpheus*, 154 (citing Aristotle. *Peace* 1.372); Ferguson, *Backgrounds*, 202; among Hittites, *ANET* 351; Moyer, “Purity,” 96, 127.

408. Some other Eastern peoples also avoided pork (Jeffers, *World*, 41; Hesse, “Pigs”; cf. Carpenter, “Deuteronomy,” 477), including Phoenicians (Hdn. 5.6.6), perhaps some Syrians (Lucian *Syr.* G. 54), and Egyptian priests (Hdt. 2.47; Sext. *Emp. Pyr.* 3.223; Plut. *Isis* 5, *Mor.* 352F, 353F; Jos. *Ag. Ap.* 2.141; Lewis, *Life*, 131; *ANET* 10); cf. pigs’ uncleanness among Hittites in *ANET* 209; Moyer, “Practices,” 29; idem, “Purity,” 106. Somehow, however, it appears that Jewish abstainers remained more notorious and ridiculed than others, except perhaps Egyptians.

Jews would rather die than eat pig's flesh, it was thought;⁴⁰⁹ they also saw no difference, Juvenal complains, between eating pork and cannibalism (*Sat.* 14.98–99). Some anti-Semites forced Jews to eat pork or face torment.⁴¹⁰

Most Diaspora Jews observed food laws;⁴¹¹ other peoples would hardly have ridiculed Jews for this practice otherwise. The Diaspora therefore must have had kosher butchers;⁴¹² although only the smallest fraction of evidence from antiquity has survived, one may be known from Rome as early as the third or fourth century.⁴¹³ In the early second century, Christians themselves were supposed to have recognized some foods as forbidden (whether these were Jewish believers keeping kosher or, more probably, whether it indicates wider acceptance of the short list of demands of Acts 15:20).⁴¹⁴ Some other cults,⁴¹⁵ sects,⁴¹⁶ and peoples⁴¹⁷ also had special food regulations. Some of these groups influenced other persons not belonging to the group.⁴¹⁸ Given the Hellenistic intellectual milieu, however, groups had to justify their taboos or risk appearing superstitious to outsiders.⁴¹⁹

Some Jewish people debated among themselves whether there was a higher moral significance to the laws and what this significance was.⁴²⁰ Philo kept the food laws

409. Sext. Emp. *Pyr.* 3.223.

410. E.g., Philo *Flacc.* 96; cf. 4 Macc 5:2, 6; 6:15; cf. carrion meat in *y. Sanh.* 3:5, §2. Sanders, *Jesus to Mishnah*, 24–25, notes that particularly pious Jews often avoided nonkosher food at great cost (Jos. *Life* 13–14; *War* 2.143–44); see earlier, e.g., 2 Macc 5:27; 7:1; Josephus's interpretation of Dan 1:8 (avoiding animal food, *Ant.* 10.190).

411. So Jos. *Ag. Ap.* 2.282; see also evidence in Trebilco, *Communities*, 18. Conservative Judeans, however, might suspect them of idolatry because they attended Gentile banquets, though bringing their own food and drink (*t. 'Abod. Zar.* 4:6; cf. *Tob* 1:10).

412. Rome accommodated Jewish customs even in Jews' various enclaves (Winter, *Left Corinth*, 288–93).

413. Williams, "Bubularius."

414. Lucian *Peregr.* 16.

415. E.g., garlic in Cybele's cult (Athen. *Deipn.* 10.422D); temporary meat abstinence for a magical ritual (PGM 4.52–55); various foods for priests of Isis (Apul. *Metam.* 11.21; Plut. *Isis* 2, *Mor.* 351F). Pigs were used in some cults' sacrifices (Klauck, *Context*, 99; Aune, "Religion," 920; Manetho *Aeg. frg.* 81 [from Aelian *Nat. An.* 10.16]) but were kept away from some cults (Diod. Sic. 5.62.5; Sil. It. 3.22–23). Different cults preferred different animals (Aune, "Religion," 920; Sext. Emp. *Pyr.* 3.220–22); e.g., the cow was sacred to Isis (Diod. Sic. 1.11.4).

416. Most notably Pythagoreans, who avoided especially meat and beans, Diod. Sic. 10.6.1; Plut. *Eating Fl.* 1.1, *Mor.* 993A; Lucian *Dial. D.* 415 (6/20, Menippus and Aeacus 3); *Phil. Sale* 6; *Cock* 4–5, 18; Philost. *Vit. Apoll.* 1.1, 8, 21; 6.10–11; 8.5, 7; *Ep. Apoll.* 8, 43, 84; Iambl. *V.P.* 16.68–69; 24.106–9; 30.186; Diog. Laert. 8.1.12–13, 19, 24; cf. Iambl. *V.P.* 21.97–98; 32.226 (in Iambl. *V.P.* 31.191, 193–94, they preferred death to harming beans). Cf. Grant, "Dietary Laws," comparing most Pythagoreans, Jews, and Christians. Some others also taught vegetarianism (Edwards and Reasoner, "Rome," 1015; Ovid *Metam.* 15.72–73, 75–110, 453–78; Orphics in Linforth, *Arts of Orpheus*, 263; Guthrie, *Orpheus*, 16–17, 197, 201), at least as a preference (Mus. Ruf. 18A, p. 112.19–23). For the diversity of philosophic preferences, cf., e.g., Pliny E. *N.H.* 20.9.19; Sen. *Y. Ep. Lucil.* 95.25; for Cynics' usual rejection of dietary restrictions (despite their simple diet), see Downing, *Cynics*, 114–15.

417. E.g., Britons (Caesar *Gall. W.* 5.12); Romans (Plut. *Rom. Q.* 21, *Mor.* 268E, avoiding woodpeckers); Libyans (Sext. Emp. *Pyr.* 3.223, avoiding sheep); Egyptians (abstaining from some kinds of fish, Plut. *Isis* 7, *Mor.* 353C; Gane, "Leviticus," 300, notes that most traditional Egyptian restrictions varied locally); Syrians, avoiding fish (Diod. Sic. 2.4.3; Artem. *Oneir.* 1.8) and doves (Sext. Emp. *Pyr.* 3.223); Indians (avoiding meat, Hdt. 3.100); Assyrians (*ANET* 391); perhaps not Hittites (Moyer, "Purity," 110). On varying cultural tastes, see, e.g., Aeschylus *Suppl.* 761. Cf. discussion in Schedl, *History*, 2:186. For food restrictions also among peoples today, see, e.g., Mbiti, *Religions*, 65, 164, 169; Luzbetak, *Church and Cultures*, 74–75; Boyer, "Folk Psychiatry," 409; Schmidt, "Psychiatry," 144; Fuchs, "Techniques," 133 (holy persons); Umeh, *Dibia*, 129 (avoiding "some European foods"); Turner, *Drums*, 174 (for particular rituals); Ndofunso, "Prayer," 594 (pig and monkey, among Kimbanguists influenced by Scripture).

418. E.g., Romans in a state of holiness (Plut. *Rom. Q.* 95, *Mor.* 286D) and Pythagoreans (see above) avoided legumes; the practice might ultimately go back to Egyptian priests (Plut. *Isis* 5, *Mor.* 352F).

419. Barclay, *Jews in Diaspora*, 434.

420. Cf., e.g., *Sipre Deut.* 75.2.1. Cf. the private view attributed to Luke's contemporary Johanan ben Zakkai (but reported much later) in Daube, *New Testament and Judaism*, 142; Flusser, *Sage*, 38 (surprisingly similar to Mark 7:14–23).

literally but found in them allegorical significance that led to higher moral behavior.⁴²¹ Nor was Philo the first Alexandrian Jew to think in these terms.⁴²² (Luke, in any case, has inherited a tradition in which even Pharisees were spiritually impure; Luke 11:39–42, 44.) For food offered to idols, see comment on Acts 15:20.

III. GOD'S COMMAND TO EAT (10:13)

While others prepare Peter's midday meal (Acts 10:10), God offers him food from heaven whose uncleanness is (especially given its heavenly origin) utterly shocking. Peter's hunger (10:10) was mentioned probably not to provide a psychological explanation for the vision⁴²³ (which probably would not have occurred to most ancient hearers) but to emphasize the piety of his resistance to the idea of eating nonkosher food in 10:14.⁴²⁴

The voice is presumably like the rabbinic *bat qol* and its earlier analogies, though certainly God spoke often enough in Scripture (including in visions; see fuller comment on Acts 9:4). The command to "get up" fits a common pattern in revelations (e.g., 9:11; see comment on Acts 9:4).⁴²⁵ The command to "kill and eat" might be construed in a cultic manner;⁴²⁶ although sacrifice might not be—and priestly butchering certainly is not—in view in Luke 15:23, 27, 30, this idea is present in Luke 22:7 (though dependent on Mark 14:12); Acts 14:13, 18 (cf. also 1 Cor 5:7; 10:20; not in Matt 22:4; John 10:10). The conjunction of killing and eating is usually sacrificial in the LXX (Gen 31:54; Exod 34:15; Deut 12:15, 21; 27:7; 1 Kgs 19:21; Hos 8:13).⁴²⁷ Yet it also can simply refer to gaiety in feasting (Isa 22:13) and seems to have this sense in the only other conjunction of the terms in Luke-Acts (Luke 15:23).⁴²⁸ But regardless of how Peter might kill the animals, genuinely eating them would be difficult;⁴²⁹ no provision exists here for cooking.⁴³⁰ Peter stays with a tanner (Acts 9:43; 10:6), who would have other use for animals; Peter's use here, however, is to be as food.

IV. PETER'S RELUCTANCE (10:14)

Peter's initial resistance to God's summons (10:14) resembles Ananias's objection concerning Saul (9:13–14) but contrasts with Cornelius's immediate obedience (10:7).⁴³¹ Luke is not portraying Peter as disobedient (cf. the apostles' misunderstanding-

421. See Philo *Spec. Laws* 4.100–118; Rhodes, "Diet"; Sanders, *Jesus to Mishnah*, 273. Philo was critical of extreme allegorizers (*Migr.* 89–93; Hay, "Extremism"). Pigs were thought unable to control their sexual appetite (*Xen. Mem.* 1.2.30).

422. See *Let. Aris.* 128–29, 147 (cf. 223); cf. *Test. Ash.* 2:9–10. Some scholars think that the *Letter of Aristeas* reflects Pythagorean influence (Berthelot, "Interprétation symbolique"). Some ancients also allegorized regulations concerning Isis's priests (which included food rules; see Plut. *Isis* 4, *Mor.* 352DE).

423. Pilch, *Visions*, 9, notes the effect of sensory deprivation (see comment on Acts 13:2 for fasting and revelations); note also the noonday heat here and in 26:13 (but balanced by the mention of nocturnal visions, 16:9; 18:9). In Luke's theology, God authors natural conditions, so natural elements would not preclude divine revelation; dreams are from the Spirit of prophecy (Acts 2:17).

424. The warning against eating before prayer times (presumably to avoid praying late; from *m. Šabb.* 1:2 in Le Cornu, *Acts*, 561) might be relevant if widespread, but it may be isolated.

425. Some (e.g., Gaventa, *Acts*, 166) instead contrast this command with Peter's command to Aeneas and Tabitha (Acts 9:34, 40), who, unlike him, are ready to obey.

426. By itself, killing might in a Roman setting evoke the slaughter of animals in the arena for public entertainment (on which, see, e.g., Lindström, "Animals"), but conjoined with eating—the emphasis here regarding unclean foods—it must mean more than this.

427. For a suggested allusion to Deut 12:13–27, see Dion, "Vision de Pierre." 1 Sam 14:34 is not cultic.

428. Most (e.g., Conzelmann, *Acts*, 81; Fitzmyer, *Acts*, 455; pace Barrett) doubt cultic connotations here.

429. Food would be consumed without benefit of forks, which may not predate the Middle Ages (Baratte, "Cutlery"; but cf. the possibility of a few in Baratte, "Table Utensils").

430. Abbott, *Acts*, 125.

431. Park, "Barriers," also notes the paired visions of chs. 9 and 10 and underlines the resistance to the second vision in each.

ing in 1:6–7); rather, the apostle (like Ezekiel in Ezek 4:14) has scriptural reservations.⁴³² (Thus, after the clear word of Acts 10:20, he does obey immediately, 10:21.) Peter is thinking of Lev 11, not Ezek 4; for Luke and his audience, however, Peter's words echo Ezek 4:14.⁴³³ As God instructed the prophet-priest to eat food that contravened the normally acceptable diet, God could do the same with his apostle.

Some scholars have plausibly argued that the "common" (as opposed to the "unclean") animals may refer to the normally clean kinds, here rendered impure by their contact with the unclean ones.⁴³⁴ (Thus the "common" animals could represent Jews defiled by contact with "impure" Gentiles.)⁴³⁵ The vision might concern both groups, but the terms are synonymous on a popular level, where *κοινός* can mean what is "unclean" (1 Macc 1:47, 62; Jos. *Ant.* 3.181; 11.346; 12.320).⁴³⁶ Some early Christians also employed the term this way (Mark 7:2, 5; Rom 14:14; Heb 10:29; Rev 21:27); most significantly, Peter uses the term this way later in the same context (Acts 10:28, along with "unclean"). His application to Gentiles whom God "cleansed" (15:8–9) (and to whom he gave the Spirit, 10:47) renders any real distinction between the adjectives unlikely.⁴³⁷

Luke portrays Peter here, like Mary (Luke 2:21–24) and Paul (Acts 18:18), as a pious and faithful Jew, at least regarding ritual practice. In the Gospel, Peter also functions as an example of the motif of sinners responding to Jesus (Luke 5:8), but that portrayal involved his heart (and was provoked by awe, 5:9), not dietary regulations. To approximate Peter's revulsion, we might think of foods accepted in some cultures but revolting in our own, then add to this revulsion religious scruples as well.

V. GOD'S RESPONSE (10:15–16)

The voice, correcting Peter's inappropriate attitude, commands him to stop regarding as common what God has cleansed (Acts 10:15).⁴³⁸ This passage should probably be included among the early Christian texts that challenged the necessity of kashrut, at least for the Gentiles (Mark 7:18–19; probably Rom 14:2–3; Col 2:21–22; 1 Tim 4:3; Heb 13:9).⁴³⁹ Some scholars cite a later Jewish tradition about the cleansing of

432. Gaventa, *Acts*, 166, compares Ananias's also objecting to God's plan (Acts 9:13). Peter does seem more adamant than Ananias, however.

433. As commonly noted, e.g., Boismard and Lamouille, *Actes*, 2:127; Weiser, *Apostelgeschichte*, 264; Longenecker, *Acts*, 183; Kistemaker, *Acts*, 379.

434. House, "Defilement by Association"; Witherington, *Acts*, 350. "Common" sometimes simply means "public" as opposed to private (2 Macc 4:5; 15:6; Men. Rhet. 1.1, 331.6), developing the idea of something shared together (e.g., Sir 50:17; 2 Macc 8:29; 9:21; 10:8; 12:4; 15:36; 3 Macc 2:33; 4:4; 7:17; 4 Macc 3:21); it need not signify uncleanness in creation (Wis 7:3; Sir 18:1). Kilgallen, "Acceptable," distinguishes "clean" from "saved"; see comment below.

435. Parsons, "Defiled AND Unclean," emphasizing the conjunction; also Smith, "Refutation"; idem, "Function of Refutation," 112.

436. Johnson, *Acts*, 184 (also noting the use in *Let. Aris.* 315 for "profane" people); Fitzmyer, *Acts*, 455; deSilva, *Honor*, 285–86n5.

437. DeSilva, *Honor*, 286n5.

438. That the negation of the present imperative means to stop what he is doing, as often, is clear here; cf. Acts 18:9; 20:10; Bruce, *Acts*¹, 218. With the juxtaposition of "purified" and "impure/common," Parsons, *Acts*, 146, compares rhetorical *commutatio* (*Rhet. Her.* 4.28.39).

439. These claims seem to stem from Jesus's teaching, the relevance of which was probably discovered in the context of the Gentile mission (cf. 1 Cor 9:21; Gal 2:12–14), rather than specific exegesis of the OT. Mark 7:15 is undoubtedly authentic (see Holmén, *Covenant Thinking*, 239–49), though initially construed only as relativizing, rather than abrogating, food laws (241, 245–45). Though Matthew must have respected Mark's orthodoxy (he reproduces most of his material), he did not find Mark's explicit application relevant for his own Jewish audience (Matt 15:17–18; cf. Keener, *Matthew*, 413–14). Later Gentile Christians widely believed that NT teaching abolished the distinction between clean and unclean foods; see, e.g., Chrys. *Hom. Rom.* 25; Novatian *Jewish Foods* 5.6; Diodore of Tarsus, on Rom 14:14, in *Pauluskommentare* 110 (all in Bray, *Romans*, 346).

unclean animals in the world to come, as they were clean before Noah's day;⁴⁴⁰ this tradition is probably too late to constitute background for this text, however.⁴⁴¹

The primary point, in any case, is not the cleansing of foods but the cleansing of people who eat them (Acts 10:28).⁴⁴² Not calling foods impure in context refers to not calling Gentiles impure,⁴⁴³ but there is a reason that the image for Gentiles involves cuisine.⁴⁴⁴ The image of pure foods represents the Gentiles in two ways. First, because ancient moralists used the language of external "purity" also for the soul and moral behavior,⁴⁴⁵ the analogy between "pure" foods and pure people was a natural one.⁴⁴⁶ But second, table fellowship between Jew and Gentile was a major factor in emphasizing Gentiles' impure status. Food purity is related to the basis for table fellowship with Gentiles (cf. esp. 15:20, 29) and is an important issue in Peter's interaction with Cornelius, at least from the perspective of its critics within the Jerusalem church (11:3). Both in Rom 14:2–23 (in the entire context of Romans) and in Mark 7:19 (if closely related to its following context), the debate over pure foods also addresses the welcoming of Gentiles into the Jesus movement.

Part of the original purpose of the kashrut was separation (Lev 11:44); various nations had their own respective food customs (see comment above on Acts 10:12). Acts 10 does not forbid the usefulness of kashrut for Jews, but it forbids making food rules (except the minor ones in Acts 15:20, 29) a basis for eating together.

Not all Gentiles are included in "what God cleansed"—only those "cleansed" (15:9) and "set apart, made holy" (26:17–18) by faith. Some scholars regard the cleansing here as ritual cleansing preliminary to receiving the gospel (10:28), distinct from the cleansing of conversion (11:14; 15:9).⁴⁴⁷ It might, however, refer to cleansing at conversion, followed by table fellowship (10:48). Most likely Luke employs the image

440. Witherington, *Acts*, 350. See *Midr. Pss.* 146:7 (in Davies, *Torah*, 57–58; also Le Cornu, *Acts*, 579, though [probably rightly] not seeing that as the background here). Another later tradition claims that no meat coming from heaven can be unclean (*b. Sanh.* 59b in Le Cornu, *Acts*, 563). But in Noah's day, cf. already Gen 7:2, 8; 8:20.

441. The entire theme of adaptations in the Torah in the eschatological era (e.g., Davies, *Torah*, 70–74, citing, e.g., *Tg. Isa.* 12:3; *Eccl. Rab.* 2:1; 12:1; *Tg. Song* 5:10; *Yal. Isa.* 26) is mainly late and rare (Schäfer, "Torah"; Urbach, *Sages*, 1:297–302, 309; Barth, "Law," 154–56; Keener, *John*, 358–59).

442. For the focus on people rather than on foods, cf. Miller, "Vision."

443. That is, the unfolding narrative interprets the imagery in a manner distinct from the way one might construe it taken by itself, with reference exclusively to food (see the discussion in Humphrey, "Collision," 80–82, contrasting [82] the more explicit technique of angelic interpretation in apocalyptic; also Humphrey, *Voice*, 76–79). Noting the conflict otherwise with Acts 15:20, Wahlen, "Visions," argues that the vision applies to people and *not* to food; the Jerusalem church may have so applied it in Cornelius's case.

444. Marshall, "Acts," 578, does think that God has also cleansed foods (with Pesch, *Apostelgeschichte*, 1:339; and Hübner, *Theologie*, 3:132, though the latter's view that God was annulling much of the Mosaic law might not have occurred to Peter, who may think in terms of God making provision for Gentiles without retracting the appropriateness of food customs in another setting).

445. E.g., *Mus. Ruf.* 3, p. 40.17, 28; 4, p. 44.25; 16, p. 104.35; 18B, p. 118.4–5; *Epict. Diatr.* 4.11.3, 5; 11.8; *Encheir.* 33.6, 8; Arius Did. *Epit.* 2.7.5b.12, pp. 26–27.20–21; *Men. Rhet.* 2.10, 416.7–8; *Iambl. V.P.* 16.70; *Philost. Hrk.* 7.3; *Porph. Marc.* 11.204; 15.255–56; 24.374–76 (cf. also 23.368; 24.374–76; 26.402–3); *Test. Reub.* 6:1. This is not to suggest that ancient Judaism simply conflated ritual and moral impurity (see Himmelfarb, "Impurity and Sin"); Klawans, "Purity," 283, argues that only Qumran, in fact, identified the two (and [275] that the rabbis normally distinguished impurity from sin). On purity in ancient Judaism more generally, see, e.g., essays in Haber, *Purify*.

446. Cf. also "pure" and light foods that keep the soul "pure" and light, hence reader to ascend to the heavens (*Mus. Ruf.* 18A, p. 112.27–28; see the context in pp. 112.11–114.8).

447. Cf. Dunn, *Baptism*, 79–80. Kilgallen, "Acceptable," distinguishes "unclean" (Acts 10:28), "acceptable to God" (10:35), and "saved" (11:14), so that all are clean without all being saved; but if 15:9 speaks of the same kind of cleansing, it speaks against this interpretation. Menzies, *Empowered*, 217, suggests that "cleansing" in 15:9 represents conversion but is distinct from the subsequent Spirit reception (15:8). See comment on each of these verses.

imprecisely to straddle both concepts: Peter should already treat them as potentially pure, although the actual cleansing comes through faith (15:9).

Various explanations could be offered for why the vision is repeated three times (10:16); is it repeated once for each of the three visitors (10:7; cf. 11:10–11)? More plausibly, does it match Peter's three denials, with Peter again resisting God's purpose (Luke 22:34, 61)? Most likely (though not necessarily incompatibly with the previous suggestions) it is repeated three times for emphasis, like the accounts of Cornelius's and Paul's conversions (Acts 9:1–11:18; 15:7–9; 22:6–21; 26:10–18).⁴⁴⁸ Dreams could be repeated for emphasis (Gen 40:1–8). The "vessel" (σκεῦος) here is the sheet or table cloth, so to speak; "vessel" is a generic term that Luke employs in various ways (Luke 8:16; 17:31; Acts 9:15; 27:17), though regularly for this object (Acts 10:11, 16; 11:5).⁴⁴⁹

4. The Apostle and the Occupier Meet (10:17–33)

After much divine arrangement, the apostle meets the representative of Rome—from a typical Judean or Galilean perspective, a representative of the occupying power. Surmounting his view that Gentiles are unclean, Peter welcomes Cornelius's hospitality.

a. Welcoming the Gentiles (10:17–23)

Luke devotes nearly as much space to Peter meeting and providing lodging for Cornelius's agents (10:17–23) as to Cornelius's (10:1–8) or Peter's (10:9–16) visions. This section of the narrative is essential because it portrays Peter's understanding of and obedience to the vision, what appeared (certainly in retrospect) a major turning point for the church's multiethnic future.

I. GENTILES ARRIVE (10:17–18)

Peter's perplexity in 10:17 is not an unusual response to a vision (cf. Luke 1:12, 29).⁴⁵⁰ Luke elsewhere employs the specific term used here for perplexity (διαπορέω) for overwhelming astonishment at miracles, elsewhere attributed to unbelievers or outsiders (Luke 9:7; Acts 2:12; 5:24).⁴⁵¹ As Gaventa points out, Luke rhetorically emphasizes the pivotal character of the event by a series of words in their intensive forms: "greatly puzzled" (*diaporeō*), "asking" (*dierōtaō*), "thinking" (*dienthumeō*), and "hesitation" (*diakrinomai*) all bear the same intensive prefix (*dia*).⁴⁵²

Because people of related trades often lived in the same districts, tanners normally lived outside or at the edge of a city,⁴⁵³ and the angel had specified "by the sea"; the

448. Triplets were widely used in rhetoric (Aune, *Dictionary of Rhetoric*, 473); Dunn, *Perspective*, 115, also notes their prominence in oral storytelling; cf. Proclus *Poet.* 6.2, K171.1–5 on Homeric triple repetition. The idea that repetition of a voice twice represents an evil spirit but three times an angel (*L.A.B.* 53:4, referring to 1 Sam 3:4, 6, 8; cf. the superstition of pairs in rabbinic literature, *b. Pesah.* 110a, bar.; *B. Meši'a* 86a; *Qidd.* 29b; perhaps broader in Virg. *Ecl.* 8.75) is not relevant to Luke's worldview (cf. Acts 9:4).

449. It could evoke a Levitical usage if the context demanded (e.g., Exod 25:39; 27:3; 30:27–28; 31:8; 35:13–16, 22; 37:16; 38:3; 39:33, 36, 38, 40; 40:9–10; Lev 6:28; 8:11; 11:32–33; 1 Kgs 7:51; 2 Chr 4:16; 36:19; Ezra 1:6–11; Dan 5:2, 23), one of its commonest OT uses, but its use in the LXX (267 times) is also generic.

450. E.g., *1 En.* 90:42, though there it is because of what appears to be bad news.

451. Elsewhere in earliest Christian texts, only in the visionary text *Herm.* 79.5–6, though ἀπορέω (as in Acts 25:20), which sometimes bears a similar meaning, is more common (I count nine uses).

452. Gaventa, *Acts*, 167. A single case might represent Koine inattention to form, but four examples are clearly rhetorically significant.

453. See Rohrbaugh, "Pre-industrial City," 135, 145 (citing Sjöberg, *Preindustrial City*, 97–100). Jewish tanners might work separately from Gentile ones, but Joppa was predominantly Jewish in this period.

messengers, who had been nearing the city about noon (Acts 10:9), probably located the neighborhood quickly. After that, it was most natural to request directions (see comment on Acts 9:11).⁴⁵⁴ Given that Simon was a tanner, odor might have also aided their quest.

The gate may suggest a house of considerable means (see comment on Acts 12:13), able to provide the apostle sufficient hospitality and care (cf. Luke 10:5–7). A location by the sea (or one that produced unpleasant odors) may have allowed for more space than in the heart of Caesarea’s business districts anyway, but Simon may have acquired some means. Less likely, this might represent a gate to “a craftsman’s quarters”⁴⁵⁵ (with the residence behind or above the workplace) or perhaps even a business district or a street entered by a gate. Although complete strangers might not enter unannounced anyway, this might be especially true if a soldier was in attendance (Acts 10:7). It was respectful to stand outside (Deut 24:10–11); the messengers enter only once invited (Acts 10:23).

We cannot be certain whether the Gentiles asked if Peter lodged there (10:18) because they had some doubt about their instructions (cf. 10:6), because directions other locals had offered had been uncertain, because Simon was such a common name that they needed to be sure that they had the right house, because Peter might have moved on since the revelation,⁴⁵⁶ or because this was a polite, nonthreatening way to ask if they might see him.⁴⁵⁷ The term for “inquire” here (ἐπυνθάνοντο) is characteristically Lukan (Luke 15:26; 18:36; Acts 4:7; 10:29; 21:33; 23:19–20, 34), appearing only three other times in the NT, twice in the Apostolic Fathers (*Barn.* 13.2; *Diogn.* 1.1), and a few more times in the LXX (esp. in Maccabean literature, 2 Macc 3:9; 3 Macc 1:13; 5:18, 27; 4 Macc 9:27; 11:13).

II. GOD ENDORSES THE GUESTS (10:19–21)

Now the Spirit (Acts 10:19), the direct and normal agent of divine revelation (2:17–18; cf. 16:7; probably 19:21) and prompter of the Gentile mission (1:8), provides the interpretation for Peter’s vision. The unclean animals that God cleansed represent these Gentiles. In claiming that he has sent them, God claims responsibility for them.⁴⁵⁸

Sometimes those who went to inquire of oracles found that their mission was already known (cf. 1 Sam 9:19–20; Plut. *Cim.* 18.7); here the Spirit prepares Peter to greet the inquirers, though he does not yet know their mission (Acts 10:21). The Spirit’s specific direction to speak with Gentiles here parallels that in 8:29 (see comments there), in both instances reflecting the promise that the Spirit would guide God’s servants in evangelizing cross-culturally (1:8). That the Spirit identifies them initially generically as “three men” (10:19; 11:11) rather than more specifically as

454. See Ling, “Stranger in Town”; cf. 1 Sam 9:11, 18. In Galilee, groups of homes typically surrounded courtyards and were reached by alleys from larger streets (Goodman, *State*, 30); the same was likely true in Damascus.

455. Longenecker, *Acts*, 184.

456. The term ξενίζω does not require the assumption of a quickly passing stay (see BDAG), but most of the other uses in Acts (which accounts for 70 percent of NT uses) refer either to this occasion (Acts 10:6, 18, 32) or to stays of only one to three days (10:23; 21:16; 28:7). Luke might play on the “surprised” sense of the term (cf. 17:20), given Peter’s vision, but such puns are not characteristic of Luke; likelier is a connection with housing being shared with the guests in 10:23.

457. For roundabout ways of making requests (e.g., John 1:38; 2:3), cf. Keener, *John*, 469–70; Bailey, *Peasant Eyes*, 108.

458. This is not quite the same as an agent consciously and legally representing the sender or a herald (cf. Keener, *John*, 313–14), but it involves identifying with them and assuming responsibility for their trustworthiness as one would in a letter of recommendation (see discussion at Acts 9:2).

Gentiles (the issue at hand; contrast 11:3) emphasizes their common humanity (10:28, 34–35).

Peter's descent (10:20) was probably via stairs on the side of the house, as was common in Judean homes.⁴⁵⁹ Luke uses διακρίνω only four times, all in connection with this account (11:2, 12; 15:9), but only here and in the parallel 11:12 possibly for doubting or questioning.⁴⁶⁰ Even here the term may have the idea of “making distinctions” (regarding Jew and Gentile).⁴⁶¹ Although technically Cornelius had sent the men (10:8, 33), he had done so at the command of the angel of God (10:5), who spoke for the God who now spoke to Peter. God could “send” people without their knowledge (e.g., 1 Sam 9:16).

Peter obeys the Spirit's instructions (Acts 10:21). Earlier he had accompanied messengers in a case involving corpse uncleanness (9:38–39), but such events were less avoidable in Peter's circle than the sort of uncleanness he would now be viewed as risking (cf. 10:28). Whether Peter could distinguish the two servants as Gentiles (rather than hellenized Jews) from their appearance we cannot say, but the soldier (10:7) would be obviously a Gentile. “I am the one you are seeking [ζητείτε]” reflects the Spirit's words in 10:19, “See, three men are seeking [ζητοῦντές] you.”⁴⁶²

III. THE GENTILES' INVITATION (10:22)

The emissaries present the supplicant in the best possible terms, seeking to commend Cornelius's efforts to follow Judaism to Peter the Jew. That he was well spoken of (even “borne witness to”) by the Jewish people recalls Luke's centurion in Luke 7:3–5. That he is well spoken of “by the whole nation”⁴⁶³ is, of course, hyperbole, or Peter would not need to hear about him.⁴⁶⁴ Praise was, however, the appropriate response concerning a benefactor;⁴⁶⁵ although Greeks associated public benefaction especially with “entertainments or buildings” (cf. Luke 7:5), caring for the poor (Acts 10:2) would also count.⁴⁶⁶ That they present him as “righteous” may link him with other honorable figures in Luke's story (Luke 1:6; 2:25; 23:50), but we need not presume, based on their epideictic speech, that he is already converted (cf. Luke 14:14; Acts 24:15). In Luke's theology, those who first admit their unrighteousness are those who can receive

459. Stambaugh and Balch, *Environment*, 83; Jeffers, *World*, 68; Safrai, “Home,” 731; also Le Cornu, *Acts*, 572 (though her correct comment about houses being built around a common courtyard off an alley would probably not apply to a tanner's house by the sea).

460. A usage not found in classical Greek (BDAG; Anderson, *Rhetorical Theory*, 239n105) but attested in the NT, especially in connection with faith (Mark 11:23 followed by Matt 21:21; Rom 4:20; 14:23; Jas 1:6; perhaps Jude 22). Paul and James both preserve the more traditional use of the term as well.

461. Smith, “Refutation,” also suggesting that its use in Acts 11:12 could function as a double entendre (referring to “distinguishing” but heard by the audience as “doubting”); see further Smith, “Function of Refutation,” 112–14. Parsons, *Acts*, 147, also suggests a play on words (citing *Rhet. Her.* 4.53.67). Some plausibly prefer a traditional sense of the term here, involving conflict (see Spitaler, “Doubting”), in 10:20 a warning against resisting the Spirit (Spitaler, “Shift,” finds no evidence for a semantic shift in subsequent authors).

462. Luke sometimes uses πάρεμι, the term for their “coming” in Acts 10:21, for appearing before honorable persons (Acts 12:20; 24:19; again for Peter at 10:33), but this is not an essential part of its meaning (17:6; Luke 13:1; cf. BDAG).

463. “The Jewish nation” functions as “an official designation” in documents (Conzelmann, *Acts*, 82, citing 1 Macc 10:25; 11:30, 33; Jos. *Ant.* 14.248; but for the phrase elsewhere, cf., e.g., 1 Macc 8:23, 25, 27; 13:36; 15:2; 2 Macc 10:8; Jos. *Ant.* 11.123, 184, 270, 303, 340; 12.6, 135, 357, 412, 417; 13.1, 38, 48, 126–27, 143; 14.196, 199, 212, 248, 320).

464. Such hyperbolic praise of a subject was common (e.g., Lysias *Or.* 2.1, §190; Val. Max. 2.7.5; 3.8.ext. 1; Pindar *Nem.* 4.33–34; *Ol.* 2.95; *Pyth.* 4.247–48; Mus. Ruf. 10, p. 78.22; 1 Macc 9:22; John 21:25; see further Keener, *John*, 1214, 1241–42).

465. E.g., Pliny *Ep.* 6.18.2; Suet. *Tit.* 7.3; *Apoll. K. Tyre* 17; pervasive in civic inscriptions (e.g., *CIL* 14.409; *ILS* 6146, in Sherk, *Empire*, §182, p. 240; cf. Harrison, *Grace*, 40–43). This was also true in Diaspora synagogues (e.g., Kroll, “Greek Inscriptions”).

466. DeSilva, *Honor*, 125–26n9.

Christ (Luke 5:32; 15:7; 18:9; 20:20). Naturally, Gentiles would not normally appear “righteous” (compare Luke 18:32 with 24:7; 22:25; Rom 9:30; 1 Cor 5:1; Gal 2:15).

The term ἐχρηματίσθη signifies a revelation or prophecy in Luke’s writings (Luke 2:26; Acts 11:26), dreams in Matthew (Matt 2:12, 22), and divine communication in Hebrews (Heb 8:5; 11:7; 12:25); it is revelatory also in a number of LXX passages (Jer 25:30; 26:2; 29:23; 30:2; 36:2, 4).⁴⁶⁷ But Jewish people borrowed the usage from pagan Greek, and so even apart from the piety of Cornelius’s servants (as members of his house, Acts 10:2) and the soldier (10:7), we should not be surprised at the language.⁴⁶⁸ Luke does not provide a verbatim repetition of the visions, as if in a ritual text, but follows the rhetorical preference for paraphrase.⁴⁶⁹ (The phrase “holy angel” is not meant to reflect the Gentiles’ ignorance [cf. Luke 9:26; Mark 8:38; Rev 14:10].)

IV. THE JEWISH HOME’S HOSPITALITY (10:23)

Despite the possible haste of the original journey (for the debated possibility, see comment on Acts 10:9), the return journey is leisurely enough, demanding no night travel. Especially if the messengers traveled part of the night to reach Peter, they would need to rest before their return journey began, and the hospitality obligations of feeding them (Acts 10:23) would leave little enough of the afternoon for travel before sundown. “The next day” (ἐπαύριον) of 10:23 implies an overnight stay, as “the next day” of 10:24 implies a journey spread over two days.

Hospitality’s obligations (see comment on Acts 16:15) demanded that the Jewish household provide lodging⁴⁷⁰ for their guests; although this action might have raised some questions (cf. comment on Acts 10:28), it might not be as serious as eating together with them⁴⁷¹ (depending on who supplied the food). Since the food was, presumably, about ready when they arrived (10:10), Peter could not eat without sharing—especially after God’s lesson about what was clean at table (10:15, 17). Peter also had an earlier lesson in eating whatever a household would offer without questioning whether food was clean or unclean, tithed or untithed (Luke 10:7).⁴⁷²

Food the Jewish household provided would be kosher, whether they ate with their guests or separately; that provided by the Gentiles in Caesarea would be more suspect (cf. Acts 11:3).⁴⁷³ Later rabbis also favored acts of kindness toward Gentiles, for the sake of maintaining peace.⁴⁷⁴ Still, some would probably look down on allowing Gentiles into one’s home (*m. Ṭehar. 7:6*); within the Holy Land, some opined, one should not even rent homes or lands to Gentiles (*t. ‘Abod. Zar. 2:8*).

Many Gentiles lived in the land, and so Israelites worked in Gentile shops and vice versa (*t. Šabb. 2:7–8*);⁴⁷⁵ later teachers also allowed Jews to buy houses from

467. Possibly the revelatory sense is present in Rom 7:3, the only other NT use, because it implies the voice of Scripture; but the revelatory sense is also unclear in Job 40:8, Jer 5:8, and probably 1 Kgs 18:27.

468. Lake and Cadbury, *Commentary*, 117 (citing esp. *SIG*³ 3.1173); Johnson, *Acts*, 185 (citing Plut. *Obsol. 46, Mor. 435C*; Lucian *Critic 8*; among Hellenistic Jewish writers, *Jos. Ant. 3.212*).

469. Tannehill, *Acts*, 132.

470. The term for displaying hospitality by providing lodging is the same as used for Peter’s own lodging (Acts 10:18; cf. 10:6, 32).

471. Also Witherington, *Acts*, 351.

472. Matson, *Conversion Narratives*, 47–48.

473. Cf. *y. Demai 3:3*: food from Caesarea could be assumed untithed, hence *demai*, produce. As will be argued (see comment on Acts 10:48), a God-fearer would hardly insult his honored Jewish guests by offering pork, but the food was probably untithed—or at least his guests could not assume it tithed.

474. See, e.g., Poulin, “Loving-Kindness”; Le Cornu, *Acts*, 578.

475. A later account claims that some Tannaim were trading silks at Tyre (*Gen. Rab. 77:2*), but priests entering Ashkelon needed to immerse after they left because of Gentile impurity (*y. Šeb. 6:1, §12*). Some Judeans opposed doing permanent business with Gentiles (*t. ‘Abod. Zar. 1:1*), but this would be impossible to enforce in mixed cities (cf. Longenecker, *Acts*, 186, citing *b. Šabb. 150a, 151a*; but noting uncleanness, cf.

Gentiles (*y. Mo'ed Qat.* 2:4, §2). Even Qumran's *Damascus Document* warns against being near Gentiles especially on the Sabbath (CD XI, 14–15), implying that contact was sometimes possible.⁴⁷⁶ Halakah sought to guard Jews from excessive contact with Gentiles, but it could not, and was not meant to, cut off all contact.⁴⁷⁷ Nor did pietists' theory restrict all Jews' practice.⁴⁷⁸

Stricter theorists' principles did, however, apply especially to eating together.⁴⁷⁹ *Jubilees* 22:16, which contains one of the strongest warnings against association with Gentiles, is emphatic about eating together: "Separate yourself from the gentiles, and do not eat with them" (trans. Wintermute, *OTP* 2:98). Gentiles in fact widely regarded Jewish people as separatist and hateful for avoiding Gentile food, though Jews protested that they were not hateful but simply observing their distinctive custom (3 Macc 3:4–7). Judith brought her own food to the enemy camp (Jdt 10:5; 12:2, 9, 19); even Esther was thought to have abstained from royal food and wine (Esth 14:17 LXX = Add Esth 4:17). Unlike others, Tobit avoided Gentile food (Tob 1:10–13).⁴⁸⁰ Jewish people tried to avoid dependence on foreign oil (Jos. *War* 2.591; *Ant.* 12.120; *Life* 74).⁴⁸¹ Compare some additional sources in comment on Acts 10:12.

This issue was of special interest to the Pharisees (Luke 5:30; 15:2), for whom table fellowship was a central concern;⁴⁸² not surprisingly, Pharisees lead the objections to full fellowship with uncircumcised Gentiles in Acts 15:5 (a view apparently more widely held in 11:3). Even if a Jewish man brought his own food to eat with a Gentile, rabbis felt that the Gentile might contaminate the food while the Jewish person stepped out (*m. 'Abod. Zar.* 5:5).⁴⁸³ One rabbi complained that Diaspora Jews were "idolaters" because they attended Gentile banquets, even though bringing their own food and drink (*t. 'Abod. Zar.* 4:6).⁴⁸⁴ Peter is not a Diaspora Jew (in Luke's parlance, he is a "Hebrew" rather than a "Hellenist," Acts 6:1), and he is well aware that other Hebrews will challenge him for eating with Gentiles (11:3; cf. Gal 2:12), which may be one reason he brings potential witnesses (Acts 10:23; 11:12).⁴⁸⁵

V. THE JOURNEY (10:23B–24)

The journey of 10:23b–24a is necessarily transitional.⁴⁸⁶ In 10:23, Peter brings others with him from the church in Joppa; many believers lived there (see 9:36, 42–43).

m. 'Abod. Zar. passim). This mixing posed serious problems when tensions later escalated into mutual attempts at genocide (Jos. *War* 2.463).

476. Purity was a central issue generally in Qumran's sectarian documents (for the emphasis in current Qumran studies, see Harrington, "Purity").

477. See Cohen, "Attitude and Reality."

478. With Conzelmann, *Acts*, 82 (citing Jos. *Ant.* 20.34–53, especially relevant for the Diaspora).

479. On the impurity of Gentiles' vessels, see, e.g., *b. 'Abod. Zar.* 67b (R. Meir citing earlier tradition); 75b, bar.; *Pesah.* 44b (citing R. Akiba).

480. See Sanders, *Jesus to Mishnah*, 274, citing many of these sources as well as Jos. *Asen.* 7:1; 8:5; 18:5; 20:8. For an anthropological approach to ancient Jewish avoidance of eating with Gentiles, see Esler, *Community*, 73–86.

481. See Sanders, *Jesus to Mishnah*, 274. Rabbis used Dan 1:1–16 as their biblical grounds for avoiding Gentile wine because Gentiles often poured libations (Sanders, *Jesus to Mishnah*, 273).

482. See, e.g., Neusner, *Beginning*, 27. Neusner estimates that about two-thirds of Shammai/Hillel pericopes concern table fellowship (*Politics to Piety*, 86). Luke knows something of Pharisaic tithing practices (Luke 11:42), but in his tradition, Pharisees have failed to truly evade uncleanness (11:39–44).

483. Hare, *Persecution*, 9, thinks that this text presupposes Jews and Gentiles eating together; it may, however, be a warning (albeit probably with little effect on common people, as Hare, 9n3, observes).

484. Also *b. 'Abod. Zar.* 8a, bar.; 8b. Eating together established a covenant of friendship; see Aeschines *Embassy* 22, 55; further discussion in Keener, *John*, 912–13. One could also raise issues of import there that one could not raise elsewhere (Cic. *Fam.* 1.2.3).

485. On taking witnesses for legality's sake, see, e.g., Char. *Chaer.* 2.5.1.

486. For the convenience of following versification in the commentary where possible, our outline obscures this transition.

Although bringing uninvited additional guests sometimes could cause problems,⁴⁸⁷ Peter needs witnesses for what the vision has prepared him to experience (11:12).

Although they presumably left in the morning, Peter probably preferred not to travel at night, requiring an overnight stop before the journey's completion. If the messengers had come swiftly by riding horses, Peter and his six companions would probably lack horses and/or the skill to ride them; even had Cornelius sent an animal for Peter or the church provided one, his entourage of six (11:12) would lack them. They could have perhaps lodged in a place such as mixed Apollonia, just under half the journey, but may have preferred a full day of travel the first day, lodging perhaps two-thirds of the way and arriving in the afternoon or late morning the next day. If the messengers had actually reached Peter in less than one day (scholars diverge on this point; see comment on Acts 10:9), Peter may be in less of a hurry to reach Caesarea. Nevertheless, this need not reflect theological or ethnic reservations.⁴⁸⁸ Even assuming that every member of Peter's group was capable of such haste (and that none of Cornelius's messengers were sore from the previous journey's haste), the group probably began the journey in the morning, and arriving in the night would not be ideal for Cornelius or those he would gather (10:24; cf. Luke 11:7).

b. Welcoming the Jews (10:24–33)

Just as Peter and his hosts, directed by Peter's vision and Spirit-led interpretation, welcomed the Gentile messengers in 10:17–23, so here Cornelius, earlier directed by a vision, welcomes the Jewish delegation. We might view Peter as something like an ambassador for Israel's God (cf. 2 Cor 5:20; Eph 6:20). What Roman policy failed to achieve in ethnically divided Caesarea, God could achieve in the church: the reconciling of normally hostile peoples.⁴⁸⁹ The visions and other confirmations in the narrative, however, reveal that even for the church, such reconciliation initially required divine intervention.

I. CORNELIUS'S RELATIVES AND FRIENDS (10:24)

Cornelius calls together those with whom he especially wishes to share the privilege, presumably without overcrowding his home beyond what it could accommodate.⁴⁹⁰ Since they could not predict the time of Peter's arrival, their presence suggests significant anticipation, with those who live a farther walk away perhaps even sleeping there at night.⁴⁹¹ Who are the "relatives" (συγγενεῖς)? Although servants (Acts 10:7) were members of the household,⁴⁹² as mentioned above, it is unlikely that the term applies to them (especially if any nuances from its etymology remain).⁴⁹³ Perhaps Luke

487. On "shadow" guests, see Plut. *Mor.* 707–710A in Winter, *Left Corinth*, 300n56; private banquets were ideally limited to more intimate company (Aul. Gel. 13.11.2–3). But this principle did not apply to all celebrations. At weddings and some other public events, often (within reason) the more guests the better: for large banquets, see, e.g., Char. *Chaer.* 3.2.10; Phaedrus 1.6.1; Alciph. *Farm.* 15 (Eustachy to Pithacnion), 3.18, ¶1; Men. *Rhet.* 2.6, 404.17; Jos. *Ant.* 13.18–21.

488. It need not even reflect a resistance on Peter's part to laboring at night (see Luke 5:5; cf. Acts 5:19; others in Luke 2:8, 37; 6:12; 18:7; 21:37; Acts 9:24–25; 17:10; 20:31; 23:23, 31; the noon nap in 10:10), though he appears to be a sound sleeper in Acts 12:6 (cf. Luke 8:23; negatively, 22:45–46). Deliberate night arrivals were unusual (Philo *Flacc.* 27); people usually sought to spend the night somewhere (cf. Gen 19:2; 24:23, 54; Judg 19:6–20; 20:4).

489. Because Cornelius is a God-fearer, this "reconciling" has already occurred on some level. Nevertheless, Cornelius has not yet become a full member of God's people but only a sympathizer.

490. Cf. Methuselah calling together his relatives (including brothers) to hear when Enoch prepares to reveal the future to him (1 *En.* 91:1–2).

491. I have observed this expression of eagerness in many African settings.

492. Pliny *Ep.* 9.36.4; Barrow, *Slavery*, 22–64; Judge, *Pattern*, 31; Verner, *Household*, 30, 33; Falk, "Law," 509.

493. Thus σύν, "with," + γένος, "ancestral stock, ancestral group" (etc.; see BDAG).

is being discreet about a soldier's "illegal" family, but for reasons offered above, this is not particularly probable. Luke usually employs this term, "relatives," for family more distant than immediate nuclear family (i.e., beyond siblings and children; Luke 2:44; 14:12; 21:16; cf. 2 Macc 15:18), though they could be first cousins and other close relatives (Lev 18:14; 20:20; 2 Sam 3:39; Tob 6:11; 1 Macc 11:31; 2 Macc 11:1, 35).⁴⁹⁴

Presumably these were not family members staying with him, since he "had called them together." Normally, the extended family did not stay with the nuclear family, but their connections were often close.⁴⁹⁵ This particular piece of evidence might favor the idea that Cornelius was from the area (had his relatives lived far, he could not have contacted and brought them so quickly); if he was retired, he could have brought family members to live with him, but again, this would probably be in the same house, which is not the case here. An alternative is that he married locally (as many soldiers did, although Rome was not obligated to recognize legally marriages contracted before retirement); thus his in-laws would be local.

In addition to relatives, Luke mentions ἀναγκαίους, "friends." When different from relatives (as here) the term can designate necessary ties,⁴⁹⁶ perhaps members of the extended household not living there, such as freedpersons and other clients.⁴⁹⁷ "Friendship" also could include patronage, especially for a Roman household, in this case referring to Cornelius's clients (cf. Luke 7:6; 14:10; Acts 19:31; esp. Luke 16:9).⁴⁹⁸ Because he was a God-fearer and presumably known as such, these "friends" probably had exposure to, and (given their gathering) presumably sympathy for, Judaism.⁴⁹⁹

If they have been gathered awaiting Peter's arrival, Cornelius would have assumed the expensive responsibility of feeding them in the meantime. Had Peter refused his invitation, Cornelius would have faced severe loss of honor in front of his guests (cf. the note of appreciation in Acts 10:33) as well as something far more serious (cf. 11:14); he hinged his urgent invitation, however, on the angelic message to him (10:22). If 11:14 supplements the information here, his household was welcome to hear the message, and Cornelius eagerly expands that definition as widely as possible.

II. REFUSING CORNELIUS'S HOMAGE (10:25–26)

Luke does not elaborate on Peter's entrance. Perhaps Cornelius (being informed of the delegation's approach) had a servant or another mediator escort Peter in

494. Given Luke's summarizing technique, he could use it to include closer family (cf. two brothers who are soldiers corresponding near their retirement in Lewis, *Life*, 22).

495. Saller and Shaw, "Tombstones," note the extended family in Western legal sources but emphasize the nuclear family in inscriptions; Garnsey and Saller, *Empire*, 129, insist that Romans usually lived in nuclear rather than extended families; Stambaugh, *City*, 158, argues that these were small (also Rawson, "Family," 7). Martin, "Construction," using evidence from the East, argues (against Saller and Shaw) that Roman-period inscriptions did not generally distinguish nuclear from extended families. (Yarbrough, "Paul," 410, argues for larger wealthy households because his count includes slaves and clients; cf. George, "Architecture." The Roman *familia* extended to anyone under *patria potestas*, wherever the person domiciled; Gardner, *Women*, 5–6; Rawson, "Family," 7–8.) It seems precarious to extrapolate from well-to-do Romans to a centurion in Caesarea, but Goodman, *State*, 36, contends that the nuclear family is dominant even in Galilee, with attachment even to neighbors before extended family.

496. Witherington, *Acts*, 352, arguing that it refers to Cornelius's retainers ("reciprocity relationships, through business or military connections or both"; cf. Acts 10:7). For various "levels" of friendship, see Arius Did. *Epit.* 2.7.5 L, pp. 34.30–37.3; friendship based on kin relations is one (pp. 36–37.2–3), but Luke's grammar explicitly distinguishes the friends from kin here.

497. On freedpersons as household clients, see, e.g., Suet. *Jul.* 2; Dupont, *Life*, 62–66; Chow, *Patronage*, 69–72; Lampe, "Patrons," 489.

498. Keener, "Friendship," 381–82; idem, *John*, 1008; see more extensive comment at Acts 19:31.

499. With Le Cornu, *Acts*, 582.

before the scene takes place, but Luke is not concerned to narrate extraneous details.⁵⁰⁰

From the standpoint of Luke's literary purposes, Cornelius "worshiped" Peter so that Peter could reject this inappropriate response, just as Paul rejects such a response in 14:15 (cf. 28:6).⁵⁰¹ By contrast, those who "fell at the feet" of Jesus (Luke 8:41; 17:16)⁵⁰² or "worshiped" him (24:52)⁵⁰³ were not reprovved because such veneration was appropriate for him. Cornelius's misplaced veneration is the sort of behavior a Jew would expect of a misunderstanding Gentile (cf. Dan 2:46), though Peter also has to warn a Jewish audience against a lesser sort of veneration (Acts 3:12), and Herod Agrippa I, though catering to Jewish politics (12:3), accepts divine worship (12:22).⁵⁰⁴

Nevertheless, this scene must raise for Luke's audience the question of what this God-fearer (10:2) has in mind. As a mere God-fearer, Cornelius may not have been completely orthodox in his beliefs;⁵⁰⁵ if he remained in active duty, he might have had to venerate Caesar as a deity (representing Rome) to demonstrate allegiance to Rome.⁵⁰⁶ Would a God-fearer consider Peter a divine man or perhaps an angel (of higher rank than the one who referred Cornelius to him)?⁵⁰⁷

But Cornelius may not act idolatrously (cf. 10:2), though Peter has reason to refuse honors that could be so construed (and Luke to record the obeisance and its refusal). Within the narrative world, those falling at Jesus's feet (Luke 8:41; 17:16) did not (in contrast to Luke's audience) recognize his divinity (cf. perhaps analogously Rev 19:10; 22:8–9); Cornelius means no harm,⁵⁰⁸ but Peter cannot leave any ambiguity as to who is to be venerated.

The verb προσκυνέω can mean obeisance, of the sort offered to rulers, especially Persians and others in the East.⁵⁰⁹ Yet Greeks and Jews often refused to offer it to the Persian king precisely because of what it signified.⁵¹⁰ Perhaps in Cornelius's mind it differed little from falling at benefactors' feet to grasp their knees, the normal posture of

500. Bruce, *Acts*³, 73, finds it attractive that Cornelius sends a servant to welcome Peter in the Western text. But this is easily enough the expansive editor's inference, with no clear indication of tradition.

501. Cf. Tannehill, *Acts*, 53, contrasting Theudas and Simon, who both claimed to be "someone" or "someone great."

502. Cf. Mark 5:22; John 11:32; Rev 1:17; note that angels also rejected this prostration (Rev 19:10; 22:8–9, the only other texts in the NT including both "falling at feet" and προσκυνέω; though the one conjunction of these terms in the LXX, 2 Kgs 4:27, was not rejected, it could not have been confused with idolatry). Only in *Herm.* 10.3 is it not turned aside (by the visionary woman); Sapphira "falling at the feet" of Peter dead (*Acts* 5:10) belongs in a different category.

503. For anyone but deity, such prostration was to be rejected (Luke 4:7–8; *Acts* 7:43; cf. 8:27; 24:11).

504. Seeing Peter's powers, people in Rome wanted to venerate him as a god in *Acts Pet.* (8) 29.

505. One might compare the progressive conversion and instruction of peoples in subsequent Christian history, whether in much of western and northern Europe or Russia through the Middle Ages (cf., e.g., Bredero, *Christendom*, 42–43, 356) or, e.g., in parts of rural Africa in the twentieth century (Yates, *Expansion*, 179).

506. Levinskaya, *Diaspora Setting*, 121. Their social status obligated some other God-fearers to participate in public pagan rituals (123). Pressure to venerate Caesar might be even greater in the city that Herod named Caesarea, with its prominent Caesar temple (cf. Holm, "Temple Hill").

507. Cf. the liberal compromise of *Acts John* 27, where Lycomedes acknowledges only one true God but sees John as divine in the sense that benefactors are. Cf. also Rev 19:10, including the immediate correction.

508. Bede *Comm. Acts* 10.25 (Martin, *Acts*, 131) even construes Cornelius's prostration as a sign of his humility.

509. E.g. (including equivalent expressions), Plut. *Themist.* 27.3–4; Val. Max. 7.3.ext. 2; Arrian *Alex.* 4.11.8; Char. *Chaer.* 5.2.2. Cf. *Jos. Asen.* 5:7/10 (to Joseph). It can also be used for entreating (e.g., *Jos. Life* 138; Men. *Rhet.* 2.13, 423.27; Hdn. 7.5.4).

510. Plut. *Themist.* 27.3–4; Helioid. *Eth.* 7.19; Corn. *Nep.* 9 (Conon), 3.3; Esth 3:2 (to an official); cf. *Tg. Neof.* 1 on Gen 19:1 (changing the Hebrew); *Tg. Ps.-j.* on Gen 26:35; Wiesehöfer, "Proskynesis," 50; but cf. also *Tg. Neof.* 1 on Gen 18:2; 24:48, 52; 33:3; 42:6; 43:26. But Jews do bow in some texts (e.g., *Jos. Ant.* 1.335; 6.240, 285; 7.187; *Test. Jos.* 13:5).

a supplicant.⁵¹¹ Thus, for example, an Alexandrian supplicant to the general Vespasian falls to his knees to seek healing (Tac. *Hist.* 4.81). The term can communicate supplication rather than worship of a deity (Matt 8:2; 9:18; 20:20; perhaps John 9:38), but usually early Christian literature—and elsewhere Luke always—employs the term for “worship” (Luke 4:7–8; 24:52; Acts 7:43; 8:27; 24:11).⁵¹² Biblical precedent might grant someone in the imperial service permission to make necessary obeisance while keeping a monotheistic heart (2 Kgs 5:18–19).

Pagan writers often portrayed their heroes and heroines as mistaken for deities,⁵¹³ sometimes complete with someone falling before the person to worship (Ach. Tat. 3.23.1; Xen. Eph. *Anthia* 1.1). (Josephus so read Dan 2:46.)⁵¹⁴ For those who were not deities,⁵¹⁵ the appropriate response was to disavow deity and refuse divine honors.⁵¹⁶ This refusal avoided hubris and impiety (contrast Acts 12:22–23), though (and this is important for recognizing how Luke applies the account) this refusal of divine honors was itself honorable.⁵¹⁷ Refusal to reject divine honors could lead to diminution of long-term honor (Quint. Curt. 4.7.30) and, worse yet, divine judgment (Jos. *Ant.* 19.346–47).

*Excursus: “Divine” Humans*⁵¹⁸

In contrast to the Jewish monotheistic tradition, in the Greek tradition boundaries between exalted humanity and incipient divinity often proved fluid⁵¹⁹ (this was widespread, against some earlier scholars who connected the practice too narrowly with the Mysteries).⁵²⁰ For example, popular tradition divinized many heroes,⁵²¹

511. Hom. *Il.* 1.427; Eurip. *Orest.* 382; *Hypsipyle* frg. 757.67–68, 62 (856–57, 861); Livy 45.7.5 (the entreaty is answered in 45.42.4); Fronto *Ad M. Caes.* 3.9.2 (a deity, figuratively); cf. Matt 18:26, 29; Men. Rhet. 2.13, 423.27.

512. That Jesus is accorded divine worship in the NT fits the Christian tradition that he is within the identity of the one God (Bauckham, *Crucified*, 34–35); most preresurrection occurrences in the Gospels are meant to be read from the standpoint of resurrection faith.

513. E.g., Hom. *Od.* 16.183–85; 19.280; Ovid *Metam.* 14.127–28; Char. *Chaer.* 3.2.17; Xen. Eph. *Anthia* 1.2, 12; 2.2.

514. Jos. *Ant.* 10.211–12 (Gaventa, *Acts*, 207).

515. Or occasionally a deity pretending not to be one, Virg. *Aen.* 1.335.

516. Hom. *Od.* 16.186–89; Ovid *Metam.* 14.129–31; Char. *Chaer.* 2.3.7; Eunapius *Lives* 470; *Gen. Rab.* 42:5; 43:5. Cf. also Conzelmann, *Acts*, 110 (citing Ps.–Callisth. *Alex.* 2.22.12), 82 (contrasting Aelian *Var. hist.* 8.15).

517. Refusing honors in general could be honorable, leading to the person's greater praise (Val. Max. 4.1.6a); emperors who insisted on their own deity in their lifetimes were the only first-century emperors not deified afterward.

518. I borrow here from Keener, *John*, 178–79, 291–92.

519. Cf., e.g., Epict. *Diatr.* 1.9.6–11; 2.8.10–11; 2.19.26–28; Plut. *Pomp.* 27.3; Plot. *Enn.* 1.2.7; Ovid *Metam.* 8.723–24; cf. Jos. *Ag. Ap.* 1.232.

520. Although divinization is alleged to occur in some other groups' initiations (Eliade, *Rites*, 71), the common view that it occurred in mystery cults in the NT period (e.g., Reitzenstein, *Religions*, 70, 200; Angus, *Mystery-Religions*, 108; Avi-Yonah, *Hellenism*, 42; Tarn, *Civilisation*, 354–55; Dibelius, “Initiation,” 81) has come under challenge in recent years (see Ferguson, *Backgrounds*, 239). Given the frequency in Greek culture in general, however, claims for some cults (e.g., Tinh, “Sarapis,” 113) are not unlikely, even in this period. Certainly it is clear in the later Hermetica (Reitzenstein, *Religions*, 70–71; Conzelmann, *Theology*, 11; Wikenhauser, *Mysticism*, 179) and other gnosticizing (Ménard, “Self-Definition,” 149; Jonas, *Religion*, 44–45) and later Christian sources (Tatian *Or. Gks.* 7; Taylor, *Atonement*, 206, cites Iren. *Haer.* pref.; Athanas. *Inc.* 54.3). In magic, see PGM 1.178–81; Frankfurter, *Religion in Egypt*, 229.

521. E.g., Eurip. *Andr.* 1253–58; Cic. *Nat. d.* 2.24.62; 3.15.39; Virg. *Aen.* 7.210–11; Ovid *Metam.* 9.16–17; Lucan *C.W.* 9.15–18, 564; Paus. 8.9.6–8; 9.22.7; Philost. *Hrk.* 2.11. On the deification of heroes, cf. Nock, *Paul*, 96; Hadas and Smith, *Heroes*; Edson and Price, “Ruler-cult”; Graf, “Hero Cult.” Greek veneration of departed

among them Dionysus,⁵²² Heracles,⁵²³ the Dioscuri,⁵²⁴ Asclepius,⁵²⁵ Achilles,⁵²⁶ Trophonius,⁵²⁷ and Palamedes,⁵²⁸ and sometimes any memorable protagonist of ancient narratives.⁵²⁹ Homer regularly described heroes as “peers of gods” or “godlike.”⁵³⁰

Heroes constituted an intermediate category between deities and mortals⁵³¹—that is, demigods.⁵³² This intermediate class consisted of the deified dead invoked by the living.⁵³³ Ancient heroes, especially those supposed to have literally sprung from divine seed, were also often sons of gods⁵³⁴ (though most often in a figurative or distant sense,⁵³⁵ such as the “Zeus-born” son of such-and-such a human father⁵³⁶) or “nurtured” by gods.⁵³⁷

Even a particularly eloquent orator might be compared to gods or titled “divine.”⁵³⁸ The same could be done with poets, especially “godlike Homer.”⁵³⁹ Romans offered sacrifices to spirits of the deceased but deified their founder, Romulus, only after the fourth century B.C.E., because of Greek influence.⁵⁴⁰

Philosophers and other sages, too, were often divinized or said to be divine in some sense,⁵⁴¹ including Democritus,⁵⁴² Pythagoras,⁵⁴³ Empedocles,⁵⁴⁴ Epicurus,⁵⁴⁵

heroes may have begun in the eighth century B.C.E. (Antonaccio, “Hero Cult”), though the cults may have flourished especially in the third and late second centuries C.E. Lucian mocks the notion of heroes compounded of human and divine elements in *Dial. D.* 340 (10/3, Menippus, Amphilocus, and Trophonius 2) (revealing some of the sorts of conceptions that subsequent Eastern Christian Christologies sought to address; for the compounding idea elsewhere, see, e.g., Max. Tyre 6.4).

522. E.g., Apollod. *Bib.* 3.5.3.

523. Apollod. *Bib.* 2.7.7; 2.8.1; Cic. *Tusc.* 1.12.28; 2.7.17; Sen. E. *Suas.* 1.1; Men. *Rhet.* 2.9, 414.23–24.

See further Graf, “Heracles: Cult.”

524. See comment on Acts 28:11.

525. E.g., Paus. 6.11.9.

526. E.g., Philost. *Hrk.* 53.8. The ghost of Patroclus also attends the sacrificial feast (53.12–13).

527. Max. Tyre 8.2; Philost. *Vit. Apoll.* 8.19; contrast Lucian *Dial. D.* 340 (10/3, Menippus, Amphilocus, and Trophonius 2).

528. Cf. Philost. *Vit. Apoll.* 3.22; 4.13; *Hrk.* 33.48.

529. E.g., all of Odysseus’s family in *Telegony* 4; cf. invocations of deceased Ajax in Philost. *Hrk.* 31.7. But Diomedes disqualifies himself by needless brutality (*Thebaid* frg. 9, from scholiast D on Hom. *Il.* 5.126).

530. E.g., Hom. *Il.* 2.407; 7.47; 13.295, 802; *Od.* 3.110; 17.3, 54, 391; 19.456; 20.369; 21.244; cf. also Soph. *Oed. tyr.* 298; Philost. *Hrk.* 21.9; 26.11; 48.15, 19; “godlike Telamon” (while he is killing someone) in *Alcmeonis* frg. 1 (in scholiast on Eur. *Andr.* 687).

531. E.g., Philost. *Hrk.* 16.4.

532. E.g., Philost. *Hrk.* 23.2 (ἡμιθεοίς); cf. Eunapius *Lives* 454.

533. Kearns, “Hero-cult.”

534. E.g., Hom. *Il.* 2.512; see esp. Heracles (Epict. *Diatr.* 3.26.31; Grant, *Gods*, 68–69).

535. E.g., Hom. *Il.* 4.489; 16.49, 126, 707; *Od.* 10.456 (mss), 488, 504; 11.60, 92, 405, 473, 617; 13.375; 14.486; 16.167; 18.312; 22.164; 23.305; 24.542. For divinity in this figurative sense, Aeschylus *Suppl.* 980–82.

536. E.g., Hom. *Il.* 4.358.

537. Hom. *Il.* 17.34, 238, 685, 702; 21.75; 23.581; 24.553, 635, 803; *Od.* 4.26, 44, 63, 138, 156, 235, 291, 316, 391, 561; 5.378; 10.266, 419; 15.64, 87, 155, 167, 199; 24.122. The title was often bestowed cheaply (*Od.* 22.136), but sometimes it applied to a deity (*Il.* 21.223).

538. E.g., Cic. *De or.* 1.10.40; 1.38.172; Pliny E. *N.H.* pref. 59.

539. E.g., *Contest of Homer and Hesiod* 316, 325; Men. *Rhet.* 2.15, 430.13; 2.16, 434.11; Proclus *Poet.* 6.1, K70.21; 6.2, K55.26–27; K198.29–30; together with Hesiod in *Contest of Homer and Hesiod* 313.

540. Hammond and Price, “Ruler-cult,” 1338.

541. E.g., Longin. *Subl.* 4.5; Diog. Laert. 6.2.63 (Diogenes’s claim); 6.9.104.

542. Diog. Laert. 9.7.39.

543. Diog. Laert. 8.1.11; Philost. *Ep. Apoll.* 50; Iambl. *V.P.* 2.9–10; 5.10; 10.53; 28.143–44; 35.255; cf. the intermediate category in 6.31; his golden thigh in 19.92; 28.135, 140. Cf. Abaris in Iambl. *V.P.* 19.91. See also Thom, “*Akousmata*,” 103.

544. E.g., Philost. *Vit. Apoll.* 1.1; Diog. Laert. 8.2.68.

545. Cic. *Pis.* 25.59 (ironically also noting Epicurus’s skepticism about gods’ concern for the world).

Theophrastus,⁵⁴⁶ Theodorus,⁵⁴⁷ Apollonius,⁵⁴⁸ Indian sages,⁵⁴⁹ a divine lawgiver such as Lycurgus,⁵⁵⁰ and especially “the divine Plato.”⁵⁵¹ This might be expected, since philosophy was held to divinize people,⁵⁵² as was philosophy’s goal, virtue⁵⁵³ or happiness,⁵⁵⁴ likewise, proper knowledge of one’s humanity,⁵⁵⁵ faithfulness,⁵⁵⁶ or, in some views or eulogistic rhetoric, simply death⁵⁵⁷ was held to divinize. Greeks bestowed such honorary language still more freely, many regarding the human soul or rational mind as divine⁵⁵⁸ or even the cosmos as divine.⁵⁵⁹ (Although this language influenced Judaism,⁵⁶⁰ even Philo employed it only “in a highly qualified sense”;⁵⁶¹ especially in Palestinian Judaism, such promises still belonged to the serpent (Gen. 3:5; *Jub.* 3:19).⁵⁶²

Luke’s critique of the worship of mortals would have implicit bearing on the imperial cult, even if he does not directly link this representative of Rome with it.⁵⁶³ Under Eastern influence,⁵⁶⁴ Greeks had divinized Hellenistic rulers;⁵⁶⁵ the practice began

546. Cic. *Or. Brut.* 19.62.

547. Diog. Laert. 2.100.

548. Philost. *Vit. Apoll.* 8.5, 15; *Ep. Apoll.* 44; 48; Eunapius *Lives* 454; also a probably third- or fourth-century inscription; see Jones, “Epigram”; a demigod in Eunapius *Lives* 454. He looks “godlike” in Philost. *Vit. Apoll.* 7.31 but denies his divinity in 7.32.

549. Philost. *Vit. Apoll.* 3.29; 7.32. Also, to a lesser extent, the magi in Philost. *Ep. Apoll.* 16–17.

550. Hdt. 1.65–66; Val. Max. 5.3.ext. 2; Plut. *Lyc.* 5.3. Lawgivers are “godlike” in Mus. Ruf. 15, p. 96.24.

551. Cic. *Opt. gen.* 6.17; *Leg.* 3.1.1; *Nat. d.* 2.12.32; Plut. *Profit by Enemies* 8, *Mor.* 90C; *Apoll.* 36, *Mor.* 120D; Philost. *Letters* 73, §13; Porph. *Marc.* 10.185–86; Athen. *Deipn.* 15.679A. Cf. patristic sources in Grant, *Gods*, 63–64.

558. Cf. Plato *Rep.* 10.611DE; Cic. *Parad.* 14; *Resp.* 6.24.26 (Scipio’s dream); *Tusc.* 1.24.56–1.26.65; *Leg.* 1.22.58–59; *Div.* 1.37.80 (citing a Stoic); Sen. *Y. Ep. Lucil.* 32.11; 78.10; *Nat. Q.* 1.pref. 14; Mus. Ruf. 18A, p. 112.24–25; Epict. *Diatr.* 1.1; 1.9.6–11, 22; 1.12; 1.14.6; 1.17.27; 2.8.10–11, 14; Plut. *Face M.* 28, *Mor.* 943A; Ael. Arist. *Def. Or.* 409–10, §139D; Max. Tyre 2.3; 6.4; 33.7; 41.5; Marc. Aur. 2.13, 17; 3.5, 6, 12, 16.2; 5.10.2; 5.27; 12.26; Men. *Rhet.* 2.9, 414.21–23; Iambl. *V.P.* 33.240; cf. *Rhet. Alex.* pref. 1420b.20–21. For a historical survey of divinization of humans, cf. Koester, “Being.”

559. In Stoic pantheism (e.g., Cic. *Nat. d.* 2.7.19–20), a view ridiculed by Epicureans (e.g., Cic. *Nat. d.* 1.10.24).

560. Philo *Mos.* 1.279; Jos. *War* 3.372 (Urbach, *Sages*, 1:222); Tabor, “Divinity”; postmortem deification in *Test. Adam* 3:2–3 (possibly Christian material); at the resurrection in Ps.-Phoc. 104; cf. immortality or divine character in Jos. *Asen.* 16.16; *L.A.E.* 14.2–3; *Pr. Jos.* 19; y. *Sukkah* 4:3, §5; perhaps 4Q181 1 3–4.

561. Holladay, *Theios aner*, 236; see Philo *Virt.* 172; *Creation* 135. Cf. Lycomedes’s use of the term for benefactors such as an apostle while acknowledging only the true God (*Acts John* 27).

562. *Apoc. Mos.* 18.3; cf. Gen 11:4; Exod 20:3–5; Isa 14:14; *Jub.* 10:20; *Exod. Rab.* 8:2.

563. Luke would likely undermine his apologetic by addressing the issue directly, in any case; though the Jewish apologetic historian Josephus is certainly more than ready to denounce Gaius Caligula’s hubris, which (after his death) was universally condemned (*Ant.* 18.256–309, esp. 256; 19.4, 11). While less antagonistic than Revelation’s John the seer, Luke cannot accept venerating humans (Witetschek, “Christus und Caesar”).

564. Cf. earlier Egyptian deification of pharaohs (e.g., Bright, *History*, 38; still recalled in Qur’an 26.29); some parallels exist even between ancient Egyptian and Roman divine kingship (Ockinga, “Divinity”). In Persia, see Aeschylus *Pers.* 157; Ps.-Callisth. *Alex.* 1.36, 39–40 (challenged in 1.38).

565. Perhaps as early as Philip of Macedon (Diod. Sic. 16.95.1); but philosophers such as Diogenes the Cynic could mock this practice (Diog. Laert. 6.2.63; cf. 6.9.104). On ruler and emperor cults, see in detail Klauck, *Context*, 250–330; Thomas, *Revelation* 19, 45–55; Van Henten, “Ruler Cult”; for Hellenistic rulers, Klauck, *Context*, 252–60; cf. Lucian *Cock* 24.

in earnest under Alexander of Macedon, after his eastern conquests.⁵⁶⁶ (Greeks and Macedonians in Alexander's generation were said to resent his demand for veneration, a demand influenced by Persian culture.)⁵⁶⁷ In the late republic, Cicero could caricaturize Greeks as viewing benevolent governors as divine,⁵⁶⁸ but the language so pervaded the culture of the empire that a late first-century C.E. Roman could poetically depict the senate as rivaling deities with their virtue.⁵⁶⁹

In view of its propagandistic value and Roman religious toleration, the Eastern practice of ruler veneration, in turn, helped shape the imperial cult in the East. Divine honors had long before been accorded Julius Caesar with the permission of his successor, Augustus;⁵⁷⁰ Tiberius continued the tradition for Augustus,⁵⁷¹ and most other emperors were posthumously deified in the West⁵⁷² but were regarded as divine even during their lifetimes in Roman Asia.⁵⁷³

Many scholars have argued that in the West the gesture was more or less symbolic, but the imperial cult throughout Italy may suggest otherwise.⁵⁷⁴ Although in a more subdued form than in the East, the imperial cult existed even in the West as early as Augustus.⁵⁷⁵ Nevertheless, enthusiasm for ruler worship ran much higher in the East: Claudius, who supported the worship of Augustus in Alexandria and permitted its people to grant himself divine honors,⁵⁷⁶ warned that excessive divine honor would offend his colleagues in the western empire,⁵⁷⁷ and demanding worship during one's

566. For Alexander as a divine son, see Arrian *Alex.* 7.29.3; Diod. Sic. 17.51.1–2; Dio Chrys. *Or.* 32.95; Plut. *S. Kings*, Alexander 15, *Mor.* 180D; *Alex.* 2.2–3.2; 27.5–11; 28.1; also known by Egyptian Jewry in the centuries immediately surrounding the birth of Christianity (*Sib. Or.* 5.7; 11.197–98; 12.7). Some ancient authors believed that Alexander used the notion only as political propaganda (Plut. *Alex.* 28.3; Lucian *Dial. D.* 395 [12/14, Philip and Alexander 1] [Lucian denies his divinity, 397–98, ¶5]; 390 [13/13, Diogenes and Alexander 1]).

567. For the demands, see, e.g., Quint. Curt. 4.7.30; 6.6.2–3; 8.5.5–6; 8.8.14; for his flatterers, see 8.5.8, 10–11; 8.10.1; for Macedonian's displeasure, see, e.g., 4.7.31; for one's critique (albeit couched in the author's imperial Roman language), e.g., 8.5.14–16; for falsification, see, e.g., 8.10.29. The oracle of Ammon allowed his worship (4.7.28) but should have been discredited (4.7.29). For a friend of Alexander whose frank critique of the practice curtailed his life, see Brown, *Historians*, 126.

568. So Cic. *Quint. frat.* 1.1.2.7; Romans in his day drew the line between deity and mortal more strictly. Latin distinguished, at least by the beginning of the empire, between an immortal god who had never been mortal (*deus*) and a mortal who had been posthumously deified (*divus*).

569. *Sil. It.* 1.611.

570. E.g., Ovid *Metam.* 15.745–50, 843–51; Strabo 4.5.4; 17.1.6; Suet. *Julius* 76; Aul. Gel. 15.7.3; Corn. Nep. 25 (Atticus), 19.2; Dio Cass. 51.20.6; Paus. 3.11.5; in Alexandria, cf. Philo *Embassy* 151; Fishwick, "Caesar"; idem, "Caesareum." Cf. his "divine spirit" in Val. Max. 4.5.6.

571. E.g., Pliny *Ep.* 10.65.3; Tac. *Ann.* 1.10–11, 41–42; 2.20; 3.62; Dio Cass. 56.46.1. See further discussion in Filson, "Ephesus," 77; Fishwick, "Ovid"; Deissmann, *Light*, 344–46; Yamauchi, *Cities*, 17, 28.

572. E.g., Virg. *Aen.* 9.642; Tac. *Ann.* 15.74; Hdn. 4.2.1, 5, 11; for deceased relatives, e.g., Tac. *Ann.* 15.23; 16.6, 21–22; Hdn. 6.1.4; cf. Seneca's questions about Tiberius in Green, "Undeified Tiberius" (on *Apocol.* 1.2). Fishwick, "Numen Augusti," argues that although early emperors possessed *numen*, they were not identified with it before the second century; cf. discussion in Herz, "Emperors," 307–9. For invoking an emperor as a deity while the emperor was still alive, see (for Nero) Tac. *Ann.* 15.74; 16.31.

573. Tiberius (e.g., Tac. *Ann.* 4.15); Caligula (e.g., Philo *Embassy* 81; Suet. *Calig.* 22); Claudius (Tac. *Ann.* 12.66; 13.2; Suet. *Nero* 9); Nero (Suet. *Nero* 31; cf. Tac. *Ann.* 15.22, 73; Massa, *Pompeii*, 116); and Vespasian and Titus (Pliny *Ep.* 10.65.3; *Panegy.* 11.1); later, Hadrian (Philost. *Vit. soph.* 1.25.534). For the imperial cult, see Klauck, *Context*, 288–330; surveyed by the emperor deified, see 288–313; on forms and diffusion of the emperor cult, see 313–25; see also Rives, *Religion*, 149–53.

574. See Horsley, *Galilee*, 121. For the impact even in Judea and Galilee, see 120–22. Nevertheless, Seneca felt free to satirize it (in Claudius's case; Paschalis, "Afterlife," on *Apocol.*).

575. Hammond and Price, "Ruler-cult," 1338.

576. P.Lond. 1912.9, 28–29, 60–62.

577. P.Lond. 1912.48–51. Cf. the similar "humility" of Tiberius (Tac. *Ann.* 4.38; Sinclair, "Temples"). See other differences between East and West in Lozano, "*Divi Augusti*."

lifetime in the West usually seemed to be madness⁵⁷⁸ and impiety.⁵⁷⁹ In any case, in the East, the very antiquity of ruler worship there would lead to a more serious interpretation of the act.⁵⁸⁰ In the early empire, even those too illiterate to understand inscriptions were surrounded by the emperor's image on statues and coins.⁵⁸¹ See also some further comments on deification (where it relates to ascension) at Acts 1:9–11.

Polytheism remained strong in Gentile parts of Judea,⁵⁸² although not all of our archaeological sources are clear about the period. We know later of the Mithras cult,⁵⁸³ the Serapis cult,⁵⁸⁴ and so forth. In this period, we may already assume extensive polytheism because of the large Gentile presence. Caesarea had its share of such cults not only because of its large Gentile population but because of sailors there.⁵⁸⁵ More significant, Peter's rejection of worship in Caesarea highlights the contrast with Agrippa I, who receives worship in precisely the same city, which is named for the divine emperor (Acts 12:19–23).

III. PETER ENTERS AND SPEAKS (10:27–28)

The house (10:27) appears to be sizable. It is often estimated that well-to-do homes in the Roman style could accommodate nine to twelve people reclining in the triclinium, plus a further thirty, forty, or even fifty gathered in the atrium if needed,⁵⁸⁶ and even more standing. (Scholars have, however, raised questions about these estimates, since homes varied in size.)⁵⁸⁷ Peter would have entered the vestibule and probably, if the house was in the Roman style, proceeded to meet those waiting in

578. As with Caligula, Nero, Domitian, and Commodus; e.g., Hdn. 1.14.8. This inspired flattery during their lives (e.g., Lucan *C.W.* 1.63–66) but cost them their posthumous “deification” (e.g., Dio Cass. 60.4.5–6; Hdn. 1.15.1). Although scholars often describe Caligula as insane (e.g., Dudley, *Civilization of Rome*, 162; Benko, “Early Empire,” 52–53; Caird, *Revelation*, 166; Knox, *Gentiles*, 92–93; cf. Sen. *Y. Dial.* 10.18.5), some more recent views suggest a neurological disorder (Benediktson, “Madness”), or a disorder from his starkly dysfunctional family background, or simple corruption by power (Sidwell, “Mental Illness”). The latter may have yielded to conventional depictions in antiquity; the tyrant Antiochus IV Epiphanes reportedly suffered madness (Polyb. 31.9.4; cf. 26.1.1–3; a committer of sacrilege in 32.15.8).

579. E.g., Virg. *Aen.* 6.585–94; earlier for Macedonians, Arrian *Alex.* 4.11.1–9; 4.12.1. Even Greeks regarded neglect of one's mortality as hubris (Soph. *Ajax* 758–79).

580. See P.Petr. 3.43 (2), col. 3.11–12 (Ptolemies); Philost. *Vit. Apoll.* 1.27–28; Dio Chrys. *Or.* 32.26. Scholars regularly refer to this phenomenon (cf., e.g., Brown, “Kingship”; Jones, *Chrysostom*, 105; Ramsay, *Luke the Physician*, 139; Knox, *Gentiles*, 11; Conzelmann, *Theology*, 11; Lohse, *Environment*, 216–18).

581. See Harrison, *Authorities*, 22–23.

582. See Flusser, “Paganism”; from coins, Avi-Yonah, “Archaeological Sources,” 60.

583. Lease, “Caesarea Mithraeum”; Bull, “Mithraic Medallion,” 190; Flusser, “Paganism,” 1099.

584. Behar, “Témoignages” (citing coins, amulets, and rabbinic material).

585. Cf., e.g., Ovadiah and Mucznik, “Zodiac” (though Galilean synagogues themselves boast zodiacs in late antiquity); Bull, “Mithraic Medallion”; Lease, “Caesarea Mithraeum”; Flusser, “Paganism,” 1099.

586. Esp. Murphy-O'Connor, *Corinth*, 156, for a figure widely followed (e.g., Talbert, *Corinthians*, 75; Thiselton, *Corinthians*, 861; Hays, *First Corinthians*, 196). Even Mithraea generally held twenty to forty people at maximum (Klauck, *Context*, 146; Gordon, “Mithraism,” 400, estimates eighteen to forty-two), although associations could host between ten and two hundred (Klauck, *Context*, 43). On atria and triclinia, see further Wallace-Hadrill, *Houses*, 82–87; for multiple triclinia in extremely wealthy homes, see Stambaugh, *City*, 164, 170 (for triclinia in antiquity generally, see Dunbabin, “Triclinium”; idem, “Convivial Spaces”); Balch, “Families,” 265; for a triclinium in an elite Judean palace, see Evans, *World*, 51 (though these were apparently rare in Judea; McRay, *Archaeology*, 79); for elite Roman villas in Palestine, see Roll and Tal, “Villa.”

587. See, e.g., Horrell, “Space,” 368–69; Horrell and Adams, “Introduction,” 11; idem, introduction to Murphy-O'Connor's essay, 130. Horrell's critique is widely cited (e.g., Adams, “Placing,” 25; MacDonald, “Reading,” 49). Homes certainly varied in size in various locations (Vitruv. *Arch.* 6.5.1–3; Libanius *Description* 2.2), and certainty in most given cases is unattainable (for larger villas, cf. Höcker, “Villa”; houses in some towns, cf. Balch, “Houses”; particularly massive examples in Suet. *Claud.* 32; Friedländer, *Life*, 1:225).

the atrium.⁵⁸⁸ A typical Roman home received visitors in the atrium, which was also where the shrine for family deities was located,⁵⁸⁹ but it is unlikely that Cornelius, as a God-fearer, would have household deities there, which could have proved a cause of serious discomfort to Peter.⁵⁹⁰

For “you yourselves know” (10:28), see comment on Acts 20:18, 34; Peter would expect their knowledge of Judean customs, since he cannot but have been aware of the population and ethnic tensions in Judea’s official capital. The interpretation of Peter’s vision (10:10–16) is now (in contrast to earlier, in 10:17) clear. Ancients believed that many oracles remained obscure until their fulfillment (which, in turn, confirmed them because they were not brought about by human attempts to fulfill them).⁵⁹¹

IV. PROHIBITING ASSOCIATION WITH GENTILES (10:28)

Peter begins with a controversial statement,⁵⁹² although he immediately “corrects” it.⁵⁹³ Gentiles often regarded Jews as separatist, comfortable only with their own people (Tac. *Hist.* 5.5), but even Gentile readers unfamiliar with Judaism could grasp Luke’s basic point here, since ritual purity was also a Gentile concept.⁵⁹⁴ Obviously Luke’s biblically literate, God-fearing ideal audience would understand his point most clearly.⁵⁹⁵

The term ἀθέμιτος, “unlawful,” “prohibited,” though applicable to foods and offerings (2 Macc 6:5; 7:1; polemically, *Diogn.* 4.2) or behavior (1 Pet 4:3; *1 Clem.* 63.2; *Did.* 16.4), is a strong (hyperbolic?) term to apply to people.⁵⁹⁶ It is possible that by “associating” (κολλᾶσθαι) with foreigners, Luke envisions close association with them or adherence to them (cf. Acts 5:13; 9:26; 17:34; Luke 15:15; but contrast Acts 8:29);⁵⁹⁷ Luke elsewhere employs the term with reference to rejecting everything unclean (Luke 10:11). But προσέρχομαι (twenty times in Luke-Acts) is a much more general term, used for an act as general as “approaching” someone (e.g., Luke 7:14; 8:44; 9:12)—for example, to speak with him or her (e.g., 8:24; 9:12; 13:31; 20:27). Does Luke have something more specific in mind (such as approaching someone and ultimately staying with that person, as in Acts 18:2–3)?

588. Perhaps commenting on a Judean adaptation, Le Cornu, *Acts*, 582, makes the triclinium (טריקלין) the center of household activity and the largest room (citing *m. 'Ab.* 4:16 [Danby, 454, translates “vestibule”]; *t. 'Erub.* 7:8).

589. Stambaugh, *City*, 164.

590. First, Cornelius was a God-fearer; second, depending on how ancient Cornelius’s ancestral citizenship was, he might not feel as attached to household deities as some would; third, as a dislocated military officer, he would not likely have Roman parents or siblings with him from whom he would feel pressure to maintain this cult; and fourth, if he married or took a concubine locally, the partner would not be Roman and have such expectations.

591. On obscure oracles, see comment on Acts 21:4, 11; Keener, *John*, 856–57.

592. Such statements were useful in seizing attention (see *controversia* in Black, “Oration at Olivet,” 88, citing Quint. *Inst.* 9.2.65–95).

593. For the utility of correction in ancient rhetoric, see, e.g., *Rhet. Her.* 4.26.36; for an example, Men. *Rhet.* 2.9, 414.26.

594. See the survey in deSilva, *Honor*, 249–53 (for Jewish sources, see 253–77); also (cited by deSilva) Parker, “Pollution”; Wright and Hübner, “Unclean and Clean”; Hauck, “Μιαίνω”; Soph. *Oed. tyr.* 95–101, 136, 353, 1423–29 (murder uncleanness); *Oed. Col.* 280–84 (retraction of hospitality); Epict. *Diatr.* 2.8.13. The problem in Aeschines *Tim.* 43 is probably not the meal with foreigners but their susceptibility to inequitable local prosecution.

595. Levitical purity considerations in the Torah would remain paramount, including for readers in this period (contrast Maier, “Torah”). Cf. Sosa, “Purezza”: Acts 10 redefines purity not by ethnicity but by the gift of God’s “holy” Spirit.

596. It depicts the wicked (2 Macc 10:34) or the wicked’s perception of Jews (3 Macc 5:20).

597. The unconverted feared to casually join the new movement (and/or its apostles, Acts 5:13); but Philip had already pioneered the way before Peter, directed by the Spirit to “associate” with a Gentile (8:29).

It seems probable that Luke chose these two verbs to echo 8:29 (the only other text in the NT, the LXX, the Apostolic Fathers, Josephus, or Philo including both verbs together) as a reminder that the Spirit had already led Philip across these barriers. Yet Peter also explicitly uses these terms as synonymous here with “unholy” or “unclean” (recalling his vision, in 10:14).

Some scholars complain that Luke here caricaturizes ancient Judaism, exaggerating its separatism;⁵⁹⁸ thus Haenchen emphasizes that “Jews were not hermetically sealed off from dealings with Gentiles.”⁵⁹⁹ Although Luke has a tendency to summarize,⁶⁰⁰ many Palestinian Jews’ experience of Judaism was, indeed, as separatist in principle as here, especially if they lived in mainly Jewish enclaves.⁶⁰¹ According to later rabbis,⁶⁰² Gentiles’ domiciles were unclean (*m. ’Ohal.* 18:7; *b. Pesah.* 9a; cf. John 18:28), probably (on the basis of the context) because of corpse impurity; Gentiles were thought to bury stillbirths and abortions in their homes (cf. also 11QT XLVIII, 11–12).⁶⁰³ Some texts emphasizing separatism were already discussed above (with respect to food, *Jub.* 22:16; 3 Macc 3:4–7; *Jdt* 10:5; 12:2, 9, 19; LXX *Esth* 14:17; *Tob* 1:10–13); see comment on Acts 10:23 above.

How impure strict pietists thought Gentiles to be⁶⁰⁴ may be illustrated by a later debate as to whether their proselyte immersion cleanses Gentiles within a day or whether they require seven days, as for removal of corpse impurity (*m. Pesah.* 8:8).⁶⁰⁵ Gentiles’ spittle was impure (*m. Šeqal.* 8:1, according to the likeliest sense), and if Gentiles entered a Jewish home, they could be expected to touch things, rendering everything impure (*m. Ṭehar.* 7:6). In rabbinic ideals, even the patriarchs’ camels avoided houses containing idols (*’Abot R. Nat.* 8 A). Idolatry, a key issue in what caused Gentiles’ uncleanness, might not accrue directly to a God-fearer such as Cornelius⁶⁰⁶ but might well contaminate him (from the strictest view) through contacts with others and certainly through some at least formal involvement with the imperial cult in the army. Even God-fearers would undergo proselyte baptism if they became full proselytes (see comment on Acts 2:38). On the major question of eating with Gentiles, see also separate comment on Acts 11:3.

598. As in Gentile perceptions of Judaism (*Juv. Sat.* 14.103–4; *Tac. Hist.* 5.5). With many scholars, however, I have suggested that Luke’s background more resembles that of a God-fearer than that of a typical polytheistic Gentile.

599. Haenchen, *Acts*, 350n4. This position is developed more fully by Hill, *Hellenists*, 118–20 but, in my opinion, by explaining away too much evidence in piecemeal fashion. Sanders, *Jesus to Mishnah*, 282, warns against exaggerations based on anti-Semitic Gentile reports but recognizes some social reality (274, 279–80; idem, *Judaism*, 216). Theissen, *Sociology*, 83, attributes the exclusivism more to the Shammaites, dominant before 70 C.E.; their later extinction makes them a more convenient target than Hillelites, but rabbinic reports do suggest that the former welcomed Gentiles less.

600. And is more interested in the general theological principle than in cultural details (cf. similarly Mark 7:3–4).

601. Cf. Wright’s critique (*People of God*, 239–40) of the emphasis in Sanders, *Jesus to Mishnah*: though Sanders presents everyone as unclean all the time anyway, much Jewish literature presents excessive contact with Gentiles as undesirable.

602. For whose views here see esp. Safrai, “Religion,” 829; cf. also *t. Demai* 3:14; *’Abod. Zar.* 4:11 in Larkin, *Acts*, 161.

603. See deSilva, *Honor*, 286n6; cf. Keener, *John*, 1099–1100. Israelites in the land should not even rent homes to Gentiles (*t. ’Abod. Zar.* 2:8); later teachers allowed Jews to buy houses from Gentiles (*y. Mo’ed Qat.* 2:4, §2).

604. On Gentiles communicating ritual impurity, see also *b. ’Abod. Zar.* 69b–70a (though this is Amoraic).

605. Hayes, “Converts,” doubts that impurity is at issue in proselyte immersions in the talmudic interpretations of *m. Pesah.* 8:8 and *t. Pisha* 7:13–14. But purification was the usual purpose of immersions; even touching anything on which a menstruant sat required this (*Lev* 15:22); the strictest pietists forbade eating with a menstruating woman (*t. Šabb.* 1:14, R. Simeon ben Eleazar, citing a far older rule).

606. Smith, *Symposium*, 160–61.

Le Cornu summarizes her own findings in this regard. Different sages held differing views; some sages even advocated hospitality to Gentiles and visiting them, “for the sake of peace.”⁶⁰⁷ Yet Hyrcanus’s plea that Herod not bring troops into the city might reflect concern for defilement (*Jos. Ant.* 14.285; *War* 1.229).⁶⁰⁸ Some later rabbis compared eating with uncircumcised persons to eating unclean flesh, bathing with the uncircumcised to bathing with a leper, and touching the uncircumcised to touching the dead.⁶⁰⁹ Le Cornu regards as particularly compelling evidence for Gentile impurity the requirement for new proselytes to be immersed,⁶¹⁰ and (of certainly relevant date) the physical segregation in the temple for purity reasons.⁶¹¹ On purity regulations and the confinement of Gentiles to the temple’s outer court, see comment on Acts 21:28.⁶¹² Our later sources amplify but do not contradict our early sources regarding Gentile impurity.⁶¹³

In practice, of course, some Jews were much more ethnically separatist than others. The wilderness Essenes took separatism to an extreme (although this is not decisive here; contrary to some early reconstructions, specifically Essene influence on early Christianity was probably not great). *Damascus Document*^a XI, 14–15 prohibits being even near Gentiles on Shabbat;⁶¹⁴ 4QMMT opposes Gentiles’ being allowed to sacrifice in the temple because idolatry remains in their hearts;⁶¹⁵ and 4Q274 applies cleanness regulations to any inhabited settlements in the Holy Land.

The *Letter of Aristeas*, which seems to include apologetic for Gentiles, nevertheless includes (albeit with a positive spin) purity laws (including food, *Let. Aris.* 142) separating Israel from all other nations to make it holy (*Let. Aris.* 139–40).⁶¹⁶ Philo, an agitator for Jewish citizenship in Alexandria, acknowledged that Jewish customs set Jews apart from other peoples, preventing mingling (*Mos.* 1.278). Likewise, even for Josephus, who certainly writes with a broader audience (including Gentiles) in view, the law forbids excess intermingling between foreigners and Jews (*Ag. Ap.* 2.257).⁶¹⁷ But Jewish refusal to fellowship with those who live otherwise (2.258) was not dif-

607. Le Cornu, *Acts*, 577–78 (citing *m. Šeb.* 4:3; 5:9; *Git.* 5:8; *t. ‘Abod. Zar.* 1:3; *y. Demai* 4.4.24a; *b. Ber.* 17a), also noting that some rabbis visited a Gentile in Tyre (citing *Pesiq. Rab Kah.* 6:2; *Esth. Rab.* 2:4; *Pesiq. Rab.* 16:6; *Midr. Prov.* 13).

608. Le Cornu, *Acts*, 575.

609. *Pirque R. El.* 29 (Le Cornu, *Acts*, 574). This may be hyperbole, working on the assumption of the uncircumcised being idolaters.

610. Contrary to the arguments of some, this practice was early and known by some Gentiles even outside the land (see Keener, *John*, 446–47; comment on Acts 2:38).

611. Le Cornu, *Acts*, 576, citing *Jos. Ant.* 15.417; *War* 6.124–25; *Ag. Ap.* 2.103–4; *Philo Embassy* 212; *m. Kelim* 1:8; *b. Yebam.* 46ab.

612. Even if one holds that later rabbis associated purity laws with the temple simply to negate those laws’ present relevance (Poirier, “Purity”), the architecture in Josephus supports the connection.

613. Klawans, “Gentile Impurity,” excludes much of the evidence by arguing that the Tannaim initiated a new understanding of Gentiles as being ritually defiling. But our earlier sources (proselyte baptism, the temple, Acts, and the Qumran evidence) suggest that the Tannaim simply refined ideas already held (though one could read even Acts as referring to moral rather than ritual impurity; Klawans acknowledges the former). The claim of Hayes, “Intermarriage,” that Gentile impurity was a late construct based on the prohibition of intermarriage (because the earliest sources against intermarriage do not cite this rationale) is also unpersuasive (see comment on Acts 16:3); Gentile impurity need not be the primary (or earliest) reason for prohibiting intermarriage for it to be held in the first century.

614. Le Cornu, *Acts*, 575.

615. Wise, “General Introduction,” 264 (connecting the First Jewish Revolt’s revolutionaries’ immediate ending of sacrifices on behalf of Caesar).

616. Distinctive customs need not entail hatred: those who followed pagan customs and “joined themselves to pagans” apostatized from Israel (1 Macc 1:14–15), but the same document welcomes Gentile allies (8:17–29; 12:2, 5, 16; 14:16, 24, 40) and considers Spartans “siblings” (12:6, 21; 14:20).

617. No less a Hellenistically competent Judean writer than Josephus might be construed as warning against welcoming Gentiles who lack genuine commitment to Judaism (*Ag. Ap.* 2.210; Barclay, “Paul among Jews,”

ferent from the similar exclusivism of other peoples (2.259); in contrast to some others, in fact, Jews did welcome converts (2.260–61). Certainly the Hellenistic and Roman pragmatic ideal of multiculturalism (cf. Dion. Hal. *Ant. rom.* 1.89.1–90.1) contrasts with Jewish prohibitions of mixing, however strictly or leniently applied.⁶¹⁸ But in practice, Romans and Greeks were ethnocentric; both Roman and Hellenistic cultural mixing was meant to spread their own “superior” cultures. See fuller comment on table fellowship at Acts 10:23; 11:3.⁶¹⁹

If Pharisees limited their intercourse with the *amme ha'aretz* within Israel,⁶²⁰ certainly at least Pharisees (who came to constitute a conservative wing within the Jerusalem church, Acts 15:5) would be no less concerned with Gentiles.⁶²¹ Later rabbis looked askance at the *amme ha'aretz*⁶²² and apparently felt that they communicated uncleanness to scrupulous Pharisees,⁶²³ with whom they may often be contrasted.⁶²⁴ One should not eat the food of an *am ha'aretz*;⁶²⁵ a pious person who eats with such a common person becomes debased;⁶²⁶ and a pious person who eats at the common person's house must assume that the food has not been tithed.⁶²⁷ A pious person (by rabbinic standards) should oversee the banquet of an *am ha'aretz* only if he may supervise and be certain that everything has been properly tithed.⁶²⁸

One could never be certain whether the garment of an *am ha'aretz*, who did not observe proper purity regulations, was unclean (*m. Tehar.* 4:5);⁶²⁹ having one's pos-

104), but while this draws community boundaries, it need not exclude positive contact. Jewish exclusivity was a major charge against them (Barclay, *Jews in Diaspora*, 272, citing *Ag. Ap.* 2.148).

618. Scholars cite, e.g., Lev 20:24–26; Ezra 10:11; 1 Esd 8:70–71, 86–87; 2 Macc 14:3, 37–38; *Let. Aris.* 138; Philo *Mos.* 1.278; see Boring, Berger, and Colpe, *Commentary*, 320–21; Dunn, *Acts*, 139. In contrast with modern multicultural ideals, however, the closest ancient ideal equivalent usually both coexisted with xenophobia in the homeland and functioned as a tool of imperialism; see the commentary introduction, Keener, *Acts*, 1:516–17; for xenophobia against Jewish people in antiquity, see comment on Acts 16:20–21.

619. For the range of views regarding Gentiles, see Donaldson, *Paul and Gentiles*, 52–74; Boccaccini, *Judaism*, 251–65; briefly, see the commentary introduction, Keener, *Acts*, 1:512–13.

620. Rabbinic reports express the social distance that existed between Pharisees and the *amme ha'aretz* (for the contrast, see, e.g., *m. Git.* 5:9; *Ḥag.* 2:7; *t. Demai* 2:5, 14–15, 19; 3:6–7; 6:8; *Ma'as.* 2:5), the common people who often ignored their legal interpretations. Hillel reportedly doubted that such unlearned people (such as the *amme ha'aretz*, *b. Ber.* 61a) could be pious (cf. *m. 'Ab.* 2:5/6); some Tannaim doubted that those who neglected learning Torah if they had the opportunity would share in the coming world (*'Abot R. Nat.* 36 A); some apparently felt that undue fellowship with an *am ha'aretz* would deprive one of (eternal?) life (*m. 'Ab.* 3:10/11). Still, some rabbinic accounts may be intended hyperbolically (*b. Ber.* 61a; *Pesah.* 49b); cf. kinder sentiments in *m. Git.* 5:9; *'Abot R. Nat.* 16, 40 A.

621. An *am ha'aretz* was more trustworthy than a Gentile (*b. Bek.* 11b; cf. *'Abot R. Nat.* 16 A; contrast *b. Pesah.* 49b, but this is extreme; one should not intermarry with them, *b. Pesah.* 49a). Views about them shifted over time (Jaffé, “*Amei-ha-ares*,” regards the Tannaim as more hostile than Pharisees or Amoraim).

622. E.g., *m. 'Ab.* 3:11; *b. Pesah.* 49b.

623. E.g., *m. Demai* 2:2; *Ma'as.* Š. 3:3; *Ḥag.* 2:7; *Tehar.* 4:5; 8:3, 5; *t. 'Ohal.* 5:11. On their uncleanness and carelessness about purity (by rabbinic standards), see also, e.g., *t. Demai* 3:10; 6:8; *b. 'Abod. Zar.* 69a; *y. Ḥag.* 2:6, §3; *Lev. Rab.* 18:1.

624. Cf., e.g., *t. Ma'as.* 2:5; *Demai* 2:5, 14–15, 19; 3:7; 6:8; *b. 'Abod. Zar.* 70b; cf. Luke 18:10. Whether the categories of *haberim* and Pharisees overlap fully has been debated and would affect the texts used here.

625. *'Abot R. Nat.* 32, §72 B. Sanders, *Judaism*, 441, concedes that Pharisees normally avoided eating with persons lower “on the purity scale” but warns against NT scholars' frequent assumption that this entailed total separation or a soteriological judgment.

626. *'Abot R. Nat.* 31, §68. For avoiding meals with them, cf. also *b. Ber.* 43b; *y. Demai* 2:3.

627. So *t. Demai* 3:7; for related cautions, 3:9; cf. Pharisaic concerns in Luke 11:42. On the untithed food of *amme ha'aretz*, see also *m. Demai* 2:2; 4:5; *Ma'as.* 5:3; *Ma'as.* Š. 3:3; *b. Beṣah* 35b; *Ned.* 20a; 84b; *Pesah.* 42b; eating it could be regarded as deathworthy in late sources (*Lam. Rab.* 1:3, §28). Some viewed this as the distinctive mark constituting an *am ha'aretz* (*b. Ber.* 47b, bar.).

628. So *t. Demai* 3:6.

629. Cf. *m. Ḥag.* 2:7. This was true, by Pharisaic standards, even though some *amme ha'aretz* were priests (*'Abot R. Nat.* 32, §72 B; *y. Ter.* 6:1), who were supposed to represent a higher standard of holiness than Pharisees (*m. Ḥag.* 2:7).

sessions on an *am ha'aretz's* property made them unclean (8:3); if one allows *amme ha'aretz* into one's house, they render it unclean (though not if they enter without permission, 8:5). Their vessels were unclean (*t. 'Ohal. 5:11*). These sentiments toward the *amme ha'aretz* probably extend earlier separatism between the righteous and the wicked in Israel⁶³⁰ (which is not to say that “sinners” in the Gospels refers to the *amme ha'aretz*;⁶³¹ the rabbis did tolerate the latter).⁶³²

Even God-fearers remained unclean as unconverted Gentiles; their food might be clean, but the seating in their home was not.⁶³³ Some strictures against interaction with Gentiles would be less relevant for a God-fearer who avoided idolatry. Avoiding business with Gentiles for three days before a festival to avoid idolatry uncleanness (*m. 'Abod. Zar. 1:1–2*)⁶³⁴ would not be relevant to a God-fearer. Not only Gentiles' homes but their land counted “as אבות טומאה (avot tum'ah—‘fathers of uncleanness’)—i.e., primary sources of impurity.”⁶³⁵ Yet a Jew might enter even a house originally built for idolatry if the idol was removed (*m. 'Abod. Zar. 3:7*).⁶³⁶

Despite the report in Acts 10:22, Peter may not know the extent of Cornelius's “God-fearing”; Cornelius's bow in 10:25 rendered the situation more ambiguous. Whatever Cornelius's precise relationship to idolatry, he, as a Roman soldier bound by oath to Caesar, cannot be completely free from that sphere. Peter seems to have held to a more stringent, “religious” view than some of his contemporaries, at least after his leadership in the Jerusalem church may have required him to be “above reproach” to avoid needless scandal that could alienate conservatives inside or outside the community.⁶³⁷ (One might suppose that the more conservative position reflected those who lived in exclusively Jewish areas; Peter, however, came from an area where some contact with Gentiles was inevitable.)⁶³⁸

Does Peter mean that literally all people are clean, making them “acceptable to God” (10:35) and “saved” (11:14)? This interpretation would press soteriology into a statement of cross-cultural relationship at the expense of its larger Lukan theological context (cf. 4:12; 10:43). Later Peter argues that God “cleansed” Gentiles through faith (15:9, 11)—a faith that occurs (at least in its fullest sense) only after Peter preaches to them (10:43–44; 11:17; 15:7).⁶³⁹

630. E.g., Ps 1:1; Prov 13:20; Sir 13:16–19; 33:14 (LXX; in a different version, 36:14).

631. Some (Jeremias, *Theology*, 118; idem, *Parables*, 132) included *amme ha'aretz* in this category; others disagree (Sanders, *Jesus and Judaism*, 176–99; Witherington, *Christology of Jesus*, 73). If the *amme ha'aretz* comprised the vast majority of first-century Judeans, the Pharisees could scarcely have excluded them entirely from the covenant (*m. Sanh. 10:1*). The Pharisees probably looked down on those uneducated in the Torah no less than much of the modern academic elite tends toward impatience with the politically uninformed “masses” (cf. *m. 'Ab. 2:6*, 3:11; *'Abot R. Nat. 36 A*; *b. Ber. 61a*; *Pesah. 49b*, including baraitoth), but “sinners” normally specified blatant violators of the law (*Tob 4:17*; *1 En. 1:9*; *5:6*; *22:10–13*; *91:11–12*; *94:5*, 11; *95:2–3*, 7; *98:10*; *108:6–7*, 15; *Pss. Sol. 2:34*; *13:1*; *14:6–7*; *Sib. Or. 3.304*), though it can include any human who sins (e.g., *Test. Ab. 9:5–7 A*; *4 Ezra 7:138–40*).

632. E.g., *m. Git. 5:9*; Urbach, *Sages*, 1:632–34. The rabbis viewed the *amme ha'aretz* negatively primarily in relation to the law as the rabbis had come to understand it (633). A son of an *am ha'aretz* could be apprenticed to a *haber* provided he followed the latter's rules when there (*t. Demai 2:19*). Sometimes an *am ha'aretz* would respect and learn from rabbis (*Gen. Rab. 78:12*; contrast *b. Pesah. 49b*). The rabbinic usage differs from that in the Hebrew Bible (de Vaux, *Israel*, 70–71; Nicholson, “Expression”).

633. Le Cornu, *Acts*, 583, citing *m. Ger. 3:1–2*.

634. Le Cornu, *Acts*, 576; cf. *y. 'Abod. Zar. 1:2*, §3.

635. Le Cornu, *Acts*, 576 (citing *m. Kelim 1:1*; *'Ohal. 18:7*; *Naz. 7:3*; *y. Šabb. 1.4.3c*; *Sem. 4:23*, 25; *b. Šabb. 14b–15a*; *'Abod. Zar. 8b*).

636. Le Cornu, *Acts*, 577. Some Tannaim claimed that Moses spoke with Pharaoh outside the city because of idolatry (*Mek. Pisha 1.40–41* [Lauterbach, 1:4]).

637. The principle could be taken too far (*Gal 2:12–13*; 6:12), but Paul himself allowed the principle more generally (*1 Cor 9:20–21*).

638. See Le Cornu, *Acts*, 566–67.

639. Cf. also discussion in Stanton, *Jesus of Nazareth*, 23–25.

Perhaps here Peter simply claims that he cannot evaluate people's *potential* for conversion on the basis of their ethnicity; his actual eating with them (11:3) seems to occur after their faith and baptism. A less likely alternative is that Luke simply uses "cleanse" in two different ways, one referring to those acceptable for table fellowship (because they are God-fearers) and the other to full cleansing of those who become something like spiritual proselytes; either way, we cannot press Luke's language or imagery too strictly here.⁶⁴⁰ (This is not the only place where he is less concerned with the chronology of conversion than we typically are; see comment on Acts 2:38; 8:14–16.)

As in the Gospel Jesus embraced "sinners" (Luke 5:8, 30, 32; 7:34, 37, 39; 15:1–2, 7, 10; 19:7) without approving of their ways (6:32–34), regarding all as genuinely sinners (cf. 5:8, 32; 13:2; 15:25–32; 18:13; 24:7), in Acts (which lacks the term) the morally marginalized now welcomed are the Gentiles.⁶⁴¹ Yet Peter is certain to be questioned for his action here (Acts 11:3), and his speech here defends him in advance with the forensic technique of metastasis: he "transfers the responsibility for his seemingly unorthodox behavior to God."⁶⁴²

V. COMING WITHOUT OBJECTION (10:29)

In Luke 7:6, Jesus was going to a centurion's home, but the centurion deterred him, claiming to be unworthy (apparently based on pre-Lukan tradition, though Matt 8:7 may be a question).⁶⁴³ But Luke here shows that the sort of practice that Jesus began, Peter has fulfilled; Jesus did not go to a centurion's house, but his agent Peter now does so.

One could refuse a request, but even to a stranger one ought to do so politely by saying "if possible" rather than a direct "no" (Cic. *Att.* 8.4); Peter, however, had not even raised any objections. His claim that he lacked an objection might be viewed as disingenuous since he had serious initial objections (Acts 10:14);⁶⁴⁴ in this case his report would be rhetorically self-serving (or at least inoffensive) like Lysias's later report to Felix (23:27). Rhetorical handbooks suggest portraying characters distinctively and realistically, in ways appropriate to the situation.

Peter's objection was to God, however, not to the messengers (the issue in question), and the lack of objection he affirms here follows his lesson from God not to regard anyone as unclean (10:28); he later does not hesitate to confess his objections to his conservative colleagues in Jerusalem (11:8). Thus Peter presumably refers to his lack of objection to the messengers.

Since Peter has already heard Cornelius's request through his messengers in 10:22, asking why Cornelius had sent for him may reflect inconsistent editing of the story⁶⁴⁵ or simply a desire to hear a fuller account. Granted, 10:22 does not specify the content of the message; neither, however, does 10:30–33, though the invitation to speak what God has commanded (10:33) may invite Peter's dependence on spontaneous inspiration of the Spirit. Perhaps protocol simply invites him to hear the message more formally from Cornelius's own lips; the verb for his inquiry might balance the inquiry of Cornelius's messengers in 10:18, though the term (used seven other times by Luke, 75 percent of NT usage) may simply be fresh on Luke's mind.

640. Kilgallen, "Acceptable," distinguishes "clean" in Acts 10:28 from "saved" in 11:14.

641. For the transposition of "sinners" and "saved" in Luke's rhetoric, cf. Neale, *None but Sinners*.

642. Soards, *Speeches*, 71.

643. For the view that it is a question, see Jeremias, *Promise*, 30; Martin, "Pericope," 15; France, "Exegesis," 257; Carson, "Matthew," 201; Keener, *Matthew*, 266.

644. Spencer, *Acts*, 115.

645. Cf. Ehrhardt, *Acts*, 61.

VI. CORNELIUS'S SUMMARY (10:30–33)

Because most of this summary rehearses information already provided, Luke covers it concisely. In 10:30, it sounds as if it took the messengers two days to reach Peter; now they were arriving (undoubtedly after a nocturnal rest in some village along the road) between 3:00 and 4:00 p.m. But “four days” may be three days, since part of a day counted as a whole by ancient reckoning.⁶⁴⁶ If the return journey to Caesarea included an overnight stay along the way, the group may have reached Cornelius's house before 3:00 p.m. (or perhaps even before noon), perhaps allowing for a hospitable meal before official business.⁶⁴⁷ Conversely, they may have simply arrived late, having stopped en route to eat kosher provisions or, less likely, to purchase food from sellers.

The summary in 10:30–32 provides the gist of 10:3–6, though the wording is different; such paraphrase was accepted in ancient rhetoric and Luke's own methodology and reduced the verbal redundancy in literary repetitions. Cornelius's depiction of the angel as one in “radiant apparel” does not suggest that he was unaware that his visitor was an angel (cf. 10:22); this is typical language in Luke-Acts (1:10).⁶⁴⁸ Cornelius's “petition” (10:31), if for salvation or acceptance, might draw on the language of regular Jewish prayer,⁶⁴⁹ although it need not have done so. That Cornelius's righteous acts were “remembered by God” evokes LXX language, where God remembers his righteous ones or his covenant with them.⁶⁵⁰

The attentive reader of Luke-Acts may also notice an implicit comparison of two recipients of revelation: Gabriel told the aged priest Zechariah that his prayer had been heard (Luke 1:13), just as an angel now declares to this uncircumcised Gentile. We cannot say for certain whether the echo is deliberate or simply the product of Luke's distinctive style, but it does draw our attention to the first angel appearance in Luke-Acts, unexpectedly placing Cornelius on a par with other (Jewish) seekers of God.

Nowhere in this chapter is it clear that Cornelius specifically sought salvation, only a message from God (Acts 10:5–6, 22, 32); still, although we might construe this to mean that Cornelius was already converted (cf. 11:9; 15:9), Peter's first summary of the events seems to suggest otherwise (11:14).⁶⁵¹ It is possible that Peter understood and articulated Cornelius's need as conversion (“salvation,” in Luke's language), but Cornelius should not be expected to have understood that language or precisely how to describe his need.

“All that the Lord commanded” Peter to say (10:33) recalls 1:2 for the ideal reader: Jesus had left commands with his disciples. The specific term, *προστάσω*, appears

646. Kistemaker, *Acts*, 389.

647. See *ibid.* Although it might seem questionable whether Luke would skip such a meal as irrelevant to his point, it is possible that meals together could be inferred on the basis of Acts 11:3 (though these meals are more certain afterward). Luke does not feel compelled to specify them in 10:48, though they may be safely assumed there.

648. The particular term for “radiant” here (*λαμπρός*) can simply mean “bright” and clean (Luke 23:11; Jas 2:2–3; Rev 18:14; 19:8; Sir 29:22; Bar 6:60), though it applies to angels in Rev 15:6, to Jesus in Acts 26:13 (in a noun cognate); Rev 22:16, and to Wisdom in Wis 6:12. Cornelius recognizes that the “man” (Acts 10:30) is an “angel” (10:22; cf. 11:13), as elsewhere (Luke 24:4, 23; cf. Acts 1:10).

649. Talbert, *Acts*, 96, cites the Eighteen Benedictions—benedictions 1, 6, and 7 regarding redemption and 6 for forgiveness (the answer in Acts 10:43).

650. Johnson, *Acts*, 190–91, cites Gen 4:1; 9:15; Exod 2:24; 6:5; Lev 26:42; Pss 105:45; 135:23; also Luke 1:54, 72; 23:42.

651. Acts 11:14 seems to supply a key element supporting the conclusion of 11:18, but the timing of the household's conversion need not be significant for that conclusion if the outpouring of the Spirit could follow conversion in some cases (cf. 8:14–17).

in Luke's writings only at Luke 5:14 (the law), Acts 10:48 (for Peter's command to baptize),⁶⁵² and Acts 17:26 (God's decree in creation).⁶⁵³

5. Peter Recounts Jesus's Story (10:34–43)

Peter recounts here the nucleus of Jesus's story, the same story preached at greater length by Luke's Gospel.⁶⁵⁴ The climactic message of forgiveness for whoever believes (10:43) is confirmed by the outpouring of the Spirit on Gentiles (10:44–48).

a. Introduction

This speech summarizes major themes of Luke's Gospel, starting from John's baptism and including healings as deliverance from the devil, the movement from Galilee to Jerusalem, rejection, appearances, and commission.⁶⁵⁵ Likewise, the mention of God "anointing" Jesus with the Spirit (10:38) is Luke's most obvious allusion in Acts back to the programmatic statement of the Gospel (Luke 4:18).

Peter is interrupted only shortly after his *narratio* (depending on how we view the speech's structure),⁶⁵⁶ but Luke allows him to rehearse in a micronarrative⁶⁵⁷ what Luke's own Gospel did more extensively: Gentiles need to hear the gospel story. This portrayal suggests a model for the continuing Gentile mission. Its summary form also provides an interpretive crux for the Gospel of Luke, recounting key themes central to his emphasis.⁶⁵⁸

The rhetorical structure is something like the following:

- Complimentary *exordium* (Acts 10:34–35)
- *Propositio* (possibly; 10:36)
- *Narratio* (10:37–42)⁶⁵⁹
- Beginning of proofs (10:43)

It is also possible to make 10:43 the *propositio*.⁶⁶⁰ In any case, Peter is unable to complete the speech (cf. 11:15, despite the idiom). Some scholars regard the speech as

652. Probably the term was fresh on Luke's mind, but perhaps Acts 10:48 suggests that Peter gives this order on the basis of God's command.

653. It appears elsewhere in the NT only rarely (Mark 1:44; Matt 1:24; 8:4) but often in the LXX, especially later parts such as Esther (Esth 1:15, 19; 2:23; 3:2, 14; 13:6), Daniel (Dan 2:8, 12, 14; 3:10, 13, 24; 4:14; 13:32, 34), and Maccabean literature (1 Macc 10:37, 62; 2 Macc 5:24; 6:21; 7:3–4; 13:4; 14:16; 15:3, 5, 30; 3 Macc 3:25; 4:11, 13; 5:3–4, 19, 37, 40; 7:8); also in the Apostolic Fathers, esp. 1 *Clement* (1 *Clem.* 20.11; 40.4–5; 54.2) and *Hermas* (*Herm.* 29.10; 66.1, 5; also *Ign. Poly.* 8.1).

654. Kennedy, "Source Criticism," 148–49, notes the connection to the gospel story and compares Mark, whose source early tradition deems Peter.

655. Johnson, *Acts*, 195; for connections with some key themes in Luke-Acts, see Neiryneck, "Luke 4,16–30," 379–87. Park, "Berichte," thinks that Acts 10:37–43 resembles the summary in *Jos. Ant.* 18.63–64, but the overlap might reflect the same historical subject and a similar audience.

656. Peter notes that the Spirit came as he was "beginning to speak" (Acts 11:15), but this may also reflect Lukan idiom with this verb (Luke 7:15; Acts 2:4) and others like it (see comment on Acts 2:4).

657. Greek epic poets such as Homer mastered the use of a story within a story, but one finds it much earlier, e.g., in the serpent's account in the Egyptian story "The Shipwrecked Sailor" (ca. 2000 B.C.E.; in Simpson, *Literature of Egypt*, 45–53).

658. On speeches interpreting history, etc., see, e.g., Plümacher, "Missionsreden."

659. This is the appropriate location for a *narratio*, though deliberative speeches could omit them (Heath, "Invention," 105–6); presumably, Luke focuses on the *narratio* because of his popular-narrative genre (though most historians composing speeches did not normally do so; oratorical narrative functioned differently than rhetorically informed historical narrative, cf. *Pliny Ep.* 5.8.9–11).

660. Cf., e.g., the defense speech *narratio* in *Cic. Quinct.* 3.11–9.33, followed by a statement of the case in 10.36, proofs in 11.37–27.85, and a summary of what was proved, 28.85–29.90. Marguerat, *Actes*, 389 (cf. 395), views Acts 10:34–36 as the *propositio*, 10:37–42 as the *narratio*, and 10:43 as the *peroratio*.

forensic, which fits the structure and the context of Peter's defense in 11:4–17;⁶⁶¹ in this setting in the story world, however, Peter's intention is deliberative⁶⁶² if he calls for conversion.

Others regard this speech as a general missionary sermon, only loosely connected with the context;⁶⁶³ if the connection is loose, Luke might give a sample of the traditional preaching without needing to know the exact words spoken on the occasion. Of course, the alternatives need not be stark; Luke could have some specific tradition about the speech and fill in with general information, for example. Some argue that Luke may follow a written source here,⁶⁶⁴ though others regard it as a Lukan creation.⁶⁶⁵ Whatever sources Luke may have had available, he certainly makes them his own.

Luke is sensitive to the rhetorical situation; thus Peter, preaching now to a Gentile, includes less Scripture than in Acts 2 and 3; Luke provides a sufficient sample of OT exposition in sermons to Jewish audiences (including Acts 7; 13). Nevertheless, Scripture remains foundational as a source and template (Acts 10:43; Luke 24:44–45), and there are a number of proposed biblical allusions here (Deut 10:17 in Acts 10:34; Isa 52:7 and 59:17 in Acts 10:36; Ps 107:20 and Isa 61:1 in Acts 10:38; and possibly Deut 21:22 in Acts 10:39).⁶⁶⁶

We need not be concerned about Peter's means of communication. Latin was used in Palestine especially by the army and provincial administration, and many Latin inscriptions appear in Caesarea.⁶⁶⁷ It was important enough to appear on signs in Jerusalem's temple forbidding foreigners' entrance (Jos. *War* 5.194), but apart from milestones, nearly half of all its occurrences in Palestine are from Caesarea.⁶⁶⁸

Nevertheless, no one would suppose that Peter had speedily learned Latin for the occasion. This was the Greek East, and whether Cornelius is a Roman who had worked in the East or an urban Syrian from the East, he would understand Greek.⁶⁶⁹ Even in Caesarea, although Latin was the language of the governor's office, the army, and inscriptions belonging to the city's post-70 colonial status, Herod's Caesarea was more Hellenistic than Roman.⁶⁷⁰

b. Rehearsing Common Knowledge (10:34–38)

Luke portrays some key events of the Jesus story as common knowledge in Judea (Luke 24:18; Acts 26:26). In Acts 10:37–38, Peter affirms that his audience in Caesarea

661. E.g., Witherington, *Acts*, 355; cf. Soards, *Speeches*, 71 (with both judicial and deliberative elements). It would be epideictic (with Kennedy, *New Testament Interpretation*, 123) if its focus was the praising of righteous Gentiles.

662. With, e.g., Humphrey, *Voice*, 76.

663. Cf. Ehrhardt, *Acts*, 61.

664. Zehnle, *Pentecost Discourse*, 40. Fitzmyer, *Acts*, 459, thinks that the apposition between λόγος and ῥήματα in Acts 10:36–37 indicates source material, but it may simply be literary variation (cf. p. 464 on the sense of the Heb. *dabar* here). The grammatical problems of 10:36–38 could suggest a source (Witherington, *Acts*, 355); Dodd thinks that 10:35–38 makes much more sense as a close translation of the Aramaic (*Preaching*, 27–28, following Torrey). (Dodd's view makes sense if the Palestinian church transmitted the message in Aramaic, but Peter certainly did not deliver it in Aramaic unless Cornelius was Syrian, which is not impossible but certainly not how Luke presents him.)

665. E.g., Wilckens, "Kerygma und Evangelium."

666. Witherington, *Acts*, 355–56.

667. Aune, "Latin," 335.

668. Eck, "Spiegel."

669. If a Syrian, he might even understand Aramaic. Whatever Cornelius's background in Luke's source, however, his own Cornelius, in literary terms, stands more for Rome than for Syria (which already had its first mentioned representative in the church, Acts 6:5). Although military inscriptions would be in Latin, Cornelius would presumably converse with his subordinates in Greek for everyday matters.

670. See Isaac, "Latin and Greek."

knows of the famous deeds of Jesus in greater Judea (or, following the sequence of Luke's Gospel, Galilee, Perea, and Judea proper). But in 10:34–35 Peter affirms that he has himself discovered something he had not known; though the point that God shows no partiality (10:34) was a common idea, its application in 10:35 would have been more controversial among Peter's countrypeople. After building on this common ground, Peter can turn to more specific information verified by witnesses.

I. NO PARTIALITY (10:34)

Luke does not strictly need to report that Peter "opened his mouth" at the beginning of a speech (Acts 8:35; 18:14; Luke 1:64), since this is self-evident; it reflects familiar biblical idiom,⁶⁷¹ generally found in the more Semitic parts of the NT.⁶⁷² "Of a truth" (ἐπ' ἀληθείας), or "certainly," appears elsewhere as an idiom in Luke (Acts 4:27; Luke 4:25; 20:21; 22:59; see comment at 4:27). Acts 10:34–35 here constitutes a complimentary *exordium*; this would be appropriate for addressing Gentile hearers (and, even if one knew little about rhetoric, might seem a matter of polite propriety, in any case). Peter may have already known, at least on some level, that Gentiles could become saved (Luke 24:47; cf. Acts 1:8; 2:39; 3:25–26); what he has certainly learned newly here is that he cannot presume uncircumcised Gentiles to be impure or treat this as a barrier to fellowship with them (cf. Acts 15:9).⁶⁷³

The foundation for this argument is God's impartiality,⁶⁷⁴ a thesis affirmed by both Jewish and Gentile thinkers (Deut 10:17 is foundational for the Jewish perspective).⁶⁷⁵ People expected and praised a ruler's⁶⁷⁶ or judge's impartiality;⁶⁷⁷ Greeks and those influenced by them could also apply this impartial judgment to the activity of Zeus.⁶⁷⁸ Jewish people recognized that judges should be impartial,⁶⁷⁹ and affirmed that God was impartial.⁶⁸⁰

Paul also applied God's impartiality to the matter of Jews and Gentiles (Rom 2:9–11, esp. 11). But whereas Paul stresses divine impartiality in the usual Jewish

671. More than forty times in the LXX; so also many commentators on Matt 5:1 (e.g., Gundry, *Matthew*, 67; Guelich, *Sermon on Mount*, 54).

672. Matt 5:2; 13:35; Rev 13:6; but also 2 Cor 6:11; the apparent exceptions in 1 Clem. 16.7; 18.15 echo biblical language. This might, but need not, reflect a Semitic source (Philip the Hellenist may be the source for Acts 8:35, though 8:32 may influence the wording there).

673. Tannehill, *Acts*, 134–37.

674. This text's more recent reception history in a racialized context suggests its continued effectiveness in demanding reconciliation between ethnically estranged groups (Scott, "Acts 10:34," esp. 138–39), including in African-American history (Williams, "Acts," 231, 236), not least the antislavery movement (see esp. Washington, *Fellowship*, 27).

675. Despite the absence of this specific term, the concept of impartiality is frequent in the LXX (e.g., Job 13:8; 32:21; expressed with πρόσωπον in Exod 23:3; Deut 1:17; 10:17; 16:19; 2 Chr 19:7; Job 13:10; Ps 81:2 [82:2 ET]; Prov 18:5; 24:23; 28:21; Sir 7:6; by πρόσωπον with λαμβάνω, Lev 19:15; Mal 2:9; Sir 4:22, 27; 35:13 [35:16]; 1 Esd 4:39). Sometimes these texts describe God (2 Chr 19:7; Job 34:19; Sir 35:12 [35:15]) or truth (1 Esd 4:39); the sense is different in Mal 1:8. For divine impartiality in Scripture, see in more detail Bassler, *Impartiality*, 7–17 (focusing on 2 Chr 19:7; Deut 10:17; Job 34:19; Ps 82:1–4).

676. E.g., Isoc. *Ad Nic.* 18; Men. *Rhet.* 2.10, 416.8–9, 15.

677. E.g., Demosth. *Cor.* 1–2; Cic. *Quint. frat.* 1.2.3.10. In different wording, e.g., Plut. *S. Rom.*, Cato the Elder 13, *Mor.* 198F; Philost. *Vit. soph.* 2.27.616.

678. E.g., Aeschylus *Suppl.* 403–4. In different wording, e.g., Sil. *It.* 6.467.

679. Besides LXX texts above, see, e.g., 4Q364 frg. 21a–k (reproducing Deut 1:17); *Jub.* 40:8; Sir 42:2; Ps.-Phoc. 9–12, 137. In different wording, e.g., Jos. *Ag. Ap.* 2.207.

680. In addition to LXX texts noted above (2 Chr 19:7; Job 34:19; Sir 35:12 [LXX; 35:15 NRSV; in another version, 32:15]), see *Jub.* 5:16; 21:4; 33:18; *Pss. Sol.* 2:18; Wis 6:7; L.A.B. 20:4; 2 Bar. 13:8; 44:4; *Test. Job* 4:7–8; 43:13; *Sipre Num.* 42.1.2; *Sipre Deut.* 304.1.1; Rom 2:11 (which Bassler, "Divine Impartiality," regards as the center of Paul's argument in Rom 1:16–2:29); cf. similar ideas in Wis 12:13. In the Apocrypha and Pseudepigrapha more fully, see Bassler, *Impartiality*, 17–44; in the rabbinic literature (where it often is used for theodicy), see 45–76; in Philo (where it retains nationalistic overtones), 77–119.

setting of God's judgment, Luke's articulation of this idea may be closer to typical Gentile portraits of universality.⁶⁸¹ Luke's particular term for one who shows partiality or favoritism, προσωπολήμπτης, is a NT hapax legomenon and perhaps the earliest occurrence in extant literature,⁶⁸² but it is probably not Luke's own coinage. Even if it were, it would be readily understandable; early Christians used cognates for the same concept, applicable both to God (Rom 2:11; Eph 6:9; Col 3:25) and to others (Jas 2:1, 9; Ign. *Phil.* 6.1). Luke elsewhere employs the constituent noun and verb, πρόσωπον and λαμβάνω, for the showing of partiality (receiving someone's "face," Luke 20:21),⁶⁸³ as does Paul in denying that God shows partiality (Gal 2:6).

The terms προσωπολήμπτης, προσωπολημπτέω, and προσωπολημπσία in early Christian texts echo the conjunction of λαμβάνω and πρόσωπον in the LXX (so BDAG), perhaps suggesting an implicit wordplay here between καταλαμβάνομαι and προσωπολήμπτης. The verb καταλαμβάνω can refer to seizing or grasping, but particularly refers to apprehending or recognition in Luke's usage (always used by him in the middle voice, Acts 4:13; 25:25).⁶⁸⁴

II. WELCOMED GENTILES (10:35)

Gentiles here who "fear" God and do what is right refer back to God-fearers (10:2, though the term here differs). ("Working righteousness"⁶⁸⁵ probably corresponds to "almsgiving" in 10:2, analogous to "good and charitable works" in 9:36. It fits the testimony of the messengers to Cornelius's "righteousness" in 10:22 and certainly cannot rest on Cornelius's response to Peter in 10:25.)

If Luke identifies God-fearers with righteousness workers fully (which is not certain), then "acceptable" or (perhaps better in this context) "welcomed" here means that the gospel will come to them and they will respond to it, not that they are already saved (as Cornelius was not, at least in Peter's view; 11:14; 15:9).⁶⁸⁶ The term δεκτός can imply acceptability in a ritual sense—that is, no longer unclean⁶⁸⁷ (though it is not clear whether Luke uses this term on only one level; compare 10:28 with 15:9)—but it also has a more direct moral sense (e.g., Prov 11:1; 12:22; 16:7; Sir 2:5; 3:17; 35:6 [35:9]).⁶⁸⁸

Those welcomed before God here are not Gentiles as a whole but a specific class of Gentiles, what many Jews traditionally considered "righteous" Gentiles.⁶⁸⁹ This minority of Gentiles avoided predominantly Gentile sins such as idolatry and fornication;

681. Bassler, "Luke on Impartiality" (regarding Paul's abolition of categories as more radical than Luke's transfer of individuals from one category to the other).

682. Bruce, *Acts*¹, 224; Fitzmyer, *Acts*, 462; cf. BDAG.

683. Cf., also opposing partiality with these terms, *Did.* 4.3; *Barn.* 19.4.

684. Cf. the wordplay in Arius Did. *Epit.* 2.7.11m, pp. 94–95.20–22, where κατάληψιν is a certain assurance in contrast to mere υπόληψιν (line 20) or τὸ ὑπολαμβάνόμενον (22), "unfounded assumption." Note the wordplay on καταλαμβάνω in John 1:5 (comments in Keener, *John*, 387; Barrett, "Κατέλαβεν," 297); also in Lucian *Phil. Sale* 27.

685. Cf. "exploits for righteousness" in Heb 11:33. Early Christians (at least in the Pauline circle) would not have regarded these as intrinsically salvific (Rom 4:6; Titus 3:5; but cf. Rom 2:6–8), but they would not have rejected their value (1 John 3:12; 1 *Clem.* 33.8; 2 *Clem.* 6.9; *Barn.* 1.6; *Herm.* 36.3, 8).

686. Cf. Dumais, "Salut" (some passages may suggest that pagan cultures provide some form of access to God, but in these passages' full Lukan context, this can be fulfilled only in Christ).

687. E.g., Lev 1:3–4; 17:4; 19:5; 22:19–21, 29; 23:11; Prov 15:8; Isa 56:7; 58:5; 60:7; Jer 6:20; Mal 2:13; cf. Job 33:26. On the cultic sense, see also Clements, "Background," 205; cf. Arnold, "Acts," 312.

688. Balch, "Accepting," emphasizes Luke's acceptance theme. Dunn, *Acts*, 142, suggests that Gentiles who act like members of the covenant people should not be excluded (Rom 2:13–29), but the ultimate test will be reception of the Spirit. Luke's use of δεκτός in Luke 4:19, 24, is not cultic; of the other two NT uses, Phil 4:18 is, and 2 Cor 6:2 probably is not.

689. For diverse views regarding Gentiles, see the commentary introduction, Keener, *Acts*, 1:512–15; Boccaccini, *Judaism*, 251–65; Donaldson, *Paul and Gentiles*, 52–74; for God-fearers, see comment on Acts

much of Judaism already acknowledged their existence (perhaps as an apologetic device for theodicy), and the church later apparently embraced those who followed Jesus as fellow members (Acts 15:19–21, 28–29) without circumcision (15:5, 20).⁶⁹⁰

These righteous Gentiles would be “saved” (11:14), their hearts cleansed by faith as God also cleansed Jewish hearts by faith (15:9).⁶⁹¹ It is only when the Spirit falls (10:45), however, that Peter and his colleagues recognize their hearers not only as “righteous Gentiles” but as members of the covenant people, like full proselytes.⁶⁹²

III. GOD OFFERS PEACE (10:36)

Peter's words evoke biblical allusions to the universal God who offers peace to Israel and to others; this peace includes reconciliation to God and the withdrawal of the judgments attached to the previous state of enmity. The “good news of peace” of which Peter speaks is expressly directed toward Israel, but it has implications for Gentiles as well.⁶⁹³ (The “word” [λόγον] here recalls Luke's frequent use of this term for the apostolic message in Acts.)⁶⁹⁴

Sending a message of peace can be diplomatic language for nonaggression or ending hostilities (Deut 2:26; Judg 21:13), such as God would send for Jerusalem (Isa 52:7; 54:10; 57:19). “Proclaiming good news of peace” (here εὐαγγελιζόμενος εἰρήνην) appears in only two texts, one celebrating judgment on Israel's oppressor (Nah 1:15 [2:1 LXX]), the other celebrating God's forgiveness and restoration of his people (Isa 52:7; cf. Rom 10:15).⁶⁹⁵ The latter is likely in view here, probably along with (in view of other clues in Luke-Acts) the section of Isaiah that it evokes.⁶⁹⁶

Isaiah 52:7 speaks of preaching God's kingdom (“Your God reigns,” demonstrating his rule on behalf of his people), certainly central to Luke's understanding of the gospel (Luke 4:43; 8:1; 16:16; Acts 8:12). That Isa 52:7 almost immediately precedes the Suffering Servant's sacrifice (52:13–53:12) was undoubtedly significant for early Christians (see comment on Acts 8:32–33).⁶⁹⁷ It could be linked midrashically with

10:2. Long before the rabbinic discussions, Wisdom literature distinguished the righteous from the wicked, often in ways that Diaspora Jews could apply broadly.

690. The decision was ambiguous enough, however, about the membership; probably, in Galatians, salvation (which most Jews allowed “righteous Gentiles”) is not at issue but, rather, membership in God's people.

691. Acts 15:9 may undercut the proposed distinction between “clean” (10:28) and “acceptable” (Kilgalen, “Acceptable”), but Luke's Peter may employ the language of “cleansing” in two ways.

692. The debate in Paul's day may have, in fact, been more nuanced than Luke presents it as being in Acts 15:1 (or may have evolved beyond that more careless formulation): not whether righteous Gentiles could be saved but whether they could become part of Israel's covenant as physically uncircumcised, spiritual children of Abraham (Rom 2:28–29; 4:9–12; Gal 3:29). But whatever Peter's understanding here, it is not clear that the entire Jerusalem church welcomes Gentile believers as *full* members of the covenant even in Acts 15:20.

693. Although some were concerned about wishing “peace” to a Gentile during idolatrous feasts (*t. Abod. Zar.* 1:3), such greetings were permitted “for the sake of peace” (*m. Šeb.* 4:3; Le Cornu, *Acts*, 595). Some later rabbis suggested a different greeting for Gentiles (*y. Git.* 5:10, §5; cf. 2 John 10).

694. If the “word” were “evangelizing,” we would have prosopopoeia in the narrower sense (see Rowe, “Style,” 144; Anderson, *Glossary*, 106–7), but the antecedent of εὐαγγελιζόμενος is certainly God (Acts 10:34), the nominative subject of the verb “sent” in this verse. Omitting the relative pronoun ὃν might smooth the Greek grammar, but textually this might support its retention (which might be an Aramism; cf. Metzger, *Textual Commentary*, 379). Later application of “word” here to Jesus (based on John 1:1–18; Justin Martyr *1 Apol.* 5; 63; *Dial.* 128; Tert. *Apol.* 21.10; contrast Theophilus *Autol.* 2.10; cf. Rainbow, “Christology,” 666) is not surprising (Hippolytus *Against the Heresy of One Noetus* 13), but not to Luke's point.

695. Cf. also 11Q13 II, 16. For similar language, cf. 4Q440 3 I, 16; 4Q511 63–64 III, 4. Le Cornu, *Acts*, 594, notes that contemporary texts treat Isa 52:7; 57:19 and Nah 1:15 messianically (11QMelch II, 1, 4, 6, 15–18).

696. Cf. Allison, *Jesus*, 114, noting allusions to both Isa 52:7 and 61:1 in Acts 10:36–38, and noting the presence of both passages also in 11Q13 II, 15–20. By contrast, Bock, *Proclamation*, 233, doubts that Luke alludes to Isa 52:7 per se, thinking that he simply uses “scriptural language” in general.

697. Evans, *World*, 79, argues that sigla in both the Qumran Isaiah Scroll and the Masoretic Text underline the relationship between Isa 52:7–12 and 52:13–53:12.

Isa 61:1–2 (cited in Luke’s programmatic statement in Luke 4:18–19) and Isa 57:19 (whose “afar off” Luke probably interprets with reference to Gentiles in Acts 2:39). The only other extant NT reference to “evangelizing peace” includes a more explicit reference to Isa 57:19 (Eph 2:17); if we include the noun cognate of “evangelize,” “good news of peace” further clearly refers to Isa 52:7 in Eph 6:15.⁶⁹⁸

Preaching “peace” in Isaiah meant good news that God was no longer angry with his people; Luke’s use, which is informed by so-called Deutero-Isaiah as a whole, presumably means good news of reconciliation to and peace with God.⁶⁹⁹ Here as at other key points, Isaiah’s portrayal of mission informs Luke’s understanding of mission (Luke 4:18–19; see comment on Acts 1:8; 13:47). Jesus is the bringer of peace for earth and for heaven (both with glory in the highest; Luke 2:14; 19:38), and his agents would offer peace (10:5–6), though his coming also brought the figurative sword of division (12:51; see comment on Acts 7:26).⁷⁰⁰

As mentioned above, “peace” meant the cessation of hostilities. The language of “peace” often applies to war⁷⁰¹ or human relationships,⁷⁰² though some ancients (especially Stoics) could apply it to tranquility in the midst of hardship.⁷⁰³ Others applied it to the posthumous bliss of the righteous;⁷⁰⁴ it also belonged to the eschatological hope for Israel.⁷⁰⁵ The pacifist Pharisaic tradition that survived in rabbinic literature⁷⁰⁶ highly extolled the value of peace.⁷⁰⁷ But just as Caesar established the Roman “peace” (the *Pax Romana*) forcibly,⁷⁰⁸ so also God would ultimately subject all his enemies

698. For a possible challenge to imperial propaganda in Eph 6:15, see Osiek and MacDonald, *Place*, 121.

699. See Isa 40:2; 51:17, 22; 52:7–8; 54:8; specifically on “peace,” esp. 42:19; 48:22; 54:10; 57:19, 21; 60:17; 66:12. Cf. 1 En. 71:15; for the centrality of this theme, see O’Toole, “Eiprvn.” Here, too, it is (at least first) to “the children of Israel” (Acts 10:36), a biblicizing pleonasm Luke employs elsewhere (Luke 1:16; Acts 5:21; 7:23, 37; 9:15; elsewhere in the NT, only in quotations [Matt 27:9; Rom 9:27], summaries of passages [2 Cor 3:7, 13; Heb 11:22; Rev 2:14], and biblical allusions [Rev 7:4; 21:12]).

700. Some of these texts may contrast with Augustus’s fictitious *Pax Romana* (on which see, e.g., Bowley, “Pax”); for contrasts between the Bethlehem narrative and the imperial cult, cf., e.g., Kodell, *Luke*, 20; Flender, *Theologian*, 58; Talbert, *Reading Luke*, 32; Brent, “Cult.” For “peace” in Luke-Acts, see also discussion in Villiers, “Peace.”

701. *Isoc. Peace*; *Cic. Phil.* 1.1.1; *Sib. Or.* 3.751–55.

702. *T. Sanh.* 1:2; *Abot R. Nat.* 40 A; usually in Paul (with fellow believers, Rom 14:19; Eph 2:14–15; 4:3; Col 3:15; 1 Thess 5:13; with outsiders, Rom 12:18; 1 Cor 7:15; perhaps 2 Thess 3:16; with God, Rom 5:1; Eph 6:15).

703. Epict. *Diatr.* 3.13.9–11; probably *Let. Aris.* 273; cf. Epict. *Diatr.* 2.2.3; Sen. *Y. Dial.* 7.8.6; Iamblichus *Letter* 9.4–10 (Stobaeus *Anth.* 2.33.15); perhaps Rom 7:23 with 8:6.

704. *Wis* 3:3.

705. Tob 13:14; 1 En. 1:6–8; 5:7–10; 71:17; 105:2 (contrast 98:11, 15; 99:13; 101:3; 103:8 for the wicked); *Jub.* 1:15; 23:29–30; 31:20; 1QM I, 9; XII, 3 (after the battle); *Sib. Or.* 2.29; 3.367–80, 751–55, 780–82; 5.384–85; *Test. Jud.* 22:2; *Lev. Rab.* 9:9, bar.; Christian material in *Test. Dan* 5:11.

706. This wing of Pharisaism may have been a minority in the first century (see, e.g., Sanders, *Jesus to Mishnah*, 86, 324). For early Christian pacifism, see Sider, *Killing*.

707. Cf. the standard rabbinic “Great is peace, for . . .” (*Sipre Num.* 42.2.3; *Sipre Deut.* 199.3.1; *Gen. Rab.* 38:6, Tannaitic attribution; 48:18; 100:8, Tannaitic attribution; cf. *Sipra Behuq.* p. q. 1.261.1.14). It is associated with keeping the commandments (*Sipra VDDen.* p. q. 16.28.1.1, 3) and is a fruit of righteousness (*m. Ab.* 2:7, attributed to Hillel). Cf. *Abot R. Nat.* 48, §134 B; *Num. Rab.* 21:1.

708. For subjugation as pacification, see, e.g., *Res Gestae* 5.26; *Cic. Prov. Cons.* 12.31; *Vell. Paterc.* 2.90.1–4; 2.91.1; 2.115.4 (cf. perhaps Col 1:20 in view of 1:16); cf. the interpretation of Roman iconography in Lopez, “Visualizing,” 83; idem, *Apostle*, 49–50. This peace was propagandistic; cf. Seneca’s critique in Huttner, “Zivilisationskritik.” In Roman political propaganda, see *Res Gestae* 2.13; 6.34; also Sherk, *Empire*, §24, p. 40 (citing Orosius *Hist.* 6.22.1–2); Grummond, “Pax Augusta”; also Bowley, “Pax,” 774. In historiography during Tiberius’s reign, e.g., *Vell. Paterc.* 2.89.3; 2.92.2; 2.103.4–5; 2.126.3. For the image’s wide propagation (on coins, etc.), see Muth, “Pax Augusta.” “Pax” was deified but prominent only from the time of Augustus (Rose, “Pax”; cf. Bowley, “Pax,” 774); for its association with emperors, see Harrison, *Authorities*, 139. For Paul’s likely rejection of the propaganda of “Roman peace,” see, e.g., Koester, “Silence,” 341; Horsley, “Assembly,” 386; Harrison, *Authorities*, 61–62; cf. Bammel, “Romans 13,” 377; Niang, “Seeing,” 171; for the challenge here, cf. also Rowe, *World*, 107 (noting the idea in Wengst, *Pax*).

(cf. Acts 2:35; Luke 20:43); in the present, meanwhile, God offered terms of peace to those willing to accept it. Whatever “preaching peace” might signify in other texts, it is highly significant when Peter addresses it to a military officer belonging to the occupying power.⁷⁰⁹ God announced good news of peace (εὐαγγελιζόμενος εἰρήνην) to Israel (Acts 10:36); now Peter is preaching good news of peace to a traditional enemy and his associates (cf. 9:13–17; Luke 6:27).

That God “sent” (ἀπέστειλεν) this message could naturally refer initially to John (Luke 7:27), Isaiah’s “voice crying in the wilderness” (Luke 3:4; Isa 40:3), and to those “sent” by Jesus (Luke 9:2, 52; 10:1, 3; 11:49; 13:34; 24:49; Acts 26:17).⁷¹⁰ But Luke explicitly applies it especially to Jesus here, who is also “sent” (Luke 4:43; 9:48; 10:16; Acts 3:26), including in the words of Isaiah that are programmatic to Luke’s Gospel (Luke 4:18; Isa 61:1). A number of scholars find an echo of Ps 107:20 (106:20 LXX) here; in that passage, God “sent his word” and brought healing (the healing appears in Acts 10:38).⁷¹¹ This allusion is possible, though it is not the only text in the LXX where God “sends” his “word” (cf. Ps 146:18), and it is common Lukan terminology.⁷¹²

Peter provides a christological aside in a rhetorical parenthesis.⁷¹³ The Lukan Peter’s wording reflects a biblical description of God as “Lord over all the earth” (Josh 3:11, 13; Ps 97:5; Zech 4:14), revealing God’s sovereignty to judge (Mic 4:13) and rule (Zech 6:5) all nations. This title remained familiar in early Judaism as “Lord of all” (ὁ πάντων δεσπότης, Wis 6:7; 8:3; cf. 11:26; Sir 36:1; ὁ κυριεύων πάντων θεός, *Let. Aris.* 18) or “Lord of all creation” (δέσποτα πάσης κτίσεως, 3 Macc 2:2).⁷¹⁴ (The term would also be familiar for Gentiles, whether for rulers⁷¹⁵ or for deities,⁷¹⁶ but the most obvious allusions for members of Luke’s biblically literate audience would be biblical, referring to the God they accepted.)

If one Lord rules over all, then he is for all (Rom 3:29–30);⁷¹⁷ in light of God’s lack of partiality, including welcoming Gentiles (in the immediate context, Acts 10:34), this statement, too, is likely ethnically universalistic. Paul likewise uses the phrase “Lord of all” with specific reference to Gentile inclusion (Rom 10:12). As in Peter’s

709. Likewise, the people of Tyre and Sidon wrongly look to the doomed Herod Agrippa I for “peace” (Acts 12:20), whereas the Lord is its true source. Cf. Tertullus’s claim that Felix had provided peace (24:2).

710. Calling it the “word” or “message” fits Luke’s (and early Christian) usage in general (e.g., Luke 1:2; 4:32; 5:1; 8:11–15, 21; 10:39; 11:28; 24:19; Acts 2:41; 4:4, 29, 31; 6:2–5, 7), applicable also to Luke’s own telling of the gospel story (Acts 1:1).

711. E.g., Witherington, *Acts*, 355; Dunn, *Acts*, 142 (who sees an allusion in Acts 13:26; cf. also Marshall, “Acts,” 584). On Jesus as “sent one,” cf. also Keener, *John*, 310–16.

712. See Bock, *Proclamation*, 232; cf. Marshall, “Acts,” 579, for various allusions, but noting (580) the relevance of the “healing” connection.

713. On rhetorical parenthesis (*interpositio*), see Rowe, “Style,” 147 (citing, e.g., Gal 2:6–7; Cic. *Phil.* 1.7.16); Blass, Debrunner, and Funk, *Grammar*, §465 (on Pauline sentence structure); Black, “Oration at Olivet,” 87 (citing Quint. *Inst.* 9.3.23); Anderson, *Glossary*, 89–90 (adding Dion. Hal. *Thuc.* 24; Quint. *Inst.* 8.2.15).

714. Also Jos. *Ant.* 1.20; 1Q20 V, 23; Philo *Creation* 100; *Cher.* 107; *Sacr.* 129; *Spec. Laws* 1.30; QG 1.21; 4Q409 1 I, 8; *Pr. Jos.* 9; *Test. Jos.* 1:5; *Test. Mos.* 4:2; 2 *En.* 66:5; cf. similarly Jos. *Ant.* 1.272; 4Q510 1 2; *Jub.* 31:13; *Let. Aris.* 269. Fitzmyer, *Acts*, 463–64, cites also 11QPs^a XXVIII, 7; Jos. *Ant.* 20.90.

715. Cf. Jos. *Ant.* 7.151; 16.134. These include Alexander (Plut. *Alex.* 27.4) and, more relevant here, Caesar (Epict. *Diatr.* 4.1.12, cited by Conzelmann, *Acts*, 83; Barrett, *Acts*, 522; Jos. *Ant.* 16.118; *War* 1.669; for Caesar’s “worldwide,” hence multiethnic, empire, see Luke 2:1; comments on “pagan ‘universal’ ideals” in the commentary introduction, *Acts*, 1:516–17). For a Roman officer, Caesar was Lord of all (for Luke, centurions are agents of imperial authority, Luke 7:8); Peter corrects this notion (cf. Acts 17:7); cf. helpfully Rowe, “Cult”; Howell, “Authority” (in contrast to Rowe, finding a challenge to centurions’ role as the emperor’s agents). This correction fits the reinterpretation of the *Pax Romana* in the “peace” with God that Peter announces in Acts 10:36 (with Rowe, *World*, 105).

716. Osiris (Plut. *Isis* 12, *Mor.* 355E, cited also by others); fate (Demosth. *Epitaph.* 21); or Zeus (Pindar *Isthm.* 5.53).

717. Cf. Dunn, *Acts*, 142; Abbott, *Acts*, 128. “Lord of all” in Acts 10:36 undercuts the distinction between “clean” and “unclean” peoples, providing part of the basis for 10:34–35 (Rowe, “Authority,” 107).

preaching of Jesus's lordship from Joel 2:32 (Acts 2:21, 34, 36, 38), Peter's language here implies Jesus's deity,⁷¹⁸ although his Gentile hearers (perhaps even God-fearing Cornelius) would more likely assume this on the basis of typical Gentile use of exalted lords than on familiarity with biblical phraseology.

IV. JESUS'S MINISTRY (10:37)

After beginning to narrate the gospel story, Peter points out that Cornelius has already heard its basics. Although Peter has learned something new from God (Acts 10:34), here is something his audience already knows about. Peter points this out not simply to compliment his hearers' knowledge (although a compliment may be included, the *captatio benevolentiae* was complete in 10:35) but as a rhetorical appeal to common knowledge. Appealing to what an audience already knew or agreed on reduced or eliminated the need for demonstration (*Rhet. Alex.* pref. 1421a.4–6) and was common in ancient texts.⁷¹⁹ Luke elsewhere assumes that the events he narrates are widely known, even for those within the narrative world (Luke 24:18; Acts 26:26).⁷²⁰ Paul sometimes makes the same rhetorical appeal (Phil 4:15; 1 Thess 2:1, 10; 3:3; 5:2; 2 Thess 3:7) or offers appeals to eyewitness knowledge (1 Cor 15:6). (Peter earlier appeals to his Gentile audience's knowledge of Jewish custom in Acts 10:28.)

The use of ῥῆμα here probably picks up the thought of λόγος in 10:36 (the term is changed merely for variation).⁷²¹ One could construe Peter's words as including Galilee in Judea; this was the standard Diaspora perspective, since Galilee, as Judea's "frontier," was part of the Judean ("Jewish") homeland.⁷²² (Luke uses "Judea" several different ways, as did his contemporaries; cf. his "land of Judeans and Jerusalem" in 10:39.)⁷²³ The Galilean beginning comports well with Luke's emphasis on decentralization and on the lowly rather than on centers of power.⁷²⁴ The promise to Israel first is a standard Lukan (Acts 3:26; 13:46) and Pauline (Rom 1:16; 2:9–10; 11:11, 15) idea.

One should begin a narrative with the most natural starting point (Dion. Hal. *Thuc.* 10–12), and Luke has an abundance of precedents for beginning this narrative where he begins it.⁷²⁵ Starting with John fits the pattern elsewhere in Acts' recitations of God's

718. As also Paul's quotation of the same Joel text in Rom 10:13 in the context of 10:9; his "Lord of all" (10:12) is in the same context.

719. E.g., Aeschines *Embassy* 44, 56, 122–23, 182; *Tim.* 89; Isaeus *Pyrr.* 40; Dion. Hal. *Lit. Comp.* 22; Quint. *Decl.* 269.3–4; cf. Men. *Rhet.* 2.14, 429.1–4; Philost. *Vit. Apoll.* 1.17; Meeks, *Urban Christians*, 114. In philosophic logic, one reasons from the known to prove what is unknown (Mus. Ruf. 1, p. 32.27). Cf. κεκριμένον in Anderson, *Glossary*, 67.

720. The Gospels and Acts claim that Jesus was widely known, but Josephus (our one other relevant source) mentions him, at most, briefly (most scholars believe that Josephus mentioned him but that the present text includes some Christian redaction; e.g., Thackeray, *Josephus*, 125–26; Klausner, *Jesus of Nazareth*, 55–58; Feldman, "Methods," 591; Cornfeld, *Josephus*, 510; Baras, "Testimonium"; Meier, "Jesus in Josephus"; idem, "Testimonium"; Whealey, "Josephus"; cf. Pelletier, "Josèphe"; Dubarle, "Témoignage"; Gramaglia, "Testimonium"; contrast Olson, "Eusebius"; for a survey of views a generation ago, see Winter, "Bibliography"). Sanders, *Jesus and Judaism*, 395n13, contrasts Jesus with John's greater role in Josephus; but Jesus does not fit Josephus's revolutionary paradigm, and even individual messianic revolutionary figures warranted only small space. See discussion at Acts 26:26.

721. Its dominance in *Joseph and Aseneth* argues against its necessarily representing a Semitic source (see Burchard, "Note on 'PHMA'").

722. Cf. Bruce, *Message*, 17; the sense of "Judea" in Mason, "Jews."

723. See Hengel, "Geography of Palestine," 32: the Roman province (cf. Luke 3:1; 23:6); Palestine (Luke 1:5; 7:17; 23:5; Acts 10:37); usually Jewish Palestine minus Samaria and Galilee (Luke 4:44; 5:17; Acts 1:8; 9:31; 11:29; 12:19; 15:1; 20:10; 26:20; 28:21; etc.). For the "whole of Judea," cf., e.g., Luke 7:17; 23:5; Acts 9:31 (cf. Luke 1:65; 4:37; not found in other NT authors, but cf. earlier 1 Esd 1:32; 9:3).

724. On Galilee in Luke's theology, see comment on Acts 9:31; in general, see Keener, *John*, 228–32; more extensively, Horsley, *Galilee*; Freyne, *Galilee, Jesus*; Strange, "Galilee."

725. Biographies often opened from a subject's adulthood (e.g., Plut. *Caes.* 1.1–4; also the *Life of Aesop*, Drury, *Design*, 29).

acts (Acts 1:22; 13:24), Luke's introduction (Luke 1:5–80) and body (3:1–20), and Mark, whom he follows (Mark 1:2–8);⁷²⁶ it also fits, for the most part, the distinctive tradition in the Fourth Gospel (John 1:19–28). Starting from Galilee (Luke 23:5) also fits the pattern. To Cornelius, “Galilee” might sound like Judea's less-civilized or educated backwater or “frontier.”⁷²⁷ For John's “baptism” as his message of repentance, see Luke 7:29; Acts 13:24; 18:25; 19:3–4 (cf. Mark 1:4; Luke 20:4; Acts 1:22).

V. ANOINTED FOR HEALING AND DELIVERANCE (10:38)

For “you know,” cf. Acts 10:28; 20:18; for wide knowledge of Jesus as a recent popular leader, cf. Acts 26:26 (and comments regarding the claim's plausibility); cf. *Jos. Ant.* 18.63–64. Although the Spirit's anointing very rarely appears elsewhere in early Jewish and Christian sources,⁷²⁸ the anointing here refers back to Luke's programmatic quotation of Isa 61:1 (Luke 4:18)⁷²⁹ and (especially in view of “Christ” in Acts 10:36) may also reflect Luke's knowledge that *χριστός* means “anointed one” (cf. Acts 4:27, following Ps 2:2).⁷³⁰ This passage therefore interprets Jesus's mission to “deliver the prisoners” (Luke 4:18) in the present era especially as liberating captives of the devil (here), in the Gospel exemplified most obviously in exorcisms. The connection between the Spirit and the anointing that invites it may be quite early, both in Scripture⁷³¹ and in the Qumran scrolls.⁷³² Seers, or prophets, are called “anointed ones” in 1QM XI, 7–8 and probably also in CD V, 21–VI, 1.⁷³³

What did it mean to be “oppressed”⁷³⁴ by the devil?⁷³⁵ Many Jewish circles viewed the devil's influence as pervasive, whether through Satan's general dominion over the

726. Mark's “beginning” (Mark 1:1) might reflect standard early Christian terminology (Robinson, *Problem of History*, 69), the “beginning” referring to the narrative about John (e.g., Bruce, *Message*, 15); for others, “beginning” may belong to the entire work's title (Kingsbury, *Christology*, 56). On the “beginning” in Luke's narrativization (citing Luke 1:3; 3:23; 23:5; Acts 1:1, 22), see Weiser, *Apostelgeschichte*, 268. Although this correspondence is not limited to Mark, if Mark's Gospel and Acts 10:36–43 both summarize the Petrine message (cf. Batten, “Acts 10”), one might expect some parallels. For Jesus's ministry as part of the kerygma, see Konings and Carmo, “*Querigma*.”

727. See discussion at Acts 9:31.

728. E.g., 4Q270 9 II, 14; 2 Cor 1:21–22; cf. 1 John 2:20, 27. The image was probably originally figurative, based on the Spirit accompanying royal anointing (1 Sam 16:13), though not everyone expected kings descended from kings to be anointed (cf. *y. Hor.* 3:2, §10). For priests, cf. 1QM IX, 8; for Israel, *Sib. Or.* 5.68; for very limited proposed analogies in the ancient Near East, see, e.g., Gane, “Leviticus,” 298; de Vaux, *Israel*, 104; *ANET* 338.

729. As most concur, e.g., Bock, *Proclamation*, 233; Bruce, *Commentary*, 226–27; Cyran, “*Namaszczenie Jezusa*”; Neirynek, “Luke 4,16–30,” 380; Haya-Prats, *Believers*, 6.

730. Some scholars view the comparatively “mundane” Christology here as a primitive feature (Bruce, *Acts*¹, 226; Dunn, *Acts*, 143; though the same criterion obviously cannot work in Acts 10:36). Strikingly, however, 4Q521 2 + 4 II, 8 may apply Isa 61:1 to “the Lord” (God); though the Messiah is possible (4Q521 2 + 4 II, 1), the Lord seems likelier (II, 4–7, 11–12).

731. 1 Sam 10:1, 6, 10 (e.g., Schweizer, *Mark*, 37, citing also Isa 61:1).

732. See CD II, 12; VI, 1; 4Q266 2 II, 12; 3 II, 9; 4Q267 2 6; 4Q269 4 I, 2; 4Q270 9 II, 14; 4Q287 10 13; 6Q15 3 4; 11Q13 II, 18.

733. Cf. likewise the parallelism in 1 Chr 16:22; Ps 105:15 (though contextually the patriarchs and/or early Israel are in view). Naturally, in light of the OT, priests are also anointed (e.g., 1QM IX, 8). Israel is God's anointed in *Sib. Or.* 5.68.

734. The term for “oppressing,” *καταδυναστεύω*, is rare in early Christian texts (Jas 2:6; *Diogn.* 10.5; for the devil oppressing, see *Herm.* 48.1–2, perhaps echoing Acts) but appears thirty-two times in our LXX, including for slavery in Egypt (Exod 1:13; Wis 15:14; 17:2), other enslavement (Exod 21:16; Deut 24:7), and exploitation (e.g., 1 Sam 12:3–4; Amos 4:1; 8:4; 2 Macc 1:28; Wis 2:10).

735. From an early period, this image was applied to humanity's captivity to Satan and demonic powers (Pelikan, *Acts*, 134, citing Origen *Cels.* 8.54). Although liberation theology rightly emphasizes Jesus's concern for economic justice and for the poor and marginalized prominent in Luke, even Luke 4:18–19 also addresses a dimension of spiritual power (including healings and exorcisms) that exclusively political theologies (often with Western philosophic roots, including Marxist materialism) sometimes neglect.

world⁷³⁶ or through people being surrounded by demons.⁷³⁷ Luke at times illustrates liberation of captives held by the devil with respect to sickness or infirmity (Luke 13:12, 15–16), but even where no demon was directly active (he typically distinguishes sickness and demonization, Luke 6:18; 7:21; 9:1; Acts 5:16; 8:7),⁷³⁸ he apparently views sickness and suffering in general as the devil's activity.⁷³⁹ The connection between sickness and the devil's hostility is clear as early as Job 2:7.⁷⁴⁰ Although some cultures do not associate spirits with sickness, many cultures do;⁷⁴¹ many also associate sickness with witchcraft or sorcery.⁷⁴² (On sickness and sin, see comment on Acts 3:2.)

Sickness or other bodily harm, however, can also come from God (thus a doubter's muting, Luke 1:20–22; the blinding of opposers in Acts 9:18; 13:11).⁷⁴³ In Jewish understanding, the devil's activity was also limited, subject to God's sovereignty. Perhaps Luke would allow that God permits the devil's activity in many cases (e.g., Job 1–2) but sends his agents to thwart this activity and accomplish his higher purposes. Luke himself does not offer a full resolution of the tensions, which are not his focus.

Luke often couples God's "power" with the Holy Spirit (Luke 1:17, 35; 4:14; Acts 1:8)⁷⁴⁴ and more often than not uses the term "power" with regard to signs and

736. E.g., 1QS X, 21; 1QM XIV, 9; 11Q5 XIX, 13–16; *Jub.* 19:28; Eph 2:2; 1 John 5:19.

737. E.g., *Num. Rab.* 11:5; *Midr. Pss.* 17:8; cf. CD XII, 2; 4Q444 1 I, 4; *Test. Benj.* 6:1; *Test. Job* 26:6; 27:1. This idea appears mainly in Amoraitic texts, after the greater profusion of magic and exorcism in the third century; it probably existed on a popular level before surfacing among the rabbis (cf., on a lesser level, *Jos. Ant.* 8.47; more fully in Keener, *Miracles*, 779–84), but it was not as dominant in first-century Jewish Palestine.

738. Perhaps Luke 13:32; cf. Thomas, *Deliverance*, 191–228, esp. 227–28. Weissenrieder, *Images*, 338–39, argues that demonization is linked with sickness much more in the Gospel than in Acts. Acts 19:12 appears unclear in this regard, but this is because it is a concise summary; "healing" covers both categories in 5:16, but there the categories remain discrete.

739. Luke associates sickness with demonic activity more than any other NT writer; see the summary of the evidence in Thomas, *Deliverance*, 227; also Twelftree, *Name*, 154; Pilch, *Healing*, 105 (noting four references from Mark, two shared with Matthew, and seven distinctive to Luke, of which four appear in Acts).

740. Demons were thought to cause some diseases (Luke 13:11; *Midr. Pss.* 17:8; sources in Alexander, *Possession*, 32).

741. Bourguignon, "Spirit Possession Belief," 20–21; idem, "Distribution," 17; Murdock, *Theories*, 72–76; Neyrey, "Miracles," 30–31; for examples, see Ejizu, "Exorcism," 13, 15, 21; Hien, "Yin Illness"; Cho, "Healing," 123–24; McClenon and Rooney, "Experiences," 53; Ward, "Possession," 126; Shoko, *Religion*, 57–63; Bergunder, "Miracle Healing," 288; Lake, *Healer*, 118–19; Gray, "Cult," 171, 178; Lewis, "Possession," 193; Southall, "Possession," 259, 262; Welbourn, "Spirit Initiation," 292; Firth, *Ritual*, 319; Ikeobi, "Healing," 57; Saunders, "Zar Experience," 179; Morton, "Dawit," 193, 220; Pressel, "Possession," 339; Umeh, *Dibia*, 200; Berends, "African Healing Practices," 278–79; Evans-Pritchard, *Religion*, 98; Turner, *Drums*, 34, 119, 296; Colson, "Possession," 71–72; Beattie, "Mediumship," 164; Peters, *Healing in Nepal*, 65–68; Shorter, *Witchdoctor*, 174–76 (regarding what are considered morally neutral water spirits); idem, "Spirit Possession," 124; Rosny, *Healers*, 116–19; Luling, "Possession Cults," 175; Ferchiou, "Possession Cults," 214–15. Some cultures where many still attribute sickness to spirits nevertheless depend more on medicine (see, e.g., Wyllie, "Effutu"). For fuller discussion, see also Keener, *Miracles*, 802–4, and references there.

742. See, e.g., Murdock, *Theories*, 64–71; Ajibade, "Hearthstones," 198; Hultkrantz, *Healing*, 29–31, 53–54, 82, 89, 111, 151, 162; Daneel, "Zionism," 30, 40–41; Jules-Rosette, "Healers," 128, 131–33, 141, 145; Sofowora, *Traditional Medicine*, 26–27; Uzukwu, "Address," 8; Ejizu, "Exorcism," 13–15, 21; Ikeobi, "Healing," 57; Lee, "Possession," 144; Beattie, "Mediumship," 164; Middleton, "Possession," 225; Rosny, *Healers*, 74, 80, 83, 85; Turner, *Drums*, 14–15, 34, 119, 128–29, 296, 298; Shorter, *Witchdoctor*, 94 (a lion attack); further comment in Keener, *Miracles*, 804–5 (esp. sources in 804n103). For witchcraft accusations, see comment at Acts 8:9–11. For belief in killing through witchcraft, see discussions in Grindal, "Heart," 66; Turner, "Actuality," 5; Hair, "Witches," 140; West, *Sorcery*, 3–5, 9–10, 88; cf. Scherberger, "Shaman," 57–59; Azenabor, "Witchcraft," 30–31; McNaughton, *Blacksmiths*, 69; Binsbergen, "Witchcraft," 243; Favret-Saada, *Witchcraft*, 124–27; Bergunder, "Miracle Healing," 293–94; Koch, *Zulus*, 151–52, 292–93.

743. See Thomas, *Deliverance*, 227–28, and his treatment of judgments in Acts (231–43, 262–78). In this passage, he argues (in light of his conclusions from Luke's Gospel) that Acts 10:38 addresses two categories of ministry: those sick from various causes, and those sick specifically as a result of demonic oppression (258–62, esp. 260–61). Discerning between the two was important both in the Gospel (227–28) and in Acts (293–95).

744. Elsewhere in the NT, Rom 1:4; 15:13, 19; 1 Cor 2:4; Eph 3:16; 1 Thess 1:5; 2 Tim 1:7 (on the link in Paul, cf. Gräbe, "Δύναμις"). Of these verses, Rom 15:19 clearly applies to signs and wonders, and some others may be associated with them (Rom 1:4; 1 Cor 2:4–5; 1 Thess 1:5).

wonders (see fully comment on Acts 1:8), relevant to the healing mission of Jesus here. Others also spoke of a deity's powers (Men. Rhet. 2.17, 440.32–441.2), included pleas for a deity to provide "power" for speech (437.25–26), or spoke of the Messiah "powerful in the Holy Spirit" (δυνατὸν ἐν πνεύματι ἁγίῳ, *Pss. Sol.* 17:37).⁷⁴⁵ One could be clothed with "the Spirit of power" (*L.A.B.* 27:10); see further comment on the connection at Acts 1:8.

That Jesus went about "doing good" (εὐεργετῶν), providing benefaction, evokes the image of benefactors in antiquity, who were often gracious kings⁷⁴⁶ or others with wealth or power (see much fuller discussion at Acts 4:9). Epideictic speeches and inscriptions regularly praise such benefactions; deliberative rhetoric can present these benefactions to invite gratitude.⁷⁴⁷ Jewish people applied the language especially for caring for the poor;⁷⁴⁸ it also applied to the activity of physicians and healers (which is relevant here)⁷⁴⁹ and to feeding guests at a banquet (which fits Luke 9:13–17),⁷⁵⁰ and (perhaps most relevant) some other people in antiquity could view miracle working in these terms.⁷⁵¹ Luke has already presented healing as "benefaction" (Acts 4:9).⁷⁵² On God being "with" Jesus (cf. Luke 1:28, 66; Acts 11:21; 14:27; 15:4; 18:10), see comment on Acts 7:9.⁷⁵³

c. Appeal to Witnesses (10:39–43)

The apostles are witnesses and guarantors of Jesus's public ministry (Acts 1:21–22), about which Cornelius and his friends would have heard (10:37–38), but also of events that Peter has not yet mentioned (10:41); Peter will also cite the prophets as witnesses (10:43).

I. WITNESSES AND THE CRUCIFIXION (10:39)

Peter's claim "We are witnesses" is a central feature of his preaching (2:32; see comment on Acts 1:8), appealing to (and providing for Luke's Gospel) eyewitness attestation. Appeal to witnesses is standard in forensic rhetoric (e.g., *Lysias Or.* 3.14, §97; 3.20–21, §98). Either the narrative and proofs are mixed here (which was possible in rhetoric)⁷⁵⁴ or this statement remains part of the *narratio* and merely introduces the proofs appealed to in Acts 10:41 (though this may well also be part of the *narratio*). The witnesses' testimony of all that Jesus did, mentioned here, is fleshed out more fully in the Gospel, which is based on their testimony (Luke 1:2; cf. Acts 1:21–22).

745. Turner, *Power*, 188–266, emphasizes the messianic anointing in Luke 4:18 and its context, but I have argued that in addition to this point, Jesus's anointing functions as a model for the church. Russell, "Anointing," thinks that the anointing metaphor provides continuity with the Spirit empowerments in Acts, but this may also affirm too much, since Luke uses the term only for Jesus's empowerment.

746. E.g., Luke 22:25; Xen. *Cyr.* 3.3.3; 5.5.34; Mus. *Ruf.* 8, p. 60.9; 8, p. 66.11.

747. See, e.g., Pliny *Ep.* 3.2.6; 4.13.10; 7.15.3; Suet. *Claud.* 25.1; Lucian *Fisherman 5*; *Tim.* 35; Fronto *Ad Ant. Pium* 9.1; Jos. *Ant.* 19.356, 361; Harrison, *Grace*, 40–43. Use of this category allows Luke to interpret his portrayal of Jesus in the Gospel as communicating his virtue, a more standard feature of biography than generally features in the Gospels (see Aune, "Problem of Genre," 48).

748. See Harvey, *History*, 9.

749. DeSilva, *Honor*, 133–34 (following Danker, *Benefactor*, 57–64); cf. also teaching (*Honor*, 134, citing Sen. *Y. Ben.* 1.2.4).

750. See deSilva, *Honor*, 134.

751. Some (e.g., Conzelmann, *Acts*, 84; Johnson, *Acts*, 192) cite Philost. *Vit. Apoll.* 8.7 (though substantially later than the Gospels, it fits what we would expect to find from other evidence).

752. As noted by, e.g., Parsons, *Luke*, 175.

753. Bock, *Proclamation*, 233, rightly points out that a specific allusion to Gen 39:21 is unclear here because the language appears elsewhere as well.

754. Proofs may often repeat events (e.g., Cic. *Quinct.* 11.37–27.85 *passim*) but are not arranged chronologically as in the *narratio*. For a *narratio* containing proofs, see, e.g., Amador, "Revisiting," 110–11; esp. Hughes, "Rhetoric," 252–53 (with documentation).

Luke uses “Judea” in various ways (see comment on Acts 10:37) and may sometimes vary his descriptions as a rhetorical flourish; here his point is not so much to distinguish the Judean “countryside”⁷⁵⁵ from urban Jerusalem as to emphasize the inclusion of the whole by pleonastically citing both. He could be surveying Jesus’s entire ministry in greater Judea (as in 10:37) or focusing on the new information of Jesus’s passion, chronologically following what he recounted in 10:37–38. Because most of Jesus’s passion was in and immediately outside Jerusalem, the former interpretation may carry more weight.

Luke does not need to explain what he means by Judeans having killed Jesus by crucifying him; the attentive reader already knows that the Judeans did it by the hands of others (2:23; 3:14–15), a point that might not be rhetorically strategic to emphasize to Peter’s new Roman hearers (though “cross” does not conceal it, and he expects his audience to know something of Jesus’s story already; cf. 10:37). That “they” (Jerusalemites and Judeans) hanged Jesus on a cross also reflects the same theology of rejection as 2:23; 3:14–15; 7:52; 13:27–28 (and as understood in some sense by Jerusalem’s aristocratic leaders in 5:28).⁷⁵⁶

Peter’s term for “cross” here (ξύλον) is simply “wood” or “tree.” Biblically literate members of Luke’s audience would catch the allusion to Deut 21:22–23, as in Acts 5:30–31⁷⁵⁷—a shameful punishment of public exposure that contrasts strikingly with Jesus’s benevolence in 10:38. Not only did they prove ungrateful to their benefactor (a crime greatly despised in Roman society; see comment on Acts 4:9); they killed him, and by the most shameful death possible. (On the nature of crucifixion, see comment on Acts 2:23.) Even without knowledge of the biblical allusion, however, Cornelius would understand what “hanging on a tree” meant and the shame of crucifixion.⁷⁵⁸

II. RESURRECTION WITNESSES (10:40–41)

Jesus appeared only to selected witnesses (noted in 10:39). Although petitions for invisibility do appear in magical sources,⁷⁵⁹ appearances to chosen witnesses would more closely resemble the epiphany tradition for a Greco-Roman audience (on which see comment on Acts 1:3). A deity might reveal himself only to the magician (PGM 1.186–87), or to those who are good and socially respectable (Callim. *Hymns* 2 [to Apollo], lines 9–10), or to a particular hero (Hom. *Il.* 1.194–200) or skeptic (Philost. *Vit. Apoll.* 8.31).⁷⁶⁰ (Romans also knew the principle of selective availability with regard to the custom of patronage.)⁷⁶¹

Selective visibility was not limited, however, to pagan tradition. Thus, for example, in Jewish sources Balaam’s donkey, but initially not Balaam himself, saw the menacing angel (Num 22:23, 27–28); only the most spiritually sensitive saw the armies of

755. Luke can use χώρα as “region” more generally (Luke 3:1; 8:26; 15:13–15; 19:12; Acts 8:1; 13:49; 16:6; 18:23; 27:27; cf. Luke 15:15; Acts 12:20), but it makes sense here to follow his occasional usage as “countryside” (Luke 2:8; 12:16), given the distinction from Jerusalem (as in Luke 21:21; cf. Acts 26:20).

756. Modern readers seeking to hear the text as closely as possible to its original setting should note that even when it is preached to Gentiles (as here), it sounds different on Jewish lips (e.g., Peter’s) than those of Gentile Christians after a history of anti-Semitism.

757. See comment at Acts 5:30–31; also, e.g., Bock, *Proclamation*, 234; Morris, *Cross in New Testament*, 142.

758. This is true whether we read ξύλον as “wood” (as in classical Greek) or as “tree” (with some papyri). On the shame of the cross, see excursus on crucifixion at Acts 2:23; esp. Hengel, *Crucifixion*.

759. PGM 1.222–31, 247–62 (esp. 256–57); cf. Tibullus 1.2.58, though this is farce. Sometimes apparitions were mere phantoms or disguised animals (e.g., Apollod. *Epit.* 3.5, 22); see Keener, *John*, 1152, 1189–90, 1201.

760. Founding heroes or gods might visit the cities they founded yet remain invisible to the people there (Dio Chrys. *Or.* 33.47; Grant, *Gods*, 57).

761. Chow, *Patronage*, 75 (citing Sen. *Y. Ben.* 6.34.2; *Const.* 10.2; *Juv. Sat.* 1.100–101).

heaven defending Elisha (2 Kgs 6:16–17); in another account, everyone saw the two angels except the Jewish people they were protecting (3 Macc 6:18).⁷⁶²

Jesus's selective and temporary visibility is illustrated more completely in the resurrection appearances of Luke 24, especially on the road to Emmaus (Luke 24:16, 31). Jesus was known to "all the people" (Luke 24:19; cf. 21:38), God's Jewish people who were to be led in the true way (cf. Acts 4:10; Luke 2:10), and many had been responsive to God's message until deterred by the elite (Luke 3:21; 7:29; 18:43; 19:48; 20:6, 45; 21:38; Acts 2:47; 3:9, 11; 13:24).⁷⁶³ Nevertheless, Jesus appeared only to chosen witnesses. Johannine tradition is also explicit that Jesus appeared only to those who followed him closely before the resurrection (John 14:21–23).

That the witnesses were "chosen" (προκεχειροτονημένοι)⁷⁶⁴ beforehand recalls Acts 1:2 (hence Luke 6:13); that he ate and drank with them⁷⁶⁵ recalls Luke 24:42–43 (see comment on Acts 1:4) and hence underlines the concreteness of their experience (as opposed to their having merely seen an apparition).⁷⁶⁶ (Given the emphasis on "eating" and "drinking" in Luke-Acts and the prominence of hospitality in the context, Luke undoubtedly also communicates the role of sharing food in true table fellowship, preparing for the discussion in Acts 11:3.)⁷⁶⁷ The witnesses of the resurrection are given a special role because they had witnessed the entire story of Jesus's public ministry from the beginning (1:21–22; cf. 10:37–39). By reminding his audience of these matters, Luke stresses not only the reliability of Peter's claims in the narrative but also his own in his first volume.⁷⁶⁸

Although the revelation was selective, it encompassed a large number of people, as did the most highly preferred claims for testimony (cf., e.g., *Lysias Or.* 3.27, §98, claiming more than two hundred eyewitnesses; 1 Cor 15:6, claiming more than five hundred for the risen Jesus). Had Luke intended only the Twelve in the pool of "witnesses," the church would not have had Matthias, Justus, and potentially others to choose from in Acts 1:21–26.⁷⁶⁹

III. PROCLAIMING THE JUDGE (10:42)

Jesus ordered the witnesses (cf. his commands in 1:2, 4) to preach to the people (reflecting Luke 24:47;⁷⁷⁰ Acts 1:8); this order conflicts with the council's order not to do so (the same term in Acts 4:18; 5:28, 40), but they had to obey God rather than humans (5:29, 32).⁷⁷¹

Luke's report of Peter's words here, however, seems ironic, revealing just how difficult it was for Peter to grasp Jesus's message. He claims that Jesus commanded

762. In a nonsupernatural analogy for selective revelation, Joseph reveals himself exclusively to his brothers (Gen 45:1; cf. Acts 7:13).

763. The phrase is also, however, a favorite Lukan idiom even for other purposes (Luke 8:37, 47; Acts 25:24). Contrast the phrase's rare occurrences in Matt 27:25; Mark 1:5; John 8:2 (which is not Johannine); Heb 9:19; *Barn.* 12.8; Papias frg. 4.2.

764. Cf. the cognate terms in Acts 3:20; 22:14; 26:16; Josh 3:12; Dan 3:22; 2 Macc 3:7; 8:9; 14:12 (but not all emphasize preceding action).

765. This greater specificity concerning their qualification as witnesses may function like epimone, which can nuance a thought while repeating it (Rowe, "Style," 144–45).

766. Tannehill, *Luke*, 291, reasonably interprets Acts 1:4's "eat salt with" as "share a meal" in view of 10:41.

767. With Gaventa, *Acts*, 171.

768. Celsus criticizes the claim that Jesus appeared only to his allies and not to his enemies (Cook, *Interpretation*, 57), but Luke has also included the conversion of Saul by an appearance (Acts 9:3–9).

769. Hengel and Schwemer, *Between Damascus and Antioch*, 25, adding the disciples en route to Emmaus (Luke 24:13–35), Jesus's brothers (Acts 1:14), and (they think) even the 120 of 1:15.

770. On the resemblance to Luke 24:47 (including preaching forgiveness), see also Neiryneck, "Luke 4,16–30," 379.

771. In rhetoric, appeal to divine authority counted as very persuasive (cf. again in Acts 11:17; 26:19).

them to preach to “the people” (τῶ λαῶ), a term Luke uses some eighty times with reference to Israel (e.g., 2:47; 3:12, 23). Although Jesus commanded them to begin in Jerusalem, he was explicit that their mission was to all nations and the ends of the earth (Luke 24:47; Acts 1:8). “All nations” was not easily construed (though Peter might have construed it thus) as referring merely to Diaspora Jews. To the very Gentile audience to whom Peter here preaches, in fulfillment of the Lord’s command, he mentions only Jesus’s command to preach to Israel!

This “judge” (cf. also Acts 17:31) will be absolutely accurate, having been appointed⁷⁷² by the God known for his impartiality (10:34).⁷⁷³ Though Jewish tradition⁷⁷⁴ sometimes adapted the more familiar Greek image⁷⁷⁵ of human agents assisting in judging, the ultimate judge in Jewish sources was always God,⁷⁷⁶ the “judge of all the earth” (Gen 18:25; cf. *Test. Ab.* 20:3 A).⁷⁷⁷ If this depiction leaves unclear whether Jesus is here assuming a divine prerogative (in view of Acts 10:36, he may be, from Luke’s standpoint at least; see comment there),⁷⁷⁸ it does not leave the scope of Jesus’s eschatological authority in question.⁷⁷⁹

“Living” and “dead” function together as a merism, thereby including everyone.⁷⁸⁰ The bulk of the reported speech (or its *narratio*) is framed by a universal Christology: Jesus is “Lord of all” (10:36) and judge of all (10:42).⁷⁸¹ Early Christian tradition elsewhere portrays Jesus as “judge of the living and the dead” (2 Tim 4:1, 8; *Poly. Phil.* 2.1; *Barn.* 7.2; 2 *Clem.* 1.1), though 1 Pet 4:5 could be using the title for God (cf. 1:17; 2:23).⁷⁸²

What is the point of mentioning “judging,” apart from emphasizing the universality of its scope? Perhaps, as in 2 Tim 4:1 and to some extent in 1 Pet 4:3–5, the appeal to Jesus’s role at the judgment adds a sense of urgency (cf. Luke 12:58).⁷⁸³ Further,

772. Luke elsewhere employs this verb (ὀρίζω) (Acts 11:29), especially emphasizing God’s sovereignty over creation (17:26), Jesus’s execution (Luke 22:22; Acts 2:23), and his establishment as universal judge (Acts 17:31). He offers the predominant NT usage (Rom 1:4; Heb 4:7), though it is not uncommon in the LXX and the Apostolic Fathers.

773. For Jesus as eschatological judge in early Christian tradition, see, e.g., Matt 7:22–23 (related to Q = Luke 13:25–27, though Matthew may supply the identification of Jesus with the householder); 25:31–32; 2 Cor 5:10; cf. Q in Matt 19:28 = Luke 22:30; John 12:47–48; for God as the eschatological judge, see Rom 2:16; 3:6; 14:10; Heb 12:23; Jas 4:12; 5:9; Rev 20:11–12; cf. Luke 18:2–8.

774. For Abel, e.g., *Test. Ab.* 12:5–13:3 A; 11:2 B (for comparison of the two recensions of *Testament of Abraham’s* judgment scene, see Nickelsburg, “Eschatology,” 29–40). The saints in 1QpHab IV, 4; 1 Cor 6:2.

775. For Minos and Rhadamanthus as judges, see, e.g., Hom. *Od.* 11.568; Eurip. *Cycl.* 273; Apollod. *Bib.* 3.1.2; Virg. *Aen.* 6.431–33, 566–69; Sen. *Y. Herc. fur.* 733–34; Lucian *Fun.* 7; *Z. Cat.* 18; *Men.* 11–13; *True Story* 2.6–7, 18, 23; *Downward Journey* 13, 24; *Dial. D.* 380–89 (25/12, Alexander, Hannibal, Minos, and Scipio 1–7); 450 (24/30, Minos and Sostratus 1); *Dial. G.* 276 (4/24, Hermes and Maia 1); Max. Tyre 9.7; Proclus *Poet.* 6.2, K156.9–10; Libanius *Encomium* 6.3; further, Rose et al., “Minos”; March, “Rhadamanthus”; cf. Stenger, “Minos.” For Minos’s reputation for judging before death, see, e.g., Dio Chrys. *Or.* 4.40; 53.11; but those who considered him unjust denied his posthumous role (*Philost. Vit. Apoll.* 3.25; cf. 4.34).

776. E.g., *Sib. Or.* 4.183–84; 1 *En.* 9:4; 60:2; 62:2; 47:3 with 46:2; cf. *Test. Ab.* 14:9, 13 A.

777. Cf., e.g., 2 Macc 12:6 (God the righteous judge).

778. Pace Dunn, *Acts*, 144, who emphasizes comparison with human judges (Enoch and Abel) in Jewish tradition.

779. For this eschatological authority, cf., e.g., 1 Pet 4:5; Matt 25:31–46; Matt 7:23//Luke 13:27; Mark 8:38; John 5:22, 27–30; 2 Cor 5:10; *Poly. Phil.* 6.2; 2 *Clem.* 1.1.

780. E.g., Cic. *Verr.* 2.1.44.114; Ruth 2:20. Cf. Plouton as judge of works “both manifest and hidden” (*Orph. H.* 18.16). That some would still be alive at the parousia is suggested in 1 Cor 15:52; 1 Thess 4:15, 17; perhaps Rev 19:19; the contrary view may appear in 4 *Ezra* 7:29, 31; cf. perhaps Rev 20:4–5.

781. With Witherington, *Acts*, 358. That “Lord of all” is equivalent to “Lord of the dead and the living” is clear (Rom 14:9; cf. 10:12).

782. The ambiguity in 1 Pet 4:5 does not help the claim that 1 Peter and Petrine speeches in Acts share much the same Christology (cf. Smalley, “Christology Again”); is Petrine Christology noticeably distinctive from “mainstream” early Christian Christology?

783. Whether the Lukan form of this Q saying includes urgency is debated. Many think that this text, like others representing Lukan eschatology, lacks urgency (Dunn, *Acts*, 144), and Robinson even doubted

though Greeks did not emphasize eschatology, even older Greek myths (like Egyptian eschatology) sometimes spoke to the question of moral judgment in the afterlife.⁷⁸⁴ Those who denied the afterlife⁷⁸⁵ might be thought especially wicked.⁷⁸⁶ For Luke's Christian audience and for Peter as a Jewish speaker within the story world, however, this judgment was not merely in the individual's afterlife (though such postmortem judgment could be included, Luke 16:22–23; 23:43) but in the day of judgment.⁷⁸⁷ Although some elements of Hellenistic Judaism and Christianity may have played down eschatological judgment, it was used as a summons to moral living by others (cf. 2 Pet 3:3–4, 11–14; 1 Cor 15:29–34; Col 3:4–6; 1 Thess 3:13; Titus 2:12–14).

IV. THE PROPHETS ATTEST THE GOSPEL (10:43)

Although the appeal to “witness” carries throughout Acts 10:39–43, most of this witness reinforces the *narratio*, the account about Jesus. In Greco-Roman rhetorical terms (relevant for Luke's ideal audience if not for Peter), it is thus probably only 10:43 that begins the “proofs” of the speech (the *probatio*); Luke need only report where the proofs are headed for the attentive reader (who has already encountered sufficient scriptural proofs in 2:25–31, 34–35; 3:22–26; and 7:2–53) to know what would be said and make its repetition unnecessary here (though see again in 13:17–22, 33–37, 40–41).

The global reference to “all the prophets” (i.e., the prophets pervasively as a whole) is a characteristically Lukan way of summarizing the biblical message (see comment on Acts 3:18).⁷⁸⁸ Only some of the texts used by early Christians as messianic referred to forgiveness (notably Isa 53:6, 10–12), but more generally, the prophets testified of forgiveness and restoration before God in the messianic time to come (e.g., Jer 23:5–6; 31:34; Dan 9:24). Cornelius and other God-fearers present might know some particular prophecies from attending synagogue as adults, but these would be less relevant to them than to previous Jewish audiences in Acts.

“Everyone” presumably implicitly includes Gentiles, as in Pauline preaching.⁷⁸⁹ For at least the circle of early Christians most engaged in the Gentile mission (as exemplified in Paul's letters), salvation “for everyone who believes” is at the heart of a message that welcomes Gentiles on equal terms with Jews (Rom 1:16; 3:22; 4:11; 10:4, 11–13; cf. Gal 3:22).⁷⁹⁰

(tentatively, I believe) that it implies a second coming (*Coming*, 28; idem, *Studies*, 143n13). For crisis, see Caird, “Expounding”; eschatological urgency in Jeremias, *Parables*, 43–44 (cf. 96).

784. The most extreme example was Tartarus; e.g., Hesiod *Theog.* 717–19; Plato *Phaedo* 113E–114A; Apollod. *Bib.* 1.1.2; *Epit.* 2.1; Virg. *Aen.* 6.540–43; Tibullus 1.73–80; Statius *Silv.* 5.1.192–93; 5.1.206 (poetically); 5.5.78; *Theb.* 1.85.102; Sen. *Y. Herc. fur.* 749–59; Sil. It. 6.40 (poetically); 13.833–49; Men. *Rhet.* 2.17, 438.30–439.1; in Jewish sources, *1 En.* 20:2; *Sib. Or.* 1.10, 101; 2.291 (possibly interpolated); 4.186; 5.178; *L.A.B.* 60:3; *Test. Sol.* 6:3; 2 Pet 2:4; for its extreme distance, Hom. *Il.* 8.13–15; Hesiod *Theog.* 722–25 (for distance). Even without using the terminology, some Jews employed some equivalent depictions for Gehinnom (e.g., *1 En.* 67:4, 7; 103:8; *y. Sanh.* 6:6, §2; *Hag.* 2:2, §5). Cf. also the river of fire (e.g., Sil. It. 13.836, 871; 14.61–62).

785. E.g., Epicureans denied Tartarus (Lucret. *Nat.* 3.978–1023); Lucian played with it (*Fun.* 8; *Icar.* 33; *Downward Journey* 28) as well as with the notion of judgment in the afterlife (e.g., *Z. Cat.* 17).

786. Cf., e.g., Wis 2:1–24; *Abot R. Nat.* 5 A; *b. Roš Haš.* 17a; *Gen. Rab.* 53:12; *Tg. Neof.* 1 on Gen 4:8; *Tg. Ps.-J.* on Gen 4:8. For Gentile critiques of the Epicurean denial, see, e.g., Plut. *Pleas. L.* 23, *Mor.* 1103D; *Aul. Gel.* 9.5.8.

787. On the Last Judgment in Acts (see also Acts 17:31; 24:25), see discussion in Morris, *Cross in New Testament*, 114.

788. For the prophets “testifying,” cf. 2 Chr 24:19; Rom 3:21 (Luke might reflect the Pauline thought attested here); *1 Clem.* 43.1.

789. With Marshall, *Acts*, 228.

790. Although we are most familiar with the message through Luke's mentor Paul, “apostle to the Gentiles,” the belief presumably was or became more widespread, though less explicitly linked with the Jewish-Gentile

Here Peter, like Paul in Acts 13:38–39, preaches forgiveness by faith (he speaks similarly in 15:11); few Gentiles would have access to God’s grace otherwise (cf. Rom 3:28–29). Luke presents this not as a soteriological alternative to repentance and baptism (Acts 2:38; cf. 19:4; 20:21) but as another perspective on the same demand, another way of articulating the summons to a radically new life through Christ.⁷⁹¹ Although Peter does not go as far as directly demanding a response (cf. 2:38; 3:19), this explanation of the appropriate soteriological response effectively climaxes Peter’s message, inviting faith in what he has already spoken.⁷⁹² God’s response to Peter’s hearers’ response is the gift of the Spirit (10:44–48; cf. 2:38).

6. The Spirit Confirms the Gentiles’ Acceptance (10:44–48)

In this paragraph, the Spirit graphically confirms the Gentiles’ acceptance. When uncircumcised Gentiles receive the same gift of the Spirit that the original Jerusalem church received, and with the same evidence, Peter orders their baptism into the covenant community without further ado.

In view of some prior examples (though cf. 2:4), the Spirit comes in an unexpected way, without laying on of hands (8:17) or even baptism (2:38), but God surprises his Jewish agents even more by sovereignly conferring the Spirit on Gentiles—an “exception” that opens the door to the future. The Spirit was a gift promised only for the covenant people (cf., e.g., Isa 42:1; 44:3; Ezek 36:26–27; 37:14, 29; Joel 2:28–29; see comment on Acts 1:6); that Gentiles received it without circumcision indicated that God had accepted them into the covenant by their faith alone, without circumcision (or even baptism). God would hardly pour his Spirit (Acts 10:45) into vessels he had not already purified or cleansed (cf. 10:28; 15:9). Paul also appeals to the presence of the Spirit as certain evidence of conversion (1 Cor 2:4; Gal 3:2, 5),⁷⁹³ a sign of the Gentiles’ reception of covenant status (Gal 3:14; cf. Rom 15:16).⁷⁹⁴ (In contrast to some earlier occasions, most obviously Acts 8:15–17, the gift of the Spirit appears to coincide directly with conversion temporally here,⁷⁹⁵ although departing from the norm of 2:38 on this occasion by preceding water baptism.)

From this point forward (10:44–48; 15:7–11, 14) the emphasis rests more on Cornelius’s household than on Cornelius as an individual,⁷⁹⁶ though from the start

divide than in Romans (cf. John 3:15–16; 6:40; 11:26, 48; 12:46; 1 John 5:1; for a Gentile in *1 Clem.* 12.7). Saving faith does appear in Petrine literature, apparently for a mixed community (1 Pet 1:5–9, 21; 2:6–7; 2 Pet 1:1; cf. 1 Pet 5:9; 2 Pet 1:5), and 1 Peter quotes the same text (Isa 28:16) on which Paul appears to base his language in Romans (1 Pet 2:6; Rom 9:33), although Paul has augmented it interpretively (Rom 10:11).

791. One cannot relegate repentance to Peter’s preaching to Israel (Acts 2:38; 3:19; 5:31; cf. Paul summarizing John’s message in 13:24; 19:4) and faith to his preaching to Gentiles (as here) because the pattern cannot hold: Gentiles also receive repentance (11:18; 17:30), and it applies to both (20:21; 26:20). A terminological *preference* for either repentance or faith is possible, however, and when Paul is not recalling John the Baptist, he uses the term “repentance” less frequently than Peter (fitting the rare use in Pauline literature, of which Rom 2:4 is most significant; although, analogously in Petrine literature, it appears only at 2 Pet 3:9).

792. Until this point only the narrator has employed the title “believers”; Trebilco therefore suggests that it originated among Greek-speaking Christians outside Jerusalem (“Self-Designations,” 40–41, 49).

793. On the possible sense of “demonstration” in 1 Cor 2:4, cf., e.g., Mus. Ruf. frg. 44, p. 138.28; Porph. *Marc.* 8.142–43; Anderson, *Rhetorical Theory*, 265–66; Winter, *Philo and Paul*, 153–55; Keener, *Corinthians*, 35. For the likely attesting function of tongues-speech in early Christianity, cf. Esler, “Glossolalia and Admission.”

794. Similarly, in Eph 3:5–6, it is the Spirit that revealed to the apostles the inclusion of Gentiles in Christ’s family.

795. Even if Cornelius had heard of Jesus’s followers through Philip’s work in Caesarea (as suggested by Blacklock, *Cities*, 75) and knew something about Jesus (Acts 10:37), he does not yet appear to be converted (11:14).

796. Matson, *Conversion Narratives*, 113.

Luke's interest in him has been especially his symbolic significance for the Gentile mission. Further, the Spirit that signals empowerment to witness to the nations (1:8) has now fallen even on those "afar off" (2:39) themselves. This implies that these Gentiles are now equipped spiritually to propagate the message further.⁷⁹⁷

a. The Spirit's Fall Interrupts Peter (10:44)

The same Spirit that sent Cornelius's messengers (10:20) and sent Peter (10:19) now graphically confirms God's acceptance of the Gentiles, marking them with the same sign by which God attested his messianic community on Pentecost (cf. 2:33) and promised to attest subsequent disciples (2:38–39). That the Spirit fell on them as on the Jewish disciples (10:47) and as on Jesus (10:38) presumably indicates that God was equipping them for participation in the same mission to the rest of the world (1:8; 10:38).

Among extant early Christian sources, Luke's work speaks by far the most abundantly of the Spirit's coming "upon" someone (Luke 1:35; 2:25; 4:18; Acts 1:8; 2:17; 10:44–45; 11:15; 19:6). Other writers speak of the Spirit coming "on" one (e.g., 1 Pet 4:14; *Jos. Asen.* 4:7/9; the case in Mark 1:10 fits the narrative and is not idiomatic), but Luke's language derives especially from the OT. Old Testament instances nearly always concern empowerment to prophesy (Num 11:17, 25–26, 29; 24:2; 1 Sam 10:6, 10; 19:20, 23; 1 Chr 12:18; 2 Chr 20:14; probably 2 Kgs 2:9; Isa 59:21; 61:1; Ezek 11:5; 37:1), or to lead (Judg 3:10; 6:34; 11:29; 1 Sam 16:13), or to exhibit superhuman strength (Judg 14:6, 19; 15:14; 1 Sam 11:6).⁷⁹⁸

The expression appears in both of Luke's programmatic texts, Isa 61:1 in his Gospel (Luke 4:18) and Joel 2:28–29 in Acts (Acts 2:17–18). The Spirit's "falling" appears in Acts 10:44 and 11:15 but also reflects biblical idiom (Ezek 11:5). The suddenness of the Spirit's coming here parallels that of the Spirit's coming at Pentecost (Acts 2:2; cf. 11:15).⁷⁹⁹ For the significance of those "hearing" the saving message, compare Rom 10:14; Gal 3:2, 5; 1 Thess 2:13; and often Luke-Acts itself (e.g., Luke 5:1, 15; 6:18; 8:8, 18).⁸⁰⁰

The Spirit here interrupts Peter's words.⁸⁰¹ Most commentators suggest that "Peter's address is really at an end," proposing that "the alleged interruption" is Luke's literary device.⁸⁰² Rhetorically,⁸⁰³ the speech is nowhere close to complete,⁸⁰⁴ having just left the *narratio* for the *probatio*; though Luke usually uses "begin" idiomatically

797. Jesus has already sent an apparent Gentile (Luke 8:39), but in that case, he could not have brought the Gentile back to Galilee (cf. 8:38) for cultural reasons. Now the barrier between Jew and Gentile is beginning to be surmounted in the church (see comment on Acts 10:48).

798. The supposed distinction between the Spirit "in" believers in the NT and "upon" believers in the OT does not hold for 1 Peter (1 Pet 1:11; 4:14) or Luke; it is sometimes only stylistic preference, perhaps reflecting the different idioms of Hebrew grammar (preferring "upon") and Greek anthropology (preferring "in"), overlap though they do. Still, Paul's and other early Christian "in" passages often do evoke more the transforming activity of the Spirit characteristic of Ezek 36, whereas Luke's "upon" passages typically evoke the more frequent OT idiom that more often refers to empowerment.

799. Stanton, *Jesus of Nazareth*, 23.

800. In Gal 3:2, as here, the Spirit came through "hearing" (Borgen, "Reception," 233).

801. His "words" (ῥήματα) have already been introduced as divinely appointed for Cornelius (Acts 10:22; cf. their function as his means of salvation, 11:14).

802. Quoting Haenchen, *Acts*, 353.

803. From the standpoint of rhetorical patterns that Luke's urban audiences, familiar with speeches, would recognize. Theologically, however, because the kerygma is especially the gospel story, the *narratio* delivered a complete message.

804. One could leave a thought incomplete but implied (cf. Luke 13:9; *Rhet. Her.* 4.30.41; Blass, Debrunner, and Funk, *Grammar*, §482; Porter, "Paul and Letters," 583), but even if the interrupted speech so functions on the Lukan level (which is doubtful), it does not within the narrative world.

with “speak,” it may therefore be meant literally in Acts 11:15: the Spirit fell when Peter had “begun” to speak. From the standpoint of Luke’s purpose, however, enough has been said to make the point. The interruption also appears providential from a narrative standpoint, since Peter might well have been uncomfortable granting baptism had the Spirit not preempted him.⁸⁰⁵

That believing Peter’s narration, without full proofs or emotional pleas at the end, is sufficient to bring the Spirit also indicates that, for Luke, the saving message proper is the gospel story itself—what God has done—more than a full theological explanation of what response is required (important as the latter is for other reasons; cf. 15:7–11), though a summons to respond is generally included (e.g., 2:38; 3:19; 16:31) and seems implied at the climax here (10:43). That is, Luke’s soteriology demands faith in the message of Christ rather than faith in a methodology of faith itself (though understanding the role of faith in soteriology is important for explaining the gospel).

Although interruption is more frequent in Acts than in other ancient histories (and its speeches are shorter to begin with, perhaps to keep the monograph to a single volume), it does appear elsewhere.⁸⁰⁶ In any case, interruptions characterized real life as well as the narratives that sought to depict it.⁸⁰⁷ (See fuller discussion at Acts 2:37.) Good orators would silence those who interrupted them (Cic. *Or. Brut.* 40.138)—for example, complaining that they are contravening one’s right to speech (*Rhet. Alex.* 18, 1432b.35–40) or refusing to allow jurors to decide for themselves (18, 1433a.14–18).⁸⁰⁸ There were, however, positive interruptions, in which an audience demonstrates that it is already persuaded (e.g., Acts 2:37; Caesar *C.W.* 2.33). This verse signals a positive interruption from the hearers as they exalt God in other tongues (Acts 10:46), but ultimately the interruption is from God’s own Spirit.

b. Gift of the Spirit on the Gentiles (10:45)

Luke calls the Jewish believers with Peter the “circumcised,” a common NT metonymy for the technical physical distinction (Rom 3:30; 1 Cor 7:18–19; Gal 2:7), even among those who reject its soteriological significance (Rom 2:25–29; 3:30; 4:9–12; Gal 5:6; 6:15; Eph 2:11; Col 2:13; 3:11; 4:11).⁸⁰⁹ On circumcision and its role in early Judaism, see the excursus at Acts 15. The phrase highlights the distinction between the Jewish believers and the Gentiles who are receiving a gift once assumed to be confined to Israel. That it recurs in this sense almost immediately afterward (Acts 11:2; cf. also its antonym in 11:3), and nowhere else in Luke-Acts, reinforces the emphasis here. Luke distinguishes the Jewish believers from other Jewish people

805. Cf. similarly Chrys. *Hom. Acts* 24: God arranged it this way both to justify what Peter would do and to teach him along with the other Jews present. The claim that the Spirit is given only through the Twelve or when they are present (Fitzmyer, “Role of Spirit,” 182) falters at Acts 9:17, and even here, Peter is present as a witness and not a mediator of the Spirit except insofar as the Spirit is connected with his message.

806. Soards, *Speeches*, 138 (following Plümacher, “Griechischer Historiker,” col. 249); Aune, *Environment*, 127; Horsley, “Speeches.” Cf. now Smith, *Rhetoric of Interruption*, 42–166.

807. Cf., e.g., *Rhet. Alex.* 18, 1432b.35–40; 1433a.14–25; Livy 3.40.5; Cic. *Prov. cons.* 8.18; *Or. Brut.* 40.138; Lucian *Dem.* 14; see fuller comment on Acts 2:13, 37. In somewhat analogous charismatic-type settings in popular sources, cf. the Spirit “falling,” apparently interrupting, during preaching in Bartleman, *Azusa Street*, 59; reports of spontaneous healings interrupting preaching in Osborn, *Healing*, 321 (Mexico, 1978).

808. If most of the hearers clamor (the same term or its cognates appear in Acts 17:5; 20:1; 21:34; 24:18), the Rhetor advises, one should beg the judges to hear one out, thereby (usually) restoring attention (*Rhet. Alex.* 18, 1433a.19–25).

809. On metonymy in ancient rhetoric, see *Rhet. Her.* 4.32.43; Rowe, “Style,” 126; Porter, “Paul and Letters,” 578; Black, “Oration at Olivet,” 85; Anderson, *Glossary*, 77 (adding Cic. *Or. Brut.* 93; against its being employed too poetically, Quint. *Inst.* 8.6.23–27).

by the adjective “faithful” (πιστοί), which may imply faithfulness to God’s covenant (Luke 12:42; 16:10–12; 19:17), presumably through faith in Christ (Acts 16:1, 15).

Their amazement that the Spirit was poured out on Gentiles—when biblically it had been promised only and exclusively to people of the covenant (e.g., Isa 42:1; 44:3; Ezek 37:14; 39:29; Joel 2:28–29; applied still more narrowly at Qumran; see comment on Acts 1:6)—is repeated by the Jerusalem assembly in Acts 11:18. Some later rabbis even emphasized that Balaam’s revelation was necessarily incomplete;⁸¹⁰ rabbis may have felt uncomfortable with the idea of God’s Holy Spirit resting on an unclean Gentile.⁸¹¹ A later tradition specifies that the Spirit of prophecy distinguished God’s people from the Gentiles.⁸¹²

The language of “pouring” evokes Joel 2:28–29 as quoted in Acts 2:17–18 (using a cognate term in the Greek), indicating that Joel’s “all flesh” includes Gentile believers as well as Jewish ones.⁸¹³ On the significance of the “gift” of the Spirit, see Acts 2:38; 8:20; 11:12 (Luke’s uses for “gift”), especially comment on Acts 2:38.⁸¹⁴ Although Peter uses “pouring” in the passive voice, God clearly has given the gift (11:17); see discussion on Luke’s theological Christology with regard to the Spirit at Acts 2:33.

c. Tongues as Confirmation (10:46)

Praise in tongues is the sign that convinces the Jewish believers that the Spirit has been poured out (“for they were hearing”).⁸¹⁵ Anything less obvious would not have been sufficiently compelling for the Jewish observers,⁸¹⁶ who are here able to recognize the phenomenon from its parallel with the analogous Jewish experience of the Spirit first reported at Pentecost (2:4).

Peter then concludes that the Gentiles have received the Spirit “the same way that we did” (10:47; cf. 11:15); the wind and fire (2:2–3) were not repeated, but the tongues speaking was, and it will be repeated again in 19:6. Luke probably highlights tongues speaking more frequently as a sign of the Spirit’s outpouring because of his emphasis on the Spirit enabling the witnesses cross-culturally (1:8); on Luke’s use of tongues to evidence the Spirit’s cross-cultural prophetic empowerment, see comment on Acts 2:4.⁸¹⁷ But probably historically, and not just in Acts, Gentiles’ glossolalia sometimes confirmed their reception of the Spirit and hence invited their admission to Christian communities.⁸¹⁸

810. *Gen. Rab.* 52:5; 74:7; *Lev. Rab.* 1:13; cf. *Sipre Deut.* 357.18.1–2. On Balaam, see excursus on prophecy at Acts 2:17–18.

811. Cf. Le Cornu, *Acts*, 602. Balaam was, however, moved by the divine Spirit in Num 24:2; *Jos. Ant.* 4.118.

812. Talbert, *Acts*, 99, citing *Tg. Ps.-J.* on Exod 33:16.

813. See also others, e.g., Mufwata, *Extrémities*, 61.

814. Jewish teachers sometimes associated the concept of “gift” especially with Torah (Moore, *Judaism*, 398; see comment on Acts 2:38); no such associations are clear here, though they would fit the Jewish-Gentile contrast indicated here. Associations with hospitality (Parsons, *Acts*, 155, noting hosts giving gifts to guests in antiquity) fit this context, though not specifically Acts 2:38 or 8:20.

815. Cf. also Chrys. *Hom. Acts* 24. For the connection between praise and the Spirit in Luke-Acts, see, e.g., Cullen, “Euphoria.”

816. With Lampe, *Seal*, 75.

817. Severus of Antioch in *Cat. Act.* 10.44 (Martin, *Acts*, 140) opines that in earlier times, people receiving baptism “both spoke with tongues and prophesied in order to prove that they had received the Holy Spirit.” For the “sign value” of tongues speaking regarding baptism in the Spirit here, see, e.g., Chuen, “Acts 10,” 72. Luke does not report it in every case, rendering it of course doubtful that it constitutes “an invariable sign of conversion” (Marshall, *Acts*, 194); against it invariably functioning as evidence, see esp. Turner, *Power*, 446–49; idem, *Gifts*, 225.

818. See Esler, “Glossolalia and Admission.” Perhaps analogously, the shared experience of glossolalia emphasized equality among disparate groups of early Pentecostals, though cultural divisions often quickly

One could suggest that Gentiles' reception of this sign might function as merely an initial attestation rather than a continuing experience, like the prophetic empowerment of the seventy in Num 11:25 (in contrast to Eldad and Medad [11:26–29], which is closer to the ideal [11:29]); but we should not read so much into Luke's silence about further manifestations,⁸¹⁹ especially when we know (and surely Luke knew) that some early Christians did continue to use the gift (1 Cor 14:2–39, esp. 14:18).⁸²⁰ Since for Luke tongues speaking marks power for cross-cultural witness, his claim seems to be that Gentiles, too, can receive this power (see Acts 2:38–39).⁸²¹ This is not to say that Luke would expect tongues in every case when someone receives this empowerment (see discussion at Acts 2:4) but to suggest that it is also unreasonable to treat their occurrence as “exceptional,” as if Luke supposed that tongues never or rarely occurred except on the occasions where they are recorded.⁸²² Nevertheless, narrating their occurrence here is theologically significant. Their reception of the empowering Spirit reveals that, rather than remaining objects of mission, Cornelius and his household immediately become partners in mission.

Believers experienced tongues speaking unexpectedly here as in 2:4, with no prior instruction concerning its nature; sometimes prophecy came roughly similarly in Israelite experience (1 Sam 19:20; cf. 10:6). Some scholars argue that the “tongues” of Acts 10:46 and 19:6 are probably meant as merely ecstatic speech, in contrast to the tongues of 2:4.⁸²³ This approach, however popular today, is quite unlikely for Luke's narrative; even if no one is present to recognize the languages here, the phenomena are portrayed in essentially the same way in each instance and make the same point. The Jewish observers in 10:47 claim that the Gentiles received the Spirit the same way the Jewish Christians had (cf. also 11:15).⁸²⁴ We have no record of the Jewish Christians' having experienced nonlinguistic “speech” and thus no reason to think that they would have known how to recognize or interpret such a phenomenon. Presumably they believed that genuine languages were involved, although they could not understand them; this again signified cross-cultural prophetic empowerment. Most compellingly, “tongues” means “languages”; this is probably, therefore, also Paul's interpretation of the gift in 1 Cor 12–14, even if (as even more scholars argue in that case) the experience behind Paul's linguistic

reasserted themselves (e.g., Yong, *Spirit Poured*, 56–57). Ezekiel spoke of Israel being as unreceptive as people of foreign, unintelligible speech (Ezek 3:5–6).

819. He narrates nothing else about these Gentiles' lives thereafter, either; nor does he describe the particulars of worship in later gatherings of believers.

820. For a caution against reading too much into Luke's silence (in contrast to Paul, Luke gives few samples of church life), see esp. Turner, *Gifts*, 224.

821. Menzies, *Empowered*, 215–18, argues that the connection is with prophetic inspiration, not salvation, since the focus is on tongues-speech; cf. Stronstad, *Baptized*, 66–67. Le Cornu, *Acts*, 601–2, cites a tradition regarding eschatological renewal of language with regard to the Gentiles (Zeph 3:9; cf. *b. Ber.* 57b, noting circumcision of Gentiles' lips in some sources).

822. Which would argue from silence rather than from Luke's pattern. Green, *Thirty Years*, 259–60, though charismatic himself, reads all the instances in Acts (Acts 2:4; 10:46; 19:6) as exceptional, performing particular functions (in this case, demonstrating that some Gentiles have received the Spirit). Although the recorded cases do serve literary functions, treating them all as exceptions fragments Luke's larger narrative, especially when we consider that these cases constitute a remarkably high proportion of Luke's descriptions of people “receiving the Spirit” for the first time in Acts. Conversely, overemphasizing tongues might put too much weight on these “initial” fillings in Acts, taking them out of the context of other (“subsequent”) fillings sometimes mentioned (esp. 4:31; probably 4:8; 13:9).

823. E.g., Witherington, *Acts*, 134.

824. With Forbes, *Prophecy*, 51n16; Everts, “Tongues or Languages?”; Faw, *Acts*, 319. Although Peter's colleagues from Joppa may not have all been present at Pentecost (Acts 10:23; though some of the believers scattered in 8:1, 4 may have eventually found themselves in Joppa) and hence could have experienced the Spirit subsequently, they speak as representatives of the Jewish church that received the Spirit then.

interpretation was to be ecstatic speech rather than unknown languages. See much fuller discussion at Acts 2:4.

Luke elsewhere applies the term *μεγαλύνω* to praise (Luke 1:46; Acts 19:17; though not in Luke 1:58; Acts 5:13), and this is a common usage in the Psalms (e.g., Pss 34:3 [33:4 LXX]; 35:27 [34:27]; 40:16 [39:17]; 69:30 [68:31]; 70:4 [69:5]). By itself, conventional praise would not have persuaded Peter's colleagues that the Spirit had been poured out, since this activity occurred regularly in the temple and perhaps in many synagogues, but its mention does not occur in isolation here. Tongues speaking in Acts apparently always functions as inspired praise, not as a message to someone else.⁸²⁵ The use in Acts 2:11 is debatable, since one could declare God's greatness either in epideictic speech directed toward hearers or in praise directed toward God, but here it is probably grammatically linked with praise,⁸²⁶ in contrast to the way it is distinguished from prophecy at 19:6 (which uses not merely *καί* but *τε . . . καί*). Certainly, tongues speaking is primarily prayer and praise in 1 Cor 14:14–17, our other clearest early Christian source on the subject.

d. Water Baptism for the Spirit-Baptized (10:47)

If these Gentiles were baptized in the Holy Spirit, thus experiencing the ultimate baptism, surely they were qualified to receive baptism in water, the lesser baptism (Acts 11:16). This functions like an implicit *qal vahomer* argument: if the greater was true, then how much more the lesser should be true (Luke 3:16).⁸²⁷ Although they undoubtedly expected water baptism first (Acts 2:38), they found that God was more interested in the fact than the sequence.⁸²⁸ Even in a much later period, some observers noticed anomalies with respect to baptism's sequence and sought to understand their theological significance; when some were forgiven without baptism, Ambrosiaster asked, "Was such a person invisibly baptized, considering that he received the gift which belongs to baptism?"⁸²⁹

Most Jewish people required baptism and circumcision of Gentile converts, but here Peter requires only what he required for Jews (2:38); because both received the Spirit in the same way, he recognizes that both come to God on the same terms (15:8–11). The controversy in Jerusalem arises not over Peter's failure to demand circumcision, however (many Jews already accepted the tradition of some righteous Gentiles who were not full converts), but because, without circumcising him, Peter treats Cornelius as if he is a circumcised member of the covenant. That is, he eats with him (11:3).

Even once this barrier is surmounted in Cornelius's individual case, it is applied to recognizing Gentile Christians in general as equal partners in the gospel only in Acts 15. This reticence to embrace ethnically and culturally different newcomers is not a distinctively Jewish problem but simply human nature when believers from one culture "evangelize" another culture, not always distinguishing their own enculturation of the gospel from its transcultural story. One may consider the often-patriarchal relations of Protestant missions and their converts in the nineteenth century (and sometimes later); of the Vatican reining in enculturated Jesuits in Asia in earlier

825. Prophetic speech could also apply to prayer and worship (Luke 1:67–75; 1 Chr 25:1–3; for musical inspiration in the stead of mantic, cf. Men. Rhet. 2.17, 437.31–438.1), and the Spirit could forbid speech (Acts 16:6–7) as well as inspire it; even Hill, *Prophecy*, 98, allows the possible excepting of 10:46 and 19:6 from Spirit-empowered speech in Acts as always being to persuade people to turn to Christ.

826. Turner, *Gifts*, 224–26 (cf. also idem, *Power*, 395), thinks that exalting God might be *mixed* with tongues, with some doing one thing and others doing the other. This view is possible although, for the reasons above, I think it less likely.

827. Also deSilva, *Honor*, 286–87.

828. With, e.g., F. Martin in *Acts* (ACCS), 139; see comment on Acts 2:38; 8:14–17.

829. Ambrosiaster *Commentary on Paul's Epistles* (Vogels, 34; Bray, *Corinthians*, 30).

centuries; of Arab cultural colonialism in much of the history of Islamic expansion; and so forth.⁸³⁰ Religious institutions, like institutions in general, tend toward conservative preservation of their cultures and traditions, in contrast to the more radical spirit of the earliest Jesus movement and other prophetic or apocalyptic movements.⁸³¹

Although the narrated sequence violates the expected pattern (2:38) and the outpouring itself is unexpected, it may fit the usual pattern of prayer preceding the outpouring of the Spirit (10:2, 4, 9; as in 1:14; 4:24–31; 8:15).⁸³² Peter’s climactic question as to who can “hinder” their baptism⁸³³ anticipates the climactic question at his defense in 11:17: “Who was I to hinder God?” It also recalls the earlier Gentile conversion, employing the same term, “hinder” (κωλύω), as in 8:36 (see comment there), its first appearance in Acts. Luke indicates that just as no one dare hinder children (Luke 18:16) or outsiders (9:49–50) from God’s kingdom (cf. 11:52), neither dare anyone hinder Gentiles. The significance of this term is evident from the cognate on which Acts ends: the apostle to the Gentiles continued preaching “unhindered” (Acts 28:31). The second part of Peter’s question, like a large percentage of questions in Luke-Acts,⁸³⁴ grounds the point in the preceding narrative: in this case, these Gentiles had received the Holy Spirit the same way that the Jewish believers had.

e. Baptism and Hospitality (10:48)

By ordering baptism in Jesus’s name, Peter grants that the Gentiles share the experience of 2:38, though the sequence has been altered by the believers’ receiving the Spirit before formal acceptance into the church. Peter ordered baptism instead of carrying it out himself (cf. John 4:2; 1 Cor 1:14–16).⁸³⁵ Water for baptism naturally would be no problem in Caesarea.⁸³⁶ Although Caesarea was by the sea, springs in the area also supplied plenty of fresh water, some piped in (at some time in the first century) through an aqueduct tunnel ingeniously carved through rock.⁸³⁷

Like Lydia later (Acts 16:15), Cornelius prevailed on the preachers to accept his hospitality, allowing him the honor of serving as host,⁸³⁸ as well as undoubtedly

830. See, e.g., Neill, *History of Missions*, 190–94; Lewis, *Race and Slavery*, passim; Gordon, *Slavery*, passim.

831. That social movements usually emerge in flux and, if successful, tend to become institutionalized is often recognized (e.g., Broom and Selznick, *Sociology*, 304; Spencer, *Foundations*, 505–6).

832. With, e.g., Grassi, *Laugh*, 112; Matson, *Conversion Narratives*, 51–52. Cf. Luke 10:2; 11:13. Yet Bonnah, *Spirit*, 190, is also right to note that the connection is less clear than in those passages. Tert. *Fasting* 8 notes that Cornelius received the Spirit before baptism, associating this with God heeding his fasting (Cyprian *Treatise 4: On the Lord’s Prayer* 32 connects Cornelius’s vision with his prayerfulness, citing Acts 10:4; cf. his alms in *Liturgy of Mark* 3.15). Cyprian *Ep.* 71 [Oxford ed. 72].¹ cites the case of Cornelius to show that orthodox water baptism is necessary even when the Spirit has come.

833. Possibly functioning like epitrope, where a speaker may challenge anyone to contradict (as defined in Rowe, “Style,” 147; Porter, “Paul and Letters,” 582; cf. the somewhat different definition in Anderson, *Glossary*, 54, citing *Rhet. Her.* 4.39). Chrys. *Hom. Acts* 24 suggests that Peter is deploying a rhetorical advantage over those who would question the propriety here.

834. On this pattern among many of Luke’s questions, see Elbert, “Observation” (comparing Homeric style). He claims that thirty-eight of the seventy questions in Acts have dual components (p. 102), of which thirty-one (82 percent; in the Gospel, 77 percent) are connected deliberately to the preceding context in the second element.

835. As noted also by Ambrosiaster *Comm.*, on 1 Cor 1:17 (CSEL 81.12–13; Vogels, 12–13; Bray, *Corinthians*, 12). One could connect the name formula with the order (cf. Acts 3:6; 16:18), but other baptismal uses associate it with the baptism instead (2:38; 8:16; 19:5; 22:16). Being baptized “in” or “into Jesus’s name” (always with baptism in the passive, focusing on the action of the recipient of baptism rather than the supervisor) implied calling on his name (2:21, 38; 22:16) and hence receiving the message of Jesus (his name, 8:12, 16).

836. Some early Christians at some time (perhaps a few decades) after our period seem to have preferred immersion in running water; but failing that, they used what water they could, and failing sufficient water for immersion, they poured (*Did.* 7.2–3).

837. See Porath, “Hmnhrh,” noting that the aqueduct is not Herodian, as was previously thought.

838. Malherbe, *Social Aspects*, 66–67.

securing more teaching. In the ancient Mediterranean world, sharing food and drink with guests was often the greatest kindness one could offer (e.g., *Xen. Cyr.* 8.2.2), and in view of obligations to repay benefaction (which Cornelius would see as relevant here, Acts 10:33), this would be the least that Cornelius could offer and also the most culturally acceptable way of expressing his gratitude.⁸³⁹ Dinner invitations established and strengthened friendship ties, thereby sustaining the Roman civic virtue of *societas*.⁸⁴⁰ In Acts 10, shared table fellowship and hospitality provide a context for converting these Gentiles—and the attitudes of the Jerusalem church.⁸⁴¹

That they ask Peter to stay for a few days will create trouble with the Jerusalem church because, under such circumstances, he has to eat with them (11:3). But the Fourth Gospel claims that Jesus accepted Samaritan hospitality for several days (John 4:40), and Acts has recently reported Peter's time in Samaria (Acts 8:14–25, esp. 8:25). Further, Jesus and his disciples ate with "sinners" in the Gospel (Luke 5:29–30; 7:34; 15:1–2); why not with Gentiles whom God has clearly accepted?⁸⁴²

Certainly a God-fearer⁸⁴³ would not have been so insensitive as to offer Jewish guests pork or other unclean foods;⁸⁴⁴ if they served meat (which was more unlikely than not),⁸⁴⁵ they could have obtained it kosher-butchered in Caesarea. But if the food had not been *tithed* on, the more scrupulous Jews (of whom there were probably a number in the Jerusalem church; Acts 15:5; cf. 6:7; 15:20, 29)⁸⁴⁶ would have had reason to protest (see comment on Acts 10:23). Further, conservative Judean Jews often disapproved of sharing a table with Gentiles (against some Diaspora Jews' values; see discussion at Acts 10:23, 28), and Cornelius's guests may have included not only the uncircumcised (the explicit issue in 11:2–3) but also those defiled by idolatry.

7. Peter Defends Welcoming Gentiles into the Covenant Community (11:1–18)

Peter here defends his acceptance of Gentiles as members of the covenant community. He recounts the very evidences that Luke has already reported; the consequent repetition for Luke's audience reinforces the divine initiative contained in the event.

839. Monetary payment would be insulting (cf. Acts 8:18–20; *Apoll. K. Tyre* 10) because it demeaned the gift and giver as if it could be bought; on appropriate responses to benefaction, depending on the relative status of giver and receiver, see Sen. *Y. Ben.* passim.

840. Winter, *Left Corinth*, 56, following Slater, *Dining*.

841. Cf. Arterbury, "Hospitality."

842. Cf. Urbach, *Sages*, 1:43 (quoting *Sipre Deut.* 173.220; cf. *b. Sanh.* 65b): "If on one who cleaves to uncleanness the spirit of uncleanness rests, then it follows that on one who cleaves to the Shekhina, the Shekhina rests upon him."

843. Even the Roman government, as a matter of respect for local customs, accommodated Jewish kashrut in local marketplaces (*Jos. Ant.* 14.261; Winter, *Left Corinth*, 288–93); also, God-fearers were not suspected of supplying unclean food, though their couches and seats were unclean (*m. Ger.* 3:1–2, in Le Cornu, *Acts*, 583).

844. On pork, see the digression above at Acts 10:12.

845. Many scholars think that most people (i.e., poorer people) ate meat especially at festivals (Cary and Haahrhoff, *Life*, 93; cf. Willis, *Idol Meat*, 13; but contrast Meggitt, "Meat Consumption"), though those with resources could preserve meat (Frost, "Preservation"). Though Cornelius might wish to spare no expense, he would also be sensitive to his guests' customs; fish would be more abundant in Caesarea. For typical diets for fairly well-to-do Gentiles, see Jeffers, *World*, 40–41. Shemesh, "Vegetarian Ideology," argues that later rabbis often believed that primeval people were vegetarian; although they did not expect vegetarianism in their own era, Shemesh argues that they recognized the value of limiting meat intake for various reasons.

846. Pharisaism emphasized purity in handling food, but probably not at a priestly level (see Sanders, *Jesus to Mishnah*, 131–254). Indeed, the dominance of Shammaites among Pharisees in this period may have exacerbated the concern more than our surviving sources (predominantly descended from Hillelite sages) reflect (see Theissen, *Sociology*, 83).

In some respects, this section may resemble a trial scene, the sort of scene commonly used in Hellenistic novels as part of the action, suspense, and entertainment.⁸⁴⁷ This scene is not a literal trial, however, despite its forensic elements;⁸⁴⁸ more important, Luke uses it pedagogically rather than primarily for entertainment. The accusation against Peter brings some suspense, but this is not its primary purpose; rather, the conflict clarifies that the Gentile mission was God's idea, not that of the church. It also provides Luke an opportunity to repeat, and hence emphasize, the central points of the preceding narrative, which is particularly strategic for Luke's concerns.⁸⁴⁹ Luke is interested in not only the conversion of these Gentiles but also the conversion of Peter's and the Jerusalem church's perspectives.⁸⁵⁰

Some scholars complain that Luke portrays church councils as orderly and decorous, in contrast to often riotous public assemblies (19:29–40; 21:27–35; 23:7–10).⁸⁵¹ Although it does suit Luke's purpose to make this contrast, it is also the case historically that Christians did experience more dangerous hostility from outside their own ranks, that the idea of orderly sectarian assemblies was not new (cf. 1QS), and that Luke does mention the conflicts (including here 11:3; also 15:5), though naturally preferring to emphasize the united outcomes.

a. *The Setting (11:1–4)*

The heart of the setting of Peter's speech in 11:5–17 is the controversy over his eating with uncircumcised Gentiles. That it might seem incongruous for a leading miracle-working apostle to be called on the carpet in Jerusalem may indicate something of the nature of the early church's "government" (Luke's Greeks would be happy to know that it was not autocratic). More important, however, this apparent dissonance underlines just how serious the breach appeared to be. Peter was respected (and his argument carried the day, 11:18), but apparent breach of Scripture (at least as it had been interpreted) required a serious justification.

I. CONCERNS IN JERUSALEM (11:1–2)

From their experiences reported in the Gospel, "the apostles" knew about eating with sinners, those unclean or serving untithed or even unclean food; in the light of Luke's larger story, their cultural prejudice against eating with Gentiles thus appears inconsistent and ripe to be challenged.⁸⁵² There is irony here: they heard that the Gentiles had "received God's message" (exactly like the Samaritans in 8:14), but here they appear more concerned about the breach of custom than about the miracle of conversion, despite the fact that in this case (unlike Samaria) the believers had already received the Spirit. Perhaps they are yet unaware of this latter detail, which will ultimately compel their acceptance at the close of Peter's defense (11:16–18). What they have "heard" secondhand bears far less evidential weight than what the eyewitnesses "heard" in 10:46.

The text does not specify whether Peter started back to Jerusalem immediately

847. Johnson, *Acts*, 199 (citing Ach. Tat. 7.7, though emphasizing the summarizing or explaining of events' significance as the purpose of novels' trial narratives).

848. See also Witherington, *Acts*, 363n143 (noting that public opinion is the only judge here). It could have become a case for censure, but no more, and is not yet at that stage.

849. As often noted (e.g., Witherup, "Cornelius Over Again"; Witherington, *Acts*, 73). Cf. rhetorical recapitulations as summaries of what was just said (Anderson, *Glossary*, 85).

850. Cf., e.g., Dollar, *Exploration*, 179; González, *Acts*, 136; Van Engen, "Peter's Conversion," 135–36; Tiede, "Conversion."

851. Pervo, *Profit*, 39–42.

852. For marginalized groups in Luke's first volume prefiguring the Gentile mission in the second, cf. Dollar, *Exploration*, 57–81; Lane, *Gentile Mission*, 48–57; Tannehill, "Ethics," 120; Mallen, *Reading*, 132; for understanding Paul's mission to Gentiles (as conquered subjects of Rome) as a mission to the marginalized, see Lopez, *Apostle*, 22.

after the “few days” in Caesarea (10:48)—only that word preceded him (11:2). Even the most direct route from Caesarea to Jerusalem would normally take two days, except perhaps in an urgent situation (cf. 23:31–33).⁸⁵³ “Those who were from the circumcision” (see comment on Acts 10:45; 15:1) is Luke’s title for the Jerusalem believers, anachronistic in the narrative world (where only Cornelius’s household and a distant African official are yet uncircumcised).⁸⁵⁴ Yet it underlines part of the point under dispute (11:3). The language by which Luke describes their criticism of Peter might recall for a particularly attentive reader the contrasting warning of the Spirit in 10:20: Peter was not permitted to “doubt” or “make distinctions” about Gentiles, but now his fellow Jewish believers do the same with him.⁸⁵⁵

That others in the church can debate with Peter, despite his prominence from the beginning (e.g., 1:15; 2:14), reveals how diffuse the church’s authority structures were in the early period and, for Luke’s narrative, diminishes the significance of later Jerusalem criticisms against Paul (21:21).⁸⁵⁶ If Jerusalem Christians can criticize Peter after a relatively brief absence, how much more Paul (who had raised some uncomfortable issues in 15:12), whom they barely knew after his conversion and who had been absent for years?⁸⁵⁷ Like Peter’s critics, Paul’s also miss the point of God’s activity (15:1, 3–5, 12).

It is possible historically that Peter’s influence in the Jerusalem church declined precisely because of such “relative laxness towards the Torah”; James, by contrast, recognized that the tolerance of at least the Pharisees and rising nationalists depended in part on the church’s strong identification with its Jerusalem environment (Gal 2:12).⁸⁵⁸ The differences between Peter and James (as opposed to those of many incoming members of the church) might have been tactical, but they reflected the uncomfortable tensions faced by members of a community united by faith yet divided by increasingly polarized social or ethnic conflict; evangelism and even survival may depend on social or ethnic identification and accommodation whereas unity with other believers must transcend these. Stephen’s preaching had challenged dominant views in Jerusalem in ways that had led to the church’s suppression (Acts 8:1–3), a matter still recalled in this context (11:19). The Jerusalem church was hardly inclined to appreciate an apparent threat to its newfound stability (9:31).⁸⁵⁹

II. THE CHARGE (11:3)

The charge is stated baldly in 11:3: “You entered to uncircumcised men and ate with them.”⁸⁶⁰ That Peter “entered” (εἰσῆλθε) among the Gentiles was part of the

853. The Western text elaborates on Peter’s ministry along the way; although Bruce, *Acts*³, 73, notes that this makes the text more “colorful,” it is also likely secondary (see Metzger, *Textual Commentary*, 382–84).

854. See Hanson, *Acts*, 126. Pauline texts employ the title both for Jews (Rom 4:12; 15:8; Col 4:11) and for those who demand Gentiles’ circumcision (Gal 2:12; Titus 1:10), a distinction perhaps not yet relevant (because not yet considered) in Acts 11:2–3. Luke’s wording might, however, betray knowledge of Paul’s polemical usage such as is also reflected in Gal 2.

855. Johnson, *Acts*, 197; Dunn, *Acts*, 150, on the polyvalence of διακρίνω, which appears in Luke-Acts only in the Cornelius story (Acts 10:20; 11:2, 12; 15:9). If members of Luke’s audience had forgotten the term in 10:20, they would soon hear that use repeated in 11:12. In this case, it applies to “disputing” (the fifth sense in BDAG, citing Polyb. 2.22.11; Jude 9), somewhat like a “halakic dispute”; the term often translates $\Psi\Phi\Omega$ in the LXX (Le Cornu, *Acts*, 609).

856. On Luke’s apologetic for Paul, see more fully, e.g., Keener, “Apologetic.” For an examination of Peter’s leadership style in Acts, with application to a South African church context, see Nell, “Leadership.”

857. One might compare politics against Caesar in Rome while he was away enjoying military successes; but Caesar responded by marching his army across the Rubicon.

858. Hengel, *Acts and History*, 97.

859. Bruce, *Acts*¹, 230.

860. This is one way to translate the phrase, though I have compromised English idiom to echo the Greek. Barrett, *Acts*, 537, notes that ὅτι can sometimes be used as “Why?” (replacing τί; Acts 9:11, 28), but admits that LJS counts this as “rare and late”; the usual sense of ὅτι as introducing direct speech is thus more likely.

problem,⁸⁶¹ since strict observers of custom would consider Gentile homes impure (see full comment on Acts 10:28). The focus of the problem, however, and the part that would be viewed as most difficult to defend was that he ate with them. Strangely enough for modern readers, it is this table fellowship, rather than Peter's preaching or administering baptism, that invited the charge⁸⁶² (though conversion to Judaism, which the Jerusalem believers doubt has occurred, would resolve the problem, 11:18).

Although Luke did not narrate Peter's eating with them (the verbs are singular, and so Peter's responsibility as a leader, rather than that of his colleagues, is stressed), it is implied in the "some days" of 10:48. The reader understands, however, that Peter had little choice: the locus of God's revelation to him apparently involved the purity of table fellowship with Gentiles (10:13).⁸⁶³ (Historically, Peter would have eaten in the circumstances described here. This case is more exceptional and special than that in Gal 2:12, since he can defend it on the basis of a revelation and since there were no conservative critics present at the time of eating. In Gal 2:12, he ate before such potential critics arrived.)

Luke's compressed narrative does not explain the source of the information used by Peter's critics; they may have inferred it from the length of his stay (though there were hospitable Jewish Christians in Caesarea also; Acts 8:40; 21:8–10).⁸⁶⁴ But if Peter had remained in Caesarea for several days, word about his behavior could have preceded him to Jerusalem (cf. 8:14a). One was naturally judged by one's associates, which often required a defense of one's character if that of one's associates was in question (see, e.g., *Rhet. Alex.* 7, 1429a.1–5).

Avoiding table fellowship with Gentiles was a major issue in early Judaism (e.g., *Jub.* 22:16; 3 *Macc* 3:4, 7; *Jos. Asen.* 7:1). This should not surprise us, since eating any untithed food, including from fellow Israelites, was defiling from the standpoint of strict pietists (and most of the early Christian movement did apparently feel comfortable with and want to identify with Jewish piety). One was to buy food only from a man known to tithe and not accept hospitality unless his wife was trustworthy in tithing (*t. Demai* 3:9). If it was bad to eat the food of an *am ha'arets* (*m. Demai* 2:2–3; *y. Demai* 2:3), how much more that of a Gentile (*m. Demai* 3:4)!⁸⁶⁵ Similarly, some complained that Samaritan foods were unclean, treating them like pork;⁸⁶⁶ most would not have treated Samaritan food as being as impure as Gentile food.⁸⁶⁷

Some scholars object that reciprocity requirements for hospitality would have required eating with Gentiles,⁸⁶⁸ but Gentiles clearly thought that Jews isolated themselves (*Tac. Hist.* 5.5). Undoubtedly, many Jews did eat with Gentiles; but also undoubtedly, many did not. Judean Jews held more conservative scruples on the matter than did many of their Diaspora cousins, and the believers in Jerusalem were religiously strict, not lax. Even strict Jews might eat with Gentiles if they took

861. Cf. Matson, *Conversion Narratives*, 114–15.

862. With most commentators, e.g., Lake and Cadbury, *Commentary*, 125; Bruce, *Acts*¹, 230; Haenchen, *Acts*, 354, 362; Dunn, *Acts*, 148. If news had preceded Peter's arrival, it was table fellowship over the period of several days (Jews at a notable Gentile's home) that might have been most obvious to travelers in Caesarea.

863. The problems that Gentile inclusion created for purity practices constitute a major issue in Acts 10–11 (with, e.g., Steffek, "Juifs et païens"). Table fellowship and inclusion are issues more intelligible today in some cultural settings (such as some Asian cultures) than in others (such as in much of the West; see, e.g., Yao, "Barriers," 33–35).

864. Cf. discussion in Barrett, *Acts*, 533.

865. On strictness for *haberim*, see, e.g., *b. Bek.* 30b, bar.; further comment on Acts 10:28.

866. See, e.g., *m. Šeb.* 8:10; *y. 'Abod. Zar.* 5:11, §2; see discussion in Keener, *John*, 600.

867. See *t. Demai* 5:24; *b. 'Eruv.* 36b–37a; *y. 'Abod. Zar.* 5:4, §3.

868. Smith, *Symposium*, 161 (though he does acknowledge [163–65] meal separatism for foods).

the proper precautions (*m. 'Abod. Zar.* 4:9–5:10),⁸⁶⁹ but it is not clear that Peter concerned himself with precautions in view of his newfound acceptance of some uncircumcised believers. Even Diaspora Jews and Judeans writing for Diaspora audiences acknowledged that Israel's customs deliberately separated them from other nations.⁸⁷⁰

Some conservative Judeans suspected Diaspora Jews of idolatry because they attended Gentile banquets, though bringing their own food and drink (*t. 'Abod. Zar.* 4:6). They might emphasize that God caused Israel not to talk or have close contact with Gentiles, thereby arousing Gentiles' anger (*Pesiq. Rab Kah.* 19:2; 21:3). In earlier stories, only a small, particularly pious remnant refused to eat Gentile foods.⁸⁷¹ See further discussion on the question of separatism at Acts 10:28 (and of Gentile anti-Judaism at Acts 16:20).

Cornelius would not have served unclean food in the strictest sense (see comment on Acts 10:48),⁸⁷² but it may not have been tithed on (see comment on Acts 10:23, 48); as a God-fearer he surely would not have served idol food or provided the typical pagan after-dinner fare of prostitutes,⁸⁷³ but the Jerusalem church could not yet know these details. Yet a greater issue is at stake in this narrative. Treating Gentile adherents as full members of the covenant without their circumcision was far more outrageous and divisive within first-century Judaism than merely claiming to follow a particular messiah.⁸⁷⁴ Granted, the latter could bring one into political conflict (and indeed secure one's discipline or even execution from political authorities if the movement was deemed politically subversive), but the former was a matter of Jewish identity and had even further-reaching political implications about relationships between Jew and Gentile.⁸⁷⁵ Diaspora Jews presumably would not view eating with Gentiles as treating them as fellow members of the covenant, but it is not difficult to see how serious the offense would appear in Jerusalem.⁸⁷⁶ Throughout the Mediterranean world, eating together created a common bond of trust (*Xen. Cyr.* 8.7.14); it also allowed for settings of greater intimacy and dialogue (e.g., *Cic. Fam.* 1.2.3).⁸⁷⁷ Most threatening of all in this case was that it constituted an endorsement and a component of a friendship relationship.⁸⁷⁸ Eating with a representative of Rome might appear even more scandalous to some; friendship with a conqueror could constitute treason, inviting

869. Garland, *1 Corinthians*, 493 (following Cheung, *Idol Food*, 44).

870. E.g., *Let. Aris.* 138–42; *Philo Mos.* 1.278; *Jos. Ag. Ap.* 2.257.

871. So *Tob 1:10–13* (modeled after *Dan 1:8*); this is, however, an idealization, not necessarily social reality. *Tobit's* author was perhaps from ca. 200 B.C.E. western Syria (*Rost, Judaism*, 63) or, on the basis of the Aramaic fragments in the Qumran scrolls, as early as the fourth century B.C.E. (*Bright, History*, 432).

872. A major reason that many Jews avoided dining with Gentiles (see Sevenster, *Anti-Semitism*, 139). Cornelius has enough income (see comment on Acts 10:2) that he would not simply serve them from army rations (on which see Garnsey and Saller, *Empire*, 88–95); it is unlikely he depends on these anyway, given his house.

873. On this practice, see Winter, *Left Corinth*, 86–88.

874. Ravens, *Restoration*, 247–49.

875. Some could accept God-fearers as saved and righteous without circumcision (e.g., *Jos. Ant.* 20.41), but so far as we can tell, no one claimed that they were incorporated into God's people without circumcision (*Donaldson, Paul and Gentiles*, 58–59).

876. For table fellowship with Gentiles as a major issue in Acts, see Esler, *Community*, 71–109 (on Cornelius, 93–97; on the apostolic council, 97–99); cf. Blue, "Influence," 490–94; Dollar, *Exploration*, 178–79.

877. See also Derrett, *Audience*, 39 (citing most relevantly *1 En.* 62:14; *Rev* 3:20). See comment on Acts 1:4; also Keener, *John*, 912–13.

878. Winter, *Left Corinth*, 56. On friendship and patron-client relationships, see, e.g., Keener, "Friendship," 381–82; such relationships were often expressed in banquets (though peer friendships and dinner invitations were also common). If eating with the angel confirms Aseneth's conversion in *Joseph and Aseneth* (Lieber, "Table"), Peter's implicit acceptance of Cornelius here serves to confirm his (although baptism has done so more forcefully).

retaliation (Diod. Sic. 19.66.6).⁸⁷⁹ For fuller discussion of the ancient sources, see comment at Acts 10:23.

Luke has, however, prepared his own audience for the direction of the narrative with earlier narratives, such as Jesus and the disciples eating with “sinners” (Luke 5:29; 15:1)⁸⁸⁰ or Jesus telling his disciples to eat what was set before them (10:7).⁸⁸¹ Probably Luke was not alone in connecting the issues of table fellowship in Jesus’s ministry with table fellowship between Jewish and Gentile believers: Paul’s response to rupture in Jewish-Gentile table fellowship may presuppose knowledge of the Jesus tradition about eating with “sinners” (Gal 2:12, 14–15).⁸⁸² What is ironic here is that the complaints about eating with sinners (attributed to Pharisees⁸⁸³ and scribes in Luke 5:30; 15:2) or, as here, “entering” as well as becoming a guest of a sinner (Luke 19:7) now appear in the mouths of apostles and other disciples. The Pharisees of the Gospel, ironically often vilified by subsequent Christian readers, become Luke’s prototype for the ethnocentric Christian church in Acts.⁸⁸⁴ Happily, Luke’s church is able to learn through its experience with the Spirit (Acts 11:12, 15–18).⁸⁸⁵

III. INTRODUCING PETER’S SPEECH (11:4)

The constructions in this summary sentence are, as we would expect, noticeably Lukan. Note the expressions for explaining (all four occurrences of ἐκτίθημι in the NT are in Acts, the other relevant ones being 18:26; 28:23) and the use of “orderly” (καθεξῆς; all five NT uses are in Luke-Acts, including Luke 1:3; 8:1; Acts 3:24; 18:23) and of “beginning” to speak (roughly half the NT uses; see Luke 1:64; 3:8; 4:21; 6:20; 7:15, 24, 49; 11:29; 12:1; 13:25–26; 20:9; 23:2, 30; Acts 11; 2:4; 4:31; 5:21; 9:20; 11:15; 13:5; 18:26; 24:2; 28:6; cf. Luke 5:21).⁸⁸⁶

Elsewhere καθεξῆς refers to traveling from one place to the next (Luke 8:1; Acts 18:23) or to those who spoke in succession (Acts 3:24), but here it refers to providing a point-by-point narrative (as in Luke 1:3).⁸⁸⁷ The term indicates not chronology necessarily (although Luke follows Mark’s sequence closely at most points in the Gospel) but clarity of logical arrangement;⁸⁸⁸ it was appropriate for

879. Such strictures would not have applied to Agrippa or others who had regular interaction with Diaspora Gentiles. But Peter leads a minority Judean religious movement that cannot afford to give conservative opponents grounds for criticism.

880. On these, see, e.g., Smith, “Fellowship”; Grassi, *Laugh*, 48–56; Just, *Luke*, 28. These stories are not simply Luke’s invention (cf., e.g., Mark 2:15; Q material in Matt 11:19 = Luke 7:34); for Jesus’s opposition to Pharisaic regulations on purity, including regarding table fellowship, see Borg, *Conflict*, 73–121. On meals in Luke-Acts (including those welcoming Gentiles) foreshadowing the messianic banquet, see Heil, *Meal Scenes*, esp. 312.

881. See Matson, *Conversion Narratives*, 47–48. Peter’s recent speech also reiterates the theme of eating with Jesus (Acts 10:41).

882. See Dunn, *Theology of Paul*, 192.

883. Table fellowship was a major issue of pre-70 C.E. Pharisaism (Goodman, *State*, 77). This is not to claim that Pharisees intended to follow a priestly level of purity (against which see Sanders, *Jesus to Mishnah*, 131–254).

884. Nor is this portrayal Luke’s invention, though he makes artistic use of it. Receiving uncircumcised Gentiles as equal members (e.g., Gal 3:26–29; Rev 5:9–10) was radical enough that many early Jewish Christians would surely have resisted it, as Paul’s letters also testify (e.g., Gal 4:17; 5:12; 6:12; Phil 3:2–3). The issue of table fellowship also recurred on other occasions (Gal 2:11–14).

885. For Christian opposition to God’s work in Acts (here and in Acts 15:1–5) as one form of Luke’s opposition theme, see Rapske, “Opposition,” 239–45.

886. Though the use of infinitive often changes in Acts from the more generic λέγειν preferred in the Gospel, the construction remains.

887. See discussion in the commentary introduction, Keener, *Acts*, 1:96, 135. A specific connection of the term to halakic dispute (Le Cornu, *Acts*, 609, tentatively) appears tenuous, although a sort of halakic dispute is what we have here.

888. Parsons, “*Progymnasmata*,” 52 (citing, for the importance of such arrangement, Theon *Progymn.* 87.13; Quint. *Inst.* 4.2.83; and contrasting emphasis on exact sequence in *Rhet. Alex.* 30.28–31; *Rhet. Her.* 1.9.15).

historiography.⁸⁸⁹ Thus Peter's interpretation of the previous events, reported in Acts 11:5–17, is also Luke's, and the climactic response of the audience (11:18) is the appropriate one.

b. Peter's Narration of Divine Confirmations (11:5–15)

Most of Peter's speech is narration, apart from the one summary of narration turned into an argument in 11:17, but this one argument is compelling to a church for whom the experience of the Spirit is a fundamental key to its identity. Not all claims to speak by the Spirit would be received as equally certain (cf. 1 Cor 14:29; 1 John 4:1–3), but for his audience, Peter's integrity is unquestioned, his apostolic sensitivity to the Spirit demonstrated, and his cumulative evidence for the Spirit's involvement utterly compelling.

I. INTRODUCTION

Most scholars rightly recognize this speech as primarily judicial; although Peter is not on trial per se, he is answering charges. He does not address, however, the explicit charge of eating with Gentiles but appeals instead to the more fundamental issue that dictated his actions; his vision was about foods but ultimately symbolized the welcome of Gentiles who had received the Spirit.⁸⁹⁰ Johnson and others structure the speech according to forensic conventions (citing Plato *Phaedr.* 266DE; Arist. *Rhet.* 1354b):

- Peter (or Luke, who condenses speeches) omits the *prooemium* and moves directly into the *narratio* (διήγησις).
- He includes proofs, a *probatio*: witnesses (Acts 11:12) and signs (11:15).
- The *peroratio* is noticeably brief, “taking the form of a rhetorical question (11:17).”⁸⁹¹

I would adjust this outline: the witnesses (11:12) and signs (11:15) remain part of the *narratio* (narration and proofs could be mixed, or the former could anticipate the latter), with 11:16 being a proof from authoritative citations. In any case, the dominance of the narration here fits the “point-by-point” narrative method (11:4) that Luke follows as central to the nature of his own work (Luke 1:3).⁸⁹²

As was appropriate in forensic rhetoric, Peter defends his actions “through *narration* that transfers the responsibility for Peter's actions to God (metastasis).”⁸⁹³ Attributing one's actions “to dreams and oracles” was a potent method for “justifying motives” and of self-legitimation in ancient sources.⁸⁹⁴ The emphasis on narrative also fits what we know about reporting ambassadorial missions (relevant especially in Acts 11:12–16). At least some rhetoricians claimed that speeches reporting embassies

889. Cf. Polyb. 38.5; BDAG.

890. See Smith, “Refutation,” who points out that in rhetoric one need not respond to irrelevant accusations and hence contends that Peter addresses only the real issue here.

891. Johnson, *Acts*, 200; also Witherington, *Acts*, 363 (following him); Parsons, *Acts*, 157. Marguerat, *Actes*, 400, sees Acts 11:5–10 as the *exordium* (including a *propositio*), 11–14 as the *narratio*, and 15–17 as the *probatio*. Luke's divisions are not clear (because Peter was not a rhetor, because Luke condenses, and/or because real speeches tended to be more flexible).

892. Johnson, *Acts*, 200.

893. Soards, *Speeches*, 77. But cf. Smith, “Function of Refutation,” 113 (arguing against Kennedy, *NT Interpretation*, 113n25): Peter does not transfer responsibility for the basic charge but ignores it, which is (113, 115) the appropriate response to arguments not worth refuting.

894. Brawley, *Luke-Acts and Jews*, 60 (citing Plato *Apol.* 33C; Philost. *Vit. Apoll.* 4.34; Lucian *Alex.* 22–24; Jos. *Ag. Ap.* 2.161–62).

would be almost entirely narrative and that the narrator, by virtue of being the one to recount the events, can show that he was not the reason the embassy failed or, if successful, that he was the reason for the success (*Rhet. Alex.* 30, 1438a.6–19). Peter lacks political motives to credit himself with the mission's success but credits God with its success and does exonerate himself from blame.⁸⁹⁵

The primary function of the changes in Acts 11:5–17 is “to add variety and interest,”⁸⁹⁶ and this retelling follows the same basic structure as other retellings in Luke-Acts (e.g., Luke 24:33–35; Acts 4:23–31).⁸⁹⁷ Some changes fit proper rhetorical method by taking into account the new intradiegetic narrator (Peter) and his particular rhetorical situation.⁸⁹⁸ Individual verses are commented on here only briefly because most comments would differ little from the comments made in more detail on the descriptions in Acts 10 that they summarize.

II. PETER'S VISION (11:5–10)

Peter's vision constitutes less than a quarter of the entire section (10:1–11:18) but is central to Peter's strategic retelling of the events, where it constitutes roughly half the speech. This vision is foundational for Peter's apologetic point: the events reflect “God's initiative and not that of Peter.”⁸⁹⁹

In 11:5, Peter begins by emphasizing that he was in prayer (10:9); Luke understands that this is a favorable time for revelations (10:30; 13:2; 22:17), though God can also grant them even during sleep (2:17; 16:9; 18:9). God's revelation was trustworthy, and Peter would not be misled during prayer (cf. 6:4). That the sheet “came to me” means that it came uninvited by Peter and was solely dependent on God's activity. The term for “descending” here is particularly Lukan in the NT (Luke 5:19; Acts 9:25; 10:11; 11:5). On the events in Acts 11:5, see comment on Acts 10:9–11 (Peter's prayer and trance in 10:9; the sheet and object descending in 10:11). On the events in 11:6, see comment on Acts 10:12; here Peter adds *θηρία*, but as part of a summary it does not differ substantially from the summary in 10:12.

God speaks in 11:7. Even if staying with a tanner (9:43; 10:6, 32) and Peter's hunger (10:10) might possibly have been factors suggesting components for the vision, Peter (insofar as we may infer anything from Luke's obviously terse summary) follows the good rhetorical principle of emphasizing only what is relevant for his point to his audience. That Peter should eat emphasizes God's command to surmount earlier food laws, at least under the special conditions soon in view.

Peter recounts his objection in 11:8. Although Luke omitted Mark 7:1–23, he includes in his Gospel plenty of examples of Jesus violating traditional mores. Still, the command to Peter goes beyond anything he has been asked to do before in terms of uncleanness; it goes even beyond the call to Ezekiel.

Judicial speeches often return charges against the accusers (see comment on Acts 7:51–53; 24:18–19), but Peter is self-effacing, showing that he himself previously

895. Gregory the Great *Letters* 45 (Martin, *Acts*, 142–43) viewed Peter as humble because he reasoned with them instead of ordering them. But Peter likely did not possess as much centralized authority as Gregory in his office would assume.

896. Maloney, *Narration of Works*, 67.

897. *Ibid.*, 67–100. Drama often would recount events seen by speakers to avoid staging limitations (Nünlist, “Teichoscopy,” noting earlier origins in Homeric epic), but these considerations are irrelevant to Luke's narrative.

898. See Kurz, “Effects of Variant Narrators”; on adaptation for the Jewish audience, cf. Scott, “Cornelius Incident”; on literary artistry in the changes, see Witherup, “Cornelius Over Again.” The claim that the story's repetition “is Luke's rather clumsy, Semitic way of stressing the event” (C. Williams, *Acts*, 140) reflects insufficient familiarity with Greco-Roman rhetoric. Verbatim repetition is more common in Mesopotamian sources (Heidel, *Genesis*, 7n1; cf. Gen 41:1–8, 17–24) and sometimes Homer.

899. Maloney, *Narration of Works*, 69.

held the views of the “circumcisionists” (Acts 11:2, 8, 17; cf. 22:3–5). He identifies with his hearers instead of condemning them; his agenda is to persuade the whole church, not to split it into factions.

Peter again mentions the voice in 11:9, this time clarifying that the voice is “from heaven.” (On the voice from heaven, analogous to the later rabbinic *bat qol*, see comment on Acts 9:4.) The threefold repetition in 11:10 (also 10:16) provides additional confirmation and emphasis (cf. Gen 41:32), just as the complementary visions of Peter and Cornelius (Acts 11:13–14) do. Two or three witnesses were required under biblical law for confirmation (Deut 17:6; 19:15; cf. Num 35:30). Peter missed the opportunity to eat visionary food⁹⁰⁰ but was ready to catch the main point.

III. THE SPIRIT AND UNEXPECTED GUESTS (11:11–12)

The arrival of the Gentile messengers at the very completion of Peter's vision suggests timing too improbable for coincidence, the sort of event in which early Christians would see divine coordination (cf. Acts 8:27–33; 21:32; 23:16; 27:26).

Peter's mention of the Holy Spirit (cf. 10:19) would weigh heavily with early Christians (1:5, 8; 2:17–18, 38; 5:32; 6:3, 5, 10); even later rabbinic Judaism valued the testimony of the Holy Spirit (the prophetic Spirit that inspired Scripture) more highly than a *bat qol* (11:9),⁹⁰¹ although it generally denied that the prophetic Spirit was inspiring prophets in its own era.⁹⁰² Appeals to divine sanction for authority constituted a long-standing tradition in rhetoric (e.g., Isoc. *Nic.* 13 [*Or.* 3.29]). An act could not be condemned—even a wife's pregnancy by one other than her husband—if it was from a god (Ps-Callisth. *Alex.* 1.9). In Acts, resisting the Spirit (Acts 7:51; cf. 5:32) is tantamount to rebellion against God.

Nevertheless, we miss how shocking this narrative would have been in a first-century Jewish context and perhaps even to God-fearing Gentile believers in Luke's day: a Galilean fisherman claims, on the basis of “a dream and his interpretation of it,” that God has reversed one thousand years of teaching from Scripture.⁹⁰³ Had not Jesus in the flesh called and authorized Peter, his revelation might not have carried so much weight (i.e., Philip or Paul alone could not have carried the brunt of such an argument, and probably only Paul would have even tried).

“These six brothers” emphasizes that Peter's witnesses are present.⁹⁰⁴ This is the first time Luke tells us how many accompanied Peter. Two or three witnesses were required under biblical law for confirmation (Deut 17:6; 19:15), and Peter has twice the maximum number required. That, along with Peter, the Jewish entourage consists of seven men may be significant (cf. Acts 6:3, a group that also prefigures the Gentile mission),⁹⁰⁵ but Luke makes nothing explicit of it. That they “entered the house” in obedience to the Spirit's command to go with the messengers answers the first part of the charge in 11:3 (they entered to the uncircumcised).

900. By which I mean not heavenly food (cf. Ps 78:25) but simply to appear to eat in a visionary state.

901. E.g., *Song Rab.* 8:9, §3; see comment on Acts 9:4.

902. E.g., 1 Macc 9:27; Jos. *Ag. Ap.* 1.41; Best, “Pneuma,” 222–25; Aune, “Προφήτης”; see Keener, *Spirit*, 13–19; idem, *Acts*, 1:890–92.

903. Walaskay, *Acts*, 107. This would appear to epitomize charismatic audacity.

904. Johnson, *Acts*, 198, thinks that the demonstrative pronoun also indicates that other circumcisionists were participants along with Peter. This claim seems unclear but, if accurate, could respond to the singular verbs in the accusation (Acts 11:3).

905. See comments there. Cf. the tradition of seven judges per city (Jos. *Ant.* 4.214), though this may be an average. Bede *Comm. Acts* 11.12 notes the total of seven yet implausibly allegorizes (for the sevenfold gifts of the Spirit or the days of creation).

IV. CORNELIUS'S VISION (11:13–14)

Whether or not Cornelius was “cleansed” before Peter’s coming (cf. 10:28; but 15:9 suggests that this occurred after or else that there were two levels of cleansing), Cornelius would be converted only through Peter’s preaching. Presumably the “salvation”⁹⁰⁶ referred to here includes eternal life (Luke 13:23; 18:26; Acts 2:21, 40; 4:12; 16:30–31; for “eternal life,” Luke 10:25; 18:18, 30; Acts 13:46, 48), which could be described in the present tense (Acts 2:47). Instead of focusing on ambiguous language about cleanness at this point, Peter is explicit that the Gentiles were lost but are given eternal life, like Zacchaeus or others the disciples knew about (Luke 19:10); his case ultimately proves persuasive, since his hearers accept that Cornelius’s household experienced the repentance leading to life (Acts 11:18).

For Luke’s purposes, it is most significant that this claim about salvation (like Peter’s words again in 15:11) contradicts that of the circumcisionists, who require circumcision for salvation in 15:1. The promise of household conversion here resembles that in 16:31; it is not explicit in Acts 10 but could easily be presupposed in 10:24, 27 and simply omitted through Luke’s abbreviation technique. As in 16:31, the gospel’s proclamation to the household makes possible their response. Since the larger number of Gentiles (with its correspondingly greater risk of some having contact with idolatry) may have compounded the apparent offense of Peter eating there, mentioning that God commanded the entire household to be present simplifies his defense. For household conversions, see comment on Acts 10:2, 24; especially 16:31–34.

V. BAPTIZED IN THE SPIRIT (11:15)

Luke’s use of “began” with speaking is usually idiomatic (see comment on Acts 11:4) but here might reflect the fact that Peter had barely finished his *narratio* (10:36–42) and was only beginning his *probatio* (10:43) when interrupted by the Spirit’s vindicating activity. This characterizes some other speeches in Acts; in 22:22, Paul is interrupted during his lengthy *narratio*. But for Luke as a writer of narrative, narrative was the most important component to emphasize, best able to hold the attention of his ideal audience. (This was not, however, a standard characteristic of speeches in histories, and it may reflect Luke’s own idiosyncrasy or his view of the centrality of narrative as exemplified in the kerygma.)

“As on us at the *beginning*” refers to the “beginning” of their life as a community of believers in 2:1–4; “at the beginning” appears occasionally as an idiom (Phil 4:15; Dan 9:23).⁹⁰⁷ That Cornelius’s household and friends experienced the gift of the Holy Spirit “even as” (ὡσπερ) the Jewish believers had (Acts 10:47; 11:15, 17) refers to the one sign from Pentecost that is repeated—namely, tongues (2:4; 10:46; on the function of tongues as a frequent sign of the Spirit’s empowerment for inspired cross-cultural evangelism in Acts, see comment on Acts 2:4). “As on us at the beginning” might also echo the suddenness of the Pentecost narrative (2:2), emphasizing divine initiative.⁹⁰⁸

906. “Salvation” is here Peter’s language, not Cornelius’s; it might relate to members of his conservative audience skeptical of Cornelius’s previous salvation and seems to be maintained in Acts 15:9 by the same speaker for a similar audience.

907. Cf. more commonly “from the beginning” (e.g., Acts 26:4; Luke 1:2; John 15:27; 1 John 2:7, 24; 3:11; 2 John 5–6; Josh 24:2; Isa 1:26; Ezek 16:55). Diod. Sic. 4.8.5 seeks to recount Heracles’s acts “from the beginning” (ἀπ’ ἀρχῆς), i.e., starting with the first act; cf. Proclus *Poet. S.*, K43.26. The phrase often signifies the beginning of the period in question (*Test. Ab.* 15:14 A; 4:13 B). Luke might view Pentecost theologically as the “beginning” of the church (Goulder, *Type and History*, 162), but it may simply be idiomatic. Moessner, “Arrangement,” 163, notes this connection to Pentecost in Acts 11:15, followed by a connection with 1:4–8 in 11:16, hence with the pivotal transition between volumes.

908. Stanton, *Jesus of Nazareth*, 23.

c. *Obeying the Spirit (11:16–17)*

Peter's clinching (and only explicit) argument flows directly from the final point narrated, namely, the Spirit falling on the Gentiles (11:15), although all the Spirit's revelation in 11:5–14 also supports his argument. Using Jesus's "word" in a manner equal to using Scripture (11:16), Peter shows that God confirmed these Gentiles' acceptance in the very way God confirmed Jesus's followers as his people at Pentecost (11:17). If God granted them the greater baptism in the Spirit, Peter could hardly withhold the lesser baptism in water (see comment on Acts 10:47); and if this was the case, then they belonged to God's people, with whom eating constituted no scandal.

I. JESUS'S PROMISE (11:16)

In Israel's Scriptures, "word of the Lord" (11:16) was regularly the prophetic message (well more than two hundred times); in Acts it is often the inspired, prophetic gospel message about Jesus (e.g., 8:25; 12:24; 13:48). Here it refers to a saying of Jesus before the resurrection, as in Luke 22:61 (cf. 1 Thess 4:15). That the phrase "YHWH's message" can be so readily transferred to "Jesus's message" reveals Luke's Christology (see comment on Acts 2:21).

Luke repeatedly refers back to one of his seminal Spirit texts, Luke 3:16, a text that summarizes Jesus's mission as the Spirit baptizer.⁹⁰⁹ Remembering Jesus's words afterward appears elsewhere in gospel sources (John 2:17; 12:16; see here esp. Luke 24:6–8). If the imperfect bears its usual force, Jesus apparently repeated John's promise of Spirit baptism regularly, and not only in Acts 1:5; the Gospels attribute it only to its first prophet, John (Luke 3:16; Mark 1:8; Matt 3:11; John 1:31–33). Possibly the quotation from Jesus here and in Acts 1:5 employs the passive, in contrast to John's way of putting it (Luke 3:16), because of ancient conventions of avoiding self-boasting (the messianic secret would be less relevant after the resurrection, i.e., in Acts 1:5).⁹¹⁰ Because Jesus's baptism in the Spirit is greater than John's water baptism, Peter could scarcely withhold water baptism from those who had already received the Spirit (10:47), and hence could not stand in God's way (11:17).⁹¹¹ Because baptism in Judaism could accompany conversion (see comment on Acts 2:38), God, who had baptized these Gentiles, clearly accepted their conversion without circumcision (cf. the complaint of 11:3). He had also given them the reality of the covenant of which circumcision was merely an outward sign.

II. PETER ACCEPTED GOD'S CONFIRMATION (11:17)

Here Luke emphasizes the identity of the gift of the Spirit (on which see comment on Acts 10:45) given to the Gentiles with that given to Israel, by employing the term ἴσος, "equal" (cf. Luke 6:34, his only other usage). The term applied, for example, to equal treatment of others (e.g., 2 Macc 9:15; 1 Clem. 21.7; Ign. Phil. 4.2). Although it had a much wider range of usage, the use in friendship texts might be significant for Luke's larger vision of an international, multicultural movement under Jesus's lordship. On equality, see more extended comment at Acts 2:44–45.⁹¹²

909. On Luke's repeated reference to Luke 3:16 in Luke-Acts, see the detailed treatment in Bock, *Theology*, 213–18.

910. On avoiding self-boasting, see Thucyd. 1.86.1; 3.61.1; Dion. Hal. *Isaeus* 10–11; *Ant. rom.* 1.1.1; Publ. Syr. 597; Cic. *Ag. Caec.* 11.36; *Fam.* 5.12.8; Val. Max. 4.1.6a; 7.2.ext. 11b; Quint. *Inst.* 11.1.15–21; Plut. *Praising* 19, *Mor.* 546F; *Alex.* 23.4; *Cic.* 24.1–2; *M. Cato* 14.2; 19.5; *Comparison of Aristides and Marcus Cato* 5.2; Philost. *Vit. soph.* 2.27.616; Prov 27:2; Jos. *Ant.* 19.318; *Ag. Ap.* 2.135–36; *'Abot R. Nat.* 22, §46 B.

911. Cf. similarly Johnson, *Acts*, 198, connecting Acts 11:16 and 11:17.

912. Cf., e.g., Xen. *Cyr.* 1.3.18; Dion. Hal. *Ant. rom.* 10.1.2; Dio Chrys. *Or.* 45.2; Pliny *Ep.* 1.8.4–6; 7.4.10; 9.15; Marc. Aur. 1.14; Diog. Laert. 8.1.10; Jambl. *V.P.* 30.167; Erskine, *Stoa*, 118–22; briefly, Keener, *Corinthians*, 205–6.

For Peter, as apostle to Israel (Gal 2:7–8), to advocate the Gentile mission carries more weight with the hearers than would that of one evangelizing only Gentiles (cf. Acts 8:14–16; 15:13–21). Rhetorical invention included using characters in the most appropriate ways; for example, because an old man is normally viewed as cautious, if he takes “a hard line,” it “carries more weight” than it would with “a younger, more impetuous speaker.”⁹¹³ Peter’s claims for a mission to the Gentiles similarly carry special weight in the narrative.

“Hinder” becomes a significant though rare term in Acts (8:36; 28:31); that Peter repeats the same term as in 10:47 reinforces its force here.⁹¹⁴ The believers with Peter would not “stand against” the Gentiles’ baptism (10:47), for Peter could not “stand against” God’s purpose (here). Ancient orators sometimes used appeals to divine authority in their proofs.⁹¹⁵ Ancient stories sometimes reflect the theme that fate could not be resisted; attempts to evade it were often thwarted, and sometimes fate was fulfilled by the attempt.⁹¹⁶ Jewish people also believed that God’s purposes could not be thwarted (1 Kgs 22:30–34; cf. Acts 26:14). Thus Peter’s argument at this point resembles the broader rhetorical category of an argument from necessity.⁹¹⁷

d. Accepting Gentiles’ Salvation (11:18)

The temporary silence after hearing Peter means that there were no objections. The silence in Acts 11:18 is analogous to that in 21:14 (cf. 15:12; much less so in 22:2, which is *before* a speech about God’s will), both times in response to persuasion about God’s will, persuasion that silenced the hearers’ objections. Silence could characterize respectful attention to another’s speech.⁹¹⁸ More relevant here is that a compelling argument could silence opposition⁹¹⁹ and opponents could be shamed into “silence.”⁹²⁰ Given their own experience, Peter’s appeal to the cumulative acts of the Spirit in his account invited their submission. Jesus likewise silences his (generally more hostile) interlocutors in Luke’s Gospel (Luke 14:4; 20:26).

Luke likes to recount people’s recognition of God’s works and hence that, as here, they “glorified” God (Luke 2:20; 5:25–26; 7:16; 13:13; 17:15; 18:43; 23:47; Acts

913. Heath, “Invention,” 91 (cf. 1 Kgs 12:7–11); cf. 92: but “open invective” could present an old man as “malicious and vindictive.”

914. One might “imitate” one’s own statement for rhetorical effect, but in a speech, not in a narrative per se (Anderson, *Glossary*, 77, citing Demetr. *Style* 226); cf. John 13:10–11. Within Peter’s speech here, this statement might function like epiphonema (ἐπιφώνημα), an exclamatory conclusion to an argument (cf. Rowe, “Style,” 148), if the rhetorical question bears exclamatory force.

915. See Black, *Rhetoric of Gospel*, 128. Sometimes a religious figure could depend especially on this appeal; thus a priest climaxes his case by claiming that the deity commanded him to do it (a sort of argument from necessity), while calling the deity to witness (Quint. *Decl.* 323.20).

916. E.g., Apollod. *Bib.* 3.5.7; Babr. 136; Lucian *Z. Cat.* 12; see comment on Acts 2:23.

917. On which see Anderson, *Glossary*, 17; Hermog. *Issues* 77.6–78.21; Aphth. *Progymn.* 7, “On Commonplace,” 35S, 20R; Nicolaus *Progymn.* 7, “On Commonplace,” 44; for examples, see 2 Cor 12:1, 11; Quint. *Inst.* 11.1.18; Dio Chrys. *Or.* 3.91; Fronto *Eloq.* 1.12.

918. E.g., Hom. *Il.* 19.255–56; Virg. *Aen.* 11.241, 300; cf. Pliny *Ep.* 2.18.2; Tac. *Hist.* 3.20; the appropriate state of a courtroom in Char. *Chaer.* 5.4.9. Silence was necessary before the true God, whether in shame or in awe (Isa 41:1; Jer 8:14; Lam 2:10; 3:28; Hab 2:20; 4Q405 20 II + 21–22 13; among Gentiles, cf. Virg. *Aen.* 10.100–103; Diog. Laert. 8.1.33; Porph. *Marc.* 16.278–79); for awe of a mortal, Char. *Chaer.* 5.5.9. See further comments on silence at Acts 12:17; 15:12; 19:33–35; 22:2.

919. E.g., Xen. *Hell.* 6.3.10; Cyr. 5.5.21; Demosth. *Cor.* 112; Plut. *Cic.* 12.5; Aul. Gel. 1.2.13; Lucian *Phil. Sale* 22; Char. *Chaer.* 8.2.12; Eunapius *Lives* 497–98; for *perplexed* silence, see Libanius *Narration* 7.2. Better to remain silent when one might not be able to make one’s case (Isoc. *Demon.* 41; Philost. *Ep. Apoll.* 81–82 [Stob. *Flor.* 33.12; 36.28]).

920. Arrian *Alex.* 7.8.3; 7.11.2; Neh 5:8; Jos. *Life* 298–99; Tg. *Ps.-J.* on Deut 28:15. Or from grief (Arrian *Alex.* 7.14.8; Ach. Tat. 1.13.1; Jos. *Ant.* 6.337); cf. dread or apprehension in Xen. *Cyr.* 7.1.25; Tac. *Hist.* 3.67; Appian *Hist. rom.* 6.4.18.

13:48; 21:20; cf. 4:15).⁹²¹ That people “glorified God” on account of miracles serves an apologetic purpose (cf. Acts 4:21): it is difficult to charge Jesus or the apostles with misleading people if the result of their actions is God’s honor.⁹²²

The claim of Peter’s hearers that God had “granted repentance even to the Gentiles” for life contrasts with the apostles’ claim in 5:31 that God had granted repentance to *Israel*.⁹²³ This expression, “grant repentance” (idiomatically using δίδωμι with μετάνοια), appears in the LXX only in Wis 12:10, 19, where God mercifully gave Israel repentance (cf. 12:18–19) and allowed it to Canaan but with the knowledge that the Canaanites would never avail themselves of repentance (cf. 12:3–11).⁹²⁴

“Even to the Gentiles” (reading καί here as “even”)⁹²⁵ reflects their surprise (albeit a *pleasant* surprise, since they were glorifying God for it). Surely they are not surprised that Gentiles who become proselytes (cf. Acts 2:11; 6:5) can be saved; they are referring instead to uncircumcised Gentiles. Yet most Jewish views reported in our sources allowed some Gentiles to be saved from eschatological destruction without circumcision; why then were the disciples surprised?

Four reasons (which are not mutually exclusive) are possible. One is that the disciples were expecting the Gentiles to be drawn by Israel’s exaltation (a possible reading of Isaiah) and therefore they were not expecting such an event before they had finished leading Israel to God.⁹²⁶ Second, the early Christians, like the Qumran documents, may have been more conservative in their soteriology than most mainstream Jews; like the sectarian documents from Qumran, they did not believe that even most Jews were saved, and so they naturally might prove more skeptical than most of their contemporaries that Gentiles would be.⁹²⁷ Third, it is possible that they mean salvation of Gentiles in a broader sense. Finally, Luke sometimes simplifies Jewish controversies, especially making circumcision a matter of “salvation” in Acts 15:1 whereas Paul presents it as a matter of belonging to the covenant (Gal 2:12; 5:3; 6:13; esp. Paul’s central argument in 3:6–4:31). (For later rabbinic Judaism at least, this would signify confusion between the categories of righteous Gentiles, who could be saved, and proselytes, who could enter the covenant.) Merely allowing their salvation and cleanness for table fellowship does not settle their inclusion in the people of God; even Acts 15:20 does not necessarily accomplish this (at least not from the standpoint of the conservative Jerusalem faction). (Paul’s arguments might carry the future for Diaspora believers but probably never convinced all of the Jerusalem church.)

For the ancient meaning of repentance, see comment on Acts 2:38. “Life” is shorthand for “eternal life” (Luke 10:25; 18:18, 30; Acts 13:46, 48; in the shorthand form,

921. Luke may have initially borrowed the phrase from tradition (Mark 2:12; cf. Matt 9:8; 15:31), but he used it characteristically thereafter. It was appropriate as a response to divine works (e.g., *Test. Ab.* 15:5; 18:11 A; 14:8 B; *Test. Sol.* 5:13).

922. For “glorifying” as “honoring,” see Keener, *John*, 885–86.

923. Other than in these two verses, the exact expression “grant repentance” appears only in 2 Tim 2:25 in the NT, though Rom 2:4 conveys the idea: even human ability to repent reflects God’s mercy. (The terms do appear together later in *1 Clem.* 7.5; *Barn.* 16.9; *Herm.* 22.3; 72.2; 77.1; cf. 31.5.) But the two references in Acts explicitly mention Israel and the Gentiles.

924. Cf. 2 Tim 2:25; *Barn.* 16.9; *Herm.* 22.3; 72.2; 77.1; “give space for repentance” in Wis 12:10; *1 Clem.* 7.5. For the idiom “give repentance,” cf. also *Jos. Ant.* 20.178; giving time for repentance in *War* 3.127; *Philo Alleg. Interp.* 3.106; the idea in Rom 2:4.

925. As in, e.g., *Diod. Sic.* 10.24.2, honoring the bravery “even if” (καὶ, the crasis of καί with εἴν) it was that of women.

926. Skarsaune, *Shadow*, 165–66.

927. For Qumran attitudes toward Gentiles, see, e.g., Wise, “General Introduction,” 264. Sanders, *Jesus and Judaism*, 213–17, argues that the Scrolls’ “narrow soteriology” is “unrepresentative” (p. 217).

see Acts 5:20; cf. 2:28; 3:15).⁹²⁸ Greeks and Romans could imagine a long life without perpetual youth (as in the case of the Sibyl),⁹²⁹ but this differs appreciably from the Jewish emphasis on the transformed, immortal life of the resurrection. “Eternal life” occasionally appears in Hellenistic sources,⁹³⁰ but it is rare in Gentile circles in this period.⁹³¹ The vast majority of its occurrences are in Jewish sources, beginning with Dan 12:2, where it refers to the life inherited at the resurrection of the dead; at that time the righteous would be “raised up to eternal life.”⁹³² Jewish sources often speak of “the life of the world to come” (חיי העולם הבא), or “life of the age” (“eternal life”),⁹³³ often abbreviating it to “life”⁹³⁴ as in John’s Gospel. Thus the righteous are preserved for the life of the coming world at death,⁹³⁵ or (in more Hellenistic sources) the righteous dead currently “live out the age of blessing.”⁹³⁶ Most early Christian literature also employs “life” as the “life of the coming age.”⁹³⁷

928. I earlier used the following material on eternal life in Keener, *John*, 328–29.

929. Ovid *Metam.* 14.136–44 (she would live a thousand years, Ovid. *Metam.* 14.144, 146); cf. Aul. Gel. 2.16.10. A more helpful Hellenistic analogy would be “immortality” (cf. 1 Cor 15:53–54), although, to some Greeks, this would connote apotheosis.

930. E.g., Plutarch employs it to describe God’s character (τῆς αἰωνίου ζωῆς, *Isis* 1, *Mor.* 351E).

931. Dodd, *Interpretation*, 144–50.

932. *Pss. Sol.* 3:12, using the full expression; 4 Macc 15:3; *Test. Ash.* 5:2; 6:6; 2 *En.* 65:10.

933. E.g., *m. Ab.* 2:7, attributed to Hillel; *b. Ber.* 28b; *Lev. Rab.* 13:2; *CIJ* 1:422, §569 (Hebrew funerary inscription from Italy); 1:474, §661 (sixth-century Hebrew inscription from Spain); 2:443, §1536 (Semitic letters, from Egypt); cf. Abrahams, *Studies* (1), 168–70; Philo *Flight* 77. The usage in 1 *En.* 10:5, 10, 12 (cf. 15:6; 25:6) and *Jub.* 5:10 (cf. 30:20) is more restrictive, perhaps figurative; the Similitudes, however, seem to follow the ordinary usage (1 *En.* 37:4; 40:9; 58:3, 6), and the circles from which 1 *Enoch* and *Jubilees* derive probably used “long duration” language to represent eternity as well (CD VII, 5–6; cf. Sir 18:10); for “eternal life” in the Scrolls, see also 4Q181 (Vermees, *Scrolls*, 251–52); Coetzee, “Life,” 48–66; Charlesworth, “Comparison,” 414; it is conditional in 1 *En.* 15:4, 6. “Eternal” occurs with other nouns (e.g., Wis 10:14; 1QS II, 3) far more rarely.

934. Tob 12:9–10; Ladd, *Theology*, 255, also cites *Pss. Sol.* 14:7; 2 Macc 7:9–14; 4 *Ezra* 7:137; 14:22; see Manson, *Paul and John*, 112n1.

935. *Sipre Deut.* 305.3.2, 3.

936. 4 Macc 17:18, using a cognate of βίος rather than of ζωή. Cf. *Test. Ab.* 20:14 A.

937. Lake and Cadbury, *Commentary*, 159; Bultmann, *Theology*, 2:159; Ladd, *Theology*, 255–56. See, e.g., Mark 10:17, 30; Matt 25:46; Rom 2:7; 5:21; 6:22–23; Gal 6:8; 1 Tim 1:16; 6:12; Titus 1:2; 3:7; Jude 21; 2 *Clem.* 5.5; 8.4; Ign. *Eph.* 18.1; *Poly.* 2.3; *Mart. Pol.* 14.2; *Did.* 10.3; *Herm.* 7.2; 16.4; 24.5.

ANTIOCH REACHES GENTILES AND HELPS JERUSALEM (11:19–30)

The Jerusalem church's acceptance of Cornelius's conversion allows Luke to narrate the active evangelization of Gentiles in Antioch with the reader's assumption that this is something that the Jerusalem church would approve.¹ Some scholars even suggest that the process of reaching Gentiles probably began as soon as Hellenists left Jerusalem, and not just in Antioch.² Yet Antioch must have at least been the most prominent point of transition, where Jews in contact with Gentiles persuaded some to be God-fearers with faith in Jesus and eventually even accepted them into corporate table fellowship. It is important to Luke as the subsequent base for the Pauline Diaspora mission.

1. Introduction

Although we explore further details in the comments on the passage itself, some introductory observations are in order, both literary and historical.

a. Literary Observations

After introducing Saul in Acts 7:58, Luke alternates between narratives of Saul and the Jerusalem church. Acts 11:19–30 interrupts a larger section in which Peter predominates for the final time in Acts (9:32–12:24); Luke prepares for his focus on Barnabas and Saul as agents of Antioch's Diaspora mission (Acts 13–15). The interruption is obvious, since the section begins and ends with pivotal verses that bracket other material with a continuous story: 11:19 picks up where 8:4 leaves off; 11:30 leaves off where 12:25 will pick up. Together these verses bracket an important summary section about the mixed church in Antioch, offering our only brief survey of what must have been a dramatic locus of transition in the early Christian movement. Although Luke's narrative focuses on Paul, he is clear that Paul's mission to the Gentiles had historical precedent (even if his deliberate transgeographic program did not).³

1. In terms of narrative sequence, Antioch's success involves the logical unfolding of the mission after Cornelius (Rowe, *World*, 134). If the Jerusalem church would not have approved it but it would have been for the good of their movement, some Antioch Christians might have still viewed the mission as something similar to compliance with the Jerusalem church's will (Aul. Gel. 1.13). For one attempt to place Antioch's ministry in the larger development of mission in Acts, with an interest in models for adapting to contemporary cultures, see Niemandt, "Missional Church."

2. Hengel and Schwemer, *Between Damascus and Antioch*, 196.

3. In addition to Paul's deliberate missionary program and his earlier role in the Jerusalem church's leadership, his work may have been distinctive as an articulate voice in the battle for keeping the Gentile mission free from the requirement of circumcision (see Skarsaune, *Shadow*, 168).

The interruption is, however, relevant to its context: just as Hellenists pioneered carrying Jesus's message to the Diaspora (8:4–40), so now the Hellenist Jews reach Hellenist Gentiles (11:19–21), in continuity with Peter's public case in 11:1–18. The Jerusalem church, having accepted Peter's argument (11:18), confirms God's work in Antioch through Spirit-filled Barnabas (11:22–24) as it had confirmed God's work in Samaria through two agents of the Spirit, Peter and John (8:14–17). Barnabas thus becomes a link between the Jerusalem church and Paul's Gentile mission because he recruits Saul, called partly to the Gentiles (cf. 9:15), to help in the work (11:25–26). This Gentile-reaching Antioch church then reaches back to Jerusalem (in response to Jerusalemite prophets) to meet its need, through Barnabas and Saul (11:27–30). For Luke, Antioch becomes (and probably historically was, albeit less monolithically) the pivotal link between the church's heritage in Jerusalem and its mission in the Diaspora, including among Gentiles.

b. Historical Tradition

The majority of scholars see historical tradition behind 11:19–30.⁴ Even though Luke's emphasis is on Peter's breakthrough to the Gentiles (10:1–11:18), he fails to suppress the tradition that the full-scale, active Gentile mission stemmed from many dispersed Hellenists (8:4) rather than his heroes Peter or even Paul.⁵ Luke writes biographic history focusing on major characters; this makes his inclusion of summary material that does not fit this general pattern all the more likely to reflect information that is authentic, pre-Lukan, and probably was too widely known to ignore.

Chronological questions are more problematic. Because Luke follows Peter from 9:32 to 11:18, then returns to the Hellenist summary of 8:1 in 11:19, his arrangement in the section is as much biographic (and somewhat geographic) here as chronological (a tension all ancient historians had to straddle).⁶ Because Luke lacks clear chronological markers at this point, however (except that this evangelism began between Stephen's death and Agrippa I's persecution), we cannot say whether disciples in Antioch, such as Philip, may have preceded Peter's ministry to Cornelius's household.⁷ For Luke, it was important that theologically Peter's activity took precedence, and so this may be why the Cornelius story appears before this summary.⁸ Paul himself could easily be Luke's source for the events in Antioch, which would have been known to Paul from his later ministry there (11:26–30; 13:1);⁹ the ancient tradition that Luke himself was from Antioch is less likely, since "we" first appears in 16:10.¹⁰

4. So Witherington, *Acts*, 367.

5. Riesner, *Early Period*, 108–9.

6. E.g., sometimes Josephus explicitly follows a topic out of chronological sequence (*Ant.* 18.194); at other times, he does so without explicitly informing readers (e.g., he narrates an event from 33–34 C.E. in *Ant.* 18.106 yet noted Pilate's recall in 18.89).

7. E.g., Bruce, *Peter*, 26–27; Witherington, *Acts*, 368. Many attribute the specific arrangement of the accounts to distinct sources, which is plausible though not certain. The objection to a source that some raise—namely, that Luke fails to display sufficient concrete material (Conzelmann, *Acts*, 87)—is not compelling in view of his limited space, but oral tradition does seem most likely here (Barrett, *Acts*, 52–53).

8. If the Cornelius story preceded Antioch's Gentile mission historically, this would help explain the lack of reported resistance to the latter (Gaventa, *Acts*, 177); but Antioch's great distance might also help account for this.

9. Hengel and Schwemer, *Between Damascus and Antioch*, 19, reject any continuous Antiochene source (*pace* Jeremias's and Hengel's own earlier views), apart from simply Luke's notes.

10. With Witherington, *Acts*, 367, contrasting the Western text of Acts 11:28. His attribution (168) of some details to Luke's weeklong stay at Tyre (21:3–7) is less likely. One could allow that Luke omits the "we" here because he is not part of the action, but the tradition rests on conflating this Luke with the Lucius of 13:1; the name was common, and later Christian writers often conflated earlier figures who bore identical names.

New Testament scholars sometimes assign an inordinate amount of the early church's theological formation to this early period of the Antioch church.¹¹ This hypothesis is convenient precisely because so little is known about the Antioch church that it allows speculation a freer hand.¹² (Reading too much from Luke's partial silence about the church is also speculative,¹³ since, apart from Gal 2:11, Luke remains our most thorough source.) Bultmann, Bousset, and others argued that the son-deity's suffering and rising derived from mystery cults and Gnosticism,¹⁴ requiring an "acute 'Hellenization,' or more precisely a *syncretistic paganization of primitive Christianity*." Yet they assigned this apparently uncontrolled transformation of the movement's beliefs to a period when the Jerusalem apostles led the church in Jerusalem (Gal 1:19; 2:1, 9) and the Antioch leaders included Barnabas of Jerusalem and Paul (Acts 13:1; cf. Gal 2:11, 13), whose biblical argumentation probably betrays advanced, formal Jewish training in Scriptures.¹⁵

The one part of earliest Syrian Christianity attested for us belongs to Antioch,¹⁶ and most of this evidence involves the Pauline circle.¹⁷ It seems problematic for modern scholarship to construct a radically distinctive new form of Christianity in ancient Antioch, which somehow nevertheless was able to work with the Jerusalem pillars (Gal 2:9; quarreling over ethnic issues but not Christology, 2:11–14) and was, if anything, more willing to accommodate Jerusalem than Paul was (2:13). After extensive consideration, Hengel and Schwemer conclude, "We have no reason to regard the community in Antioch in the first roughly ten years of its existence as having been theologically far more creative than the other communities in Jerusalem, Syria or Cilicia."¹⁸

2. Hellenists Carry the Gospel to More Gentiles (11:19–26)

This passage shows the cross-cultural spread of the gospel, through Diaspora Jews to Gentiles in Antioch, and introduces Paul's ministry there. Luke thus connects Paul to

11. Donfried, *Thessalonica*, xxvi, thinks that much of Paul's distinctive theology reflects pre-Antiochene Palestinian influences (resembling Qumran), and argues against "pan-Antiochenism."

12. Cf. Hengel and Schwemer, *Between Damascus and Antioch*, 21–22.

13. E.g., Winter, "Antioch," believes that Luke is silent partly because he disapproves of the Antioch church elevating law observers over others (given the expectations of proselytes, this probably *did* happen in the early period; but Winter's article extrapolates too much from later Antiochene exegesis's Jewish elements). In view of the silence, however, we can only speculate. The argument that Luke wishes to focus on the journey to Rome is likely, however, in view of the text of Acts itself.

14. Despite the problems with dating now known; see Yamauchi, *Gnosticism*; Smith, *Gnostic Origins*; Keener, *John*, 164–69. For Gnosticism's debt to earlier Christianity, see Wilson, *Gnostic Problem*, 68, 256; Yamauchi, *Gnosticism*, 20; Burkitt, *Gnosis*, viii; Grant, *Gnosticism*, 13–14.

15. Hengel, *Son*, 18; Hengel and Schwemer, *Between Damascus and Antioch*, 260–61. Bultmann speculatively made very selective use of Acts and counted Paul's letters as evidence for this distinctive "Antiochene Christianity" (Hengel and Schwemer, *Between Damascus and Antioch*, 279, responding on 279–86). Hengel and Schwemer also refute (286–91) the speculative claims of Antiochene traditions in Paul; these "traditions" are likelier just Paul. "Pre-Pauline" phrases in Romans were probably recognized by the Roman Christians, too, and the common source is far likelier Jerusalem (which Paul mentions four times in Rom 15) than Antioch (287–88).

16. Hengel and Schwemer, *Between Damascus and Antioch*, 21–22. They also note that this part of Syria in the first century was oriented culturally toward Rome and the West (cf. Gal 1:21); the oft-cited orientation toward the east came after the addition of Edessa in the second century (22). (Lucian *Hist.* 24 proves particularly peeved when a historian places his native Edessa in Mesopotamia instead of Roman Syria.)

17. If later sources used Petrine tradition to "domesticate" the Pauline tradition, to bring it more in line with traditional Jewish Christianity (Brown and Meier, *Antioch and Rome*, *passim*), this pattern does not characterize Antioch in Acts.

18. Hengel and Schwemer, *Between Damascus and Antioch*, 286 (concluding 279–86).

the seminal spread of the movement to Gentiles (though he arrived after it began) and the time and location when the movement's detractors began to call them "Christians."

a. Transition in Antioch (11:19–21)

The Hellenist believers scattered abroad zealously carry the message with them wherever they go, including cosmopolitan Antioch. In Antioch the movement begins to reach (apparently) Gentiles as well as Jews, inviting the attention of the Jerusalem church (Acts 11:22–24).

I. THE MESSAGE SPREADS (11:19)

Luke returns here to those providentially "scattered" from the affliction that came about with respect to Stephen (8:1). Luke has already mentioned that they were evangelizing, carrying the message wherever they went (8:4).¹⁹ Although, at Luke's last mention, the scattering extended only throughout Judea and Samaria (8:1; the specific illustration being 8:5–40), Luke's claim in 11:19 that disciples went to minister among Jews in Phoenicia, Cyprus, and Antioch fits clues already offered in his narrative.

The Hellenists leaving Jerusalem had to scatter in places where their Greek language and cultural differences would be welcome, and urban centers in these cities were much more workable than rural Galilee. The sudden shifts from a rural Galilean movement to an urban Jerusalem movement, and then to a cosmopolitan mission in Antioch, were virtually unprecedented.²⁰ Cities, where many people were already uprooted from previous centuries of traditions, tended to show greater openness to new ideas than the countryside, and first-century churches spread initially there (along trade routes) and usually only later to outlying villages.²¹

Luke has already mentioned contacts for Cyprus and Antioch, although, because they represent leaders, they probably are only some of the connections that existed. Barnabas would have contacts and relatives in Cyprus (4:36; cf. 13:4) and hence could provide letters of recommendation (on which see comment on Acts 9:2). Nicolas was presumably already a proselyte when in Antioch (a Gentile from Antioch without interest in Jewish religion had little other reason to migrate to Jerusalem, unless possibly as a merchant); thus he probably also had connections with synagogues there (6:5).²² Nicolas himself may not have settled or remained there (he is conspicuous for his absence among the leadership in 13:1),²³ but he may have had some influence on the Gentile mission there; ancient hospitality required the welcoming of friends' friends.

Phoenicia also makes sense as a destination, and its cities were heavily hellenized.²⁴ Although some counted Joppa (Pliny E. *N.H.* 5.69) and Caesarea (Jos.

19. Many recognize this scattering as a crucial factor in the spread of the Jesus movement (Race, "Journeys").

20. See Hengel, *Acts and History*, 99 (though perhaps overstating the case by claiming "hardly any parallels in the sociology of religion" for such a rapid shift).

21. Malherbe, *Social Aspects*, 63. Antioch, Alexandria, Rome, and other major cities set the new fashions of thought in the empire (Meeks, *Moral World*, 24). Given the rapid increase in rural population of Antioch's χώρα during the first two centuries C.E., possibly partly due to retired veterans (De Giorgi, "Antioch"), Antioch's countryside may have been influenced by events in its nearby city more than most rural areas would have been.

22. Some scholars think that Nicolas influenced even the choice of Antioch as a destination (Blaklock, *Cities*, 9); but it was a major center, though it was far.

23. Especially since Barnabas, who was apparently a Hellenist disciple not among the Seven in Acts 6:5, is included. If Nicolas remained alive, he may have traveled elsewhere, at least by the time of 13:1.

24. Though from a later century, note Philost. *Hrk.* 1.1, despite their apparent greed (1.1–7, esp. 1.3; Hom. *Od.* 14.288–89; Maclean and Aitken, *Heritkos*, lxxxiii). Phoenicians' nautical skills (*Hrk.* 1.3) would

Ant. 15.333) as part of Phoenicia (evangelized by Philip in Acts 8:40 and Peter in 9:43; 10:24), most of Phoenicia (and the parts that Luke would surely call by that name) were farther north, especially Tyre and Sidon (Pliny E. *N.H.* 5.75–78).²⁵ Those who did not include Caesarea in Phoenicia, however, recognized that Phoenicia was directly beyond it (5.14.69); see comment on Acts 12:20. We know of Jewish communities in Phoenicia (Philo *Embassy* 281). The Phoenician mission was successful, producing churches (Acts 15:3; 21:2–5; 27:3); though details of the church's origins are lacking, the mission was prefigured by some Tyrians and Sidonians who listened to Jesus (Luke 6:17) and by Luke's programmatic appeal to a Sidonian widow (4:26) as well as a Syrian leper (4:27) as examples of the sorts of people who would respond to Jesus's ministry.²⁶ Jesus claimed that Tyre and Sidon would fare better on the day of judgment than Galilean towns where he had spent much of his ministry (10:13–14), and so we are not surprised to discover disciples there later (Acts 21:3–4; 27:3).

II. ANTIOCH AS A STRATEGIC LOCATION (11:19–20)

Antioch²⁷ was near Seleucia Pieria, Apamea, and Syrian Laodicea, called its “sister” cities; Antioch itself was divided into four parts (Strabo 16.2.4). It was the “metropolis” (μητροπολις), or “mother-city,” of Syria, ruling the rest of Syria, and was where the Seleucid rulers of Syria had lived (Strabo 16.2.5; cf. *Jos. War* 3.29).²⁸ Some scholars doubt that evidence is conclusive that Syria had a “capital” per se in the Roman period,²⁹ but in any case, Antioch was powerful and on coins called itself the “capital of the East.”³⁰ It was also the seat of the Roman governor (*Jos. Ant.* 18.95, 126).³¹ Since 47 B.C.E., Antioch had been a “free city”—that is, one that the Romans allowed to govern itself mostly by its own laws.³² Romans complained about Antioch's morality (*Juv. Sat.* 3.62),³³ but the truth of the complaints probably ran no deeper (or less deep) than those against other Mediterranean cities.

Josephus claims that the city ranked third in size and wealth after Rome and Alexandria (*War* 3.29); some placed it fourth (with Seleucia on the Tigris as third; Libanius *Or.* 20).³⁴ Strabo thought it nearly the size of Alexandria in Egypt and Seleucia on the Tigris (Strabo 16.2.5), and some thought it nearly the size of Rome

also provide mobility for ideas. Greeks made one Phoenix the land's mythical ancestor, supposedly related to Cilicians (Eurip. *Phrixus B.* frg. 819.7–8). Canaanite religion apparently did persist (Oden, “Persistence”; Rives, *Religion*, 66; Steiner, “Rise”). On Phoenicia, see, e.g., discussion in Grainger, *Phoenicia*.

25. Johnson, *Acts*, 202–3; Pesch, *Apostelgeschichte*, 1:351; Parsons, *Acts*, 165–66.

26. For Jews there (and in Syria), see Stern, “Diaspora,” 137–42; Luke does omit Mark's Syrophoenician woman (Mark 7:26; changed by Matthew to a Canaanite, Matt 15:22), but perhaps because he reserves his emphasis on the Gentile mission especially for his second volume.

27. On Antioch, see, e.g., Norris, “Antioch”; Meeks and Wilken, *Antioch*; for archaeological data, see, e.g., Johnson, “Antioch”; McRay, *Archaeology*, 227–32; idem, “Antioch”; Fant and Reddish, *Sites*, 143–52; Blaiklock, *Cities*, 9–12; for summary of background, Eckey, *Apostelgeschichte*, 254–55; for earlier sources, see the seven entries in Mattill and Mattill, *Bibliography*, 203 (including Downey, *History of Antioch*, 272–316; Reynolds, “Antioch”; Tenney, “Antioch”).

28. For this title on its coins, see Tracey, “Syria,” 238 (section on Antioch, 236–39). Bruce, *Acts*¹, 235, notes that it was “now to become the metropolis of Gentile Christianity.”

29. Tracey, “Syria,” 239.

30. Witherington, *Acts*, 366. Most scholars call it Syria's capital in Roman times (Koester, *Introduction*, 1:70; Reicke, *Era*, 194). Vell. Pat. 2.37.5; 2.38.6 claims that Syria became a Roman province through Pompey.

31. See also, e.g., Lake and Cadbury, *Commentary*, 127; Reicke, *Era*, 194; further Tracey, “Syria,” 243–46.

32. Pliny E. *N.H.* 5.18.79; Jones, Seyrig, Liebeschuetz, and Sherwin-White, “Antioch”; Ferguson, *Backgrounds*, 32. On the meaning of “free cities” (limited autonomy contingent on Roman goodwill), see Spawforth, “Free cities.”

33. Lake and Cadbury, *Commentary*, 127, claim that *Daphnici mores* became a “byword.”

34. Riesner, *Early Period*, 111.

(Hdn. 4.3.7). Estimates of its population vary widely. Many scholars cite the figure of half a million³⁵ or even 600,000; others estimate about 150,000.³⁶ Ancient estimates reveal little more consensus: in the first century B.C.E., Strabo estimated 300,000 (Strabo 16.2.5); in the next century, Pliny the Elder suggested twice that number (*N.H.* 6.122); in the fourth century, John Chrysostom estimated only 200,000 (*Pan. Ign.* 4).³⁷ Although Westerners would think the modern town, Antakya, Turkey, “fairly crowded” and it consumes “somewhat less than half the area of the ancient city,” its population appears no more than 75,000. Even the low estimates for the ancient city (about 250,000) require “a high density in a relatively small area.”³⁸ Though its location made it a battleground “between Rome and Sassasian Persians” and, in a later period, between Byzantines and Arabs, it “remained an important city into the Middle Ages.”³⁹

Although we know the course of the walls, Antioch is difficult to excavate, being thirty-five feet (11 m.) deep.⁴⁰ That the modern city of Antakya covers part of the site⁴¹ may also complicate excavations. Although the excavations in 1932–39 were very limited, they did confirm what ancient literature leads us to expect: “Antioch was a typical Hellenistic Roman metropolis.”⁴² The Roman bridge over the Orontes has survived, although it has been repaired many times.⁴³

Antigonus I founded Antioch in 307 B.C.E.; Seleucus I Nicator defeated Antigonus in 301 B.C.E., renaming the city and moving it in 300 B.C.E. to its present site (where Antakya lies today). It became the capital of the Seleucid kingdom; various distinct settlements, each with its own walls, were united into a tetropolis. Romans made it their capital for Syria after conquering the Seleucids in 64 B.C.E.⁴⁴ Agrippa and Herod provided wide sidewalks on either side of Antioch’s main thoroughfare, which had shops along at least its eastern side and in alleys meeting it; Tiberius added a colonnade.⁴⁵

Antioch was large enough to boast its own marketplace, theater, and amphitheater; the island also had a palace and a circus.⁴⁶ Augustus instituted games at the stadium, which some say that Claudius elevated to Olympic Games, eventually competing with those held in Greece.⁴⁷ Antioch was known for its love of dance, so that its residents would call out positive or negative evaluations as dramatic dances were under way (*Lucian Dance* 76). Dio Chrysostom, in his day, could spur his native city, Prusa, to build projects in light of those of other prominent cities in or near Asia Minor, including Antioch (*Or.* 40.11; cf. 47.13). He conceded that Antioch needed more space than Prusa did, since it was thirty-six stadia long (roughly 4.5 mi.) and its main street was famously full of colonnades (*Or.* 47.16).

35. Haenchen, *Acts*, 365; Jeffers, *World*, 57; Reicke, *Era*, 194; in Abbott, *Acts*, 134, more than half a million. Jones, Seyrig, Liebeschuetz, and Sherwin-White, “Antioch,” estimate 250,000 for Antioch.

36. See Riesner, *Early Period*, 111. Stark, *Cities*, 37, still more modestly estimates 100,000.

37. McDonald, “Antioch,” 34, correctly noting that who was counted (citizens or residents) and how far beyond the city proper was included may account for some of the disparity.

38. Meeks, *Urban Christians*, 28.

39. Koester, *Introduction*, 1:70.

40. Finegan, *Apostles*, 67.

41. *Ibid.*, 68.

42. Hengel and Schwemer, *Between Damascus and Antioch*, 268.

43. Finegan, *Apostles*, 68.

44. Wittke, “Antioch on Orontes.” (See additional comment at Acts 13:4.)

45. Tate, “Antioch on Orontes,” 144.

46. Finegan, *Apostles*, 68.

47. *Ibid.*, 65–66 (citing Libanius *Or.* 11). Remijsen, “Introduction,” argues that despite many games and much entertainment, the Olympic Games in Antioch are uncertain before 212 C.E.

III. GENTILE RELIGION IN ANTIOCH

Although many Jews lived in Antioch, it was predominantly Gentile and pagan. Egyptian deities, such as Isis and Serapis, and Greek deities, such as Demeter, were prominent in Antioch's worship.⁴⁸ A later writer also opines that Antioch enjoyed far more festivals than most cities (Hdn. 2.7.9; 2.8.9). In Syria as a whole, most deities worshiped in this period remained Semitic (most prominently Baal), although many were identified with Greek or Roman deities (e.g., Bel with Zeus).⁴⁹

Antiochus IV Epiphanes began the building of a major temple to the Olympian Zeus on Mount Silpius, but it was finally completed only by Tiberius in the early first century.⁵⁰ Julius Caesar built, presumably around the center of the city, the Kaisareion for the cult of Roma; a statue of Caesar was in the building. Caesar also rebuilt the declining Pantheon in Antioch.⁵¹

Near Antioch was the cult center Daphne (Strabo 16.2.4; Jos. *War* 1.328), about forty stadia (ca. 5 mi. or 8 km.) away, with a temple of Apollo and Artemis, the grove of which was eighty stadia around (Strabo 16.2.6).⁵² Tradition said that the nymph Daphne was metamorphosed into a laurel tree there, and this led to worship of a laurel tree at the Apollo temple.⁵³ Daphne was so famous as a cult center that many called Antioch ἐπὶ Δάφνῃ (cf. also Pliny E. *N.H.* 5.18.79)—hence the burial at “Epidaphna” in Tac. *Ann.* 2.83.⁵⁴ Titus built a theater in Daphne; according to some reports, he destroyed a synagogue and used its site for the theater.⁵⁵

IV. JEWS AND ANTIOCH

It would not be difficult for the scattered Hellenist Christians to “speak the word” to Jews in Antioch. Josephus indicates that the city held a sizable Jewish population (*Ag. Ap.* 2.39), indeed claiming (perhaps exaggeratedly) that this was the heaviest concentration of Jewish people in the Diaspora (*War* 7.43).⁵⁶ Although it was founded later than some other Diaspora communities (by Seleucus Nicator in 300 B.C.E.), it grew quickly, and there is an abundance of evidence for its popularity with Jewish people.⁵⁷ The highest estimates range from 45,000 Jewish residents in Augustus's day to 65,000 in the fourth century, but others estimate a total population for Antioch of only 150,000 (though 400,000 in its territory) in the fourth century. More recent scholars tend to estimate about 22,000 Jews in Antioch, but most admit that this is at best a useful guess.⁵⁸ Likewise, many estimate about 10 percent of the population,

48. Norris, “Isis, Sarapis, and Demeter.” On the Mysteries there, cf. also Metzger, “Antioch-on-Orontes,” 78–80.

49. Healey, “Syrian Deities”; Whittaker, *Jews and Christians*, 260.

50. Finegan, *Apostles*, 65.

51. McRay, *Archaeology*, 230.

52. For its springs, waterfall, and abundant trees (cypress, laurel, and oak), see also Finegan, *Apostles*, 65; for other discussion, see Dowden, “Daphne,” 221. Pliny E. *N.H.* 5.18.79 places Daphne across the Orontes.

53. So Philost. *Vit. Apoll.* 1.16, claiming that Apollonius rejected this superstition; see also Ovid *Metam.* 1.452–567; Libanius *Narration* 17; *Speech in Character* 27.4; Mader, “Pursuit.”

54. Lake and Cadbury, *Commentary*, 127. Nevertheless, Daphne also had a synagogue (Meeks and Wilken, *Antioch*, 9).

55. Finegan, *Apostles*, 65–66. The theater included a sculpted satyr struggling with a hermaphrodite, an image characteristic also of some other theaters (Retzleff, “Group”).

56. See Levinskaya, *Diaspora Setting*, 128; Metzger, “Antioch-on-Orontes,” 81–82; Kraeling, “Jewish Community at Antioch.” For Jewish inscriptions from Syria and Transjordan, see *CIJ* 2:55–105, §§803–68; for Syria being less unclean than other Gentile lands, see *b. Git.* 8a. The estimates tend to be significantly lower than those for Alexandria, however (see comment on Acts 18:24). Kennedy, “Demography,” estimates Greater Syria's population at three or four million in Augustus's era.

57. Kraeling, “Jewish Community at Antioch,” 131–36. It also appears among mighty cities destroyed in the end time in *Sib. Or.* 4.140 (perhaps written ca. 80 C.E.).

58. Meeks and Wilken, *Antioch*, 8; Levinskaya, *Diaspora Setting*, 134.

whatever its number, was Jewish, though this, too, is a guess.⁵⁹ Because of Syria's connections with the East, the Jewish community here was probably more like that in Palestine than were most Diaspora Jewish communities.⁶⁰

Most scholars believe that most Jews, or "Judeans," lived outside Judea, even when we discount the Jewish residents of Parthia. Some estimate 4.5 million Jews in the Roman Empire, or about 7 percent of its total estimated population;⁶¹ others, about 7 million, or about 10 percent of the empire's estimated population;⁶² still others note both figures as a range⁶³ or suggest a mediating 5 to 6 million.⁶⁴ The percentages may be right for some cities (with probably higher percentages in Alexandria, Antioch, and certainly Judea itself), but with only perhaps 10 percent of the empire living in cities (and rural areas unable to sustain Jewish community practices), I suspect that the real percentage was lower (perhaps 5 percent of the empire overall). Still, by not practicing the common (albeit inadvertent) methods of population control (such as infant exposure and abortion), Jews (like Egyptians) would naturally multiply more than other groups (with a temporary decline due to wars in Judea, the Decapolis, and North Africa from 66 to 135).

All such figures are in any case only guesses, but they probably at least offer a fairly accurate sense of orders of magnitude.⁶⁵ All the estimates reckon a much larger percentage of Jews outside Palestine than inside it in this period. Jewish people had to settle throughout the rest of the world, Philo insists, because they were too numerous to fit in any one land (*Flacc.* 45–46);⁶⁶ an earlier, Gentile historian notes their large population, which he attributes to their refusal to abandon babies.⁶⁷ Like most immigrant groups, they clustered in cities, so that some scholars estimate that they constituted 10–15 percent of the populations of average coastal towns in the Roman world;⁶⁸ we must adjust higher for Antioch and Alexandria and lower for some other cities.

We know of a synagogue in Antioch in the Seleucid period (*Jos. War* 7.44); a different synagogue after 70, located in the city's southern quarter, became the main one, but other synagogues existed there as well.⁶⁹ Presumably the Hellenist Jewish Christians who came to Antioch found many prospective disciples in one or more of these synagogues (speaking "to Jews alone," Acts 11:19). How long the connections remained we cannot say. Whereas in Luke's day being part of the ancient Jewish religion may have remained advantageous, it may have appeared a

59. Riesner, *Early Period*, 111; also Schnabel, *Missionary*, 71 (estimating 20,000 to 35,000).

60. Hengel and Schwemer, *Between Damascus and Antioch*, 79–80. On Judaism in Syria, see Barclay, *Jews in Diaspora*, 242–58 (for the Roman period, 249–58), also noting ties with Judea.

61. So, e.g., Schoeps, *Paul*, 221–22; Bornkamm, *Paul*, 4–5; Malherbe, "Life," 25.

62. E.g., De Ridder, *Rejected*, 5; cf. an ancient Syrian church historian's estimate at 6,944,000 (Avi-Yonah, "Geography," 109; Rabello, "Condition," 691), though he may have exaggerated like Josephus. This higher figure is sometimes broken down as 2.5 million in Palestine; more than a million each in Syria with Asia Minor, in Egypt, and in Mesopotamia; and about 100,000 each in Italy and North Africa (Jeffers, *World*, 213). S. W. Baron estimated one-fifth of the eastern Mediterranean world, but this may be too high (Stambaugh and Balch, *Environment*, 47).

63. Caird, *Apostolic Age*, 21.

64. Meeks, *Urban Christians*, 34.

65. Cf. Levinskaya, *Diaspora Setting*, 23.

66. It is of course to Philo's advantage to exaggerate here and to inflate some of his estimates. But he could have avoided criticism for such hyperboles or estimates only because they would have struck potential hearers as sound enough to be plausible.

67. Diod. Sic. 40.3.8; on abandoning babies, see comment on Acts 7:19.

68. Meeks, *Urban Christians*, 34; followed by Gill, "Élites," 113.

69. Meeks and Wilken, *Antioch*, 8–9; cf. de Vaux, *Israel*, 343–44. Cf. also evidence for synagogues in Meeks and Wilken, *Antioch*, 53–54; *CIJ* 2:56, §804.

liability after Hadrian; throughout the empire, in varying degrees, Gentile Christian converts or sympathizers could escape some anti-Jewish sentiments against themselves by distancing themselves from Judaism. Even by the early second century, Ignatius attests theological conflict between Jews and Christians;⁷⁰ nevertheless, they remained in active contact into the fourth century.⁷¹ Thus Judaism apparently remained strong there in that century, when John Chrysostom tried to keep Christians from synagogues.⁷²

During the war of 66–73, Antioch (along with Sidon, Apamea, and Gerasa, *Jos. War* 2.479–80) was among the few predominantly Gentile cities in the region to spare their Jewish inhabitants. Josephus allows that this may partly reflect the large number of Jewish people in Antioch, but he thought it especially reflected good relations there (2.479). In contrast to Caesarea (a hotbed of Jewish-Gentile tension; see comment on Acts 10:1), Antioch was a more natural site to bridge the Jewish-Gentile divide in a major way.

Nevertheless, we should not exaggerate Antiochene Gentiles' trust of their Jewish neighbors, especially in the wake of the Judean revolt.⁷³ That Antioch loved Germanicus, Caligula's father, and hence showed great affection for Caligula⁷⁴ would not have boded well for local Jews sympathetic with Judean hostility toward Caligula.⁷⁵ After Jerusalem's destruction, Antiochenes asked Titus to banish Jews or at least restrict their rights in Antioch; he refused (*Jos. War* 7.100–111; *Ant.* 12.121–24) but dedicated some figures there, meant to emphasize his defeat of Jerusalem.⁷⁶ Some scholars thus suspect that Christian life in Antioch about 36/37 was probably not as peaceful as Luke portrays.⁷⁷ It probably was not violent, but even in Gentile cities with large Jewish populations such as Antioch, followers of the one Jewish God would not be able to forget their minority status. Jewish believers here presumably evangelized Gentiles more through personal contact than through public proclamation.

V. EVANGELIZING ANTIOCH

Word undoubtedly spread through house church meetings as well.⁷⁸ Perhaps a range of types of homes existed in Antioch. Syrian homes preserved from the first millennium C.E. used stone slabs for their roofs, topped by clay terraces reached by stone staircases.⁷⁹ Presumably, Hellenistic models had produced change in urban Antioch in a direction more like known forms of Greek architecture.⁸⁰ Perhaps ministry after dark was easier here than elsewhere. Antioch seems to have been one of

70. Meeks and Wilken, *Antioch*, 19–20.

71. *Ibid.*, 21–24.

72. Fant and Reddish, *Sites*, 145.

73. Hengel and Schwemer, *Between Damascus and Antioch*, 187–90, esp. 189–90, think that most Antiochenes were anti-Jewish despite the willingness of many others to embrace Judaism.

74. *Ibid.*, 184.

75. *Ibid.*, 180–83. The claim of John Malalas *Chronographia* that a Jewish high priest sent thirty thousand Jewish soldiers to kill many Antiochenes in 39/40 C.E. is certainly confused, but it might reflect Jewish-Gentile conflicts in Antioch in Caligula's reign (so Hengel and Schwemer, *Between Damascus and Antioch*, 184–85).

76. Fant and Reddish, *Sites*, 145.

77. Hengel and Schwemer, *Between Damascus and Antioch*, 186.

78. On the church in Antioch, see, e.g., Patzia, *Emergence*, 96–104; for how it has been used as a misological paradigm in history and today, see, e.g., Orme, "Antioquia." White, *Origins of Architecture*, 2:144, addresses an example of a converted Syrian *insula* complex that developed into a later church building.

79. Robertson, *Greek and Roman Architecture*, 314. See further Holladay, "House," on pre-Hellenistic Syro-Palestinian homes.

80. Limited excavations reveal that Antioch resembled most Greco-Roman metropolises (Hengel and Schwemer, *Between Damascus and Antioch*, 268); for the city's Hellenistic gridiron plan, see below.

the few ancient cities to hang lamps to light streets after nightfall, since most people in antiquity went to bed early.⁸¹

Although ministry probably started in mainly Jewish parts of the city,⁸² Antiochene believers would undoubtedly traverse the city, which retained some older topographic elements but had greatly expanded them. The traditional Hellenistic and Roman gridiron plan structured the city, which originally filled “an oblong area on the flat ground between the river and” a major Hellenistic road. The original city also provided for two distinct walled quarters, one for Greeks and Macedonians and a smaller one “for the native Syrians.”⁸³ Antiochus I Soter (281–261 B.C.E.) constructed another quarter following the gridiron pattern,⁸⁴ and Antiochus IV Epiphanes (175–164) provided the final quarter.⁸⁵ In the Roman period, the old Hellenistic road, once along the side of Antioch, passed through its middle and constituted the main axis street of the city, lined with columns.⁸⁶ It “ran from the Aleppo Gate on the northeast to the Daphne Gate on the south”—that is, for about two miles (i.e., 3 km.).⁸⁷ The road was paved with stones, but in the time of Herod it was paved with marble, with broad walkways on its sides and, beyond them, many shops.⁸⁸

Because synagogues in Antioch welcomed proselytes and God-fearers, it is not surprising that the Jewish Jesus movement in Antioch would do the same.⁸⁹ Because God-fearers were not circumcised, Gentiles welcomed on these terms (as allies but not members of the covenant) may have constituted a sort of lower tier within the church at the very beginning, although at some early point such a distinction must have changed (Acts 14:26–15:2; Gal 2:11–12);⁹⁰ whether Paul was an influential voice in establishing this change or (perhaps more likely) simply became its most articulate defender,⁹¹ we cannot say. (Practice may have also taken time to follow theory. In some parts of Judaism, although proselytes should be fully welcome in terms of religious status,⁹² their social status was more marginal.)⁹³ A variety of cultural factors would contribute toward making Greek-speaking Antiochene Gentiles more open to Jewish and Christian values, facilitating the way for Gentile converts.⁹⁴ But Judaism, and hence the church, also apparently faced anti-Jewish challenges from

81. Cary and Haarhoff, *Life*, 106.

82. Cf. a modern (but pre-1975) community in Lebanon, where a particular cultural group usually dominated in a neighborhood despite some mixing (Eickelman, *Middle East*, 218).

83. Finegan, *Apostles*, 64.

84. *Ibid.*

85. *Ibid.*, 65.

86. *Ibid.*

87. *Ibid.*, 68.

88. *Ibid.*, 65, 68 (noting that it was expanded to nearly 130 ft., or 40 m., wide in Justinian’s day).

89. Chilton, *Rabbi Paul*, 103, suggests that the mission to Gentile God-fearers in Antioch would inevitably spill over to pagans as well; there was no way to know whether a Gentile had already accepted the God of Israel beforehand, since synagogues did not keep records of God-fearers. Perhaps the Antioch believers viewed both pagans and uncircumcised God-fearers, in contrast to proselytes, as newly converting to allegiance to the God of Israel when they entered the Jesus movement.

90. Cf. Winter, “Antioch.”

91. Cf., e.g., Horn, “Verzicht,” who is probably right that Paul spread the circumcision-free Gentile mission abroad but did not start it.

92. See, e.g., Kern-Ulmer, “Bewertung”; Bamberger, *Proselytism*, 145–61; McKnight, “Proselytism,” 840–41.

94. See Mena Salas, “Condiciones” (supporting the relevance of these factors also from Syrian Christian sources); cf. Feldtkeller, *Identitätssuche*.

members of the Gentile majority during the period of Paul's ministry there, which Luke's summary omits.⁹⁵

Tradition speaks of the Antioch church's leadership after the depiction of Acts 13:1. After Peter's ministry, Evodius became the city's first bishop, followed by Ignatius (martyred ca. 107 C.E.; Euseb. *H.E.* 3.22.1). Despite severe persecutions under Decius (250 C.E.) and Diocletian (303 C.E.), the church experienced enormous growth, and thirty church councils were held at Antioch from the mid-third to the early sixth centuries.⁹⁶ Although eventually vying with Alexandria and surpassed by Constantinople, the bishopric of Antioch was ranked second only to Rome in the earliest period.⁹⁷ When the church made the transition from multiple leaders (see comment on Acts 13:1) to a bishop over other leaders is not clear, but, given evidence elsewhere, it is not likely that it occurred before the closing years of the first century.

VI. CYPRIOTS AND CYRENIANS REACH GENTILES (11:20)

Most ancient hearers of Acts would understand that Antioch was a major cosmopolitan center with considerable involvement in trade.⁹⁸ This helps explain why believers there could send an offering for the saints in Jerusalem (Acts 11:29).⁹⁹ Its geography aided its engagement in trade (though it was its history that sparked its role). After breaking through the hills, the river Orontes flowed near Antioch and emptied itself into the Mediterranean Sea, just about 40 stadia (5 mi.) from the port city of Seleucia.¹⁰⁰ This coastal city was 120 stadia from Antioch (ca. 15–16 mi.), making river transport natural (cf. 13:4). A traveler from Antioch could reach the sea on the same day (Strabo 16.2.7). The city's cosmopolitan character undoubtedly engendered much more cross-cultural contact than would have been possible in Jerusalem or even coastal Caesarea, helping to explain the transition to a ministry to Greeks here (Acts 11:20).¹⁰¹ Urban Antioch also positioned the growing church with access to other major cities of the Mediterranean world.¹⁰²

The Jewish community in Antioch, though part of the larger city, would have also formed a distinct ethnic enclave, as ethnic groups (especially among recent immigrants and, more relevant in this case, groups that cannot or will not assimilate) often do in urban communities.¹⁰³

The mention of Cyprus (see comment on Acts 11:19) and Cyrene anticipates two leaders in the Antioch church, Barnabas (among the Cypriots, 4:36) and Lucius of Cyrene (13:1); the latter may have been among the evangelists Luke has in view here.¹⁰⁴ Barnabas had not yet arrived (11:22) but probably knew many of the Cypriot

95. See Hengel and Schwemer, *Between Damascus and Antioch*, 184–90; cf. Finegan, *Apostles*, 65–66.

96. Finegan, *Apostles*, 67.

97. *Ibid.*

98. For trade between Syria and Rome, see Charlesworth, *Trade Routes*, 36–56. Some members of the Jewish community there became quite wealthy (Jos. *Ant.* 17.24), though they were probably a minority (Riesner, *Early Period*, 111).

99. In contrast to the grinding poverty of the rural empire (see MacMullen, *Social Relations*, 1–27), though the truly wealthy were only a tiny fraction even in the cities (88–120; Malherbe, *Social Aspects*, 86).

100. Seleucia Pieria was also a free town, on the cape but associated with Antioch inland (Pliny E. *N.H.* 5.18.79); see further comment at Acts 13:4.

101. Cf. Bruce, *Documents*, 88; McRay, *Archaeology*, 232. Sociologists have shown that groups with minimal contact with each other tend to harbor greater prejudices (Allport, *Prejudice*; as cited in Ecklund, *Science*, 49); although without eliminating prejudice, cities like Antioch provided significant cross-cultural exposure.

102. Judge, *Pattern*, 14.

103. Wallace, *Urban Environment*, 134–84, esp. 135–52.

104. If Luke was privy to such details. In view of the probably historical tradition in Acts 13:1, Dunn therefore also thinks 11:20 historically likely (Dunn, *Acts*, 154).

believers scattered from Jerusalem.¹⁰⁵ Cyprus had a large Jewish population,¹⁰⁶ and so its Diaspora was probably also significant. The Ptolemies had ruled Cyprus for more than two centuries, but Rome annexed it in 67 B.C.E. and ruled it as part of the province of Cilicia from 58 B.C.E.¹⁰⁷ Although Cyprus was naturally prosperous (see comment on Acts 13:4), Rome's exorbitant taxes (and interest rates for funds lent to pay the taxes) in the early period of Roman rule exploited the province severely.¹⁰⁸

Cyrene was in Libo-phoenicia (as opposed to Syro-phoenicia), and besides Lucius the Jerusalem church probably had produced other believers from Cyrene (2:10; probably some came from the synagogue mentioned in 6:9), probably including Simon (Luke 23:26), whose naming and identification in the tradition (Mark 15:21) strongly suggests that he continued to be known among the believers.¹⁰⁹ Simon's sons, or at least Rufus, may have later ended up in Rome (Mark 15:21 with Rom 16:13);¹¹⁰ at some point, their mother knew Paul and became a "mother" to him (Rom 16:13), and if this was (as is likely) when Paul was already a believer, Antioch is the likeliest single location.¹¹¹ (Simon is probably not the Simeon of Acts 13:1, however, since Luke would hardly have relinquished the opportunity to identify them explicitly had they been the same person.)

Cyrene was known for the fertility of its land (Strabo 2.5.33; 17.3.21). In the Hellenistic period, Cyrene was part of a five-city Pentapolis, but Ptolemy Apion (116–96 B.C.E.), the final Greek king of Cyrenaica, willed his realm to Rome, and it became a Roman province in 74 B.C.E. Augustus later combined it with Crete into a senatorial province.¹¹² We know of prominent and well-educated Jews in Cyrene (2 Macc 2:23), and in this period it had a large Jewish population (Jos. *Ag. Ap.* 2.44; *Ant.* 14.118), which Josephus (sometimes prone to exaggeration) treated as a fourth distinctive part of the population (*Ant.* 14.115).¹¹³ Nevertheless, the Jews were not always well treated (16.160, 169).

105. Watson, *Gentiles*, 68, thinks that Luke's tracing of all the Hellenists (including Barnabas) originally to Jerusalem reflects his neat schema (Acts 1:8) "but the historical reality may have been more complex." Paul, however, also treats Jerusalem as the center (Rom 15:19; Gal 1:17; 2:1, 9). The movement had to begin somewhere; we know of Hellenists in Jerusalem (see comment on Acts 6:1), and Jerusalem would provide the source of the earliest, hence usually most mature, believers. Luke does not attribute a Jerusalemite origin to all the characters in the Gentile mission (such as himself) and denies it for some of Paul's other colleagues (Timothy; Aquila and Priscilla; Apollos). Luke goes out of his way to emphasize the diversity of background locations in Acts 13:1, not a Jerusalemite background. Watson's skepticism is thus unwarranted.

106. See the evidence in Stern, "Diaspora," 154–55.

107. On Cyprus's history (Neolithic through 750 B.C.E.), see further Schulzki, "Kypros"; more generally McRay, "Cyprus"; in the Roman period, Mitford, "Cyprus"; Nobbs, "Cyprus."

108. Muhly, "Cyprus," 95. For archaeology on Cyprus, see Muhly, "Cyprus"; Swiny, "Research Institute."

109. Keener, *Matthew*, 677 (the use of a place of origin rather than a patronymic may be significant; for the possible transmission of the passion narrative in Jerusalem, see Theissen, *Gospels*, 166–99).

110. Cf. Hunter, *Romans*, 132; Morris, *Romans*, 536; Murray, *Romans*, 2:231. "Alexander" and "Simon" are both common names (there is a burial cave of Alexander son of Simon in Jerusalem, which some also identify with Simon of Cyrene's family; Powers, "Treasures"; Evans, "Excavating," 338–40). But Paul knows only one Rufus in Rome (Dunn, *Romans*, 897), and so the argument is strong if Mark wrote his Gospel to Rome (a widely accepted thesis but one that is not currently susceptible of proof). "Rufus" was a Latin name common especially among slaves (Morris, *Romans*, 536); some Jews used it (*CIJ* 1:103, §145; cf. the feminine form, 1:401, §541; possibly the cognate "Rufinus," 1:52, §79).

111. They could have moved to Rome because of ancestral connections as members of Jerusalem's synagogue of freedpersons (Acts 6:9), allowing a preconversion connection, though this thesis requires multiple speculations. Paul did not have the opportunity to spend much time in Jerusalem as a believer (Gal 1:18; cf. Acts 9:29–30; though cf. also 11:30 and 12:25, when he would have needed hospitality), and Antioch was long his base (cf. Acts 13:1–4; 14:26; Gal 2:11). The designation could involve familial hospitality (cf. Jewett, *Romans*, 969), but probably in more than a casual sense; Meeks, *Urban Christians*, 60, suggests a benefactress.

112. White, "Cyrene," 97. On the geography and archaeology of Cyrene, see Yamauchi, *Africa*, 187–202.

113. Cf. Caird, *Apostolic Age*, 21; Brown, *Death*, 915. On Jews in Cyrene, see most fully Applebaum, *Jews and Greeks in Cyrene*, esp. 130–200; also Yamauchi, "Cyrene in Libya"; Barclay, *Jews in Diaspora*, 232–42.

Cyrenaic Jews were susceptible to rabble-rousing (*Life* 424; *War* 7.437–39); this led to the false accusation of three thousand Jews, especially rich ones, and the confiscation of their property for Roman coffers (*War* 7.442–46). In the early second century, Jews in Cyrenaica revolted, which led to the massacre of many there and in Egypt.¹¹⁴ This revolt crippled the region's prosperity, but Trajan and Hadrian helped rebuild Cyrene (cf. *SEG* 17.584).¹¹⁵ Apart from its Jewish residents, it was a pagan city whose most notable temple was that of Apollo,¹¹⁶ whose temple also housed shrines for Artemis, Hades, and Hecate.¹¹⁷ See additional comment on Cyrene at Acts 2:10; 13:1.

If we read those whom the scattered believers evangelized here as “Hellenists,”¹¹⁸ it makes no sense to think of hellenizing Jews as in Jerusalem (see comment on Acts 6:1); rather, one should think of hellenizing Syrians. This would apply to the citizens of Antioch who viewed themselves as culturally Greek although they were ethnically Syrian.¹¹⁹ Such hellenizers could also be called “Greeks,” as in Mark (Mark 7:26) and Josephus,¹²⁰ but perhaps Luke expects readers to understand his usage because of his previous uses of “Hellenist” as “hellenizing non-Greek.” Some scholars argue in favor of reading “Greeks” here because only this seems to make sense of the context;¹²¹ possibly scribes changed “Greeks” to “Hellenists” to avoid the appearance of contradiction with Acts 11:19; but a contrast with 11:19 is likely precisely what Luke had in mind. “Hellenists” is the likelier reading, which was changed to “Greeks” to make better sense of the context.

However one reads the text, it likely refers to Gentiles, a direct contrast to 11:19. After all, the Jews of 11:19 living in Antioch would be “Hellenists” themselves, obviating the need for Luke's comment. From the Maccabean era, Greeks had been the primary cultural force with which pious Judeans clashed and to which they assimilated; now Greek culture was beginning to receive the Asian and Jewish good news of Israel's Messiah. Many or most of these cultural and linguistic Greeks may have been ethnically Syrian, but it is the symbol of Greek culture, and the consequent demonstration of the gospel's cross-cultural power to reach its possessors, that Luke periodically emphasizes (14:1; 17:4; 18:4; 19:10, 17; 20:21).¹²²

VII. GOD'S BLESSING (11:21)

God showed his blessing on this ministry to Gentiles, just as he had shown it with regard to Peter's ministry to a Gentile household (11:15–17). In Luke-Acts, God's “hand” being with a person can be equivalent to God being “with” him or her in a positive way (Luke 1:66;¹²³ cf. comment on Acts 7:9 for God being with a person)

114. See Frankfurter, *Religion in Egypt*, 206–7.

115. Huss, “Cyrene: History,” 9.

116. *Ibid.*; for archaeology of the temple, see Niemeyer, “Cyrene: Archaeology.” For a map of the city, see Huss, “Cyrene: History,” 6–7; for intellectuals from there, p. 9.

117. Niemeyer, “Cyrene: Archaeology.” For excavation reports of the temple of Demeter and Persephone, see Rose, “Return to Cyrene.”

118. For the textual possibilities and a survey of much of the secondary literature, see Metzger, *Textual Commentary*, 386–89, favoring (probably rightly) “Hellenists” (as Greek speakers from Antioch's mixed population, in contrast to Acts 11:19's “Jews,” 388–89). Some, however, have read these “Hellenists” as Jewish (e.g., Malina and Pilch, *Acts*, 82), not a necessary inference.

119. Ferguson, “Hellenists”; Stanton, “Hellenism,” 470.

120. Josephus describes “Greeks” as all residents of Greek cities (including Jews, Rajak, “Location,” 1) or as Gentile inhabitants of the same (distinct from “Syrians,” rural provincials; Rajak, “Location,” 11–13). Traditionally and through the period of the empire, Greeks understood their ethnicity differently; cf. Malkin, *Greek Ethnicity*.

121. E.g., Johnson, *Acts*, 203; Hengel and Schwemer, *Between Damascus and Antioch*, 409n775.

122. Also Paul, Rom 1:14; 3:9; 1 Cor 1:22, 24; 10:32; 12:13.

123. So also Dormeyer and Galindo, *Apostelgeschichte*, 179 (comparing 2 Sam 3:12).

though the “hand” could also be against a person for judgment (13:11); compare similarly the “finger of God” (Luke 11:20) and God’s arm (Luke 1:51; Acts 13:17). This reproduces the basic range of expression concerning God’s “hand” in Luke’s Bible, where God’s hand could be with someone (e.g., 1 Kgs 18:46; 2 Kgs 3:15; 2 Chr 30:12; Ezra 7:6, 28; Isa 66:14; Ezek 1:3; 3:14, 22; 8:1; 33:22; 37:1; 40:1)¹²⁴ or against someone (Exod 9:3; Deut 2:15; Judg 2:15; Ruth 1:13; 1 Sam 5:6, 9, 11; 7:13; 12:15; Job 19:21; Isa 25:10).

Although later Christian theology’s antipathy toward anthropomorphism is borrowed from Greek philosophy rather than biblical imagery,¹²⁵ a literal understanding in either English or Greek would read too much into the idiom, which applies to others as well as God without thought for their literal hands (Luke 1:71, 74; Acts 12:11).¹²⁶ Like “believe,” “turning” to the Lord is also an idiom familiar in Luke’s soteriology (see comment on Acts 9:35), though by chance Luke uses them together only here (cf. the conjunction between repentance and faith, Acts 19:4; 20:21).

Given the openness of Gentiles to Judaism in Antioch, it is not surprising that many would turn to the Jesus movement’s Jewish faith (especially if, as is almost certain, the Antioch church was not imposing circumcision; cf. 15:1; Gal 2:12). Significant for Acts (cf. Acts 6:5) is that many Greeks were becoming proselytes in this period, swelling the Jewish community further (Jos. *War* 7.45).¹²⁷ Many Antiochene Gentiles who were not becoming proselytes at least respected their Jewish neighbors.

Under Rome, Jews had rights to maintain their customs there,¹²⁸ and the only place in Syria where Jews were spared persecution in 66–70 was Antioch (Jos. *War* 2.457–79, esp. 462–63, 479).¹²⁹ Though members of Luke’s audience who knew only the LXX (in a form containing later sources) might think of Antioch in terms of earlier Seleucid oppression of Jews, Seleucus had settled Jews there and given them the same citizenship privileges as other residents (Jos. *Ag. Ap.* 2.39). Herod the Great had supported Jewish influence in Antioch by paving the central street with polished marble and adorning it with colonnades more than two miles long.¹³⁰

Josephus has reason to argue that governments had long affirmed Jewish privileges there (e.g., *Ant.* 12.119–20; *Ag. Ap.* 2.39; *War* 7.43–45), but the crisis in *War* 7.46–57 suggests that even in Antioch, a Jewish minority sometimes faced hostility.¹³¹

124. Cf. Wis 3:1; *Sib. Or.* 3.709, 795; 1QMI, 14; *Test. Ab.* 18:7 A (χειρ . . . μετά). Cf. being “in” God’s hand in a favorable way, Wis 3:1; *Jub.* 12:17; John 10:28–29. Cf. also ancient Near Eastern usage for judgment in Carpenter, “Deuteronomy,” 434–35 (less relevantly, 465); an expression of authority in Hess, “Joshua,” 28.

125. See Cohen, *Maccabees*, 86–87.

126. Cf. 1QS I, 3; III, 20; IV, 12; VIII, 15; CD II, 12; III, 21; IV, 13; V, 21; VIII, 2; XI, 19; 1QpHab IX, 6–7; perhaps CD V, 17–18. Cf. also abundantly in Scripture, e.g., “hand of the Philistines” (Judg 10:7; 13:1, 5; 1 Sam 7:3, 8, 14; 9:16; 12:9; 18:17 [not LXX], 21, 25; 2 Sam 3:18; 8:1; 19:9; 1 Chr 18:1).

127. Many were probably God-fearers rather than full proselytes, paving the way for the welcoming of Gentiles in Acts 11:20 (with McRay, *Archaeology*, 227).

128. Meeks and Wilken, *Antioch*, 2–4; Levinskaya, *Diaspora Setting*, 128–31. Antiochus IV had curtailed their citizen rights, but even his successors restored them (Jos. *War* 7.44).

129. Levinskaya, *Diaspora Setting*, 132. A sixth-century source claims pagan attacks on Jews ca. 40 C.E. (perhaps during the conflict over Caligula’s statue; Malalas *Chronogr.* 1; Stambaugh and Balch, *Environment*, 147). False rumors then incited pogroms against them (Jos. *War* 7.47, 58–61, 100–103), but Titus restored their rights (7.109–11); by ca. 190 C.E., Antioch even “had a Jewish magistrate” (Meeks and Wilken, *Antioch*, 5–6; quotation, 6). By the fourth century, they could appeal to patrons connected with the imperial government and had close ties with Palestine (Meeks and Wilken, *Antioch*, 11–12), though this may reflect increasing centralization in the empire.

130. Jos. *War* 1.425; *Ant.* 16.148; McDonald, “Antioch,” 34 (including data external to Josephus). McRay, *Archaeology*, 230, notes that the Byzantine author John Malalas says that Tiberius built colonnades after Herod paved it, and some think that Malalas obtained this information from local records (antipathy toward a Jewish donor might have decreased reports of his gift?).

131. Barrett, *Acts*, 549.

Although we do not have evidence that the Jewish mission in Antioch fared badly (Acts 11:19), we know that the Gentile mission fared well (11:20–21); this success may fit Luke's theme of going to the Jewish community first but finding great receptivity among Gentiles (13:5–7, 46; 18:6; 19:8–10; 28:28).

As noted above, many people in cities were already uprooted from previous centuries of traditions and hence showed greater openness to new ideas than those in the countryside.¹³² Some ancients negatively characterized Syrians as always eager for political change (Hdn. 2.7.9); if any truth exists in this caricature, it might further support the idea of people open to change rather than bound too closely to ancient traditions.

Although Luke has previously recorded Gentile conversions (Acts 8:27–39; 10:1–48), none have occurred on this scale. Luke prepares us for this mission by showing the Hellenists' receptivity to it (especially through Philip), but he treats matters here only briefly. This could reflect the scarcity of his source material here, but it probably also (or instead) reflects his biographic interests; the mission here is carried out not by major figures but by minor characters who would distract from his larger architectural patterns.

b. Barnabas Helps the Antioch Church (11:22–26)

The Jerusalem church needed to be assured that the developments in Antioch remained in continuity with the direction of God's Spirit, and so it sent Barnabas as it had earlier sent Peter and John to Samaria. In this case, Barnabas does not find even the deficiency that Peter and John found in Samaria. What the disciples in Antioch do need for perseverance, however, is teaching; Barnabas recruits another Hellenist, one with an exceptional Jerusalem academic background (cf. 22:3), to join him and other Antioch leaders in the task.

I. APPROVAL FROM JERUSALEM (11:22–24)

God's blessing (11:21) might not necessarily ensure Jerusalem's blessing (cf. 11:3); yet the latter was important for the church's unity, and the Jerusalem church (so long as it existed and exerted influence) had an interest in ensuring that the movement remained faithful to its founding vision. Luke emphasizes that Jerusalem's agent recognized and immediately approved God's work in Antioch because Jerusalem sent the right agent, someone full of the Spirit and faith.

(1) Investigating the New Work (11:22)

Word reached Jerusalem, as it had in 8:14 and 11:1; gossip networks and travelers made the quick spread of word to the Christian "capital" almost inevitable.¹³³ As the Jerusalem church earlier sent Peter and John as emissaries to Samaria (8:14–15) and invited an accounting for events in Caesarea (11:3), it now sends Barnabas, who apparently remained in Jerusalem when many of his fellow Cypriot Jewish believers were scattered (9:27). He is thus an apostle of the Jerusalem church,¹³⁴ though accorded the title of "apostle" in the narrower sense only in 14:4, 14 (though even there not as narrow as Luke's usual restriction of the term to the Twelve).¹³⁵

132. Malherbe, *Social Aspects*, 63.

133. On the quick spread of word orally, see, e.g., Ezek 24:26; Eurip. *El.* 361–62; Pindar *Nem.* 5.2–3; Cic. *Fam.* 12.30.3; Apul. *Metam.* 1.26; comment on Acts 19:10.

134. Lake and Cadbury, *Commentary*, 129; Barrett, *Acts*, 553; Le Cornu, *Acts*, 619.

135. Cf. apostles of churches in 2 Cor 8:23 (delegates of the churches for the offering, Martin, *Corinthians*, 278; comparing Jewish sources, Bruce, *Corinthians*, 225; Nickle, *Collection*, 88); perhaps Phil 2:25; perhaps an analogous usage in *CIF* 1:438–39, §611 (where two *apostuli* are mentioned alongside two rabbis in a congregation). On the background and nature of "agency," see Keener, *John*, 310–15.

Perhaps the Jerusalem church sent him to investigate (cf. 8:14–15) to be certain that the new movement's or new believers' faith was sound; he was happy to discover that it was (11:23). (The choice of emissary may have influenced this outcome;¹³⁶ not everyone in Jerusalem turned out to be pleased with the way Christians in Antioch made Gentile converts without circumcising them [15:1, 5] and then would even wish to eat with them in that state [Gal 2:12].) The Antioch church's ministry thus receives Jerusalem's seal of approval here as the Samaritan believers did in Acts 8.¹³⁷

(2) *Barnabas's Approval (11:23–24)*

The summons to new believers to persevere (cf. also 13:43) is also part of Luke's summary of the message to new churches in 14:22, emphasizing the importance of perseverance in his theology of discipleship (cf. Luke 22:32; in Paul and other early Christian authors, cf., e.g., Rom 11:22; 1 Cor 15:2; Col 1:23; Heb 3:6, 14; 4:14; 10:23; Rev 2:25; 3:11). His "exhortation" stands in continuity with John (Luke 3:18), Peter (Acts 2:40), and Barnabas's later apostolic ministry with Paul (14:22; cf. Paul with others, 16:40; 20:1–2).¹³⁸ It also fits the way Luke reads the name the apostles gave Barnabas (4:36). Luke (among a wide range of other early Christian writers)¹³⁹ commonly speaks of "the grace of God" (Luke 2:40; Acts 13:43; 14:26; 20:24) and "the grace of the Lord" (Acts 15:11, 40); here he probably means that God has shown his favor and generosity by turning so many Gentiles to himself.

Barnabas's joy over the Gentile conversions¹⁴⁰ and his ministry to the church occur because ("for") he is a good man and full of the Spirit (11:24). Although technically no one was absolutely good (Luke 18:19; cf. 11:13), Luke is ready to use the common language (cf. also Luke 6:45; esp. 23:50) to communicate Barnabas's character, as with another Joseph, of Arimathea (23:50; cf. Acts 9:36).¹⁴¹ One might also infer from this description a negative moral judgment on those who did not celebrate the conversion of outsiders (cf. Luke 5:30; 15:2; contrast 15:6–7, 9–10, 23–24, 32).

Being "full of the Spirit" (cf. Luke 4:1; Acts 6:3; 7:55) may indicate a special and more continuous empowerment than Luke's more common "filled with the Spirit."¹⁴² That Acts 6:3 and 7:55 apply to Stephen, who challenged narrow ethnic and geographic conceptions, and that Luke 4:1 applies to Jesus, who soon after did the same (cf. 4:18, 26–27), may point again to the close connection between a life "full of the Spirit" and Luke's perspective regarding the Spirit's mission (Acts 1:8).¹⁴³ Luke sometimes pairs the Spirit with qualities associated with the Spirit, such as

136. Though he may have been selected less for his disposition than for his connection with the Cypriot founders of the Antioch church (Acts 4:36; 11:20; Johnson, *Acts*, 207). Barnabas appears a mediating figure both in Acts and Paul (see Öhler, *Barnabas*).

137. If prior to Barnabas's sending to Antioch (as it probably was), Peter's revelation (Acts 10:1–11:18) undoubtedly played a role in this acceptability (Chilton, *Rabbi Paul*, 98–99).

138. Cf. also the prophets in Acts 15:32 and the cognate relevant to prophecy in Luke 2:25; cf. 1 Cor 14:3, 31.

139. E.g., Rom 5:15; 16:20, 24; 2 Cor 1:12; 6:1; 8:1, 9; 9:14; 13:14; Heb 2:9; 12:15; 1 Pet 4:10; 5:12; Rev 22:21; 1 Clem. 8.1; 55.3; Ign. *Magn.* 2.1; *Smyrn.* 11.1; 13.2; *Mart. Pol.* 7.3.

140. See R. Williams, *Acts*, 96.

141. On characterization (χαρακτηρισμός; sometimes explicit, as here) in ancient rhetoric, see Anderson, *Glossary*, 125. Bonnah, *Spirit*, 322, rightly notes the very similar depiction of Joseph in *Test. Sim.* 4:4; one significant difference is Luke's characteristic pneumatological term, "full."

142. Turner, *Power*, 168.

143. Stephen also was "full of faith and the Holy Spirit" (Acts 6:5; others also see this connection, e.g., Wall, "Acts," 176). As noted, one may also compare the other "good man" in Luke-Acts—namely, another Joseph, of Arimathea (Luke 23:50), who used his rank justly.

“faith” (6:5), “wisdom” (6:3), and “power” (10:38; Luke 1:17).¹⁴⁴ Barnabas’s approval fits his welcoming character throughout Acts, where he trusts God’s work in both Saul (9:27) and John Mark (15:37–39) even when others do not.¹⁴⁵ Even more important here, his approval of the Gentile mission in Antioch fits the Spirit’s agenda throughout Acts (e.g., 8:29; 10:19; 11:12; 15:28). The verse sounds as if Barnabas, like Paul (Acts 9:20–22, 28–29), participated in the evangelism already occurring (11:21), prefiguring his later apostolic ministry (14:14).¹⁴⁶

II. RECRUITING SAUL (11:25–26)

Barnabas exhorted the new believers (11:23) and recognized that they needed teaching (11:26). Why did he look for Saul in particular to recruit him? Although some of the church’s founders may have also helped teach (13:1), Barnabas knew well of another zealous believer who had special academic training to prepare himself to teach Scripture (22:3) and experience doing so as a believer (9:27–29).

Further, Barnabas had undoubtedly heard Saul’s full testimony (9:27) and hence remembered his calling (9:15; cf. 26:16–18).¹⁴⁷ The conversion of Gentiles that was occurring in Antioch (11:20–23) was something that Paul, given his divine calling, should be a part of.¹⁴⁸ This might allow Paul to ultimately overshadow Barnabas’s own ministry (cf. 13:9–11; 14:12), but genuine concern for another’s interests above one’s own was counted a mark of true friendship¹⁴⁹ and, among Christians, viewed as a virtue (Rom 12:10; 1 Cor 10:24). Likewise, beyond Christian circles, looking out for another’s interests¹⁵⁰ and honor¹⁵¹ above one’s own was often considered virtuous behavior. Paul’s writings also attest the close connection that developed between Paul and Barnabas (Gal 2:1, 13; 1 Cor 9:6).

Another supporting reason for pursuing Paul may have been that Tarsus was only about a hundred miles from Antioch (as the crow flies; farther by overland journey) whereas Jerusalem was more than three hundred. Paul was more accessible than recruits from Jerusalem. Luke surely expects us to assume that Barnabas knew of Paul’s being sent away to Tarsus in Acts 9:30, given his close connection with him when they were in Jerusalem (9:27). Because Luke has last mentioned Paul in Tarsus (9:30), it also makes literary sense for Luke to resume speaking of him there (11:25). Luke often picks up characters where he left them off, using geography to remind his audience where he left them; thus Philip is found in Caesarea (21:8; cf. 8:40), and “we” near Philippi en route to Troas (20:5; cf. 16:10–16).¹⁵² Given the

144. Cf., in Paul, 1 Cor 2:4; 1 Thess 1:5; for the association of faith with the Spirit, 1 Cor 12:9; 2 Cor 4:13; Gal 5:22; cf. 3:14; 5:4; perhaps Phil 1:27; Jude 20; 1 En. 61:11.

145. Cf. later rabbinic tradition about gentle Hillel’s welcome of Gentiles (*b. Šabb.* 31a).

146. For those being “added,” cf. Acts 2:47; 5:14; possibly based on the image in Isa 14:1 LXX (Hort, *Judaistic Christianity*, 42). Here they are added “to the Lord,” perhaps suggesting the church’s union with Christ as in Acts 9:4–5 and Pauline theology (cf. being “added” to the community in 2:41, 47; 5:14; A. J. Gordon in Barr, Leonard, Parsons, and Weaver, *Acts*, 506; on union with Christ in Paul, cf. Campbell, *Union*).

147. This remains relevant whether or not he knew of Paul’s apparent ministry in Cilicia (Gal 1:21), which Luke does not narrate.

148. Whether Luke is aware of the chronological gap of perhaps a decade since Acts 9:30 (Gal 1:18; 2:1; Haenchen, *Acts*, 367, supposes not, but this cannot be proved) need not concern us.

149. See Grant, *Paul*, 38 (citing Arist. *Pol.* 2.2.6; *N.E.* 8.2.3).

150. E.g., Cic. *Att.* 13.6a; Sen. *Y. Ep. Lucil.* 95.63; *Jub.* 36.4; *m. ’Ab.* 2:12; applied to one’s people in Cic. *Fin.* 3.19.64; Pliny E. *N.H.* pref. 16; Fronto *Ad am.* 2.11. Cf. the mythical example of Castor and Pollux in comment on Acts 28:11. The ideals of ambition and self-honor may have often vitiated this principle in practice (see Winter, *Left Corinth*, 267).

151. See, e.g., 4 Macc 13:23–27; *m. ’Ab.* 2:10; 4:12; *’Abot R. Nat.* 15 A; 29, §60 B; Rom 12:10; for brothers, e.g., Plut. *Luc.* 1.6. Contrast Epict. *Diatr.* 1.14.17.

152. Cf. Witherington, *Acts*, 326.

limited Jewish community in Tarsus, Barnabas could have begun looking for him there simply by inquiring at synagogues. (This is true whatever Saul's relationships with some members may have been; it is possible, though not certain, that some of his synagogue beatings in 2 Cor 11:24 stem from this period.)

Paul joins Barnabas in teaching the church in Antioch (11:26). Paul is not said to "teach" believers before this point (though it is implied at least in "his disciples" in 9:25, unless they were and remained non-Christian, which would be unlikely by that point). Because Tarsus was known as a significant center of philosophic learning, Luke might imply that Paul had acquired more training while there;¹⁵³ but he certainly already had more education than most (22:3). We lack clear evidence as to what Paul experienced during the interim period, though his mention of beatings unrecorded in Acts (2 Cor 11:23–25) probably suggests that he was continuing to do evangelism. (The three shipwrecks of 2 Cor 11:25 are harder to account for during the interim period; Luke mentions only the voyages of Acts 9:30 and reports in greater detail only voyages undertaken during a later period in Paul's ministry. Some scholars suggest an earlier Aegean ministry; travel between Antioch and Cilicia or between Antioch and Cyprus seems inherently more probable.)

Luke reports Paul's extended periods of ministry in strategic places, such as Antioch (Acts 11:26), Corinth (18:11), and Ephesus (19:8–10), as well as his extended captivity in Caesarea (24:27) and Rome (28:31, which also mentions his ministry in Rome). He spent enough of a year in Antioch to warrant Luke's summary as a year there (11:26), before undertaking the journey to Jerusalem (11:30). Scholars sometimes opine that after this year, Paul and Barnabas used Antioch as their home base but traveled in ministry elsewhere in Syria and Cilicia.¹⁵⁴ It is likely that their ministry in and/or around Antioch was a lengthy one before their itinerant ministry began; some estimate eight or nine years (ca. 39 or 40 to 48 or 49 C.E.),¹⁵⁵ although we cannot be sure at what point Paul left Tarsus (where, it is argued above, he was probably also in ministry). This passage suggests that Paul was in Antioch when the nickname "Christians" arose, a name probably more widespread by the time Luke is writing probably some three decades later (cf. Tac. *Ann.* 15.44).¹⁵⁶

III. CHRISTIANS IN ANTIOCH (11:26)

Opponents of the Jesus movement in Antioch apparently derided the disciples with a new coinage based on Roman political parties: "the partisans of Christ" (i.e., of the Judean king). The term *Χριστιανοί* is formed on the analogy of Latin political terms, such as *Herodiani* (Ἡρωδιανοί), *Sullani*, *Neroniani*, *Asiani*, *Pompeiani*, *Caesariani*,

153. So Heinger, "Tarsus und zurück" (though supposing it Luke's invention).

154. Hengel and Schwemer, *Between Damascus and Antioch*, 261, citing Gal 1:21, but this text could refer to simply Tarsus and Antioch. They suggest (475n1356) places such as "Nabataean Arabia, the Decapolis," and also that the Cyprus and southern Asia Minor missions reported in Acts are only samples of apostolic activity (see also p. 205). Luke, however, treats these missions not as samples but as something new (note the commissioning in Acts 13:2–4). Some journeys are possible, but the long ones are both "sent" here, including 11:30.

155. Hengel and Schwemer, *Between Damascus and Antioch*, 205. In any case, the combined period (cf. Gal 2:1) is longer than the Aegean ministry emphasized in Paul's letters.

156. This passage in Tacitus probably reflects more than simply the nomenclature of Tacitus's era, since he explicitly attributes the title to Romans in 64 C.E., years before Luke's writing and perhaps two decades after its first use. The claim of Pervo, *Acts*, 295, that the title originates in the 90s rather than the 30s or 40s, mainly because Paul does not cite it, is unduly skeptical; he himself notes that this was probably an external nickname rather than an internal title. Although it is widespread later (Pliny *Ep.* 10.96–97; Suet. *Nero* 16.2; *Did.* 12.4; Ign. *Eph.* 11.2; *Magn.* 4.1; 10.1, 3; *Trall.* 6.1; *Rom.* 3.2–3; *Philad.* 6.1; *Mart. Pol.* 3.2; 10.1; 12.1–2; *Diogn.* 1.1; 2.6, 10; 3.1; 4.6; 5.1; 6.1–9), it is already familiar to Josephus's audience in *Ant.* 18.64 (if authentic).

and so forth.¹⁵⁷ Later in the generation here depicted, partisans of various factions after Nero's demise were called Othonians,¹⁵⁸ Vitellians,¹⁵⁹ and Flavians (loyal to Vespasian).¹⁶⁰ Luke's use of the term further signals his shift of focus away from Judea to the larger Roman world¹⁶¹ (though even in Jerusalem Jesus's mission had been misunderstood politically; Luke 23:2, 5).

Some scholars suggest that the Latin formation points to an origin for the title in the West rather than in Antioch.¹⁶² But Luke, who would also recognize the Latin formation, probably lacks good reason to suppress that origin,¹⁶³ and in fact all that would be needed for the term's origin was someone familiar with Latin political terminology, not a difficult hurdle for members of the educated elite of a major city in the empire. The title's composers may not have understood the message about Jesus well; its formation sounds like it treats "Christ" as a proper name, though Josephus also might speak of "the tribe of Christians, so named after him" (*Ant.* 18.64, if authentic).¹⁶⁴ But given the political coinage, someone understood "Christ" as head of the group and perhaps as Judea's king (the normal use of "Christ").¹⁶⁵

Some think that the term's Latin formation indicates "that it was coined by the Roman authorities,"¹⁶⁶ yet no persecution is reported, which probably weakens this proposal.¹⁶⁷ If the authorities understood what "Christ" meant to Jews, they might have concerns—though at least in the West they sometimes did not understand (see comment on Acts 18:2). Alternatively (and I think this somewhat more likely), it might stem from high-status Roman citizens in Antioch. Some think that Jewish residents with a good relationship with the Roman government may have coined the phrase in complaining about the Jesus movement to the government.¹⁶⁸ Yet even if

157. Lake and Cadbury, *Commentary*, 130; Reicke, *Era*, 194; Fitzmyer, *Acts*, 478; Hengel and Schwemer, *Between Damascus and Antioch*, 225–30; Judge, *Athens*, 269; for the significance of political partisans named for leaders, see Welborn, *Politics*, 8–9. For examples of Pompeians as Pompey's partisans, see Appian *Bell. civ.* 2.12.87; Vell. Patern. 2.49.3; 2.51.3; 2.62.1, 6; 2.63.3; 2.65.1; 2.73.2; for their conflict with Caesarians, see, e.g., Caesar *Alex. W.* 1.59 (this work may not be by Caesar); Iuliani in Vell. Patern. 2.84.1; Brutiani and Cassiani, e.g., in Vell. Patern. 2.74.1. Use as a patronymic is possible (cf. Matthews, "Names, Greek," 1023) but less likely.

158. Tac. *Hist.* 1.34 (*Othionianis*).

159. E.g., Tac. *Hist.* 2.27, 31, 34, 42; 3.9, 17, 22, 25, 29, 35, 61, 73, 77, 84; 4.1 (*Vitellianos*).

160. E.g., Tac. *Hist.* 3.6, 23, 59, 63, 69, 82 (*Flavianos*).

161. See Aune, *Environment*, 140–41.

162. Gilbert, "Propaganda," 233 (suggesting possibly Rome). Cf. Pervo, *Acts*, 295, regarding Rome as likely but Antioch as possible. From its absence in Paul and other sources of Paul's generation, he dates the term to the 90s, but (the testimony of Acts and 1 Peter aside) arguing from silence in Paul seems tenuous on Pervo's own recognition that the title was not yet a self-designation in Jesus's movement.

163. One could say that he wanted to associate the title with Paul and Antioch's Gentile mission (Acts 11:26); but given the term's association with external derision and persecution by the mid-60s (more or less by Luke's day?), would the connection with Paul really have furthered his apologetic? The term and its cognates are much more common in the Apostolic Fathers (including Ignatius of Antioch), without negative associations (1 *Clem.* 1.2; 48.4; *Did.* 12.4; *Ign. Eph.* 11.2; *Magn.* 4.1; 10.1, 3; *Trall.* 6.1; *Rom.* 3.2; *Philad.* 6.1; 7.3; *Poly.* 7.3; *Diogn.* 1.1; 2.10; 3.1; 4.6; 5.1; 6.1, 2, 3, 4, 7, 8; Papias frg. 26.1); texts mentioning the name *Christian* with a context of persecution (*Ign. Rom.* 3.3; *Mart. Pol.* 3.2; 10.1; 12.1–2; *Diogn.* 2.6; 6.5–6, 9) need not imply persecution because of that name.

164. Le Cornu, *Acts*, 622. The line may not be authentic, however. The title suggests that outsiders knew the group's leader especially more as "Christ" than as "Jesus" (Kee, *Every Nation*, 149–50, citing Suet. *Claud.* 25.4).

165. Cf. the Syrian Stoic Mara bar Sarapion, who claimed (ca. 73 C.E.) that Jesus was a "wise king of the Jews"; on this source, see Theissen and Merz, *Guide*, 76–80 (suspecting the influence of Syrian Christians, 80); Evans, "Non-Christian Sources," 455–57.

166. Dunn, *Acts*, 156; Haacker, *Theology*, 11.

167. Luke often emphasizes persecution, which could suggest that he would have mentioned it had it happened; conversely, Luke likes to emphasize Roman toleration, which could explain why Luke omits it.

168. Hengel and Schwemer, *Between Damascus and Antioch*, 229, as a possible suggestion.

relations between Jesus's followers and other Jews were strained at this point in Antioch (a suggestion for which we lack evidence), non-Christian Jews probably would not have coined a term that appears to concede Jesus's messiahship (cf. John 19:21).¹⁶⁹ Nevertheless, some suggest that they might have accepted it once it was coined; the full entry of uncircumcised Gentiles into the sect might demonstrate its distinctness from traditional Judaism, warranting use of a special name for the movement.¹⁷⁰ In Judea, however, the movement continued to be called the "Nazarenes" (possibly another title of derision) by outsiders (Acts 24:5).

That the title "first" appeared in Antioch suggests that by Luke's day the designation was widespread, though his audience was unfamiliar with where it began. Among first-century Christian sources, the title only appears later in Acts, in the mouth of a non-Christian (26:28), and apparently as a legal charge in 1 Pet 4:16.¹⁷¹ Already by 64 C.E., people in Rome were calling the disciples "Christians" when it became a chargeable offense under Nero (Tac. *Ann.* 15.44, unless Tacitus simply substitutes later language for an earlier title, which is not impossible), and Roman governors continued to apply the term to the group in legal settings in the early second century (Pliny *Ep.* 10.96). A Pompeian graffito (dated between 62 and 79 C.E.) uses the name to ridicule Christ's followers (*CIL* 4.679).¹⁷² Beginning early in the second century, Christian sources themselves adopt the title;¹⁷³ by the mid-second century, Justin uses it extensively and proudly.¹⁷⁴

The Jesus movement may have soon appeared as a philosophic sect in much of the Diaspora (see comment on Acts 19:9), but in Antioch, "Christians" were first portrayed as political partisans of the executed leader Jesus. Had the opponents meant that the Christians were literally "preaching another king" (Acts 17:7), the charge could prove dangerous. That Luke does not associate it with persecution here suggests that Antiochenes used it as derision, not as a charge of membership in a political group competing with Caesar.¹⁷⁵ The title, however, cannot have counted

169. So also Judge, *First Christians*, 437; Schnabel, *Mission*, 73. They also would not have turned it into a proper name (Le Cornu, *Acts*, 624) with a Latin formation.

170. Judge, *Pattern*, 44–45; cf. Meeks and Wilken, *Antioch*, 16. This approach apparently assumes that outsiders could distinguish the Antiochene Jesus movement's treatment of Gentiles as full members as opposed to Antiochene synagogues' treatment of them as God-fearers, but the real situation was probably much more complex and clarified only gradually. Campbell, *Deliverance*, 157, suggests that they received a new name because they stopped practicing the law. That Jewish believers gave up such practices seems unlikely, however; it is the Gentile connection that appears in our limited evidence at this stage (Acts 11:20; Gal 2:11–12). Josephus does use the term once coined, if this part of *Ant.* 18.64 is authentic (but that point is disputed). But depending on how one defines terms, Christianity and Judaism became distinct religions in Antioch only later, by the time of Ignatius of Antioch (*Magn.* 10.3; Haacker, *Theology*, 11).

171. This is probably the accusers' title for them; see, e.g., Beare, *Peter*, 167; discussion in Horrell, "Label." It seems to have become a nickname by the mid-first century in Rome (Moffatt, *General Epistles*, 159; Selwyn, *Peter*, 225, cites Tac. *Ann.* 15.44; Suet. *Nero* 16), though these reports may be colored by the period of the historians who convey them. If Judge, *Athens*, 211, is correct about the variant spelling in P.Oxy. 42.3035 (Feb. 28, 256 C.E.), "Christian" remained a legal charge in third-century Egypt.

172. Barrett, *Acts*, 556–57. Lucian also uses it for ridicule in the second century (*Alex.* 25, 38, cited in Fitzmyer, *Acts*, 478).

173. Scholars (e.g., Selwyn, *Peter*, 225; Kelly, *Peter*, 190; Dunn, *Acts*, 1) cite the term or its cognates in *Did.* 12.4; *Ign. Magn.* 10.1–3; *Rom.* 3.2–3; *Philad.* 6.1; see also *1 Clem.* 1.2; 48.4; Papias *frag.* 26.1; *Ign. Eph.* 11.2; *Magn.* 4.1; *Trall.* 6.1; *Poly.* 7.3; *Mart. Pol.* 3.2; 10.1; 12.1–2.

174. Osborn, *Justin*, 171; cf. also *Diogn.* 2.6, 10; 3.1; 4.6; 5.1; 6.1–9.

175. With Dunn, *Acts*, 156. Taylor, "Christians' at Antioch," suggests that their preaching in Antioch's Jewish community was blamed for the disturbances of 39–40 C.E. there; Jews may have been attacked then, but for other reasons (see comment on John Malalas above), and although that situation fits Rome (Suet. *Claud.* 25.4; Acts 18:2), it is not clear in Antioch. Then again, if Christians were involved in the unrest, we should not expect Luke to emphasize this point (cf. comment on Acts 18:2).

in the movement's favor when members in the West were later accused of sedition (cf., e.g., 1 Pet 4:16).¹⁷⁶

Clearly, Christians did not employ the title for themselves until later, possibly (for most of them) as late as the second century.¹⁷⁷ Luke does find a useful theological purpose to which he can put the information about the mockery: Christians now “bear” Christ’s “name” (Acts 9:15–16) on an entirely new level.¹⁷⁸ Nevertheless, Luke does not choose to use the term elsewhere except on the lips of a critic (26:28). Christians called themselves “saints,” “brothers,” “believers,” “the way,” or “disciples,” several of these being terms that outsiders would not readily concede to them; that Luke himself uses such terms rather than “Christians” supports the reliability of his account of the name’s origin.¹⁷⁹ Thus Gentiles mocked the disciples by calling them “partisans of Christos,” a Jewish king. (For mocking Jesus himself as a false king, see, for example, Luke 23:11, 35–38; for the Gospel writers and their audiences, such mockery constituted the supreme irony, since Jesus was in fact king.)¹⁸⁰ At least by a later period, Antioch’s residents were well known for mocking people.¹⁸¹ (“Nazarenes” in Acts 24:5 probably was a similar designation of ridicule by outsiders; cf. 24:14.)¹⁸²

3. Relief Mission to Jerusalem (11:27–30)

The relief mission to Jerusalem fits not only Luke’s emphasis on care for the poor (e.g., Acts 2:44–45; 4:32–37; 6:1–3; Luke 3:11; 12:33; 14:33; 18:22) but his pervasive effort to reconcile the tension between heritage and mission. The very church most engaged in reaching Gentiles (Acts 11:19–26) remains in continuity with the mother church in Jerusalem (11:27–30).¹⁸³

a. Prophets Arrive from Jerusalem (11:27)

“In those days” may stress the momentous character of those times (cf. Luke 1:24; 5:35; 21:22–23; 24:18; Acts 2:18; 3:24; perhaps Luke 1:39; 4:2) or simply serve as a chronological marker of the time something happened (Luke 2:1; 6:12; 9:36; 23:7;

176. Though Tacitus, at least, does not seem to regard them as politically dangerous. The negative connotations weaken the comparison (offered in Balch, “ΜΕΤΑΒΟΛΗ ΠΟΛΙΤΕΙΩΝ,” 170) to historians’ reports about colonies’ early name changes (Dion. Hal. *Ant. rom.* 1.9.3; 1.10.2; 1.25.2; 1.26.1; 1.30.3; 1.45.2; 1.53.1; 1.65.1; 2.2.2; 2.46.2; 2.49.1).

177. Riesner, *Early Period*, 112–13; cf. Pilch, “Jews and Christians”; Horsley, “Assembly,” 373–75. I employ the title for NT times, aware that it is an anachronism, solely because it currently remains the standard designation today in the language in which I write.

178. Gaventa, *Acts*, 180. Given Luke’s use of the verb for divine messages elsewhere (10:22; Luke 2:26)—its other primary meaning—it may be at least possible that he plays on words here. Surely there were other ways to say “named” (e.g., Acts 1:19; 4:36). A play on the similar sound of Χριστιανούς is also not impossible, though it appears at the end of the sentence to provide emphasis, framing the clause.

179. Haenchen, “Acts as Source Material,” 270 (suggesting that “disciples” was probably archaic even by Luke’s time).

180. See Keener, *Matthew*, 673, 675; cf. the early observations of Cyprian *Good of Patience* 7; Cyril Jer. *Sermon on the Paralytic* 12 (Oden and Hall, *Mark*, 226–27).

181. So Yamauchi, *Stones*, 114, citing reported insults against Apollonius of Tyana and the emperor Julian.

182. Though Luke uses “Nazarene” simply to describe Jesus’s place of upbringing (Acts 2:22; 3:6; 4:10; 22:8; Luke 24:19), Nazareth was a lowly village (cf. John 1:46), and some applied “Nazarene” as a title of derision even to Jesus (Acts 6:14).

183. Schnabel, *Missionary*, 72, even regards the Jerusalem church as the “mother church” of the Gentile mission because of Cornelius. One’s verdict will hinge on one’s definition of “mother church”; clearly Luke associates the concerted, large-scale movement instead with Antioch.

Acts 1:15; 6:1; 7:41; 9:37; 21:15).¹⁸⁴ Its greatest significance for Luke may be its evocation of biblical phraseology, especially in the form “in those days.”¹⁸⁵

That the prophets “came down” from Jerusalem reflects its higher elevation (cf. Luke 10:30), but for Christians who believed that they had entered the eschatological time of fulfillment, such language might possibly evoke also the word of the Lord from Jerusalem (Isa 2:3). That it is more topographic (or conventional) than symbolic is clear from Luke’s usage, however (see esp. Acts 15:1).

Despite the common depiction of “wandering charismatics” in the literature of NT scholars,¹⁸⁶ there is no reason to read this anachronistic typology into this passage. Gerd Theissen in particular (in his early work) overemphasized the type of early Christian “wandering prophets,” based especially on material in the Gospels.¹⁸⁷ Wandering charismatics may appear at times in early Christianity, such as in the *Didache*,¹⁸⁸ and, if the prophetic element is dominant enough, in the activities of both Paul (Rom 15:19) and some of his opponents. Elsewhere in antiquity, wandering prophets often traveled outside their land, preserving oracle collections.¹⁸⁹ But all three explicit first-century Christian examples of traveling prophets (i.e., Acts 11:27–28; 21:8–11; 15:32) represent a specific purpose, not aimless itinerancy, and probably the prophets returned to their sending communities when they finished their mission.¹⁹⁰

Moreover, itinerancy marked teachers at least as much as prophets,¹⁹¹ and the landless often wandered as well.¹⁹² In other words, mobility characterized first-century Roman society in general rather than merely prophets in particular.¹⁹³ The mobility of these prophets may be simply an instance of the general mobility of travelers in the first-century empire, when travel was easier than ever before.¹⁹⁴ Given our uncertainty about the events’ chronology, it is even possible that these prophets left Jerusalem because leaders faced persecution there (12:1) or for some other specific reason; Agabus seems not to have left permanently (21:10).

184. Bruce, *Acts*¹, 239, suggests that the phrase marks a new beginning (citing Acts 1:15; 6:1), but this does not seem persuasive here.

185. E.g., Gen 6:4; Deut 17:9; 1 Sam 28:1; 2 Chr 21:8; 32:24; 1 Macc 1:11; 2:1; 9:24; 11:20; 13:43; 14:13.

186. See critique in Keener, *Matthew*, 57, from which I have drawn some of the material in the critique here.

187. Cf. Theissen, *Sociology*, 8–16 (sometimes “mirror-reading” Jesus’s sayings); Gager, “Review,” 176. Theissen highlights socioeconomic factors in Palestine that could have led to such itinerant charismatics (*Setting*, 28–35) while curiously contrasting Paul (35–40)—part of whose mission in the NT was itinerant. Some evidence supports traveling Galilean teachers at this time, although it is probably exceptional rather than the norm (Vermees, *Religion*, 46). For a critique of Theissen’s “wandering charismatic” thesis, see Witherington, *Christology of Jesus*, 249. Galilee was small enough that Jesus could have traveled without spending most nights away from home (Overman, “Deciphering,” 194; idem, *Crisis*, 67).

188. Aune, *Prophecy*, 213, however, notes that visiting teachers (*Did.* 11.1–2; 13.2) and apostles (11.3–6) are more prominent in the *Didache* than are itinerant prophets (13.1); Harnack overstated the itinerant nature of early Christian prophecy (Aune, *Prophecy*, 202, 211). New Testament itinerancy (Philip, John) more often resembles the apostolic model (*ibid.*, 215); some cultists of the Mysteries were itinerant (Burkert, *Mystery Cults*, 31); and Theissen himself (*Sociology*, 14–15) parallels Cynics in the Greek tradition.

189. Collins, *Sibylline Oracles*, 6.

190. Aune, *Prophecy*, 212.

191. Cf. Dio Chrys. *passim*, e.g., *Or.* 3; 4; 80; Socrates *Ep.* 2 to Xenophon; Diog. Laert. 2.22; *Sent. Sext.* 18–19; Liefeld, “Preacher,” 26–133, esp. 33–59, 89–133; Bowers, “Propaganda,” 318–19.

192. Goodman, *State*, 39.

193. Aune, *Prophecy*, 211–12; cf. Boyd, *Sage*, 122–23. Aune, *Prophecy*, 214, is too generous; he regards Theissen as basically convincing, but after undercutting both the prophetic composition of sayings for Jesus and the idea that such sayings reflect the social reality of those among whom they circulated, he has dismantled the entire foundation for Theissen’s thesis.

194. On this status of travel, see, e.g., Stambaugh and Balch, *Environment*, 37; Purcell, “Travel,” 1547; for news circulated by travelers, see, e.g., 1 Cor 1:11; Phil 2:19, 23; Col 1:7–8. Nontravelers, however, often did spend most of their lives in a single area (Schneider, “Traffic”). See discussion of travel in the commentary introduction, Keener, *Acts*, 1:582–83, 585–89.

The Jesus tradition, though charismatic, provides no evidence that specifically links Jesus or his disciples with the wandering prophets proposed by Theissen.¹⁹⁵ Paul himself provides our best concrete evidence for the lifestyle commitment commanded in the Gospels,¹⁹⁶ and he is as much teacher as prophet. The travels of Samuel, Elijah, and Elisha indeed provide the strongest Palestinian models for Jesus's itinerancy, but these otherwise dominant models in the Jesus tradition make all the more striking the lack of clear evidence for groups of itinerant followers of Jesus after the resurrection.

For wandering, one might compare wandering philosophers in classical Greece and their growth in the Roman Empire (albeit with no specifically charismatic dimension).¹⁹⁷ (The itinerant apostles and prophets of the *Didache* may follow the deliberate model of Paul more than that of Agabus.)¹⁹⁸ The prophets may arrive already knowing their message; in contrast to most pagan prophecy, biblical prophecy was not always (though it was often) spontaneous (Jer 7:2; 17:19–20; 26:2; 35:2; 36:4–15, 32).¹⁹⁹

New believers in Antioch previously less familiar with Christian (or LXX) prophecy would have some knowledge about prophetic-type arts from Syria itself²⁰⁰ as well as the Greek oracular tradition.²⁰¹ On the popular level, Syrian religion was pragmatic and materialistic, though most people were aware of some cults of peculiar intensity.²⁰² Perhaps (though this is only speculation) these Jerusalemites' prophetic ministry influenced the development of that of some Antioch church leaders in Acts 13:1.

By this period the Greco-Roman world had some traveling prophetic figures, but most people viewed this form of prophecy as largely past and focused either on divination or on oracular shrines with priesthoods answering specific questions.²⁰³ Although the ancient world believed in prophets and oracular shrines, it did not expect religious movements full of prophets or characterized by large percentages of their members being prophets.²⁰⁴ Luke, however, leads his audience (whatever their prior experience in the church)²⁰⁵ to expect prophetism as pervasive in the church (2:17–18).²⁰⁶

Prophets appear later in Antioch (13:1), as well as elsewhere (19:6; 21:9; cf. Luke 2:26–27, 36), and regularly in Pauline churches (1 Cor 11:4–5; 12:10, 28–29; 13:2, 8–9; 14:1–39; Eph 3:5; 4:11; 1 Thess 5:20; 1 Tim 1:18; 4:14), as well as apparently in non-Pauline churches of which Paul knows (Rom 12:6), and other prophets appear in the NT (Rev 1:3; 10:11; 11:3, 6, 10, 18; 16:6; 18:20, 24; 19:10; 22:6–10, 18–19). Paul apparently anticipates multiple prophets even in the Corinthian house

195. Cf. Boring, *Sayings*, 59–61; Schüssler Fiorenza, *Memory*, 74.

196. Many of Jesus's radical sayings are hyperbolic (see Tannehill, *Sword*, 73–76, 139–40), but even if they are to be taken literally, they may function as much as a critique of the community as a description of it (see Keck, "Ethos," 450; Aune, *Prophecy*, 243). Cf. the proposed competition of local and translocal traditions in Scroggs, "Present State," 172.

197. See, e.g., Montiglio, "Wandering Philosophers"; Lucian *Peregr.* 16.

198. *Did.* 11.1, 4, 5; for Christian travelers on missions, see, e.g., 1 Cor 16:10, 12, 17; Phil 2:30; 4:18; 2 John 7–10.

199. See also Garland, *1 Corinthians*, 633. It was often, perhaps usually, spontaneous; many (e.g., Dunn, *Jesus and Spirit*, 228; Talbert, *Corinthians*, 89) cite 1 Cor 14:30. Yet the point is extrahuman inspiration, rather than when it is received or the duration over which it comes.

200. Aune, *Prophecy*, 41 (citing Arrian *Alex.* 4.13.5–6; Plut. *C. Mar.* 17.1–3; Lucian *Lover of Lies* 15–16; *Dial. C.* 288; cf. Florus *Epitome* 2.7.4–8).

201. On which see, e.g., Nilsson, *Cults*; Aune, *Prophecy*, 23–79, 349–68; cf. Forbes, *Prophecy*, passim; part of the excursus on prophecy at Acts 2:17–18. See fuller discussion at Acts 16:16.

202. Tracey, "Syria," 258–59.

203. Forbes, *Prophecy*, 288–308.

204. The only possible exceptions would have been far less mainstream than the Christians if we count ecstatic frenzies of bands of Galli as prophetic (which is dubious); on the Galli, see comment on Acts 8:27.

205. It may have included significant prophetic elements; see 1 Cor 14 and, for Macedonia, 1 Thess 5:20. It is not explicit in the brief letter to Philippi, but cf. perhaps Phil 1:19; Acts depicts miracles there (Acts 16:26), including one against false prophetism (16:18).

206. For earlier studies of "prophets" relevant to Acts, see Mattill and Mattill, *Bibliography*, 298–99, §§4174–88.

churches (1 Cor 14:29–32; cf. 12:28–29). Given the prevailing views of most of contemporary Judaism regarding the cessation or (perhaps more commonly outside later rabbinic circles) diminution of prophecy, the unanimity of early Christianity in this regard seems a remarkable evidence of the character of the Jesus movement’s spiritual experience.²⁰⁷ Although Josephus allows that many Essenes prophesied, he avoids speaking of true “prophets” in the present era; Greek and Syrian culture, though valuing oracles, would find this plurality of “prophets” even more striking (see fuller excursus on prophecy at Acts 2:17–18).

b. Agabus Prophecies (11:28)

“Agabus” is a rare name (the closest extant parallels being in Ezra 2:45–46; Neh 7:48; 1 Esd 5:30).²⁰⁸ Paul is Luke’s likeliest source for this material, but Luke would probably have special interest in Agabus (more than in the other prophets) also because Luke later met this itinerant prophet personally in Caesarea (Acts 21:10–11).

One would “rise” to speak in an assembly (e.g., Xen. *Cyr.* 7.5.55; see comment on Acts 1:15); it sounds as if Agabus may be speaking in the Christian assembly in Antioch. Agabus “declared” God’s message; the term σημαίνω need not include (cf. Acts 25:27),²⁰⁹ but often does, prophetic associations (cf. John 12:33; 18:32; 21:19; Rev 1:1; Dan 2:23, 30, 45).²¹⁰ The term also often implies the use of symbolism,²¹¹ this suits how Agabus communicates another prophetic message in Acts 21:11, and might (though need not) imply something about his form of presentation here.

Like some other Christian prophecies in Acts, this one predicts what the reader should expect (20:25; 21:11; cf. 19:21), and hence advances the narrative (11:29–30; 12:25).²¹² (Prophecy did not always concern the future but often did so.)²¹³ This prophecy’s form (like the prophecy Agabus gives in 21:10–11) would be recognizable to those familiar with Greek and Roman oracles as well as to those familiar with the OT.²¹⁴

c. Predicting Famine (11:28)

Many people in antiquity viewed famines as divine judgments²¹⁵ or tests,²¹⁶ and Luke also affirms that God controls famines (Luke 21:11). In Scripture, when famines

207. See 1 Macc 9:27; Jos. *Ag. Ap.* 1.41; Best, “Pneuma,” 222–25; Aune, “Προφήτης”; Keener, *Spirit*, 13–19. The later diminution of the prophetic gift in Christian circles may reflect an analogous institutional domestication of prophecy (Johnston, “Leadership,” 12–17, noting that this reaction is less than ideal).

208. See Williams, “Names,” 84 (noting its absence in Josephus and inscriptions).

209. Cf. “signaling” with a horn (Xen. *Cyr.* 5.3.44); Papias 21.1 (Euseb. *H.E.* 2.15).

210. Epict. *Diatr.* 1.17.18; Jos. *Ant.* 7.214; 10.241; Plut. *S. Sp.*, Callicratidas 6, *Mor.* 222F; *Or. Delphi* 21, *Mor.* 404E (in Lake and Cadbury, *Commentary*, 131; Johnson, *Acts*, 205); through “signs,” Xen. *Mem.* 1.1.4; Philost. *Hrk.* 16.5. The claim that the wording suggests something less authoritative than OT prophets (Grudem, *Prophecy*, 76) is therefore unwarranted; that the prophetic experience of believers is rooted in and superior to that of the OT prophets is at the heart of Luke’s theology and apologetic (cf. Acts 2:17–18).

211. As commentators sometimes observe with reference to Rev 1:1 (e.g., Beale, *Revelation*, 50–52). Even the reference in Plut. *Or. Delphi* 21 (above) may indicate “that oracles require interpretation” (Aune, *Prophecy*, 51), i.e., are often obscure (on oracles’ obscurity, see Keener, *John*, 856–57; comment on Acts 21:4).

212. Cf. Johnson, *Acts*, 12.

213. E.g., Isa 45:11; Jer 29:11; 31:17; Sir 48:24; Jos. *War* 1.78–80; 2.159; 3.351; *Gen. Rab.* 91:6; cf. 4Q268 1 3, 8. For prophesying the future in paganism, see, e.g., Dion. Hal. *Ant. rom.* 1.31.1; Livy 38.18.9; Plut. *Or. Delphi* 7, *Mor.* 397C; Arrian *Alex.* 4.13.5; Paus. 9.39.11; Aul. Gel. 15.18.2; Lucian *Dem.* 37.

214. Forbes, *Prophecy*, 287.

215. E.g., Philost. *Hrk.* 53.20; Amos 4:6–9; *Pss. Sol.* 17:18–19; *Sib. Or.* 3.235–36, 476; *Test. Jud.* 23:3; *L.A.B.* 3:9; *t. Sukkah* 2:6; *b. Ber.* 55a; *Tg. Neof.* 1 on Exod 20:15; on Deut 5:19; *Tg. Ps.-J.* on Exod 20:13; on Deut 5:19; Rev 6:5–6; cf. drought in *Sipre Deut.* 43.9.1. For plagues as judgment, cf. Diod. Sic. 14.69.4–14.71.4. Others attributed famine to fate (Men. *Rhet.* 1.3, 364.17–20).

216. *Jub.* 17:17.

were judgments they were judgments on societies, not on all the individuals who experienced them; Scripture also portrays God's concern for people in famine (Gen 50:20), and not all famines are said to be judgment (e.g., Gen 12:10; 26:1; 41:27). Although God could miraculously reverse a famine (2 Kgs 7), sometimes God simply announced that a famine would take place so that people could prepare for it (e.g., 8:1–2). God sometimes supplied direction in times of famine (Gen 26:1–2); biblically literate hearers would think especially of Pharaoh's dreams and Joseph's interpretation in Gen 41:29–36 (cf. Acts 7:10–12)²¹⁷ and perhaps also of Elisha (below).²¹⁸ Some might think of Elijah helping someone outside the Holy Land in time of famine (Luke 4:25–26, the only other NT passage speaking of a "great famine," though a synonymous expression appears in 15:14).²¹⁹ Elisha also predicted a famine (seven years, like Joseph; 2 Kgs 8:1). As God used Joseph's involuntary exile from the Holy Land to provide food for his family and others (Gen 45:5; 50:20), God uses the scattered Christians of Antioch (cf. Acts 8:1; 11:19) to provide for their siblings in Jerusalem. As Elisha, a prophet of ancient Israel, provides wisdom for God's servants in the time of impending famine, so does a prophet here.

Many scholars think that Agabus predicted an eschatological famine here, especially because it is to be worldwide;²²⁰ this could be one prophecy driven by the early church's passionate expectation of the end, which was later reinterpreted historically. Famines could have an eschatological orientation (e.g., Rev 6:5–8),²²¹ including in Luke (esp. Luke 21:11–12).²²² But famines were also a regular part of ancient life,²²³ again including in Luke (15:14); they were so common that one noted historian suggests that most people in the empire suffered sustained hunger at least at some point in their lives.²²⁴ Famine was even personified.²²⁵ As today, dearth killed more people through disease—to which malnourished bodies were particularly susceptible—than through starvation proper.²²⁶

Granted, "famines" often reflect the political rhetoric of urban culture, where,

217. Cf. Joseph as "one to whom divine secrets are revealed" (*Tg. Neof.* 1 on Gen 41:45). Although we know that the "Claudian" famine lasted several years, Luke resists the temptation to make it seven (Gen 41:30; 2 Kgs 8:1) or even half that figure (Jas 5:17; cf. 1 Kgs 18:1) to reinforce the biblical allusion.

218. Major coming events would have to be revealed to prophets; see Amos 3:7; cf. Gen 18:17.

219. Cf. Luke 21:11, which conjoins famines with "great" earthquakes; and Acts 7:11, which conjoins a famine with "great" tribulation. A famine in Elisha's time is called "great" (2 Kgs 6:25); for others, cf. Job 30:4 LXX; 1 Macc 9:24. Much later rabbis treated Elijah's famine as worldwide (*Esth. Rab.* 1:5). If the younger brother in Luke 15:11–32, who represents sinners returning to God, also points to the Gentile mission, one might connect Antioch's help to Jerusalem here (Luke 15:14), but the connection lacks other support and is too tenuous to sustain. For Luke's use of the famine motif, note also Paffenroth, "Famines."

220. Aune, *Prophecy*, 265; Knox, *Jerusalem*, 166; Nickle, *Collection*, 25.

221. Scholars cite *Jub.* 23:18 (with 23:13–14); *1 En.* 80:2; *Sib. Or.* 3.540–42; *4 Ezra* 6:22; *2 Bar.* 27:6; 70:8 (Aune, *Prophecy*, 265; see also *Sib. Or.* 2.23; *Pesiq. Rab Kah.* 5:9; *Gen. Rab.* 25:3; 40:3; 64:2; *Ruth Rab.* 1:4; *Song Rab.* 2:13, §4; *Pesiq. Rab.* 15:14/15), though often these appear among a wide range of ills. See also *Sib. Or.* 4.149–51 (perhaps written ca. 80 C.E.). Some Amoraim spoke of ten worldwide famines, the final in the messianic era (*Gen. Rab.* 25:3; 40:3; 64:2; *Ruth Rab.* 1:4). For the language, cf. the famine and "great tribulation" in Acts 7:11.

222. This is more eschatological than in Mark 13:8 because Luke applies the saying related to the idea of "the end is not yet" only to false prophets of Luke 21:8–9; but it may not directly precede the end (cf. 21:9–11). Famine (Acts 7:11), like eschatological distress (possibly 14:22), could be θλιψις.

223. MacMullen, *Enemies*, 249–54; cf. Men. Rhet. 1.3, 364.17–20; the Ptolemaic stela in Simpson, *Literature of Egypt*, 386–91.

224. MacMullen, *Enemies*, 249.

225. Cf. Schaffner, "Fames"; along with other ills in Hesiod *Theog.* 4.211–336; Rev 6:5–6.

226. Engels, *Roman Corinth*, 76; cf. Garnsey, "Malnutrition," 208. Like plagues (Thucyd. 2.47.3), famine often followed war (Polyb. 5.10.3–4; 5.19.8; 9.11a.1–4; Tac. *Ann.* 14.38; *Sib. Or.* 3.236).

some argue, “famine was a frequent threat but a very infrequent experience.”²²⁷ The poor were chronically malnourished,²²⁸ but residents of towns²²⁹ could pressure leaders to intervene quickly; food was usually available elsewhere in a region.²³⁰ There were, however, shortages of food covering large swathes of the Mediterranean world, such as those known in 328 B.C.E., 45–47 C.E.—the period relevant here—and 500 C.E.²³¹ Lack of food in the cities could lead to unrest and even riots;²³² lack of adequate transportation prevented surpluses in some areas from readily reaching areas experiencing shortages.²³³

“The entire inhabited world” is probably Lukan hyperbole (or Agabus’s prophetic overstatement), but if so, it is hardly uniquely Lukan.²³⁴ The scope of Roman rule was often described as the οἰκουμένη²³⁵ (as in Luke 2:1; Acts 17:6–7; 24:5; though Luke could use the term more broadly), even though everyone who knew even a little about Rome’s archenemies the Parthians²³⁶ would have understood that the Roman Empire was merely the “world” or civilization in which they lived; it was not the entire inhabited world. The same phraseology also applied to other, earlier empires.²³⁷ Josephus also uses the term hyperbolically (*War* 1.426; 2.372; 6.442); Luke’s hyperbole, however, makes good sense in the oracle of a prophet (Isa 10:14, 23; 13:5, 9, 11; 14:17, 26; 23:17; 24:1, 4; 27:6; 34:1; 37:16, 18).²³⁸ Luke means at most the Roman world in well over half his uses of the term (Luke 2:1; Acts 17:6; 19:27; 24:5); of the three remaining instances, two are eschatological (Luke 21:26; Acts 17:31; cf. Luke 4:5). The famine need have occurred everywhere at once no more than did Luke’s “universal” census in Luke 2:2; it was universal from the standpoint of the characters in the narrative world, and its timing in other locations was not relevant to Luke’s point.²³⁹

227. Rathbone, “Famine.” On the persistent reality of the threat, see Finley, *Economy*, 169; on the grain supply and means to compensate for shortfalls (much better organized in the empire than by Greek city-states), see, e.g., Foxhall, “Food Supply”; Rathbone, “Food Supply”; on official responses to famines, see Winter, “Shortages,” 72–75; idem, *Left Corinth*, 222.

228. Garnsey, “Malnutrition,” argues that food shortages were common (205) but that the effectiveness of measures taken against them varied from one region to another (205–6); Rome’s policies were most effective, but they drew on its empire’s resources (206).

229. Especially in favored regions such as Italy, Achaia, Macedonia, and Asia.

230. Famines often fanned enmity “between the people and local elites” (Toner, *Culture*, 66).

231. Rathbone, “Famine.” Vespasian’s policies helped renew the empire’s prosperity (Grant, “Economic Background,” 111). Famine raised food prices exorbitantly (e.g., Plut. *Sulla* 13.2–3; 2 Kgs 6:25; *Tr. Shem* 2:5); it was always to be expected during long sieges (e.g., Thucyd. 4.26.5; Hermog. *Issues* 73.16–74.1). Those who feasted while the people were starving were negatively regarded (e.g., Polyb. 38.8.10–11).

232. See, e.g., Appian *Bell. civ.* 5.8.67; Tac. *Ann.* 12.43; 1 Macc 9:24; Stambaugh, *City*, 143; MacMullen, *Social Relations*, 66.

233. MacMullen, *Social Relations*, 33.

234. With many, e.g., Lake and Cadbury, *Commentary*, 131 (who also allow a Semitism for “the whole land” of Palestine but rightly view that as less probable); Chance, *Acts*, 189. Most famines “had only regional effects” (Wiesehöfer, “Mortality,” 214).

235. E.g., Lucian *Oct.* 7; Jos. *War* 3.29 (Johnson, *Acts*, 206); Strabo 1.1.13, 15; 2.24.2; 3.3.1 (Winter, “Shortages,” 67); “almost” the whole world in Diod. Sic. 4.2.5; 5.40.2; 12.2.1 (Winter, “Shortages,” 68); Polyb. 1.1.5; 1.2.7; 3.118.9; 6.2.3; 6.50.6; Men. *Rhet.* 2.12, 422.9–10. Luke favors the term, employing it seven times (vs. Matthew and Paul once each, Mark never, and Revelation thrice). Lopez, *Apostle*, 51–54, identifies Roman artwork that could signify Rome’s rule over the world.

236. See Hor. *Ep.* 2.1.256; *Odes* 1.12.53; 1.21.13–16; 3.5.3–4; 3.8.19–20; see much more thorough discussion of the Parthians at Acts 2:9. Nevertheless, Roman artwork could transform Rome’s more ambiguous conflicts with Parthia into propaganda of Roman triumph; see Lopez, *Apostle*, 41.

237. For Alexander’s empire, see Men. *Rhet.* 2.3, 388.8–9; cf. the idea (in different words) for Cyrus’s Persian empire (Xen. *Cyr.* 8.6.20).

238. Winter, “Shortages,” 68.

239. The census of Luke 2:2 may have been carried out at different times in different locations (in contrast to the later fourteen-year cycles). See discussion and sources in the commentary introduction, Keener, *Acts*, 74–75n210.

d. The Famine during Claudius's Reign (11:28)

Most scholars doubt that a single famine swept the entire world, or even the entire Roman world, during Claudius's reign (41–54 C.E.).²⁴⁰ Allowing for Lukan hyperbole, however, many data corroborate widespread famine conditions during much of Claudius's reign,²⁴¹ and these crises in various locations were severe enough to invite new imperial measures to address them.²⁴² Unless Josephus's account diverges far from the chronology of its context, it was during Claudius's reign that Queen Helena of Adiabene arrived in Jerusalem to discover a famine (*Ant.* 20.51). "Famine" regularly meant dearth, which was indeed widespread.²⁴³ Sources less than a century later reported continuing droughts (*assiduae sterilitates*) that caused many famines during Claudius's reign (*Suet. Claud.* 18.2). During shortages, Rome always took priority in the allocation of Egyptian grain, to maintain stability in the imperial city;²⁴⁴ sometimes this distribution pattern exacerbated hunger elsewhere.²⁴⁵ Yet even Rome itself experienced severe food shortages in 42 C.E. (*Dio Cass.* 60.11) and 51 C.E. (*Tac. Ann.* 12.43).²⁴⁶ Some ancients viewed the latter famine as a divine warning, and Claudius was nearly mobbed in the streets.

Most relevant to the eastern Mediterranean world, including Palestine, is our knowledge that a severe famine appears to have struck Egypt about 45–46 C.E.; Egypt was the primary source of grain in the eastern Mediterranean world.²⁴⁷ One local list in Egypt notes that 1,222 people defaulted on their taxes in 45/46, with 1,678 doing so the following year (P.Mich. 594).²⁴⁸ Already by the summer of 45, grain prices were more than double any grain prices in Roman history before the Flavian era, in which Luke probably wrote.²⁴⁹ Although this famine was not worldwide, it affected "Egypt, Syria, Judaea and Greece."²⁵⁰ During the reign of Claudius an official in Corinth three times filled the office of *curator annonae*, which was held only during times of famine.²⁵¹

240. E.g., Dunn, *Acts*, 157, objecting that Antioch would have suffered as much as Jerusalem. But Antioch's Christians may have been wealthier than Jerusalem's; indeed, their sacrifice in view of their own impending suffering may be part of Luke's point.

241. Most commentators accept this solution (e.g., Munck, *Acts*, 109; Johnson, *Acts*, 206; Aune, *Prophecy*, 430n113; cf. Conzelmann, *History*, 82). Cf. Winter, "Shortages," 63, who applies Pliny *E.N.H.* 5.58; 18.11.68 to the excessive Nile flooding of the mid-40s (following Gapp, "Universal Famine," 259). On imperial finance in general in Claudius's reign, see Burgers, "Coinage."

242. Riesner, *Early Period*, 131–32.

243. *Ibid.*, 127.

244. Garnsey and Saller, *Empire*, 98–99; on the danger of food-related riots in Rome, see, e.g., *Tac. Ann.* 6.13; 12.43.

245. See Winter, "Shortages," 65.

246. Ramsay, *Traveler and Citizen*, 48–49; *idem*, *Bethlehem*, 251–52; Hemer, *Acts in History*, 164; Winter, *Left Corinth*, 223; Fitzmyer, *Acts*, 482.

247. Gapp, "Universal Famine"; Fitzmyer, *Acts*, 482. When even grain-producing locales ran out of grain, they depended on Egypt (*CIG* 2927, 2938; *Jos. Ant.* 15.307; Garnsey and Saller, *Empire*, 98–99), and those with greatest wealth probably bought the now scarcer Egyptian grain even during this period (cf. *Jos. Ant.* 20.51). Famine struck Egypt in *Gen* 41:54–57.

248. September–October 51 C.E.; Winter, "Shortages," 63 (who also suggests that more than half the males of Philadelphia defaulted, citing Browne, *Michigan Collection*, 64–67; again in Winter, *Left Corinth*, 221). In extreme conditions, Rome granted tax abatements (P.Cair. 49359, 49360; Lewis, *Life*, 114–15).

249. Witherington, *Acts*, 373.

250. Winter, "Shortages," 68. Eusebius reports this for Greece, and an inscription for Asia Minor (Ramsay, *Traveler and Citizen*, 48–49; *idem*, *Bethlehem*, 251–52, claiming that no period in Roman history has so many allusions to widespread famine). Famine in Alexandria causes many Jewish deaths (*Sib. Or.* 11.239–42), but this may refer to Cleopatra's earlier refusal to share grain with Jews there (*Jos. Ag. Ap.* 2.56–61; see *OTP* 1:440 n.y2).

251. Winter, *Left Corinth*, 216–20 (noting that when an official had done so in the mid-third century B.C.E., it was due to a long famine); on famine in 51 C.E., cf. Engels, *Roman Corinth*, 75 (citing *Tac. Ann.* 12.43.1; *Suet. Claud.* 18.2; Euseb. *Chron.* 2, p. 152).

Josephus reports that the ensuing dearth struck Judea with great force, probably starting when Fadus was Judea's governor but growing problematic especially in the early governorship of Tiberius Alexander (46–48 C.E.; *Ant.* 20.100–101).²⁵² A small portion of wheat sold for four drachmas (3.320). Some scholars think that a Sabbatic Year also fell in 47–48, complicating possible dependence on local production.²⁵³ Only friendly rulers outside Judea (Helena and Izates of Adiabene) were able to provide sufficient aid to reduce the effects of the famine; visiting Judea with gifts for the poor a decade later, Luke may well have heard the famous stories of help sent by the royal house of Adiabene (*Jos. Ant.* 3.320–21; 20.51–53, 101).²⁵⁴

Luke shows that the Diaspora church also sent support. Like Helena and Izates (*Ant.* 20.52–53), others who contributed funds toward feeding the hungry would be viewed as benefactors. As in the case of Corinth's *curator annonae*, noted above, local governments normally depended especially on individual benefactors to alleviate shortages;²⁵⁵ it is possible that Antioch Christians may have responded to Agabus's prophecy with "a subscription list (ἐπίδοσις) of rich Christians."²⁵⁶ (Outside the Christian community, such benefaction was not always voluntary; the "liturgy" system often drafted wealthy individuals to balance civic budgets, and those drafted often protested their poverty or named a richer person more appropriate for the "honor.")²⁵⁷ Although some, such as Manaen (Acts 13:1), probably had some means, 11:29 emphasizes that *everyone* contributed. Many suggest that assigning the role of benefactor to the entire Christian community could have appeared innovative and perhaps even revolutionary to Greco-Roman society.²⁵⁸

Some scholars contend that Luke moves a later famine of 47–48 C.E. to an earlier period to fit it into his narrative in 11:27–30.²⁵⁹ Others argue that the famine specifically in view occurred in 43–44, so that Luke has not dislocated anything chronologically.²⁶⁰ Neither approach is warranted; not the famine itself but its prediction appears in 11:28, which may be one reason "Luke completes the story" only after Agrippa's death, in 12:25.²⁶¹ As we have seen, historians writing anything but local history or a monograph about a single event had to dislocate some events either chronologically or geographically; like most, Luke probably simply struck the most effective balance available.²⁶²

252. Josephus attaches it to the time of Claudius the emperor and Ishmael the high priest in *Ant.* 3.320, but this synchronization offers less precision than that in 20.100–101 (especially if we must question Josephus's mention of Ishmael; cf. Jeremias, *Jerusalem*, 143). Zias, "Remains," suggests that the high childhood mortality (68 percent) in one burial cave reflects this period of drought.

253. Barrett, *Acts*, 563 (citing *m. Sotah* 7:8); cf. Witherington, *Acts*, 80 (more tentative, 373). This suggestion cannot be more than speculation, given the nature of the source.

254. Discussed further in Reicke, *Era*, 212–13. Euseb. *H.E.* 2.12.1 assumes that Paul's famine visit coincides with the famine that Josephus reports here; Bede *Comm. Acts* 11.29 (L. Martin, 108–9) also notes Helena's charity here. Later rabbis also praised the generosity of the royal house of Adiabene (*y. Pe'ah* 1:1, §6, on Izates's father).

255. Garnsey and Saller, *Empire*, 101; cf., e.g., Val. Max. 4.8 passim, esp. 4.8.1, 2. Donations for the poor individually were usually too small to warrant significant discussion (Hahn, "Alms," 522).

256. Winter, "Shortages," 75.

257. See esp. Lewis, *Public Services*; idem, *Life*, 177–84; Jones and Spawforth, "Liturgy"; cf., e.g., Dio Chrys. *Or.* 46.14. In classical Athens, MacDowell, "Antidosis"; Schmitz, "Eisphora," 865 (particularly during crises, such as war); Jones and Rhodes, "Liturgy"; cf. Millett, "Finance," 596. Excessive taxes (Bell, "Egypt," 300–306) and liturgies (301–2) led to Egypt's economic collapse (315).

258. Winter, "Shortages," 75; Harrison, *Grace*, 303; Parsons, *Acts*, 169.

259. Conzelmann, *Acts*, 90.

260. Tornos, "Fecha del hambre" (arguing against placement of the famine in 49 C.E. [based on *Jos. Ant.* 20.100–102] from other evidence in Josephus for a famine in 43, e.g., *Ant.* 3.320).

261. With Barrett, *Acts*, 563–64; cf. also Witherington, *Acts*, 77; Dunn, *Acts*, 158.

262. Biographies were not necessarily chronological (see, e.g., Görgemanns, "Biography"), but even history sometimes had to adapt strict chronological sequence by region, etc. (see Keener, *Acts*, 1:175n70,

Some scholars suggest that the famine prompting the collection occurred no later than 45 C.E.,²⁶³ whereas others prefer 45–46²⁶⁴ or 46.²⁶⁵ Still others suggest perhaps 48 C.E. or a little earlier.²⁶⁶ Any time during the famines before Paul's missionary journeys could technically fit, but we also need not suppose that the Antioch Christians, armed with a prophecy, waited for the strongest signs of famine to strike Judea before sending their offering. Luke provides no clear chronology (11:28–30).

Why does Luke mention Claudius's reign, which was long, without defining the period more narrowly with more detailed synchronisms? The possible answers are legion. Luke has not provided synchronisms since Luke 3:1–2, and so perhaps we should make nothing of it. It is possible, however, that Luke uses a generalizing reference to long periods of dearth instead of referring to only the troubles of a particular year; indeed, it is probable (as one expects from oral history) that he did not know the specific time. It is also possible that he intends to depict in a general way that the fulfillment followed the prophecy within a few years—that is, under the next emperor.²⁶⁷

Because everyone in the urban empire would know who Claudius was,²⁶⁸ Luke's other mention of this ruler (Acts 18:2) need not imply a deliberate connection between the texts.²⁶⁹ Perhaps famine in the empire (the part of the οἰκουμένη Luke seems to specify) during any named emperor's reign exposes the pretense of an emperor ordering all of that domain to organize for taxation (Luke 2:1), but in writing an apologetic work seeking the movement's legal toleration in the empire, Luke could hardly make such a connection clear.

e. Sending Assistance (11:29)

As already noted, Antioch was a wealthy city heavily engaged in trade,²⁷⁰ and at least some members of the Jewish community had also achieved wealth there (Jos. *Ant.* 17.24).²⁷¹ As in the case of others' benevolence during shortages, the Antiochene Christians contributed funds toward the buying of food instead of trying to ship food directly (cf. 20.51, 53; though wealthy donors could also oversee the buying and distribution of food, 20.51–52, 101).²⁷² Food was not easily transported long distances

193–94). See, e.g., Quint. Curt. 5.1.1–2, explaining his need to finish one “course of events” before pursuing another elsewhere. At least in some narrative genres, some ancient writers create forced transitions to link together disparate stories as if they happened sequentially (e.g., Ovid *Metam.* 2.708–13; 6.1–5, 148–50; some might suggest Mark 1:21, 29); stories within stories were common in ancient storytelling (e.g., Ovid *Metam.* 4.37–388, within 4.1–415).

263. Riesner, *Early Period*, 125–36 (dating the strongest period of famine between 44 and 46 C.E., pp. 132–34).

264. Hemer, *Acts in History*, 165.

265. Bruce, *Commentary*, 244.

266. Witherington, *Acts*, 373; cf. Conzelmann, *Acts*, 90 (47–48 C.E., complaining that Luke dates it too early).

267. Bede *Comm. Acts* 12.1 argues that the famine occurred in Claudius's fourth year and Agrippa died in his third; hence he dates the offering to that time. But the offering follows the prophecy, not the famine itself, and so we cannot infer too much about the chronology from the famine's timing, in any case.

268. On Claudius, see, e.g., Eck, “Claudius,” and sources there.

269. If a connection existed, the famine (Acts 11:28) could constitute judgment for the expulsion of Jews in 18:2, but given the portrayal of Jerusalem's judgment in Luke 21, this is unlikely.

270. For trade between Syria and Rome, see Charlesworth, *Trade Routes*, 36–56. Various parts of the empire were intertwined economically (see, e.g., Purcell, “Economy,” 505), providing a model for the Christians here.

271. Some of this wealth undoubtedly made its way back to Jerusalem (though the description of serving the “temple” in Jos. *War* 7.45 is ambiguous).

272. Basic staples in some locations were grain, wine, and cheese (Thucyd. 4.26.5); wheat was basic (Diod. Sic. 4.3.5), and Palestinian staples could include bread and fish (Neusner, *Beginning*, 23; cf. Pliny E. *N.H.* 22.68.138; Lewis, *Life*, 68). Here grain would be most important (cf. grain and dried figs, imperishables, in Jos. *Ant.* 20.51).

in antiquity, making one region's surpluses less valuable to redress another region's dearth.²⁷³ Yet such supplies were more easily procured from Egypt and Cyprus, in any event (20.51).

If the Antiochenes sent the money during the famine rather than before it (which is not really clear, though it would reinforce the need to send money rather than food), we should note that later historians report that Syria suffered the famine as well as Judea (Orosius *Hist.* 7.6.12). Certainly Antioch faced its share of disasters in this period, perhaps generating compassion but also local needs that would demand attention.²⁷⁴ The Christians sacrificed there on behalf of others in the face of prophesied, impending famine in their own region also. Moreover, Luke indicates that each gave in proportion to what he or she had.²⁷⁵

Why would Jerusalem be targeted for help when rural Christians might also see the results of famine?²⁷⁶ Although Jerusalem had a higher living standard than the surrounding Judean countryside, it also had a correspondingly higher cost of living.²⁷⁷ Moreover, most cities depended for food on their rural surroundings; the size of most cities was limited by the ability of countrysides (or, exceptionally in Rome, the massive grain fleet; or in Corinth, probably, trade) to sustain them.²⁷⁸ Presumably the persecution narrated in Acts 12:1–2 would have also exacerbated economic distress (though cf. comment on Acts 12:13). Yet an offering for the needs of the Jerusalem church not only demonstrated Christian solidarity across cultural and geographic boundaries (cf. 2 Cor 8:1–2, 13–15; 9:1–4, 11–14); it also demonstrated loyalty to and solidarity with the faith of the earliest Jewish church (cf. Rom 15:26–27).²⁷⁹ Diaspora Jews were already accustomed to send money to Jerusalem on other occasions (e.g., Jos. *Ant.* 16.171). The church in Antioch might not be large enough to help all Jerusalem, but they were obligated to sacrificially assist at least those considered their spiritual siblings.

Luke elsewhere uses *διακονία* and its cognates for financial ministry (Luke 8:3; Acts 6:1–4) as well as ministry of the word;²⁸⁰ as the Twelve had performed social ministry (Acts 4:35–37) and the Seven began with such ministry (6:3) before larger ministries of preaching (6:8–10; 8:5), so Barnabas (who had donated under the ministry of the Twelve, 4:37) and Saul engaged in social *διακονία* (11:29–30; 12:25) before entering on their Gentile mission (13:1–5).²⁸¹ Paul's letters also use *διακονία* for a collection (2 Cor 8:4; 9:1, 12–13).²⁸²

Although Jesus had multiplied food miraculously (Luke 9:16–17), the same passage invited disciples to share what food they had (9:13), a command that fits Luke's larger

273. MacMullen, *Social Relations*, 33. Feeding a small tribe (Gen 42:3) would be less difficult, and again, Egypt was much closer than Antioch.

274. For earthquakes in Antioch during the reigns of Caligula (April 9, 37 C.E.) and Claudius, see McRay, *Archaeology*, 231–32.

275. People might give in proportion to what they had (Deut 16:10; Sir 14:13; Tob 4:8, 16), as Paul also hopes concerning the Diaspora churches' later offering for Jerusalem (1 Cor 16:2; 2 Cor 8:12, 15).

276. Some areas were more susceptible to dearth than others; in some locations, grain prices were always at a level that they reached elsewhere only during shortages (Dio Chrys. *Or.* 46.10).

277. Le Cornu, *Acts*, 632 (citing *m. Arak.* 6:5; *Ma'as.* Š. 4:1; *y. Yoma* 4.1.41b).

278. It is possible too that though the greater number of needy believers would be centered in Jerusalem, food could be disseminated more readily from there if needed elsewhere in Judea.

279. Knox, *Jerusalem*, 166. Cross-cultural solidarity was one purpose for Paul's offering for Jerusalem (Rom 15:27).

280. For background, see comment on Acts 6:1–4.

281. This may be Luke's simplifying schema, since Paul was likely preaching in Tarsus as well; see comment on Acts 9:30; note Acts 15:23, 41.

282. Betz, *Corinthians*, 46–47, treats *διακονία* as an administrative term here; Furnish, *II Corinthians*, 401, cites parallels in *Testament of Job*; Nickle, *Collection*, 107, likewise locates the background in Jewish usage. This appears in a context of nonmonetary terms (see Dahl, *Studies*, 37–38; Matera, *II Corinthians*, 181).

emphasis on sharing possessions (12:33; 14:33; Acts 2:44–45; though Luke finds the command in his source, Mark 6:37). In earlier times of famine, those with means had shared resources (2 Kgs 4:38, 42). Luke portrays the Antioch church's mission here as a positive example and a model for economic sharing;²⁸³ he also underlines thereby the ideal unity of the Jerusalem and Diaspora churches. Whereas in 11:22 the Jerusalem church sent Barnabas to check on the Antioch church, in 11:29–30 the Antioch church “sends” Barnabas and Saul to serve the Jerusalem church.

f. The Jerusalem Church's Elders (11:30)

The “elders” to whom the Antioch Christians sent the offering are leaders in the Jerusalem church (Acts 15:2; 21:18), just as other churches had elders (14:23; 20:17; see much fuller discussion at Acts 14:23). The practice was borrowed from the traditional Israelite leadership structure (e.g., Exod 17:5; 18:12; 19:1; Lev 4:15; Num 11:30; 16:25; Josh 7:6; 2 Chr 5:2; 1 Macc 12:35; 13:36; 14:20; 3 Macc 1:8), including in towns and villages (e.g., Ruth 4:2–11; 1 Sam 16:4; 1 Kgs 21:11; 2 Kgs 23:1; 1 Esd 9:13; Jdt 6:16, 21; 7:23; 8:10; 10:6) and in Jerusalem (1 Esd 6:5; 9:4; 1 Macc 7:33; 2 Macc 14:37).²⁸⁴ It also appears in Luke's descriptions of Galilean towns (Luke 7:3) and in Jerusalem (9:22; 22:52; Acts 4:5, 8, 23; 6:12; 23:14; 24:1; 25:15).

The Jerusalem church's elders appear alongside the apostles (Acts 15:2, 4, 6, 22–23; 16:4), hence probably not simply as a replacement for the two lost apostles (12:2, 17).²⁸⁵ Because the apostles had relinquished financial oversight of the community to the Seven (6:2–3, on the likeliest interpretation of the passage), the elders may have assumed many of these responsibilities when the surviving members of the original Seven scattered (8:1). “Through the hand of” Saul and Barnabas reflects a frequent LXX idiom, simply meaning “through.”²⁸⁶

g. The Visit's Timing (11:30)

I believe that the data surveyed above suggests that this trip probably occurred later than the point at which it is described (to retain the narrative connection between the fulfillment and the earlier prophecy); it may also contain elements, known from Paul's later collection, that (for whatever reason; see comment on Acts 24:17) Luke will not include.²⁸⁷ This is not the only time the Antioch church sends this pair as representatives to Jerusalem (15:2); their connection with Antioch in the context of a rift with Jerusalem also appears in a different setting in Gal 2:13.²⁸⁸ Further, if a famine occurred, Diaspora Jewish Christians might well be expected to respond in such a way;²⁸⁹ certainly, Diaspora Jews had long shown their fiscal loyalty to Jerusalem

283. With, e.g., Chrys. *Hom. Acts 25* (Martin, *Acts*, 150–51), on caring for the poor (given Chrysostom's own associations with Antioch, his appreciation for this model is not surprising). From a Majority World perspective, this text also models “stewardship without paternalism” (Kisau, “Acts,” 1321).

284. Fitzmyer, *Acts*, 482–83, cites also an extrabiblical reference to Jerusalem elders in SEG 8.170.9. For fuller discussion of background, see comment on Acts 14:23.

285. Pace Bauckham, “James,” 433. He finds doubtful the comparison with elders functioning alongside tribal princes in the Pentateuch (430; cf. Deut 5:23; Josh 24:1; 1 Kgs 8:1; 2 Chr 5:2; Isa 3:14; Bar 1:4).

286. Haenchen, *Acts*, 375n4; e.g., 1 Chr 29:5, 8. In the NT, διὰ χειρὸς appears only in Acts (Acts 2:23; 7:25; 11:30; 15:23).

287. For the visit's occurring after Agrippa's death in 44 C.E., see, e.g., Peterson, *Acts*, 358. For one discussion of the offering here in light of information about the collection in Paul's letters, see Horn, “Kollektenthematik.”

288. Cf. Barrett, *Acts*, 559 (though unsure whether the sending in Acts 15:1–5 represents a separate event or a doublet of this one).

289. Marshaling considerable evidence, Watson, “Collection,” argues that Paul's collection is rooted in Jewish practices of aid for the poor. It would have been less intelligible, and hence more difficult to raise money, among those without a synagogue background.

in their annual half-shekel tax.²⁹⁰ In such a case, like other Diaspora communities, they would send trusted representatives,²⁹¹ and it would be natural in a case like this one, where it was possible, to send representatives who knew Jerusalem well.²⁹²

Other historically plausible views have also been suggested, although in the absence of other sources they necessarily require a greater degree of speculation. Some scholars think that Luke created this visit out of other data (such as Paul's later collection).²⁹³ Although this suggestion is not impossible, it is not strictly necessary; Paul's commitment to the collection in his writings of the mid-50s need not imply that he had never before been involved in such an undertaking.²⁹⁴ Indeed, an undertaking a decade or so earlier on a smaller scale could help explain what was the seed for his larger plan later in his ministry, though Luke does not report the larger one (see comment on Acts 24:17).²⁹⁵ (Some suggest that there were multiple collections.)²⁹⁶ Or this could be a trip by Barnabas and some other colleague into which Luke has compressed Paul's later collection activity because he cannot focus on it later yet wishes to include its most important point (including Paul's concern for the Jerusalem poor; cf. Gal 2:10) here.²⁹⁷

Many others see this visit as the Jerusalem visit of Gal 2:1–10, citing discrepancies between Gal 2 and Acts 15;²⁹⁸ Luke's emphasis on concern for believers' sharing leads to the emphasis described here (cf. Gal 2:10).²⁹⁹ But the parallels between Gal 2 and Acts 15 are far stronger than any discrepancies; parallels seem compelling (see comment there), and the discrepancies can be explained mostly on the basis of the writers' different perspectives and agendas.

A major objection to Acts 15 representing Gal 2 is that Gal 2:1 sounds like Paul's *second* visit to Jerusalem (1:18). (Others use the same argument to make Acts 11:30 and Acts 15 doublets for the same visit.) But must it really disallow the possibility of brief intervening trips? Paul's point in Galatians is to define his relations with the

290. Some compare Paul's collection with the half-shekel temple tax (esp. Nickle, *Collection*, 74–99; cf. Panikulam, *Koinōnia*, 36ff.; Bruce, *Commentary*, 429n28), though a larger component of the imagery is probably the nations bringing tribute (e.g., Isa 60:5–11; Sanders, *Jesus and Judaism*, 93). Some count the collection's voluntary character against the temple-tax parallel (Witherington, *Corinthians*, 426n62), but the analogy may be useful without being exact.

291. De Ridder, *Discipling*, 125; Nickle, *Collection*, 130. The number of delegates was also not unusual (cf. Betz, *Corinthians*, 72).

292. Admittedly, Barnabas was closer to the apostles than Saul had been (Gal 1:18–19; cf. 2:13; though cf. Acts 9:27–28), and it would have taken some of his boldness for Paul to venture back to this city (cf. Acts 9:29).

293. Cf. Boismard and Lamouille, *Actes*, 2:131–32; Johnson, *Acts*, 208 (though noting that every detail disagrees); cf. Dunn, *Acts*, 158 (though he ultimately regards another view as more likely).

294. Blomberg, *Poverty*, 178n5.

295. Nickle, *Collection*, 72; Witherington, *Acts*, 426n62. Occam's razor in this case might cut either way; is it simpler to assume a single collection explaining all the reports or to accept the reports we have in Acts and the Pauline corpus that imply two collections, each mentioned only by the other source? But in the final analysis, the two-collections explanation seems somewhat simpler to me because to harmonize the two requires explaining Barnabas in the one report though his presence seems impossible in the later corpus (only Acts details when Barnabas and Paul stopped traveling together, but 1 Thess 1:1 implies that Silas was Paul's traveling companion by the time he reached Macedonia; cf. 2 Cor 1:19; 2 Thess 1:1).

296. Watson, "Collection," 183–84, concludes that the collection reflected common early Christian practice of caring for the poor.

297. Streeter, *Gospels*, 556–57n1 (following Renan), thinks that Luke knew of a trip undertaken by Barnabas and another person and wrongly assumed that the other was Paul. A deliberate foreshortening of narratives would, however, seem more likely.

298. E.g., Witherington, *Acts*, 90–97, 375, 440–43; Hoerber, "Galatians and Acts"; Morgado, "Paul in Jerusalem"; Faw, *Acts*, 170; Larkin, *Acts*, 218; Schnabel, *Mission*, 988–92; Rainer Riesner, "Pauline Chronology," 20, attributes this view to a "growing number of exegetes." Cf. Bunine, "Réception," suggesting that Luke moved the Jerusalem Council to Acts 15 but that it occurred here in his source.

299. Witherington, *Acts*, 375.

Twelve, not to recount any minor journeys to Jerusalem;³⁰⁰ he may have recounted only visits where his purpose included conferring with the apostles. Further, that details sometimes slipped Paul's memory elsewhere (1 Cor 1:14–16, if this is not a rhetorical device) means that he need not have recalled every detail, relevant or not; Galatians, though not a totally spontaneous composition, was undoubtedly composed with less forethought than was Acts. Further, Acts 11:30 could be a later trip, placed here because it involves the *future* famine that Agabus prophesied, fulfilled only later in Claudius's time (11:28). (That the trip is later is probable; the problem with attempting to date this trip after the Jerusalem Council, however, is that Barnabas and Saul were no longer traveling companions after 15:39 nor working directly for the church in Antioch. If it is Paul's later collection, mentioned only in passing in 24:17, Luke has certainly exercised more literary liberty than is usual for him.)

Another objection, often unstated, might be that some scholars wish to date Galatians early to deny that justification by faith is a late development in Paul's theology.³⁰¹ This interest is understandable, but even the most conservative scholars will agree that, by itself, this should not dictate the outcome of our inquiry, which should follow the best textual evidence rather than follow pragmatic lines. In any case, 1 Thessalonians (probably Paul's earliest letter) already provides a basic outline of the gospel message,³⁰² even if not as explicit or directed to the same polemical settings as Romans and Galatians later. The evidence seems to me to better fit a correspondence with the Jerusalem Council of Acts 15; see comment there.

More important than ascertaining the precise events that lay behind Luke's narrative is hearing the point that he makes from them. The church members' caring for one another's economic needs (2:44–45; 4:32–27; 6:1) had now crossed geographic and (given the Gentile Christian influx, 11:20) even ethnic and cultural boundaries. Luke's model of economic sharing should extend beyond the local level (outside Jerusalem, e.g., 9:36, 39) to believers from other peoples and places. This sharing stresses the church's ideal translocal unity, including economic unity. If Luke hoped that his readers would embrace his views, he would certainly be sorely disappointed by modern Western Christendom.

Yet Luke's views on the matter hardly formed in a vacuum. Paul also agrees that believers in one location are obligated to care for needy believers in other parts of the world (2 Cor 8:13–14); because Paul's later collection included Macedonia (Rom 15:26; 1 Cor 16:5; 2 Cor 8:1; 9:2–4) and was a major component of the trip surveyed in Acts 20:3–5, Luke (present from 20:5 forward) certainly knew Paul's collection and the ideology behind it, though he did not report it (apart from 24:17). But whereas Paul emphasizes the salvation-historical dimension of the connection between the Jerusalem church and Gentile believers in the Diaspora (Rom 15:27; cf. Gal 2:10), Luke emphasizes the ideal of *κοινωνία*, economic partnership,³⁰³ already modeled in the earliest church after Pentecost (Acts 2:44–45).³⁰⁴ Just as Stephen and Philip, like the apostles before them, began in a ministry of service to the poor before their public preaching ministries (6:3–5, 8), so Barnabas and Saul serve the poor before their coming mission (13:1–4).

300. With Robinson, *Redating*, 40.

301. Campbell, *Deliverance*, 197–98, who rejects “justification theory,” notes the convenience of the early date for justification's supporters (although most would not regard this date as necessary for their view).

302. First Thessalonians employs *πίστις* or *πιστεύω* thirteen times, especially for embracing the gospel message; it speaks of deliverance from God's wrath, etc.; see more fully Kim, *New Perspective*, 85–99.

303. See comment on Acts 2:42 (though Paul also uses the term in explaining the collection, Rom 15:26; 2 Cor 8:4; 9:13; cf. Gal 2:9–10).

304. Cf. Johnson, *Acts*, 208.

Luke interrupts his narrative here and completes it at 12:25, revealing that the entire process took place over time and perhaps also implying that Paul again came to Jerusalem at a dangerous time (12:1–3). Temporary suspension of narrative and other forms of suspense were common in ancient novels,³⁰⁵ but they also appear in other genres. Thus Polybius leaves Carthage about to destroy Rome at the end of book 3 of his *History of the Roman Republic*, then shifts to an account of Greece during the same period, returning to Rome only later. This approach fits the needs of chronology (as noted above, geography and chronology offered competing demands) but also creates suspense.³⁰⁶

Though Luke's arrangement of the narrative is due partly to competing demands of chronology and geography (as noted), the Antioch church's gift to Jerusalem frames it in such a way as to imply (at least on the narrative level) some sort of relationship. Certainly the Jerusalem church was oppressed and needed outside help; a situation like that depicted in Acts 12 might allow a few prominent Christian landowners in Jerusalem (12:12–13), but they might have trouble attracting many new ones.³⁰⁷ Moreover, it appears that the Antioch church's leading emissaries came to Jerusalem (their long-standing "home") at a time of great danger (whether before or during the prophesied famine), perhaps leaving only when Agrippa died (12:24–25). Because of Luke's historical method, we cannot be certain when this happened historically, but what we gather from the way the narrative world is portrayed is the narrative impression that Paul and Barnabas shared some of the Jerusalem apostles' period of potential peril. Possibly some other Antioch Christians accompanied Paul and Barnabas on the ship to Caesarea and by land to Jerusalem, for safety's sake (Mark returned with them from Jerusalem, 12:25), but Luke focuses on the key individuals for his account.

305. E.g., Heliod. *Eth.* 1.1 (opening in the middle of a scene whose background does not appear until 5.28–33); 2.11; 2.25–4.21; in fictitious dialogue in Philost. *Hrk.* 25.16–17.

306. Likewise, in a different narrative genre, Cicero teases his audience, taking the story forward, thwarting expectations and asking, "Are you expecting more?" before reaching the climax of Verres's crime (*Verr.* 2.5.5.10–11). Luke's break does not so much produce a parenthetical narrative (Acts 1:18–19 suits that better) but certainly isolates 12:1–24 as a distinct unit.

307. On the confiscation of property in antiquity, see comment on Acts 18:2.

PETER VERSUS HEROD (12:1–24)

The narrative has shifted back and forth between Paul (Luke’s primary agent of the foreign Gentile mission) and Peter (leader of the Jerusalem apostles); this is the last major narrative with Peter as the central human character. During a previous persecution, the apostles remained in Jerusalem (8:1); now the persecution becomes so harsh that even Peter leaves (12:17), if only for a time (cf. 12:23; 15:7). The locus of God’s activity, and focus of Luke’s narrative, is gradually shifting. God continues to be active in the Jerusalem church, as 21:20 demonstrates, but especially if Luke’s ideal audience hears this work anytime after 66 C.E., it will know that the movement’s future must lie beyond Jerusalem.

In 10:1–11:18, an apostle welcomed a military officer of Rome into God’s people. Here the supposedly pro-Roman king of Judea, like the Sanhedrin before him, opposes the same apostle—contributing (along with, ironically, Agrippa’s own acceptance of pagan values) to the king’s own demise (12:23). (Historically, Agrippa’s catering to Jewish nationalism indeed seems to have encouraged nationalist resistance to Rome, although he undoubtedly would have tried to check this trend had he survived.) Yet it is the Jewish rather than the Roman perspective that is most vital here. Although it is not yet time for the kingdom to be restored to Israel (1:6–7), Luke leaves no doubt that Jesus’s apostolic witnesses (1:8) are God’s agents, who (like Israel’s ancient prophets) bear an authority ultimately more consequential than that of political authorities.

That the mission of Paul and Barnabas to serve the Jerusalem church frames the account of Agrippa’s persecution suggests that (in terms of narrative implications, not necessarily historical chronology) representatives of the Antioch church face risks and share the Jerusalem church’s sufferings. It is also part of Luke’s technique for transitioning from a story especially about Peter and the Jerusalem church to his story about Paul and the Gentile mission, in this section of Acts cutting back and forth between them (Paul or the Antioch church in 7:58–8:3; 9:1–31; 11:19–30; 12:25–13:3; Peter or the Jerusalem church in 8:14–25; 9:32–11:18; 12:1–24). Once Peter leaves Jerusalem (12:17), the narrative soon follows Paul through the rest of Acts (12:25–28:31).

1. Peter’s Deliverance (12:1–17)

Although James dies, God’s angel rescues Peter from prison and imminent execution. Ironically, however, neither he nor the people praying for him initially believe it. This irony is close to the heart of the narrative, reminding the reader that although God often acts behind the scenes or through angels, it is still God’s purposes, rather than the excellence or faith of the narrative’s chief human characters, that drive the church’s expanding mission.

Agrippa I is the most dangerous and potentially lethal human oppressor of the church in Luke's narrative so far. Granted, he is less personally committed to destroying the young movement than Paul had been, and in focusing on the leaders, he possibly participated in the killing of fewer Christians than Paul had (we do not know how many of Paul's detainees died). Nevertheless, he succeeds in killing one apostle and nearly kills a second; he also holds more power to expand the persecution than previous oppressors had. The hostility of this king thus raises the narrative's suspense to a new level.

a. Introduction

Although martyr stories constitute a common genre or topic,¹ this passage is hardly a martyr story. James's execution is mentioned almost in passing to build suspense for Peter's situation, which leads to escape. For whatever reasons (such as for positive legal precedents, for miraculous demonstrations of God's power, or for "marketability" in Theophilus's circle), Luke keeps his narrative focus mostly positive and upbeat. Stephen's martyrdom is depicted in detail to provide Luke's sufficient sample, though even here positive (albeit inadvertent) effects are described (8:4). Other martyrdoms are, generally, at most hinted at (9:1; 22:4)² or passed over quickly (12:2; 26:10 [if not a generalizing plural]), and Luke ends his work happily without explicit reference to Paul's martyrdom (28:31). Luke probably writes for a church that needs to be ready for persecution (cf. Luke 9:23; 14:26–27; Acts 14:22) but is not facing major persecution (except perhaps ridicule) at the time.³ Luke's portrayal of the persecution is less fresh and less angry than Paul's (1 Thess 2:14–16).

Even after Peter departs from Jerusalem, however, Luke is not quite finished with the events of Acts 12:1–17; the passage goes on to speak of Herod's miserable death (12:23). His description fits typical pictures of the divinely ordained, horrible ends of tyrants in Jewish literature (see comment on Acts 12:23) and carries forward the narrative contrast between the powerful oppressor and the powerless saints who depend on God.⁴

Some scholars point to the persecution of Acts 12 and argue that it explains why the base for the Gentile mission dare not be Jerusalem, justifying the shift in narrative.⁵ The persecution and the need for Antioch's offering do indicate that the church is stronger if not dependent on the circumstances of any one location. But we should also keep in mind that Jerusalem is not persecuting Jewish Christians in 21:20, though fiercely opposed to the Gentile mission (22:21–22); even in a single location, time may bring change. What the opposition of 12:1–3 (and especially its popular support base, 12:3; cf. 12:11) reveals is that the church cannot depend on the vagaries of popular support in any one location (cf. Luke 23:21); it must be universal if it is to flourish.⁶

Dibelius thinks the section legendary but nevertheless preserved carefully by Luke in the form in which it reached him, since it presupposed knowledge of John Mark

1. E.g., 2 Macc 6–7; Wis 2:12–20; CPJ 2:55–107, §§154–59. See fuller discussion at Acts 7:54–60.

2. Whether to de-emphasize Paul's role in saints' deaths or (by contrast) to emphasize his harshness by implication though in historical fact he had not killed anyone.

3. Brawley, *Luke-Acts and Jews*, 25, noting the same phenomena, attributes them to Luke's possible warning against "a martyr complex," but I think this less likely. In any case, Luke's work is less overshadowed by the specter of persecution than is Mark's Gospel.

4. Cf. Maciel del Río, "Pedro dormía" (emphasizing that political powerbrokers are not the final arbiters of history).

5. Witherington, *Acts*, 383.

6. If I am correct in dating Acts after 70 C.E., Jerusalem's fall would confirm the same point for Luke's audience with greater finality.

(12:12) and James the Just (12:17).⁷ Given our greater confidence in Luke's literary skills, we would attribute this presupposed knowledge not to Luke's source but to Luke himself; his ideal audience knows something more of these stories than we generally can today. Still, Luke's oral source here provides him substantial material.⁸ Although the section is full of strong literary connections with other material in Luke-Acts, the timing fits Agrippa's brief reign, the escape fits Jerusalem's topography, and Agrippa's death fits Josephus's account. (Agrippa's personality depicted here also fits the more negative side of his personality in Josephus.) Agrippa was a popular king, and it would not make sense to have invented his persecution of the church if it did not occur. As noted below, James (who figures heavily in gospel tradition) probably did die at this time, whereas Peter did not (Gal 2:9; cf. 1 Cor 1:12; 9:5).

The oral story on which Luke here depends may have been shaped, from its first telling, by the events of Agrippa's time. If most Jerusalemites had viewed Caligula's sudden assassination as judgment for opposing God's temple,⁹ Agrippa's sudden death for accepting divine praise would fit the same pattern. By claiming the right to take the lives of God's people (12:1–3), Agrippa had usurped a divine prerogative; God countered this offense both by sparing one of his servants (12:3) and by taking Agrippa's life (12:23).

Luke frequently parallels Peter, Paul, and some other characters in Acts with Jesus.¹⁰ Whereas Peter is not executed (in contrast to Stephen, whose martyrdom follows details of Jesus's), there are clear parallels between this final major story of Peter in Acts and Luke's passion narrative for Jesus. Johnson provides one of the most complete summaries:¹¹

Jesus in Luke 22–24	Peter in Acts 12
Passover setting (22:1)	Passover setting (12:2)
A Herod is among the powerful oppressors (23:6–12; Acts 4:27)	Herod is the powerful oppressor (12:1)
Laying on hands (9:44; 20:19)	Laying on hands (12:1)
“Arresting” (22:54)	“Arresting” (12:3)
“Handing over” (23:25; 24:7)	“Handing over” (12:4)
“Angels” announce to women (24:23)	An angel guides Peter (12:7–10), and he announces his freedom to a woman (12:13)
Women are disbelieved (24:11), and disciples later disbelieve “for joy” (24:41)	Rhoda leaves Peter “because of joy” (12:14), and disciples disbelieve her (12:15)
The disciples think Jesus a “ghost” (24:37)	The disciples think Peter a ghost of sorts (12:15)
After conversation, Jesus withdraws (24:51)	After conversation, Peter withdraws (12:17)

Wall rightly notes that these parallels facilitate Luke's transition from Peter to James in the Jewish mission and from Peter to Paul in the Gentile mission.¹²

7. Dibelius, *Studies in Acts*, 21. Dibelius's view is more defensible than that in MacDonald, “Acts 12:1–17 and Iliad 24” (despite MacDonald's undeniable ingenuity, more helpfully displayed at some other points); MacDonald argues that Luke composed this passage as a retelling of Hom. *Il.* 24, with an angelic appearance, an escape, and a gate scene. The parallels are tenuous: whereas angels, escapes, and gates are common, Acts, e.g., does not include a handing over of a corpse, lacks a parallel to the miraculous transport of Priam to beg for the body, and does not function as an anticlimactic ending. See further comment below.

8. If we need to conjecture a particular oral source, Luke could have heard from Paul (see comment on Acts 16:10) what Paul could have learned from John Mark (see Acts 12:12, 25; 13:5, 13); this would account for the names of the homeowner (12:12) and the servant (12:13) as well as the architecture (12:13). The events of 12:20–23 were public knowledge, making a particular oral source impossible to isolate.

9. See Theissen, *Gospels*, 232.

10. See the commentary introduction, Keener, *Acts*, 1:555–62, and sources cited there.

11. Johnson, *Acts*, 218; for a somewhat different list, see Green, “Acts,” 751. See now even more extensively Marguerat, *Actes*, 429.

12. See Wall, “Successors to ‘Twelve.’”

b. Herod's Persecution (12:1–5)

Pleasing his constituency, Herod Agrippa I executes James and prepares to do the same with Peter after the Passover festival. Agrippa acts in character with some of what is known of him extrinsic to Acts and in character with opposition to the gospel in Acts.

I. KING HEROD AGRIPPA I (12:1)

Agrippa I had curried favor with influential people in Rome until achieving the authorization to rule Judea and eventually being sent back to Judea to rule. Josephus's portrait of this king is fairly positive, but it is also clear that Agrippa remained eager to please his constituency. Luke's name for him ironically links him with his relative "Herod" (Antipas), also a persecutor of God's servants.

(1) Agrippa as King

Agrippa I assumed control of Philip's tetrarchy in 37 C.E., added Galilee and Perea at Antipas's exile in 39, and in 41 received all Judea.¹³ Although he came to power through his friendship with Caligula, he was unable to relocate to Judea until after Gaius Caligula's assassination in 41, when Agrippa, sent by Claudius, achieved the height of his power.¹⁴ He reigned in Judea only briefly, dying in (possibly) 43 or (much more likely) 44.

Although Agrippa was particularly loved by his people and known for his piety (see comment on Acts 12:3), this affection was partly due to contrast with the other alternatives since self-rule under the Hasmoneans. Agrippa's youth was notoriously dissolute; he squandered his wealth in Rome (Jos. *Ant.* 18.143–46) and returned to Palestine in debt and suicidal until his sister Herodias helped him (18.147–49).¹⁵ He retired to his friend Flaccus, governor of Syria, but fell out with him also (18.150–54).

He did endear himself to Gaius Caligula (18.167–68), but his desire for Caligula to become emperor (18.168) led to Agrippa's imprisonment by Tiberius (18.187) until Caligula became emperor and helped his friend (18.237; Dio Cass. 59.8.2).¹⁶ Some historians have even complained (though probably with a Roman cultural bias) that Gaius "learned unwholesome lessons from Herod Agrippa and other young Oriental princes with whom he was allowed to associate."¹⁷ Josephus claims that Agrippa's later slander against Antipas helped lead to the latter's banishment (*Ant.* 18.250–54, esp. 250); after this, Agrippa added Antipas's territories of Galilee and Perea to his own. Although the Jewish people had good reason to appreciate him, Luke is not condemning a persecutor who lacked known character flaws.

Agrippa had long socialized on familiar terms with the politically powerful. Agrippa was lavish with gifts to Caesar's freedmen, seeking to acquire favor even to the point of ruining himself financially (Jos. *Ant.* 18.145). He further borrowed a million drachmas from one of Caesar's freedmen, lavishing the surplus (after paying his previous debt) on honoring Gaius Caligula (18.167). Although politics may have informed his choice of friends, he was not always politically discreet; indicating his hope that

13. For discussion of Agrippa I, see Stern, "Herod," 288–300 (and bibliography, 304–5); Feldman in *Josephus*, LCL, 9:474–75; Reicke, *Era*, 195–97.

14. The assassination did not upset the legal status of client kings whom Gaius appointed; see Wardle, "Caligula and Client Kings."

15. Agrippa reportedly exchanged drunken taunts with Herod (Jos. *Ant.* 18.150).

16. Josephus lacks incentive to connect Agrippa (whom he likes) with Caligula (whom by Josephus's day no one liked), unless for historical reasons, i.e., that his sources supported this connection.

17. Dudley, *Civilization of Rome*, 162.

Tiberius would die and Caligula would become emperor led to his ruin (18.168); fortunately for him, Tiberius died soon after and Caligula succeeded him.

Josephus shows, however, that Agrippa would expend his political favor on behalf of his people when necessary; this helps to explain his popularity with people who hated his old friend Caligula. Living in Rome, Agrippa acquired increasing favor with Gaius Caligula and threw him the most splendid of banquets (*Ant.* 18.289). Having drunk too much and not wanting Agrippa to outdo his own generosity (18.291), Gaius promised Agrippa whatever he wanted, expecting him to request a territory or wealth (18.292–93). Instead, Agrippa requested that Gaius not set up his image in the temple (18.296–97); he would have been risking his life with this request had not Gaius first made the offer (18.298), but because he had promised publicly (18.299), Gaius sent to Petronius to remove the statue (18.300–301).¹⁸ Assuming the essential reliability of Josephus's account, Agrippa's zeal to show himself orthodox (despite having partied with the Roman elite in Rome) makes sense for one who had already risked his neck to protest Gaius's desecration of the sanctuary.

After Gaius Caligula's death, Josephus claims that it was especially Agrippa who persuaded Claudius to lay hold on the kingdom (*Ant.* 19.236).¹⁹ Josephus also claims that Agrippa encouraged Claudius to treat the senators more gently, thus reconciling them (19.265–66). Soon after his accession, Claudius decreed that Agrippa would have the kingdom Gaius had already assigned to him (19.274), and sent him to Judea (19.292).²⁰ Agrippa thus received a third of his ancestral kingdom (*Philo Flacc.* 25).

(2) Agrippa as "Herod"

It seems odd at first that Luke calls King Agrippa I "Herod the king." Although the title "king" is fully appropriate for a Herod who was king,²¹ the name "Herod" allows for less informed hearers' confusion with another "Herod the king" (Luke 1:5) and another oppressive Herod more prominent in Luke's narrative (Antipas the tetrarch; 3:1, 19; 9:7, 9; 13:31; 23:7–15; Acts 4:27; 13:1).²² Sometimes Josephus calls Antipas the tetrarch simply "Herod" (*Ant.* 18.104–6, 243–55), but he regularly calls Agrippa I "Agrippa." (I use Josephus's title to avoid historical confusion with Luke's other Herods.)

Certainly Luke's varying depiction of these characters reveals that he distinguishes them, does not confuse them, and takes for granted historical knowledge on the part of at least the most informed members of his audience. From a literary standpoint, however, this sharing of names connects the various characters who share the name;²³

18. He nevertheless ordered Petronius to kill himself when he learned that the latter had not yet erected the statue (*Jos. Ant.* 18.302–4); the order was prevented only by Gaius's prior death (18.305–9).

19. More fully, *Jos. Ant.* 19.236–44. Of course, Josephus may simply be exalting a Jewish leader here; Philo earlier (but with different rhetorical agendas) narrates Agrippa's success (*Embassy* 333) but also Caligula's further hostile plans (334–37).

20. Cf. Agrippa's earlier commission to Syria in *Philo Embassy* 179.

21. The title appears for other Herods (cf. perhaps *Pers. Sat.* 5.180, though this may be Herod the Great), including Archelaus (*Dio Cass.* 55.27.6; he used the title on his coinage, as noted by E. Cary in *Dio Cassius*, LCL, 6:465n2) and Antipas (*Dio Cass.* 60.8.3; Mark 6:14, 22, 25–27; though in fact he was only a tetrarch). Josephus mentions about seven or eight other Herods (Williams, "Names," 98); kinship in the family fit traditional patterns (see Hanson, "Herodians and Kinship"). Ancient audiences would be more prepared than modern ones to recognize multiple "Caesars," "Ptolemies," "Candaces," and common names within dynasties (e.g., "Cleopatra"), and so multiple "Herods" would not surprise them.

22. Antipas ultimately lost his status by seeking the title "king" (*Jos. Ant.* 18.240–44, 250–54; *War* 2.182–83; for the danger of such presumption, cf. *Plut. Themist.* 29.5); Luke's audience might not know this, however (though cf. Mark 6:14, 22, 25–27).

23. Sievers, "Name," argues that Josephus deliberately exploits negative connotations of the name "Antiochus" in *War* 1.

the murderer of James and attempted murderer of Peter is the same type of character as the murderer of John the Baptist.²⁴ This title also prevents any confusion between Agrippa I and (in Acts 25:13, 22–26; 26:1–12, 19, 27–28, 32) Agrippa II, whose character is presented in a distinctly different and more positive way (and, it might be relevant, who further remained alive and respected even while Luke was writing). Moreover, the name “Agrippa,” unlike that of Herod, would sound positive to romanized ears.²⁵

(3) *Agrippa as Persecutor*

Agrippa persecutes some members of the movement (12:1), especially after he finds popular support for his actions (12:3). Messianists had long been a potential thorn in the side of the Herodian dynasty.²⁶ But no one had yet persecuted Christians as a revolutionary movement per se (barring the founder’s execution for *majestas*); it is unlikely that Agrippa’s motives included the suppression of political competition.²⁷ But he did strive to curry popularity with his subjects, Gentile and (especially) Jewish, just as he had with elite persons in Rome.²⁸ On this subject, see further comment at Acts 12:3.

Some scholars argue that the persecution’s target was probably especially those most open to the Gentile mission, such as Peter and one of Zebedee’s sons.²⁹ There is something to be said for this proposal, though it echoes too closely the traditional consensus on the earlier persecution in 8:1. Certainly the controversy surrounding Peter’s acceptance of uncircumcised Gentiles (11:3) would have generated friction in a period when revolutionary sentiment was growing;³⁰ although Agrippa’s reign was marked by no Roman misadministration as later became prevalent, it allowed nationalist aspirations to flourish in a way that had not been possible since the death of Herod the Great. This was especially true in the wake of Caligula’s death after he had sought to desecrate the temple, widely seen as divine judgment. Anyone thought to oppose the temple (a charge that had been associated with some Christians, 6:14) thus invited triumphalist repression; even in Alexandria the turn of events agitated some Alexandrian Jews against Gentile Alexandrians,³¹ with serious long-range repercussions. What renders this view open to some suspicion is that it reproduces Luke’s

24. See Allen, *Death of Herod*, 23; Spencer, “Approaches,” 405; Witherington, *Acts*, 382; Weaver, *Epiphany*, 209–10 (suggesting “a conscious name-play”); Marguerat, *Actes*, 431. Because John’s beheading (Luke 9:9) foreshadows Jesus’s passion, James’s beheading by another Herod raises suspense regarding Peter (Parsons, *Acts*, 171).

25. Agrippa was traditionally a Roman family name (e.g., Sen. *Y. Ben.* 6.32.2–4; Tac. *Ann.* 1.3, 4, 12; 2.39; Suet. *Aug.* 16, 19, 25; *Cal.* 7; *Claud.* 18; *Tib.* 7; *Tit.* 7, 8); so also the feminine “Agrippina” (e.g., Tac. *Ann.* 1.33, 41, 44; 3.17, 18; 4.75; 11.12).

26. Cf. Atkinson, “Herodian Origin” (on Pss. *Sol.* 17; 4Q161; 4Q285; 4Q246; 4Q252; 4Q174).

27. Hengel and Schwemer, *Between Damascus and Antioch*, 247. Others have suggested revolutionary associations with Simon “Baryona” (Matt 16:17), a rebel title (cf. *b. Git.* 56a), and “sons of thunder” (Le Cornu, *Acts*, 640–41; but there is no agreement on the background of “sons of thunder,” e.g., Buth, “BONEPEFEM”; Rook, “Boanerges”; Beattie, “Boanerges”). The Akkadian connection for *baryona* (Cullmann, *State*, 16; Theissen, *Sociology*, 11) is grasping at straws. But nationalists gave Agrippa little trouble.

28. So also Hengel and Schwemer, *Between Damascus and Antioch*, 248 (citing Jos. *Ant.* 19.328–31).

29. Riesner, *Early Period*, 123. Less plausibly, Knox, *Jerusalem*, 168–69, thinks that Agrippa targeted the Galileans, because Jerusalemite leaders were now on good terms with the Pharisees. But by this point the Galilean apostles had lived in Jerusalem for more than a decade.

30. Further, the situation “can hardly have been helped” by memories of Stephen’s earlier preaching (Acts 6:14) and, especially, recent news of Gentile conversions without circumcision (11:20–22; Judge, *Pattern*, 66).

31. See Theissen, *Gospels*, 232. Some argue that Christians’ inability to support other Jerusalemites’ opposition to Caligula (partly because of Christian eschatology) led to a serious breach (Taylor, “Jerusalem and Temple”).

perspective on the overarching problem in a place where not even Luke, who has every reason to report it if his sources allowed him to do so, presents this perspective.

Still, in support of the basic idea is the narrative's assumption that James the Lord's brother could lead the Jerusalem church in a way that Peter no longer could (12:17). Peter's Gentile commitments (cf. 11:3) may have compromised him politically among the pious masses in Jerusalem in ways that James the Lord's brother's obvious devotion to the law may not have (cf. Gal 2:12),³² helping to explain subsequent efforts to conciliate conservatives. Thus James was a natural leader to lead that part of the Jesus movement forward (Acts 12:17), and he did, indeed, prove successful both in witness (21:20) and in forging compromises that preserved the church's cross-cultural unity without raising tensions for the church in Jerusalem (15:19–21; though cf. Gal 2:12).

Moreover, it is fairly certain that both Gaius Caligula and Agrippa, in their opposite ways, helped shape a tide of nationalism that yielded a bitter harvest a generation later, evident in Acts 21:21, 28–30; 22:21–22 but especially in the Judean revolt that began in 66 C.E. Gaius's order to set up his image in Jerusalem's temple (Jos. *Ant.* 18.261) proliferated resistance against Rome (18.263–64, 270–72),³³ and his death provoked confidence that God would help God's people defeat Rome. Josephus himself viewed Gaius's death as divine judgment (18.305–9), as did (in his narrative) the Roman governor of Syria, Petronius (18.309), and Philo (who predicted it, 18.260). The short-lived hopes stirred by a Jewish king who (far more than Herod the Great) showed respect for the law restored the popular plausibility of imminent eschatology.

What is clear from the narrative is that the authorities targeted especially the movement's leaders (Acts 12:2–3); that Peter was not in hiding but susceptible to arrest when Agrippa found this move convenient (12:3) and that presumably known Christians retained their property (12:12) reinforces this impression. Authorities often targeted only movements' ringleaders at first,³⁴ as the Jerusalem authorities had initially settled for arresting Jesus and letting his disciples escape (Mark 14:50–52; cf. Acts 4:13, 21). As a rule in antiquity, prominent individuals were most often the targets.³⁵ Removing leaders often was sufficient to kill a nascent movement and could even weaken political bodies of long standing (e.g., Cic. *Fam.* 12.30.4).

Although most scholars (including, tentatively, myself) date the famine somewhat later, the persecution could have coincided with the food shortage mentioned in Acts 11:28. In that case, it may have appeared good politics to distract public attention from the famine itself by dealing strictly with a group that some may have suggested as a scapegoat (like the Christians for Nero in Tac. *Ann.* 15.44), a group supposed to have invited divine judgment (cf. 2 Sam 21:1–9).³⁶

That Agrippa "laid hands" on some in the church (in contrast to the positive use of laying hands, e.g., Acts 6:6) might recall the warning of Luke 21:12, where disciples'

32. His lengthy absences from Jerusalem (Acts 9:32–11:2) may also be relevant, but it appears that at least at some point, James also engaged in ministry travels (1 Cor 9:5).

33. This was not the first time Jews gathered to protest, but this proved a particularly aggressive and effective occasion, notably including (Jos. *Ant.* 18.270–72) forty days' protests in Tiberias, with farmers neglecting their fields.

34. E.g., Dion. Hal. *Ant. rom.* 3.40.3.

35. E.g., Dion. Hal. *Ant. rom.* 5.43.2; Phaedrus 1.21.1–2; 2.7.14–15; 3.5.1; 4.6.11–13; Babrius 4.6–8; 31.23–24; 64.10–11; Corn. Nep. 1 (Miltiades), 7.5–6; 2 (Themistocles), 8.1–7; 3 (Aristides), 1.1–5; 7 (Alcibiades), 4.1–2.

36. Later Celsus urged that no deity would avenge the persecution of Christians (Cook, *Interpretation*, 89–90).

enemies would “lay hands” on them, bringing them before kings and imprisoning them (cf. Acts 12:4–5);³⁷ but the hair on their heads would not perish (Luke 21:18), and they would gain their lives (21:19).³⁸ More important, the wording also prepares for Acts 12:11, where God has delivered Peter from Herod’s “hand.” The use of *κακῶω* is frequent in the LXX (more than sixty times)³⁹ but appears in the NT only in Acts (7:6, 19; 12:1; 14:2; 18:10) and in 1 Pet 3:13. Most of these uses apply to the sufferings of Christians (ironically in Acts 14:2; 18:10, to Jewish opposition to Paul); those that are clear biblical allusions are 7:6, 19, referring to Pharaoh’s oppression of God’s people (Gen 15:13; Exod 1:11; 5:22–23). Given the explicit setting of Passover (Acts 12:3–4), Luke might implicitly present Herod against the backdrop of the prototypical tyrant and oppressor of Israel, Pharaoh,⁴⁰ though the allusions are limited (see comment on Acts 12:4).

II. BEHEADING JAMES (12:2)

Some apostles have remained in Jerusalem (8:1) or have returned there (11:2), but now Jerusalem is also the preferred residence of the new king (Jos. *Ant.* 19.331),⁴¹ which increases the difficulties of evading his attention. Only the bare fact of James’s execution is narrated,⁴² without further description that would supply pathos to the narrative.⁴³ (Church tradition elaborated further, so that James converted his jailer, leading to the execution of both together.)⁴⁴ A good historian was to focus on what was important rather than what was not (Dion. Hal. *Thuc.* 13),⁴⁵ and Luke is more interested in recounting a deliverance and its relation to his theme of prayer (Acts 12:5, 12) than in elaborating James’s death. That the names “James” (12:17) and “John” (12:12) both quickly recur, for different characters from those mentioned here, is not surprising in view of the commonness of both names in this period.⁴⁶

37. It would also precede “famines” (Luke 21:11; cf. Acts 11:28). This idiom for hostile “laying on hands” appears elsewhere (Luke 20:19; Acts 4:3; 5:18; 21:27).

38. The dangerous urgency may explain why Peter does not also appear in court to testify here (Luke 21:13–15), in contrast to disciples in some other detentions in Acts (Acts 5:26; 24:27; 26:32; cf. 17:10).

39. As Haenchen, *Acts*, 381n3, emphasizes.

40. With also Allen, *Death of Herod*, 98; for God “striking” Pharaoh, cf. p. 104 (citing Exod 3:20; 7:25, 27; 9:15; 12:12; Acts 12:23). Genesis and Exodus themselves apply the term *κακῶω* not only to Israel’s oppressors but to the danger of God’s people abusing power over others (Gen 16:6; Exod 22:21–23). For traditions coalescing the images of oppressors, see, e.g., Matt 2:16; Pharaoh and Haman in Qur’an 28.6, 8 (but Haman works for Pharaoh, 28.38; cf. 29.39). Tyrants took on typical traits in literary portrayals, as in Caesar’s depiction of Ariovistus (Vasaly, “Characterization,” 247–51) or post-Flavian portrayals of Domitian (often noted, e.g., Vout, “Emperor,” 261), although historically as well as literarily, power probably corrupted many of them similarly.

41. Although he usually resided there, he did spend time in Berytus (Jos. *Ant.* 19.335–37) and in Tiberias (19.338–42) and came to Caesarea, where he died (19.343–52). Judea’s Roman governors normally spent most of the year in Caesarea.

42. “The wording conveys the impression of a summary execution” (Haenchen, *Acts*, 382, comparing Mark 6:27–28).

43. Rhetoricians complained if historians failed to evoke the appropriate horror for sufferings (e.g., Dion. Hal. *Thuc.* 15), though more restrained historians sometimes critiqued the sensationalism of others who overemphasized such pathos (e.g., Polyb. 2.56.7–11).

44. Euseb. *H.E.* 2.9.1–3. Since it is doubtful that Luke would have known such a story and not reported it or that it was known in his day but not reported to Luke with the rest of the account, it appears improbable enough that we may ascribe the story to legendary embellishment; a similar rabbinic martyr story reinforces this probability (cf. *b. Abod. Zar.* 18a, in Bamberger, *Proselytism*, 244, although this story includes the executioner’s suicide).

45. He expounds this more fully in Dion. Hal. *Thuc.* 13–17.

46. For “James” (“Jacob”), see Williams, “Names,” 86 (including *DJD* 40, 42, 103); for “John,” 87–88. Postulating a deliberate literary connection is thus in this case tenuous.

James's death is not shocking to Luke's audience, though it must have shaken the earliest church in Jerusalem.⁴⁷ Luke clearly applies Luke 9:27 not to the second coming but rather to the transfiguration (9:28–36; as in Mark 9:1–2; Matt 16:28–17:2). Luke reports Jesus's promise that the twelve apostles would rule from twelve thrones (Luke 22:29–30; minus Judas, 22:21–22) but already understands this as potentially distant future eschatology. He also omits Mark 10:39–40, which could suggest that James and John would die the same way or at the same time (though it need not be so understood).⁴⁸ Although such matters were not a problem for Luke, they must have caused some confusion for the Jerusalem church. There is no reason to question the historicity of James's early martyrdom, which fits the tradition in Mark 10:39; that his brother John's is not narrated, by contrast, fits John's evident survival (Gal 2:9).⁴⁹

Such events could challenge people's faith, and Luke answers this challenge partly by the contrast with Peter's miraculous deliverance (Acts 12:7–11), which underlines God's unfettered ability to deliver and hence God's sovereign purposes even when he does not do so (cf. the apparent antinomy in Luke 12:16–19). Seneca notes that we often complain that it is unfair that one dies while another lives, but we need to trust the wisdom of the gods and of fate (*Ep. Lucil.* 93.1). Musonius had been happy about Galba's power, but at the ruler's assassination he reaffirmed that his belief in providence did not depend on Galba (*Mus. Ruf. frag.* 47, p. 140). Later rabbis recognized that the angel of death acted only at God's command,⁵⁰ and they regarded martyrdom (most evident during the Hadrianic persecution) as the ultimate expression of sanctifying God's name.⁵¹ Still, it was hard for even people of great faith not to ask why. When R. Simon and R. Ishmael were killed, R. Akiba told his disciples that they must have been taken to escape greater suffering to come (*Mek. Nez.* 18.63ff.; cf. Isa 57:1).

The most specific datum about James's execution Luke provides is that he was executed by the "sword." Although some, cognizant of genuine exodus echoes in this passage, have compared Pharaoh's "sword" in the exodus story (Exod 5:21; 15:9),⁵² the description is too common to evoke a specific passage. Decapitating enemies was also common practice in war⁵³ and other settings;⁵⁴ sometimes people were decapitated after death, and their heads displayed.⁵⁵ But it was also a common form of execution, mentioned among some other peoples⁵⁶ but most notably among Romans.⁵⁷

47. Cf. later rabbinic tales about the execution of Jesus's disciples (esp. *b. Sanh.* 43a; cf. Herford, *Christianity*, 90–95).

48. Because it contradicts later tradition, it may be thought authentic (Jeremias, *Theology*, 243–44; Hill, *Matthew*, 288; Sanders, *Jesus and Judaism*, 147). Val. Max. 1.8.ext. 17 reports, as among strange plans of Fate, that two Epicurean disciples were born the same day and in old age died in the same instant.

49. The James in that passage is clearly a different one; see Gal 1:19. For later traditions about John's extended survival, cf. early Christian tradition concerning the author of the Fourth Gospel (Keener, *John*, 91–100); the probable sense of Rev 1:1; and, much later, *Acts of John*.

50. Moore, *Judaism*, 1:410.

51. Montefiore, "Spirit of Judaism," 63; cf. *b. Pesah.* 53b; *Num. Rab.* 4:6; *Song Rab.* 2:7, §1; *Pesiq. Rab Kah.* 11:14.

52. Allen, *Death of Herod*, 99. Exod 18:4, which in the LXX changes "sword" to "hand," might, indeed, be echoed in Acts 12:11. Later rabbis depicted Moses's escape from Pharaoh's "sword" in Exod 18:4 as literal, with the sword miraculously breaking (*y. Ber.* 9:1, §8).

53. E.g., Polyb. 3.67.3; 11.30.2; 21.38.5; Livy 30.43.13; Val. Max. 2.7.12; Tac. *Hist.* 2.16.

54. E.g., Pliny E. *N.H.* 33.14.48; Philost. *Hrk.* 28.12.

55. E.g., Virg. *Aen.* 9.465–67.

56. Cf. 2 Kgs 6:31–32. Rabbis recognized but did not usually favor decapitation as a form of capital punishment (*m. Sanh.* 7:3; cf. *b. Sanh.* 52b; *Gen. Rab.* 9:10; *Exod. Rab.* 2:4). Some other Eastern peoples practiced decapitation (Plut. *Luc.* 25.1); the rabbis anachronistically attributed it to Pharaoh (*y. Ber.* 9:1, §8). Massilia retained its ancient rusty sword for when needed (Val. Max. 2.6.7c).

57. E.g., Val. Max. 2.7.15–16; 5.8.1; Appian *Hist. rom.* 3.9.3 (280 B.C.E.); Hdn. 3.4.6; 3.7.7; Jos. *Ant.* 19.270–71; *Abot R. Nat.* 38 A (by sword); 41, §115 B (without mentioning the sword).

Given Agrippa's background in Rome, he may regard execution by the sword (cf. Rom 13:4) as the most efficient and rapid method, which was also less sadistic than more torturous methods. The two standard forms of Roman execution were the *summum supplicium*, which included such "vindictive" modes of death as drowning, burning, crucifixion, or a violent death in the arena, and *capite puniri*, "a simple death by decapitation." Decapitation could be by sword (*decollatio*) or (at least in the republic) by axe (*capitis amputatio*; Dig. 48.19.8.1–2).⁵⁸ Provincial governors could use the sword only (48.19.8.1),⁵⁹ though presumably a client king such as Agrippa could have exercised more liberty had he wished. To be executed was to "offer one's neck";⁶⁰ those who offered the neck boldly were more often decapitated with a single stroke, avoiding the more painful necessity of multiple strokes.⁶¹

Crucifixion and other such punishments were meted out to slaves and people of low status; Roman citizens and people of status more often died by decapitation, which was considered more dignified.⁶² In principle, this form of execution was supposed to be a solemn event whose contours were constrained by custom, at least in Rome (Sen. E. *Controv.* 9.2.10). That Agrippa would prefer the more merciful method of execution is not implausible; Josephus claims that on other occasions Agrippa showed mercy even to his enemies. When an interpreter of the law named Simon denounced Agrippa (Jos. *Ant.* 19.332), the latter confronted him privately (19.333), and when Simon apologized, Agrippa pardoned him and sent him away with gifts (19.334). This may have been a politically astute way to defuse enmity, but it certainly would appear merciful. On the other hand, Agrippa did not simply pardon everyone; even in his younger days, before Caligula's accession, he was severe in demanding punishments (18.183).

We need not detain ourselves with how a pious king beheaded one not guilty of murder, against Mishnaic prescriptions;⁶³ these rulings are later, may be particularly Pharisaic, and would not have constrained a Roman client king, in any case. Since the Mishnaic penalty also covers corporate apostasy (for an apostate city), it is possible that Agrippa treats James as an apostate and hence pleases "the Jews."⁶⁴ But granting that many Jews disagreed with James or even believed him in error that warranted public discipline, on what grounds would James be held guilty of apostasy?⁶⁵ And as noted, the antiquity of the rules in *m. Sanhedrin* is much in question, in any case.

58. Aune, *Revelation*, 1086; Schiemann, "Decollatio" (citing Paulus *Sent.* 5.17.2). In general, the republic employed the axe (e.g., Cic. *Verr.* 2.5.50.133; Livy 2.5.8), and the empire the sword (Stambaugh and Balch, *Environment*, 35); but sometimes a sword was also used during the republic (Livy 39.43.2–3; Val. Max. 4.7.4). Rabbis considered the axe more merciful than Rome's sword (*m. Sanh.* 7:3), but decapitation was more merciful than some other methods (*b. Sanh.* 50a).

59. Aune, *Revelation*, 1086. Cf. Hengel and Schwemer, *Between Damascus and Antioch*, 247: as a king, he literally exercised the *ius gladii*. For governors' *imperium* for executions, see, e.g., Pliny *Ep.* 10.30.1; yet one who executed too freely might be removed from office (Philost. *Vit. soph.* 2.24.607).

60. Sen. Y. *Nat. Q.* 2.59.7; *Dial.* 3.18.4.

61. Sen. E. *Suas.* 6.17–18; Jos. *Ant.* 19.270–71. In practice, decapitations have often required multiple strokes; Evans, *World*, 126, notes not only later English examples (Mary, Queen of Scots, in 1586 and James, Duke of Monmouth, in 1685) but hundreds of decapitated skeletons from the Roman era, in which roughly half reveal "two or more strokes."

62. See, e.g., O'Rourke, "Law," 174; Pucci, "Arenas," 113. On crucifixion, see comment on Acts 2:23. Romans could sometimes be executed more harshly than Latins if needed, e.g., to make an example (Livy 30.43.13; Val. Max. 2.7.12).

63. Cf. Haenchen, *Acts*, 382 (following Strack and Billerbeck, *Kommentar*, 2:706); cf. earlier Knowling, "Acts," 272 (following J. Lightfoot and Wetstein). Scholars cite *m. Sanh.* 9:1 (but it also allows beheading for citizens of an apostate city).

64. E.g., Johnson, *Acts*, 211.

65. This may be true of the *minim*, which I admitted as background for John's Gospel given the milieu I think it addresses (Keener, *John*, 197–214). It seems less likely for James's own day, and it seems questionable whether Luke's audience would be familiar with it; but it is not impossible (2 Cor 11:24; Luke 21:12).

Beheading typically followed stripping and scourging.⁶⁶ One might be flogged, then immobilized by being tied to stakes for beheading.⁶⁷ Those who dispatched executioners sometimes demanded the disembodied head as evidence of the deed;⁶⁸ others also sent back heads⁶⁹ or displayed them vengefully or as a shocking warning (or sometimes for a lover's entertainment).⁷⁰

The vast majority of people in various cultures approved of capital punishment.⁷¹ Plato insisted that those in charge of it should be just⁷² and claimed that Socrates refused to flee unjust execution lest he undermine the authority of law, which did more good than harm.⁷³ Some disapproved of capital punishment, at least under particular circumstances.⁷⁴ Others respected those who chose not to inflict such vengeance but to reform a person,⁷⁵ or even advocated this as a better way of life.⁷⁶ Later rabbis allowed capital punishment in principle⁷⁷ but objected to its abuse⁷⁸ and evaded it in practice.⁷⁹

III. PETER'S DETENTION (12:3–5)

Catering to many Judeans' resentment of the Jesus movement, Agrippa has Peter arrested, planning to have him executed after the Passover festival.

(1) Agrippa's Political Savvy (12:3)

On the "feast of unleavened bread," which appears in Acts 12:3 in a parenthetical interposition,⁸⁰ see discussion concerning Passover at Acts 12:4. That Agrippa would act here to "please" people is in keeping with his character attested in other historical sources.⁸¹ Agrippa may have been unwise in financial matters in his youth, but he had sometimes been quite astute politically. Not only had he been an intimate "party buddy" of Caligula; his support for Claudius's bid for the throne had yielded further political power for himself.⁸²

66. E.g., Polyb. 11.30.1–2; Livy 9.24.15; 10.1.3; 26.40.13; Val. Max. 2.7.15–16. (Not all these texts mention the stripping explicitly, but it may be inferred from the scourging.)

67. E.g., Val. Max. 5.8.1 (on an early period).

68. E.g., Val. Max. 9.2.1; Hdn. 3.7.7; 8.5.9; 8.6.7.

69. E.g., Sall. *Jug.* 12.5; Sen. E. *Controv.* 10.3.1, 5; *Suas.* 6.20; Pliny E. *N.H.* 33.14.48; Sil. It. 11.319–20; Quint. 78. Thoma, "Death Penalty."

79. If God wanted someone decapitated, he handed them over to the Romans or to robbers (*b. Soṭah* 8b); Rome was useful at least for this (*Gen. Rab.* 9:13; but less pleasantly, see Rome as God's chastening sword, 75:1).

80. On *interpositio*, or *parenthesis*, see Aune, *Dictionary of Rhetoric*, 337.

81. Luke's portrait is selective, but then so was often that of other historians' ruler figures (see Laistner, *Historians*, 132, regarding Tacitus). Lest anyone seek to explain the similarities between Luke's and Josephus's (less negative) portrayal of Agrippa as the former's literary dependence on the latter, Mark's portrayal of Herodias also resembles Josephus's; both depend on earlier information or perspectives. Dunn, *Acts*, 162, emphasizes the distinction between Agrippa and "the Jews," based on self-consciousness of his partly Idumean ancestry (*m. Soṭah* 7:8), but this does not fit Josephus's portrait of his self-certainty.

82. Dio Cass. 60.8.2–3; Jos. *Ant.* 19.236–44.

He was also politically prudent regarding the people he governed. Caligula's attempt to desecrate the temple left Judea in ferment, and so, as soon as Agrippa returned to Judea (after Caligula's death), he identified with the most conservative sentiments of his people, thereby calming some of their hostility against Roman rule. He provided lavish gifts for the temple, provided for Nazirites, and so forth (Jos. *Ant.* 19.294).⁸³

He was able to use his influence in Rome on behalf of his people, gaining Claudius's favor for Judaism early in his reign⁸⁴ (though cf. comment on Acts 18:2). Before Caligula's death, Agrippa interceded with the emperor not to place his statue in the temple (Philo *Embassy* 276–329), offering this intercession even at grievous risk to his own status and safety, as already noted. That the Alexandrian delegation (including Philo) knew so many details about his attempted intervention suggests that word spread; such reports would have won Agrippa much favor in Judea, especially after Caligula's assassination.

Agrippa's political savvy that kept the favor of his Jewish people sometimes alienated the Gentile subjects who felt less pressed under his grandfather Herod the Great.⁸⁵ Still, Agrippa had political sensitivity even regarding Gentiles, especially outside Judea.⁸⁶ He gave generously to Gentiles and was less cruel than his grandfather (Jos. *Ant.* 19.328). He commissioned a coin for Caesarea depicting its patron deity, Tyche (Fortune).⁸⁷

When a scribe, described in the way Josephus typically describes Pharisees ("devout in the law"), publicly denounced him, Agrippa I surprisingly won him over, appeasing any conservative nationalists (*Ant.* 19.332–34), and the king otherwise followed the strict customs of the people (19.331).⁸⁸ Jewish people appreciated his piety, remembered even in much later tradition (e.g., *y. Šeqal.* 5:1).⁸⁹ Later rabbis emphasized that, despite his mixed ancestry (on Herod the Great's side), Israel welcomed him as a full Israelite.⁹⁰ They also preserve the tradition of his piety, though emphasizing that every Israelite, including King Agrippa, came before God in the temple on the same terms (*t. Bik.* 2:10). Agrippa's contacts and strong support base in Rome allowed him to cater to nationalists in a way that many other Jewish leaders would not have dared.

(2) Agrippa's Excessive Nationalism (12:3)

Nevertheless, Agrippa sometimes overplayed his power. Some scholars suggest that flaunting his magnificence in Alexandria may have contributed to the immediate backlash against Jews there;⁹¹ nor does Luke praise him for his humility (Acts 12:22–23). More clearly, Syria's new governor (42–45 C.E.) grew suspicious of Agrippa's project to extend Jerusalem's wall, and this led to its discontinuation (Jos.

83. Riesner, *Early Period*, 118; cf. also Theissen, *Gospels*, 232.

84. See Riesner, *Early Period*, 97–98.

85. Schürer, *Time of Jesus*, 221, citing "the unconcealed jubilation with which the news of his death was received by the Caesareans and Sebasteans" (Jos. *Ant.* 19.358). Cf. also the political conflict in Acts 12:20.

86. Cf. Reicke, *Era*, 200; see comment on Acts 12:23.

87. Carmon, *Inscriptions*, §211 (Engl., p. 100; Heb., p. 216).

88. Theissen, *Gospels*, 232.

89. Commentators often note his piety, e.g., Dunn, *Acts*, 161–62; e.g., Jos. *Ant.* 19.301.

90. *M. Sotah* 7:8; *Sipre Deut.* 157.3.1 (on the question of qualifications for Israel's throne in Deut 17:15), though its portrayal of Agrippa's self-consciousness about his heritage is questionable. For most, his descent from the Hasmonean rulers through Herod's chief wife, Mariamne, made him the most authentically Jewish of anyone in Herod's line and a far better choice than Roman governors! See Jos. *Ant.* 16.133; 18.110, 126, 131; cf. 19.274, 359.

91. Cf. Reicke, *Era*, 195–96. On the other hand, this may be like blaming the victim (cf. Philo *Flacc.* 39). Gentile Alexandrians cannot have appreciated Judean demands for an exemption, for their temple, from involvement in the imperial cult; no one else needed such exemptions.

Ant. 19.326–27). Likewise, Claudius cancelled Agrippa's invitation of six vassal kings to a conference in 43 C.E. (19.338–42) and divided his kingdom when he died (*War* 2.219–20; *Ant.* 19.343–52, 360–63; *Tac. Hist.* 5.9).⁹² Claudius rightly was concerned about Agrippa's political independence and power, which, intentionally or unintentionally, probably emboldened Jewish nationalism. Agrippa presumably planned to ride the tide of increasing power without any disloyalty to Rome, but the forces he unleashed outlived him. The memory of such nationalism remained alive under the corrupt Roman governors who followed, perhaps contributing to the war two and a half decades later.

His royal status also meant that Agrippa, unlike the Sanhedrin under Roman governors,⁹³ could freely exercise capital jurisdiction in ways that Rome might not have officially approved, including repressing unpopular minority sects to curry favor with rising nationalism. His campaign against the church leaders may have been part of his program of identification with conservative elements in Judea. If, in the wake of Caligula's attempt to have his image set up in the temple, some Judeans still felt that members of the Jesus movement undermined the temple (*Acts* 6:14), venerated too highly a mortal, or proved too friendly to uncircumcised Gentiles, suppressing the cutting edge of the movement by executing some of its leaders may have seemed a small price to pay to increase stability and unity in Judea. Peter had convinced many people but had apparently generated more enemies than allies at this point, perhaps leaving him more politically vulnerable.⁹⁴

This persecution could, then, occur in the period leading up to Agrippa's first Passover as Judea's king, "which in A.D. 41 fell on 5 April."⁹⁵ Some other scholars, dating Peter's arrest and escape closer to Agrippa's death, suggest 43 or 44 C.E.⁹⁶ Because Agrippa was struck during spectacles honoring the emperor (*Jos. Ant.* 19.343) in 44, this could have taken place on Claudius's birthday on August 1 or the annual commemoration of Caesarea's foundation on March 5;⁹⁷ Passover came after March in 44, and so Peter's arrest could be no later than 43 C.E. if we accept the March date and 44 if we accept the August date.⁹⁸ But the events Luke narrates could also be earlier; we cannot be sure that the events of *Acts* 12:20–23 follow closely on 12:19, which is not required by the narrative.⁹⁹ The exact point in Agrippa's reign when Peter was arrested is difficult for us to recover and was probably not known or important to Luke or his audience.

The irony of the situation would not be lost on Luke's audience. The nationalistic king, eager to please Judeans, also welcomes worship as a deity from Gentiles. Similarly, Jewish enemies help stone Paul or, apparently, repudiate association with him after his defenses of monotheism (14:11–19; 19:26–28, 33). In Luke's narrative, his protagonists are theologically better Jews than are their opponents, but the opposing rhetoric prevails on a popular level.

92. Riesner, *Early Period*, 101–2.

93. The Sanhedrin apparently was not functioning, or at least exercised minimal influence, under Agrippa (see Levine, *Hellenism*, 88–90).

94. Schwartz, "Peter," 410–11 (also comparing the execution of a beguiler in Lod, *t. Sanh.* 10:11). Popularity with the poor would help less than popularity with the rich (such as the Sadducees) unless there was a public outcry (as later with James, Jesus's brother; *Jos. Ant.* 20.200–203).

95. Riesner, *Early Period*, 118.

96. Some have allowed for a dating of even Agrippa's death to 43 (cf. Lake, "Chronology," 452), but evidence today points more readily to 44 (Jewett, *Chronology*, 33–34; Barrett, *Acts*, 592).

97. Witherington, *Acts*, 385. Barrett, *Acts*, 592, favors March 5. Agrippa died three years after he became king (*Jos. Ant.* 19.351); his latest coins are also from 44.

98. Barrett, *Acts*, 592; Witherington, *Acts*, 385, 389.

99. Riesner, *Early Period*, 117–18; Le Cornu, *Acts*, 639.

(3) “Pleasing” Judeans (12:3)

Executing an innocent person to please or pacify a constituency was considered morally disgusting behavior.¹⁰⁰ The most extreme tales are told of those who executed a person to indulge the voyeurism of women or boys for whom they lusted;¹⁰¹ political considerations might be more understandable, but it is clear that Luke condemns Agrippa along with those he seeks to please (cf. Acts 12:11; Luke 23:4, 23–24; Acts 4:27). Luke has earlier denigrated crafty politicians appealing to the people (Luke 19:48; 20:5–7); demagogues appear negatively in most ancient sources, at least from the aristocratic social stratum that most opposed them.¹⁰² Jerusalem believers in Jesus later regained favor (Acts 21:20; cf. 2:47), which allows us to assume a much more gradual change in attitude toward the Jewish believers than the crowds exhibit in their attitudes toward Jesus in Luke 23:13, 21; ancient literature often views the crowds as fickle and changeable.¹⁰³ The masses, aristocrats complained, sometimes condemned the leaders who had offered them the greatest services.¹⁰⁴ Demagogues who followed public whims could stir crowds, but (at least as aristocratic writers presented it) crowds sometimes regretted the change in leadership (e.g., Plut. *Cic.* 33.1–4). Ironically, Herod’s concern for public opinion leads to his destruction later in the chapter (Acts 12:22–23);¹⁰⁵ likewise, Jerusalem’s opposition to God’s agents ultimately leads to its destruction (Luke 19:44; cf. 21:23; comment on Acts 22:21–22).

Agrippa, however, did strive to win popularity among his subjects, Gentile and (especially) Jewish,¹⁰⁶ just as he had with elite persons in Rome.¹⁰⁷ Some scholars suggest that he carried favor especially with the Sadducean elite, restoring a particular high-priestly family;¹⁰⁸ the evidence for indulging this group in particular is questionable,¹⁰⁹ although it makes political sense. If anything, we have somewhat better evidence for his accommodating the more populist Pharisees.¹¹⁰

In any case, he certainly was eager to please. Josephus highlights Agrippa’s continued generosity after reaching Judea, specifically noting his desire to please people and acquire honor (*Ant.* 19.328).¹¹¹ He presents this as a stark contrast to Herod

100. It was also hard-hearted, though even a kind person would support executions if needed for the public good (Plut. *Cic.* 19.5).

101. E.g., Livy 39.42.8–39.43.5; Appian *Bell. civ.* 4.4.20; Tac. *Ann.* 14.57, 59, 64; Suet. *Galba* 20; Dio Cass. 62.14.1.

102. See comment on Acts 4:18–22; Keener, *John*, 732–33.

103. Usually this is the negative perspective of the aristocracy (again, see comment on Acts 4:18–22; Keener, *John*, 732), though anyone who follows U.S. politics will recognize that popular opinion can shift significantly. For condemnations of fickleness, see, e.g., Caesar *Gall. W.* 4.5, against the Gauls; similarly, Cic. *Flacc.* 11.24, against the Greeks (because they are here witnesses for the other side); at greater length, see Keener, *Acts*, 1:1037, with documentation. For one modern example of shifting attitudes, popular sentiments toward early Methodists improved as the movement became established (see, e.g., Wigger, *Saint*, 185).

104. E.g., Corn. Nep. 1 (Miltiades), 7.5–6; 2 (Themistocles), 8.1–7; 3 (Aristides), 1.1–5. Cf. “the rhetorical commonplace . . . that it was impossible to please the crowds (Meeks, *Moral World*, 57, citing Epicurus frg. 43 [Bailey, *Epicurus*, p. 131]; cf. Themistius *Or.* 26 [*Epicurea* §551]; *Vatican Sayings* 58).

105. Pervo, *Story*, 41.

106. So also Hengel and Schwemer, *Between Damascus and Antioch*, 248 (citing Jos. *Ant.* 19.328–31).

107. For his extravagant (and financially ruinous) generosity in Rome, seeking and often winning favor, see, e.g., Jos. *Ant.* 18.144–45, 167, 352.

108. Hengel and Schwemer, *Between Damascus and Antioch*, 249 (citing Jos. *Ant.* 19.297, 312–16; 20.198).

109. Agrippa had to deprive one high priest of the office to give it to another, and he replaced more than one high priest (Jos. *Ant.* 19.297, 313, 342), as did others after him (20.15, 103, 179, 195–96, 203, 223).

110. The suggestion that Simon, toward whom Agrippa showed mercy, belonged to the “priestly nobility” (hence, by implication, probably to the Sadducees; Hengel and Schwemer, *Between Damascus and Antioch*, 248–49) is questionable (his stated prowess in the law in Jos. *Ant.* 19.332 more likely aligns him with the Pharisees).

111. Cf. also his generosity toward royal guests (Jos. *Ant.* 19.339).

the Great, who was severe and friendlier to Greeks than to Jews (19.329).¹¹² In the context of pleasing his people, Josephus notes Agrippa's piety; he delighted to live in Jerusalem, following the laws carefully and never missing a sacrifice (19.331; cf. also 19.293). He helped Nazirites and dedicated to the temple the golden chain Gaius Caligula had given him (19.294).

In Rome, Agrippa learned a strategy of the Roman elite for contenting the masses: destroying "criminals" for public entertainment. He displayed his munificence in the theater and gladiators (Jos. *Ant.* 19.336), and Josephus reports that he managed to entertain the public while exterminating 1,400 criminals on a single occasion (19.337). That he would publicly execute an unpopular leader (Acts 12:2) is not surprising; that the popularity of this decision would invite him to execute another (12:3) also fits this pattern. If he had announced in advance Peter's impending execution (12:3–4), Peter's escape would seem to offer him a major political embarrassment, only partially alleviated by holding the guards capitally responsible (12:19).¹¹³

Some scholars associate Agrippa's desire to please "the Jews" here with his close alignment with the Pharisees (Jos. *Ant.* 19.292–316).¹¹⁴ Yet if later rabbinic writings are representative at all of first-century Pharisaic sentiment, Pharisees had grown reluctant to approve death sentences lightly.¹¹⁵ Some of their reluctance may have developed from the general illegality of carrying out executions under Rome; perhaps, under a Jewish king who favored them, they might have approved it (cf. 13.410), but their tradition advocated mercy under normal circumstances (cf. 13.294). But Luke does not specify Pharisaic involvement, in any case, and one wonders how some would have been defending tolerance toward disciples in Acts 5:34–39 and 23:9 yet most would have been advocating their death in the period between.¹¹⁶ That Paul was both a Pharisee and a persecutor (Acts 23:6; Phil 3:5–6) need not mean that all or most Pharisees agreed with him (though much of Paul's circle apparently did; cf. Gal 1:13–14); Acts associates his behavior more with the high priests than with the Pharisees (Acts 9:1–2; 26:10).¹¹⁷ Although Pharisaic involvement is therefore possible, it is far from certain here.

(4) *Passover* (12:4)

"Passover" here is used broadly to include the entire Feast of Unleavened Bread then occurring; by this period, they were commonly described as the same festival (cf. Luke 22:1, 7; Jos. *Ant.* 14.21; 18.29).¹¹⁸ Romans normally did not hold trials

112. Herod the Great had to keep outsiders happy; Agrippa I probably felt that he had earned in Rome, where he lived among the Gentiles, the right to be as Jewish for his subjects as he pleased; and perhaps he felt that he had something to prove to his own people. Still, Josephus quickly emphasizes, Agrippa was kind to foreigners and treated all equally (*Ant.* 19.330).

113. The personality profile of a disenfranchised son of royalty who craved honor and had learned to buy it with gifts at any cost might also fit the successful king who ultimately committed hubris in the tradition behind both Acts 12:23 and Josephus (see comment on Acts 12:23). Whereas his character portrait in Luke is flat (wholly negative), Josephus fleshes out more fully the tragic dimension of this character. Even Luke may allow some complexity in one who catered to Jewish nationalism while accepting worship; but in Acts both actions relate to desiring honor (cf. 12:3a).

114. E.g., Conzelmann, *Acts*, 93; Johnson, *Acts*, 211; on his alignment with Pharisees, cf. also Theissen, *Gospels*, 232.

115. Cf. Jos. *Ant.* 13.294; 20.199; cf. *War* 2.166; *Tg. Neof.* 1 on Lev 24:12; *Tg. Ps.-J.* on Lev 24:12; see comment on Acts 5:33–34.

116. The rhetoric after 70 C.E. addresses a different sociopolitical situation in Judea; see Keener, *John*, 194–214. In the earliest stage of Synoptic tradition, Jesus had conflicts with Pharisees, but it was only the Sadducees who could engineer his execution (see Keener, *Matthew*, 251–53, 613–16).

117. Though this could be apologetic, since after 70 the Pharisees emerged less tainted by the war and more powerful than the chief priests.

118. Various commentators also cite other sources, such as Deut 16:1–4; 2 Chr 35:17 (less plausibly); Ezek 45:21–25; Jos. *Ant.* 6.423; 17.213; 20.106; *War* 2.280 (though Josephus could also distinguish them in

during festivals except in extraordinary circumstances (Cic. *Cacl.* 1.1); consequently, punishments were usually delayed during their festivals.¹¹⁹ Jewish tradition, however, seems to have allowed executions on festivals, when they could offer the optimum propaganda effect.¹²⁰

Because the early Christians claimed that the executed messianic claimant Jesus rose during this festival, Agrippa or his advisors may have counted it expedient not to create another martyr at a festival celebrating nationalistic freedom. Arresting Peter before the festival and executing him afterward might also prevent problems with crowd control (cf. Luke 22:2; Mark 14:2), especially if Peter's supporters included many Galileans who would be present for the feast. Yet Agrippa's political planning conflicted with the divine plan: the God who freed his people at Passover and raised Jesus would also liberate Peter.

The mention of Passover surely recalls the passion narrative.¹²¹ When the Feast of Unleavened Bread was near (Luke 22:1), Jerusalem's chief leaders plotted to kill Jesus (22:2); but whereas then they feared the people (22:2), now Agrippa acts to please the people (Acts 12:3–4). Mentioning Passover probably also invites a reading against the backdrop of the original Passover narrative. Allen offers the following comparisons:¹²²

Subject	Exodus	Acts 12
Night	11:4; 12:8, 12, 29, 42	12:6
Angel is revealed	3:2	12:7
Gird on sandals, clothes; make haste	12:11	12:7–8
Vision	3:3	12:9
Sea opens; gate opens	14	12:10
God rescues	18:8–10	12:11

Of these, the angel parallel (12:7) and the gate opening (12:10) appear quite weak, at least in isolation;¹²³ the girding on of sandals and clothes appears stronger, as is the language of “rescue,” given an explicit Passover context. Peter's use of ἐξάγω to describe his release (12:17) is also consistent with the exodus model of deliverance (often in the OT, e.g., Exod 3:8–12; Deut 5:15; Ps 136:11 [135:11 LXX]).¹²⁴

Ant. 3.249); see Fitzmyer, *Acts*, 487; Johnson, *Acts*, 211; Burton, “Passover.” They remain distinct in 4Q326 1 2–3; 11QT XI, 10.

119. Sen. E. *Controv.* 5.4. The different example of Tiberius was thus considered deplorable (Suet. *Tib.* 61.2).

120. See *m. Sanh.* 11:4; cf. Jeremiah, *Theology*, 78; Hill, *Prophecy*, 52; Stauffer, *Jesus and Story*, 209; Le Cornu, *Acts*, 644. For scheduling executions for propaganda, see, e.g., Quint. Curt. 7.5.43.

121. As often noted, e.g., Johnson, *Acts*, 211; Pervo, *Story*, 41. Allen, *Death of Herod*, 98, argues that this festival invites comparison with the Exodus narrative. Although the season makes sense for propaganda reasons noted above, and was likely remembered, Luke probably mentions it for more than merely chronological reasons. It may or may not be relevant, by means of comparison, that he does not provide the year in Agrippa's reign (this was less likely remembered). The gate opening may parallel a pre-Christian tradition about Moses; see comment on Acts 12:10.

122. Allen, *Death of Herod*, 100–101; cf. Marguerat, *Actes*, 426. Focusing instead on Dionysiac parallels, Weaver, *Epiphany*, 155–59, 191, 203 (addressing the three parallels of Strobel, “Passa-Symbolik,” 212–13), views the exodus allusions as “suggestive” but not yet demonstrated, since a wider array of Jewish deliverance stories existed (e.g., 2 Macc 3; 3 Macc 6).

123. The angel, both textually in Exodus and because of closer alternative texts; the gate, because it is not comparable to the sea.

124. The term is common, appearing more than two hundred times in the LXX, but a significant percentage refers to the exodus (especially in the Pentateuch after Genesis). Luke accounts for nine of twelve uses in the NT, including another release (Acts 5:19), but specifically for the exodus in 7:36, 40; 13:17—the uses nearest this one in the text. (Elsewhere in early Christian literature, see, e.g., Heb 8:9; 1 *Clem.* 53.2; *Barn.* 4.8; 14.3.)

Although such a term by itself need not evoke the exodus, it may fit the larger context of possible allusions. In fact, Luke has already spoken of Jesus's mission of freeing prisoners (Luke 4:18). The Isaiah passage refers to Israel's restoration, but just as Luke would read Isaiah's promises of blind sight restored literally (Isa 35:5 in Luke 7:22) as well as spiritually (cf. Isa 6:9–10 in Acts 28:26–27), the God who delivered his people physically at Passover and would do so at the eschatological restoration could also do so for some of his present servants who were agents of the end-time restoration.

Although Luke's mention of the season may evoke the exodus and certainly evokes Jesus's passion, we need not suppose that he invented it. He speaks of an execution planned for "after" the Passover, which ruins an exact correspondence;¹²⁵ and even had the correspondence been exact, festivals were (as noted above) ideal seasons to exploit the didactic value of executions with the largest numbers of people.¹²⁶

(5) *The Guards* (12:4)

Peter's imprisonment is significant. During Jesus's passion at a Passover likely more than a decade earlier, Peter declared his willingness to face "both prison and death" for Jesus (Luke 22:33). On that occasion, he had proved unwilling after all (22:34, 57–61); after the resurrection and Pentecost, however, Peter was ready for prison and death. John the Baptist was imprisoned before he died (3:20), and Jesus warned his followers to expect imprisonment (21:12), a situation many had already experienced (Acts 8:3).

Many parts of the Mediterranean world used public slaves to guard prisons;¹²⁷ here, however, soldiers are explicitly in view (12:4, 6, 18). Despite military terminology suitable to Roman units (a τετραδίων is a quaternion, a unit of four soldiers), these were not necessarily Roman recruits, lent to Agrippa from Roman legions,¹²⁸ or Syrian auxiliaries.¹²⁹ Jewish armies could employ titles of Roman military units,¹³⁰ and since Rome granted Agrippa the title of client king, his Jerusalem guard could be members of his own Jewish army, further pleasing his people. Yet this is not to say, with some scholars, that Agrippa lacked access to Rome's Syrian auxiliaries stationed in Caesarea or Sebaste; Josephus, in fact, suggests that those soldiers remained in those cities that had mainly Gentile populations (*Ant.* 19.356–65); see comment on Acts 10:1.¹³¹ Although it is less likely that Agrippa retained their services for Jerusalem, it is not impossible that the soldiers would be Syrian auxiliaries stationed in the Fortress Antonia.¹³² If the soldiers were Gentile, it could weaken Luke's recent portrayal of Cornelius to emphasize this point.

125. Hengel and Schwemer, *Between Damascus and Antioch*, 251.

126. Cf., e.g., Jeremias, *Theology*, 78; Stauffer, *Jesus and Story*, 209; *m. Sanh.* 11:4.

127. Pliny *Ep.* 10.19.2 supplements public slaves with soldiers, viewing the former as undependable (10.19.1); but Trajan does not want soldiers transferred to guard service (10.20.1) and insists that public slaves will prove adequate if discipline is adequate (10.20.2). See also Rapske, *Custody*, 252.

128. Nevertheless, as "king," he had capital authority and could have executed even citizen soldiers for dereliction of duty or conspiracy.

129. Though King David had used elite Philistine mercenaries (2 Sam 8:18; 15:18; 20:7, 23; 1 Kgs 1:38, 44; 1 Chr 18:17; on the titles, cf. 1 Sam 30:14; Ezek 25:16; Zeph 2:5), the use of Syrian auxiliaries in Jerusalem during this period would hardly help Agrippa identify with Judean nationalism.

130. Jos. *Life* 242; Catchpole, *Trial*, 149 (citing, e.g., Jdt 14:11; 2 Macc 8:23; 12:20, 22; Jos. *Ant.* 17.215); Blinzler, *Trial*, 64–65; Bammel, "Trial," 439–40. Some of the terms, like χιλίαρχος, are common in the LXX (e.g., Exod 18:21, 25; Num 1:16; 31:14, 48–54; Deut 1:15; Josh 22:14, 21; 1 Chr 13:1; 15:25) as well as elsewhere (Jos. *War* 2.578; *Ant.* 17.215).

131. Also see Keener, "Troops."

132. Witherington, *Acts*, 385, argues for Agrippa using Roman troops here, comparing Acts 10:1 (if Cornelius's conversion occurred during Agrippa's reign, though this timing is uncertain).

Sometimes guards were civil toward prisoners,¹³³ but more often they were harsh,¹³⁴ and sometimes they were chosen for harshness (Jos. *Ant.* 18.203).¹³⁵ Guards often demanded bribes and other favors; this practice eventually led many early Christians to pay guards' "wages" (bribes) to support better treatment of prisoners.¹³⁶

Agrippa entrusted Peter to four quaternions of soldiers—that is, four units consisting of four soldiers each.¹³⁷ These soldiers need not have been a special unit assigned to this task, but they may have been. A *contubernium* was a Roman unit, originally referring to those who shared a tent or barracks (Tac. *Ann.* 1.41.1; Suet. *Tib.* 14.4; Caesar *C.W.* 2.29); originally eight men (Ps.-Hyginus *De munitionibus castrorum* 1), it came to be ten, with one in charge (Veg. *Mil.* 2.8, 13).¹³⁸ A water clock could be employed to divide the night into four watches;¹³⁹ each group could thus work in three-hour shifts, ensuring that none of them would fall asleep during the night watch. If the soldiers worked four shifts, Peter was chained to a soldier at either arm, leaving two unchained soldiers at the gate (Acts 12:6). Agrippa is taking no chances that Peter might escape—at least by natural means, the only sort he entertains.

(6) *Prayer for Peter (12:5)*

Prayer is a regular theme of Luke and plays a major background role in this narrative (cf. 12:12).¹⁴⁰ Luke often presents prayer as a means by which God brings about his purposes in history,¹⁴¹ even if, as in this instance, the petitioners' faith proves comically imperfect (12:15).¹⁴²

Prayer could characterize Passover season, since Passover was a night of remembrance,¹⁴³ but Luke leaves no question as to what they were praying about. Jewish people often prayed for deliverance from adversaries;¹⁴⁴ perhaps some of those praying echoed the language of the Psalms (e.g., Pss 17:13; 22:20; 31:1, 15; 43:1; 142:7). One of the most relevant biblical examples was the three days of corporate fasting for Esther as she went to petition the king.¹⁴⁵

133. Rapske, *Custody*, 254–56.

134. *Ibid.*, 256–59. Sometimes governments planted spies in prisons to gain information to convict prisoners.

135. *Ibid.*, 258, noting also that guarding prisoners sometimes made guards worse (Philo *Jos.* 81–84). One offended his guards, leading to their ensuring his death (Diod. *Sic.* 31.9.5; Rapske, *Custody*, 259).

136. Rapske, *Custody*, 259–61, esp. 261.

137. On the arrangement here, commentators cite Veg. *Mil.* 3.8; Philo *Flacc.* 111 (e.g., Conzelmann, *Acts*, 93; Schille, *Apostelgeschichte*, 270; Fitzmyer, *Acts*, 487; Hemer, *Acts in History*, 108; Lake and Cadbury, *Commentary*, 134; Johnson, *Acts*, 211). Cf. also the unit of four guards in Philost. *Vit. Apoll.* 7.31.

138. Le Bohec, "Contubernium." The Roman army's basic unit was a *contubernium*, originally eight men who shared a tent; normally half of such a unit would be dispatched for a work detail such as a crucifixion (Jones, "Army," 193–94; see John 19:23).

139. Romans used four watches (Livy 36.24.1) instead of the traditional Jewish three watches (*b. Ber.* 3a; also found in Hom. *Il.* 10.253); rabbis debated it, some preferring four (*t. Ber.* 1:1; *b. Ber.* 3b). On night watches, see, e.g., Ps 63:6; *Jub.* 25:2; 1QS X, 2. Agrippa's soldiers, whether Gentile auxiliaries or even (given his background in Rome) Judean guards, would presumably follow the Roman discipline. A sundial worked during the day, but a water clock (κλεψύδρα) was needed at night; water clocks had been fairly accurate since the third century B.C.E. (Toomer, "Clocks"; see comment on such clocks at Acts 24:4).

140. Rakocy, "Struktura Ap 12," even suggests that Acts 12:5 is the *dispositio* of 12:1–19, introducing the themes of Peter's deliverance (12:6–11) and prayer (12:12–17).

141. See, e.g., O'Brien, "Prayer in Luke-Acts"; Smalley, "Spirit, Kingdom, and Prayer"; Trites, "Prayer Motif."

142. This in spite of the prayers being made ἐκτενῶς, "fervently," i.e., passionately or sincerely, as in Luke 22:44 (apart from 1 Pet 1:22, the only other NT occurrence), or persistently (cf. Acts 12:12; Luke 18:7); it applies to prayer in all its LXX uses (Joel 1:14; Jonah 3:8; Jdt 4:12; 3 Macc 5:9; also in 1 Clem. 34.7).

143. Reimer, *Women*, 241. Before the exodus, God heard the cries of Israel's people because of their bondage (Exod 2:23, though this was not prayer per se).

144. See Johnson, *Prayer*, 7–12.

145. Faw, *Acts*, 140–41.

Their prayers intensify the narrative's suspense (especially for members of Luke's audience unfamiliar with the time and location of Peter's death): will the prayers of the church prevail, or will Herod's plans? The church had earlier prayed about another oppressive Herod (Acts 4:27), and the apostles had earlier been delivered miraculously from a lesser threat in prison (5:19). But Agrippa I, as a client king, could exercise the capital prerogative legally, in contrast to the Sanhedrin, and the narrative emphasizes that the prisoner was now chained between two guards (12:6).

c. *God's Angel Releases Peter (12:6–10)*

At almost the last possible moment for a discreet deliverance, an angel awakens Peter, guiding him step-by-step to safety until he is awake enough to know the rest of what he must do. Whereas the church is praying fervently for his deliverance (12:5, 12), he is sound asleep (12:6–7). But just as the people praying do not initially believe it when he is released (12:15), neither does he (12:9).

I. ASLEEP BEFORE EXECUTION (12:6)

Peter is heavily guarded, his death imminent, yet he is sleeping so soundly that even after the angel prods him awake, he thinks that he is still dreaming until he is out in the cool night air (12:9, 11). That Peter is chained between two guards parallels him with Paul later in Luke's narrative (21:23; cf. 16:26; 22:29; 26:29; 28:20).¹⁴⁶ Lighter detentions for lesser crimes or for those of higher status lacked chains, but public city prisons required them.¹⁴⁷ Over a period of time, iron chains were hard on the skin,¹⁴⁸ and if adjusted tightly, they functioned as a form of torture;¹⁴⁹ more certainly here, they were often heavy, tiring prisoners and restricting or preventing mobility.¹⁵⁰ Chains also would shame a person (e.g., Polyb. 1.69.5). Often, as here, prisoners were shackled to their guards, usually (when chained by just one hand) the prisoner's "right wrist to the soldier's left."¹⁵¹ Shackled between two guards, Peter should have been more secure than normal.¹⁵²

The purpose of imprisonment was often to secure the person's appearance at trial.¹⁵³ Some persons of high status were executed in prisons to minimize the public shame;¹⁵⁴ here, however, Agrippa plans to bring Peter out before the people for public execu-

146. This connection would reduce the appearance of Paul's shame for any readers inclined to respect Peter. The primary reason for mentioning two guards in the narrative itself, however, is to underline the impossibility of escape by natural means (excepting collusion, which the presumed and actual consequences may safely rule out).

147. See Rapske, *Custody*, 9, 25–28; apparently, however, it was often used even for house arrest (Rapske, *Custody*, 31, citing *Jos. Ant.* 18.237). The binding of prisoners' hands was a common image (e.g., Ovid *Amores* 1.2.19–20).

148. Rapske, "Prison," 828 (citing Lucan *C.W.* 72–73; Sen. *E. Controv.* 1.6.2); Rapske, *Custody*, 207–8. Some also report that they can be painful when it is cold (Yun, *Heavenly Man*, 85). Ancient chains could resemble modern ones, apart from the handcuff (Abbott, *Acts*, 139, on an example preserved in Rome).

149. Rapske, "Prison," 828 (citing *Cod. theod.* 9.3.1); Rapske, *Custody*, 208–9.

150. Rapske, "Prison," 828 (citing *ARS* 8, "The Twelve Tables," 3.3; Ovid *Con. Liv.* 273–74; Suet. *Nero* 36.2; Sen. *E. Controv.* 1.6.2; Philost. *Vit. Apoll.* 7.36). Those just released from chains might remain sluggish (cf. Libanius *Fable* 2.2).

151. Rapske, *Custody*, 31. Commentators cite *Jos. Ant.* 18.196; Sen. *Y. Ep. Lucil.* 5.7 (e.g., Knowling, "Acts," 274; Conzelmann, *Acts*, 93; Fitzmyer, *Acts*, 488).

152. Chains could be fastened to either or both legs and wrists, the neck, and even more (Rapske, *Custody*, 206–7).

153. *Ibid.*, 10–12.

154. *Ibid.*, 13–14. Such executions were usually by strangulation (Cic. *Verr.* 2.5.147; Sall. *Catil.* 55.5–6; Tac. *Ann.* 5.9; 6.39–40, 58; Suet. *Tib.* 61.4–6; Pliny *Ep.* 2.11), but also from starvation and cold (Plut. *Mar.* 12) or sword (Lucan *C.W.* 2.76–81; Rapske, *Custody*, 14). Cf. Plut. *Cic.* 22.2, though this prison execution may also involve dangerous notoriety.

tion (Acts 12:4, 6).¹⁵⁵ Neither Greeks nor Romans generally used imprisonment as a punishment in itself, though there were exceptions.¹⁵⁶ Roman imprisonment was usually for brief detentions—for example, as a holding place before swift executions (Appian *Bell. civ.* 1.3.26; Plut. *Cic.* 20.3).¹⁵⁷

That this is “the night when Herod planned to bring him out” does not mean that Agrippa planned to have him executed at night, which was a very unusual practice (cf. Val. Max. 4.6.ext. 3). He plans to “bring him to the people” (Acts 12:4), and a public execution would not be possible at night, when most people slept (see comment on Acts 4:3). Jewish people reckoned days starting from nightfall, and so this is the night immediately preceding Peter’s scheduled execution during the coming daylight. Presumably this is nearly the end of the Feast of Unleavened Bread (12:3–4),¹⁵⁸ and Herod may have already announced his plan for a speedy execution (cf. 12:15). As at some other points in Scripture, deliverance comes close to the last moment, building faith for those in the narrative world (and suspense for the first-time reader).

One could parallel Peter’s sleep here with his failure to guard Jesus at Gethsemane (Luke 22:45–46) or to stay awake at the transfiguration (9:32). More likely, however, in this situation it indicates his trust in God’s plan (cf. Luke 8:23–25), though he, like everyone else (cf. Acts 12:15), apparently anticipates his death (cf. 12:9). Although exhaustion may have been the cause for sleep (cf. 20:9),¹⁵⁹ fear¹⁶⁰ or other anxieties¹⁶¹ were also often cause for sleeplessness (though cf. also Luke’s justification of the apostles as sleeping “from grief” in Luke 22:45). Ancient readers might have seen this as a sign of virtuous serenity or fearlessness; thus, for example, a Stoic praises Cato’s bravery and tranquility in spending the night of his expected death in reading (Sen. Y. *Ep. Lucil.* 71.11).¹⁶² Whereas Peter refuses to fear those who kill the body (Luke 12:4), Herod, by usurping divine prerogatives (Acts 12:2–4, 22–23), fails to fear the one who can cast into hell (Luke 12:5). Resisting a tyrant was considered praiseworthy,¹⁶³ and here Peter may fail to even dignify the ruler’s threats with fear.

The prison’s location is of interest for Peter’s ready access to the house of John Mark’s mother (Acts 12:12), probably not the most private place he could have gone; it suggests a prison near the Upper City, such as the Fortress Antonia. Given the large

155. Greek republics employed the same expression, “bring forth [ἀνάγω] to the people,” for public prosecutions (cf. Acts 17:5), though this may not be relevant here (Judge, *Pattern*, 66).

156. Berger and Lintott, “Prison”; Lintott, “Punishment”; Rapske, *Custody*, 12–14.

157. Perhaps also Vell. Paterc. 2.91.4. Rapske, *Custody*, 12, also emphasizes that detentions even after conviction could be brief (e.g., Dio Cass. 58.27.5; Sen. Y. *Tranq.* 14.6–7), but detainees could be kept alive longer (e.g., to be tortured for evidence against others, Gaius *Dig.* 48.19.29). For detention before trial, see, e.g., Quint. *Decl.* 348 intro (though the trial is preempted); prison is probably the implied place of holding for thirty days while awaiting execution in Quint. *Decl.* 313 intro.

158. The “night” could then evoke God’s activity in the Passover narrative (Exod 12:8, 12, 30–31; *Jub.* 49:1–2, 10; *Jos. Ant.* 2.313), a “night to be observed” (Exod 12:42). Those associating the Feast of Unleavened Bread with present deliverance might also strike at night (cf. *Jos. War* 4.402; but night was the most strategic time for them to attack, in any case).

159. Cf., e.g., hard workers (*m. Ab.* 3:4). If emotional distress had prevented sound sleep on some earlier nights, he could well be exhausted by this point; in any case, his sleep here is portrayed as deep, not fitful and vigilant, so that it takes some time for him to fully awaken (Acts 12:9).

160. E.g., Pub. Syr. 359; Plut. *Alex.* 31.4; Sil. It. 13.256–57.

161. E.g., Hom. *Il.* 2.2–3; Aristoph. *Lys.* 27; Livy 40.56.9; Plut. *Cic.* 35.3; *Virt.* 2, *Mor.* 100F; perhaps 2 Cor 11:27; also mourning.

162. Philotas in Quint. Curt. 6.10.14 claims that only one with a clear conscience would sleep (in this case, oblivious to the possibility of arrest; in Peter’s case, one who also has nothing to fear). Pervo, *Acts*, 304n35, helpfully compares Socrates before his execution (Plato *Crito* 43B). Cf. also Otho, though his death appears “nobler” than his life (much sleep in Suet. *Otho* 11.2; some sleep in Tac. *Hist.* 2.49).

163. E.g., Sen. E. *Controv.* 2.5.intro.; 2.5.8. Cf. comments on tyrannicide at 12:23.

numbers of prisoners reported and Josephus's plural "prisons,"¹⁶⁴ probably Jerusalem had multiple locations for detention.¹⁶⁵ The Antonia is the most commonly suggested site here.¹⁶⁶ Prisons were sometimes in citadels (Polyb. 5.39.4–5), and the Temple Mount, which the Antonia guarded, would qualify as a citadel.¹⁶⁷ Prisons were also often near other major public buildings (Vitruv. *Arch.* 5.2.1), as was the Antonia, on the corner of the Temple Mount in Jerusalem. Prisoners could be detained in the Antonia (Jos. *War* 1.118); see further discussion below.

II. ROUSED BY AN ANGEL (12:7)

Undeterred by prison or guards, an angel suddenly is present.¹⁶⁸ That "angel of the Lord" here (and in Acts 12:23) is anarthrous does not rule out that a prominent angel is in view.¹⁶⁹ Luke never employs the article with this phrase (Luke 1:11; 2:9; 5:19; 8:26; 12:23), with the possible exception of Acts 12:11 (and, on the most likely textual reading, not even there). Yet when doubted, the Lord's angel in Luke 1:11–20 identifies himself as Gabriel (1:19; he appears again in 1:26). Gabriel was certainly a prominent angel (Dan 8:16; 9:21),¹⁷⁰ the only named angel in the OT (minus the Apocrypha) besides Michael (Dan 10:13, 21; 12:1).¹⁷¹

Greeks had stories in which deities or other beings entered rooms through bolt holes, like mist;¹⁷² but those familiar with Scripture would already understand that angels could appear and disappear without explanation (Judg 6:12, 21; 13:9, 20; 1 Kgs 19:5, 7).¹⁷³ (The claim of angelic interventions continues in modern popular Christian literature, often referring to sudden rescues by those who appear to be human and then are no longer to be found.)¹⁷⁴

164. Le Cornu, *Acts*, 645, cites Jos. *War* 4.353, 385; 5.526; see also *Ant.* 20.215; *War* 2.273; 6.412.

165. Le Cornu, *Acts*, 645.

166. *Ibid.*, 646.

167. Although a client king would be free to ignore the rule, Roman law (at least in a later period) prohibited detaining prisoners in private prisons (Robinson, *Criminal Law*, 49).

168. Likewise, in contrast to human inquirers seeking Peter (Acts 10:17), angels did not need to ask directions.

169. Though, e.g., in Tob 12:22, the articular angel of the Lord is Raphael. The angel of the Lord can be either articular (e.g., Num 22:31, 34; Judg 13:13–21) or anarthrous (e.g., Gen 22:11, 15; Exod 3:2; 4:24; Judg 5:23) in the LXX, sometimes both in the same context (Gen 16:7 is anarthrous, but 16:8–11 articular; Judg 2:1 anarthrous, but 2:4 articular; Judg 6:11–12 anarthrous, but 6:14, 16, 20–21 articular, with 6:22 having both). Michael is an "angel of the Lord" (anarthrous, *Test. Ab.* 6:1 A; though this is a predicate nominative, where anarthrous forms are more common, cf. Metzger, "Translation," 125); but it is not always possible to make the distinction (especially in Greek, but cf. also 1QSb IV, 24–26).

170. As one of the two named angels in Daniel, he figures prominently in early Jewish speculation, e.g., 1QM VIII, 16; 1Q19bis 2.4; 4Q285 10.3 (reconstructed); 4Q529 1.3–4; 4Q557 1.2; 1 En. 9:1; 10:9; 20:7; 40:6, 9; 54:6; 71:8–9, 13; 2 En. 21:3, 5; 24:1; 72:1 A; 3 En. 14:4; 17:1, 3; *Sib. Or.* 2.214–20; *Pesiq. Rab Kah.* 5:3; *b. B. Bat.* 74b–75a; *Ber.* 4b; *B. Meši'a* 86b; *Sanh.* 19b; *Šabb.* 55a; *Soṭah* 12b; 33a; *Yoma* 77a; *Gen. Rab.* 50:2; 63:14; 78:1; *Exod. Rab.* 2:5; 18:5; *Deut. Rab.* 5:12; *Song Rab.* 2.4, §1; 6:10, §1; *Lam. Rab.* 3:23, §8; *Pesiq. Rab.* 21:9; 35:2; 46:3; PGM 3.405; 7.1012–13; 90.1–13; Goodenough, *Symbols*, 2:174–88.

171. Angels also help God's agent in the Gospel. Jesus rejected the devil's use of Ps 91:11–12 to argue for Jesus's throwing himself down and depending on angels (Luke 4:9–12), but angels did indeed serve Jesus (e.g., 2:13–15; 24:23) and continued to be active on behalf of the spreading movement (e.g., Acts 5:19; 8:26; 10:3; 12:23; 27:23).

172. E.g., Hom. *Od.* 4.795–803, 838–39; Boring, Berger, and Colpe, *Commentary*, 306, cite Hom. *Hymns* 4.145–46 (to Hermes).

173. On angels in the OT, see, e.g., Meier, "Angels."

174. E.g., Bryson, "Angels," 46; missionary reports in Davis, "Surrounded," 123; Bray, "Angel"; Johnson, "Alone"; Stewart, "Guardian Angel"; Malek, "Stranger"; Harris, *Acts Today*, 132–40; for angels obvious as angels, see Tari and Tari, *Breeze*, 171; Khai, "Pentecostalism," 269; Numere, *Vision*, 202; in a symbolic vision, Rumph, *Signs*, 90–93; most extensively, Moolenburgh, *Meetings*. Two less ambiguous reports, both involving children, are Caldwell, "Prayers"; Jones, "Rumors," 22 (for children, see also Hickson, *Heal*, 115 [cf. 116], from 1922 South Africa); a number of claims also appear in Schlink, *World*, 127–38; Baker and Baker, *Enough*, 18,

The term for “appeared” or “stood” is distinctively Lukan (eighteen of the twenty-one NT uses), and Luke occasionally uses it elsewhere for the sudden appearance of an angel (Luke 2:9; 24:4). The light shining evokes other superhuman appearances, through various terms (2:9, where an angel of the Lord also stood [ἐπέστη]¹⁷⁵ and where the Lord’s glory similarly shone around [περιέλαμψεν]; Acts 9:3, where “light” flashed).¹⁷⁶

The term Luke uses for the angel’s blow to Peter (πατάσσω) is a harsh one (Luke 22:49–50; Acts 7:24),¹⁷⁷ but Luke has good reason to employ it. In Acts 12:7, the angel “strikes” Peter to deliver him; in 12:23, the angel “strikes” Herod to kill him. These are the only two verses in the NT where an angel “strikes”; Luke may have chosen the term to evoke 2 Kgs 19:35 in Acts 12:23. This harsh term also implies the depth of Peter’s sleep, which is not shaken off fully until Acts 12:11; it takes a blow to rouse him, yet he is still not convinced that he is awake as late as 12:9.

The angel commands Peter to rise (ἀνάστα) quickly; the chains apparently drop off when Peter obeys, as the gate also opens as they proceed (12:10). This fits the familiar pattern of miracles following a demonstration of faith (e.g., Luke 17:6; Acts 3:6–7; Mark 11:23). The verb ἀνίστημι appears in the imperative for divine commands (Acts 8:26; 9:6; cf. 26:16) and miracles (9:34, 40; 14:10).

Because they could not have imagined Peter escaping, it is possible that Luke wants us to envision the guards drifting off to sleep, by a divinely heavy sleep.¹⁷⁸ Given the three-hour shifts and high penalties for sleeping on duty, however, it is also possible that they remained awake throughout the angelic intervention.¹⁷⁹ Yet they did not notice the slackening of chains attached to their wrists (12:7), Peter putting on his cloak (12:8), or his walking through the gates (12:10) any more than they saw the angel or the light (12:7). (The inner cell might have been dark, as in 16:24, 29,¹⁸⁰ but torches may have burned near the gates where the guards stood. And a new light in the cell in 12:7 should have awakened sleeping guards [though it did not suffice for Peter] or startled those who were awake.) All this suggests selective visibility and selective revelation, as in 9:7 and 10:41 (see comment there; with angels, cf. also, e.g., presumably 12:23; 27:23). If there was light in the cell, how would the guards not at least notice Peter’s absence? Did his image remain as a phantom, as was common in Greek literature?¹⁸¹ Or were their eyes simply adjusted so as not to notice (Luke

62, 64–65 (most visionary); beyond easy attribution to coincidence is the testimony in Moreland and Issler, *Faith*, 155–56; Ritchie, *Spirit*, 122 (to one who had not heard of this phenomenon), 206. For some claims from a wider range of religious perspectives, see Woodward, “Angels”; Wuthnow, *Heaven*, 114–41 (noting on 121–22 that roughly a third of Americans claimed to have had at least one angelic encounter).

175. Again, eighteen of the twenty-one uses of this verb in the NT appear in Luke-Acts, so this stylistic feature is not surprising; but Luke 2:9 and Acts 12:7 are the only two texts linking the verb with a form of “shines.”

176. In ancient texts, cf., e.g., 4Q377 2 II, 7–8; Xen. *Cyr.* 4.2.15; Heliod. *Eth.* 10.9; see comment on Acts 9:3. Perhaps a century or more later some would tell a story about bright light filling the room when Peter prayed (*Acts Pet.* 21, in Aune, *Dictionary of Rhetoric*, 16).

177. E.g., Barrett, *Acts*, 580. Conzelmann, *Acts*, 93–94, cites literary parallels for sound sleepers aroused only by touch (Hom. *Il.* 10.157–59; Curt. Ruf. 4.13.20, §49), although, even without parallels, no one disputes this.

178. Escapes and adventures in enemy camps while enemy sentries slept are common in ancient texts, e.g., 1 Sam 24:5; 26:7–12; Hom. *Il.* 10.465–514; Virg. *Aen.* 9.314–66 (but cf. 9.375–445); Plut. *Cam.* 33.4; cf. Hom. *Od.* 2.395–96; spying in Hom. *Il.* 10.326–27 (which fails); *Little Iliad* frg. 2, from scholiast on Aristoph. *Knights* 1056–57; Judg 7:11. In Lucian’s satire, Zeus could order the night extended to cover up his adultery (*Dial. G.* 231 [14/10, Hermes and Helios 2]).

179. For invisibility, see comment on Acts 8:39; further below.

180. This would fit the language of light shining suddenly (Acts 12:7) best, although such descriptions were also possible even at midday (9:3; 22:6–11; 26:13).

181. Cf. Hom. *Il.* 5.449–53; Helen in Euripides’s *Helen* (following Stesichorus’s *Recantation*) and Apollod. *Epit.* 3.5; Iphigeneia in Lycophron *Alex.* 190–91 and Apollod. *Epit.* 3.22; Ovid *Fasti* 3.701–2 (allowing Caesar’s snatching up to heaven despite his apparent death, 3.703–4); Ixion’s cloud in Apollod. *Epit.* 1.20; cf.

24:16, 31)? Other cases of selective visibility leave angelic or other supernatural activity unseen; here even the natural activity of Peter goes unnoticed.

Miraculous escapes from prison were depicted in fairly standard terms, and Luke's language may evoke that tradition.¹⁸² Prison escapes often appear in Hellenistic fiction,¹⁸³ whether due to human means or supernatural aid.¹⁸⁴ The prototype for such stories was Dionysus's escapes and rescues of his followers from Pentheus's prison, as has long been noted.¹⁸⁵ Some scholars think that Luke borrows images from this source;¹⁸⁶ others, that he seeks to rival and supplant it;¹⁸⁷ and others, that the language was too widespread and familiar by this period to evoke a single source.¹⁸⁸ Some Diaspora Jews would have known the story about Moses attributed to the much earlier Jewish writer Artapanus, which employs the same Dionysiac escape imagery;¹⁸⁹ in a Passover context, a Moses allusion would be significant.

Though Luke especially evokes biblical language and parallels in this context, he is not averse to some Greek cultural allusions that are also fulfilled (or in this case, perhaps supplanted) by God's activity in the church (cf. Acts 17:18). Though Luke has other escapes (5:19) or nonescapes (16:28; 24:27), this context may also evoke Israel's liberation from Egypt (see comment on Acts 12:4). By whatever means, God could free a prisoner condemned to execution (Ps 102:20); in Peter's case, this would lead to at least some praise in Jerusalem (102:21).¹⁹⁰ For further discussion of the parallels (especially the valuable connections with Dionysiac release narratives), their significance, and the degree of their relevance to the question of the historical reliability of Luke's sources in his escape stories, see extended comment on Acts 5:19.

III. DRESSING BEFORE ESCAPE (12:8)

The angel must command Peter to get dressed because Peter does not know that they are going out; he also may need detailed instruction because he does not believe that he is genuinely awake (12:9). The instruction also shows the reader that God has the guards' sleep well in hand; under normal circumstances, fugitives should so

the angel arrested in Moses's place in *y. Ber.* 9:1, §8. This led to the docetic idea of a wraith crucified in Jesus's place (cf. *Iren. Her.* 1.24.4), apparently followed in the Qur'an (cf. Cook, *Muhammad*, 79).

182. Bruce, *Acts* 1, 245 (citing the familiar Eurip. *Bacch.* 443ff.; Ovid *Metam.* 3.696ff.; often cited, e.g., Schille, *Apostelgeschichte*, 271). See here much more fully the discussion at Acts 5:19–20.

183. Johnson, *Acts*, 217, cites Lucian *Tox.* 28–33; Ach. Tat. 3:9–11; others (e.g., Weiser, *Apostelgeschichte*, 284–85) also cite examples. MacDonald, *Imitate Homer*, 123–45; idem, "Acts 12:1–17 and Iliad 24," compares Peter's prison escape (Acts 12) with Hom. *Il.* 24; but Weaver, *Epiphany*, 153, argues that "there is little that is convincing about MacDonald's analysis" here, complaining that he inaccurately conforms the sequence in *Il.* 24 to Acts and, worse still, portrays the opening of gates as part of Hermes's delivering Priam when, in fact, they belong to Priam's *entrance*, not exit. (The problem, Weaver notes [154], comes in seeking to identify a single text as background.) Talbert, *Acts*, 110, compares also later apocryphal acts that employ the motif (*Acts of Paul*; *Acts Thom.* 142, 153–55).

184. Johnson, *Acts*, 217, cites Ovid *Metam.* 3.690–700; Artapanus *Concerning the Jews* frg. 3; *Acts Paul* 7; *Acts Thom.* 162–63; for a much longer list of sources, including Pacuvius, see Rapske, *Custody*, 412–18. Cf. also *Hist. Rech.* 10:5 (probably a monastic Christian work; I am skeptical that it contains pre-Christian material). Conzelmann, *Acts*, 94, contrasts Peter with a divine man who can free his own chains (Philost. *Vit. Apoll.* 7.34, 38; 8.30).

185. Eurip. *Bacch.* 346–57, 434–50 (esp. 443–48), 498, 510–643; later, Apollod. *Bib.* 3.5.1; Ovid *Metam.* 3.699–700; see further comment in Otto, *Dionysus*, 97. The standard narrative elements in this tradition appear here and elsewhere in Acts; see Weaver, *Epiphany*, 22, 149–217. There are too few verbal connections with *Bacchanals* to suggest a direct allusion to that work; instead, there are shared motifs with the broader Dionysiac escape tradition (including loosing of both chains and doors and inadequate guards; Weaver, *Epiphany*, 195–96).

186. Renehan, "Quotations," 22.

187. Theissen, *Miracle Stories*, 277.

188. Conzelmann, *Acts*, 94.

189. With, e.g., Le Cornu, *Acts*, 649 (citing Artapanus 3.27.23 [= OTP 2:901, from Euseb. *PE.* 9.27.1–37]).

190. That God cared for the life of the righteous was also a commonplace (e.g., *Gen. Rab.* 58:1).

value haste that they leave even their outer cloaks behind (cf. Mark 13:16),¹⁹¹ but here preparation is more crucial than is immediacy.¹⁹² Once outside, being dressed normally would prevent him from arousing suspicion on the street (which would not contain many people, though wheeled traffic presumably would be transporting goods at this time; see comment on Acts 12:10).

The cloak and sandals would be Peter's own; prisons did not supply these items, and prisoners sometimes depended even on outside help for food.¹⁹³ An outer garment (ἱμάτιον) doubled as a covering for sleep at night,¹⁹⁴ and Peter may have been employing it "as bedding or a sleep covering" here as well.¹⁹⁵ This mantle would protect him from the cool air of the night.¹⁹⁶ The command to "gird" (ζῶσαι) himself may suggest wrapping something around his waist, like a sash or belt,¹⁹⁷ or tucking up his long robe into such a sash, so that he can move more freely (cf. 2 Kgs 4:29; 9:1; Job 38:3; 20:7).¹⁹⁸ The latter activity (often expressed by περιζώννυμι or cognates) was normal for soldiers before battle (Plut. *Coriol.* 9.2) and (perhaps significantly in view of this being the end of the Feast of Unleavened Bread, Acts 12:3–4) for the Passover (Exod 12:11, also with sandals on their feet). But such language also stands for any kind of readiness for movement or quick action.¹⁹⁹ A prisoner wishing to escape at night might gird himself and don sandals (cf. perhaps Vell. Paterc. 2.41.3, describing how Caesar avoided the suspicion by wearing them all the time).

Although urban people usually went barefoot indoors (or wore slippers),²⁰⁰ those in the eastern Mediterranean preferred outdoor coverings for their feet with open-work upper sections (i.e., lattices of leather straps rather than the closed design noble Romans preferred with togas).²⁰¹ Whereas Greeks preferred to go barefoot

191. Omitted in Luke 21:12, perhaps because Jerusalem's fall was past (not likely simply to avoid conflict with his telling of Peter's escape here). Night could be cool in Jerusalem during Passover season (Craig, "Tomb," 184).

192. Jews escaping Egypt were to be girded in faith, in advance of their deliverance, aiding their haste (Exod 12:11). The contrast makes Peter's unpreparedness at this season—because he was not expecting escape—all the more ironic.

193. See Rapske, "Prison," 828–29; idem, *Custody*, 209; comment on Acts 24:23.

194. Deut 24:13; Jos. *Ant.* 4.269. Cloaks also could do double duty as blankets among Romans (Croom, *Clothing*, 30).

195. Rapske, *Custody*, 199.

196. On this garment more fully, see, e.g., Croom, *Clothing*, 127; comment on Acts 7:58; for Jewish apparel in general, see Goodenough, *Symbols*, 9:168–74.

197. Cf. two almost identical verbs in LXX Exod 29:9; Lev 8:7, 13; 16:4; 1 Sam 17:39; 25:13; Isa 11:5; Ezek 9:11; 16:10; 23:15; 2 Macc 10:25; the noun cognate ζώνη in Exod 28:4, 39–40; 29:9; 39:29; Mark 1:6; 6:8; Rev 1:13; 15:6; and esp. Acts 21:11. This may be minimal for making himself presentable (cf. the cognate verb in Luke 17:8). One could, however, wear the basic tunic even without a belt (Croom, *Clothing*, 127).

198. See Jeffers, *World*, 43; on "shortening" a (woman's) long garment by tucking it into the belt, cf. Cary and Haarhoff, *Life*, 97. Interestingly, the one other NT use of ζώννυμι is a Johannine tradition about Peter's final (and fatal) imprisonment, where he cannot gird himself (John 21:18). Luke may here play off a Petrine martyr tradition later recorded in John 21.

199. See 1 Kgs 18:46; 2 Kgs 4:29; 9:1; Prov 31:17; Jer 1:17; Luke 12:35, 37; 17:8; Eph 6:14; 1 Pet 1:13; Poly. *Phil.* 2.1; soldiers before battle in Plut. *Coriol.* 9.2; cf. perhaps Hor. *Sat.* 1.5.5; tavern work in Dio Chrys. *Or.* 72.2. For comment about the ancient Middle Eastern custom, cf., e.g., Kelly, *Peter*, 65; Best, *Peter*, 84; Mounce, *Peter*, 18.

200. Cary and Haarhoff, *Life*, 98 (noting that boots or clogs prevailed in rural areas). The indoor footwear of the well-to-do differed from their outdoor wear (Croom, *Clothing*, 59, 63); Romans often wore ankle- or knee-high socks, and in Gaul, men even wore trousers (Croom, *Clothing*, 59).

201. Cary and Haarhoff, *Life*, 98; Croom, *Clothing*, 63. That sandals would be a luxury for free persons (Jeremias, *Parables*, 130) may be an exaggeration, but they would be more common for free persons than field servants (cf. Bailey, *Poet*, 185); observations from more recent peasant life may tell us more about norms for the poor than literary sources, but Judea was not as impoverished as Egypt, nor was Peter a peasant (even before being called).

indoors,²⁰² only the poorest people did so outside.²⁰³ (In poorer Egypt, villagers, in contrast to metropolitans, went barefoot and had more foot problems.)²⁰⁴ Although some later rabbis (concerned with halakic precision) debated over whether to don the right or left sandal first,²⁰⁵ undoubtedly this was a matter of personal habit for most people. Although footwear could consist of palm or other atypical substances, people usually made it from “vegetable- or alum-tanned leather.”²⁰⁶

Roman shoes often appear to be simply slippers with the upper leather and leather soles “seamed together.”²⁰⁷ The most basic form of sandal included simply a sole with narrow leather straps holding it to the foot; more respectable shoes could be made from a single piece of leather or, most elaborately, multiple pieces of leather connected with the sole.²⁰⁸ The Roman variety of shoes, at least, lacked heels and contained iron nails to hold the shoe together, but such shoes also slipped easily on pavements.²⁰⁹ At least in later times, Judeans avoided nails in their shoes.²¹⁰ The usual basic form of sandal was “a fan-shaped splay of straps passing from between the toes up to the top of the ankle.”²¹¹ Because the straps were light, a person with sandals seemed almost barefoot except on the bottom.²¹²

IV. LEAVING THE PRISON (12:9–10)

Although Peter obeys and follows the angel, he is not yet interpreting his deliverance literally (Acts 12:9). Since night “visions” might at times be dreams,²¹³ it is reasonable that Peter supposes that he is dreaming,²¹⁴ perhaps of a symbolic liberation to be accomplished in his execution.²¹⁵ Sometimes an event seems so surprising that a symbolic interpretation initially appears more plausible.²¹⁶ Yet Peter's skepticism may seem most odd since an angel has delivered him before (5:19);²¹⁷ but he has

202. Cosgrave, *History of Costume*, 48; this was opposite the ancient Egyptian pattern of footwear indoors but not outside (25) but probably accorded with the Minoan custom (35).

203. *Ibid.*, 48. Dio Chrys. *Or.* 10.8 prefers going barefoot to being poorly shod, probably associating this behavior with the poor; some others who were philosophically minded also preferred going barefoot (Mus. Ruf. 19, p. 122.5; cf. Matt 10:10). Runners also went barefoot (Mus. Ruf. 19, p. 122.9–11), as did farmers when working (Max. Tyre 24.6); the humbling of fasting might require the removal of sandals (*y. Ta'an.* 3:11, §4). By contrast, rabbinic circles expected most people to have different sandals for the Sabbath from those worn on other days (*y. Sabb.* 6:2, §1).

204. Lewis, *Life*, 69; in earlier times, see Cosgrave, *History of Costume*, 25. In contrast to Greeks, Egyptian women were traditionally denied shoes; this required them to stay home (Plut. *Bride* 30, *Mor.* 142C).

205. Jacobson, “Shoes,” thinks that the debate reflects Pythagorean interests (*b. Šabb.* 61a).

206. Croom, *Clothing*, 64. Cosgrave, *History of Costume*, 25, notes that people often made sandals of “tooled leather or of purple leather with piped edges that were attached to the sandal by a clasp hanging on a strand of plaited leather.” Some strict Jews might use reeds or bamboo footwear instead of leather on Yom Kippur (Le Cornu, *Acts*, 728). Egyptian gentry might have leather or papyrus rind, with decorations of beads (Lewis, *Life*, 52). Wealthy footwear could also be alluring (Jdt 10:4; 16:9).

207. Forbes, *Technology*, 5:59; on Greek footwear, see 5:57–59, and for Roman, 5:59–60; much more extensively, see Goldman, “Roman Footwear.”

208. Croom, *Clothing*, 60–61.

209. *Ibid.*, 60 (the nails might have to be purchased separately [63, citing Diocletian's later price list]).

210. *Ibid.*, 131 (claiming that the tradition began in times of persecution); cf. Evans, *World*, 151.

211. Cosgrave, *History of Costume*, 48.

212. *Ibid.*

213. Eleven of twelve NT uses are in Acts, of which two (both Paul's) refer to visions at night (Acts 16:9–10; 18:9); visions and dreams are connected in 2:17.

214. So Haenchen, *Acts*, 384. Because epiphanies were often connected with dreams and visions (Weaver, *Epiphany*, 166–72), Peter has to realize that his release is real (172).

215. Cf. the later symbolism in the dream in *Passion of Perpetua and Felicitas* (in, e.g., Friend, *Rise of Christianity*, 291, 412–13; Walsh, *Dictionary*, 964–65). The vision in Acts 10:11–13 had a figurative point but, unpredictably, the present experience was literal.

216. In one modern narrative, see MacNutt, *Angels*, 21–22.

217. For parallelism between the scenes in some respects, cf., e.g., Goulder, *Type and History*, 26.

also experienced an object-lesson vision earlier in Acts (10:10–16), and Luke may well expect the informed reader to assume that Peter has had other visions periodically (cf. 2:17; 2 Cor 12:1–4). Angels could appear in dreams (Gen 28:12; 31:11; cf. Matt 1:20; 2:13, 19; perhaps 1 Kgs 19:5–7, including striking awake). Perhaps he has been sleeping so soundly (Acts 12:7) that it takes a few moments to be fully awake.

This portrayal of Peter serves well an irony in the context. Peter doubts the reality of the angel in 12:9, then realizes that it was real (12:11); by contrast, those praying for Peter will believe that he is an angel and doubt that he has really come. Peter thinks the angel he is seeing is a “vision” just as the doubting disciples claimed that the women saw only a “vision” of angels in Luke 24:23. As in other biblical narratives, the “hero” is God; even the most faithful of human agents remain “humans just like” others (cf. Acts 14:15).

That the iron²¹⁸ (thus, heavy) gate opened “by itself” (αὐτομάτη, 12:10) reflects a long Hellenistic tradition associated with the escapes mentioned above (see comment on Acts 12:7).²¹⁹ When Dionysus freed prisoners, the fetters fell from their feet αὐτόματα, of themselves (Eurip. *Bacch.* 447), and the doors likewise unbarred themselves without a human hand (*Bacch.* 448).²²⁰ A consort of Zeus was freed by her bonds loosening αὐτομάτως (Apollod. *Bib.* 3.5.1); door bolts sprang back αὐτόματοι from Medea’s enchanted music (Ap. Rhod. 4.41–42). In the same tradition, Apollonius released his own bonds, then ran to the prison doors, which opened for him without his touch; then he vanished (Philost. *Vit. Apoll.* 8.30).

The language also applied to divine activity when not connected to prison release: thus the gates of heaven opened αὐτόματα, “self-bidden,” as Hera’s horses moved forward (Hom. *Il.* 8.392–93 [LCL, 1:367]); when Apollo visits his shrine, Callimachus poetically calls for its doors’ bolts and bars to push themselves back (Callim. *Hymns* 2 [to Apollo], lines 1–8).²²¹ Greeks also spoke of animals that offered themselves willingly for sacrifice (Philost. *Hrk.* 17.3–4), sometimes using this term (56.4, αὐτόματον).

Similar images also appear in Jewish sources. Like Callimachus’s summons to the doors of Apollo’s shrine,²²² Josephus mentions the temple doors opening by themselves (*War* 6.293), though this was a negative portent (6.289–96; Tac. *Hist.* 5.13).²²³ The closest LXX use of the same term as here is undoubtedly Josh 6:5, where Jericho’s walls collapse unaided (a case of miraculous ingress rather than egress).²²⁴

The closest parallel here, however, is Artapanus’s third- or second-century B.C.E. story of Moses in Pharaoh’s prison, when Moses came to release the Jews (relevant again to this context, Acts 12:3–4). “When night came, all the doors of the prison opened of themselves,²²⁵ and some of the guards died, while others were relaxed by

218. Ironwork was well more than a millennium old by this point and fairly sophisticated (see Riederer, “Ores”; idem, “Iron: Greece”; Riederer and Wartke, “Iron”). Rabbinic literature attests even case hardening and Indian steelwork as early as the fourth century C.E. (Levene and Rothenberg, “Evidence”).

219. The term appears elsewhere in the NT only at Mark 4:28 (for growing seed; cf. seed without farmers’ assistance in Lev 25:5, 11; 2 Kgs 19:29). One may contrast the gate in Acts 10:17, opened by more natural means but after God secures Peter’s cooperation.

220. Ovid *Metam.* 3.699–700 is even more dramatic here, with the prison doors flying open and the chains dropping.

221. For discussion of the motif, cf. also Brawley, *Luke-Acts and Jews*, 58; Haenchen, *Acts*, 390. Such stories sometimes also emphasized “the weight and solidity of the door” that moved (Lake and Cadbury, *Commentary*, 136, comparing Mark 16:4); here the gate is “iron.” For deities associated with gates (as guardians), see Johnston, “Gates” (on Hecataea, citing Aeschylus in *TrGF* 388; Aristoph. *Wasps* 804; on Hermes, e.g., Theocritus *Idylls* 25.4; Aristoph. *Plut.* 1153; Paus. 1.22.8).

222. Conzelmann, *Acts*, 94, also notes the opening of heaven’s gates (Hom. *Il.* 5.749; 8.393).

223. Conzelmann, *Acts*, 94; cf. Bruce, *Acts*¹, 246; Le Cornu, *Acts*, 649.

224. Cf. perhaps self-kindled fire for judgment in Wis 17:6.

225. Eusebius’s αὐτομάτως here might be an additional accommodation to Greek tradition, however, since Clement has “according to God’s will” (Collins in *OTP* 2:901 n. j2).

sleep and their weapons were broken.”²²⁶ Peter's encounter is less spectacular, since it does not slay the guards, nor does he proceed to Agrippa's palace to wake up the king, as Moses did with Pharaoh (Euseb. *P.E.* 9.27.24). But Artapanus's account shows that the motif had been accepted in hellenized Jewish circles for centuries before Luke wrote. It seems at least possible that the self-opening gate might also remind hearers of the stone that has been rolled away²²⁷ (Luke 24:2, employing a perfect passive participle; although *self*-rolling is not specified in the extant first-century gospels).²²⁸

Since the shift had four guards (Acts 12:4) and half of them remained in Peter's cell (12:6), he passed only two guards going out, neither of whom saw him any more than the first two had.²²⁹ Peter and the angel pass the door of the cell, and possibly a prison door beyond the guards, if the gate mentioned here is outside a courtyard. That the gate led “to the city” almost certainly does not place the prison outside the city (even allowing for possible executions there). If the Fortress Antonia is in view, it probably means the *inhabited* city, away from the prison and presumably from the temple courts, since one could exit the Antonia tower either toward the temple or toward the city.²³⁰ The temple was not easily exited at night and was full of Levite watchmen (on the Levite police, see comment on Acts 4:1),²³¹ but one would not need to leave the Antonia directly through the temple; a street alongside the temple ran straight to the Upper City.

We cannot be certain of the street or alley (ῥύμην)²³² along which the angel led Peter, probably for safety from night watchmen, even if we could be sure that Peter exited from near the fortress and the temple.²³³ Nevertheless, knowledge of Jerusalem's design may give us a general idea of the route that Peter might have taken. Jerusalem's major street, a paved Herodian thoroughfare, ran (in one branch) from the Antonia in the north alongside the temple's Western Wall toward the south of the city; to its west lay the Tyropoeon Valley.²³⁴ This major street probably connected the northwestern upper market and the southern lower market, the temple's

226. Euseb. *P.E.* 9.27.23 (*OTP* 2:901).

227. On such stones, see, e.g., *m. Erub.* 1:7; *Naz.* 7:3; *'Ohal.* 2:4. Robbers would roll away the stone (*Char. Chaer.* 3.3.1), but normally not single-handedly; even smaller stones could require enormous strength (*Gen* 29:8, 11).

228. In contrast to *G. Pet.* 9.37 (Maurer, 186).

229. Greek sources also spoke of divinely enabled invisibility (*Hom. Il.* 3.381; 5.23, 344–45; 20.321, 443–46; 21.597–98; 24.334–38; *Od.* 7.14–17, 41–42; 13.189–93; *Soph. Ajax* 70, 83–85; *Eurip. Hel.* 44–45; *Iph. Taur.* 27–30; *Orest.* 1629–36; *Ap. Rhod.* 3.210–13; 4.647–48; *Virg. Aen.* 1.411–14, 439–40; 12.52–53, 416; *Ovid Metam.* 5.621–24; 12.32–34; 15.538–39; *Philost. Vit. Apoll.* 4.16; *Apollod. Bib.* 3.6.8; *Sil. It.* 9.484–85; for the helmet of Hades, see *Aristoph. Acharn.* 390; *Soph. frg. of Inachus* 8, 26 [*SPap* 3:24–25]; *Apollod. Bib.* 2.4.2), an objective also in magical papyri (*PGM* 1.222–31, 256–57; cf. Smith, *Magician*, 120). See more fully Keener, *John*, 773–74.

230. Barrett, *Acts*, 581; cf. Carter and Earle, *Acts*, 168.

231. Cf., e.g., *Jos. War* 4.298; 6.131, 136. Priests normally opened the temple gates shortly after midnight (*Jos. Ant.* 18.29) and also engaged in offerings at night (*War* 6.299; *Ag. Ap.* 1.199). Priests also guarded other temples' doors at night (e.g., *Ant.* 18.74).

232. These could be narrow alleys (Rohrbaugh, “Pre-industrial City,” 144); see comment on Acts 5:14; 9:11. That Luke himself knew the exact route is doubtful; Peter was not likely present during Luke's visit to Jerusalem, and had he been present he would not likely have been offering tours.

233. Cf. Lake and Cadbury, *Commentary*, 136, for the difficulties of the Greek. The Western text includes a descent of seven steps, appearing to presuppose the reader's understanding (Bruce, *Acts*³, 73; for discussion, see Metzger, *Textual Commentary*, 394). Steps appear in the temple area (*Acts* 21:35; *Jos. War* 5.207); but we cannot identify these (there were more than seven descending from the Antonia into the temple courts), and the Western tradition probably postdates the temple's destruction. Maloney, *Narration of Works*, 101–15, suggests that Luke may have redacted the details of Acts 12:11–17, after Peter's deliverance, to fit his general schema of retelling accounts; the retellings here (cf. 12:11, 17), however, are relatively minimal.

234. Mare, *Archaeology*, 151; McRay, *Archaeology*, 108, 124.

southwestern corner being the city's center of daily activity.²³⁵ Instead of following the street all the way south until finding other roads connecting with the Upper or Lower City, he could cross Robinson's Arch to enter the Lower City.²³⁶ More quickly still, he could cross the earlier Wilson's Arch, six hundred feet before the southern wall. Wilson's Arch carried a forty-four-foot-wide street from this main street into the Upper City.²³⁷

Would Peter have dared take the main thoroughfare? If the angel made Peter's escape invisible to the guards and led him to the street, Peter probably could feel more confident valuing speed over secrecy. Would Peter risk being recognized on the main street? This was not likely in the dark and without chains; unlike Antioch, few cities had torches illuminating the streets at night.²³⁸ In Rome, wheeled traffic traversed the streets at night;²³⁹ this could have been true in Jerusalem as well, especially on a street near the markets and running near rather than through elite neighborhoods in the Upper City.²⁴⁰ Peter would not then be on the street completely alone but would be relatively inconspicuous. A more circuitous route is possible (especially given the term *ρύμη*; we cannot be sure what information Luke himself had here) but would have taken longer.

Knowing his way around the city, Peter would follow a fairly straightforward route once he exited the major street into the Upper City; its design followed the standard Greek pattern of "crisscrossed streets flanked by houses."²⁴¹ The Upper City made sense in part because it was closest; Peter's choice of this believer's house may be determined by its being in the nearest residential neighborhood available. Some parts of the Upper City were closer than others, of course, but the palaces of the high priest (consuming about the southern third) and Herod's old palace (consuming more or less the rest of the western quarter) were the farthest points, leaving most of the residential areas closer at hand.²⁴²

Unlike some other writers (such as Matthew, e.g., Matt 1:20–24; 28:2–6, though one may assume that his angels did not remain permanently), Luke sometimes narrates an angel's departure as well as the angel's appearance (cf. Acts 10:7; Luke 1:38).

d. Visiting the Prayer Meeting (12:11–17)

Once free, Peter visits some believers at a nearby house church to let them know what has happened to him and to leave instructions to spread the word. He discovers that even believers spending the night in prayer for him are astonished that he has been delivered and has visited them.

I. RECOGNIZING DELIVERANCE (12:11)

Peter's recognition of deliverance (Acts 12:11) could belong to the unit 12:6–10 as well as to 12:12–17; at many points, modern outlines can only approximate transitions in Luke's action. The verb for "deliver," *ἐξείλατο*, appears in 7:10, 34 (Joseph and Israel in the exodus) and 23:27 and 26:17 (Paul); although not limited by any means to an exodus context, it might evoke such associations in this Passover setting

235. Mare, *Archaeology*, 152 (following Mazar).

236. Cf. McRay, *Archaeology*, 108–9, 124.

237. Cf. *ibid.*, 109.

238. Cary and Haerhoff, *Life*, 106. Presumably, however, wheeled traffic moved slowly, and it seems likely that they carried torches.

239. E.g., McRay, *Archaeology*, 87; Clarke, "Italy," 474.

240. It should go without saying that wheeled traffic could be noisy.

241. Bahat, "Jerusalem," 230.

242. See the map in Mare, *Archaeology*, 169.

(12:3–4).²⁴³ God had delivered Peter from the “hand” of Herod just as God saved Israel from the “hand” of the Egyptians (Exod 14:30).²⁴⁴ (“Deliverance from the hand” was extremely common OT language; we should not think of a single, specific textual allusion on this basis alone.)²⁴⁵ The closest allusion (besides perhaps Exod 3:8, to which Luke refers in Acts 7:34) would be Jethro’s praise of Israel’s God in Exod 18:9–11: God “delivered” them from the “hand” of their oppressors (18:10); “Now I know²⁴⁶ [that God is the greatest God]” (18:11; echoed in Acts 12:11).²⁴⁷ Cf. similarly the use of *κακόω* in Acts 12:1. Mention of “the Jewish people” along with Herod alludes back to the sentiments mentioned in 12:3.

Ancient texts praised the heroic people who returned to prison and death because they had given their word (e.g., Val. Max. 1.1.14) or for other honorable reasons (e.g., Socrates refused to escape lest he undermine the laws). Peter, however, has no honorable reason to return and celebrates his deliverance. Peter’s coming “to himself” means coming to his senses²⁴⁸ (cf. the similar expression in Luke 15:17);²⁴⁹ that is, he is finally fully awake and recognizes it. Although Luke also employs *ἐν ἑαυτῷ* for interior monologues (Luke 7:39; 12:17; 18:4), the expression might recall Peter’s previous experience that was genuinely visionary in Acts 10:17; in both cases God’s activity is so contrary to expectations that Peter cannot grasp the message fully while the event is occurring.

II. MARK’S MOTHER’S HOUSE (12:12)

Peter could find his way if there was any moonlight;²⁵⁰ this would make him more visible to the city’s night guards or whoever might see him moving about (increasing the suspense in Acts 12:14–16), but without drawing close with torches, they would probably not recognize his face.²⁵¹ No one would yet be looking for Peter (his absence was noticed at daybreak, 12:18). That believers were together may fit the setting of persecution (cf. Luke 24:33; John 20:19) but is useful especially for Luke’s theme of unity, especially in prayer (Acts 1:14; 2:1, 42, 46; 4:24; 5:12; 15:25).²⁵² Believers had prayed together both in their homes and in the temple (2:42, 46), but a prayer

243. The only other use for *ἐξείλατο* (contrast Matt 5:29; 18:9) in the NT is Gal 1:4. The term is frequent in the LXX, but Luke’s one use in a citation is related to Israel’s exodus (Exod 3:8; cf. 18:4, 8–10). In some ways, however, the deliverance is closer to the individual rescues suggested in Dan 3:17; 6:16. Passover involved protection, and some exegetical traditions even linked this protection with the term “pass over” (Büchner, “Psh”).

244. Also Exod 3:8; 18:4, 9–10; 1 Sam 10:18. Also Gaventa, *Acts*, 184–85.

245. Likewise, it could contrast with Herod’s laying “hands” on some in Acts 12:1, but the language is too common to draw this inference (cf. Luke 1:74; Sir 51:8; 3 Macc 6:10; the specific verb linked with *ἐκ* (*τῶν*) *χειρῶν* or *ἐκ χειρὸς* is extremely common).

246. Talbert, *Acts*, 108, notes other “interior monologues” in Luke (e.g., Luke 7:39; 12:17–19, 45; 15:17–20; 16:3–4; 18:4–5; 20:13, all specifically Lukan; see also 18:11, also Lukan; cf. 3:15; but also Mark 2:6–7; Matt 9:3), the OT (e.g., 1 Sam 18:17, 21), and Gentile sources (Talbert cites Ap. Rhod. 3.772–801; Virg. *Aen.* 4.534–52; Ovid *Metam.* 10.319–33; Longus 1.14.18; Xen. Eph. *Anthia* 1.4.1–7).

247. See Le Cornu, *Acts*, 650 (emphasizing the exodus allusion). Exodus 18:11 LXX has *νῦν ἔγνων ὅτι* (cf. Philo *Drunkness* 41, quoting Exod 18:11; elsewhere in the LXX, only Judg 17:13; Ps 19:7 [20:7 ET]), compared with *νῦν οἶδα ὅτι* (elsewhere in the NT, only at John 11:22; nowhere else in this form in the LXX, Josephus, or Philo) here.

248. Fitzmyer, *Acts*, 488 (comparing Soph. *Philoc.* 950; Xen. *Anab.* 1.5.17; Polyb. 1.49.8).

249. On which cf. perhaps Jeremias, *Parables*, 130; less strongly, Bailey, *Poet.*, 173–75.

250. For the significance of moonlight for night visibility, see Pindar *Isthm.* 8.44; Polyb. 7.16.3; 9.15.12; Virg. *Aen.* 7.9; Ovid *Fasti* 2.697; Sil. It. 15.616; Plut. *Alc.* 20.5; Tac. *Hist.* 3.23; contrast (strangely) Plut. *Nat. Phen.* 24, *Mor.* 917F.

251. Cf. the need for the betrayer to identify Jesus at Gethsemane, Luke 22:47 (more complete in Mark 14:44–45).

252. The term used here for gathering, *συναθροίζω*, appears elsewhere in the NT only at Acts 19:25, though it appears more than thirty times in the LXX.

meeting late at night would naturally occur only in homes, and persecution would probably prevent public corporate prayer in the temple. Although the situation was dangerous for believers, it seems that at the moment (perhaps in contrast to 8:1) it is especially the chief apostles who have been targeted for execution (12:2–3).

Why would many people gather at this particular home? Normally, large groups favored the homes of well-to-do people with enough space to accommodate them (cf. the upper room in 1:13). Features that support the home's being well-to-do are the servant girl and the gate (on each of which, see comment on Acts 12:13). Barnabas had been a landowner (4:36–37) and was probably part of the same extended family (Col 4:10; Luke's audience may not have known this detail, but John Mark's identity at least is already presupposed in Acts 12:12). (Luke explains which "John"—an extremely common Jewish name—by the Roman second name but may presuppose that his audience has heard of him. He will treat him further in 12:25; 15:37.)

For Luke, this offers a convenient opportunity to introduce both John Mark and his mother by name, perhaps also taking advantage of the opportunity to suggest another probable widow in the church (on her widowhood, see discussion below; on widows, see discussion at Acts 6:1; 9:39–41). Luke did not need to specify her social power, since the audience would understand this on the basis of her prominence;²⁵³ this may also serve his purposes for gender balance.²⁵⁴

That the house is identified as belonging to John Mark's "mother" likely means that she was widowed²⁵⁵ and hence exerted a degree of control over her property higher than usual among women.²⁵⁶ Women controlling homes had fewer status concerns and so tended to be more open to joining and providing meeting places for new religious movements (see comment on Acts 16:15).²⁵⁷ We know of women patrons for religious associations elsewhere in antiquity (perhaps a tenth of all religious associations);²⁵⁸ like male patrons, they probably exercised considerable influence on the groups that met in their homes.²⁵⁹

Because the house is described as well known, Luke probably is drawing on authentic local tradition for it.²⁶⁰ The criticisms sometimes leveled against movements depending too much on women's support²⁶¹ also speak against its being Luke's invention, though he is not shy to report the benefaction of women of status where he

253. Arlandson, "Lifestyles," 169.

254. On Luke and gender, see the discussion and sources in Keener, *Acts*, 1:597–638; on balancing, see 598–99 and sources cited there.

255. It would not be to protect her husband's identity (given generally harsher punishments for men), since this would not likely be an issue after Agrippa I's death.

256. See discussion at Acts 16:15, concerning another woman patron.

257. Cf. *Jos. Ant.* 20.34; *Iren. Her.* 1.13.1–3; Liefeld, "Preacher," 239–41; esp. 1 Tim 5:13, probably implying (in the context of the Pastorals) that false teachers were targeting and working through widows to procure access to their homes (see 2 Tim 3:6; cf. Keener, "Perspective," 232–33). For targeting women's households as more susceptible, see Aeschines *Tim.* 171 (and the commentary introduction, Keener, *Acts*, 1:629–34, esp. 630–31); thus Lucian emphasizes widows among Christians (*Perigr.* 12).

258. Meeks, *Urban Christians*, 24 (describing MacMullen's figure); cf. Pomeroy, *Goddesses*, 200 (for about half that figure); Lefkowitz and Fant, *Life*, 24, §48; 243–44, §232; Matthews, "Ladies' Aid"; see further comments on women patrons at Acts 16:15; 17:4.

259. Lampe, "Patrons," 495. The term *προστάτης* can apply to a governing role (e.g., *Xen. Mem.* 1.2.40; *Mus. Ruf.* 8, p. 66.6), and Greco-Roman financial patrons often exercised authority (Jeffers, *World*, 83, though doubting this connection in Pauline congregations) if they were involved in a congregation. On women's leadership roles in Luke-Acts, see Kee, *Origins*, 91.

260. Conzelmann, *Acts*, 94 (Luke has "factual support" for it). Such information would have been available during Luke's visit to Jerusalem (Acts 21:15–18).

261. See, e.g., Ilan, "Women to Pharisaism"; further comment on Acts 16:15.

has reason to do so (Luke 8:2–3; Acts 16:15).²⁶² This is probably not, however, the home with the upper room of Acts 1:13 unless Luke simply lacks tradition on this point; if he knew of a connection, he surely would have made it (especially given the prayer meetings at both homes, 1:14).²⁶³

Some scholars link this Mary with the earlier Mary at the prayer meeting before the Spirit's coming (1:14);²⁶⁴ although the connection of women mentioned at prayer meetings may be significant for showing Luke's interests, it is not surprising that Luke mentions this patron's name (he tends to name women where his tradition supplies this information). Nor should we make too much of the shared name: "Mary" was "easily the most popular woman's name in 1st-century Palestine" across all social strata,²⁶⁵ and so, once Luke names her, it makes sense to identify her further (even had Luke not been introducing John Mark).

We might anticipate names such as "Mark" and perhaps "Rhoda" more in a Hellenist's home²⁶⁶ (allowing, though not requiring, the relationship with Barnabas; compare Col 4:10 with Acts 4:36). The son's name could imply some status and a household with Diaspora connections. "Marcus" is a Latin praenomen, and praenomens did not necessarily indicate Roman citizenship;²⁶⁷ still, the name was most in use among Jews in the West and is otherwise unknown in Palestine. Among Jews, it seems normally a praenomen of those who had acquired citizenship.²⁶⁸ Many Diaspora Jews used variants of this name, including "Marcia" and "Marcellus" (see, e.g., *CIJ* 1:97, §138 [Appian Way; a child, hence not a proselyte]; 1:98, §139 [Appian Way]; 1:176, §248; 1:177, §249 [Latin]; 1:178, §250 [Latin]; 1:293, §377 [Greek, but "wife of Maximus"]). But John may have acquired this Latin *epiklesis* later, while on his mission travels (cf. Acts 12:25; 13:5; 15:39); certainly Gentiles would have found "Marcus" a much easier name to accommodate "than the outlandish and unfamiliar Yehohanan" ("John").²⁶⁹ Roman praenomens in use were so few (the favorites, besides "Marcus," being "Gaius," "Lucius," and "Titus") that these became very common,²⁷⁰ requiring the distinguishing "John"²⁷¹ unless context (as in 15:39; cf. 15:37) or audience knowledge (Phlm 24; 2 Tim 4:11; 1 Pet 5:13) allowed the simple "Mark."

For comment on how the motif of prayer here fits Luke's broader emphases, see comment on Acts 12:5. Much more than any unjust judge (Luke 18:2–4), God hears those who cry to him day and night (Luke 18:7); here God, in answer to fervent prayer (Acts 12:5), delivers Peter from a real unjust judge (12:2–4). But just as Jesus

262. This is undoubtedly historical; see, e.g., Rom 16:2, 5; Col 4:15; perhaps 1 Cor 1:11; note that Acts 16 appears in "we" material and Luke 8 reflects earlier tradition from or related to Mark 15:40–41. Given the culture, it is intrinsically likely that a house church's host would have exercised significant influence, despite the relative silence of our earliest sources (see Osiek and MacDonald, *Place*, 33).

263. Had Luke written before 66 C.E. and simply wished to suppress information dangerous to the homeowner, naming the site in Acts 12:12–13 (where Peter fled after escaping Agrippa) would have been far more dangerous than naming the site in 1:13. The upper room of Luke 22:12 belonged to a home with perhaps only a male servant (22:10), since his task was one normally performed by women (contrast Acts 12:13).

264. Rius-Camps, "Maria en Hechos."

265. Williams, "Names," 90–91. It exploded in popularity after Herod the Great killed Judea's beloved Hasmonean queen, Mariamne (Williams, "Names," 107; on the dominance of Hasmonean names in the Holy Land in this period, see 107–9).

266. Lake and Cadbury, *Commentary*, 138.

267. Judge, *Rank*, 36n19; idem, *First Christians*, 561. Whether Mark was a Roman citizen or not, use of the name could suggest that Mark derived from a wealthy family comfortable with Roman rule, if he had the name before leaving Judea.

268. Williams, "Names," 105.

269. *Ibid.*

270. Stambaugh, *City*, 94.

271. Or "Barnabas's cousin" (Col 4:10).

warned that his followers might lose faith by the time they were delivered (Luke 18:8), so here neither Peter (Acts 12:9) nor the disciples praying for him (12:15) really expect God's intervention.

III. HOUSE CHURCHES (12:12)

Although Jesus called disciples to abandon their possessions (Luke 12:33; 14:33; 18:22), not all became literally homeless. Thus disciples could be simply itinerants away from their homes (18:28–30).²⁷² For others, Luke seems to have accepted as adequate fulfillment the selling of whatever they had in excess of their needs, whenever others' greater needs arose²⁷³ (and presumably not acquiring more, if its "selling-off" value would be less than its acquisition price).

Christians met in homes for prayer, worship, study of Scripture, and other corporate activities we associate with the early church.²⁷⁴ This pattern fit Jesus's instructions (Luke 9:4; 10:5, 7; Mark 6:10). Sociological studies suggest that conversions most frequently occur through relationships,²⁷⁵ making the house church model an effective one for the growth of a new religious movement. There can be little doubt that this pattern belongs to the earliest period of the church's formation. The house church model preceded Paul's church-planting ministry, the Roman church used it (Rom 16:5),²⁷⁶ synagogues often started in homes,²⁷⁷ and there was no other practical place to meet in difficult times. It is also reasonable to believe that this part of the Jesus tradition is authentic, attested in both Markan (Mark 6:10; Luke 9:4) and Q (Luke 10:5–7; Matt 10:12–14) forms (though Mark may depend here on Q).

This use of a domestic venue for worship and teaching, unfamiliar to many modern Western Christians accustomed to larger and more formal "services," would not have surprised their contemporaries.²⁷⁸ Associations of various sorts too small for constructing their own meeting hall typically met in areas of temples (which were public buildings; cf. Acts 2:46), rented a hall, or, as here, met in homes.²⁷⁹ Some mystery cults were practiced in houses;²⁸⁰ some philosophic schools met in houses.²⁸¹ Religious associations often began in homes, then grew, requiring architectural adaptation of existing properties²⁸² and finally often building their own religious structures.²⁸³ Sometimes a residential block was converted into a Serapion or even a temple for

272. See, e.g., Kim, *Stewardship*, who offers a strong case. Tannehill, "Ethics," 119–20, finds Kim's case appealing yet warns that Luke may not be concerned to offer systematic or consistent presentation.

273. See discussion at Acts 2:44–45; esp. 4:34.

274. See, e.g., Acts 2:46; 5:42; 8:3; 10:24; 18:7; 20:20; Rom 16:5; 1 Cor 16:19; Col 4:15; Phlm 2; 2 John 10; cf. *t. Sabb.* 13:5. On house churches in the NT, see, e.g., Smith, "House Church"; White, *Origins of Architecture*, 1:103–10; in second-century sources, see 1:110. House churches allowed a level of relationships and participation in corporate charismatic experiences (cf., e.g., Langner, *Hechos*, 317–18, citing 1 Cor 14:26) unusual in traditional churches today.

275. See Campbell, *Deliverance*, 131–33, and the sources cited there. One should note that most of these studies involve modern Western culture, where religion is not always an acceptable topic for public discourse; but new religious ideas are undoubtedly controversial in many cultures.

276. Though possibly learned from Paul's colleagues in Rom 16:5 (cf. 1 Cor 16:19); Paul did not found that church (Rom 1:10–13; 15:20–23).

277. See discussion below.

278. It is also familiar in some Western and many non-Western settings, and it tends to prove useful for church growth (e.g., Obed, "House Fellowship"; Pothen, "Missions," 300–302).

279. Stambaugh and Balch, *Environment*, 126; Jeffers, *World*, 77.

280. Klauck, *Context*, 63.

281. *Ibid.*

282. See White, *Origins of Architecture*, 1:26–59.

283. Generally, see White, *Origins of Architecture*, passim (and Meeks, "Aliens," 131, who cites White in this regard); White, "Synagogue in Ostia," 33–34 (citing even Mithraists).

Zeus.²⁸⁴ Homes were certainly well suited to the needs of Christian worshipers, who lacked a sacrificial cult and practiced a common meal.²⁸⁵

Palestinian Jewish scribes sometimes taught students in their houses' courtyards;²⁸⁶ apparently, others also welcomed sages to teach in their homes (*m. 'Ab.* 1:4).²⁸⁷ Philo compared the paschal use of homes to the temple (Philo *Spec. Laws* 2.148).²⁸⁸ Following the above-noted pattern often used by other religious associations, most current scholars argue that most early Diaspora synagogues began as houses and were gradually redesigned and rebuilt for use as synagogues,²⁸⁹ and some even retained their basic domestic structure after renovations.²⁹⁰ (Not all synagogues took the domestic form; in contrast is the massive third-century C.E. synagogue in Sardis.)²⁹¹ White suggests that an early second-century C.E. Ostia synagogue may have evolved from an *insula*, a regular apartment building.²⁹² Of the six excavated Diaspora synagogues, White notes, "five were renovated from private domestic edifices, and in each case they had been houses typical of domestic architecture in that locale."²⁹³

Christians presumably followed, for their assembly halls, the practice that was common for synagogue buildings. The earliest excavated churches (probably built long after the first century) also suggest the pattern that renovations were an early stage in adapting house churches.²⁹⁴ For example, a house lies beneath Capernaum's later church building.²⁹⁵

Clubs were increasing in the eastern Mediterranean during the empire.²⁹⁶ These included associations with household,²⁹⁷ ethnic or geographic (e.g., synagogues),²⁹⁸

284. White, *Origins of Architecture*, 1:34.

285. Schnabel, *Missionary*, 303.

286. Watson, "Education," 312.

287. The attribution and probably the custom are pre-Christian. The piety of opening one's home to sages in *m. 'Ab.* 1:4 parallels that of opening one's home to the poor in 1:5.

288. See Stambaugh and Balch, *Environment*, 140, for discussion.

289. Avi-Yonah, "Archaeological Sources," 54, citing those at Delos, Miletus, Priene, and Dura-Europos; cf. Meeks, *Moral World*, 111; see most fully White, *Origins of Architecture*, 1:60–101 (summary, 101). On the house synagogue at Priene in Asia Minor, see Kraabel, "Judaism in Asia Minor," 24. For probable particular examples, see, e.g., Meyers and Strange, *Archaeology*, 141; Strange and Shanks, "House in Capernaum," 29–30; see more fully the excursus on synagogues at Acts 6:9–10. On Jewish associations, see also Instone-Brewer and Harland, "Associations."

290. White, *Origins of Architecture*, 1:64, on the synagogue in Delos. Even the contested Ostia synagogue may have originated as a domestic site (1:69); if not, it may have originated as public space used by the Jewish community (see this alternative case in Runesson, "Synagogue"); see further debate in White, "Synagogue and Society"; Runesson, "Oldest Building." For the renovation of buildings for special synagogue usage, see Evans, *World*, 51, 55; of course, when synagogues do not exhibit distinctly synagogal features, we cannot recognize them as synagogues.

291. On Sardis's synagogue, see Hanfmann, "Campaign," 23–28; Goodenough, *Symbols*, 12:191; Mitten, "Sardis," 61–62; Meyers and Kraabel, "Remains," 184–85, 192; Botermann, "Synagogue"; Cross, "Inscriptions from Sardis"; Kroll, "Greek Inscriptions"; Bonz, "Approaches"; esp. Seager and Kraabel, "Synagogue." Given eight Jewish members of the city council, however, Sardis hosted no ordinary Jewish community (Seager and Kraabel, "Synagogue," 171, 178).

292. White, "Synagogue in Ostia," 43–46, 49–50; inscriptions show that it was renovated by patrons' donations (53–66). This upwardly mobile Jewish community seems well connected with wealthy donors (62, 66–67). But see the sources challenging White's interpretation in Das, *Debate*, 191–93.

293. White, *Origins of Architecture*, 1:62.

294. *Ibid.*, 1:114–18; e.g., a converted *insula* complex in Syria, 2:144. White, 2:33–120, gives literary sources for early Christian assembly, including from the second (some mentioning the house, 2:36–48) and third centuries (2:48–87), and (2:121–257) provides archaeological sources and documents.

295. E.g., Strange and Shanks, "House in Capernaum," 33–34. Archaeology also attests early house churches in Syria (Blue, "House Church," 137).

296. Smith, *Symposium*, 105 (for Egypt, see 106–7). On associations, see also Kloppenborg, "Associations"; Bernabé Ubieta, "Asociaciones"; Jeffers, *World*, 72–77; Ascough, "Associations"; now esp. Ascough, Harland, and Kloppenborg, *Associations*; on their earlier development, see Gabrielsen, "Brotherhoods."

297. Harland, *Associations*, 30–33.

298. *Ibid.*, 33–36.

neighborhood,²⁹⁹ occupational,³⁰⁰ and cultic connections.³⁰¹ Workers' trade guilds were very common,³⁰² often meeting in houses they owned.³⁰³ Another form of association that scholars have often noted is the burial association,³⁰⁴ though many now think that joint investment in members' burials remained a secondary concern before the second century C.E.³⁰⁵ Associations with this interest often met near burial grounds outside the town.³⁰⁶

Many associations were primarily religious,³⁰⁷ though religious elements pervaded all associations.³⁰⁸ Rome usually tolerated religious associations, and even the rule that they meet only once a month was often ignored.³⁰⁹ Religious associations often met in temples.³¹⁰ All guilds, whatever their basis, had patron deities; thus a Syrian merchants' guild had Poseidon as a patron and called themselves the "Poseidoniasts."³¹¹ Imperial deities were honored in Asia's associations along with other gods.³¹²

Given Philo's protest against cultic associations in Alexandria (*Flacc.* 136–37), many Jews and Christians probably would not have viewed their groups primarily as cultic associations.³¹³ Nevertheless, given their voluntary character, regular meetings and meals, and so forth, outsiders would naturally so understand them.³¹⁴ Some Jewish groups probably also viewed themselves in these terms,³¹⁵ and both pagans and Christians later described Christian groups in such contextualized terms.³¹⁶ (See discussion on synagogues at Acts 6:9 and on Diaspora synagogues at Acts 13:5.) Differences, including different titles for leaders, suggest that the first Christians did not deliberately model their groups on associations, though later Christians did adopt more elements.³¹⁷ Similarities, however, offer fertile grounds for comparison, comparisons Christians themselves found useful in time as one model for understanding

299. *Ibid.*, 36–38. Given relations among neighbors (Osborne, "Neighbours," 617), house churches may have attracted some neighbors; knowledge of the meetings would have proved inevitable in urban apartment buildings, where, beyond more ample ground floor dwellings, meetings would have to employ the broader shared visiting space (see comment on Acts 20:8–9).

300. Harland, *Associations*, 38–44.

301. *Ibid.*, 44–50.

302. See much fuller comment at Acts 18:3; 19:24; Harland, *Associations*, 38–44.

303. Smith, *Symposium*, 93, 103.

314. Harland, *Associations*, 211; Klauck, *Context*, 54; cf. Meeks, *Moral World*, 113; Stambaugh and Balch, *Environment*, 140–41.

315. Cf., e.g., *CPJ* 1:252–53, §§138–39 (possibly); White, "Revisited" (possibly); Pearson, "Associations," 137. Mantel, "Nature of Synagogue," develops this insight at length but may press it too far (especially referring to Judean institutions).

316. Pliny *Ep.* 10.36.7 (the former Christians' confession violating the law against *collegia*, a prominent concern, e.g., in 10.92–93); Lucian *Peregr.* 11 (θιασάρχης); Malherbe, *Social Aspects*, 88. Judge, *Patterns*, 47–48, argues that Pliny so viewed Christians.

317. Meeks, *Urban Christians*, 77–79, esp. 78–79. The lack of association language in the NT itself suggests that in the first century, the association functioned as "legal cover" rather than a model for churches (Jeffers, *World*, 80).

and articulating the nature of their activity.³¹⁸ Whereas Christian groups were initially modeled after synagogues, the later Roman distinction between synagogues and churches made the voluntary-association model appealing.³¹⁹

Nonpolitical private clubs existed in fourth-century B.C.E. Athens and began to flourish from 300 B.C.E. onward, with private temples and usually about a hundred members.³²⁰ Nevertheless, from an early period, some ancients recognized that political associations could pose a danger to monarchies.³²¹ *Collegia* (associations) never represented a standing offense, but their potential for disorder and subversion led to their regulation (as early as the first century B.C.E.).³²² Most notably, there is little evidence for membership beyond the local level, suggesting an important limitation.³²³ Because Rome normally regulated the right to assemble, Roman authorities sometimes had to issue special edicts reiterating the Jewish exception to such limitations.³²⁴ Romans allowed certain kinds of meetings, including for religious purposes, so long as they did not contradict statutes against banned meetings.³²⁵ Activities done in secret were considered subversive,³²⁶ which made house meetings less than ideal—but their private venue also often kept them free from surveillance (where anyone would have cared enough to check on them anyway).

Associations ranged in membership from about ten to two hundred,³²⁷ most often twelve to forty and only rarely more than a hundred.³²⁸ Whereas some associations admitted women and slaves, others were limited to free men;³²⁹ there is little evidence for all-women clubs.³³⁰ Some required members who joined to remain for at least a year.³³¹ These associations sometimes had patrons who helped sponsor the group financially.³³² Associations sometimes had concerns for their members' moral behavior.³³³ They also invariably included meals,³³⁴ which varied in the dominance of religious elements; all included sacrifice and libations.³³⁵

Most house churches were probably small, since most homes were smaller than the estimates for maximum size offered above. Anyone seeking to teach in multiple house churches would need to move from one to another once they began to spread (Acts 20:20; cf. 1 Tim 5:13).³³⁶ Homes remained ideal in part because they contained

332. E.g., Chow, *Patronage*, 64–68; Lampe, "Patrons," 493.

333. See Seesengood, "Rules" (although the connection should be with associations in general, not with specifically religious associations); Batten, "Moral World."

334. See Smith, *Symposium*, 96.

335. Harland, *Associations*, 74–83, esp. 77.

336. Their size has implications for the group dynamics there; sociological literature includes hundreds of works on group dynamics, including a large number on the effectiveness of small-group dynamics for reinforcing learning (for a random sampling, see, e.g., Rice and Stacey, "Dynamics"; Keedy, "Leadership"); for their dynamics over an extended period of time, see, e.g., Ziller, "Dialectics."

the kitchen facilities necessary for communal meals,³³⁷ but they would also be useful because the household provided wide kinship and patronal networks that allowed news about the Christian faith to spread.³³⁸

Because the house owners served as host and (in some settings) patron, their names typically identified the group that met there, as here (Acts 18:7; Rom 16:3–5; 1 Cor 16:19; Col 4:15; Phlm 2).³³⁹ Some argue that the formula Paul often uses for this (κατ' οἶκον, Rom 16:5; 1 Cor 16:19; Col 4:15; Phlm 2) may imply that in Roman settings the church was viewed as an extension of the patron's household (like clients in the Roman patronage system).³⁴⁰ Like all private associations, immigrant groups (such as Diaspora synagogues) depended on benefactors internal or external to their group.³⁴¹ Some features of Diaspora house churches do not fit the expectations for Greco-Roman households. For example, they lacked contact with homes' domestic cult;³⁴² they lacked hierarchical structures characteristic of the Roman family, including the patron's extended household;³⁴³ they shared unity with Christians in other cities.³⁴⁴ Some Christian groups probably also met in different kinds of dwellings (such as apartment space) not provided by patrons.³⁴⁵

A Roman home received visitors in the atrium, which was also where the shrine for family deities was located.³⁴⁶ The family altar venerated the Penates and Lares.³⁴⁷ The household cult followed the model of the Roman state cult,³⁴⁸ and the state cult's hierarchy generally followed that in the household.³⁴⁹ Early Christian meetings shared little in common with this model, even if some later Roman Christian gatherings of households may have assumed elements of it (by, e.g., reflecting household hierarchical patterns).

Eventually Christians were sufficiently wealthy and secure to procure meeting halls specifically designated for that function. The earliest that is currently known is at Dura-Europos, from about 240 C.E.; they became common in the third century and were even permitted by an emperor.³⁵⁰ Like the nearby synagogue and Mithraeum,

337. Blue, "House Church," 121.

338. Meeks, *Moral World*, 111–12; on conversion and social networks, see discussion in Campbell, *Deliverance*, 129–32. Blue, "Influence," 481–82, 486, emphasizes that the primary goal in homes was Christian edification; given frequent opposition, however, the household probably became the locus of evangelism as well (cf. 1 Cor 14:23). Social affiliation sometimes proved a factor even in philosophic conversion (Eshleman, "Affection").

339. With Stambaugh and Balch, *Environment*, 55.

340. See Meeks, *Urban Christians*, 75; cf. White, "Pater familias," 457.

341. See White, "Synagogue in Ostia," 34; Meeks, "Aliens," 131; for Jewish groups, Meeks cites esp. Lifshitz, *Donateurs et fondateurs*.

342. The supposition that its meeting in homes would classify the Jesus movement as primarily a domestic cult (Pearson, "Domestic Religion," 300) ignores the frequency with which private associations met in homes.

343. For household hierarchical structures, see, e.g., Pomeroy, *Goddesses*, 150–52; Verner, *Household*, 33; Stowers, *Letter Writing*, 31; Keener, *Paul*, 159–66; idem, "Marriage," 687–91; idem, "Family," 357–58. The household hierarchical structure was normally reproduced in household cults (Meeks, *Urban Christians*, 31) and created the potential for some of the social conflicts that appeared in early churches (cf. idem, *Moral World*, 112).

344. Meeks, *Urban Christians*, 77; such features may comport better with aspects of voluntary associations (77–80; Barton, "Values," 1132; cf. Malherbe, *Social Aspects*, 91).

345. See Jewett, *Romans*, 64–65. For the sake of privacy, however, houses may have been preferred when available (see Heid, "Romanness," 407).

346. Stambaugh, *City*, 164; cf. Höcker, "Lararium," 244. For mural paintings on shrines for household cults, see Lipka, "Domestic Cults."

347. Klauck, *Context*, 60; cf. Höcker, "Lararium"; Mastrocinque, "Lares" (on the private cult, 248–49).

348. Klauck, *Context*, 62. On household religion more generally, including in the ancient Near East, see Bodet and Olyan, *Religion*; for Roman household cults, see Rives, *Religion*, 118–22; for Greeks, Nilsson, *Folk Religion*, 65–83.

349. Meeks, *Urban Christians*, 31.

350. Scriptores Historiae Augustae *Severus Alexander* 49.6, in Jeffers, *World*, 78–79.

Dura's church was originally adapted from a private home.³⁵¹ Church buildings became prevalent only in the fourth century, especially under Constantine,³⁵² a specifically Christian architecture emerged only after the Edict of Milan (313 C.E.).³⁵³

IV. SPACIOUS JERUSALEM HOMES (12:12–13)

Early twentieth-century commentators stressed the relatively low social origins of early Christians; they emphasized that many were poor and were slaves.³⁵⁴ Although this generalization about early Christians may be true (cf. 1 Cor 1:26),³⁵⁵ it is far from the whole story, especially given the urban focus of the expanding movement. Whereas the truly elite were a tiny minority, early Christianity, as an urban movement, likely contained a higher percentage of individuals in the middle-range professions than did the largely rural Mediterranean world as a whole.³⁵⁶ At least in Luke-Acts, Christians interact favorably with persons of high status;³⁵⁷ Paul's letters suggest the same scenario.

The home Peter visits, then, would probably be in the Upper City, near the temple and other wealthy homes, many of which would have belonged to members of the Sadducean aristocracy.³⁵⁸ (The members of John Mark's family themselves may have been Levites, given their relation to Barnabas [cf. Acts 4:36].) The neighborhood would not be the safest place for a fugitive such as Peter (cf. 4:1), both raising the suspense during the delayed entry in 12:13–15³⁵⁹ and explaining why Peter is wise to depart soon after reporting his deliverance (12:17). The fact that, coming from Antonia, Peter had most immediate access to the Upper City would explain why he stops there first, in contrast to poorer homes that might have also been known to host nocturnal prayer meetings or hold influential Christians.

351. Blue, "House Church," 161; Meeks, *Moral World*, 111; Grant, *Christianity and Society*, 146. For discussion of some archaeological evidence regarding pre-Constantinian house churches, see also Riesner, "House Churches"; for one discussion of Blue, see Lockwood, "House Church."

352. See Blue, "House Church," 120; Grant, *Christianity and Society*, 146–63.

353. Blue, "House Church," 121–22.

354. See, e.g., Troeltsch, *Social Teaching*, 1:39; Case, *Origins*, 79; summary and critique in Malherbe, *Social Aspects*, 29–59. More recently and skillfully, see Gager, *Kingdom*, 94; idem, "Class," 99; esp. Meggitt, *Poverty* (critiqued by Theissen, "Structure"; more harshly by Martin, "Review of Meggitt"); Friesen, "Poverty."

355. Friesen, "Demography," 352–58, points out that the "cross-section hypothesis" depends on evidence from Corinth and Rom 16, i.e., may not be demographically representative. (Paul probably tended to name more often persons of status.) Conclusions depend on the groups chosen for comparison; the second-century rabbinic movement, e.g., was of generally higher status and wealth than the Christian movement (Cohen, *Maccabees*, 122) whereas most of Paul's churches were more on the margins than 1 Clement's church (Chow, "World").

356. For the recent general consensus that Christians were a cross section of society, see, e.g., Judge, *Rank*, 9–10; Malherbe, *Social Aspects*, 29–30; Meeks, *Urban Christians*, 51–52; cf. Verner, *Household*, 3–5. This does not mean that members with surplus funds or with status constituted a majority, but they were present and would exert influence beyond their numbers (see Theissen, "Schichtung"; idem, *Setting*, 69–96, 99; Malherbe, *Social Aspects*, 29–30, 118–19). Even the early "poor" consensus allows for some persons of diverse stations (Case, *Origins*, 133); in critiquing Malherbe, Gager insists that only romantics and Marxists defined early Christians as *wholly* proletarian and argues not against some high-status members but only against those of high class (such as Roman senators and equestrians; see Gager, "Review," 178–80). But no one argues that they drew from the higher Roman orders (Judge, *Pattern*, 52); part of the division has been semantic.

357. Grant, "Social Setting," 22 (noting that the status was even higher in the second-century apocryphal acts). Some have attacked the cross-section-of-society consensus especially for its dependence on Acts as opposed to the Gospels' critiques of wealth (Scroggs, "Present State," 170), but the author of Acts also wrote the Gospel most radical concerning wealth.

358. Cf., e.g., the Bar Kathros stone weight in the "Burnt House" (Carmon, *Inscriptions*, §233, pp. 113, 239). In addition to their own mikvaot, wealthy homes included "mosaic tiles, plastered and painted walls" (Evans, *World*, 96). Luke's average Diaspora reader would not know Jerusalem's layout but would recognize that poor and rich were normally concentrated in different sections of a city.

359. At least for anyone who knew something of Jerusalem's topography. But given the design of most ancient cities, the proximity of wealthier homes to the main city center (where jails were more often located) would probably be assumed by others as well.

The nature of homes varied according to region and especially wealth.³⁶⁰ Rural peasants in the Mediterranean world often lived in small homes built from wood or compressed clay whereas most poor urbanites lived in upper stories of wooden tenements (the sort that burned in Rome in 64 C.E.).³⁶¹ Wealthier Greeks used stone, and Italians often employed concrete with burned brick facings; wealthy Greeks had quadrangular chambers surrounding an oblong inner court, with the most private chambers farthest from the street and with others holding quarters for slaves, offices, and storage space.³⁶²

Wealthy Roman homes could cost 875,000 denarii; on the other end of the scale, the simplest apartment in Rome could run 100 to 125 denarii a year for rent.³⁶³ As already noted, most of the poor in Rome lived in multistory tenements, the price, utility, and safety decreasing with altitude.³⁶⁴ In Rome, although some neighborhoods were poorer than others, often the well-to-do (full-scale aristocrats being far below 1 percent of the population) and poor people lived in the same neighborhoods, sometimes with the rich having luxury housing on the bottom floor.³⁶⁵ Housing usually would cost much less in other cities than in Rome, but good housing would not be cheap in any urban area.

Because Pompeian homes remain intact, they provide a useful illustration of a mixed Western style.³⁶⁶ They used an *atrium* near the front entrance for receiving guests and hosting receptions, following the Italian plan, with a Greek-style *peristylum*, or courtyard dwelling, further back.³⁶⁷ (For the patronal class,³⁶⁸ privacy was determined by time of day, not by architecture.)³⁶⁹ The *atrium* was a columned, mostly roofed hall open to the sky and sunlight in the rectangular center, beneath which lay a shallow, rectangular pool to catch rainwater.³⁷⁰ The walls of the front of a house typically bordered the street.³⁷¹ Some city dwellers even had palaces in addition to rural villas.³⁷² In imperial times, Italians with wealth preferred more spacious villas near the edge of town, or courtyard suites on the first floors of apartment buildings.³⁷³ Following a more Eastern style, larger Palestinian Jewish homes also had courtyards, sometimes so-called Tyrian courtyards.³⁷⁴

360. For homes varying according to social rank of their occupants, see, e.g., Vitruv. *Arch.* 6.5.1–3. Some Roman homes in northern regions used hypocaust central heating systems, piping heat under the floors and up the walls (Cary and Haarhoff, *Life*, 102); furniture was scanty except for the wealthy (102).

361. Cary and Haarhoff, *Life*, 100. Most “lived in one or two room storefront and upper story apartments” (Verner, *Household*, 80).

362. Cary and Haarhoff, *Life*, 100 (noting women’s quarters sometimes in an upper story or in the rear of the house).

363. Stambaugh, *City*, 154. Thus an average agricultural worker in Galilee (cf. Matt 20:1–16) or Roman auxiliary (100–200 denarii per year) could not easily have afforded housing in Rome (cf. 356n41). Greek homes varied in price by place, even within the same city; thus in Olynthus they ranged from 900 to 5,300 drachmas (averaging 1,000–2,000 drachmas, with day’s wages of one drachma; Höcker, “House”).

364. See, e.g., Carcopino, *Life*, 24–26, 29–32.

365. See further Stambaugh, *City*, 90; on Pompeii (where the most evidence remains), Wallace-Hadrill, *Houses*, 141, 183.

366. Pompeii held a greater concentration of wealth per capita than Rome, however (Carcopino, *Life*, 23–24).

367. Cary and Haarhoff, *Life*, 100; Hardy, *World*, 79.

368. In urban nonpatronal settings, Greeks and Romans tended to perform their socializing outside the homes (Cary and Haarhoff, *Life*, 150); the very poor lacked room to do otherwise.

369. White, “*Pater familias*,” 462.

370. E.g., Hardy, *World*, 79 (based on Pompeian homes); Friedländer, *Life*, 1:208 (noting benches for those who needed to wait); Stambaugh and Balch, *Environment*, 110.

371. Cary and Haarhoff, *Life*, 100.

372. For the luxury of city palaces, see Friedländer, *Life*, 2:185–93; villas and gardens, 2:193–202; on luxury in domestic arrangements, 2:202–10.

373. Stambaugh and Balch, *Environment*, 110 (with less affluent neighbors in higher stories).

374. Safrai, “Home,” 728–30 (for homes, 730–35).

More relevant is information about Jerusalem's housing. Poor Jerusalemites lived in the Lower City (downwind of the sewers), with outcasts on the fringes; well-to-do people lived in the Upper City.³⁷⁵ The Upper City was distinct from the Fortress Antonia but approachable from it; the supreme example of its extravagance was Herod's lavish palace (Jos. *War* 1.401).³⁷⁶ One entered a wealthy Jerusalem home by means of a vestibule, which opened into the dining hall, or triclinium; in wealthy homes, other rooms surrounded the triclinium.³⁷⁷ Archaeologists have excavated various wealthy homes in pre-70, Upper City Jerusalem, providing a sense of their magnificence.³⁷⁸ Even the wealthy homes, though equipped with both ritual and other baths, lacked indoor toilet facilities because of the lack of running water in Jerusalem.³⁷⁹

Luke says that "many" were praying (Acts 12:12), but estimates can only approximate the order of magnitude, not the number.³⁸⁰ It is usually thought that most well-to-do homes in Jerusalem and elsewhere in the Mediterranean world could not comfortably accommodate more than fifty people, though a peristyle might allow up to 120 altogether if necessary.³⁸¹ Some wealthier houses (especially in areas with more space available) could hold more,³⁸² but it should be remembered that the larger the dwelling, the smaller the percentage of the population to whom such homes would have been available.

Upper City Jerusalem had many luxury villas built close together.³⁸³ In one splendid Upper City mansion, the largest room is about twelve or thirteen meters by about seven meters; the second largest room (apart from courtyard) is about seven meters

375. See, e.g., Fiensy, "Composition," 224.

376. On this palace, see further Jos. *War* 5.176–83; for its current use as a praetorium, see Philo *Embassy* 299; Jos. *War* 2.301, 328; Brown, *Death*, 705–10; Blinzler, *Trial*, 173–76; Benoit, *Jesus*, 1:167–88; idem, "Reconstitution"; Keener, *John*, 1099.

377. Safrai, "Home," 732.

378. See Avigad, *Jerusalem*, 95–138, noting that many architectural patterns are borrowed from the larger Gentile world (e.g., p. 120); see also photos and reconstruction designs in Cornfeld, *Josephus*, 352, 447; for relief designs, 446. For art decorations in wealthy Jerusalem homes, see Avigad, *Jerusalem*, 144–50; for one huge palatial mansion in the Upper City, see 95–120, including many Hellenistic details. On the "Burnt House," revealing the Roman destruction of 70, see Avigad, *Jerusalem*, 120–39 (with the skeletal forearm of a woman caught in the fire, 137; idem, "Burnt House," 67, 71–72).

379. Avigad, *Jerusalem*, 143; but for some toilets, see more recently Shanks, "Channels"; for chamber pots, cf. *y. Ber.* 3:5, §5. Heating did exist for baths, however (e.g., Cornfeld, *Josephus*, 482, at Masada; for the steam room at Masada, see 488). Even in Rome, latrines with running water were available only on the first floor when at all (McRay, *Archaeology*, 85); for latrines (mostly public) and chamber pots in Rome, see, e.g., Friedländer, *Life*, 4:284–85; Carcopino, *Life*, 40–43; Koloski-Ostrow, "Latrines"; Stambaugh, *City*, 132–33; only the wealthy had private toilets (Jansen, "Distinctions"). Public toilets in Ephesus (Fant and Reddish, *Sites*, 191, on a later period) and Corinth (64) were near the public baths; cleaning public toilets and baths was an extremely low-status job (Pliny *Ep.* 10.33.2).

380. Given the apparent size of the household (with a gate and a servant who doubles as porter), we might estimate between fifteen ("many" for a secret night meeting during persecution) to fifty ("many" for the house).

381. Witherington, *Acts*, 211 (following Blue, "House Church," 131n44); cf. Witherington, *Corinthians*, 114 (following Murphy-O'Connor, *Corinth*, 156–57). Some scholars have more recently suggested possibilities broader than Murphy-O'Connor's estimates; see, e.g., Smith, "House Church," 13 (though partly from discounting Acts); Horrell, "Space"; Adams, "Placing" (esp. 25–35); summarizing views, MacDonald, "Reading," 49. One house in Pompeii consumed an entire block (31,000 sq. ft.) whereas some cramped living quarters atop shops were but 220 sq. ft. (Balch, "Paul, Families, and Households," 260). A shop's space might accommodate ten to twenty people (Jewett, *Romans*, 64). Gordon, "Mithraism," 400, estimates that meeting places for later Mithraic groups in Ostia could hold from roughly eighteen to forty-two, averaging at about thirty-five people. Under duress, of course, more people can be seated than can be reclined comfortably.

382. See esp. Balch, "Houses." Country homes varied in size (Libanius *Descr.* 2.2); for some massive villas, see designs in Höcker, "Villa," 411–14, 417–18; for a romanized first-century Palestinian villa, see Roll and Tal, "Villa."

383. McRay, *Archaeology*, 77. McRay notes (78) one many-roomed palace (ca. 2,000 sq. ft.) with a large waiting room.

by almost five meters. The courtyard is about eight meters by eight meters.³⁸⁴ But John Mark's mother's house, though probably in the Upper City, would not be this large unless she belonged to the high-priestly family (which probably would have made prayer meetings in her home difficult).³⁸⁵

V. DOORS AND PORTERS (12:13)

That Peter knocks at a gate and a servant answers suggests a larger than usual Jerusalem home, as one might expect for a gathering place. Palestinian Jews expected all homes to include doors with bolts, and both doors and courtyard gates were bolted.³⁸⁶ Here, however, the door is part of a larger gate entrance, probably one that could admit more people when opened during the day.³⁸⁷ (Luke's language in 12:14 is less precise, suggesting that Rhoda needed to open the entire gate; but it does not negate the more precise language here.) Such a gate (πυλῶν) normally belonged only to a wealthy home (Luke 16:20; cf. Matt 26:71; Gen 43:19). Granted, we cannot be certain that the gate in Acts 10:17 belonged to a wealthy home,³⁸⁸ but a spacious area near the sea should not be compared with the luxury of having a private gate in urban Jerusalem. Πύλη could include the door of a house (though it bore other meanings as well, many interchangeable with πυλῶν; e.g., 12:10), but πυλῶν refers to a gateway, gatehouse, or vestibule. Barrett suggests here "a large house with a large gateway in which was set a wicket-door that would be used for ordinary purposes."³⁸⁹

Although there is no clear indication that Agrippa is seeking to round up ordinary Christians at this point, the air of persecution may have intensified any anxiety about an unexpected knock on the door. This would not, however, be the reason that Rhoda was sent, as if the others were cowering and concealing themselves. Doorkeepers were of low status, like ditchdiggers and water drawers (Lucian *Phil. Sale* 7). Well-to-do people counted on slaves to function as porters;³⁹⁰ one who answers a knock on the door himself could be counted ignorant (Theoph. *Char.* 4.9). Women of the home who answered the house's door by themselves could be suspected (by gossipers) of having a paramour.³⁹¹ Well-to-do homes might have heavy gates that required a strong person to admit visitors (Ovid *Am.* 1.6.1–2), but the door in the gate (mentioned above) would prove less cumbersome, especially if Rhoda was not strong (cf. Mark

384. Avigad, *Jerusalem*, 98. Such spaciousness would count more in this period than before the Herodian period; if we can extrapolate from burial caves (assuming they were family caves), nuclear households predominated in Herod's day, with large extended-family households declining (Regev, "Family Burial"), probably because of increased prosperity.

385. Mary had a sizable home, but certainly not a palace. One named servant doubles as porter; Mary does not have her own specialized porter (in contrast to, e.g., the high priest; cf. Luke 22:56; John 18:16–17). From an aristocratic perspective, a wealthy person who had only one servant (here again a servant girl) appeared miserly (Lucian *Lucius* 1).

386. Safrai, "Home," 734; cf. Luke 11:7. On doors in the Greek East, including frames and locking mechanisms, see Höcker, "Door," 671; esp. Hurschmann, "Lock," 766, 768; on bolted or barred doors, see, e.g., Aristoph. *Wasps* 154–55; on slave girls' often opening them, Tibullus 1.2.7, 15–24.

387. It could conceivably be a gate that opened to a number of homes, to which a resident in any of the homes would respond, but that the home includes a servant and holds a number of visitors (Acts 12:12) suggests that this is the home's own gate. Otherwise Peter's knocking might prove too dangerous from the start.

388. Cf. Reimer, *Women*, 241. We should not, however, confuse the tanner's marginal status with his income level.

389. Barrett, *Acts*, 584.

390. Slave doorkeepers were sometimes of low status (Suet. *Rhet.* 3), but among slaves, they could sometimes be higher (two in Livia's household were married to freedwomen; Treggiari, "Jobs in Household," 51); they were counted on to guard doors (Suet. *Aug.* 19.2). Especially in Rome, with wealthy homes on ground floors throughout the city, the wealthy had to post guards at doors (Robinson, *Criminal Law*, 27). Doorkeeping constituted a common role for slaves in ancient literature (Hezser, "Impact," 402; idem, *Slavery*, 140).

391. See Theophr. *Char.* 28.3; Tibullus 1.2.7, 15–24, 41, 55–56.

16:3). Women could be doorkeepers (John 18:16–17; cf. Cic. *Att.* 1.12). A Jewish story includes a female slave who watches the door, carrying messages between a visitor and the householder.³⁹²

The term Luke uses here for Rhoda's "answering" the door, ὑπακούω, applied to a doorkeeper's task (Plato *Phaedo* 59E).³⁹³ One wishing to enter a wealthy home first knocked (Sen. E. *Controv.* 10.4.22). Those who knocked were normally not to enter, even if nothing was bolted, until invited to do so (Plut. *Cim.* 17.1). A person of status might be annoyed by a slack servant doorkeeper who took too long to answer and then further delayed the caller (Lucian *Lucius* 2).

Full-time doorkeepers (unlike Rhoda) stood watch to guard a well-to-do household;³⁹⁴ when someone came at night, a doorkeeper was to ask, "Who are you?" (Cic. *Phil.* 2.31.77). One writer summarizes a porter's job as observing who enters and who exits (Ovid *Fasti* 1.138).³⁹⁵ Doorkeepers normally screened callers;³⁹⁶ some prominent leaders bade a doorkeeper awaken Cicero at night (Plut. *Cic.* 15.1); a porter might need to check with an owner before admitting the caller.³⁹⁷ Doorkeepers also watched for the home's owner, to openly immediately upon his or her return.³⁹⁸ To refuse to admit a family member at the door was to reject him or her (Sen. E. *Controv.* 10.3.intro.), and this was presumably the message in refusing entrance to anyone else who would have normally been permitted ingress (cf. Matt 25:12).³⁹⁹ One whose knock was not answered might leave (Song 5:2–6) even if the streets were dangerous (5:7).

Whereas the most well-to-do homes had porters, servants in smaller households performed multiple functions (Luke 17:7–8), so that a pedagogue or other servant might also act as doorkeeper (Ael. Arist. *Def. Or.* 380, §127). (This might explain why no one is simply guarding the door at Mary's house—in addition to the observation that Rhoda is participating in the prayer meeting.) Cicero sought to reduce the expenses of provincial administration by doing without a doorkeeper when he was governor (Plut. *Cic.* 36.3).⁴⁰⁰ Sometimes servant girls were known to help men (suspected of adultery) in or out of a house where they did not belong (Cic. *Att.* 1.12).

VI. RHODA AS A SERVANT (12:13)

The priestly aristocracy had many slaves (Mark 14:4–7; Jos. *Ant.* 20.181, 206–7); other wealthy residents might have some slaves, though not as many (cf. *m. Ed.* 5:6;

392. *T. Job* 7:1–12 (graciously brought to my attention by Richard Pervo, personal correspondence, Oct. 3, 2012). This passage employs the same term as Luke for the female slave, although also another term designating her as the regular doorkeeper (naturally this work depicts Job as far wealthier than Mary appears in Luke's depiction of her).

393. So Conzelmann, *Acts*, 94–95. BDAG includes also Plato *Crito* 43A; Xen. *Symp.* 1.11; Theophr. *Char.* 4.9; 28.3; Lucian *Icar.* 22.

394. See Lucian *Slander* 30 (comparing intellect as a superior guardian). In prosperous but less wealthy households, any servant might answer if the door was bolted (e.g., Menander *Epitrepontes* 1075–77).

395. Apparently they were also supposed to keep out snakes and animals (cf. Ps.-Callisth. *Alex.* 1.32).

396. Treggiari, "Jobs in Household," 51 (noting that they also checked departing slaves). Perhaps relevant here, friends were more welcome to knock than others; Menander *Dyskolos* 481–82; cf. Luke 11:5–10.

397. Lucian *Lucius* 2, although this is not depicted as a normal home.

398. Cf. Mark 13:34–36; a faithful night watchman allegedly watched each night until Agamemnon's return (Aeschylus *Ag.* 1–25). Being ready for a householder's return was an important emphasis, since his absence in a distant land provided a temptation for those left behind (Prov 7:19–20; Eurip. *Hipp.* 281; Diod. Sic. 17.108.4; Char. *Chaer.* 1.4.8; *Pesiq. Rab Kah.* 19:4). Indeed, because they might return unexpectedly early (e.g., Aelian *Nat. An.* 7.25), Roman men normally warned their wives in advance when they were about to return (Plut. *Rom. Q.* 9, *Mor.* 266A), unless one returned at night unexpectedly to examine a wife's faithfulness (Phaedrus 3.10.18–20).

399. Cf. comment in Keener, *Matthew*, 598.

400. Joking aside, he did not go without a doorkeeper simply because of the one who was to get him out of bed in Plut. *Cic.* 15.1!

Roš Haš. 1:7).⁴⁰¹ Some scholars think it slightly more likely that Rhoda as παιδίσκη was simply a young woman in the family (or the church praying there), since she is named.⁴⁰² As helpful as this would seem for our modern sensitivities (including my own),⁴⁰³ it seems more likely that she is a slave. This is the more common use—indeed, the only use elsewhere in Luke-Acts (Luke 12:45; 22:56; 16:16) and elsewhere in the NT (Mark 14:66, 69; Matt 26:69; John 18:17; Gal 4:22–23, 30–31).⁴⁰⁴ Would an ancient home have a locked gate (large enough to contain its own door) but no one to serve (at least when needed) as porter?⁴⁰⁵

Rhoda's name does appear for a slaveholder (*Herm. Vis.* 1.1.1)⁴⁰⁶ and was a good Greek name borrowed from mythology (Poseidon's daughter in Apollod. *Bib.* 1.4.5). The name was, however, most common for slaves, and by this period, "Rhoda" ("Rose") and its cognates ("Rhodion," "Rhodia," "Rhodopis," "Rhodope") "had become well established in the servile onomastikon of the Graeco-Roman world."⁴⁰⁷

The name is attested among Jews (*CIL* 9.2619) only rarely and in fifth- and sixth-century Diaspora sources, and so she may have been born into a Gentile family and bought by Jerusalemites.⁴⁰⁸ Then again, the high priests' households, which probably produced a surplus of slaves, might have slaves with Greek names because they often used Greek themselves (cf., e.g., "Alexander" in 4:6). Some would be descended from Gentiles (Jewish servants were freed in the Jubilee Year)⁴⁰⁹ but be Jewish by faith, at least after the first generation.⁴¹⁰ If she was a Gentile, we might expect Luke to mention this if he knows it (cf. Acts 6:5); but he may not know it, or extraneous details might distract the reader from the main action. Thus the matter cannot be decided with certainty.

She could be a slave of some disciples present, or a slave of another aristocratic household in the area, allowed in and out by the porter of her own household. Her coming to the gate probably implies, however, that she is part of Mary's household; given the circumstances for prayer that night, it certainly implies that she was trusted as a member of the Christian community.⁴¹¹ Associations that admitted women and slaves probably thereby promoted social integration more than those that did not.⁴¹² For the

401. So Fiensy, "Composition," 224, also noting that elsewhere elites used "scores or even hundreds of slaves . . . as household servants, body guards, eunuchs in the harem" (Jos. *War* 1.511; *m. Yebam.* 8:4).

402. Barrett, *Acts*, 584.

403. See, e.g., Usry and Keener, *Religion*, 100–110.

404. It is also by far the dominant usage in the LXX, e.g., Gen 12:16; 16:1–8; 20:14, 17; 21:10–13; Exod 20:10, 17; 21:20, 32; 23:12; Esth 7:4; Jdt 8:7; 10:10; Tob 8:12–13; Sir 41:22/24; also the standard use in the Apostolic Fathers (1 *Clem.* 60.2; *Did.* 4.10; *Barn.* 19.7), Philo (*Alleg. Interp.* 2.94; 3.146, 244; *Cher.* 9; *Flight* 1; *Prelim. St.* 1, 12, 14, 71, 153–54), and one of two references in Josephus (*Ant.* 18.40, vs. 4.248).

405. Even today, gated homes I visited in northern Nigeria typically had workers because labor was abundant and inexpensive. Danny McCain, professor at the University of Jos, Nigeria, offers a similar observation (personal correspondence, July 16, 2012) regarding walled homes with gates: "All moderately wealthy people would have a gate man to answer the gate"; those with somewhat lesser wealth would have a worker delegated to answer the gate along with other responsibilities, and in other cases "there is almost always" a boy or girl working there to open it "rather than one of the family members doing it." An immediate family member does it only if no one else "of lesser rank" is available.

406. Barrett, *Acts*, 584.

407. Williams, "Names," 111 (following Reilly, *Slaves*, §§2412–26); Witherington, *Acts*, 387.

408. See Williams, "Names," 111.

409. Cf. Lev 25:40–42 (on Gentile servants, see Lev 25:44–46); Fiensy, "Composition," 224.

410. Whether a slave who converted to Judaism had to be freed became a problem for later rabbis (cf. *b. Yebam.* 45b–46a), but it would probably not have troubled Sadducees to the same extent. Later rabbis circumvented the problem by ensuring that a symbol of bondage remained on the slave during proselyte baptism (*b. Yebam.* 46a).

411. Slave girls sometimes betrayed household secrets (e.g., Val. Max. 2.5.3).

412. Klauck, *Context*, 47.

significance of Rhoda's (and Mary's) gender, see the discussion of gender in the commentary introduction.⁴¹³ For the significance of her slave status, see the excursus below.

Excursus: Slaves and Slavery

The “slave stereotypes” that some scholars have proposed as relevant for this passage can hardly fail to have existed, given the vast array of existing stereotypes, but the same might well be true of competing “slave stereotypes” that could be proposed. Ancient literature concerning slaves is vast, a range of stereotypes existed, and slaves filled a wide range of roles. Some of these roles are more relevant for this passage than others, but instead of selecting narrow associations, this excursus surveys slavery in general, with special attention to household slaves, women slaves, and stereotypes of slaves.

Others have produced extensive monographs and other works on slavery in antiquity;⁴¹⁴ here we simply survey basic information as background to this passage. Nevertheless, this excursus requires more extensive treatment than most of our other excursuses for four reasons: first, slavery is a subject of considerable interest to interpreters of the text in our era; second, it is relevant for the explication of the text in its historical setting; third, some scholars debating issues relevant to this text have provided extensive documentation regarding ancient slavery, inviting sufficiently ample documentation in a response; and fourth, the plethora of ancient material on the subject precludes hasty dismissal of the subject without at least cursory treatment here of the various topics involved.⁴¹⁵ Although some of the material surveyed here will ultimately prove much less relevant to Rhoda than to the slave woman in Acts 16:16–19, this cohesive excursus supplies the background for both (and for other passages, such as 2:18; 3:13; and 10:7).

The distinction between slave and free was the most basic distinction among people under Roman law.⁴¹⁶ That the master's role is to command and the servant's is to obey was a commonplace;⁴¹⁷ likewise, the master was held to be superior to the slave.⁴¹⁸ There was no single religious perspective regarding slaves. Some Roman goddesses would not let female slaves approach (Ovid *Fasti* 6.551–53); another goddess could be worshiped by slaves, since the worshiper who started her temples was the son of a slave woman (6.783–84). The sacred island of Delos was long used as a central slave market in the East, some scholars estimating that as many as ten thousand slaves could be sold there on a highly efficient day.⁴¹⁹

413. Keener, *Acts*, 1:597–638.

414. See, e.g., Buckland, *Slavery*; Barrow, *Slavery*; Harrill, *Slaves*; more briefly, Harrill, “Paul and Slavery,” 575–85; idem, “Slavery”; Gager, *Kingdom*, 103–6; Keener, “Family,” 361–66; idem, *Paul*, 196–207; for sample sources, Shelton, *Romans*, 163–85; van der Horst, “Macrobius,” 229 (citing Macrobi. *Sat.* 1.11.6–15). For their ambiguous status, see Lintott, “Freedmen and Slaves.” For civil bondage distinct from slavery in Jewish and Roman law, see Cohen, *Law*, 159–78.

415. The treatment here is also arranged more topically than chronologically despite significant differences between, e.g., Athenian and Roman slavery (Harrill, “Slavery,” 1124). Geographic differences will also be relevant, but most readers will recognize the relative dates and peoples represented by the authors cited. My approach has been to accumulate sufficient data for the general state of affairs to try to fill the significant lacunae in our knowledge about a slave in a moderately well-to-do Hellenist Levitical home in first-century Jerusalem; the class and background both suggest the relevance of Hellenist as well as traditional Judean culture.

416. Gaius *Inst.* 1.9–17, esp. 1.9; Justin. *Inst.* 1.3–4.

417. Ael. Arist. *Def. Or.* 128, §40D.

418. Ael. Arist. *Def. Or.* 130, §41D.

419. Grant, “Economic Background,” 104.

Although slavery has been pervasive in human history, scholars usually identify only a handful of full-scale “slave societies”—entire socioeconomic systems dependent on slavery. Even by the narrowest definitions, however, Greek and Roman societies are among them.⁴²⁰ Egyptian law reportedly treated slaves and free as equals regarding their humanity;⁴²¹ German slavery was more like serfdom, with slaves ruling their own homes;⁴²² India, most unusually of all, was thought by Greeks to lack slaves.⁴²³ Greco-Roman society, however, had a highly sophisticated differentiation of slave roles. Judean slavery was influenced by the larger milieu but was not a slave society (see comment on Judean slavery below).

1. Estimates of Numbers

Estimates of the numbers of slaves vary widely. Some scholars have claimed that slaves far outnumbered (by as much as three to one) free persons in Italy, with their numbers roughly equal in Rome;⁴²⁴ others estimate that those of slave descent far outnumbered those of free descent in Rome.⁴²⁵ The number for Italy is far too high, a slave population closer to one-third being likelier.⁴²⁶ Some in fact argue that free persons outnumbered slaves even in very urban areas;⁴²⁷ some estimate that between one-third and one-half the population of early imperial Rome consisted of slaves or families with a recent background in slavery.⁴²⁸ Galen estimated that the number of slaves in Pergamum was close to the number of citizens, which might yield an estimate of one-third slaves in that city in Asia Minor;⁴²⁹ this was perhaps an average for urban areas.

During the late republic, Roman expansion and economic growth fueled the demand for slaves;⁴³⁰ the late republic and the early empire probably used more slaves than any earlier society.⁴³¹ Finley estimates that the proportion of slaves in late republican Italy (with two million slaves, 35 percent of the population) was roughly comparable to the proportion of slaves (33 percent) in the southern United States in 1860.⁴³² Likewise, just as three-quarters of southern whites held no slaves,⁴³³ some

420. Finley, *Slavery*, 9 (listing only five, which is too narrow), 67 (making Greeks and Romans the first; he does not count Pharaonic Egypt); Padgug, “Problems,” 21–22 (narrowly identifying *only* Greco-Roman society).

421. Diod. Sic. 1.77.6 (regarding slavery as an accidental, not inherent, condition).

422. Tac. *Germ.* 25. Freeborn children and servants were raised in the same conditions (*Germ.* 20). Nevertheless, some slaves were used to cleanse sacred vessels, then drowned (*Germ.* 40). Gaul’s nobles also reportedly oppressed their poor peasants (Caesar *Gall. W.* 6.13).

423. Diod. Sic. 2.39.5; Arrian *Ind.* 10.8. Nevertheless, India also had castes (seven, in Diod. Sic. 2.40.1).

424. Ladd, *Theology*, 529. Lightfoot, *Colossians*, 320–21, thinks that slaves outnumbered free three to one in classical Athens and outnumbered citizens four to one. Finley, *Slavery*, 80, prefers a figure of 30 percent slaves for classical Athens.

425. Carcopino, *Life*, 61, estimating 80 percent of non-Roman names on Rome’s inscriptions.

426. Finley, *Slavery*, 80 (giving an estimate of 35 percent for late republican Italy). The slave system proved economically profitable (for the slaveholders) in agrarian Italy (idem, *Economy*, 83–84). Scheidel, “Mobility,” estimates perhaps more than half a million slaves in Roman Italy.

427. Cary and Haarhoff, *Life*, 130; see most of the varied estimates for Rome in Barrow, *Slavery*, 21.

428. MacMullen, *Social Relations*, 103. Finley, *Economy*, 71, argues that persons of freed descent outnumbered freeborn persons in first-century Rome.

429. Verner, *Household*, 63. Slaves also abounded in some other attested areas in the Greek East (see, e.g., Harper, “Census Inscriptions”).

430. Grant, “Economic Background,” 104.

431. Verner, *Household*, 41–42 (following Hopkins, *Conquerors*, 99). This would be true at least in the northern Mediterranean world.

432. Finley, *Slavery*, 80; idem, *Economy*, 71.

433. Finley, *Economy*, 71 (according to census figures in Stamp, *Institution*, 29–30).

estimate that, at most, one-quarter of free persons held slaves in Roman Italy.⁴³⁴ Some argue that slavery was declining by the period of early Christianity because it was inefficient and the supply was diminishing;⁴³⁵ even if this is so, the numbers of slaves remained high, especially on Italian estates, in the mines, and in other high-volume industries.⁴³⁶ Our Jewish sources (below) suggest that slavery was less common in Judea than in Greece or Rome.

Prices also varied widely. In an earlier period, manual laborers might sell for just three or four minas whereas a well-educated person might fetch 100 to 120 minas.⁴³⁷ Closer to this period, slaves sold in Rome from as little as 750 sesterces (187.5 denarii) to as much as 700,000 sesterces (175,000 denarii), 2,000 sesterces being “a legally recognized norm.”⁴³⁸ In contrast to the Americas, however, slaveholders in the Greco-Roman world did not necessarily belong to the social or economic elite.⁴³⁹

2. Slave Occupations

The ancient sources suggest that most long-term hired labor was slave labor.⁴⁴⁰ The overhead cost of housing and feeding slaves even in off-seasons complicated matters, however, and scholars debate the proportion of free to slave labor.⁴⁴¹

The range of occupations among slaves was roughly the same as among free persons,⁴⁴² and slaves and free persons often worked beside each other.⁴⁴³ Slaves were often physicians,⁴⁴⁴ managers of houses or estates,⁴⁴⁵ pedagogues (who escorted boys to school and assumed attendant responsibilities),⁴⁴⁶ readers in well-to-do houses,⁴⁴⁷ and so forth. Temples held slaves to maintain their grounds;⁴⁴⁸ undertakers also could use slaves to obtain bodies ready for burial.⁴⁴⁹ Slaves often worked in masters' shops

434. Verner, *Households*, 60 (with comparable figures for classical Athens); Toner, *Culture*, 185 (a quarter). Verner estimates (60) that only a fifth of free persons in Roman Egypt held slaves (and usually a small number, since only 10 percent of the population there were slaves); but most of the metropolite households in the nome capitals did have one or two slaves (Lewis, *Life*, 57).

435. Mattingly, *Christianity*, 13.

436. Koester, *Introduction*, 1:331.

437. Grant, “Economic Background,” 104, suggesting 15–20 dollars (5–6 pounds) for the former figure and 500–600 dollars for the latter (Grant offered these equivalents in 1964). Infirmities lowered the slave's “market value” (see, e.g., Nutton, “Epilepsy,” for epilepsy).

438. Stambaugh, *City*, 154; cf. Verner, *Household*, 61.

439. Finley, *Slavery*, 80.

440. Finley, *Economy*, 73–74.

441. Stambaugh and Balch, *Environment*, 72.

442. Finley, *Slavery*, 81–82; Martin, *Slavery*, 11. For examples, see Barrow, *Slavery*, 22–64; for a briefer list of occupations, see Cary and Haarhoff, *Life*, 130. The range of occupations was higher than in the American South, although even the latter included a wider range than often assumed (including a small minority of managers, urban artisans, and carpenters; see Fogel and Engerman, *Time*, 38, 41).

443. Finley, *Economy*, 79; note also Lintott, *Romans*, 95, on slaves as well as freedpersons in a variety of professions.

444. E.g., the inscriptions in Sherk, *Empire*, 150 (*FIRA* 1.73), 223–24 (*ILS* 5152; 7812); Friedländer, *Life*, 1:167–68; Stambaugh, *City*, 136.

445. E.g., Lucian *Affairs* 10; Char. *Chaer.* 1.12.8; 2.2.1; 3.7.1; Treggiari, “Jobs in Household,” 49; Stambaugh, *City*, 149; Judge, *Pattern*, 38; see more fully Martin, *Slavery*, 15–22; in novels, see Hock, “Ethnography,” 113–14 (citing Char. *Chaer.* 1.12.8; Ach. *Tat.* 5.7.3–10; 6.3.3; 7.7.3; Xen. *Eph. Anthia* 2.10.4). The manager in Luke 16:1–13, however, is probably free, since he is concerned with unemployment rather than being sold (Luke 16:3; Bailey, *Poet*, 92; cf. Derrett, *Law*, 52).

446. E.g., Ael. *Arist. Def. Or.* 380, §127; Xen. *Eph. Anthia* 1.14.

447. Pliny *Ep.* 8.1.1.

448. DeSilva, *Honor*, 192.

449. Stambaugh, *City*, 150.

or managed their businesses.⁴⁵⁰ Public slaves sometimes represented a particularly privileged class of slaves;⁴⁵¹ municipal slaves ranged from menial laborers to wage-earning clerks and officials.⁴⁵²

Slaves were abundant in agriculture, especially in the West,⁴⁵³ though many scholars argue that rural tenants outnumbered them by this period.⁴⁵⁴ Slaves on farms may have outnumbered those in the cities,⁴⁵⁵ but others argue the reverse,⁴⁵⁶ perhaps better reflecting conditions under the early empire. Farms employed massive numbers of slaves during the republic, but in the late republic and the empire, it became more common to depend on free labor, which could be laid off when weather or ill health made such workers less profitable.⁴⁵⁷ Yet even in the early second century C.E., Pliny the Younger, faced with nonpaying tenants, considered replacing them with some quality slaves to work his estate.⁴⁵⁸

Pliny the Elder warned against hiring “slave-gangs hired from houses of correction”;⁴⁵⁹ he also strongly urged maintaining the farmhands’ health.⁴⁶⁰ Most scholars believe that life was much harder for agrarian workers than for household slaves.⁴⁶¹ Granted, household slaves faced greater scrutiny from slaveholders, which could yield periodic discipline,⁴⁶² but field slaves also had supervisors and were subject to beatings. Household slaves had better access, on average, to food and health care and far better access to manumission.

3. Slaves versus “Free” Peasants

Agrarian slaves’ lot was bad, but they had an abundance of miserable company from free subsistence workers. Peasants could be hired seasonally without the capital and continuous maintenance required for slaves;⁴⁶³ most “free” peasants lived at subsis-

450. *Ibid.*, 149.

451. E.g., Pliny *Ep.* 10.31.2; a stela inscription in Sherck, *Empire*, §48, pp. 90–91; Barrow, *Slavery*, 130–50. Some public slave jobs were of higher status than others: a city manager could be a slave (Meeks, *Urban Christians*, 58); some slaves performed public rituals (Livy 9.29.9); one was a public executioner, required to live outside the town (Rapske, *Custody*, 247–48); another had been mistreated (Aeschines *Tim.* 54).

452. Jones, *Empire*, 243. Jeffers, *World*, 222, suggests that a free person might temporarily sell himself into slavery when it was a matter of a high civic office such as that of civic manager.

453. Barrow, *Slavery*, 65–97; for a first-century example, note Petron. *Sat.* 37–38; later, Alciph. *Farm.* 23 (Lenaeus to Corydon), 3.26. Some rich landlords in republican Italy employed massive numbers of slaves (Appian *Bell. civ.* 1.1.8). Slaves were more common—because more easily supervised—on medium-sized villas than on large estates (Pucci, “Pottery,” 116).

454. Finley, *Slavery*, 79. Slavery also occurred in urban settings in the American South (Fogel and Engerman, *Time*, 101), though it was predominantly rural.

455. Bradley, *Slaves*, 75.

456. Finley, *Slavery*, 79.

457. Shelton, *Romans*, 155–56 (citing Colum. *Rust.* 1.7.1–3, 6–7 for tenants on estates). Slave labor proved profitable only if slaves were treated better; this recognition improved their treatment during the empire (Barrow, *Slavery*, 97).

458. Pliny *Ep.* 3.19.6. Likewise, free workers who protested conditions could be displaced by slaves (Cary and Haarhoff, *Life*, 120).

459. Pliny E. *N.H.* 18.7.36 (LCL, 5:213), advising also the hiring of a supervisor almost as smart as the owner but who did not recognize it. His nephew wants more expensive, higher-quality agrarian slaves than the cheap kind who need to be chained (Pliny *Ep.* 3.19.7).

460. Pliny E. *N.H.* 18.8.44.

461. E.g., Crossan, *Jesus*, 47; cf. Garnsey and Saller, *Empire*, 119. Mommsen, *History*, 28–30, contends that it was hard enough to lead the slaves to insurrection during the republic. But for some provisions for agrarian slaves, cf. Roth, “Food.”

462. D’Arms, “Slaves,” 179–80. Female household slaves, however, were at much higher risk of sexual abuse (see discussion below).

463. Lewis, *Life*, 57; Shelton, *Romans*, 155.

tence level,⁴⁶⁴ and this, in some respects, made their lot worse off *economically* than that of male household slaves.⁴⁶⁵ (On tenant farmers, see the discussion concerning poverty at Acts 3:2.)

Some ancients remarked that it made little difference whether one was a slave or a peasant; it simply entailed a change of masters.⁴⁶⁶ The “freer” a peasant became from a landholder’s control, the less security the peasant had;⁴⁶⁷ Cato’s chained slaves had more regular access to bread than did the typical peasant in Egypt.⁴⁶⁸ When Pliny visited his estate, he relaxed, letting the urban servants who had accompanied him supervise the peasants working for him;⁴⁶⁹ if he allowed the peasants to remain on his estate, he planned to let his servants supervise them.⁴⁷⁰ Nor were peasants much more upwardly mobile than agrarian slaves; they were in fact far less mobile than urban freedpersons, and social mobility was difficult for “free” peasants. Peasants who rose from such a life to the municipal aristocracy were few and far between.⁴⁷¹ Small farmers who owned their own land would have more freedom, but circumstances were rarely ideal.

4. Slavery in the Mines and the Arena

The primary job almost exclusive to slaves (and criminals) was work in the mines, and the one almost exclusive to free persons was service in the military.⁴⁷² Slaves who enlisted in a Roman legion, knowing that this was forbidden, could be executed⁴⁷³ (though once during the republic, Rome bought slaves for use as soldiers in an emergency).⁴⁷⁴ Mines in Egypt either hired free persons for high wages (given the difficulty of the work) or used convicts.⁴⁷⁵ A forger, for example, could be condemned to the mines.⁴⁷⁶ Mines were the harshest form of slavery, both in the Hellenistic era⁴⁷⁷ and in the Roman period.⁴⁷⁸ Threats of sending slaves to the mines were used as a form of behavioral control.⁴⁷⁹ Members of the elite could not be sent to the mines;⁴⁸⁰

464. Lewis, *Life*, 57. Peasants’ workdays even in Jewish Palestine could run from sunrise to dusk (Applebaum, “Economic Life,” 657).

465. Libanius *Invective* 6.12–16; Lee, “Unrest,” 129–31; Jeffers, *World*, 225 (on the urban poor). In the American South, although slaves faced intolerably worse conditions psychologically and in terms of beatings and families being broken up, some of their physical conditions (access to food and housing; even some work conditions and longevity) bore some resemblance to some of the free poor (cf. Fogel and Engerman, *Time*, 5). Freedom was desirable, but it did not guarantee the alleviation of all other circumstances.

466. Phaedrus 1.15.

467. Finley, *Economy*, 108.

468. *Ibid.*, 107.

469. Pliny *Ep.* 9.20.2.

470. Pliny *Ep.* 9.37.2. He is annoyed at the peasants’ complaints and their desire for more of his time (9.36.6).

471. For one notable example, see *CIL* 9.3088 (in MacMullen, *Social Relations*, 47).

472. Harrill, “Paul and Slavery,” 583. For slaves and criminals in the mines, see also Forbes, *Technology*, 7:223.

473. Pliny *Ep.* 10.29.1; 10.30.2.

474. Val. Max. 7.6.1a. Rome was normally paranoid about large numbers of slaves in arms (cf., e.g., Vell. Patern. 2.73.3; Quint. *Decl.* 352 intro).

475. Lewis, *Life*, 138 (noting temperature extremes between night and day and that soldiers, supervised by a centurion, would control the mine).

476. Pliny *Ep.* 10.58.3.

477. Tarn, *Civilisation*, 104.

478. See, e.g., Pliny *Ep.* 10.31.3 (somewhat lesser forms of penal labor included cleaning sewers and public baths; 10.33.2).

479. Boer, *Morality*, 225.

480. Lewis, *Life*, 138. Caligula, however, violated this protocol (Suet. *Calig.* 27.3). Someone who would have a Roman knight condemned to the mines merited harsh punishment (Pliny *Ep.* 2.11.8).

such a “demeaning and cruel” penalty was meted out only to “lower-class criminals and slaves, notable among them being captives from the Jewish revolts and later, Christians.”⁴⁸¹

Ancient mining⁴⁸² required arduous labor. Mountains were mined with lamps, and miners might not see the light of day for months at a time.⁴⁸³ Periodically the ceilings of the mines would collapse, crushing the miners.⁴⁸⁴ Fire and vinegar could be used on flint, but to avoid excess smoke and heat in the tunnels, miners often used heavy machines to smash the flint. The miners would then remove the loads of flint “on their shoulders, working night and day, each man passing them on to the next man in the dark, while only those at the end of the line see daylight.”⁴⁸⁵ A gravel-clay mixture was even harder, requiring very heavy labor to penetrate.⁴⁸⁶ Strabo and Pliny the Elder both report dangerous gases in the mines, and some ancient authors attributed miners’ sickly pallor to this cause.⁴⁸⁷

Besides slavery in the mines, the most degrading form of slavery was that in the arena, as a gladiator.⁴⁸⁸ Not all gladiators were equally despised. Although most gladiators were slaves, the most skilled were professionals, often popular with the people.⁴⁸⁹ Professional gladiator instructors were known for their skill, at one point called in to train Roman soldiers how to parry blows and give them.⁴⁹⁰ Once condemned to be gladiators, whether against other people or animals, slaves could never achieve citizenship even if they survived and were freed.⁴⁹¹ Gladiatorial exhibitions made their sponsors politically popular,⁴⁹² but some ancients complained of the depravity of a society entertained by watching armed combatants kill each other.⁴⁹³

5. Household Slavery

Household slavery represented another common form of slavery,⁴⁹⁴ most relevant to our text and most references in early Christian sources. Slaves were viewed as members of the household,⁴⁹⁵ although this status did not necessarily affect their

481. Lewis, *Life*, 138. Cf. Weisgerber, “Mining,” 8–9, for the use of slaves and criminals.

482. On ancient mining and quarrying, see Forbes, *Technology*, 7:104–91; Weisgerber, “Mining”; for Greek mining, see esp. Forbes, *Technology*, 7:139–49; for Roman, 149–62. For mining techniques, see 192–243. The early empire belonged to the heyday of Roman mining (155).

483. Pliny E. *N.H.* 33.21.70.

484. Pliny E. *N.H.* 33.21.70, suggesting that this work was more dangerous than that of pearl divers.

485. Pliny E. *N.H.* 33.21.71 (LCL, 9:55).

486. Pliny E. *N.H.* 33.21.72–73, also describing the cracking of the roofs.

487. Forbes, *Technology*, 7:223. On silver mines, see Pliny E. *N.H.* 33.31.96.

488. Conjoined with mine slaves in Pliny *Ep.* 10.31.2. Seneca the Younger praises a gladiator for killing himself, noting that the worst death is better than the best slavery (*Ep. Lucil.* 70.20–21). (Seneca was later forced to commit suicide himself.) On gladiators, see further Flaig, “Gladiator”; Lintott, *Romans*, 156; on their vegetarian diet (at least in Ephesus), see Curry, “Diet.”

489. Jeffers, *World*, 33. The senate forbade knights to work as gladiators (Suet. *Aug.* 43.3). On female gladiators, see McCullough, “Gladiators.”

490. Val. Max. 2.3.2.

491. Gaius *Inst.* 1.13.

492. Suet. *Jul.* 10.1–2. For this reason, the emperor became their primary sponsor.

493. Sil. It. 11.51–54 (in this case, on an earlier period). Pliny the Elder reports a superstition in which drinking gladiators’ blood cures epilepsy (*N.H.* 28.2.4).

494. See, e.g., Barrow, *Slavery*, 22–64.

495. E.g., Dio Chrys. *Or.* 38.15; *CPJ* 1:249–50, §135; cf. Lewis, *Life*, 57; Dixon, *Mother*, 16; Verner, *Household*, 30, 33; White, “*Pater familias*,” 457; Aune, *Environment*, 59–60; Meeks, *Urban Christians*, 30; Stowers, *Letter Writing*, 31; Ferguson, *Backgrounds*, 53; Safrai, “Home,” 750. Also freedpersons (*CPJ* 2:20–22, §148; Cic. *Fam.* 1.3.2; Pliny *Ep.* 5.19.1–2, esp. 5.19.2; 9.24). Cf. also οἰκέτης, “household slave” (e.g., Luke

treatment. Household slavery was generally the most benevolent (or, more accurately, the least oppressive) form of slavery.⁴⁹⁶ Most slaves in Jerusalem probably worked in a domestic capacity.⁴⁹⁷ A Jewish sage advised treating one's only servant like one's sibling (Sir 33:31).

The matron of a Roman home could be expected to supervise the household staff during most of the day;⁴⁹⁸ a tyrannical matron could spell untold suffering for the household slaves,⁴⁹⁹ although this portrait emerges most forcefully in Juvenal's misogynist complaint against unruly matrons. A large household also held slaves of varying ranks⁵⁰⁰ (probably unlike here). One form of household slave in the wealthy household was the food waiter, most often a well-dressed male.⁵⁰¹ The wine waiters were usually young males without facial hair, often Greek, and subject to sexual harassment.⁵⁰² By contrast, homosexual exploitation would be far less likely in Jewish settings, where homosexual activity of any sort was loathed and treated as an exclusively Gentile vice.⁵⁰³

6. Housing, Food, and Clothing

Where slaves were quartered depended on the size of the home; they lived in closer contact with slaveholders in working-class homes.⁵⁰⁴ Most slaves in Rome had to live in the slaveholders' homes; the many homes that could not afford separate slave quarters⁵⁰⁵ might consign a slave's sleeping area to a cot in the kitchen or elsewhere.⁵⁰⁶ Slaves with families were likelier to receive separate quarters in a large enough home.⁵⁰⁷ But slave quarters, where they existed, were less decorated than the main parts of the household, and their service areas were kept from the center of free activity.⁵⁰⁸ Although servants worked throughout a house, particular areas with more menial responsibilities were particularly "servile" areas.⁵⁰⁹

Slaveholders were expected to provide their slaves with adequate food.⁵¹⁰ Nevertheless, slaves ate a form of food inferior to that of the slaveholders,⁵¹¹ though some

16:13; Acts 10:7; Rom 14:4; 1 Pet 2:18; Sir 4:30; 6:11; 10:25; 23:10; 37:11; 42:5; some fifty times in the LXX; Epict. *Diatr.* 2.14.18).

496. Garnsey and Saller, *Empire*, 119. This would not be true, however, for sexually exploited boys, girls, and young women in some households (see my separate discussion of sexual abuse below).

504. Stambaugh, *City*, 159.

505. Pliny the Younger had for his residential slaves and freedpersons nice enough quarters that he could also welcome guests there (*Ep.* 2.17.9).

506. Jeffers, "Families," 132; *idem*, *World*, 56. Likewise, most excavated homes elsewhere in the West lack specific "slave quarters" (White, "Pater familias," 461).

507. Jeffers, *World*, 56.

508. Balch, "Families," 261.

509. Wallace-Hadrill, *Houses*, 39.

510. E.g., *Xen. Cyr.* 8.1.43; Ps.-Phoc. 223–24; cf. also Philod. *Household* 30.18–31.2 in Lincoln, *Ephesians*, 415. Failure to provide slaves enough nourishment helped provoke revolt during the republic (Diod. Sic. 34/35.2.32).

511. Romans despised a wealthy father who, being miserly, made his son work with slaves in the fields and eat their food (Appian *Hist. rom.* 3.2); freedpersons also usually ate food inferior to that of the patron

austere thinkers advocated eating the same kind of food the slaves ate.⁵¹² One such exception was the rigorous Cato, who, after working alongside his slaves, dined with them on the same food.⁵¹³ (This, however, reflected his frugality rather than his generosity; he overworked his slaves, then sold them when they were old.)⁵¹⁴ Normally, wealthy Romans ate with slaves in attendance rather than together with them.⁵¹⁵ One king was thought benevolent for allowing his slaves to eat and drink before him,⁵¹⁶ and he shared food from his table when they worked hard, earning their appreciation.⁵¹⁷

Most slaves wore clothing comparable to that of the free poor,⁵¹⁸ and they probably could not change them often; in the second century B.C.E., the austere Cato listed one tunic and one cloak per male farm slave every other year.⁵¹⁹ In Rome, female slaves, as well as slaveholders' young daughters, could wear "a tube-dress with a long overfold, belted at the waist, possibly over a short-sleeved undertunic."⁵²⁰ In contrast to free Romans, Roman slaves typically wore their hair long and did not shave; freedpersons could shave their heads and wear a wool cap.⁵²¹

7. Sources of Slaves

Extant evidence suggests that male slaves outnumbered female slaves, and so, unless this evidence is skewed, slave numbers could not be maintained purely by natural reproduction.⁵²² People entered slavery in a variety of manners.⁵²³ For example, in some cultures thieves could be enslaved to the victims of their theft,⁵²⁴ though this would account for a very small number of slaves; self-sale to pay a debt⁵²⁵ also generated a small portion of the slaves in this period. Many infants discarded on trash heaps were adopted as slaves.⁵²⁶

With the decline of foreign wars as a source of slaves, slaveholders encouraged slaves to reproduce; at least in Egypt, many slaves in the first two centuries C.E. appear in the papyri as "homeborn."⁵²⁷ Although many slaves were born in slavery, most slave

(Pliny *Ep.* 2.6.4). Most advocated that slaves' food and work be kept moderate (Lincoln, *Ephesians*, 415, again citing Philod. *Household* 30.18–31.2).

512. See Mus. Ruf. 18A, p. 114.21–26; 18B, p. 118.35–36.

513. Plut. *M. Cato* 3.2; he continued this practice even as an official (4.3).

514. Plut. *M. Cato* 5.1. Although he never complained about preparation of food for himself, he flogged slaves who did not prepare or serve well when he entertained others (21.3).

515. Sen. *Y. Ep. Lucil.* 47.2–3 (who disagrees with the practice). Even eating with freedpersons was considered noteworthy (Pliny *Ep.* 2.6.3; Pliny saved money by eating the same food they ate, 2.6.4–5).

516. Xen. *Cyr.* 8.1.44 (just as he allowed animals to do; for this benefit, the slaves loved him and called him "father"). The *Cyropaedia* is Xenophon's idealization, not a reflection of his Athenian culture.

517. Xen. *Cyr.* 8.2.4 (again comparing the appreciation of animals).

518. Croom, *Clothing*, 23, noting this explicitly in Diocletian's price edict (301 C.E.).

519. *Ibid.*, 23–24 (citing Cato *E. Agr.* 59; also Colum. *Rust.* 1.8.9).

520. Croom, *Clothing*, 128.

521. Cosgrave, *History of Costume*, 78.

522. Osiek, "Female Slaves," 260–61 (citing lists of slaves from antiquity, even those serving aristocratic women). That those with sufficient slaves to produce lists preferred male to female slaves is possible but not clear.

523. See, e.g., Lyall, *Slaves*, 29–35 (mentioning capture, birth to a slave mother, self-sale or submission to slavery); Buckland, *Slavery*, 397–436 (by capture, 397; by birth, 397–401; for criminal actions, 401–19 *passim*; the sale of children, 420; an ungrateful freedperson, 422; fraudulent sale of freemen, 427); Barrow, *Slavery*, 1–21; Bartchy, *Slavery*, 45–50; Hezser, *Slavery*, 221–46; more briefly, Koester, *Introduction*, 1:59.

524. Cohen, *Law*, 163.

525. Jeffers, *World*, 222.

526. E.g., Dunand, *Religion en Égypte*, 116–17; Lewis, *Life*, 54, 58; Ferguson, *Backgrounds*, 59; Baugh, "Paul and Ephesus," 46–47 (citing esp. *I. Eph.* 18c); Pliny *Ep.* 10.65.1; 10.66.2; see comment on Acts 7:19.

527. Lewis, *Life*, 58.

families initially entered slavery as prisoners of war⁵²⁸ (as Luke knew, Luke 21:24); this required sufficient wars to sustain the numbers unless natural reproduction could supplant it. This source for slaves was originally viewed as a merciful alternative to killing the prisoners of war.⁵²⁹ Those spared for slavery most often tended to be women and children, the males sometimes being slaughtered.⁵³⁰ Since wars declined and apparently manumissions increased during the empire, slavery inevitably decreased.⁵³¹

8. Slaves Viewed as Property

Although the humanity of slaves was obvious, their services and, in ancient views, their persons were purchased financially; hence ancient law treated them from the economic standpoint, as property.⁵³² Aristotle articulated the philosophic foundations of such an approach: a slaveholder cannot be said to treat a slave “unjustly” because he owns the slave as his property.⁵³³ The slave was the master’s “living tool,”⁵³⁴ just as one’s soul owns one’s body.⁵³⁵

As such, slaves were naturally compared to animals, living beings also owned by people. Seeking to portray Cyrus as benevolent, Xenophon notes that he treated his slaves as well as his animals, and they appreciated him the same way dogs appreciate their masters.⁵³⁶ Plutarch criticizes Cato for selling his slaves when they grew too old to work for him, then adds that a kind person should care even for his or her horses and dogs when they are old.⁵³⁷ Slaves were, of course, recognized as more intelligent than animals, but they shared an analogous legal situation in many respects. Aristotle employed this analogy to support slaves’ subordination.⁵³⁸ Insofar as the slave was viewed as a slave, there could be no more friendship with or justice toward a slave than toward any inanimate object.⁵³⁹ Their offspring, like those of livestock, were legally “fruits” analogous to those of other animals.⁵⁴⁰ Slave dealers concealed slaves’

528. Xen. *Hell.* 2.1.15; Diod. *Sic.* 2.18.5; 14.68.3; 20.105.1; Livy 4.29.4; 5.22.1; 26.34.3; 26.40.13; 41.11.8; Plut. *Alex.* 11.6; Suet. *Jul.* 26.3; Tac. *Hist.* 3.33; Gaius *Inst.* 1.13–17; Men. *Rhet.* 2.1–2, 377.17–19; Eustathius *Paraphrase of Dionysius Periegetes* (GGM 2:253, lines 8–10, in Sher, *Empire*, §20, p. 37). Cf. slavery by capture in Grant, “Economic Background,” 104. Although Romans enslaved members of any people (many slaves were Greeks), descendants of Libyans in Rome might be accused of servile descent (Plut. *Cic.* 26.4).

529. So Justin. *Inst.* 1.3.3. Dion. Hal. *Ant. rom.* 4.24.2 insisted that this method of acquiring slaves revealed Romans’ justice.

530. E.g., Dion. Hal. *Ant. rom.* 10.26.3; Diod. *Sic.* 17.46.4; Vitruv. *Arch.* 1.1.5; Paus. 3.23.4; Plut. *Alc.* 16.4–5; Hdn. 3.9.11.

531. Koester, *Introduction*, 1:59. Scheidel, “Quantifying,” doubts that manumissions increased and thinks natural reproduction the leading source of slaves; Harris, “Demography,” demurs, emphasizing instead such factors as the enslavement of foundlings. Noting images of captives, Bradley, “Captives,” contends that war provided for slaves in the empire more often than many suppose.

532. E.g., Buckland, *Slavery*, 10–38; Lyall, *Slaves*, 35–37; long recognized by commentators, e.g., Lightfoot, *Colossians*, 311, 321–22. On slaves as people and property under Roman law more briefly, see, e.g., Buckland, *Roman Law*, 62–65. For mainly modern examples of chattel slavery, from a sociological approach, see van den Berghe, “Institution.”

533. Arist. *N.E.* 5.6, 8–9, in Kelly, *Peter*, 116.

534. Arist. *E.E.* 7.9.2, 1241b; *Pol.* 1.2.3–6, 1253b–1254a; *N.E.* 8.11.6, 1161b.

535. Arist. *E.E.* 7.9.2, 1241b; *Pol.* 1.1.4, 1252a; 1.2.10, 1254a. They were also united like body and soul (*Pol.* 1.2.21, 1255b).

536. Xen. *Cyr.* 8.1.44; 8.2.4.

537. Plut. *M. Cato* 5.1–6 (the comment about animals appears in 5.2).

538. Arist. *Pol.* 1.2.8–14, 1254a–1254b; slaves’ utility differed “little from that of animals” (1.2.14 [LCL, 21:23]).

539. Arist. *N.E.* 8.11.6–7, 1161b. Like animals, slaves lacked their own direction in life (*Pol.* 3.5.10, 1280a); like animals, but unlike free persons, slaves were also built by nature for manual labor (1.2.14, 1254b).

540. Gardner, *Women*, 209–13.

flaws just as horse sellers did with their merchandise.⁵⁴¹ Even some rabbis prohibited funeral orations over or condolences for slaves, comparing them to animals, for whom one would offer no condolences.⁵⁴²

This ideology expressed itself in a variety of legal and economic ways. Slaves could be sold;⁵⁴³ some were children.⁵⁴⁴ In the Black Sea region, Greek slave traders calculated slaves' financial worth in barrels of wine.⁵⁴⁵ Slaves would be divided (and hence separated) as part of a deceased's estate.⁵⁴⁶ Slaveholders had to pay taxes on slaves as on other kinds of property.⁵⁴⁷ They could be liable for their slaves' behavior.⁵⁴⁸ Failure to register slaves in a census could lead to the confiscation of one's slaves.⁵⁴⁹ When masters in Egypt tried to export slaves without knowing proper tax regulations, the slaves were to be sold by the state;⁵⁵⁰ matters were more severe if one knowingly violated the regulations.⁵⁵¹ Although one was free to beat one's own slaves (see discussion below), beating another's was offensive.⁵⁵²

Although this analogy to animals was used for legal and economic purposes, in principle it left masters legally free to abuse slaves (see discussion of abuse below); if a slaveholder did not beat, torture, or otherwise abuse slaves, it was not because the law kept him or her from doing so.⁵⁵³ The Mishnah agrees: one could do what one wished with one's slave, because the slave was one's chattel, one's property.⁵⁵⁴ Slavery's financial component inevitably affected even personal perceptions. One may note Pliny's offhanded comment about his reader's illness: it would be disappointing if Encolpius could no longer read, since this was the reason for which he was purchased.⁵⁵⁵

Slaves normally held a lower status and social "value" than they would have had if they had been free.⁵⁵⁶ Slaves have the same illnesses as free persons, Pliny notes, but it is obvious which group receives kinder treatment from physicians.⁵⁵⁷ Servants were not normally friends with whom one shared one's most intimate confidences;⁵⁵⁸ indeed, slaves were often contrasted with friends.⁵⁵⁹ Slaves had to live with their holders' decisions; they could offer good advice, but they could not compel their slaveholders to accept it.⁵⁶⁰ Most of Galen's slaves in Rome died from a plague (*Grief 1*),

541. Sen. *Y. Ep. Lucil.* 80.9. But Seneca himself complains about treating slaves like animals (47.5).

542. Rabbi Eliezer in *y. Ber.* 2:7; cf. similarly R. Eliezer in *b. Ber.* 16b, bar.

554. *So m. Git.* 1:6; cf. *Exod* 21:21, though the interpretation is debated (cf. the analogy to free persons in 21:18–19. On the tension between slaves as persons and chattel, see Hezser, *Slavery*, 55–68).

555. Pliny *Ep.* 8.1.1.

556. E.g., in Massilia, the corpses of free people were carried to burial in one coffin, and slaves in another (*Val. Max.* 2.6.7d).

557. Pliny *Ep.* 8.24.5.

558. E.g., Theophr. *Char.* 4.2; Pliny *Ep.* 1.12.7; John 15:15; Keener, *John*, 1010; slaves also were not apt to confide in their holders (Mitchell, "Friends by Name," 259, citing *Cic. Amic.* 6.22; *Arist. N.E.* 8.11.6, 1161a).

559. E.g., *Xen. Cyr.* 1.6.45; *Arist. N.E.* 8.11.6–7, 1161b; *Sall. Jug.* 102.6–7; *Philo Migr.* 45; *Sobr.* 55; see Keener, *John*, 1013–14.

560. Aristoph. *Plut.* 1–5. A Jewish sage, by contrast, advises accepting a slave's wise counsel (*Ps.-Phoc.* 227).

but he considered far worse the recent loss of his possessions (*Grief 2*), especially his research (12b, 31–36).⁵⁶¹

The exploitation of slaves showed its worst side in the slave trade itself.⁵⁶² Dehumanizing indignities on the slave market included being presented naked and bearing placards identifying one's marketable features.⁵⁶³ In principle, such slave trade could include the illegal⁵⁶⁴ kidnapping of children⁵⁶⁵ or others,⁵⁶⁶ but mostly, in this period, it was a matter of trade in existing slaves. Roman aristocrats, however, worked with slave dealers, and contempt for this occupation on the basis of concern for slaves is not well attested before Augustine.⁵⁶⁷

9. Denigrating Slaves

Free persons often held negative stereotypes of slaves. Most thought it degrading to eat with their slaves.⁵⁶⁸ Aristocrats often despised freedpersons' servile origins; thus the Roman senate briefly debated requiring freedpersons to wear a special identifying uniform to expose their "derelictions."⁵⁶⁹ Some rabbis added that one should praise God for not making one a slave, which was baser than being a woman.⁵⁷⁰

A slave's nature was considered base, and free people of dignity were to avoid having a servile nature.⁵⁷¹ Cicero lumps slaves with mad persons and exiles.⁵⁷² In numerous texts, "slave" (often ἀνδράποδον) functioned as an insult.⁵⁷³ Portraying free persons as if being auctioned on a slave market was insulting to them;⁵⁷⁴ treating people as stupid is also treating them as slaves.⁵⁷⁵ One who acted as a slave to gain can be beaten with the thirty-nine lashes; this would be disgraceful for a free person but is appropriate since the person acted as a slave.⁵⁷⁶ Attributing slave birth or character to free persons

561. Nevertheless, he says that he would have counted a tyrant's abuse of one of his friends as worse than any of this (*Grief 72a*).

562. On abuses by slave dealers, see Bradley, *Slaves*, 114–16.

563. *Ibid.*, 115; on nakedness in slave markets, see Jensen, "Nudity," 299.

564. E.g., Xen. *Mem.* 1.2.62 (prescribing death, as also in Exod 21:16; Hamm. 14); Lucian *Phil. Sale* 7.

565. Terence *Eun.* 108–9; cf. Scroggs, *Homosexuality*, 120; many would be sexually exploited (cf. Suet. *Dom.* 7.1). Technically, however, theft of a slave was not kidnapping (Robinson, *Criminal Law*, 33); dealing with fugitive slaves, in contrast to kidnapping, remained a minor offense under Roman law (34). One who colluded with a free person entering slavery to secure part of the price of the sale could be enslaved (Buckland, *Slavery*, 71).

566. E.g., Iambl. *V.P.* 3.14; Goodman, *State*, 38; Gagnon, *Homosexual Practice*, 333–34; for other kinds of kidnapping, see, e.g., Xen. *Anab.* 6.1.1.

567. Bodel, "Caveat emptor" (arguing that outrage at the enslavement of free persons generated even that protest). But for the wickedness of kidnapping, cf., e.g., Dio Chrys. *Or.* 69.9; 1 Tim 1:10.

568. Sen. *Y. Ep. Lucil.* 47.2–3; cf. Appian *Hist. rom.* 3.2; the atypical approach toward freedpersons in Pliny *Ep.* 2.6.3–5.

569. MacMullen, *Social Relations*, 104–5.

570. So *b. Menah.* 43b–44a, bar. Freed slaves stood low on the social pyramid in various texts (*Num. Rab.* 6:1; Jeremias, *Jerusalem*, 334–37).

571. Philost. *Vit. Apoll.* 6.35; cf. Dio Cass. 8.36.3. On slaves' distinctive nature, see Arist. *Pol.* 1.1.4, 1252b; 1.2.7, 1254a; they differed not only in body but also in soul (1.2.14–15, 1254b).

572. Cic. *Acad.* 2.47.144.

573. E.g., Demosth. *Lept.* 132; Epict. *Diatr.* 1.6.30; 1.9.20; 1.12.24; 1.13.3; 1.24.17; 1.29.16; 2.7.13; 2.13.18; 3.24.74; Diog. Laert. 6.2.33, 43; probably Plut. *Virt.* 2, *Mor.* 100E; slave ancestry in *Vit. Aes.* 126, 130, 140. Also Jeremias, *Jerusalem*, 351, citing a baraita in *b. Qidd.* 28a. To call one a "son of a slave" was to imply one's illegitimate birth (Jos. *Ant.* 13.292).

574. Lucian *Fisherman* 4.

575. Lucian *Fisherman* 5. Iambl. *V.P.* 8.44 suggests that education often distinguishes free persons from slaves. Yet we know that in practice slaves were often highly educated.

576. Jos. *Ant.* 4.238.

was a conventional insult.⁵⁷⁷ In earlier Rome, a plebeian complained that patricians were treating the plebeians as if they were merely slaves or freedpeople.⁵⁷⁸ Their lives and character are often cheap in novels.⁵⁷⁹

Somehow people of noble birth were supposed to be obvious by appearance,⁵⁸⁰ just as one could discern slaves by their servile appearance;⁵⁸¹ sometimes these are contrasted explicitly.⁵⁸² Free persons could not tolerate being treated as slaves,⁵⁸³ especially if they were of noble birth.⁵⁸⁴ Aristotle had claimed that Greeks, unlike other peoples, were unfit for slavery;⁵⁸⁵ by the first century, many slaves were Greek. Likewise, some Romans claimed that unlike other peoples, they could not endure slavery.⁵⁸⁶ Josephus also claimed, despite recent history, that it was inappropriate for Israelites, whom God had exalted over the nations, to take the roles of slaves.⁵⁸⁷

Because extant literature generally derives from the slaveholding class, it portrays slaves as base;⁵⁸⁸ slaves were associated with a variety of moral faults.⁵⁸⁹ Slaves were thought to be generally cowardly.⁵⁹⁰ An adulteress would be humiliated before free persons but not before slaves.⁵⁹¹ When Socrates claims that evil is characteristic of slaves, and virtue of free persons, his interlocutor agrees that free persons should avoid slavishness.⁵⁹² In practice, some were viewed as worse than others; the “bad servant” was despised.⁵⁹³

Slaveholders in various cultures have sometimes viewed slaves as lazy, perhaps because slaveholders often have more incentive to want work to be done than slaves have to do it.⁵⁹⁴ Thus one person complained about how much his slave ate and slept.⁵⁹⁵

577. Demosth. *Lept.* 132; Mart. *Epig.* 1.81; Libanius *Invective* 4.2; cf. Vell. Patern. 2.73.1; 2.91.3; applicable to the condition of parasites in Quint. *Decl.* 252.12; 298.9–11.

578. Livy 4.3.7 (this was before freedpersons began achieving high status).

579. E.g., Xen. *Eph. Anithia* 1.14 (unnecessary for the plot, most die; one's death, at least, serves the literary function of pathos). For slave girls specifically, “King Cheops and the Magicians” 12.8–28 (in Simpson, *Literature of Egypt*, 23–24); Heliod. *Eth.* 2.11 (exulting over an immoral slave girl's death; but she had acted partly in fear for her life); and worst of all, Philost. *Hrk.* 56.6–10.

580. E.g., Hom. *Od.* 4.63–64; 24.253–55; Char. *Chaer.* 2.1.5; 2.2.3; 2.3.10; *Apoll. K. Tyre* 31. Noble lineage could often remedy the disgrace of slavery; see, e.g., Byron, “Lineage.”

581. E.g., Hom. *Od.* 24.252–53.

582. E.g., Hom. *Od.* 24.252–55; Arrian *Alex.* 5.19.1; Char. *Chaer.* 1.10.7; 2.1.5; *Test. Jos.* 11.2–3.

583. Dion. Hal. *Ant. rom.* 19.9.4; Philo *Rewards* 137; *Good Person* 36.

584. Char. *Chaer.* 1.11.3.

585. Arist. *Pol.* 1.1.4, 1252b; 1.2.18, 1255a; cf. Arist. *Pol.* 3.9.3, 1285a; Eurip. *Iph. Aul.* 1400–1401. Free people were not built for manual labor, Aristotle opined, but slaves, like animals, were (*Pol.* 1.2.14, 1254b).

586. Cic. *Phil.* 6.7.19.

587. Jos. *Ant.* 8.161.

588. Bradley, *Slaves*, 26–30. Plautus created the comic use of mischievous or base slaves (not borrowed from Greek comedy, 28–29). Even Seneca thought that virtue was rarely found in slaves, though he considered them equals as humans (Seventer, *Seneca*, 185–89).

589. E.g., brutality in Pliny *Ep.* 3.14.5; runaway slaves could be identified by their extravagant use of money in Char. *Chaer.* 4.5.5.

590. Ach. *Tat.* 7.10.5.

591. *M. Soṭah* 1:6, probably implying their lewdness. Male slaves loved robbery, and female slaves were vulnerable to immorality (*m. 'Ab.* 2:7; cf. also Moore, *Judaism*, 2:137).

592. Plato *Alcib.* 1.135C.

593. *Sent. Syr. Men.* 154–67.

594. Cf. Toner, *Culture*, 165 (offering an example from *Querolus* 74, an early fifth-century comedy); he also notes (28) from the same source the stereotype that slaves were all apt to steal and were undependable. Similarly, elite sources worried that an estate left to slaves might yield nothing to the owners (Philost. *Hrk.* 4.6); slaves would lose fear of a master who proved benevolent (Pliny *Ep.* 1.4.4, possibly joking but playing on stereotypes). Sometimes, however, servants were commended for diligence; cf. Alciph. *Farm.* 23 (Lenaeus to Corydon), 3.26; Matt 25:21 (only one as lazy, in 25:26). In fact, it was slaveholders whom slavery made lazy (with Barrow, *Slavery*, 25–26).

595. Alciph. *Farm.* 36 (Eudicus to Pasion), 3.38.

Slaves did not want to work if masters were not there to direct them.⁵⁹⁶ Diogenes reproved a master angry with his slave: you ruined him by allowing excessive idleness, which ruins anyone.⁵⁹⁷ One sage advised sufficient food, work, and discipline for a slave (Sir 33:25; cf. 33:28, 30); without sufficient work to keep him busy, he would want freedom (33:26) or find mischief in his idleness (33:29). Thus some later rabbis said that slaves wanted ten times as much sleep as anyone else.⁵⁹⁸

Slaves were thought guilty of flattery⁵⁹⁹—no surprise since this was demanded of them.⁶⁰⁰ Slaves were often accused of deceptiveness,⁶⁰¹ sometimes of recommending themselves,⁶⁰² and of much gossip.⁶⁰³ Thus their testimony might be challenged,⁶⁰⁴ and prudent persons were to confide nothing to slaves.⁶⁰⁵ Josephus rejected the testimony of slaves because of their base character,⁶⁰⁶ and the rabbis were not much more appreciative of slaves' testimony.⁶⁰⁷ For negative figurative uses of slavery (politically and morally), see comment on Acts 15:10.

10. Various Abuses of Slaves

A later section of this excursus addresses the sexual abuse of slaves and the separation of families; here are surveyed some other forms of abuse.⁶⁰⁸ Luke knew that slaves could be abused by wicked masters (cf. Luke 12:45, using the same term παιδίσκη). One fictitious slave lamented that if a slave died, her life was too difficult anyway.⁶⁰⁹

Cato overworked slaves, then sold them when they were old and tired instead of taking care of them;⁶¹⁰ fearing their unity, he also kept slaves divided against one another.⁶¹¹ Hadrian jabbed out the eye of a slave; others struck their slaves' teeth so

596. Hom. *Od.* 17.320–21; the passage goes on to opine that people lose half their worth when they become slaves (17.322–23).

597. Dio Chrys. *Or.* 10.6–7.

598. So *b. Qidd.* 49b.

599. E.g., Ael. Arist. *Def. Or.* 309, §100D. By contrast, slaves were also thought to be insulting to their masters (Sen. *Y. Dial.* 2.11.3; when more free to do so in Jos. *Ant.* 19.14).

600. With MacMullen, *Social Relations*, 116.

601. Terence *Self-T.* 668–78; *Andr.* 495; Dio Chrys. *Or.* 1.26; Plut. *Educ.* 14, *Mor.* 11C (who does exempt “decent” slaves); Char. *Chær.* 2.10.7; cf. the concern in Pliny *Ep.* 1.21.2. In Philost. *Vit. soph.* 1.21.517, the slave uses deception to have the master's son disinherited and supplant him.

602. Char. *Chær.* 6.5.5.

603. Lucian *Lucius* 5; Barrow, *Slavery*, 27. The greater danger would actually be slandering a slave to his holder, against which Jewish sages warned (Prov 30:10; Ps.-Phoc. 226). The prejudice might be greater for a woman slave (cf. Tac. *Dial.* 29), in view of prejudices that women were more prone to deceive (Fronto *Ep. graec.* 2.3) or apt to gossip (Sent. *Syr. Men.* 118–21, 336–39; *b. Qidd.* 49b; *Gen. Rab.* 45:5; 70:11; 80:5; perhaps *Lev. Rab.* 26:2; for widows in *y. Soṭah* 3:4, §12; Miriam in *'Abot R. Nat.* 9A; *Deut. Rab.* 6:11); they were more talkative (Hom. *Il.* 20.251–55; Livy 6.34.6; Lucian *Prof. P.S.* 23; *Deut. Rab.* 6:11) and better at reviling (Lucian *Prof. P.S.* 23), though Greeks associated talkativeness (e.g., Theophr. *Char.* 3; 7; 8) and gossip (Livy 44.34.4–5) with anyone.

604. Lysias *Or.* 5.2–3, §§102–3; Hermog. *Issues* 45.10–20. In Apul. *Metam.* 10.7, a slave lies under oath (and, in 10.10, even under torture). But perjury also applied to slaves (Prop. *Eleg.* 3.6.20).

605. E.g., Theophr. *Char.* 4.2; Pliny *Ep.* 1.12.7; cf. John 15:15; Keener, *John*, 1010; comments above.

606. Jos. *Ant.* 4.219.

607. Stern, “Aspects,” 628–29.

608. For examples of abuse, see further Bradley, “Traffic”; idem, *Slaves*, 113–37; Cary and Haarhoff, *Life*, 131; abundant examples in Barrow, *Slavery*, 30–31.

609. Eurip. *Andr.* 88–90. Another character likewise complains about the inability of slaves to resist injustice (Eurip. *Hec.* 332–33).

610. Plut. *M. Cato* 5.1.

611. Plut. *M. Cato* 21.4.

hard the slaveholders bruised their hands.⁶¹² Slaves could be branded,⁶¹³ a practice apparently common in Italy under the republic⁶¹⁴ though not standard in this period⁶¹⁵ except among the “basest” of slaves,⁶¹⁶ sometimes as a punishment.⁶¹⁷ A Jewish sage advised against branding, as an insult to the slave’s dignity.⁶¹⁸

Slaves could be beaten,⁶¹⁹ even in Jewish circles;⁶²⁰ they could, for example, be harshly beaten with sticks.⁶²¹ Public disciplines were more severe for slaves than for free persons.⁶²² Cicero contrasts beating a parent, which is terrible, with beating a slave.⁶²³ Quintilian argues against beating free children—a stance more progressive than many or most of his contemporaries—but by noting that beatings were fit only for slaves.⁶²⁴ Slaves could, naturally, take such abuse very badly.⁶²⁵

Nevertheless, excess savagery sometimes drew the scorn—albeit not generally the intervention—of others.⁶²⁶ Juvenal complains about a merciless mistress of the house who had slaves beaten for minor failings when the householder was not there to protect them.⁶²⁷ If she was in a hurry, she might tear her slave hairdresser’s hair and rip

612. Toner, *Culture*, 70.

613. Cf. Herodas *Mimes* 5.28; Deissmann, *Studies*, 349 (also noting soldiers); Lampe, *Seal*, 9; Aune, *Revelation*, 456–59; in the ancient Near East, see Mendelsohn, “Slavery,” 80–82. But it was apparently a special indignity rather than a norm (Plut. *Nic.* 29.1). The Getae did it to their slaves (Artem. *Oneir.* 1.8).

614. Diod. *Sic.* 34/35.2.32.

615. It did happen, much to slaves’ displeasure (Mart. *Epig.* 3.21). But Caligula did it even to persons of rank (Suet. *Calig.* 27.3); for hypothetically branding adulterers, see Hermog. *Issues* 90.2–3; for prisoners, Lampe, *Seal*, 10. Cultic or other tattooing was often associated with Egyptians, Sarmatians, and distant peoples (3 Macc 2:28–29; Sext. *Emp. Pyr.* 1.148; 3.202; Artem. *Oneir.* 1.8; Lucian *Syr. G.* 59; Jones, “*Stigma*”). Against some claims (e.g., Angus, *Mystery-Religions*, 97), branding was apparently not practiced in Mithraism (Beskow, “Branding,” esp. 499–500).

616. See Gaius *Inst.* 1.13 (classed with those chained, tortured, or sent to the arena).

617. For “delinquent slaves,” Aune, *Revelation*, 458, cites Aristoph. *Birds* 760–61; *Frogs* 1508–14; Menander *Samia* 321–24; Petron. *Sat.* 103.2; Diog. Laert. 4.46; cf. Jones, “*Stigma*.”

618. Ps.-Phoc. 225. (*OTP* 2:582 n. h points out that later rabbis did allow it.)

619. Often noted, e.g., Cary and Haarhoff, *Life*, 131; Boer, *Morality*, 225; Bradley, *Slaves*, 119–20; Stambaugh, *City*, 96 (citing Plaut. *Men.* 966–77); deSilva, *Honor*, 191; see, e.g., Tac. *Ann.* 16.19 (Petronius’s acts toward slaves before his death); Libanius *Anecdote* 2.9 (“beating and choking and torturing”). In ancient Egypt, e.g., “King Cheops and the Magicians” 12.8–28 (in Simpson, *Literature of Egypt*, 23–24); in a later novel about ancient Egypt, *Test. Jos.* 13.3; in Mesopotamia, *Ahiq.* 3.2; Syriac *Ahiq.* 3.2; 4.14. It is difficult to quantify the average frequency of beatings, but one antebellum Louisiana plantation averaged 0.7 whippings per slave annually, with all those going to about half the slaves (Fogel and Engerman, *Time*, 145–46), assuming that the records are complete.

620. Bloodying the back of a bad slave was appropriate (Sir 42:5; cf. 33:25; Prov 29:19); note the analogy in *Deut. Rab.* 3:2; Moore, *Judaism*, 2:137, says that flogging was common. Excess discipline, however, warranted punishment (Exod 21:20–21; cf. 21:18–19 for free persons).

621. Apollod. *Bib.* 2.8.2. In one novel, a wicked pirate leader has a young slave flogged with whips and fire, causing him to lose much blood (Xen. *Eph. Anthia* 2.6).

622. Earlier Athenians gave them fifty stripes for loving free boys (Aeschines *Tim.* 139); Plato recommends a hundred stripes for a slave who fails to protect a parent beaten by a child, but manumission if the slave does help (*Laws* 9.881C).

623. Cic. *Fin.* 4.27.76.

624. Quint. *Inst.* 1.3.13–14 (also observing that the most recalcitrant slaves become only more hardened by blows). For beating of children, see, e.g., Sir 30:1–2, 12 (esp. with Pilch, “Beat”); *Ahiq.* 81–82 (sayings 3–4); *Pesiq. Rab Kah.* 15.4; Aristoph. *Clouds* 1409–10; Xen. *Lac.* 6.1–2; Columbanus, (probably) Catonian lines, line 52; Quint. *Curt.* 8.8.3; Ael. *Arist. Def. Or.* 380, §127; Libanius *Anecdote* 2.9–10; *Invective* 7.8; discussion in Townsend, “Education,” 145; Safrai, “Home,” 770–71; for opposition to beating them, see Plut. *M. Cato* 20.2; Ps.-Phoc. 150 (cf. 207); for limits, *t. B. Qam.* 9:11.

625. A slave might hang himself after a flogging, but this is an unusual and unexpected response (Theophr. *Char.* 12.12).

626. Cf. Seneca’s complaint (*De Ira* 3.32) about slaveholders’ eagerness to flog or break slaves’ legs (cited in Toner, *Culture*, 70). In the empire, laws did arise governing excessive cruelty (Jeffers, *World*, 228). Beating others’ slaves had long been offensive (Demosth. *Con.* 4), but perhaps only in the sense of abusing another’s property.

627. *Juv. Sat.* 6.474–85; Juvenal certainly exaggerates and also targets matrons for dishonor, but his critique presumably reflects knowledge that abuse was occurring. Such sadistic abuses are documented outside ancient satire in modern eyewitness reports of slavery (see Sterling, *Sisters*, 10).

off her clothing;⁶²⁸ another hairdresser was struck to the ground for not securing one pin in the matron's locks.⁶²⁹ A cook might be beaten for a poor dinner.⁶³⁰ Disfiguring slaves by beating them was also excessively harsh.⁶³¹

Some recommended that punishment be kept moderate;⁶³² the philosopher Seneca approved of lashing only with the tongue, not with a whip,⁶³³ advising that slaveholders should earn loving respect, not fear.⁶³⁴ He opined that particularly wise people, when angry, might refrain from discipline,⁶³⁵ or entrust discipline to another,⁶³⁶ rather than risk disciplining excessively.

Not all valued moderation. Whenever Cato found a slave guilty of a capital offense, he executed him in front of the other servants;⁶³⁷ instilling fear in the servants was considered a useful means of maintaining control.⁶³⁸ Spartans held the Helots, as a group, in servitude to Sparta;⁶³⁹ on one occasion, the Spartans promised to reward with freedom those who thought themselves the best fighters; once two thousand volunteers came forward, the Spartans executed them, fearing lest they genuinely want freedom.⁶⁴⁰

11. Torture

Torture for information appears regularly in our sources, though it should be understood that, in contrast to beatings, most individual slaves would never have faced torture (other than the aforementioned beatings themselves).⁶⁴¹ Slaves had long been tortured to procure information for court testimony,⁶⁴² and even protagonists in novels were portrayed as using it.⁶⁴³ This was practiced on slave women as well as men⁶⁴⁴ and

628. *Juv. Sat.* 6.490–91.

629. *Mart. Epig.* 2.66.1–8. Statues from the period depict numerous curls; to have missed one thus stands for a minor offense at best.

630. *Mart. Epig.* 8.23; Cato did this only if the food was not good for a guest (*Plut. M. Cato* 21.3). Presumably the trouble in *Gen* 40:2 similarly involved Pharaoh's indigestion.

631. *Ach. Tat.* 5.17.8–9.

632. *Philod. Household* 30.18–31.2 (in Lincoln, *Ephesians*, 415). Such advice did not necessarily define moderation.

633. *Sen. Y. Ep. Lucil.* 47.19.

634. *Sen. Y. Ep. Lucil.* 47.18.

635. *Val. Max.* 4.1.ext. 1.

636. *Val. Max.* 4.1.ext. 2.

637. *Plut. M. Cato* 21.4.

638. *Bradley, Slaves*, 113–14.

639. Still known in imperial times, e.g., *Arrian Ind.* 10.9. On Helots, see, e.g., Cartledge, "Helots."

640. *Thucyd.* 4.80.3–4. When the Helots revolted, the Plataeans helped the Spartans subdue them (*Thucyd.* 3.54.5); even Athenians recognized them as a danger for the Spartans comparable to the serfs of Thessaly (*Arist. Pol.* 2.6.2, 1269a).

641. Torture apparently lowered a slave's market value (*Gaius Inst.* 1.13). A holder could nevertheless torture a slave even apart from the desire for testimony (*Quint. Decl.* 328.12). *Sen. E. Controv.* 10.5.intro. portrays someone in classical Athens purchasing a slave to torture to death for aesthetic reasons, which is considered morally repugnant (but not illegal at the time). Those tortured were unwashed (*Libanius Descr.* 19.4), and torture could include "fire" and "lash" (*Quint. Decl.* 272.10); occasionally it proved fatal (hypothetical cases in *Sen. E. Controv.* 8.3.intro.; *Quint. Decl.* 328 intro.; 338 intro).

642. E.g., *Demosth. Pant.* 27; *Olymp.* 18–19; *Tim.* 55–58; *Con.* 27; *Rhet. Her.* 2.7.10; *Tac. Ann.* 3.22, 67; 4.11, 29; 6.47; *Suet. Galba* 10.5; *Quint. Decl.* 269 intro; *Apul. Metam.* 10.28; *Hdn.* 4.5.4. Scholars often comment on this (e.g., Ramsay, *Church in Empire*, 205; cf. Robinson, *Criminal Law*, 64–66).

643. *Char. Chaer.* 1.5.1.

644. E.g., *Sen. E. Controv.* 6.6; *Pliny Ep.* 10.96.8; *Tac. Ann.* 14.60; *Lucian Demosth.* 49; *Char. Chaer.* 1.5.1; cf. Osiek, "Female Slaves," 262; Osiek and MacDonald, *Place*, 102. In the hypothetical case in *Sen. E. Controv.* 8.3.intro., the slave woman is tortured to death but found innocent. The nurse (possibly a slave) is also tortured to death in the hypothetical case in *Quint. Decl.* 338 intro.

even used on freedwomen.⁶⁴⁵ (In this period, nonslaves were not normally tortured, but apparently even they experienced this abuse on occasion.)⁶⁴⁶

Some ancients defended torture of slaves as a means of securing reliable information,⁶⁴⁷ whereas others (or the same rhetor in a different case) opposed it.⁶⁴⁸ The basic rhetorical rule of thumb was that those who found the results of torture useful to their case should defend the value of information so obtained; those who did not should argue against it.⁶⁴⁹ Slaveholders who refused to hand over slaves for torture could be accused of having something to hide;⁶⁵⁰ others freely offered their slaves for torture, implying that their opponents' denial of the value of such evidence was suspicious.⁶⁵¹

Torture sometimes compelled slaves to fabricate false charges.⁶⁵² Thus one slave under torture confessed that he had killed another person's slave; after his execution, the supposedly murdered man was discovered alive.⁶⁵³ Another slave denied a crime despite being tortured six times; he was crucified anyway.⁶⁵⁴ Another was tortured eight times to make him accuse his master, but he did not do so.⁶⁵⁵ Augustus and Hadrian limited the use of torture on slaves, suggesting that it should be employed only when other means to learn the truth had failed.⁶⁵⁶

Since women slaves could be interrogated by torture, did Rhoda have much to fear in this situation? Despite Agrippa's years in Rome, it seems doubtful that Rhoda

645. Suet. *Calig.* 16.4; Tac. *Ann.* 15.57. A free woman is in view in Jos. *Ant.* 19.34; one may be in view in Sen. E. *Controv.* 9.6.intro.

646. See Livy 32.38.8; Sen. E. *Controv.* 9.6.intro. (probably); Tac. *Ann.* 4.45 (a barbarian); 11.22; 14.24 (a barbarian aristocrat); 16.20 (a freedman); Apul. *Metam.* 3.8 (but it turns out to be an idle threat); *Pesiq. Rab Kah.* 15:7; earlier, Quint. Curt. 6.8.15; 6.10.10; 6.11.13–14, 31; 7.2.34; 8.8.20–21; Arrian *Alex.* 6.29.11. Those who tortured free persons were typically tyrants (Dio Chrys. *Or.* 47.24), such as Gaius Caligula (Jos. *Ant.* 19.34) or Domitian (who allegedly tortured free persons with fire on their genitals; Suet. *Dom.* 10.5). It was also applicable to criminals (Lucian *Tox.* 28) or during investigations of *majestas* (Gizewski, "Maiestas," 187; Schiemann, "Torture," 795); perhaps also homicide (Quint. *Decl.* 324 intro) and poison (Quint. *Decl.* 381 intro) investigations. For slaves, rather than free, being subject to torture, see, e.g., Quint. *Decl.* 312.9. Rank may have been more critical than free status in this respect (Rowe, *World*, 67–68).

647. Isaeus frg. 2, *Hagnoth.* 2; Lysias *Or.* 1.16 (*On the Murder of Eratosthenes*). Some claimed that it was the best test (Isaeus *Ciron* 12), the surest evidence (Demosth. *Neaer.* 122).

648. Cic. *Sull.* 28.78 argues *against* examining slaves by torture, since pain directed by the inquisitor determines the outcome; thus the hearers should test instead this man's life of character rather than the slaves. It was illegal to accept testimony from a slave against his or her slaveholder, even with torture (Cic. *Deiot.* 1.3). A slave might well guard a slaveholder's secret under torture anyway (Val. Max. 6.8.1), and opponents might accuse those who continued denying under torture of simply lying anyway (Quint. *Decl.* 269.5).

649. Arist. *Rhet.* 1.15.26, 1376b; *Rhet. Alex.* 16.1432a.12–33; Quint. *Inst.* 5.4.1; against torture's value, see, e.g., Quint. *Decl.* 353.4; 379.5.

650. Isaeus *Ciron* 10–11; Lysias *Or.* 4.10–12, §101; Cic. *Rosc. Amer.* 28.77–78; 41.120. One way to keep slaves from revealing something under torture was to emancipate them, thereby preventing them (normally) from being subject to torture (Cic. *Mil.* 21.57).

651. Lysias *Or.* 7.34, §111; Aeschines *Embassy* 126–28; Tac. *Ann.* 3.14; Quint. *Decl.* 269 intro.

652. E.g., a minority of slaves in Tac. *Ann.* 14.60, 62. The report of Scipio's tortured slaves (Appian *Bell. civ.* 1.3.20) was quite improbable (he had died without a mark during the night). One man under torture deceptively implicated a tyrant's loyal aide, thereby depriving the tyrant of a loyal friend (Val. Max. 3.3.ext. 5). A torturer could torment a victim until she gave the response he desired (as in Quint. *Decl.* 338 intro; 338.10, 16, 23–26); thus respective parties' slave stewards in a case could each claim the opposite of their slaveholders (Quint. *Decl.* 353 intro; cf. 353.4), and one might accept only the convenient part of the tortured person's testimony (Quint. *Decl.* 381 intro; 381.1). For the view that slaves could lie under torture, see, e.g., Apul. *Metam.* 10.10.

653. Val. Max. 8.4.1.

654. Val. Max. 8.4.2. Opponents might accuse those who continued denying under torture of simply lying anyway (Quint. *Decl.* 269.5).

655. Val. Max. 8.4.3. Roman aristocrats note with distaste slaves used to inform on their holders (e.g., Tac. *Ann.* 16.18).

656. *Dig.* 48.18.1 (Sherk, *Empire*, §178C, pp. 236–37). Cf. also, e.g., Llewelyn, *Documents*, 7:176–77, §8. Arguments from probability had long counted more strongly, in any case (*Rhet. Alex.* 7, 1428a.19–23).

would run much risk of being interrogated by torture unless clear evidence suggested that she or members of her household were accomplices to Peter's escape. Letting Peter in would make her an accomplice, but it would also reduce the likelihood of Peter's visit becoming known. (The text is not even explicit that Peter entered [Acts 12:16–17], but this ambiguity might simply reflect Luke's conciseness.)

12. Slave Executions

Attacks by slaves to kill their masters were well known,⁶⁵⁷ and the state sought to deter them with horrific examples. If one slave murdered a master, all the slaves of the household would be executed.⁶⁵⁸ On one occasion, many people, including in the senate, opposed carrying out the measure, since most of the slaves were obviously innocent, but the stricter voices prevailed.⁶⁵⁹ One pseudoprophet allegedly told a man to kill his servants for murdering his son; after they had been executed, the son returned home alive.⁶⁶⁰ Once, when it was not known how a consul had died, many argued for his freedmen's death; Pliny defended the latter's freedom, but the compromise measure won out and they were banished.⁶⁶¹

These were not the only circumstances under which slaves' lives were cheap. In earlier times, one slaveholder tortured a slave to death, and although other people did not protest, they thought ill of the slaveholder for his cruelty.⁶⁶² One betrayed his master to Sulla; Sulla rewarded him with freedom, then executed him for being an untrustworthy servant.⁶⁶³ If slaves joined a Roman legion, they were to be executed (for seeking citizenship illegally).⁶⁶⁴ When Cato found one of his slaves guilty of a serious offense, he executed him in front of the others to set an example.⁶⁶⁵ Julius Caesar was considered more merciful; when a slave tried to assassinate him, Caesar had him executed without torture.⁶⁶⁶ When someone, to spare his own life, needed to implicate some others in his crime, he named some of his servants to make the charges more believable.⁶⁶⁷

Slaves could be crucified,⁶⁶⁸ one of the cruelest and most degrading forms of death by torture (see comment on Acts 2:23). Some slaveholders were thought to dispense the punishment cavalierly, at least in satirical literature.⁶⁶⁹ In a case where the slave was merely an accomplice, the slave could be crucified whereas the noble was merely

657. E.g., Pliny *Ep.* 3.14.1. That some slaves would be interested in the slaveholder's death is not surprising (e.g., Sen. *Y. Clem.* 1.26.1; Hermog. *Issues* 56.16–18), though others would try to prevent the slaveholder's death (Tac. *Hist.* 4.59), including at the hands of other slaves (Pliny *Ep.* 3.14.3–4).

658. E.g., Tac. *Ann.* 13.32 (the law passed in 58 C.E., reinforcing earlier law); 14.42; Barrow, *Slavery*, 55–56. Under the law of 10 C.E., slaves were first tortured to see if the guilty and negligent parties could be narrowed down; failing that, all were executed; if the master died on a journey, only those with him were executed (Robinson, *Criminal Law*, 45).

659. Tac. *Ann.* 14.42–45 (61 C.E.). Many people in general did not approve of cruel executions of slaves (Dion. Hal. *Ant. rom.* 7.73.5).

660. Lucian *Alex.* 44. When a master disappeared, the servants might be suspected (Pliny *Ep.* 6.25.4).

661. Pliny *Ep.* 8.14.12, 24–25.

662. Plut. *Coriol.* 24.4 (claiming that in earlier times, people were more benevolent toward their slaves).

663. Plut. *Sulla* 10.1.

664. Pliny *Ep.* 10.29.1; 10.30.1–2.

665. Plut. *M. Cato* 21.4.

666. Suet. *Jul.* 74.1.

667. Plut. *Alc.* 21.2–4.

668. E.g., Terence *Andr.* 622–24; Sen. *Y. Clem.* 1.26.1; Hdn. 5.2.2; Llewelyn, *Documents*, 8:1–3, §1.

669. Mart. *Epig.* 2.82; Juv. *Sat.* 6.219–24; cf. Sen. *E. Controv.* 3.9 excerpts; Quint. *Decl.* 380 intro (the slaveholder decreed crucifixion for refusing to help him commit suicide).

banished.⁶⁷⁰ A slave might be falsely accused yet allowed to be crucified without further investigation because he was merely a slave.⁶⁷¹ The crucifixion of Roman citizens was humiliating because they thus died the deaths of slaves.⁶⁷² None of the circumstances described above would seem applicable to Rhoda, the potential exception being if this household were implicated in Peter's escape (which apparently did not happen).

Executions were relatively rare, but slaves often died young⁶⁷³—for example, one young woman at eighteen,⁶⁷⁴ another at nineteen,⁶⁷⁵ and another at twenty.⁶⁷⁶ Some scholars suggest that even among wives of imperial slaves and freedmen, more than half died before thirty, mostly between twenty and twenty-five.⁶⁷⁷ This information must be balanced somewhat, however, with the high mortality rate among young women in general, especially during childbearing years.⁶⁷⁸ Moreover, slaveholders had economic incentive to keep slaves healthy, which suggests that household slaves and perhaps some other slaves as well were better fed than free peasants.⁶⁷⁹

13. Slaves Understood as Human Beings

Treating slaves as property created inevitable tensions with the obvious recognition that slaves were, after all, human beings. Thus masters held the power, recognized among all peoples, over their slaves' life and death, as well as possessions.⁶⁸⁰ By the second century C.E., however, laws restricted this right in practice.⁶⁸¹

Roman law recognized slaves' humanity and distinction from normal "property."⁶⁸² Even if Roman law treated slaves as property, it recognized that, unlike other "property," slaves could achieve manumission. Further, slave women could produce children fathered by free men, and the gods viewed slaves as human.⁶⁸³ Even Aristotle recognized that slaves, though treated as property, were humans with reasoning capacities.⁶⁸⁴

Attitudes were shifting, perhaps partly because of continuing contact between slaves and slaveholders, and laws in the imperial period increasingly limited the abuse of slaves.⁶⁸⁵ Disgusted with slaveholders who left sick slaves on the island of Aesculapius to die, the emperor Claudius decreed that any such slaves who recovered were

670. Apul. *Metam.* 10.12. Likewise, an enemy spy was maimed and released, but twenty-five slaves charged with conspiring were crucified (Livy 22.33.1–2).

671. Xen. Eph. *Anthia* 4.2 (the false accusation is in 3.12). When the prefect learns the truth, however, he has the free accuser crucified instead of the slave (4.4).

672. Cic. *Verr.* 2.5.66.169; Val. Max. 2.7.12.

673. Slaves could also die older, however, such as the man who died at sixty-five, a ship's pilot (*IGRR* 1.417, in Sherk, *Empire*, §173Y, p. 230).

674. *ILS* 7420a (Sherk, *Empire*, §173E, p. 228).

675. *ILS* 5215 (Sherk, *Empire*, §172K, p. 227).

676. *ILS* 7428 (Sherk, *Empire*, §172J, p. 227).

677. Pomeroy, *Goddesses*, 194. Among U.S. slaves in the South, perhaps 40 percent died before age nineteen, though mortality rates were high among free persons as well (Fogel and Engerman, *Time*, 154).

678. Perhaps less severe than once estimated, but nevertheless substantial (Wiesehöfer, "Mortality," 215).

679. *Ibid.* (naturally excepting slaves working in the mines).

680. Gaius *Inst.* 1.52. Technically the *paterfamilias*'s power of life and death (*patria potestas*) originally extended to all members of the Roman household.

681. Gaius *Inst.* 1.53.

682. See Barrow, *Slavery*, 151–72; Buckland, *Slavery*, 73–130 (for noncommercial relations), 131–86 (for commercial relations, excepting the *peculium*, addressed below); Cary and Haarhoff, *Life*, 132.

683. Finley, *Economy*, 62.

684. Arist. *Pol.* 1.5.3, 1259b.

685. See, e.g., *Dig.* 48.8.11.2 (in Sherk, *Empire*, §178 B, p. 236); Carcopino, *Life*, 57–58; Jeffers, *World*, 227–28.

free.⁶⁸⁶ These restrictions should not be read as making the system unduly humane,⁶⁸⁷ many abuses remained, as noted above. Minimal limitations in laws left much to slaveholders' discretion; thus servants on an estate with a benevolent slaveholder might well fear the change of masters.⁶⁸⁸ But recognition of slaves' humanity, as well as concern to reduce resistance and increase productivity,⁶⁸⁹ generated rewards as incentives. Moralists might advise slaveholders to converse with slaves and so train them in intelligence.⁶⁹⁰ Some strict Jewish pietists insisted that Jewish slaveholders not sell servants to Gentiles.⁶⁹¹ Not only hostile literary sources, which may exaggerate, but inscriptions attest that manumission was a frequent event, at least in the Latin West.⁶⁹² This is quite in contrast to the slavery in the American South familiar to many modern Western readers.⁶⁹³

One of the clearest legal affirmations of a slave's humanity was the Roman institution of the *peculium*, in which a slave, in practice, owned money or property (sometimes including slaves), even though technically what the slave owned, like the slave himself or herself, belonged to the slaveholder.⁶⁹⁴ (Jewish law resembled Roman law in this matter.)⁶⁹⁵ By saving funds from the *peculium*, the slave might purchase freedom.⁶⁹⁶ Slaves could purchase and own property,⁶⁹⁷ including other slaves.⁶⁹⁸ In practice, even during the republic, Cato lent money to some of his slaves, who would then buy boys, train them for a year, and sell them at a higher price.⁶⁹⁹

Although most humane regulations and acts could have self-serving motives, it was inevitable that many human beings in close contact would bond despite the various inequities in their relationship.⁷⁰⁰ Some examples simultaneously reveal both inequity and a measure of intimacy. Thus Cicero expresses his own surprise at how upset he is with the death of his amiable slave reader; he did not think most people would expect

686. Suet. *Claud.* 25.2 (adding that slaveholders who killed them instead of abandoning them would be charged with murder).

687. See Watson, "Slave Law."

688. Cf. Apul. *Metam.* 8.15.

689. For this correct emphasis on the self-serving goals, see esp. Bradley, *Slaves*, 44–45. Some apparently humanitarian moves may not have been. Cicero preferred freeing his slaves to having them confiscated with his estate, but this way he would retain their services as freedpersons (*Fam.* 14.4.4).
