

VOLUME 2

ACTS

AN EXEGETICAL
COMMENTARY

3:1–14:28

CRAIG S. KEENER

Praise for Volume One

“Acts has now taken a new step forward . . . the starting point for all Acts scholarship from now on!”

—**Scot McKnight**, Northern Seminary

“Somewhat surprisingly, a socio-historical approach to Acts still needs to be defended and its value demonstrated. No one does this better—is more informed about ancient literature, parallels, and precedents, and more interactively and fruitfully engaged with contemporary literature and issues—than Craig Keener. For anyone wanting to appreciate how Acts ‘worked’ in its original context and to get into the text at some depth, Keener will be indispensable and ‘first off the shelf.’”

—**James D. G. Dunn**, University of Durham

“Keener takes very seriously the claim of the book of Acts to be historiography. His encyclopedic knowledge of ancient literature and his intelligent skill as an exegete make this a magisterial commentary.”

—**Richard Bauckham**, University of St. Andrews; Ridley Hall, Cambridge

“Keener’s finished commentary will dwarf other modern commentaries, if measured by the quantity of either ink spilled or of citations of Greco-Roman texts. Beyond such metrics, Keener’s magnum opus is a rich resource that will serve Acts scholars for years to come. . . . A scholar with extensive knowledge of Jewish and Greco-Roman materials, Keener brings this expertise to his commentary, introducing scores of relevant citations to subsequent scholars of Acts. . . . This volume is the result of the careful, balanced work of a senior scholar. Any serious scholar will want to have this valuable commentary ready-to-hand.”

—**Daniel L. Smith**,
Review of Biblical Literature

“To my knowledge, Keener’s four-volume project . . . is by far the largest single-author work on Acts to date. . . . Keener’s strong suit has always been

his impressive acquaintance with the literary environment of the New Testament. . . . He is also remarkably thorough in citing other scholars. . . . Anyone concerned with Acts is best advised to take account of this extensive study from a widely read and dedicated scholar.”

—**Larry Hurtado**, University of Edinburgh

“This promises to be the most comprehensive commentary on Acts to date. Keener presents a socio-historical reading of the text with meticulous precision, and his knowledge of scholarly research is impressive. The book of Acts is read as a historiographical work in which its author rewrites traditions; the documentation from ancient Jewish literature is exceptionally rich. Keener treats hermeneutical issues and the historical reliability of the text astutely and clearly. From now on, any exegesis of Acts will need to take into account this major work.”

—**Daniel Marguerat**,
University of Lausanne, Switzerland

“As one has come to expect from Keener, there is thorough knowledge and use of the best and most important secondary literature and abundant utilization of a wide range of ancient sources. This is a commentary that will continue to serve as a detailed resource for both scholars and students wishing to explore the book of Acts.”

—**Stanley E. Porter**,
McMaster Divinity College

“A work of great quality and value. . . . Keener provides numerous connections to pertinent Greco-Roman and Jewish sources, to archaeology and material evidence, and to the other writings of the New Testament, particularly the letters of Paul. . . . Keener’s prodigious work offers a closely reasoned and thoroughly documented argument for the historical worth of Acts, that is, ‘historical’ judged by the canons of history prevalent in the ancient world. This is a very valuable resource work that will surely be a point of reference for all future discussions about Acts.”

—**Donald Senior, CP**, *The Bible Today*

“Craig Keener has provided us with a rich gem of a commentary on Acts. One can use it and get a real sense of what this key work is all about.”

—**Darrell L. Bock**,
Dallas Theological Seminary

“This commentary sets Acts in its ancient social and historical setting. Keener’s wide reading of scholarly discussion is stupendous. A marvelous, impressive, and inspiring commentary!”

—**Manfred Lang**, Martin Luther
University, Halle-Wittenberg

“By almost any measure, Craig Keener’s commentary on Acts is a remarkable achievement. . . . He is thoroughly engaged with a wide range of critical studies of Acts and related writings. Keener also brings to the study of Acts a deep

and extensive acquaintance with ancient Greco-Roman and Jewish literature, and the result is a rich, detailed commentary packed with abundant and useful information. . . . I am unable to agree with many of his convictions about Acts but am compelled to admire his well-conceived and well-documented arguments and interpretations.”

—**Joseph Tyson**, *Review of Biblical Literature*

“Craig Keener’s academic commentaries are among the most important in print, because they not only summarize former scholarship but also add so many new insights from primary literature of the time.”

—**David Instone-Brewer**,
Tyndale House, Cambridge

PART 2: APOSTOLIC LEADERSHIP IN JERUSALEM (3:1–5:42) 1039

The Healing of the Paralytic and Its Aftermath (3:1–4:30) 1042

1. The Power of Jesus's Name (3:1–11)
 - a. Introductory Issues
 - b. Hour of Prayer (3:1)
 - c. The Disabled Beggar at the "Beautiful" Gate (3:2–3)

EXCURSUS: THE DISABLED, POVERTY, AND BEGGING 1050

1. The Disabled (3:2)
2. Poverty in General (3:2)
3. Urban and Judean Poverty (3:2)
4. Alms (3:2)
5. Begging (3:2–3)
 - d. Faith in Jesus's Name (3:4–7)
 - i. Inviting Attention (3:4–5)
 - ii. Without Silver or Gold (3:6)
 - iii. Jesus's Name (3:6)
 - iv. Commanding Healing (3:6)
 - v. Contrast with Gentile Attempts to Secure Divine Favor
 - vi. Strengthened Feet (3:7)
 - e. Public Attention to the Healing (3:8–10)
 - f. Running Together at Solomon's Portico (3:11)
2. Call for Israel's Repentance and Salvation (3:12–26)
 - a. Introduction
 - i. Message
 - ii. Authenticity
 - iii. Rhetoric
 - b. Not by Our Power or Devoutness (3:12)
 - c. God Glorified His Rejected Servant Jesus (3:13)

- i. The Ancestral Deity
 - ii. The Glorified Servant
 - iii. The Servant Rejected
 - iv. Pilate's Desire to Release Jesus
 - d. Disowning the Bringer of Life (3:14–15)
 - i. The Holy and Righteous One (3:14)
 - ii. Rejecting Jesus (3:14)
 - iii. Preferring a Murderer (3:14)
 - iv. The Establisher of Life (3:15)
 - e. Faith and Witness (3:15–16)
 - i. Witness (3:15–16)
 - ii. Faith in Jesus's Name (3:16)
 - f. Their Ignorance and God's Plan (3:17–18)
 - i. Ignorance as a Mitigating Factor (3:17)
 - ii. God's Plan (3:18)
 - g. Repentance Would Bring Israel's Restoration (3:19–21)
 - i. Luke's Repentance Eschatology (3:19)
 - ii. Repentance Eschatology in Early Judaism (3:19)
 - iii. Refreshing and Jesus's Return (3:20)
 - iv. Restoration Eschatology (3:21)
 - h. The One Predicted by Moses and the Prophets (3:22–24)
 - i. The Prophet like Moses (3:22)
 - ii. Punishment for Rejecting Him (3:23)
 - iii. All the Prophets Announced These Days (3:24)
 - i. Israel's Blessing through Jesus (3:25–26)
 - i. Heirs of Covenant Blessing (3:25)
 - ii. The Condition for Blessing (3:26)
3. Confronting Jerusalem's Elite (4:1–30)
 - a. Introduction
 - i. Power Conflict
 - ii. Sources and Narrative Construction

- b. Jerusalem's Elite Confront the Apostles (4:1–7)
 - i. The Elite Arrest the Apostles (4:1–3)
 - (1) Commander of the Temple Guard (4:1)
 - (2) Sadducees (4:1)
 - (3) Announcing the Resurrection in Jesus (4:2)
 - (4) Jailed Overnight (4:3)
 - ii. Church Growth despite Persecution (4:4)
 - iii. The Political Elite Confront the Apostles (4:5–7)
 - (1) Rulers, Elders, and Scribes (4:5)
 - (2) The Sanhedrin (4:5)
 - (3) Named High Priests (4:6)
 - (4) The Authorities' Challenge (4:7)
- c. Salvation in Jesus's Name (4:8–12)
 - i. Filled for Confrontation (4:8)
 - ii. Arraigned for Benefaction (4:9)
 - iii. Charging the Real Criminals (4:10)
 - iv. The Rejected Cornerstone (4:11)
 - v. Salvation in Jesus's Name (4:12)
- d. Confronting the Authorities (4:13–22)
 - i. The Apostles' Boldness (4:13)
 - ii. "Uneducated" (4:13)
 - iii. Private Discussion (4:14–17)
 - iv. Refusing to Be Silent (4:18–22)
- e. Prayer for More Boldness (4:23–30)
 - i. The Gathering and Address (4:23–24)
 - ii. The Enemies in Psalm 2 (4:25–26)
 - iii. The Psalm's Present Application (4:27–28)
 - iv. Prayer for Boldness and Signs (4:29–30)

Results of the Second Outpouring of the Spirit (4:31–5:16) 1173

- 1. Immediate Impact of Prayer (4:31)
- 2. Sacrificial Sharing of Believers (4:32–35)
 - a. Common Property (4:32)
 - b. Power and Grace (4:33)
 - c. How the Property Was Distributed (4:34–35)
- 3. Positive and Negative Examples of Sharing (4:36–5:11)
 - a. Positive Example: Joseph Barnabas (4:36–37)
 - i. Naming Barnabas (4:36)
 - ii. A Cypriot Levite (4:36)
 - iii. Salvation for the Wealthy (4:37)
 - b. Negative Example: Ananias and Sapphira (5:1–11)
 - i. Introduction
 - ii. Deceptively Withholding Income (5:1–2)

EXCURSUS: PARALLELS FOR THIS NARRATIVE 1186

- iii. Spiritual Confrontation and Judgment (5:3–6)

- (1) Satan's Activity (5:3)
- (2) Lying to God (5:3–4)
- (3) Ananias's Death (5:5)
- (4) Ananias's Immediate Burial (5:6)
- iv. Sapphira's Lie and Judgment (5:7–10)
- v. Others Observed and Feared (5:11)
- 4. Apostles' Honor and Signs (5:12–16)
 - a. The People Revere the New Movement (5:12–14)
 - i. Signs through the Apostles' Hands (5:12)
 - ii. Respect for the Apostolic Movement (5:13–14)
 - b. Seeking Healing (5:15–16)
 - i. Dramatic Signs (5:15)
 - ii. Shadows (5:15)
 - iii. The Word Spreads Further (5:16)
 - iv. Delivering People from Unclean Spirits (5:16)

More Persecution (5:17–42) 1205

- 1. Arrest, Release, Rearrest (5:17–28)
 - a. Sadducees Arrest the Apostles (5:17–18)
 - i. The Sadducean "Sect" (5:17)
 - ii. Jealousy as a Motivation (5:17)
 - iii. Arrest and Detention (5:18)
 - b. Released and Commissioned (5:19–20)
 - i. Miraculous Escapes (5:19)
 - ii. The Message of Life (5:20)
 - c. The Council's Reaction (5:21–28)
 - i. Morning Discovery (5:21–25)
 - ii. Rearrest and Charge (5:26–28)
- 2. Obeying God rather than the Elite (5:29–33)
 - a. Obeying God (5:29)
 - b. The Message (5:30–32)
 - c. The Authorities' Response (5:33)
- 3. Gamaliel's Defense (5:34–39)
 - a. Gamaliel, Pharisees, and the Speech (5:34–35)
 - i. Gamaliel
 - ii. Pharisees

EXCURSUS: PHARISAISM 1225

- iii. The Speech's Design
- iv. Gamaliel Begins Speaking (5:34–35)
- b. Jesus versus Revolutionary Movements (5:36–37)
 - i. Luke versus Josephus on Theudas's Chronology
 - ii. Luke's Rhetorical Use of Theudas
 - c. Gamaliel's Wise Counsel (5:38–39)
- 4. Continued Obedience (5:40–42)
 - a. The Council's Reluctance to Execute (5:40)
 - b. Celebrating Persecution (5:41)
 - c. Continued Teaching about Jesus (5:42)

PART 3: THE HELLENIST EXPANSION (6:1–9:31) 1247

Hellenist Leaders (6:1–7) 1249

- 1. Historical Basis
- 2. Literary Connections

- 3. The Problem (6:1)
 - a. Hellenists and Hebrews
 - i. The Tübingen Approach

- ii. Hebrews
- iii. Hellenists

EXCURSUS: GREEK AND ARAMAIC USE IN JUDEA AND GALILEE 1255

- iv. More Than Language
- v. Diaspora Immigrants
- vi. Conflict over the Law?
- b. The Complaint (6:1)
- c. Charity and Widows (6:1)
 - i. Charity and Distribution Mechanisms
 - ii. Widows
 - iii. Disproportionate Numbers Poor?
- 4. The Solution (6:2–7)
 - a. God's Message or Serving Tables? (6:2, 4)
 - i. The Apostles' Priorities (6:2, 4)
 - ii. Serving by Proclamation and Prayer (6:2, 4)
 - iii. "Serving" Economically
 - b. Securing the Right Ministers (6:3)
 - i. Delegation
 - ii. Qualifications, Including Reputation
 - iii. Full of the Spirit and Wisdom
 - iv. Seven Men
 - c. Choosing the Seven (6:5)
 - i. Harmonious Resolution
 - ii. Electing the Seven
 - iii. Stephen
 - iv. Philip and Other Names
 - v. Nicolas from Antioch

EXCURSUS: PROSELYTES 1284

- vi. Seven Hellenists
- d. The Commissioning (6:6)
- e. Summary of the Church's Growth (6:7)
 - i. Summary Statements
 - ii. Conversion of Priests

Stephen (6:8–8:1a) 1294

- 1. Introduction to Stephen
- 2. Ministry and Opposition (6:8–7:1)
 - a. Grace and Signs (6:8)
 - i. Grace
 - ii. Signs and Wonders
 - b. Debating Some from the "Freedpersons" Synagogue (6:9–10)

EXCURSUS: SYNAGOGUES 1298

- i. Multiple Synagogues?
- ii. Synagogue of Freedpersons (6:9)

EXCURSUS: FREEDPERSONS 1304

- iii. Diaspora Synagogues in Jerusalem
- iv. A "Hellenist" Synagogue
- v. Stephen's Inspired Success in Debate (6:10)
- c. False Witnesses (6:11, 13)
 - i. False Charges
 - ii. Investigating and Punishing False Witnesses

- iii. Deliberate Judicial Deception
- iv. Luke's Portrayal
- d. The Charges (6:11–14)
 - i. Listing the Charges
 - ii. Ancient Customs and Laws
 - iii. The Temple

EXCURSUS: VIEWS ABOUT THE TEMPLE 1322

- e. Stephen's Transfiguration (6:15)
- f. The High Priest's Question (7:1)
- 3. Stephen's Countercharge (7:2–53)
 - a. Introduction
 - i. Rhetoric of Acts 7
 - ii. Use of Scripture
 - (1) Historical Retrospectives
 - (2) Luke's Selection Criteria
 - (3) Applying the Scriptures
 - iii. History and Redaction
 - (1) Arguments for Sources
 - (2) Arguments against Sources
 - (3) Mediating Approaches
 - iv. Acts 7 and the Samaritans
 - v. Hellenistic Judaism
 - vi. The Land
 - (1) Early Jewish Land Theology
 - (2) Holy Sites within the Land
 - (3) Devotion to Holy Sites
 - (4) Samaritans and the Temple
 - b. Abraham the Alien (7:2–8)
 - i. God Speaks in Mesopotamia (7:2)
 - ii. Forsaking All for God's Promise (7:3)

 - v. Sergius Paulus (13:7)
 - vi. The Governor's Residence (13:7)
 - vii. Opposition from "Elymas" (13:8)
 - c. Paul's Power Encounter (13:9–12)
 - i. Saul Called Paul (13:9)
 - (1) The Non-Roman Name "Saul" (13:9)
 - (2) The Roman Name "Paul" (13:9)
 - (3) Why the Name "Paul"? (13:9)
 - ii. Paul Pronounces Judgment (13:10–11)
 - (1) The Rebuke (13:10)
 - (2) Judgment (13:11)
 - iii. The Governor's Faith (13:12)
3. Ministry in Pisidian Antioch (13:13–52)
 - a. Journey and Setting (13:13–15)
 - i. From the Coast to Perga (13:13)
 - (1) Journey through Pamphylia (13:13)
 - (2) Perga (13:13)
 - (3) John Mark's Departure (13:13)
 - ii. Pisidian Antioch (13:14)
 - (1) Reaching Pisidian Antioch
 - (2) The Route Taken
 - (3) Why Antioch?
 - (4) Connections with the Sergii Paulli?
 - (5) Life in Pisidian Antioch
 - (6) Antioch and Rome
 - (7) Religion in Antioch
 - (8) Judaism near Antioch
 - iii. Synagogue Setting (13:15)
 - (1) Why Invite Paul and Barnabas? (13:15)
 - (2) Synagogue Leaders
 - (3) Scripture Readings

- b. Proem and Biblical *narratio* (13:16–22)
 - i. Introduction
 - (1) Synagogue Homilies
 - (2) Literary Connections
 - (3) Pauline Characteristics
 - (4) Proposals regarding the Speech's Structure
 - ii. Opening the Speech (13:16)
 - (1) Rising to Speak
 - (2) Address
 - iii. God's Faithfulness to Israel (13:17–22)
 - (1) God Chose and Delivered (13:17)
 - (2) Israel in the Wilderness (13:18)
 - (3) God Gave Israel the Land (13:19)
 - (4) God Gave Judges (13:20)
 - (5) God Granted a King (13:21)
 - (6) God Chose David (13:22)
- c. The Narrative about Jesus (13:23–31)
 - i. The Promised Savior (13:23–26)
 - (1) God Gives a Davidic Deliverer (13:23)
 - (2) John's Mission (13:24–25)
 - (3) Salvation for Israel (13:26)
 - ii. Jesus's Death and Resurrection (13:27–31)
 - (1) Executing Jesus (13:27–29)
 - (2) God Raised Jesus (13:30–31)
- d. Proofs and *peroratio* (13:32–41)
 - i. Jesus's Resurrection Fulfills Scripture (13:32–37)
 - (1) The Promise Fulfilled (13:32)
 - (2) Resurrection Sonship (13:33)
 - (3) Promise to David (13:34)
 - (4) Incorruptible Holy One (13:35–37)
 - ii. Forgiveness through Faith (13:38–39)
 - (1) Lukan, Pauline, or Both?
 - (2) Not against the Law (13:39)

EXCURSUS: PAULINE SOTERIOLOGY IN CONTEXT 2079

1. Early Jewish Soteriology
2. Pauline Soteriology
3. Paul and the Law
4. Conclusions
5. Paul on "Justification"
 - iii. Warning against Unbelief (13:40–41)
- e. Response (13:42–52)
 - i. Favorable Short-Term Response (13:42–43)
 - ii. Mixed Response the Next Sabbath (13:44–48)
 - (1) Success Breeds Jealousy (13:44–45)
 - (2) Turning to the Gentiles (13:46)
 - (3) Light for the Gentiles (13:47)

CD	Cairo Genizah copy of the <i>Damascus Document</i>

1. The citations give double enumerations where the OTP translation (listed first) and the standard Greek text differ.
2. The citations first give the OTP reference, then the enumeration in Schermann's Greek text.
3. Where editions diverge, I cite the enumeration in both Spittler (in OTP) and Kraft.

Josephus and Philo

Jos.	Josephus
<i>Ag. Ap.</i>	<i>Against Apion</i>
<i>Ant.</i>	<i>Antiquities of the Jews</i>

APOSTOLIC LEADERSHIP IN JERUSALEM (3:1–5:42)

In this section the apostolic church grows and even challenges the municipal aristocracy (the local political elite) by an alternative vision of leadership for Israel. This section reports a major public sign and a consequent speech appealing to Israel to turn and submit to its rightful king. It then turns to two escalating confrontations with Jerusalem's leaders. Sandwiched between the two confrontations are an account of a second community experience of the Spirit (analogous to the Pentecost experience), including positive (Barnabas) and negative (Ananias and Sapphira) examples of sharing possessions, and a summary of continuing apostolic signs.

Luke's contrast between two kinds of leadership—one institutional and supported by Rome and hereditary wealth, the other charismatic and following Jesus's example—is graphic. The contrast would be especially striking if, as suggested in the commentary introduction (ch. 10), Luke wrote in a period when Jerusalem and its priestly aristocracy lay in shambles whereas the movement founded by Jesus's apostles had continued to spread.

Scholars have often noted some parallels between the persecution of the apostles in Acts 4 (Peter and John) and Acts 5 (all the apostles). A century and even half a century ago most scholars viewed the repetition as due to Luke's including divergent oral accounts of the same event as different events. Today most scholars find instead a deliberate literary pattern, an "echo effect" to reinforce the point.¹

1. Spencer, *Acts*, 42–45; cf. the pattern noted in 4–5 in Donegani, "Procès." Cf. a similar trend even in contemporary approaches to Genesis's doublets (see discussions in Garrett, *Rethinking Genesis*; Loewenstamm, *Evolution*, 16; Houtman, "Pentateuch," 192–94; Cassuto, *Hypothesis*, 69–83; Whybray, *Making*, 74–78; Alexander, "Variants"; idem, "Oral Variants"). Repetition characterizes both the author's style (Whybray, *Making*, 78) and ancient Near Eastern practice (80–84; Wiseman, *Records*, 117–18; Heidel, *Genesis*, 7n1; Gordon, *Near East*, 134, 139). Sometimes doublets may in fact stem from divergent versions developed through oral tradition, both regarded by the editor as too valuable to discard; but this cannot be simply assumed in a given case.

Because some of the patterns (those unrelated to the arrest and trial) also appear in a previous section, I have listed some of the parallel points in three columns. Expanding the parallels through the rest of Luke-Acts would put the parallels between the two trial accounts in an even larger context, underlining the fact that they reflect the same patterning of summary material that appears throughout the work.

Acts 2–3	Acts 3–4	Acts 5
Revival summary (2:41–47)	(Revival summary; 2:41–47)	Revival summaries (4:32–35; 5:11–16)
Preaching in temple (2:14–40)	Preaching in temple (3:12–26)	(Preaching in temple; 5:20, 25)
Activity in temple (summary; 2:46)	(Preaching in temple; 3:12–26)	Activity in temple (summary; 5:12)
Many converts (2:41)	Many converts (4:4)	Many converts (5:14)
Continuing apostolic miracles (2:43; 3:8) — (no recorded opposition from leaders)	Continuing apostolic miracles (3:8; probably 4:33) Priests and Sadducees against apostles (4:1–2, 5–6)	Continuing apostolic miracles (5:15–16) High priest and Sadducees against apostles (5:17)
Favor with the people (2:47) —	Favor with the people (4:21; cf. 4:4) Apostles jailed overnight (4:3)	Favor with the people (5:26) Apostles jailed overnight (5:18)
—	Apostles tried (4:5–7), including demand (4:7)	Apostles tried (5:21–41), including demand (5:28, 40)
—	Peter and colleague preach (4:8–12), including, Obey God, not people (4:19–20)	Peter and colleagues preach: Obey God, not people (5:29–32)
—	Response of authorities and private dialogue among themselves (4:13–17)	Response of authorities and private dialogue among themselves (5:33–39)
—	Apostles released (4:21)	Apostles released (5:40–41)
—	Prayer for events (4:23–30)	Praise for events (5:41)
(Revival summary; 2:41–47)	Continuing apostolic activity and revival (4:32–35)	Continuing apostolic activity (and presumably revival; 5:42)

Listing only parallels can, however, obscure the distinctions among the accounts, such as the increasing intensity of persecution and the addition of other apostles. Apart from the fact that the apostles are arrested twice—which makes sense if they continued preaching after their first arrest—most of the parallels are due to Luke’s method of summarizing *continuing* activity rather than to parallel events. Nor do the patterns fall neatly into identically sequenced, set columns (as the very attempt to list them clarifies; note the varied sequencing of parallel components); the repetition is of various individual events, not of entire narrative sections. As narrative criticism has clarified, then, the parallels reflect not doublets of the same historical material but deliberate *literary* patterning for theological reasons. The clearest differences among the accounts particularly emphasize increasing intensity:

Acts 2	Acts 3–4	Acts 5
No persecution recorded (2:47)	Arrest (4:3) and warning (4:21)	Arrest (5:18), near execution (5:33), and beating (5:40)
—	—	Angel frees them (5:19)
—	Peter’s “you be the judge” (4:19)	Greater confrontation (5:29, 32)

Luke highlights the parallels not to equate them but to exhibit the increasing intensity of the conflict; in this way he offers a pattern resembling the role of conflict in

the plot development in the Gospels. The pattern here may thus fit the repetition of intensifying cycles (as in John's last discourses or 1 John) more than Luke's standard parallelism among Jesus, the Jerusalem Christians, and Paul (on which see the discussion in the commentary introduction, ch. 16). (For chronological reasons, Luke cannot climax the greatest of the three objects of his parallels—namely, Jesus—last.)

THE HEALING OF THE PARALYTIC AND ITS AFTERMATH (3:1–4:30)

In Acts 3:1–10, Luke emphasizes the power of Jesus’s name; signs (by definition) draw attention for the gospel (3:11–26).¹ In the sermon of 3:11–26, the power of Jesus’s name demonstrates that God raised Jesus, Isaiah’s “servant” (3:13, 26; the inclusio suggests that this is the “controlling” title), the righteous sufferer (3:14), the promised ruler (3:15), the epitome of Israel’s prophetic leadership (3:22–23). The time of promise has come (3:24–25); as soon as Israel will accept Jesus as its rightful ruler (3:19, 26), the kingdom will be restored (3:19–26).

1. The Power of Jesus’s Name (3:1–11)

Luke’s writing does not always yield easily to modern (or ancient) outlines, since he provides continuity even when he shifts “sections.” Thus 3:1–10 follows naturally from the preceding section, concretely illustrating apostolic signs (2:43) and prayer in the temple (2:47). This account thus becomes a dramatic example of the summary that precedes it.² Believers are praying daily in the temple (2:42, 46–47), and hence Peter and John are going to the temple to pray (3:1); Peter’s lack of silver (3:6) illustrates the sacrificial lives of those serving the Lord in 2:44–45.

Most clearly, this event illustrates the continuing apostolic signs (2:43) and is a particularly dramatic case of continuing conversions (2:47; 4:4).³ The heart of the account, as demonstrated by the dialogues that follow (3:16; 4:7, 10, 12, 17–18, 30), is that healing occurs through Jesus’s “name” (3:6), which offers salvation and wholeness (2:21, 38).⁴ That is, Jesus remains active and works through the agents he has chosen and commissioned.

a. Introductory Issues

There are clear parallels with Jesus’s healing of the lame man in Luke 5:17–26, including the literary function (linking the healing with Jesus’s power to forgive and save and a universal scope, 5:24; Acts 4:9, 12).⁵ The early placement of these two healings

1. This pattern of miracle followed by audience response followed by Peter’s speech is comparable to Acts 2 (Chrys. *Hom. Acts* 8; cf. also Panier, “Récit”).

2. As is often noted, e.g., Bruce, *Acts*¹, 103.

3. With Tannehill, *Acts*, 48.

4. Both senses of the term appear in the following discussion, as they do throughout Luke-Acts (e.g., Luke 7:50; 8:48).

5. Tannehill, *Acts*, 50–51.

in the corresponding works may also be significant.⁶ The parallels with the healing of a lame man in Acts 14 early in Luke’s narration of Paul’s ministry are also significant:⁷

Acts 3:1–6	Acts 14:8–10
Man disabled “from birth” (3:2)	Man disabled “from birth” (14:8)
Peter and John “gaze intently” (3:5)	Paul “gazes intently” (14:9)*
Leaping and walking (3:2)	Leaping and walking (14:10)
Near temple gates (3:2)	Near temple gates (14:9)
Human “adulation” rejected (3:11–16, esp. 3:12)	Human “adulation” rejected (14:11–18, esp. 14:15)

* This is significant, but less than the preceding point, as this term is common for Luke. Acts uses the verb ἀτενίζω ten times (it appears twice in the Gospel and in only one other NT passage, 2 Cor 3:7, 13; in the Apostolic Fathers, it is found only in 1 Clem. 7.4; 9.2; 17.2; 19.2; 36.2; it also appears in 1 Esd 6:27; 3 Macc 2:26).

Some of the parallels are more significant than they might first appear; for example, in both cases the healed man demonstrates his healing by leaping (3:8; 14:10). This is hardly coincidence; the rare term appears only three times in the NT, including these two (the other is John 4:14, with a different sense). Rather, the repeated use of this specific language is probably meant to reinforce and illustrate the fulfillment of the messianic-era promise in Isa 35:6 (by far the closest parallel among the seven LXX uses of the term), the text alluded to in Luke 7:22. This allusion reinforces, in turn, the point that the prophets announced these days (Acts 3:24).⁸ The parallels among Jesus, Peter, and Paul here are characteristic of Luke-Acts, suggesting the continuity of divine activity in salvation history. Even among such parallels, however, Luke retains Jesus’s preeminence; Peter and Paul both point to Jesus as the source of miracles (3:16; 14:14–15; cf. 10:25–26).⁹

Some scholars find historical tradition in 3:1–11 on the basis of pre-Lukan Palestinian features.¹⁰ Even Goulder, noting clearly nonallegorical details (such as the Beautiful Gate, Solomon’s Portico, and John and Alexander among the Sadducees), argues for tradition here. Some memory of the occasion may have been preserved, in view of its dramatic public character and its effects; Luke knew of many healings (2:43; 5:15–16) and could have easily chosen this one as the most famous.¹¹ Others doubt tradition here, though sometimes because of antisupernaturalist presuppositions. “There is no historical nucleus to the tradition of the miracle story in vv. 1–10,” Lüdemann opines, because “those who are lame from their childhood are (unfortunately) not made whole again.”¹² The commentary introduction (ch. 9) has addressed antisupernaturalistic presuppositions; these are premises that interpreters are not obligated to grant. But even one who prefers a psychosomatic explanation (in which Peter and John might have held him as he walked, 3:11) might allow a nucleus of genuine tradition.

6. Witherington, *Acts*, 173, compares how closely Luke 5:17–26 follows the call of the first disciples (Luke 5:1–11).

7. Many scholars note parallels here, but I follow here especially the particularly full list in Spencer, *Acts*, 149. For a comparison of Acts 14:8–10 with the healing in Luke 5:18–25, see Lindemann, “Einheit,” 238–42. The healing fits a pattern found in the Gospels (a sick person is healed, sometimes demonstrating healing, and observers marvel; e.g., Gaventa, *Acts*, 83), but it is difficult to conjecture how else one would depict such accounts.

8. Tannehill, *Acts*, 52–53.

9. *Ibid.*, 53.

10. Sabugal, “Curación.”

11. Goulder, *Type and History*, 188. Pervo, *Acts*, 98–99, suggests development of a core, with an added speech, a compositional method that scholars often suggest for Johannine miracle accounts in John 5, 9, and 11 (cf. Martyn, *Theology*).

12. Lüdemann, *Christianity*, 54.

Whatever their explanation, accounts of some disabled persons suddenly being cured and walking do abound, and I witnessed such a case myself.¹³ Certainly, the parallel account in the Gospel (Luke 5:17–26) stems from tradition (Mark 2:3–12), though Luke may adjust the telling of it;¹⁴ Luke could then have created analogous accounts for Peter and Paul. But Luke’s account in Acts can appear suspect historically more than the account in his Gospel only because we do not possess Luke’s source for Acts 3 as we do for Luke 5. Most competent ancient historians (at least those as conservative as Luke is with his sources where we can check him) selected and emphasized parallel events but did not create them wholesale.¹⁵ This dependence on tradition did not, of course, preclude adjustments in some details for the purpose of underlining the narrative unity already expected there, and Luke uses fairly consistent style throughout his writings (except when he reverts to a semitizing style).

b. Hour of Prayer (3:1)

Luke often emphasizes dramatic divine interventions during prayer times. The ninth hour (3:00 p.m.) recurs as the time when an angel reveals God’s message to Cornelius (10:3). In this case, the apostles were probably on their way to a corporate prayer meeting in the temple (2:46). Peter and John often appear together, sometimes with James the son of Zebedee (Luke 8:51; 9:28; cf. Mark 5:37; 9:2; 13:3) but later more often by themselves (Luke 22:8; Acts 3:1–4, 11; 4:13, 19; 8:14; cf. Gal 2:9; James is martyred in Acts 12:2).

For the “hour of prayer,” Luke’s audience may recall the “hour of the incense offering” in Luke 1:10.¹⁶ The Bible mandated sacrifice in the temple both in the morning and toward dusk (Exod 29:39–41; Num 28:4; cf. 2 Kgs 3:20; 16:15; Ezra 9:5; Ps 141:2; Dan 9:21; Jdt 9:1).¹⁷ Such a practice was not unusual in the ancient world; Egyptian temple cults and public ceremonies “included daily morning and evening services,” during which people offered incense and hymns.¹⁸ At some point during the Hellenistic period, the time of the near-dusk offering shifted toward the middle of the afternoon (as in Acts 3:1),¹⁹ perhaps to avoid the risk of running

13. Around 1980, I personally witnessed a nursing home Bible study leader in the United States, whom I knew fairly well, take by the hands a woman who, all the time I had known her, had been complaining of her absolute inability to walk. To her amazement as well as that of everyone else in the room, he walked her around the room; after that event, she began to walk on her own (and not surprisingly became quite zealous for the Bible study). For other claims of some disabled persons being instantly able to walk, see discussion in Keener, *Miracles*, 523–36 (including accounts from interviews in various parts of the world); more briefly, e.g., Duffin, *Miracles*, 18, 62; Opp, *Lord for Body*, 46–47; Curtis, *Faith*, 1–5, 81–82; Kidd, “Healing”; Ising, *Blumhardt*, 212–13; Ma, “Encounter,” 137; idem, “Vanderbout,” 129, 132; Green, *Thirty Years*, 104; De Wet, “Signs,” 94–95, 114; Bush and Pegues, *Move*, 51–52; Menberu, “Mekonnen Negera”; comments at Acts 9:34. Most persons unable to walk long-term are of course not dramatically cured in this way, but it is impossible to deny that many cases have occurred.

14. Some scholars draw parallels with the Matthean version (Matt 9:1–8; Boismard and Lamouille, *Actes*, 3:67), but most of these elements are not surprising in any account of something extraordinary and fit particularly the pattern of early Christian miracle stories (for the patterns for such stories, cf. Theissen, *Miracle Stories*; Kee, *Miracle*).

15. See discussion in the commentary introduction, Keener, *Acts*, 1:568–74.

16. Luke reveals significant interest in temple worship (e.g., Luke 18:9–14; Hamm, “Service”; cf. Acts 10:3, 30), fitting his portrayal of the Jerusalem believers’ interests (Acts 2:42–47) and perhaps his own visit to Jerusalem in the 50s.

17. The LXX of Exod 29:39 probably accounts for the addition in D relating to the afternoon offering (Haenchen, *Acts*, 198n3); cf. Lev 6:20; Jos. *Ant.* 3.237, 257. On morning and evening sacrifices, see Reid, “Sacrifice,” 1040–41. Some scholars connect some of the psalms to morning or evening offerings (cf., e.g., Pss 5:3; 55:17; 59:16; 92:2; 130:6; 141:2; 143:8; Weiser, *Psalms*, 125); but cf. Wilson, *Psalms*, 1:166.

18. Stambaugh and Balch, *Environment*, 135.

19. Falk, “Prayer Literature,” 297.

late. Josephus mentions sacrifices in the morning and at the ninth hour—that is, about 3:00 p.m. (Jos. *Ant.* 14.65);²⁰ a century later the Mishnah reports that the lamb was normally slaughtered around 2:30 p.m. and burned as an offering by 3:30 p.m. (*m. Pesah.* 5:1).²¹

Various writers compared prayer to incense (Ps 141:2; Rev 5:8; 8:5).²² From an early period, people offered prayer during the incense offering and other offerings (Sir 50:9, 13, 17, 19; Luke 1:10; Jos. *Ag. Ap.* 2.196–97; *Ant.* 4.203); priests made the incense offering before the morning sacrifice and after the evening one (cf. 2 Chr 2:4; 13:11).²³ It is clear that many people in the temple (Luke 1:10) and elsewhere (Dan 9:21; Jdt 9:1) prayed at these times.²⁴ At least some of the pious may have prayed during the entire hour (cf. *b. Ber.* 32b, bar., for nine hours of prayer daily).

Scholars debate whether synagogues practiced a unified liturgy in this period; it is not clear that a unified liturgy existed in the Diaspora (or even Judea) by the end of the first century.²⁵ First-century local leaders in Galilee could call a special public fast day (Jos. *Life* 290), and people would engage in their prayers (*Life* 295) in the house of prayer (*Life* 293); it is likely that they prayed aloud,²⁶ but it is not clear whether those present recited their prayers in unison.²⁷ In the temple itself, people would be coming and going, and many outside Jerusalem would not know the liturgy; although the priests may have followed some sort of liturgy, it is unlikely that the crowds would have done so. Instead worshipers prayed according to their interests and needs (cf. many who pray at the Wailing Wall today).

This is not to deny that some standard prayers were already in circulation. The Shemoneh Esre prayer (the Eighteen Benedictions, also known as the Amidah) eventually came to be used in synagogues throughout the ancient world,²⁸ and at least its basic substance is early.²⁹ The Amidah is probably pre-Christian, or at least some forms of it.³⁰ By the second century at the latest, the Amidah was widely recited three times a day,³¹ and it is possible that this practice recalls an earlier custom in the temple.

20. The hours were reckoned from sunrise, which on average was about 6:00 a.m. but by our reckoning would vary by time of year. Rabbis debated exactly how much light constituted sunrise and hence exactly when to say morning prayers (*m. Ber.* 1:2). Later rabbis allowed the afternoon prayer between the ninth hour and sunset (cf. *m. Ber.* 4:1; *b. Ber.* 26b; Le Cornu, *Acts*, 165).

21. Following Hengel, "Geography of Palestine," 42.

22. Cf. *Mart. Pol.* 15.2; *Jub.* 2:22; Philo *Heir* 199, 226–27; Marshall, *Luke*, 54.

23. Falk, "Prayer Literature," 297; Sanders, *Judaism*, 255.

24. Dunn, *Acts*, 40.

25. For evidence that does not suggest a common liturgy, cf. Levine, "Synagogue," 19–20; Cohen, "Evidence on Synagogue," 175; thus Talmon, "Institutionalized Prayer," 273–74, thinks Qumran's early institutional prayer (1QS IX, 26–X, 3; 4QS504; 4QS507–509; see Abegg, "Liturgy: Qumran," 648–49) unusual. For evidence that could favor some common Jewish liturgy, cf. Schiffman, "Scrolls"; Maier, "Kult"; Goodman, *State*, 86. The example in Harding, "Prayer," predates the fifth century C.E., but we cannot be certain of its date.

26. On the analogy with traditional Greek and Roman prayers, on which see van der Horst, "Prayer."

27. If they did it privately, it was nevertheless in the place of public assembly, large enough to hold Tiberias's citizens (Jos. *Life* 277).

28. Martyn, "Glimpses," 173; for the importance of the prayer, see, e.g., *Gen. Rab.* 69:4; *Lev. Rab.* 1:8.

29. E.g., *m. Tamid* 5:1; the themes appear in many pre-Christian documents (Oesterley, *Liturgy*, 54–67; Levine, "Synagogue," 19; cf. Arbel, "Liturgy: Rabbinic," 650–51). Sanders, *Jesus to Mishnah*, 72, cites *m. Ber.* 4:3 as implying that "something close to a set text" existed at Yavneh; cf. *idem*, *Judaism*, 203, where he contends instead for basic themes.

30. Van der Horst ("Greek Evidence"; *idem*, "Egerton 5") suggests an early form, without the temple or Jerusalem, in P.Egerton 5.

31. Schiffman, "Crossroads," 151, observes that the Amidah was "the only thrice-daily recitation in the synagogue services" (fitting Jerome's later testimony and *t. Ber.* 2:9; 6:24; cf. *y. Ber.* 4:1, 3; *Ta'an.* 2:2, §6). That second-century Christians knew this prayer is made likely by their apparent view that its added malediction against the *minim* was anti-Christian (see Horbury, "Benediction," 19; Barnard, "Old Testament," 400; *idem*,

In any case, at some period the synagogue settled on three prayer times during the day (a practice followed by Christians, *Did.* 8.3); some scholars connect these with the different hours of prayer in Acts 2:15 (9:00 a.m.), 3:1 (3:00 p.m.), and 10:9 (noon),³² though it is not really clear that all of these are necessarily regular prayer times.³³ Many believe that the standard prayer times were established by Jesus's day.³⁴ Analyzing the Qumran scrolls and earliest rabbinic sources, others suggest that this period knew only two regular times of daily prayer, corresponding with the morning and afternoon (about 3:00 p.m.) offerings in the temple, with a third (evening) offering still optional.³⁵ Since it is unlikely that second-century Christians would have borrowed a Jewish practice used exclusively by Palestinian rabbis, however, the thrice-daily prayer times probably do reflect a pre-Christian practice (though not universal and with the third time probably optional).

The Qumran sectarians prayed at least twice a day (1QS X, 1);³⁶ they apparently had different prayers for evening and morning prayers for each day of the month (4Q503).³⁷ Morning prayers appear in the first-century B.C.E. work *Psalms of Solomon* (*Pss. Sol.* 6:4–5/6:6–7).³⁸ Evening prayers also appear in early texts (*Jdt* 9:1; 12:7–9).³⁹ At least in second-century C.E. tradition, one must say afternoon prayers toward but before night (*m. Šabb.* 1:2); later traditions on the later evening prayers varied considerably as to the required time (*m. Ber.* 1:1), possibly suggesting a requirement of more recent vintage. Although the Amoraic tradition that thrice-daily prayer goes back to the three patriarchs (*Num. Rab.* 2:1) naturally lacks merit,⁴⁰ rabbis did have biblical precedent subsequent to the patriarchs: Daniel's biblical prayer three times a day (*Dan* 6:10, 13) was counted among his righteous acts (allegedly first-century tradition in *'Abot R. Nat.* 4 A). Likewise, Tannaim cited Ps 55:17 (55:18 MT; 54:18 LXX) for prayer during the evening and morning prayers, with "noon" applied to the afternoon prayer (*t. Ber.* 3:6). Some scholars argue that the Qumran sectarians matched the three periods of daytime prayer with these three biblical periods, dividing day as well as night into three watches.⁴¹

Daniel Falk notes that the various sources on prayer times fall into two basic patterns: twice-daily personal prayers by morning and evening (including the Shema)

Justin Martyr, 44–45; Shotwell, *Exegesis*, 83–84; Pancaro, *Law*, 253; Williams, *Justin Martyr*, xxxii; by contrast, Kimelman, "Evidence," 235–38, disputes this interpretation of the second-century evidence; see discussion in Keener, *John*, 207–14, esp. here 210).

32. Oesterley, *Liturgy*, 125.

33. Noon (Acts 10:9) was probably not a regular prayer time (*Jeremias, Prayers*, 79).

34. E.g., *Jeremias, Prayers*, 73; idem, *Theology*, 188.

35. Schiffman, "Scrolls," 39–40. Though uncertain of corporate liturgical prayers outside Qumran before 70 C.E., Sarason, "Intersections," notes similarities between rabbinic and Qumran evidence.

36. 1QS X, 1 appears to refer to prayer three times a day, in the morning, in the evening, and, between them, possibly (depending on the sense) at what can be the "solstice" (or high point, in rabbinic Hebrew), hence perhaps at midday; but X, 3 seems to rehearse this and mentions only two times, during day and night (unless it means three times in the day and three at night).

37. At Qumran, proper times of prayer aligned the community with the angelic liturgy in heaven; cf. 1QS X, 6; XI, 8; 4Q400–407; 11Q17 in *DSSNT* 365–77; cf. *Sipre Deut.* 306.31.1; Lincoln, *Paradise*, 112, 149; Newsom, "Songs." Qumranites viewed prayer at set times as an act of righteousness (Arnold, "Prayer"). Later Judaism continued to associate heavenly worship with the times of offerings in the temple (cf. *Tg. Ps.-J.* on Exod 14:24).

38. Also in *Let. Aris.* 304–5; *Sib. Or.* 3.591–93; cf. perhaps *Pss* 5:3; 59:16; 88:13; 92:2 (perhaps connected with the morning offering).

39. Sanders, *Jesus to Mishnah*, 74–75 (*Let. Aris.* 184–85, though before the banquet, is less likely). Cf. *Ps* 141:2.

40. The same tradition attributes the Eighteen Benedictions to Moses and Aaron (who were addressed equally eighteen times).

41. S. Talmon's interpretation of 1QS IX, 26–X, 3, as cited in Abegg, "Liturgy: Qumran," 649.

or a thrice-daily (possibly originally twice-daily) pattern based on the temple service.⁴² In all, Luke's picture of prayer practices fits that of other Jewish sources before 70: daily prayer in the temple (but not clear in Palestinian synagogues), prayers at sunrise and sunset, "and morning and afternoon, based on the Temple sacrifices."⁴³

The early Christians prayed together in the temple (Acts 2:42, 46). Although this practice may have included corporate singing of psalms or other worship (2:47; cf. 4:25–26), much of the prayer may have been from persons leading or of everyone praying differently simultaneously. Corporate prayer did exist in this period, as the language of the Eighteen Benedictions, the Kaddish, and some earlier communal prayers (e.g., 4Q503) indicate;⁴⁴ at least Essenes repeated some inherited prayers (Jos. *War* 2.128).⁴⁵ At the same time, many prayers were individual (as often in 1QH^a), and it is not clear that people prayed even shared prayers in "unison" (see comments on Acts 4:24).⁴⁶

If Peter and John were coming to the temple for prayer about 3:00 p.m., the preaching probably continued for about three hours (since it was toward evening when they were arrested, Acts 4:3); the message in 3:12–26 is thus intended as a mere summary of the most relevant samples of apostolic christological exegesis. Jewish wonder-workers were often said to have prayed before performing healings, though the Gospels usually report Jesus doing miracles simply by command, as Peter and John will do here.⁴⁷ In this passage, it may be of interest that Peter and John are on their way to prayer (perhaps for their second hour that day) and hence ready to act *before* their afternoon prayers. Nevertheless, the entire context of Luke-Acts supports the frequent connection between prayer and divine activity (see comments on Acts 1:14).

c. *The Disabled Beggar at the "Beautiful" Gate (3:2–3)*

Jesus had advocated for (Luke 14:13, 21) and healed (7:22) those unable to walk (the term *χωλός* here); this pattern of healing continues with Philip (Acts 8:7) and Paul (14:8, where the disability also stemmed from birth, *ἐκ κοιλίας*). We should not think, however, that the disciples prayed for all with such disabilities to be healed.⁴⁸ The believers were continuing "daily" (2:47) in the temple, and this man was laid at the gate of the temple "daily" (3:2), yet the man does not appear to even recognize them, much less know them from previous prayers for healing. What makes this occasion the significant one for healing is not the disciples merely passing by but that the man initiates contact on the basis of his need. Although he asks only for alms

42. Falk, "Prayer Literature," 296. Most references to hours of prayer in Tannaitic texts are connected with times of sacrifices (see Hruby, "Horas de oración"). The importance of regular prayers by the Amoraic period may be illustrated by the dictum that even God says prayers (*b. Ber.* 7a).

43. Falk, "Prayer Literature," 267 (summarizing his chapter).

44. The Kaddish is almost certainly pre-Christian, unless we think (against all probability) that it and other early Jewish prayer language is based on the Lord's Prayer (Matt 6:9–13//Luke 11:2–4; see Keener, *Matthew*, 215–16). Most scholars recognize that the Lord's Prayer draws on the Kaddish (e.g., Bonsirven, *Judaism*, 133; Jeremias, *Prayers*, 98; idem, *Theology*, 21; Moore, *Judaism*, 2:213; Smith, *Parallels*, 136; Hill, *Matthew*, 136–37; Perrin, *Language*, 28–29; Vermes, *Jesus and Judaism*, 43; Davies and Allison, *Matthew*, 1:595; Luz, *Matthew*, 371); others suggest other early Jewish parallels (e.g., Bivin, "Prayers").

45. Talmon, "Institutionalized Prayer," 273–74, thinks that the Qumran covenanters (like common Judaism after the temple's destruction) developed such prayers because of their isolation from the temple and its hours of sacrifice. Luke 11:1 could imply fixed prayers (cf. Jeremias, *Theology*, 170; Leaney, "Text," 110; Smith, *Parallels*, 129, comparing *t. Ber.* 4:16–18), but it probably concerns simply the manner of prayer.

46. Sanders, *Judaism*, 205–7.

47. Aune, "Magic," 1533–34.

48. Presumably they prayed for those brought to them, but as their fame multiplied, there were apparently too many supplicants even to pray for all of them individually—without this limitation thereby diminishing the divine generosity at work (Acts 5:15–16).

(3:3) and expects only alms (3:5), he has provided an opportunity for the apostles to provide him a benefit.⁴⁹

In some gospel tradition, Jesus had earlier healed the lame in the temple (though they were coming from elsewhere; Matt 21:14), though without implying that he must have healed everyone. That Luke's depiction of Jesus's ministry in the temple specifies only teaching (Luke 19:47; 20:1; 21:37–38) allows for his audience to understand more easily why such an obvious case of illness noted in Acts 3:2 was not already healed.

Although ancient sources mention the names of many gates in the temple,⁵⁰ they do not specify which gate was popularly called “Beautiful” (though they may provide hints). (The title could be merely a nickname,⁵¹ though the available evidence does not specify whether the nickname was widespread locally or peculiar to Luke's Jerusalem “tour guide”⁵² or some similar source.⁵³ Nor can we be fully certain whether 3:2 refers to an outer gate of the temple complex or a gate to the sanctuary.) The traditional site for this gate (starting in the fifth century C.E.) is the Shushan Gate on the east side of the Temple Mount; this was, appropriately, near Solomon's Colonnade (also often translated as Solomon's Portico).⁵⁴ Against this suggestion, only those entering the temple from outside the city would use this gate, and so a beggar wishing charity from larger masses usually entering from Jerusalem itself might prefer a different gate⁵⁵—assuming, at least, that there was enough space to go around for all the beggars likely at such gates. Some scholars have preferred the southern gate, which the Talmud makes the primary entrance to the temple,⁵⁶ but people entered through many gates, and the Talmud's depictions of the temple are often fanciful in any case.

Much more often, modern scholars prefer as more probable (though not certain) the famous Nicanor Gate.⁵⁷ Josephus speaks of the Corinthian bronze⁵⁸ of a gate

49. The parallel language to Acts 14:9 (ἀτενίζω) might suggest that Peter perceived that the man would have faith when commanded in Jesus's name to rise (3:4, 6). (The absence of mentioned faith might also be used to argue for a deliberate contrast here; but someone—whether the man or the apostles—clearly did express faith, in 3:16. See comments there.)

50. See Netzer, “Kysd.” Cf. the traditional expression “gates of prayer,” sometimes along with “gates of repentance” (e.g., *Deut. Rab.* 2:12; *Lam. Rab.* 3:43–44, §9; cf. 3 *En.* 1:11; 8:1).

51. That Luke notes that it is “called” this does not necessarily specify a nickname (Luke 2:4; 22:1, 47; cf. Acts 6:9). The parallel verb καλέω can apply to a given name (e.g., Luke 2:21; 7:11; 9:10; 10:39; 19:2, 29; 21:37; Acts 1:12; 7:58; 10:1; 27:16) or to a nickname (e.g., Luke 6:15; 8:2; 22:3; Acts 1:23; 8:10; 13:1; 15:22; cf. Luke 1:36; 23:33). Parsons, *Acts*, 59, suggests a rhetorically appealing play on words between the Greek term for “beautiful” here and the ninth “hour” in Acts 3:1.

52. Given Paul's reception in the Jerusalem temple, we may think it more likely that most of Luke's Judean sojourn was spent in Caesarea.

53. Luke's specificity nevertheless points to his knowledge of Jerusalem topography (Hemer, *Acts in History*, 108). The connection of Ὠραΐαν with ὥραν (in Acts 3:1) or the Hebrew term for “light” (Taylor, “Beautiful”) is not probable, although a local Hebrew name for “light” (emphasizing the gate's shininess) might have sounded to Luke like the Greek term “beautiful.”

54. E.g., D. Williams, *Acts*, 66. For various views, see Fitzmyer, *Acts*, 278. Medieval times named the Shushan Gate the “Golden Gate.”

55. Barrett, *Acts*, 179–80. But for beggars at all the gates, cf. Cowton, “Alms Trade”; Cynics at gates in Alexandria in Dio Chrys. *Or.* 32.9. Bahat, “Temple Mount,” 302 (who prefers a gate of the temple proper), even argues that the gate was used only for “priests going to the Mount of Olives for the sacrifice of the red heifer.”

56. Lake and Cadbury, *Commentary*, 32–33.

57. E.g., Lake, “Localities,” 479–85; Dibelius, *Studies in Acts*, 14; Carter and Earle, *Acts*, 49; Haenchen, *Acts*, 198; Bruce, *Commentary*, 83; Witherington, *Acts*, 174; Cornfeld, *Josephus*, 357n204a; Parrot, *Temple*, 85, fig. 20; Talbert, *Acts*, 36 (tentatively); cf. Marguerat, *Actes*, 118. Schwartz, “Nicanor Gate,” attributes the name to the Greek general defeated by Judas Maccabee; but Hemer, *Acts in History*, 223, attributes the name to its maker, who claims credit for it on his ossuary (*CIJ* 2:262, §1256 = *OGIS* 599). In any case, concluding three lines with “temple” in Acts 3:2–3 indicates an emphasis on the larger site (Parsons, *Acts*, 305, noting antistrophe).

58. Also *t. Kip.* 2:4; *b. Yoma* 38a; whereas other gates had gold, the Nicanor Gate allegedly experienced a miracle to make it shine like gold (*m. Mid.* 2:3; cf. *m. Yoma* 3:10). On the special value of Corinthian bronze, see Cic. *Verr.* 2.4.1.1; 2.4.44.97–98; *Fin.* 2.8.23; Strabo 8.6.23; Petron. *Sat.* 31, 50; Sen. *Y. Dial.* 9.9.6; Pliny E.

more beautiful than those covered with silver or gold (Jos. *War* 5.201), and it was the largest of the gates (5.204).⁵⁹ Tannaim likewise praised the bronze of Nicanor's Gate, which appeared like gold, and some Tannaim associated this appearance (or the gate's preservation) with a miracle.⁶⁰ All of these details would fit the description "Beautiful" gate; also important is that Solomon's Portico was also accessible without much trouble from where rabbinic tradition locates the Nicanor Gate (Acts 3:11).⁶¹ Though Luke mentions this epithet for the gate only in passing, some Roman writers were happy to describe in detail the splendid doors of some temples.⁶²

That Luke intended the Nicanor Gate cannot be certain.⁶³ The gate could date from anywhere between 6 and 60 C.E., and the Mishnah does not name all the gates in the outer court.⁶⁴ But the gate probably does precede 60 C.E.; it seems doubtful that a gate that lasted for less than a decade would have earned such fame in later rabbinic literature or even in Josephus. If we must guess, the Nicanor Gate seems the most likely suggestion among the known choices available, and in the unlikely event that the Nicanor Gate was not yet built at the time assumed in Acts 3, a gate in the vicinity where rabbinic tradition locates it would make sense (3:11). Certainly, the gate would have been built by the time of Luke's visit, and given the specificity of the title ("the Beautiful Gate"), any former pilgrims to the temple among his ideal audience might most naturally think of some particularly impressive gate. Some evidence suggests that this gate separated the outer court from the elevated Court of Women, but Josephus, who knew the temple firsthand, seems to link a notable bronze gate with the sanctuary and differs from later rabbis as to whether it was located at the eastern or the western entrance.⁶⁵ The events in Acts 3 may fit well the eastern gate and entrance to the Court of Women, near Solomon's Portico.⁶⁶ Perhaps subsequent discoveries and analysis will produce greater clarity regarding the site involved.

Most scholars doubt that a man unable to walk, and hence one that some considered ritually defective, could enter beyond this point.⁶⁷ There is some ground for uncertainty

N.H. 34.1.1; 34.3.6; 34.3.8; Jos. *Life* 68; Mart. *Epig.* 9.59.11; 14.172, 177; Pliny *Ep.* 3.1.9; 3.6.1–5; Paus. 2.3.3; Murphy-O'Connor, "Bronze." Although it was supposedly invented by accident (Plut. *Or. Delphi* 2, *Mor.* 395BC), some suggest that it may instead stem from fraud: the alloy probably contained tin rather than, as was supposed, gold (Engels, *Roman Corinth*, 36–37). Its source is hard to document (cf. Mattusch, "Corinthian Bronze"), and it may not have all come from Corinth (Jacobson and Weitzman, "Bronze"); on its color, cf. Jacobson and Weitzman, "Alloy"; other discussion in Emanuele, "Aes corinthium."

59. Although many identify this gate with the Nicanor Gate, Josephus's identification is not certain (Mare, *Archaeology*, 143–44); certainly his location differs from that in later rabbinic sources.

60. *M. Yoma* 3:10; *Mid.* 2:3; *t. Kip.* 2:4. See further *m. Šeqal.* 6:3; *Soṭah* 1:5; *Mid.* 1:4; 2:3, 6; *Neg.* 14:8; later, *b. Yoma* 38a. Because of its public character, Amoraim viewed it as a suitable location for public disgrace (*b. Soṭah* 8b).

61. See Dunn, *Acts*, 40.

62. Cic. *Verr.* 2.4.56.124 (to denounce the impiety of Verres in stealing them).

63. Or, despite his visit to Jerusalem (and Polybius's emphasis on historians checking sites), even that he understood the exact location where the event occurred.

64. Hengel, "Geography of Palestine," 39 (see more fully 38–42); but his suspicion that the disabled could not beg at a primary eastern gate (39, following Jeremias, *Jerusalem*, 128–29n50) is less likely. Rabbis reckoned Nicanor as the eastern gate (*m. Mid.* 1:4; 2:6).

65. Cf. Jos. *War* 2.411; 6.293; Hengel, "Geography of Palestine," 38; Schwartz, "Nicanor Gate." The later comment in a Jerusalem talmudic tractate claims that "before the Lord" refers to the Nicanor Gate (*y. Soṭah* 1:5, §1), i.e., making it the main entrance to the temple proper (cf. *b. Naz.* 45a: at entrance to the camp of Levites). Earlier tradition distinguishes it from the Women's Gate (*m. Šeqal.* 6:3), though rabbinic tradition identified it as the place for purifying women after childbirth (*m. Soṭah* 1:5) and publicly humiliating adulteresses (*m. Soṭah* 1:5; *b. Soṭah* 8b) as well as for cleansed lepers (*m. Neg.* 14:8). Rabbis mentioned fifteen steps between the two courts (*b. Yoma* 16a).

66. Bahat, "Temple Mount," 301–2. Note the Jerusalem Map B in Brill's *New Pauly*, 6:1171.

67. E.g., Jeremias, *Jerusalem*, 117; Reicke, *Era*, 99; Dunn, *Acts*, 39–40. Marguerat, *Actes*, 121, finds here Luke's interest in the religiously marginal (e.g., Luke 7:1–10; 19:1–10; Acts 8:26–40). More cautiously,

about this position, although some strands of evidence may support it. Biblical law excluded the disabled only from the priesthood (Lev 21:18),⁶⁸ but Qumran applied this law to restrict their presence in the community (1QSa II, 5–6).⁶⁹ (It should be noted that although the rabbis and Qumran excluded them from holy places, they did not exclude them from participation in the covenant,⁷⁰ nor did Jews, in contrast to many Gentiles, sanction destroying infants who were considered deformed.)⁷¹ The same purity practices that kept women and Gentiles from the Court of Israel perhaps did exclude those unable to walk as well, although they were not ritually “unclean.” Later rabbis, at least, believed that the unclean could not go beyond the Nicanor Gate (though not specifying this application to those unable to walk, who were not unclean).⁷² Some later Targumim apparently associated the blind and those unable to walk with sinners excluded from God’s house.⁷³

Temple gates were useful locations for begging, since they were frequented by large numbers of people (at least some of whom might also have been in a mood more disposed than usual toward charity).⁷⁴ That the man had to be brought here daily makes sense, but that the man would be brought here at this time of day could appear more problematic.⁷⁵ But this arrival need not constitute the beginning of his begging day; it is doubtful that the man would be out in the sun in midday heat, when most people sought shade.⁷⁶ If he had people to carry him at all (and such help would be viewed as pious, like charity itself), they would also be able to move him under the colonnades. The traffic flow at the gate would increase with the approaching hour of prayer, inviting him to take up his place again.

Excursus: The Disabled, Poverty, and Begging

1. The Disabled (3:2)

Although too dismal a picture can be painted, the lot of the disabled was not an easy one. Classical Athens provided a very small pension for the disabled (Lysias *Or.* 24

Parsons, *Body*, 115, doubts whether we can be certain, though he notes (115–16) that pagan temples excluded priests for blemishes.

68. Cf. Deut 15:21; Mal 1:8, 13. Others also note this limitation (e.g., Gaventa, *Acts*, 84). In pagan priest-hoods, Parsons, *Body*, 115–16.

69. Commentaries frequently cite this passage (e.g., Dunn, *Acts*, 40; Johnson, *Acts*, 65). For similar exclusions, see 4QMMT B 49–51 (the blind) and B 52–54 (the deaf); 4Q174 1 I, 2–4 (anyone with a defect); cf. 1QM VII, 4–6; XII, 7–9; Plut. *Rom. Q.* 73, *Mor.* 281C; *BCH* 7 (1883): 477.1 in Grant, *Religions*, 7; Soph. *Philoc.* 1032–33. Only disabilities potentially marring a sacrifice (e.g., deaf-mutes, who presumably did not hear the instructions, as also minors, who might not understand them) are excluded from this activity in *m. Hul.* 1:1.

70. See Shemesh, “Angels.” Olyan, “Dimensions,” thinks that 11QT^a XLV, 12–14 reads 2 Sam 5:8 as indicating that these disabilities were polluting, but that 1QSa II, 3–10 and 1QM VII, 4–5 view them as merely profaning (though also going beyond Scripture).

71. See comments on Acts 7:19.

72. E.g., *b. Nid.* 70a. This may be why a leper, after immersing himself, stands in the Nicanor Gate (*b. Yoma* 30b); in this line of tradition, the unclean were often sprinkled there (*Num. Rab.* 9:13; a parallel with adulteresses exposed there, *b. Soṭah* 8b, is far less likely). Lepers were also known to shelter in Jerusalem’s city gates (Le Cornu, *Acts*, 177, cites *b. Pesah.* 85b).

73. See the evidence in Evans, “Targum 2 Samuel 5.8.”

74. Barrett, *Acts*, 180; Cowton, “Alms Trade.”

75. Fitzmyer, *Acts*, 277, notices the problem, though he warns that the question spoils the story.

76. E.g., Sus 7 (= Dan 13:7 LXX); Ovid *Metam.* 3.143–54; Livy 44.35.20; 44.36.1–2; Colum. *Arb.* 12.1; Longus 2.4; Aul. Gel. 17.2.10. See fuller comments at Acts 26:13.

[*Refusal of a Pension to the Invalid*]),⁷⁷ but we have little evidence for such provision elsewhere.⁷⁸ The disabled and others forced to beg appeared at temples and other public places in Mediterranean cities.⁷⁹ Although Sophocles expects his description of Philoctetes's lameness to elicit pity, he recognizes that many would view the lame as potentially troublesome and dependent (Soph. *Philoc.* 481–86); a lame man might smell bad and hence his presence prove offensive to the gods (*Philoc.* 1032–33). A lame person would endeavor to minimize discomfort however possible (Lysias *Or.* 24.10, §169).⁸⁰

Greeks and Romans often used terms of weakness (such as ἀδύνατοι, ἀσθένεια; *debiles, debilitas*) to designate the disabled; sometimes they also associated it with divine judgment or with the disabled person's bad character.⁸¹ Even some aristocrats faced discrimination based on their disability; some concealed their disabilities whereas others mocked themselves or grew depressed and even suicidal.⁸² Mostly they had to depend on their families⁸³ (though, among Gentiles, disabled infants, if considered deformed, were sometimes discarded);⁸⁴ but begging was necessary for those without family support and for the many with such support who needed to supplement it (cf. John 9:8, 18). Some were even forced to perform as clowns for the public, "displaying their physical anomalies."⁸⁵

Still, we read of blind poets, lame craftsmen (one thinks immediately of the Greek deity Hephaistos),⁸⁶ and so forth; not all disabilities were equally incapacitating, and some disabled persons were able to live more normal lives.⁸⁷ There were disabled

77. On Athens's provision for those unable to work, see further Aeschines *Tim.* 104; Arist. *Const. Ath.* 49.4; for a theoretical law perhaps based on Athens, Sen. E. *Controv.* 3.1.excerpts.

78. Libero, "Disability," 535.

79. See Stambaugh and Balch, *Environment*, 109; for begging at temples, see also Jos. *Ag. Ap.* 1.305. Beggars would have been around the various temple gates, so that one cannot decide the site of the Beautiful Gate (Acts 3:2) by isolating a common location for beggars (see Cowton, "Alms Trade").

80. In this text, by riding a horse; by contrast, Hippocr. *Airs* 22.1–36 warns that Scythians experience lameness from riding too much.

81. Libero, "Disability," 534; cf. Parsons, *Body*, 113; idem, *Acts*, 56–57. Hierocles *How Should One Behave toward the Gods?* (Stobaeus *Anth.* 2.9.7) attributes many disabilities to excess. Some drew connections (at least in individual cases) between one's physical deformity and one's base character (Vell. *Paterc.* 2.69.3–4; Libanius *Invect.* 3.12), but people knew enough to argue the contrary when they wished (Libanius *Encomium* 4.19). For the connection between status and appearance more generally, see (for Roman elite culture) Toner, *Culture*, 137. Parsons (*Body*, 109–16; idem, "Character") argues that Luke subverts physiognomic conventions here.

82. Libero, "Disability," 535.

83. A wife might need to bring in money if a husband was incapacitated (Tob 2:11; *Test. Job* 21:2–3; 22:23; 23:10; 24:4).

84. The advice of Arist. *Pol.* 7.14.10, 1335b; in Roman practice (where the decision whether to discard the infant was ultimately the father's, but the father sometimes chose the infant's death), see Boer, *Morality*, 98–99, 113, 116 (often); Allély, "Enfants malformés"; Libero, "Disability," 535 (sometimes); in more recent cultures, e.g., Dawson, "Urbanization," 324. Edwards, "Deformity," argues against overemphasizing Greek disdain for deformed infants. But malformed or unusual babies were often viewed as omens; e.g., Livy 21.62.2–3; 24.10.10; Val. Max. 1.6.5; Appian *Bell. civ.* 4.1.4; 4 *Ezra* 6:21; cf. Hesiod *W.D.* 180–81; Ptolemy *Tetrab.* 3.8.122–23; Boer, *Morality*, 100.

85. Libero, "Disability," 535. This was probably less frequent in this period, but Parsons, *Body*, 114, notes that both Plutarch and artwork indicate that making the lame try to dance was used as dinner entertainment; mocking the lame had to be warned against in 4 *Ezra* 2:21.

86. Satirized in Lucian *Z. Cat.* 8; *Sacr.* 6; *Dial. G.* 241–43 (17/15, Hermes and Apollo 1–3); 243–44 (18/16, Hera and Leto 1); 245–46 (21/17, Apollo and Hermes 1–2) (esp. Lucian's mockery in 241 [Hermes and Apollo 1]; and Leto's in 243 [18/16, Hera and Leto 1]). In one account, his embarrassed mother Hera cast him from heaven (Hom. *Il.* 18.395–98; Libanius *Narration* 7.1). An Argonaut hero was disabled in his feet because he was a son of Hephaistos (Ap. *Rhod.* 1.202–4), presupposing a genetic mechanism that most would dismiss today as Lamarckian. Among other deities, Lucian figuratively portrays Wealth (Ploutos) as blind and lame (*Tim.* 25–27).

87. Libero, "Disability," 535.

philosophers,⁸⁸ although ancient mockery of intellectual opponents did not spare their physical weaknesses (hence one mocked a “lame Peripatetic,” lit. “lame walker”).⁸⁹

The OT strongly emphasized just treatment of the disabled (Lev 19:14; Deut 27:18), including the lame (Job 29:15).⁹⁰ This emphasis on showing special kindness to the disabled (Luke 14:13, 21), as well as on their healing (7:22; 8:7; 14:8), appears elsewhere in Luke-Acts. Their healing is an eschatological gift announcing the arrival of the messianic era (7:22, recalling Isa 35:5–6, to which Luke also alludes in the “leaping” of Acts 3:8). In the end time God would “save the lame” of Israel (Zeph 3:19), gather the lame and marginalized (Mic 4:6), and make the lame into “a remnant” (4:7).

Disability of the legs could be attributed to various physical causes, including walking through cold snow (leading to frostbite and amputation).⁹¹ Yet some ancients associated maladies with punishment for misbehavior.⁹² Some later teachers opined that, at least as a rule, one who encounters the lame, the blind, or others who are visibly afflicted should say, “Blessed be the righteous judge” (*t. Ber.* 6:3).⁹³ Thus, in Greek sources, the gods and Fate often sent punishment like the crime;⁹⁴ Jewish sources, including both early sages and sectarian sources⁹⁵ as well as later rabbis,⁹⁶ recited the same principle. In many Greco-Roman sources, God or the gods punished with physical afflictions;⁹⁷ in Jewish sources, sickness often stemmed from sin.⁹⁸ Thus a woman would die childless only because of her sin (*1 En.* 98:5). The *Testament of Job* even supplies a possible sin (pride) committed by Job’s sons that made them susceptible to death (*Test. Job* 15:6–9/10).⁹⁹ One later Amora opined that a person would be born lame because the parents cohabited unnaturally (though the majority of sages

88. Notably Epictetus, as in Fronto *Ad verum imp.* 1.1.5.

89. Lucian *Dem.* 54.

90. Cf. 2 Sam 9:3. Ancient cultures did use “lameness” as an insult to ridicule the able-bodied as weak (2 Sam 5:6–8; cf. Isa 33:23); but God would protect the weak of his people, including the lame (Jer 31:8; Mic 4:6–7; Zeph 3:19), and some other ancient Near Eastern ethics defended the lame (e.g., “The Instruction of Amen-em-ope” 2, in *ANET* 422). For the lame as a character type in the LXX, see Roth, *Blind, Lame, Poor*, 107–8 (for the poor, 112–32).

91. Lucian *Book-Coll.* 6; Xen. *Anab.* 4.5.12; Hdn. 6.6.3; cf. Alciph. *Farm.* 27 (Ampelion to Euergus), 3.30, ¶1.

92. E.g., blindness (Dion. Hal. *Ant. rom.* 16.3.1; Ovid *Metam.* 3.335; *b. Ta’an.* 21a; see more fully Davies and Allison, *Matthew*, 2:135); at Qumran, cf. Naveh, “Fragments.” Much earlier, cf. *KRT C* (vi) (*ANET* 149). Borgen, “Miracles,” 101, emphasizes that this is only one option in NT narratives.

93. The response was to be the same, however, for bad news to oneself (*m. Ber.* 9:2). Cf. also *b. Ber.* 58b, though here some Amoraim harmonize opinions by differentiating one born with a condition and one who acquired it after birth. Some of what follows I have adapted from Keener, *John*, 777–78.

94. Diod. Sic. 20.62.2; see also Demosth. *Zenoth.* 6; cf. Plot. *Enn.* 3.2 [47], 13.1–17, cited in Judge, *Athens*, 185. The principle also applied to executions by rulers (e.g., Diod. Sic. 20.101.3; Aul. Gel. 7.4.4) or heroes (Apollod. *Bib.* 3.16.1; *Epit.* 1.2–3; Eurip. *Archelaus* test. iiiia.3–4 [from Hyginus *Fab.* 219]). Cf. sorcerers’ death by sorcery in Kenyan Luo tradition (Whisson, “Disorders,” 289).

95. Ps 9:15; Prov 26:27; Obad 15; Sir 27:25–27; 2 Macc 4:38; 9:5–6; 13:7–8; *L.A.B.* 44:9–10; 1QpHab XI, 5, 7, 15; XII, 5–6; 4Q181 1 1–2; *Jub.* 4:32; 35:10–11; 37:5, 11.

96. See *m. ’Ab.* 2:6/7; *Sipre Deut.* 238.3.1; *’Abot R. Nat.* 27, §56 B; *b. ’Abod. Zar.* 17b, bar.; *Ber. Sa;* *Sanh.* 108b; *y. Hag.* 2:1, §3; *Gen. Rab.* 53:5; *Tg. Rishon* on Esth 1:11; other sources in Bonsirven, *Judaism*, 110; esp. Phillips, “Balance”; cf. Sanders, *Paul and Judaism*, 125. Some did not even believe that a rabbi would face execution without having merited it somewhat through at least a minor transgression (*Mek. Nez.* 18.55ff.).

97. Hom. *Il.* 6.139; Hierocles p. 48.22–49.9 from Stob. *Ecl.* 1.3.54 (in van der Horst, “Hierocles,” 157–58); Parth. *L.R.* 29.2. Some ancients, however, attributed such afflictions directly to human vice apart from the gods (Iambl. *V.P.* 32.218).

98. E.g., *Pesiq. Rab.* 22:5; Lachs, *Commentary*, 166 (citing *b. Meg.* 17b; *Ned.* 41a; *Šabb.* 55a); Brown, *John*, 1:371; see more extensively Abrahams, *Studies* (1), 108. One should not, however, overstate the case (as in Dibelius, *Jesus*, 112–13); cf. the sickness of pious rabbis (Dvorjetski, “Medical History”). Sicknesses could be useful for meritorious suffering (e.g., *b. Ber.* 17a; *Sanh.* 107b, bar.; *Gen. Rab.* 62:2).

99. In a late source, Job himself suffered because he did not speak against wrongdoing (*Exod. Rab.* 1:9). Likewise, the death of the concubine in Judg 19 is attributed to her earlier sin with an Amorite (*L.A.B.* 45:3);

disagreed).¹⁰⁰ Prayer for forgiveness might be coupled with prayer for healing.¹⁰¹ Some Jewish teachers did, however, express skepticism that we could know the reasons the righteous suffered,¹⁰² and argued that not all kinds of suffering derived from sin.¹⁰³ Like many other narrators, Luke makes no connection with individual sin here; his theology allows for other causes (cf., e.g., Luke 13:11).

That the malady was experienced from birth might, but would not necessarily, alleviate a verdict of sin.¹⁰⁴ Some people in antiquity believed in significant prenatal activity;¹⁰⁵ it would thus not prove surprising that some could also suspect prenatal sin,¹⁰⁶ though the view was probably less dominant than is sometimes supposed.¹⁰⁷ Luke mentions that the man was disabled from birth, however, to emphasize the greatness of the cure (Acts 4:22); this was the usual function, in ancient texts, of specifying the duration of an ailment divinely cured.¹⁰⁸

2. Poverty in General (3:2)

Although only a minority of people were so destitute as to be forced to beg, poverty was pervasive. We will survey some information regarding wealth and poverty in the Roman Empire, including in Judea and Galilee, before turning to the more specific questions of charity and begging.

There was little overlap between rich and poor in classical society.¹⁰⁹ It has been estimated that in the late republic a wealthy person had 714 times the income of the poor, with the extremely wealthy holding 10,476 times the wealth of the poor. The gap between rich and poor remained in the early empire, but that between the wealthiest and the poor widened to 17,142 times.¹¹⁰ By some estimates, the rich constituted about 3 percent of the empire, with the majority of the remaining people being poor;¹¹¹ others estimate that 2 percent of the empire controlled half to two-thirds of the empire's

Dinah was raped because her father Jacob boasted (*Gen. Rab.* 79:8; 80:4). Even Elisha's sickness (cf. 2 Kgs 13:14) was attributed to sins (*b. Sanh.* 107b).

100. So *b. Ned.* 20ab.

101. Sir 38:9–10; Jas 5:14–15. For forgiveness and healing, see, e.g., *Gen. Rab.* 97 NV (perhaps spiritual here only). For other prayers for healing, e.g., the eighth benediction of the Amidah; *m. Ber.* 5:5; *b. Ber.* 60a; *Gen. Rab.* 53:14 (for God as the source of healing, also Sir 34:20 [31:17]; *b. Ber.* 60b; *Pesah.* 68a).

102. *M. 'Ab.* 4:15. In general, later Babylonian sources were more nuanced than Tannaitic and later Palestinian ones (Elman, "Suffering").

103. Urbach, *Sages*, 1:443, 446 (esp. *t. B. Bat.* 3:25 concerning Job's comforters). Pagans might also protest that their suffering was due to Fate rather than to any evil they had done (Horsley, *Documents*, 4:30–31, §7, citing *CIG* 4.9668).

104. "From the mother's womb" was a more traditional Semitic manner of expressing the situation (ἐκ κοιλίας appears about fifteen times in the LXX) than "from birth" (as in John 9:1; see Brown, *John*, 1:371).

105. E.g., Isis and Osiris copulated in the womb (Plut. *Isis* 12, *Mor.* 356A).

106. E.g., the question in John 9:2; often argued by commentators on that verse (e.g., Barrett, *John*, 356; Lightfoot, *Gospel*, 202).

107. Cf. also *b. Sanh.* 91b (sins from birth, not conception); perhaps *Exod. Rab.* 4:3 refers to a decree at birth. Some later rabbis regarded the evil impulse as inborn (*'Abot R. Nat.* 16 A; *Pesiq. Rab Kah.* Sup. 3:2), as some Gentiles viewed wrongdoing as humanity's natural bent (e.g., Crates *Ep.* 12).

108. Theissen, *Miracle Stories*, 51–52 (citing Philost. *Vit. Apoll.* 6.43; *Epid. inscr.* 1). Cf. *Test. Job* 26:1; 27:6/9; 28:1. The cause, as Wilkinson, *Health*, 88, notes, is presumably a prenatal "developmental abnormality," perhaps a severe form of clubfoot.

109. In the perspective of Arist. *Pol.* 4.3.15, 1291b. On ancient Mediterranean poverty, see also Watson, "Collection," 15–31.

110. Bastomsky, "Rich" (noting that this gap far surpassed that in Victorian England). The figures are, of course, estimates.

111. Friesen, "Demography," 369; highlighting the intermediate range, see Longenecker, "Middle." Malherbe, *Social Aspects*, 86, suggests that the actual "upper class" was perhaps 0.02 percent.

quantifiable, transferrable wealth.¹¹² A range did exist, with mobile artisans in notably better circumstances than tenant farmers,¹¹³ but the truly wealthy were few.¹¹⁴ It has been argued that the drive to acquire wealth did not transcend individual activities to generate capital or act the way a more productive market economy would.¹¹⁵ Others argue that the early empire's economy did connect many interdependent markets, though they acknowledge that it did not achieve modern sophistication.¹¹⁶

Most of the empire's labor force consisted of subsistence-level agricultural labor.¹¹⁷ Agriculture was also central to the Palestinian Jewish economy (Jos. *Ag. Ap.* 1.60).¹¹⁸ Most scholars hold that the cities exploited the production of neighboring countrysides,¹¹⁹ yet most surrounding countrysides were inadequate to support cities without cities' provisions being well supplemented by trade.¹²⁰ The economy was inadequate to support many large cities in most of the empire.¹²¹

Most of the rural empire was poor.¹²² Although some smallholders remained, the majority of the poor in both Italy and Asia Minor now lacked their own land.¹²³ Landowning defined wealth, and landowners profited enormously by exploiting farmers working their land.¹²⁴ Landowners insulated themselves against crisis¹²⁵ with large holdings.¹²⁶ By contrast, the homes of poor Egyptian farmers were terribly overcrowded (e.g., twenty-four in one adobe house; twenty-six in another).¹²⁷ Subsistence for the poor was minimal, so that most died young; most peasants probably made barely enough to stay alive.¹²⁸ Moses Finley argues that "Cato gave his chained slaves more bread than the average peasant in Graeco-Roman Egypt could count on as a regular staple."¹²⁹ The soil in most of the empire (in contrast to the land around the Nile) was not highly productive, yielding its

112. Blomberg, *Poverty*, 89–90. Malina, *Anthropology*, 72–73, also estimates 2 percent for the elite. More modestly, 1.5 percent might control 20 percent of the empire's income (Scheidel and Friesen, "Size").

113. For important observations concerning stratification below the elite, see Holmberg, "Methods," 263, 265–66, and sources he cites.

114. For matters of comparison, the average middle-class person in the United States at the time of this book's writing has a much higher standard of living than any but the most wealthy in Roman antiquity.

115. Finley, *Economy*, 144.

116. Temin, "Market Economy."

117. Garnsey and Saller, *Empire*, 43–46; Andraeu, "Wages," 542 (noting subsistence level also for manual laborers). On Greek farmers, see Osborne, "Farmers"; on Roman farmers, Rathbone, "Farmers."

118. For details regarding agriculture in Jewish Palestine, see Applebaum, "Economic Life," 646–56.

119. E.g., Garnsey and Saller, *Empire*, 119.

120. Engels, *Roman Corinth*, 121. Engels argues (131–42) that cities such as Corinth survived by trade, not exploitation.

121. Erdkamp, "Agriculture." Engels, *Roman Corinth*, 27–33, argues that Corinth's outlying areas did not produce enough agriculturally to support it.

122. MacMullen, *Social Relations*, 1–27. Of course, economics, like education (e.g., Aelian *Farmers* 20 [Phaedrias to Sthenon], end), varied geographically among rural populations. Many scholars estimate about 90 percent of the empire as agrarian peasants (Horsley and Hanson, *Bandits*, xii); for arguments for gradual and eventual agrarian decline in Roman Palestine, see Gil, "Decline."

123. Grant, *Social History*, 72. For independent subsistence farmers, despite their relative invisibility, see also Garnsey and Saller, *Empire*, 75–77. Independent workers earned small wages (e.g., White, "Finances," 232) and could find extra work only during harvest (Finley, *Economy*, 107); landowners kept their workforce no larger than necessary to maximize profits (MacMullen, *Social Relations*, 42). On day laborers' lack of security, see also Arlandson, *Women*, 92–98.

124. MacMullen, *Social Relations*, 48–56. For land as the basis for wealth, see also Garnsey and Saller, *Empire*, 64–82. Some argue that tenant farmers often hated cities because they housed their exploiters (Lee, "Unrest," 128; see Keener, *Acts*, 1:589–96).

125. On famine, see comments on Acts 11:28.

126. Finley, *Economy*, 108.

127. MacMullen, *Social Relations*, 13.

128. *Ibid.*, 13–14.

129. Finley, *Economy*, 107.

fruits only with arduous toil.¹³⁰ A hailstorm could destroy one's crops and leave one at the mercy of potential creditors for survival.¹³¹

That rich landlords oppressed the poor was widely enough known (Apul. *Metam.* 9.35–37).¹³² Some wealthy landowners tried to seize the land of those unable to protect their own interests.¹³³ A landholder might send his own slaves or tenants to seize the land of another person if the latter was weak.¹³⁴ The rich landlords tended to live in cities or sometimes villas, ruling their large estates from afar.¹³⁵ These landlords often effectively controlled the labor force of entire villages on or near their estates.¹³⁶ They were the towns' benefactors¹³⁷ and also could render decisive judgments more economically than would courts.¹³⁸ Their generally absentee status, however, often laid these communities open to exploitation by the landlords' delegated managers.¹³⁹

Those who lived on and worked these estates were poor tenant farmers,¹⁴⁰ who were often subject to exploitation.¹⁴¹ Tenants were generally more profitable economically to landholders than slaves were, since the landholder owed them no maintenance and could lay them off in difficult times.¹⁴² A worker could well fear an estate's owner if something went awry.¹⁴³ At least in some areas, the poor resented the oppression they experienced from the empire and its local collaborators.¹⁴⁴ Analysis of skeletal remains reveals the chronic undernourishment and physical stress on people who did not belong to the elite.¹⁴⁵

Pliny considers himself a benevolent absentee landowner but finds wearisome dealing with the tenants' complaints when he visits;¹⁴⁶ he reports that his tenants have fallen so far into debt, despite his reducing the rent, that they no longer even try to catch up on it.¹⁴⁷ His urban servants supervise the peasants to make sure they are

130. MacMullen, *Social Relations*, 32–33.

131. So in Alciph. *Farm.* 3 (Amnion to Philomoschus), 1.24. Alciph. *Farm.* passim reveals that others in the empire were aware that farmers faced hardships; Dio Chrys. *Or.* 70.1 assumes knowledge that they were hard workers.

132. On class prejudice, see, e.g., MacMullen, *Social Relations*, 138–41.

133. E.g., Philost. *Hrk.* 4.1–2.

134. MacMullen, *Social Relations*, 7–12. The drive was toward consolidating rural resources into increasingly "fewer hands" (6, citing sources including Cic. *Agr.* 3.4.14; Petron. *Sat.* 48.3; 77.3; Sen. *Y. Ep. Lucil.* 90.39; *Ben.* 7.10; Ambrose *De Nabuthae historia* 1; Jerome *Commentary on Micah* 2.1; Cyprian *Ad Donatum* 12).

135. Fiensy, "Composition," 215.

136. MacMullen, *Social Relations*, 39–40, noting (39) that towns could even be sold. Hock, "Ethnography," 108, cites Char. *Chaer.* 1.3.1; 1.11.2 for peasants living on or near many estates.

137. See Pliny *Ep.* 4.1.4–5; 9.15.1; *CIL* 6.1492 (101 or 102 c.e., in Sherk, *Empire*, §193, p. 248); MacMullen, *Social Relations*, 47 (and passim). Many of our sources for specific aspects attest them particularly for the West, but they at least illustrate the picture of social stratification more generally.

138. MacMullen, *Social Relations*, 39.

139. *Ibid.*, 5–6.

140. Lee, "Unrest," 127, compares them with a sort of rural client (employing the image more loosely than its narrower political sense).

141. Foxhall, "Tenant" (also noting various kinds of tenancy). For tenant farmers' difficult situation, see also Krause, "Colonatus," 538–39.

142. Shelton, *Romans*, 155.

143. E.g., Alciph. *Farm.* 19 (Polyalsus to Eustaphylus), 3.22, esp. ¶¶3–4, where they accidentally snared the master's pet dog.

144. Toner, *Culture*, 167 (though citing esp. evidence from fourth-century Egypt).

145. *Ibid.*, 63.

146. Pliny *Ep.* 9.36.6. For landholders' visits to estates, see also Hock, "Ethnography," 111, citing examples in novels that imitate social reality (Char. *Chaer.* 2.3.1–5; 3.8.2–9; Ach. *Tat.* 5.17.2–10; Xen. *Eph. Anthia* 2.1.2; 11.1; cf. in greater detail Hock, "Experience," 314–19). In Char. *Chaer.* 2.3.10, the landowner's country estate had plenty of housing space to host his entourage (Hock, "Ethnography," 108).

147. Pliny *Ep.* 9.37.2. (Aristocrats often accumulated land through peasants' debts; Horsley, *Galilee*, 215–21.) One solution Pliny considers is to lease the land for a proportion of produce rather than for monetary

working while he enjoys a bit of leisure.¹⁴⁸ He complains about a former landowner who sold peasants' possessions to compensate for their debt, thereby diminishing their future resources. This, he reasons, foolishly diminished their future ability to pay.¹⁴⁹

Taxes in the Roman Empire must have seemed daunting to the poor.¹⁵⁰ Most peasants in the empire paid 10 percent for rent, 10 percent for tax on the land, and an additional poll tax, but this was better than the 50 percent that eighteenth-century French peasants paid (on top of a 10 percent church tithe and other taxes).¹⁵¹ Tax breaks were usually based more on status than on need; thus, for example, the Hellenist metropolites¹⁵² in Egypt's nomes received tax breaks and hence were taxed less than the other, poorer Egyptians.¹⁵³ Taxes in Judea were also high.¹⁵⁴ Much of the grain in Upper Galilee was designated for Caesar (Jos. *Life* 71).¹⁵⁵ With the Jewish taxes—all three biblical tithes (Jos. *Ant.* 4.240)—on top of government taxes, agrarian peasants who actually did pay all the tithes that strict interpreters expected carried a heavy tax burden.

3. Urban and Judean Poverty (3:2)

More directly relevant to our passage are the urban poor, whose plight could be extreme.¹⁵⁶ Philip Esler describes the ancient urban poor as “ill-fed, housed in slums or not at all, ravaged by sickness,” and with little hope of social betterment.¹⁵⁷ The divide between wealth and poverty was particularly obvious in cities.¹⁵⁸ The poor constituted the majority of cities' residents; at Pompeii they even constituted a sufficiently significant voting bloc that “the beggars” could “demand” someone's election.¹⁵⁹ In Rome they often lacked enough food,¹⁶⁰ and they had to pay high rent for wretched lodgings.¹⁶¹ Since they often lacked sufficient income to cover basic necessities, their situation was desperate;¹⁶² Rome could not have supported itself without depending on its empire.¹⁶³

rent (9.37.3). Pliny would reduce rents also after a bad harvest (10.8.5); what is noteworthy to us is how easily he could *afford* to do so.

148. Pliny *Ep.* 9.20.2. Some, however, may have opined that poverty trained people better for hard work than luxury did (Eurip. *Alexander* frg. 54, from Stobaeus 4.33.3).

149. Pliny *Ep.* 3.19.6. Replacing such tenants, he wants to employ good slaves there who need no chains, since he does not use chained labor (3.19.7).

150. MacMullen, *Social Relations*, 34–37. One also needed to reckon with customs duties, taxes on transported goods (2.5 percent), sales tax (1 percent), and inheritance tax (5 percent) (O'Rourke, “Law,” 183).

151. Engels, *Roman Corinth*, 133. (He earlier places the rents at 20–40 percent but notes that even with taxes at 60 percent in the fourth century, peasants survived, 39–40.)

152. On these gentry, see Lewis, *Life*, 45–64.

153. *Ibid.*, 41. For Roman repression of Egypt, see 207. For full freedom from taxes as a special honor, see, e.g., 1 Sam 17:25; Jos. *Life* 429.

154. Others have estimated higher in Judea than Engels's general figures above, such as 40 percent or more (Horsley and Hanson, *Bandits*, 55–59, esp. 58–59) or 50 percent (Oakman, “Countryside,” 165), but Sanders, *Judaism*, 146–68, esp. 158–68, suggests that the total of taxes and tithes for Jewish peasants was probably below 35 percent, though difficult for the poor. Crossan, *Jesus*, 221, argues that the tax burden was no worse than elsewhere in the empire; yet this was bad enough for the poor.

155. Some Galilean grain belonged to Berenice (Jos. *Life* 118–19), but perhaps because of her ownership of the fields.

156. On the plight of the urban poor, see Esler, *Community*, 171–79.

157. *Ibid.*, 179.

158. In Rome, see Dupont, *Life*, 30–55 (with little middle ground between rich and poor).

159. MacMullen, *Social Relations*, 87.

160. Juv. *Sat.* 3.203–11.

161. Juv. *Sat.* 3.164–67 (also complaining, however, about the cost of food for one's slaves; Juvenal is a better source for the cost of living than for the suffering of the poorest).

162. See, e.g., Gager, “Class,” 106.

163. Cf. the portrait in Rev 17:3 (and comments in Bruce, *Message*, 86).

To provide for (and pacify) the poor of Rome, emperors in the early empire had to provide a form of food welfare, the grain dole.¹⁶⁴ Providing grain for the people had always earned favor with the people for those who could afford to sponsor this benefaction;¹⁶⁵ the emperor protected his political power in part by absorbing this activity into responsibilities of the government.¹⁶⁶ Augustus provided the dole monthly for the city's poor (Suet. *Aug.* 40.2), though he found ways to limit it when less grain was available (42.1–3). Whereas the ruler effective in ensuring the grain supply earned praise,¹⁶⁷ Dio Cassius lists among Nero's atrocities that he deprived the Romans "of the free dole of grain."¹⁶⁸ This benefaction required much attention; supporting perhaps two to four hundred thousand people¹⁶⁹ was no small undertaking.¹⁷⁰ Rome was always vulnerable if the supplies of Egypt were cut off,¹⁷¹ making control of Egypt and the efficiency of the grain fleet crucial.¹⁷²

The dole was important to maintain political stability in the capital. During food shortages, riots were to be expected,¹⁷³ including when grain supplies were cut off externally.¹⁷⁴ Ancients were aware of the possibility of class strife more generally,¹⁷⁵ but unrest was generated especially in times of hunger.¹⁷⁶ The high price of grain nearly caused riots in 32 C.E. (*Tac. Ann.* 6.13), and in 51 C.E. hostile crowds again gathered in Rome (12.43).

Exploitation of the poor was not a distinctively Roman problem, appearing, for example, in Gaul before Roman subjugation.¹⁷⁷ Jewish Palestine, too, had its elite classes.¹⁷⁸ For three centuries, most of the elite in Jewish Palestine had been priests,¹⁷⁹ and Josephus reports that aristocratic priests boldly seized the support designated for the poorer priests.¹⁸⁰ In Jewish piety, the designation "poor" sometimes applied to the pious;¹⁸¹ the rich were sometimes thought to oppress

164. E.g., Gager, "Class," 106; Hardy, *World*, 96. Later, meat was also provided (e.g., Philost. *Hrk.* 1.5), but it was currently a private responsibility (Sanders, *Jesus to Mishnah*, 277).

165. E.g., Sir 31:23–24 [34:23–24]; Livy 4.13.3; Lucan *C.W.* 3.52–58; Suet. *Jul.* 26.3.

166. Stambaugh, *City*, 134. Cf. the *curator annonae* (Clarke, "Italy," 474; Stambaugh, *City*, 145; O'Rourke, "Law," 169); controller of the grain supply was one of the early empire's highest offices (*Tac. Ann.* 1.7; Epict. *Diatr.* 1.10.2). Managing the city's grain without personal profit could make an administrator popular (*Tac. Ann.* 14.51).

167. Pliny *Panegy.* 29.1–5.

168. Dio Cass. 62.18.5 (LCL, 8:117).

169. For differing estimates within this range, see, e.g., Carcopino, *Life*, 65; Casson, *Mariners*, 207. See further discussion regarding Rome's population at Acts 28:16.

170. On the economic demand, see, e.g., Koester, *Introduction*, 1:327.

171. *Tac. Ann.* 2.59; *Hist.* 3.48. Concerns about cutting off the grain supply were also important in ancient Athens (*Lysias Or.* 22).

172. On this fleet, see comments on Acts 27:6. Rome earlier had to deal with pirates who could obstruct the trade (Jones, "Army," 200, citing *Jos. War* 3.414–31), but Pompey had mostly eliminated these roughly a century before the narrative world of Acts begins.

173. E.g., Stambaugh, *City*, 143; MacMullen, *Social Relations*, 66. People might even riot when they did not manage to see an actor in the theater, which forced the government to fund actors better (Dio Cass. 56.47.2); another actor who offended Romans was lynched on the spot (Diod. Sic. 37.12.1).

174. Appian *Bell. civ.* 5.8.67.

175. Arist. *Pol.* 5.1.6, 1301b. During the republic, poor multitudes in Rome were easily stirred to anger against the rich by misfortunes (e.g., Dion. Hal. *Ant. rom.* 9.25.2).

176. Famine could lead even to cannibalism (e.g., Deut 28:55, 57; 2 Kgs 6:28–29; Polyb. 1.85.1; Plut. *Luc.* 11.1; *Tac. Hist. frg.* 1; cf. Diod. Sic. 1.84.1; Appian *Bell. civ.* 12.6.38).

177. Caesar *Gall. W.* 6.13.

178. Stern, "Aspects," 580–621.

179. Sanders, *Jesus to Mishnah*, 79; Stern, "Aspects," 580–612.

180. *Jos. Ant.* 20.181, 206–7; cf. *Life* 80. The tithes may have barely supported the poorer priests to begin with (Fiensy, "Composition," 220). Contrast the friendlier picture in *t. Pe'ah* 4:3.

181. Davids, *James*, 43, 111 (citing, e.g., Sir 10:22–24; *Pss. Sol.* 5; 1 *En.* 108:7–15; 1 QpHab XII, 3, 6, 10; 4 QpPs 37; 1 QM XI, 9; 1 QH^a XI, 25; also rabbinic sources). It was said that Hillel had been poor (*b. Yoma*

the poor (Sir 13:20);¹⁸² and one could speak of a poor person “before his ruler” (1QS IX, 22–23).¹⁸³

Like other locations in the empire, rural Galilee presumably had a number of tenant farmers working absentee landowners’ estates.¹⁸⁴ Rabbinic evidence can support the picture of rich landowners and poor peasants in Galilee,¹⁸⁵ but while archaeological evidence suggests this situation in Galilee, it also suggests less disparity between rich and poor there than in much of the empire.¹⁸⁶ Perhaps this lack of disparity simply suggests that most of the wealthy did not live in rural Galilee, which was very poor;¹⁸⁷ in this period, many wealthy Palestinian Jews undoubtedly lived in Jerusalem¹⁸⁸ as well as in the two Galilean cities of Sepphoris and Tiberias.¹⁸⁹ Although most Jerusalemites were not wealthy, many of them held steady employment; the city produced as well as consumed.¹⁹⁰

Just as diminished food supplies could stir unrest in Rome, economic problems contributed toward the social unrest in Judea that helped precipitate the Judean revolt.¹⁹¹ Power struggles within the Jewish ruling class probably constituted a factor in the Judean revolt.¹⁹² (That priestly aristocrats soon challenge Peter and John for providing to the needy man a popular “benefaction” that they have not provided is noteworthy [Acts 4:5–9].)

Wealthy Romans typically viewed poverty as shameful, driving people to morally undesirable behaviors;¹⁹³ some ancient thinkers, though, argued that one should distinguish the honorable from the dishonorable reasons for particular cases of poverty.¹⁹⁴ Some later Jewish sages believed that God would protect students of Torah from such poverty and certainly from the need to beg (*b. Šabb.* 151b); poverty was one of the worst possible problems (*Exod. Rab.* 31:14), even atoning for sin (*b. Erub.* 41b).¹⁹⁵ In other sources, however, poverty was considered helpful for Jewish people¹⁹⁶ because

35b). Josephus’s claim that the Pharisees lived simply (*Ant.* 18.12) may assimilate them to Stoics (Feldman in LCL, 9:10–11 n. b). For the poor in the OT, the Apocrypha, and the Pseudepigrapha, see Hoyt, “Poor in Luke-Acts,” 13–61.

182. Cf. Johanan ben Zakkai’s criticism of property owners in *‘Abot R. Nat.* 31, §67 B.

183. Cf. Phaedrus 1.15 on the difference between enslavement and life as a peasant: it makes little difference if one changes masters. Cf. also the propriety of using slaves or foreign serfs to till the soil in *Arist. Pol.* 7.8.5–6, 1329a.

184. See Luke 20:9–10; Mark 12:1–2; Matt 21:33–34; Applebaum, “Economic Life,” 657–60. On the problem of landlessness in Jewish Palestine after Pompey, see Stambaugh and Balch, *Environment*, 91–92.

185. Urbach, *Sages*, 1:632.

186. Goodman, *State*, 33. Hirschfeld, “Ramat Hanadiv,” reinforces this picture of wealthy landowners versus the poor, although there remains great debate on his view of Qumran.

187. Freyne, *Galilee, Jesus*, 155, 160. Possibly, Roman liberation of Hellenistic cities from Hasmonean rule had produced more landless Jewish peasants (Horsley and Hanson, *Bandits*, 57–58), but the poverty of Galilean peasants should not be overestimated (Reed, *Archaeology*, 97).

188. Neusner, *Beginning*, 24. The rural Galilean poor resented urban aristocrats (Freyne, *Galilee, Jesus*, 148).

189. Freyne, *Galilee, Jesus*, 149.

190. See Finger, *Meals*, 108–24.

191. See Applebaum, “Economic Causes”; Goodman, *Ruling Class*, 51–75; Reicke, *Era*, 210; cf. Lang, “Oppression.” In earlier eras, too, famine had moved people toward revolt (1 Macc 9:24). In Galilee as in Rome, free distribution of food created interest but had to be managed in such a way as to avoid rioting (Goodman, *State*, 39).

192. Goodman, *Ruling Class*, 19. Goodman argues that Romans per se were less a particular object of resentment than “Gentile” oppressors in general (76–108). The Roman sympathies of some of the Judean aristocrats probably presented them as traitors to those suffering the worst oppression (Horsley and Hanson, *Bandits*, 227–28).

193. Saller, “Poverty.” Cf. the marginal status of the propertyless in Ungern-Sternberg, “Proletarii,” 1.

194. Philost. *Ep. Apoll.* 97 (from Stob. *Flor.* 95.9).

195. Cf. *Exod. Rab.* 52:3.

196. E.g., *b. Hag.* 9b; *Lev. Rab.* 13:4.

its very hardship led toward repentance.¹⁹⁷ See the fuller discussion concerning ancient views of wealth at Acts 2:44–45.

4. Alms (3:2)

Beggars requested charity precisely because they could expect that some people would accommodate their request. Luke often emphasizes the piety involved in almsgiving (Luke 11:41;¹⁹⁸ 12:33; Acts 9:36; 10:2, 4, 31; 24:17), providing ten of the thirteen NT uses of ἐλεημοσύνη.¹⁹⁹ Despite Judaism's heavy emphasis on charity, being a recipient of charity, or otherwise having to depend on others, was considered shameful;²⁰⁰ despite the injustice of such a stigma, it undoubtedly did reduce abuse of the system. Judaism stressed both charity and a high work ethic; most beggars genuinely had no alternative means of income.²⁰¹ Jewish sources recognized as a moral, though not legal, obligation the practice of giving to beggars who requested alms.²⁰²

Charity was one of the most basic and often-emphasized obligations in early Judaism;²⁰³ sometimes it appeared even among the three most prominent moral demands.²⁰⁴ It was central to the early Jewish conception of “righteousness.”²⁰⁵ Altruistic²⁰⁶ ethical (and not simply “legalistic”) concerns motivated Jewish emphasis on charity.²⁰⁷ Even Gentiles recognized the Jewish emphasis on charity (Jos. Ag. Ap. 2.283). A Jewish sage emphasized giving charitable help to the poor (Ps.-Phoc. 23) and even taking in the homeless (Ps.-Phoc. 24). Josephus emphasized that God

197. *Song Rab.* 1:4, §4.

198. A Lukan redaction of Q; cf. discussion of the underlying Aramaic in Black, *Aramaic Approach*, 2; Burney, *Aramaic Origin*, 9; Argyle, *Matthew*, 176; Keener, *Matthew*, 553.

199. The Apostolic Fathers add a few more early Christian uses (2 *Clem.* 16.4; *Did.* 1.6; 15.4); it appears about fifty times in the LXX, most commonly in Tobit (Tob 1:3, 16; 2:14; 3:2; 4:7–11, 16; 12:8–9; 13:8; 14:2, 10–11) and Sirach (Sir 3:14, 30; 7:10; 12:3; 16:14; 17:22, 29; 29:8, 12; 31:11; 35:2; 40:17, 24).

200. See also *b. Ber.* 6b; *Beza* 32b, bar.; *Erub.* 18b; *Pesah.* 112a; *Yebam.* 63a; *Song Rab.* 2:5, §3; cf. Derrett, *Audience*, 43.

201. In a society dominated by honor and shame, some considered it better to die than to beg (Sir 40:28–30; cf. Diogenes *Ep.* 34); few would resort to that lifestyle unnecessarily. Work generally generated more income than begging anyway; especially among Gentiles, begging usually met refusal (Diogenes *Ep.* 11; Diog. Laert. 6.2.49).

202. Guelich, *Sermon on Mount*, 223.

203. E.g., Prov 29:7; Ezek 16:49; Tob 1:3; 2:14; 4:7; Sir 4:1–8; 17:22; *Test. Job* 9–12; 15:1; *Test. Iss.* 3:8; Ps.-Phoc. 29; Jos. *Asen.* 10:11/12; *m. Demai*; *t. B. Qam.* 11:3; *Demai* 3:16; *Abot R. Nat.* 3, 7 A; 14, §33 B; *b. Ta'an.* 21a; in the Diaspora, *CJJ* 1:142, §203. On charity in Judaism, see further Johnson, *Sharing Possessions*, 135ff.; Kim, *Stewardship and Almsgiving*, 277–83; Montefiore and Loewe, *Anthology*, 412–39; Le Cornu, *Acts*, 180–82; Watson, “Collection,” 56–119 (in the OT, 56–80; after the OT, 80–96, 106–19). On Christian charity in the patristic period, see Grant, *Christianity and Society*, 124–45; idem, *Paul*, 57; cf. *Did.* 1.5–6; most of Jesus's initial followers were probably much poorer than most of the audience of the Tannaim (Cohen, *Maccabees*, 122).

204. One early teacher lists the three basic deeds as Torah, the temple service, and charity (*m. 'Ab.* 1:2; cf. *Abot R. Nat.* 31, §67 B); another, judgment, truth, and peace (*m. 'Ab.* 1:18); other, later teachers would list prayer, charity, and repentance (*y. Ta'an.* 2:1, §9; *Pesiq. Rab Kah.* 28:2; *Ecl. Rab.* 7:14, §1). One Jewish-Christian writer claimed that charity was more meritorious than fasting or prayer (2 *Clem.* 16.4), fitting a Jewish teaching that it outweighed all other commandments (*t. Pe'ah* 4:19; *b. B. Bat.* 9a).

205. See esp. Przybylski, *Righteousness*, 67, 74–75, for Tannaitic sources.

206. Magnetic resonance technology shows that altruistic decisions involve the most developed and distinctively human parts of the brain (Moll et al., “Networks”); they are also associated with better psychological health (Schwartz et al., “Behaviors”).

207. With, e.g., Liébaert and Bernard, “Dieu et prochain.” One must give charity from the right kind of heart (*m. 'Ab.* 5:13; Bonsirven, *Judaism*, 67; cf. Ethiopic *Apoc. Peter* 11). Indeed, some Jewish teachers also praised secret charity and objected to ostentation in charity (*Test. Job* 9:7–8; *m. Šeqal.* 5:6; *t. Pe'ah* 4:19–21; *Šeqal.* 2:16; *b. B. Bat.* 9b; *Pesah.* 113a; see further Abrahams, *Studies* [2], 125; Odeberg, *Pharisaism*, 84–85; Bonsirven, *Judaism*, 153; Lachs, *Commentary*, 113; Vermes, *Religion*, 196).

blessed humanity with many material blessings so that one could give to others (*Ant.* 4.237).

Later rabbis developed such thought further. Later rabbinic sources suggest a wide range of charitable programs to meet the needs of the poor.²⁰⁸ Sages declared that one should treat the poor as members of one's family (*m. 'Ab.* 1:5). Texts speak of specifically assigned persons who locally collect and distribute charity,²⁰⁹ although late texts sometimes also warn against their oppressing the poor by demanding funds from them for the collections (*Lev. Rab.* 30:1). In an act of piety, a second-century Tanna began to support his ex-wife and her blind husband, for whom she was begging alms (e.g., *y. Ketub.* 11:3, §2). Some sages recounted acts of sacrificial charity being rewarded by providence.²¹⁰ Still, some teachers wanted to impose limits on charity (roughly 20 percent beyond tithes) lest one impoverish oneself out of well-intentioned devotion.²¹¹

Greek culture also practiced charity but did not emphasize it to the same extent (cf. *Artem. Oneir.* 3.53), except in the sense that rich benefactors contributed to public works and were requited by honor from the populace.²¹² But while scholars rightly note that Greco-Roman society emphasized charity less than Judaism, this comparison can be overplayed.²¹³ Greeks and Romans did have some means of caring for the poor and of benefaction,²¹⁴ though these never effectively challenged either the exploitation of urban peasants or the personal deprivation of the urban masses. Thus a moralist could praise a man who provided food for the hungry and dowries for girls who could not afford them (*Val. Max.* 4.8.ext. 2).²¹⁵ In a later period, a writer praises Damianus of Ephesus for not only helping repair public buildings but using his wealth to help the poor (*Philost. Vit. soph.* 2.23.605). No less an accepted Greek authority than Homer claimed that strangers and beggars are sent by Zeus and hence one must treat them kindly (*Od.* 6.207–8; 14.57–58). The first-century Stoic philosopher Musonius Rufus urged providing charity to support the common good, though a classicist opines that he was “one of the first” to do so.²¹⁶ Later Herodes the Athenian counseled using wealth to help those in need instead of hoarding it.²¹⁷ Wealthy Pliny the Younger emphasized that true generosity involves helping friends without means to repay, not just those who will reciprocate with equivalent gifts (*Ep.* 9.30.1–2)—though, of course, his offhand remarks are less demanding than Luke's Jesus in this regard (Luke 14:12–14).

208. See Dalin, “*Tzedakah*” (emphasizing dignity for the needy).

209. CD XIV, 13–16; *t. B. Qam.* 11:3; *B. Meši'a* 3:9; *Demai* 3:16; cf. Acts 4:35; 6:2–3; the date of the rabbinic practice is unclear (cf. Seccombe, “Organized Charity”).

210. E.g., *Lev. Rab.* 5:4; *Deut. Rab.* 4:8.

211. Hengel, *Property*, 20; cf. *Jeremias, Jerusalem*, 127.

212. Stambaugh and Balch, *Environment*, 64; cf. *Ps.-Phoc.* 80; Boer, *Morality*, 34–36; Zuiderhoek, “Sociology.” Boer (*Morality*, 151–78) argues that nothing was done to help the very poor, in contrast to generosity to those in need in the givers' social class.

213. I was guilty of the same overgeneralization in Keener, *Background Commentary*, 61. See, e.g., *Publ. Syr.* 274; *Corn. Nep.* 5 (Cimon), 4.1–2; *Libanius Descr.* 29.3; cf. *Hesiod W.D.* 354 (give to the generous; cf. perhaps *Prov* 11:25; 22:16); Romans also praised those who used their resources to serve the needy instead of profiting from their office (*Dion. Hal. Ant. rom.* 12.1.7).

214. On which see, e.g., Kim, *Stewardship and Almsgiving*, 253–77; Hoyt, “Poor in Luke-Acts,” 84–96. Addressing Gentile responses to hunger, Watson, “Collection,” notes patronage (31–33), benefactors (33–40), the corn dole (41–46), and liturgies (46–47); for a comparison with Jewish aid to the poor, see 123–39.

215. Cf. *Sen. E. Controv.* 1.19, 14 for helping needy relatives and 1.1.19 for nonrelatives (here a needy elderly man). An advocate compares his client's generosity to individuals with the benefaction of public works in *Quint. Decl.* 260.13.

216. Lutz, “Musonius,” 30; cf. *Mus. Ruf.* 19, p. 122.24–27. In a contemporary philosopher, see *Sen. Y. Ep. Lucil.* 95.51 (for honorable works of kindness, including sharing bread with the hungry).

217. *Philost. Vit. soph.* 2.1.547 (he functioned as a municipal patron, giving to cities; see 2.1.548–49).

5. Begging (3:2–3)

Although a practiced beggar can sometimes discern who will not give, the disabled man in this passage could not know who might give something. If second-century rabbis preserve reliable historical tradition here, people entering the temple could not expose their wallets to view (*t. Ber.* 7:19).²¹⁸ Temple gates were, however, a common place for begging,²¹⁹ as here (see the discussion above on the Beautiful Gate).

Despite some examples of charity toward the poor, the dominant ethos among the rich was disdain for the poor, whose need seemed endless.²²⁰ Certainly, Luke understood this to be the general view and challenged it accordingly (Luke 14:21–23).²²¹ What in modern times has been labeled “compassion fatigue” may have numbed even the most compassionate, given the boundless need. One scholar comments that 15 percent of urban populations were considered “expendables,” those for whom the rest of society had no use, including beggars, unfamilied widows and orphans, and so forth.²²² In major cities such as Rome, one encountered beggars regularly,²²³ as in many parts of the world today; some places even had colonies of beggars.²²⁴

Ancient Greek ethics demanded kindness toward strangers and beggars, treating them as sent by Zeus (*Hom. Od.* 6.207–8; 14.57–58). Views about them, however, varied widely. Although beggars could be viewed as homeless through the tragedies of war or exile (Tyrtæus 10.3 [*GEF*]), they could be associated with laziness (Hesiod *W.D.* 299ff., 395ff., 496–97) or idleness (Thucyd. 2.40.1).²²⁵ Later Roman law, understandably, forbids begging for employable men (Justin. *Cod.* 11.26.1).²²⁶

Those unaccustomed to a lifestyle of begging considered it shameful or embarrassing.²²⁷ Nevertheless, beggars could not afford to be shy about their need; casting aside any semblance of honor, they had to beg boldly or stay poor (*Hom. Od.* 17.347, 578).²²⁸ The disabled typically had no choice,²²⁹ as is often the case today for recently urbanized disabled people with minimal extended kin support in many Majority World cities. The disabled were susceptible to severe abuse. Thus declaimers presented an outrageous hypothetical situation in which a man rescued discarded children only to cripple them so that he could have them beg and take a percentage of their profits

218. So Barrett, *Acts*, 180, rightly preferring this view to the stricter (and less enforceable) prohibition of wallets there in *m. Ber.* 9:5.

219. E.g., for Cynic philosophers, in Dio Chrys. *Or.* 32.9 (along with Alexandria’s streets). Their broad colonnades made temples useful places for begging (*Jos. Ag. Ap.* 1.305; perhaps Acts 14:8–9, 13).

220. Jeffers, *World*, 193. Citing Plato *Laws* 936C, Judge, *Athens*, 185, points out that Plato’s ideal state resolved the issue of begging by expelling beggars beyond its territory.

221. Despite the church fathers’ charity ethic, contempt remained (Hahn, “Beggars,” 580, cites Chrys. *Hom. Matt.* 48.6–7).

222. Arlandson, *Women*, 108–9 (more on the “expendables,” 109–12).

223. Hahn, “Beggars,” 580, cites *Hor. Ep.* 1.17.48ff.; *Sen. Y. Vit. beat.* 25.1; *Mart. Epig.* 4.53; 10.5; 12.32; *Juv. Sat.* 3.13ff.; 4.117; 5.6ff.; 14.299ff.

224. Hahn, “Beggars,” 580, citing *Sen. Y. Vit. beat.* 25.1; *Juv. Sat.* 4.117–18. Although beggars often appear alone, as here, they may have sometimes experienced group support (cf. lepers, though not explicitly beggars, in Luke 17:12–13); one source even suggests that they had their own sort of code language (Toner, *Culture*, 141, citing Lucian *Hist.* 22).

225. Hahn, “Beggars,” 579; Reden, “Unemployment,” 112.

226. Hahn, “Beggars,” 580. Unfortunately, probably a quarter of urban populations lacked sufficient employment to sustain themselves, and perhaps 30–40 percent more could not reach subsistence levels (Reden, “Unemployment,” 111).

227. E.g., *Mus. Ruf.* 11, p. 80.19, 21–23; *Hermog. Issues* 50.14–16; Luke 16:3; *Sir* 40:28–30.

228. Alexander expected even his friends to ask boldly (*Plut. Alex.* 39.3–4).

229. E.g., *y. Ketub.* 11:3, §2 (the story concerns a Tanna but is probably Amoraic).

(Sen. E. *Controv.* 10.4.intro).²³⁰ Although people gave them alms, they prayed for them to die and hence receive mercy (10.4.4); but some argued that a maimed beggar's life was preferable to death from exposure (10.4.17).

Cynics were known to be particularly insistent beggars,²³¹ often to others' disdain,²³² although the mendicant lifestyle was hardly limited to their group.²³³ Diogenes the Cynic, known for his wit, reportedly once begged from a stingy person "who was slow to respond; so he said, 'My friend, it's for food that I'm asking, not for funeral expenses'" (Diog. Laert. 6.2.56 [LCL]). To another, who dared Diogenes to persuade him, the Cynic replied that had he the power of persuasion, he would have persuaded the man to hang himself (6.2.59).²³⁴ One Cynic source advocated practicing begging from statues to accustom oneself to being turned down.²³⁵

Begging for alms was viewed as a wretched existence (Artem. *Oneir.* 3.53).²³⁶ Sores and lice helped identify the poorest, and beggars were typically unwashed and their hair uncut.²³⁷ At least in parody, a beggar could even be assaulted by someone from whom he begged alms (Lucian *Tim.* 47). In one story, a sage forces the reluctant people of Ephesus to stone to death a pleading beggar, but fortunately they discover incontrovertible evidence that the beggar was merely a demon in disguise (Philost. *Vit. Apoll.* 4.10). (See also comments above on the abuse of the disabled.)

Despite Judaism's heavy emphasis on charity, begging was viewed as unpleasant;²³⁸ some considered it better to die than to beg (Sir 40:28). Although begging probably did not provide a large means of income, rabbis did warn that whoever falsely claimed to be in need would suffer genuine need afterward (late first-century tradition in 'Abot R. Nat. 3 A).²³⁹ In Luke-Acts, Jesus and his agents do not simply treat beggars as continuing recipients of charity but change their condition.²⁴⁰

230. He was envisioned as blinding some, cutting off arms, or breaking feet or legs (Sen. E. *Controv.* 10.4.2–3). Although I knew no cases of deliberate maiming, some of the beggars I met in northern Nigeria reportedly had to share their profits with those who sent them out. Although some beggars may have employed "faking strategies" (Toner, *Culture*, 30, citing the satirist Martial *Epig.* 12.57), in most cities other means of income would be simpler than begging.

231. E.g., Epict. *Diatr.* 3.22.10; Diogenes *Ep.* 10; Crates *Ep.* 17; Diog. Laert. 6.2.46, 56, 59; 10.119; Lucian *Cynic* 2; cf. Aristippus in Diog. Laert. 2.70, 82. Cf. Liefeld, "Preacher," 246–49; Hock, *Social Context*, 55–56; Winter, *Philo and Paul*, 46–47. For discussion of Cynics, see the excursus at Acts 14:8–10 ("Paul as a Cynic Preacher?").

232. E.g., Dio Chrys. *Or.* 32.9; Diog. Laert. 10.119; Lucian *Fisherman* 42; Diogenes *Ep.* 34; Socrates *Ep.* 1. For one debate about the propriety of Cynic simplicity, see Lucian *Cynic* 1, 2, 4, 11, 17, 19, 20.

233. Cf. also priests of foreign cults, including those of Isis and Cybele (e.g., Babr. 141.1–6; Phaedrus 4.1.4–5; Val. Max. 7.3.8), also often to others' disdain (*Sent. Syr. Men.* 262–77; Lucian *Lucius* 35; Apul. *Metam.* 8.24; Philost. *Vit. Apoll.* 6.41). Some early Christian missionaries apparently sought to avoid this model (cf. 3 John 7; Liefeld, "Preacher," 251, 265; Dibelius, *Studies in Acts*, 9:156).

234. Some ancients argued that it was honorable to beg so long as one chose from whom to do it and one did not do it indiscriminately (Crates *Ep.* 19, 22, 36), but this appears to be a later, domesticated, literary form of Cynicism. Speakers could expect money (*Vit. Aes.* 124) and insult those who refused to give it (*Vit. Aes.* 125–26).

235. Diogenes *Ep.* 11; Diog. Laert. 6.2.49.

236. This text also associates such existence with those who must enter a house of prayer (προσευχή, on which see comments on Acts 1:14).

237. Toner, *Culture*, 132, citing Firm. Mat. 5.3.49.

238. See esp. Sir 40:28–30. It is better to sell everything than to be disgraced by begging (*b. Yebam.* 63b). Dependence on others for food was viewed as terribly difficult (*b. Beṣah* 32b, bar.); better to work on the Sabbath, one insisted hyperbolically (*b. Pesah.* 112a).

239. See also Le Cornu, *Acts*, 177 (adding *m. Pe'ah* 8:9; *t. Pe'ah* 4:14). One could also withhold alms from the wicked (late second- or early third-century tradition in *y. Hag.* 2:1, §11).

240. See Speckman, "Beggars"; cf. idem, "Healing" (applying Acts 3:16 paradigmatically for economic development).

d. Faith in Jesus's Name (3:4–7)

The man is healed because of faith in Jesus's name (Acts 3:16; see also comments there). Peter expresses faith by commanding the healing and lifting the man up; apparently, the healed man also expresses faith by recognizing what has happened and acting accordingly (3:8). Jesus's name is a key issue that recurs throughout this section (3:6, 16; 4:7, 10, 12, 17–18; cf. 4:30; 5:28, 40–41). This emphasis expressly points beyond Jesus's agents (as in 3:12) to the one who sent them (see Luke 10:16).

I. INVITING ATTENTION (3:4–5)

The disabled man expected to receive something from them²⁴¹ but, ironically, would be receiving something of far greater value than he anticipated.²⁴² Misunderstanding is a motif in some miracle stories (cf., e.g., 2 Kgs 5:5–7; John 5:7; 11:24; Mark 5:39); thus, “when Apollonius stops a funeral procession” before a miracle “the mourners think, ‘He is going to make a speech like the funeral speeches which provoke lamentation’” (Philost. *Vit. Apoll.* 4.45).²⁴³

The speaking part here, as most often in Luke's early chapters, belongs especially to Peter. John the apostle has few speaking parts in Acts. In literary terms, he is a flat, secondary character, though his presence pays homage to the knowledge that he played an important role in the Jerusalem church (Gal 2:9). His fewer speaking parts could, however, also reflect historical tradition about his personality vis-à-vis Peter's.²⁴⁴

Some scholars emphasize Peter's “fixing his gaze” (ἀτενίσας) on the man (Acts 3:4). Supernatural stares were thought to wield enormous power;²⁴⁵ for example, rabbinic literature is replete with miracles of destruction wrought by sages with supernaturally powerful eyes.²⁴⁶ But Luke often uses the verb (ten times in Acts; twice in the Gospel and in only one other NT passage)²⁴⁷ and might simply refer to the apostles' discernment that the man had faith to be healed (cf. Acts 14:9). Their command to the man, “Look at us!”²⁴⁸ might imply no more than a summons to attention.²⁴⁹

II. WITHOUT SILVER OR GOLD (3:6)

Their lack of silver and gold (3:6a) is significant; it fits Luke's distinctive theology so well (cf. 2:44–45) that Conzelmann thinks that it represents Luke's only addition

241. Although it is not exclusively Lukan, Luke supplies ten of the NT's fifteen uses of προσδοκάω (with 2 Pet 3:12–14 providing three of the others); in the Apostolic Fathers (cf. 1 *Clem.* 23.5; *Ign. Magn.* 9.2; *Pol.* 3.2; *Herm.* 19.3), it is most common in the *Epistle to Diognetus* (4.6; 8.11; 9.2; 12.6). It appears about thirteen times in the LXX, most commonly in 2 Maccabees (7:14; 9:25; 12:44; 15:8, 20). Thus a few authors supply most of the uses, with Luke dominating.

242. For comic irony in Luke-Acts, see Goldingay, “Comic Acts?” On this passage, see Grassi, *Laugh*, 45 (noting that the man is initially disqualified to enter the temple).

243. Theissen, *Miracle Stories*, 55. For the misunderstanding motif and its literary functions, see at greater length Keener, *John*, 545–46.

244. Even in the Fourth Gospel, the beloved disciple (who may be connected with John; see the argument in Keener, *John*, 84–91) has few speaking parts despite observing and even participating in much of the action (John 13:25; 21:7; cf. 21:20).

245. Cf. Strelan, “Stares”; idem, *Strange Acts*, 38–39. For some ancients using such stares to kill (cf. our modern expression “If looks could kill”), see, e.g., Pliny E. *N.H.* 7.2.16–18 (esp. the Illyrians in 7.2.16).

246. E.g., *Pesiq. Rab Kah.* 11:16; 18:5; *b. B. Bat.* 75a; *B. Qam.* 117a; *Šabb.* 33b–34a; *Gen. Rab.* 79:6; less fatally, *b. B. Meši'a* 85a. Le Cornu, *Acts*, 183, cites, in addition to some of these, *b. Sanh.* 100a; *B. Meši'a* 59b; *Ta'an.* 9a; and for one case of healing with the eyes, *b. Šabb.* 33b; for the evil eye, *Gen. Rab.* 45:5; 53:13; *Lev. Rab.* 16:8; *Deut. Rab.* 1:25; *y. Šabb.* 14.3.14c.

247. 2 Cor 3:7, 13; in the Apostolic Fathers, it is found only in 1 *Clement* (7.4; 9.2; 17.2; 19.2; 36.2); it also appears in 1 *Esd* 6:27; 3 *Macc* 2:26.

248. Cf. perhaps gazing on the serpent in Num 21:8–9; but cf. Keener, *John*, 565.

249. Cf. possibly comparable uses of the impv. of βλέπω in Luke 8:18; 21:8; Acts 13:40.

to the tradition in 3:1–10.²⁵⁰ By contrast, what Peter does “give” (3:6, 16)²⁵¹ is greater than what could be bought with money (8:20), a pure “benefaction” from God’s mercy (cf. 4:9).

The phrase “silver and gold” simply means money, “minted coins.”²⁵² Certainly, such a claim exonerates Luke’s apostles here from any comparisons with the widely known danger of greedy charlatans (see comments on Acts 20:33–35). Some pagans, at least by the early second century, thought Christians unlearned and particularly vulnerable to financial exploitation from unscrupulous leaders (Lucian *Peregr.* 13). Particularly relevant in this context, the apostles’ lack of money helps distinguish them from magicians, who accepted pay for their services (cf. Acts 8:20).²⁵³ (For a discussion of signs, see the commentary introduction, ch. 9; for the antimagical apologetic of Acts, see 8:11, 20–24; 13:6, 8.)²⁵⁴

In contrast to begging, admitting a lack of money was not necessarily shameful (Xen. *Hell.* 5.1.14). Many ancients respected those who lived ruggedly or simply (see comments on Acts 2:44–45). Some Romans praised the more virtuous days of old, when their leaders eschewed opulence and viewed luxury as scandalous (Val. Max. 2.9.4–5); although such views did little to limit current luxury, they did provide a template for viewing such praiseworthy simplicity as depicted here. Some criticized even the common prayer for money (Lucian *Z. Cat.* 1, noting that the putative gods rarely granted such requests anyway).

Simple living was, however, especially noteworthy in austere leaders or teachers whose lives of simplicity contrasted starkly with others who abused their offices for personal gain. Thus Xenophon favorably compares Socrates’s poverty with Critobulus’s wealth because only the former could be satisfied with what he had (Xen. *Oec.* 2.2–4). The Cynic Epistles cite Socrates as claiming that because he has little money, he will leave something better than money for his children, “namely good friends” (Socrates *Ep.* 6 [*Cyn. Ep.* 237]). Likewise, Plutarch praises Aristides for choosing to remain poor, despite his office, as much as for his military victory (*Arist.* 25.3, 5). Philostratus praises a sophist who, though he could have profited, maintained his shabby cloak and poverty.²⁵⁵ The apostles’ lack of money would contrast them with some greedy Cynics and other itinerants against whom nobler philosophers would contrast themselves (see further comments on Acts 20:33–35).

The combination of traveling simply and performing healings fits particularly the missionary discourses of Luke 9:2–6 and 10:4, 9.²⁵⁶ Leaders, especially, were required to live simply (Luke 12:41–42; Acts 20:33–35); they might oversee funds

250. Conzelmann, *Acts*, 26. Johnson, *Acts*, 65, suggests a possible contrast between the apostles’ simplicity and the temple’s wealth (implied in the “Beautiful” Gate). One cannot make much connection between ὑπάρχει in Acts 3:6 and the noun cognate in 2:45, since the verb appears forty times in Luke-Acts.

251. Cf. Luke 9:1; 10:19; Acts 8:18; with charity, Luke 12:33. But again, the verb appears in Luke-Acts eighty-eight times (thirty-four times in Acts). What one was given, one might also be expected to share (Xen. *Cyr.* 8.3.3; Matt 10:8; analogous to Matt 10:8, cf. Torah teachers in *b. Bek.* 29a; *Der. Er. Rab.* 2.4; Dalman, *Jesus-Jeshua*, 226; Lachs, *Commentary*, 180; cf. *m. ’Ab.* 1:3; *Sipre Deut.* 48.2.7; *y. Ned.* 4:4).

252. With Barrett, *Acts*, 182 (citing Philo *Unchangeable* 169; *Good Person* 76; *Jos. Ant.* 15.5). On coinage, see, e.g., Betlyon, “Coinage.” On Greek and Roman minting, see, e.g., Kaenel, “Minting”; for Middle Eastern examples, e.g., Klose, “Minting,” esp. (for Jewish examples) 32. On money, see, e.g., Reden, “Money”; Crawford, “Money”; on silver, see Riederer, “Silver”; idem, “Extraction.”

253. Klauck, *Magic*, 21; Reimer, *Miracle*, 139, 246, 252; cf. also Thomas accepting no fees in *Acts Thom.* 20 (Klauck, *Magic*, 22).

254. On “divine men,” see Keener, *John*, 268–72.

255. Philost. *Vit. soph.* 2.29.621.

256. Bede *Comm. Acts* 3.6 (Martin, *Acts*, 40) viewed Peter’s lack of silver and gold as reflecting Christ’s command (Matt 10:9); cf. Euseb. *Proof of the Gospel* 3.5 (Martin, *Acts*, 41).

(Acts 4:34–37; 5:2; cf. Luke 12:42), but even this role they quickly relinquished in favor of others who could attend to the needs more fully (Acts 6:2–4). Historically, although Paul acknowledged the right of apostles to support (1 Cor 9:4–14; cf. 1 Tim 5:17–18),²⁵⁷ he sacrificed the right for himself (1 Cor 4:11–12; 9:12, 15).

In the context of the church's giving (Acts 2:44–45; 4:32–35), this account emphasizes that a greater gift than charity is removal of the need for charity; a dependent (carried there daily, 3:2)²⁵⁸ would now have means that would also improve his social status.²⁵⁹ What the apostles here offered was a gift that money could not procure (as in 8:20). Others also contrasted mere money with treasures that money could not procure.²⁶⁰ Thus, when one matron boasted of her jewelry, Cornelia claimed that her sons (the Gracchi) were *her* jewels (Val. Max. 4.4.pref.). Ancients, especially ancient Jewish sages, often compared wisdom to a treasure.²⁶¹

The idea here is one that fits the zeal of many new religious movements but is often quickly lost. Some commentators illustrate this point by referring to a supposed exchange between Thomas Aquinas and Pope Innocent II (applicable to most current Western Protestants and other established religious groups today no less than to medieval Catholics): “You see, Thomas,” said the Pope, “the Church can no longer say, “Silver and gold have I none.” “True, holy father,” said Thomas, “and neither can she now say, “Arise and walk.””²⁶²

III. JESUS'S NAME (3:6)

Jesus's “name” is a key element for this section; it appears repeatedly (Acts 3:6, 16; 4:7, 10, 12, 17–18, 30; 5:28, 40, 41), as it did in the preceding context, which links its invocation with baptism (2:21, 38; see esp. comments there).²⁶³ But Acts uses “the name of Jesus” in various ways, the connection with the gospel and Jesus being the primary unifying thread.²⁶⁴

By designating the powerful name of Jesus as “Jesus the Nazarene,” Peter not only specifies which Jesus (the name was common enough; cf. Col 4:11) but defies popular expectations of greatness. Being from a great city was to one's honor (see comments on Acts 21:39), but Jesus's followers in Acts are not ashamed of his association with inconspicuous Nazareth (Acts 4:10; 10:38; 26:9; cf. Luke 24:19; see esp. comments on Acts 2:22), nor is Jesus himself (Acts 22:8), despite the animosity of outsiders on this basis (cf. 6:14; also “Nazarenes,” 24:5).

257. It is possible that 1QS VI, 19–20 advocates other members providing support so that one can study all the time (cf. 1QS VI, 6–7; shared with me by Prof. Orval Wintermute, then at Duke University, fall 1987).

258. Beggars often went door-to-door, so that one who was laid at the temple steps was genuinely lame (Le Cornu, *Acts*, 177, citing, for door-to-door begging, *b. Ketub.* 67a; 108b; *Git.* 68b; *Meg.* 15b; *B. Bat.* 9a).

259. Some scholars apply the principle here to issues of socioeconomic development (e.g., Speckman, “Healing”). Luke clearly cares about the economically marginal (e.g., Luke 4:18; 6:20; 7:22; 14:13, 21).

260. Johnson, *Acts*, 65, supplies many examples of various virtues' superiority to wealth in moralists' teachings (Plut. *L. Wealth 1, Mor.* 523D; Epict. *Diatr.* 3.3.5–13; 3.7.19–28; 3.9.15–22; 3.26.34–36).

261. E.g., Ps 19:10; Prov 2:1, 4; 3:14; 7:1; 8:10, 19; 16:16; 20:15; Sir 1:24; 40:25 (cf. 41:14); Wis 7:13–14; 8:5; Col 2:2; the Torah in Ps 119:72, 127; *Pesiq. Rab Kah.* 12:11; *b. Šabb.* 88b. Among Gentiles, cf. Vitruv. *Arch.* 6.pref. 1–2; Philost. *Vit. Apoll.* 8.21.

262. Bruce, *Commentary*, 84. Contrary to modern “prosperity teaching” in some Christian circles (a recent innovation not historically connected to healing claims, which more often surrounded ascetics in Christian history, nor even part of Pentecostalism, Curtis, *Faith*, 206; cf. Hedges, “Prosperity Theology”; in Africa, Stabell, “Modernity,” 469), in much of history as recent as the twentieth century, healing powers were more apt to be associated with the sacrificially poor. (Even some prominent modern “faith healers” acknowledged being poor for a period of time; see, e.g., Lindsay, *Lake*, 31–32.)

263. On the importance of the “name” here, see, e.g., Ridderbos, “Speeches of Peter,” 29; Tannehill, *Acts*, 49; Karris, *Invitation*, 49.

264. Ridderbos, “Speeches of Peter,” 29; Ziesler, “Name in Acts.”

Some scholars associate use of the name with magic (see full discussion at Acts 19:13). Practitioners of magic often employed name invocation,²⁶⁵ and magical papyri attest the special proficiency of Jewish magicians who claimed access to the hidden name of God.²⁶⁶ Once a person acquired an “angel’s” name, the person could offer sacrifice and become the angel’s friend,²⁶⁷ and then the angel would do all sorts of magic for him.²⁶⁸

But Luke clearly repudiates this sort of use of Jesus’s name (19:13–20).²⁶⁹ He is not remotely subtle in his antimagical polemic (8:9–11, 19; 13:8–11; 16:16–18), including against magical abuse of Jesus’s name (19:18–19);²⁷⁰ he would hardly risk undermining his apologetic case with this formula if its most obvious interpretation for his audience would be magical. Indeed, Luke’s very emphasis on Christology may provide a deliberate contrast with magic,²⁷¹ and the preceding context links invocation of Jesus’s name with baptism (2:21, 38).²⁷² Whereas magicians invoked many names, the earliest Christians regarded Jesus’s name as “uniquely efficacious”;²⁷³ further, in contrast to secret use in magic, Jesus’s name was publicly and corporately affirmed.²⁷⁴

Some ancient texts report healings produced by invoking a miracle-working name.²⁷⁵ Invoking a deity’s name would bring to bear his power.²⁷⁶ For monotheists such as Christians, this would mean the name of the one God. Jewish sources emphasize the power of the sacred name;²⁷⁷ some people apparently invoked it for healing.²⁷⁸ Those who knew the secret of the divine name could perform miracles, such as using the name to strike someone dead (e.g., *Exod. Rab.* 1:30).²⁷⁹ By calling on God’s name, Moses had his prayers answered (*Tg. Ps.-J.* on Deut 9:19). Rabbis may have understood Christian invocation of Jesus’s name along such lines; they spoke of wonder-workers who healed in the name of Jesus or prophesied in the name of a false deity (*m. Sanh.* 11:1, 6).²⁸⁰ Rabbis noted especially one “Jacob” in Galilee for healing in Jesus’s name.²⁸¹

265. PGM 1.160–61, 167, 216–17; 12.316; Lucan *C.W.* 6.732–34; Apul. *Metam.* 2.28. Pulleyn, “Power of Names,” however, doubts that Greek religion attached magical efficacy to name invocation of the gods.

266. For the sacred name of Israel’s God, Incant. Text 20.11–12; 69.6–7; *CIJ* 1:485, §673; 1:486, §674; 1:490, §679; 1:517, §717; 1:523, §724; 2:62–65, §819; 2:90–91, §849; 2:92, §851; 2:217, §1168; *Test. Sol.* 18:15–16; *Pr. Jos.* 9; *b. Git.* 68ab; *Num. Rab.* 16:24; also revelatory texts in Scholem, *Gnosticism*, 32–33. For Jewish support of and opposition to magic, see also sources in Keener, *Spirit*, 29–30n21.

267. PGM 1.168–72. This is probably the patronal rather than the egalitarian sense of “friend” (see discussion at Acts 19:31).

268. PGM 1.172–90.

269. In a later period, by contrast, Christian magical syncretism analogous to Jewish magical usage appeared (see, e.g., Gitler, “Amulets”; cf. Smith, *Magician*, 62–64, despite his anachronistic approach). Of course, many uses of Jewish and Christian divine names were by pagans (Klauck, *Context*, 213).

270. For Luke’s antimagical polemic in general, see, e.g., Garrett, *Demise* (a very useful work); comments on Acts 8; 19.

271. See Marguerat, “Magie, guérison, et parole.”

272. Barrett, *Acts*, 176–77.

273. Hurtado, *Lord Jesus Christ*, 204.

274. *Ibid.*, 205.

275. Bultmann, *Tradition*, 223, cites Mark 9:38; *t. Hul.* 2:21–23; *Jos. Ant.* 8.47 (invoking Solomon’s name); Lucian *Lover of Lies* 10, 12.

276. Hurtado, “Signs,” 50; cf. the appeal to Caesar in Apul. *Metam.* 3.29.

277. See Urbach, *Sages*, 1:124–34, including the divine name (engraved on clubs) used to calm the sea (p. 126, citing *b. B. Bat.* 73a). Later kabbalistic speculation developed thought on the divine name further (Simon, *Sects*, 120).

278. *M. Sanh.* 10:1 notes (and condemns) this use (so Urbach, *Sages*, 1:130; the text mentions both invoking the name and reciting Exod 15:26).

279. Moore, *Judaism*, 1:426. God also performed miracles with his own name (*Pr Man* 4).

280. Bietenhard, “ὄνομα,” 267–68 (citing, e.g., *Sipre Deut.* 177; *Eccl. Rab.* 1:8; Strack and Billerbeck, *Kommentar*, 1:468); Moore, *Judaism*, 1:378; Bagatti, *Church*, 106–7. For Jesus’s followers allegedly healing in the name of Yeshu ben Pandira, see *t. Hul.* 2:22–23; Urbach, *Sages*, 1:116; Herford, *Christianity*, 103–11; Klausner, *Jesus of Nazareth*, 40; Pritz, *Nazarene Christianity*, 96–97.

281. Le Cornu, *Acts*, 188, cites *t. Hul.* 2:22–23; *y. Sabb.* 14.4.14d; *’Abod. Zar.* 2.2.40d–41a; *b. ’Abod. Zar.* 27b.

Use of Jesus's name may evoke calling on the Lord's name, a theme elaborated in the preceding context (Acts 2:21).²⁸² In biblical tradition, God's people had confessed God's name, praying toward the temple (1 Kgs 8:29, 33, 35; 2 Chr 6:20, 24, 26).²⁸³ Those who prayed called on the Lord's name (e.g., 1 Kgs 18:24; Ps 116:4, 13, 17)—that is, called on the Lord himself. In the context of prayer, calling on the deity's name meant addressing him (1 Kgs 18:24–26, 32; 2 Kgs 5:11; Pss 9:2; 18:49); similarly, in 1 Chr 16:2, when David blessed the people in the Lord's name, he apparently was calling on the Lord to bless them. Thus the point may simply be an implicit invocation of the Lord, although the form is directed to a human hearer.

Late first-century Christian sources in the Johannine tradition provide an example of prayer “in Jesus's name” (John 14:13; 15:16; 16:23–24).²⁸⁴ But in what sense did the Fourth Gospel mean such prayer in Jesus's name?²⁸⁵ Praying “in one's name” might evoke praying “on the merits of,” or because of, another's status before the one entreated. Thus the patriarchs had earned Israel favor before God, and they could seek God's favor on account of their ancestors' favor (Exod 32:13; Deut 9:27; 2 Chr 6:16–17).²⁸⁶ Biblical tradition was clear that God answered the prayers of the righteous (e.g., Ps 34:15–18; Prov 15:8, 29; 21:27; 28:9)²⁸⁷ and the repentant (2 Chr 7:14; Neh 1:6) and that God often showed favor to the descendants of the righteous (Deut 9:5). Prayer “in Jesus's name” could mean prayer predicated on his merit alone.

Another proposed background draws on the ancient Mediterranean role of a broker;²⁸⁸ patrons could write letters of recommendation to procure for their clients favors from other members of the elite, and others could use their favor as agents to secure favor as well. For example, a prince in the king's special favor might secure whatever he asked for his friends.²⁸⁹ Thus, in John's Gospel, prayer in Jesus's name (presumably related in some way to Luke's use of Jesus's name) could mean asking “as his representative, while about his business,” just as Jesus came in his Father's name (John 5:43; 10:25).²⁹⁰ This would involve prayer “in keeping with his character and concerns and, indeed, in union with him.”²⁹¹ This usage (“in the name of” meaning “as one's representative”) was common (e.g., as a messenger)²⁹² and fits the Johannine context (14:26; 15:21; cf. 15:26–27). (Later rabbis also spoke of passing on traditions in another's name—that is, on another's authority [e.g., *m. 'Ab. 2:8*].)²⁹³ Such

282. Cf. O'Toole, *Unity of Theology*, 50, on the divine, LXX background for Luke's use of Jesus's name.

283. Some find background for prayer “in Jesus's name” in the biblical tabernacle traditions; one praying in or toward God's house would secure an answer to prayer (cf. Lacomara, “Deuteronomy,” 80; Dowd, “Theology,” 333); but this is probably simply one example of the broader category of calling on God's name.

284. Cf. also Jas 5:14; perhaps Gabriel praying in God's name (1 En. 40:6).

285. I adapt much of this material from Keener, *John*, 947–50.

286. For the efficacy of Abraham's intercessory prayer, see *Test. Ab.* 14:8; 18:10–11 A; 1 Qap Genst XX, 16, 28–29, though many religious figures shared this power (Harrington, “Abraham Traditions,” 171). On ancestral merit, see the excursus on Pauline soteriology in context, at Acts 13:39.

287. Also in early Judaism, e.g., *Let. Aris.* 192; *Pesiq. Rab.* 23:9.

288. See Malina and Rohrbaugh, *John*, 235; deSilva, *Honor*, 97–98, 137.

289. Xen. *Cyr.* 1.4.1; cf. *Apoll. K. Tyre* 17. Alexander reportedly encouraged people to ask boldly, depending on his generosity (Plut. *Alex.* 39.3–4; cf. Ps.-Callisth. *Alex.* 2.21; 3.6). Objects of such favor were always selective; e.g., people might grant any special requests to heroes (Hermog. *Issues* 81.5–23; Libanius *Declam.* 36.13); a ruler invited his teacher to request whatever he wished (*Mus. Ruf.* 8, p. 66.28–29).

290. Sanders, *John*, 324, comparing also Acts 3:6, 16; 4:10; 16:18; also Schnackenburg, *John*, 3:73; Malina and Rohrbaugh, *John*, 247–48.

291. Whitacre, *John*, 355, citing Aug. *Tract. Jn.* 73.3. Augustine also notes that one receives what one asks only if one does not ask wrongly (73.1.1, citing Jas 4:3).

292. As a messenger of God (Deut 18:19–20; 1 En. 10:2) or another (1 Sam 25:9).

293. To speak “in God's name” could, however, mean simply to speak as one loyal to God (*Jos. Asen.* 9:1 in light of *Jos. Asen.* ch. 8; cf. Acts 4:17).

prayer naturally implied desiring the sort of thing that Jesus would desire and hence praying, as best as one knows, according to God's will (cf. 1 John 5:14).

Whatever else may be involved, the idea of a representative is likely prominent. Messengers delivered their messages in the name of the one who sent them (1 Sam 25:5, 9). One could receive someone sent in the sender's name—that is, as their representative (Luke 9:48; Mark 9:37; Matt 18:5). Messengers were “authorized”—that is, they carried the authority of their sender, to the extent that they accurately represented their commission;²⁹⁴ thus, acting in Jesus's name might entail acting in accord with Jesus's revealed purpose, as his agent (cf. Acts 9:34)—that is, by the direction of the Spirit (cf. 16:7).²⁹⁵ The same point may be underlined by the agents in Luke's second volume (Acts) repeating many sample miracles performed by Jesus in the first volume (the Gospel); he continues to work through his agents.²⁹⁶

One could pass on traditions in another's name—that is, citing that person as one's authority.²⁹⁷ One could also speak in this way as another's representative, equivalent to announcing, “Thus says . . .” (1 En. 10:2). Thus the prophets spoke “in the name of the Lord” (Jas 5:10),²⁹⁸ something James mentions in a context where he advocates prayer for the sick “in the name of the Lord” (5:14). Jesus spoke of followers working miracles in his name (Mark 9:39), including exorcisms (9:38–39; cf. 16:17). In Acts also, Jesus's agents teach and preach in his name (Acts 4:18; 5:40; 9:27) and command out demons in his name (16:18; cf. 19:13).²⁹⁹

“In God's name” could signify a representative's acting on God's behalf (Exod 5:23; Deut 18:19–22; Jer 14:14–15), according to his command (Deut 18:5, 7), or by his help (Ps 118:10–11; Prov 18:10) or using his name for a miraculous act (2 Kgs 2:24). That various early Jewish circles could employ “name” as a polite surrogate for pronouncing the divine name also fits this usage.³⁰⁰ In earlier biblical usage, “name” often connoted reputation, so that when God acted “on account of his name,” God defended his honor, a matter readily understood in the ancient Mediterranean world, given its emphasis on honor and shame.³⁰¹ Thus “in the name of Jesus” might mean “on Jesus's behalf” or, most likely, “by the authority and power of Jesus, who

294. E.g., *m. Ber.* 5:5; *t. Ta'an.* 3:2; *b. Naz.* 12b; Dion. Hal. *Ant. rom.* 6.88.2; Diod. Sic. 40.1.1; *Jos. Life* 65, 72–73, 196–98; 2 Macc 1:20; on agents and agency, see (much more fully than here) Keener, *John*, 310–15; Rengstorf, *Apostolate*, passim; idem, “Ἀπόστολος”; Dix, *Ministry*, 228–30; Kirk, “Apostleship.” For envoys of rank, see, e.g., *Jos. Ant.* 18.265; *Pliny Ep.* 10.18.2. Ἀπόστολος was one of the Greek terms for “envoy” (Eder, “Envoys”).

295. Cf. the “mind of Christ” (1 Cor 2:10–16; Phil 2:5).

296. Warrington, “Healing Narratives,” emphasizes Jesus's activity in his agents, doubting that they replicate Jesus's messianic activity; Shelton, “Used to Be?,” counters that the repetition reveals the paradigmatic character of Jesus's healing ministry. Undoubtedly both elements are present: Jesus's charismatic ministry is paradigmatic for the church (through some of its agents); his signs resemble those of Elijah and Elisha instead of being unique. At the same time, their ministry is efficacious because Jesus works through his agents (who are not messianic); see Acts 9:34.

297. See, e.g., *m. Ab.* 2:8; *b. Ber.* 5a.

298. Both true (Deut 18:19) and false (18:20; Jer 14:14–15; 23:25; 27:15; 29:9, 21, 23; Matt 24:5; Mark 13:6; Luke 21:8) prophets, since both claimed to speak as God's messengers.

299. The exact phrase “in the name of Jesus” appears only in Acts in the NT (seven times); “the name of Jesus” altogether appears there eleven times (it also appears in Phil 2:10); “the name of the Lord Jesus” appears five times in Acts and two times in Pauline texts. But Jesus uses “in my name” in Markan (Mark 9:37, 39; 13:6), Johannine (John 14:13–14, 26; 15:16; 16:23–26), and other (Mark 16:17) traditions.

300. 1 En. 6:3 (if “Semyaza” means “he sees the Name”); perhaps 1 Chr 13:6 LXX; Jeremias, *Theology*, 10; Longenecker, *Christology*, 43; Bietenhard, “ὄνομα,” 268–69. Bonsirven, *Judaism*, 7, cites *m. Ber.* 4:4; *Yoma* 3:8.

301. Cf., e.g., *Pss* 23:3; 25:11; 31:3; 79:9; 109:21; 143:11; *Isa* 48:9; *Jer* 14:7, 21; *Ezek* 20:9, 14, 22, 44; 36:23; *Mal* 1:11.

authorized us.”³⁰² One more general nuance of Jesus’s name is certain: as baptism in Jesus’s name specified identification with Jesus (Acts 2:38; 8:16; 10:48; 19:5), healing in Jesus’s name (as in 3:6; 4:30) meant healing credited specifically to him (3:16; 4:10; 9:34; cf. 3:12–16; 9:27; 19:13, 17; 21:13). Jesus’s agents acted only for his honor, not for their own.

IV. COMMANDING HEALING (3:6)

The verbal element of miracle working was not uncommon, though often as words of assurance.³⁰³ The gospel tradition already spoke of commanding mountains (Mark 11:23) or, in Luke, a tree (Luke 17:6).³⁰⁴ As God’s representatives, prophets sometimes commanded, speaking by the word of the Lord, and their words were fulfilled (e.g., 2 Kgs 1:10; 2:14, 21–22, 24; 4:43; 5:10). Such commands, though addressed to the object in question, could also function as implicit prayers by reflecting dependence on God (Josh 10:12); when David blessed the people in YHWH’s name (1 Chr 16:2), he was implicitly calling on YHWH to bless them. Such biblical blessings and curses also allowed for “wish-prayers,” words directed grammatically to the subject the speaker desired to help but directed implicitly to God as the one who could make the words efficacious.³⁰⁵ In this case, acting in Jesus’s name means speaking as his agent, authorized on Jesus’s behalf to do what he would do (see comments above on use of Jesus’s “name”).

Occasionally, Jewish tradition could envision efficacious commands. In Jos. *Ant.* 2.287, Moses commanded his rod to become a serpent (contrast Exod 7:9–10);³⁰⁶ some later rabbis claimed that very pious sages could decree events and they would occur.³⁰⁷ Conversely, a sage too audacious in demanding a miracle could be viewed as having profaned the divine name.³⁰⁸ Peter boldly acts on the name, trusting its efficacy and not his own (Acts 3:12). Curing disease with a mere word was unusual, contrasting with most of the popular magicians of the day.³⁰⁹

V. CONTRAST WITH GENTILE ATTEMPTS TO SECURE DIVINE FAVOR

Gentiles often reminded a deity of favors owed, seeking an answer on contractual grounds, as many classical texts attest.³¹⁰ In some cases, Gentiles piled up multiple

302. Witherington, *Acts*, 175. For “name” as equivalent to “power” here, see Marguerat, *Actes*, 119. Busch, “Presence,” connects the use of name with his full presence being deferred till the eschatological time (cf. Acts 3:19–21).

303. Theissen, *Miracle Stories*, 58–59 (citing Mark 2:5; 5:36; 6:50; 7:29; 9:23; 10:49; Philost. *Vit. Apoll.* 3.38; 4.10, 45; 7.38; Lucian *Lover of Lies* 11; *Hymn of Isyllus* in IG 4.128).

304. For speaking to objects in nature as if animate, see, e.g., Iamb. *V.P.* 28.134 (Pythagoras conversing with a river); cf. the prophetic act of symbolism in Ezek 37:4, 7, 9–10. Exorcistic texts also could, in the name of some deity, command wombs to stop “wandering” (Faraone, “New Light”).

305. E.g., *Abot R. Nat.* 8 A; Wiles, *Prayers*, 25–29, 71. Earlier Egyptians also expected their priests—and increasingly in this period, magicians—to bless and curse efficaciously (Frankfurter, “Curses,” noting continuity of practice even to later Coptic monks).

306. Less successfully, the Egyptian false prophet also promised his followers to make the walls of Jerusalem collapse “at his command” (Jos. *Ant.* 20.170), and Theudas promised to command the Jordan to part (20.97).

307. E.g., instant death on a Cuthean (*Pesiq. Rab Kah.* 11:16; *Ecl. Rab.* 10:8 §1); cursing people with poverty (*b. Ta’an.* 23b); cursing one with death (outside the rabbis, e.g., *Test. Jud.* 11:3–5), even accidentally (*Gen. Rab.* 74:4 and *Pesiq. Rab.* 3:4, citing Gen 31:32); or, more positively, filling a field with cucumbers (*Abot R. Nat.* 25 A); commanding a field to produce gold dinars (*Exod. Rab.* 52:3). Traditional African culture also attributes supernatural power to words, especially those spoken by a greater to a lesser (Mbiti, *Religions*, 257–58).

308. E.g., *y. Ta’an.* 3:10, §1.

309. Anderson, *Mark*, 97.

310. E.g., Hom. *Il.* 1.39–41; 10.291–94; *Od.* 1.61–62, 66–67; 4.762–64; 17.240–42; Ap. Rhod. 1.417–19; Virg. *Aen.* 12.778; cf. also Maximus of Tyre, who reports the first *Iliad* example (Max. Tyre 5.2) but rejects

names of the deity they were entreating,³¹¹ apparently hoping that at least one would prove effective.³¹²

Romans were concerned with getting a formula precisely right;³¹³ thus, for example, after praying, a Roman would turn to the right (Plut. *Cam.* 5.7).³¹⁴ Roman magistrates read prayers exactly as they had been handed down through tradition; “if one syllable or one ritual gesture was performed incorrectly, the prayer might well be invalid.”³¹⁵ Even a single mistake could ruin the prayer, functioning like a bad omen (Pliny E. *N.H.* 28.3.11). Any minor lapse in proper protocol required the sacrifice’s or procession’s repetition; in some cases, it could be repeated as many as thirty times (Plut. *Coriol.* 25.3). Thus, for example, when games were marred by something that displeased the gods, a deity might demand in a dream that the games be repeated (Val. Max. 1.7.4).³¹⁶ Too much was at stake to trifle with errors; when a priest’s hat fell off at a sacrifice, he was removed from the priesthood (1.1.5). Although the intelligentsia were typically less impressed with such formulas than the people were (Pliny E. *N.H.* 28.3.10), traditions of past confirmations of such formulas (28.3.12–13; 28.5.29) and punishments on those who failed in them (one struck by lightning in 28.4.14) rendered them more plausible to some.³¹⁷

Jewish ritual was less particular, but correctly implementing the ritual remained important, leading to conflicts between, for example, Pharisees and Sadducees (or the people and high priests) over correct ritual³¹⁸ or various opinions on the dating of the new moon.³¹⁹ (The Sadducees had to accommodate Pharisaic opinion on the matter because of its popular support [Jos. *Ant.* 18.15, 17].) For example, if one errs while reciting the *Tefillah*, it is a bad omen for the reciter and for whoever may have appointed the reciter (*m. Ber.* 5:5). Likewise, anyone apt to mispronounce words was not allowed to lead in prayers (*y. Ber.* 2:3, §3, bar.).³²⁰

its literal plausibility (5.3). Requests were a prominent form of prayer (see Averna, “Suasoria”). Sacrifices elicit divine favor (Libanius *Maxim* 3.4), though pure motives also could count (Libanius *Encomium* 7.4). When sacrifices did not achieve their effect, people might complain that they were in vain (Alciph. *Farm.* 33 [Thallicus to Petraeus], 3.35, ¶1); Zeus was too busy elsewhere (¶2).

311. E.g., Hom. *Il.* 1.37–38, 451–52; 2.412; PGM 4.2916–27; Cleanthes’s *Hymn to Zeus*; more restrained, *ILS* 190; cf. *Apoc. Zeph.* 6:7; *Apoc. Ab.* 17:8, 13.

312. Burkert, *Religion*, 74.

313. Aune, “Religion,” 919, 923, cites formulas of address such as “whether god or goddess” (Livy 7.26.4; Cic. *Rab. Perd.* 5; Aul. Gel. 2.28.3) or “by whatever name” (Virg. *Aen.* 2.351; 4.576; Catullus [Carm.] 34.21f). Cf. also Versnel, “Prayer,” 1243; Klauck, *Context*, 30; on the efficacy of Roman ritual words, especially Hahn, “Prayers,” 235–39.

314. Romans placed their right hand on their lips and turned around, although the Gauls thought turning to the left was most effective (Pliny E. *N.H.* 28.5.25).

315. Stambaugh and Balch, *Environment*, 129; cf. also Hahn, “Prayers,” 235–39; Jeffers, *World*, 90; Aune, “Religion,” 919–20, 923; in the rabbis, cf. *y. Ber.* 1:5, §5.

316. Citing a different case, Toner, *Culture*, 151, notes that spectators, appealing to such breaches, sometimes insisted on restarting the games to prolong their pleasure.

317. Pliny thought that their omens’ effects depended on how people responded to them (*N.H.* 28.4.17).

318. E.g., *m. Sukkah* 4:9; *t. Sukkah* 3:16; *b. Sukkah* 48b; *Yoma* 19b; Jeremias, *Jerusalem*, 264–65. 4Q276–277 concurs with a Sadducean (dominant priestly) ritual versus that of the Pharisees (*m. Parah* 3:7; so Abegg, “Introduction to 4Q276–277,” 284).

319. On the importance attached to correct sighting of the new moon for dating festivals properly, see, e.g., *m. Roš Haš.* 1:3–5; *Mek. Pisha* 2.1ff., 35ff. (Lauterbach, 1:15, 18); *Pesiq. Rab. Kah.* 5:1, 13; *b. Roš Haš.* 22b; *Sanh.* 42a; *y. Roš Haš.* 1:4–3:1; *Exod. Rab.* 15:11, 22; *Pesiq. Rab.* 15, preamble; 15:17; note its importance even in texts using a solar calendar (*Jub.* 1:10; 16:1; 1QS X, 3; 1QM II, 4; 11Q5 XXVII, 7). It was celebrated from an early period (Num 29:6; 1 Sam 20:5, 18; 2 Kgs 4:23; 1 Chr 23:31; Neh 10:33) and long past Luke’s period (*Gen. Rab.* 44:14; *Pesiq. Rab.* 1:1–3). Gentiles also celebrated it as a holiday (Theophr. *Char.* 4.12; Pindar *Nem.* 4.35; Porph. *Abst.* 2.16) and used it to define months (Ovid *Fasti* 3.883).

320. A *shaliach* mispronouncing words could bring punishment on the entire congregation (Richardson, *Theology*, 324).

If pagans performed the appropriate rituals or offered even unsolicited gifts, however, they believed that they could remind the deities, expecting reciprocal obligations as in the patronage system and ancient society more generally.³²¹ A central element of many Greek (and some biblical) prayers was “the argument,” appealing either to the petitioner’s deeds or to the deity’s character.³²² If pleas to multiple deities eventually produced no results, however, the supplicants might simply give up (Thucyd. 2.47.4); the goal of most popular religion then (as, in practice, in most cultures) was not assimilation of one’s will to the deity’s (cf. Luke 22:42) but obtaining what one needed from the deity. Sacrifices unheeded were “in vain” (Alciph. *Farm.* 33 [Thalliscus to Petraeus], 3.35, ¶1); the god must be too busy elsewhere (3.35, ¶2; cf. 1 Kgs 18:27).

Lucian parodies prayer;³²³ for example, one might get the gods’ attention if one shouted sufficiently loudly for them to hear.³²⁴ He also notes the contradictory and unjust nature of many human prayers.³²⁵ Lucian ridicules the idea that sacrifices can purchase blessings from the gods, as if the gods sell them.³²⁶ He lampoons Homer’s depiction of Chryses’s complaining to Apollo about his fellow Achaians. Chryses there reminded Apollo that he was Apollo’s benefactor (having offered many sacrifices), and so Apollo began slaying Achaians.³²⁷

Some ancients believed that one should simply ask the gods to send “good things,” leaving the definition of “good things” to them (e.g., Socrates in Xen. *Mem.* 1.3.2).³²⁸ This idea was, however, never dominant; most people prayed to their deities for what they needed.³²⁹ Myths portrayed deities ready to work with such a system; in myths, though, deities also often promised or granted gifts that they regretted, or otherwise granted benefactions that harmed their recipients.³³⁰ Jews and Christians would be more apt to pray for what they thought best, yet trust their God’s discretion in answering.³³¹ A ruler who invited one to ask whatever one wished would be considered particularly benevolent (Suet. *Tit.* 8.2), and the same would be true of deities (cf. John 14:13–14; 1 John 5:14).

VI. STRENGTHENED FEET (3:7)

Clasping by the right hand was typically a sign of agreement or covenant in the ancient world (see comments on Acts 23:19); one also accepted a suppliant by giving him one’s right hand (Dion. Hal. *Ant. rom.* 8.2.1).³³² The idea here is more general,

321. E.g., Hom. *Il.* 1.39–41; Virg. *Aen.* 12.778; cf. also Aune, “Religion,” 923, for this principle. Some ancients considered unworthy the portrait of deities implied in such prayer (Max. Tyre 5.2–3).

322. Versnel, “Prayer,” 1242.

323. E.g., deities could not help mortals in the face of fate, though “Zeus” claimed that sacrifices were nevertheless appropriate for those greater than mortals (Lucian *Z. Cat.* 7).

324. Lucian *Tim.* 7, 11; cf. 1 Kgs 18:27.

325. Lucian *Icar.* 25–26.

326. Lucian *Sacr.* 2.

327. Lucian *Sacr.* 3, citing from Hom. *Il.* 1.33ff.

328. Also Val. Max. 7.2.ext. 1a; Philost. *Vit. Apoll.* 1.11, 33; 4.40; cf. Diogenes in Diog. Laert. 6.2.42. Some opposed petitionary prayer (Max. Tyre 5 passim, e.g., 5.3; cf. 5.8, which misinterprets Plato; see more fully van der Horst, “Maximus van Tyrus”); Seneca the Younger regards as superstitious and primitive the notion that incantations can affect rains (*Nat. Q.* 4.7.3); some regarded all divine decrees as immutable (Hierocles *How Should One Behave toward the Gods?* in Stobaeus *Anth.* 1.3.53, beginning). Other thinkers defended prayer (e.g., Iamblichus *V.P.* 28.137), while limiting its propriety to requests of eternal value (Porph. *Marc.* 12.212–18).

329. See Burkert, *Religion*, 75. Sometimes this was wealth (so Lucian *Z. Cat.* 1).

330. E.g., Eurip. *Bacch.* 90ff., 596–99; Ovid *Metam.* 2.44–102; 3.287–98, 308–9; 11.100–105; 14.129–53; Apollod. *Bib.* 3.4.3; Mart. *Epig.* 12.

331. Thus one should thank God when one’s petition fails as well as when it succeeds (Chrys. *Hom. Gen.* 30.16; Bray, *Corinthians*, 306).

332. In addition to the comments on Acts 23:19, see Keener, “Pillars.” Derrett, *Audience*, 130, suggests that “the left hand, used for lavatory purposes, was inauspicious even after it had been washed.” Positively

though it may imply the connotation of personal kindness (cf. Acts 23:19); the man's hand was stretched out to receive the alms he had requested,³³³ and it may have been the right hand simply because he was, presumably, right-handed. But if the man was not expecting healing, he may have needed Peter's act of faith to motivate him to walk. The element of touch was frequent in healing accounts, especially in the NT.³³⁴ In a later tale, the Amora R. Johanan took an ailing rabbi by the hand and raised him up (*b. Ber. 5b*).³³⁵

The particular terms by which Luke designates feet, ankles, and restoring bones appear in medical literature;³³⁶ but medical language had passed into the vernacular, and its use here probably simply reveals Luke's command of sophisticated Greek.³³⁷ Some scholars argue that the terms Hobart identified as medical here, though found elsewhere, are particularly frequent in medical writers as the more technical terms available for describing these matters;³³⁸ this observation would be consistent with the tradition of a physician's authorship, though any educated Greek could have written it. But the terms used here were quite common in Greek.³³⁹ That the man was healed "immediately" (παρᾶχρημα) reflects Luke's usual vocabulary (sixteen times in Luke-Acts, the only other two NT uses being in Matt 21:19–20).³⁴⁰

Palestinian Jewish Christians expected healing whenever prayers were offered in faith; James writes as if he expects this experience to happen regularly (Jas 5:14–16).³⁴¹ Some other Jewish teachers expected healing in answer to prayer (Sir 38:9) and urged confidence in prayer (*Lev. Rab.* 16:9),³⁴² but this confidence appears considerably more pervasive, on the whole, in what religion scholars might call the revivalistic experience of earliest Christianity.³⁴³

e. Public Attention to the Healing (3:8–10)

As in Acts 2:6–8 and often in Acts, signs draw attention to the message to be proclaimed (see, e.g., 4:29–30; 14:3). Miracle accounts typically delighted in emphasizing physical demonstrations of deliverance (e.g., *Jos. Ant.* 8.48). As Theissen puts

contagious touch could be envisioned (as in a common version of the Midas story, though Max. Tyre 5.1 has just prayer).

333. With Fitzmyer, *Acts*, 279.

334. Theissen, *Miracle Stories*, 62 (giving examples with respect to resuscitation, Mark 5:41; Luke 7:14; Acts 9:40; cf. Philost. *Vit. Apoll.* 4.45; Ovid *Fasti* 6.753–54). Occasionally touch from a foot (Plut. *Pyrr.* 3.7–9) could be said to accomplish healings (Theissen, *Miracle Stories*, 62).

335. With characteristically Amoraic theology, he did so only after the other rabbi preferred to be rid of his suffering despite its promised reward in the world to come.

336. Hobart, *Medical Language*, 34–35.

337. Cf. Lake and Cadbury, *Commentary*, 33; Cadbury, *Acts in History*, 36; Haenchen, *Acts*, 200; Bruce, *Acts*¹, 105; see further comments on authorship in the commentary introduction, ch. 11. Parsons, *Body*, 112–13, notes that physiognomic literature links strong feet and ankles with strong character.

338. Carter and Earle, *Acts*, 51.

339. Parsons, *Body*, 111, remarks that the *TLG* includes more than 1,600 uses of βάσις; he notes (112) more than 100 for σφυρόν (cf. here σφυδρόν).

340. Other early Christian uses appear in *Barn.* 12.7; *Mart. Pol.* 13.1; of the roughly sixteen LXX uses, more than one-third appear in a single work (2 Macc 4:34, 38; 5:18; 7:4; 10:22; 11:36). Luke also uses εὐθύς and εὐθέως (twenty-two times, including thirteen times in Acts), but this is not distinctive (as is well known, Mark uses these terms more than forty times).

341. See discussion in Thomas, *Deliverance*, 36–37; Davids, *James*, 192–97; McKnight, *James*, 434–48. They recognized, however, that it did not occur on every occasion (e.g., Phil 2:26–27; 2 Tim 4:20).

342. Prayer assurances also appear outside Israel, e.g., "The Instruction of Ani" (*ANET* 420). Some rabbis taught that the matriarchs were barren so that God could answer prayer (*b. Yebam.* 64a; *Gen. Rab.* 45:4; cf. 60:13).

343. Di Lella, "Health," connects healing in Tobit (of Sarah and Tobit) with doing good, hence with Deuteronomic expectation. Luke's focus is on the evangelistic sign function of healing.

it: “In healings the newly acquired physical power is demonstrated by activity: the man who had been sick serves (Mk 1.31), carries his bed (Mk 2.12; Jn 5.9; Lucian, *Philops.* 11), or a stone (Epidauros, 15), can walk and follow (Mk 5.42; 10.52; Plut. *Cor.* 13 . . .). The girl who has come back to life eats (Mk 5.42) and utters sounds (*vita Apoll.* iv, 45).”³⁴⁴

Like other miracle accounts emphasizing demonstrations, Luke mentions “walking” four times in Acts 3:6–8 and mentions it again in 3:12, suggesting that this demonstration is emphatic.³⁴⁵ Luke is further emphatic by describing the healing with the term *παρὰρῆμα*, which he often attaches to miracles (Luke 1:64; 4:39; 5:25; 8:44, 47, 55; 13:13; 18:43).³⁴⁶ Luke also notes that the man was “leaping,” just as the formerly lame man leaped up in 14:10; outside these two references, the NT nowhere uses the term (except in a very different sense at John 4:14). Luke probably employs this term to allude to the messianic-era promise in Isa 35:6 (easily the closest parallel among the seven LXX uses of the term), as nearly all commentators recognize.³⁴⁷ Because Luke earlier alludes to this text in Luke 7:22, he emphasizes that the blessings of the promised messianic era have begun, foreshadowing Peter’s impending speech (Acts 3:24).³⁴⁸ If the lame were forbidden to enter the temple (see discussion on Acts 3:2–3, above), Luke’s indication that the man entered the temple courts proper is significant.

We may also learn from Luke’s depiction of the people’s response in 3:9–10. That “the people” recognized him (cf. John 9:8–9) suggests that this is not a festival but the usual temple constituency in Jerusalem, the local population.³⁴⁹ The audience is, however, symbolically larger: “all the people” may symbolically represent Israel,³⁵⁰ suiting the invitation to Israel in Acts 3:25–26.

A disabled person might use a walking stick (Lysias *Or.* 24.12, §169), or his affliction might be otherwise visibly evident (24.14, §169). The disability noted in Acts 3 is even more serious; the lame man had to be “carried” to the temple (Acts 3:2); lame from his mother’s womb, his legs were probably visibly useless (3:7; cf. Prov 26:7). But ultimately people recognized him by sight, perhaps aided by his shabby begging clothes and even more by his current jubilation at being able to walk.

That they were “filled” (*ἐπλήσθησαν*) with wonder may be a typically Lukan way of wording their amazement (Luke uses *πίμπλημι* twenty-two times out of a total twenty-four times in the NT). Amazement is, however, a characteristic response to

344. Theissen, *Miracle Stories*, 66.

345. Dunn, *Acts*, 41. With the events of Acts 3:7–8, van der Horst (“Macrobius,” 225) compares Macrobius *Sat.* 1.2.4. Parsons, *Body*, 119–21, notes that slow walking connotes dignity but that this man displays enthusiasm instead; given the circumstances, of course, we can hardly expect otherwise, whether for him or for the crowd that runs together in Acts 3:11. In most cultures, a person dramatically and suddenly healed expresses excitement (e.g., an Indian report in “Power of Prayer,” 21).

346. Apart from the two occurrences in Matt 21:19–20, all NT uses appear in Luke-Acts (sixteen times); Acts applies it especially to judgment miracles, Acts 5:10; 12:23; 13:11; 16:26. Healings as signs of the messianic era might be “immediate,” but the consummation of the kingdom would not be (Luke 19:11).

347. E.g., Haenchen, *Acts*, 200; Bruce, *Commentary*, 85; Tannehill, *Acts*, 52–53; Crowe, *Acts*, 20; Dunn, *Acts*, 41; Witherington, *Acts*, 176; Le Cornu, *Acts*, 189; Gaventa, *Acts*, 85; Marguerat, *Actes*, 120; Parsons, *Acts*, 58; Pervo, *Acts*, 101; Peterson, *Acts*, 166–67. “Leaping” for joy appears in Luke 1:41, 44; 6:23; and elsewhere (e.g., LXX Ps 113[114]:4, 6; Jer 27[50]:11; Mal 3:20; Wis 19:9; 1 En. 51:4; Jos. *Ant.* 5.193; Libanius *Narration* 8; *Speech in Character* 17.1).

348. Tannehill, *Acts*, 52–53; cf. Parsons, “Character”; Marshall, “Acts,” 544.

349. Cf. Tac. *Hist.* 4.81, where the blind Alexandrian healed through Vespasian was “well known” for his blindness; cf. also John 9:8. Naturally, such recognition amplifies the public effect of a miracle; cf., e.g., the miracle reports in the *Natal Mercury* in 1922 in Hickson, *Heal*, 122; from Guatemala, February 20, 1953, in Osborn and Osborn, *Evangelism*, 1:944.

350. Gaventa, *Acts*, 85.

miracles in the NT (Theissen lists more than twenty references).³⁵¹ Parallels outside the NT are much less common than one would expect; examples are far more common in Christian miracle stories or other miracle stories late enough to depend on them. The isolated pre-Christian examples are not frequent enough in the many miracle stories to constitute a motif.³⁵² Human nature being what it is, however, we would expect such amazement whether or not it was a motif to report it.³⁵³

Some scholars suggest a lapse of time between the healing before the hour of prayer and the preaching (which they place afterward),³⁵⁴ but such a delay would probably lose the momentum of the event. In this narrative, Peter did not deliberately draw the initial crowd but began preaching only when he saw their reaction.³⁵⁵

f. Running Together at Solomon's Portico (3:11)

Temples following Greek architectural models had porches (e.g., Polyb. 4.67.3), where people could gather protected from sun and inclement weather. Colonnades displayed a city's wealth or a benefactor's gifts, starting at least as early as Herod the Great in Antioch.³⁵⁶ After the NT period, wealthy donors even built a long porch (στοά) from Ephesus to the temple of Artemis, a stadion in length, to prevent worshipers from avoiding the temple during rains (Philost. *Vit. soph.* 2.23.605). Public speakers often lectured in temples, which were major public buildings.³⁵⁷

The use of Solomon's Portico (Acts 3:11; 5:12) undoubtedly was part of primitive Christian tradition, independently attested (as a location of Jesus's activity and early Christian interest) in John 10:23.³⁵⁸ Greek public buildings regularly included such porches, which philosophers and others employed for activities such as public lectures; covered on top and shielded on one side by the building to which they might be attached and somewhat on the other by pillars, they provided shade and shelter, as noted above. On the southern end of the massive outer court of the temple lay the Royal Portico (or Porch); the eastern colonnade was called Solomon's Portico. Whereas the Royal Portico had four rows of pillars, Solomon's Portico along the eastern wall of the Court of the Gentiles had, like the other sides, two rows of pillars.

A long outdoor hallway supported by pillars, Solomon's Portico was on the east of a pre-Herodian structure considered Solomon's, which overlooked the steep Kidron Valley (Jos. *Ant.* 20.221; *War* 5.185).³⁵⁹ Because the eastern colonnade's masonry was pre-Herodian, people assumed that it derived from the time of Solomon (*War*

351. Theissen, *Miracle Stories*, 69. The particular term *θάμβος* is exclusively Lukan in the NT (Luke 4:36; 5:9; though six times in LXX); Luke usually uses *ἐκστάσις* for a visionary state (Acts 10:10; 11:5; 22:17) but can also use it for astonishment (Luke 5:26; as in Mark 5:42; 16:8, the other two NT uses; but about twenty-six times in the LXX).

352. Theissen, *Miracle Stories*, 70 (citing Lucian *Lover of Lies* 12; *Disowned* 5; Apul. *Metam.* 10.13; P.Oxy. 10.1242; PGM 4.2454–55).

353. In popular accounts of miracles in various nations today, cf., e.g., celebration at the healings of the lame that is reported in Green, *Thirty Years*, 104; Chavda, *Miracle*, 12–13, 146; Dunkerley, *Healing Evangelism*, 18 (explicitly compared with Acts 3); various examples cited in Keener, *Miracles*, ch. 12. In research for that book, I found statements of amazement commonly accompanying miracles (not recording all of them in the book); in many cases, however, one might safely assume its occurrence even without its specific mention.

354. Dunn, *Acts*, 44.

355. Witherington, *Acts*, 179.

356. See McRay, *Archaeology*, 39.

357. E.g., Dio Chrys. *Or.* 36.17; Philost. *Vit. Apoll.* 4.2; see comments on Acts 2:46.

358. The LXX employs the term *στοά* for the temple (1 Kgs 6:33; Ezek 40:18; 42:3, 5), but the LXX would not by itself provide information on "Solomon's" portico. Some other scholars have also noticed the connection between John and Acts here (e.g., Anderson, "Worship").

359. Hengel, "Geography of Palestine," 37; cf. Thompson, *Archaeology*, 337; Fitzmyer, *Acts*, 279.

5.184–85; *Ant.* 15.397–400; 20.221).³⁶⁰ The putative connection with Solomon, builder of the original temple (Acts 7:47), may have helped play into an eschatology emphasizing the temple’s restoration even if the believers chose the site for its utility.

These “temple precincts across the Court of the Gentiles” were “some way from the sanctuary entrance.”³⁶¹ Whether Luke studied the temple sufficiently during his time in Jerusalem to visualize such aspects of its topography, and whether he could expect some older Jewish members of his ideal audience to be able to visualize it, we cannot say.³⁶² What is clear at least is that Luke wants to indicate that he has authentic historical tradition and wants his audience to share at least some of the setting of these events, rooted in Israel’s history. Teaching in temples was common; see comments on Acts 2:46.

The gathering of “the people” in the temple may also remind the ideal reader of the work’s first such gathering, during Zechariah’s prayer (Luke 1:10, 21), when God also acted dramatically for his plan of redeeming Israel, or Jesus’s teaching there (19:47–48; 20:1, 6, 9, 19, 26; 21:38).

The “running together” of “the people” here in a good way (cf. Mark 6:33) contrasts with the temple crowd during Paul’s later visit to the temple—when “the people” “run together” to lynch him (Acts 21:30).³⁶³ Running was counted as undignified for particularly honorable people,³⁶⁴ though allowed for extraordinary circumstances (Luke 15:20) such as these.³⁶⁵ People might even “run together” to hear a famous teacher.³⁶⁶

2. Call for Israel’s Repentance and Salvation (3:12–26)

Throughout Acts, signs are the most abundant means of drawing attention to the gospel (see the commentary introduction, ch. 9, and esp. ch. 15, sect. 6.b.i)³⁶⁷ and hence are inseparable from proclamation.³⁶⁸ The audience’s attention so secured in Acts 3:1–11, Peter preaches his message. This passage offers a restoration of Israel’s kingdom if Israel, which has rejected its king, will now turn and receive him.

a. Introduction

Before examining the speech’s details, it will be helpful to summarize its message, arguments concerning its “authenticity,” and the nature of its rhetoric.

I. MESSAGE

Peter emphasizes that the blessings to Israel (3:26) promised to patriarchs and prophets are now available through the Messiah, whom his people have rejected.

360. E.g., Brown, *John*, 1:402; see further Hengel, “Geography of Palestine,” 37.

361. Witherington, *Acts*, 178–79. It was, however, accessible from there (see Dunn, *Acts*, 40). Luke’s language is probably general; otherwise (as Pervo, *Acts*, 101, emphasizes), his topography is precise only in the probably later (and corrected) Western text.

362. See Hengel, “Geography of Palestine,” 37.

363. The verb συντρέχω can appear in joyful (Jdt 6:16; 13:13; 15:12), sorrowful (Jdt 14:3; 2 Macc 3:19; 6:11), virtuous (Ign. *Eph.* 3.2; 4.1; *Magn.* 7.2; *Pol.* 6.1), and sinful (Ps 50:18 [49:18 LXX]; 1 Pet 4:4; 1 *Clem.* 35.8; *Barn.* 4.2) settings.

364. E.g., Dio Chrys. *Or.* 32.52 (noting [32.54] that one’s gait in walking reveals one’s character); cf. Bailey, *Peasant Eyes*, xv; Jeremias, *Parables*, 130; Talbert, *Reading Luke*, 150; esp. Parsons, *Body*, 119–20.

365. E.g., tragedy to a loved one (*Apoll. K. Tyre* 25); meeting a king (*b. Ber.* 58a); reuniting with a loved one (Gen 33:4; Tob 11:9–10; Luke 15:20; *Appian Hist. rom.* 2.5.3; see further Hock, “Novel,” 140).

366. E.g., y. *B. Meši’a* 2:11, §1; *Hor.* 3:4, §4.

367. Keener, *Acts*, 1:320–82, 542–44.

368. For one application of this observation, see Campbell, “Ministry,” 43–44 (noting that twentieth-century evangelicals, liberals, and Pentecostals often separated word, deed, and power).

Although their rejection of their rightful ruler comes close to the beginning of Peter's message (3:13–14), as in his Pentecost message (2:23), in both instances the message is introduced and occasioned by divine activity revealing God's presence with Israel (2:16–21; 3:12), and the bulk of the message argues for Jesus's identity and Israel's proper response. Luke includes many points (especially about the promises to Israel) here that do not appear in the Pentecost speech, and vice versa, providing through different speeches samples of early Christian preaching to Israel and scriptural apologetic summarized in Luke 24:44.³⁶⁹ When speaking about Israel's rejection, we should keep in mind that Luke's own narrative in the Gospel is actually more nuanced; in fact, Jesus was quite popular especially in Galilee. But given biblical promises about Israel as a whole turning to God, a mere remnant, no matter how large, was insufficient to fulfill God's restoration promises. Rejection by Israel thus means not that all Jesus's people rejected him but that many did so, in Luke's passion narrative indeed repudiating him in a particularly forceful way (Luke 23:13–24).

Because Israel has rejected its king, it must now repent and embrace this king to receive the promised kingdom blessings (Acts 3:25–26). Peter's—and apparently Luke's—view is that ultimately Israel will accept its king, ushering in the eschatological era. The delay in obedience, meanwhile, leads to a delay of the promised end and so provides the time in which the Gentile mission will be carried out (a view similar to that of Paul in Rom 11).

Nevertheless, though Jesus is an authority figure here (Acts 3:15) and has already never introduced as king (2:36), this speech's christological focus lies elsewhere. Jesus is the promised and expected one who would inaugurate the promised eschatological blessings. The controlling christological title is “servant,” as indicated by the inclusio of 3:13 and 26; in light of other clues, this is almost certainly the servant of Isaiah. In light of this title, “righteous one” (3:14) probably recalls Isaiah's “servant” as well (Isa 53:11).³⁷⁰ (Clearly, Luke does associate Jesus with Isaiah's servant [Acts 8:32–33].)³⁷¹ (On the nature of “servants” more generally, see the excursus at Acts 12:13; but the sense here is much more specific.)

Among the distinctive features introduced to the theology of Luke's speeches by this passage, scholars often emphasize the prophet-like-Moses Christology evident here (3:22).³⁷² Zehnle points out parallels between Peter's preaching about Jesus here and Stephen's portrayal of Moses in Acts 7:³⁷³

1. In “orthodox” Christian literature before the end of the second century C.E., only Acts 3:22 and 7:37 cite Deut 18:15.³⁷⁴

369. For how this speech fits Luke's larger strategies, including in Luke 4:16–30, see, e.g., Neiryneck, “Luke 4,16–30,” 378–79. Buttica, “Actes 3,” proposes connections with the narrative (Acts 3:1–11) and Luke-Acts more widely.

370. With many, e.g., Watson, “Faith,” 156–57. Doble, *Paradox* (e.g., 158), argues that Jesus, as the “righteous one,” at his death (Luke 23:47) evokes Wis 2, hence implying that Jesus's death was “a faithful response to God's call.” I do find this language in the passion narrative, though I have seen language from Wisdom of Solomon more clearly in Matthew (Keener, *Matthew*, 682).

371. Presumably Luke would read Isa 53:12 as implying Jesus's resurrection, although he nowhere cites it clearly.

372. E.g., Hamm, “Acts 3:12–26.”

373. Zehnle, *Pentecost Discourse*, 76–77.

374. This means explicit citations; clearly, allusions appear elsewhere, including in John 1:21, 25; 6:14; 7:40 (though the Johannine references represent outsiders' inadequate Christology). Cf. also possibly “hear him” at Luke 9:35; Mark 9:7; Matt 17:5 (see, e.g., Mauser, *Christ in Wilderness*, 114; Davies, *Sermon*, 24; Longenecker, *Christology*, 36; Young, *Jewish Theologian*, 211), which appears in the context of a larger Moses allusion in the transfiguration.

2. Exodus 3:6, quoted in Acts 7:32, is alluded to in Acts 3:13 (cf. Mark 12:26; Matt 22:32; Luke 20:37).³⁷⁵
3. Whereas ἀρνέομαι appears for Jesus in Acts 3:14 and Moses in 7:35, it appears nowhere else in Luke-Acts.³⁷⁶
4. Similar titles apply to both: Jesus is δίκαιος and ἀρχηγός (3:14–15), and Moses is ἄρχων καὶ δικαστής (7:27, 35).
5. Moses’s return in 7:34–37 parallels Jesus’s return in 3:20–21.
6. Moses-Jesus parallels are absent from the rest of Acts.³⁷⁷
7. The language of the covenant appears in 3:25 and 7:2–8, 17.³⁷⁸

In support of this pattern, he notes also the clear Moses-Jesus parallel in Acts 7 (a strong argument) and adds the possibility that 3:20’s προκεχειρισμένον (cf. also 22:14; 26:16) reflects a Mosaic parallel³⁷⁹ (unfortunately a very weak argument).³⁸⁰ Deuteronomy 18 suggests a prophet patterned after Moses, and the primary connection in Acts is that both were rejected.³⁸¹

Borgman suggests parallels in Peter’s preaching to Israel (Acts 2:14–39; 3:12–26; 4:8–12);³⁸² I asterisk in the following table the parallels that are most significant, where I believe they can be defended in at least two columns:

	2:14–39	3:12–26	4:8–12
*Resurrection	You killed God raised	You killed God raised	You killed God raised
Authority#	Let Israel know certainly	Heed him	Salvation only in him
*Repentance	Repent, be baptized	Repent, turn to God	(Failure to repent rejects Israel’s cornerstone)
*Forgiveness	So your sins may be forgiven	So your sins may be wiped out	(No repentance, hence no forgiveness)
Holy Spirit†	Spirit poured out explains disciples’ behavior (2:15–17)	Why do you attribute the healing to our own power? (3:12)	By what power . . . ? Peter, filled with the Spirit (4:7–8)
“Punch line”	Know with certainty; repent	Listen to him! Repent	(Not listening rejects the cornerstone)

#This could better be viewed, in two cases, as an appeal to Christology.

† In this section, the Spirit is mentioned in a speech (as opposed to a surrounding narrative) only in Acts 2, not in Acts 3–4.

Although some of the “parallels” require too much inference or association, the explicit connections are clearest regarding Jesus’s resurrection, the call to repentance, and the promise of forgiveness. Borgman rightly points out that this pattern reflects Jesus’s own last-words speech (Luke 24:46–47);³⁸³ as in these speeches, this is evident regarding resurrection, repentance, and forgiveness. It is especially conspicuous regarding repentance and forgiveness, which Jesus specified to preach in 24:47, starting in Jerusalem, a commission that Peter is here carrying out. We should also add the “witnesses” of 24:48 (see Acts 2:32; 3:15; 5:32).

375. The OT source can be only Exod 3:6, 15; 4:5, all of which are part of Moses’s call narrative.

376. But cf. the emphasis on repudiation in Luke 19:14, 27 (noted by Tannehill, *Luke*, 161).

377. This is part of his argument for the pre-Lukan character of the motif in Acts 3. Acts does not focus on Jesus as much as Luke’s Gospel does, but the parallel is not entirely absent; still, it is predominant especially here and in Acts 7.

378. This is really an Abrahamic parallel, a point on which the text itself is clear (Acts 3:25; 7:8).

379. Zehnle, *Pentecost Discourse*, 77–78.

380. The LXX employs the exact term only at 2 Macc 3:7; 8:9; 14:12; Dan 3:22.

381. Zehnle, *Pentecost Discourse*, 78.

382. Borgman, *Way*, 279.

383. *Ibid.*, 277.

II. AUTHENTICITY

Many scholars have argued for early tradition in this speech, sometimes in contrast with Acts 2. Not all the proposed arguments are of equal weight, but they merit mention. Zehnle, who finds far more marks of Lukan composition in Acts 2, offers the following non-Lukan (hence pre-Lukan) characteristics of Acts 3:12–26:

1. Elements of forgiveness terminology
 - a. especially ἐξαλειφθῆναι³⁸⁴ (3:19)
 - b. and ἐν τῷ ἀποστρέφειν³⁸⁵ (3:26)
2. End-time terminology
 - a. Καίροὶ ἀναψύξεως³⁸⁶ (3:20)
 - b. Χρόνων ἀποκαταστάσεως³⁸⁷ (3:21)
3. In contrast with Acts 2, it is not highly polished³⁸⁸
4. Jewish motifs without traces of later Christian theological developments³⁸⁹

He also suggests that Luke sometimes adopts the style of the source at times instead of restating it.³⁹⁰ But verbal cognates (e.g., for “restoration”) and other points of contact between this speech and other passages in Luke-Acts (mentioned below and at those other passages) warn us against reading too much into early Christian hapax legomena. Modern reconstructions of what Christologies are most “primitive” (as opposed to the more objective category of “distinctive”) also often depend on a modern view of the evolution of Christology in the early church that contradicts some of our explicit early evidence.³⁹¹ Many elements of Christology here do, indeed, seem early and based on tradition, of course; I also believe that the distinctive elements do suggest early tradition. The necessity of Israel’s repentance prior to the end appears often enough in the prophets and occasionally in the NT; but it is rare for Luke, and this may suggest tradition about emphases of the primitive church.³⁹² But even this fits into Luke’s overall schema (see comments on Acts 1:6–8). Although I believe that this passage betrays signs of Luke’s knowledge about distinctive emphases of the (probably primitive) Jerusalem church, I do not believe that all distinctive elements should weigh as heavily for the argument as they are sometimes counted. Whatever his sources, Luke avails himself of the opportunity to expand, in Peter’s second sermon, elements of the salvation-historical theology and Christology introduced in the first.³⁹³

John A. T. Robinson argues that “prophet” and “servant” in Acts 3 are more primitive than “Lord” and “Christ” in Acts 2, as is also its futurist (as opposed to Acts 2’s

384. In extant early Christian texts, elsewhere only in *1 Clem.* 18.2 (quoting Ps 51); *2 Clem.* 13.1 (Zehnle, *Pentecost Discourse*, 56). By contrast, “forgiveness of sins” here is common Lukan terminology, but it is hardly limited to him.

385. Zehnle claims that this is unique in early Christian literature (*Pentecost Discourse*, 57).

386. It appears nowhere else in the NT, and in the LXX only at Exod 8:11 (Symmachus adds Isa 32:15 but is too late; Zehnle, *Pentecost Discourse*, 57).

387. Only the verb form is found elsewhere in the NT (the relevant examples are Matt 17:11; Mark 9:12; Acts 1:6; Luke omits the Markan example; Zehnle, *Pentecost Discourse*, 58).

388. Zehnle, *Pentecost Discourse*, 60.

389. *Ibid.*, 134–35. Luke at least wishes his material to seem primitive, and his attempt at least reflects his knowledge of the community’s primitive traditions (137).

390. *Ibid.*, 59.

391. See, e.g., Keener, *John*, 298–310; cf. Witherington, *Story*.

392. See, e.g., Parker, “Apokatastasis,” 31. The eschatology of Acts 3:19–21 does not seem to be Lukan in emphasis (though compatible; cf. Acts 1:6–7; Luke 21:28) (cf. discussion in Hahn, “Überlieferungen,” esp. 148–51).

393. Cf. Pesch, *Apostelgeschichte*, 1:158. Pervo, *Dating*, 335–36; *idem*, *Acts*, 103, argues against primitive christological titles in Acts 3.

mainly realized) eschatology.³⁹⁴ He goes too far, however, in seeing Jesus as only Christ-designate until his return from heaven.³⁹⁵ (He answers the objection from Jesus's Christ title in the context, 3:18, by arguing that it is an interpolation;³⁹⁶ it is circular reasoning, however, to select what is early in the sermon only on the basis of what fits one's thesis about what should be early.) Dunn likewise argues for early tradition in this sermon, especially on the basis of its "primitive" Christology³⁹⁷ and its role for Israel:

1. Jesus is *παῖς* only here (3:13, 26) in the NT (Dunn claims).
2. Jesus is the Holy and Righteous One (3:14), which is *rare* in the NT.
3. Jesus is *ἀρχηγός* (3:15; 5:31), a title that elsewhere appears only in Heb 2:10; 12:2.
4. There are ancient motifs of God restoring Israel (Acts 3:19–21).
5. The new Moses of Deut 18:18 is not widespread in the NT, which generally considers a mere prophet Christology inadequate.³⁹⁸
6. The covenant blessing for the nations starts with Israel (Acts 3:24–26; Gen 22:18).³⁹⁹

Although I concur (for reasons given in the commentary introduction, chs. 3–7) that Luke has access to—and hence, like a good historian, uses—early tradition, not all of the above arguments prove effective in support of that claim. First, Jesus does appear as *παῖς* at least occasionally elsewhere, even if we count only the clear examples of the title and not Isaiah allusions (Matt 12:18), and this appearance includes in Luke's writings (Acts 4:25–30; cf. Israel and David in Luke 1:54, 69).⁴⁰⁰ Second, titles of "holy" and "righteous" are not rare in Luke's style (Luke 4:34; Acts 7:52; 22:14). Third, one wonders whether a title attested in Hebrews, a Hellenistic Jewish document, is necessarily primitive; in contrast to the expectation that rare terms are early, terms can be rare because they are late and had not had the opportunity to spread throughout early Christianity, whereas early terms could be widespread because of their antiquity.

On the fourth and sixth points, expecting Israel's restoration is part of how Luke consistently characterizes the first apostles in these chapters (Acts 1:6). Although this depiction no doubt reflects genuine knowledge of primitive Christian expectations, by itself it does not demonstrate knowledge of a particular speech's content; it could be explained by Luke writing speeches in character (see the commentary

394. Robinson, "Primitive Christology"; idem, *Studies*, 150; cf. Cullmann, *Peter*, 66; Witherington, *Acts*, 153; Marguerat, *Actes*, 125. Somewhat persuasively, "his" Christ appears more primitive than "the" Christ (Lake and Cadbury, *Commentary*, 37; Semitic usage in 1 Sam 2:10; 12:3–5; 22:51; Pss 2:2; 18:50; 20:6; 28:8; Isa 45:1; Sir 46:19; 1 En. 48:10; 52:4; 4Q377 1 II, 5; Pss. Sol. 18:5; Rev 11:15; 12:10; but cf. Acts 4:26; Luke 2:26).

395. Robinson, *Studies*, 144; idem, *Coming*, 144.

396. Robinson, *Coming*, 145. Granted, Christ's suffering is Lukan language, but it is also the language of other early Christian teachers (e.g., Mark 8:31; 9:12; Heb 2:18; 5:8; 9:26; 13:12), including the Petrine tradition (1 Pet 2:19–23; 3:18; 4:1). Excising parts of the speech that do not fit one's thesis does not disprove one's thesis, but it suggests that one may also not grant its falsifiability.

397. Cf. Robinson, *Studies*, 46: "In Acts 3.12–16, we have a speech which . . . preserves extremely primitive material, and indeed reflects a Christological outlook as primitive as any other in the New Testament."

398. Aune, *Prophecy*, 155, particularly notes that this is not a notable Lukan emphasis.

399. Dunn, *Acts*, 42–43.

400. O'Toole, "Servant," sees "servant" as an important Lukan motif. Marshall, "Acts," 545, notes that although the title appears in the Apostolic Fathers (cf. 1 Clem. 59.2–4; Did. 9.2–3; 10.2–3; Mart. Pol. 14.1, 3; 20.2; Diogn. 8.9, 11; 9.1), it appears there without apparent connection with Isaiah (though cf. Barn. 5.14–6.1; perhaps 9.2 with Isa 50:2).

introduction, ch. 8, sect. 2.b)⁴⁰¹ without knowledge of this specific speech's content. Finally, the prophet-like-Moses (or prophet-greater-than-Moses) Christology appears also in John and Matthew,⁴⁰² which are hardly the earliest NT works (though they are thoroughly Jewish).⁴⁰³

These qualifications weaken the argument but do not necessarily attenuate it beyond helpfulness. That Luke does report various christological titles in Acts, some more in earlier sections, suggests that he did not try to conform all the speeches to a single standard despite the various ways he connects them together. He wished to portray distinctively the earliest Jerusalem church and apparently had some early tradition that allowed him to highlight such distinctions while nevertheless weaving a literary unity throughout the speeches. Likewise, although some of the proposed translations back into Aramaic seem convincing, for the most part Luke is probably "archaizing," using the LXX.⁴⁰⁴

III. RHETORIC

This speech is mostly deliberative rhetoric, calling for a change in behavior (3:19, 26).⁴⁰⁵ Peter's speech has tangled syntax and ideas without clear connections, but the syntactic disjunctions may result from compressing too much.⁴⁰⁶ Apparently, Luke knew some early Christian preaching, but in compressing the material so much, he may depend on his audience's awareness of the same material if he expects them to follow. Satterthwaite suggests the following structure and notes how unusual it is:

1. Proem (3:12)
2. Proposition (God glorified his Son, 3:13a)
3. Demonstration (3:13b–16)
4. Peroration (3:17–21)
5. Conclusion, which functions as a new proposition (3:20b–21: Jesus fulfills prophecy)
6. Further demonstration (3:22–24)
7. Peroration (3:25–26)

He suggests that it may be unusual because Luke wanted "to give an impression of something exuberant, spontaneous, and impassioned, which would naturally tend towards a loose structure."⁴⁰⁷ Luke would certainly not expect Peter to follow standards of Greco-Roman rhetoric, nor expect Acts' audience to anticipate this competence of Peter. Possibly the repetition of the basic structure is meant to suggest that Peter's speech, going on for some time (cf. 2:40), repeated various elements, especially with a likely growing crowd. The elaborate chiasmus in the equally spontaneous speech in 2:22–36 indicates that Luke himself was careful with structure, however, and none

401. Keener, *Acts*, 1:284–86.

402. See esp. Allison, *Moses*; Glasson, *Moses*.

403. Meeks, *Prophet-King*, 26–27, while allowing the (untestable) possibility that Luke could have used prior tradition identifying Jesus as the new Moses, contends that Luke has constructed this Christology in its present form in Acts. We cannot be certain; although the parallels may fit Luke's interests elsewhere, those could derive from tradition as well.

404. Johnson, *Acts*, 72–73.

405. On the deliberative rhetoric, see Haraguchi, "Call for Repentance." See further the commentary introduction, ch. 8.

406. Johnson, *Acts*, 72–73. Contrast the suggestion of literary chiasmus in Acts 3:12–16 (Boismard and Lamouille, *Actes*, 2:36), which would be editorial.

407. Satterthwaite, "Acts," 359.

of the above explanations for the unusual structure here fully explain why Peter's earlier sermon is structured so differently. This difference apparently stems either from sources of a different nature or from Luke's simply allowing varied models to make different points.

b. Not by Our Power or Devoutness (3:12)

That Peter here teaches in the temple (more explicitly than in 2:14–40; cf. also 2:42, 46) indicates that he continues Jesus's ministry there (Luke 20:2).⁴⁰⁸ It is not impossible that Peter's address, "men," here could signify his preaching further in the interior of the temple (Acts 3:8) and hence deriving converts only from the Court of Israel, not including women (cf. ἀριθμὸς τῶν ἀνδρῶν in 4:4). This is, however, a familiar Lukan (and ancient) form of address (see comments on Acts 2:14), and so it is unlikely that we should limit the converts to the males explicitly mentioned (4:4). "Israelites" fits the theological message to Israel (3:19–21, 26) but also the setting in Jerusalem, whether the speaker is Peter (2:22), Gamaliel (5:35), or Paul's accusers (21:28); Paul also applied the term to Diaspora Jews (13:16).

Peter begins his sermon by correcting a misunderstanding of a miracle, as he did in 2:14–15.⁴⁰⁹ Here Peter disclaims being the cause of the healing.⁴¹⁰ Some scholars suggest that by Luke's discounting their own power or piety as the cause of healing, Luke contrasts them with "divine men" like Simon (8:10) or later Apollonius (Philost. *Vit. Apoll.* 3.18; 8.5, 7).⁴¹¹ The "divine man," in its best-known form (as in stories of Apollonius), is a later construct, but particular elements of this portrayal already existed in wonder-workers in the first century.⁴¹² Since many of these wonder-workers (when not viewed benevolently) were understood as sorcerers,⁴¹³ this passage may function as antimagical apologetic; Luke elsewhere (Acts 8:7–13, 18–24; 19:11–20) applies such contrasts to distinguish early Christian miracles from sorcery, which was often feared (see comments on Acts 8:9–11). Paul and Barnabas offer the same disclaimer (14:15).

One may contrast also some circles of Jewish tradition. Honi would draw a circle and refuse to step outside it till God sent rain, so that God, honoring Honi's confidence and piety, would grant the request.⁴¹⁴ It was later said of Levi ben Sisi that God drove off marauders in response to his piety (but responded less enthusiastically to a less pious disciple).⁴¹⁵ A holy man had power to make things happen, because he was holy.⁴¹⁶ Some Jewish people, however, had concerns about misplaced faith. According to Josephus, Moses even rewrote his own disappearance from the earth to avoid people's attributing his ascension to his great virtue (*Jos. Ant.* 4.326).

Pagans, too, linked piety with spiritual power. Romans believed that their sacrifices could expiate the gods (*Val. Max.* 1.1.16) and that their continued worship could

408. With Crowe, *Acts*, 26. On teaching in temples, see comments on Acts 2:46.

409. Barrett, *Acts*, 188.

410. John Cassian *On the Incarnation of the Lord against Nestorius* 7.19 (Martin, *Acts*, 40) suggests that the apostles never treated the power as if it came from themselves but always gave credit to Christ, who gave the power. Some modern healing evangelists have also offered such disclaimers (Kuhlman, *Miracles*, 15–16), although the utility of such claims as analogies is mitigated by likely dependence on the biblical tradition.

411. Witherington, *Acts*, 179.

412. See, e.g., the discussion in Keener, *John*, 268–72, following, e.g., Tiede, *Figure*; Holladay, *Theios aner*, passim.

413. Barrett, *Acts*, 200, specifies antimagical apologetic in contrast to divine men as background.

414. See discussion in the commentary introduction, ch. 9, sect. 3.d (Keener, *Acts*, 1:338–41). *'Abot R. Nat.* 9 A applies the circle-drawing to Moses's intercession for Miriam.

415. *Y. Ta'an.* 3:8, §2; *Pesiq. Rab Kah.* 24:18.

416. *Y. Ta'an.* 3:11, §4; cf. *b. 'Abod. Zar.* 18a (on R. Meir); *Me'il.* 17b (R. Simeon ben Yohai); *Sukkah* 28a (Jonathan ben Uzziel). Cf. *b. B. Meši'a* 86a in Neusner, *Sat.* 77–78, where signs are recorded to glorify Rabbah bar Nahmani.

even make the gods embarrassed to continue in anger against Rome (1.1.15). They could speak of those who merited answers to prayer (Fronto *Ad M. Caes.* 3.10). Even the few who opposed petitionary prayer (see comments on Acts 3:6) believed that deities favored those who merited their favor (Max. Tyre 5.3).

Luke is not opposing either piety or power; he elsewhere employs εὐσεβ- terminology only for non-Christian religious devotion but portrays it as positive and potentially a prelude for Christian faith (Acts 10:2, 7; 17:23). In addition to more general connections between piety and power noted above, Luke's audience would be familiar with εὐσεβ- language; piety toward the divine was one of the highest values of pagan society (Men. Rhet. 2.1–2, 368.17–20).⁴¹⁷ Greek-speaking Jews also portray it as a central virtue.⁴¹⁸ "Power" appears in Luke-Acts in connection with healings and miracles (Luke 4:36; 5:17; 6:19; 8:46; 9:1; Acts 4:7; 6:8; 10:38),⁴¹⁹ but the power comes from God, not from God's agents (cf. Luke 9:1; 24:49; Acts 1:8; 10:38).

Peter asks why his hearers marvel. It should not surprise us that ancient texts sometimes report people's amazement as a typical response to miracles, other supernatural activity (*Sib. Or.* 1.32), unusual behavior (Mus. Ruf. frg. 39, p. 136.10, 14), or greatness (P.Lond. 1912.8–9). Astonishing and unnatural events were called "wonders" (θαύματα).⁴²⁰ Hearers could marvel (θαυμάζω) when hearing about them.⁴²¹ Just as Luke probably borrows "signs and wonders" from the exodus story (cf. Acts 7:36; Exod 7:3; Deut 4:34; 6:22; 7:19; 26:8; 29:3; 34:11), he might interpret the language of "marveling" in light of the same source (Acts 7:31, reflecting the idea of Exod 3:3; cf. Exod 3:20); his most immediate source, however, is likely gospel tradition (compare, e.g., Luke 8:25 with Matt 8:27).⁴²² Yet Peter here treats their amazement as inappropriate, considering the truth that God had raised up the Prince of life (Acts 3:12–15).

c. God Glorified His Rejected Servant Jesus (3:13)

Scholars generally recognize as the speech's proposition the premise that the God of Israel had acted in history again to resurrect Jesus.⁴²³ A full πρόθεσις, or statement of the case, should also preview arguments that will be used in the proof,⁴²⁴ but this is too much to expect of Luke's mere speech summary here.⁴²⁵

I. THE ANCESTRAL DEITY

Pagans could describe a local deity as "god[dess] of our fathers"⁴²⁶ or speak of the "gods of our ancestors,"⁴²⁷ but the Jewish expression was much more familiar in Jewish

417. For the importance of εὐσεβεία in Greek religion, see Burkert, *Religion*, 272–74.

418. E.g., *Test. Iss.* 7:6 (*OTP* 1:804)/7:5 (Charles, 115). In various forms, it became a common Jewish name (e.g., *CIJ* 1:79, §113; 1:80, §114; 1:260, §§330–31; 1:261, §332).

419. The term employed for "miracles," δυνάμεις, presupposes the connection, as "acts of power" (Grundmann, "δύναμαι/δύναμις," 301).

420. E.g., Philost. *Hrk.* 8.12–13, 15; 14.4.

421. Philost. *Hrk.* 9.4.

422. Luke employs the verb θαυμάζω eighteen times, more than any other individual NT writer (even proportionate to size; though Matthew has more than Acts, Luke's Gospel more than compensates), though only about 40 percent of the total. It is also frequent in the Apostolic Fathers (thirteen times) and the LXX (fifty-seven times if we include 4 Maccabees [1:11; 6:11; 8:5; 9:26; 17:16–17; 18:3]). The verb for "gazing" recalls 3:4 (see Gaiser, *Healing*, 216).

423. E.g., Satterthwaite, "Acts," 359.

424. Dion. Hal. *Lysias* 17.

425. For further discussion of speech propositions, see comments on Acts 1:8.

426. Xen. Eph. *Anthia* 1.11.

427. Virg. *Aen.* 9.247; Mus. Ruf. 15, p. 96.26, 30; Quint. Curt. 4.10.34. See in more detail Parker, "Patrooi theoi"; in the ancient Near East, cf. Gordon, *Near East*, 130; Carpenter, "Deuteronomy," 442. Malina and

circles than the pagan expression in pagan ones. “The God of Abraham, Isaac, and Jacob” was a familiar Jewish expression, derived from the biblical revelation to Moses (Exod 3:6, 15–16; 4:5; 6:3).⁴²⁸ It continues to appear in early Jewish sources.⁴²⁹ This title appears in the regularly prayed Eighteen Benedictions and hence would have been one of the most familiar titles of God in early Judaism.⁴³⁰

A specific passage is, however, likely Luke’s source here. Apart from their mention in Luke 13:28, these patriarchs appear in Luke-Acts only in connection with “the God of Abraham, Isaac, and Jacob,” in explicit allusions to the burning-bush passage (Luke 20:37; Acts 7:32).⁴³¹ The informed reader of Luke-Acts would recall that Jesus uses this very phrase from Exod 3:6 to affirm the doctrine of resurrection (Luke 20:37).⁴³² Luke probably therefore expects the informed reader to presuppose that argument here: the God who demonstrated his faithfulness to the patriarchs in the exodus would also raise them from the dead and had now demonstrated his power by raising Jesus as a foretaste of the resurrection of God’s people.⁴³³ But the Spirit acts as Jesus’s executive power,⁴³⁴ in this case through Jesus’s “name” (see extended comments on Acts 3:6).

II. THE GLORIFIED SERVANT

The term *παῖς* itself can mean either “child”⁴³⁵ or “servant.”⁴³⁶ Because the context is pregnant with biblical allusions, however, the usual OT, especially Isaianic, sense should be given preference; Jesus is God’s “servant.”⁴³⁷ At least some in the Qumran community called the Teacher of Righteousness God’s “servant” (4Q171 1–2 III, 15–16).⁴³⁸ Most scholars, however, rightly find the direct background here in Isaiah’s servant, who both suffers (as here) and is also “glorified” (Isa 52:13 LXX).⁴³⁹ Some have disputed this

Pilch, *Acts*, 187–88, compare ancestor veneration in many societies (a frequent subject in anthropological literature), but the connection appears rather tenuous.

428. Cf. also Gen 28:13; 31:42; 1 Kgs 18:36; 1 Chr 29:18; 2 Chr 30:6. If the repetition of “God” with the name of each patriarch is original (textual evidence is divided), it would, though traditional, produce rhetorical effect; the repetition might suggest *synonymia* (cf. Rowe, “Style,” 133; Porter, “Paul and Letters,” 580), and rhetoricians might also see epitheton (cf. Porter, “Paul and Letters,” 580) here. Regardless of the variant, care must be taken in translating the expression here into some languages to retain its monotheistic sense (Wade, “Gods”). Mention of “Abraham” may also prepare for Acts 3:25.

429. E.g., *Jub.* 27:22; 29:4; 44:5; 45:3; 4Q393 4 5 (probably); *Philo Dreams* 1.3, 159; *Abr.* 51; *Mos.* 1.76; *Mek. Pisha* 1.23–27; *b. Ber.* 16b; *Gen. Rab.* 82:3; *Test. Mos.* 3:9. The title also appears with individual patriarchs, e.g., “the god of our father Jacob” (*Test. Dan* 1:9, most MSS). Other nations also addressed the gods of their ancestors (e.g., *Virg. Aen.* 9.247).

430. Cf. also Bruce, *Acts*¹, 107. For discussion of the dating of this prayer, see comments above on Acts 3:1.

431. “Glorified” might relate to the glory of the angel of the Lord in the burning-bush passage; but Luke omits that feature of the passage (cf. Acts 7:2, 35, 38), and some other sources for “glorified” are likelier.

432. See similar ancient Jewish arguments in *y. Ber.* 2:2, §9; Lachs, *Commentary*, 361; Davies and Allison, *Matthew*, 3:233; Keener, *Matthew*, 528–29; for various arguments for the resurrection from the Pentateuch, see *Sipre Deut.* 306.28.3; 329.2.1; *b. Sanh.* 90b; *Gen. Rab.* 20:10; for the patriarchs’ continuing life, *Philo Abr.* 50–55 in Downing, “Resurrection”; 4 *Macc* 7:18–19; 16:25.

433. Reference to the God who acted in a strikingly new way in the exodus may also help explain the title “pioneer of life” in Acts 3:15.

434. Turner, *Power*, 303.

435. E.g., *CIJ* 1:369–70, §505; Char. *Chaer.* 3.5.4; Acts 20:12.

436. E.g., *Test. Ab.* 17:18 A; 18:3 A. Theon *Progymn.* 5.104–6 understandably warns against the term’s potential ambiguity.

437. With, e.g., Foakes-Jackson, *Acts*, 28.

438. The Qumran scrolls apply the language and perhaps the image to the Teacher of Righteousness (see Brownlee, “Messianic Motifs,” 18–20; Dupont-Sommer, *Writings*, 361–63). This title is not based on the text being explained (Ps 37:23–26), but it is possible that the Qumran use for the Teacher and for the priestly messiah reflect Isaiah’s “servant” (Betz, “Servant”). Brownlee, “Servant,” applies it to the community as the “saints” of Daniel (though cf. Reider, “MSHTY”); others also apply it to the community (Tängberg, “Justification”).

439. Cullmann, *Peter*, 66; Ridderbos, “Speeches of Peter,” 23; Haenchen, *Acts*, 205; Bruce, *Acts*¹, 107; Conzelmann, *Acts*, 28; Bock, *Proclamation*, 188–89; Dunn, *Acts*, 44–45; cf. Abbott, *Acts*, 53; Morris, *Cross in*

connection,⁴⁴⁰ but the “glorifying” of the servant here undoubtedly alludes to Isaiah (53:12; cf. 49:3), as does the servant’s “anointing” in Acts 4:27 (cf. 10:38; Luke 4:18; Isa 61:1). Given the Isaianic background, Cullmann even has some reason for his claim, overstated as it is, that the title lies at “the heart of New Testament Christology.”⁴⁴¹

Luke is aware that the title “servant” applies to Israel (Luke 1:54)⁴⁴² as well as that the title applies to Jesus’s agents (implicitly, Acts 13:47). But the text of Isaiah itself would offer clues pointing in various directions. Isaiah’s “servant” is clearly Israel (Isa 41:8; 44:1, 21; 49:3); but Israel fails to fulfill the servant calling (42:18–19), and one within Israel brings the rest of Israel back to God (49:5–7; 53:5–6). Although Israel suffers justly for its sins (40:2), this remnant “servant” suffers in Israel’s place, though innocent (53:4–12, esp. 53:9).⁴⁴³ This portrayal of God’s perfect agent, who would both save Israel and bring light to the Gentiles (42:6; 49:6; 52:15), lent itself most naturally to the retroactive, early Christian interpretation of Jesus as their Savior and Lord.

“Servant” was normally not a title of high honor (see comments on slavery at Acts 12:13), but “servant of God” was different. The Hebrew Bible and later Jewish tradition regularly call the Israelite prophets “slaves of God,”⁴⁴⁴ also applying the title to David,⁴⁴⁵ Moses,⁴⁴⁶ the patriarchs,⁴⁴⁷ and Israel as a whole;⁴⁴⁸ other ancient

New Testament, 141; Ladd, *Theology*, 330–31. Because the title applies to Jesus mostly in early strata of the NT (Jeremias in Zimmerli and Jeremias, *Servant*, 93), there is good reason to trace the usage to Jesus himself (with, e.g., Schweizer, “Son of Man Again,” 257).

440. Jones, “‘Servant’ in Luke-Acts,” 158–59, who doubts that Luke borrows the title from Isaiah in part because he also applies it to David (Luke 1:69; Acts 4:25; for Israel in Luke 1:54; for Jesus in Acts 3:13, 26; 4:27, 30).

441. Cullmann, *Christology*, 51.

442. Some scholars would so apply it exclusively (e.g., Berger and Wyschogrod, *Jewish Christianity*, 48); others recognize corporate personality in these chapters (Bright, *History*, 358–59; Robinson, *Personality*, 40ff.; Cullmann, *Christology*, 55; cf. Hooker, *Servant*, 44; Kaiser, *Theology*, 215); one suggestion limits it in “Second Isaiah” to Jerusalem (Wilshire, “Servant-City,” 367). For Israel, cf. also, e.g., *Pss. Sol.* 12:6; 17:23. Some argue that Qumran sectarians identified more with the justified than with the servant in Isa 53 (Tångberg, “Justification”), viewing the servant as their righteous Teacher (Betz, “Servant”); some argue that the individual use attested at Qumran paved the way for messianic use (Elgvin, “Interpretation”). Further, the title’s background need not be limited to Isaiah; e.g., David is God’s “servant” (Luke 1:69; Acts 4:25), as often in biblical sources (2 Sam 3:18; 7:5, 8, 26; 1 Kgs 3:6; 8:25, 66; 11:13, 32, 34, 36, 38; 14:8; 2 Kgs 8:19; 1 Chr 17:4, 7, 24; 2 Chr 6:15–17, 42; *Pss* 78:70; 89:3, 20; 132:10; 144:10; Isa 37:35; Jer 33:21–22, 26; Ezek 34:23–24; 37:24–25; 1 Macc 4:30). If Isaiah’s usage dominates in Acts 3:13, the Davidic “servant” might predominate in 4:25, 27, 30.

443. Cf., e.g., discussion in LaSor, Hubbard, and Bush, *Survey*, 310–12 (citing also Clines, *Approach*); differently, yet recognizing both individual (the prophet) and corporate (Israel) elements, see Robinson, *Personality*, 39–42. Other views include “what Israel must become” (McKenzie, *Isaiah*, lv); the prophet himself (Whybray, *Isaiah*, 171; perhaps written by a disciple of the prophet, Blenkinsopp, *Isaiah*, 355–56); both God’s people and a special servant (Oswalt, *Isaiah* 1–39, 51–52; cf. Jesus in idem, *Isaiah* 40–66, 408); for a survey of interpretations, see, e.g., McKenzie, *Isaiah*, xlii–lv; for bibliography, Oswalt, *Isaiah* 40–66, 408–10.

444. E.g., 2 Kgs 9:7, 36; 10:10; 14:25; 17:13, 23; 21:10; 24:2; Ezra 9:11; Isa 20:3; Jer 7:25; 25:4; 26:5; 29:19; 35:15; 44:4; Dan 3:28; 6:20; 9:6, 10; Amos 3:7; Zech 1:6; cf. *’Abot R. Nat.* 37, §95 B; later also, e.g., Qur’an 43:59; 66:10.

445. E.g., 2 Sam 3:18; 7:5, 8, 19–21, 25–29; 1 Kgs 3:6; 8:24–26, 66; 11:13, 32, 34, 36, 38; 14:8; 2 Kgs 8:19; 19:34; 20:6; 1 Chr 17:4, 7, 17–19, 23–27; 2 Chr 6:15–21, 42; *Pss* 78:70; 89:3, 20; 132:10; 144:10; Isa 37:35; Jer 33:21–22, 26; Ezek 34:23–24; 37:24–25; cf. *’Abot R. Nat.* 43, §121 B.

446. E.g., Exod 14:31; Num 12:7–8; Deut 34:5; Josh 1:1–2, 7, 13, 15; 8:31, 33; 9:24; 11:12, 15; 12:6; 13:8; 14:7; 18:7; 22:2, 4–5; 1 Kgs 8:53, 56; 2 Kgs 18:12; 21:8; 1 Chr 6:49; 2 Chr 1:3; 24:6, 9; Neh 1:7–8; 9:14; 10:29; *Ps* 105:26; Dan 9:11; Mal 4:4; cf. 4Q378 22 2; *L.A.B.* 30:2, *famulum*; *’Abot R. Nat.* 43, §121 B. Teeple, *Prophet*, 63, cites *b. Soṭah* 14a.

447. *Cf.* Gen 26:24; Exod 32:13; Deut 9:27; *Pss* 105:6; 2 Macc 1:2; *Jub.* 31:25; 45:3; *Test. Ab.* 9:4 A; 2 *Bar.* 4:4; *’Abot R. Nat.* 43, §121 B.

448. Lev 25:42, 55; Deut 32:43; Isa 41:8–9; 42:1, 19; 43:10; 44:1–2, 21; 45:4; 48:20; 49:3; Jer 30:10; 46:27–28; Ezek 28:25; 37:25; 2 *Bar.* 44:4; *t. B. Qam.* 7:5; *’Abot R. Nat.* 43, §121 B; *Gen. Rab.* 96 NV; *y. Qidd.* 1:2, §24; *cf.* Tob 4:14 mss.

hearers would have also received the image of being God’s slave as one of great honor.⁴⁴⁹

Various early Jewish sources naturally called the “Messiah,” among others, God’s servant. Thus the warrior Messiah in *2 Bar.* 70:9 is God’s “servant,” though the title is hardly exclusive to him.⁴⁵⁰ What is more surprising is that some early Jewish sources, and especially later rabbinic sources, applied Isaiah’s servant image to the Messiah, although not, so far as we know, to a suffering one.⁴⁵¹ Among eighteen persons called “servant” in the Hebrew Bible, some rabbis identified the Messiah as one, citing *Isa* 42:1;⁴⁵² others identified the Messiah as the servant in 49:8–13;⁴⁵³ and a targumic tradition even identifies the Messiah as the servant in 52:13–53:12, while reserving the descriptions of suffering for Israel.⁴⁵⁴ Because the Targum strongly rewords this section, many scholars suspect anti-Christian polemic at work.⁴⁵⁵ Some others suggest that the targumic identification of the servant in 52:13–53:12 as a triumphant Messiah was a logical inference from Jewish hermeneutics.⁴⁵⁶ Whatever one’s conclusions, there is but one possible pre-Christian source for the language of Luke (and other early Christians) that was indisputably in wide circulation among his audience before he wrote: Isaiah itself.⁴⁵⁷

David Moessner has noted a number of echoes of Isaiah’s servant in Peter’s sermon in Acts 3 (especially in the explicit mentions of the servant in 3:13, 26). Some are stronger than others, but the overall case seems firm:⁴⁵⁸

Acts 3	Isaiah’s Servant
δοξάζω, 3:13	<i>Isa</i> 49:3, 5; 52:13
παραδίδωμι, 3:13	<i>Isa</i> 53:6, 12
δίκαιος, 3:14	<i>Isa</i> 53:11
μάρτυς, 3:15 (apostles)	<i>Isa</i> 43:9–12
διαθήκη, 3:25	<i>Isa</i> 42:6; 49:6, 8
διατίθημι, 3:25	<i>Isa</i> 61:8*

*Although it appears only twice in Luke-Acts (several more times in Hebrews), it appears eighty-five times in the LXX, making this a weaker argument. The other parallel Moessner cites (the use of *πρωτοῦς* in *Isa* 53:9, without verbal parallel in Acts 3) is weaker still.

449. Inscription in Grant, *Religion*, 122; Martin, *Slavery*, xiv–xvi (citing Soph. *Oed. tyr.* 410; Plato *Phaedo* 85B; Apul. *Metam.* 11.15; inscriptions), 46, 49 (against, e.g., Beare, *Philippians*, 50); cf. Rom 1:1 (cf. Minear, *Images*, 156). Slaves of rulers exercised high status (e.g., Epict. *Diatr.* 1.19.19; 4.7.23; inscriptions in Sherk, *Empire*, 89–90; Deissmann, *Light*, 325ff. passim; P.Oxy. 3312.99–100 in Horsley, *Documents*, 3:7–9; Suet. *Gramm.* 21 [in Dixon, *Mother*, 19]; cf. Char. *Chaer.* 5.2.2).

450. The title applies to Baruch (*2 Bar.* 48:11; 54:6) and to Abraham (4:4). Other texts also apply servant language to others, e.g., Job (*Test. Job* 37:8).

451. Schoeps, *Paul*, 134–35, 139; Jeremias in Zimmerli and Jeremias, *Servant*, 57ff.; Kelly, *Peter*, 126. Houtman, “Lijdende,” suggests that the relation of the Aramaic to the Hebrew led to a triumphant Messiah here. Santala, “Messiah,” does find ancient Jewish application to a suffering Messiah. It is possible that Sir 1:6 applies the imagery of *Isa* 53:1–2 LXX to Wisdom, but Prov 8:1 is more probable as the background.

452. *Abot R. Nat.* 43, §121 B. Rabbi Simlai saw Isaiah’s servant as Moses (*b. Soṭah* 14a, in Davies, *Gospel and Land*, 60).

453. *Pesiq. Rab.* 31:10.

454. Koch, “Messias,” thinks that the Targum is simply silent about the Messiah’s death but that it might be inferred at *Isa* 53:12. We may dismiss the relevance of the medieval Kabbalah tradition (in, e.g., Ginsburg, *Kabbalah*, 141–42), which drew also on Christian Gnosticism.

455. Jeremias in Zimmerli and Jeremias, *Servant*, 70–71. The section was probably omitted from the haftarah for polemical reasons (Bruce, *Acts*, 193, following Montefiore and Loewe, *Anthology*, 544).

456. *Ādna*, “Herrens.” Some believe that these methods would also naturally coalesce the servant and the Son of Man (Doeve, *Hermeneutics*, 147–48).

457. Later church fathers regularly construed *Isa* 52–53 messianically (e.g., *1 Clem.* 16.3–14; Justin *Dial.* 13, 43).

458. Moessner, “Script,” 228.

For Luke (in contrast to John; cf. John 12:23–24; 13:31–32; 14:1–5), the “glorification” specifically indicates exaltation rather than atonement.⁴⁵⁹ It may apply directly to praising God for the miracle (Acts 4:21; cf. Luke 2:20; 5:26; 7:16; 13:13; 17:15, 18; 18:43)⁴⁶⁰ but also alludes naturally to Jesus’s resurrection (Luke 24:21) and return (9:26; 21:27), both addressed later in the sermon (esp. Acts 3:15, also God’s response to Jesus’s execution; 3:19–21).⁴⁶¹

“Glory” involves especially honor here (for revelatory or eschatological glory, see comments on Acts 9:3).⁴⁶² Δόξα often meant honor; “glorifying” God meant honoring him. When applied to humans, it could refer to reputation;⁴⁶³ some thinkers warned that such reputation depended on human whims and was not worth much effort.⁴⁶⁴ Although many thought that the pursuit of honor would lead to noble exploits,⁴⁶⁵ some others regarded love of glory, or its excess, as something to be avoided.⁴⁶⁶

Jewish texts speak of “honor” or “glory” for those who did exploits⁴⁶⁷ or of bringing honor to their nation.⁴⁶⁸ Other Jewish texts praised those who would not concern themselves with human glory⁴⁶⁹ and noted that God would shame those presently honored.⁴⁷⁰ God “glorified” or honored his people, vindicating them.⁴⁷¹ Thus Jewish thinkers, like some Greek and Roman thinkers, emphasized the importance of transcending concern for honor. Early Christian writers also adopted this virtue of seeking only divine commendation (Rom 2:29; 1 Cor 4:3; 2 Cor 3:1; 1 Thess 2:6). Whatever might be said of human honor, ultimately all true honor belonged to God.

Many associated God’s “glory” also with God’s revelation (see comments on Acts 9:3). In this passage, “glorification” involves honor and may also imply God’s revelation. In the context of Isa 52:13 LXX, early Christians could interpret it in light of the servant’s suffering and hence in light of Jesus’s passion, which inverted the world’s values of honor and shame (cf. Luke 14:11).

459. With, e.g., Conzelmann, *Acts*, 28; cf. Jones, “‘Servant’ in Luke-Acts,” 158–59.

460. So Haenchen, *Acts*, 205 (the miracle, not the resurrection).

461. Cf. the association of “glory” with resurrection in Paul (Rom 6:4; 8:18, 21, 30; 9:23; 1 Cor 15:40–41, 43; Phil 3:21; Col 3:4; 1 Thess 2:12; 2 Thess 1:10; cf. 1 Tim 3:16).

462. I draw here from Keener, *John*, 410, 885–86.

463. Reputation was considered important enough to form a basis for praise in an encomium; Theon *Progymn.* 9.18; cf. Plut. *Themist.* 1.1; *Demosth.* 12.1; Eunapius *Lives* 465. Alexander reportedly craved praise (Arrian *Alex.* 7.28.1). Some appreciated reputation but warned that it invited trouble (Babr. 4.7).

464. Dio Chrys. *Or.* 66; Sen. *Y. Ep. Lucil.* 123.16; cf. also Porph. *Marc.* 15.253 (where, however, the term bears the common nuance of “opinion,” as in, e.g., 17.284; Mus. Ruf. 10, p. 76.30). Human mortality also relativized the value of glory (Diog. Laert. 5.40, citing Theophrastus), and reputation invited trouble (Babr. 4.6–8). Cic. *Fam.* 10.12.5 insists on true honor, that which benefits the state (also *Fam.* 15.4.13).

465. E.g., Xen. *Hiero* 7.3; Cic. *Sest.* 48.102; Val. Max. 2.8.5; 5.7.ext. 4; 7.2.ext. 1b; Dio Chrys. *Or.* 31.20; Dion. Hal. *Epid.* 7.291; Philost. *Hrk.* 23.23; 45.8; cf. Pliny *Ep.* 3.16.6; 5.8.1–2; 5.11.2; 9.3.1–2; Lucian *Dial. D.* 449 (23/29, Ajax and Agamemnon 2); 1QSa I, 18.

466. E.g., Diog. Laert. 6.1.8 (Socrates); Diogenes *Ep.* 4; Socrates *Ep.* 6; Sen. *Y. Ep. Lucil.* 94.63–66; cf. Dio Chrys. *Or.* 3.17; 4.4, 60, 84, 118–19, 126–28; 13.13; 24.3; Epict. *Diatr.* 3.9; Lucian *Peregr.* 33; Marc. Aur. 7.34; Philo *Spec. Laws* 1.281. Diogenes the Cynic reportedly attacked all those who were bound by reputation (ἐνδοξολογοῦντας, Diog. Laert. 6.2.47). Cynics, of course, went so far as to refuse human commendations altogether (Diogenes *Ep.* 9); Stoics could ridicule those concerned with what others thought (Mus. Ruf. 10, p. 76.30; Epict. *Diatr.* 2.21.12–14; cf. the diminutive δοξάριον in Marc. Aur. 4.2; 8.8).

467. E.g., 1 Macc 11:51 (ἐδοξάσθησαν); Wis 8:10.

468. E.g., 1 Macc 14:35.

469. E.g., *Test. Benj.* 6:4 (δόξης ἀνθρώπων). Competing social groups in the ancient Mediterranean world demanded that one seeking honor determine in which group(s) one should seek it (see deSilva, “Honor and Shame,” 520).

470. 1QM XIV, 11–12 (ולנבדויהם); 4QpNah II, 9 (also mentioning “rulers,” ומושלים); cf. 4QpNah 3–4 III, 9; 3–4 IV, 4; *Gen. Rab.* 1:5.

471. E.g., Wis 18:8; 19:22; cf. also 1Qsb III, 4; *Pesiq. Rab Kah.* 2:7; *Tg. Isa.* 1:2; 5:2. Cf. eschatological glory for his people in 4 Ezra 7:98; 2 Bar. 51:3; 2 En. 43:3 A; perhaps *Test. Job* 40:3.

**Examples in Peter's Temple Sermon of Some Lukan Imagery
and Its Broader Context in Early Christianity**

Image in Sermon	Language Elsewhere in Luke-Acts	Image Elsewhere in Early Christianity
God of patriarchs (3:13)	Acts 7:32; Luke 20:37; cf. 13:28	Mark 12:26 (source for Luke 20:37)*
Jesus as the Servant (3:13, 26), probably from Isaiah	Acts 4:27, 30; from Isaiah, cf. 8:32–33	1 Pet 2:22, 24–25; Matt 12:18; John 12:38; perhaps Phil 2:7–8; Mark 10:45; 14:24
Witnesses of resurrection (3:15)	Acts 1:8; 2:32; 10:41; 13:31; Luke 24:48	Cf. John 15:27; 1 John 1:2; especially (in different words) 1 Cor 15:5–11; cf. also 1 Pet 1:12; 2 Pet 1:16
Ignorance as a somewhat mitigating factor (3:17)	Acts 17:30	1 Tim 1:13; cf. Rom 3:25; 5:13; Heb 9:7; perhaps 1 Pet 1:14
Israel's repentance precedes Jesus's return (3:19)	—	Rom 11:24–32; probably Matt 23:39; perhaps Rev 11:2, 13
Jesus's return to restore the kingdom (3:19–21)	Cf. Acts 1:7–8; 26:7; Luke 21:27–28; 22:30; perhaps 1:74; 21:24	Rom 11:26–27
Message of all the prophets (3:18, 21, 24)	Acts 10:43; Luke 1:70; 24:44; cf. Luke 16:16, 29; 24:25; Acts 13:27; 24:14; 26:22; 28:23	Rom 3:21; 1 Pet 1:10; Matt 11:13 (Q); cf. Rom 1:2; 16:26; Heb 1:1; 2 Pet 3:2
Prophet like Moses (3:22–23)	Acts 7:37; cf. possibly Luke 9:35	Cf. John 1:21; 6:14; probable echoes in Matt 2:19–20; 4:2; possibly 5:1; Mark 9:7
Abraham's blessing (3:25–26)	Cf. perhaps Luke 13:28	Gal 3:8; cf. possibly 1 Pet 3:9

*This title is not very distinctive here, being pervasive in early Judaism.

As noted above, some scholars argue that “servant” Christology is the earliest⁴⁷² in the NT or at least very primitive and hence stemming from the beginning.⁴⁷³ Others deny that the title is primitive;⁴⁷⁴ still others concede it as early without it being primitive.⁴⁷⁵ Probably the title is an early one, but insufficient extant evidence remains to ascertain historically whether it derives from tradition regarding a speech on this occasion or simply represents Luke archaizing to approximate as best as possible what might well have been said in such an early speech. Further, even if it is early tradition, Luke makes it serve his purposes.

Luke undoubtedly is aware of the potential atonement language of the Isaian context (see comments on Acts 8:32–33) and elsewhere may exploit it (cf. Luke 22:19–20, 27; Mark 10:45).⁴⁷⁶ Here, however, he merely outlines a much longer speech (cf. Acts 3:1; 4:3), allowing his informed readers to reconstruct such ideas from elsewhere in his work.

III. THE SERVANT REJECTED

Jesus is denied and handed over to death, just as the servant of Isa 53:1–3 was rejected (although, in that context, it was the Lord who “handed him over” for Israel's sins, Isa

472. Cullmann, *Peter*, 66–67 (emphasizing especially its location in Acts). Much early Christian Christology likely flows from Jesus's own self-understanding as reflected in his teachings; see, e.g., Witherington, *Christology of Jesus*; Keener, *Historical Jesus*, 256–82.

473. Robinson, *Studies*, 150 (along with the prophet Christology in the same sermon).

474. E.g., Jones, “‘Servant’ in Luke-Acts” (viewing Luke's Christology as late).

475. Ménard, “Messianic Title.”

476. For the presence of atonement language in this passion tradition, see comments in Keener, *Matthew*, 487–88; Morris, *Preaching*, 34; Gundry, *Matthew*, 404; Hagner, *Matthew*, 2:579–80; for Isaianic servant language in the saying, see, e.g., Taylor, *Atonement*, 14; Cullmann, *Christology*, 64–65; Jeremias, *Theology*, 292–93; Davies and Allison, *Matthew*, 3:95–97. For early Jewish atonement imagery, see, e.g., Kim, “Atonement.” Peterson, “Atonement Theology,” esp. 70, rightly points to Luke's dependence on Isa 53 and the connection between Jesus's cross/resurrection and forgiveness.

53:6 LXX). The term for “handed over” (παράδιδωμι) carries a wide range of meaning, but Luke employs it for Jesus’s being “handed over” to people (Luke 9:44; 24:7), specifically Israel’s leaders (24:20) “handing” him over to Gentiles (18:32); disciples could also expect to be “handed over” (21:12, 16; cf. Acts 8:3; 12:4; 22:4), including Paul to the Gentiles (Acts 21:11; 28:17). It applied more specifically to Judas’s betraying Jesus (Luke 22:4, 6, 21–22, 48) and to Pilate’s handing Jesus over to the wishes of his aristocratic Jewish opponents (23:25), completing the chain of shared guilt. The speeches to Israel naturally emphasize Israel’s responsibility for rejecting God’s agent, although Luke’s full usage reveals that he regarded the Jewish (Acts 4:26; 13:27–28) and Roman (4:27) leaders as more directly responsible than the people themselves.

Peter also notes that the people “denied” Jesus (twice in 3:13–14)—that is, as their rightful ruler.⁴⁷⁷ The term (ἄρνέομαι) is the same for Israel’s disowning Moses in 7:35 (not the wording of the LXX).⁴⁷⁸ Ironically, the Gospel employs this verb not for those who betrayed Jesus to the Sanhedrin (Judas) or to Pilate (the priestly leaders) but for Peter himself, who denied Jesus (Luke 22:57; cf. 9:23; 12:9). For Luke’s audience, the connection of verbs might link Peter’s betrayal with that of Judas but also suggests that the guilt can be resolved through repentance. Peter, the denier, is now the proclaimer par excellence.

IV. PILATE’S DESIRE TO RELEASE JESUS⁴⁷⁹

That Pilate wanted to release Jesus (Luke 23:16, 20, 22) does not absolve Pilate from the guilt of giving in to popular sentiment instead (Luke 23:25; Acts 4:27); even a Roman audience would regard Pilate’s behavior as unjust and unbecoming of a governor⁴⁸⁰ (see comments on Acts 24:27). But because Peter is preaching to “Israelites” (Acts 3:12), this emphasis allows him to focus on the responsibility of his audience (cf. 13:28).

That Jesus appeared before Pilate⁴⁸¹ is an inescapably historical datum; only the governor could order him crucified, and if he wished to follow some semblance of order, he would provide at least a brief hearing. Likewise, Jesus’s own countrymen would normally perform the function of *delatores*, or accusers, to charge him with sedition.⁴⁸² Yet what is striking is Pilate’s reticence to pronounce sentence; if no Roman citizens were involved, one would expect most governors to act quickly at the local aristocracy’s request.⁴⁸³ The Gospels show that Pilate did indeed act quickly, but they also report his reluctance to do so.

477. Although not identical in sense to “delivered up,” this verb broadens rather than specifically supplements its sense and (in the speech itself, ignoring Lukan literary connections) would function like other rhetorical repetition for emphasis.

478. Jewish tradition uses the term for those who deny God (Wis 12:27; 16:16) or renounce their Judaism (4 Macc 8:7; 10:15); early Christians employed it for denying the true God (2 Clem. 3.1; Diogn. 10.7) or Jesus (2 Tim 2:12; 2 Pet 2:1; Rev 2:13; 3:8; 2 Clem. 17.7; Mart. Pol. 9.2; Herm. 6.7–8; 74.4; 103.3–6; 105.4–8; Diogn. 7.7) or the truth about Jesus (1 John 2:22–23; Ign. Magn. 9.1; Smyrn. 5.1); sometimes this applied primarily to behavior (1 Tim 5:8; Titus 1:16; Jude 4).

479. I have drawn here from Keener, *Matthew*, 665–67.

480. Tac. *Ann.* 15.44 calls Pilate “procurator”; an inscription discovered in 1961 calls him [*prae*]fectus, which may be used to correct Tacitus but might be intended nontechnically (Dubuisson, “Procurateur,” argues for Tiberius’s “prefect”).

481. See Sherk, *Empire*, 40, §39A; Smallwood, *Jews*, 145; Brown, *Death*, 336–37. Although scholars once thought that the officials brought Jesus to Pilate in the Fortress Antonia, most now concur that Pilate was residing in Herod’s palace (Schürer, *Time of Jesus*, 181; Lane, *Mark*, 548; Wilkinson, *Jerusalem*, 140; Brown, *Death*, 705–10), as ancient sources suggest (Pilate in Philo *Embassy* 299; Florus in Jos. *War* 2.301, 328). Herod’s palace is farther from the temple but not a difficult trek.

482. Harvey, *History*, 16; see Sherwin-White, *Society*, 47.

483. Cf. Harvey, *History*, 17; Sanders, *Figure*, 274; for an impoverished provincial condemned to death without trial, cf., e.g., Apul. *Metam.* 9.42.

Thus some scholars question whether Pilate’s “wanting to release” Jesus, as here and in the Gospels, is “in character” with the Pilate known to us from other sources.⁴⁸⁴ Pilate’s brutal disposition, however, colors all the other brief Jewish reports of his activity that remain extant.⁴⁸⁵ Pilate executed people without trial, and excessive use of capital punishment ultimately cost him his office.⁴⁸⁶ From what Philo and especially Josephus show us of Pilate’s character, any reticence to accept the local leaders’ recommendation would be more out of spite for them than concern for justice.⁴⁸⁷ Yet this reticence need not be unhistorical. As corrupt as the later governor Albinus was, he dismissed Joshua ben Hananiah (Jesus son of Ananias) from further punishment (after a scourging reportedly bared his bones) once he took him to be insane and hence harmless (Jos. *War* 6.305).⁴⁸⁸ Even before Sejanus’s fall and while Pilate remained governor, Pilate seems to have been quite unpopular (cf. rumors circulating in Luke 13:1).⁴⁸⁹

Still, the narratives go to great lengths to emphasize that Pilate cooperated with Jesus’s execution against his own preference, and this literary emphasis is understandable for apologetic reasons. Minority sects often validate themselves through reports of praises by those respected among their oppressors; those writing in socially delicate situations also must show proper deference to officials. Thus, for example, Josephus repeatedly excuses Roman rulers’ motives; for instance, Titus wished to spare the temple but some soldiers failed to cooperate (*War* 6.254, 258, 260–66), and Titus allowed his soldiers to torture Jews only for good reason (5.449–51). The *Letter of Aristee* likewise defends the Ptolemaic ruler’s motives against the Jews (*Let. Aris.* 14), and Josephus claims that Ptolemy Philadelphus praised the Jewish law (*Ag. Ap.* 2.45–47). In the same manner, early Christians commending themselves to an audience in the broader Roman world might wish to exonerate the Roman governor⁴⁹⁰ or even cite, in their own defense, Roman officials’ reticence to condemn them (e.g., Acts 13:12; 18:14–15). This emphasis fits Luke’s larger apologetic agenda.

Historically, Pilate may have had good reason for political concern if he erred in judgment. Philo notes the anti-Jewishness of Sejanus, Pilate’s patron (Philo *Flacc.* 1). Although Sejanus was not executed until October 19, 31 C.E.⁴⁹¹ (probably after Pilate questioned Jesus),⁴⁹² Pilate, like most provincial officials,⁴⁹³ was probably politically

484. Winter, *Trial*, 54–55, 60; Borg, *Vision*, 179.

485. On the rhetorical bias of such accounts, see, e.g., Krieger, “Judenfeind”; Thatcher, “Pilate.”

486. Philo *Embassy* 302; Jos. *Ant.* 18.88–89; Sanders, *Figure*, 274. On governors being tried for abusing power, especially for executing innocent people (particularly Roman citizens), see Pliny *Ep.* 2.11 in Jones, *Empire*, 192–95; and esp. comments on Acts 24:27.

487. Cf. Benoit, *Jesus*, 1:141–42.

488. Philo and especially Josephus are also ill disposed to report good of Pilate (cf. Brown, *Death*, 697; Krieger, “Judenfeind”; Thatcher, “Pilate”); they seem to have felt that the unrest in Judea is better blamed on deceased prefects such as Pilate (once supported by the corrupt Sejanus, still despised, e.g., in Juv. *Sat.* 10.66, 76, 89–90, 104; Phaedrus 3. prol. 41–44; cf. also Brown, *Death*, 694, on Philo *Flacc.* 1; *Embassy* 160–61) than left with the Judeans themselves.

489. On which see Bailey, *Peasant Eyes*, 75. For Pilate’s attempts to promote the imperial cult, see Taylor, “Pilate.” Brown, *Death*, 695–705, ultimately concludes, as I do, that most of the Gospel portrait fits what we know of Pilate from the other sources once all has been taken into account.

490. Cf. Sanders, *Jesus and Judaism*, 298; Cohn, *Trial*, 326–27.

491. Stauffer, *Jesus and Story*, 132; Lane, *Mark*, 556–57n34; cf. Sherk, *Empire*, 75–77, §40. The contemporary report about Sejanus in Velleius is positive (Vell. *Paterc.* 2.127.3–4; 2.128.1–4; contrast Tac. *Ann.* 4.1), but had it been otherwise (during Sejanus’s dominance), Velleius’s work certainly would have been suppressed.

492. The proposed date of 33 C.E. for Jesus’s crucifixion (e.g., Jewett, *Chronology*, 29; Duriez, *AD 33*) appears less probable, in my opinion excessively compressing Pauline chronology.

493. See Reicke, *Era*, 138, 175.

ambitious and hence could ill afford bad reports about himself.⁴⁹⁴ In contrast with many of his peers in office, being only an equestrian left him especially vulnerable apart from Sejanus's patronage. More to the point, Pilate had incurred the hatred of the Jewish people⁴⁹⁵ and on some other occasions had backed down to pacify them.⁴⁹⁶ Thus Pilate was not only cruel but, like many bullies, fearful of exposure to those in authority over him.⁴⁹⁷

If anything, this situation might well require Pilate in time to become more, rather than less, cooperative with the more powerful of his subjects (cf. John 19:12–13); to fail to prosecute a potential revolutionary, accused by the leaders of his own people, could lay Pilate himself open to the charge of *crimen majestatis* (or *majestas*).⁴⁹⁸ Even the suspicion of treason could be fatal under Tiberius, and despite Sejanus's patronage, Pilate likely would not risk it.⁴⁹⁹ Further, although Jesus may have proved politically innocuous,⁵⁰⁰ cooperation with the local aristocracy would be more politically advantageous than risking more conflict for an individual of no value to Pilate.⁵⁰¹ That Pilate survived as governor until 36 C.E., long after his patron's demise, suggests that he had belatedly acquired some political savvy.⁵⁰² In any case, in the Gospels, the hearing before Pilate is brief, and the execution swift (a few hours later).

d. Disowning the Bringer of Life (3:14–15)

Jesus's titles here highlight both his innocence and the irony of killing the lifegiver. Commentators regularly note the contrast between a murderer and the author or giver of life in Acts 3:14–15.

I. THE HOLY AND RIGHTEOUS ONE (3:14)

The titles “holy one” and “righteous one” function as antonomasia.⁵⁰³ Jesus is called “holy” elsewhere in Luke-Acts (Luke 1:35; Acts 4:27), and both demons (Luke 4:34) and Scripture (Acts 2:27; 13:35) recognize him as God's “holy one.” The quoted psalm in 2:27 and 13:35 employs a different Greek term, but Luke employs here his common term for “holy” (ἅγιος, seventy-one times in Luke-Acts, often for the Holy Spirit). “The Holy One” was especially a title for God himself in the OT⁵⁰⁴ and in early Judaism.⁵⁰⁵ In a context that draws heavily on Isaiah (see esp. Acts 3:13), the “holy

494. Cf. Malina, *Windows*, 115–16.

495. E.g., Jos. *War* 2.169–77; *Ant.* 18.55–62.

496. Philo *Embassy* 301–2; Jos. *War* 2.171–74; *Ant.* 18.59.

497. Winter, *Trial*, 53–54.

498. Blinzler, *Trial*, 236; Smallwood, *Jews*, 169.

499. Tiberius reportedly viewed even negative remarks as *majestas* (e.g., Dio Cass. *R.H.* 57.9.2; 57.19.1; 57.23.1–2; cf. Caligula, 59.11.6), leading to many false accusations (57.4.5–6); some later emperors also suffered paranoia (Hdn. 1.13.7). Among Romans, treason was the greatest crime (Dion. Hal. *Ant. rom.* 8.80.1).

500. So Cullmann, *State*, 46–47. The matter (and sense of “innocuous”) is debated.

501. On Pilate's possible perspective on Jesus as a harmless sage, see Keener, “Truth.”

502. Reasons for his dismissal in 36 C.E. are sometimes debated; Krieger, “Problematik,” rejects Josephus's explanation.

503. On antonomasia, cf. Anderson, *Glossary*, 23 (citing *Rhet. Her.* 4.42; Quint. *Inst.* 8.6.29–30; Plut. *De vita et poesi Homeri* 24); Rowe, “Style,” 128 (citing Matt 26:48; Cic. *Consil.* 4.9); Porter, “Paul and Letters,” 579 (citing Rom 5:14). The adjectives are coupled in Mark 6:20 but not in a titular sense; the combination was a natural one (cf. Rom 7:12; Rev 22:11), though Luke more often conjoins “righteous” with other descriptions of piety (Luke 1:6; 2:25; Acts 10:22).

504. E.g., 2 Kgs 19:22; Job 6:10; Pss 71:22; 78:41; 89:18; Prov 9:10; 30:3; Jer 50:29; 51:5; Ezek 39:7; Hos 11:9, 12; Hab 1:12; 3:3; and esp. in Isaiah (Isa 1:4; 5:19, 24; 10:17, 20; 12:6; 17:7; 29:19, 23; 30:11–12, 15; 31:1; 37:23; 40:25; 41:14, 16, 20; 43:3, 14, 15; 45:11; 60:9, 14).

505. E.g., Sir 4:14; 23:9; 43:10; 47:8; 48:20; Bar 4:22, 37; 5:5; 2 Macc 14:36; Tob 12:15; 1Q20 1 I, 7; II, 14; VI, 13, 15; VII, 7; XII, 17; 4Q162 II, 7–8; 4Q163 23 II, 3; 4Q176 8–11 7; 4Q405 20–22 12; 4Q448 II, 1; 1 *En.* 1:3; 10:1; 14:1; 25:3; 84:1; 92:2; 97:6; 98:6; 104:9; 3 *En.* 1:2 and passim; *L.A.E.* 33:5; *m. Ab.*

one” title could imply deity (“Holy One” appears thirty times in Isaiah, including for God as Israel’s savior and “redeemer” in the servant contexts, Isa 41:14; 43:3, 14; 47:4; 48:17; 49:7; 54:5). (It nevertheless could also function as an acceptable title for one of God’s servants when conjoined with “of God.”)⁵⁰⁶

“Righteous one” is not a common expression of later Christology (though cf. 1 Pet 3:18; 1 John 2:1)⁵⁰⁷ and may well be primitive;⁵⁰⁸ Luke employs it exclusively in speeches to Jerusalem audiences, perhaps suggesting that he knew it especially appropriate there.⁵⁰⁹ Nevertheless, it certainly also fits Luke’s emphasis. Calling Jesus the “righteous one” (also Acts 7:52; 22:14) heightens both the contrast with Barabbas the “murderer” and the guilt of those who denied Jesus in 3:13. It also fits a theme in Luke’s passion narrative that is central to his apologetic and acceptable for Roman consumption: Jesus is innocent, as Pilate (Luke 23:4, 13–15, 22), a centurion (23:47), and even a thief (23:40) recognize.⁵¹⁰

Such a title would be familiar in the larger milieu, although Luke’s allusion is primarily biblical. A pagan ruler could call himself “Righteous One” as a divine title;⁵¹¹ certainly, the ideal ruler was to be “righteous.”⁵¹² Speeches in Acts, however, specify Jesus as the “righteous one” especially for Jewish audiences (Acts 7:52; 22:14), suggesting the significance that the title bore in early Jewish circles. Some Jewish people called God “the most righteous” (δικαιότατος, *Sib. Or.* 3.720, probably second century B.C.E.). Later teachers opined that “righteous” was among God’s titles,⁵¹³ though it was not holy like the divine name.⁵¹⁴ Because “Holy One” was also a divine title,⁵¹⁵ the two conjoined may imply Jesus’s deity. But “righteous one” also functioned as an epithet⁵¹⁶ for some of God’s special servants,⁵¹⁷ such as Enoch⁵¹⁸ and Noah.⁵¹⁹ The

3:1, 4. Cf. also 1 Pet 1:15–16; John 17:11; 1 John 2:20; Rev 4:8; 6:10; 16:5; *1 Clem.* 30.1. Some fifty-four of some seventy-two references to any of the terms we translate “holy” in Luke-Acts apply to the Spirit; that is 75 percent. Similarly, three of the five uses of ἅγιος in John apply to the Spirit (John 1:33; 14:26; 20:22); this pattern of usage coheres with usage in early Judaism.

506. Ezra in the late work *Gr. Ezra* 5:10. Domeris, “Confession,” argues that the title connotes agency. It applies to Jesus in Luke 4:34 (following Mark 1:24 for the demon’s confession); in works explicitly affirming Jesus’s deity, John 6:69; Rev 3:7; cf. *1 Clem.* 23.5; *Diogn.* 9.2.

507. Because the righteous person’s response to the aorists in Jas 5:6 is present, it is probably not messianic (cf. 5:16), though cf. Longenecker, *Christology*, 47. Lake and Cadbury, *Commentary*, 83 (on Acts 7:52), suggest that the title was passed on from Jesus to James “the Just.”

508. Robinson, *Studies*, 151; Lake and Cadbury, *Commentary*, 83; cf. Simon, *Stephen and Hellenists*, 65 (though he also recognizes Luke 23:47 as emending Mark 15:39). It appears later in Justin *Dial.* 16.4 as a title for Jesus, but this depends on Acts 7:52. Sources naturally conjoined “holy” and “righteous” in some descriptions (e.g., for people in *Jub.* 25:3; *1 En.* 25:5; 38:4–5; 39:4; 48:1, 7, 9; 51:2; 65:12; 100:5; *2 Bar.* 85:1; Mark 6:20; angels in *1 En.* 39:5; for the law in Rom 7:12; for God in *Jub.* 21:4; *Ass. Mos.* 3:5; *L.A.E.* C 27:1; Rev 15:4; 16:5; 22:11).

509. Hays, *Conversion*, 126–27.

510. Hays, *Moral Vision*, 118–19, noting likely dependence on Wis 2:12–20 (or, less likely, Isa 53:11 LXX).

511. See the inscription from Antiochus I of Commagene (50–35 B.C.E.) in Grant, *Religions*, 21 (“God, Righteous One, Manifest”).

512. E.g., Dio Chrys. *Or.* 4.24 (“most righteous,” δικαιότατος).

513. E.g., *b. Sanh.* 26b; *y. Hag.* 2:1, §12; *Pesiq. Rab.* 14:6.

514. *Y. Meg.* 1:9, §17.

515. *1 En.* 1:3 (Knibb, 58, cites also 10:1; 12:3; 14:1; 25:3; 84:1; 92:2; 97:6; 98:6; 104:9; 1Qap Gen^m II, 14; XII, 17); and texts noted above.

516. On rhetorical epitheton (substituting an epithet for a proper name), see *Rhet. Her.* 4.31.42; Porter, “Paul and Letters,” 580.

517. A pre-Christian sage named Simeon “the righteous” (קִיָּוִן, *m. Ab.* 1:2); Esdram in the late *Gr. Ezra* 1:9. Brownlee, “Messianic Motifs,” 13, compares Qumran’s “Teacher of Righteousness.” Contextually, *1 En.* 92:3–4 probably refers to the righteous in general (with Knibb, 222) instead of being used as a title (Isaac, 74).

518. *Test. Levi* 10:5; *Test. Jud.* 18:1; *Test. Dan* 5:6; *Test. Benj.* 9:1 (most mss); *2 En.* 1a:1, rec. A; probably *1 En.* 1:2 (with Isaac; less clear in Knibb).

519. *4 Bar.* 7:8–9; cf. also Ebedmelech (called Abimelech) as δίκαιος ἄνθρωπος in *4 Bar.* 5:28.

Similitudes of Enoch appear to use “righteous one” as a title (*1 En.* 38:2), apparently for the “Chosen One,” the son of man (53:6).⁵²⁰ Presumably, Peter’s Jewish hearers, and any of Luke’s audience who knew the titles but did not identify Jesus with deity, would assume the exalted human rather than the divine usage.⁵²¹

Luke’s primary literary background shared with his audience, however, is biblical, and this is the primary source of his allusion. Thus the most likely usage to come to their mind, given the allusion to the servant in Acts 3:13, would be Isaiah’s title of “righteous one” for the servant in Isa 53:11.⁵²²

II. REJECTING JESUS (3:14)

In Jewish tradition, “denying” the Lord was a terrible sin.⁵²³ Although the motif of repudiation also appears in Luke 19:14, 27,⁵²⁴ the people’s rejection appears explicitly in Luke’s version of the passion only alongside that of the leaders who moved them (23:13, 18). Luke is aware of the complexity of differing loyalties (and degrees of loyalty) among the people; elsewhere the crowds also protect Jesus (e.g., 22:6) and mourn him (23:27, 48). Yet while Luke tones down the guilt of the crowds by laying responsibility on the leaders, texts such as this one reveal that he did not repudiate Mark’s perspective about the crowd’s responsibility (Mark 15:8–15). There, too, the crowd was stirred by its leaders (15:11), and so the difference is one of emphasis. Mark focuses on the guilt of the crowds; ancients were well aware of the injustices created by mob violence. Luke focuses on the aristocratic leaders; had it not been for them, Luke may imply, Israel might have received its Messiah and his apostles.

Perhaps because the high priests reported to Pilate Jesus’s popular appeal along with the charge (Luke 23:5), Pilate gambled that the people would prefer Jesus to Barab- bas, releasing him from obligation to the Jerusalem aristocrats;⁵²⁵ if so, his hope was disappointed. Although Jesus’s Galilean following may have been large, the high priests represented the temple system respected by most local and foreign Jews, and they could more easily inflame the vast majority of the crowd in their favor. Ancient literature is replete with examples of masses being easily swayed by leaders,⁵²⁶ including by these elite priests,⁵²⁷ and being fickle in the populist favor they bestowed on various figures.⁵²⁸

520. It is not always clear whether it applies to God, to the Messiah, or to Enoch, but *1 En.* 53:6 identifies the title with the chosen one, presumably the Messiah (cf. also 46:3; see also Longenecker, *Christology*, 46–47; citing also possibly 1QIsa^a LI, 5; the repeated descriptions in *Pss. Sol.* 17:23–51; 18:7–8). Some scholars claim that it was a messianic title in rabbinic literature (Abbott, *Acts*, 91); the righteous are associated with the Messiah in *b. B. Bat.* 75b; but I do not recall finding the title “Righteous One” for the Messiah in the Talmud, and I suspect that it is at best rare.

521. More recently, some scholars have offered significant arguments that “son of man” in Enoch’s Similitudes may also be a divine title (see esp. Quarles, “Lord”).

522. With Morris, *Cross in New Testament*, 141; Witherington, *Acts*, 181; Moessner, “Script,” 228.

523. E.g., *1 En.* 38:2; 41:2; 45:1–2; 46:7; 48:10; 67:8, 10; *4 Ezra* 7:37; cf. denying God’s covenant and words, *4 Ezra* 5:29; 7:24; *2 Bar.* 59:2; 82:9; *Philo Spec. Laws* 2.255. Gentile philosophers also warned against denying God (e.g., *Porph. Marc.* 21.338; 23.361–62).

524. Tannehill, *Luke*, 161.

525. As noted above, Pilate was not eager to please them and did not have a good relationship with them; at the same time, he could not ignore political realities (see comments on Acts 24:27).

526. E.g., many who voted for Aristides’s banishment allegedly did not know the charge; *Corn. Nep.* 3 (Aristides), 1.4.

527. *Jos. War* 2.237–38, 316–17, 321–25; cf. 2.406.

528. *Tac. Ann.* 2.41; *Hist.* 1.32, 45; 3.85; *Ps-Phoc.* 95–96; *Philo Embassy* 120; *Jos. Life* 87, 97, 143–44, 313–17, 333; *Livy* 31.34.3; *Lucan C.W.* 3.52–58; *Corn. Nep.* 10 (Dion), 10.2; 13 (Timotheus), 4.1; *1 Sam* 18:16; 25:10; *2 Sam* 5:2; 15:6. The ruling class usually could sway the masses (Saldarini, *Community*, 38), although deep-rooted popular convictions were no more easily removed than today (*Paus.* 2.23.6; *Jos. Ant.* 13.298; 18.17). Contrast the motif of being well liked by the people, who advocate one’s case, as a sign of one’s nobility (e.g., *Char. Chaer.* 1.1.10; *1 Sam* 14:45; *Jos. Ant.* 6.128; *Life* 303).

Further, the outdoor hearing at Pilate's *bēma*⁵²⁹ undoubtedly took place at Herod the Great's old palace;⁵³⁰ although still in the Upper City, dominated by the priestly aristocracy, it was some distance from the temple, where Jesus's popular following had been growing and where most Galileans would be found. Early in the morning, the hearing may have also been before most of Jesus's supporters would have returned to the temple area after a late-night Passover celebration. That Mark does not emphasize this distinction between Galilean supporters and Judeans who heeded the local aristocrats fits an ancient literary device: ancient writers, especially those influenced by the chorus tradition of Greek drama, often allowed a corporate body to speak as if in unison.⁵³¹

Although Israel's leaders bear primary responsibility for Jesus's being handed over and executed by the Romans, Peter addresses the responsibility of all his hearers. This is not to reduce the guilt of the leaders (Acts 3:17) but to call for repentance from the only people who may embrace it in response to his preaching—his hearers. Although this shift is useful for deliberative rhetoric, it is also grounded in Luke's tradition about the passion. The crowds, presumably more native Jerusalemites than Galilean pilgrims (cf. Luke 23:49, 55), did prefer a murderer to Jesus (23:18–19). Luke assumes, as his tradition did (Q material in 11:47–50; 13:34), Israel's corporate responsibility along with individual responsibility. This feature is common among the biblical prophets and hence should not surprise us.

Some scholars have charged that Luke's passion narrative is particularly anti-Judaic; they sometimes attribute this anti-Judaism to a source whose tendency on this matter contrasts with pro-Jewish statements in other parts of Luke-Acts.⁵³² Luke's version is less harsh toward Israel than Matthew's (cf. Matt 27:25), but Matthew's better fits the rules of intra-Jewish polemic.⁵³³ The commentary introduction (ch. 14, sect. 1)⁵³⁴ has addressed the question of Luke's alleged anti-Judaism, but we should note that here Peter's sermon qualifies the guilt by the concession of ignorance (Acts 3:17) and the affirmation of God's plan (3:18).

Against the tendency to see much early tradition in this passage, some regard attribution of responsibility to the Jewish people more than to Romans as a late feature.⁵³⁵ Emphasis on Jewish responsibility (while playing down that of the Romans) did,

529. John 19:13; Jos. *War* 2.175–76, 301, 308; cf. Acts 18:12; 2 Cor 5:10. John 19:13 necessarily occurs at the *bēma*; capital sentences, unlike others, had to be pronounced from there (Blinzler, *Trial*, 240, following Mommson). It was natural to go outside if one was to speak with the multitude (Jos. *War* 2.172).

530. Brown, *Death*, 705–10; Strachan, *Gospel*, 212; Blinzler, *Trial*, 173–76; Reicke, *Era*, 140; Benoit, *Jesus*, 1:167–88; idem, "Reconstitution"; Gundry, *Matthew*, 552; Carson, "Matthew," 567; Schürer, *Time of Jesus*, 181; Lane, *Mark*, 548; Wilkinson, *Jerusalem*, 140; Jos. *War* 2.301.

531. E.g., Virg. *Aen.* 11.122–31; Dion. Hal. *Ant. rom.* 6.10.1; 6.87.1; Acts 4:24; cf. 1 Sam 11:4; 2 Sam 5:1–2. One may think of their corporate unity also in the way that historians portray civic assemblies acting, without supposing that every individual in a city supported the assembly's actions (e.g., Athens exiling generals), though the Gospels depict the crowds' activities as more like a mob scene than the democratic process of a Greek *polis* (for the negative narrative function of mob scenes, see comments on Acts 19). Manson, *Servant-Messiah*, 79, also ventures a chronological explanation for the transformation of the crowds—namely, the passage of six months between Jesus's act in the temple (at Sukkoth) and his arrest (at Pesach). Yet it seems inconceivable that the authorities would have allowed Jesus to survive in public six months after the act in the temple, unless one also postulates a miracle or that Jesus went into hiding. Granted, they had no direct authority in Galilee, but they might have prevailed on Antipas to arrest him; as we know from the case of John, the latter had no scruples about arresting prophet figures.

532. Gaston, "Anti-Judaism and Passion Narrative."

533. See Keener, *Matthew*, 45–51, 536–37, 546–47, 561, 671; Johnson, "Slander"; on Matthew's Jewish context, see esp. Overman, "Judaism: A Study"; Saldarini, *Community*.

534. Keener, *Acts*, 1:459–77.

535. E.g., C. Williams, *Acts*, 77 (though curiously he cites in support of this 1 Thess 2:15, which is probably the earliest NT document).

indeed, grow over time (cf., e.g., Justin *Dial.* 17); this approach undoubtedly allowed Christians a more favorable hearing in the Roman world when explaining how their Lord was crucified as a rebel.⁵³⁶ Nevertheless, shared responsibility appears in the sources from the beginning.⁵³⁷ Indeed, what is probably our earliest relevant source, 1 Thess 2:15, hyperbolically attributes Jesus's death *directly* to Judeans (assimilating it to the deaths of the prophets, as also apparently in some gospel tradition; see comment on Acts 7:52), even though Paul's audience would recognize crucifixion as a Roman punishment.⁵³⁸ Further, Peter preaches to a Jewish crowd here; emphasis on Jewish responsibility appears in Acts especially in sermons to Jewish people (Acts 2:23; 13:27), not to Gentiles (cf. 28:19); the messages focus on the aspect relevant to their respective audiences. Pilate is sometimes mentioned as sharing responsibility even among strictly Jewish hearers (4:27; 13:28), though the other side of Pilate's behavior is emphasized in 3:13; Luke's passion narrative includes both aspects of Pilate's behavior.

III. PREFERRING A MURDERER (3:14)⁵³⁹

In requesting a murderer's release (Luke 23:19) rather than that of Jesus, the people embodied on a narrative level in Peter's audience had (in the less sympathetic words of Stephen) become murderers themselves (Acts 7:52). Many earlier manuscripts omit Luke 23:17, which explains Pilate's "obligation" (ἀνάγκην) to release a prisoner; it may well have originated as a scribal marginal explanation based on other Gospels. Yet Luke's account presupposes the Markan (and perhaps independently Johannine) custom, since the people barter for one prisoner's release over another's (23:18). The threat of mob violence might well compel Pilate's choice of which prisoner to release once the matter was on the table, but was the governor, in fact, obligated to offer a prisoner release?

Although all four Gospels attest the paschal amnesty custom,⁵⁴⁰ most scholars remain skeptical of the custom because the proposed analogies from other locations appear inadequate.⁵⁴¹ A Gospel writer might, then, follow a literary practice of his day in creating customs to suit his narrative.⁵⁴² Conversely, this objection to the narrative's claim is a not particularly compelling argument from silence.⁵⁴³ Like most customs

536. See Keener, *Matthew*, 666.

537. See 1 Thess 2:14–15 (sometimes rejected for the circular reason that it claims Jewish responsibility); Keener, *Matthew*, 612–16; later, see Jos. *Ant.* 18.64, the earliest non-Christian Jewish source unless (as is quite possible) this particular line was interpolated. That the high-priestly leaders would have wanted Jesus dead for public order and, as local leaders, would be responsible for delivering him to the Romans is simply the way things were done (Sanders, *Figure*, 265–69; cf. Vermes, *Religion*, ix–x).

538. Paul does not specify crucifixion in the Thessalonian correspondence, perhaps for political reasons (cf. comment on Acts 17:7), but it is clear that he recognized it and had preached it to his audiences (1 Cor 1:17–18, 23; 2:2; Gal 3:1; 5:11; cf. Rom 6:6; 1 Cor 1:13; 2:8; 2 Cor 13:4; Gal 2:20; 5:24; 6:12, 14; Phil 2:8; 3:18). For a brief summary of the debate about an interpolation in the passage, see my *Acts*, 1:463n32, but no textual evidence supports the interpolation hypothesis.

539. Here I have drawn on Keener, *John*, 1115–18; idem, *Matthew*, 668–69. The close resemblance of the Greek expressions for "denied" and "asked" here is rhetorical repetition.

540. See Brown, *Death*, 793–95.

541. E.g., Cohn, *Trial*, 166; Winter, *Trial*, 91; Brown, *Death*, 814–19. Theissen, *Gospels*, 196, links this story with the Caligula crisis, when he thinks more of the populace would have sided with the "bandits" than with Christians (citing Tac. *Ann.* 12.54.1; Jos. *Ant.* 20.5, 97, 102); but this is hardly the *only* period in the first century in which that would be the case, and Jesus would be less popular than Barabbas to those prone to revolution and, probably more to the point here, less popular with most of the Jerusalem masses than the priestly authorities were.

542. Bauer, "Namen."

543. One could at least regard the custom's historical existence as "plausible" (as in Culpepper, *John*, 225) and certainly "possible" (Talbert, *Matthew*, 302). The Fourth Gospel might provide independent attestation

of the Roman administration in Palestine, this one is currently unattested (a not surprising situation given the freedom of governors to ignore and supersede earlier customs),⁵⁴⁴ but if the Gospels usually correctly report events, especially when they multiply attest them (as possibly here, if John's witness is counted as independent), it seems sounder to judge in favor of, rather than against, their claims if no hard evidence to the contrary is available.⁵⁴⁵ Analogies do suggest the general consistency of the reported paschal amnesty custom with Roman policy, and the Gospel writers appear to assume that their audiences were familiar with this practice in prior gospel tradition.

Although Roman law dictated that judges should not ignore laws, decrees, or custom (Justin. *Inst.* 4.17), Roman provincial officials often followed, but were not bound by, "precedents of their predecessors or local customs."⁵⁴⁶ Prefects were in any case free to issue amnesties.⁵⁴⁷ Pilate's offer of amnesty thus could be a custom Pilate himself initiated, though it is more likely an earlier custom that he merely decided to continue (cf. John 18:39). Pilate had authority to ignore a preexisting custom, but given previous conflicts with the people (e.g., Jos. *War* 2.174, 177) and the dangers of popular unrest at festivals (e.g., 2.224), he may have been more inclined to grant such symbolic concessions.⁵⁴⁸ Politically prudent rulers in the East presumably often continued festival traditions begun by their predecessors.⁵⁴⁹ Doing away with pardons and other civic customs was considered despicable (Cic. *Rosc. Amer.* 1.3), and governors who wished to make a positive impression typically continued as many precedents that the people liked as possible (Cic. *Att.* 6.1).

Romans sometimes deferred to local custom in forgiving an offense (e.g., Plut. *Rom. Q.* 83, *Mor.* 283F); they also sometimes freed prisoners en masse on local feasts (Livy 5.13.8),⁵⁵⁰ a custom known in various other ancient Near Eastern and Mediterranean cultures.⁵⁵¹ Although the later practice of pardoning criminals at Easter (*Cod. theod.* 9.38.3–4, 8) is probably dependent on the Gospels,⁵⁵² sometimes Roman authorities also released captives because of the people's demands.⁵⁵³ Romans usually

of the tradition, but I believe that John's passion narrative reveals awareness of the Markan (or pre-Markan) passion tradition.

544. On which point, see Ferguson, *Backgrounds*, 50.

545. A minimalist methodology demanding external evidence before accepting a source serves a legitimate function if one's goal is historical certainty, but this approach is too stringent for normal purposes of ascertaining probability; little of ancient history could survive such a criterion.

546. Ferguson, *Backgrounds*, 50. This freedom may call into question the supposed official report cited by Eusebius (*H.E.* 2.2) and Tertullian (*Apol.* 21:24; cf. 5:2), which may depend on an earlier Christian forgery that the Christians assumed to be accurate (probably as in Just. *1 Apol.* 35, 48; *pace* Stauffer, *Jesus and Story*, 145–46).

547. E.g., P.Oxy. 1668.17–19 (third century C.E., perhaps referring to a political disturbance); cf. Sen. E. *Controv.* 5.8 (hypothetical); Plut. *Caes.* 67.4 (the senate).

548. Its lack of attestation in Josephus might suggest that it was discontinued by his own day; but whether for supposing the custom discontinued or denying its existence, appeal to Josephus on this point remains an argument from silence. Arguments from silence may have merit to the degree that the silence runs contrary to legitimate expectations, but such an argument is not particularly compelling in this case, given Josephus's focus on other matters.

549. E.g., Alexander in Diod. Sic. 17.16.3; contrast the imprudent Verres in Cic. *Verr.* 2.2.21.51–52.

550. Blinzler, *Trial*, 206. During local festivals, Romans sought to show particular benevolence to local populations even with respect to executions (Philo *Flacc.* 83). They offered mass amnesties when it proved politically advantageous (Cic. *Phil.* 8.9.32).

551. Merritt, "Barabbas"; cf. P.Tebt. 5.1–13 (118 B.C.E.); Corn. Nep. 8 (Thrasylbulus), 3.2; a fictitious example in Iambl. (nov.) *Bab. St.* 16 (Photius *Bibl.* 94.77a).

552. With Cohn, *Trial*, 167. Blinzler, *Trial*, 207, 218–21, argues for the custom of a paschal release of prisoners in *m. Pesah.* 8:6 (cf. also Schnackenburg, *John*, 3:252); Le Cornu, *Acts*, 198; but see Bammel, "Trial," 427, who argues that the text merely indicates the special Jewish desire to free prisoners at this time.

553. P.Flor. 61.59ff., cited in Deissmann, *Light*, 269; Blinzler, *Trial*, 207; Lane, *Mark*, 553. Roman rulers sometimes handed over convicted persons at the people's request as an act of benevolence (Livy 8.35.1–9); governors might also release prisoners in acceding to terrorist demands (Jos. *Ant.* 20.208–10).

delayed punishments during their own festivals in Rome.⁵⁵⁴ Roman law permitted two kinds of amnesty: *abolitio* (acquitting a prisoner before trial, Justin. *Cod.* 9.42 [*De abolitionibus*]; *Dig.* 48.16) and *indulgentia* (pardoning a convicted criminal, Justin. *Cod.* 9.43.3).⁵⁵⁵ Since Pilate had not yet pronounced sentence against Jesus, an *abolitio* allowed him to easily circumvent the whole matter placed before him.

Scholars typically accept (at least until evidence is offered otherwise) many ancient claims about customs that are attested in only one source; yet the passion tradition here may be attested independently by Mark and John. Further, the custom was potentially subject to verification in the earliest period, and so fabricating the custom in the passion tradition that probably circulated first in pre-70 Jewish Palestine would hardly have been helpful for apologetic purposes. Finally, the tradition is likely pre-Markan; Mark presumes his audience's prior knowledge of Pilate and (more significantly) Barabbas and other insurrectionists. They presumably know about Barabbas through gospel tradition and not simply a copious knowledge of recent Judean history, for Pilate in fact confronted many such revolutionaries.⁵⁵⁶

Why would Pilate consider releasing Jesus rather than Barabbas? If Pilate wished to grant any prisoner's release for the festival, it was far safer to release Jesus, whom he likely supposed akin to a harmless philosopher,⁵⁵⁷ than alternatives such as Barabbas, who had committed murder during an act of revolt (Mark 15:7).⁵⁵⁸ Yet Pilate's approach in the Gospel passion narratives portrays him as one who attempts to be politically shrewd but proves politically inept. He tries to achieve two goals simultaneously: he is willing to honor an earlier custom—which Roman law did not require him to follow—to curry more favor with the people, and at the same time to release a prisoner whom he wishes to release in any case. Yet he proves politically inept: the crowds prefer Barabbas to Jesus, revealing how poorly Pilate read the situation.⁵⁵⁹

IV. THE ESTABLISHER OF LIFE (3:15)

"Prince of life" is *antonomasia* and is synonymously parallel with another title, "the one whom God raised." That Peter's "people" (3:12) "killed" the Prince of "life" is a classic case of rhetorical antithesis, which juxtaposes opposing meanings;⁵⁶⁰ it is also part of the obvious rhetorical contrast between their asking for a murderer

554. Sen. E. *Controv.* 5.4; Cic. *Cael.* 1.1; New Year's Day in Suet. *Tib.* 61.

555. Blinzler, *Trial*, 207–8.

556. Theissen, *Gospels*, 171, 182–83. Livy occasionally cites a name as if familiar despite lack of previous mention (e.g., 40.55.2), perhaps incompletely following a source. Dodd, *Tradition*, 120, thinks the question of treason relevant in Palestine only before 70 C.E., but this argument is questionable: to be sure, the issue fits Tiberius's time very well, but it would remain relevant after 70.

557. See Keener, *John*, 1112–14; idem, "Truth"; even if the details are purely Johannine, the logical assumptions that John highlights in John 18:35–38 fit cultural expectations about what was probably already implicit in Mark 15:2–5.

558. John 18:40 employs a term for Barabbas used for insurrectionists in Josephus (Barrett, *John*, 539). In the gospel tradition, those who arrested Jesus treated him as if he were a guerrilla as well—a natural category in which to place many messianic pretenders, albeit not Jesus (Mark 14:48). Some argue plausibly that Jesus shared the social bandits' "basic goals" though rejecting their violent means (see, e.g., Oakman, "Peasant," 121).

559. Perhaps Pilate expects the municipal aristocracy to side with Roman values over against a low-class peasant revolutionary; it was such lower-class revolutionaries who, perhaps more than two decades before this Gospel was written, ultimately had slaughtered much of the priestly aristocracy in the temple area (Jos. *War* 4.302–34). Ironically, the chief priests hand Jesus over as a messianic pretender yet favor a genuine revolutionary (who must have seemed to them far less dangerous, having fewer followers).

560. See *Rhet. Alex.* 26, 1435b.25–39; Anderson, *Glossary*, 21–22 (citing, e.g., *Rhet. Her.* 4.15.21; 4.58; Demet. *Style* 22–24, 247, 250; for cautions, Theophr. frg. 692 FHS&G); Rowe, "Style," 142 (citing as examples Greg. Naz. *Or.* 3; Aug. *Ep.* 196.6); Black, "Oration at Olivet," 87; in the LXX, see Lee, "Translations: Greek," 780 (e.g., Prov 6:1). Commentators generally notice the irony (e.g., Kilgallen, *Speech*, 99). Cf. antimetabole in Anderson, *Glossary*, 22; Rowe, "Style," 143; Porter, "Paul and Letters," 582.

(Acts 3:14) and their repudiating the Prince of life. (For the accusation that his audience participated in “killing” Jesus, cf. 4:10; 7:52; but esp. comments on Acts 2:23.) Barrett observes the following contrasts that demonstrate Luke’s skillful composition:

- A You denied the holy and righteous one
- A’ You asked for a murderer
- B You asked for a murderer
- B’ You killed the author of life
- C You killed
- C’ The author of life
- D You killed the author of life
- D’ God raised him from death⁵⁶¹

The contrast between life and death recurs as many as three times here. Jewish hearers schooled in Scripture might recall Moses’s challenge to choose life rather than death (Deut 30:15, 19) and might note that the Jerusalemites had chosen death. Now Peter will offer them the alternative of life again, eschatological salvation for Israel (Acts 3:19–21), the blessing of the covenant (3:25–26) prefigured in the wholeness of the disabled man (3:16). The blessing of the covenant appears often in the Law (see esp. Gen 12:2–3; 22:17; Deut 28:2; 30:1, 19) but, for our present point, most notably in the above-mentioned passage about choosing life and death (Deut 30:16, 19).

The greatest lexical challenge for commentators in this passage is the meaning of ἀρχηγός (here and in Acts 5:31). The term also appears in Hebrews (Heb 2:10; 12:2), also a document from a highly educated Diaspora Christian.⁵⁶² The term could apply to deities⁵⁶³ but only in the sense that these deities were viewed in the larger category of leaders or saviors. It applied to eponymous heroes and was often applied specifically to Heracles.⁵⁶⁴ Greek texts often use the term to depict a founder,⁵⁶⁵ such as the founder of a city,⁵⁶⁶ a meaning that may be relevant in Hebrews (cf. Heb 11:10, 16; 12:22; 13:14).⁵⁶⁷ The term closely overlaps with ἀρχηγέτης, “leader,” “founder,”⁵⁶⁸ which also applied to Apollo, Heracles, Attic demes’ heroes, and so forth.⁵⁶⁹ A writer could describe Noah’s family as ἀρχηγέται of a new and second world after the flood’s destruction (Philo *Mos.* 2.65) and hence as “inaugurators” (with LCL, 6:481).⁵⁷⁰

561. Barrett, *Acts*, 197.

562. From the early second century, it applies to Jesus also in 2 *Clem.* 20.5 (in a more general sense in 1 *Clem.* 14.1; 51.1; 63.1).

563. Van der Horst, “Cornutus,” 169, cites Cornutus *Summ.* 6 (Lang, 6, lines 5–6; Rhea); 28 (Lang, 56, line 18; Demeter).

564. Often noted, sometimes in connection with the term’s use in Hebrews (e.g., Montefiore, *Hebrews*, 61). For the thesis that Heracles imagery affects more thoroughly Hebrews’ portrayal of Jesus, see Aune, “Heracles” (perhaps plausible in the background, although, certainly, explicit biblical citations dominate the foreground).

565. E.g., of a philosophic school, e.g., Zeno of the Stoics (Lucian *Oct.* 19). For “founder,” see, e.g., BDAG; for hero-founders, see Delling, “ἀρχηγός,” 487.

566. E.g., Heracles as founder of Tarsus (Dio Chrys. *Or.* 33.47). Like many terms applied to Jesus, this one might compete with the emperor, whom imperial propaganda could portray as “creator” (founder) of cities to whom he showed benefaction (Pont, “Fondateur”). Cf. Alexander as founder (using a different term, Libanius *Descr.* 27, esp. 27.1).

567. Montefiore, *Hebrews*, 60–61, rightly objects that God, rather than Jesus, founds the city (Heb 11:10), but the writer of Hebrews elsewhere coalesces the image of Jesus with God as builder (3:2–4; cf. 1:3).

568. For the overlap, see LSJ.

569. See Graf, “Archegetes,” 980.

570. Josephus also uses this term to designate Noah as the “originator” of humanity (*Ag. Ap.* 1.130).

The term ἀρχηγός is frequent in the LXX, where it applies to heads of clans;⁵⁷¹ the basic sense is not their hereditary position but that they are respected leaders.⁵⁷² It also could apply to authors or originators of something (1 Macc 9:61; of something negative there, but the sense of leader also fits in this passage) or the “initiator” of something (1 Macc 10:47, with NEB; see also Jos. *Ant.* 7.207). For readers steeped more in biblical Greek than in Greek tradition, the image of leadership would be a dominant nuance.⁵⁷³ Luke’s ideal audience probably knew something of both but would expect Peter’s preaching to echo more the language of the LXX.

To the extent that ἀρχηγός means (as it typically does in the Greek Bible) “leader” as well as “forerunner,” it overlaps with the semantic range of ἄρχων. The latter term appears elsewhere in Acts and applies to worldly rulers of various sorts (Acts 3:17; 4:5, 8, 26; 13:27; 14:5; 16:19; 23:5; cf. Luke 8:41; 11:15; 12:58; 14:1; 18:18; 23:13, 35; 24:20) but in an unambiguously positive sense only twice—of Moses, whom God explicitly appointed (Acts 7:27, 35; cf. Exod 2:14 LXX).⁵⁷⁴ One of these texts couples the title with “redeemer” (Acts 7:35), just as 5:31 couples “Savior” with ἀρχηγός. As Moses was the prince who led his people to salvation, so is Jesus. Such an allusion (or, perhaps more accurately, at most an implicit comparison) would pave the way for the explicit prophet-like-Moses Christology later in the sermon (3:22–23). Although a first-time hearer would not immediately catch the comparison, Moses would naturally provide the sort of biblical figure with whom Jewish people could associate the Greek term.⁵⁷⁵

Jesus is thus the heroic leader leading the way to the historic goal of achieving eternal life (Luke 10:25; 18:18, 30; Acts 5:20; 11:18; 13:46, 48), the life of the resurrection (cf. Luke 14:14; 20:36; Acts 23:6; 24:15, 21), and as such fulfills the promises and inaugurates the opportunity for the eschatological era of blessing (Acts 3:24–26). Thus Christ, by his resurrection, is the “first” to preach (26:23; followed by others, cf. 13:47), and this sermon’s message is summarized as preaching “in Jesus the resurrection from among the dead ones” (4:2). In the words of other early Christian writers, he is the “firstborn” from the dead, who thereby guarantees life to the rest of his people (Col 1:18; Rev 1:5).⁵⁷⁶ Or (using the same term) Jesus authors salvation for his people (Heb 2:10; 12:2).

Many commentators render the term “pioneer.” This can be appropriate provided we understand it as the one who has led the way rather than with the nuances of rugged individualism often associated with the concept among U.S. readers. Jesus’s triumph over death was not a matter of rugged self-determination but of submission to the Father’s will and of exaltation by the Father’s act (Acts 3:15).

That the “ruler” here (3:15) is also the “servant” (3:13) functions like an oxymoron,

571. Exod 6:14; Num 10:4; 1 Chr 5:24; 26:26; Neh 7:70–71; 1 Esd 5:1; leaders of ranks in 1 Chr 12:20; 2 Chr 23:14; Neh 2:9; Jdt 14:2. In their function as the people’s representatives, see, e.g., Num 25:4.

572. E.g., Num 13:2–3; Deut 33:21; Judg 5:2; Isa 3:6–7; Lam 2:10. Bruce, *Acts*¹, 143, cites it especially for judges in Judg 11:6, 11 (cf. also “raising” a “savior,” as in Acts 5:31, at Judg 3:9), though this is in only some MSS. It applies to those chosen by the assembly (Num 14:4; 16:2) and is used for other nations’ leaders in Num 24:17 (only LXX); Isa 30:4.

573. Johnston, “Archegos,” 385, though he may go too far in viewing it as a royal title equivalent to ἄρχων, “prince,” a messianic title also used by Michael and various guardian angels in the DSS.

574. Zehnle, *Pentecost Discourse*, 47, who draws this parallel (cf. also Cribbs, “Agreements,” 55), suggests that Luke changes Moses’s ἄρχων to ἀρχηγός for Jesus to differentiate the two.

575. Another might be Joshua, as founder of a “colony” (C. Williams, *Acts*, 78). But Joshua, not mentioned much in Acts (Acts 7:45; cf. Heb 4:8), is probably merely an example of the category in which Moses is a clearer example.

576. Cf., e.g., Haenchen, *Acts*, 206. For the excellent fit of this conception with “originator” (emphasizing that nuance here, where it is appropriate), see also Anderson, *Raised*, 225.

inviting attention;⁵⁷⁷ it may reflect “the servant of rulers” despised by the nations (Isa 49:7) until his exaltation (52:13–15).⁵⁷⁸

e. Faith and Witness (3:15–16)

The apostles were witnesses of the miracle that Jesus had risen from the dead. The name of the risen Jesus had now generated another miracle, but this time the crowds hearing Peter were themselves the witnesses, since many among them recognized that this healed man was the one who was previously unable to walk. Dependence on Jesus’s name by his agents could produce miracles, as did faith in the Gospels when Jesus was present.

I. WITNESS (3:15–16)

The witnesses (3:15), in the first case, are the apostles whom Jesus appointed to testify of what they had seen (see extended comments at Acts 1:8; for the phrase “we are witnesses,” cf. 2:32; 5:32; 10:39). This role is important for Luke as an author, since witnesses were essential in Hellenistic historiography.⁵⁷⁹ “Witness” may also retain some of its judicial nuance, given the context, which appears to apply the charges made against Jesus now to the city that had called for his execution (3:13–15; see also 5:31–32).⁵⁸⁰ “We” is emphatic, and the statement about witnesses may come last in the sentence because it begins the proofs section of this speech summary.⁵⁸¹

Now that his audience has witnessed a miracle, Peter appeals to their own firsthand knowledge (3:16); appeal to an audience’s eyewitness knowledge was a useful rhetorical technique.⁵⁸² Peter’s hearers see the man well, and presumably from their experience in the temple, they “know” the man as having been disabled. (Cf. “see and hear” in 2:33; 4:20.)

II. FAITH IN JESUS’S NAME (3:16)

The man was healed on the basis of faith; this faith might refer to that of the healed man (which would better fit the parallel in 14:9)⁵⁸³ but might be that of the apostles who used the name (3:6).⁵⁸⁴ That this faith also comes through (δὲ) Jesus⁵⁸⁵ probably alludes to events described in Luke’s Gospel, either to Jesus’s teaching the disciples faith through their experience with him or to the miraculous events of Jesus’s ministry and/or exaltation as the basis for their faith.⁵⁸⁶

577. On this figure, see Rowe, “Style,” 143; Porter, “Paul and Letters,” 582; Anderson, *Rhetorical Theory*, 227; Aune, *Dictionary of Rhetoric*, 327; Krentz, “Oxymora.”

578. If one looks to Isaiah for the “ruler” (on the basis of the servant allusion in Acts 3:13), one might think of the messianic ruler of Isa 9:6–7; 11:1–5 (ancients read Isaiah as a unity), but the term does not appear here in the LXX.

579. Witherington, *Acts*, 182.

580. Returning charges was standard rhetorical practice (see comments on Acts 24:19), although, in this case, the apostles themselves have not yet been charged.

581. Some scholars begin the demonstration earlier, as in the outline from Satterthwaite, “Acts,” 359, cited above; but the proofs themselves, after returning of the charges, seem to begin here.

582. See comments on Acts 26:4–5, 26.

583. The pattern fits Luke’s work well, e.g., Luke 5:20; 7:9; 8:25, 48, 50; 17:19; 18:42; cf. Mark 5:34; 9:19; 10:52. In Acts (after the resurrection despite unbelief, Luke 24:11, 25, 41), we have only Acts 14:9, but it provides the closest parallel to this passage.

584. For that of the apostles, see Lake and Cadbury, *Commentary*, 37; Gaventa, *Acts*, 87; cf. Jas 5:14–15. Ammonius in *Cat. Act.* 3.16 (Martin, *Acts*, 43) suggests that the faith of both is necessary; cf. Gaiser, *Healing*, 218–19 (distributing faith still more widely). In either case, πίστει τοῦ ὀνόματος contains an objective genitive (Schreiner, *Romans*, 183).

585. That it is the “faith” that comes through Jesus, rather than the gift of health, seems clear; the relative pronoun “which” (ἣ) corresponds to ἣ πίστις, which immediately precedes it.

586. Cf. Acts 9:34; esp. 4:13. If we read it in light of Paul, it could also refer to faith imparted as a gift through Jesus (cf. Rom 12:3; but though scholars sometimes take Eph 2:8 accordingly, the neuter demonstrative

Acts uses πιστεύω and its cognates far less often than does the NT epistolary literature but more often than other NT narratives except the Fourth Gospel.⁵⁸⁷ A broader Mediterranean audience might understand faith in the context of dependence on a divine provider; inscriptions and other texts demonstrate the use of faith language in patronal and sometimes benefactor relationships.⁵⁸⁸ Thus one could praise a patron for his πίστις (trustworthiness).⁵⁸⁹ Roman Christians translated πίστις into Latin as *fides*, hence imbuing it with legal and moral associations⁵⁹⁰ that include veracity and the maintaining of commitments.⁵⁹¹ Even in Greek, πιστεύω and its cognates can imply loyalty or fidelity,⁵⁹² and this nuance is undoubtedly included in Paul's emphasis on covenant faith (cf. Rom 1:5; 16:25).

In a more cultic sphere, faith also entailed acceptance of particular claims; Lucian mocked Christians for having faith without evidence.⁵⁹³ Faith language contrasted with skepticism elsewhere as well.⁵⁹⁴ Ancients would also understand the dangers of active unbelief that could provoke the anger of deities.⁵⁹⁵ Philostratus recognizes that failing to believe a semidivine hero after sufficient evidence has been presented would be unjust (*Hrk.* 17.1). (Philostratus even traces in his narrative the development of a person's faith,⁵⁹⁶ although it is difficult to know to what degree the Gospels, by then widespread, might have influenced him.)⁵⁹⁷ Judgments for unbelief in a divine agent also appear in the OT (2 Kgs 9:7; Dan 9:6–7; Amos 7:12–17), Amoraic texts,⁵⁹⁸ and Luke-Acts (Luke 1:20; Acts 13:11).

One might suggest that Jesus was the object of faith only in the way that Moses or the prophets were, but the language is stronger than this. Moses is frequently the object of faith in the LXX of the Pentateuch (Exod 4:1, 8, 9, 31; 14:31; 19:9);⁵⁹⁹ most often, however, Moses leads the people to "believe" in God (4:5; 14:31; Num 14:11; 20:12; Deut 9:23; 32:20). Luke's Christology is clearly higher than this (Acts 2:34–38), and faith in others besides God did not yield miracles on behalf of their agents.⁶⁰⁰

Sometimes signs could be performed with minimal or no faith,⁶⁰¹ but in Luke's

pronoun [τοῦτο] there would not refer strictly to the feminine πίστεις [faith] as its antecedent). Gaiser, *Healing*, 220, views this faith as a gift.

587. Jeremias, *Theology*, 160, notes that cognates appear on the average page of the Greek text of the NT according to the following distribution: 0.09 in Revelation; 0.24 in the Synoptics; 0.55 in Acts; 1.10 in the Catholic Epistles; 1.25 in Paul; 1.31 in Hebrews; and 1.48 in John.

588. E.g., Sen. Y. *Ben.* 3.14.2; Tac. *Dial.* 10; Marshall, *Enmity*, 21–24; deSilva, *Honor*, 115–16, 145; idem, "Patronage," 768 (following Danker, *Benefactor*). Peter would not think in terms of Roman patronage here, but it might illustrate one element of the context for Luke's audience.

589. Kent, *Inscriptions*, no. 265, lines 4–7.

590. Büchli, "Fides," 417.

591. Schieman, "Fides," 415; Horsley, "Assembly," 386. On the personification of this virtue, see Prescendi, "Fides" (but some demurred, Pliny E. *N.H.* 2.5.14).

592. E.g., Dio Chrys. *Or.* 3.88.

593. Lucian *Peregr.* 13. Luke, who cites evidence, would define believers' faith differently.

594. E.g., Lucian *Tox.* 56. Also the contrast between mere "faith" and true "knowledge" (Philostr. *Ep. Apoll.* 52; *Hrk.* 8.1; contrast the perspective in 1QM XIII, 3; Arius Did. *Epit.* 2.7.11m, pp. 94–95.20–22).

595. E.g., Ovid *Metam.* 3.513–18; cf. Porph. *Marc.* 22.348–60.

596. The guest in Philostratus's *Heroikos* initially does not believe in heroes but is willing to be persuaded (3.1; 7.10–11; 8.2). Before long, however, he begins to believe in response to accounts of the signs (7.12; 8.18; 16.6; 17.1; 18.1; 44.5).

597. Moving an interlocutor along during a dialogue appears as early as Plato; but Christianity certainly popularized an analogous language of faith.

598. E.g., *b. B. Bat.* 75a; *Pesiq. Rab Kah.* 18:5; cf. *Tg. Ps.-J.* on Gen 25:29, 32.

599. For other prophets, see 2 Chr 20:20; cf. 1 Sam 12:18.

600. On agency, especially divine agency, see Keener, *John*, 310–15, esp. 314–15.

601. Suet. *Vesp.* 7.3 (but Suetonius honors Vespasian by reducing his credulity, for skeptics).

Gospel (as in the gospel tradition in general),⁶⁰² faith is often associated with miracles (Luke 5:20; 7:9; 8:25, 48, 50; 17:6, 19; 18:42). Those who received revelation were morally responsible to respond in faith (1:20, 45; 24:25; cf. 8:12–13).⁶⁰³ Still, it should be recognized that not all accounts mention faith (e.g., 7:12–15; 13:11–13; Matt 8:14–15; 14:14; Mark 1:30–31; John 5:6–9; 9:4–7); one dare not argue from silence, especially since Jesus himself supplied faith in many cases, but it is also clear that miracles can occur at times despite some participants' lack of faith (Matt 8:26; 14:17, 26; 16:8–10; Mark 4:40; 6:49; 8:4, 17–21; 9:24, 26; Luke 2:9; 5:4–9; 8:25; 11:14–15; especially Luke 1:20; cf. Luke 10:18). The disciples themselves are often the ones chided for their little faith (Mark 4:40; Luke 8:25; 12:28; cf. Luke 17:5), albeit especially in Matthew (Matt 6:30; 8:26; 14:31; 16:8; 17:20).⁶⁰⁴

For the sake of emphasis, Peter repeats “name,” though the repetition is not grammatically necessary for understanding.⁶⁰⁵ The term “name” functions as a sort of metonymy for his authority⁶⁰⁶ (though this use of the term was so common that authority may simply function as part of its semantic range) or as synecdoche (a part functions for the whole).⁶⁰⁷ Jesus’s name healed the man in Acts 3:6; the man was healed through faith in the efficacy of Jesus’s name, in which Peter declared he was acting.

Here the primary issue in the use of “name” involves not magic but Jesus’s *honor*. (For discussion of the meaning of “Jesus’s name” in this context, see comments on Acts 3:6.) From a human perspective, Jesus was shamed by the cross (one of the ultimate humiliations in the Roman world),⁶⁰⁸ but by exalting him, God had vindicated him and restored his honor (cf. 3:15).⁶⁰⁹ The name also, however, involves agency: Peter acted in Jesus’s name, as Jesus’s agent, carrying out Jesus’s own ministry (9:34). This agency thus entailed doing what Jesus had earlier been doing (see comments on “what Jesus *began* to do and teach” in 1:1) and what Jesus now would continue to do through his agents.

602. Cf. Mark 2:5; 5:34, 36; 9:23; 10:52; 11:23–24; Matt 8:10//Luke 7:9; Matt 8:13; 9:2, 6–7, 22, 28–29; Matt 14:28–31; 15:28; 21:21–22; John 4:50; 11:40; later, Mark 16:17. Disbelief likewise inhibited healings (Luke 9:41; cf. Mark 6:5–6; Matt 13:58; perhaps violent disbelief, in view of Luke 4:28–29), including the disbelief of Jesus’s agents (Matt 17:20; cf. Mark 9:29; Luke 9:41). (John more typically emphasizes basic faith *following* signs; John 1:50; 2:11, 23; 4:39, 48, 53; 7:31; 11:15, 42, 45, 48; 12:11; 14:29; 16:30; 20:30–31; cf. John 9:35–38; 10:25; Acts 13:12.) That Jesus granted miracles to those who trusted God’s power in him is part of the modern consensus regarding Jesus’s miracles (Blackburn, “Miracles,” 375).

603. Some modern Christian healing evangelists also emphasize the operation of faith in healings, but some warn that it is only God’s gift (cf. Kuhlman, *Miracles*, 152–53, 211–12, 214, 217–18, disagreeing with many “faith” healers).

604. Cotter’s recent and excellent *Miracle Stories*, thoroughly informed in ancient culture, helpfully highlights the petitioners and Jesus’s response to them in some key Markan narratives and Q, often including the petitioners’ boldness. For faith and its often bold expression in this work, see *Miracle Stories*, 6–7, 9, 12, 74–75, 100–102, 158, 254–55, 257.

605. This is something like metaclisis (using different inflections), though a strong example would list more than two occurrences (cf. Rowe, “Style,” 133, citing as examples 1 Cor 9:20; Aug. *Ep.* 267), or epanalepsis (Rowe, “Style,” 129, citing as examples Demosth. *Cor.* 208; Cic. *Phil.* 2.17.43; Porter, “Paul and Letters,” 579, citing Phil 2:8; Black, “Oration at Olivet,” 86, citing Quint. *Inst.* 8.3.51; Mark 13:8, 12; see also Hermog. *Method* 9.423–25). Peter also repeats “faith” twice in Acts 3:16.

606. On metonymy, see *Rhet. Her.* 4.32.43; Anderson, *Glossary*, 73; Black, “Oration at Olivet,” 85; Rowe, “Style,” 126; Porter, “Paul and Letters,” 578.

607. For synecdoche, see *Rhet. Her.* 4.33.44–45; Anderson, *Glossary*, 112 (citing also Cic. *De or.* 3.168; Quint. *Inst.* 8.6.19–22); Rowe, “Style,” 127 (citing Demosth. *Fals. leg.* 313; Cic. *Phil.* 11.14.37); Porter, “Paul and Letters,” 578; Black, “Oration at Olivet,” 85.

608. See the excursus on Acts 2:23; more fully, Hengel, *Crucifixion*.

609. Spencer, *Acts*, 43.

f. Their Ignorance and God's Plan (3:17–18)

After confronting his audience with the full measure of their corporate guilt, Peter more gently points out their ignorance and God's plan in allowing Jesus's crucifixion.

I. IGNORANCE AS A MITIGATING FACTOR (3:17)

Ignorance mitigated Israel's guilt, though it did not erase it completely. Ignorance mitigated the guilt of Gentiles (14:17; cf. 17:23, 30), though the ignorance of the Judean leaders, who knew Scripture, was more culpable (cf. Luke 11:52; Acts 13:27). The leaders were ignorant because they understood neither Jesus nor the Scriptures (Acts 13:27; cf. Mark 12:24); these leaders contrast with the true leader (Acts 3:15). Ignorance mitigated guilt for the crucifixion (the likeliest reading of Luke 23:34).

Other writers also believed that ignorance was culpable but forgivable (1 Tim 1:13); indeed, biblical law specifically provided atonement only for sins done in ignorance (Lev 4:2–3, 22–23, 27–28; 5:15–19; 22:14; Num 15:22–31; 35:11, 15).⁶¹⁰ Early Judaism widely recognized this principle (e.g., *L.A.B.* 22:6, *ignorantia*).⁶¹¹ The author(s) of the pre-Christian *Psalms of Solomon* believed that God disciplined the righteous in the present (as opposed to destroying sinners utterly) for deeds done in ignorance (*Pss. Sol.* 13:7, ἐν ἀγνοίᾳ; cf. 18:4), but the work allowed that by fasting the righteous could atone for ignorance (3:8). Philo also acknowledges pardon for those who acted in ignorance, unaware that their acts were sins.⁶¹²

Later Jewish sources concurred. In one novel, Judah notes that God had mercy because Judah acted in ignorance.⁶¹³ In a novel⁶¹⁴ of uncertain date, Aseneth beseeches God's forgiveness on the basis of her ignorance (*Jos. Asen.* 6:7/4)⁶¹⁵ soon after pleading with God to pardon her idolatrous sins against God performed "in ignorance" (13:11 [many MSS] and 13:12–13, several times). Rabbis believed that sins of ignorance were not culpable⁶¹⁷ or that they should be punished, but less so than deliberate sins.⁶¹⁸ Ignorance could even invite the nullifying of vows (based on mistaken information).⁶¹⁹

610. If one repented, one's sins would be counted as if "sins of ignorance" (*Tg. Hab.* 3:1). Cf. lack of intention as a mitigating factor in some ancient Near Eastern law (Wells, "Exodus," 238; Eshn. 37; Hammurabi 266; for homicide, *Xen. Anab.* 4.8.26; Apollod. *Bib.* 2.3.1; Sen. E. *Controv.* 4.3, excerpts, introduction; 6.2).

611. E.g., Tobit asked God not to punish his sins, his ignorances (ἀγνοίμασίν μου), and those of his ancestors (*Tob* 3:3).

612. Philo *Unchangeable* 134.

613. *Test. Jud.* 19:3–4 (also noting the devil's blinding him through his sins). The pre-Christian nature of this testament is not certain.

614. For *Joseph and Aseneth* among romances, see, e.g., West, "Joseph and Aseneth"; Doran, "Narrative Literature," 290–91.

615. For the range of possible dates, see Burchard, "Introduction," 187; pre-Christian, see West, "Joseph and Aseneth," 79–80; Koester, *Introduction*, 1:265. It appears mostly Jewish (appealing for Gentile women's conversion; cf. the emphasis on Levi in *Jos. Asen.* 22–26, though this could be Jewish-Christian, as in *Testament of Levi* [which is at least heavily interpolated]) and does not teach permanent celibacy, but it sometimes appears to recall Christian ideas (*Jos. Asen.* 13:13 sounds like virgin birth typology; *Jos. Asen.* 14:7–8 might recall Acts 9; *Jos. Asen.* 14:9–11 might recall Rev 1:13–16; *Jos. Asen.* 14:12–13 might recall the putting off and the putting on of tunics in conversion, as perhaps in Col 3:9–10; in *Jos. Asen.* 16:15–16/16:9, the bread of life might recall the Eucharist, and anointing, later Christian baptisms; in 19:11, the imparting of spirit by breath could evoke John 20:22; and other features may suggest a Christ typology).

616. E.g., *Jos. Asen.* 6:7 (*OTP* 2:210)/6:4 (Philonenko, 150), ἐν ἀγνοίᾳ (for other references, see Burchard, *OTP* 2:210 n.s.). Some Tannaim felt that God had a more tolerant standard for Diaspora proselytes (*t. Šabb.* 8:5).

617. E.g., *Sipre Deut.* 155.1.1 (the text in Deuteronomy concerns a capital offense). One who, knowing no better, followed the wrong decision of a court is not culpable (*m. Hor.* 1:1); a proselyte among Gentiles might inadvertently commit a sin, which was therefore covered by the sin offering (*t. Šabb.* 8:5).

618. E.g., *Sipra VDDeho. par.* 12.65.2.1.

619. *M. Ned.* 9:8.

Gentiles also viewed ignorance as mitigating guilt.⁶²⁰ A soldier who unwittingly killed his own brother could have viewed himself as innocent by virtue of his ignorance (*ignorantiae beneficio innocenti*), though the narrator reports that this soldier proved so exceptionally pious that he killed himself instead (Val. Max. 5.5.4). Far more than biblical tradition, Greek religion could regard unbelief as less culpable if stemming only from ignorance (Philost. *Hrk.* 8.18). Greek philosophy tended to identify ignorance as the cause of wrong behavior.⁶²¹ A Stoic claimed that those who did wrong were unlearned like beasts, but if one could cure their ignorance (ἄγνοίας) and lack of instruction (ἀμαθίας, line 30), they would stop such behavior (Mus. Ruf. 10, p. 78.27–31, esp. 78.30–31).⁶²² Epictetus, another Stoic, exempted the ignorant masses from fault, explaining that they were simply blind (*Diatr.* 1.18.4); even brigandage and adultery were not culpable, stemming only from blindness (1.18.6). But philosophers could recognize that love for pleasure provided a basis for deliberate ignorance.⁶²³

Ignorance reduced legal liability.⁶²⁴ In contrast to ignorance of facts (such as that one's animals were grazing in the plaintiff's field), ignorance of the law remained culpable.⁶²⁵ Nevertheless, groups presumed to have less knowledge or mental competence (whether foreigners, women, children, or rural people) were treated more leniently.⁶²⁶ Some concrete examples illustrate the same concession. For example, when masters exported slaves without proper knowledge of tax rules, the slaves were sold by the state (*BGU* 5.65.164, from the second century C.E.), but penalties were harsher if they acted knowingly (5.66.165–5.67.170). Many analogously viewed youth as an extenuating circumstance.⁶²⁷ Youth could overlap with ignorance; thus some Jewish moralists attributed sexual immorality to the "ignorance of youth" (*Test. Reub.* 1:6; 2:9; 3:8).

In a context of forensic rhetoric, granting that the accused acted in ignorance was a significant concession.⁶²⁸ A defendant may claim that his or her action was unintentional and remind the hearers "that unjust conduct is particular to wicked people, but the error [ἐξἁμαρτεῖν] and misfortune in one's actions is not peculiar to yourself alone but is common to all mankind, including the members of the jury."⁶²⁹ A prosecutor may respond that laws must hold people liable for their actions even if they claim them accidental, or else everyone will begin committing such "mistakes."⁶³⁰ Similarly, a defendant may claim that no law prohibits his or her specific act, which

620. For attention to intention in legal reasoning, see, e.g., Hermog. *Issues* 61.16–18; 72.14–73.3.

621. See, e.g., Max. Tyre 12.9; see further Malherbe, *Moral Exhortation*, 42 (citing the moralist Dio Chrys. *Or.* 13.13).

622. Thus one wicked through ignorance could reform through philosophic knowledge (Lucian *Downward Journey* 24; cf. the rabbis on R. Akiba or 1 Tim 1:13 on Paul).

623. See, e.g., Max. Tyre 25.5. Ignorance, pleasure, and vices ruled the masses (Lucian *Charon* 15).

624. Even without ignorance (but not relevant here), Roman law sometimes regarded killing as justifiable, e.g., in self-defense, defending a family member's sexuality, killing a deserter to the enemy, and sometimes avenging adultery (Robinson, *Criminal Law*, 45).

625. *Ibid.*, 16. To make crimes of ignorance intelligible, Bryan, *Preface*, 102, compares corporate racist attitudes (citing Nazi Germany and apartheid South Africa).

626. Robinson, *Criminal Law*, 17.

627. *Rhet. Alex.* 7, 1428b.37–40; Dion. Hal. *Ant. rom.* 5.9.2 (the plea did not prove effective); Plut. *Alc.* 16.3; *Themist.* 2.5; Suet. *Aug.* 5; *Nero* 26.1; Quint. *Decl.* 260.2; 267.1, 4; 290.2; 300.2; *Test. Jud.* 11:1; cf. perhaps Aeschines *Tim.* 39; Cic. *Cael.* 20.48.

628. Though few prosecutors granted this concession, it was strategic to appear gentle rather than bitter when pressing home charges, hence winning more favor from the hearers (*Rhet. Alex.* 37.1445b.17–19). Intention was important in arguing for or against guilt (Hermog. *Issues* 61.16–18).

629. *Rhet. Alex.* 4, 1427a.37–40 (LCL, 314). The ultimate form of such a line of argument was the insanity defense (Hermog. *Issues* 58.19–59.3; cf. Eurip. *Herc. fur.*; 2 Cor 11:1).

630. *Rhet. Alex.* 4, 1427a.1–21, esp. 13–14 (ἐξἁμαρτάνοντα).

produced unforeseen consequences (Hermog. *Issues* 65.17–22). The prosecutor could respond that harming the public interest violates the law even if the specific act did not (66.5–7); the defendant might answer by affirming that his or her *intentions* were correct (67.6–8).

The concession of ignorance may resemble the ancient rhetorical technique (cf. discussion at Acts 4:13) of calming an audience *after* a shocking statement (3:14–15).⁶³¹ Its status as a concession would not, however, mean that it would not be taken seriously. Some later Christian writers believed that God even forgave the rulers (Pilate, Herod, and the chief priests) though they continued in unbelief until they merited judgment.⁶³²

II. GOD'S PLAN (3:18)

Having mitigated their guilt based on ignorance (3:17), Peter now further softens the charge of murdering the Messiah by showing that it happened according to God's plan (cf. 2:23; Gen 45:5).⁶³³ Such a claim softened the rhetoric without completely absolving the hearers of their personal and corporate responsibility (cf. Rom 3:7–8; Gen 50:20–21). God's plan had long included rejected deliverers (Acts 7:9, 27–28, 35). Whereas Stephen (in his harsh counteraccusation in 7:52) applies the same verb *προκαταγγέλλω* to Jesus's coming (though he acknowledges that Scripture foretold Jesus's rejection, 7:35–37), Peter applies it (in the only other NT use) to Jesus's suffering. (The phrase "through the mouth of" implies divine inspiration; see comments on Acts 1:16.)

Some Jewish teachers spoke of a suffering Messiah, though it seems likely that, except among Jesus's followers, this tradition stems from the second rather than the first century (see the excursus on the Messiah at Acts 2:36). But the rest of Luke-Acts suggests that Luke draws on patterns of God's suffering servants, especially those rejected by their people, which provides a norm to expect for any of God's servants, with Jesus being God's servant par excellence.

The speech summary notes the support of Scripture proofs, though in its summary form it will develop only a few (esp. 3:22–23). For Luke as well as for the primitive church, the gospel of the kingdom may move beyond the Law and the Prophets (Luke 16:16), but those sources remain valid and sufficient testimony (16:29). The *global* reference to Scripture is frequent Lukan hyperbole (Acts 3:18, 24; 10:43; 17:3; 18:28; 24:14; 26:22; Luke 1:70; 24:44–47), "almost exclusively Lukan in the NT."⁶³⁴ But if it includes patterns and principles as well as explicit prophecies (see comments on Acts 7), Luke may genuinely envision a broad sweep of the biblical message. That the Scriptures foretold Jesus's execution implies not only explicit texts on which Luke draws (such as Isa 53:7–8 in Acts 8:32–33; Isa 53:12 in Luke 22:37) but also patterns of rejected deliverers (Acts 7:9, 27–28, 35), as the following context makes

631. Thus as something like what some Greeks called *epanorthosis* (cf. Rowe, "Style," 141 [citing Basil *Hom. Hex.* 9.7.63C; Aug. *Serm.* 339 c. 1]; Porter, "Paul and Letters," 581 [citing Rom 3:5]; cf. *μεταβολή* in Anderson, *Rhetorical Theory*, 162, 170–71; cf. correction in *Rhet. Her.* 4.26.36), but without retracting or explicitly contrasting what he has said.

632. Theodoret *Comm. 1 Cor.* 176 (Bray, *Corinthians*, 23). Others believed that the chief priests and scribes knew that Jesus was the Christ and hence that they, unlike Pilate and Herod, merited judgment (Oecumenius in *Pauluskommentare* 432 [Bray, *Corinthians*, 23] comparing Luke 20:13–15).

633. One might think that Peter portrayed the ignorance (Acts 3:17) as less excusable in view of prophetic Scripture available to his audience (3:18), but the emphasis is on God's plan.

634. Fitzmyer, *Acts*, 91; cf. similarly Meek, *Mission*, 137–38. Other writers did, of course, cite simply "the prophets" if they had numerous sources in view (e.g., *Tg. Isa.* 30:27; Matt 2:23; 5:17; 7:12; 22:40). Dahl, "Abraham," 141, treats "all the prophets" in Luke 13:28 as "a Lukan addition" (comparing analogous language in 4 Macc 13:17; 16:25).

clear (3:22–23). Whereas Greeks used Fate and oracles as plot-moving devices, fulfillment of biblical prophecies performs an analogous narrative function in Luke-Acts.⁶³⁵

The informed reader of Luke-Acts will hardly be surprised that Peter possesses a repertoire of Scripture relevant to Jesus's death and resurrection; Jesus himself instructed his followers on these matters only a few chapters earlier (Luke 24:46; cf. 24:26). Presumably, such texts include the obvious and more explicit examples cited in Acts (e.g., the servant in Acts 8:32–33), plus texts fitting the model of the righteous sufferer (e.g., 1:20) and the pattern of the rejected deliverer (e.g., 7:37–39). Paul and presumably many other early Christians believed that Jesus fulfilled the most critical biblical promises (e.g., Rom 15:8; 16:25–26; 2 Cor 1:20; Gal 3:14–16), that the Law and the Prophets testify to the gospel message (Rom 3:21), and that the Law supports justification by faith (3:31; 4:3). The Petrine tradition itself indicates that the prophets predicted beforehand the sufferings of Christ, that he would experience glories afterward, and that this message belonged to a future generation (1 Pet 1:10–12).

Many Jewish sages offered an eschatological, hence a messianic, reading of biblical prophecies.⁶³⁶ If, as later rabbis hyperbolically claimed, the prophets spoke only of the “days of the Messiah,” Jesus's coming was the climax of history (see fuller comments on Acts 3:24).⁶³⁷

g. Repentance Would Bring Israel's Restoration (3:19–21)

The call to repentance (Acts 3:19) signals the deliberative purpose of the speech. Luke may display some rhetorical sensitivity in the repetition of various sounds, though the examples here are quite minor by the standards of ancient rhetoric (as might be expected with a mere summary of a first-century Galilean's speech).⁶³⁸ Acts 3:19 opens with verbs coordinated and with -ατε endings,⁶³⁹ 3:20 repeats the ἀπό and προ- sounds (ἀπὸ προσώπου . . . ἀποστείλη τὸν προκεχειρισμένον).⁶⁴⁰

Luke's eschatology is, as noted before, less emphatically futuristic than that of Matthew, Mark, or Paul's Thessalonian correspondence. Whether this difference stems from a delay of the parousia is an open question (see comments on Acts 1:6–7), but many of the passages that speak of the end (10:42; 17:31; 24:25) lack an emphasis on eschatological urgency.⁶⁴¹ The present text, by contrast, reflects an expectation of at least a *potentially* imminent end, an ideology that Luke apparently connects with the earliest Jerusalem church.⁶⁴² The prerequisite for the end, however, appears to be

635. See, e.g., Aune, *Environment*, 131; fuller discussion on Acts 2:23.

636. E.g., all the prophets prophesied about the future era (1 *En.* 108:6) or about Jerusalem's restoration (*Gen. Rab.* 78:3, emended version). Rabbis also reread texts about prophets with an eschatological application (e.g., *Sipre Deut.* 357.5.11).

637. Dodd, *Preaching*, 21. Cf. Le Cornu, *Acts*, 211; Edersheim, *Life*, 309 (citing *b. Sanh.* 99a; *Ber.* 34b; *Šabb.* 63a).

638. As noted in the commentary introduction, ch. 8, Hellenistic historians sought to provide not only rhetoric that was acceptable (on appropriate occasions) but rhetoric that was appropriate to the speakers.

639. For this rhetorical pattern, see Anderson, *Glossary*, 78–79 (cf. 91–92); Rowe, “Style,” 138; Porter, “Paul and Letters,” 581; Lee, “Translations,” 779; Aune, *Dictionary of Rhetoric*, 221. For a fuller example of end-rhyme, cf. *Mus. Ruf.* 6, p. 54.12–13.

640. Cf. also Acts 3:26, with two words beginning with ἀπέστ- and ἀποστ- respectively. This may not be close enough to constitute paronomasia (on which see *Rhet. Her.* 4.21.29–4.22.31; Rowe, “Style,” 132; Poglouff, *Logos*, 106; contrast the definition in Blass, Debrunner, and Funk, *Grammar*, §488), but it is akin in its method. Many restricted this device to epideictic rhetoric (Anderson, *Rhetorical Theory*, 283–85, citing *Rhet. Her.* 4.32; *Cic. Or. Brut.* 37–38, 164–67) and excluded it from passages with pathos (Anderson, *Rhetorical Theory*, 283–85, citing *Dion. Hal. Thucyd.* 48; *Demet. Style* 27–29, 154, 247, 250).

641. See, e.g., Dunn, *Acts*, xxii.

642. Luke may also connect this early idea with the eschatological tradition of tribulation preceding the end (Acts 14:21–23), which would suggest that he preserved traditional eschatology even if he did not emphasize it (Nielsen, “Purpose,” esp. 88).

Israel's repentance (3:19; cf. Rom 11:15, 25–26; Matt 23:39; Hos 14:1–7),⁶⁴³ as often in early Jewish texts. Luke's explanation for the parousia's delay would thus undoubtedly be the delay of Israel's repentance (cf. Rom 11:25),⁶⁴⁴ an idea closely related to the Jewish expectation that the Messiah's coming was being delayed until Israel's repentance. Luke, however, would probably attribute this delay in repentance to the divine purpose of allowing the Gentile mission to be fulfilled first (Acts 1:6–8; cf. Rom 11:11–12, 25, 30–31; Matt 24:14).⁶⁴⁵ In context, the healing, an act of "salvation" through Jesus's name (cf. Acts 4:9, 12), may well prefigure eschatological deliverance.⁶⁴⁶

I. LUKE'S REPENTANCE ESCHATOLOGY (3:19)

If Jesus's coming was the fulfillment of the prophetic promises (3:18), then the era had come when God's eschatological blessing was available to Israel.⁶⁴⁷ Peter's summons to repentance here recalls the same summons in 2:38 (see fuller comments there). This is a call to Israel corporately, like the calls to turn to God in the biblical prophets (e.g., Isa 6:10; 10:21; Jer 3:7; 4:1; Hos 14:1–2; Joel 2:12–13; Zech 1:3–4; Mal 3:7).

The particular term ἐπιστρέφω also could apply to philosophic conversion (Porph. *Marc.* 24.378–79) but appears regularly in the LXX for Israel's repentance (Deut 30:2; Isa 6:10; 31:6; 44:22; 55:7; Jer 3:10, 12, 14, 22; 5:3; 8:5; 24:7; 34:15; Lam 3:40; Ezek 14:6; 18:30; Hos 2:7; 5:4; 6:1; 11:5; 12:6; 14:1–2; Amos 4:6–11; Joel 2:12–13; Hag 2:17; Zech 1:3; Mal 3:7), including in what first-century interpreters would understand as the end time (Deut 4:30; Hos 3:5).⁶⁴⁸ If Luke (or his source) derives the term from a specific biblical source, it is most likely Isa 6:10, which he quotes in his concluding summary justifying the Gentile mission in Acts 28:27. Although Luke uses the term also for regular repentance (Luke 17:4; 22:32), he employs it in a more dramatic sense for conversion (Acts 9:35; 11:21; 15:19; 26:18, 20), at least sometimes as an eschatological work, part of Elijah's mission (Luke 1:16–17).

This turning to the Lord in the prophets invites the Lord's restoration of Israel (e.g., Ezek 36:24–28; Hos 14:1–7; Joel 2:12–32); when applied in an ultimate, eschatological sense, this suggests the end of the age.⁶⁴⁹ It is not surprising that, for Peter, this repentance ushers in the eschatological promises (Acts 3:19–21), including Jesus's return (3:20), as apparently elsewhere in early Christian expectation (Rom 11:25–27, esp. 11:26; Matt 23:39). Luke apparently believes that in the meantime, if Israel refuses to repent and drags out the interim period,⁶⁵⁰ then the very hardness of Israel justifies the Gentile mission, against Jewish objections.

II. REPENTANCE ESCHATOLOGY IN EARLY JUDAISM (3:19)

For much of early Jewish expectation, Israel's repentance was the goal of history (see *Jub.* 1:15–18), and many Jewish sources expected that Israel would return to

643. With, e.g., Tannehill, *Luke*, 260; Glasson, *Advent*, 155. Cf. perhaps Rev 11:13, depending on its interpretation (for support, see, e.g., Keener, *Revelation*, 297; but the passage is not easy).

644. With, e.g., Bruce, *Commentary*, 90.

645. With Munck, *Acts*, 29.

646. Hamm, "Sign of Healing," 163–74 (as cited in Tiede, *Prophecy*, 90); Hamm, *Acts*, 25 (noting Acts 3:24); Gaiser, *Healing*, 217, 224.

647. Parker, "Apokatastasis," 36–37.

648. Cf. also for Egypt (Isa 19:22) and the nations (45:22). Cf. Sir 18:21.

649. The Lord would "return" to Israel's people when they "returned" to him (Joel 2:12–14; Zech 1:3; Mal 3:7; Tob 13:6; cf. Jer 18:8; *Test. Zeb.* 9:7).

650. Particularly if Luke understands Isaiah as saying that the period of welcoming Gentiles lasts until Israel's repentance and restoration ("to make them jealous" [Deut 32:21], Paul would have added [Rom 10:19; 11:11, 14]).

God's law in the last days.⁶⁵¹ Often Jewish teachers, most abundantly exemplified in later rabbinic texts, predicated the end's arrival and Israel's restoration as chronologically contingent on Israel's repentance.⁶⁵² As early as *Jubilees* (second century B.C.E.) we may find the idea (if the text means this) that a generation turning completely to God would usher in the (or an) age of peace (23:26–27). Rabbi Judah praised charity as bringing the final redemption closer;⁶⁵³ some later teachers claimed that caring for the poor would bring the resurrection before the appointed time.⁶⁵⁴ Other rabbis noted that obedience to various other precepts also hastened the Messiah's coming.⁶⁵⁵ Various sins were thought to delay the Messiah's coming, such as insincere converts or marrying girls too young to produce children.⁶⁵⁶ A third-century teacher reportedly claimed that only Hezekiah's failure to praise God for Sennacherib's overthrow delayed the end and prevented Hezekiah from being the Messiah.⁶⁵⁷ Delaying repentance would delay the time of redemption.⁶⁵⁸ An early version of such views certainly affected some Jewish-Christian eschatology; one Jewish Christian opined that if Christians did particular things, the kingdom would come (2 *Clem.* 12.1–6, esp. 12.6).

Not all Jewish teachers agreed on the timing of this end-time scenario. Some Jewish teachers held that the end would come at a fixed time, whereas others believed that Israel's repentance would usher it in.⁶⁵⁹ Thus 4 *Ezra* 7:74 declares that God is patient with the world, not for the sake of its people, but for the sake of God's pre-established times. A very late tradition claims that the Messiah will not come until all the souls predestined to be created have been formed.⁶⁶⁰

There thus existed no unified view: later rabbis collected various views about dates, prerequisites, and signs of the Messiah's coming, alongside warnings against speculating when he would come (*b. Sanh.* 97a–98b).⁶⁶¹ Teachers could combine the options, of course, since God would bring about Israel's repentance whether or not they wished to cooperate.⁶⁶² In a late tradition attributed to a third-century rabbi, God had set an appointed time for the end but would advance it if Israel proved worthy⁶⁶³—for

651. E.g., 4QMMT C 21–22 (after surveying Israel's behavior in history, C 17–21); *Test. Jud.* 23:5; *Test. Zeb.* 9:7; *Test. Dan* 5:9–10; 6:4. The renewal (or "regeneration," Vermes) would come when the spirit of falsehood was purged from the earth at the determined end (1QS IV, 25). For eschatological repentance for many sinners, see 1 *En.* 50:2–5. Differing from an emphasis in some rabbinic eschatology, in *Jub.* 1 repentance may be seen as divinely, rather than humanly, initiated (Lambert, "Redemption").

652. E.g., *Sipre Deut.* 43.16.3 (citing *Jer* 31:21); *y. Ta'an.* 1:1, §7; also *Test. Dan* 6:4; possibly *Test. Mos.* 1:18. Bonsirven, *Judaism*, 117, cites also *Sipre* on *Num* 11:3; see more fully Bonsirven, *Sages*, 180 (noting the prerequisite of repentance in *b. Sanh.* 97b–98a as well as other prerequisites, such as prayer and good deeds); Moore, *Judaism*, 2:350–51 (citing, e.g., *b. Yoma* 86b; *Yalqut Isa.* 59:20); Urbach, *Sages*, 1:669; Klausner, *Messianic Idea*, 427–29. New Testament scholars generally note this pattern as well (e.g., Strack and Billerbeck, *Kommentar*, 1:599ff.; Manson, *Paul and John*, 23–24; Munck, *Acts*, 29; De Ridder, *Discipling*, 118; Talbert, *Acts*, 40).

653. *B. B. Bat.* 10a (ca. 200 C.E.).

654. *Song Rab.* 2:5, §3 (citing third-century R. Johanan in the name of second-century R. Simeon ben Yohai if the attribution is dependable).

655. *Deut. Rab.* 6:7. All Israel's keeping the Sabbath on one day would bring the end (*Exod. Rab.* 25:12, third-century R. Levi if the attribution is dependable, a caveat that must apply to all the later parts of Midrash Rabbah cited in this section).

656. *B. Nid.* 13b (interpreting a baraita).

657. *Song Rab.* 4:8, §3 (attributed to R. Joshua ben Levi).

658. *Pesiq. Rab.* 33:6.

659. Noted also by others, e.g., Le Cornu, *Acts*, 135. See fuller discussion at *Acts* 1:6–7.

660. *Lev. Rab.* 15:1 (attributed to R. Tanhum b. R. Hiyya, possibly third century C.E.).

661. For attempts to calculate the time of the end (on the basis of such matters as sabbatical and Jubilee cycles or end-time invasions), see *b. 'Abod. Zar.* 9b–10a; *Lam. Rab.* proem 21; *Lam. Rab.* 1:13, §41.

662. E.g., *Sipra Behuq. pq.* 8.269.2.3 (using *Ezek* 20:33).

663. *Song Rab.* 8:14, §1 (R. Aha in the name of third-century R. Joshua ben Levi).

example, if Israel repented even for a single day.⁶⁶⁴ Another late story even claimed that Elijah once woke the patriarchs separately for prayers lest, praying together, they “bring the Messiah before his time.”⁶⁶⁵ Whether at an appointed time or before, Israel’s repentance signaled the end.⁶⁶⁶

Luke, like many Jewish contemporaries, seems to have accommodated both approaches; the times were fixed (Acts 1:7), but Israel’s repentance would usher in the end (3:19–20). The earliest Christians apparently expected, or at least hoped, that this repentance of Israel and consequently Christ’s return from heaven would occur almost immediately.⁶⁶⁷ Although many modern arguments for the church’s later disappointment over the delay of the parousia are overstated, it does appear that the earliest Christians connected Jesus’s return with Israel’s repentance and viewed the delay of the latter (for some, providentially allowing the Gentile mission) as the primary factor delaying Christ’s return (cf. Rom 11:15, 25–26).

Where Luke parts company most starkly with other Jewish eschatological views, however, is his Christology.⁶⁶⁸ For Luke, repentance was inseparable from receiving God’s agent (Acts 3:22–23, 26; cf. 2:38; 5:31; 17:30–31; 19:4; 20:21). There was no question of what to do to hasten the Messiah’s first coming; he had come, his people had rejected him, and now they could not expect his return until they repented (cf. Matt 23:39 [with 21:9]; though contrast Luke 13:35; 19:38).

The “wiping away” of sins or guilt appears elsewhere in early Christian texts (Col 2:14), but the term also applies to wiping away tears (Rev 7:17; 21:4) or one’s name from the new Jerusalem’s citizen register (3:5). In the LXX, the verb appears in pleas to blot out the petitioners’ sins (Ps 50:11 [51:9 ET]; 2 Macc 12:42)⁶⁶⁹ and, most significantly, in Moses’s prayer for God to blot out Israel’s sin (Exod 32:32).⁶⁷⁰ Here the forgiveness extends even to the ultimate guilt of participation in their king’s murder (Acts 7:52; Luke 11:47–51).⁶⁷¹

III. REFRESHING AND JESUS’S RETURN (3:20)

The term ἀνάψυξις and its cognates nowhere bear a specifically eschatological meaning in biblical literature (though that literature’s usage signifies, as here, something like “refreshing,” rest or respite from trouble).⁶⁷² Some scholars connect it with the aftermath of the exodus in Ps 66:12, which could be relevant to those seeking a new exodus (Luke 21:24).⁶⁷³ Others note Symmachus’s use for it to replace πνεῦμα in the

664. *Exod. Rab.* 25:12 (R. Johanan); cf. *Song Rab.* 5:2, §2 (R. Levi). The principle of an interim period being necessary because of Israel’s sin was applied even to the Passover (*Mek. Pisha* 5.38ff.).

665. *B. B. Meši’a* 85b (Soncino 492).

666. Cf. also *Deut. Rab.* 3:2.

667. With Dodd, *Preaching*, 33; cf. Goppelt, *Times*, 37.

668. Cf. Bayer, “Eschatology in Acts 3:17–26,” esp. 250.

669. Cf. the prayer in 3 Macc 2:19, employing a cognate verb (BDAG). God wipes away transgressions in Isa 43:25; Sir 46:20; God would spare his holy ones and wipe away their transgressions by discipline, in *Pss. Sol.* 13:10.

670. Also in prayers that the sins of one’s persecutor *not* be blotted out (Ps 108:14 [109:14 ET]; Jer 18:23; cf. a plea to wipe away the memory of the wicked in *Pss. Sol.* 2:17).

671. Chrys. *Hom. Acts* 29 (Martin, *Acts*, 168–69, on Acts 13:38) contends that forgiveness is offered even to the very people who killed Jesus.

672. Exod 8:15 (respite); 23:12 (rest); Judg 15:19; 1 Sam 16:23; 2 Sam 16:14; Pss 39:13; 66:12; Hos 12:8; Jer 49:31; 2 Macc 4:46; 13:11. The proposed alternative to an eschatological reading here (periods of relief from the final suffering; cf. Lake and Cadbury, *Commentary*, 37: “a temporary relief attainable through faith”) has not commended itself to many interpreters (see the critique in Conzelmann, *Acts*, 29). *Apoc. Sed.* 16:5 applies it to a place of refreshing for the righteous after death, but this source is late enough to possibly reflect the influence of some NT language.

673. Rackham, *Acts*, 53 (also connecting this with a new creation in Ps 39:13, but this is difficult to find there).

LXX of Isa 32:15, and they suggest that the repentant here are promised “refreshing” in this age as they are promised the Spirit in this age in Acts 2:38.⁶⁷⁴

That God would “send” Jesus (3:20)⁶⁷⁵ connects his second mission with his first,⁶⁷⁶ for God had already “sent” him to bless Israel first (3:26; cf. Luke 4:18, 26, 43; 9:48; 10:16; 20:13; Acts 10:36).⁶⁷⁷ Like Moses (Acts 3:22–23), Jesus was “sent” by God yet rejected by his people (7:34–35). The term employed here for “appoint” (προχειρίζομαι) indicates God’s sovereign choice (like that of a king [cf. 2 Macc 3:7; 8:9; 14:12]; Dan 3:22; applied to the Lord’s choice of Paul in Acts 22:14; 26:16, the only other NT uses), underlining the claim that rejecting Jesus as Messiah is rebellion against God’s choice for Israel and embracing him is obedience to Israel’s God.

The “face of the Lord” represents his presence (e.g., Gen 3:8; 2 Cor 3:18),⁶⁷⁸ essentially (like his name) his person (Jdt 4:11; 1 Pet 3:12). Judgment comes from there (Num 16:46 [17:11 LXX]; 2 Thess 1:9); God’s face is so awesome as to have dramatic effects (Judg 5:5). Thus one may contrast the negative repercussions of the Lord’s showing his face in some passages (Isa 2:10, 19, 21; 2 Thess 1:9).⁶⁷⁹ The righteous might see God’s face at death or in the coming age,⁶⁸⁰ but at the death of the wicked, God might turn his face from them (Sir 18:24). For God to “hide” or “turn away” his face was a fearful matter.⁶⁸¹

IV. RESTORATION ESCHATOLOGY (3:21)

Luke has already spoken of God’s prophets predicting Jesus “from antiquity” (ἀπ’ αἰῶνος, Luke 1:70) and will use the phrase again (Acts 15:18); although it appears nowhere else in the NT, Luke has probably borrowed it from the LXX.⁶⁸² That heaven would receive Jesus until the period of restoration echoes Ps 110:1, as quoted in Acts 2:34–35: Jesus ascended (1:9–11; 2:33) and would complete his heavenly reign and return only at the time that his enemies would be put under his feet (2:34–35).⁶⁸³

674. Marshall, “Acts,” 546–47 (following W. L. Lane). Although this argument is plausible, one cannot (pace Marshall) treat the restoration as present; in view of Luke’s ἄχρι, Jesus’s return and restoration period are future, not only from Peter’s but from Luke’s standpoint.

675. Cf. God’s sending a king (perhaps Cyrus) in *Sib. Or.* 3.286–87; sending Wisdom (Wis 9:10) or Torah (*Song Rab.* 1:2, §2); the heavenly agent, in Borgen, “Agent,” 144–47. Agents in ancient Jewish sources include Moses (*Sipra Behuq.* pq. 13.277.1.13–14; *’Abot R. Nat.* 1 A, most mss; *Exod. Rab.* 6:3; *Pesiq. Rab Kah.* 14:5; cf. *Jos. Ant.* 4.329; note also *Memar Marqah* 6.3, in Bowman, *Documents*, 241, 243), Aaron (*Sipra Sav M.d.* 98.9.6), the prophets (*Mek. Pisha* 1.87 [Lauterbach, 1:8]; *’Abot R. Nat.* 37, §95 B), or anyone who carries out God’s will (*Sipra Sav M.d.* 98.9.5). See further discussion of the sending motif in Keener, *John*, 310–17, esp. 310–15.

676. The idiosyncratic view that the sending in Acts 3:20 refers to Jesus’s sending to the individual soul (Abbott, *Acts*, 55; cf. John 14:23) cannot fit the context here.

677. The commission started with the prophets (Luke 11:49; 13:34; 20:10–12) and is extended to the Spirit (24:49) and the apostolic witnesses (9:2, 52; 10:1, 3, 16; 11:49; 14:17; 22:35; Acts 26:17) and for the Gentiles (Acts 26:17; 28:28).

678. Sometimes connected with the tabernacle because God’s presence was there (Num 17:9 [17:24 LXX]; Josh 4:5 [as an LXX circumlocution for the ark]; 1 Sam 1:14, 22; 2:11; 21:6; Sir 35:6 [35:4]; cf. Jdt 4:13); it probably represents the Holy Land in 1 Sam 26:20.

679. 3 Macc 6:18; *Sib. Or.* 3.556–57; Rev 6:16; cf. *Jub.* 1:20.

680. E.g., 1 En. 90:35; 4 Ezra 7:98; *CIJ* 1:452, §634 (cf. 1:509, §696); *Sipra Behuq.* pq. 3.263.1.5; *Sipre Deut.* 47.2.2; 310.6.1; *’Abot R. Nat.* 1 A; *Pesiq. Rab.* 12:9; 37:2; in probably Christian material, *Asc. Is.* 9:38. Some Hellenistic sources also place a vision of God at death (Max. Tyre 9.6; 10.3; 11.11).

681. Often, e.g., Pss 13:1; 27:9; 69:17; 88:14; 102:2; 104:29; 143:7; Ezek 39:29; Mic 3:4; Tob 3:6; 4:7; *Jub.* 1:13, 20; 21:22; 1 En. 84:6; CD I, 3–4; II, 8; 4Q216 II, 14; 4Q388a 6 2; 4Q390 1 9; 11QT LIX, 7.

682. See, e.g., Gen 6:4; Ps 118:52 (119:52 ET) (the law); Jer 2:20; 25:5; Sir 44:2 (Israel’s early history); 51:8; later, 3 Macc 5:11. The expression does not imply “eternity,” though it can reach as far back as Adam (Sir 14:17; 1 Clem. 32.4).

683. The δεῖ here suggests divine necessity (see Cosgrove, “Divine ΔΕΙ”), i.e., a fixed eschatological plan. The period referred to in both 3:19 and 21 is presumably the eschatological era ushered in at Jesus’s return (3:20); see Anderson, *Raised*, 226–28 (responding also to alternative positions). The pattern outlined here

The “restoration” spoken of in the prophets is specifically connected with the hope of Israel, whose “restoration” was already mentioned by the disciples in 1:6 (there a form of the verb ἀποκαθίστημι).

Throughout history, some have interpreted the “restoration of all things” cosmically. Some modern interpreters likewise apply it to the restoration of the cosmos.⁶⁸⁴ In the most extreme form of this position, Origen understood this promise as declaring not merely the subordination but the reconciliation of all things (cf. Col 1:20), so that even Satan would be saved (a view deemed heterodox by most later Christians).⁶⁸⁵ Context prevents us, however, from reading Luke’s “restoration of all things” in a universalist manner,⁶⁸⁶ even many within Israel would be destroyed (Acts 3:23; see comments there). Further, the time of restoration, which ends Jesus’s period in heaven, parallels the subjugation of Jesus’s enemies (2:35). But could a cosmic “restoration” remain in view?

Certainly, cosmic eschatology was common, attested most obviously in Zoroastrianism⁶⁸⁷ but also (though less commonly, apart from Stoics) in Greek and Roman views.⁶⁸⁸ Greeks and Romans sometimes believed at least in the restoration of an ancient “golden age” (cf., e.g., Calpurnius Siculus *Eclogae* 1.42–45).⁶⁸⁹ Pliny the Elder and Seneca expected a golden age to follow the world’s destruction.⁶⁹⁰

Scholars have often drawn attention specifically to Stoic language as background for Acts 3:21, noting that Stoics used the term “restoration” for the reoccurrence in each new age of the events of previous ages.⁶⁹¹ Stoics taught that the universe was periodically dissolved in primeval fire,⁶⁹² followed by a “regeneration” (παλιγγενεσία;

also renders impossible the traditional dispensational schema of a pretribulation gathering of saints (see Katterjohn and Fackler, *People*, 68).

684. E.g., Ladd, *Theology*, 333; Fitzmyer, *Acts*, 283.

685. Hall, *Reading Scripture*, 52–53; Fitzmyer, *Acts*, 289 (citing Origen *De principiis* 1.6.1–4; 2.3.1–5; 3.5–6; *Cels.* 8.72; also Greg. Nyssa *Oratio catechetica* 26); Pelikan, *Acts*, 66; see qualifications and discussion in Reasoner, *Full Circle*, 56–57. Cf. the gnostic idea of restoration into the pleroma (*Tripartite Tractate* 122–24, in *NHL* 91); or the later Kabbalah idea of universal salvation at a final Jubilee (Ginsburg, *Kabbalah*, 126–27; the source is thirteenth century).

686. Still more dubious is the allowance that the Bible as a whole could support universal salvation (Pelikan, *Acts*, 66–68), appealing as such a notion is to most of us; apart from soteriological universalism’s serious problem with more explicit passages about eternal destruction, the “restoration” here must refer to the restoration of Israel in Acts 1:6–7 (see discussion below).

687. Collins, “Eschatologies,” 332–33; Finegan, *Religions*, 90. It is possible that this perspective indirectly influenced the Stoic view (Knox, *Gentiles*, 207, is skeptical because of lack of evidence for contact, but contacts with Parthia were many).

688. See Collins, “Eschatologies,” 333.

689. Probably about the first century C.E. See fuller discussion of a primeval golden age in our comments on Acts 2:17. Janus brought newness each year (Statius *Silv.* 4.1.17–20).

690. Downing, “Strands,” doubting that they regarded it as cyclical.

691. E.g., Foakes-Jackson, *Acts*, 29. For Stoics and the end of the cosmos, see Adams, *Stars*, 114–24, including discussion of the cosmic conflagration (116–18) and cycle (118–20); for concise comparison and contrast with Jewish notions, see 128–29. This view contrasts with the eternity of the world in some other systems (Arist. *Heav.* 1.9–10; Lucret. *Nat.* 1.215–64, 958–1115; Cic. *Tusc.* 1.23.54; *Nat. d.* 1.9.21–22; Ovid. *Metam.* 15.252–58; Plot. *Enn.* 2.1.1; Sallustius *Gods* 7, 13, 17; others in Sen. *Y. Nat. Q.* 3.22.10; Aug. *Serm.* 241.7; cf. Pliny *E. N.H.* 2.1.1; 2.6.30; Philost. *Ep. Apoll.* 58; Bodnár, “Eleatic School,” 892), argued against in, e.g., Philo *Creation* 7, 170 (affirming a beginning, esp. against Aristotle; see Chroust, “Fragment”; Chroust also finds fragments of Aristotle in Philo’s *Eternity* [Chroust, “Comments”]); perhaps *Gen. Rab.* 1:5; cf. Wolfson, *Philo*, 1:180, 301–5.

692. E.g., Sen. *Y. Ben.* 4.8.1; Epict. *Diatr.* 3.13.4; Plut. *Comm. Conc.* 31, *Mor.* 1075B; Lucian *Phil. Sale* 14; Marc. Aur. 4.46; Diog. Laert. 9.1.7; cf. Klauck, *Context*, 354; Sevenster, *Seneca*, 33; Knox, *Gentiles*, 1–2; Hippol. *Ref.* 6.4; for different approaches among early Stoics to the conflagration, see Salles, “Ἐκπύρωσις”; cf. Murray, *Philosophy*, 56–57. Some others also utilized the image of the conflagration (Lucan *C.W.* 7.812–15). For periodic destructions of the world order, see Bauckham, *Jude*, 301 (citing esp. Plato *Tim.* 22C–E; Berossus in Sen. *Y. Nat. Q.* 3.29.1; Lucret. *Nat.* 5); Justin *1 Apol.* 20. Even later rabbis allowed earlier worlds, though not a cyclic repetition of history (*Gen. Rab.* 3:7; 9:2; *Eccl. Rab.* 3:11, §1).

cf. Matt 19:28) or restoration (ἀποκατάστασις).⁶⁹³ Because the Stoic view of history was cyclical,⁶⁹⁴ they believed that the gods could predict the future—because it had already happened before (Chrysippus frg. 1192).⁶⁹⁵ Seneca expects the earth to be covered again by the fated deluge (*Nat. Q.* 3.27.1; contrast 2 Pet 3:6–7);⁶⁹⁶ he combines this fate with the cosmic conflagration (*Nat. Q.* 3.29.1; cf. 2 Pet 3:7).⁶⁹⁷ He expects the cosmic deluge to be followed by a re-creation of animals and a humanity free from sin, though it will decline again (*Nat. Q.* 3.30.7).

In a Jewish context, a cosmic transformation must refer to the time of the new creation,⁶⁹⁸ applicable especially to the time of Israel's restoration (cf. *Jos. Ant.* 11.66; Acts 1:6–7; 3:21, 25) and the resurrection (cf. *Jos. Ag. Ap.* 2.218, though cf. also *War* 6.250). Many Jews also expected an ultimate conflagration of divine judgment.⁶⁹⁹ From Isaiah (Isa 65:17; 66:22) on,⁷⁰⁰ cosmic renewal was a familiar Jewish hope.⁷⁰¹ Isaiah had promised a cosmic renovation (65:17; 66:22), a new (or renewed) creation along with (Isa 66:18–19) a new (or renewed) Jerusalem, which came to be echoed frequently in ancient Jewish literature. The eschatological new creation appears frequently in early Jewish hopes.⁷⁰²

Adopting Hellenistic language, Josephus claims that the righteous will receive new life (in traditional Palestinian Jewish terms, the resurrection of the dead) at the time of the “revolution” of things (*Ag. Ap.* 2.218).⁷⁰³ Apocalyptic texts often depicted the *Endzeit* in terms of the *Urzeit*,⁷⁰⁴ a motif not entirely foreign to Roman readers, who had hoped for a restoration of the primeval golden age in the Augustan Pax Romana or other events.⁷⁰⁵ Thus what was ruined in Adam could be restored in the eschatological time.⁷⁰⁶

693. Bruce, *History*, 44; for the world's renewal after destruction, see, e.g., Sen. *Y. Dial.* 6.26.7; Epict. *Diatr.* 2.1.18. This Stoic claim of periodic παλιγγενεσία after conflagration is challenged in Philo *Eternity* 85, 88; Tatian *Or. Gks.* 6. Pliny *E. N.H.* 2.4.13 refers to the annual rebirth of the year.

694. E.g., Epict. *Diatr.* 2.1.18. History repeated itself even down to the details of the same individuals having the same friends in each cycle (Chrysippus *Frg.* 625, in Boring, Berger, and Colpe, *Commentary*, 311). Cf. the less dramatic “cycles” of different races of humanity in some other sources (e.g., *Sib. Or.* 1.65–124).

695. Boring, Berger, and Colpe, *Commentary*, 312. For cyclical destructions, see also Plato *Tim.* 22B.

696. His present-tense verbs probably reflect his Stoic expectation that the catastrophe recurs. On the expectation in 2 Peter, see, e.g., Thiede, “Conflagration.”

697. Bruce, *History*, 44. Cf. also the possibly noncyclical renewal in Pliny and Seneca (Downing, “Strands”). Many cite such Stoic imagery in 2 Pet 3 (see Harrill, “Physics,” 131).

698. See the discussion of Jewish texts addressing transformation of the present world in Arrington, *Aeon Theology*, 98–100. Among the rabbis, see, e.g., citations in Bamberger, *Proselytism*, 201; cf. also later Jewish mysticism (e.g., in Scholem, “Luria,” 578). Cf. Matt 19:28 and comments in Manson, *Sayings*, 216; France, *Matthew*, 287; Sim, “Παλιγγενεσία”; Hagner, *Matthew*, 2:565; for the “resurrection,” see Derrett, “Palingenesia.”

699. E.g., 1QH^a IV, 13; *Sib. Or.* 3.73–74, 83–92, 760–61; 4.43, 161, 176–78; 5.29–31, 211–13; 7.118–31 (cf. Collins in *OTP* 1:388 n. f2); *Jos. Ant.* 1.70; *Gen. Rab.* 39:6; cf. 1 *En.* 1:6.

700. Isaiah's vision included socioeconomic restoration (Kraybill, *Cult and Commerce*, 209–10, citing Isa 65:20–22; 66:12) and certainly Jerusalem's restoration (Isa 65:18).

701. See, e.g., Black, *Scrolls*, 135–36; Gaster, *Scriptures*, 23; McNamara, *Judaism*, 112–13.

702. E.g., *Jub.* 1:29; 4:26; 1 *En.* 45:4–5; 72:1; 91:16; *Sib. Or.* 5.211–12; *L.A.B.* 3:10; 2 *Bar.* 32:6; 44:12; 57:2; *Deut. Rab.* 11:10; cf. 4 *Ezra* 6:16; 8:52; perhaps *Gen. Rab.* 1:13. On strands of renewed creation teaching relevant to Rev 21, see Stephens, “Destroyers”; idem, *Annihilation* (note esp. Second Temple materials in 46–116).

703. Naturally, Philo and his imitators could exploit this Hellenistic language (Philo *Eternity* 85; *Mos.* 2.65).

704. Cf., e.g., Rev 22:1–3; 1QH^a XIV, 16–17; 4 *Ezra* 8:52–54; 9:5–6; *Test. Levi* 18:10–12; *Test. Dan* 5:12; 2 *En.* 8:3; *m. Ab.* 5:20; *b. Tamid* 32b; *Tem.* 16a; *Yoma* 87a; *Song Rab.* 4:12, §3; see further Rissi, *Time*, 4; Arrington, *Aeon Theology*, 77–81.

705. Cf., e.g., Calpurnius Siculus 1.42–45; cf. Winslow, “Religion,” 239.

706. Le Cornu, *Acts*, 208 (citing *Gen. Rab.* 12:6); Scroggs, *Adam*, 27–31 (citing, e.g., *Apoc. Mos.* 13:2–4; 39:2); see also *Num. Rab.* 13:12; perhaps 1QS IV, 23; CD III, 20; 1QH^a IV, 27.

This conceptualization may appear most strikingly in Essene thought. The Qumran scrolls speak of creation's renewal⁷⁰⁷ and (in 1QH^a XI) appear to confirm the later report of Hippolytus that the Essenes envisioned a future cosmic conflagration at the end of the age.⁷⁰⁸ Some scholars have also compared the restoration of Adam's former glory in the Qumran scrolls.⁷⁰⁹ Early Christians also spoke of creation's liberation (Rom 8:21–22) and a new creation (2 Pet 3:13; Rev 21:1; cf. Isa 65:17; 66:22; 2 Cor 5:17), a "regeneration" (Matt 19:28). But such factors establish only the *possibility* that Acts 3:21 envisions cosmic renewal; they do not demonstrate that this is the nearest frame of reference for interpreting the phrase. Other factors in fact suggest a quite different meaning.

The terminology does not require us to narrow the meaning to its occasional Stoic usage; in fact, Stoics themselves could employ such language in different ways.⁷¹⁰ Nor need the term refer to a once-for-all (as opposed to cyclical) return to the beginning of creation, following the common apocalyptic principle of the end time's reflecting the beginning time.⁷¹¹ The term appears in papyri for various kinds of repairs of temples and may even function as "the establishment of what was predicted rather than the restoration of an earlier condition."⁷¹² Significantly, when used for restoration, it can apply to Jerusalem's restoration (Jos. *Ant.* 11.63), which fits the only other usage of even a cognate term in Luke's own writings (Acts 1:6).

In view of the cognate usage in 1:6 and the text's claim that the object of restoration is what all the prophets spoke about, the restoration of Israel is the likeliest interpretation.⁷¹³ Israel's restoration appears repeatedly in the biblical prophets (Amos 9:14; Ezek 39:25; see comments on Acts 1:6), a significant point here given that the restoration is of what "the prophets" predicted (Acts 3:21).⁷¹⁴ Granted, they also prophesied in terms of cosmic renewal (e.g., Amos 9:13; Isa 65:17; 66:22); but this renewal was always connected in context with Israel's restoration, and it included the nations' destruction or subjugation as often as their conversion. Jewish literature frequently commented on cosmic renewal, but Israel's restoration was always a part of this hope (even, in some sense, in Rev 21:1–2, which features a new Jerusalem alongside the new creation, following Isa 65:17–18; 66:22–23).⁷¹⁵ Because Peter nowhere qualifies the Jewish expectation that this restoration would occur at the end of the age, it seems likely that this is what he has in mind.

h. The One Predicted by Moses and the Prophets (3:22–24)

Presumably expounding the sort of texts learned from Jesus in Luke 24:44–47, Peter has portrayed Jesus as "servant" (Acts 3:13), "holy and righteous one" (3:14),

707. 1QH^a XIX, 13; perhaps 4Q225 1 7.

708. Cross, *Library*, 94 (citing Hippol. *Ref.* 9.27; 1QH^a XI, 19–36, esp. 29–31); Black, "Essenes," 175; idem, *Scrolls*, 142. It is interpreted figuratively by Pryke, "Eschatology," 4:54–55, because it appears nowhere else in the Scrolls, but cf. 1QS II, 7–8; CD II, 5–6; 1QpHab X, 3–5. 1QH^a XI has been compared with Stoicism and the *Sibylline Oracles* (Gaster, *Scriptures*, 22, 25) and with 2 Pet 3:7 (Barnard, "Judgment").

709. Black, *Scrolls*, 135.

710. E.g., the material part of a human reverts (ἀποκαταστήναι) to its original elements at death (Epict. *Diatr.* 4.7.15).

711. A view defended by Mattill, *Last Things*, 5–6. On the connection of *Endzeit* and *Urzeit* in apocalyptic literature, see comments above.

712. Lake and Cadbury, *Commentary*, 38; for various uses, cf. Carter and Earle, *Acts*, 54.

713. Also, e.g., Witherington, *Acts*, 187; Wright, *Ethics*, 206 (adding the more controversial Jubilee principle). Luke's language in 3:19–21 evokes particularly Israel's restoration and the messianic age; see in detail Lennartsson, *Refreshing*; for the restoration theme in Luke-Acts against the background of early Jewish expectations, see also Fuller, *Restoration*.

714. On Israel's restoration, especially through the lens of Isaiah, see Pao, *Isaianic Exodus*, 111–46.

715. Cf., e.g., Buchanan, *Consequences*, 138–39; Tiede, *Prophecy*, 90.

“founder” of new life (3:15), and “Christ” (3:18, 20). Now he turns to an explicit biblical citation (3:22–23) and a final global summary (3:24) to proclaim Christ: Jesus fulfills what both Moses and the prophets spoke and hence is the epitome of Israel’s hopes for the promised new era of blessing (cf. 3:19–21, 25–26).

I. THE PROPHET LIKE MOSES (3:22)

Orators regularly used citations in their proofs; the speech, which surrounds its eschatological summons with global allusions (3:18, 21) and will soon offer another global allusion (3:24), now develops one text in particular, this one a reading from the “law” proper. The quotation’s emphatic repetitions of “you” or “your” help underline God’s concern for Israel (3:25–26).

Peter presented Jesus not only as the Messiah but also as the prophet like Moses.⁷¹⁶ This idea is developed more fully in 7:37 (see fullest comment there).⁷¹⁷ Moses was not only a prophet but a divinely appointed leader of the nation (once even “king,” Deut 33:5).⁷¹⁸ Prophetic endowment was the ideal for any ruler of Israel (cf. 1 Sam 10:6, 11; 16:13; Acts 2:30) but modeled only by a few (Acts 2:30; Judg 4:4; 1 Sam 7:15–17). A prophet “like Moses” was thus a prophet of great rank (Deut 18:19; cf. 33:4–5) with special intimacy with God as well as wonders and signs (34:10–12; Acts 7:36; cf. 2:22). The most important connection offered in Acts, however, is that he was a prophet rejected by his people (Acts 7:35–37); Deuteronomy itself promised a prophet from among the people (Deut 18:15, 18) and warned against disobeying him (18:19).

Moses was central in Jewish tradition. Even many Gentiles knew of Moses’s centrality to Judaism,⁷¹⁹ so that he was “by far the best-known figure of Jewish history in the pagan world.”⁷²⁰ Although Moses’s behavior was accepted as the standard for all subsequent prophets,⁷²¹ this “prophet like Moses” was usually understood not as one among many but as a special successor to the greatest prophet (see discussion below).⁷²² Moses was widely associated with prophecy, as the most preeminent of prophets (*L.A.B.* 35:6).⁷²³ He also functioned as a sort of ruler,⁷²⁴ a role sometimes emphasized alongside his prophetism.⁷²⁵ Some later rabbis said that Moses would lead Israel⁷²⁶ and teach Torah⁷²⁷ in the coming world.⁷²⁸ He functioned as mediator of God’s supreme revelation;⁷²⁹ various early Jewish texts presented Moses as a

716. With, e.g., Hamm, “Acts 3:12–26.”

717. Moessner, “Luke 9:1–50,” argues also for a new-Moses and new-exodus comparison in Luke 9.

718. Philo emphasized the combination of prophet and king in Moses (see Meeks, *Prophet-King*, 115); probably Hasmonean rule had popularized this combination.

719. For law giving, see Gager, *Moses*, 25–112; for the exodus, 113–33. Moses appears as a prophet even in magical texts (e.g., *PGM* 5.107–9).

720. Gager, *Moses*, 18.

721. Cf. *Sipre Deut.* 83.1.1. In *Sipre Deut.* 306.24.2, Moses is “father” of the prophets.

722. Moses and Isaiah were the greatest prophets (*Deut. Rab.* 2:4; but cf. 7:8, which grants the title to Ezekiel).

723. Moses is the chief prophet in the Qumran scrolls (Meeks, *Prophet-King*, 173); in the rabbis, see Meeks, *Prophet-King*, 198–200; in Philo, 125–29; in Josephus, 137–38; in Samaritan literature, 220–26.

724. Deut 33:5; cf. the name in *L.A.B.* 9:16; Joshua as ruler in 20:5. For Moses’s kingship, see esp. Meeks, *Prophet-King*, 181–96; in Philo, 107–17 (despite lack of Hellenistic precedent for combining king and prophet); in Samaritan literature, 238, 236 (rarely); Ezekiel the Tragedian in Euseb. *P.E.* 9.29 (Lane, *Hebrews*, liv; Meeks, *Prophet-King*, 147–50). He is never king in Josephus (Meeks, *Prophet-King*, 134–36; not surprising given his apologetic) but is a commander (133–34).

725. E.g., Philo *Rewards* 53.

726. *Deut. Rab.* 9:9.

727. *Exod. Rab.* 2:6.

728. For Moses’s eschatological role, see Meeks, *Prophet-King*, 246–50.

729. E.g., *Exod. Rab.* 28:1; Jeremias, “Μωυσης,” 852–53; cf. Van Henten, “Moses as Messenger.”

continuing advocate or intercessor for Israel,⁷³⁰ as he had been in the Bible (Exod 32:32; Jer 15:1). He was the most righteous of all people⁷³¹ and, contrary to 1 Kgs 3:12, he was also the wisest of all people in history.⁷³² Commenting on Exod 7:1, some traditions used virtually divine language for him the way many Greeks had divinized Plato and other philosophers.⁷³³ For further discussion of Moses haggadah, see comments on Acts 7:20–22.

More to the point here are traditions about the new Moses.⁷³⁴ Scholars often compare especially the Samaritans, as best as we can reconstruct their views from later sources.⁷³⁵ Samaritans apparently (if our sources reflect this early period) rejected prophets (or at least the Jewish tradition of prophets) between Moses and the final prophet, a prophet like Moses—the Taheb or “restorer” (cf. comments on the restoration in Acts 3:21).⁷³⁶ Despite Luke’s interest in the Samaritans, it remains doubtful that his audience possessed detailed knowledge of their beliefs; their writings, however, may preserve a more widespread tradition of exegesis on the question of the prophet like Moses.⁷³⁷

There was a widespread expectation of an end-time prophet (a new Elijah, Mal 4:5; Sir 48:10), perhaps at least sometimes conjoined with Deut 18 (cf. Mark 9:4, 7;⁷³⁸ John 1:21).⁷³⁹ “The Prophet” like Moses highlighted in some ancient Jewish literature could point to Elijah,⁷⁴⁰ though, for Luke-Acts, Jesus is one greater than Elijah (see comments on Acts 1:8–11). Early Christians regularly compared Christ to Moses, while asserting the former’s superiority (e.g., John 1:14–18; 5:45–47; Heb 3:3–6).⁷⁴¹

Scholars, however, point out especially the expected prophet of the Qumran scrolls, who is at least sometimes linked with the prophet-like-Moses text of Deuteronomy.⁷⁴²

730. E.g., *Jub.* 1:19; *Philo Mos.* 2.166; *4 Ezra* 7:107; *L.A.B.* 12:8–9; *Test. Mos.* 11:17; *Sipre Deut.* 343.1.2; as an intermediary in other respects, e.g., *Test. Mos.* 1:14; 3:12; *Pesiq. Rab.* 6:2; 15:3. Pardon comes through Moses in 4QDibHam^a 1–2 II, 7–12 (in Vellanickal, *Sonship*, 30). In greater detail, for nonrabbinic Jewish literature, see Meeks, *Prophet-King*, 118, 137, 160–61; in rabbinic literature, 200–204; in Samaritan tradition, 254. Joshua intercedes for Israel in *L.A.B.* 21:2–6.

731. E.g., *Mek. Shir.* 9.34ff. (Lauterbach, 2:69); *Pesiq. Rab Kah.* Sup. 1:20.

732. *Jos. Ant.* 4.328; *Sipre Deut.* 306.24.2. Later the Qur’an portrays him not only as a prophet (Qur’an 19.51) but also as the greatest human of his era (7.144).

733. For Philo, see esp. Meeks, *Prophet-King*, 103–6. In one Amoraic tradition, perhaps with tongue-in-cheek hyperbole, God even allowed Moses to be stronger than God (*y. Ta’an.* 4:5, §1)!

734. Some think that *Psalms of Solomon* also assimilates the Messiah to Moses (Patte, *Hermeneutics*, 173).

735. E.g., Scharlemann, *Stephen*, 73; Simon, *Stephen and Hellenists*, 61; Bruce, *Time*, 39.

736. Bruce, *History*, 37–38; idem, *Time*, 39; on this reading, the prophetic figure of *Jos. Ant.* 18.85–87 might be viewed as the Taheb. On the Taheb (a Mosaic, not Davidic, figure), see *Memar Marqah* 2.40.28; 4:12 (in Boring, Berger, and Colpe, *Commentary*, 264–65); Teeple, *Prophet*, 63–64; MacDonald, *Samaritans*, 362–63; Bruce, *History*, 37–38; Longenecker, *Christology*, 34; Brown, *John*, 1:172; Dexinger, “Taheb-Vorstellung”; see further Keener, *John*, 610, 619–20.

737. Gaster, *Scriptures*, 393, notes that the Samaritans used the same *testimonia* for the Taheb as appear in Qumran *testimonia* (cf. 444–46, citing Deut 5:25–26; 18:18–19; Num 24:15–17; Deut 33:8–11; Josh 6:26).

738. Many commentators think that “hear him” in the heavenly voice may evoke Deut 18:15 (see Mauser, *Christ in Wilderness*, 114; Davies, *Sermon*, 24; Lane, *Mark*, 321; Bruce, *Time*, 40; Longenecker, *Christology*, 36; Gundry, *Matthew*, 343; Young, *Jewish Theologian*, 211; Keener, *Matthew*, 439).

739. See *Sipre Deut.* 175.1.3; discussion in Aune, *Prophecy*, 124–25; Keener, *John*, 434–37.

740. Cf. Robinson, *Studies*, 32.

741. Cribbs, “Agreements,” 55, emphasizes the parallel between John’s and Luke’s use of the prophet like Moses. In John, see, e.g., Keener, *John*, 436–37; Glasson, *Moses*, passim; on Moses Christology in early Christianity more generally, see, e.g., Longenecker, *Christology*, 32–38 (cf. 72–73).

742. See, e.g., Appold, *Motif*, 72; Marshall, *Acts*, 95; Witherington, *Acts*, 188; Dunn, *Acts*, 47; Barrett, *Acts*, 208; citing 1QS IX, 10–11; 4QTest [= 4Q175] 5–7; Marshall, “Acts,” 548; cf. also Xeravits, “Moses Redivivus” (suggesting also 11QMelch II, 15–21). Some also mention 1 Macc 14:41, and Mosaic-type attempted prophets in Josephus (e.g., *Ant.* 20.97). Poirier, “Return,” thinks that Qumran texts envisioned an eschatological prophet and an eschatological priest, corresponding to Moses and Elijah.

The Qumran scrolls do reveal expectation of an eschatological prophet (1QS IX, 10–11; 11QMelch II, 15–21),⁷⁴³ though they may also apply it (and Deut 18:15–18) to the Teacher of Righteousness, who may have originally filled this role for them.⁷⁴⁴ That a Qumran scroll links the Mosaic prophet (4Q175 I, 5–8) with the star from Jacob (Num 24:15–17; 4Q175 I, 9–13) indicates that some Jewish people associated this mission with the future anointed ruler.⁷⁴⁵

At least from the vantage point of Deuteronomy, the prophet of Deut 18 points toward the future, unfulfilled at the time of Deuteronomy's writing (34:10).⁷⁴⁶ Although the rabbis apparently rarely interpreted Deut 18:15–18 eschatologically,⁷⁴⁷ many compared the future redeemer to the former one—that is, to Moses.⁷⁴⁸ The hidden Messiah tradition often connects the Messiah with Moses, who was also hidden before he was revealed.⁷⁴⁹ In some texts, the Messiah would lead home the exiles of Israel⁷⁵⁰—that is, in a new exodus. The new exodus expectation persisted as late as the rabbis⁷⁵¹ and was already present in so-called Deutero-Isaiah.⁷⁵²

The command to “heed” the prophet in “everything” provided him great authority comparable to that of the first Moses. Heeding this Mosaic prophet would bring deliverance from enemies and from God's anger (4Q375 I, 1–4; presumably this implies the converse as stated in Acts 3:23). Later rabbis allowed that in an emergency situation he could even contravene some laws in Torah, as Elijah did (*Sipre Deut.* 175.1.3). The command to “heed” Jesus, probably an allusion to Deut 18:15, already appears in Luke 9:35 (following Mark 9:7).⁷⁵³

The “raising up” of this prophet invited a wordplay with the resurrection (cf. Acts

743. See, e.g., Xeravits, “Moses Redivivus.” In 4Q377 1 II, 5, Moses is “anointed” (but at Qumran this need not mean the anointed king).

744. Cf. Aune, *Prophecy*, 126 (citing 1QS IX, 10–11; 4QTest 1–20 [see esp. 4QTest 1–8] and numerous scholars). Among others, Teeple, *Prophet*, 51–52, thinks that Qumran viewed its Teacher of Righteousness as the prophet like Moses.

745. This does not suggest “literary dependence so much as that Qumran and NT authors breathed the same air of eschatological expectation” and used the same Bible (Brooke, “4Q175,” 1207). Although the text is “messianic” (see, e.g., Villalón, “Deux messies,” 62–63), its messianic figure might not be *the* Messiah in the usual early Jewish sense; the *testimonia* probably address the multiple messianic figures held by the sect (cf. Vermes, *Scrolls*, 247–48).

746. Certainly Deuteronomy does not regard Joshua (cf. Deut 34:9) as the “prophet like Moses” (see 34:10), and those who argue for a Deuteronomistic history would not see the promise as fulfilled even by their own era (again, see 34:10). Holladay, “Background,” and idem, “Jeremiah,” suggests that Jeremiah viewed himself in these terms; others compare Elijah (e.g., Konkel, *Kings*, 303). Many prophets may have followed aspects of Moses's model or calling, but Moses remained special (Num 12:6–8; Deut 34:10–12).

747. Aune, *Prophecy*, 125–26.

748. E.g., *Pesiq. Rab Kah.* 5:8; *Num. Rab.* 11:2; *Ruth Rab* 5:6; *Eccl. Rab.* 1:9, §1; cf. *Pesiq. Rab Kah.* 27:5; *Eccl. Rab.* 3:15, §1; *Tg. Neof.* on Exod 12:42 (but *Tg. Ps.-J.* on Exod 12:42 is simpler); Jeremias, “Μωυσης,” 857–62; Mauser, *Christ in Wilderness*, 55–56. Rabbis also compared others to Moses (e.g., *Gen. Rab.* 100:10).

749. Commentators cite *1 En.* 48:6; *4 Ezra* 13:52; *Justin Dial.* 8.4; 110.1; for rabbinic documentation, see Vermes, *Jesus the Jew*, 137–39. See further *1 En.* 62:7; *Pesiq. Rab Kah.* 5:8; *Num. Rab.* 11:2; *Ruth Rab.* 5:6; *Song Rab.* 2:9, §3; *Pesiq. Rab.* 15:10; Glasson, *Moses*, 103. Much of the rabbinic attestation is late (Smalley, *John*, 65, declares that the “hidden Messiah” appears only in rabbinic sources, but this is true only of its developed form), but the basic tradition in earlier sources surely does not derive from inferences from John or from Justin's *Dialogue with Trypho*.

750. E.g., *Pesiq. Rab.* 31:10.

751. See, e.g., *Pesiq. Rab Kah.* 27:5; *b. Ber.* 12b; *y. Ber.* 1:5, §8; *Exod. Rab.* 1:5; 3:4; 15:11; 19:6; 32:9; *Lev. Rab.* 27:4; *Pesiq. Rab.* 52:8; cf. *t. Ber.* 1:10; *Eccl. Rab.* 2:15, §2; probably in CD V, 19 (but cf. VII, 21); 4Q389 frg. 2. See more fully Longenecker, *Christology*, 39–41; cf. Qumran imagery in Hatina, “Exile,” 349.

752. See, e.g., Glasson, *Moses*, 15–19; cf., e.g., Isa 12:2 (with Exod 15:2); 40:3; 52:4, 12; 63:11–14; Hos 2:14–15; 11:1, 11. On exodus typology in the OT, see most extensively Daube, *Exodus Pattern*, passim.

753. Luke emphasizes “heeding” Jesus (cf., e.g., Luke 5:1, 15; 6:18, 47, 49; 8:8, 10, 18, 21; 10:16, 24, 39), though this is neither unique to Luke nor necessarily based on an allusion to Deut 18.

2:24, 32; see esp. 3:26; 13:33–34).⁷⁵⁴ This need not connect the resurrection with traditions of Moses’s survival, but they may bear mention. Because of the special circumstances of Moses’s burial (Deut 34:6),⁷⁵⁵ later traditions claiming even that he did not die⁷⁵⁶ arose at least as early as the first century (Jos. *Ant.* 4.326;⁷⁵⁷ see comments on Acts 1:9–11).

II. PUNISHMENT FOR REJECTING HIM (3:23)

Peter did not need to quote this further line from Deuteronomy (Deut 18:19, adapted in light of other texts) for a solely christological point, which was already established in the “prophet like Moses.” His point is instead soteriological, a warning concerning the consequences of nonrepentance. God threatens punishment of those who do not heed the prophet in Deut 18:19; Peter implies the meaning of that punishment by adding words from other texts about being “cut off” or “destroyed” (esp. Lev 23:29). That the unrepentant will be “destroyed” from among the people shows that the promise to Israel as a whole does not guarantee the salvation of individual Israelites who fail to repent. The “restoration of all things” (Acts 3:21) refers to Israel’s restoration (1:6–7), not to the sort of universalist soteriology accepted by Origen and others. Other Jewish people recognized that whereas Israel as a whole would be saved, many individual Jews would be lost.⁷⁵⁸ The vision of the Qumran scrolls may be closest to Acts here, yet furthest from Origen’s universalism: not only the Gentiles but unrepentant Jews (those who did not join the elect community represented at Qumran) would be destroyed.

Blending texts was common, and this passage certainly follows the practice: “every soul” being “cut off” clearly echoes a familiar phrase from the Pentateuch. The verb is common in the LXX and is frequently conjoined with “soul” or “person,” for example, in punishing those who break the Abrahamic covenant by rejecting circumcision (Gen 17:14; cf. Acts 3:25; 7:8), breaking the Sabbath (Exod 31:14), performing ritual sacrifice outside the tabernacle (Lev 17:4), eating food with blood in it (17:14; cf. Acts 15:20), engaging in sexual abominations (Lev 18:29), rejecting Passover and unleavened bread (Exod 12:15, 19; Num 9:13), and other offenses (Lev 19:8; 22:3; Num 19:20)—in short, any deliberate rebellion against the Lord (Num 15:30). Seven of these texts specify that one is cut off from the “people” (λαός, not including synonyms; Exod 31:14; Lev 17:4; 18:29; 19:8; 23:29; Num 9:13; 15:30). Peter’s speech may thus allude to the language of just punishment for any act of rebellion against the Lord.

It is, however, noteworthy that the exact phrases (πᾶσα ψυχή ἥτις and ἐξολεθρευθήσεται ἐκ τοῦ λαοῦ) appear in Lev 23:29 and only there.⁷⁵⁹ This could

754. See Dupont, *Salvation*, 155; Ellis, “New Testament Uses Old,” 202; Dunn, *Acts*, 47; esp. O’Toole, “Observations on *anistēmi*.” Ancient rabbis and orators used wordplays to advance arguments (see, e.g., Demosth. *Ep.* 3.28; Diog. Laert. 6.2.55; 6.2.68; Keener, *Paul*, 54n101; idem, *John*, 537, 782; for discussion in the rhetorical handbooks, see Anderson, *Glossary*, 59–60 [cf. also 81–82]; Rowe, “Style,” 132).

755. Followed by the more conservative line of tradition, e.g., *1 En.* 89:38; *Test. Mos.* 11:8; *Sipre Deut.* 338.2.1; *b. Sofah* 13b; *Tg. Neof.* 1 on Deut 33:21. On Moses’s unusual death, cf. also *Deut. Rab.* 11:10.

756. A view in *Sipre Deut.* 357.10.5; perhaps in *Abot R. Nat.* 12 A. Scholars also cite Clem. Alex. *Strom.* 6.15.

757. Cf. Philo *Sacr.* 8–10. Elsewhere Josephus implies the deathlessness of Elijah and Enoch, while omitting Elijah’s ascension per se (*Ant.* 9.28). Rev 11 is often construed to play, literally or symbolically, on a return of Moses along with Elijah (e.g., Glasson, *Moses*, 69; Frost, *Revelation*, 212; Beasley-Murray, *Revelation*, 183; Ford, *Revelation*, 178; Talbert, *Apocalypse*, 45).

758. E.g., *m. Sanh.* 10:1; *b. Hag.* 15b; *Sanh.* 90a; *Num. Rab.* 14:1; *Song Rab.* 1:1, §5; cf. Rom 11:26 (in the context of cutting off, 11:17, 19–20); for longer lists, *t. Sanh.* 12:9; *b. Roš Haš.* 17a. In particular, most teachers consistently excluded Manasseh (2 *Bar.* 64:7–9; *Num. Rab.* 14:1), though a minority demurred (*b. Sanh.* 103a); some salvaged even Jeroboam son of Nebat (*Pesiq. Rab.* 1:5) and others (*b. Hag.* 27a; *Erub.* 19a). Akiba reportedly even denied the ten tribes, but his colleagues refuted him (*b. Sanh.* 110b).

759. That Luke employs a composite citation of Deut 18:19 and Lev 23:29 has been noted by others (e.g., Teeple, *Prophet*, 86; Gaventa, *Acts*, 89; Marshall, “Acts,” 547). Despite targumic parallels (cited by Waard, “Acts

indicate a random adaptation of one passage's wording to allude to the entire series of phrases, retaining its general condemnation of rebels. It may, however, suggest a deliberate allusion. Bock thus proposes that the language alludes not only to the rejection of Moses (Deut 18:15, 19 LXX) but also to those who reject the Day of Atonement (Lev 23:29), which would suggest that the idea of Jesus's death as expiatory is hinted at.⁷⁶⁰

III. ALL THE PROPHETS ANNOUNCED THESE DAYS (3:24)

By citing "all" the prophets, Peter's speech develops the claim of Acts 3:21 hyperbolically, a technique familiar in the rhetoric of both the Greco-Roman world and traditional Jewish sages.⁷⁶¹ We are also familiar with Luke's narrative "all" meaning "many," as in Josephus (e.g., *War* 2.515–16, where "all" the men had gone, but fifty were discovered in hiding).

Although prophecy appears earlier (including Peter's citation of Moses in Acts 3:22–23), Peter starts with the prophetic movement initiated by Samuel, who was followed by a succession of prophets.⁷⁶² Scripture records no explicitly messianic prophecy of Samuel, but his prophecies about the establishment of David's kingdom would be relevant.⁷⁶³ Pertinent prophecies by Samuel or within the work associated with him may include such passages as 1 Sam 2:10 (the anointed king); 12:3, 5 (referring to Saul); 12:22 (God's faithfulness to Israel); 16:1–13 (David's anointing); and 2 Sam 3:18 (David's call against the Philistines). Positive prophecies about Israel's anointed king could be fulfilled par excellence in the messianic Son of David (cf. Acts 1:16; 2:25–36; 4:25; 13:33–37; 15:16).

Because Luke is interested in patterns in Scripture, some other images from the section of Scripture associated with Samuel are relevant: just as Luke implicitly compares Zechariah and Elizabeth to Abraham and Sarah (Luke 1:7), he compares Jesus's mother to Hannah (2:46–55; cf. 1 Sam 2:1–10). But mention of Samuel is especially important because he is the greatest prophet-judge after Moses and fathered the prophetic movement in a special way (cf. 1 Sam 3:1; 10:5; 19:20). Samuel was also the prophet where Samaritan tradition parted company with Israel: the Samaritans apparently believed that Eli, Samuel's predecessor as Israel's leader, inaugurated the era of divine displeasure with Israel, which had remained till the present era.⁷⁶⁴

Later teachers often claimed that the prophets prophesied for the end of the age and the messianic era.⁷⁶⁵ Using hyperbole that exceeds Luke's here, a later rabbi (R. Hiyya bar Abba, in the name of third-century R. Johanan) could even claim that all

3, 22.23 and Text"), the basis is clearly the LXX; the Targumim postdate the LXX and may reflect it at points. Nevertheless, the LXX of Deut 18:19 does resemble the early Palestinian text found in 4QTest 7 (Fitzmyer, *Acts*, 289, following Waard, "Acts 3, 22.23 and Text").

760. Bock, *Proclamation*, 191–93. He finds here the Jewish concept of atonement through suffering, present in the Akedah (which in turn fits Acts 3:25, which he sees as alluding to Gen 22:18; 12:3 [194]).

761. See, e.g., Arist. *Rhet.* 3.11.15; *Rhet. Alex.* 11, 1430b.16–19; *Rhet. Her.* 4.33.44; Cic. *Or. Brut.* 40.139; Demet. *Style* 2.124–27; 3.161; Quint. *Inst.* 8.6.73–76; examples in, e.g., Pliny *Ep.* 5.16.1; Marcus Caesar to Fronto in Fronto *Ad M. Caes.* 2.3.3; Philost. *Vit. Apoll.* 8.7; *Hrk.* 48.11; *m. 'Ab.* 2:8; *'Abot R. Nat.* 36A; see further Anderson, *Glossary*, 122–24; Rowe, "Style," 128. Longenecker, *Exegesis*, 98, finds here a pesher view of the OT similar to Qumran. Celsus attacked Christian arguments from OT prophecy (Cook, *Interpretation*, 72–76).

762. For prophetic succession, see, e.g., Heschel, *Prophets*, 472; Scott, *Relevance*, 57. Rabbi Judah the Prince reportedly called Samuel the greatest of prophets (*y. Hag.* 2:1, §2; cf. Daube, *New Testament and Judaism*, 13); but few texts repeat this view, and it probably constituted merely one opinion among many (cf., e.g., *Deut. Rab.* 2:4; 7:8).

763. Bruce, *Commentary*, 93 (citing 1 Sam 13:14; 15:28; 16:13; 28:17; cf. 2:10).

764. Bowman, *Documents*, ii.

765. E.g., *b. Šabb.* 63a; *Tg. Jon.* on 2 Sam 23:1, 3; on 1 Kgs 5:13.

the prophets prophesied only of the messianic era.⁷⁶⁶ But sages could also claim that God spoke to all the prophets only because of Israel⁷⁶⁷ or that they all prophesied concerning Jerusalem.⁷⁶⁸ Tradition attributes especially to R. Hiyya bar Abba the claim that prophets prophesied only concerning the messianic era; yet this same rabbi, again in the name of R. Johanan, also claimed that “all the prophets prophesied only on behalf of one who gives his daughter in marriage to a scholar” and otherwise serves scholars.⁷⁶⁹ The same rabbi reportedly further claimed that they “prophesied only for repentant sinners.”⁷⁷⁰ Elsewhere it was said that all the prophets predicted that Jerusalem will be rebuilt.⁷⁷¹ In other words, some sages used hyperbole to describe any subject they believed the prophets must have addressed at length.⁷⁷² Although later rabbis referred to a future rather than a past Messiah, Urbach thinks that their messianic midrashim apply a christocentric hermeneutic similar to the one that he finds in the Gospels: they sought “to find the fulfilment of all the Scriptures and visions containing Messianic descriptions.”⁷⁷³ Later rabbis did not likely borrow these ideas from early Christians,⁷⁷⁴ so the points shared in common probably reflect the wider environment of early Jewish thought.

“These days” of which they prophesied refer to the messianic era or the era of the kingdom’s restoration to Israel, a subject indeed of concern to most of the biblical prophets. Luke’s “days of the Son of Man” elsewhere (Luke 17:22) may be relevant, though it is probably not exactly the same.⁷⁷⁵

i. Israel’s Blessing through Jesus (3:25–26)

God planned to bless all nations through Abraham’s seed (Acts 3:25), but the blessing was offered to Israel first of all (3:26). Israel had a special place of privilege (3:25), but it could be realized only by each hearer’s turning from sin (3:26).

I. HEIRS OF COVENANT BLESSING (3:25)

This passage reflects Luke’s respect for the heritage not only of the Jerusalem church (a respect that Paul advocated except perhaps when engaged in polemic; cf. Rom 15:27, 31) but also of the Jewish people generally, whose cultural heritage had also become his own spiritual heritage. The phrase “descendants of the prophets”⁷⁷⁶ (Acts 3:25) in context surely indicates those for whom the prophets prophesied (3:18, 21,

766. *B. Ber.* 34b; *Sanh.* 99a; *Šabb.* 63a.

767. *Mek. Pisha* 1.135ff., 166 (admittedly this need not mean “concerning Israel”).

768. *Gen. Rab.* 82:2 (a fifth-century rabbi in a third-century rabbi’s name, but apparently using an earlier commonplace).

769. *B. Ber.* 34b (Soncino); *Sanh.* 99a.

770. *B. Sanh.* 99a (Soncino 671); *Ber.* 34b.

771. Later in *Pesiq. Rab.* 17:2.

772. Thus, “in every text,” the fathers and prophets offered their lives for Israel (in *Mek. Pisha* 1.111–13, summarizing 105–11).

773. Urbach, *Sages*, 1:686.

774. A polemical reaction is possible, but similar eschatological applications in Qumran pesharim suggest that the model predates both early Christian and rabbinic usage.

775. It refers to Jesus’s return (Luke 17:24, the “day” of the Son of Man) or to the peaceful period just preceding his return (17:26–29); probably it refers to the period just before (17:30, climaxed by the day when he would be revealed). Cf. the “days of the Messiah” in rabbinic sources (*Sipre Deut.* 343.7.1; *Pesiq. Rab Kah.* 27:5; *b. Ber.* 34b; *Pesah.* 68a; *Šabb.* 63a; *Num. Rab.* 13:14; *Ecl. Rab.* 12:1, §1; *Song Rab.* 2:13, §4). Cf. “the last days” in Acts 2:17–18.

776. Unusual in extant Christian texts for the Jewish people (Zehnle, *Pentecost Discourse*, 53) and hence perhaps reflecting earlier tradition (perhaps rooted in Tob 4:12; cf. “disciples of the prophets” for Israel in *t. Pisha* 4:14, attributed [rightly or wrongly] to Hillel). Rhetoric demanded building rapport with one’s audience (e.g., Kennedy, *New Testament Interpretation*, 36), though especially in the *captatio benevolentiae* (see comments on Acts 17:22).

24). But it may well also remind the informed reader of Luke 11:47–48, a passage that suggests an implicit choice here (a choice implied elsewhere, e.g., 13:28; 16:31; 24:25): they will act as descendants either of the prophets (6:23, 26; 10:24; Acts 2:17–18) or of their killers (Luke 11:47–50; 13:34; Acts 7:52).⁷⁷⁷ To be effective, the children of Israel would need to return to the Lord (cf. Luke 1:16).

“Descendants of the covenant” could reflect the language of Ezek 30:5 LXX, but the sense is quite different (especially if readers understood the Hebrew behind the translation). More relevant to the first-century sense, the phrase refers to the Jewish people (albeit tempted to apostasy among the Gentiles) in *Pss. Sol.* 17:15 and became a self-designation of the Qumranites (1QM XVII, 8; 4Q501 1 I, 2; 4Q503 7–9 IV, 3).⁷⁷⁸ But in the context of Luke-Acts, the “covenant” focuses the reader on remarks about Abraham (cf. Acts 7:8, 17; Luke 1:55, 72–73; 13:16; 19:9).⁷⁷⁹ They are “children of the covenant” as children of (explicitly) their “ancestors,” of whom Luke specifies Abraham (Acts 3:25; cf. the “ancestors” in 3:13; 7:32; 13:17, 32; 24:14; 26:6; Luke 1:55, 72).

This mention of the covenant with Abraham underlines the promise-fulfillment continuity with the OT story in which Jesus’s story is rooted (Luke 1:55, 72–73).⁷⁸⁰ The prominence of the Abraham story lies in the background of Luke’s story, not only in his historical retrospective in Acts 7:2–8 but also in various allusions throughout his work. The story is echoed as early as Luke 1:7, 13, where Zechariah and Elizabeth experience a miracle like that of Abraham and Sarah (except that Zechariah’s initial skepticism is greeted less gently, 1:18–20; cf. Gen 17:17–19; 18:12–15; also Luke 1:34–35). The “blessings” now available to them (Acts 3:25–26) were among the blessings of Abraham also continued in subsequent covenants with his descendants (Deut 28:2–14). These covenant blessings included healing and deliverance (Luke 13:16) as well as participation in the messianic banquet (13:28; 16:22–23). Salvation was also for ethnic children of Abraham, including those who had been alienated but would repent (19:9–10). But while ethnic descent from Abraham may involve the first “right of refusal” (Acts 3:26), participation in the covenant was not guaranteed without repentance (Luke 3:8; 16:23).⁷⁸¹ In one line of Jewish tradition that became prominent in rabbinic literature, God offered the law first to the seventy nations, who rejected it, after which Israel accepted the offer.⁷⁸² In Acts 3 and Rom 11, this sequence may be reversed, although there remains the expectation that, in the end, Israel will accept it (cf. Acts 3:19–21; Rom 11:15, 25–26).

777. Cf. Jervell, *Unknown Paul*, 96–121, for whom the prophetic Spirit reveals the continuity between believers and OT prophets and who applies Acts 3:25 this way (though it addresses all the people). People ought not disbelieve their ancestors (Dio Chrys. *Or.* 31.77). Parsons, *Acts*, 71, notes the inflection of “you” in various cases in Acts 3:25–26, which rhetorically underlines this address.

778. On the Qumran usage, see Fitzmyer, *Acts*, 291.

779. Van den Eynde, “Children,” 482, relates the covenant promise here to Luke 1:72 (applying it only to Jewish followers of Jesus). The Last Supper tradition also contains an allusion to Moses’s covenant (Luke 22:20; cf. Mark 14:24; 1 Cor 11:25), but this is less explicit. Evocative allusions to the story of Abraham help shape Luke’s characterization of God’s covenant faithfulness (see Brawley, “Abrahamic Traditions,” 130–31; on the centrality of this covenant in Luke-Acts, cf. also idem, “Blessing”).

780. Bock, “Scripture and Realisation,” 50–51, points out that Acts 3 emphasizes Abraham (and alludes to Moses) the way Acts 2 and 13 emphasize David.

781. Cf. Paul’s point in excluding Ishmael and Esau from the primary Abrahamic promise (Rom 9:6–13; though Ishmael was blessed in other respects, Gen 17:20); this idea of limiting Abraham’s covenant descendants must have also been raised between Jews and Samaritans (cf. John 4:12).

782. E.g., *Mek. Bah.* 5 (in Urbach, *Sages*, 1:532); *Sipre Deut.* 343.4.1; *b. ’Abod. Zar.* 2b; *Pesiq. Rab Kah.* 2:1; 12:10; *Pesiq. Rab Kah.* Sup. 1:15; *Exod. Rab.* 17:2; 30:9; *Num. Rab.* 14:10; *Lam. Rab.* 3:1, §1; *Pesiq. Rab.* 15:2; 21:2/3; 30:4; comments in Keener, *John*, 397–98.

In at least some early Christian theology, Abraham was the model of faith even for Gentile converts to messianic faith (Gen 15:6 in Rom 4:9–10; Gal 3:7), making him the spiritual ancestor of those who exercised faith as he did (Gal 3:7; Rom 4:11–13). His blessing (Gen 12:2–3; 17:16; 18:18; 22:17–18; cf. 26:4; 28:14) comes even on Gentiles who received the promised Spirit by faith (Gal 3:14). In the heat of polemic (possibly inverting opponents' claims), Paul could even imply that unbelieving Jews were like spiritual Ishmaelites rather than Israelites (Gal 4:22–31), but normally he could also still use the literal sense of physical Abrahamites (Rom 11:1; 2 Cor 11:22).

Luke combines the language of various texts addressing the Abrahamic promise. That the nations of the earth would be blessed through Abraham's *seed* appears in Gen 22:18 (cf. 18:18); the promise is repeated to Isaac in 26:4 and to Jacob (in whom and whose seed the "families" of the earth will be blessed) in 28:14. God's blessing to the "families" of the earth (synonymous with "nations" of the earth in the other passages) appears in 12:3 (and, for Jacob, 28:14).⁷⁸³ This conflation of texts suggests that Luke envisions the entirety of the promise to Abraham rather than merely the one or two texts to which his language is closest.

Luke uses the promise concerning "all the families of the earth" (Gen 12:3; 28:14)⁷⁸⁴ again to foreshadow the Gentile mission, demonstrating that it belongs to God's purposes even in the very inauguration of the covenant.⁷⁸⁵ "All families" applies to Gentiles; thus Israel was only "first." Luke may find the conversion of the Gentiles through Israel's remnant also in his allusion to the "servant" passages (probably in Acts 3:13, 26), since the servant would touch all the nations (Isa 49:6–7; see comments on Acts 1:8; 13:47). By offering the blessing first to Israel (Acts 3:26), Luke apparently provides us one biblical rationale for the arrangement of his own story, starting from the Jerusalem temple (Luke 1:9; and now in Acts 3:12–26) and proceeding to the ends of the earth.

Although Luke is aware that the Abrahamic covenant included circumcision (Acts 7:8; cf. 16:3), like Paul he probably does not emphasize this aspect of the covenant blessing (Gen 17:10–14; see Acts 11:3; 15:1, 5) unless in a spiritual sense (Acts 7:51; cf. Rom 2:26–29; Col 2:11).⁷⁸⁶ Though his language blends allusions to several aspects of the promise, it seems to emphasize "seed" (Gen 22:18, responding to Abraham's sacrifice of Isaac) and its universal future ("families of the earth" appears in 12:3; 28:14; Amos 3:2; Zech 14:17).

II. THE CONDITION FOR BLESSING (3:26)

The speech concludes on a deliberative note, although it is not worded as the sort of direct appeal one would expect in a deliberative *peroratio*. This conclusion, which presumably summarizes and drives home the point of the speech's message, is that Jesus as the servant fulfills and makes possible Israel's hopes, and through him Israel is welcomed to turn to God and receive the promised blessings of the covenant.

Although the emphasis on turning is personal here (ἐκαστον), it recalls the demand for Israel's repentance (Acts 3:19; cf. 2:38). Apparently, when a significant proportion

783. For the interchangeability, see, e.g., Pao, *Isaianic Exodus*, 233. Cf. "families of nations" in LXX Ps 21:28 (22:27) and 1 Chr 16:28 (D. Williams, *Acts*, 73). Though noting that Acts 3:25 uses Gen 22:18, Pervo, *Dating Acts*, 296–97, thinks that Eph 3:14–15 is closer; it is not, however, closer by any significant margin.

784. Modeled in the patriarchs' lives (e.g., in Gen 14:22–24; 26:12–33, esp. 26:29); especially others blessed for their sake (e.g., 30:27, 30; 39:5).

785. Léonas, "Note," contends (in view of Genesis, Philo, and Peter's audience) that the promise is for Abraham's offspring in the land, not for the Gentiles. But even if this was what Peter's audience would have understood and expected, more is in view in Luke's larger context in Acts.

786. The spiritual sense reflects an OT emphasis as well (Lev 26:41; Deut 10:16; 30:6; Jer 4:4; 9:26).

(perhaps an overwhelming majority?) of individual Israelites repented, God would count it as Israel's repentance and provide the Abrahamic blessing. Part of Jesus's mission, as expressed here, was to turn Israel from its ways⁷⁸⁷ so that its people might qualify for God's promised blessings, which he desired to give them.

That God "raised up" (ἀναστήσας) the servant may suggest a play on words. The noun cognate applies regularly to Jesus's resurrection (e.g., 1:22; 2:31; 4:2, 33), as also often does the verb (e.g., 2:24, 32). But in this immediate context, it also plays on the promise that God would "raise up" a prophet like Moses (3:22); because Luke does not seem fond of midrashic wordplay (though he presumably recognizes it), he may reflect earlier tradition here.

The narrowing of the source of blessing from Abraham's seed (3:25) to David's ultimate scion (3:26; cf. Gal 3:16) represents an intriguing reading of biblical history. Genesis does portray a narrowing of the chosen seed from Adam to Noah to Abraham (cf. Gen 1:28; 9:1, 7; 12:2–3; 17:6), then through Isaac to Jacob (35:11). Carrying forward the Abrahamic promise through the promise to David of a seed (2 Sam 7:12–14) represents a canonical approach suggested also by Luke's blending of various biblical hopes elsewhere (Luke 24:44).⁷⁸⁸ As one moves through Scripture, the promise to Abraham of land and chosen descendants finally becomes a promise ultimately fulfilled in God's kingdom, established through the ideal Davidic ruler.

The idea of narrowing the source of blessing from Israel to Jesus appears in other early Christian writers, whether Paul's application of a singular "seed" to Christ (Gal 3:16;⁷⁸⁹ though he knows very well the term is collective, 3:29) or Matthew showing how Jesus recapitulates Israel's history.⁷⁹⁰ That Isaiah's servant (see comments on Acts 3:13) is the agent of blessing after his resurrection would likely be news to Peter's audience, although Isaiah does appear to indicate the servant's exaltation after his death (cf. Isa 53:12).

The promise to Abraham of land was conditioned, however, on his descendants' obedience. The people of Israel's disobedience to Moses (cf. Acts 7:39–41) prolonged their stay in the wilderness for another generation (Num 32:13; Deut 1:35); likewise, they first subdued the promised boundaries fully in the time of David (Gen 15:18; Josh 1:4; 2 Sam 8:9–12). The promised blessing could come incrementally (as during the conquest under Joshua) but would ultimately be fulfilled when they followed the promised deliverer—or be delayed if they did not. Early Christians shared Jewish expectations of a new exodus (Isa 11:16; 40:3; 43:19; Hos 2:14–15; 11:11) and hence adopted the wilderness experience as a metaphor for their experience between their first taste of redemption and its completion (cf. the exodus language in Rom 8:14–17, 23; Rev 12:5–6).

To offer blessing to Israel *first* (of the families of the earth)⁷⁹¹ probably implies the Gentile mission, which follows it, fleshed out in the rest of Acts.⁷⁹² Paul, Luke's hero

787. Ironically, Luke's only other use of ἀποστρέφω is the charge that Jesus sought to "turn" the people to sedition—again a political misinterpretation of his kingship (cf. Acts 17:7). John was to prepare Jesus's way by "turning" people back to the Lord (Luke 1:16–17; cf. 3:4).

788. See Kaiser, *Theology*, passim. Not all Kaiser's exegetical arguments on specific OT passages are compelling, but he provides a reading that in many respects may resemble the canonical reading presupposed by Luke.

789. Also noted by Marshall, *Acts*, 96 (for Jesus as the seed, cf. also idem, "Acts," 549); Bock, "Scripture and Realisation," 51. For the promise to all nations through an individual, see here Meek, *Mission*, 114–29.

790. On this practice in Matthew, see, e.g., Keener, *Matthew*, 109, 136–37; Longenecker, *Exegesis*, 144–45; Meier, *Vision*, 55, 59–61; Patte, *Matthew*, 37; Gundry, *Matthew*, 34, 53.

791. Cf. also the prior responsibility of Israel in Amos 3:2 (its "families of the earth," undoubtedly deliberately echoing the Abrahamic promise); Rom 2:9–10.

792. See Witherington, *Acts*, 187; Bayer, "Preaching," 268.

of the Gentile mission, himself maintains this sequence of offering the message of the kingdom to Jewish people in each location before the Gentiles (Acts 13:14; 14:1; 17:1, 10, 17; 18:4, 19; 28:17). The salvation-historical understanding reflected here also appears in the writings of the historical apostle to the Gentiles (Rom 1:16; 2:9–10).⁷⁹³

Heikki Räisänen doubts any future for Israel in Acts, thinking (against Mussner and Tannehill) that Luke has reinterpreted OT promises through Christ in such a way as to empty them of their content.⁷⁹⁴ The issue for Luke, as for Paul, however, seems one of delay, with him still expecting the fulfillment of God's promise to the Jewish people as a whole. Some aspects of their argument, however, would have shocked most first-century Jews. Paul's and Luke's ethnic universalism (despite Paul's expectation of an ultimate inclusion of "all Israel," Rom 11:11–12, 26) would have appealed only to those Jews who expected the conversion of (many of) the nations; allowing this conversion without circumcision did not change the content of the promise, but many even within the church felt that it changed the content of covenant conditions for the promise (Acts 15:5).

3. Confronting Jerusalem's Elite (4:1–30)

Acts 4:1–22 shows that worldly status is spiritually ineffective compared with Christ's authority through his apostles. Conflict dominates the section, in which the apostles (4:8–12, 19–20) twice respond to the rulers (4:1–7, 13–18). The immediate passage (4:1–12) displays the effectiveness of the apostles' service to Christ even when they were experiencing persecution from the very elite rulers who (3:17) participated in killing these elite's rival, God's appointed ruler (3:15). Jesus's name saves not only physically but spiritually (4:9–12; cf. 2:21, 38; 3:6, 16). Acts 4:13–22 then contrasts the politically cautious elite with the courageous boldness of apostles carrying on Jesus's ministry (i.e., in his name) by signs (cf. 4:29–30).

a. Introduction

Just as Jesus's words in Nazareth were first well received (Luke 4:20, 22), so were Peter's (Acts 2:37, 41, 47; 4:4); but in both cases proclamation ultimately led to persecution (Luke 4:28–29; Acts 4:1–2).⁷⁹⁵ In both cases, too, God's servants remained safe (Luke 4:30; Acts 4:21; 5:19). That the apostles repeat Jesus's experience of suffering validates their calling (cf. Acts 5:41).⁷⁹⁶

Persecution is a major theme in Acts,⁷⁹⁷ inseparable from the spreading of the gospel and sometimes connected with joy (5:41; 16:25).⁷⁹⁸ Such persecution is by no means Luke's literary fiction; he reports it only sporadically,⁷⁹⁹ and other early Christian writers in authentic occasional documents confirm it (1 Cor 15:9; Gal 1:13, 23; Phil 3:6; 1 Thess 2:14–16).⁸⁰⁰ But Luke certainly makes theological use of

793. Cf. Bruce, *Acts*¹, 114; Marshall, "Acts," 550.

794. Räisänen, "Redemption," 101.

795. Goulder, *Type and History*, 55. The account of Acts 4–5 is retold in summary fashion in Iren. *Her.* 3.12.5.

796. Cf. Brawley, *Luke-Acts and Jews*, 24–25; Kilgallen, "Persecution." For echoes of Luke's passion narrative (Luke 20:2, 27; 22:52, 66; 23:13), see Marguerat, *Actes*, 141.

797. See, e.g., House, "Suffering and Purpose"; Rapske, "Opposition," 235–56; Cunningham, *Many Tribulations*; Mittelstadt, *Spirit*.

798. See further Pereira, "Persecution."

799. Kilgallen, "Persecution," 160.

800. Cunningham, *Many Tribulations*, esp. 340, rightly views Jewish persecution in Luke not as anti-Jewish but as an apologetic response to questions about the majority of Israel rejecting Jesus (see further on Luke's portrayal of Judaism in the commentary introduction, ch. 14, sect. 1 [Keener, *Acts*, 1:459–77]).

it, presenting it (as do some other writers, e.g., 2 Tim 3:12) as characteristic of the Christian life (Luke 6:23; Acts 14:22).⁸⁰¹

I. POWER CONFLICT

It is noteworthy that the authorities had not moved against Jesus's followers the way they had moved against those of Theudas, the Samaritan prophet, or the Egyptian prophet (cf. Acts 5:36–37; 21:38; Jos. *Ant.* 20.98; *War* 2.260, 263). Some scholars attribute the difference to different regional administrations,⁸⁰² but the primary difference probably lies in the level of perceived threat (cf. Luke 22:52; 23:2, 5). The disciples had not taken up arms or spoken about overthrowing anyone; neither had Jesus, but his action in the temple (and his usual location in Galilee, less available for observation) would have rendered him more suspect from the start.

Like Jesus, however (Luke 19:45–48), the disciples would have to confront the municipal aristocracy. The chief priests and scribes were particular targets of Jesus's criticisms (e.g., 20:19) and were among his most critical enemies (19:47; 20:1, 19; 22:2, 4, 52, 66; 23:4, 10; 24:20). Jesus's preaching of the kingdom could have announced, as some other pietist contemporaries did, God's intervention without planning political force; indeed, his virtually suicidal, unarmed collision with Jerusalem's elite suggests nothing else. But in an honor-and-shame culture, Jesus's challenge to the temple hierarchy had political consequences and would probably be understood politically. The parable in 20:9–16 treats the religious elite essentially as illegitimate usurpers of Jesus the king's rightful position.

The leaders could not but have suspected thinly veiled criticisms of their legitimacy (cf. Luke 20:19), especially since such criticisms were not uncommon. Most minority Jewish sects viewed the Sadducean elite (the dominant, though not the only, voice in the Sanhedrin)⁸⁰³ as Rome's political lackeys (cf. the connection in Acts 4:25–29);⁸⁰⁴ with Rome's support, Herod the Great had installed his own backers in the Sanhedrin, and Rome determined who filled the high-priestly office. The minority sects differed only in their view as to who ought ideally to fill the place wrongly held by the Sadducees: Pharisees, Essenes (in a future new order), or leaders of the emergent Jesus movement. The approach of the apostles, however, is more confrontational than that of the Pharisees (who by this period worked within the system insofar as possible) or the Essenes (many of whom withdrew to the wilderness to await God's intervention): they openly imply, in the presence of the elite, the municipal aristocracy's corruption and abuse of power (4:10–11, 19; cf. 2:23; 3:13–15), like biblical prophets challenging their people's rulers (e.g., 1 Kgs 13:2; 14:7–11; 17:1; 21:21–24; 2 Kgs 21:10–15). The true king is ready to return and rule Israel if the people are ready to receive him (Acts 3:19–23). True, the apostles' confrontation plainly relied on theological claims and not verbal or visual threats of armed resistance (indeed, Luke presents them as almost polite in 3:17; 4:8); Jesus's opposition to their attempt to resist violently in Luke 22:49–51 should have put that approach to rest for them.⁸⁰⁵ Nevertheless, their

801. See more fully Cunningham, *Many Tribulations*, esp. 337–38.

802. Freyne, *Galilee, Jesus*, 195–96. Pilate, Fadus, and Felix were, however, all governors of Judea and only a matter of decades apart.

803. Although not all aristocrats were Sadducees, most Sadducees belonged to the priestly aristocracy (Sanders, *Judaism*, 318, 322).

804. Many scholars emphasize the ruling elite's connection to Rome (e.g., Kee, "Central Authority"; Sampathkumar, "Bandits"). Luke does distinguish the aristocracy from the rulers—the latter being more powerful (Acts 4:26–27)—but both remain potent political forces.

805. Cf. Jesus's dependence on God to raise him in the face of injustice (Luke 22:50–53, 67–69; Matt 26:52–54; cf. Luke 6:27–29//Matt 5:39, 44; John 10:18), and the early Christian theme of true power revealed

teaching was public and publicly challenged the elite's honor (Acts 5:28). Such honor could be recouped only by avenging it. Only the apostles' growing popular support in Jerusalem (not, as with Jesus, mainly from Galilean pilgrims) likely protected them from hastier discipline.

We should not, as do some uninformed approaches, read the conflict anachronistically, as if it were between Jews and Gentiles or between the representatives of distinct religions. Both the apostles and the Sanhedrin claimed to lead their people, albeit the former through their teaching rather than by political means. The conflict is not one of ethnicity but one of power; political elites repress their competition.⁸⁰⁶ (The contrast between receptive peoples and resistant, repressive leaders also sounds true to form in many societies.)⁸⁰⁷ The issue is one of political power versus truth,⁸⁰⁸ a common theme in ancient philosophy suggested also by *παρρησίαν* in 4:13.

That the narrative retains clues of such confrontation, which could be construed politically, suggests that confrontation of some sort occurred (cf. 1 Thess 2:14–15); Luke would hardly dare invent something so counterproductive to his political apologetic. Luke does agree that it was the corrupt rulers who prevented Jesus's mission from being accepted by his people (cf. Luke 22:66; 23:4, 10, 13; Acts 13:27–28).⁸⁰⁹ He does, however, tread carefully in his presentation. Many in Rome disliked Jews for their foreign ways and their conversion of Romans; a Jewish sect making converts for what seemed a subversive rebel movement could only appear worse. Both Corinth and Philippi (probably within Luke's geographic range) had enough Roman influence to be sensitive to such issues in a post-Nero era. Further, Rome would favor the municipal aristocracy of Jerusalem over potential rivals; the failure of this aristocracy to keep peace, however, might render them more suspect by Luke's day (at any date after 66). Luke is careful to emphasize repeated Roman decrees of the leader's and movement's innocence (e.g., Luke 23:14–15, 22; Acts 26:30–32); that the "other king" charge (Acts 17:7) represents a complete misunderstanding; and that even in the confrontation between the apostles and the Sanhedrin in Jerusalem, this was no movement based on political force like those of Theudas or Judas (5:36–37).⁸¹⁰

II. SOURCES AND NARRATIVE CONSTRUCTION

Historically, if Jesus's followers preached in the temple, the temple guardians would have surely intervened; this is especially likely if these officials helped facilitate Jesus's execution, which they very likely did (as argued elsewhere).⁸¹¹ Rome depended on

in weakness, hence God's power for those embracing their social weakness (1 Cor 1:17–2:5; 2 Cor 12:9–10; 13:4; Jas 4:6, 10; 1 Pet 5:5–6; Rev 5:5–6; 1 Clem. 6.2; 13.1; 16.1–3; 30.2–3; 59.3–4).

806. González, *Acts*, 86–87, on Acts 5:17–40, emphasizes this reading from a Latino perspective. Just as the Sanhedrin sought to pacify Rome, many Majority World elites retain power through the realities of global injustice (87). Local elites exercised considerable authority (cf. Sloopjes, "Potentes," though focused on the second and third centuries).

807. González, *Acts*, 63–69, illustrates from his Latin American perspective how contemporary is the cultural conflict between the masses and the elites and how movements among the former can challenge the sense of power among the latter.

808. An issue also applicable within Christendom today, as Chance, *Acts*, 84, observes.

809. Indeed, initially Jesus had been so popular that even his Pharisaic detractors, more popular than the Sadducees, could be portrayed as isolated from a celebration shared by everyone else (in Luke 15:23, a fattened calf would feed a village, but in 15:25–26, only the elder brother seems unaware of the celebration!).

810. Luke also fails to use Peter's Aramaic name "Cephas" (1 Cor 1:12) and mentions "Caiaphas" by name only twice (Luke 3:2; Acts 4:6), eliminating any possibility of a contrasting play on the similar-sounding names.

811. This would be particularly clear in Jos. *Ant.* 18.64, if the most relevant line is original, but this is uncertain; see discussion of Josephus's *testimonium* at Acts 21:20. As Sanders observes (*Jesus and Judaism*, 286), conflict with the Romans, crowds, or Pharisees would not explain events subsequent to the passion

the chief priests to maintain order.⁸¹² The leading priests likewise intervened when any supposed prophet threatened the stability of the temple (Jos. *War* 6.300–305).⁸¹³

They would likely continue to intervene until the movement was suppressed or became too popular to suppress. Luke Timothy Johnson is very likely correct that Luke had much more detailed sources for Acts 13–28 than for the early chapters and hence “filled out” these earlier chapters “with summaries, speeches, and vivid descriptions.” He suggests that Luke may have created the scenes of the apostles’ hearings in Acts 4 and 5 on the basis of knowledge that the Sanhedrin did persecute the apostles (cf. 1 Thess 2:14–15).⁸¹⁴

On the basis of what we know of Luke’s technique elsewhere and where this locates him along the spectrum of ancient historians (see the commentary introduction, chs. 6–7), it seems likely that Luke knew more details than just that the Sanhedrin persecuted the apostles. Presumably, for example, he would have had informants in Jerusalem who could recount at least what they had heard or opined about some reasons for these events. Johnson is surely right, however, that the sources are less complete in this section of Acts; concrete narrative details are fewer and of the sort that might stick in informants’ memories years later, supplemented with much speech material. At this temporal remove, we lack sufficient evidence to investigate more fully the sources of Luke’s details.

Earlier scholars argued that parallels between the arrest scenes in Acts 4 and 5 reflected two variant forms of the same original tradition. Granted, if Luke heard different forms of the story from two informants and could not harmonize them, he may have chosen to include both conflicts (since both make engaging stories). But the two, escalating accounts (constituting essentially a warning followed by more severe discipline when the offense was repeated) fit the way discipline could be undertaken for offenses that were minor or (as in this case) politically difficult to crack down on.

There are also literary reasons for including the two accounts (see the introduction to Acts 3:1–5:42). The presence of apparent “doublets” might fit Luke’s pattern of variation in retelling stories.⁸¹⁵ If Luke’s sources here are oral, one would expect repetition for narrative reasons, entirely aside from the question of tradition.⁸¹⁶ Contemporary narrative criticism, bolstered by ancient Near Eastern parallels, has likewise challenged an earlier generation’s confidence that “doublets” indicate separate accounts of single events in ancient Israelite stories.⁸¹⁷ Certainly, Luke’s contemporaries did not view these earlier biblical stories as merely doublets from recycled tradition.

tradition, but the continuing enmity of the chief priests against Jesus’s followers (e.g., Acts 4:1–7; 5:17–18; 9:1–2) points to the priestly aristocracy as the main source of opposition. Cf. also Vermes, “Jesus the Jew,” 120. On members of the priestly aristocracy rather than others being the opposition, cf. further discussion and sources in Keener, *Historical Jesus*, 290–94, 310–13, 316–17.

812. Jos. *War* 2.232–44; Sanders, *Figure*, 266–67. The high priest probably wanted Jesus removed for the sake of public order (Sanders, *Figure*, 265) and would have handed him over to the governor; “that is the way things really happened, as the numerous stories in Josephus prove” (269).

813. Regev, “Concerns,” considers the pattern of priestly opposition in the early Christian sources consistent with the Sadducees’ special commitment to the temple’s ritual purity (see esp. 86).

814. Johnson, *Acts*, 4. It is historically likely that leaders of the aristocratic priesthood, if involved or somehow implicated in Jesus’s condemnation (see Keener, *Matthew*, 612–13), would have repressed his followers if they became a mass movement and if they implicated the leaders in the execution (cf. also Richardson, *Israel*, 46).

815. Cf. Mussies, “Variation.”

816. See Dewey, “Oral-Aural Event,” 149 (following Ong, *Orality and Literacy*, 37–49).

817. See Klingbeil, “Historical Criticism,” 410, and sources surveyed there; Whybray, *Making*, 74–80; Garrett, *Rethinking Genesis*; for ancient Near Eastern parallels, see esp. Whybray, *Making*, 80–84; Klingbeil, *Ordination*, 104–7; Garrett, *Rethinking Genesis*, 22–25.

Typically, reduplication of scenes elaborates and develops a pattern, later scenes recalling earlier ones but advancing the plot further.⁸¹⁸ Certainly, this is the case in Acts 4–5, where Acts 5 advances the plot much further toward crisis, requiring Gamaliel’s intervention to save the apostles’ lives.⁸¹⁹ The parallels highlight the differences instead of obscuring them. Some scholars also point out that later rabbis required a warning for a first offense and punishment only for subsequent offenses. If this practice reflects a wider custom, it helps explain the need for two trial scenes in Acts 4 and 5 (4:21; 5:40).⁸²⁰

Listed below are some of the common elements between the narratives; though not all are of equal weight, the stronger elements suggest that Luke invites us to notice the parallels and consequently to focus especially (in the second arrest narrative) on the new developments in the situation.

Sadducees and chief priests arrest the apostles (4:1)	Sadducees and chief priests arrest the apostles (5:17–18)
Because they are disturbed (4:2)	Because they are jealous (5:17)
They jail them overnight (4:3)	They jail them overnight (5:18–19)
—	An angel releases the apostles (5:19)
Yet the apostles are successful among the people (4:4) (the apostles’ popularity protects them, 4:21)	The apostles are successful among the people (5:20, 25–26) (the apostles’ popularity protects them, 5:26)
Their hearing before the municipal aristocracy occurs the next morning (4:5–7)	The Sanhedrin summons them in the morning (5:21)
The authorities demand an answer (4:7)	The authorities demand an answer (5:28)
Peter’s answer (4:8–12, 19–20)	Peter’s answer (5:30–32)
God raised Jesus, whom you crucified (4:10)	God raised Jesus, whom you crucified (5:30)
(Jesus is the exalted cornerstone, 4:11)	(Jesus is the exalted ruler, 5:31)
Jesus is the means of salvation (4:12)	Jesus is the Savior (5:31)
(Obeying God rather than mortals, 4:19–20)	(Obeying God rather than mortals, 5:29)
(The apostles cannot stop speaking what they know firsthand, 4:20; Peter speaks, filled with the Spirit, 4:8)	(The apostles are witnesses, 5:32; the Spirit testifies, 5:32)
Gag order (4:18)	Reminder of gag order (5:28); new gag order (5:40)
Threat of punishment (4:21)	Carrying out of punishment (5:40)
They release the apostles (4:21)	They release the apostles (5:40)
Praise (4:24)	Rejoicing (5:41)
Continuing activity (4:31–35)	Continuing activity (5:42)

As already noted, the parallels are not all of one kind. Some elements, such as being jailed overnight or being confronted by the Jerusalem authorities, are plausible by themselves; that Peter and the municipal authorities would continue their essential demands is also to be expected in the narrative. One also expects continuing activity that disobeys the injunctions to stop preaching; that Luke describes it would fit his emphasis in each case whether or not he is drawing a deliberate parallel. Parallels in some other elements, such as the apostles’ evangelistic success reported in 4:4 and suggested in 5:25–26, are less clear yet attributable to Luke’s narrative artistry (the report of 4:4 could easily have preceded the arrest). Other elements (such as

818. Real or apparent doublets could be used to heighten suspense, as here; cf. Jonathan’s peaceful resolution of David’s situation with Saul in 1 Sam 19:1–7, with the more open breach in 20:1–42.

819. Tannehill, *Acts*, 64; Gaventa, *Acts*, 106. Cf. Wall, “Acts,” 103: the two accounts were “written to be read together as mutually interpreting narratives of apostolic vocation and authority.”

820. Marshall, *Acts*, 97; Fitzmyer, *Acts*, 332; following Jeremias. Offering a public warning first would be honorable; admittedly, the Sadducean elite would not be much concerned with the niceties of what later became rabbinic procedure.

the addition of the other ten apostles; the angelic release; Gamaliel's intervention; and carrying out a flogging) show a development in the overarching narrative (and consequent natural differences between the two accounts).

b. Jerusalem's Elite Confront the Apostles (4:1–7)

Peter's summons to Israel to repent (3:12–26) is met instead with hostility from the current leadership of Israel (4:1–3), who object to their theology (4:2) even if they cannot contravene their miracle (4:14). Many of the people had responded (4:4), a pattern that would continue with the Jerusalem church (21:20). Nevertheless, the die has also been cast for the future: Luke seems to imply that Jerusalem as a whole would have responded to the apostolic message but for the leaders' hostility—hostility because of jealousy (5:17) and because Israel's God-ordained leadership threatened their power base (cf. Luke 20:14).⁸²¹

I. THE ELITE ARREST THE APOSTLES (4:1–3)

In Acts 4:1, Peter is calling Israel to turn from evils (3:26, end of the verse); those who fail to do so will be destroyed from among Israel (3:23). That the speech is "interrupted" (see comments on Acts 2:37; 10:44) at this point⁸²² not very subtly indicts the leaders of Israel (who proceed to arrest the apostles) with being among those who do not heed the Messiah (3:22–23). The end result is the impression that much of Israel might have turned to Christ were it not for the leaders' unwillingness to relinquish power or admit wrongdoing (cf. 5:28).

This commentary will treat some groups of the elite where they arise later in the narrative (such as the Sanhedrin in 4:5). The focus at present will be the commander of the temple guard and the Sadducees, who appear in 4:1. "Priests" here may refer to various priests in the temple (some of whom may have later joined the Jesus movement, 6:7), but they would be under the leadership of the aristocratic priests (a large percentage of whom belonged to the favored Sadducean party). Here the Sadducees, who reject the resurrection (Luke 20:27), are threatened by the proclamation that resurrection has in fact happened—in the person of an enemy whose death they helped to facilitate. (Their behavior here also prefigures their role against Paul in Acts 23:6–10, though less emphatically; in that passage Paul also emphasizes the resurrection.)⁸²³

(1) Commander of the Temple Guard (4:1)

The "commander of the temple guard" was a high officer who, according to some ancient reports, occasionally even rose to the office of high priest.⁸²⁴ Rabbinic texts call him the *sagan ha-kohanim*, to whom commentators frequently attribute rank after the high priest as well as chief responsibility for preserving order in the temple.⁸²⁵ Josephus, like Luke (also Acts 5:24, 26),⁸²⁶ calls him a στρατηγός (*Ant.* 20.131; *War*

821. Other Jewish groups, such as the one represented in the Qumran sectarian texts, also claimed to represent the true, God-ordained leadership for Israel (though this group lost the battle and mostly withdrew from Jerusalem instead of continuing to attract the people). The Pharisees' vision of rule by their traditional interpretations of the Torah was less dramatic and took much longer to achieve, but it survived 70 C.E. in a way that Sadducean power could not.

822. From a literary perspective, such interruptions may help Luke "veil the unreal brevity of space which he could afford to allocate to the speeches" (Horsley, "Speeches," 610).

823. Similarly, Paul in 23:6–10 experiences Pharisaic intervention like the Jerusalem apostles in 5:34–40. For a semiotic reading of 4:1–12, see Donegani, "Procès."

824. See Reicke, *Era*, 148.

825. E.g., Lake and Cadbury, *Commentary*, 40; Bruce, *Acts*¹, 115; Bruce, *Commentary*, 95n4.

826. Only Luke employs this title in the NT (but elsewhere always in the plural, Luke 22:4, 52; Acts 16:20, 22, 35–36, 38), but it is quite common in the LXX (usually in the plural but consistently singular in some

6.294);⁸²⁷ this term frequently translates *sagan* in the LXX. Certainly, this officer was among those whom Luke envisions as involved in Jesus's arrest (Luke 22:4, 52). Later rabbis, whose perspective is naturally generally rabbinic-centered, portrayed some who filled this priestly office as wise scribes as well.⁸²⁸ They also reported that this officer, or likely one of those who filled this office in Jerusalem's final generation, was quite harsh even with his own temple guards, occasionally even setting aflame the clothes of a guard found asleep.⁸²⁹

One individual who filled this office close to our period is Ananus (Jos. *Ant.* 20.131), who a parallel reference in Josephus suggests was the son of the high priest Ananias (*War* 2.243).⁸³⁰ If Ananus is the same temple officer as here (which is by no means certain, since this narrative is somewhat earlier), he later became high priest himself (*Ant.* 20.197) and executed James the Lord's brother (20.199–200). But if this connection is accurate, Luke might not know of it; at the least, we may observe that he makes no attempt to communicate it to his audience.⁸³¹ Regardless of the official's specific identity, we may expect that this high office was filled by a relative of the high priest (cf., e.g., 20.208; *War* 2.409). The appearance of Levitical officers foreshadows the confrontation with aristocratic priests in Acts 4:5–6.

The Sanhedrin maintained some police power, which the Romans tolerated as in other municipal aristocracies.⁸³² Because most ancient temples had wealth (among Gentiles, often including idols) and often treasuries that functioned as banks,⁸³³ they typically also had watchmen and guards.⁸³⁴ The temple guards were Levites who functioned as an honor guard in addition to protecting entrances (on the latter function, cf. Acts 21:30).⁸³⁵ The Levite gatekeepers were apparently linked with the twenty-four courses of priests (2 Chr 8:14),⁸³⁶ and some early Jewish traditions assign them to

Maccabean works: 1 Macc 8:10; 10:65; 11:59; 13:42; 14:42, 47; 16:11; 2 Macc 3:5; 4:4; 8:8–9; 9:19; 10:11, 14; 12:2, 32; 13:24; 14:12; 4 Macc 4:2).

827. He might also be the same as "the king's captain" (Jos. *War* 1.652, with LCL, 2:311 n. a), though the term is familiar enough that this need not follow (cf., e.g., Acts 16:20, 22, 35–36, 38; more than fifty times in the LXX [cf. esp. Neh 13:11; 1 Macc 14:47], though it is restricted to Luke in the NT). Josephus can employ Greek terms generally when describing Roman officers, rather than employing the terms technically for particular offices (see στρατάρχης in *War* 2.531, 544; Tully, "στρατάρχης").

828. E.g., Hanina the *sagan* of the priests, *m. Pesah.* 1:6; *Šeqal.* 4:4; 6:1; *Ed.* 2:1–3; *Ab.* 3:2; *Zebah.* 9:3; 12:4; *Menah.* 10:1; *Neg.* 1:4; *Parah* 3:1; *b. Pesah.* 14b; cf. the rabbinic son of a *sagan* in *b. Pesah.* 47a. If Hanina is the Ananias of Jos. *Ant.* 20.131, it is curious that rabbis a generation or two later would cite him as an authority (especially if he became high priest).

829. *M. Mid.* 1:2; *b. Tamid* 27b–28a. Penalties for sleeping guards could be harsher in armies (see comments on Acts 20:28), but rabbis reported this behavior as if unduly harsh.

830. Cf. the prefect Haniah in the Mishnah (*m. Šeqal.* 8:5; *Ketub.* 2:8), perhaps father of the later prefect Eleazar ben Hananiah, who served 62–64 C.E. (cf. Jos. *War* 2.409; so Le Cornu, *Acts*, 216).

831. Given Luke's use of identical names for literary connections (most obviously, among "Herods," Luke 3:19; 9:7–9; 13:31–32; 23:11; Acts 12:1–23), mention of an Ananias here would have served his point later (Acts 23:2; 24:1); hence he probably does not know a connection (especially since he names other leaders, 4:6).

832. Cadbury, "Law and Trial," 300; Stambaugh and Balch, *Environment*, 34. On municipal aristocracies, see also Welwei, "Gerousia"; in Jerusalem, Ego, "Gerousia."

833. See Pindar *Pyth.* 4.53–54; Caesar *C.W.* 3.33, 105; *Juv. Sat.* 14.260–62; *Cic. Fam.* 5.20.5; 2 Macc 3:6–7; 4 Macc 4:3–7; Keener, *John*, 523; comments on Acts 19:25.

834. E.g., *Cic. Verr.* 2.4.43.94; 2.4.44.96.

835. See Safrai, "Temple," 872; Jeremias, *Jerusalem*, 210. Priests probably outnumbered Levites in Jerusalem (cf. Neh 11:18); the latter appear rarely in Second Temple sources (Fiensy, "Composition," 220). Other ancient Near Eastern temples also had keepers to bar intruders (Moyer, "Practices," 36, noting also Milgrom, "Custody"; idem, *Studies*, 50–59).

836. Luke knew of the courses (Luke 1:8), which appeared in his Bible (1 Chr 24:7–18; 28:13, 21; 2 Chr 5:11; 31:2, 15, 17; 35:10; Ezra 6:18; 1 Esd 1:2). They were widely known (Jos. *Ant.* 7.365, 367; *Life* 2; *t. Sukkah* 4:26–27; *Ta'an.* 2:1; 3:1; *y. Ta'an.* 4:5, §13; cf. 4Q494 1 3; see further Stern, "Aspects," 587–95; more anachronistically, Jeremias, *Jerusalem*, 72, 199).

twenty-four stations: five for the outer gates of the temple, five for the gates of the court, four for the outer corners, four for the corners of the court, one behind the holy of holies, and one each in five chambers.⁸³⁷ A large number were assigned to closing of the temple gates.⁸³⁸ Not all Jewish people in antiquity felt that the priesthood guarded the temple adequately; some accused the priests of being poor stewards unworthy of the sanctuary's keys (2 Bar. 10:18).⁸³⁹

(2) Sadducees (4:1)

Luke has previously mentioned the Sadducees only with regard to their skepticism about the resurrection (Luke 20:27). But it will soon become clear that the Sadducees are the circle around the high priests (Acts 5:17) and hence form a significant part of the ruling assembly (4:5, 15; cf. 23:6). They thus belong to the circle that had opposed the apostles' Lord (Luke 9:22; 19:47; 20:1, 19; 22:2, 66; 23:10; 24:20).

Though some aristocrats were not Sadducees (some, such as Gamaliel, were Pharisees), it is believed that in this period nearly all the Sadducees belonged to the aristocracy.⁸⁴⁰ Most likely a priestly sect, they were probably the well-to-do priests who had remained loyal to the Zadokite line during the Maccabean era (while other Zadokites fled to Qumran and elsewhere; cf. 1QS V, 2; VI, 3–4; CD V, 5), returning to a position of power under the Romans.⁸⁴¹ Most scholars contend that in this period they dominated the Sanhedrin (on which see comments at Acts 4:5).⁸⁴²

The Jesus movement was not alone in its resentment of the Sadducees. Among other critics, later rabbinic tradition complains that the rich Sadducees (who did not affirm the resurrection) had all their reward in this life ('*Abot R. Nat. 5 A*). The rabbis linked them with "Boethusians" under the special charge that they denied the resurrection from the dead.⁸⁴³ Their denial of resurrection was widely known,⁸⁴⁴ and many Jews besides the Pharisees felt that a denial of substantive future hope led to wickedness (Wis 2:1–24).⁸⁴⁵ (On the Sadducees' views regarding the resurrection, see fuller comments at Acts 23:7–8.)

Other grounds also separated these aristocrats from the dominant views that became rabbinic practice.⁸⁴⁶ Probably claiming to take Scripture as their only authority,

837. Safrai, "Temple," 872–73 (citing *m. Mid.* 1; *Tamid* 1:1); cf. also Le Cornu, *Acts*, 217 (citing also *Jos. War* 6.294).

838. Two hundred in *Jos. Ag. Ap.* 2.119; but twenty could shut it with considerable effort (*War* 6.293). The two hundred could represent a textual corruption.

839. See further references in *OTP* 1:624 n. h (esp. 4 Bar. 4:4–5; also *b. Ta'an.* 29a; *Lev. Rab.* 19:6).

840. See Sanders, *Judaism*, 318, 332. I have adapted material on the Sadducees and high priests from Keener, *Matthew*, 613–14; on Sadducees, see also Porton, "Sadducees."

841. See Baumbach, "Sadduzäerverständnis." Manson, *Servant-Messiah*, 16, derives "Sadducees" from a cognate of "Sanhedrin," but the Zadokite explanation is more probable (with Lohse, *Environment*, 74, and others).

842. E.g., Gager, "Class," 105.

843. '*Abot R. Nat. 5 A*; 10 B; cf. *m. Ber.* 9:5; a reading of *b. Šabb.* 152b; the Palestinian Targum in Isenberg, "Polemic"; Bowker, *Pharisees*, 53–76. Medieval tradition sometimes links them with Karaites (Jacobs, *Exegesis*, 10), perhaps for polemical purposes against the Karaites; others (aside from the scholars who once dated the Scrolls to the medieval period) have found, for the Karaites, predecessors in the Essenes (early after the discovery of the Scrolls, cf., e.g., Ginsberg, "Cave Scrolls," 81; Kahle, "Karaites"; Wieder, "Sectaries and Karaites"; Fritsch, *Community*, 86–89).

844. Cf. *Jos. Ant.* 18.16; *War* 2.164–65. Cf. comments in Flusser, *Sage*, 43, on the Jerusalem tomb of "Jason," with illustrations of the present life but no expressions of future hope.

845. Also '*Abot R. Nat. 5 A*; *Tg. Neof.* 1 on Gen 4:8; *Tg. Ps.-J.* on Gen 4:8. So also some Gentiles, against Epicureans (Aul. Gel. 9.5.8; cf. *Plut. Pleas. L.* 23, *Mor.* 1103D; Neyrey, "Polemic," 410–12, 420–22); cf. even the utility of a fictitious fear of judgment for social control (Polyb. 6.56.12–15).

846. E.g., *m. Nid.* 4:2; *Yad.* 4:7; *t. Nid.* 5:2; *Sukkah* 3:1; later rabbis treated Sadducean women who followed Sadducean practice as like Samaritans, i.e., unclean (*t. Nid.* 5:2), but believed that many of them learned instead from the sages (5:3).

Sadducees felt no obligation to embrace Pharisaic traditions.⁸⁴⁷ Later rabbis claimed that despite Sadducean disagreements, Sadducees had to follow Pharisaic rules in the temple;⁸⁴⁸ because Pharisees tended to represent the popular perspectives, Sadducees had to accommodate populist sentiments in some public rituals.⁸⁴⁹ To whatever degree there may have been truth in such claims, powerful Pharisees and others had to work alongside them before 70.⁸⁵⁰

Qumran and others opposed the priestly aristocracy that controlled the temple; the Dead Sea Scrolls offer numerous criticisms of such priests.⁸⁵¹ For example, the Habakkuk peshar provides a quite unpleasant view of “the last priests of Jerusalem” (1QpHab IX, 4–5). Qumran sectarians complained about the Jerusalem priesthood’s corrupt wealth (e.g., IX, 4–7; 4QpNah 3 + 4 I, 11).⁸⁵² The Qumran sectarians viewed the temple as morally desecrated, in part because of the hierarchy’s wickedness.⁸⁵³ A “wicked priest” had driven their own teacher and community into exile,⁸⁵⁴ and the image may have been applied subsequently to others belonging to the improper priestly lineage.⁸⁵⁵ Certainly, the Jewish revolutionaries who seized control of Jerusalem hated the high-priestly family (Jos. *War* 2.256). Many marginalized groups viewed the Judean elite as the primary source of problems.⁸⁵⁶

Josephus, himself a priestly aristocrat, has a far more positive view of Jerusalem’s aristocracy than does Luke.⁸⁵⁷ Yet even Josephus testifies to the corruption and abuse of power in the high-priestly family and some other leading families, having experienced it himself (e.g., *Life* 216). He especially regards the chief priests as corrupt during the period of Agrippa II (particularly 59–65 C.E.),⁸⁵⁸ but he may highlight their behavior in this period because of his own uncomfortable experiences then.

847. Jos. *Ant.* 18.16; cf. *Abot R. Nat.* 10 B; Neusner, *Beginning*, 27–28; Sanders, *Jesus to Mishnah*, 107.

848. Some texts warn that Sadducees who did not cooperate were sometimes struck dead (*t. Kip.* 1:8; cf. *y. Yoma* 1:5).

849. Though later rabbinic perspectives about this accommodation may be exaggerated, Josephus also tells us this (*Ant.* 18.15, 17).

850. Pace Eppstein, “Excommunicated,” even had Pharisaism exercised adequate control to effect excommunication, the Sadducees could not have been excommunicated almost a decade before the temple’s destruction. Worse still, Jeremias, *Jerusalem*, 264–65, takes later rabbinic sources at such face value that he supposes that Pharisaic (protorabbinic) authority had stripped the Sadducees of power (cf. Finkelstein, *Pharisees*, 2:659).

851. E.g., 4Q387, frg. 2–3, apparently condemns aristocratic priests (cf. three reigning ones in frg. 3.6) who disobey God (2.4), serving other gods (3.6); CD VI, 15–16 condemns exploitation of consecrated funds. Cf. criticisms of the end-time priesthood also in *Test. Levi* 17:11. Nor were criticisms of the priesthood new (1 Sam 2:12–17; Jer 5:31; 26:8, 11; Ezek 22:26; Hos 4:9; 5:1; 6:9; Mic 3:11; Zeph 3:4; Mal 1:6).

852. Many attacked the aristocratic priests’ corruption (1QpHab IX, 4–5; XI, 6–7; CD V, 6–7; cf. *Pss. Sol.* 8:11–13; *Test. Levi* 14:1, 6 if not an interpolation); later rabbis most often attacked their doctrine.

853. Cf. 4QMMT C (Regev, “Abominated Temple”). Some argue that some sectarians from the Maccabean period may have remained pro-temple while opposing the priestly establishment (Finkelstein, “Documents,” 22–24).

854. 1QpHab I, 13; VIII, 8–12; IX, 9; XI, 4–6; XII, 2–3, 5–6, 8; 4Q163 30 3; 4Q171 IV, 8 (= “the man of deceit” in 1QpHab II, 1–2; V, 10–11; X, 9; cf. CD I, 14–15; 4QpPs 37:7; so also, e.g., Thiering, “Wicked Priest”). The first priest’s identity is debated (e.g., Fritsch, *Community*, 83–84; Rost, *Judaism*, 163; Brownlee, “Messianic Motifs,” 13–15). Some think that the “lion” in 4QpNah is Alexander Jannaeus (Allegro, “Light,” 92; Eisenman, *Maccabees*, 23, 35 [but positively]); but cf. Rowley, “4QpNahum”). The wicked ruler of 4Q175 lines 21–29 may not be the Wicked Priest.

855. See van der Woude, “Wicked Priests”; cf. Thiering, “Wicked Priest” (not viewing him historically at all).

856. Overman, *Crisis*, 329; see the argument of Goodman, *Ruling Class*.

857. See, e.g., Jos. *Ag. Ap.* 2.185; Sanders, *Judaism*, 187; Mason, “Chief Priests,” 175 (though emphasizing agreement with Luke that the high priest led an aristocratic council; that the Pharisees were more populist; and that the Sadducees were more skeptical, 175–76). On the priests, cf. also, e.g., Basser, “Priests.”

858. Sanders, *Figure*, 324; see, e.g., Jos. *Ant.* 20.206–7. For Josephus’s negative view of the Sadducees, see Baumbach, “Sadducees”; of some high priests (but not their office), Thoma, “Priesthood” (attributing it to Josephus’s pro-Hasmonean tendencies). For earlier abuses dominant in the time of the Annas family, see Puigdollers I. Noblom, “Grans sacerdots.”

The examples in his work may thus suggest (in keeping with our other contemporary sources) a broader corruption within the aristocratic ranks from which such priests were drawn.⁸⁵⁹ By the time of Felix, the high priests were so corrupt that they seized the tithes belonging to the poorer priests, allegedly leading many to starve (Jos. *Ant.* 20.181); when another aristocratic priest was seizing their tithes (20.206), his bold servants were beating those who refused to comply.

Of course, wealth and power often breed resentment. Archaeological sources confirm the literary portrayal of a priestly aristocracy.⁸⁶⁰ But even if some resentment of the Sadducees was due more to jealousy than to corruption, wealth and power would breed conflict with other groups, conflict that would naturally be settled the way such conflicts were normally settled in antiquity: by the dominant party's exercise of power. Such an exercise would always be viewed as abuse of power by those against whom it was wielded.

Repressed groups in Judea generally hated the group in power, and the group in power repressed its competition sufficiently to maintain power, until that power base disintegrated en route to and in the wake of the Judean-Roman war. Human nature leads us to expect nothing different. Luke's locating opposition to the Jesus movement primarily in the Sadducean aristocracy is historically plausible and not likely simply a Lukan construct.⁸⁶¹ Pagan literature also cites examples of corrupt priests (e.g., Plut. *Lys.* 26.1–3), and many in antiquity complained about corrupt priesthods.⁸⁶²

Even Pharisaic tradition respected the office of high priest,⁸⁶³ though Sadducees dominated it. The priesthood as a whole reportedly included both those committed to extrabiblically stringent purity rules (probably including Pharisees or their sympathizers) and those who were not (*y. Ter.* 6:1). Jewish high priests held considerable political authority,⁸⁶⁴ recognized even among Gentiles (Diod. Sic. 40.3.5–6). Contrary to traditional Israelite law, however, Roman officials freely gave and revoked the office of high priest; thus Quirinius installed Annas (Jos. *Ant.* 18.26), and Vitellius retired Caiaphas after Pilate's recall to Rome (18.95).⁸⁶⁵

(3) *Announcing the Resurrection in Jesus (4:2)*

Luke's audience knows that Sadducees reject the doctrine of the resurrection (Luke 20:27; Acts 23:8). Like Jesus's followers, Pharisees also preached an eschatological

859. Perhaps in part because I find myself more skeptical that religion often changes human nature, I am less sympathetic to their piety than is Sanders, *Figure*, 336. They probably acted in their own self-interest, as well as for the peace, in relations with the Romans (Horsley, "High Priests"). The charges may be stylized, sectarian polemic, as Sanders suggests (and against the priesthood in general he may be right, *Judaism*, 182–89), but one should not dismiss too readily the reasons for the polemic, which appear widely (cf. 1QpHab IX, 4–5; *Test. Levi* 14:1; 2 *Bar.* 10:18; *t. Menah.* 13:21 in Avigad, *Jerusalem*, 130; idem, "Burnt House," 71; Hengel, *Property*, 23); corrupt priesthods were common targets of polemic in the ancient Near East through the first century (Crocker, "Corrupt Priests"; cf. Plut. *Lys.* 26.1–3; Libanius *Declam.* 44.43). Cf., e.g., the later Ananias's servants, who beat poorer priests to seize their tithes (Jos. *Ant.* 20.181, 206).

860. See Fiensy, "Composition," 216–19. Osteoarchaeological evidence raises questions about the incidence of disease and injuries among the upper class (see Zias, "Mount Scopus Tomb"). For the pattern of a healthier upper class in antiquity generally, see, e.g., Toner, *Culture*, 134.

861. Cf. Haenchen, *Acts*, 214–15. There were apologetic reasons to attack the Pharisees (though this is much more dominant in Matthew and John, engaged in late first-century intra-Jewish polemic), although, after 70 C.E., there was no reason to appeal to any positive sympathies for the Sadducees.

862. See, e.g., Crocker, "Corrupt Priests." Apparently Egyptians resented local priesthods for their collaboration with Roman oppression (Toner, *Culture*, 167). Sanders, *Judaism*, 188, objects that stereotypical charges common against other priesthods do not apply to Jerusalem's.

863. See, e.g., *m. Hor.* 3:1; *y. Sanh.* 2:1, §2; Acts 23:5–6. Still, Pharisees could criticize the high priest (Jos. *Ant.* 13.288).

864. Smallwood, "High Priests."

865. Herod the Great was the first to set this precedent (Jos. *Ant.* 15.40; cf. Schille, *Apostelgeschichte*, 133).

resurrection of dead people, a theological difference that generated considerable conflict between themselves and the Sadducees.⁸⁶⁶ It is unlikely that the Sadducees employed police force to suppress the Pharisaic proclamation; the operative difference here, however, is that the apostles preached this doctrine “in Jesus.” That is, they preached not a theoretical hope for the future but that this hope was grounded in an event that had already occurred.⁸⁶⁷ Jesus’s resurrection was theologically inseparable from the corporate resurrection (hence the plural νεκρῶν),⁸⁶⁸ but as an accomplished event, it could not be contested in the same way. The portrayal that this view was central to apostolic preaching yet threatened the Sadducees recurs frequently later in Acts (see Acts 24:21; 25:19; 26:6–8; esp. 23:6–9).⁸⁶⁹

The Sadducees also had political reasons to be concerned about movements preaching resurrection; movements with partially realized or participatory imminent eschatologies—those who believed that they were inaugurating the kingdom—could pose a threat to Judea’s political stability and hence could ultimately invite potential Roman intervention.⁸⁷⁰ Indeed, that the Sadducees gradually vanished after 70 C.E. confirms that such instability threatened their own survival.⁸⁷¹

Further, the one in whom they proclaimed resurrection was an alternative authority to the priestly aristocracy,⁸⁷² and early Christian tradition implicates this aristocracy in his execution (Luke 20:19; 22:2, 4, 52, 66; 23:4, 10; 24:20; cf. Acts 13:27). (Paul also has his conflicts with them later [Acts 23:14; 25:2, 15].) One would not expect the priestly aristocracy to take well to public criticisms, which they usually did not need to tolerate (3:13–14, 17; 5:28). Leaders in various Mediterranean societies often viewed their own situations as tenuous and unstable;⁸⁷³ apart from the frequent change of high priests under Rome, certainly the priestly aristocracy made many enemies, as most sources from the rest of early Palestinian Judaism suggest.⁸⁷⁴

(4) Jailed Overnight (4:3)

Luke claims that the temple police jailed the apostles because it was already evening. Within the story world, many people had gathered in the temple courts for the

866. E.g., *Jos. Ant.* 18.14, 16; *Abot R. Nat.* 5 A; cf. *b. Sanh.* 90a. Finkelstein, *Pharisees*, 1:145, finds class conflict behind this theological difference; certainly the resurrection was a more popular view than that of the Sadducees.

867. Ladd, *Theology*, 324; idem, *Last Things*, 79; cf. Barrett, *Acts*, 219–20. The claim’s centrality was also a likely factor in its offensiveness (Hare, *Persecution*, 5).

868. Though it technically specifies only the plurality of the dead (cf. Luke 9:7; 16:30–31; 20:38; 24:5), the phrase typically implied a corporate resurrection. It appears frequently in Luke-Acts (20:35; 24:46; Acts 10:41–42; 13:30, 34; 17:3, 31–32; 23:6; 24:21; 26:23; most relevant here, Acts 3:15; 4:10) and other early Christian texts (e.g., Rom 1:4; 1 Cor 15:12–13, 21, 42; Heb 6:2; 1 Pet 1:3; Rev 20:5; 1 *Clem.* 24.1; *Did.* 16.6; *Barn.* 5.6). This future, corporate resurrection was the only one that early Judaism knew (see Jeremias, *Theology*, 309).

869. See Tannehill, *Acts*, 59.

870. Caird, *Apostolic Age*, 83.

871. Goppelt, *Times*, 57.

872. The best textual reading in Acts 4:1 says “priests” (ἱερεῖς) rather than “high priests” (ἀρχιερεῖς), but the context (4:5–6) suggests this sense, which probably also commended itself to the copyist who introduced the variant reading based on Luke’s usual style. On the high priesthood, see Stern, “Aspects,” 600–612.

873. They believed that those who were prominent provided the most prominent targets, as in, e.g., Corn. Nep. 1 (Miltiades), 7.5–6; 2 (Themistocles), 8.1–7; 3 (Aristides), 1.1–5; 7 (Alcibiades), 4.1–2; Babr. 4.6–8; 31.23–24; 64.10–11; Phaedrus 1.21.1–2; 2.7.14–15; 3.5.1; 4.6.11–13. Prominence was held to arouse envy, hence hostility, as in Corn. Nep. 5 (Cimon), 3.1; 8 (Thrasylbulus), 4.1–2; 12 (Chabrias), 3.3; 14 (Datames), 5.2; 15 (Epaminondas), 7.1; 18 (Eumenes), 7.2; 10.2; 19 (Phocion), 4.3; 23 (Hannibal), 1.2; Hdn. 3.2.3; Plut. *Demosth.* 26.5.

874. E.g., 1 QpHab IX, 4–5; *Test. Mos.* 5:4; *Test. Levi* 15:1; 2 *Bar.* 10:18; repeatedly in rabbinic sources. Granted, such charges come only from their opponents (Sanders, *Judaism*, 182–89, who argues that the charges are stylized polemic; cf. Botha, “Point of View”); it is likewise true that most groups had only opponents, rather than permanent allies, outside themselves. It is sufficient for my point, however, to observe how many opponents the Sadducees made and the concreteness of the accusations.

hour of evening prayer (Luke assumes knowledge of these hours; see comments on Acts 3:1), and so Peter had fresh ranks of hearers to whom to preach. Because the disciples went to the temple about 3:00 p.m., the coming of evening suggests that a few hours have passed; Luke again provides merely a summary rather than a transcript of Peter's preaching (cf. 2:40).

Still more widely known was the fact that most work stopped at night and would be suspended till the next morning. A prisoner's being confined overnight till a morning hearing appears in Greek novels⁸⁷⁵ but also emulates reality for urgent cases. That the authorities jailed the apostles overnight rather than try them in the evening fits what we know of nearly all public activities in antiquity (cf. Luke 24:29),⁸⁷⁶ including battles⁸⁷⁷ and court sessions.⁸⁷⁸ Thus, for example, the Roman senate convened even most emergency meetings (when confronting the Catiline conspiracy) at daybreak (Plut. *Cic.* 15.3; 19.1).

Luke's portrait contrasts with the Markan tradition of Jesus's (presumably illegal) night trial (Mark 14:53), which Luke omits, including only the more official morning hearing (Luke 22:66; though cf. 22:54; Mark 15:1).⁸⁷⁹ Jesus's night interrogation (Mark 14:53; cf. Luke 22:54) was a special emergency situation, and even in Jesus's case, Luke reserves the official hearing for daybreak (Luke 22:66).⁸⁸⁰ This is the first of many detentions in Acts (Acts 5:18–19; 8:3; 12:4–6; 16:23–27; 22:4; 24:27; 26:10), fulfilling Jesus's promise in Luke 21:12 and fulfilling part of Peter's earlier commitment (22:33), which Peter had failed to fulfill during the passion narrative.

II. CHURCH GROWTH DESPITE PERSECUTION (4:4)

Luke shows that the intervention of the temple elite, apparently after two or three hours of the apostles' public preaching, does not prevent the church's growth among the people. Part of Luke's emphasis is that nothing can stop the gospel (cf. Acts 28:31). A higher level of hostility would eventually force the movement to expand elsewhere (8:3–4; 12:17) temporarily (cf. 21:20), and the disaster of war and the city's destruction would scatter them from Jerusalem in the long term (Luke 21:20–22). But even then, God arranges that the movement as a whole continues to grow.

Three thousand people were already believers (Acts 2:41); the number had been growing (2:47) and would eventually, after a period of steep decline (8:1, 4; 11:19), reach much higher figures (21:20). Because Luke reports that the number "came to" five thousand, there is some debate whether he means the total number of believers in the Jerusalem church or the total number of those believing newly on that occasion. Even if he means the former,⁸⁸¹ he specifies here only the number of men, suggesting

875. It appears in three of thirteen court scenes there (Schwartz, "Trial Scenes," 112–13), as it also appears in only select court scenes in Acts.

876. E.g., Hom. *Il.* 2.387; 7.275–82; 8.529–30; 11.209; 14.259–61; Ap. Rhod. 4.1059; Dion. Hal. *Ant. rom.* 9.48.3; Arrian *Alex.* 1.19.2; Polyb. 5.86.1–2; Caesar *Alex. W.* 1.11; *Gall. W.* 2.11; Apollod. *Epit.* 4.2; Sil. It. 5.678; 13.254–55; Pliny *Ep.* 7.2.2; Philost. *Hrk.* 58.4.

877. E.g., Hdt. 1.74, 76; Polyb. 5.86.1–2; Vell. Pat. 2.27.3; Pliny *Ep.* 4.9.9. Their rarity made night attacks all the more devastating (Hom. *Il.* 10.100–101; Arrian *Alex.* 1.4.1).

878. E.g., Pliny *Ep.* 2.11.16, 18; 4.9.9; cf. forced dismissal of the senate (Cic. *Fam.* 1.2.3). Pliny views as indiscreet one speaker who continued after nightfall (*Ep.* 4.9.14).

879. Night trials were technically illegal according to our available sources (*m. Sanh.* 4:1; cf. also Pompey's interpretation of Roman law in Aul. Gel. 14.7.8).

880. Although Mark reports this morning meeting (Mark 15:1), he focuses on proceedings during the night (14:53–65, 72). The same sources that warn of night meetings' illegality portray the priestly authorities as disinclined to limit themselves by such rules (discussion in Keener, *John*, 1086).

881. With, e.g., Calvin. This estimate would, however, include only those of the three thousand thought to have remained in Jerusalem, i.e., not pilgrims.

a much larger total figure. The temple courts would have been the ideal place to make the most converts, since it would have been here, in Jerusalem's largest "public space," that people would have congregated in the largest numbers.⁸⁸² But this number is huge.⁸⁸³

Although some commentators allow that the number may be historical,⁸⁸⁴ more remain skeptical. Those who follow Jeremias's old estimate of Jerusalem's population (25,000–30,000) regard such numbers as incredible.⁸⁸⁵ But more recent estimates of ancient Jerusalem's population are consistently and considerably higher, undercutting the primary basis for this argument against authenticity (see comments on Acts 2:41).⁸⁸⁶ One need not suppose that the early Christians counted the crowd, but they did have an idea about how many new believers ended up in their meetings (cf. Judean churches in Gal 1:22) and probably how many baptisms would have been performed in following days (cf. Acts 2:41).

Fanciful estimates are common in ancient writings, especially haggadic and midrashic texts.⁸⁸⁷ At the same time, more sober military reports and censuses were more characteristic sources for most Greco-Roman historians. Thus Thucydides at one point admits that he cannot recount the number of either the Spartans or their enemies because the former keep their numbers secret and most people exaggerate the numbers of their enemies to make their own victories greater (or defeats smaller; Thucyd. 5.68.2). Granted, in such cases, casualty estimates⁸⁸⁸ and some other figures in the sources might be inflated estimates, but they were rarely utterly fanciful. Thus, when quoted numbers do not fit, Polybius finds the scribe a more believable source of the error than a historian (Polyb. 12.4.4–6). Some also point out that Luke's figure may include large numbers from the Judean countryside⁸⁸⁹ who visited the temple regularly (though their attendance would have been more expected on a Sabbath or feast day).

This is not to deny that the numbers are quite high relative to Jerusalem's size. Because only men (explicit in ἀνδρῶν) are counted,⁸⁹⁰ the total figure by this point (if this is a new number added to those in Acts 2:41, 47) is probably more than 10 percent of current estimates of Jerusalem's population.⁸⁹¹ Ancient estimates of Jerusalem's population (like Luke's estimate of the crowd) may have been higher than most modern ones, but even from our modern interpretation of the data, the figures nevertheless would appear massive (see comments on Acts 2:41). Josephus finds in all Judea more than four thousand Essenes (*Ant.* 18.20) and, at one point, more than six thousand Pharisees (17.42), although their proximity to education and influence may have limited the latter group's numbers. Luke's number is thus

882. On massive numbers of people congregating in public space, including temples, see Stambaugh, *City*, 111, 113.

883. Malina and Pilch, *Acts*, 42, note that classical Athenian thinkers such as Plato (*Rep.* 5) could attribute 5,040 citizens to an ideal city.

884. E.g., C. Williams, *Acts*, 81.

885. E.g., Haenchen, *Acts*, 215n2.

886. See Reinhardt, "Population Size," 237–50 (followed by some more recent commentators). The highest estimates (at 250,000) are doubtless too high; estimates from 70,000 to 85,000 seem more likely. On Luke's growth figures generally, cf. also discussion in Keener, "Plausibility."

887. E.g., *L.A.B.* 14:4 (more than nine million, not including women); 43:8 (adding 37,000 to Judg 16:27); *L.A.B.* 63:3 (though the LXX comes close and Josephus agrees); those slaughtered at Bethar in, e.g., *y. Ta'an.* 4:5, §10. For fuller discussion, see comments on Acts 2:41.

888. On ancient recognition that many exaggerated counts of enemy casualties, see, e.g., Xen. *Hiero* 2.16; Thucyd. 5.68.2.

889. D. Williams, *Acts*, 85–86.

890. Counting only men was a common practice (*L.A.B.* 5:7; 14:4; compare Matt 14:21 with Mark 6:44).

891. This would be even more if one quadruples the figure for men, as Kraeling, *John the Baptist*, 172, suggests (attributing the rapid growth to the less urban influence of John's ministry); more conservatively, one might simply double it.

not small. Also possibly significant for Luke, Jesus fed a crowd estimated at exactly this size (Luke 9:14).⁸⁹²

If ὥς is original, it would certainly fit Luke's characteristic style. Following the custom of good ancient historians,⁸⁹³ he is generally explicit when a figure is merely an approximation (Luke 3:23; 9:14, 28; 22:41, 59; 23:44; Acts 1:15; 2:41; 10:3; 19:7). This usage is rarer among other NT writers except John (John 4:6; 6:10, 19; 11:18; 19:14, 39; though also Matt 14:21; Rev 16:21).⁸⁹⁴

III. THE POLITICAL ELITE CONFRONT THE APOSTLES (4:5–7)

Preaching and even drawing crowds in the temple was not illegal; intervening against such preachers was a delicate matter unless it was possible to first discredit them publicly (cf. Acts 5:26; Luke 20:19–22, 27–33). Publicly denouncing the leadership and their decisions, however, appeared to be political subversion; even if Peter attributed Jesus's execution to Israel as a whole as well as to the leaders and mitigated it with ignorance (Acts 3:17), it was clear to everyone that Jesus's execution involved primarily the activity of the government. Even if the details of the night arrest were unknown, the chief priests' participation thereafter was public knowledge (Luke 23:10, 13; 24:20), and Jesus's disciples, being eyewitnesses, could also make known these officials' participation in that secret arrest (cf. 22:52–54). (The disciples did not seem inclined to keep such matters secret but were ready to make public what they saw as injustices against God's purposes [cf. Acts 4:23, 26; 13:27; 26:10–12].)

This concern of the officials becomes explicit in 5:28: they accuse the apostles of bringing Jesus's blood on them. The issue is not only the perception that the apostles want them to hand over their political power; the issue is also that the apostles are publicly dishonoring them. Honor was a paramount value in this society. Thus for the elite to admit error on a capital case, and still more to admit it in executing Israel's promised Messiah, would shame them for incompetence. Likewise, to admit error in their Sadducean denial of messiahs and resurrections was to abandon all that they stood for, hence their public honor. By contrast, Jesus's apostles counted it honorable to suffer public shame for his name or reputation—that is, to honor him (5:41). As always, the exalted would be humbled, and the humble exalted (Luke 1:52; 10:15; 14:11; 18:14; so also with Jesus, Acts 2:33; 5:31).

(1) Rulers, Elders, and Scribes (4:5)

On the only earlier occasion where Luke describes rulers (taken as the high-priestly leaders), elders, and scribes gathering, they meet to condemn Jesus (Luke 22:66; cf. Acts 4:26–27). Although this prior incident might build suspense concerning the outcome here, it also prepares for the denunciation of such leaders (Acts 4:10). Their gathering may also contrast with the divinely empowered gathering (also using συνάγω) of believers in 4:31.

“Rulers” could refer to temple administrators (the term sometimes translates *sagan* in the LXX) but more likely refers to the ruling priests, who appear alongside “scribes” and “elders” in the Gospel (Luke 9:22; 20:1; cf. 22:6), though not in Acts

892. Cf. C. Williams, *Acts*, 81; also Bede *Comm. Acts* 4.4 (Martin, *Acts*, 47; L. Martin, 49). Perhaps the number portrays the disciples in Jerusalem as carrying on Jesus's ministry; but even Johnson, *Acts*, 76, suspects that this is coincidence (possible in view of other numbers in the narratives, e.g., Acts 2:41; 21:20); Luke neglects the opportunity to draw parallels (though a communal meal hardly fits this narrative; in contrast to 2:41–42, he could not have included one here).

893. Ramsay, *Bethlehem*, 197–98.

894. For ὥς and ὡσεὶ meaning “like,” compare Luke 3:22 with Mark 1:10 (Matt 3:16 agrees with Luke); Luke 22:44; Acts 2:3; 6:15.

6:12.⁸⁹⁵ The term “elders” can apply to local synagogue leadership (Luke 7:3) but can also be connected with chief priests and scribes as Jesus’s adversaries (9:22; 20:1; 22:52) or as adversaries of the Jerusalem apostles (Acts 4:5, 8, 23), Stephen (6:12), or Paul (23:14; 25:15; cf. 24:1). Likewise, the Jesus movement used the term for local congregational leaders (14:23; probably 20:17) but also the leaders of the Jerusalem church (11:30; 15:2, 4, 6, 22–23; 16:4; 21:18).

Josephus also portrays elders ruling (e.g., *War* 2.267, 571), for example, alongside rulers in David’s time (*Ant.* 7.26, 28, 41, 78) and later (8.99); they also led alongside the priests (12.406; 13.124). These could be leaders in Jerusalem (11.306) or of the tribes (12.39, 56–57, 86–87, 91, 101). Josephus speaks of a *γερουσία*, a ruling council of elders, some twenty-nine times; the term appears thirty-five times in the LXX. This Jewish usage reflects wider Mediterranean usage, where a *γερουσία* could also be linked with a “sanhedrin.”⁸⁹⁶ On the governing role of “elders,” see further comments on Acts 11:30; 14:23. If Luke’s audience envisions the apostles the way they would have envisioned typical disciples, the apostles here are young men, like Saul (Acts 7:58).⁸⁹⁷ Not only were the apostles of lower social status, but they would also be much younger than these “elders” in a culture that valued age.

The Christian tradition that essentially equates “scribes and Pharisees” with the whole of the Jewish people (e.g., Justin *Dial.* 17) is a wholesale misrepresentation of the evidence (if Josephus’s estimate of six thousand Pharisees is proportionate to his population estimates, the Pharisees formed far less than 1 percent of the Judean population). Granted, some scribes may well have been Pharisees,⁸⁹⁸ given the Pharisees’ popular reputation for skill in the law and their availability for training. Many of the scribes may have been priests,⁸⁹⁹ who may have been better equipped financially to pursue such training.⁹⁰⁰ Elsewhere in the Mediterranean world, priesthoods often preserved laws (cf. Val. Max. 2.5.2).

Luke expects some of the scribes to be Pharisees (Acts 23:9, referring to the Sanhedrin; Luke 5:30) and sometimes portrays them as acting in concert (Luke 5:21; 6:7; 11:53; 15:2), but he also recognizes a distinction (11:45). On other occasions they are linked with rulers in Jerusalem, in the Sanhedrin, as here (Luke 9:22; 19:47; 20:1, 19; 22:2, 66; 23:10; Acts 6:12).

In the villages of the Roman Empire, “scribes” were literate (not always well-educated) professionals who executed legal documents.⁹⁰¹ Such persons also existed

895. Lake and Cadbury, *Commentary*, 41 (noting that “Josephus also uses ἄρχοντες as a synonym for ἀρχιερεῖς”). The title is also valuable to Luke from a literary standpoint, as noted in Marshall, “Acts,” 550; it fulfills the citation in Acts 4:26 (Ps 2:2) and possibly also two texts against trusting in “princes,” Ps 118:9 (Peter will cite from this psalm in Acts 4:11) and Ps 146:3 (which Acts will use in Acts 4:24).

896. E.g., *IGRR* 4.836.8 (BDAG); cf. other Gentile examples in, e.g., Diod. Sic. 14.113.7–8; *SIG* 1112.1–2 (BDAG).

897. Although Peter is married (Luke 4:38; cf. Mark 1:30), John, in widely known gospel tradition, still worked for his father at the time of his calling (Mark 1:20; cf. Luke 5:10). Many of the disciples may have been young. On disciples in their teens, see, e.g., Jos. *Life* 10; *m. Ab.* 5:21; Eunapius *Lives* 493; Stamps, “Children,” 198; comments on Acts 22:3.

898. Cf. Sanders, *Figure*, 177–78; cf. Rivkin, *Revolution*, 138, 178–79 (seeking to identify Pharisees with rabbis).

899. Sanders, *Jesus to Mishnah*, 80; idem, *Figure*, 170–71; for priests as teachers, cf. Ezek 44:23; Mal 2:7; Jos. *Ant.* 8.395. Relevant here are scribes of the temple (Jos. *Ant.* 11.128; 12.142).

900. The wealthier priests (cf. Jos. *Life* 63; *Ant.* 20.213), not the poorer ones (as in *Ant.* 20.207). Some Qumran sectarians also viewed priests as teachers, but they specified that they should be from the Zadokite line (4Q163 frg. 22, albeit reconstructed). More fully on scribes, see Twelftree, “Scribes”; Keener, *Matthew*, 537–38; on the high priests, e.g., Reid, “Sacrifice,” 1048–49; on the elite classes, see Stern, “Aspects,” 580–621 (on the priests, 580–612; for aristocratic priests, 600–612).

901. *CPJ* 1:157, §21; 1:188–89, §43; Lewis, *Life*, 82.

in Palestine and surrounding territories.⁹⁰² Yet the Gospels and Acts (employing the title about sixty times) can hardly apply the term in so broad a sense, and ancient views of special education in Judea⁹⁰³ suggest that many “literate” professionals did more than execute documents (cf. Ezra 7:10–11; 1 Macc 5:42).⁹⁰⁴ Presumably, many also instructed children in reciting the law, and the more advanced among them would have had adult disciples (i.e., disciples older than thirteen). Occasionally later rabbis could look ill upon their scribal predecessors, perhaps recognizing their great responsibility to guide Israel rightly (*’Abot R. Nat.* 36 A).⁹⁰⁵

Some scholars also suggest that Luke or his source borrows the phrase from the LXX, where γραμματεὺς translates not only “scribe” but also “officer” regularly among the Levites.⁹⁰⁶ The term γραμματεὺς also applied to secretaries of associations⁹⁰⁷ and of councils, the latter case sometimes representing a high office (see comments on Acts 19:35).⁹⁰⁸ Some highly literate scribes knowledgeable in Israel’s laws might become leading teachers of the people, and some, but perhaps a minority, belonged fully to the Pharisaic sect.

(2) *The Sanhedrin (4:5)*⁹⁰⁹

The assembly described in Acts 4:5 consists of the same groups as Jerusalem’s “council,” or Sanhedrin (Luke 22:66); Luke clearly intends this identification here (explicit in Acts 4:15).⁹¹⁰ The identification is already clear to Luke’s audience here if they can associate the “rulers” with the high-priestly aristocracy (cf. Luke 9:22; 20:1; esp. 22:66).⁹¹¹

A συνέδριον was a ruling council, equivalent to a βουλή, or “senate.”⁹¹² Cities such as Tiberias had their own ruling senates composed of the leading citizens (Jos. *Life* 64, 69, 169, 313, 381); such elite assemblies were distinguishable from the larger citizen assembly (*Life* 300).⁹¹³ Josephus applies the term both to Jerusalem’s council

902. Cf. Goodman, *State*, 59; Sanders, *Figure*, 179.

903. Cf. Stern, *Authors*, 8–11, 46, 50.

904. The function of Diaspora synagogue “scribes” (*CIJ* 1:12, §7; 1:18, §18; 1:21, §24; 1:70, §99; 1:84, §121; 1:85, §122; 1:88, §125; 1:100, §142; 1:103, §145; 1:104, §146; 1:106, §148; 1:107, §149; 1:130, §180; 1:158, §221; 1:161, §225; 1:250, §318; 1:275, §351; 1:326, §433; 1:337, §456; perhaps 1:27, §36; cf. 1:545, §22, but probably pagan) is unclear; they could be scholars (cf. “law-t[eacher],” 1:140, §201; “the wise,” 1:519, §719), secretaries (as in usual Greek usage; see esp. Leon, *Jews of Rome*, 184–85), or something else (Ferguson, *Backgrounds*, 454–55; cf. *CIJ* 1:xcii–xciv)—e.g., one could be nineteen years old (*CIJ* 1:196, §279) or, more incredibly (probably honorary), twelve (1:200, §284, but possibly non-Jewish).

905. For distinctions between legal scribes and more authoritative rabbis, Overman, *Crisis*, 205, cites *m. Kelim* 13:7; *Or.* 3:5; *Sanh.* 11:3; *Tehar.* 4:7; *Yad.* 3:2. For further documentation on scribalism, see also Scott, *Customs*, 165–68; Keener, *Marries Another*, 23, 145–46; on “scribes” as scholars, see Pogoloff, *Logos*, 160–72. In the Tanak, Philo, Josephus, and rabbis, see Orton, *Scribe*, 39–61; in ben Sira, 65–75; in apocalyptic literature, 77–120; in the Dead Sea Scrolls, 121–33.

906. See Le Cornu, *Acts*, 223, citing 1 Chr 23:4; 26:29; 2 Chr 19:11; 34:13.

907. Klauck, *Context*, 46; probably *CIJ* 1:545, §22. Traditionally, Greeks honored ordinary scribes or secretaries more than Romans did (Corn. Nep. 18 [Eumenes], 1.5).

908. Even in villages, petitions could address the village scribe as an official of some sort (*BGU* 1256.1–2; P.Tebt. 39.1).

909. Developed from Keener, *Matthew*, 614–16; idem, *John*, 1074–76.

910. Likewise, the Sanhedrin appears in the later arrest (Acts 5:21, 27, 34, 41), identifying itself with the earlier group that arrested representatives of the apostles (5:28).

911. Luke distinguishes yet links them in Luke 23:13. But the role of the high priest and his family both in Luke-Acts and in other literature indicates that the high-priestly elite formed the heart of the ruling elite.

912. See, e.g., Rhodes, “Synhedrion.” Συνέδριον is a broad rather than restrictive term, applicable also in Greek texts to an informal assembly of advisers (Diod. Sic. 13.111.1) or, frequently, to Rome’s “senate” (e.g., 40.1.1; Dion. Hal. *Ant. rom.* 5.70.5; 6.30.2; 6.81.1; 6.85.2; 8.69.2; 9.32.5; 10.2.6; 12.1.14; 12.6.2 [4]); in these texts, it appears interchangeably with βουλή, a more common term, e.g., Dion. Hal. *Ant. rom.* 5.71.1; 6.1.1; 6.21.1; 6.81.4). Usage was broad; a βουλή traditionally could constitute a local council (Aristoph. *Knights* 475, 653) but also a leader’s war council (Hom. *Il.* 2.84).

913. Officials could also assemble their own administrative “councils” from among their friends (e.g., Jos. *Life* 368).

(*Ant.* 14.167–68, 170–72, 175, 177–80; *Life* 62) and to district councils (*Ant.* 14.91).⁹¹⁴ This usage is not surprising. The term “Sanhedrin” was widely used, for example, in Achaia,⁹¹⁵ though βουλή (which is employed throughout this excursus as a synonym) appears more often there.⁹¹⁶

The similarity in terminology to other ruling councils is no coincidence. Rome ruled through local aristocracies, in Judea as elsewhere.⁹¹⁷ Municipal senates consisted of aristocrats the Romans called “decurions,”⁹¹⁸ and in the eastern Mediterranean “varied in size from thirty to five hundred members.”⁹¹⁹ (See discussion of decurions at Acts 13:50.) Local senates often had property qualifications, and sometimes those who wished admittance to such senates, especially if beyond the requisite number of members, had to pay significant fees.⁹²⁰

Jerusalem’s Sanhedrin was the ruling council for Jerusalem, the major urban center that watched over Judea; just as the Roman senate wielded power far beyond Rome because of Rome’s power, Jerusalem’s Sanhedrin wielded some influence in national affairs to the degree that Roman prefects and Herodian princes allowed.⁹²¹

The wealthiest elite dominated municipal aristocracies of the Mediterranean world, and the dominance of a priestly aristocracy in Judean affairs was a lasting legacy of the Maccabean era.⁹²² Priestly Sadducees dominated the Sanhedrin and were mainly loyal to Rome. “In Judea, as elsewhere, the local aristocracy was the municipal equivalent of the Roman Senate—conservative, wealthy, hereditary, and, above all, loyal to the purposes of the Empire.”⁹²³ Some of the “scribes” may have been Pharisees, but Pharisees were not dominant in the Sanhedrin,⁹²⁴ despite Josephus’s possible favoritism toward Pharisees.⁹²⁵

At some point the Sanhedrin may have held seventy-one members, as tradition indicates;⁹²⁶ it is, however, doubtful that all members were expected to be present on all occasions (especially an emergency meeting on the night when people had eaten the Passover). The number could reflect an average or an ideal number of members

914. See Twelftree, “Sanhedrin,” 1061. Cf. also spontaneously assembled councils (*Life* 368), noted above; the title also could apply to the management board of the Ephesian Artemis cult (*I. Eph.* 1a.28; 3.945, 951, 966; Horsley, “Inscriptions of Ephesos,” 143n158).

915. See Meritt, *Inscriptions*, 57, no. 76.7 (albeit reconstructed).

916. E.g., *ibid.*, 57, no. 86.1; 107.2.

917. Étienne et al., “Romanisation,” 106. On local ruling classes in the empire, see Brunt, “Romanization.” Local aristocrats often adopted elements of Roman (or, in the East, a blend of Hellenistic and Roman) culture whereas others sometimes emphasized their local traditions more heavily (Bénabou, “Résistance,” 375).

918. Municipal senators who governed a city and its countryside were of the *ordo decurionum*, the order of decurions.

919. Jeffers, *World*, 186.

920. In *Pliny Ep.* 10.112.1, one thousand to two thousand denarii (the debate was whether those elected should also pay the entrance fee, 10.112.2). Former civic officials became members of senates (*Pliny Ep.* 10.79.1; 10.80).

921. Overman, *Crisis*, 372–73, 385, regards the Sanhedrin as a Roman political institution, although conceding that “some of the local Jewish elite may have been involved.” Yet in cities such as Jerusalem, Rome ruled through municipal aristocracies—here pro-Roman Jewish aristocrats.

922. Sanders, *Jesus to Mishnah*, 79 (noting the high priests’ leadership in the Sanhedrin; also priests as generals in *Jos. War* 2.566–68).

923. Gager, “Class,” 105. Toward the beginning of the war, some younger members of the priestly aristocracy also became disaffected, but their resistance could not long unite with the less aristocratic nationalists.

924. Brown, *Death*, 350–52.

925. *Jos. Ant.* 18.15, 17; cf. *Life* 1, 12; *Ant.* passim; Brown, *Death*, 353–56.

926. *M. Sanh.* 1:6; cf. later *Tg. Neof.* 1 on Exod 15:27. Cf. also Josephus’s Galilean council of seventy members in *War* 2.570; *Life* 79 and that of the Zealots in *War* 4.336, both undoubtedly following a standard contemporary model; the models probably ultimately derive from Mosaic tradition (Exod 24:9; Num 11:16, 24; cf. Ezek 8:11). Josephus also assumed a council of seven judges as a lower court in every city (*War* 2.571; *Ant.* 4.214).

in the elite body.⁹²⁷ If tradition regarding its size is even approximately correct, Jerusalem's senate, or Sanhedrin, was not particularly large; such bodies in the eastern Mediterranean ranged from thirty to five hundred.⁹²⁸ The Sanhedrin included the high priest, who according to tradition could break ties in voting.⁹²⁹ Again according to tradition, its members met in the Chamber of Hewn Stone on the Temple Mount;⁹³⁰ otherwise they met close to the Temple Mount (cf. Jos. *War* 5.144).⁹³¹ Our first-century sources, the NT and Josephus, include Sadducees and other groups in the Sanhedrin, under high-priestly control; later rabbis portray the Sanhedrin as an assembly of rabbis.⁹³² The later portrayals should not surprise us; rabbinic portraits of the Sanhedrin include more striking anachronisms than this, by depicting leaders of the Sanhedrin in biblical times.⁹³³

According to rabbinic (and probably Pharisaic) ideals, judges who proved themselves locally could be promoted to the Sanhedrin (*t. Šeqal.* 3:27), but in actuality the Sanhedrin in the apostles' day probably consisted mainly of members of the Jerusalem aristocracy and wealthy landowners in the vicinity. Rulers could use sanhedrins, or assemblies, the way some politicians today use committees: to secure the end they wanted without taking full responsibility for the decision. Although Rome held authority over the Sanhedrin, it seems to have supervised them closely, primarily in the wake of publicly scandalous abuses (as in Jos. *Ant.* 20.201–3).

Before Herod came to power, the Jerusalem Sanhedrin exercised significant authority (Jos. *Ant.* 14.177). In Josephus, rulers such as Herod appointed the Sanhedrin members they wished and obtained the results they wished.⁹³⁴ After appointment by Herod the Great, the group's membership was probably self-selecting⁹³⁵ and hence undoubtedly represented the most powerful political interests, most commonly associated with traditional aristocratic priestly families. In Pilate's time, without Herod the Great's interference and with the Romans expecting local aristocracies to

927. Brown, *Death*, 348–49, doubts that an exact list of seventy-one members existed in the first century, suggesting that it merely included elders from distinguished families alongside chief priests, representatives of whom were expected to appear. He may be correct.

928. Jeffers, *World*, 186. In the late republic, the Roman senate numbered more than a thousand, but Augustus reduced it (Suet. *Aug.* 35.1).

929. Cf. Ferguson, *Backgrounds*, 453. An odd number to break a tie made sense; as in Roman law (Dion. Hal. *Ant. rom.* 7.64.6; Quint. *Decl.* 254 intro; 254.6, 18–19; 314 intro; 314.12), a tie vote would yield acquittal.

930. *T. Šeqal.* 3:27; *Sipre Deut.* 152.1.2; *b. Yoma* 25a; *Gen. Rab.* 70:8; *Num. Rab.* 19:26; *Ecl. Rab.* 1:1, §1; some traditions made this the world's center (*Num. Rab.* 1:4). A location near the temple is not surprising; at times, other peoples' leaders could use temples (the senate in Cic. *Fam.* 8.4.4).

931. For bibliography on the Sanhedrin, see Safrai, "Self-Government," 418 (the section on the Sanhedrin is 379–400). Josephus generally prefers the term "sanhedrin," "assembly," in *Antiquities of the Jews* and βουλῆ, "council," in the *War*. The rabbis believed that God supported the decrees of the rabbinic *Beth din hagadol*, great assembly (*Exod. Rab.* 15:20), on which Israel rightly depended (*Song Rab.* 7:3, §1; *Lam. Rab.* 2:4, §8).

932. Cohen, *Maccabees*, 156. The Sanhedrin appears often, albeit in idealized form, in later rabbinic literature (e.g., *m. Sanh.* passim; *Pesiq. Rab Kah.* 27:9); rabbis elaborated Israel's dependence on the Sanhedrin (e.g., *Song Rab.* 4:1, §2; 7:5, §2). See now also Grabbe, "Sanhedrin," against most of the later rabbinic image of the Sanhedrin.

933. E.g., *b. Ber.* 3b; *Gen. Rab.* 74:15; *Exod. Rab.* 1:13; *Pesiq. Rab.* 11:3; *y. Sanh.* 7:5, §5; 10:2, §8; *Tg. Ps.-J.* on Lev 24:12; *Tg. Ruth* 4:1, 4; *Tg. 1 Chr.* 18:17; *Tg. Qoh.* 2:10; *Tg. Rishon* on Esth 2:21. Cf. also the eschatological and heavenly Sanhedrin, composed of angels or scholars (*'Abot R. Nat.* 32 A; *b. 'Abod. Zar.* 36a; *B. Meši'a* 75a; 85b; 86a; *Giṭ.* 68a; *Mak.* 13b; *Pesaḥ.* 53b; *Šabb.* 129b; *y. Sanh.* 1:1, §4; 11:5, §1; *Gen. Rab.* 49:2; 64:4; *Exod. Rab.* 12:4; 30:18; *Lev. Rab.* 11:8; 24:2; 29:1, 4; *Num. Rab.* 3:4; 18:4; 19:3; *Ruth Rab.* 4:3, 5; *Ecl. Rab.* 1:11, §1; 2:12, §1; 5:11, §5; *Song Rab.* 3:11, §2; *Pesiq. Rab Kah.* 23:4; 24:11; *Pesiq. Rab.* 15:19; Keener, "Heavenly Court").

934. See Sanders, *Figure*, 482–83; cf. Jos. *Ant.* 15.173; 20.216–18. If we may take Josephus literally, Herod executed the former sanhedrin that had resisted him (*Ant.* 14.175); he could then assemble his own councils as needed (*Ant.* 16.357, 360; 17.46).

935. Cf. Rapske, *Custody*, 105.

administer the business they could (cf. Jos. *War* 2.331, 405; *Ant.* 20.11), we should not be surprised that chief priests would convene a sanhedrin (*Ant.* 20.200), especially since the priestly aristocracy constituted a large portion of it.⁹³⁶ We should also not be surprised if the Sanhedrin found the support of Rome in their interests, since its members maintained their status by virtue of Roman benevolence.⁹³⁷ Fewer than four decades after the events the Gospels describe, Jerusalem's aristocracy continued to act as a body. When the high priest and the leading Pharisee allegedly acted without the approval of the rest of the assembly, they provoked that assembly's anger (Jos. *Life* 309).

A small minority of scholars, wishing to harmonize the later rabbinic portrait of the Sanhedrin with the one found in Josephus and early Christian sources, have opted for two Sanhedrins—the religious Sanhedrin of the rabbis and the political Sanhedrin attested in first-century sources. Some of these scholars argue that the political Sanhedrin tried Jesus, thereby exonerating the religious Sanhedrin of the rabbis. One scholar favoring the rabbinic picture has even argued that the Gospels and Acts are late sources on this matter, with changes into the fourth century.⁹³⁸ Nevertheless, even apart from textual evidence to the contrary, evidence within the early Christian texts refutes this theory: later writers fail to clear up conflicts and to impose later theology.⁹³⁹ In the final analysis, it is simply anachronistic to reject all our first-century portraits on the basis of later, idealized rabbinic accounts, although reliable tradition may remain in them at points. Few scholars have therefore accepted the double-Sanhedrin thesis.⁹⁴⁰

After examining Josephus's three mentions of "Sanhedrin" and five of βουλή,⁹⁴¹ Brown concludes that Josephus's portrait of the Sanhedrin is quite close to that of the Gospels and Acts.⁹⁴² It judges, consists of "chief priests, scribes, and rulers or influential citizens (= elders)," sentences those found guilty of crimes, and constitutes the leading Jewish body with which Roman rulers would deal. Clearly, it "played a major administrative and judicial role in Jewish self-governance in Judea."⁹⁴³

It is not clear from first-century sources how frequently and formally this senate met; presumably, they would assemble as often as other municipal aristocracies, though this frequency need not imply that every member would be present (see discussion at Acts 22:30). On this occasion, however, especially with a meeting postponed till morning (Acts 4:3, 5) and given how rapidly important information would spread (see comments on Acts 19:10), here likely through messengers or servants, the percentage of attendance could be substantial.⁹⁴⁴ A meeting place on or near the Temple Mount itself is very likely. Rabbis called the meeting place the

936. Cf. Sanders, *Figure*, 484–87; Jos. *War* 2.331, 336; *Ant.* 17.160, 164; 20.216–17; probably the municipal aristocracy in *Ant.* 14.91, 163, 167, 180; *Life* 62.

937. Spencer Kennard, "Provincial Assembly" (though, in view of Josephus's portrait, he may overstate their loyalty to Rome).

938. Mantel, *History of Sanhedrin*.

939. Sutcliffe, "Review."

940. See Blinzler, *Trial*, 15, 140; Brown, *Death*, 343–48; Grabbe, "Synagogue," 1730–44, esp. 1743.

941. Jos. *War* 2.331, 336; 5.142–44, 532; *Ant.* 20.11, 200–201, 216–17; *Life* 62.

942. Brown, *Death*, 342–43.

943. *Ibid.*, 342–43.

944. Dunn, *Acts*, 52, suggests only the high priest's advisers and some others, doubting that the highest court would be convened for this. Although the term can apply to ad hoc groups (see Levine, *Hellenism*, 88–90) and this narrative would fit an assembly limited to ranking Sadducees, there is no reason to doubt that the court met often (and members counted participation honorable, as with elders in ancient Israelite towns, Deut 22:15; 25:7; Josh 20:4; Ruth 4:1–2; 2 Kgs 6:32; Prov 31:23; Lam 5:14; Ezek 8:1; Zech 8:16). Well-to-do Roman aristocrats such as Pliny certainly invested considerable time in court and Rome's senate.

Chamber of Hewn Stone;⁹⁴⁵ first-century evidence suggests a site on the east end of a bridge over the Tyropoeon Valley, near the western end of the temple (Jos. *War* 5.144).⁹⁴⁶ Other municipal senates could meet in temples.⁹⁴⁷ (See fuller discussion of the meeting place at Acts 23:5.)

(3) *Named High Priests (4:6)*

Luke writes as if his audience may be familiar with the names he lists, or at least gives the impression that he possesses (and this could also be the point he is making) secure historical information. He may at least safely assume his audience's knowledge of Annas and Caiaphas, whom he earlier introduced as high priests (Luke 3:2). The high priest presided over the ruling council and hence was Jerusalem's most powerful permanent resident, to whom the Roman prefect would likely defer many decisions.

Annas the high priest is Ananus I, son of Seth, who held the highest office from 6 to 15 C.E. (One should not be surprised how frequently variant names such as Annas and Ananias appear for different individuals in Acts [e.g., Acts 5:1; 9:10; 23:2]; the names were quite common in Palestine and need not imply any deliberate narrative connections.)⁹⁴⁸ The Roman governor Quirinius put this chief priest in office (Jos. *Ant.* 18.26), and five of his sons (20.198) as well as his son-in-law Joseph Caiaphas became high priests after him. Rome might change the highest official but often preferred to retain the hereditary dynasty in power.⁹⁴⁹

That Caiaphas held power as long as he did (nineteen years) reinforces the suspicion that one acquires from other nonpriestly sources concerning the character of the high priesthood: he was a skilled but probably often ruthless politician. He kept the public peace in a manner that satisfied both Rome and the populace, and thereby preserved his own position.⁹⁵⁰ He was well-to-do⁹⁵¹ and part of the most hellenized elite⁹⁵² and hence had much at stake personally in keeping the peace.

Some scholars suggest that Luke was incorrect about Annas being the "high priest,"⁹⁵³ since Caiaphas was officially high priest in this period (cf. John 18:13; Jos. *Ant.* 18.35, 95).⁹⁵⁴ But elsewhere Luke reveals his awareness that Annas and Caiaphas shared high-priestly authority in this period (Luke 3:2; cf. here "high priestly family"). This observation fits the likelihood, given the continuing dynasty over whom Annas

945. *M. Pe'ah* 2:6; *'Ed* 7:4; *Mid.* 5:4; *Sipre Deut.* 152.1.2; *b. Yoma* 19a; cf. *Sanh.* 11:2; *Tamid* 2:5; 4:3.

946. A nearby site (the same one?) in Jos. *War* 2.344 appears spacious enough to hold large crowds and so perhaps was used especially for public deliberations, with private hearings in nearby chambers. Cf. the hall's destruction in 6.354. Cf., e.g., Jerusalem Map B in *Brill's New Pauly*, 6:1171.

947. Though Rome had its own senate house, cf. the meeting in the temple of Apollo in Cic. *Fam.* 8.4.4.

948. E.g. (including feminine forms), Luke 2:36; *CIJ* 1:62, §88; 1:228, §290; 1:244, §310; 1:314–15, §411; 2:127, §907; 2:155, §967; 2:186, §§1013–14; 2:195, §1066; *CPJ* 1:165–66, §24; and nearly fifty times in the LXX. It was not common in the Diaspora, however, where Luke was from (Williams, "Names," 85).

949. Two high-priestly families dominated the first-century high priesthood. Later rabbis preserved tales of the wickedness of some of the final aristocratic priests (*b. Pesah.* 57a).

950. Stauffer, *Jesus and Story*, 102. (Stauffer [54] thinks that Caiaphas "held his peace" when Pilate introduced standards into Jerusalem; but Jos. *Ant.* 18.57–59 is unclear.)

951. See the so-called Caiaphas family tomb, although the precise name of the owner remains debated (Riesner, "Familiengrab"; Reich, "Inscriptions"; idem, "Name"; Evans, "Caiaphas Ossuary"; idem, "Excavating," 327–28). Even if it did not belong to Caiaphas himself, it probably belonged to aristocratic priests (see Horbury, "Ossuaries") and so illustrates the point; for health advantages of Jerusalem's upper class, cf. Zias, "Mount Scopus Tomb." At the time of this book's writing, the current verdict is that the tomb did belong to Caiaphas (see Zissu and Goren, "Ossuary," brought to my attention by Craig Evans, May 5, 2012), but the debate is continuing.

952. On pagan features of the tomb, see Greenhut, "Tomb"; idem, "Cave"; Evans, "Excavating," 329 (noting the coin in a skull's mouth in the same tomb, though Evans does not insist that the tomb is Caiaphas's).

953. E.g., Winter, *Trial*, 33; Pervo, *Acts*, 115.

954. On Caiaphas, see further comments in Keener, *John*, 853–54, 1089–90; Bielecki, "Problems"; for a proposed site for his palace, McRay, *Archaeology*, 199–202.

reigned as *paterfamilias*, that he continued to exercise considerable influence after Caiaphas, his son-in-law, assumed office.⁹⁵⁵ After Vitellius, legate of Syria, deposed Caiaphas in 36 C.E., he replaced him with Jonathan son of Annas (Jos. *Ant.* 18.95); in time all five sons of Annas followed in office (20.198), suggesting that Annas had in fact exercised considerable influence before his death in 35 C.E. None of these factors would justify regarding Annas as the highest priest, but he may have retained the title as one of respect, something like retired U.S. presidents.⁹⁵⁶ Josephus does, indeed, suggest that even former high priests could retain the title “high priest” (e.g., 20.204). Annas certainly also retained respect in a situation where many Jews must have been frustrated by Rome’s authority to depose and appoint high priests.

More important, Luke clearly employs the term “high priests” in the plural for all the leading priests (Luke 9:22; 19:47; 20:1, 19; 22:2, 4, 52, 66; 23:4, 10, 13; 24:20; Acts 4:23; 5:24; 9:14, 21; 22:30; 23:14; 25:2, 15; 26:10, 12); this usage appears in the adjective “high-priestly” in Acts 4:6 itself. Josephus uses the plural “high priests” more often than does Luke; it was simply the standard terminology of the era.⁹⁵⁷ Perhaps under foreign influence, Jewish writers came to speak of the priestly aristocracy or high-priestly family as high priests, rather than merely the ruling chief priest, the *kohen hagadol* of the OT.⁹⁵⁸ Luke’s frequent use of the plural (twenty-two times, or one-third of NT uses in the plural) thus reflects the standard usage of his day (in Acts, this usage first appears in 4:23; then 5:24).

Hebrew names such as “John” and “Jonathan” were not unusual⁹⁵⁹ and appear among members of the high-priestly dynasty (Jos. *Ant.* 18.95). “Alexander” is a good Greek name, rare among Palestinian Jewish peasants but common among Jerusalem aristocrats and in the Diaspora.⁹⁶⁰ Greek names in general were especially popular with the Jerusalem aristocracy, in contrast to “the heavily Aramaised peasantry of Galilee.”⁹⁶¹ Indeed, the elite absorbed various Greek customs as well as names.⁹⁶²

Those who knew Jerusalem’s leadership and history best would not be surprised by Luke’s mention of a high-priestly family. The high-priestly line held a hereditary power base,⁹⁶³ a heritage considered critical to those who maintained it.⁹⁶⁴

955. This continuing influence is widely acknowledged (e.g., Haenchen, *Acts*, 216; Reicke, *Era*, 142–43).

956. For retaining the title, see Witherington, *Acts*, 190–91. Certainly this could be Luke’s practice as a Diaspora writer; Roman officials retained titles of past offices they had filled (Taylor, “Asiarchs,” 258). Some may have felt that he remained high priest in God’s sight because the office was supposed to be lifelong (a view mentioned by some commentators, e.g., Talbert, *Acts*, 41); cf. the biblical specification of transition with the “death of the high priest” (Num 35:25, 28; Josh 20:6).

957. E.g., Jos. *War* 2.243, 316, 320, 342, 410–11; 4.151, 315; *Life* 197; cf. also 1QM II, 1; 4Q494 1 4; Stern, “Aspects,” 601, 603; Sanders, *Figure*, 327–32; Jeremias, *Unknown Sayings*, 51. Josephus, indeed, employs the plural of ἀρχιερεὺς about seventy-seven times.

958. Elsewhere in the Roman Empire, the title “high priests” did not always bear the prestige it held in Judea (cf. Lewis, *Life*, 47; Reicke, *Era*, 147).

959. See Ilan, “Lhbdlly ktyb.” Still, “Jonathan” (e.g., in *CPJ* 1:165–66, §24) was one of “the least popular of the early Hasmonaean names” (Williams, “Names,” 88).

960. Williams, “Names,” 96–97. See, e.g. (in either gender), *CIJ* 1:lxvii; 1:13, §8; 1:59, §85; 1:102, §144; 1:149, §210; 1:157, §219; 1:288, §370; 1:436, §606; 2:27, §764; 2:249, §1217; 2:274, §1284; *CPJ* 1:xix; 3:168–69.

961. Williams, “Names,” 109. Some upper classes in the empire still knew the local vernacular, the degree of the use of which varied from one place to another (see Brunt, “Romanization,” 170–72).

962. E.g., the Greek afterlife practice of a coin in the mouth (Evans, *World*, 98); cf. also decorative designs in the elite’s homes (96).

963. The priesthood as a whole shares a common ancestry, one apparently supported also by genetic analysis (Basser, “Priests,” 825).

964. E.g., the Zadokite line, established in the time of David, was a matter of no small importance to protest movements originating in the period of Hasmonaean ascendancy, as evident in the emphasis on Zadok at Qumran (CD IV, 1, 3; V, 5; 1QS V, 2, 9; 1QSa I, 2, 24; II, 3; 1QSB III, 22; 4Q174 1 I, 17; 4Q266 5 I, 16).

(4) The Authorities' Challenge (4:7)

That the apostles stood in the “midst” would fit the tradition that the Sanhedrin sat in a semicircle⁹⁶⁵ and at the least indicates that they were situated so that all the gathered leaders could see them. That early Christians appeared before various courts is difficult to dispute (cf. 2 Cor 11:24–25), and the reported suffering of the Jerusalem church (Gal 1:13, 23; 1 Thess 2:14–16) probably implies that at least some of the municipal authorities were involved. But this trial scene, like others in Acts, also makes for a good story. As much as pirates and shipwrecks, trial scenes provided suspense in ancient narratives (cf., e.g., those in Chariton *Chaereas and Callirhoe*).

The authorities ask the apostles a leading question (cf. Acts 8:34),⁹⁶⁶ which allows the apostles to address Jesus’s “power” (cf. 1:8; 3:12; 4:33; 10:38) and “name” (3:6, 16; 4:10, 12, 17–18, 30). This resembles the questioning of Jesus’s authority in Luke 20:2, except that in this case the disciples’ answer is not evasive (contrast Luke 20:3–4). “Name” signified authority or authorization (see comments on Acts 3:6). Because Acts speaks of priestly authority (Acts 9:14; 26:10, 12), God’s authority in Christ (cf. 1:7; 26:18; delegated to the apostles in 8:19) may here appear as a direct challenge to that of the priestly authorities. As in ancient Israel, God’s summons through his agents the prophets was a higher authority than that of earthly rulers.⁹⁶⁷

c. Salvation in Jesus’s Name (4:8–12)

Unintimidated by the political power arrayed before him, Peter plays on the semantic range of $\sigma\acute{\omega}\zeta\omega$: the name of Jesus, which alone “saved” this man from sickness (4:9), was the only means for anyone’s “salvation” (4:12); only Jesus’s authority and power brought either kind of God-given salvation. The authorities had unjustly brought about Jesus’s death, but God had reversed their unjust verdict by raising him (4:10); now Peter interprets this reversal as fulfilling a principle of Scripture (4:11). Peter holds back nothing; apart from his courteous use of a title for his hearers (4:8), he confronts the officials with the same message he preached publicly.

Like some other speeches in Acts, this one has a judicial setting, one of the most common settings for ancient oratory.⁹⁶⁸ It introduces some themes developed further in the parallel speech in 5:29–32 (on the relation to which, see comments on doublets above);⁹⁶⁹ it also summarizes some themes from Peter’s earlier Lukan speeches, including challenging the hearers with Jesus’s crucifixion and especially proclaiming salvation through Jesus’s name.⁹⁷⁰ The brief speech plays especially on the broad sense of $\sigma\acute{\omega}\zeta\omega$, which includes both physical (4:9) and spiritual (4:12) salvation, deliverance,

965. *M. Sanh.* 4:3; *Exod. Rab.* 5:12; see comments on Acts 23:1. This view is commonly suggested by commentators (e.g., Haenchen, *Acts*, 216; Larkin, *Acts*, 72; Polhill, *Acts*, 142; Peterson, *Acts*, 189). But Luke commonly uses $\mu\acute{\epsilon}\sigma\omicron\varsigma$ (twenty-three times; compared with four in John; two in an interpolation in John; five in Mark [comparable for its length]; seven in Matthew; seven in Pauline literature), often for the center of action in a narrative.

966. Ancient narrators frequently used interlocutors as foils (e.g., Plato’s dialogues; cf. also Maclean and Aitken, *Heroikos*, xli).

967. Cf. Walaskay, *Came to Rome*, 66, contrasting Caesar’s political authority (Luke 20:25), as delegated through centurions (7:8), with the church’s authority in the soteriological sphere. Robinson and Wall, *Called*, 258–59, argue that Luke portrays God’s agents as prophetically challenging authorities to employ their power justly, not as seeking to establish a theocracy; the apostles relativize earthly rulers’ authority in light of God’s final authority. For the church’s authority (and authorities), cf. O’Toole, “ Αὐθηνία .”

968. See Soards, *Speeches*, 44 (noting that Acts 4:19–20 function as a judicial epilogue for the speech, though also noting the deliberative implications of 4:12).

969. Sabugal, “Kerygmas de Pedro,” finds an original Petrine core in the tradition behind these speeches.

970. See Susaimanickam, “Name.”

or wholeness.⁹⁷¹ By continuing his preaching of Jesus’s “name” (3:6, 16) in response to their question (4:7), Peter effectively carries forward the same theology articulated in his central text in 2:21: whoever calls on the Lord’s “name” will be “saved.”⁹⁷²

I. FILLED FOR CONFRONTATION (4:8)

The apostles here are filled with the Holy Spirit, probably again,⁹⁷³ indicating that Luke employs the language freely for empowerments for proclamation, not simply for an initial entrance into faith or empowerment (cf. 2:4; 4:31, 33).⁹⁷⁴ This is Peter’s first occasion for confronting an enemy of the gospel; Paul’s first recorded filling with the Spirit subsequent to his initial one (9:17) occurs under similar circumstances (13:9).⁹⁷⁵ The Spirit had also led Jesus immediately into conflict with spiritually hostile forces (Luke 3:22; 4:1–2, 13–14).⁹⁷⁶ Although Luke speaks often of “receiving” the Spirit, he conceives of the Spirit not as simply a past possession to be commemorated but as God’s powerful presence dynamically active within the community of believers.

Spirit-empowered speech (which appears frequently in Acts: e.g., Acts 2:4; 4:31) fulfills the promises of 1:8 (applying “witness” even in the narrowly forensic sense) and Luke 12:11–12 (which is specifically forensic).⁹⁷⁷ The Holy Spirit, who inspires witness for Christ (Acts 1:8), and the obvious miracle (4:14) both instigate Peter’s unflinching response; certainty of the resurrection (4:2) may also make the apostles fearless (on this boldness, see further comments on Acts 4:13). In view of their resurrection certainty, death itself loses its power to coerce fear.⁹⁷⁸ Such courage is not the province only of fiction; ancient historical writers often focused on those who gave their lives in loyalty to the state (common in Roman military and political history) or their convictions (as in accounts of prophets and philosophers). Such experiences are not uncommon in today’s world.⁹⁷⁹

Jesus directly confronted Jerusalem’s leaders only toward the end of his public ministry; his followers confront them toward the beginning. Hearers steeped in the LXX, as Luke’s ideal audience is, would recognize in the audacity of Peter and John toward Israel’s rulers the character of ancient Israelite prophets confronting kings and other leaders of Israel’s institutions (as well as an echo of Jesus, 4:13). This impression is reinforced by the explicit claim that they were “filled with the Holy Spirit,” a claim frequently associated with prophecy.⁹⁸⁰

971. Cf. Bailey, *Poet*, 65, though his proposed double chiasmic structure is not persuasive.

972. On Joel 2:32 as the subtext here, see Dupont, *Salvation*, 152; cf. Marshall, “Acts,” 550.

973. Though “having been filled” is an aorist passive participle, it need not refer to an event as antecedent, as Pentecost was; if it refers to chronology at all, it simply demands action antecedent to that of the main verb (cf. the discussion in Blass, Debrunner, and Funk, *Grammar*, 174–75, §339); so also Acts 13:9. See Parsons and Culy, *Acts*, 66: the participle could function “as attendant circumstance” (an additional action) “or temporal” (Peter spoke after being filled). For multiple fillings in the OT, cf. 1 Sam 10:10; 11:6.

974. Cf. Carson, *Showing Spirit*, 160; Keener, *Gift*, 166–68; Miller, *Empowered for Mission*, 121. One should nevertheless distinguish between the spontaneous inspiration implied by the aorist passive (here) and the continuous character implied in the adjective πλήρης (as in Acts 6:5; Bruce, *Commentary*, 99n16; Hamilton, “Theology of Spirit”).

975. Stronstad, *Prophethood*, 109, also notes the parallel.

976. Cf. Keener, *Spirit*, 70–71, on Mark 1:9–11.

977. See Soards, *Speeches*, 44.

978. An educated ancient audience would respect the lack of fear of death; see philosophers and others cited in my introduction to Acts 27:21–26.

979. My own experience makes it impossible for me to treat all such accounts as intrinsically implausible. In the first few years after my conversion from a non-Christian background, I experienced some beatings and threats on my life for my witness. On one occasion, I continued preaching as my head was being slammed repeatedly against the floor and my hair was being torn out; on one of the occasions, I felt no pain. Whether one attributes this behavior to adrenaline or, as I would have interpreted it at the time, pneumatic inspiration, I am a witness that bold preaching may continue in the face of potentially life-threatening hostility.

980. See Keener, *Spirit*, 10–13, among many others; see the commentary introduction, ch. 15, sect. 5.a.iii (Keener, *Acts*, 1:523–24), and esp. part 3 of the excursus in that chapter (534–37).

Although Peter will speak “boldly” (see comments on Acts 4:13), he opens with a courteous address, the customary *captatio benevolentiae*.⁹⁸¹ If he treads softly in 4:8–9,⁹⁸² by 4:10 he speaks with boldness; speakers sometimes softened the blow of courageous speech (παρρησία) with flattery or an explanation⁹⁸³ or, as here, at least an acknowledgment of due respect.

II. ARRAIGNED FOR BENEFACTION (4:9)

Peter’s response is laden with irony.⁹⁸⁴ By ironically pointing out that the apostles are being legally examined⁹⁸⁵ for offering a benefaction, Peter both begins a defense and goes on the offensive.⁹⁸⁶ Defensively, it was a common rhetorical practice to admit a charge that was not a crime (cf. 24:14);⁹⁸⁷ claiming one’s benefaction, in fact, should weight the burden of proof in favor of the speaker’s positive character, and hence one’s innocence (see comments on Acts 24:17). Benefaction was, indeed, universally viewed as a virtue.⁹⁸⁸ Offensively, in the ancient Mediterranean ideology of reciprocity, the proper response to benefaction was gratitude;⁹⁸⁹ the ungrateful person was viewed quite negatively.⁹⁹⁰ After listing murder and other vices, for example, Seneca rhetorically claims that ingratitude is worse than all of them and the source of all of them.⁹⁹¹ Indeed, it was virtuous to repay benefactions and scandalous to neglect such returns.⁹⁹² Though a benefactor might continue to give anyway,⁹⁹³ gratitude provided further motivation for the relationship,⁹⁹⁴ and Eastern cities evolved patterns of honoring benefactors that were meant to invite future benefaction.⁹⁹⁵ Benefactions

981. Observed by rhetorical commentators, e.g., Witherington, *Acts*, 193.

982. One could use figured speech to soften one’s message to those in authority (see Anderson, *Glossary*, 58, on Demet. *Style* 287–98).

983. See Anderson, *Glossary*, 94 (on παρρησία); cf. *prodiorthōsis* in the comments on Acts 4:10a.

984. Most recognize this (e.g., Pervo, *Story*, 23). On irony as a rhetorical technique, see *Rhet. Alex.* 21, 1434a.17–32; Cic. *Brut.* 292; Anderson, *Glossary*, 39–40; Rowe, “Style,” 128–29; Duke, *Irony*, 8–12; O’Day, *Revelation*, 12–19; Keener, *John*, 223; in satire and debate, e.g., 1 Kgs 18:27; Plato *Soph.* passim; Dio Chrys. *Or.* 31.9–10; Plut. *St. Poets* 4, *Mor.* 1058c; Apul. *Metam.* 3.4–6; Jos. *Life* 340; Ag. *Ap.* 1.295; Tert. *Apol.* 40.2; forensic speech in Cic. *Verr.* 2.5.10.25. On sarcasm (probably too strong a depiction for here), see, e.g., Anderson, *Glossary*, 108.

985. Luke usually uses the term for hearings (Luke 23:14; Acts 24:8; 28:18) or legal examination (Acts 12:19), though it can also apply to spiritual evaluation (1 Cor 2:14–15; 4:3–4; 9:3; 14:24; cf. Acts 17:11).

986. Cf. Paul’s claim in Acts 26:6–7 that he was on trial for his Jewish faith, i.e., for sharing the common Jewish hope of resurrection, to which his Sadducean accusers objected.

987. See comments on Acts 24:14.

988. E.g., Demosth. *Aristocr.* 6; Mus. *Ruf.* 14, p. 92.32; Quint. *Curt.* 7.3.1; Arius Did. *Epit.* 2.7.11e, pp. 68–69.14; Marc. *Aur.* 1.15.3; Philo *Spec. Laws* 4.58.

989. E.g., Xen. *Mem.* 2.2.13; Cic. *Fam.* 13.22.2; Sen. *E. Controv.* 9.1.intro.; 9.1.9; Val. *Max.* 5.2; Pliny *Ep.* 3.2.6; 4.13.10; 7.15.3; 7.31.7; Fronto *Ad Ant. Pium* 9.1; Harrison, *Grace*, 40–43; Garnsey and Saller, *Empire*, 148; deSilva, “Patronage,” 768; idem, *Honor*, 109–10, 116, 142; in Epicureanism, Dorandi, “Epicurean School,” 1074. The normal response was also “friendship” (e.g., Mus. *Ruf.* 19, p. 122.29–30 [cf. 122.26–27]), as Luke well knew (Luke 16:9). Naturally, gratitude was expected toward deities (e.g., Ael. *Arist. Panath.* 21, 161–162D; Men. *Rhet.* 2.17, 437.7–9, 13–15; Diog. *Laert.* 8.1.24; cf. Porph. *Marc.* 35.534–35).

990. Xen. *Mem.* 2.2.2–3; Polyb. 6.6.6; Val. *Max.* 5.3; Sen. *Y. Ep. Lucil.* 81 passim, esp. 81.1; Arius Did. *Epit.* 2.7.11k, pp. 80–81.21–22; Lucian *Fisherman* 5; *Tim.* 35; Philost. *Ep. Apoll.* 36; Jos. *Ant.* 19.361; for potential legal penalties, e.g., Xen. *Cyr.* 1.2.6 (Persia); Val. *Max.* 2.6.6 and 5.3.ext. 3–4 (Athens); Suet. *Claud.* 25.1; Winter, *Left Corinthin*, 130; Buckland, *Roman Law*, 130. Ingratitude toward deity was especially wrong (e.g., Porph. *Marc.* 23.372; Ps 78:11 [77:11 LXX]; Wis 16:11; Philo *Creation* 169; Rom 1:21; ‘Abot R. Nat. 46, §128 B).

991. Sen. *Y. Ben.* 1.10.4 (cf. Rom 1:21). Cf. Cic. *Att.* 8.4: ingratitude “encompasses all offenses.”

992. E.g., *Rhet. Alex.* 1, 1421b.38; 1, 1422a.32–34, 36–38; 2 Macc 9:26.

993. Fronto *Nep. am.* 2.9; deSilva, *Honor*, 117, cites here Sen. *Y. Ben.* 1.10.5; 7.31.2, 4; 7.32; cf. deity in Epict. *Diatr.* 1.6.42.

994. Pliny *Ep.* 6.18.2; cf. deSilva, *Honor*, 117, citing Dio Chrys. *Or.* 31.38, 65. This was also understood with reference to gratitude to deities (Harrison, *Grace*, 349–50).

995. Bowersock, “Cult,” 171.

normally elicited praise from observers,⁹⁹⁶ honor being their desired end. Ironically, civic benefactors were typically members of the urban elite⁹⁹⁷—that is, the class that jailed the apostles overnight and is now interrogating them.

But here the response is worse than ingratitude; it is in fact scandalously inappropriate. To betray or harm benefactors was grossly wicked;⁹⁹⁸ indeed, criticizing a civic benefactor could mobilize the citizenry against oneself,⁹⁹⁹ a potential danger of which the rulers would not be unaware (Luke 20:19; Acts 5:26). Instead of being thanked for performing a civic benefaction akin to giving alms,¹⁰⁰⁰ Peter and John are being prosecuted as if the benefaction were a crime! This in turn casts the moral discernment of the priestly leaders in a bad light, possibly following the rhetorical technique of returning the charges against one's accusers (on which see comments on Acts 7:51–53; 24:19). Had Peter wished to be more conciliatory, he could have used softer language for the interrogation (while retaining his claim to act as a benefactor), but Acts 4:10 indicates that he has no intention of being conciliatory here.

Benefaction ideology was prominent in antiquity and appears elsewhere in Luke-Acts for Jesus's ministry (Luke 22:25; Acts 10:38; elsewhere in the NT only at 1 Tim 6:2).¹⁰⁰¹ Although people sometimes employed the language ironically (e.g., 1 Tim 6:2)¹⁰⁰² or more loosely,¹⁰⁰³ "benefactors" were most commonly those who possessed adequate social power to benefit others; ideally, such persons would feel obligated to benefit the larger society.¹⁰⁰⁴ The culturally respected way for the wealthy to distribute their wealth was through public benevolence.¹⁰⁰⁵ (They also expressed such benevolence toward socially powerful persons with somewhat lesser status than themselves.)¹⁰⁰⁶

This social power was most obvious in the case of "benefactors" who were deities¹⁰⁰⁷ and kings.¹⁰⁰⁸ (In many cases a king was even titled Euergetes, "Benefactor.")¹⁰⁰⁹ Philosophers spoke of God as beneficent or benefactor¹⁰¹⁰ and claimed that God expected

996. E.g., Arius Did. *Epit.* 2.7.11i, pp. 78–79.27–28; Plut. *Cim.* 10.1–5; *Apoll. K. Tyre* 17; a dominant theme in civic inscriptions (e.g., *CIL* 5.875 in Sherck, *Empire*, §116, pp. 158–59).

997. See, e.g., Engels, *Roman Corinth*, 89; Clarke, "Italy," 472; Kearsley, "Benefactor."

998. E.g., 2 Macc 4:2; 3 Macc 3:19; 6:24; Wis 19:14; Jos. *Ant.* 10.166; 11.278. Cf. the ancient horror of those who betrayed benefactors with whom they had shared table fellowship (e.g., Hom. *Il.* 21.76; *Od.* 4.534–35; Eurip. *Cycl.* 126–28; *Hec.* 25–26; Livy 25.16.6; more fully Keener, *John*, 912–13).

999. See Lucian *Peregr.* 19, where the critic barely escapes lynching. Four years later, the critic praises the benefactor instead (*Peregr.* 20).

1000. Not silver and gold in this case but empowering the man to earn his own living.

1001. For benefaction imagery in general, see, e.g., Walker, "Benefactor"; Saller, *Patronage*; and esp. Danker, *Benefactor* (for a concise survey of the theme's applicability to Luke-Acts, see idem, *Luke*, 6–8).

1002. Figuratively, philosophers also provided the greatest "beneficence" by their teaching (Epict. *Diatr.* 1.4.29). A wicked governor appeared a "benefactor" in contrast to one more wicked still (Jos. *Ant.* 20.253).

1003. Rahab's benefaction to the spies (Jos. *Ant.* 5.30).

1004. For examples of such benefactions, Pliny *Ep.* 2.4; 6.18.1; 7.18.5 (by publishing these letters, Pliny invites greater honor).

1005. E.g., Mus. Ruf. 19, p. 122.24–27. Although many saw the sponsoring of activities such as public games as diminishing public morals to gain reputation, sponsoring civic projects was honorable (Zuiderhoek, "Munificence").

1006. E.g., Jos. *Ant.* 15.190; 17.109 (to his son); 20.66 (a deposed king); Char. *Chaer.* 4.5.8. Nevertheless, although Hellenistic benefaction overlaps with Roman patronage, it is not identical (Joubert, "Exchange"; Gehrke, "Euergetism," 155; Harrison, *Grace*, 15–16; MacGillivray, "Patronage," 46–54, 80).

1007. For Osiris, Plut. *Isis* 12, *Mor.* 355E; for Isis, Kee, *Miracle*, 125–28. This theme became prominent in the Hellenistic era (see Du Sablon, "Religiosité").

1008. E.g., Xen. *Cyr.* 5.5.34; Mus. Ruf. 8, p. 60.9–14, esp. 60.9 (king). Cf. Herod's beneficence to other peoples (Jos. *Ant.* 16.159).

1009. E.g., Sir prol.; Jos. *Ag. Ap.* 2.48. Ptolemy is the "divine benefactor" in *PSI* 1016.16 (129 B.C.E.).

1010. Mus. Ruf. 17, p. 108.14; Epict. *Diatr.* 1.6.42. Jewish philosophers (e.g., Philo *Spec. Laws* 1.209; 4.187; *Rewards* 122; *Decal.* 41) and nonphilosophers (Pss 13:6 [12:6 LXX]; 57:2 [56:3]; 116:7 [114:7]; Wis 3:5; 11:5, 13; 16:2; 2 Macc 6:13; 10:38) also portrayed God as benefactor; so also wisdom in Wis 7:23. As

mortals to exhibit the same ethic.¹⁰¹¹ Rulers ideally should be benefactors;¹⁰¹² the ideal ruler should delight in giving even more than receivers desire receiving.¹⁰¹³ Naturally, benefactor ideology applied in the empire to the emperor par excellence.¹⁰¹⁴ To receive benefactions from the emperor increased the receiver's honor as an obvious beneficiary of the emperor's attention.¹⁰¹⁵ Just as rulers could be benefactors, they could be "saviors," a term also applied specifically to the emperor.¹⁰¹⁶ Kings were often called both "benefactor" and "savior" (or said to "do benefaction" and "save").¹⁰¹⁷ Peter's hearers understood well the benefaction obligations expected of leaders; many earlier priestly leaders in Jerusalem had functioned as civic benefactors.¹⁰¹⁸

Peter's speech will, accordingly, move quickly from benefaction to salvation in the parallel clause (σέσωται, at the end of Acts 4:9), a concept he will develop further in 4:12. Luke's use of not only "benefactor" but "savior" terminology for God and Christ may suggest his use of the imagery of the benefactor cults;¹⁰¹⁹ but it is of interest that he uses "savior" only in exclusively Jewish settings (Luke 1:47; 2:11; 5:31; 13:23). Moreover, Josephus mentions being called by Galilean villagers "savior and benefactor,"¹⁰²⁰ and the terms are paired in other noncultic contexts;¹⁰²¹ where they refer to a deity in a Jewish setting, they naturally apply to Israel's one God as both savior and benefactor.¹⁰²² Jewish sources in Greek often made use of benefaction language; thus, for example, Job's generosity with his wealth made him a benefactor.¹⁰²³

Human benefaction was typically financial, which was the sort of gift the man had initially requested (Acts 3:2–3); but Peter had promised the man a different kind of benefaction (3:6). Peter's speech ultimately pointed beyond mortal benefactors to the divine one. In contrast to models of paternalistic social power exemplified above, Luke also provided models of servant-benefactors (following Luke 22:25).¹⁰²⁴

The verb σώζω applied to divine healing for the sick (e.g., Luke 8:36, 48, 50; 17:19; 18:42)¹⁰²⁵ as well as other kinds of deliverance (cf. Acts 27:20, 31, 34; Luke 9:24; 13:23; 18:26); Peter's speech plays on different senses of the term (see comments on Acts 4:12).¹⁰²⁶ "Today" might underline the realization of eschatology (cf. Luke

a benefactor, God should be praised and honored (Philo *Prelim. St.* 97; *Dreams* 1.163); on God as benefactor, cf. further Neyrey, "Benefactor"; on miracles as benefactions, see idem, "Miracles," 22–27, esp. 26–27.

1011. Mus. Ruf. 16, p. 104.33; Epict. *Diatr.* 2.14.13; applicable also to rulers in *Let. Aris.* 190, 205, 210, 281. Benefactors were often compared to deity or encouraged to imitate deity (Mus. Ruf. 17, p. 108.11–22, esp. 14; Pliny E. *N.H.* 2.5.19; Iambl. *V.P.* 21.100; cf. Harvey, *History*, 9–10).

1012. E.g., Mus. Ruf. 8, p. 66.11.

1013. Dio Chrys. *Or.* 1.23; Iambl. *Letter* 6, frg. 2.3–5.

1014. Witherington, "Salvation," 166; see, e.g., *Res gest.* 15.1–24.2 (Sherk, *Empire*, §26, pp. 45–47); SB 3924 (Sherk, *Empire*, §35 B, p. 61); Philo *Embassy* 148; cf. *Jos. Ag. Ap.* 2.57 (Latin). His benefactions could include sending a good prefect (*OGIS* 666; *IGRR* 1.1110 in Sherk, *Empire*, §63, p. 104).

1015. So explicitly Pliny *Ep.* 10.13; hence his many and tedious requests of the emperor in published letters (e.g., 10.12.2).

1016. See, e.g., Dio Chrys. *Or.* 3.6; Green, "Salvation," 87–88; Gilbert, "Propaganda," 238–39; cf. Sall. *Ep. Caes.* 13.6.

1017. E.g., as divine titles of Ptolemy V in *OGIS* 90 (Grant, *Religions*, 68); for the emperor, P.Fouad 8 in Sherk, *Empire*, §81, p. 123; Philo *Flacc.* 74; *Embassy* 22; *Jos. War* 7.71.

1018. See Gardner, "Leadership and Benefaction."

1019. Klauck, *Context*, 328. For the pairing of benefactor and savior in such cults, see, e.g., Koester, *Introduction*, 1:176 (Asclepius); Otto, *Dionysus*, 113 (Dionysus).

1020. *Jos. Life* 244, 259.

1021. E.g., Philo *Flacc.* 126; *Jos. War* 1.530; 3.459; 4.146; *Ant.* 12.261.

1022. E.g., Philo *Creation* 169; *Alleg. Interp.* 2.56; *Sobr.* 55; *Prelim. St.* 171; *Spec. Laws* 1.272.

1023. *Test. Job* 16:6; 44:3. Jewish usage often applied to the poor (Harvey, *History*, 9).

1024. See esp. Lull, "Servant-Benefactor."

1025. *Men. Rhet.* 2.1–2, 375.14 (on the Asclepiads).

1026. Widely noted (e.g., Ridderbos, "Speeches of Peter," 28; Haenchen, *Acts*, 217).

2:11; 4:21; 19:5, 9; 23:43) but may simply evoke LXX rhetoric (cf. Acts 20:26; 22:3; 24:21; 26:29; Luke 5:26), whether as a biblicism, to underline events' importance, or to underscore their reliability.¹⁰²⁷

III. CHARGING THE REAL CRIMINALS (4:10)

“Let it be known to you” may prepare for a shocking statement (cf. Acts 2:14, 36; 13:38; 28:28) and hence may function in a manner akin to the more elaborate techniques rhetoricians called *prodiorthōsis* (preparing hearers for a shocking statement) or perhaps *proparaskeuē* (which prepares the audience to heed something).¹⁰²⁸ The invitation to “know” appears elsewhere in exhortations (e.g., *Test. Jud.* 20:1; *Test. Iss.* 6:1). The language of Acts 4:10–11 includes some features found in some rhetoric, though just as likely the product of the intensity of emotion as due to deliberate mimicking of rhetorical force.¹⁰²⁹

It was standard rhetorical practice to charge one's accusers with something (see comments on Acts 7:51–53; 24:19).¹⁰³⁰ To charge one's *judges*, however, was unusual; one normally appealed positively to judges, and so to charge them was an extraordinary act of *παρρησία* (“boldness,” 4:13) that normally characterized only the boldest of philosophers or prophets. Those who narrated the trials of philosophers such as Socrates sometimes portrayed the trial as revealing that the accusers in reality were accusing themselves, whereas Socrates was being vindicated (Max. Tyre 3.8).¹⁰³¹ Crucifixion was almost the most shameful and painful form of execution known (see comments on Acts 2:36); on the charge of guilt for Jesus's execution, see comments on Acts 2:23.¹⁰³²

Though the text does not explicitly play on the different nuances of *ὄψις* the way it does *σῶζω*, writers had also come to apply this term and its cognates to moral and spiritual health.¹⁰³³ Physical health often functioned as a metaphor for moral or intellectual health, which allows a parabolic application (in addition to the literal sense) in many Gospel narratives, including Luke's (Luke 6:9; 8:36, 48, 50; 17:19; 18:42; Acts 14:19).¹⁰³⁴

IV. THE REJECTED CORNERSTONE (4:11)

The disciples, who learned their messianic prophecies from Jesus (Luke 24:44–46), had learned from Jesus to apply this text to the leaders (the “builders”), even in public confrontation (20:17).¹⁰³⁵ Supporting this saying's authenticity in

1027. For the last option, see Rothschild, *Rhetoric of History*, 294.

1028. On *prodiorthōsis*, see Rowe, “Style,” 142 (citing Demosth. *Cor.* 199; Livy 39.37.17); on *proparaskeuē*, see Rowe, “Style,” 146 (citing Hyperides *Contra Euxenippum* 23; Cic. *Clu.* 4.11); cf. Porter, “Paul and Letters,” 581. Similar expressions appear in the LXX, sometimes preceding dramatic statements (cf. 1 Esd 2:14; Ezra 4:12–13; 5:8; with different wording, 1 Kgs 18:36; Ezek 36:32; Dan 3:18). Raising one's voice also appears in LXX idiom (see comments on Acts 2:14).

1029. Note the two successive *ὅν* clauses referring to Jesus in Acts 4:10, the use of *τούτω* and *οὗτος* for Jesus in 4:10–11, and (modifying Ps 117:22 LXX [118:22 ET]) the two *ὁ* clauses referring to Jesus in Acts 4:11. This resembles a brief anaphora (see Demet. *Style* 5.268; Black, “Oration at Olivet,” 86 [citing *Rhet. Her.* 4.13.19]; for examples, e.g., Mus. Ruf. 14, p. 92.35–36; Rowe, “Style,” 131 [citing Aug. *Serm.* 219]; Porter, “Paul and Letters,” 579; in the LXX, Lee, “Translations: Greek,” 779) or something like polyptoton (cf. Rowe, “Style,” 132–33). But had Luke constructed the pairs more carefully, perhaps one might not expect *οὗτος* for the healed man in 4:10 before its application to Jesus in 4:11.

1030. See also Keener, *John*, 753.

1031. Trapp, *Maximus*, 30n22, compares Plato *Apol.* 39CD.

1032. The phrase “all the people of Israel” suits Lukan hyperbole and recurs only in Acts 13:24 in the NT.

1033. E.g., Arius Did. *Epit.* 2.7.Sb.4, pp. 16–17.34; Philost. *Hrk.* 53.3–4; 1 Tim 1:10; 6:3; 2 Tim 1:13; 4:3; Titus 1:9, 13; 2:1–2, 8; 3 John 2; Malherbe, *Philosophers*, 121; cf. more generally Mus. Ruf. 1, p. 32.15; Philost. *Hrk.* 33.4; analogously (albeit in Latin) Sen. *Y. Ep. Lucil.* 10.4.

1034. See Keener, *Matthew*, 298; this commentary's introduction, ch. 11, sect. 3.c (Keener, *Acts*, 1:414–16).

1035. The quotation diverges from the LXX (unlike Luke 20:17), possibly suggesting *testimonia* tradition; but changes in wording also highlight the persecution theme (Larkin, *Acts*, 74). Most important is Peter's

the gospel tradition is its context in the Hallel used at Passover season.¹⁰³⁶ Some scholars have also found there other potential support, including possible Semitic wordplays.¹⁰³⁷ Some have even suggested that Peter and the fledgling Jerusalem church here knew that the site of Jesus's crucifixion was a rejected stone quarry area, as archaeologists have discovered, a realization that would have offered another wordplay.¹⁰³⁸

The cornerstone or topstone¹⁰³⁹ to which Jesus referred is part of the architecture of the temple; hearers may have recognized that he was comparing the elect community to a temple, as in the Dead Sea Scrolls.¹⁰⁴⁰ Most clearly, they would recognize that he was challenging the “builders,” here the temple authorities. (On the historical level, this represented especially, though probably not exclusively, the Sadducees.)¹⁰⁴¹

Whereas Jesus implied the identity of the builders, however, Peter states it directly.¹⁰⁴² Their focus on building (cf. the temple in Acts 7:47, 49) might contrast with God building the church (9:31; 20:32). The building in view in Ps 118:22 (if not a general metaphor, 127:1) may be the temple (118:19–20, 27); it was readily understood that the temple's cornerstone was massive.¹⁰⁴³

Many scholars interpret the “cornerstone” as a “capstone,” the final stone fitted in place to hold the others in place.¹⁰⁴⁴ The image of a strategically placed stone was also intelligible to others in the first-century Mediterranean world, not requiring advanced knowledge of architecture. Seneca expects Lucilius to understand when he compares their mutual relations to “a stone arch, which would collapse if the stones did not mutually support each other.”¹⁰⁴⁵

explanatory “you,” identifying the builders. Early Christians (Eph 2:20), including the Petrine author in 1 Pet 2:6–7, applied the cornerstone to Jesus (apparently differently, Naassene gnostics; cf. Hippol. *Ref.* 5.2).

1036. See Keener, *Historical Jesus*, 284–85; *m. Pesah.* 5:7; 9:3; 10:5–7; *t. Pisha* 8:22; cf. *t. Sukkah* 3:2.

1037. Although Vermes, *Religion*, 104, characteristically rejects the citation as anti-Jewish church polemic (the saying itself is hardly anti-Jewish), various factors argue strongly for authenticity: Jewish parables typically included a Scripture citation (so Stern, *Parables in Midrash*, 197, on this parable, though many of Jesus's parables lack such allusions); the citation appears in all three Synoptics and also in the *Gospel of Thomas* (Young, *Parables*, 293–94; Snodgrass, *Stories*, 280); Jesus draws his citation from the festal liturgy; “stone” may provide a Hebrew play on words here with the “son” earlier in the parable (Gundry, *Matthew*, 429, following Black); “Have you not read?” is unique to Jesus in the NT (Gundry, *Use*, 200); and the collection of stone sayings in a variety of disparate early Christian texts supports a common authoritative source for diverse early Christian groups (Acts 4:11; Rom 9:33; 1 Pet 2:6–8; cf. Luke 19:38, 40, 44). For the fit with the parable, see esp. Snodgrass, *Stories*, 289–90. Early Christians naturally accommodated the quotation to the LXX (Perrin, *Kingdom*, 132), although Jesus undoubtedly addressed the Jerusalem aristocracy in Greek. Jesus may read *habonim* (“builders”) as if from *bun*, “understand,” rather than from *bnh*, “build,” and hence apply it to the scribes (Stern, *Parables in Midrash*, 196); Young, *Jewish Theologian*, 219, suggests a play between “sons” (*banim*), “builders” (*bonim*), and “stones” (*avanim*).

1038. Charlesworth, *Jesus within Judaism*, 124. But even if this information is accurate, would Jerusalemites have known the area's use seven or eight centuries earlier?

1039. Cf. McKelvey, “Cornerstone,” for the former; for the latter, cf. Gundry, *Matthew*, 429; Jeremias, “Γωνία,” 792–93.

1040. 1QS VIII, 5, 8–9; IX, 6; CD II, 10, 13; Gärtner, *Temple*, 16–46; Flusser, *Judaism*, 37–39; Wilcox, “Dualism,” 93–94. This image probably does not appear, however, in 4QFlor (McNicol, “Temple”; Schwartz, “Temples”).

1041. A later rabbinic tradition plausibly explains the rejected cornerstone as David, repudiated by Saul (Hilton and Marshall, *Gospels and Judaism*, 60; Young, *Jewish Theologian*, 219).

1042. The cornerstone tradition appears in (1 Pet 2:7), but is not limited to (Mark 12:10; Eph 2:20; cf. Rom 9:33), Petrine material. On the implications of this passage in early Christian teaching, see, e.g., Moule, *Birth*, 41; Longenecker, *Christology*, 50–53.

1043. *Test. Sol.* 22 (*Test. Sol.* 23 connects this to Ps 118, but it may reflect Christian interpretation).

1044. E.g., Conzelmann, *Acts*, 33, citing *Test. Sol.* 22:7–23:4 (third century C.E.); Tert. *Marc.* 3.7; Fitzmyer, *Acts*, 301; Longenecker, *Acts*, 100.

1045. Sen. *Y. Ep. Lucil.* 95.53 (LCL, 3:91).

V. SALVATION IN JESUS'S NAME (4:12)

Although we might see “save” here as a wordplay with “save” in Acts 4:9,¹⁰⁴⁶ our sense that this is a wordplay (rather than simply the developing of another nuance of the same word complex) may stem largely from the fact that our English terms for these concepts are usually different; in Greek, both senses simply belonged to the broad semantic range of “salvation.”¹⁰⁴⁷ Thus “not only lame people but all can find salvation through” Jesus’s name.¹⁰⁴⁸ Still, the repetition of salvific vocabulary and “name” provide rhetorical emphasis,¹⁰⁴⁹ an emphasis that is climactic in this speech.¹⁰⁵⁰ That no other name provides salvation “under heaven” means that no other name provides it “anywhere”¹⁰⁵¹ (at the very least, Luke must intend the phrase to mean “among all nations”; cf. 2:5). The idiom “under heaven” is biblical; all peoples under heaven would experience God’s rule (Dan 7:27).¹⁰⁵² Not surprisingly, the ethnic universality of Jesus’s saving significance fits Luke’s central theme (Acts 1:8).

Luke teaches God’s continuing concern for Israel, but this is exemplified in continuing mission rather than the common two-covenant view today; Luke regards salvation as effective only through calling on Christ.¹⁰⁵³ Despite attempts to circumvent the claims of soteriological exclusivism here, it is clear that Luke affirms¹⁰⁵⁴ salvation only through Christ.¹⁰⁵⁵ Early Jewish groups held a range of views, from universalism (some Alexandrian documents) to the salvation only of the (sectarian) Jewish remnant (the Qumran *War Scroll*). But whereas early Christians were ethnically universalistic, they proved “much less willing to recognize the possibility

1046. Wordplay was a common argumentative device; see Keener, *John*, 537, 782; idem, *Paul*, 54n101. Thus *tradio*, which allows for plays on different senses of a word (Rowe, “Style,” 132, citing Isoc. *Peace* 101; Cic. *Verr.* 2.64.155; Porter, “Paul and Letters,” 580, citing Rom 8:2–3; Black, “Oration at Olivet,” 86, citing *Rhet. Her.* 4.14.20–21; Quint. *Inst.* 9.3.41–42; Mark 13:34–35), is more relevant than paronomasia here. A wordplay with Jesus’s name is less likely (cf. Fitzmyer, *Acts*, 302), as it would presuppose Aramaic competence.

1047. On which see, e.g., Witherington, *Acts*, 821–43; idem, “Salvation”; comments on Acts 27:20. Other early Christian writers could also play on the term’s varied connotations (Dunn, *Theology of Paul*, 329). For the conceptual relationship between physical and spiritual health in earlier Israelite thought, see, e.g., Brown, *Healer*, 185–207.

1048. Tannehill, *Acts*, 61.

1049. For “close verbal” parallels, Barrett, *Acts*, 230, cites Jos. *Ant.* 3.23; Aristoph. *Lys.* 29–30; Hdt. 8.118.3; cf. the “antiparallel” that van der Horst, “Macrobius,” 226, finds in Macrobius. 1.8.3. Luke, however, echoes especially “saved” and “name” from the Joel quotation in Acts 2:21 (see introduction to this section, “Salvation in Jesus’s Name,” 4:8–12). Marshall, “Acts,” 551, also allows a possible allusion to the inability of princes to “save” in Ps 146:3 (145:3 LXX, οὐκ ἔστιν σωτηρία), in view of the echo of this psalm in Acts 4:24.

1050. The accompanying gesture for emphasis often was the pointing of one’s index finger at the ground (Shiell, *Reading Acts*, 74–75); the use here of “under heaven,” however, may have invited a lateral (or combination of upward and lateral) gesture.

1051. Barrett, *Acts*, 232 (comparing Plato *Tim.* 23C; *Ep.* 7.326C).

1052. Cf. Dan 9:12, where “under the whole heaven” nothing is comparable to what Jerusalem suffered; Deut 2:25 (all peoples afraid of Israel); 4:19 (the nations are peoples “under the whole of heaven”); Gen 7:19; Eccl 1:13; 2:3; 3:1; Job 28:24; 41:11; comments at Acts 2:5; for destruction from under heaven, Gen 6:17; Exod 17:14; Deut 7:24; 9:14; 25:19; 29:20; 2 Kgs 14:27. Cf. also “from one end of heaven to the other” (Deut 4:32; Matt 24:31; similarly, Jer 49:36).

1053. With Tannehill, *Acts*, 3 (who disagrees with Luke on this point); Talbert, *Acts*, 43. Views through church history and modern theology vary widely, but only by reading around the plain sense of much of earliest Christianity (as exemplified in the extant first-century Christian documents) can scholars evade the reality that this claim was central to the apostolic kerygma preserved in Acts or other first-century Christian documents. One can deny such a claim’s respectability in a more theologically relativist framework, but this is a theological, not historical, verdict. We ought not try to make its authors more respectable to our contemporaries by denying their claim (a respectability that Luke’s characters might well reject, in any case; cf. Acts 5:41).

1054. At least on the level of apostolic proclamation; but he presumably agrees with this.

1055. See Sandnes, “Stendahl’s Exegesis of 4:12.” For a survey of views, see Fernando, *Acts*, 163–66.

of salvation for nonbelievers, be they Jews or Gentiles,” than did some other early Jewish groups.¹⁰⁵⁶

Luke believes that people from afar will enter the kingdom but that the way of salvation is narrow and many of the children of the kingdom will be lost (Luke 13:23–30).¹⁰⁵⁷ Despite Luke’s ethnic universalism, it is unlikely that he would regard unconverted polytheists as saved if he believed Israel to be lost. Jewish people held different views concerning the salvific status or eschatological potential of Gentiles (see comments on Acts 15:1), but they generally agreed that unconverted polytheists (who constituted the vast majority of Gentiles) were not saved. The ethnic universalism in Isaiah’s later chapters, on which Luke draws, speaks of Gentiles’ conversion or submission (see comments on Acts 1:8)—not an allowance for other saviors (see Isa 43:3, 11; 45:20–21; 47:13–15; cf. Jer 2:28; 11:12; Hos 13:4; 14:3).¹⁰⁵⁸

Luke, like most first-century Christians,¹⁰⁵⁹ followed the most exclusivistic line of Judaism, though maintaining dialogue with the outside world (in contrast to the radically exclusivistic Qumran community). This exclusive truth claim was now further narrowed through Christ: the apostolic proclamation of Jesus as Christ meant that he was king of Israel and rightful king of humanity.¹⁰⁶⁰ (To most of Luke’s contemporaries, such a notion would sound absurd: Christians remained a small albeit rapidly growing sect.) Still, Luke’s perspective is more nuanced than that of Johannine moral and social dualism;¹⁰⁶¹ he allows for some who are “close” to the kingdom (Acts 10:4, 31; 15:9; cf. Mark 12:34; Luke 10:28, 37).

Luke’s claim would have been intelligible, though not welcome, to most of his non-Christian contemporaries. Although polytheists could accommodate additional deities,¹⁰⁶² they recognized Judaism’s theological exclusivism and understood the nature of exclusivistic truth claims.¹⁰⁶³ Thus, for example, a Stoic complained that

1056. Boccaccini, *Judaism*, 265; in Paul, see Gundry-Volf, “Universalism.” Peterson, *Acts*, 192, suggests that the Sanhedrin itself would have insisted that exclusively Israel’s God provided salvation (citing, e.g., Isa 43:11–12; 45:22), and that the apostles simply narrowed this; certainly, Jewish monotheists affirmed only one divine Savior whatever their view of Gentiles’ salvation. Green, “Salvation,” argues that “salvation” is Acts’ unifying theme (perhaps an overstatement, though cognates appear some twenty times, and roughly an equal number of times in the Gospel) and is articulated so as to address yet challenge both Gentile and Jewish understandings of the concept.

1057. For the salvation of only a few or a remnant in contemporary Judaism, see, e.g., 4 *Ezra* 7:3–16, 45–61; 8:1–3; *Test. Ab.* 11 A; 8 B; *b. Sukkah* 45b; Keener, *Matthew*, 250–51.

1058. Larkin, *Acts*, 74, notes that “Peter claims this role for Jesus” (citing also 4QFlor 1 I, 13; 1QH^a VII, 18–19; *Jub.* 31:19).

1059. See Talbert, *Acts*, 43–44; idem, *Romans*, 270 (cf. the fuller discussion, 269–74); idem, *Matthew*, 159–61; Keener and Usry, *Faith*, 114–22. On this passage specifically, see further Edwards, *Savior*, 105–7.

1060. The frequent modern Western individualist notion that one can adopt Jesus as personal Lord and Savior but not recognize him as the only rightful Lord and Savior of humanity is more in line with the ancient Jerusalem authorities’ tolerance of personal beliefs (so long as they did not make public, political demands on Israel) than with the extant apostolic witness. (The former approach addressed the political sphere, not truth claims, because theology held at most secondary significance for political stability or control.) The apostles were prepared to suffer publicly for “his name”; Christ was a personal Lord and Savior only because he was first of all God’s appointed Lord and Savior for the world.

1061. See Keener, *John*, 941–43. The Johannine community’s more radical separatism may have been shaped by its situation of persecution and of marginalization from its own ethnic community (cf. 149–52, 198–227; from a social standpoint, cf. Malina and Rohrbaugh, *John*, 237–39). Among more fully sectarian groups, the Qumran covenanters appear to have withdrawn from the rest of Israel; see, e.g., 1QSI, 18; II, 19; III, 22; IV, 20; 1QM I, 6; XIV, 9; CD I, 5; VI, 10; 1QpHab V, 7–8.

1062. Thus, e.g., one normally could be initiated into various mystery cults (Winslow, “Religion,” 241), although some were exclusive (Horsley, *Documents*, 1:21–23, §3; this is in terms of initiation, not in terms of belief in multiple deities).

1063. Polytheists often looked down on this exclusivism; tolerating all professed deities (e.g., Pliny E. *N.H.* 28.4.18), they found monotheism more difficult to tolerate (Mac. Magn. *Apocrit.* 4.20–23 [*Porphyry’s* 83–88]).

the various opinions on foods held by Jews, Syrians, Egyptians, and Romans each excluded the others and hence could not all be right.¹⁰⁶⁴ There were many divergent approaches to philosophy; different schools each believed that they themselves were right and others were wrong.¹⁰⁶⁵ The plurality of claims to exclusive truth about a matter may have confused outsiders, but to insiders of these movements such claims often constituted matters of life and death.

d. Confounding the Authorities (4:13–22)

Acts 4:13–22 contrasts the politically cautious elite with the courageous boldness of apostles carrying on Jesus’s ministry (i.e., in his name) by signs (cf. 4:29–30). This paragraph opens and closes with the elite’s being confounded by a public miracle they cannot deny (4:14, 21–22), and its heart is the insistence on speaking the truth of what the apostles know firsthand (4:19–20).

Although some ancients denigrated extemporaneous speech by comparison with prepared speech,¹⁰⁶⁶ others preferred it; it was in any case a prized skill usually held to be acquired only by much effort.¹⁰⁶⁷ (See further discussion at Acts 14:9.)

I. THE APOSTLES’ BOLDNESS (4:13)

The leaders’ amazement at the apostles’ bold challenge performs the same literary function as authorities’ amazement in Jewish martyr stories (e.g., 4 Macc 17:16; Matt 27:14): it reinforces attention to the protagonists’ courage (for martyrs’ boldness, see 4 Macc 10:5). Perhaps the authorities expected these commoners to cringe before their authority and accede to it apologetically, as was presumably often the case,¹⁰⁶⁸ but Peter and John answer to a higher authority.

Peter has already spoken with boldness (Acts 2:29) after the outpouring of the Spirit (2:4). The Spirit (4:8) provides the same boldness here, and the Spirit will do the same for believers at the next outpouring (4:31; cf. 4:29). As in other respects, Paul’s ministry will parallel Peter’s in this one (28:31; for the verb, 9:27–28; 13:46; 14:3; 18:26; 19:8; and before authorities, 26:26). Philosophers, moralists, and other writers regularly praised *παρρησία*—open, frank speech.¹⁰⁶⁹ They sometimes attributed this frank speech to particularly respected sages (among Gentiles, these were especially philosophers) who were committed to truth rather than to others’ opinions.¹⁰⁷⁰ For example, one first-century Stoic philosopher asks who was freer than Diogenes the Cynic, who displayed *παρρησία* even as a slave.¹⁰⁷¹ Eschewing hierarchy, Epicurean

1064. Epict. *Diatr.* 1.11.12–13. By contrast, on such secondary issues, Paul, a strict monotheist, was willing to bend (Rom 14:2–3).

1065. E.g., Lucian *Hermot.* 14; cf. 29. Lucian, who presents the approaches as “doors” (*Hermot.* 15) and “ways” (*Hermot.* 25–26, 30; cf. John 14:6), seems readier to question them all than to accept Stoicism.

1066. Cf., e.g., *Rhet. Alex.* 36.1444a.16–34. Some rhetoricians refused to speak extemporaneously (Plut. *Demosth.* 8.3–4; 9.3).

1067. On extemporaneous speaking in antiquity, see, e.g., Kennedy, *Classical Rhetoric*, 103. See further comments at Acts 14:9.

1068. People of lower status were expected to cringe and show deference to social superiors (Toner, *Culture*, 140), in striking contrast to the apostles’ behavior.

1069. E.g., Mus. Ruf. frg. 9 (in Meeks, *Moral World*, 49); Dion. Hal. *Ant. rom.* 9.32.2; Diog. Laert. 6.2.69; Publ. Syr. 10; Plut. *Praising* 6, *Mor.* 541D; Pliny *Ep.* 3.3.5; Lucian *Fisherman* passim, esp. 3, 17; *Posts* 4; Fronto *Ad M. Caes.* 3.12; *Ad verum imp.* 2.2; Philod. *Crit.* passim (possibly an influence in Horace; cf. Kemp, “Flattery”); Men. *Rhet.* 2.3, 386.9; 2.10, 416.24–25; Libanius *Encomium* 4.15; among Cynics, see Vaage, “Barking”; more generally, Sampley, “Frank Speech,” 293–99 (in Paul, 299–309). Some might stress practicing philosophy secretly before proclaiming it (Epict. *Diatr.* 4.8.35–36), but this idea is rarer and not contradictory.

1070. E.g., Epict. *Diatr.* 1, pref. Cf. esp. accounts of Socrates; see comments on Acts 4:19; 17:19.

1071. Mus. Ruf. 9, p. 74.10–11 (cf. also 74.12–13). Cf. Paul’s “frankness” despite his detention (Eph 6:19–20; Phil 1:20; 1 Thess 2:2; Rapske, *Custody*, 311–12).

disciples exercised this freedom of speech.¹⁰⁷² Some writers even requested frankness in feedback (e.g., Pliny *Ep.* 3.4.9; 6.12.3–5). Moral freedom was inseparable from this virtue of unrestrained speech;¹⁰⁷³ philosophy thus could be associated with frankness, truth, and freedom in contrast to flattery and servility.¹⁰⁷⁴ Writers also associated this fearless speech with the traditional virtue of courage.¹⁰⁷⁵

Moralists also recognized, however, that such frankness could sometimes prove insulting, as here,¹⁰⁷⁶ hence generating needless hostility.¹⁰⁷⁷ It was best to avoid harshness and bitter self-defense¹⁰⁷⁸ (thus perhaps cf. Acts 4:8–9). Witty repartee was a highly prized skill,¹⁰⁷⁹ but by boldly shaming one's accusers, one risked making enemies of them (e.g., Philost. *Hrk.* 33.8–9).¹⁰⁸⁰ Flattery was a safer way to win one's judges (see comments on Acts 7:51–53), and the powerful were thought to favor flatterers.¹⁰⁸¹ But writers regularly contrasted *παρρησία* with flattery, preferring those who spoke the truth.¹⁰⁸² (This was especially true in friendships,¹⁰⁸³ perhaps particularly because such boldness proved safer there than in politics.)¹⁰⁸⁴ Most denounced flattery,¹⁰⁸⁵ though many may have rationalized contrary practice. Orators could feign *παρρησία* by pretending to say something offensively bold that would not in fact offend their audience;¹⁰⁸⁶ obviously, Peter's words would be genuinely offensive, but Luke's report of them for his own audience would sound rhetorically courageous without being controversial for them.

Ancient literature about frankness often addressed its propriety with regard to rulers. Dio Chrysostom spoke truth instead of flattery even when it was dangerous to do so (*Or.* 3.13); one later writer praised Pythagoras for confronting a tyrant frankly,¹⁰⁸⁷

1072. Dorandi, "Epicurean School," 1074.

1073. E.g., Mus. Ruf. 9, pp. 72.23–74.3.

1074. Lucian *Nigr.* 15; *Dem.* 3.

1075. Mus. Ruf. 9, p. 74.5–7. On courage as one of the four traditional virtues, see, e.g., *Rhet. Alex.* 35, 1441b.7–8; Mus. Ruf. 4, p. 48.8; 9, p. 74.24; Arius Did. *Epit.* 2.7.5b, p. 10.18; 2.7.5b.1, p. 12.21–22; 2.7.5b.2, p. 14.4, 7, 16; Men. *Rhet.* 2.1–2, 373.7; 2.5, 397.23; 2.10, 415.26; Iambl. *V.P.* 32.214–28 (in 30.167–33.240); comments on Acts 26:25.

1076. Plut. *S. Kings, Lys.* 5, *Mor.* 190F; cf. *Prov.* 27:6.

1077. E.g., Appian *Hist. rom.* 9.11.3; cf. Arrian *Alex.* 5.28.1. Lucian mocks Cynics for such behavior (*Phil. Sale* 8, 10).

1078. Philod. *Crit. passim*, e.g., col. 2a.

1079. E.g., Philost. *Hrk.* 33.8; Maclean and Aitken, *Heroikos*, xlvi; Aul. Gel. 1.2.13; 18.13.7–8; *b. B. Bat.* 115b.

1080. Toner, *Culture*, 97, notes that some deployed magic to seek harm against those who mocked them.

1081. Plut. *Educ.* 17, *Mor.* 13B; Arrian *Alex.* 4.8.4–5; 4.9.9; Epict. *Diatr.* 1.9.26; 3.24.45; Hdn. 5.5.6. Toner, *Culture*, 33, contends that flattery and deception became pervasive elements of relationships in Roman society. On 158, he notes that Dio Cass. 59.27.2 characterizes the masses as flatterers, but Toner adds that this was "the safest way to speak to the powerful" (see also 33); on 170–71 he specifically cites Acts 4 as an example of what would have violated elite expectations.

1082. Dion. Hal. *Ant. rom.* 11.9.1; Tac. *Hist.* 1.15; Plut. *Aem. Paul.* 11.3; *Flatt.* 1–37, *Mor.* 48E–74E; Dio Chrys. *Or.* 4.15.

1083. Plut. *Profit by Enemies* 6, *Mor.* 89B; *Flatt.* 17–37, *Mor.* 59A–74E; cf. *Rhet. Her.* 4.36.48; Alciph. *Farm.* 37 (Philometor to Epiphanius), 3.39, ¶3.

1084. Konstan et al., "Introduction," 3, attribute the shift to the rise of kingdoms after the Athenian democracy. Fredrickson, "Free Speech," notes the shift from political to moral discourse (arguing, more controversially, that Paul reiterated its public value).

1085. Historians (Dion. Hal. *Ant. rom.* 1.6.5), philosophers (Epict. *Diatr.* 1.9.20; 1.12; 4.6.33; 4.7.24; Diog. Laert. 6.1.4; 6.2.51; 6.5.92; Marc. Aur. 1.16.4), orators (Symm. *Ep.* 1.37.2; 1.90.2), and moralists (Isoc. *Demon.* 30; Cic. *Amic.* 25.94–26.99; *Off.* 1.26.91; Hor. *Ep.* 1.16.25–39; Juv. *Sat.* 3.86–87; 4.65–72; Babr. 77; Phaedrus 1.13.1–2; 3.16.16–18; 4.13; Athen. *Deipn.* 6.236e), including Jewish writers (Wis 14:17; Jos. *Life* 367; Ps.-Phoc. 91; 1 Thess 2:5), regularly warned against flattery. In a distant culture, see Confuc. *Anal.* 63 (13.23); 100 (5.24).

1086. Anderson, *Glossary*, 94 (citing Rutilius Lupus *De figuris sententiarum et elocutionis* 2.18).

1087. Iambl. *V.P.* 32.215, 220. Cf. Pervo, *Acts*, 118–19, on the ancient motif of confronting tyrants as background for reading the image in Acts 4:15–17.

another praised the Pythagorean Apollonius for refusing to flatter Domitian.¹⁰⁸⁸ Not everyone appreciated this impudence of philosophers against rulers, but benevolent rulers endured it patiently (Suet. *Vesp.* 13).¹⁰⁸⁹ (One might even praise an emperor for preferring truth to flattery—without, of course, seeming to flatter him for it!)¹⁰⁹⁰ The strong, secure in their self-image, might in fact need harsher criticism than others to secure their attention.¹⁰⁹¹ But ancients also understood that people of reputation did not usually appreciate reproofs, attributing them to jealousy.¹⁰⁹² People in authority could view such frank speech as insolent and dishonoring them; kings, with total power, could become angry,¹⁰⁹³ viewing reproof “as insubordination.”¹⁰⁹⁴ That most people praised rulers highlighted all the more the unexpected reproof of others.¹⁰⁹⁵

Philosophers could get away with much, and even when a sage was banished for foolishly criticizing a good ruler, he might earn praise with the unlearned populace for his “frankness.”¹⁰⁹⁶ Frankness did not, however, always pay favorable dividends. Refusing to accept shameful treatment as a subordinate, Agrippa’s former general spoke to him as an equal on the basis of their friendship and hence remained in prison (Jos. *Ant.* 19.317–18, 321–22, 325). The apostles here risk jail rather than such shameful subordination; the issue in their case, however, is not personal honor but the publicly manifest truth of their claim.

II. “UNEDUCATED” (4:13)

ἄγραμματος literally means “illiterate.” But while the level of education widely available in small villages such as Nazareth remains disputed,¹⁰⁹⁷ many or most Palestinian Jewish boys would have had training at least in reciting Torah,¹⁰⁹⁸ and fishermen probably had more access to income and education than most Galileans.¹⁰⁹⁹ The term more broadly indicated simply lack of formal education.¹¹⁰⁰ Here it might function as a contrast with γραμματεὺς, “scribe” (a common enough title in Luke as elsewhere in the Gospels), and hence mean one without scribal training in reading and interpreting Scripture.¹¹⁰¹ Later sages could regard as unlearned even those who could read the

1088. Philost. *Vit. Apoll.* 8.4.

1089. Frankness was likewise appreciated only in the minority of democracies that were benevolent (Dio Chrys. *Or.* 32.27–28).

1090. Dio Chrys. *Or.* 3.2–3 (by contrast with what is reported of the reign of terror in Domitian’s later years, Trajan certainly earned the praise).

1091. Philod. *Crit.* frg. 7 (contrast the weak in frg. 59.9); cf. Luke 11:39–52.

1092. Philod. *Crit.* col. 23a.

1093. Philod. *Crit.* col. 23b.

1094. Philod. *Crit.* col. 24a.

1095. Philod. *Crit.* col. 24b.

1096. Lucian *Peregr.* 18 (complaining about Peregrinus).

1097. Lack of primary education was, however, common in the ancient Mediterranean (e.g., Meeks, *Moral World*, 62), and despite apologetic claims of education for Hellenistic readers (e.g., Jos. *Ag. Ap.* 2.178; *Life* 9–10) and among the aristocracy (*m. Ab.* 5:21; *t. Hag.* 1:2.), Tannaitic mistrust of the *amme haaretz* (cf. Keener, *John*, 732–33) may suggest that even in Jewish Palestine, elementary education was more available to those with means. Horsley, *Galilee*, 246–47, thinks that the nonelite learned primarily orally.

1098. See, e.g., *t. Hag.* 1:2; Watson, “Education,” 311. Outsiders sometimes praised them as a “nation of philosophers”; see comments on Acts 17:22–31. But claims of advanced literacy (e.g., *m. Ab.* 5:21) may apply only to the minority (Horsley, *Galilee*, 246; cf. the various categories in Dalman, *Jesus-Jeshua*, 31–32). Still, note some significant evidence for literacy in Evans, *World*, 63–75, 80–88 (for Jesus, see, e.g., Mark 2:25; 12:10, 26; Luke 10:26, on 86), and Foster, “Educating” (as cited by Evans). See further discussion at Acts 22:3.

1099. See Stanton, *Gospel Truth?*, 186; Freyne, *Galilee, Jesus*, 241; Keener, *Matthew*, 152; cf. Mark 1:20.

1100. Johnson, *Acts*, 78, citing Plato *Tim.* 23A; Epict. *Diatr.* 2.9.10.

1101. Barrett, *Acts*, 233–34; cf. Strack and Billerbeck, *Kommentar*, 3:463; Evans, *World*, 81; on John 7:15, Keith, “Claim” (esp. 63–64). For γραμματιστα related to the law, cf. Rom 2:27, 29; 7:6; 2 Cor 3:6, although, in much of the urban Greek East, a γραμματικὸς would instruct boys from well-to-do homes in grammar at the

Scriptures in Hebrew but did not follow the traditions (or perhaps were unaware of the traditional interpretive pointings) of the schools of sages.¹¹⁰²

Ἰδιώτης could designate an ignorant person or one who lacked training, in contrast to a philosopher.¹¹⁰³ One schooled in a particular philosophy might be a layperson (ιδιώτης) with regard to another philosophy.¹¹⁰⁴ Both Paul (2 Cor 11:6) and Josephus (*Ant.* 2.271) employ the term for someone without rhetorical skill.¹¹⁰⁵ Because the designation came into early Jewish literature as a loanword meaning “commoner,” some commentators associate it with the less educated common people whom later rabbis called the *amme haaretz*.¹¹⁰⁶ Just as some trained philosophers despised the philosophically uninformed masses,¹¹⁰⁷ later rabbis lamented that it was better never to have been born than to be unable to recite the Torah.¹¹⁰⁸ Perhaps because of deficient educational opportunities, poverty could lead to the neglect of the Torah.¹¹⁰⁹ Hillel reportedly doubted that such unlearned people could be pious.¹¹¹⁰ Various Tannaim doubted that those who neglected learning Torah if they had the opportunity would share in the coming world (*ʿAbot R. Nat.* 36 A); some apparently felt that undue fellowship with an *am haaretz* would deprive one of the coming world.¹¹¹¹ Rabbinic reports express the social distance that existed between Pharisees and the *amme haaretz*,¹¹¹² the common people who often ignored their legal interpretations.¹¹¹³

Even the disciples’ appearance (at the least, not adorned like the rich; cf. Acts 3:6) could have counted against them. Despite traditions of poorly clothed¹¹¹⁴ or

secondary level, perhaps around ages seven to twelve, in preparation for rhetoric (Heath, *Hermogenes*, 11–12; Porter, “Paul and Letters,” 534–35; Burrige, “Gospels and Acts,” 510; Kennedy, “Survey of Rhetoric,” 18).

1102. Dalman, *Jesus-Jeshua*, 31–32, at length.

1103. E.g., Mus. Ruf. 3, p. 40.35; cf. Matheson, *Epictetus*, 25; Johnson, *Acts*, 78 (citing Lucian *Alex.* 30, for ignorance; Arist. *Pol.* 1266a for someone untrained). A philosophy student regarded the rabble as ἰδιῶται (Lucian *Hermot.* 1); when the unschooled (ιδιώται) see how the Cynics behave, it makes them reject true philosophy (*Runaways* 21).

1104. Lucian *Hermot.* 17. The “layman” in Lucian’s story proves much wiser than his Stoic-schooled colleague, regularly contrasting the ἰδιώτης with philosophers (*Hermot.* 15, 21, 67, 81, 83).

1105. Fitzmyer, *Acts*, 302. It also applies to outsiders to the church in 1 Cor 14:23–24 (perhaps 14:16).

1106. Bruce, *Commentary*, 102n25; Johnson, *Acts*, 78 (citing *m. Demai* 2:2–3; 3:3).

1107. E.g., Epict. *Diatr.* 1.18.10; 1.2.18; 1.3.4; 1.18.4; 2.1.22; 4.8.27; Sen. *Y. Ep. Lucil.* 66.31; 108.7; Marc. Aur. 11.23; Mus. Ruf. frg. 41, p. 136.22–26; Max. Tyre 1.7–8; 33.1; Iambl. *V.P.* 31.200, 213; Porph. *Marc.* 17.291–92; 30.475; Diogenes the Cynic in Diog. Laert. 6 passim.

1108. *T. Hag.* 1:2. The rabbis did require higher moral standards for the learned (Sanders, *Jesus and Judaism*, 190), but any who neglected Torah study or even listening to sages would be damned (*ʿAbot R. Nat.* 36 A). Priests were also trained in the law (Sanders, *Judaism*, 178).

1109. Cf. *m. ʿAb.* 3:17 (though contrast 4:8).

1110. *M. ʿAb.* 2:6, probably a hyperbolic way to underline the importance of learning Torah but a not unnatural view, considering the price Hillel himself reportedly had to pay (if these stories glorifying him, probably to secure imitation, are true) to acquire learning (see Moore, *Judaism*, 1:313, citing later Amoraic traditions in *b. Yoma* 35b; *Pesah.* 70b).

1111. *M. ʿAb.* 3:10/11, unless it means death in the present world.

1112. For the contrast, see, e.g., *m. Git.* 5:9; *Hag.* 2:7; *t. Demai* 2:5, 14–15, 19; 3:6–7; 6:8; *Ma ʿas.* 2:5; on the *am haaretz*, see the fuller excursus in Keener, *Matthew*, 294–96 (esp. for questions of their cleanness, salvation, and so forth).

1113. Though the severest rabbinic accounts (including Akiba’s comments on his former antipathy toward scholars) may be intended hyperbolically (*b. Ber.* 61a; *Pesah.* 49b); cf. kinder sentiments in *m. Git.* 5:9; *ʿAbot R. Nat.* 16, 40 A.

1114. See, e.g., Mus. Ruf. 16, p. 106.13; Epict. *Diatr.* 3.22.10; cf. 4.8.12, 15; Dio Chrys. *Or.* 34.2; 49.11; 64.18; 70.8; *Juv. Sat.* 13.121–22; Lucian *Runaways* 14, 20; *Phil. Sale* 9; *Icar.* 31; *Dem.* 48; Lucian *Cynic* 4, 20; *Crates Ep.* 16, 23, 33; *Diogenes Ep.* 6, 7, 13, 19, 26, 30, 46; *Diog. Laert.* 6.1.13; 6.2.22–23, 76; cf. *Anacharsis Ep.* 5. Cynics carried only a bag and a staff; see, e.g., Epict. *Diatr.* 3.22.10; Lucian *Runaways* 32; *Peregr.* 24; *Dial. D.* 364–65 (20/10, Charon and Hermes 2); *Book-Coll.* 14; Max. Tyre 1.9. I omit here most references that include long hair (for use below).

unkempt¹¹¹⁵ philosophers and probably prophets (likely 2 Kgs 1:8; certainly John in the wilderness), someone with unkempt beard and hair could be assumed unlearned until his speech proved otherwise (Philost. *Vit. soph.* 1.24.529). Urban elites sometimes denigrated the masses, depicting them as the “dregs” or the sort of dirty water that collects at the bottom of a boat.¹¹¹⁶ Although fishermen (Luke 5:8–10) were not peasants, neither did they belong to the elite.

The disciples lacked formal scribal credentials,¹¹¹⁷ though it is uncertain how many pre-70 sages possessed credentials recognized outside their own movements, in any case. The disciples had studied under Jesus; formal rabbinic ordination was almost certainly not mandatory in this period, and they apparently knew how to recite Scripture. But Jesus does not seem to have studied with any particular school (cf. John 7:15) except perhaps John the Baptist,¹¹¹⁸ whose authority was widely rejected by the urban elite (Luke 7:30). The scribes who were not Sadducees (Acts 4:5; cf. 23:6) may have been concerned about such matters. Sirach contrasts the professional sage with groups that cannot achieve wisdom—that is, common workers (Sir 38:25–39:3).¹¹¹⁹

Most members of the municipal aristocracy, however, whether scribes or not, would have Hellenistic education and, if Josephus is any indication, probably had at least some knowledge of rhetoric, a subject relevant to evaluating speakers. (Evaluation of rhetoric was in fact more widespread in the cities than formal rhetorical training was.)¹¹²⁰ This was also the form of education likeliest to come to the mind of Luke’s ideal audience; probably even their knowledge of the most Jewish training available—training in the law (cf. Acts 22:3)—would have been filtered through this lens (cf. 7:22).

The term ἰδιώτης applied, in rhetorical contexts, to a layperson in rhetoric, even if the person was a philosopher.¹¹²¹ Plainly, the apostles lacked formal advanced schooling, especially in rhetoric, which was the most common form of advanced Hellenistic education.¹¹²² More broadly, they lacked “the formal education of an upper-class gentleman in the Graeco-Roman world; they were ignorant of philosophy and literature and rhetoric.”¹¹²³ This would have been available to the wealthy priests of rank.¹¹²⁴ (For rhetorical and other education, including in Jerusalem, see comments on Acts 22:3.) Boys from wealthy homes in much of the urban Greek East would

1115. For philosophers with long hair and beard, see, e.g., Mus. Ruf. 16, p. 106.14; Dio Chrys. *Encomium on Hair*; Or. 12.15; 35.2; 36.17; 47.25; 72; Epict. *Diatr.* 2.23.21; 4.8.12, 15; Plut. *Isis* 3, *Mor.* 352C; Artem. *Oneir.* 1.30; Lucian *Posts* 33; *Dial. D.* 371–72 (20/10, Charon and Hermes 9); *Peregr.* 15; *Hermot.* 18, 86 (cf. also *Eunuch* 9); *Runaways* 27; *Lover of Lies* 5; *Indictment* 6, 11; *Phil. Sale* 2; *Icar.* 29; *Fisherman* 42; *Dem.* 13; Lucian *Cynic* 1–4, 11, 17, 19–20; Philost. *Ep. Apoll.* 3, 70; *Vit. Apoll.* 7.34, 36; 8.7; Diog. Laert. 1.109; Iambl. *V.P.* 2.11.

1116. Toner, *Culture*, 129, citing Cic. *Quint. fratr.* 2.4; *Flacc.* 18; *Att.* 1.19.4.

1117. E.g., Judge, “Scholastic Community,” 12.

1118. Many scholars portray Jesus as John’s “disciple”; see, e.g., Dodd, *Tradition*, 274; Stauffer, *Jesus and Story*, 65; Lane, *Mark*, 52; Kraeling, *John the Baptist*, 55 (summarizing the position of Lohmeyer [1932] and K. Grobel [1941]); Freyne, “‘Servant’ Community,” 111. This title may exceed our evidence, but Jesus followed John in at least some respects, a relationship unlikely to have been invented by the gospel tradition.

1119. Probably scribes and priests belonged to a literate elite, in contrast to most of ancient Israelite society (Young, “Israelite Literacy”).

1120. E.g., *Rhet. Alex.* 29, 1436b.33–34; Lucian *Prof. P.S.* 20; Witherington, *Corinthians*, 124; for more sophisticated evaluation of speeches, see, e.g., Dion. Hal. *Isoc.* passim; Dio Chrys. *Or.* 18.11; Pliny *Ep.* 3.13.5; 5.3.8; Fronto *Ad M. Caes.* 1.8.

1121. See Winter, *Philo and Paul*, 213–15.

1122. See Ferguson, *Backgrounds*, 85; cf. Aune, *Dictionary of Rhetoric*, 143; Kennedy, *New Testament Interpretation*, 9.

1123. Hanson, *Acts*, 78.

1124. After 70 C.E., rabbis forbade teaching Greek (literature?) but made an exception for R. Gamaliel’s household (*t. Soṭah* 15:8); this would hardly have affected pre-70 aristocratic priests. Moreover, the prohibition probably concerned only children until much later (Lieberman, *Hellenism*, 101–2).

study grammar at the secondary level, often around ages seven to twelve, and focus on rhetoric at the next level.¹¹²⁵ Although Jerusalem undoubtedly offered some such training, the wealthiest probably sent their children “to study rhetoric in Alexandria or other centers of Hellenistic education.”¹¹²⁶ Obviously, such training would not be available to most Galileans from the towns or villages outside Sepphoris and Tiberias.

Such training might be thought to equip one to speak more boldly (it was, at times, a rhetorical technique if employed in proper balance,¹¹²⁷ though rhetoricians would hardly commend it to those facing judges). Yet these disciples speak authoritatively despite their lack of formal training. The claim of being a layperson (ιδιωτης) could also function to lower expectations, thus reinforcing appreciation for the degree of rhetorical skill nevertheless displayed (Dio Chrys. *Or.* 12.16); hence Luke may employ the leaders’ verdict to good rhetorical effect for his own audience.¹¹²⁸

From the standpoint of the documentary papyri, “illiterate laymen” was not an insult¹¹²⁹ and may not have offended Luke’s audience. But the audience would also know that members of the elite (such as the Sanhedrin) often looked down on those of nonelite status and that members of the elite would be offended by the impudence of commoners (see discussion of “frankness,” above). Any members of Luke’s audience who might have considered the protagonists’ lesser sophistication embarrassing, however, would find compensation in the hero of the second half of the volume, Paul. Yet the Jerusalem elite want to *kill* the educated Paul: the inconsistency resembles the treatment of John and Jesus (both rejected, for opposite reasons, Luke 7:33–34; not unlike the cornerstone, Acts 4:11).

Other hostile observers had recognized before that Peter had been “with” Jesus (Luke 22:56, 58), but on this occasion Peter will not be ashamed of it (cf. Luke 9:26; 22:57–62). Peter’s claim in Acts 4:10 left no doubt that the apostles were supporters of Jesus of some sort (cf. Luke 9:49), but now the Jerusalem authorities recognize that these were among Jesus’s close disciples or adherents who learned from him.¹¹³⁰ Teachers were often judged by how their students turned out and were sometimes even held liable for it.¹¹³¹ Thus, for example, when Crates donated all his property to the citizen body, the public marveled at the one who had trained him in this way (Diogenes *Ep.* 9, to Crates). In a negative vein, Socrates, who was accused of corrupting youths, protested that none of his disciples had gone from moral to immoral behavior.¹¹³² The observation of this verse applies to the whole of the parallels between the Gospel’s Jesus and Acts’ apostles: Peter performs signs (Acts 5:14–15), achieves popularity (5:26), and so forth because the apostles have been with Jesus and his

1125. Heath, *Hermogenes*, 11–12; Porter, “Paul and Letters,” 534–35; Burridge, “Gospels and Acts,” 510; Kennedy, “Survey of Rhetoric,” 18. Rhetorical training in Rome was normally around ages fifteen to seventeen (Watson, “Education,” 310); apart from the aristocracy, Judeans rarely attended school of any sort beyond age thirteen unless training under a rabbi (Watson, “Education,” 312).

1126. Watson, “Education,” 312.

1127. For the favor attaching to its appropriate use in rhetoric, see Anderson, *Glossary*, 94; Rowe, “Style,” 139.

1128. For lowering audience expectations, see, e.g., Isaeus *Aristarch.* 1; Cic. *Quinct.* 1.1–4; 24.77; 26.80–27.85; Isoc. *Panath.* 3; Quint. *Inst.* 4.1.8–9, 11.

1129. See esp. Kraus, “Illiterate.” Papyri offer a view of the broadest cross section of society, including the very poor.

1130. On this sense of “disciple” as adherent of a school, see Wilkins, *Discipleship*, esp. 41–42.

1131. E.g., Aeschines *Tim.* 171–73; Philost. *Vit. soph.* 2.8.579; 2.10.588 (an example of liability); *t. Ed.* 3:4; *Abot R. Nat.* 27 A; 34, §76 B; Mark 2:18, 24; perhaps Alciph. *Court.* 7 (Thais to Euthydemus), 1.34, ¶¶6–7.

1132. Xen. *Apol.* 19 (the notorious Alcibiades had always been dissolute). Xenophon defends Socrates against these charges elsewhere as well (*Mem.* 1.2.2, 12); Critias and Alcibiades (1.2.12) followed him only to learn proficiency in speech (1.2.14–16) and remained virtuous during their period of study with him (1.2.18, 26).

Spirit continues to empower them.¹¹³³ Because they lacked boldness before Pentecost (Luke 22:57–62), their newfound *παρρησία* reflects the impact of the Spirit's empowerment on their speech.¹¹³⁴ This humanly inexplicable boldness fulfills Jesus's promise (21:15; cf. 12:11–12).¹¹³⁵ It thus brings honor to Jesus, the one they have been "with" and who should be credited for their newfound abilities.¹¹³⁶

III. PRIVATE DISCUSSION (4:14–17)

Even if the apostles are less educated, their spiritual power to heal and speak boldly both confounds and silences the educated elite (Acts 4:14). In ancient literature, speakers sometimes silenced their opponents, shaming the latter.¹¹³⁷ That the man is "standing" (4:14) presumably reemphasizes the point that his feet and ankles are now strong (3:7).¹¹³⁸ (His presence may indicate that the man was jailed overnight with them,¹¹³⁹ but he may have simply been summoned for the hearing. He was the occasion but not the cause of the putative disorder.)

Who could be Luke's ultimate source for the closed discussion in 4:16–17? Leaks sometimes occurred from closed meetings of Roman senators (Val. Max. 2.2.1a) or the Jerusalem Council (Jos. *Life* 204); but Luke could also be simply engaging in a reasonable historical surmise about the general nature of the discussion (an acceptable technique in ancient historiography), a surmise that would appear very probable in view of the leaders' behavior after their closed session.¹¹⁴⁰ Such a surmise fits standard rhetorical practice for expanding a *chreia* (anecdote),¹¹⁴¹ as well as Luke's historical method (rephrasing Luke 24:47–49 in Acts 1:4–8). The practice of warning before punishment (cf. Acts 5:40) is documented in some ancient Jewish sources.¹¹⁴² Aristocrats in high courts regularly argued on the basis of the credibility of witnesses (e.g., Cic. *Scaur.* 17.38–40); in this case, however, the witnesses are not limited to the apostles before them.

The apostles had confronted the municipal leadership boldly, and to leave the impression that the apostles had the final word would cause the municipal officials to lose face. At the same time, the multitudes who celebrated the apparently inexplicable,

1133. Juel, *Promise*, 66. Often in the Gospel, the disciples (or the special nucleus of disciples, including Peter and John) are "with" Jesus (Luke 8:1, 38, 51; 22:14; 24:29; cf. Mark 2:26).

1134. See esp. Hull, *Spirit in Acts*, 143–45. Many ancient thinkers considered learning from a teacher good, but from innate virtue better (cf. Philo *Abr.* 6); Musonius Rufus opined that even the least educated could have virtue because valuing it is innate (2, p. 38.17–20).

1135. Pervo, *Story*, 24; idem, *Acts*, 117.

1136. Cf. Bede *Comm. Acts* 4.13 (Martin, *Acts*, 51; also L. Martin, 50), comparing 1 Cor 1:17: God sent "unlettered" people to preach so that faith "would not be thought to have come about by eloquence and teaching instead of by God's power."

1137. E.g., Xen. *Hell.* 6.3.10; Cyr. 5.5.21; Demosth. *Cor.* 112; Plut. *Cic.* 12.5; Aul. Gel. 1.2.13; 18.13.7–8; Eunapius *Lives* 497–98; Neh 5:8; Luke 14:4; 20:26; Matt 22:34; Jos. *Life* 298–99; Tg. *Ps.-J.* on Deut 28:15.

1138. Pointed out by Kistemaker, *Acts*, 158.

1139. Cf. the observations of Mundhenk, "Invisible Man."

1140. Marshall, *Acts*, 101–2, also presents both possibilities. Some believe that Luke elsewhere takes the liberty to rewrite Mark's account of Jesus before the Sanhedrin (Luke 22:66–71) without additional sources (Matera, "Luke 22, 66–71"). But Bruce does point to a possible Semitism in the Byzantine text of Acts 4:17 (Bruce, *Acts*³, 154; see discussion below).

1141. Theon *Progymn.* 4.37–42, 80–82, advised expanding or contracting fables by elaborating speeches or descriptive details; but his example for expanding a *chreia* does not change its basic meaning much (3.224–40; cf. 2.115–23; cf. Longin. *Subl.* 11.1).

1142. E.g., Marshall, *Acts*, 97; Fitzmyer, *Acts*, 332; following Jeremias, "Untersuchungen." Though this probably reflects Pharisaic sensitivities and Conzelmann (*Acts*, 41) is right that the sources are more than a century later, it comports with the narrative (much more than does Conzelmann's approach); we also lack clear evidence for *contrary* procedures in Jewish noncapital cases, and preliminary warnings were not unheard of elsewhere.

yet undeniable, healing would certainly view the authorities, who publicly arrested the apostles, as punishing them for a “benefaction” (Acts 4:9) if they flogged them. So the authorities released them with a mere warning; if the apostles failed to heed the warning, however, the authorities would be forced to act at that time or lose face and the people’s respect by backing down (5:28–41). (For the apostles, the corrupt leadership had already lost its moral authority to silence them because it had handed Jesus over for execution and because God had reversed its verdict.)

Because the witnesses are too numerous and diverse, the Sanhedrin cannot deny that the miracle occurred (4:16); their use of γνώστων probably echoes Peter’s own declaration in 4:10.¹¹⁴³ If “What shall we do . . . ?” (τί ποιήσωμεν) alludes to the only other NT uses of the phrase—namely, Luke 3:12, 14 and Acts 2:37¹¹⁴⁴—it ironically underlines the contrast between humble and blinded responses to divine activity. That they are *unable* to deny it might mean that they would if they could (cf. the same term for “deny” in Acts 3:13–14).

Despite the miracle, the leaders never seem to pause to question their own position. The dissonance of this feature of the narrative invites the ideal readers’ notice.¹¹⁴⁵ In part, Luke may imply political corruption and hardness of heart among the elite, a condition with which most people in ancient cities would have been familiar; even on Luke’s reading, however, corruption does not affect all the Sanhedrin’s members (Acts 5:34–39). Other factors can also help explain why the miracle itself was not intellectually coercive. Later sages valued tradition over signs (e.g., *t. Yebam.* 14:6).¹¹⁴⁶ More to the point with Hellenistically trained Sadducees (and expectations for Luke’s ideal urban audience), some thinkers were skeptical about many paranormal claims,¹¹⁴⁷ especially unsubstantiated miracle claims¹¹⁴⁸ (which this is not; cf. Acts 4:14, 16). (For the plausibility of such a scenario, one need only think of how many claims of miracles today are simply dismissed or ignored without investigation, especially when they come from social strata not respected by the intellectual elite.)

One could acknowledge a miracle yet question its source, as Celsus and later rabbis did regarding Christian miracles.¹¹⁴⁹ Nevertheless, the informed reader cannot miss the irony of authorities more interested in political “damage control” than in explaining a miracle that they themselves cannot deny.¹¹⁵⁰ “The ignorance that may have excused them for Jesus’s death [cf. 3:17] hardens into blindness.”¹¹⁵¹

For the informed reader, it is clear that the interrogators lack the moral authority that the disciples possess; their power is purely political and hence can be maintained only through political means and sensitivities (cf. similarly in Luke 20:5–7). By contrast, Jesus chose the Twelve as leaders of a nucleus for the renewed remnant

1143. They also employ Luke’s designation σημεῖον (Acts 4:22; cf. 2:43). Perhaps what they cannot “deny” contrasts with “denying” Jesus (3:14); it might also imply that they would deny it if they could (i.e., were the act not public; cf. Matt 28:12–13; on the importance of activity being public, see comments on Acts 26:26).

1144. The phrase was not uncommon (e.g., Judg 21:7, 16; 1 Sam 5:8; 6:2; 2 Sam 16:20; 2 Chr 20:12; Song 8:8; 1 Macc 3:50; 1 Clem. 16.17), especially given the addition “to these people,” but coming so soon after Acts 2:37 (and given Luke’s usage), it seems plausible here.

1145. It invites commentators’ notice as well (e.g., New, “Name,” 132). That each side in the confrontation claimed refutation of the other (cf. Acts 4:27–29) may be interpreted in light of the concern for losing face and the observations of labeling theory (Webber, “Heathen So Arrogant”).

1146. More fully, see Dibelius, *Tradition*, 149–50 and references.

1147. See the commentary introduction, ch. 15, sect. 6 (Keener, *Acts*, 1:537–49); Keener, *Miracles*, 87–96; cf., e.g., Thucyd. 1.22.4; Polyb. 7.7.1; Pliny E. *N.H.* pref. 12–13.

1148. Cf., e.g., Lucian’s pillorying of the gullibility of Peregrinus’s followers, especially at his death.

1149. See, e.g., Yamauchi, “Magic?,” 90–91; also in the gospel tradition itself, cf., e.g., Keener, *Spirit*, 104–9.

1150. Johnson, *Acts*, 81.

1151. Pervo, *Story*, 21–22, on the responses of the leaders in Acts 3:1–8:3; Haenchen, *Acts*, 218–19.

of Israel (see comments on Acts 1:22, 26), and they would ultimately rule over it (Luke 22:30).¹¹⁵² The corrupt leaders' days of power were numbered. In Acts 3–5, "the present leaders of the people lack credibility and authority in the people's eyes, while the apostles have become their effective leaders. The Jewish authorities refuse to accept the obvious significance of the facts they cannot deny."¹¹⁵³ In view of such matters, Luke, like Paul in Rom 11, grapples with theodicy and apologetic to explain how in God's purposes the apostolic leadership of Israel has been delayed. Tragically, Israel's political leaders prevail (though the Jerusalem church remains effective, Acts 21:20) and lead Jerusalem down the road Jesus warned would lead to destruction (Luke 19:42–44; 21:21–24). Like Paul, however, Luke nevertheless believes that the apostolic movement will one day prevail and peacefully bring Israel under the lordship of its rightful king, Jesus (Acts 3:20; Luke 22:30).

The authorities decide on issuing a warning (Acts 4:17). Municipal authorities normally suppressed only groups that posed a threat to stability; executing a ringleader was often sufficient.¹¹⁵⁴ Romans suppressed cults that they considered subversive, but otherwise proved officially tolerant even in Rome itself.¹¹⁵⁵ More severe repression was necessary only in cases of more dangerous threats; thus, after one Cleander was executed (like Jesus) for treason (Hdn. 1.13.4), his sons and known friends were also executed (1.13.6). The leaders here are not certain that the disciples pose a political threat on the same order as Jesus; nevertheless, if an executed would-be messiah's supporters continued supporting him, it could stir unrest against the leaders who had felt the need to suppress him (cf. Acts 5:28).¹¹⁵⁶

Late as the text form behind the Byzantine text is, on this verse (4:17) it may offer an earlier variant than the Alexandrian family: Byzantine manuscripts have ἀπειλή ("with a threat") in front of the verb, a familiar Semitism that made little sense in Greek. This variant, if original, could suggest that Luke followed an eyewitness source¹¹⁵⁷ or at least a bilingual informant whose language reflected Semitic interference.¹¹⁵⁸

IV. REFUSING TO BE SILENT (4:18–22)

Ordering them not to speak "in Jesus's name" (4:18) means not to speak as his representatives, acting on his authority and thus drawing attention to a rival voice for popular attention who was executed by the authorities. But for the informed reader, compliance with such an order is clearly impossible: this same "name" is doing miracles (3:6, 16; 4:7, 10) and is the only means available for Jerusalem's salvation (2:21, 38; 4:12).¹¹⁵⁹

Peter and John openly refuse to abide by the order (4:19–20). Their "inability" to stop speaking according to their firsthand knowledge (4:20) contrasts with the Sanhedrin's "inability" to deny the sign (4:16). Unethical "gag orders" often proved

1152. Indeed, Talbert, *Acts*, xxi, makes a case that in their role in the Jerusalem church, they judge the restored remnant already under Christ's reign established in Acts 2:34–36.

1153. Clark, "Role," 174–75 (and more fully, 173–77).

1154. E.g., Dion. Hal. *Ant. rom.* 3.40.3; 5.43.2; Jos. *War* 2.75, 77–78.

1155. Cf. O'Rourke, "Law," 178; Garnsey and Saller, *Empire*, 170–71; Bammel, "Romans 13," 367–68. E.g., the repression of the Isis cult (Jos. *Ant.* 18.79) was a special (and temporary) circumstance.

1156. For the view that the Sanhedrin had begun to perceive in the apostles a potential political threat, see Judge, *Pattern*, 64; idem, "Scholastic Community," 12.

1157. Bruce, *Acts*³, 154 (comparing, e.g., Exod 3:7).

1158. Luke might then have unconsciously retained the expression because he recognized it from the LXX, even if he was not composing this section in that style. But as with most source-critical questions, this one is not easy to resolve.

1159. One may also think of speaking "in the name" of God (Jos. *Asen.* 9:1, where it refers to rejecting close companionship with an idolater, Jos. *Asen.* 8), but it is not clear that this was a widespread idiom.

ineffective with proclaimers who exhibited integrity. Many first-century Jews with apocalyptic perspectives, while avoiding violence, may have disdained the elite who led their nation in paths they considered less holy.¹¹⁶⁰ They had biblical models for respectful civil disobedience (as here) when necessary (e.g., Dan 3:16–18; 6:10, 13) and, for more extreme cases, the defiant responses of the Maccabean martyrs in 2 and 4 Maccabees. (Politically, Sadducees and Maccabees were also incompatible.)

Among Greeks, philosophers in particular offered models of resistance against orders for silence; among these the martyred Socrates became the model par excellence. Thus, for example, Socrates virtually refused to obey the illegal commands of the thirty tyrants (Xen. *Mem.* 4.4.3). Socrates's alleged claim that he would obey the god rather than his judges (Plato *Apol.* 29D; see comments on Acts 5:29) was a commonplace that might inform Luke's particular choice of wording (esp. in Acts 5:29).¹¹⁶¹ Luke later appeals to the model of Socrates more explicitly in the case of Paul, whom he often parallels with Peter (see comments on Acts 17:19). Threatened with death but perhaps allowed release if he remained silent, Plato's Socrates was respectful (cf. 4:8's *captatio*) but insistent: "If you should let me go on this condition which I have mentioned, I should say to you, 'Men of Athens, I respect and love you, but I shall obey the god rather than you, and while I live and am able to continue, I shall never give up the philosophy or stop exhorting you and pointing out the truth to any one of you whom I may meet.'"¹¹⁶² The parallel might be "analogical" rather than "genealogical,"¹¹⁶³ but Luke elsewhere was ready to use common quotations (with or without allusion to their source; cf. Acts 26:14); he could have paraphrased his sources to bring out such analogies if he wished (see the commentary introduction, ch. 8).

Many philosophers justified disobedience to authorities when obedience to them would contravene obedience to the justice they ought to espouse. (Sometimes they even portrayed this as obedience to the authorities in *spirit*.)¹¹⁶⁴ Thus Musonius advocates obedience to philosophy over obedience to one's father if the latter forbids the former;¹¹⁶⁵ by acting in such ways, one chooses God's will over a mortal's.¹¹⁶⁶ Dio Chrysostom complains about those who neglect Zeus's divine law for human laws (*Or.* 80.6–7). Jewish martyr accounts portray acts of defiance against rulers to honor God.¹¹⁶⁷ Luke's ideal audience, familiar with the LXX, will naturally think also (or especially) of prophets who defied authorities, including Jerusalem's authorities, to bring them the one true God's message (cf., e.g., 1 Sam 13:13–14; 2 Sam 12:1–15; 1 Kgs 13:1–3; 2 Chr 24:20; Jer 20:3–6; 26:20).

Peter's "Judge for yourselves" (cf. "if we are being examined" in Acts 4:9) invited the authorities' own evaluation of the obvious; such remarks appear elsewhere (cf.

1160. See Segal, "Revolutionary," 211–12, arguing for Jesus's own setting.

1161. Noted by most commentators (Wikenhauser, *Apostelgeschichte*, 66; Marshall, *Acts*, 102; Barrett, *Acts*, 237; Johnson, *Acts*, 79; Witherington, *Acts*, 197; Dunn, *Acts*, 55; Boring, Berger, and Colpe, *Commentary*, 314; cf. also Socrates *Ep.* 1). Athenag. *Plea* 7 may recall Acts.

1162. Plato *Apol.* 29D (LCL, 1:109); cf. also 37E (LCL, 1:133).

1163. Longenecker, *Acts*, 103; cf. Bruce, *Commentary*, 104. Cf. Luther at Worms (April 14, 1521; Marguerat, *Actes*, 149).

1164. E.g., Mus. Ruf. 16, p. 102.12–31, for whom *true* obedience to fathers is obeying what they *should* command rather than what they do command. Musonius was apparently sympathetic to the conspiracy against Nero (Meeks, *Moral World*, 51), as was, of course, Seneca (Tac. *Ann.* 15.45, 60–64).

1165. See Mus. Ruf. 16, p. 100.23–31.

1166. Mus. Ruf. 16, pp. 104.37–105.1. Antigone likewise preferred the laws of Zeus to those of Creon (Soph. *Antig.* 450–55, cited by Meeks, *Moral World*, 21; Boring, Berger, and Colpe, *Commentary*, 314).

1167. See, e.g., 2 Macc 7:2; 4 Macc 5:16–29; Jos. *Ant.* 17.158–59 (cited by Conzelmann, *Acts*, 33; Johnson, *Acts*, 79). For a Jewish prophetic reading of Luke's use of "boldness," see Shelton, "Boldness," 319–20 (Jewish usage on 302–3; Acts' usage on 308–15).

1 Cor 10:15; 11:13).¹¹⁶⁸ Orators sometimes asked questions of their audience as a rhetorical device;¹¹⁶⁹ the most relevant form was the device that rhetoricians called *anacoenosis*, rhetorically inviting the audience's own opinion (cf. Luke 10:26).¹¹⁷⁰ "Judge for yourself" could be construed as a rhetorical device similar to submission to a jury's or judge's decree¹¹⁷¹ (as if one had any choice; cf. comments on Acts 7:51–53; 24:8, 10).

Even a writer who wished to show off his oratory would not waste it on a dialogue,¹¹⁷² however, and this brief rejoinder to the authorities is more like part of a dialogue than a lengthy speech. The following context reveals that Peter has no intention of currying favor. In contrast to most rhetorical questions, this one functions ironically; Peter invites his hearers to pronounce negative judgment on their own behavior (cf. 2 Sam 12:5–7). In fact, there can be no question concerning what is "right" (δικαιος) in such a choice, a point perhaps underlined by Luke's (and Peter's) most recent use of the term: the unjust execution of "the righteous one" (Acts 3:14).

Appeal to what Peter and John have "seen and heard" implies that the court's real interest is not maintaining public security but suppressing legitimate testimony.¹¹⁷³ If the disciples are "witnesses" (4:20), they hold the moral high ground both within and outside the story world; as common as the intimidation of eyewitnesses against testifying must have been, no one defended it as honorable behavior. Hearings regularly included rhetorical misrepresentation of opponents' claims and attempts to discredit witnesses (see comments on Acts 6:11; 24:5–9), but only tyrannies openly prevented testimonies from being heard in court.

The question of whether Luke intends the apostles' boldness toward authorities as a model for Christian proclamation in his own day requires some nuancing.¹¹⁷⁴ Certainly, the disciples follow the example of Jesus, who accepts human authority as valid but subordinate to God's (Luke 20:25); obeying God rather than people (Acts 5:29) when the two are in conflict does not require disrespect under normal circumstances (cf. 4:8; 23:5).¹¹⁷⁵ Luke does not seem to treat all authorities in the same manner. Throughout his narrative, Luke usually appeals favorably and respectfully to Rome, in contrast to Jerusalem's (by his day, probably defunct) Sanhedrin. Nevertheless, he would presumably authorize civil disobedience there as well if it became necessary (cf. Luke 21:12–15).¹¹⁷⁶

1168. E.g., Alciph. *Court.* 7 (Thais to Euthydemus), 1.34, ¶7.

1169. E.g., Max. Tyre 1.1 even uses it to open his work. Cf. *hypophora*, asking what the adversaries can say on their behalf or what can be said against the speaker (*Rhet. Her.* 4.23.33).

1170. See Porter, "Paul and Letters," 581 (citing Phil 1:22–24). In view of Acts 4:20, it is certainly not aporia (pretending not to know where to start).

1171. E.g., Aeschines *Tim.* 196.

1172. See Schenkeveld, "Philosophical Prose," 230.

1173. For Acts 4:19–20 as judicial rhetoric, see Soards, *Speeches*, 44. For "seen and heard," see extended comments on Acts 2:33. Although I regard this as a good Lukan expression, Johannine scholar Paul Anderson has pointed out to me its exact correspondence (in its present form) to Johannine usage; because this is one of John's only speaking parts in this work and because of at least Johannine tradition in the Fourth Gospel, the question that Anderson raises may merit further exploration (see Anderson, *Quest*, 10, 116; idem, *Christology*, 274–77; cf. Wright, *Mission of People*, 154).

1174. Boldness in general, of course, is a positive model (see Acts 4:29–31, which likely does attribute boldness by the Spirit's empowerment more broadly than to the apostles alone; cf. 4:33).

1175. Cf. Cassidy, *Society*, 44–45.

1176. For the passage as a model for Christians when the state seeks to muzzle the apostolic message, see Draper, "Church-State Conflict." Pelikan, *Acts*, 89, questions the Reformation's application of this text to resisting ecclesiastical authority (e.g., Augsburg Confession 28.75). Luke probably never envisioned the need for such resistance (Acts 15:2 is gentler than Gal 2:6, 11), but it is difficult to see how the application is illegitimate: Peter is here confronting religious as well as civil authority, preferring truth to authority.

In the end, it is the municipal authorities who are (from Luke's perspective) compelled to back down, although without explicitly indicating that they are doing so (Acts 4:21–22). This would be a matter of shame; for the leaders to lose face before these populist healers (who might seem arrogant to them) undoubtedly aroused their long-term hostility. Nevertheless, they were left little choice but to back down. Politicians sometimes had to accommodate the populace to prevent unrest (cf. Luke 20:1–7);¹¹⁷⁷ for this reason, the Sadducees sometimes even worked with the more populist Pharisees despite the differences between the two parties.¹¹⁷⁸ They had not “found” (cf. Luke 23:22) a legal basis for punishing them, and certainly they could not protest the people’s “glorifying” God (Acts 4:21).¹¹⁷⁹

Nevertheless, upper classes regularly despised demagogues and their appeals to the unlearned, hence easily swayed, masses. In elite ideology, it is individuals least persuasive to the wise who tend to be most persuasive to the masses,¹¹⁸⁰ and in one of the more common themes of ancient political thought, the masses are easily misled by demagogues, those who appeal to their ignorance instead of courting the wise elite.¹¹⁸¹ The Greek term *δημαγωγός* (from which we derive the term “demagogue”) was not originally negative in classical Athens,¹¹⁸² but aristocratic critics saw dangers in purely populist appeal. Popular support of the masses for (or against) a hero was common in good stories,¹¹⁸³ but these reflected (albeit sometimes also amplified) social reality (see comments on Acts 2:47). Some ancients charged that public speakers used oratory to sway the masses,¹¹⁸⁴ though the authorities are not likely to attribute any formal rhetorical training to the disciples (4:13).

Ancient *encomia* praised those who had education; conversely, lack of education was not praiseworthy.¹¹⁸⁵ Popular philosophers such as the Cynics preferred the simple life and hence were more apt to appreciate those formally unlearned.¹¹⁸⁶ Some philosophers felt that virtue was more widespread than education because it was innate.¹¹⁸⁷ Most would have been skeptical, however, of those who sought to be public speakers and leaders purely by instinct and without training.¹¹⁸⁸

That the man disabled from birth (3:2) was more than forty (4:22) heightens the

1177. Cf. the Roman senate after the creation of tribunes. With Acts 4:21, Marguerat, *Actes*, 141, compares Luke 19:48.

1178. E.g., Jos. *War* 2.411; *Life* 21–22.

1179. Normally this means “praising” him (e.g., *Test. Sol.* 5:13; cf. *1 En.* 90:40; *Jub.* 25:11; 4 *Macc* 1:12; *Test. Ab.* 6:8; 18:11 A). This is a regular response to divine interventions in Luke-Acts (Luke 2:20; 5:25–26; 7:16; 13:13; 17:15; 18:43, where also “the people” do so; 23:47; cf. 2 *Cor* 9:13; *Gal* 1:24), though in Acts focusing on the conversion of the Gentiles (Acts 11:18; 13:48; 21:20), and also applies to honoring Jesus (Luke 4:15; Acts 3:13).

1180. Eurip. *Hipp.* 988–89. For elite Roman disdain for populist rhetoric, which was often portrayed as unnecessarily passionate or frenzied, see Hall, “Delivery,” 231.

1181. E.g., Aristoph. *Frogs* 419, 1085–86; Isoc. *Ad Nic.* 48; Xen. *Hell.* 2.3.27, 47; Arist. *Pol.* 3.6.4–13, 1281a–1282b; 4.4.4–7, 1292a; 5.4.1–5, 1304b–1305b; 6.2.10–12, 1319b; *Rhet.* 2.20.5, 1393b; Diog. Laert. 6.42; Polyb. 6.3–4; Diod. Sic. 10.7.3; 15.58.3; Dion. Hal. *Ant. rom.* 7.8.1; 7.31.1; 7.56.2; 8.31.4; 9.32.4; 10.18.3; Livy 3.71.5; 6.11.7; 22.34.2; Appian *Hist. rom.* 2.9; 3.7.1; 7.3.18; 11.7.40; C.W. 1.5.34; Phaedrus 1.14.10–13; Plut. *Cic.* 33.1, 3–4; *Cam.* 31.2; *Praising* 16, *Mor.* 545C; *Statecraft* 5, *Mor.* 802 DE; Max. Tyre 6.5; 27.6; Ael. Arist. *Def. Or.* 189, §57D; 201–2, §§61D–62D; Philo *Creation* 171; Jos. *Ant.* 4.223; 6.36. On Dio Chrysostom’s mistrust of the mob, see Barry, “Aristocrats.”

1182. Hornblower, “Demagogues.”

1183. Pervo, *Profit*, 35.

1184. See, e.g., Ael. Arist. *Def. Or.* 189, §57D; 201–2, §§61D–62D, for an orator’s response.

1185. Malina and Rohrbaugh, *John*, 152–53.

1186. Malherbe, *Social Aspects*, 90, commenting on this passage.

1188. See, e.g., Socrates’s view in Xen. *Mem.* 4.2.6.

magnitude of the miracle,¹¹⁸⁹ eliciting the crowd's praise.¹¹⁹⁰ His disability had been neither temporary nor partial and was widely known (3:10), and thus the healing was impossible to deny. Miracle stories often include the duration of prior disability to heighten the intensity of the miracle (cf. Mark 5:25; John 9:1).¹¹⁹¹

e. Prayer for More Boldness (4:23–30)

Acts 4:23–5:16 displays God's power in the face of the world's opposition. In 4:23–31, Luke emphasizes God's agents glorifying God in the face of opposition, because opposition fulfills God's plan (4:25–28), and their asking therefore for continued boldness backed by continuing signs (4:29–30). Their prayer may illustrate graphically the custom of corporate prayer mentioned in 2:42 (cf. 2:47).

As elsewhere in Luke-Acts, prayer invites the coming of the Spirit (Luke 3:21–22; 11:13; Acts 1:14; 8:15). But the presence of prayer in this crisis contrasts starkly with the disciples' prayerlessness in another crisis in Luke 22:39–46;¹¹⁹² the disciples now follow the prayerful model of their Lord. Jesus had warned his followers to respond to persecution with prayer (6:28).¹¹⁹³ The prayer may offer one concrete model for prayer in the face of suffering:¹¹⁹⁴ acknowledging (in language echoing Scripture) God's supreme authority (Acts 4:24); reading persecution in light of earlier biblical prayers and hence putting it in its place in God's plan (4:25–28); and praying for renewed confidence and power to go on speaking regardless of opposition (4:29–30).

As in the Fourth Gospel and many ancient historians, where speeches provide perspectives on narrative events, the prayer in this passage provides a theological interpretation of the opposition the apostles have experienced.¹¹⁹⁵ The prayer confirms the pattern for how the gospel will spread in the rest of Acts (especially through the Spirit's empowerment for signs and boldness, which follow the prayer, 4:29–31).¹¹⁹⁶ The prayer also provides encouragement in the face of persecution by emphasizing God's sovereignty, historical perspective on facing opposition (David's and Jesus's suffering), and power for signs by the Spirit and Jesus's name.¹¹⁹⁷

We lack external corroboration to evaluate Luke's sources here,¹¹⁹⁸ but scholars have offered various observations. Structurally the passage follows the same pattern as other reports of people narrating what God had done (e.g., Luke 24:33–35).¹¹⁹⁹

1189. Cf. the healing of a lame man of thirty in Philost. *Vit. Apoll.* 3.39. Here Bede *Comm. Acts* 4.22 (Martin, *Acts*, 52) opines that his age made his healing all the more difficult to challenge (though Bede then goes on to allegorize the number).

1190. The proposed allusion to Israel's forty years in the wilderness (Boismard and Lamouille, *Actes*, 2:157–58; Parsons, *Acts*, 58 [citing Isa 35 in Acts 3:8]; cf. Bede *Comm. Acts* 4.22 [Martin, *Acts*, 52]) is possible (cf. Acts 7:36, 42; 13:18; John 5:5), but it lacks explicit supporting clues in the text and may simply be a round number (cf. Acts 23:13, 21) to emphasize the extended duration of his need.

1191. Theissen, *Miracle Stories*, 51–52; Lake and Cadbury, *Commentary*, 45 (citing Philost. *Vit. Apoll.* 3.38).

1192. Tannehill, *Acts*, 71–72.

1193. Gradl, "Gebet," emphasizes prayer as response to persecution here; cf. Green, "Acts," 742, citing Luke 22:40, 46. Cf. Dan 6:10.

1194. Hamm, "Paradigm," even views it as a model for liturgical prayer. In view of Ps 2, just referred to, one might expect prayer for judgment against the apostles' enemies; instead, the prayer is for boldness for proclamation (Hamm, *Acts*, 29).

1195. See, e.g., Rosner, "Biblical History," 76 (comparing the prayer in 1 Kgs 8:22–53); Keener, *John*, 69–71.

1196. See Wahlde, "Assessment of Persecution" (part omitted); more fully, idem, "Acts 4, 24–31."

1197. Wahlde, "Acts 4, 24–31," esp. 244. On the Spirit providing boldness to face opposition here, see Mittelstadt, *Spirit*, 99. The prayer moves from God's sovereignty over creation (Acts 4:24) to sovereignty over their present difficult situation (Gallagher, "Acts 4:22–31," 50).

1198. Prayers could be inserted into historical narrative like speeches, though the narrator may not have had access to a speech (cf. 1 Macc 7:36–38; perhaps 1 Sam 2:1–10).

1199. Maloney, *Narration of Works*, 43–66.

Although this pattern appears in the LXX as well,¹²⁰⁰ it may indicate Lukan composition or reworking.¹²⁰¹ Such an observation does not deny the possibility that Luke may have drawn on earlier sources. In favor of Luke's dependence on sources here, Witherington notes that Acts 4:27 preserves the etymological significance of "Christ" as "anointed," an idea quickly obscured among Gentile churches where "Christ" became more a name than a title.¹²⁰² Dunn offers the following observations:¹²⁰³

1. Early Christians may have employed similar prayers in similar situations (esp. Isa 37:16–20).¹²⁰⁴
2. "Lord" means "God" here, rather than Jesus.
3. Jesus appears as the servant; as in the early Christology of Acts 3:13, 26, this may suggest pre-Lukan Christology.
4. The prayer's mention of "the peoples of Israel" in contrast to Luke's positive use of "the people" in 4:1–2 may suggest pre-Lukan material.
5. Dunn argues for the possibility of early tradition even behind 4:31.

Some of these suggestions are weaker than others (for discussion of the antiquity of servant Christology, see comments on Acts 3:13). It is always easier to spot Lukan elements that fit the work's unity than to substantiate non-Lukan material (since anything that Luke includes is, by definition, "Lukan" regardless of the prior sources). But given what we know of Luke's custom elsewhere, it is reasonable to affirm that Luke has a tradition of the prayer meeting here and some information about the early community's perspectives that he has written in a manner that both takes account of the tradition and fits his work as a whole.

I. THE GATHERING AND ADDRESS (4:23–24)

After being released, the apostles returned to "their own";¹²⁰⁵ scholars differ as to the exact sense of the reference. Most think that the entire community of disciples is in view, which would fit what appears to be a general pattern (2:42, 46; 13:52; 14:27; 15:4).¹²⁰⁶ Others doubt that this is possible, since it now may have included more than eight thousand members (2:41; 4:4);¹²⁰⁷ this might pose a strain even on a meeting in the temple courts, and whatever place they met was shaken (4:31).

A meeting of the church as a whole is possible. In Luke's narrative, the church of three thousand (plus those being added daily) has been holding corporate meetings in the temple in addition to private house meetings (2:42, 46–47), and the newer converts of the previous day may not yet be incorporated. Even later, the church continues to meet, and in Solomon's Portico (5:12), not in mere rooms (though a

1200. See *ibid.*, 190; 1 Esd 4:61–62.

1201. Maloney, *Narration of Works*, 53; for Lukan characteristics in Acts 4:23–31, see also Weiser, *Apostelgeschichte*, 131.

1202. Witherington, *Acts*, 202. On the use of "Christ" as a name in Gentile churches (and a title in Jewish ones), see Longenecker, *Christology*, 73–79. Nevertheless, highly educated Gentile Christians might recognize the connection (cf. later Bede *Comm. Acts* 4.27).

1203. Dunn, *Acts*, 56.

1204. Also in 2 Kgs 19:15–19. Other scholars also point out dependence on Hezekiah's prayer (e.g., Boisnard and Lamouille, *Actes*, 2:66; Haenchen, *Acts*, 228; Fitzmyer, *Acts*, 306; Witherington, *Acts*, 203; Chance, *Acts*, 78; Pervo, *Acts*, 121), which cannot decide the historical question either way.

1205. A much happier prospect, in any event, than Judas going to his own (Acts 1:25). The only other occurrence in the context is 4:32; if the occurrences of the wording are meant to be taken together, Luke may be saying that the ideal community counted their spiritual siblings, rather than their possessions, as "their own."

1206. E.g., Witherington, *Acts*, 201; Barrett, *Acts*, 242.

1207. Fitzmyer, *Acts*, 307.

more enclosed place may be suggested by 4:31). Further, the parallel results on the congregation in the two narratives (2:44–45; 4:32) suggest that all may have been present for the outpouring of the Spirit (though in the story world, even the converts at Pentecost would have received the Spirit subsequently to the first group; 2:4, 38, 41). The outpouring of 4:31 certainly affects the entire *πλήθος* of 4:32.¹²⁰⁸ A smaller assembly is also plausible, though it need not be limited to the apostles (cf. 1:15).¹²⁰⁹ If the meeting was spontaneous on the apostles' return, it would not be the full body, but this impression could be left simply by Luke's abbreviating a source or composing without concern for this question.

This passage reflects “free, spontaneous” prayer,¹²¹⁰ as apparently often in early Christianity (cf. 1 Cor 14:26). Crying out with a single voice could refer to prayer in unison, in which case it would be inspired. This could resemble the common voice of the chorus in Greek drama;¹²¹¹ such a chorus had to speak in unison to be intelligible.¹²¹² It was said that the Therapeutae sang antiphonally and then united as one chorus (Philo *Contempl.* 84). One may think also of later synagogue liturgy, but it is unclear to what extent a liturgy existed in this period, and even less clear whether it was widely prayed in unison. More problematic still, the prayer is too relevant to the events to be an earlier liturgical form simply recited together. Far more likely, it simply reflects the idiom for speaking in unanimity¹²¹³—that is, united in agreement (as implied by *ὁμοθυμαδόν* elsewhere in Acts; see comments on Acts 1:14; 2:46)—rather than speech with identical words.¹²¹⁴ (The assembly could have recited the psalm quotation together, however.)

The prayer addresses God as *Δέσποτα*;¹²¹⁵ *δεσπότης* is a title that appears for gods in Greek literature¹²¹⁶ but also for the one God in Jewish texts,¹²¹⁷ including specifically in prayers (as in its only other use in Luke, Luke 2:29).¹²¹⁸ God as maker of

1208. The *πλήθος* (the public assembly of the congregation; also Acts 6:2; 15:12, 30) might evoke the congregation in the wilderness or town assemblies (see comments on *ἐκκλησία* in Acts 7:38; 19:32, 39–40) but has a parallel at Qumran (see Brown, “Scrolls,” 7).

1209. The apostles surely would have welcomed others to join them for prayer (cf. Acts 12:12; 16:25; though 5:13 could be understood otherwise).

1210. Martin, *Worship*, 34, on Acts in general (cf. Acts 1:24–25). On Spirit-inspired prayer, see comments on Acts 2:4.

1211. On the chorus, see Zaminer, “Chorus,” 248–49. Ign. *Eph.* 4.2 idealizes singing with a common voice (Zaminer, “Chorus,” 249). For scripting purposes, a normal chorus would be treated as a single character (Arist. *Poet.* 18.19, 1456a), though they normally circled around a main character (4 Macc 8:4; Callim. *Hymns* 4 [to Delos], line 301; Mus. Ruf. 15, p. 98.9–13; Men. *Rhet.* 2.17, 439.19–20; 445.32–446.2).

1212. Dio Chrys. *Or.* 32.2; 39.4; 48.7.

1213. See Polyb. 3.62.7; Dion. Hal. *Ant. rom.* 6.10.1; 6.87.1; Cic. *Phil.* 6.1.2; Virg. *Aen.* 11.122–31; Vell. Patern. 2.32.1; Sen. *Y. Ep. Lucil.* 84.9; Apul. *Metam.* 11.13; Exod 19:8; 2 Chr 18:12; 4 Macc 8:29; 1 En. 61:11–13; Jos. *Life* 259.

1214. Possibly one person led while others either agreed or repeated after him (Marshall, *Acts*, 103); whoever led would need to pray loudly so that all could hear (Jos. *Ant.* 4.40).

1215. Haenchen, *Acts*, 226, suggests that Luke changed Isa 37's *κύριε* here to avoid confusion with Christ. Falk, “Prayer Literature,” 275, suggests that the closest OT analogies are an expanded “You are the Lord” (e.g., Ps 86:5, 15, 17) and a *berakah* (“Blessed are you, Lord”; e.g., 1 Chr 29:10), later expanded by rabbis with participial clauses (the DSS resemble Acts 4:24 here).

1216. *I. Eph.* 1240.1 (Zeus); Fitzmyer, *Acts*, 308 (citing Eurip. *Hipp.* 88; Xen. *Anab.* 3.2.13); many others in BDAG. It was not necessarily praiseworthy for a mortal ruler (Dio Chrys. *Or.* 1.22).

1217. E.g., Wis 8:3; 13:3, 9; 2 Macc 5:17, 20; 6:14; 9:13; 3 Macc 5:12; Jos. *Ant.* 1.20, 72; 5.93; Philo *Alleg. Interp.* 1.96; *Cher.* 83; *Test. Ab.* 1:1.12, 25; 8:3; 16:2–3; 20:12 A; *Test. Jos.* 1:5; *Test. Job* 38:1 (with Job 5:8 LXX); *CJ* 1:279, §358; Fitzmyer, *Acts*, 308 (citing LXX Job 5:8; Wis 6:7; 8:3; Sir 36:1; Philo *Heir* 22–23; Jos. *War* 7.323; *Ant.* 8.107; 18.23; 1 *Clem.* 59.4; 61.1–20); Christ in 2 Pet 2:1; Jude 4. Philo distinguishes its sense from *κύριος* (*Her.* 22–23). Some Jewish prayers may reflect significant Greek influence (cf. van der Horst, “Elements,” on *Apost. Const.* 7.34–35), but use of Greek language is sufficient to explain the overlap here.

1218. E.g., 1 Esd 4:60; Tob 8:17; Jdt 9:12 (master of heaven and earth); Wis 11:26; Sir 23:1; Bar 6:5; 2 Macc 15:22; 3 Macc 2:2 (master of creation); 6:5, 10; Jos. *Ant.* 1.272; 2.270; 4.40; 5.41; 11.162, 230; 20.90; Rev 6:10; Gr. *Ezra* 2:23.

heaven and earth (cf. Acts 14:15; 17:24) was a long-standing title for God in Jewish prayers;¹²¹⁹ the linking of heaven and earth and sea was a common summary of the world.¹²²⁰ Luke echoes the title later in the book (14:15), perhaps one of his many connections between his narrations of the Jerusalem church and the Diaspora mission. In both 4:24 and 14:15, Luke thinks especially of Ps 146:6 (145:6 LXX). Probably this belongs to Christian liturgical memory (alluded to in Rev 5:13; 10:6; 14:7; 21:1), but Luke may remain cognizant of the context. Here he may recall the warning not to trust in princes (Ps 146:3 [145:3 LXX]); Acts 4:26 speaks of princes, using the same term as the LXX.¹²²¹ If God rules all creation (4:24), then the earth's human rulers are foolish to think they can stop his purposes for his king, the Messiah (4:25–28)—or the Messiah's agents (4:29).

II. THE ENEMIES IN PSALM 2 (4:25–26)

Given biblical precedent, believers had no reason to be discouraged by persecution; rulers' opposition fulfilled Scripture. Indeed, it fulfilled God's plan (4:28). In 4:25–29, the believers identify their sufferings for Christ's name with Christ's own (cf. 5:41; 7:59–60; 9:4). That David was "our father" refers to his role as leader and benefactor (Mark 11:10; cf. 2 Kgs 2:12; 13:14; Isa 9:6)¹²²² rather than to genetic descent (in contrast to Acts 2:30; 13:23; 15:16; Luke 1:27, 32, 69; 2:4; 3:31; 18:38–39). That the Spirit spoke through him—that is, inspired the psalms—was customarily recognized (cf. Acts 1:16 and comments there; cf. Luke 20:42; Acts 2:34).¹²²³

Luke here cites the LXX of Ps 2:1. The editors of the books of Psalms prefixed this psalm to the "Davidic psalms" collection (the first two books contain numerous Davidic superscriptions, the meaning and origin of which are unclear). Some considered Ps 1 as an introduction to the entire Psalter, thus leaving Ps 2 as the opening of the Davidic psalms in particular.¹²²⁴

Given the mention of the "Anointed" one in Ps 2:2, it comes as no surprise that early Judaism often applied the psalm to the ultimate Davidic seed popularly called by that title—that is, the "Messiah" (Χριστός) (Acts 4:26).¹²²⁵ That early Christians would immediately apply the title to Jesus "whom you anointed" (ἔχρισας, 4:27) is even less surprising. Most Jews who recited the psalms would be familiar with this divine approbation of the Davidic line at the beginning of their hymnbook. They

1219. E.g., Pss 115:15; 121:2; 124:8; 134:3; cf. 2 Chr 2:12; Jdt 6:19 (God invoked as Lord God of heaven); much later, Qur'an 39:46 (cf. 42:11); and the oft-cited 2 Kgs 19:15; Isa 37:16.

1220. E.g., Lucian *Phil. Sale* 18; Gen 1:26, 28; 9:2; Amos 9:6; Zeph 1:3; Hag 2:6; *1 En.* 101:8; *2 En.* 23:1; 47:5; *4 Ezra* 4:21; Jos. *Ant.* 1.31, 156; 3.123, 181; Philo *Creation* 114; *Giants* 7; *Conf.* 154; Rev 5:13; 12:12; 14:7; 21:1; *1 Clem.* 33.3; *Diogn.* 7.2. Including all three in prayer in Jos. *Ant.* 4.40 (added); 8.107; Neh 9:6; Pss 96:11; 146:6 (derived from Exod 20:11, though not in a prayer; cf. further Falk, "Prayer Literature," 275; Soards, *Speeches*, 48); in oaths, Jos. *Ag. Ap.* 2.121; Rev 10:6. Helios appears as "Lord of heaven and earth" (and "God of gods") in PGM 4.641.

1221. Which appears twenty-two times in only seventeen psalms (about 11 percent of the psalms).

1222. "Father" applied to societal benefactors (Dion. Hal. *Ant. rom.* 12.1.8; Paus. 8.48.5–6; 8.51.7; Plut. *Cic.* 23.3); generals (Sil. It. 7.734–35; 8.2; 17.651); rulers (Mus. Ruf. 8, p. 64.14; Heliod. *Eth.* 10.17), including Rome's emperor (Ovid *Tristia* 4.4.13; *Fasti* 2.130–32, 637; *Pont.* 4.9.134; Hdn. 2.2.9; 2.6.2); and so forth. On "father" as an honorary title in general, see (for scores of ancient references) Keener, *John*, 921–23.

1223. For the hyperbaton here (as well as some other rhetorical features), see Roux, "Style and Text"; on hyperbaton in general, see Rowe, "Style," 136; Black, "Oration at Olivet," 87; Anderson, *Glossary*, 121–22; Porter, "Paul and Letters," 580. Miura, *David*, 167 (with Wahlde, "Acts 4, 24–31," 242), notes a chiasm: Gentiles and peoples (of Israel; 4:25, 27); kings and rulers (4:26, 27); gathered together against Lord and anointed (4:26–27).

1224. See Wilson, *Psalms*, 1:92; idem, *Editing of Psalter*, 204–6.

1225. See Longenecker, *Exegesis*, 101; following Lövestam, *Son and Saviour*, 17–19; most important, 4QFlor. For Ps 2:8, see *b. Sukkah* 52a; *Gen. Rab.* 44:8; for Ps 2:9, see *Pss. Sol.* 17:26; more fully on Ps 2, see comments on Acts 13:33. On the meaning of "Messiah," see the excursus at Acts 2:36.

would therefore recognize that the same psalm announced this king as God’s “son” (Ps 2:7), a claim useful for Luke’s (and early Christian) proclamation (Acts 13:33; cf. Heb 1:5; 5:5; Mark 1:11; Luke 3:22). (The hostile “rulers of the earth” might also evoke the king’s coming international rule in Ps 2:8 and hence, for Luke, the Gentile mission.)¹²²⁶

What is more surprising is that the opposition in the psalm¹²²⁷ is the nations (Ps 2:1), not Israel itself.¹²²⁸ (The verses include roughly synonymous ideas—Gentiles are peoples, and kings are rulers—reflecting a common form of parallelism in Hebrew poetry.)¹²²⁹ By applying the psalm to their persecutors in the Jewish aristocracy (alongside the Gentile Pilate), the believers are viewing the Jerusalem leaders as allies of the Gentiles. While such a perspective is striking, it is hardly unprecedented. Jerusalem had originally fallen under Roman “protection” partly because some factions in its leadership had invited Roman assistance to ensconce themselves in power.¹²³⁰ Members of the priestly aristocracy owed their continuing power, in large measure, to their Roman patrons, hence incurring the resentment of Jewish revolutionaries,¹²³¹ and this aristocracy gradually disappeared after the destruction of the temple in 70. The Qumran scrolls, written by a movement born from protest against Jerusalem’s priestly aristocracy in an earlier generation, classed all of apostate Israel (those not aligned with their sect) along with the Gentiles in the final battle (e.g., 1QS V, 19–20; 4QpNah IV, 3).¹²³² If Jesus was Israel’s rightful king, then Jews who opposed him were apostates from the covenant. Now, as one scholar puts it, “the enemy is anyone who stands opposed to the Lord’s anointed.”¹²³³

Thus Pilate (Acts 4:27) becomes a representative of the “Gentiles” (Acts 4:25; Ps 2:1) and perhaps (along with Herod the tetrarch, Acts 4:27) of the “kings of the earth” as Caesar’s agent (Acts 4:26; Ps 2:2).¹²³⁴ But just as many other Jewish interpreters would read different significance into synonymous parallelism where it suited their exegetical purpose, this prayer reapplies the psalm’s other enemies to Jerusalem’s municipal aristocracy. They were “rulers” (ἄρχοντες, Acts 4:26; Ps 2:2), mentioned elsewhere in Luke-Acts as those who engineered Jesus’s execution (Acts 3:17; 13:27; Luke 23:13, 35; 24:20)¹²³⁵ and had now arraigned two of the apostles (Acts 4:5, 8; cf. 23:5). The “peoples” (4:25; originally parallel with the “Gentiles,” Ps 2:1) are now

1226. Perhaps not coincidentally in view of Acts 1:8 (as noted by Richard Hays in a seminar on Acts and intertextuality at the annual meeting of the Society of Biblical Literature, San Diego, November 17, 2007), Ps 2:8 also mentions the king’s rule “to the ends of the earth” (though the LXX here uses πέρατα τῆς γῆς and the wording and context in Acts 1:8 point more closely to Isa 49:6; see comments there).

1227. The “enemy” is a standard “character” throughout the psalms; here the enemy is corporate.

1228. Some later rabbis naturally applied the text eschatologically to the war against Gog and Magog (Edgar, “Messianic Interpretation,” 49, citing *b. Ber.* 7b).

1229. Still intelligible to a Greek audience (cf. Greek use of synonyms in rhetoric; Anderson, *Glossary*, 114), especially one familiar with the use of LXX Psalms in worship. The community applies “peoples” to Israel; if the plural suggests Israel’s tribes, the usage is highly unusual (reflecting neither OT nor Lukan practice; cf. Schille, *Apostelgeschichte*, 141).

1230. E.g., *Jos. Ant.* 14.29–30.

1231. E.g., *Jos. War* 4.147–48, 154, 157, 160, 315–17.

1232. Qumran scrolls, indeed, applied Ps 2:1 to the “nations” opposing “the chosen of Israel in the eschatological time” (4Q174 1 I, 18–19)—i.e., against the sectarians. For similar pesher applications to the community, see also 1QH^a XIV, 26; XVI, 7–8 (Dupont, *Salvation*, 119–20).

1233. Bock, “Scripture and Realisation,” 56n20; cf. also idem, *Acts*, 206.

1234. Luke’s tradition of Pilate’s and Herod’s cooperation persisted in later sources; Schille, *Apostelgeschichte*, 141–42, cites *Ign. Smyrn.* 1.2; *G. Pet.* 1ff.; *Justin 1 Apol.* 40.

1235. This usage is unique to Luke and (later) John among the Gospels and becomes Luke’s prevailing use only in the passion narrative (contrast Luke 8:41; 11:15; 12:58; 14:1; 18:18); does he already have this citation in view when writing Luke 23?

the “peoples” of Israel (Acts 4:27), a highly unusual expression formed solely by the early believing community’s pesher-style application of the psalm.¹²³⁶

III. THE PSALM’S PRESENT APPLICATION (4:27–28)

Now the prayer turns to the pesher application of the psalm to the present (eschatological) time.¹²³⁷ (Peter underlines the certainty of what has happened with the solemn phrase ἐπ’ ἀληθείας, “truly.”)¹²³⁸ Jesus’s followers could be assured that all had happened according to God’s plan (4:28), for they found opposition to God’s anointed in Scripture (4:25–26).

The rulers were “gathered” (συνήχθησαν), just as the psalm predicted (Acts 4:26); Luke’s informed audience may think of how the rulers “gathered” both against Jesus (Luke 22:66) and the apostles (Acts 4:5).¹²³⁹ (On the identity of the “rulers,” see comments above.) Because, from the standpoint of Peter and his colleagues, Jesus is God’s ultimate “anointed” (i.e., “Christ,” 4:26) and the psalm’s ultimate “son” (Ps 2:7; see comments above), the application appears straightforward. The disciples experienced the mistreatment of the anointed one.

The rejection of Jesus as God’s “servant” undoubtedly echoes Isaiah’s Servant Songs,¹²⁴⁰ where God’s servant is rejected by the people (Isa 53:3, 7–9).¹²⁴¹ That the “servant” is “anointed” here confirms a likely connection with Isaiah’s servant (61:1),¹²⁴² as implied in one of Luke’s paradigmatic texts (Luke 4:18) and another of his summaries (Acts 10:38). Early Christian understanding of this passage is not difficult to reconstruct (see also comments on Acts 3:13; 8:32–33); though Israel is God’s servant (Isa 41:8–9; 43:10; 44:1–2, 21; 45:4; 48:20; 49:3), Israel proves blind and disobedient (42:19). Thus God raises up a remnant within Israel to restore Israel (49:5–7; 50:10; 52:13; 53:11); in contrast to Israel (40:2), this one suffers without personal guilt (53:4–6, 8–11, esp. 53:9). Like Israel (42:1, 6; 43:10–12; 44:8), he brings light to the Gentiles as well (49:6; 52:15; cf. Luke 2:32).

Nevertheless, Jesus’s “servanthood” here is connected not with that of Israel but with that of David (Acts 4:25; cf. Luke 1:69).¹²⁴³ This points to an additional line of early Christian christological exegesis—namely, the application of selected Davidic promises to Jesus (Acts 2:25–31; 13:23, 33–37; relevant to Ps 2 in Acts 4:25–26).

1236. Cf. Rom 3:19: after citing texts applicable primarily to Gentiles and heinous sinners (3:10–18), Paul applies the text universally by recalling the principle that everything in the law must be relevant for those for whom it is intended (Dunn, *Romans*, 1:145, 149; cf. also Hays, *Conversion*, 90–91; Schreiner, *Romans*, 167). For application of this context in Psalms to both Jewish and Gentile enemies in pre-Christian Jewish sources, see Miura, *David*, 163–64 (citing *Pss. Sol.* 17:22–29; 4QFlor frg. 1).

1237. It is in a sense also functionally a *narratio* (narrative introductions appear not only in speeches but in genres as distant as ancient Near Eastern treaties), but its function as an application of the text determines its placement here. The line-by-line explanation fits Qumran’s pesher-style approach.

1238. Used by Peter also in Acts 10:34 but by Luke also in Luke 4:25; 20:21 (following Mark 12:14); 22:59 (the other earliest extant Christian uses being Mark 12:32; *1 Clem.* 23.5; 47.3). The phrase appears in the LXX (Deut 22:20; Isa 37:18; Jer 23:28; Tob 8:7), esp. in Job (9:2; 19:4; 36:4) and Daniel (2:5, 8, 9, 47; 8:26).

1239. With Johnson, *Acts*, 84. The term does not appear in Mark’s passion narrative (though cf. John 11:47).

1240. The voice of Luke 3:22 might combine Ps 2:7 with Isa 42:1, but I am inclined to think that it echoes instead, if anything, Ps 2:7 with Gen 22:1, in contrast to Matthew (see Keener, *Spirit*, 56–59; idem, *Matthew*, 135; cf. Matt 12:18).

1241. Moessner, “Script,” 229. Some suggest that this interpretation goes back to Jesus himself (Cullmann, *Peter*, 66; Ladd, *Theology*, 331); others date it later (Ménard, “Messianic Title”), some much later (Jones, “Servant” in Luke-Acts”). See comments on Acts 3:13; fuller discussion in Keener, *Matthew*, 487–88.

1242. Cf. Kilgallen, “Servant You Anointed”; Ridderbos, “Speeches of Peter,” 23.

1243. Often in the OT, e.g., 2 Sam 7:5, 8, 20, 26; Pss 89:3, 20; 132:10; Jer 33:21; Ezek 34:23–24; 37:24–25. The dual comparison (to Isaiah’s servant and to David the servant) is noted also in Kilgallen, “Servant You Anointed.”

The informed reader would presuppose information from Luke’s passion narrative about the individual enemies named, Pilate and Herod. Although Pilate’s governorship is attested on an inscription,¹²⁴⁴ among Gentiles he was especially remembered by Luke’s generation (cf. *Tac. Ann.* 15.44), and particularly among Christians (1 Tim 6:13), for his involvement with Jesus’s crucifixion. Early Jewish sources confirm that Pilate executed people without trial; excessive use of capital punishment ultimately cost him his office (Philo *Embassy* 302; *Jos. Ant.* 18.88–89).¹²⁴⁵ His earlier plundering of the temple treasury to support an aqueduct¹²⁴⁶ and particularly his recent issuing of coins bearing an insignia of the divine emperor¹²⁴⁷ blatantly demonstrated his insensitivity to local Jewish concerns. (Pilate was an ethnocentric colonialist governor, though both the republic and the empire reveal even harsher cases of provincial exploitation and maladministration.)¹²⁴⁸ From what Philo and especially Josephus show us of Pilate’s character, any reticence to accept the local leaders’ recommendation would be more out of spite for them than out of concern for justice.¹²⁴⁹ For discussion of Pilate’s reluctant condemnation of Jesus, see comments on Acts 3:13;¹²⁵⁰ for discussion of corrupt governors, see comments on Acts 24:26–27.

“Herod” here was a legitimate name for Herod Antipas, as evidenced in Josephus,¹²⁵¹ as well as the standard name for him in early Christian tradition; Luke’s retaining the name “Herod” also allows for a connection with “Herod” Agrippa I, also an enemy of the Jesus movement (12:1–19). Herod was known among early Christians for his affair with Herodias and execution of John (Mark 6:14–29; Luke 3:19–20; 9:7–9)¹²⁵² but in Luke also for his involvement with Jesus’s execution (Luke 23:6–12). This text provides a theological verdict on the more nuanced description of the behavior of Pilate and Herod earlier narrated by Luke: though Pilate tried to avoid condemning Jesus (23:4, 14–16, 20, 22), he ultimately yielded to political expediency (23:7, 12, 24–25). Though Herod found no guilt in him (23:15), he abused Jesus (23:11; cf. 13:31–32). Rarely did they work together,

1244. Evans, “Pilate Inscription”; Smallwood, *Jews*, 145; Sherck, *Empire*, §39A, p. 40.

1245. Sanders, *Figure*, 274. On governors being tried for abusing power, especially for executing innocent people (particularly Roman citizens), see Pliny *Ep.* 2.11, in Jones, *Empire*, 192–95.

1246. Others viewed this act as misappropriation of funds (*Jos. War* 2.175–76; cf. *Ant.* 18.60; *Suda*, s.v. “*Korbanas*,” in Sherck, *Empire*, §39 B, 75); Pilate, however, probably assumed that he followed safe Roman precedent: Augustus and others paid for workmen on aqueducts by public and imperial treasuries (Frontinus *De aquis* 2.89–101, 116–18, in Jones, *Empire*, 207; cf. *Res gest.* 4.20), and the use of public money would have been expected (*Jos. Life* 199; but cf. *Life* 298–99) had it not been from the temple treasury. Romans and other Gentiles, however, also complained when designated funds in a public treasury were redirected (Appian *Bell. civ.* 2.6.41; *Lysias Or.* 25.19, §173; 27.7, §178; 27.16, §179; Plut. *Cic.* 17.2; *Caes.* 35.2–4; worse, despoiling temple treasuries, e.g., Val. Max. 1.1.21; *Tac. Ann.* 14.18; see further Keener, *Matthew*, 557n72; Robinson, *Criminal Law*, 31; cf. 4 Macc 4); they would have been angrier had he profited himself, which sometimes happened (Catull. *Carm.* 10.7–13; cf. Jeffers, *World*, 111–12).

1247. Stauffer, *Jesus and Story*, 72; Thompson, *Archaeology*, 308–9.

1248. E.g., *Cic. Verr.* 1.1.2; 1.4.12; 2.3.22.55; 2.3.28.69; *Sest.* 25.55; many Judean governors as presented by Josephus, e.g., *Ant.* 20.106–17, 162–63, 215, 253–57; *War* 2.223–45, 272–79. Pagan motifs on Pilate’s coins, however, are not attempts to provoke his subjects; they appear elsewhere in the empire (Hoffeditz, “*Divus*”).

1249. Cf. Benoit, *Jesus*, 1:141–42.

1250. See the discussions of Pilate in Keener, *Matthew*, 665–67; idem, *John*, 1103–4; cf. the negative verdict on Pilate in Flusser, *Sage*, 145–55 (showing that despite the Gospels’ apologetic slant, their portrayal of his actions fits that found in other sources).

1251. E.g., *Jos. Ant.* 18.104–6, 243–55. But Josephus, unlike Luke, always calls Antipas’s brother-in-law Agrippa. Because Herod is here one of the “kings” of Acts 4:26 and Luke knows better (13:1; Luke 3:1, 19; 9:7), Pervo, *Acts*, 123, finds pre-Lukan tradition here; this is a plausible inference, but ancient exegesis could also apply the terms loosely.

1252. On which see Hoehner, *Antipas*, passim; idem, “Herodian Dynasty,” 490–93; for a differing perspective, Theissen, *Gospels*, 81–97; I have noted other sources in Keener, *Matthew*, 397–402 (which is closer to Hoehner’s approach).

but they used Jesus as a means of reconciliation between them (only¹²⁵³ in 23:12);¹²⁵⁴ thus, despite their differences, they acted in concert against God's Messiah. They are rounder, more nuanced characters in Luke's narrative, but his ultimate verdict on them is negative.

In Acts 4:28, Luke emphasizes again that Jesus's death was no accident but a fulfillment of God's purposes and explicit promises (see 3:17–18; 13:27; esp. comments on Acts 2:23, which similarly speaks of τῆ ὀρισμένη βουλή).¹²⁵⁵ That God acts by his "hand" may be a particularly Lukan way of putting the matter (cf. 4:30; 7:50; 11:21; 13:11; Luke 1:66; 11:20), though it is hardly unique to him and recalls especially OT language.¹²⁵⁶ It might also reflect the image of healing often occurring through laying on of hands (e.g., Acts 28:8; Luke 4:40; 13:13).

IV. PRAYER FOR BOLDNESS AND SIGNS (4:29–30)

Having recited God's promise and narrated part of its fulfillment in their time, the disciples now pray for the triumph (or perhaps here the prelude to that triumph) also declared in the psalm.¹²⁵⁷ (They expect the final triumph once the work of proclamation is complete; cf. Acts 1:7–11; implied also in other psalms cited, 2:34–35; Luke 20:43). They draw attention to the "threats" (ἀπειλάς) facing them, undoubtedly especially the warning against further proclamation in Acts 4:17 in addition to the "further threatening" of 4:21 (προσαπειλησάμενοι). Luke will employ the same term for "threats" from another persecutor in 9:1, immediately before narrating his conversion.¹²⁵⁸

Following the psalms (and human need in general),¹²⁵⁹ Jewish people offered many prayers for God's justice and vindication in the present age¹²⁶⁰ as well as prayers for deliverance from adversaries.¹²⁶¹ What is striking is that the primary protection requested here against the oppressors is more boldness for further proclamation.¹²⁶² On "boldness" here, see comments on Acts 4:13, where it stems, as here (4:30), from

1253. The language is characteristically Lukan; various forms of "friendship" terminology appear explicitly seventeen times in Luke-Acts (see discussion in Mitchell, "Friends by Name," 236–57; Keener, "Friendship," 386), six times in John (see discussion in Keener, *John*, 579–80, 1004–15, 1128–29), once in Matthew (11:19 = Luke 7:34), and in only three other NT passages (in the Apostolic Fathers, see *1 Clem.* 10.1; 17.2; *2 Clem.* 6.5; *Herm.* 34.2; 40.4; 55.6, 11; 57.1; 58.3).

1254. Political enemies might find reconciliation and renewed friendship (politically speaking, an alliance) expedient; see Val. Max. 4.2.passim; Keener, "Friendship," 381; Marshall, *Enmity*, 42–43. On rulers sacrificing lives for expediency, see, e.g., Baynham, "Quintus Curtius," 433.

1255. This fits the providential approach to history shared with many other Hellenistic historians; see comments on Acts 2:23. The conjunction of God's plan with the rulers' ignorance is probably implied also in 1 Cor 2:8.

1256. For opposition (cf. Acts 13:11), see, e.g., Exod 9:3; Deut 2:15; Josh 4:24; 22:31; Judg 2:15; Ruth 1:13; 1 Sam 5:6, 9; 7:13; 12:15; Job 12:9. For empowerment (as in Acts 4:30; 11:21), see 1 Kgs 18:46; 2 Kgs 3:15; 2 Chr 30:12; Ezra 7:6, 28; Ezek 1:3; 3:14, 22; 8:1; 33:22; 37:1; 40:1. In Greek literature, Barrett, *Acts*, 247–48, cites Pindar *Nem.* 8.12, 13. Haya-Prats, *Believers*, 36, emphasizes the association with healings and wonders.

1257. Ancient narrators also used prayers in response to oracles to advance the narrative (because both would be fulfilled), e.g., Xen. *Eph. Anthia* 5.1.

1258. For Jewish hearers, the term might evoke Jewish persecution literature (see esp. 3 Macc 2:24; 5:18, 30, 33, 37; 4 Macc 4:24; 7:2; 8:19; 9:32; 13:6; 14:9).

1259. Others also prayed for divine intervention against their enemies, e.g., Sil. It. 12.643–45; Iamb. *VP* 32.222; 2 Chr 24:22; Ps 137:8–9; 1QM XII, 11–12; *1 En.* 22:6–7; 84:6; 97:5; 99:3; *CJF* 1:524, §725; Rev 6:10; 8:4–6; Burkert, *Religion*, 75; Deissmann, *Light*, 413ff., 424; for imprecations, see, e.g., *MAMA* 1.25, 126, 294, 425, and 437; 7:xxxv–xxxvi.

1260. See Johnson, *Prayer*, 29–31. See also my comments on Acts 7:60.

1261. Johnson, *Prayer*, 7–12.

1262. Sometimes deities were believed to impart strength or courage to continue fighting (e.g., Hom. *Il.* 5.513; 13.59–61; 21.304, 545–47).

completed signs and wonders (4:9–10).¹²⁶³ As the Lord’s “servants” (δούλοις), they are the promised recipients of his prophetically inspiring Spirit (2:18, one of only two other uses in Acts). Given this allusion, the prayer may extend beyond the apostles to their entire community of believers despite Luke’s primary narrative focus on apostles.¹²⁶⁴

Luke’s use of “word” (4:29), or “word of the Lord” (4:31), fits that of our early Christian sources, but for this very reason it is easy for modern readers to miss how striking this usage was in its original Jewish setting. Israel’s Scripture calls the Law and the prophetic message God’s “word” or “message” more than two hundred times, a usage with which early Christians were quite familiar. Isaianic prophecies also associate this “word” (e.g., Isa 40:8) with the “good news” of God’s kingdom intervention for his people (40:9; 52:7; cf. 60:6; 61:1).¹²⁶⁵ Throughout Acts, however, the phrase consistently refers to the proclamation of the gospel, implying that Luke regards this proclamation as inspired (as implied in Acts 1:8; 2:17–18; cf. likewise 1 Thess 2:13; Rev 19:10).

Signs and wonders are the primary means of drawing attention to the gospel message in Acts (e.g., Acts 2:43; 5:12–16; 14:3; on the function of signs and wonders in Luke’s missiology, see further the commentary introduction, ch. 15, sect. 6).¹²⁶⁶ The healing of the disabled man in 3:6–10 functions as the model for the sorts of healings for which they now pray: the term ἴασιν here probably refers back to it (see also 4:22; the only other NT use is in Luke 13:32). That healing occurred through Jesus’s “name” (Acts 3:6, 16), brought many to faith in Jesus, and provoked opposition that required boldness (4:13; requested in 4:29 and granted in 4:31).

The Lord will grant his servants boldness (4:29) especially through healing and performing signs and wonders through the name of Jesus (4:30).¹²⁶⁷ (For one example, see 16:18.) The context is significant for informing this prayer: the name of Jesus had performed healing already (3:6, 16; 4:10), and their prayer now defied the command to stop speaking in this name (4:17–18; 5:28). (They would respond similarly to a further such command; see 5:40–41.) The term for Jesus as “servant” here (cf. comments on Acts 3:13; 4:27)¹²⁶⁸ differs from that used for his followers in 4:29, but even were they the same, it would remain clear that Jesus’s name, rather than the disciples, did the miracles (cf. 19:13 for a failed attempt to depend on the name secondhand). Enemies raged against Jesus and simply fulfilled God’s purposes (4:25–28); now Jesus will continue to work, despite enemies’ threats, through those who bear Jesus’s name (4:29–30).

1263. Other first-century Christians also prayed for boldness for proclamation; see Eph 6:19. Boldness also applies to confidence before God in prayer (1 John 2:28; Philo *Heir* 4–5; see Moffatt, *Hebrews*, 44; cf. Sen. *Y. Ep. Lucil.* 10.4), but here boldness is the object, not the means.

1264. This prayer is answered in Acts 4:33 for the powerful witness of the apostles; but it is also answered (and with closer verbal echoes) in 4:31 for “all” who, filled with the Spirit, “spoke boldly” (4:31 repeats *ἀλέω, λόγος*, and, most significant because least common, *παρησία*). The grace on “all” in 4:33 likelier refers to the community generally than to the apostles specifically, because of the presumably explanatory *γάρ* in 4:34.

1265. Isa 40:8 (used also in 1 Pet 1:25) belongs to a passage important to Luke (Luke 3:4–6) and hence may underlie Luke 3:2.

1266. Keener, *Acts*, 1:537–49.

1267. For this likely relationship (made explicit in some translations), see, e.g., Parsons and Culy, *Acts*, 79 (“probably”); Keener, *Gift*, 95.

1268. For early Christian prayers including Jesus as God’s “servant,” cf. also *Did.* 9.2–3; 10.2–3.

RESULTS OF THE SECOND OUTPOURING OF THE SPIRIT (4:31–5:16)

Acts 4:23–5:16 displays God’s power in the face of the world’s opposition (experienced both externally and internally); in 4:31–5:16, God pours out the Holy Spirit again as at Pentecost.¹ God answers the prayer for increased boldness, backed with signs and wonders (4:23–30), by granting boldness (4:31) and a fresh outpouring with a focus again on sharing (4:32; 4:34–5:10). This second outpouring in the same city demonstrates that Luke believes Pentecost to be not only a past event but also a model for the praying church. The parallel to 2:44–45 takes central stage here, with its contrast between generous sacrifice (4:36–37) and the mere pretense of such religion (5:1–10). Both outpourings also lead to apostolic signs (2:43; 3:4–8; 5:12–16) and consequent confrontations with Jerusalem’s ruling elders (4:1–22; 5:17–40).

1. Immediate Impact of Prayer (4:31)

As evangelism (2:41, 47) framed church life (2:42–46; sharing possessions in 2:44–45) in Luke’s first summary section (2:41–47, employing a chiasmic A-B-B’-A’ pattern), Luke may here follow an A-B-A’-B’ pattern of narrating the consequences of the prayer:

- A The community’s² proclamation (4:31)
- B Sharing possessions (4:32)
- A’ The apostles’ proclamation (4:33a)
- B’ Sharing possessions (4:34–35)³

The disciples prayed for boldness in the face of opposition, backed by signs (4:25–30). In this passage they do receive boldness (4:31) and perhaps signs (implied in “power” in 4:33). Although Luke nowhere calls it a sign or relates it to healing (4:30), the church’s sharing (4:32–5:10) has a heavy impact on the surrounding city, and a sign associated with the sharing (5:5, 10) leads to much attention (5:11). More signs appear in 5:12–16, further fortifying the church members before they must face further opposition (5:17–41).

1. Against those who find contradictions and redactional tensions in Acts 4:32–5:16, Noorda, “Scene,” argues that it is a coherent section, compositionally cohesive (as a summary, not a scene).

2. One need not insist that the proclamation here is solely apostolic for the parallel with A’ to hold; Acts 2:41 refers to a response to apostolic proclamation, and 2:47, probably at least partly, flows from the community’s lifestyle. For the community in 4:31, see comment below.

3. This differs slightly from the A-B-A’ pattern in Talbert, *Acts*, 47, but only because he excludes Acts 4:31 from consideration in the unit.

This verse narrates the dramatic answer to their prayer: God the Creator may be understood as acting in the earthquake (cf. Acts 4:24; cf. Isa 6:3–4; Amos 5:8–9); more explicitly, the filling of the Spirit provides for continuing signs, and the boldness directly answers the request in Acts 4:29.⁴ (This verse plainly echoes the prayer’s λαλέω, λόγος, and—most significant because least common—παρηρησία.) In principle, the “all” may apply here to all believers (in view of 2:38–39; the more probable referent of “their own” in 4:23; and the “all” of 4:33), though Luke’s own narrative focus is on the apostles.

Here, as often in Luke-Acts, the Spirit comes in response to prayer (Luke 3:21–22; Acts 1:14; 8:15; 9:11, 17; 10:30, 44–46; cf. 19:6), as Luke’s redaction of Q material in Luke 11:13 leads us to expect.⁵ And here, as elsewhere in Luke-Acts, prayer often precedes mission (Luke 6:12–13; 10:2; Acts 10:9, 19–20; 13:2–3).⁶ The Spirit provides the utterance when there is need of boldness in the face of adversaries (Luke 12:11–12), the situation envisioned here (Acts 4:29).

One immediate confirmation that the prayer is answered is the shaking of the place where the believers are gathered,⁷ just as thunder or other phenomena were sometimes thought to confirm divine answers to prayer.⁸ Like a good rationalist, Harnack suggested that the ecstatic trembling of believers was “transferred also to the place where they were assembled.”⁹ There are some modern reports of buildings shaking during periods of spiritual revival.¹⁰ Ancient sources shed light on how Luke’s audience may have heard the passage. Ancient literature sometimes mentioned the shaking of a building to confirm that a deity had heard a prayer (e.g., Ovid *Metam.* 9.782–85).¹¹ The closest and (for Luke’s informed audience) most obvious specific sources, however, are biblical theophanies, especially Isa 6. Sinai trembled when God revealed himself there (Exod 19:18). More notably, in Isaiah God’s house was filled with glory and smoke (Isa 6:1–4 LXX; cf. the first outpouring, with which Luke parallels this outpouring, Acts 2:2–3). God’s house was also shaken (Isa 6:4), and Isaiah was divinely empowered for his calling (6:5–8). When this shaking is combined with the cloud of Acts 1:9 and especially the sound, wind, and thunder of 2:2–3, it is clear that Luke recalls OT theophanies here.¹² Instead of a mere vision of God, however (cf. 7:55–56; 9:3–4), the community is again filled with God’s own Spirit (2:4; 4:31).

4. Bold speaking could follow signs (as in Acts 4:8–13) or precede them (14:3); as with baptism and the Spirit (2:38; 8:15–17; 10:44–48), Luke does not demand adherence to a unified pattern in every instance.

5. Observed by others, e.g., Richard, “Pentecost,” 135.

6. See comments of Matson, *Conversion Narratives*, 51–52.

7. Chrys. *Hom. Acts* 11 (Martin, *Acts*, 54) also understands this as a confirmation that their prayer is heard. Although Luke’s use of “place” is by no means restricted to the temple, that usage dominates in the rest of the first quarter of Acts (6:13–14; 7:49; cf. 7:7, 33).

8. E.g., Hom. *Od.* 20.101, 103; 21.413; Virg. *Aen.* 7.141–42; 8.523–26; 9.630–31; Pindar *Pyth.* 4.197–200; Sil. It. 15.143–45; Ovid *Fasti* 3.369; Cic. *Cat.* 3.8.18; cf. Parth. *L.R.* 6.6; Catull. *Carm.* 64.202–6; in Jewish tradition, see Exod 19:19; 1 Sam 12:17–18; Sir 46:16–17; cf. 1 Kgs 18:36–38, 44; see further comment in Keener, *John*, 877.

9. Harnack, *Acts*, 154.

10. The history of revivalism does report the experience of a house being shaken by divine power like a dramatic storm, and claiming that even those outside witnessed it (Woodworth-Etter, *Diary*, 107); or even people falling down as people present experienced houses shaking (Peckham, *Sounds*, 106, 113, on the Presbyterian Hebrides revivals in 1939 and 1949; also in Gulick, *Captured*, 134–35); cf. Keener, *Miracles*, 590.

11. Scholars regularly cite shaking as a portent in Virg. *Aen.* 3.84–92 (Boring, Berger, and Colpe, *Commentary*, 315; Karris, *Invitation*, 61; Chance, *Acts*, 80; Schille, *Apostelgeschichte*, 142) and sometimes other passages (e.g., Lake and Cadbury, *Commentary*, 47, cite 4 Ezra 6:15, 29; Witherington, *Acts*, 204, cites Ps 18:7–8; *Test. Levi* 3:9; Jos. *Ant.* 7.76–77; Plut. *Publ.* 9.6; Lucian *Men.* 9–10; Schille, *Apostelgeschichte*, 142, cites also Ovid *Metam.* 15.669ff.). Strelan, *Strange Acts*, 83, cites the shaking after Moses’s prayer in Jos. *Ant.* 4.40–51.

12. With, e.g., Pervo, *Story*, 18; Fitzmyer, *Acts*, 311; cf. Spencer, *Acts*, 32; more generally, Strelan, *Strange Acts*, 82–83. Cf. also the figurative uses in Pss 46:6–7; 114:7 cited by Arnold, “Acts,” 250.

God confirms the coming of his Spirit in both initial instances with striking physical phenomena (2:2–3; 4:31), though narrations of subsequent outpourings suggest that these would not normally be repeated (8:17; 10:44–46; 19:6).¹³ The shaking of a location also follows prayer in 16:25–26 (there as a delivering earthquake). The primary effect of being filled with the Spirit, though, is speaking God’s message boldly, fitting the primary activity of the Spirit in Acts (see esp. 1:8; 2:17–18). More believers have been added since the last recorded dramatically ecstatic community experience (2:4); nevertheless, the new experience also reminds the church that the Spirit is not simply a past possession but God’s continuing, dynamically active power among God’s people (see comment on 4:8).¹⁴

2. Sacrificial Sharing of Believers (4:32–35)

This summary section, like other ones in Acts, reinforces the thrust of Luke’s narrative (see comment on Acts 2:41–47).¹⁵ Sharing goods frames this unit (4:32–35).¹⁶ Luke also uses this summary to promote the Christian sect as the ideal community, appealing to popular perceptions of virtue in antiquity.¹⁷ As on the day of Pentecost, the outpouring of the Spirit here (4:31) produces a community of sharing (cf. 2:42, 44–45) and continued apostolic power (presumably for signs; cf. 2:43). Some suggest that the passages are so close in content that they may resemble a single original tradition, which Luke for theological reasons has doubled and inserted from this point (where it is illustrated in 4:36–5:11) into the Pentecost narrative.¹⁸ If such events happened once, however, it would not be surprising if they happened more than once; earlier revivals often generate expectations for subsequent revival movements in the same tradition.¹⁹ Rather than Luke doubling a single source in his tradition, it is likelier that he deliberately parallels the two events. Although Luke’s language is idealistic, we know that early Christians valued such ideals (Rom 12:16; 15:5; 1 Cor 1:10; 10:24, 33; 13:5; 2 Cor 8:13–15; Phil 1:27; 2:2–4), and Luke does not impose his ideals onto his reports of later stages of the Jerusalem church (Acts 11:3; 15:5). What is certain is that Luke intends to parallel the two narratives to illustrate a point he believes he has learned from this tradition: outpourings of the Spirit in response to prayer produce such results as these.

13. Luke’s reports are admittedly incomplete (Acts 8:18 could suggest phenomena of some sort, and 10:46 is necessary only to explain the response of the observers in the narrative, not to justify the omniscient narrator’s perspective). But such dramatic external phenomena would presumably bear mention.

14. Luke probably echoes Ezek 37 in Acts 2:2; in Luke’s theology as in Ezekiel’s, God’s people without God’s activity and blessing are like a heap of dry bones.

15. So, e.g., Joubert, “Gesigpunt”; see fuller discussion at Acts 2:41–47.

16. Cf. Wall, “Acts,” 96.

17. For discussion of other ethnographic histories focused on philosophic sects, see Sterling, “Athletes of Virtue.”

18. Lake, “Communism,” 145. Midrashic exposition also allowed material later in a source to be glossed onto an earlier analogous account, creating parallel accounts (Goulder, *Midrash*, 36). But on doublets, see discussion in the introduction to part 2 above.

19. Cf., e.g., analogies between the two Asbury revivals at Asbury University. Cf. Dunn, *Acts*, 59: “Charismatic movements, particularly in the first flush of enthusiasm, are capable of building a communal life on such altruistic principles.” Apart from renewed experience, the radical expectations at a movement’s beginning may often adapt over time to external social constraints. Cf., e.g., the earliest Franciscans and subsequent limitations on poverty (cf. Galli, *Francis of Assisi*, 92–96, 108–11, 130–33), though they would still appear radical to most modern Western observers; or nineteenth- and early twentieth-century faith missions, many or most of which eventually developed support infrastructures (for one example of similar changes, cf. McGee, *Preached*, 109–14).

The suggestion of some scholars that this liquidation of its capital led to the Jerusalem church's later poverty is a counterreading of Acts. Luke not only is explicit that the direct cause of that poverty was a famine (11:27–30),²⁰ but he depicts the community of goods in glowing terms (which all educated Greek readers would have understood as such; see comment on Acts 2:44–45) as an ideal for wherever the Spirit is outpoured.

a. Common Property (4:32)

Luke's Greek rhetorical skill enables him to depict the community in terms intelligible and appealing to his audience.²¹ The immediate described result of much of the community's Spirit filling (4:31) is that members of the "community" serve one another.²² Urban Mediterranean society sometimes romanticized older rural notions of sharing and communal values.²³ The ideal of sharing all things "in common," however, was especially attributed to "friends,"²⁴ an ideal celebrated at least as early as Aristotle. For further discussion, see comment on Acts 2:44.

Various ancient writers also claimed that friends were of "one soul" or "mind," as here (sometimes worded the same way, sometimes differently).²⁵ This depiction was not limited to friends,²⁶ but it was most common there. It also applied, like having "all things in common" (see comment on Acts 2:44), to "ideal philosophical communities."²⁷ A few centuries after Luke, one philosopher reports on the earlier teachings of Pythagoreans as follows:

The first principle of justice, then, is the concept of the common and the equal, and the idea that all should approximate as nearly as possible in their attitudes to having one body and soul in which all have the same experience, and should call that which is mine and that which belongs to another by the same name.²⁸

The idea was developed among Stoics, among others.²⁹ Jewish writers in Greek took over the phrase "one soul" (or "same soul"; 4 Macc 8:29); LXX translators used it to translate what we might render as "one heart" in 1 Chr 12:38.³⁰ The pleonastic "heart and soul" reflects Luke's biblical idiom, presumably from LXX passages about wholehearted devotion to the Lord,³¹ perhaps most familiarly from the passage that

20. González, *Acts*, 71 (noting also [73] that Paul's collection reveals that the practice continued).

21. Hengel, *Property*, 8 (though regarding the Qumran parallels as closer in substance, 9); cf. Capper, "Context," 324–25.

22. Πλήθος can mean simply "crowd," but it twice translates *qahal* in the LXX (Exod 12:6; 2 Chr 31:18; usually translated by ἐκκλησία; Bruce, *Commentary*, 108n41); it can elsewhere apply to the church (Acts 15:12, 30; cf. Taylor, "Community of Disciples"), though this is not its most common sense.

23. Alciph. *Farm.* 27 (Ampelion to Euergus), 3.30, ¶3; 29 (Comarchides to Euchaetes), 3.73.

24. E.g., Alciph. *Fish.* 7 (Thalassus to Pontius), 1.7 (emphasizing reciprocity).

25. Commentators (see esp. Dupont, *Salvation*, 96–97; Spencer, "Approaches," 403) cite Phil 1:27; 2:2; Eurip. *Orest.* 1046; Arist. *N.E.* 1168b; Cic. *Amic.* 21.81; 25.92; *Off.* 1.17.56 (citing Pythagoras); Plut. *Dial. L.* 21.9, *Mor.* 967E; Diog. Laert. 5.20 (citing Aristotle). See also comment on Acts 15:25.

26. In marriage, see Char. *Chaer.* 1.3.7; *Gr. Anth.* 6.209; for an army, Dion. Hal. *Ant. rom.* 6.10.1 (ἐκ μιᾶς ψυχῆς); for the state, 6.87.1; for cities, Dio Chrys. *Or.* 39.5.

27. Malherbe, *Social Aspects*, 90.

28. Iambl. *V.P.* 30.167 (Dillon and Hershbell, 183).

29. Engberg-Pedersen, *Paul and Stoics*, 75; Grant, *Paul*, 127. Stoics particularly developed the relationship between friendship and the ideal political community (see Engberg-Pedersen, *Paul and Stoics*, 74, 77), though they were not known to practice the (limited) sort of communalism depicted here.

30. The eschatological "one heart" of Ezek 11:19 is translated "another heart" in the LXX.

31. E.g., Exod 35:21; Deut 4:29; 10:12; 11:13, 18; 13:3; 26:16; 30:2, 6, 10; 1 Chr 22:19; 28:9; 2 Chr 6:38; 15:12; 34:31; Jer 32:41; Tobit 13:6; 2 Macc 1:3; it is rarer in works composed in Greek unless they echo biblical idiom.

would be recited with the Shema (Deut 6:5–6). Even rules of hospitality invited people to claim that their possessions belonged also to the person they addressed (e.g., Pliny *Ep.* 1.4.3).

This sharing continues a theme in Luke-Acts (see fuller discussion at Acts 2:44–45). Scholars debate the sense of the third-person plural verb reciprocating generosity in Luke 6:38; in the immediate context, God repays, but in 6:38, it appears that other people participate. The third-person plural, however, fits what we find in Acts (or in Luke 18:30): believers share their resources with other believers, and in turn receive from them, whenever any are in need.

b. Power and Grace (4:33)

“Power” here probably suggests continuing signs and wonders (matching the first outpouring of the Spirit in Acts 2:43; on “power” and signs, see discussion at Acts 1:8); the coupling of “grace” and “power” elsewhere also suggests signs (6:8). Jewish prayer tradition already emphasized that raising the dead displayed God’s power (i.e., the second blessing of the Eighteen Benedictions: “You are eternally powerful. . . Blessed are you, Lord, who restores life to the dead”);³² it was natural that demonstrations of power could best attest the message that God had raised Jesus.

Luke elsewhere speaks of God’s “grace” being “on” Jesus (Luke 2:40). Other writers could speak of divine χάρις for necessary tasks;³³ they also could describe the Spirit (see comment on Acts 10:44) or other divine gifts (e.g., 1 Esd 6:1) as being “upon” (ἐπί) God’s servants. The grace on “all” in Acts 4:33 may imply the community generally and not simply the apostles specifically, because of the presumably explanatory γάρ in 4:34 (see also the discussion of “their own” at 4:23). Acts 5:12 picks up the thought of apostolic power in 4:33; the section 4:36–5:11 is a digression illustrating 4:34–35.

c. How the Property Was Distributed (4:34–35)

The imperfect verbs suggest not a sale of all property upon conversion but believers selling their property when needs arose and contributing to a common fund supervised (at this point) by the apostles.³⁴ As the community grows and new situations arise, the apostles will ultimately need to delegate supervision to those with more leisure for it (6:2–4). Still, the divestiture of property might challenge “the Greco-Roman cultural attitude that rationalizes the retention of wealth under the guise of being able to bestow future benefits, primarily among one’s friends.”³⁵ “Selling” their possessions may well evoke Jesus’s call to the rich ruler (Luke 18:22), which constitutes a sort of model for all disciples (12:33). On sharing of property, see the extended discussion at Acts 2:44–45 (the use of πικράσκω in Acts 4:34 and 5:4 is among the features recalling the earlier passage); cf. also Jesus’s principle in 20:35.

The claim that none were needy among them (4:34) reflects the language of the biblical ideal community in Deut 15:4.³⁶ God promised that if its members were obedient, there would be no poverty among them (15:4–6), even though the poor

32. Sandmel, *Judaism*, 148 (noting also that *m. Roš Haš.* 4:5 calls this benediction “Powers”); in Paul, cf. Rom 1:4; 1 Cor 6:14; 15:43; Eph 1:19–20; Phil 3:10.

33. *Test. Jud.* 2:1; *Jos. Asen.* 4:7; Rom 12:6; Eph 4:7; cf. χάρισμα in 1 Cor 1:7; 12:4, 9, 28–30; 1 Tim 4:14; 2 Tim 1:6; 1 Pet 4:10.

34. With others, e.g., Pesch, *Apostelgeschichte*, 1:180; Dunn, *Acts*, 59; Tannehill, “Ethics,” 118.

35. Mitchell, “Friendship in Acts 2:44–47,” 272.

36. As is often recognized; e.g., Grassi, *Laugh*, 121; Johnson, *Acts*, 86; Capper, “Reciprocity,” 502; Chance, *Acts*, 80; Green, “Acts,” 742.

would never depart from the land (15:11), because God would supply enough resources for those who were endowed with resources to share with those who were not (15:7–10). Thus Luke depicts the primitive church not only in Greek terms as the ideal community but in traditional biblical terms as well (appropriate for Israel's righteous remnant; see comment esp. on Acts 1:26).

That the goods were deposited at the apostles' feet (Acts 4:35, 37; 5:2) means that they were the managers who would supervise distribution among the needy (6:1–2); the income was not for themselves (3:6). The location at their feet indicates submission (cf. Luke 5:8; 8:35, 41; 10:39; 17:16; Acts 7:58; 10:25; 13:25; 22:3).³⁷ Supervising the distribution of goods could be an important role; residents of Rome might think of distribution of the grain dole, but Judean models are closer at hand. Among the Essenes, money was given into the hands of the *mebaqqer* (supervisor) and judges to give to the needy (CD XIV, 13–16).³⁸ Later rabbis also spoke of specific charity officials but warned that if they found no poor people to whom to distribute others' gifts, they could not use it for themselves (*t. B. Meši'a* 3:9). Being above reproach in distributing funds was critical,³⁹ and Luke appears concerned to distinguish his protagonists from greedy charlatans (see comment on Acts 3:6; 20:33–35; cf. Luke 9:58). That the apostles used all the funds for the needy contrasts them with members of the religious elite who exploited others economically (e.g., Luke 16:14; 20:47; cf. Acts 8:18; 16:16; 19:25).⁴⁰

The goods were distributed according to need (Acts 4:35, the language recalling 2:45). Luke does not tell us whether the later complaint of 6:1 was just or not, but if so, it arose at a later stage, when the dimensions of the charitable project became too large for the apostles themselves (6:1a).

3. Positive and Negative Examples of Sharing (4:36–5:11)

This passage contrasts positive and negative models to explain, illustrate, and reinforce the summary statement of 4:32–35,⁴¹ as early interpreters also recognized.⁴² (With the contrasting approaches to possessions in 4:36–5:11, cf. Luke 18:18–30; 19:2–10.) It includes apostolic signs of power (5:3–5, 9–10; cf. 4:32; 5:12) but especially illustrates the character of the church's sharing.

37. Also Johnson, *Acts*, 87 (noting that this gesture is common in the LXX); cf., e.g., Exod 11:8 (MT); 1 Sam 25:24; 2 Sam 15:17–18 (MT); 2 Kgs 4:37; Esth 8:3; Jos. *Ant.* 17.248; *War* 2.625. The exact phrase is especially Lukan (eight of nine NT uses, with no precise matches in the LXX, Josephus, Philo, or Apostolic Fathers, though cf. the expression for surrender in Jos. *War* 2.625). Barrett, *Acts*, 255, thinks that the strongest parallels are Cic. *Flacc.* 68; Lucian *Lover of Lies* 20; *Dial. C.* 14 and allows that Fitzmyer's parallels (CD XIV, 13; 1QS VI, 19–20) contain "the sense but not the wording."

38. The priests and multitude make all decisions on property (1QS V, 2–3). The *mebaqqer* supervises initiates' funds in 1QS VI, 19–20, a practice fitting Josephus's description in *War* 2.123. Like the entire community (cf., e.g., 1QS III, 6–7), such officials presumably needed the Spirit (cf. Acts 6:3). For the *mebaqqer* in general, see CD IX, 18–19, 22; XIII, 6–7, 13, 16; XIV, 8, 11, 13; XV, 8, 11, 14; 1QS VI, 12, 20; 4Q265 4 II, 6, 8; 4Q266 5 I, 14; 7 III, 2 (reconstructed); 3; 8 I, 2, 5; 9 II, 17; 9 III, 2; 10 I, 1, 5, 6; 11 16; 4Q267 8 4 (reconstructed); 9 IV, 2, 3, 11; 9 V, 13; 4Q269 9 8; 16 14; 4Q270 6 II, 7; 6 IV, 12; 4Q271 3 14; 4 I, 11; 4Q275 3 3; 5Q13 4 1.

39. Cf. 2 Cor 8:21; *t. Šeqal.* 2:2, 24; *y. Šeqal.* 3:2; *Exod. Rab.* 51:2. For being above reproach more generally, see, e.g., Hesiod *W.D.* 760–64; Isoc. *Demon.* 17; *Nic.* 54 (*Or.* 3.38); Polyb. 22.10.8; 27.8.4; Corn. Nep. 25 (*Atticus*), 6.4; Quint. *Inst.* 2.2.14; Plut. *Cic.* 29.7; *Sipre Deut.* 79.1.1; comment on Acts 6:3.

40. Cf. Spencer, *Acts*, 55–56.

41. Barnabas's sale of land to help the needy may also contrast with Judas's purchase of land with blood money (Acts 1:18–19; Witherington, *Acts*, 210).

42. Chrys. *Hom. Acts* 12 (trans. p. 76). So also most commentators today (e.g., Parsons, *Acts*, 73; Pervo, *Acts*, 126; Peterson, *Acts*, 208; Chance, *Acts*, 87).

Comparison was a standard narrative technique, sometimes employed even to create parallel biographies.⁴³ Orators could use comparisons to exalt one person (often themselves) at another's expense.⁴⁴ Critics used it as a heuristic device to enable them to discern strengths and weaknesses in various authors.⁴⁵ But it was also used to discern appropriate examples.⁴⁶ Thus one might illustrate the virtue of gratitude and the vice of ingratitude by providing examples of each (Val. Max. 5.2.pref.).⁴⁷ See more complete discussion of parallels among characters in the commentary introduction.⁴⁸

a. Positive Example: Joseph Barnabas (4:36–37)

Luke may have had other positive examples to contrast with Ananias and Sapphira; even if he knew only a small proportion of the donors' names, the positive examples were surely more numerous than the negative ones. Further, given the emphasis on gratitude toward benefactors in the ancient Mediterranean world, many of the positive examples would likely have been remembered for some time.⁴⁹ Some scholars think that Barnabas is singled out because his donation as a landowner was the greatest "single contribution,"⁵⁰ but would Luke have considered this sufficient reason to specify him (cf. Luke 21:2–4)?⁵¹ Although Barnabas was generous, we cannot necessarily infer from Luke's mention of him that he contributed the largest gift.⁵² Rather, Luke has a specific literary reason to focus on Barnabas; he often mentions his characters in preliminary ways before introducing them in their primary roles (e.g., Philip and Stephen in Acts 6:5; Saul in 7:58 and 8:1).⁵³

External sources support Luke's basic portrayal of Barnabas in Acts. Paul later mentions Barnabas as a traveling companion (1 Cor 9:6; Gal 2:1, 9), who once sided with conservative elements from Jerusalem in Antioch though he should have known better (Gal 2:13). From Paul's portrayal, it appears that Barnabas wanted merely to keep peace within the church, whereas Paul insisted on a matter of principle for the sake of new Gentile believers and the church's future; Acts likewise portrays Barnabas as a broad-hearted peacemaker eager to welcome everyone (Acts 9:27; 15:37–39; cf. 11:22–24).⁵⁴ External tradition also indicates that Barnabas and Mark belonged to the same extended family (Col 4:10), which makes good sense of both the former's defense of Mark (Acts 15:37–39)⁵⁵ and the fact that both Barnabas (here, 4:36–37)

43. See the commentary introduction, Keener, *Acts*, 1:568–74.

44. Cic. *Brut.* 93.321–22.

45. Dion. Hal. *Pomp.* 1–2.

46. Dion. Hal. *Pomp.* 6.

47. One could also extend such comparisons to different characters' contentment with wealth (e.g., Xen. *Oec.* 2.2–4). Readers would probably identify with Barnabas; on reader identification, see Dewey, "Oral-Aural Event," 151–57.

48. Keener, *Acts*, 1:568–74.

49. Cf., e.g., Lysias *Or.* 19.9, §152 (one who spent more on Athens than on himself should be praised).

50. Dunn, *Jesus and Spirit*, 161. More simply and accurately, many ancient hearers would regard Barnabas as a benefactor (see Witherington, *Acts*, 205; on benefaction, see comment on Acts 4:9).

51. Luke may use the Barnabas story to challenge widespread cultural values, including the reciprocity ethic (see Mitchell, "Friendship in Acts 2:44–47," 272).

52. Wealth itself was one ground for praise in typical aristocratic Greek thought (e.g., *Rhet. Alex.* 35, 1440b.17–19), but this hardly fits Luke's perspective elsewhere (or that of even wealthier philosophers; cf. Sen. *Y. Ep. Lucil.* 94.72, on true grounds for status; 98.6, on relinquishing concern to retain property).

53. Capper, "Context," 341. Though otherwise a secondary character, his appearance in many scenes in Acts reinforces his importance; cf. Murphy, "Role of Barnabas," emphasizing his role in spreading the gospel.

54. On Barnabas as a reconciling or mediating personality in the various sources, see esp. Öhler, *Barnabas*. For a survey of his story, see Burge, "Barnabas."

55. Luke's audience, most of whom probably lacked this information (whether Col 4:10 provides new information or simply identifies which "Mark," a common name), would have seen this more in light of Barnabas's peacemaking character, already noted in Acts 9:27.

and Mark's mother (12:12–13) had ample resources. Certainly, Barnabas would not easily be charged with greed; he appears to have shared the practice of Paul, unlike that of some other missionaries, of paying his own way (1 Cor 9:6).⁵⁶

I. NAMING BARNABAS (4:36)

In the OT, naming a person signified authority over them (Gen 2:19; 17:5; 19:39; 25:26, 36; also *Jos. Asen.* 15:7; cf. Luke 6:13–14).⁵⁷ Thus Barnabas, who also lays possessions at their feet, proves doubly submissive.⁵⁸ His character throughout Acts is associated with encouraging those otherwise marginalized (Acts 9:27; 11:22–26; 15:37–39), though this personality trait could also lead to more tolerance than Paul thought appropriate at times (both in Acts [Acts 15:36–39] and in Paul's letters [Gal 2:13]). The later conflict with Paul in Acts 15:39 may not reflect the submissive element but simply allows for Barnabas to be a rounder character than mere literary creation would prefer.⁵⁹

"Son of Encouragement"⁶⁰—that is, *encourager*—could accurately depict elements of Barnabas's ministry in Acts,⁶¹ but it is probably not what the passage means.⁶² It is not what the Aramaic title cited means, nor is it the only way to interpret Luke's or his tradition's Greek translation of that title.⁶³ Some suggest that the Aramaic title might have been originally a pagan theophoric, such as "son of Nebo";⁶⁴ it appears only one other time as a Jewish name (in first-century Egypt), but it was common among other Semites.⁶⁵ In this case, later Christian tradition may have found a more pious etymology for Barnabas's title, one that Luke unwittingly follows here.⁶⁶

Given the unlikelihood, however, that many pagan names would arise in Jerusalem (or that Semitic pagan names would flourish among Greek-speaking Cypriot Jews), another explanation seems equally plausible. The apostles may have given a barely familiar pagan name a new meaning, as described here.⁶⁷ (It is, after all, a *nickname*; on nicknames, see comment on Acts 1:13 and esp. 1:23.) The title may mean "son" (*bar*) of "prophet" (*nabi*), prophecy referring to exhortation;⁶⁸ this would fit his

56. See here Thiselton, *Corinthians*, 679. For a survey of information on Barnabas in Acts and Paul's letters, see Eckey, *Apostelgeschichte*, 129; for a reconstruction of the historical Barnabas, see Öhler, *Barnabas*.

57. Johnson, *Acts*, 87.

58. *Ibid.*

59. An informed reader could also compare one's best and worst reported moments (cf. Dion. Hal. *Thuc.* 35, end, as a rhetorical critical technique on a writer's style).

60. It functions as an epithet (cf. Anderson, *Glossary*, 52–53) rather than as *antonomasia* (cf. 23; Rowe, "Style," 128; Porter, "Paul and Letters," 579).

61. See, e.g., France, "Barnabas." Insofar as the Greek term can suggest "comfort" or "consolation," it might apply to gifts for widows (Acts 6:1); but the title here may precede the gift, and Luke applies "consolation" more broadly (Luke 2:25; 6:24; Acts 9:31; 15:31).

62. See, e.g., Conzelmann, *Acts*, 36.

63. Unless we accept the tradition that Luke was from Antioch, he need not have known Aramaic (and even then, Luke need not have known Aramaic well or perhaps even directly, since Greek was so common there); the LXX probably can account for his adaptation of Semitic style in places.

64. Cf. Johnson, *Acts*, 87, who suggests that Luke's translation is faulty but fits Barnabas's character in Acts (Acts 9:27; 11:22, 30; 12:25). Hengel and Schwemer, *Between Damascus and Antioch*, 213, doubt that it would be understood as a pagan theophoric but reject in any case the objection that a Levite could not have born one; pagan deity names were common (see, e.g., "Apollon," Acts 18:24; cf., e.g., Lung-Kwong, *Purpose*, 104).

65. Williams, "Name," 101. It appears in numerous Semitic inscriptions, including at Dura-Europos (Cadbury, *Acts in History*, 24).

66. Deissmann, *Studies*, 307–10, esp. 310.

67. This should be preferred to a proposal that they simply gave him a name "son [*bar*] of encouragement" in addition to "Barnabas" (cf. R. Williams, *Acts*, 60).

68. See Barrett, *Acts*, 1:258–59; Hill, *Prophecy*, 101; Bruce, *Acts*¹, 130–31; Witherington, *Acts*, 209; Boismard and Lamouille, *Actes*, 2:163–64; Bock, *Acts*, 217. Cf. the Hebrew designation "sons of the prophets" (1 Kgs 18:20; 20:35; 2 Kgs 2:3, 5, 7, 15; 4:1, 38; 5:22; 6:1; 9:1; used very differently in Acts 3:25).

role both as a prophet at Antioch (13:1) and a bearer of the Lord's message (14:14; see comment on Acts 4:31; cf. "exhortation" in 13:15), though in the latter role he appears subordinate to Paul in speaking (14:12).⁶⁹

His original name, "Joseph," was so common as to require a surname or nickname to distinguish him from others by that name (cf. 1:23). It is frequently attested in both the Diaspora and Palestine, and the latter includes it "at all social levels."⁷⁰ It is the one non-Hasmonean name that was as common as Hasmonian names in first-century Palestine.⁷¹

II. A CYPRIOT LEVITE (4:36)

Identifying Barnabas's place of origin as Cyprus helps explain ministry connections later in the story (11:20; 13:4; 15:39; see further comment on Cyprus at 11:20). Place of origin was also a frequent basis for identifying a person. One of the first questions a person would ask of another is, "Where are you from?"⁷²

Some members of Luke's ideal audience, or at least the urban Jewish Christians among them, may have known that many Jews lived in Cyprus (13:4–5).⁷³ Barnabas's Cypriot Jewish origins presumably make him one of the Hellenists (6:1), which, along with his background in wealth, may help explain his initial compatibility with Paul, also part of an immigrant family and probably of the same class (cf. 6:9; 7:58; 9:1; 26:4).⁷⁴

Perhaps Barnabas's associations with Cyprus help explain his wealth (and that of his relatives, 12:12–13).⁷⁵ Cyprus was a prosperous land both rich in minerals (especially copper⁷⁶ but also gems⁷⁷) and agriculturally fertile (Strabo 14.6.5); Cyprus's fertility made it a natural source of food for Judea, especially in time of need there.⁷⁸ Given the mention of his "field" (cf. Luke 14:18; 15:25; 17:7, 31; though contrast the use in 8:34; 15:15), Barnabas may have acquired income from agricultural work (presumably someone else's).⁷⁹ (Another Cypriot disciple in 21:16, probably from the same early period of the church, hosts a large entourage and hence also appears to be a person of means, or at least someone very generous.)

Although Levites did not hold tribal territories and might live in towns (Num 18:20; Deut 10:9; 12:12, 18; 14:27, 29; 16:11, 14; 26:12; 2 Chr 23:2), they traditionally held

69. Prophets may have been, ideally, poor (*Did.* 11.5–6, 9; cf. Matt 10:41; Boring, *Sayings*, 92).

70. Williams, "Names," 89.

71. *Ibid.*, 108–9.

72. E.g., Gen 16:8; 29:4; 42:7; Josh 9:8; Judg 13:6; 17:9; 19:17; 1 Sam 25:11; 30:13; 2 Sam 1:3, 13; Jonah 1:8; Luke 13:25, 27; John 7:27–28, 42; 8:14; 9:29–30; 19:9; Rev 7:13; Hom. *Od.* 19.104–5; Soph. *Oed. Col.* 206; Eurip. *Cycl.* 102, 275–76; *Hel.* 86; *Iph. Taur.* 495, 505; *Rhes.* 682; Prop. *Eleg.* 1.22.1–2; Pindar *Pyth.* 4.97–98; Philost. *Letters* 5 (41) (even using it to explain the person's character); *Hrk.* 1.1. Another was about one's parentage or ancestry (e.g., Pindar *Pyth.* 4.98–100).

73. See, e.g., Philo *Embassy* 282; Jos. *Ant.* 13.284–87 (Conzelmann, *Acts*, 99; most fully, Stern, "Diaspora," 154–55). Cyprus is among the places judged in *Sib. Or.* 3.457.

74. On the basis of the tradition that Mark and Barnabas were relatives (Col 4:10) and Luke's claim that Mark's mother owned a sizable home in Jerusalem (Acts 12:12–13), either a large part of Barnabas's family had emigrated from the Diaspora (perhaps with some resources acquired there) or, less likely, he had traveled abroad on business ventures (perhaps through other family connections).

75. People of means are known from there (e.g., Lucian *Dem.* 3), including Jews (Jos. *Ant.* 18.131).

76. On Cyprus's notable copper, see Strabo 3.4.15; Pliny E. *N.H.* 33.46.131; 34.2.2, 4; cf. 34.23.106; for copper factories there, 34.24.107; for ash from cadmea and copper ore, 34.34.130. On Cyprus, see further comment at Acts 13:4.

77. Pliny E. *N.H.* 37.15.58; 37.17.66–37.18.67; 37.38.119.

78. Jos. *Ant.* 20.51; Feldman in LCL, 10:29 n. d, cites further y. *Demai* 2:1. Cf. Reifenberg, "Beziehungen"; on coins indicating trade links, Le Cornu, *Acts*, 683.

79. Romans of high status considered this "the only socially acceptable business" (Jeffers, *World*, 184; cf. Gager, "Class," 101; Stambaugh and Balch, *Environment*, 116–17), although, of course, most people did not have the luxury of making such choices.

some Israelite cities with surrounding land (Num 35:2–7; Josh 14:4; 21:3, 13; 1 Chr 6:64; 9:2; 2 Chr 31:19; Ezra 2:70; Neh 7:73; 11:3, 20; 12:44; 1 Esd 5:46). They could not, however, sell such land, in contrast to Barnabas's action here. More relevant is that Levites often did hold land by this period (Jos. *Life* 68–83; cf. Jer 32:6–15; Jos. *Ant.* 11.312; Luke 1:23, 39, 65).⁸⁰ The Levitical connection makes some historical sense of the ample house of Barnabas's relative in the Upper City, probably near the temple and the Fortress Antonia (see comment on Acts 12:13).⁸¹ Luke may appeal to Barnabas's "Levite" status the way he appeals to priests' joining the church (Acts 6:7) or to Paul's Roman citizenship (16:37):⁸² within Judaism, "Levite" was a status claim, just like hereditary aristocratic lineages elsewhere.⁸³ As we observe elsewhere, Luke is interested in reporting status claims among early Christians.⁸⁴

Some scholars deny Barnabas's Jerusalem connection, making him a leading Hellenist (from Antioch or elsewhere).⁸⁵ But had Luke wished to invent connections for Barnabas, he could have brought him closer to the Jerusalem apostles by renaming Joseph Barsabbas (1:23) "Barnabas," as the Western text does with minimal emendation.⁸⁶ That he was in fact connected to Jerusalem, as well as to the Diaspora, is suggested by his alliance with the Judean faction in Gal 2:13.⁸⁷

III. SALVATION FOR THE WEALTHY (4:37)

Against biblical injunctions about Levites and priests not holding land, the aristocratic priests (see comment on Acts 4:5) show that some did in fact grow rich (unlike the apostles, Acts 3:6). Although probably nowhere on the scale of such wealthy priests, in comparison with most persons in the empire, Barnabas, like Lydia later in Acts (16:14), illustrates the Gospel's teaching about salvation for the rich.⁸⁸ (By the definitions of Jesus and John, someone living in Jerusalem with an extra plot of land somewhere else readily qualified for the discussion [Luke 3:11].) In principle, it was impossible for the rich to be saved (Luke 18:24–25) apart from God's intervention (18:26–27). Joseph of Arimathea had risked his reputation and probably his life to follow Jesus (23:50–52), and Zacchaeus had surrendered much of his wealth (19:8–9).⁸⁹ Barnabas provides another illustration of a rich person who forsook all

80. With Witherington, *Acts*, 209; Talbert, *Acts*, 49. Fiensy, "Composition," 228, suggests that his background in Cyprus probably indicates that he did not belong to one of the twenty-four temple courses (cf. Luke 1:8). On Levites, see Stern, "Aspects," 596–606.

81. Cf. Acts 12:12–13 with Col 4:10. The interlocking of such data, not emphasized by the authors themselves, supports the probability of historical tradition behind both sources.

82. This is not to say that Luke *invented* Barnabas's Levite status; as Hengel and Schwemer, *Between Damascus and Antioch*, 213, ask, why not make him a priest? (Or Paul as well if Luke did not know he was a Benjaminite?)

83. This remains true even if priests such as Josephus treated Levites as rivals (Feldman, "Levites," thinks that Josephus played them down).

84. Perhaps Barnabas even had Sadducean connections (since many of the Sadducees were wealthy priests), but since they were a local aristocracy, this is less likely. (Luke's silence on the matter would not, however, count against it: his portrayal of the Sadducees, unlike that of the Pharisees and the priesthood, is purely negative, a portrayal that Barnabas cannot fit.) That Barnabas's Levite status invited him to sell the land (as a return to biblical norms) is possible but not what Luke emphasizes.

85. Hengel and Schwemer, *Between Damascus and Antioch*, 212–13, summarize their position.

86. *Ibid.*, 214.

87. *Ibid.*, 215.

88. Not only his Levite ancestry (as noted above) but his wealth would be a mark of status. Πλοῦτος is one of the subjects for praise in an encomium (Theon *Progymn.* 9.18).

89. Cf. D'Sa, "Salvation of Rich." Fiensy, "Composition," 226, suggests that Simon of Cyrene was also wealthy, since he had a farm near Jerusalem (Mark 15:21), but would this be the meaning of "coming from the field" on a festival day? On Zacchaeus's conversion in the context of Luke's conversion stories, see Méndez-Moratalla, *Paradigm*, 153–80 (for the nonconversion of the ruler in Luke 18:18–30, see 198–214).

and hence could enter the kingdom. (Jewish teachers could use examples of both rich and poor who served God, to eliminate the excuses of all alike.)⁹⁰

b. Negative Example: Ananias and Sapphira (5:1–11)

In the context of Acts 4:32–37, part of the narrative's point concerns the value of sharing one's goods with the needy (through the leaders in the church, in a time when those are godly). Ancient moralists, both Gentile⁹¹ and Jewish,⁹² preached hard against covetousness. But the standard here is not just against covetousness; it invites sacrificial sharing (see discussion on Acts 2:44–45). The passage also emphasizes the community's sanctity and warns against lying to the agents of the God who knows all hearts (cf. 1:24). In a sense, it also praises the Jerusalem apostles (as histories and biographies often praised honorable characters; cf. 5:13) as the second half of Acts praises Paul, but since they only act as God's agents, the ultimate focus of praise is God himself (5:11).

In terms of the narrative's larger epideictic treatment of the "pristine" Jerusalem church, however, the focus is on God's guarding the community's sanctity.⁹³ Ananias and Sapphira wanted to join God's community while also retaining their personal autonomy from God's authority. They thereby risked infiltrating God's church with Satan's agenda (5:3). God's decisive action against them guarantees that, for the time being at least, only true believers (5:14; "men and women," balancing the report of Ananias and Sapphira), and not compromising ones (5:13), will join the movement. God's active justice in the ideal community, the church, also contrasts with the corruption of the municipal elite in the surrounding context.⁹⁴ What this passage suggests about the sanctity of the church experiencing God's power contrasts starkly with the conception of the institutional church and its merely routine church meetings typically perpetuated in Western Christendom today.⁹⁵ Even in Luke's setting, however, he does not seem to expect God's enforcement of community holiness so directly normally (cf. 20:29–31).

I. INTRODUCTION

Scholars differ in their estimates of the historical content of the account. Some doubt whether the narrative even has a historical core.⁹⁶ Others accept an original core in which a couple attempted to deceive the church, were found out, and were excommunicated⁹⁷ or died shortly after the deception.⁹⁸ At least one piece of historical

90. E.g., 'Abot R. Nat. 6 A; 12, §30 B; *b. Yoma* 35b; 3 *En.* 4:3; cf. the principle in Plut. *Coriol.* 1.2; Max. Tyre 1.9.

91. E.g., Demosth. *Olymp.* 46; Mus. Ruf. 3, p. 40.27–28; 4, p. 48.9; 8, p. 62.17; 14, p. 92.22; 17, p. 108.13; 20, p. 126.18; Dio Chrys. *Or.* 13.32; 17 (esp. 17.6, 21); 34.19; Men. *Rhet.* 2.9, 414.9–10; Iambl. *V.P.* 17.78; van der Horst, "Macrobius," 223.

92. E.g., Sir 14:9; *Let. Aris.* 277; 1QS IV, 9; 11QT II, 8; 4 *Macc* 2:7; Rom 1:29; Col 3:5; *Jos. Ant.* 15.89; *Sib. Or.* 3.189, 235; *Test. Naph.* 3:1; *Test. Gad* 5:1; *Test. Ash.* 5:1; *Test. Benj.* 5:1; 3 *Bar.* 13:3. Philo employs $\pi\lambda\epsilon\omicron\nu\epsilon\acute{\xi}\iota\alpha$ and relevant cognates some sixty times, and Josephus about fifty.

93. For Luke's emphasis on the church and its proper unity here, see Thompson, *Church*, 81–82. For one semiotic reading of the passage, sensitive to its larger context, see Duplantier, "Mort." For an approach in light of Aristotle's rhetoric and ethics, see Spencer, "Scared to Death." For expectations for a holy community's special sanctity due to God's presence, see, e.g., Lev 10:2–3; Deut 23:10, 13.

94. See Repschinski, "Hananiah," contrasting the preceding and following Sanhedrin trials.

95. Others offer additional Lukan points with subsequent potential applicability, such as the Spirit's activity in the church; church authority; and so forth (e.g., Ntumba, "Ananie"; idem, "Mort").

96. Hills, "Equal Justice."

97. In which case, it was believed that they should have died (Lüdemann, *Christianity*, 66, citing 1 Cor 5:5; but contrast Haenchen, *Acts*, 239).

98. Goulder, *Type and History*, 188; cf. Haenchen, *Acts*, 239–41; Pervo, *Acts*, 131. Williams, *Miracle Stories*, 143, allows excommunication followed by death, yet without a demonstrable causal relationship.

evidence supports a historical core. “Sapphira” is a rare name without likely symbolic value,⁹⁹ though occasionally a scholar has drawn symbolic value from “Ananias” (against whom Jeremiah pronounced mortal judgment, Jer 28:15–17).¹⁰⁰ Her name fits almost exclusively the right location and social class and hence suggests reliable tradition.¹⁰¹

Some other proposals for or against the passage’s historical reliability could be argued either way. From the biblical parallel (the Achan story in Josh 7), one could argue that Luke entirely composed the narrative, but the connections could also simply mean that he or his tradition edited the narrative so as to emphasize the parallel. If Luke composed the story simply to parallel that of Achan (a passage he nowhere explicitly quotes here), the many differences between the narratives would obscure his point.¹⁰² On the other side of the argument, one could argue from the likely reaction against such a story¹⁰³ (the telling of which could weaken Luke’s apologetic concerning the church’s innocence) that Luke would not have invented it, though for the same reason one could wonder why he tells it at all. Thus most historical arguments in this case, though perhaps of some value, are not conclusive. Nevertheless, given our observations concerning Luke’s overall methodology, it seems most plausible that Luke has reworked a tradition available to him.

Luke-Acts itself and its grounding in the biblical story provide more explicit information for exploring the points Luke wished to make from the narrative.¹⁰⁴ Certainly the story demonstrates, like the Achan narrative in the book of Joshua, which it echoes,¹⁰⁵ that sin can disrupt *κοινωνία* even in the primitive, idyllic community.¹⁰⁶ Achan kept some of Jericho’s wealth devoted to God; Ananias and Sapphira hold back some of their wealth already dedicated to God.¹⁰⁷ The sudden deaths may also recall the priests who died in God’s presence in Lev 10:1–5.¹⁰⁸ Luke’s audience might also recall that Gehazi, understudy of a prophet to Israel, secretly took wealth, but God saw and punished him (albeit not mortally) through the prophet (2 Kgs 5:27).

Within the structure of Luke-Acts, Johnson may be right that each new geographic frontier includes a symbolic confrontation with “evil powers,” echoing Jesus’s kingdom

Such a relationship is hard to doubt in Luke’s narrative, however, where both parties die independently and instantly on being confronted! Both antisupernaturalism and a modern distaste for “judgment” miracles probably figure into skepticism about this passage.

99. Goulder, *Type and History*, 188. It is among the names that first-century ossuaries attest (Thompson, *Archaeology*, 319).

100. Goulder, *Type and History*, 174, 188. But cf. a positive “Ananias” in Acts 9:10–17.

101. Williams, “Names,” 95.

102. Gaventa, *Acts*, 103, emphasizes the differences: “Achan’s secret action brings defeat on Israel, he immediately confesses when confronted, and all Israel takes part in the stoning of Achan and the destruction of his entire family and all his property.” Cf. Marshall, “Acts,” 554 (suggesting the verb *νοσφίζω* as the only explicit connection); Marguerat, *Actes*, 173.

103. See likely Porphyry in Mac. Magn. *Apocrit.* 3.19–22 (*Porphyry’s*).

104. For a survey of views here, see Fitzmyer, *Acts*, 318–20.

105. As commonly recognized; e.g., Johnson, *Possessions*, 205–6; Allen, *Death of Herod*, 124; Witherington, *Acts*, 213; O’Day, “Acts,” 309 (also comparing Saul’s disobedience in 1 Sam 15); Talbert, *Acts*, 51 (also comparing the coconspirators Ahab and Jezebel in 1 Kgs 21); Chance, *Acts*, 88. Particularly reminiscent is the devotion of the transgressor of mandatory *herem* to *herem* himself, in Acts having voluntarily devoted possessions to *herem*; see Park, *Herem*, 132–43.

106. Fitzmyer, *Acts*, 320.

107. Achan’s function in the Joshua narrative also contrasts him with Rahab: he hid loot under his tent, but she hid the spies on her roof (Josh 2:6; 7:21–22); they each betrayed their own people; Achan brought about his (complicit) family’s death, and Rahab her (complicit) family’s deliverance (6:17, 23, 25; 7:24–25). If Luke thinks of the context, this betrayal in Israel might also remind him of the Gentile mission. (But we lack clear Rahab allusions; the closest plausible one, Lydia in Acts 16:15, is not close at all.)

108. Barrett, *Acts*, 262; Witherington, *Acts*, 214. Wright, *Acts*, 80 (also comparing the violation of the sacred in 2 Chr 26:19–21). Cf. similarly 2 Sam 6:6–7, another transgression of holiness.

confrontations in the Gospel (Luke 11:20). Here the church confronts members with Satan in their hearts (Acts 5:3; cf. Luke 22:3); later God's agents will confront sorcerers and magicians (Acts 8:9–11; 13:8–11; 19:13–16) and demons (16:16; cf. 5:16).¹⁰⁹

Certainly the passage fits into Luke's larger theme on possessions. It also fits Luke's opposition to hypocrisy. God discerns the insincerity of even the outwardly devoted (Luke 16:15) who really loved money (16:14), illustrating the point that one cannot serve both God and mammon (16:13). Jesus cleansed the temple (19:45) perhaps partly in response to its hypocrisy and handling of money (19:46). God judged impostors within the community (Acts 1:18; 5:5) more severely than false prophets outside it (13:11).¹¹⁰ Thus there was no room for spiritual compromise, especially in the revivalistic intensity of the Pentecost community: in the presence of God's Spirit (5:3, 9; cf. 4:31), there was no toleration for nominalism or mere pretense of commitment (cf. 5:13).¹¹¹

Ananias's behavior of seeking to deceive the community recalls the betrayal of Judas: both had Satan in their hearts (Luke 22:3; Acts 5:3), conspired for money (Luke 22:4–6; Acts 5:9), and were involved in real estate in a negative way (Acts 1:18).¹¹² They contrast starkly with the role of disciples in forsaking all to follow Jesus (Luke 5:11; 12:33; 14:33; 18:28–30).

II. DECEPTIVELY WITHHOLDING INCOME (5:1–2)

Luke elsewhere pairs husbands and wives, often positively (Acts 18:2–3, 26; also Luke 1:7, with its emphatic ἀμφότεροι); here Luke mentions Sapphira's complicity in the plot at both stages. The name "Sapphira," in its various spellings, means "beautiful" and appears "almost exclusively" among wealthy Jerusalem families in this century.¹¹³ This name thus suggests that she came from a propertied family and likewise married into one,¹¹⁴ which indicates that the church has (as in Acts 4:36–37) now extended beyond those who have little wealth (3:6). The term κτήμα (also 2:45), along with the amount of money the narrative seems to presuppose (also in 4:36–37), might suggest "medium-sized estates."¹¹⁵

109. Johnson, *Acts*, 11 (though viewing the viper of Acts 28:3–5 as such a power encounter, in view of Luke 10:19, might go too far); O'Toole, "Not to Us but to God." Combet-Galland, "Expulsion," even compares exorcism (and the fall narrative of Genesis).

110. Those who knew the right way but turned out badly merited even greater punishment (Thucyd. 1.86.1; Heb 6:6; 2 Pet 2:20–21; cf. Ezek 18:24; Amos 3:2).

111. Marguerat, "Mort d'Ananias," thinks the narrative's focus is the activity of the Spirit rather than community rules or behavior. Marguerat's Adam-and-Eve connection for the couple (*ibid.*; *idem*, "Terreur dans l'Église"; cf. *idem*, *Histoire*, 268; *idem*, *Historian*, 178) appears more questionable (although this is the initial sin of a new community).

112. Johnson, *Acts*, 40; Allen, *Death of Herod*, 125. Allen also compares (*ibid.*) Herod, who also sinned against God (Acts 5:4; 12:22–23) and "expired" (5:5, 10; 12:23), inviting the church's growth (5:12–16; 12:24).

113. Williams, "Names," 95 (with at least nine other toms from "the Jerusalem area"; "The only other case known (also a rich lady) comes from 2nd-century Murabba'at"). See, e.g., *CIJ* 2:316, §1378 (Greek and Semitic); 2:318, §1384 (Semitic). Barrett, *Acts*, 264, cites a masculine cognate in *b. Mo'ed Qat.* 11a. Cf. the positive figures Σεπφώρα in LXX Exod 1:15 (Shiphrah); 2:21; 4:25; 18:2 (Zipporah); Σαπφώρα in *Jos. Ant.* 2.277 (Zipporah); the closest common term in the LXX is that for "sapphire."

114. Although some men gladly married wealthy women (*Cercidea* 38–41; *Jos. Life* 427; *Plut. Cic.* 41.3–4), conventional wisdom advised men not to marry women from families wealthier than the husband's (*Aeschylus Prom.* 887–93; *Eurip. frg.* 214 [in *P.Oxy.* 3214.5–6; *Stob.* 4.22.93]; *Melanippe frg.* 502 [Stob. 4.22.94]; *Callim. Epig.* 1; *Xen. Cyr.* 8.4.25; *Sen. E. Controv.* 1.6.5, 7; *Plut. Educ.* 19, *Mor.* 13F–14A; *Diog. Laert.* 1.92; *Libanius Thesis* 1.22; *Ps.-Phoc.* 199–200; *Tg. Šeni* on *Esth* 1:16; cf. *Eurip. El.* 931–33; *Plut. M. Cato* 20.1; *Quint. Decl.* 257.7; *Philost. Vit. soph.* 2.25.610–11; somewhat differently in comedy, *Menander Dyskolos* 795–96, 825–34), though hers could be poorer (*Pliny Ep.* 6.32.1–2; *Athen. Deipn.* 8.359F). Some ancients did opine it wiser to marry their daughters to an honorable poor man rather than to a dishonorable rich one (*Val. Max.* 7.2.ext. 9). Later rabbis warned that a man must be able to maintain his wife at the standard with which she had grown up (*Safrai*, "Home," 763).

115. So Fiensy, "Composition," 227.

The text appears to lay primary responsibility for active deception on Ananias (5:2), with his wife participating in the subterfuge (5:1, *σὺν Σαπφίρῃ*).¹¹⁶ Given the usual authority structure in ancient households,¹¹⁷ it is not surprising that Ananias would have taken the lead. The narrative attributes to both, however, the sale of the property (5:1). Contracts reveal some Jewish women as cosellers, signing alongside their husbands. This was no mere formality: separate witnesses attest the signatures of each. The husband's property was liable if the wife's *ketuba* (marriage settlement) needed to be refunded in the case of a normal divorce, and so she had to sign to show that the property was genuinely available for sale.¹¹⁸ More explicit joint ownership might also be in view here, in the case of a more independent woman from a wealthy household (but see comment on Acts 16:14).¹¹⁹ Whatever the case, Sapphira participated fully and was judged fully (5:8–10);¹²⁰ even subordinate rank in a patriarchal society did not excuse complicity in disobeying God, the ultimate authority (cf. 1 Sam 25:14–38).¹²¹

Like Barnabas, this couple may have held property some distance from Jerusalem. In support of this possibility, Ramsay points out that Mediterranean life was public and everyone would know the price of any field that was sold (cf. Jer 32:9–12); he doubts that the couple would have risked exposure by selling a field close to Jerusalem.¹²² Given the size of both Jerusalem and the church, however, Ananias and Sapphira may well have gambled that no one would check, especially if other contributors were not being questioned.¹²³

Some scholars think that a special group existed in the church “for whom communal ownership . . . was obligatory.”¹²⁴ It is likelier that it was voluntary for everyone, motivated not by membership requirements but by the internal leading of the Spirit suggested in Acts 4:31–32. Nevertheless, even when sharing is voluntary, the practice itself, when it becomes a dominant practice of the group, exerts considerable influence on other members to conform to the new standard it sets. More malevolent motives are also possible: benefactors in the ancient Mediterranean world expected public honor, and the couple may have wished to achieve status within the Christian community without genuine sacrifice.

Excursus: Parallels for This Narrative

Various ancient analogies help us to reconstruct some of the sense that Luke may have assumed his audience would intuit. Normal cultic and other associations required

116. Reimer, *Women*, 14–16, 262, portrays her complicity as silent enablement of her husband's patriarchy in relinquishing her *ketuba* (hence rights to the property as a widow). This assumes, however (though perhaps rightly) that the *ketuba* was tied up in the property. On widows' inheritance rights in the Greco-Roman world more generally, see comment on Acts 16:15; in Israel historically, see Num 36.

117. See, e.g., Philo *Creation* 167; Keener, “Marriage,” 687–91; idem, *Acts*, 1:619–26.

118. Reimer, *Women*, 5 (on women's property rights in marriage more generally, see 2–6).

119. Classical Athens rejected even the validity of changes of will that were influenced by women (Isaeus *Philoct.* 29–30, though this is an allegedly immoral one), but classical Athens represents an extreme position.

120. As often noted, e.g., Osiek and MacDonald, *Place*, 36 (even viewing them as “equally culpable”).

121. Obedience to the law took precedence over family allegiance (Deut 13:6–9; 4 Macc 2:11; cf. Sir 30:19).

122. Ramsay, *Pictures*, 34–35.

123. Certainly no one was expected to produce receipts of their transactions, or they would not have risked this ruse, in any event.

124. Fitzmyer, *Acts*, 322, summarizing and rejecting this position.

only dues and fees, not total sacrifice (see comment on Acts 2:42).¹²⁵ A small minority of groups, however, went further. Followers of Pythagoras sold property and entrusted their resources to him. If they ultimately proceeded to full discipleship, they relinquished their property permanently to the community; if not, it was restored to them (with more added for their trouble).¹²⁶

Qumran's communalism was not voluntary (1QS I, 11–12), except in the sense that membership in the community was voluntary.¹²⁷ But when members first joined, their resources were initially surrendered only provisionally (VI, 17); after a waiting period,¹²⁸ the novices would either be initiated fully (and the property go to the community, VI, 19–20) or receive their property back (VI, 21–22).¹²⁹ Particular leaders of the community (VI, 12) had to evaluate the case, as well as bringing it before the entire community.¹³⁰

In such models, the funds, in a legal sense, remained the adherents' "own" even after they had donated them; this allowed them opportunity to reevaluate their commitment for a limited period if they proved dissatisfied. Such a two-phase process could explain how the funds remained at the couple's disposal (Acts 5:4) even while they "kept back" part of the price (5:3).¹³¹ This suggestion offers a plausible account of the dynamics behind this narrative.

The text, however, refers to the funds being their own after the sale, not after their donation (5:4). It is not clear that the Jerusalem community offered to refund dissatisfied customers the way Pythagoreans or Essenes might, since initiates were not required to hand over all property at baptism. At the same time, it also appears that no one was required to contribute everything to the community, in contrast to fully committed Essenes and Pythagoreans. One clear difference between Pythagoreans and Essenes, on the one hand, and the Jerusalem Christians, on the other, is that the latter did not abolish property altogether; we read of Christians continuing to meet in homes (2:46; 5:42; 8:3), some apparently well endowed (12:12–13). It is unlikely that these homes are Luke's fabrication (to match the house churches of the Diaspora?); he would not deliberately tone down the utopian imagery by which he presents the primitive church (cf. also his ideal, admittedly possibly hyperbolic, in Luke 12:33; 14:33), nor would the churches have persevered easily (especially after persecution, Acts 8:1; 12:1) without private meeting places.

The threat to the integrity of the community, however, is no less real simply because the community's rules are voluntary. The Greek term νοσφιζω means "to put aside for oneself, *keep back*, of engagement in a type of skimming operation,"¹³² or

125. Sometimes those who neglected "business meetings" (as in the case of a cult association of Dionysus) would also be fined (Smith, *Symposium*, 121).

126. Iambl. *V.P.* 30.168; Grant, *Christianity and Society*, 100 (citing Iambl. *V.P.* 80–81; Hippol. *Ref.* 1.2.16–17).

127. For volunteering, see 1QS I, 11; VI, 13; cf. 1QS I, 7; V, 1, 6, 8, 10, 21–22; VI, 13; 1Q31 1 1 (for the final battle, 1QM VII, 5; 4Q261 1 2); see comment on Acts 2:44–45. Knowledge of the Essene practice persisted; see, e.g., Hippol. *Ref.* 9.14.

128. The first year (1QS VI, 17–18; and even the second year, to a lesser extent, 6.21) was provisional. Some cult associations required membership for at least a year (P.Lond. 2710, from 69–57 B.C.E., in Klauck, *Context*, 50).

129. See Capper, "Context," 329; idem, "Acts 5.4." Evidence suggests that those who signed over their property did so with a legal document (Flusser, "Light on First Church"; cf. Cross and Eshel, "Ostraca").

130. Harrison, "Rites," 27.

131. Comparing both Pythagoreans and Essenes, cf. Capper, "Interpretation of Acts 5, 4"; idem, "Context," 337–39. Hamidovic, "Remarque," suggests that the couple retained rights over the usufruct after the donation; this would be problematic for the narrative as we have it, however, since it could hardly be kept secret.

132. BDAG (citing Xen. *Cyr.* 4.2.42; Polyb. 10.16.6; Plut. *Luc.* 517 [37.2]; *Arist.* 320 [4.3]; Jos. *Ant.* 4.274; *SIG* 993.21; P.Ryl. 116.10; 2 Macc 4:32).

withholding some of the proceeds.¹³³ Luke uses the term *νοσφίζομαι* nowhere but here (5:2–3; elsewhere in the NT only at Titus 2:10), but it does appear twice in the LXX, both times as sins against the community (2 Macc 4:32; Josh 7:1).¹³⁴ The former case concerned the theft of sacred vessels from the temple by one who also conspired to murder the high priest.¹³⁵ In the latter case, Achan's rebellion against God removed God's blessing, thereby bringing death to many others in the community (Josh 7:1, 5–13). The danger of the removal of God's blessing was serious enough to warrant Achan's own death (7:25–26); the evildoer in 2 Maccabees also ultimately died a disgraceful death (2 Macc 13:1–8).

The term itself probably implies more than theft; it seems to apply especially to “insiders” acting secretly when property does not belong to them.¹³⁶ Josephus employs the same term for retaining another's property in Deut 22:1–3 (Jos. *Ant.* 4.274); Polybius uses it for making sure the soldiers divide booty equally and no one holds some back (Polyb. 10.16.6; cf. also 6.21).¹³⁷ Reimer takes this to mean that the price of the field was no longer Ananias and Sapphira's in Acts 5:2, on the basis of their prior commitment.¹³⁸ In this case, members of the community had agreed that whatever they sold belonged to the community; their “free decision” (5:4) was made when they were entering the community.¹³⁹

This interpretation is possible, but 5:4 indicates that they retained authority over the wealth until they laid it at the apostles' feet. Perhaps this means simply that the wealth should have belonged to the community once sold, according to the official purpose for its sale (4:34), but that it still remained in their right legally (if not morally) to change their minds (openly, not deceitfully). If the community allowed tentative commitments like the Essenes and the Pythagoreans (which is uncertain), this would be possible. But it seems likelier, as argued above, that giving possessions was an ideal for those within the community rather than a requirement for entering it. Luke's wording may allow several reconstructions that vary on some details because he is more interested in the application than in satisfying our curiosity on all the economic arrangements. The economic particulars did not obtain in his Diaspora churches (though they provided a useful voluntary model; cf. 20:33–35); nevertheless, the summons for disciples to forsake possessions for God's purposes remained (Luke 14:33).

III. SPIRITUAL CONFRONTATION AND JUDGMENT (5:3–6)

Whereas some onlookers may have viewed Ananias's action as at worst merely selfish from a personal perspective, it was in fact Satan's activity to infiltrate the community with hypocrisy. Love of money might look outwardly righteous, but this behavior was detestable in God's sight (Luke 16:14–15).¹⁴⁰ God saw the sinful

133. BDAG (citing esp. Josh 7:1, 19–26; Diod. Sic. 5.34.3).

134. Commentators regularly note the Achan allusion here (e.g., Rackham, *Acts*, 65; Munck, *Acts*, 40; Bruce, *Commentary*, 110; Fitzmyer, *Acts*, 322; Bock, *Acts*, 221; Pervo, *Acts*, 130–31). Some (like Reimer, *Women*, 6–7) note both Achan and the 2 Maccabees allusion.

135. Alexander, “Comment(ary)ing,” suggests a parallel with the striking-down of Heliodorus for violating community sanctity in 2 Macc 3:27–28, close to the same context.

136. See Reimer, *Women*, 8; Fitzmyer, *Acts*, 322.

137. Reimer, *Women*, 7 (also noting the use for common property in the army camp in Xen. *Cyr.* 4.2.42; cf. Plut. *Luc.* 37; Athen. *Deipn.* 6.234; other texts, p. 8). Only in exceptional cases was keeping back some wealth accepted (Plut. *S. Kings*, Dionysius the Elder 13, *Mor.* 176C).

138. So Reimer, *Women*, 9.

139. *Ibid.*, 12–13.

140. Luke associates it with the Pharisees (Luke 16:14), just as he associates hypocrisy with them (Luke 12:1).

hearts; Peter thus confronts the problem spiritually, and Ananias, Satan's agent, pays the price.

(1) *Satan's Activity* (5:3)

Whereas others are filled with the Spirit (Luke 1:15, 41, 67; Acts 2:4; 4:8, 31; 9:17; 13:9, 52), Ananias is filled by Satan to lie to the Spirit (Acts 5:3)—though obviously ineffectively. Whereas Satan fills hearts to lie, God's Spirit fills believers to speak his genuine message (4:31).¹⁴¹ The conflict in the narrative thus goes beyond the level of Ananias and Peter to Satan and God's Spirit (cf. 2 Kgs 6:16–17; Eph 6:12).¹⁴² Although Judaism accepted God's sovereignty over Satan's limited sphere of activity,¹⁴³ it understood Satan's activity and motivation as hostile.¹⁴⁴

Early Judaism commented often on Satan (usually synonymous with the devil, Belial, Beliar, Mastema, and often Sammael)¹⁴⁵ and conceptualized his activity in several primary spheres.¹⁴⁶ First, Satan functioned as accuser, a role derived from Scripture (cf. Job 1:6–2:7; Zech 3:1–2).¹⁴⁷ Thus Satan might tempt (the second role) and then accuse the person who succumbed to temptation. Second, he functioned as tempter (cf. Luke 4:2; Matt 4:3; 1 Thess 3:5; 1 Chr 21:1).¹⁴⁸ Later rabbis underlined this role by telling of famous rabbis nearly deceived to destruction when Satan disguised himself as a beautiful woman.¹⁴⁹ Finally, he acted as deceiver (John 8:44), a category admittedly overlapping with tempter (temptation being the object of the deception).¹⁵⁰ The latter two roles are most relevant here, since Satan's agents attempt deceit (Acts 5:3–4) and try to “test” the Spirit (5:9).¹⁵¹ Despite God's sovereignty

141. Spencer, *Acts*, 56.

142. Dunn, *Acts*, 64. God's Spirit was incompatible with deception (*Sib. Or.* 3.701; cf. Titus 1:2), and some portrayed it as the spirit of truth in contrast to the spirit of error (1QS IV, 21–23; 4Q177 12–13 I, 5; *Test. Jud.* 20:1; cf. *Jub.* 25:14; *Test. Jud.* 14:8; 20:5; *Test. Sim.* 3:1; *Test. Reub.* 2:1 [in the context of 2:3–4]; *Test. Iss.* 4:4; further discussion in Keener, *John*, 969–71; on 1QS IV, 21–23, see Duhaime, “Voies”).

143. E.g., *Jub.* 10:8–9; 49:2; *Test. Job* 20:3. Sometimes a later text attributes to Satan something that an earlier text attributed to God's judgment, as if Satan is an agent of such judgment (2 Sam 24:1 with 1 Chr 21:1; Exod 4:24 with *Jub.* 48:2–3; cf. a Masada text vs. Exod 4:24; Eshel, “Mastema's Attempt”; to some extent, Gen 22:1 with *Jub.* 17:15–18).

144. Satan's absence yields peace and corresponds to the absence of evil (*Jub.* 23:29; 40:9; 46:2; 50:5).

145. See Elgvin, “Belial”; e.g., CD V, 18; VIII, 2; XIX, 14; 1QS II, 4–5; *b. Ber.* 60a; for “satans” (plural), see 1 En. 40:7; 65:6. In Luke-Acts, see Fitzmyer, *Theologian*, 146–74; particularly extensively, Garrett, *Demise*. In the form of Azazel, cf. Shea, “Azazel.” For a summary of some early Christian perspectives, see Arnold, “Satan.” Satan, God's subordinate, differs starkly from dualistic Zoroastrianism's Ahriman (Yamauchi, *Persia*, 460), but Jewish thoughts about Satan seem to have developed especially during the exile (1 Chr 21:1; Job 1:6–2:7; Zech 3:1–2).

146. On the diverse range of views, see Best, *Temptation*, 55.

147. Satan's acts of killing already make him more than a mere prosecutor in Job (Riley, “Devil,” 247), though the Hebrew employs “the satan” as a title. For Satan as accuser in subsequent sources, see, e.g., *Jub.* 1:20; 48:15, 18; 3 En. 14:2; 26:12; *Gen. Rab.* 38:7; 57:4; 84:2; *Exod. Rab.* 18:5; 21:7; 31:2; 43:1; *Lev. Rab.* 21:10; *Eccl. Rab.* 3:2, §2; Rev 12:10; in the plural, 1 En. 40:7. Cf. 4Q225 2 I, 9–10; the name “Satan” means “adversary” or (in legal settings) “accuser” (e.g., Breytenbach and Day, “Satan,” 726; Ladd, *Theology*, 49n15; pace Gershenson, “Satan,” who offers the alternative proposal “Titan”). Later rabbis said that he could not accuse on Yom Kippur (*b. Yoma* 20a; *Lev. Rab.* 21:4; *Num. Rab.* 18:21; *Pesiq. Rab.* 45:2; 47:4; though cf. *Tg. Job* 2:1).

148. E.g., CD XII, 2; 1QS X, 21; 4Q174 1 I, 9; 4Q225 2 I, 9–10; 11QS XIX, 15; *Jub.* 10:8, 11; 17:16; *Test. Reub.* 4:11; *Test. Jos.* 7:4; *Test. Iss.* 7:7; *Test. Ash.* 3:2; 3 Bar. 9:7; *b. B. Bat.* 16a; *Gen. Rab.* 70:8; *Exod. Rab.* 19:2; 41:7; cf. 1QS III, 24; *Gen. Rab.* 22:6; Eph 4:26–27; persecution in 2 Cor 12:7; 1 Pet 5:8; Rev 12:3–4, 13, 17; much later, cf., e.g., Qur'an 7.20.

149. *B. Qidd.* 81a (the apocryphal accounts involve R. Akiba and R. Meir; cf. the temptation in *b. Qidd.* 81b, although his wife takes the role of tester there); *y. Sabb.* 1:3, §5.

150. E.g., CD IV, 15–16; *Test. Benj.* 6:1; *Test. Dan* 3:6; *Test. Levi* 3:3; *Test. Jud.* 25:3; *Test. Job* 3:3/4; 3:6/5; 26:6/7; 27:1; Eph 6:11; 2 Thess 2:9; Rev 12:9; 20:8; much later, cf. Qur'an 43.62; 47.25; see discussion in Keener, *John*, 760–61.

151. At least in secular Greek, πειράζω normally refers to proving or testing, not specifically enticement to sin (Gibson, “Testing”). “Testing” a deity was an act of unbelief that warranted divine punishment (Xen. *Cyr.* 7.2.17).

over Satan, he was thought to be in deliberate rebellion against God¹⁵² and, in some sense, to rule the sinful world.¹⁵³

Satan was thought to move some people against others¹⁵⁴ or, by “filling” them (as here), inspire them to speak evil.¹⁵⁵ In some Jewish sources Satan targeted the righteous.¹⁵⁶ Thus Beelzebul sought to stir sinful desires in holy people and chosen priests (*Test. Sol.* 6:4); Dan sought to kill Joseph because one of Belial’s spirits was working in him (*Test. Dan* 1:7). (For Luke, Satan’s temptation does not, however, force anyone to act; it does not absolve Ananias or Sapphira of moral responsibility.)¹⁵⁷

The narrative thus highlights the danger of Satan’s direct testing and its effects on God’s community. After God anointed Jesus with the Spirit (Luke 3:22; 4:1), Satan tempted Jesus (4:2), but Jesus triumphed and emerged from testing still full of the Spirit (4:14, 18). Now that God has empowered the church with his Spirit afresh (Acts 4:31), Satan seeks to disrupt this community. Jesus triumphed in testing (Luke 4:1–14), but Satan entered Judas successfully (22:3)¹⁵⁸ as he now filled Ananias’s heart (Acts 5:3). Peter himself has been tested through Satan (Luke 22:31) but persevered (or was restored) through Jesus’s intercession (22:32), and now he is God’s agent of victory in this conflict. Apparently the standards of holiness were particularly demanding for a community experiencing dramatic spiritual life such as Acts depicts for the church after Pentecost.¹⁵⁹ Like Jesus in the wilderness, however, its members persevere.

(2) Lying to God (5:3–4)

The phrase in 5:4, “lied not to us,” does not literally mean that Ananias has not lied to Peter, but rather that the far more important issue, which Ananias has not realized, is that he has lied to God. This semantic construction may echo biblical prophets.¹⁶⁰ Lying to the Holy Spirit (Acts 5:3) is identified with lying to God (5:4). In an early Jewish context, the Spirit could be understood as God’s activity or agency; Christians at an early stage seem to have portrayed the Spirit at times as an entity within the one Deity.¹⁶¹ Peter’s knowledge of Ananias’s deceit is clearly portrayed as supernatural.

152. E.g., *L.A.E.* 12:1; *2 En.* 29:4–5 (expanded and late material); cf. Anderson, “Exaltation.” Views defending him (e.g., *b. B. Bat.* 16a) are rare.

153. E.g., *1QS I*, 18, 23–24; *II*, 19; *1QM I*, 1, 5, 13, 15; *IV*, 2; *XI*, 8; *XIII*, 2, 4, 11; *XIV*, 9; *XV*, 3, 17; *XVI*, 11; *XVII*, 15; *XVIII*, 1, 3; *4Q174* 1 I, 8; *4Q176* 13 I, 16; *4Q177* 12–13 I, 11; *1 John* 5:19; cf. perhaps *Col* 1:13. He was especially powerful (e.g., *3 En.* 14:2; *Asc. Is.* 2:4).

154. E.g., *1 Chr* 21:1; *Test. Sim.* 2:7; *John* 13:21, 27.

155. *Test. Job* 41:5/7; cf. the late *Apoc. Sed.* 5:4–5.

156. Besides examples below, note also the rabbis noted above in *b. Qidd.* 81a.

157. A point emphasized among patristic writers (Pelikan, *Acts*, 134, citing Theophylact *Exposition of Acts* 5:6; today, Marguerat, *Actes*, 175). Some had apparently used Satan’s activity to reduce the guilt of the patriarchs (*Test. Dan* 1:7).

158. On spirits entering mortals, in addition to Synoptic portrayals of demonization (Satan’s entrance being the ultimate example, *Luke* 22:3; *John* 13:27), see *Hom. Il.* 17.210–11; *Philost. Hrk.* 27.2.

159. Some popular literature today describes analogous “judgment” events in some communities experiencing intense religious revival (see Tari, *Wind*, 32–33, in Indonesia; Thollander, *Mathews*, 125, in India).

160. Cf. *Exod* 16:8; *1 Sam* 8:7; *Jer* 7:22–23; *Mark* 9:37, all cited (along with *Acts* 5:4) in Allison, *Jesus*, 105 (regarding a different point).

161. Most fully, in John’s Paraclete passages (see Keener, *John*, 962–71; idem, “Pneumatology,” 218–65, esp. 233–65); more generally, widespread trinitarian formulas (see esp. Fee, *Presence*, 839–42; Watson, “Identity”; in Paul, esp. *1 Cor* 12:4–6; *2 Cor* 13:14; *Eph* 4:4–6). The Spirit may function as a divine character or actor in Luke’s narrative (see *Acts* 8:39; 16:6–7; 20:23; Shepherd, *Narrative Function*, 255–56); but even if we may assume that Luke accepted the distinct identity of the Spirit as Paul seems to (and John certainly does), he nowhere makes this explicit (see Turner, *Power*, 41–44). Patristic writers often used the connection in *Acts* 5:3–4 in supporting the Spirit’s deity (Pelikan, *Acts*, 82–83, cites Basil *Holy Sp.* 12.28; 16.37; *Greg. Naz. Or.* 31.30; *Bede Comm. Acts* 5). See the brief discussion in Keener, *Acts*, 1:528.

Ancients usually associated such knowledge with deities,¹⁶² heroes,¹⁶³ and their agents.¹⁶⁴ Jewish readers and those who shared their Scriptures would naturally think of the prophetic tradition,¹⁶⁵ and the informed reader would think of Jesus's own prophetic ministry (e.g., Luke 6:8; 9:47; 10:13; 11:17; 21:6–36). Halfhearted commitment could be prophetically exposed (1 Cor 14:24–25).¹⁶⁶

Moralists sometimes noted that wrongdoing cannot remain concealed indefinitely.¹⁶⁷ This must be especially the case when God is involved (Num 32:23; 1 Cor 4:5; 1 Tim 5:24–25),¹⁶⁸ a point likely not lost on Luke's audience, including more well-to-do members such as Theophilus. Ancients called deities to witness the truth of their claims when they swore oaths by them; the assumption was that deities saw the truth, could not be deceived, and would avenge the honor of their name.¹⁶⁹

Under normal circumstances, both Gentiles¹⁷⁰ and Jews¹⁷¹ viewed lying negatively. Greeks opined that liars would be punished by the gods;¹⁷² Jewish tradition emphasized that the end for thieves and, worse yet, liars was destruction (Sir 20:25),¹⁷³ and elsewhere also emphasized punishment¹⁷⁴ and damnation for liars.¹⁷⁵ Ancient writers also sometimes assumed that some people could become habitual liars by nature (e.g., Babr. 57), so that even when they told the truth, they would not be believed (e.g., Phaedrus 1.10.1–3). Philosophers, naturally, opposed falsehood, emphasizing the importance of seeking truth;¹⁷⁶ they thus usually emphasized telling

162. Particular high deities were thought to know (e.g., Hom. *Od.* 4.468; 13.417; 20.75; Pindar *Pyth.* 3.28; Xen. *Cav. Com.* 9.9; Plut. *Isis* 1, *Mor.* 351E; Athen. *Deipn.* 5.218F; Mus. Ruf. 1, p. 32.17–18; Max. Tyre 3.1; Philost. *Hrk.* 16.4) and see (Hom. *Il.* 3.277; Hesiod *Theog.* 514; Aeschylus *Eum.* 1045; *Suppl.* 139, 210, 303–5; Ap. Rhod. 2.1123, 1133, 1179; cf. Aristoph. *Birds* 1058; Ovid *Metam.* 13.852–53) all things. Israel's God in Sir 39:19; Bar 3:32; Sus 42; *Let. Aris.* 210; *Sib. Or.* 1.151; 3.12; *1 En.* 9:5; 39:11; 84:3; CD II, 9–10; Jos. *Ag. Ap.* 2.181; *2 Bar.* 21:8; cf. *Tg. Ps.-J.* on Gen 3:9; 16:13; *Neof.* 1 on Gen 1:9; "God of knowledge" in 4Q504 4 4; 4Q510 1 2; 4Q511 1 7. See fuller discussion in Keener, *John*, 531–32.

163. Who knew more than mortals but less than deities (Philost. *Hrk.* 16.4); cf. the exorbitant claim for Caesar in Ovid *Pont.* 4.9.125–28; a hero in Philost. *Hrk.* 43.3. For philosophers, see Diog. Laert. 9.7.42; Eunapius *Lives* 468–70 (cf. also 495); for sorcerers, see PGM 1.175–77; Aune, *Magic*, 45; in some later traditions, some demons had foreknowledge (e.g., *Test. Sol.* 5:12).

164. E.g., Eunapius *Lives* 468 (though the agent appears as divine in *Lives* 470).

165. E.g., 1 Kgs 14:5; 2 Kgs 4:27; 5:25–27; 6:12, 32; *Jos. Asen.* 6:6; 23:8 (despite textual variants in 23:8, the context clarifies the sense); 26:6; *Liv. Pr.* Nathan 2 (Schermann, §28); *y. Hag.* 2:2, §5; *Sanh.* 6:6, §2; Joseph in *Tg. Neof.* 1 on Gen 41:45; Enoch in *2 En.* 40:1–2. Since lying to the apostles is automatically testing the Spirit, identification with the Spirit may exceed that of the prophets here (2 Kgs 4:27; Brown, *Apostasy*, 107).

166. Some miracle reports even today include the supernatural confrontation of hidden sins (Wimber, *Power Evangelism*, 33–34, 51–52) or other secrets of the heart (59; Keener, *Gift*, 51).

167. E.g., Isoc. *Demon.* 17; Diod. Sic. 14.1.1–2; Livy 3.36.1; Aul. Gel. 12.11.

168. Cf. Sir 11:27–28; *Sib. Or.* 3.258–60; *2 Bar.* 83:3; *b. Soṭah* 22b; *y. Soṭah* 7:5, §5; *Exod. Rab.* 8:2; *Num. Rab.* 9:12; 19:6; *2 Clem.* 16.3; though cf. *Pss. Sol.* 13:8. Cf., e.g., cases of adultery (Sir 23:21; *Lev. Rab.* 23:12; *Num. Rab.* 9:1).

169. E.g., Hom. *Il.* 1.273; 14.158; Exod 20:7; see comment on Acts 23:12. Lucian *Phal.* 1.1 subverts this convention (tongue in cheek but a theological skeptic, in any case).

170. E.g., *SIG* 3/985 (= LSAM 20), lines 12–15 (Klauck, *Context*, 66); Corn. Nep. 25 (Atticus), 15.1; Phaedrus 4.13; Plut. *Educ.* 14, *Mor.* 11C; Ps.-Plut. frg. 87; Diog. Laert. 1.60. This is common morality in many cultures (e.g., Mbiti, *Religions*, 277).

171. E.g., 1 Macc 7:18; Tob 7:10–11; Sir 7:12–13; *Let. Aris.* 206, 252; *1 En.* 104:9; 1QS X, 22; Jos. *Ag. Ap.* 2.79–80; *War* 2.141; *Sib. Or.* 3.38, 498–500; Ps.-Phoc. 7; *Test. Iss.* 7:4; *Test. Dan* 5:1–2; *b. Hul.* 94a (even to Gentiles).

172. Phaedrus 1.17.1.

173. Falsehood and theft also appear together in *t. B. Qam.* 7:8. Some Greeks opined that liars stole the understanding (*Rhet. Alex.* 1, 1422b.5–8).

174. E.g., *Sib. Or.* 3.500–503; for breaking one's word, *m. B. Meṣi'a* 4:2; *b. B. Meṣi'a* 49a.

175. E.g., *1 En.* 99:1; *Abot R. Nat.* 45, §§125–26 B; probably *b. Sanh.* 103a. For the eschatological destruction of deceit, see, e.g., *1 En.* 91:8.

176. E.g., Diog. Laert. 7.1.110.

the truth.¹⁷⁷ The better people prefer hearing truth to lying flattery.¹⁷⁸ Polemic often accused opponents of lying.¹⁷⁹

Philosophers¹⁸⁰ and other Gentiles¹⁸¹ did allow deception under some circumstances, as did pious Jews.¹⁸² For example, one might deceive an enemy at war (Xen. *Mem.* 4.2.14–15) or deceive someone into taking medicine necessary for health (4.2.17). Deception captured Troy, and it is also appropriate in catching traitors to protect the state (Sen. E. *Controv.* 10.6.2). Even philosophers could lie, an orator noted, to persuade a judge to do justice.¹⁸³ No moralists, however, approved deception merely to conceal and support one's wrongdoing. Also, whereas pagan deities might lie,¹⁸⁴ the same was never said of Israel's God.¹⁸⁵

Those who lied about their property (ןן) when entering the Qumran community would be excluded from full participation in the community for a year and deprived of a quarter of their food allowance (1QS VI, 24–25).¹⁸⁶ Lying to God, by contrast, was much more severe.¹⁸⁷

(3) Ananias's Death (5:5)

Jesus "breathed his last" when he died (Luke 23:46); this similar description here could imply a contrast between honorable and dishonorable death, but may simply represent a familiar way of depicting death.¹⁸⁸ The precise expression, however, appears in Acts 12:23, where another enemy of the church dies.

That Acts reports a miracle of judgment would have concerned Luke's audience less

177. E.g., Arius Did. *Epit.* 2.7.11m, pp. 92–93.27–31; Marc. Aur. 9.1.2; Philost. *Ep. Apoll.* 83. Sometimes, however, they were accused of falsehood (e.g., Lucian *Runaways* 19, against Cynics).

178. E.g., Dio Chrys. *Or.* 4.15.

179. E.g., Lysias *Or.* 4.13, §101; Cic. *Rosc. com.* 16.46; cf. further, on the liar charge in polemic, Keener, *John*, 761–62.

180. E.g., Epict. *Diatr.* 4.6.33; Arius Did. *Epit.* 2.7.11m, pp. 92–93.31–35.

181. E.g., *Orph. H.* 14.8. In the epic period, deception for useful purposes could indicate cleverness (Hom. *Od.* 19.164–203, esp. 203; Gen 27:19, 24; 30:31–43), though Odysseus's cleverness (e.g., Soph. *Philoc.* 54–55, 107–9, called "wisdom" in 119, 431) appears unscrupulous to some ancients (Soph. *Philoc.* 1228). See Keener, *John*, 708.

182. Jdt 9:10, 13; *Test. Jos.* 11:2; 15:3; 17:1; (perhaps) 13:7–9; *t. Ta'an.* 3:7–8; Exod 1:19; 1 Sam 16:2–3; 21:2, 5, 8, 13; 2 Sam 12:1–7; 17:14; 1 Kgs 20:39–41; 22:22; 2 Kgs 8:10; 2 Chr 18:22; Jer 38:27; probably 2 Kgs 10:19. Especially on Judith, see deSilva, "Lies."

183. Quint. *Inst.* 2.17.27. Quintilian further notes (12.1.38–39) that deception to prevent assassination or to save one's nation is ethical, but he does also note that not all circumstances allow this (12.1.40).

184. E.g., Hera's false oath in Hom. *Il.* 15.36–44; Rhea's good lie in *Orph. H.* 14.8. Zeus keeps his promise to Hera yet circumvents truth in Diod. Sic. 4.9.5.

185. E.g., *Sib. Or.* 3.701; *Jos. Ant.* 3.308; Titus 1:2; Heb 6:18; 1 *Clem.* 27.2; *Pesiq. Rab.* 14:4. More philosophic Gentiles refrained from attributing sin to deity (Dion. Hal. *Ant. rom.* 1.77.3; Sen. Y. *Ep. Lucil.* 95.49–50); for limitations on deity, see, e.g., Pliny E. *N.H.* 2.5.27; likely Porphyry in Mac. Magn. *Apocrit.* 4.24.

186. Often pointed out in connection with this passage; e.g., Capper, "Context," 340; Reimer, *Women*, 18–19. Sages generally simply expected God to punish those who lied about needs (*'Abot R. Nat.* 3 A).

187. With, e.g., Yamauchi, *Stones*, 138; on lying to a deity, see, e.g., Epid. inscr. 7 (noted below). Such a lie violated biblical rules concerning vows (Num 30:1–2; Deut 23:21–23; cf. Mark 7:11–12; 1QS VI, 24–25; Dunn, *Acts*, 63). Some scholars believe that exclusion from the community could also lead to death in view of the oath not to accept food from outsiders (*Jos. War* 2.143; Reimer, *Women*, 19), but such vows would most likely be annulled outside (see comment on Acts 23:12). Pervo, *Acts*, 133, compares lying to God here with "battling God" in Acts 5:39.

188. One breathed out (e.g., Hom. *Il.* 13.654, ἀποπνεύων; Eurip. *Phoen.* 1454, ἐξέπνευσαν; *Herac.* 566, ἐκπνεύσαι) one's life, or "breathed" (*exanimatus est*) one's last (Corn. Nep. 15 [Epaminondas], 9.3); for breathing out one's spirit or its departure in other ways as a means of depicting death, see Ovid *Metam.* 10.43 (*exhalata anima*); Vell. Patern. 2.14.2 (giving up *spiritus*); Ps.-Callisth. *Alex.* 1.14; *Test. Ab.* 17 A; *L.A.E.* 45:3; 2 *En.* 70:16; cf. Jas 2:26. In Luke-Acts (and earliest Christian literature, though cf. LXX Judg 4:21; Ezek 21:12), the specific term appears only here and in Acts 12:23; pace Hobart, *Medical Language*, 37, it is not a distinctively medical term (see LXX Judg 4:21; Ezek 21:7).

than it does many modern readers.¹⁸⁹ Those familiar with biblical stories recognized that God had struck others dead for similar offenses, usually for profaning what was sacred to the Lord. Thus Uzzah was struck dead for touching the ark (2 Sam 6:6–7; 1 Chr 13:9–10; cf. those who looked inside in 1 Sam 6:19); the Korahites were swallowed by the earth for challenging Moses and breaking the peace of the community (Num 16:30–33); those who threatened Elijah (2 Kgs 1:10, 12) or mocked Elisha (2:23–24) faced sudden deaths; Aaron’s sons died for offering alien fire on the holy altar (Lev 10:1–2); others in Moses’s time also died “miraculously” for rebellion (Exod 32:35; Num 14:37; 16:35; 21:6; 25:9), leaving a holier remnant. A number of judgment miracles also appear in both pagan¹⁹⁰ and postbiblical Jewish tradition.¹⁹¹ Sometimes they involved judgment for lying to a deity¹⁹² or his agent (2 Kgs 5:27). Later Jewish haggadah often reported rabbis efficaciously pronouncing judgment,¹⁹³ sometimes disintegrating evildoers with their eyes.¹⁹⁴

Achan was executed for hoarding wealth devoted to destruction. Similarly, Greeks knew of one people who reportedly executed farmers who kept back any of their harvest instead of bringing all of it to the community storehouse (Diod. Sic. 5.34.3).¹⁹⁵ Such accounts reflect an even broader and more widespread ancient understanding that the community takes priority over individuals when the interests of the two conflict.¹⁹⁶

Anthropological literature documents suffering and deaths caused by curses,¹⁹⁷ possibly due to extreme terror.¹⁹⁸ Some scholars suggest death by terror here,¹⁹⁹ though on the historical level it strains reasonable probability to suppose that both Ananias and Sapphira independently and immediately expired simply from the natural trauma of Peter’s words. In the narrative, Peter’s words are not actually a curse but a prophecy

189. In ancient texts, “even punitive miracles” were accepted as long as one did not seek “personal advantage” (Reimer, *Miracle*, 247); such reports expressed “the longing for justice” (Pervo, *Acts*, 52, though he disapproves [131–35] of the theology). Ancients expected judgments for impiety (e.g., Hermog. *Inv.* 3.5.146) and desecration of holy space (see comment on Acts 19:37). For judgment in Acts, see Morris, *Cross in New Testament*, 112–13.

190. Epid. inscr. 11 (Theissen, *Miracle Stories*, 109–10); Lucian *Lover of Lies* 20; Aelian *Nat. An.* 11.17 (Havelaar, “Acts 5.1–11 and Interpretations”); Dion. Hal. *Ant. rom.* 3.4.4 (though cf. 3.5.1–2); Val. Max. 1.1.16–21; 1.1.ext. 1–9.

191. *M. Soṭah* 3:4; see further Theissen, *Miracle Stories*, 110; Eve, *Miracles*, 268–69.

192. E.g., Epid. inscr. 7 (in Grant, *Religions*, 57–58), where one received another’s brand marks.

193. E.g., *Sipra Sh. M.d.* 99.5.6; *y. Šeb.* 9:1, §13 (38d).

194. E.g., *b. B. Bat.* 75a; *B. Qam.* 117a; *Yebam.* 45a; *Pesiq. Rab Kah.* 18:5; cf. *b. B. Meši’a* 85a.

195. Spencer, “Approaches,” 399; idem, *Acts*, 57.

196. Spencer, “Approaches,” 399.

197. See, e.g., Prince, “Yoruba Psychiatry,” 91; Dawson, “Urbanization,” 328–29; Mbiti, *Religions*, 258; cf. Remus, *Healer*, 110; Welbourn, “Healing,” 364; voodoo and taboo deaths in Benson, *Healing*, 40–41; Frank, *Persuasion*, 39–42; esp. Knapstad, “Power,” 84, 89. Most people in the ancient Mediterranean world also accepted the efficacy of curses (e.g., Aeschylus *Lib.* 912; *Seven* 70, 656, 695–97, 709 [it was irresistible; see 692–711, 725–26, 833–34]). Widespread beliefs in curses’ efficacy appear in rural Africa (e.g., Azevedo, Prater, and Lantum, “Biomedicine”; Lienhardt, “Death”) but also in sixteenth- and seventeenth-century Netherlands (see Waardt, “Witchcraft”) and in some parts of the West more recently (e.g., Sebald, “Witchcraft”).

198. Cf. the “nocebo effect,” the negative opposite of the placebo effect (in Beauregard and O’Leary, *Brain*, 145–47; Benson, *Healing*, 39, 53, 59, 63); sudden deaths from emotive trauma in Engel, “Death” (as cited in Benson, *Healing*, 42; cf. Weisman and Hackett, “Predilection,” in Benson, *Healing*, 53; Phillips, Van Vorhees, and Ruth, “Birthday,” in Benson, *Healing*, 62; Adler, “Pathogenesis,” in Benson, *Healing*, 85). Other elements, such as dehydration, may also play a role (Eastwell, “Voodoo Death,” 5).

199. Dunn, *Acts*, 64; Witherington, *Acts*, 218. Luke does not emphasize overtly miraculous elements here, but Hellenistic historians often played these down, in any case, at least on the surface of their narration. That events occur today that witnesses construe as judgment warns against hasty dismissal of a tradition of judgment in ancient Jerusalem.

or pronouncement of a divine verdict.²⁰⁰ That fear fell on others afterward (Acts 5:5, 11) is not surprising (cf. 2:43; 9:31; 19:17); on this phenomenon, see comment on Acts 5:11.

(4) Ananias's Immediate Burial (5:6)

Covering²⁰¹ the corpse after death was an act of respect; even before one had official shrouds for an expensive burial (which is not envisioned here despite Ananias's social status),²⁰² one would cover a corpse to preserve the deceased's dignity.²⁰³ That "young men" handled the body (5:6, 10) might allude to the biblical mention of those who had to remove the corpses of the priests struck dead for profaning the sanctuary (Lev 10:4–5), though the passage lacks the particular terms found here.²⁰⁴ It might, however, simply reflect their supportive role (cf. Acts 7:58; Luke 22:26; 1 Pet 5:5) and strength (cf. Prov 20:29; 1 John 2:14).²⁰⁵ That they "carried him out" (5:6; cf. also 5:10) ironically recalls how he "brought" (a cognate verb) some of the money (5:2).

Why was the burial so sudden that even Sapphira (three hours later) proved unaware of it (Acts 5:7)?²⁰⁶ Jewish custom required the rapid burial of corpses, and tradition claims that Jerusalem custom demanded it on the day one died.²⁰⁷ As Safrai notes, "Leaving a corpse unburied through the night, for any reason, was considered to be sinfully disrespectful, and was permitted only if more time was needed for the preparation of shrouds or a coffin."²⁰⁸ Tradition, however, also demanded the involvement (and certainly the notification!) of family. That the narrative suggests the events happened otherwise may imply the degree to which the church became a new household (and hence a center for distributing resources; Luke 18:29–30);

200. Conzelmann, *Acts*, 38 (contrasting even pronouncement of judgment in Acts 13:11); Fitzmyer, *Acts*, 324; both citing Jerome *Ep.* 130.14.5–6 (who responded to Porphyry; cf. perhaps Mac. Magn. *Apocrit.* 3); Witherington, *Acts*, 218.

201. Συοτέλλω bears various meanings, but by far the likeliest with a corpse is "wrap" or "shroud" (LSJ; Barrett, *Acts*, 269, citing Eurip. *Tro.* 378; cf. Hobart, *Medical Language*, 37–38).

202. For expectations of costly burials, see, e.g., Cic. *Fam.* 4.12.3; Statius *Silv.* 2.1.157–62; *Apoll. K. Tyre* 26; but those advocating simplicity opposed these (e.g., Iambl. *V.P.* 27.122–23).

203. E.g., Livy 3.18.9. It was honorable to cover the face of a person about to die (Esth 7:8; Eurip. *Hipp.* 1458; Livy 1.26.11; 4.12.11; Sil. It. 11.257–58; Dio Cass. 42.4.5; cf. Livy 3.49.5; 23.10.9; Cic. *Verr.* 2.5.28.72; 2.5.60.157), as with, e.g., Caesar (*Appian Bell. civ.* 2.16.117; Plut. *Caes.* 66.6–7; Suet. *Jul.* 82) and Polyxena (Eurip. *Hec.* 432–33; Ovid *Metam.* 13.479–80). For similar reasons of honor, ancients would close a person's eyes once dead (Hom. *Od.* 11.426; Val. Max. 2.6.8).

204. So Dunn, *Acts*, 64; Sapphira's name might (though need not) link her with the priestly aristocracy (but if Luke knew of this connection, it might have suited his overall *Tendenz* to mention it). Less relevant, Johnson, *Acts*, 89, cites the young men who took Rahab from the city (Josh 6:23).

205. For Luke's usage of these and cognate terms, cf. further Acts 2:17 (young men empowered by God); 23:17–18, 22 (used to rescue Paul); 20:9 and Luke 7:14 (one himself dead but raised; cf. Acts 20:9–12). Their supportive role appears frequently (e.g., Exod 24:5; Num 11:27; Josh 2:1, 23; 6:21–23; 1 Sam 20:22, 37; Dan 1:10). One may compare prophets' younger attendants (e.g., Exod 24:13; 33:11; 2 Kgs 3:11; 4:38), and a prestige given to Peter normally accorded only to traditional teachers (cf. Acts 22:3). Spencer links them with the ancient stereotype of young men's proclivity toward violence ("Young Man," esp. 39; citing esp. the OT, 4 Maccabees, and Josephus; see comment on Acts 7:58), since they are not said to mourn the violence (pp. 40–41). This is, however, a weak argument from silence; neither does Peter explicitly lament here, and whereas David protested Uzzah's death (2 Sam 6:8), Moses did not lament that of Korah's company in Num 16:31–40 (though others do, 16:41).

206. A reasonable objection to the narrative's realism (Conzelmann, *Acts*, 38); but cf. below on ancient associations often attending to members' burials. If Ananias had been missing three hours and (as the narrative indicates) Sapphira knew where he was going, it is not surprising that she would come looking for him.

207. Safrai, "Home," 774, cites *t. Neg.* 6:2; *'Abot R. Nat.* 35 A; 39 B; *b. B. Qam.* 82a. Le Cornu, *Acts*, 268, notes that the bier should be simple (*t. Nid.* 9:16).

208. Safrai, "Home," 774 (citing *m. Sanh.* 6:5; *Sem.* 11:1); cf. Le Cornu, *Acts*, 270. Cf. also how far mourning procedures have advanced in Luke 8:52, immediately after death (8:41–42, 49; the small size of Capernaum [cf. 8:40] or towns like it prohibit a burial's lengthy delay due to travel if the same town is envisioned, as in 8:41).

it also could suggest one reason that the apostles became an alternative leadership within Jerusalem, inviting the “envy” of Jerusalem’s political elite (Acts 5:17).

Where family members were not available (and the couple’s contribution might suggest that they had no children), a community to which one had entrusted oneself would be involved (Mark 6:29). Those who had given everything to the church presumably lacked property and hence would need to be buried by the church (compare the practice of the Qumran community). Ananias may not have given everything, but his covenant with the community presumably left the community with responsibility for his body; here we may compare ancient burial associations.²⁰⁹ The burial place was presumably the land of someone else in the church, since believers shared their property (Acts 2:44–45) but most contributions to the church were in money (4:34, 37; 5:1).²¹⁰

That Luke mentions no lamentation after burial may be significant in view of the contrast with 8:2 (where such mourning may even have been dangerous). The primary delay in a burial was to allow for brief mourning first (though most of the mourning period followed burial);²¹¹ this burial’s immediacy might stress, more clearly than Luke’s silence, that no public mourning occurred.²¹² Mourning was normally withheld or forbidden only in the case of enemies or criminals (see discussion under Acts 8:2), indicating the moral status of Ananias. Those who joined such a holy community must also be willing to be judged by its strict standards. Nevertheless, the Christians did not withhold burial; whereas ancient rulers sometimes forbade burial for heinous offenses, ancient literature generally considered more honorable those who granted burial (see comment on Acts 8:2). Biblical law expected burials for everyone (e.g., Num 11:34; Deut 21:23; Josh 7:26; 8:29; 10:26–27).

IV. SAPPHIRA’S LIE AND JUDGMENT (5:7–10)

Sapphira was privy to the plot and shared its promised gain, like Achan’s family (clear from his burial of the loot under their tent, Josh 7:21–22). Like Achan’s accomplices (7:24–25), therefore, Sapphira would share her husband’s penalty if she persisted in denying the truth she knew about (Acts 5:2).²¹³ Women were executed in antiquity, though far less often than men (perhaps because they were generally held to pose less of a threat; see discussion at Acts 8:3; 9:2). Sapphira is given opportunity to tell Peter the truth (with his question perhaps suggesting to her his suspicion),²¹⁴ thus taking the side of God’s agents rather than her deceitful husband. Nevertheless, she refuses the opportunity (cf. Gen 4:9; 2 Kgs 5:25–26).

Peter warns that they conspired to “test” God’s Spirit and now must witness the terrible result, since God could not be deceived (Luke 16:15).²¹⁵ In Luke-Acts, Satan

209. On which see, e.g., Smith, *Symposium*, 104. Although burial may have been a secondary function of associations in this period (Harrill, “Asia Minor,” 136), it remained a function.

210. Burying another in one’s own tomb displayed special affection or commitment (cf. 1 Kgs 13:30–31; Matt 27:60).

211. Cf., e.g., Eurip. *Alc.* 336; Plut. *Coriol.* 39.5; Sir 22:12; Jdt 16:24; further discussion in Keener, *John*, 842–43, 848.

212. Cf. Larkin, *Acts*, 86. This may fit the special situation of those struck by divine decree (Lev 10:1–5; Josh 7:25; so Witherington, *Acts*, 217, and Bock, *Acts*, 224, following Derrett, “Ananias, Sapphira,” 198).

213. Attempts to cover one’s behavior could be seen as an admission of guilt (Mus. Ruf. 12, p. 86.19–20).

214. Though Haenchen, *Acts*, 238–39, sees the question only as a strategy “to make her complicity plain to the reader,” her complicity is already suggested by Acts 5:2. Pervo, *Acts*, 131, compares Peter’s questions in 5:3–4, 9, to Joshua’s in Josh 7:25 (though the wording is not close).

215. Strelan, *Strange Acts*, 199, parallels Hdt. 6.86, where one who has wrongly kept money is accused, at Delphi, of “testing the deity” (τὸ περιηθῆναι τοῦ θεοῦ) and lacked descendants. This example illustrates the intelligibility of such an account to an ancient audience.

“tempts” Jesus (4:2), as do his human opponents (11:16), but the church also later risks “testing” God by holding to its traditions (Acts 15:10).²¹⁶

Distress tested one’s character to see if one would sin;²¹⁷ suffering was thus often testing.²¹⁸ Enemies could test martyrs’ faith by torture.²¹⁹ God would try his people;²²⁰ he would also test particular individuals²²¹ through their sufferings, such as martyrs²²² or whoever wished to serve the Lord.²²³ God would also rescue his servants in their testing;²²⁴ his purpose in testing was not the hope that one so tested would fall, because he did not want people to sin.²²⁵ The same person could experience testing as being from God²²⁶ or Satan²²⁷ in the same context, because Satan was subject to God’s rule. Major examples of testing were Abraham²²⁸ and Israel in the wilderness.²²⁹ Testing God, by contrast, was a serious offense (cf. 15:10),²³⁰ and one could do this, for example, by breaking God’s commandments²³¹ or acting in a way that displayed unbelief.²³² A prototypical instance of this in Scripture was Israel’s testing God in the wilderness (Exod 17:2, 7; Deut 6:16; Pss 78:18; 95:9).

Sapphira’s falling to her death at Peter’s “feet” (Acts 5:10) contrasts starkly with the couple’s pretended submission of part of their property at the apostles’ feet (5:2).²³³ The couple pretended submission earlier; now they offer it involuntarily in death.²³⁴ Just as God here judges both a man and a woman (both share moral responsibility; cf. Acts 13:50; 2 Chr 15:13), both men and women believe in the continuing revival (Acts 5:14; a Lukan emphasis, cf. 2:18; 8:12; 16:13–14; 17:4, 12).

V. OTHERS OBSERVED AND FEARED (5:11)

Luke elsewhere speaks of fear falling on all in response to God’s works (e.g., Luke 1:12, 65; 2:9; 5:26; 7:16; 8:37; Acts 19:17), a familiar phrase.²³⁵ More broadly,

216. The use of the verb in Acts 9:26; 16:7; and 24:6 means simply “attempt.”

217. 1QS XI, 13 (in the context of XI, 9–22).

218. *Pss. Sol.* 16:14.

219. So 4 Macc 9:7.

220. E.g., Deut 13:1; Judg 2:22; 3:1, 4; 7:4; Isa 48:10; Jer 20:12; Zech 13:9; Jdt 8:25; 1 Pet 1:7; 4:12; Rev 2:10; for Israel in the wilderness, see, e.g., discussion in Sheriffs, “Testing,” 832–33. Some rabbis observed that God tested only the righteous, not the wicked (*Gen. Rab.* 55:2). But in 3 Macc 2:6, God tested Pharaoh.

221. Cf. Joseph in Ps 105:19; Hezekiah in 2 Chr 32:31; the righteous in Wis 3:5; Sir 2:5; also *Sen. Y. Dial.* 1.4.8: God counts worthy those whom he tests, to see how much human nature can endure (cf. 1.1.6).

222. So Wis 3:5–6 (using ἐπίρασεν in 3:5 and ἐδοκίμασεν in 3:6, the latter for refining like gold in the furnace); cf. 4 Macc 17:12.

223. So Sir 2:1.

224. So Sir 36:1. He would deliver them after first allowing their brief testing (*Test. Jos.* 2:6).

225. E.g., Sir 15:11–12, 20; cf. Mark 10:21. He could test mortals as a teacher tests students (*Philo Creation* 149) or test the righteous as a parent warns a child (*Wis* 11:10).

226. E.g., *Jub.* 17:17; 4Q225 2 I, 10–13.

227. E.g., *Jub.* 17:15–18 (who suggested the idea, although God chose to implement it); 4Q225 2 I, 9–10. Cf. angels in *Jub.* 19:3.

228. Esp. in Gen 22:1, where it is explicit in Scripture; e.g., Jdt 8:26; *Jub.* 17:16–18; Heb 11:17; *Num. Rab.* 17:2; cf. further Sir 44:20; 1 Macc 2:52. On other occasions, e.g., *Jub.* 19:8 (Abraham’s ten testings; cf. *Num* 14:22); *Num. Rab.* 14:11 (also Abraham’s ten testings).

229. E.g., Exod 16:4; 20:20; Deut 8:2, 16; Heb 3:9; Wis 10:10; 11:9; cf. Katzin, “Testing,” on 4Q171.

230. E.g., Mal 3:15; Jdt 8:12–13; Wis 1:2.

231. E.g., *Test. Mos.* 9:4.

232. E.g., Jdt 8:12–13.

233. Lake and Cadbury, *Commentary*, 52, see “the feet” in Acts 5:9 as a Semitism; if their evidence (1 Kgs 18:41 LXX) is not convincing, falling dead at someone’s feet was certainly a biblical expression of triumph (Judg 5:27; 2 Sam 22:39; Ps 18:38). Falling at someone’s feet also signified submission (1 Sam 25:24; 2 Kgs 4:37; Esth 8:3).

234. Cf. also Johnson, *Acts*, 89; Fitzmyer, *Acts*, 325; Rev 3:9.

235. The language of fear falling on people may echo biblical language (e.g., Exod 15:16; Deut 2:25; Josh 2:9; 1 Sam 11:7; Jdt 2:28; 1 Macc 7:18; cf. Gen 9:2; Rev 11:11), though having “the fear of Heaven upon” one

Luke speaks of everyone feeling awe (Acts 2:43), the church²³⁶ continuing in fear (9:31), individuals fearing (Luke 1:12), amazement coming on all (4:36), and, most broadly of all, in simple summaries, God's message growing everywhere (4:37).

Traditional Romans opined that one reason for punishing a crime was to set an example and prevent others from committing the same crime (Aul. Gel. 7.14.4); Jews agreed (3 Macc 7:14–15, where they executed apostates).²³⁷ Deuteronomy likewise decreed punishments for their deterrent value (Deut 13:11; 17:13; 19:20; 21:21), and later Jewish sources echoed this tradition (11QT LXI, 10–11; cf. 1 Tim 5:20). When pagan deities executed judgment, word spread and people revered the deities more (Ovid *Metam.* 6.146–47 [cf. 6.139–45], 313–15). In the Bible, when judgment miracles occurred, people also feared (Num 16:34).²³⁸

4. Apostles' Honor and Signs (5:12–16)

Such summary sections (see comment on Acts 2:42–47; cf. also, e.g., Acts 4:32–35) are useful for reinforcing Luke's themes, as in other literature (including depictions of sectarian movements).²³⁹ This section also picks up the thought of 4:33 (after the digression of 4:36–5:11, which illustrated the thought of 4:34–35).²⁴⁰

a. The People Revere the New Movement (5:12–14)

Because of continuing signs (5:12), the people of Jerusalem respect the apostles and their movement (5:12–13). This makes the apostles even less easy for the aristocrats to target (4:21; 5:26) but even more of a perceived threat to their power (5:28). The apostles' honor is increased by the growing healing ministry in 5:14–16. Their mounting popularity will ultimately provoke the leaders to intervene before the apostles can become still more powerful (5:17).

I. SIGNS THROUGH THE APOSTLES' HANDS (5:12)

For Solomon's Portico, see comment on Acts 3:11. The continuing use of this site probably suggests that the apostles viewed the temple as the appropriate place for an end-time renewal of Israel (for their likely pro-temple views, see comment on Acts 2:46).²⁴¹ As in an earlier summary (2:46), they continued to meet in the temple (the conflict over the temple arising only in 6:13–14).²⁴² For being in one accord or of one mind, see comment on Acts 2:46. The unity (*ἁποθυμαδόν*) reported in 5:12b is

(*m. 'Ab* 1:3) was positive. As God put the fear of Israel on others (Gen 35:5; Exod 23:27), so Greek deities could cause combatants on one side to panic (Hom. *Il.* 16.656–58; *Od.* 14.268–70); in the ancient Near East, see, e.g., Carpenter, "Deuteronomy," 436.

236. In Acts, the "church" first appears by this designation in 5:11 and then especially in Acts 8, suggesting a development in this contextualization (see Trebilco, "Self-Designations," 42–45, 49). The designation did arise in Judea early (Gal 1:22), but just not at the very beginning (42). Trebilco suggests (42–43) that it probably originated with the Hellenists in Jerusalem, and (44) Luke is avoiding anachronism. This is not to deny the possibility that Jesus had used this language (Matt 16:18; 18:15–21; see discussion in Keener, *Matthew*, 427–28), but to suggest that it took time for his followers to welcome it as a chief title.

237. Cf. also shaming people by assigning appropriate texts for public reading (*t. Kip.* 4:12).

238. This is also the reported effect in modern accounts (e.g., Thollander, *Mathews*, 125).

239. See comment on Acts 2:42–47; cf. Joubert, "Gesigpunt"; Sterling, "Athletes of Virtue."

240. Boismard and Lamouille, *Actes*, 2:48, see Acts 5:12b–13 as a transitional summary concluding the long episode that began in 3:1.

241. See Dunn, *Acts*, 65.

242. Though cf. Kisirinya, "Re-interpreting" (who argues that the early summaries progressively move away from the temple).

presumably that not only of the apostles but of the entire movement they were leading, as in 1:14 (though the movement was smaller there), 2:46, and 4:24.

For signs and wonders, see the commentary introduction.²⁴³ Here the thought matches the signs after the first outpouring of the Spirit (2:43); already suggested for the second outpouring (cf. 4:33), signs become explicit here.²⁴⁴ Just as the signs after the first outpouring were accompanied by a specific example (3:1–10), which included a moral about the greater value of God’s power than that of human wealth (3:6), so the sharing of possessions at the second (4:32–35) was accompanied by concrete examples (4:36–5:10), one of which included signs that brought fear (5:5, 10–11; cf. 2:43). Now, however, Luke has returned to summarizing the many miracles.

The mediating (διὰ) use of the apostles’ “hands” (cf. 2:23; 11:30; 15:23; often in the LXX, e.g., Ezek 38:17) may be idiomatic, but it also follows the biblical tradition where God used the “hands” of his agent (Exod 14:16, 21, 26–27), though it remains clear that God did the work (Exod 14:21, 27; Acts 7:25). (Gentile traditions may also be relevant for some parts of Luke’s audience, although they are not as close.)²⁴⁵ More specifically, it presumably envisions the apostles touching people to communicate God’s power (Luke 4:40; 13:13; Acts 8:17–18; 9:17; 19:6; 28:8; in contrast with a negative kind of laying on of hands, Acts 4:3; 5:18).²⁴⁶

II. RESPECT FOR THE APOSTOLIC MOVEMENT (5:13–14)

Ananias and Sapphira, wanting to both belong to God’s holy community and retain their own interests, had risked infiltrating the community with Satan’s agendas (5:3). God’s decisive action against them guarded the community’s sanctity, preventing others from joining the community (5:13) except those who were true believers (5:14, like Ananias and Sapphira, both men and women).

Clearly, outsiders’ fear of association comports with respect (5:13b). What does “associate” (κολλᾶσθαι) mean? The verb applies to any sort of cleaving (Luke 10:11; cf. Rom 12:9; 2 Kgs 3:3; 5:27; Bar 1:20; 3:4), whether a higher (such as becoming a dependent worker in someone’s household, Luke 15:15; cf. Ruth 2:8)²⁴⁷ or a lower level of attachment (such as simply joining with another’s chariot, Acts 8:29). Closer to the particular sense here would be the association with Gentiles that would be avoided by Jews (for different reasons, Acts 10:28; cf. 1 Kgs 11:2) and especially the act of becoming a believer and adherent to the Christian faith (Acts 17:34).²⁴⁸

Does the crowds’ fear of association refer to associating with the apostles (5:12a) or to associating with the entire assembly of believers (5:12b)? In favor of fearing to associate with the apostles, their works inspired awe (5:12a), including the fear based on the fate of Ananias and Sapphira (5:11).²⁴⁹ Thus the crowds would not dare

243. Keener, *Acts*, 1:537–49 (on Luke’s theology of signs); cf. also 320–82.

244. For a comparison among Luke’s miracle summaries (as in Acts 2:43), see Lindemann, “Einheit,” 248–50.

245. Gentile traditions sometimes associated healing with particular parts of persons’ bodies (Pliny E. *N.H.* 7.20; 28.6.34). Some cured by touch (28.6.30, for snakebites) or presence (28.6.31), although “hands” in general stood for crafts or writing (or speeches; Artem. *Oneir.* 1.42).

246. Yamauchi, “Magic?,” 135–36, compares modern emphasis on the therapeutic value of touch; if this principle is too far afield, so perhaps are associations with Hellenistic magic (cf. the use of physical contact in prior biblical tradition, e.g., 1 Kgs 17:21; 2 Kgs 4:34). For Chrys. *Hom. Acts* 14, the laying on of human hands (in ordination) mediates God’s touch (Pelikan, *Acts*, 95).

247. Also marriage (1 Esd 4:20; Matt 19:5; cf. Tob 6:19) or immoral sexual unions (Sir 19:2; 1 Cor 6:16–17).

248. It also applies to “cleaving” to the Lord (Deut 6:13; 10:20; 2 Kgs 18:6; Ps 63:8 [62:9 LXX]); Jer 13:11; Sir 2:3) and political allegiance (2 Sam 20:2; 1 Macc 3:2; 6:21).

249. Johnson, *Acts*, 95.

seek to emulate their authority or originate rival factions.²⁵⁰ Those who challenged Moses's authority suffered terrible deaths (Num 16:10, 27, 32, 40) or other judgments (12:8–10), and other passages in Acts demonstrate that power seekers marginally acquainted with the faith tried, and failed, to imitate apostolic power (Acts 8:18–24; 19:13–16). One may compare the tradition about people's awe of Moses's glory (Exod 34:30), though Paul contrasts this external glory with the greater internal glory of apostolic ministry (2 Cor 3:7–18). Pagans also recognized some holy persons who were closer to deities than were others (e.g., Statius *Silv.* 3.3.64–66).²⁵¹

According to this view, even other Christians might fear associating with the apostles.²⁵² Pythagoras divided his students into “probationers” and “advanced students” because not all were of equal merit (Iambl. *V.P.* 18.80–81), and reportedly only the highest order of disciples had access to him.²⁵³ Zoroaster chose to associate only with the magi, those best able to understand him (Dio Chrys. 36.41); even in terms of patrons and clients, friends and some clients had fuller access to patrons than others did.²⁵⁴

More likely Luke refers to fear of association with the assembly of believers who were of one mind on Solomon's Portico (Acts 5:13b).²⁵⁵ “Joining” this assembly meant becoming a follower of Christ;²⁵⁶ this fits with Luke's occasional use of *κολλάομαι* to indicate joining the Christian movement (17:34). Possibly the crowds feared to join, despite their respect for the church, because they feared persecution;²⁵⁷ but given the surprising leniency of the previous sentence (4:21) and the lack of overt persecution of even the apostles until after these events (5:18), another view is more likely. The context probably shows the reason for fear of association: inadequate commitment could bring death (5:1–10), and this judgment generated widespread fear (5:11).²⁵⁸ Possibly members of this larger group respected the early Christians the way Gentile God-fearers respected Judaism (see comment on Acts 10:2) but were both unwilling to surrender all their property and afraid to offer it only in pretense like the deceased couple (5:1–11).²⁵⁹ The closer the community lives to the holy ideal, the more self-selective their core group.²⁶⁰ Ironically, the disciples (meaning Christians, 6:1–2, 7; 9:1, 10, 19, 38; 11:26, 29; 13:52) later are reticent to let Paul associate (*κολλᾶσθαι*) with them because they (for a very different reason) fear him (9:26).

250. E.g., Rackham, *Acts*, 68.

251. In some societies, kings are ritually holy, leading to veneration and avoidance (Mbiti, *Religions*, 240).

252. Disciples and other hearers might “be with” (*συνόντας*) their teachers (Mus. Ruf. 6, p. 52.7), but *κολλᾶσθαι* may imply a greater degree of adherence.

253. This reportedly provoked murderous jealousy from those “not accounted worthy of admittance to his presence” (Diog. Laert. 8.1.39 [LCL, 2:355]). Culpepper, *School*, 51, acknowledges this tradition but finds another one more likely.

254. See Chow, *Patronage*, 75 (citing Sen. Y. *Const.* 10.2; Juv. *Sat.* 1.100–101; or, Chow notes, they could bribe patrons or catch them on the street, Hor. *Sat.* 1.9.56–58; Juv. *Sat.* 3.189). In the gospel tradition, Jesus spent time with his apostles but spent long days among the masses as well.

255. Cf. the Egyptians who wanted the Israelites to leave quickly, lest the Egyptians all die as the firstborn had (Exod 12:33)—perhaps analogous to fear after Ananias's and Sapphira's deaths here.

256. See Barrett, *Acts*, 274.

257. Witherington, *Acts*, 225 (recognizing that this would constitute a negative part of Luke's otherwise positive summary, 226).

258. Revival fervor can generate fear of insincere commitments; cf. the spiritual experience at Azusa Street (Bartleman, *Azusa Street*, 54–55); cf. some judgment miracles reported in popular sources noted above (Tari, *Wind*, 32–33; Thollander, *Mathews*, 125).

259. Cf., insightfully, Schwartz, “Sympathizers” (though his view that the believers of Acts 5:14 probably had not joined is less persuasive; see 2:44; 4:4, 32; 8:12–13).

260. Cf., e.g., Wesley's preference for a more committed core and his follower Asbury's less rigid public enforcement of positions (e.g., on slaveholding). (For Wesley against slavery, see, e.g., Raboteau, *Slave Religion*, 143; Childs, *Political Black Minister*, 27–28; early Methodists in Wilmore, *Religion*, 34; Adams, *Period*, 97.)

Although outsiders feared to join the movement hypocritically, the insistence on sincere converts led to greater long-range growth (5:14). The mention of both genders in 5:14 fits Luke's typical pattern (see comment on Acts 5:9). It also balances the negative example of Ananias and Sapphira with a positive one. Because God struck down hypocritical Christians, the uncommitted feared to join (5:13), but the number of genuine believers continued to grow all the more (5:14). Continued growth also fits the pattern of revival in 2:47 (see comment there).

b. Seeking Healing (5:15–16)

Luke here reports even more dramatic signs, with consequently greater church growth. Even limited persecution (5:17–41) would not slow the movement down (5:42).

I. DRAMATIC SIGNS (5:15)

The popular enthusiasm and miracle summaries Luke reports in 5:15 can easily reflect earlier tradition; such reports are characteristic of renewal movements, “particularly in their initial enthusiasm.”²⁶¹ Such phenomena are commonly reported in many regions of the world today, and during some revival movements historically by large numbers of sincere and trustworthy people claiming to be eyewitnesses.²⁶²

Although there is therefore no reason to question whether a genuine report or reports could stand behind Luke's abstract, Luke summarizes them in his own words, using language characteristic of his other descriptions of miracles.²⁶³ The term *κράβαττος* refers to a mattress or pallet, what the poor might use for a bed (BDAG); coupled with it, *κλινάριον* probably retains its diminutive force (despite the dilution of the diminutive in Koine); together the terms might suggest an appeal to the less wealthy masses (though even the wealthy would hardly arrive on the street in a full bed).²⁶⁴ The general mention of such healings may be exemplified in specific stories elsewhere in Luke-Acts, such as Aeneas (who was confined to his *κράβαττος*, 9:33) and the bedridden paralytic whom Jesus healed in Luke 5:24–25 (cf. *κλίνης*, 5:18).²⁶⁵

The gathering in the streets may merit further comment. Small and crooked streets often joined neighborhoods;²⁶⁶ the larger streets would help define the neighborhood units. (Thus in Rome “the urban unit was the *vicus*—a street and the neighborhood spreading around it into alleys and little squares.”)²⁶⁷ Luke probably envisions larger Jerusalem streets²⁶⁸ rather than side alleys; still, he may not think of the main

261. Dunn, *Acts*, 66.

262. See extensively Keener, *Miracles*, 209–599. The interpretation of such reports is more debatable, but see 601–759. For ancient sources, see 19–82.

263. This context might also imply a contrast between those carrying away the bodies of Ananias and Sapphira after judgment miracles (5:6, 9–10) and people carrying others to Peter to be healed (5:15); these constitute the only uses of this precise verb in Acts (elsewhere, Luke 15:22), though Luke frequently employs a cognate (fourteen times, one of them in 5:16).

264. For beds more generally, see, e.g., Mare, “Bed.”

265. For beds of various kinds (from the minimum possessions of the poor to elaborate forms for the rich), see Safrai, “Home,” 735–36 (citing, e.g., *t. Ned.* 2:7; *b. Sanh.* 20a).

266. Cf. Stambaugh, *City*, 188 (on Rome). Straight streets, the urban planning ideal (Cary and Haarhoff, *Life*, 104), were harder to achieve in old cities.

267. Stambaugh, *City*, 184. The narrow side streets were better protection from the sun (p. 189, citing Tac. *Ann.* 15.43; Cary and Haarhoff, *Life*, 104). Whereas Greek streets could run parallel, Romans liked intersecting north-south and east-west streets (Watson, “Cities,” 214; Owens, *City*, 113, 131).

268. Jerusalem's main north-south street, “Tyropoeon Valley Street,” was 10 m. wide, running alongside the Temple Mount's west; the east-west “Hulda Gates Street” (6.4 m. wide, ca. 280 m. long) intersected it; one street in the Upper City was 13 m. wide at its widest point (Aune, *Revelation*, 618).

thoroughfares, and rarely in ancient cities were even most large paved streets wider than twenty to thirty feet²⁶⁹ (often they were only eight).²⁷⁰ We should thus imagine considerable congestion (not a new situation for ministry of the word; cf. Luke 5:1; 8:42, 45). Many people could be found congregating in streets (Luke 14:21; undoubtedly especially on warm days), and these were useful places to preach or teach,²⁷¹ as Jesus's example (13:26) and instructions for his disciples (10:10, as here) show.

II. SHADOWS (5:15)

Scholars have compared the involuntary flow of power from healers (Mark 5:30; Luke 8:46; Acts 5:15; 19:12; cf. Luke 5:17; 6:19) to magical Greek conceptions of divine power as a sort of fluid substance.²⁷² Thus scent, voice, and other emanations from a person might transmit beneficent or malevolent effects;²⁷³ the suppliant's presence at Epidaurus was sometimes sufficient for healing.²⁷⁴ Occasionally this concept of spiritual effects of proximity applied to great teachers such as Socrates.²⁷⁵ The magical idea of a "zone" around a holy person is attested in a variety of traditions, from Buddhism to the experience of Francis of Assisi.²⁷⁶

This principle may apply to shadows as well, as in some modern healing claims.²⁷⁷ Van der Horst notes that some ancients believed that a criminal's shadow (Ennius) or those of animals (Aelian *Nat. An.* 6.14) could cause harmful effects;²⁷⁸ some believed that injury to one's shadow or its diminution by midday sun could be harmful.²⁷⁹ Shadows also play an important role in many traditional cultures, sometimes even identified with one's soul—though the effects of such shadows are generally held to be negative.²⁸⁰ Greek traditions also associated shadows with the realm of the dead, allowing some to speculate about active shadows (specifically, about one's shadow exposing one's deeds at the judgment).²⁸¹

269. Cary and Haarhoff, *Life*, 104. Not all streets were paved (Carcopino, *Life*, 46–47), but by this period, paving was common for larger streets (Owens, *City*, 157).

270. Stambaugh, *City*, 188 (citing Varro *L.L.* 7.15).

271. Teachers could hold school in the streets (Dio Chrys. *Or.* 20.9). Perhaps particularly relevant, streets were public sites as opposed to private ones (e.g., Prov 1:20; 5:16; 7:12; Song 3:2; Isa 42:2; Jer 5:1; 9:21; Lam 1:20; Nah 2:4; 3 Macc 1:20; Matt 6:2, 5); in business documents, "in the street" can even mean "before the public notary" (e.g., P.Oxy. 261.8–9 [AD 55]; 266.7 [AD 96]; 270.7 [AD 94]).

272. Kee, *Miracle*, 215; Aune, "Magic," 1537; on the story of the woman with the flow of blood, Lane, "Theios anēr," 160–61. "Power" (Luke 8:46) certainly is frequent in the magical papyri (Arnold, *Power*, 73, though also citing the LXX).

273. Caused by particles in Plut. *Table* 5.7.1–2 (Boring, Berger, and Colpe, *Commentary*, 78–79).

274. Ael. Arist. *Sacr.* 2.71; 3.22 (Johnson, *Acts*, 96). Theissen, *Miracle Stories*, 63, argues that various material substances were thought to radiate healing power, but his examples (Lucian *Lover of Lies* 11; Pliny E. *N.H.* 28.7; Tac. *Hist.* 4.81) may simply represent medical quackery.

275. Implied in Plato *Theag.* 129E; 130C; 130E (Tiede, *Figure*, 35) but rare in other sources (36).

276. See Borg, *Vision*, 129 (including 144n16). Cf. Nock, *Essays*, 603–5, on use of the notion of "mana" (borrowed from Polynesia). By way of anecdote, although I have not generally experienced the divine Spirit this way (except in extraordinary cases such as at the home of some remarkably prayerful Ethiopian refugees), I have sensed something like such "zones" in some power encounters.

277. E.g., Numere, *Vision*, 213; Crandall, *Raising*, 28 (secondhand); cf. Liardon, *Generals*, 219 (following Frodsham, *Apostle*, 79), on Smith Wigglesworth in Sri Lanka in 1921.

278. Van der Horst, "Shadow," 207–8; Strelan, *Strange Acts*, 195. Shadows of various kinds of trees could promote harm or good (*Strange Acts*, 209, citing Pliny E. *N.H.* 17.18; Lucret. *Nat.* 6.783–85).

279. Van der Horst, "Shadow," 208 (citing Arist. *Mir. ausc.* 145 [157]; Lucan *C.W.* 3.423ff.; Philost. *Hrk* 1.3; Porph. *Antr. nymph.* 26; more rationally, Dio Chrys. *Or.* 67.4–5). Profaning a sacred place could cause one to lose one's shadow and hence die (van der Horst, "Shadow," 209, citing Polyb. 16.12.7; Paus. 8.38.6; cf. also much later Jewish texts, p. 210). Strelan, *Strange Acts*, 193, connects "shadows" here with "images" (cf. Lucret. *Nat.* 4.379–86).

280. Van der Horst, "Shadow," 205–7 (including ancient Egyptian texts, 207).

281. Lucian *Men.* 11 (Menippus is not, however, a reliable narrator). For the deceased as shadows, see, e.g., Lucian *Fun.* 9.

Such comparisons are helpful for reconstructing likely ways early Gentile Christians would have understood Luke's language, and there is no reason to doubt that he would have readily contextualized his message in terms they understood.²⁸² These comparisons, however, need to be nuanced by also weighing earlier Jewish sources (cf. esp. 1 Sam 19:20–24; 2 Kgs 13:20–21)²⁸³ and a more careful consideration of the *antimagical* nature of Luke's accounts.²⁸⁴ The language of "overshadowing" might recall passages about God's presence such as Exod 40:35; Ps 91:1, 4.²⁸⁵

Most significantly, for Luke's audience Peter's shadow would recall God's power overshadowing Mary (Luke 1:35) and the cloud of heavenly glory from which the Father claimed Jesus at the transfiguration (9:34). Given these earlier comparisons in the Gospel, the shadow may thus recall what some sources call the Shekinah.²⁸⁶ If a shadow was considered part of one's body,²⁸⁷ we should not be surprised that people sought to touch at least this, like the woman who sought access to Jesus's power through his garment (8:44, 46). (For power mediated through touch, see comment on Acts 3:6–7; 5:12.) Peter thus carries on the ministry of Jesus exemplified in Luke 8 and also parallels Paul's ministry in Acts 19:11–12. Their empowerment by the Spirit, who actually performed the miracles, allowed for secondary effects on others not intended by themselves (1 Sam 19:20–24; 2 Kgs 13:21).

III. THE WORD SPREADS FURTHER (5:16)

The gathering of crowds to be healed is familiar from Luke's other summaries (Luke 4:40; 5:15, 17; 6:18–19; 9:11; Acts 8:7; 28:9); crowds also gathered to hear Jesus (e.g., Luke 8:4; 15:1). Being thronged by crowds (the other side of Acts 5:13) was a common feature of popularity.²⁸⁸ Given the high rate of early mortality attested by youthful skeletal remains, we can be confident that a healer would draw large crowds.²⁸⁹ The mention of people "bringing" the sick may recall for attentive readers how a paralytic's friends brought him to Jesus (Luke 5:18–19).²⁹⁰

That word spread widely in the vicinity²⁹¹ of Jerusalem (as many of the Gospel's summaries reported it had in that of Galilee, e.g., Luke 4:14) is not surprising (for the rapid spread of word in the ancient Mediterranean world, see comment on Acts 19:10). The appropriate response to benefaction (even attempted confidential benefaction, e.g., Luke 5:14–15; cf. 8:56) was as much publicity for the act as possible.²⁹² Epideictic

282. Cf. how Christian holy men (e.g., St. Anthony) directly replaced expectations for pagan counterparts in late Roman Egypt (Frankfurter, *Religion in Egypt*, 267); Polhill, *Acts*, 402, sees such activity (in Acts 19:11–12) as divine accommodation. There were, of course, limits; unlike Greek magicians, no one in Acts seeks invisibility, works love spells, etc.

283. Cf. Derrett, *Audience*, 128 (a holy sage's blessing); cf. Arnold, *Power*, 36–37.

284. See comment on Acts 8:9–11; 19:11–20.

285. Larkin, *Acts*, 90–91. Malina and Pilch, *Acts*, 50, also cite Deut 33:12 LXX.

286. For discussion of sources concerning the Shekinah, see Keener, *John*, 409–11.

287. Hence it could communicate even corpse uncleanness; cf. Sanders, *Jesus to Mishnah*, 34, 232; Borg, *Conflict*, 104; *m. 'Ohal.* in Maccoby, "Corpse." Pharisees were not alone in their strict concern regarding corpse impurity (4QMMT B 72–74; Jos. *Ant.* 18.38). For later exceptions, probably following the purported cleansing of Tiberias (on which see, e.g., Levine, "Purification"), cf., e.g., *b. Bek.* 29b; *Ber.* 19b; *B. Meši'a* 114b.

288. See, e.g., Xen. *Cyr.* 7.5.38–44.

289. Evans, *World*, 111. Cf. also large numbers drawn to therapeutic springs (see my *Acts*, 1:327n50).

290. Cf. also apostles entreated to perform healings in later apocryphal literature (e.g., *Acts John* 19).

291. Luke here, as often, uses πόλις "indiscriminately"; see Oakman, "Countryside," 170; Reed, *Archaeology*, 166–68 (suggesting [168] Luke's theological motives in Acts 26:26). The less technical use in the evangelists (esp. Luke, who in his two volumes accounts for just more than half the NT uses) has an abundance of LXX precedents and was hardly unique to them (see BDAG), though unusual for elite authors such as Pausanias.

292. DeSilva, *Honor*, 134–35 (noting that this would prove all the more the case with the most virtuous benefactors, namely, those who attempted confidential benefactions); for deSilva's ancient sources, see 114 (citing Arist. *N.E.* 8.14.2, 1163b 1–5; Sen. *Y. Ben.* 2.22.1, 4; 2.23.1).

texts often recounted how their protagonists' reputation spread (e.g., *Iambl. V.P.* 2.11; cf. comment on Acts 2:47).²⁹³ This was and is naturally the case for signs reports.²⁹⁴

IV. DELIVERING PEOPLE FROM UNCLEAN SPIRITS (5:16)

The expression "harassed by unclean spirits" here is close to that in Luke 6:18, again reflecting the disciples' emulation of Jesus's ministry.²⁹⁵ Demons were often associated with sicknesses²⁹⁶ (though not every sickness would have been thought caused by a demon). Luke elsewhere associates sicknesses with demonic activity (cf. Acts 10:38) but does distinguish those sick from natural causes from those sick by possession (e.g., Luke 8:2; 13:11).²⁹⁷

See the extensive excursus on demons, possession, and exorcism at Acts 16:16.²⁹⁸ Some cultures associate spirit possession or a trance state with power for exorcism;²⁹⁹ in Luke-Acts, God's agents do not act in trance states, but they are filled and empowered by God's Spirit (e.g., Luke 5:17; 6:19; 8:46; 9:1; Acts 1:8; 2:4). Philip demonstrates the message of God's sovereignty (Acts 8:12) by expelling demons (8:7), as elsewhere (Luke 4:41, 43; 6:18–20; 9:1–2; 10:9, 17; esp. 11:15–20; cf. 4:32–36; 8:1–2).³⁰⁰ The exorcisms performed by both Jesus and his disciples in the Gospel foreshadow those in Acts.³⁰¹

The association of "spirits" with "uncleanness" or "impurity" (as here) appears in earlier gospel tradition, and also in some Jewish tradition,³⁰² though surprisingly less frequently than we might expect from the Gospels.³⁰³ Sometimes links between sin

293. Ancient narratives about popular teachers also could praise them by emphasizing their popularity (e.g., *Philost. Vit. Apoll.* 1.40; Robbins, *Jesus the Teacher*, 122n74; cf. *Ovid Metam.* 3.339–40, 511–12).

294. For signs and consequent movement growth, see esp. De Wet, "Signs"; also, e.g., Yung, "Integrity," 173–75; Maggay, "Issues," 34; Ma, "Encounter," 136; Khai, "Pentecostalism," 268–70; Read, Monterroso, and Johnson, *Growth*, 323; Marostica, "Learning," 207; Norwood, "Colloquium," 24–26; Castleberry, "Impact," 108; Dunkerley, *Healing Evangelism*, 21–22; on a popular level, Lindsay, *Lake*, 26, 29; Thollander, *Mathews*, 84, 87–90.

295. These are the only NT uses of ὀχλέω and ἐνοχλέω, except for an occurrence of the latter in Heb 12:15 (ἐνοχλέω also occurs a few times in the LXX, and ὀχλέω in Tob 6:8; 3 Macc 5:41).

296. See Kotansky, "Demonology," 271–72; e.g., *Test. Sol.* 18; *y. Šabb.* 6:3, §7. The NT hapax legomenon ὀχλέω appears in medical texts (Hobart, *Medical Language*, 7–8) but also in other descriptions of sickness (Gen 48:1; 1 Sam 19:14; 30:13; Mal 1:13); most relevant here is its association with demons (Tob 6:7–8), as in the only other Lukan use (the cognate in Luke 6:18).

297. Thomas, *Deliverance*, 249; for the Gospel, see 198–228; for Acts, see 229–95.

298. For discussion of OT evidence for demons, see also Kotansky, "Demonology," 269–70; for a survey of Satan and demons in Luke-Acts (esp. the Gospel), see Fitzmyer, *Theologian*, 146–74. On approaches to spirits in antiquity, see discussion in Keener, *Miracles*, 769–87; in various cultures today, 788–856.

299. Klutz, *Exorcism Stories*, 196–97.

300. More often than not, these texts mention the exorcisms before proclaiming the kingdom, as if God's authority is first demonstrated and then explained. Proclaiming God's rule is used to terrify spirits in 4Q510 1 4 (Vermes, *Religion*, 130).

301. For Jesus, see Twelftree, *Name*, 130–37; for the Twelve, 137–42; for echoes specifically in Acts 5:12–16, see 142.

302. See Klutz, *Exorcism Stories*, 134–38, citing esp. *Pesiq. Rab Kah.* 4:7 (which uses Zech 13:2; he argues for a popular view refuted here); a likely implication of 4Q*Exorcism ar* (4Q560) (Gaster, *Scriptures*, 262n17, claims that it appears in rabbinic literature, but offers no sources; regarding spirits in graveyards, presumably associated with corpse uncleanness, cf. *b. Sanh.* 65b; *Hag.* 3b). See also the "polluted demons" in *Jub.* 10:1; "unclean spirits" in 4Q230 1 1 (but this is reconstructed); and, differently, "unclean spirit" in 1QS IV, 22 (vs. the "spirit of truth" in IV, 21); 4Q444 1 3–4 + 2 I, 4 (possibly the human spirit); clearly 11Q5 XIX, 15 (and the reconstructed text in 11Q6 4–5 16; here an unclean spirit acts like Satan). Those dominated by Belial's spirits also are more apt to defile the temple (CD XII, 1–2; 4Q271 5 I, 17–18). "Unclean" could sometimes represent "sinful" (1QpHab VIII, 13). Later, see *Test. Sol.* 3:7 (τὰ ἀκάθαρτα πνεύματα).

303. Klutz, *Exorcism Stories*, 137, while emphasizing that it is attested as one perspective, concedes that it is not widespread.

and impurity also appear.³⁰⁴ Levitical purity laws lack prophylactic associations, but their Hittite analogies serve as prophylaxis against demons.³⁰⁵ Following Leviticus and Jewish tradition, some forms of sickness (such as leprosy; cf. Lev 13) are linked with impurity in Luke-Acts.³⁰⁶

Power encounters were a primary means of driving out competition.³⁰⁷ Many later Christian authors claimed that exorcism happened regularly and as a matter of public knowledge. Thus Justin boasts about it in his city; Irenaeus is emphatic about its occurrence; Tertullian says, “Let a man be produced *right here before your court* who, it is clear, is possessed by a demon, and that spirit, commanded by any Christian at all, will as much confess himself a demon in truth as, by lying, he will elsewhere profess himself a ‘god’”; Cyprian says that his audience may *see* the demons cast out of burning idols.³⁰⁸ These exorcists were not averse to “roughing” demons up—“manhandling,” “humiliating them, making them howl, beg for mercy, tell their secrets, and depart in a hurry,” thus exposing the superiority of the true God over all others.³⁰⁹

304. Klawans (“Impurity”; idem, “Idolatry”) emphasizes the links between sin and impurity in the Scrolls; Himmelfarb, “Impurity and Sin,” warns against overgeneralizing this link (while conceding that 1QS and 4QS12 exceed OT perspectives).

305. See esp. Milgrom, *Leviticus*, 256–57, 259–60, 318, 766; note also, e.g., Walton, Matthews, and Chavalas, *Background Commentary*, 25, 125, 129–32; cf. Gane, *Leviticus*, 407.

306. See, e.g., Pilch, *Healing*, 111–12.

307. MacMullen, *Christianizing*, 27. On power encounters, see further discussion at Acts 8:9–11 and 13:6.

308. MacMullen, *Christianizing*, 27.

309. *Ibid.*, 28.

MORE PERSECUTION (5:17–42)

In contrast to the people's favorable reception of Jesus's appointed agents in Acts 5:12–16 is the authorities' response in 5:17–18. In 5:17–42, the power of God invites more persecution. Moreover, the narrative illustrates that God's power can deliver from captivity, but that power also enables God's servants to continue to grow the church despite persecution. The apostles, backed with continuing miracles, are no less bold than before. The central speech is by a respected non-Christian voice (5:35–39), climaxing in 5:39: if Jesus's movement is not a human revolutionary movement but from God, nothing will stop it. And in Acts, nothing does (5:42; 28:30–31).

The introduction to Acts 4–5, above, briefly addressed conventional historical questions, but we may also pause to note that aspects of the narrative sound more plausible to many peoples in the world than seems natural to many middle-class Western readers. The portrait of a power struggle between a political elite and a populist movement depicted here comports well with reality as experienced and interpreted by many repressed groups in much of the world.¹

I. Arrest, Release, Rearrest (5:17–28)

Acts reports a variety of divine escapes, including a permanent escape (12:8–11), an escape that was not an escape (16:26–28), and here a temporary escape leading to a rearrest. The second time, however, the officers must arrest the apostles publicly in front of a crowd, and so, if anything happens to the apostles, all Jerusalem will know of it.

a. Sadducees Arrest the Apostles (5:17–18)

That the high priest and his colleagues “arose” could suggest that they planned to speak or take public action (cf. 2:14; 5:34; 11:28; 13:16; 15:7; and comment on Acts 5:20), but it may simply reflect Semitic syntax due to Luke's immersion in the LXX or perhaps semitized Koine.² This “high priest” was introduced in 4:6 as Annas (though historically Caiaphas was high priest at this time, his father-in-law was de facto head of the high-priestly family)³ and leads the session in 5:27 (cf. 7:1).

I. THE SADDUCEAN “SECT” (5:17)

Luke here calls the Sadducees a “sect” (αἵρεσις); elsewhere he applies the title to the Pharisees (15:5, in this case also Christians, and so the two are not mutually exclusive categories; 26:5) and Christians (Nazarenes, 24:5), though he accepts the title for Christians only as an external designation (28:22), since they believed

1. See esp. González, *Acts*, 86–87.

2. Cf. Lake and Cadbury, *Commentary*, 56; Luke 4:38; 24:12; Acts 1:15; 8:27; 9:39; 10:20.

3. See comment on Acts 4:6.

themselves the true way (24:14). Greeks used the term to describe different sects of philosophers, such as Epicureans, Peripatetics, and Stoics (Epict. *Diatr.* 2.19.20), and also Platonists.⁴ Stoics so described their own school.⁵

Josephus applied this language to the different movements or schools within early Judaism,⁶ and Luke provides independent attestation that this was an accepted way to explain Palestinian Jewish groups to Gentile readers.⁷ The language itself (cf. 1 Cor 11:19; Gal 5:20; 2 Pet 2:1) rightly points to the divisions in early Judaism,⁸ which may help explain the reference to “jealousy” here.

II. JEALOUSY AS A MOTIVATION (5:17)

Luke explains part of the temple hierarchy’s motivation as “jealousy,” which may sound to modern ears like an unverifiable cheap shot but is entirely plausible in the logic of the narrative (cf. 1 Sam 18:8–9). The same motivation (and exact wording, “filled with jealousy”) appears in the first reported synagogue hostility toward Paul and Barnabas (Acts 13:45); Thessalonian Jews (17:5) likewise oppose Paul from jealousy. All of these opponents seem to follow the model of Joseph’s brothers in the biblical narrative (7:9; see comment there). The expression “filled” is common in Luke-Acts, but it might possibly recall the recent mention of Satan’s filling Ananias’s heart (5:3).⁹

Envy was common enough in the agonistic, honor-shame society of ancient Mediterranean cities.¹⁰ As Spencer points out, “Within a competitive limited honor culture the popularity of the apostles’ ministry . . . diminishes their own support.”¹¹ This is particularly the case given apostolic charges attributing to Jerusalem’s leaders unjust decisions that led to Roman soldiers crucifying a good Jew—indeed, God’s Messiah (3:17; 5:28). In a similar (though less sensational) manner, Josephus felt that his good fortune produced jealousy and frequent accusations against him (*Life* 423, 425) and that fellow aristocrats opposed him because of “envy” (*Life* 204).¹² Because successes breed envy (especially against outsiders),¹³ some ancients even considered it wise to leave the arena of their successes (Polyb. 1.36.2–3). Just as success bred jealousy, jealousy might generate slander;¹⁴ indeed, an orator might deliberately stir envy to create enmity,¹⁵ which was its neighbor.¹⁶

4. For Platonists, see Macrob. *Comm.* 2.14.6 (van der Horst, “Macrobius,” 226).

5. Hierocles p. 37, col. 8, 10 (van der Horst, “Hierocles,” 157); Arius Did. *Epit.* 2.7.6a, pp. 38–39.4; 2.7.6b, pp. 38–39.19; 7, pp. 42–43.26; 11m, pp. 86–87.22; 11m, pp. 90–91.16.

6. Josephus schematizes Jewish schools in terms of three or four sects; but later rabbis mention Boethusians as very close to Sadducees, and Josephus mentions two varieties of Essenes (cf. *War* 2.160). Josephus cannot list all sects; he does not list as a sect the Judean followers of Jesus (“Nazarenes,” Acts 24:5), who cannot but have existed (e.g., Gal 1:22). But all our sources list Pharisees and Sadducees as the dominant groups in Judean society.

7. See, e.g., Acts 15:5; 26:5; Reicke, *Era*, 152.

8. On the diversity of early Judaism, see (differing in how far they take it), e.g., Porton, “Diversity”; Luke, “Society Divided”; Boccaccini, “Multiple Judaisms”; Neusner, *New Testament*, 106–24; Keener, *John*, 181–85.

9. Cf. also Jesus’s opponents filled with anger in Luke 4:28, or Peter being filled with the Spirit in confronting the leaders (Acts 4:8).

10. Plut. *Profit by Enemies* 10, *Mor.* 91E, counts it both endemic in humanity and characteristic of the base (citing Pindar frg. 212).

11. Spencer, *Acts*, 43.

12. I am treating ζήλος, φθόνος, and similar terms as sufficiently synonymous for the points being made here.

13. E.g., Cic. *Fam.* 1.7.2; Corn. Nep. 8 (Thrasylbulus), 4.1–2; 12 (Chabrias), 3.3; 23 (Hannibal), 1.2; Diog. Laert. 5.76–77; Philost. *Hrk.* 15.10.

14. Lucian *Slander* 12.

15. *Rhet. Alex.* 36, 1445a.12.

16. *Rhet. Alex.* 36, 1445a.19–20.

Moralists often addressed the issue of envy,¹⁷ even in entire essays.¹⁸ Philosophers were known to critique envy.¹⁹ Both Gentile²⁰ and Jewish²¹ authors condemned envy in general; Gentile²² and Jewish²³ authors also did so in narratives. Instead of harming a person whom one envies, it is better to stop envying (Mus. Ruf. 7, p. 58.1–2).²⁴ In one Jewish text, true humility kills jealousy (*Test. Gad* 5:3).

Envy was a natural motivation to attribute to enemies²⁵ and also proved useful to answer charges that one was exaggerating the praises of one's protagonists (Thucyd. 2.35.2).²⁶ Some scholars today suppose that Luke's attribution of this motivation fits best in novelistic genres,²⁷ but it was in fact common in historical genres. It appears frequently as a motivation for enmity in the works of political historians and biographers,²⁸ sometimes even as a statement of general political life.²⁹ It provided a motive that a person could cite for his opponent's charges (e.g., Lysias *Or.* 24.1, §168).³⁰ Marcius's colleagues plotted against him διὰ φθόνου (Plut. *Coriol.* 39.1); those who most should have supported Spinther caused him troubles because of jealousy (Cic. *Fam.* 1.7.2); some who criticize others do so because they envy those superior to themselves (Philost. *Vit. soph.* 1.21.515). Some orators even studied how to provoke envy against opponents (presenting them as harming the audience's interests; *Rhet. Alex.* 36, 1445a.12); this was helpful in generating hatred (36, 1445a.19–20). The charge was apparently common enough to warrant the disclaimer that a political action was not caused by envy (Val. Max. 2.8.4, presenting the republican senate as above such motives).³¹ It appears as a motivation for op-

17. E.g., Hor. *Sat.* 1.1 (e.g., status in 1.1.61–62; wealth in 1.1.70–79); Dio Chrys. *Or.* 34.19; Plut. *Flatt.* 24, *Mor.* 65B; *Lect.* 5, *Mor.* 39DE; *Profit by Enemies* 8, *Mor.* 91AB.

18. E.g., Dio Chrys. *Or.* 77–78; Plut. *Envy, Mor.* 536E–538E (hate was worse, since it desired the other's destruction).

19. E.g., Sen. *Y. Dial.* 5.31.1; Mus. Ruf. 17, p. 108.13; Epict. *Diatr.* 1.9.20; 2.19.26; Arius Did. *Epit.* 2.7.5f, pp. 30–31.28; 2.7.10e, pp. 62–63.15; Anacharsis *Ep.* 4.13, to Medocus; Philost. *Vit. Apoll.* 6.11; *Ep. Apoll.* 43; van der Horst, "Musionius," 310; Diog. Laert. 6.1.5; 10.117 (Epicurus).

20. E.g., Hesiod *W.D.* 195; Xen. *Mem.* 3.9.8; Ovid *Metam.* 2.760–64, 768–69; Fronto *Ad M. Caes.* 4.1. Some ancients associated it particularly with women (Musaeus *Hero* 36–37; *ILLRP* 977 in Lefkowitz and Fant, *Life*, 135, §138; Jos. *Ant.* 18.255), but most references in ancient literature are to men. Younger men often euphemized it with designations such as "ambition" (Plut. *Old Men* 25, *Mor.* 796A). Some eventually even personified Jealousy; see Men. *Rhet.* 1.1, 342.6–9 (claiming it a recent innovation).

21. E.g., Wis 6:23; *Let. Aris.* 224; *Sib. Or.* 3.660–64; *Test. Iss.* 4:5; *Test. Gad* 7:2; Philo *Good Person* 13; *Sacr.* 20–21, 32; *Posterity* 138, 140, 150; *Test. Sol.* 6:4 MSS; 2 *En.* 70:23; *Gen. Rab.* 49:8. It would cease in the coming age of peace in *Sib. Or.* 3.377.

22. E.g., Xen. *Cyr.* 1.4.15; Val. Max. 2.8.4; Plut. *Isis* 27, *Mor.* 361C; Iambl. *V.P.* 2.10; Char. *Chaer.* 1.2.5–6.

23. E.g., Jos. *Ant.* 18.255; *War* 1.77; *Acts Paul* 3.15 (*Paul Thec.* 15); Joseph's brothers constituted a common case (e.g., Philo *Jos.* 5, 17, 114, 144, 234; Jos. *Ant.* 2.13; *Test. Sim.* 3).

24. Arius Did. *Epit.* 2.7.10c, pp. 60–61.32; pp. 62–63.2.

25. E.g., 3 Macc 6:7 (Daniel's accusers); *Test. Dan* 1:6; *b. Yoma* 71b. Josephus accuses some Gentile historians of ignoring Jews for this reason (*Ag. Ap.* 1.213; cf. 1.222, 225). Political biography regularly lists envy as a motive for hostility; e.g., Hdn. 3.2.3; Corn. Nep. 5 (Cimon), 3.1; 8 (Thrasylbulus), 4.1–2; 12 (Chabrias), 3.3; 14 (Datames), 5.2; 15 (Epaminondas), 7.1; 18 (Eumenes), 7.2; 10.2; 23 (Hannibal), 1.2.

26. Disbelief of accounts might stem from envy (Lucian *Tox.* 56).

27. Pervo, *Acts*, 141n9, associates inference of motives especially with popular and fictitious works, citing appropriately several texts (esp. Jos. *Asen.* 24; roughly ten references to lovers' jealousy in Gentile romances); less apt is his citation of material in Josephus that the latter may have believed historical (*Ant.* 12.174; esp. 20.21, which mentions envy). Although *Acts* is fairly popular literature (as Pervo emphasizes on 141), this motivation is not limited to popular literature.

28. E.g., Corn. Nep. 14 (Datames), 5.2; 23 (Hannibal), 1.2 (Sil. It. 11.554 also mentions that Hannibal's rival opposed him because of jealousy, *invidia*); Vell. Paterc. 2.47.2; Tac. *Ann.* 16.18; cf. Plut. *Themist.* 29.4.

29. Corn. Nep. 8 (Thrasylbulus), 4.1–2; 12 (Chabrias), 3.3; Vell. Paterc. 2.40.4.

30. Others presented charges as motivated by personal enmity of other sorts (Lysias *Or.* 9.10, §115 [the issue was friendship with the accuser's enemy, 9.13, §115]).

31. Plaintiffs had to guard against being suspected of this motive (Hermog. *Inv.* 1.1.95–96). Some commentators also cite the association of envy with the desire to murder (e.g., Philost. *Hrk.* 34.1; Johnson,

position in early Christian texts (Mark 15:10; Phil 1:15; *Acts Paul* 3.15), including later in Acts (Acts 7:9; 17:5).

For the Sadducees, populist Pharisees may have been bad enough; the relatively uneducated Galilean apostles, however, claimed charismatic power and divine authorization to challenge their hegemony. In addition to Luke's mention of the leaders' envy of the apostles' popularity (5:13), we might imagine that the leaders would be troubled by rumors that some people, specifically a well-to-do couple, had mysteriously died when confronted by Peter, a report that seems to have spread widely (5:11). The story's biblically literate ideal audience would be aware that God's agents might be blamed when God struck someone dead (Num 16:41).

III. ARREST AND DETENTION (5:18)

The apostles' popularity³² and lack of an adequate public charge had protected them from the authorities so far (cf. Acts 4:21); but they had continued to openly defy the authorities' decree, and the authorities either would be viewed as tacitly accepting the new sect or would continue to lose face if they failed to discipline them publicly. The authorities probably believed that they had been lenient so far; indeed, they had sought only to restrict public preaching, not to suppress the church.³³ Now, however, matters had escalated to the point of threatening their own public honor and control, and inaction appeared more dangerous than intervention (though some still thought otherwise, 5:38–39). Their hostile laying on of hands (5:18; cf. 4:3) apparently contrasts with miracles through the apostles' hands in 5:12.

Peter's jailing is significant for one who approaches the early chapters of Acts in light of the end of the Gospel. In the Gospel's passion narrative, Peter claimed that he was willing to face "both prison and death" for Jesus (Luke 22:33)—but he failed (22:34, 57–61). His character proves quite different in Acts, with the resurrection and Pentecost as the transforming events (Luke 24:49; Acts 1:4–5). His imprisonments (Acts 4:3; 5:18; 12:4–6) also connect him backward with John's ministry (Luke 3:20) and forward with Paul (Acts 16:23–40; 24:27) and other disciples (Luke 21:12; Acts 8:3; 22:4; 26:10).

Luke may not be referring to the "public prison" (e.g., NRSV) but may well instead employ the adjective δημοσίᾳ adverbially: they jailed them "publicly,"³⁴ as in Acts 16:37 (cf. 18:28; 20:20); this action contrasts with the angel's releasing them by night (5:19). This claim further highlights the elite's public competition with the apostles for honor (5:17), publicly shaming the apostles—who will count this indignity as a badge of honor (5:41). Although this jail had gates (5:19), it is not likely in the Fortress Antonia (in contrast, perhaps, to the place of detention in 12:4–5). Romans garrisoned the Fortress Antonia in this period (again in possible contrast to the brief period of Herod Agrippa I's reign in Acts 12), but the narrative presents this site as under the jurisdiction of the temple police and the municipal aristocracy. Nevertheless, like the fortress, this site is likely near the temple (5:21).

Acts, 96, and Witherington, *Acts*, 229, cite Plato *Laws* 9.869E–870A; Plut. *Br. Love* 17, *Mor.* 487F; Wis 2:24; Philo *Jos.* 12).

32. Whereas Jesus's power base was Galilean (cf. Luke 22:59) and hence of little threat to the leaders, the apostles now had a Jerusalem base.

33. Cf. Goppelt, *Times*, 57.

34. With Gaventa, *Acts*, 106. See BDAG for more detailed argument and examples (esp. *SIG*² 680.3; also, e.g., Epict. *Diatr.* 3.4.1; 3.22.2; Vett. Val. 71.22; *SIG* 1173.9, 13, 18; *BGU* 1086.2.3; 2 Macc 6:10; 3 Macc 2:27; 4:7; *Jos. War* 2.455; Justin 2 *Apol.* 3.2; 12.5; Tat. 18.3; 25.1; 26.3).

b. Released and Commissioned (5:19–20)

Whereas Peter leaves the range of the deadlier nemesis, King Agrippa I (12:17), here the apostles are sent not into hiding but into public to teach. That they heed this angelic commission underlines both their courage and their obedience—both in turn based on faith. The release is a means to an end: continuing to proclaim God’s message (cf. 4:20, 29, 31; 5:28–32).

I. MIRACULOUS ESCAPES (5:19)

Jesus’s mission includes release to the captives (Luke 4:18;³⁵ cf. perhaps [but probably not] 23:25), and Luke knew quite well how difficult it sometimes was to get people out of detention by legal means (Luke 12:58–59; Acts 24:27). The angel of the Lord will free Peter from a more serious detention again in Acts 12:7–11 (a context that in some respects evokes the deliverance at Passover). And as in 12:6–10, doors open without guards realizing it.

As scholars often observe,³⁶ miraculous escapes are a frequent motif in ancient literature, especially surrounding classical tales of the “new” god Dionysus spreading his cult.³⁷ Even if biblical allusions are more natural to Luke’s explicit narrative world (as noted above), in this case Greek stories provide some more-detailed parallels. In Euripides, Dionysus freed his followers from prison (Eurip. *Bacch.* 443–45), and the fetters fell “of themselves” (αὐτόματα; cf. Acts 12:10) from their feet (*Bacch.* 447); doors likewise “unbolted themselves” without human hand (*Bacch.* 448).³⁸

One need not assume that Luke directly drew on Euripides here, although Euripides was the most popular model and could influence Luke’s telling, directly or indirectly.³⁹ Others after Euripides likewise repeated this supernatural release of prisoners, often narrating others as well (Apollod. *Bib.* 3.5.1).⁴⁰ In the second century B.C.E., Apollonius of Rhodes sang that door bolts sprang back by themselves (αὐτόματοι) through the witch Medea’s magical song (Ap. Rhod. 4.41–42). In the second century C.E., Philostratus claimed that Apollonius loosed his bonds and that gates opened wide for him before his final disappearance (*Vit. Apoll.* 8.30).

Hellenistic Judaism had already adopted the motif probably by the third or second century B.C.E., if later Christian sources transcribed Artapanus accurately;⁴¹ this author

35. The passage in its Isaian context refers to Israel’s restoration, but just as Luke would read literally (Isa 35:5 in Luke 7:22) as well as spiritually (cf. Isa 6:9–10 in Acts 28:26–27) Isaiah’s promises of the blind’s sight restored, the God who would deliver his people at the eschatological restoration could also do so literally at times for his servants who were agents of the end-time restoration.

36. E.g., Theissen, *Miracle Stories*, 101; Brawley, *Luke-Acts and Jews*, 58; Marguerat, *Actes*, 189–90. Weaver, *Epiphany*, 45, counts “Dionysus’ liberating power . . . among his best-known attributes” and (11–22) surveys previous studies of Greek myth in prison escapes in Acts (Otto Weinreich; Richard Pervo; Reinhard Kratz). Ziegler, *Dionysos*, finds Dionysian motifs in Acts perhaps too pervasively but is correct to highlight *theomachos* (e.g., 115–18, on Euripides; 177–82, on Paul; and 183–87, on Agrippa vs. Peter); cf. also Schäfer, “Funktion.” On Dionysus, see concisely, e.g., Graf, “Dionysus.”

37. Pervo, *Profit*, 21–22, reckons more than thirty such tales. Rapske, *Custody*, 418, sees the accounts of Dionysus as variants of a single story; he also surveys the motif in apocryphal Christian literature that is at least sometimes dependent on Acts (414–17).

38. Dionysus himself escapes likewise in Eurip. *Bacch.* 642–43; in *Bacch.* 655, he flies over walls to escape. On door bolts in this period, see, e.g., Hurschmann, “Lock,” 766, 768.

39. For the importance of recognizing the motif’s pervasiveness, see Weaver, *Epiphany*, 281–82.

40. Rapske, *Custody*, 412–14, cites other examples, including Ovid *Metam.* 3.572–701 and the escape of Caius Marius in the historical period (87 B.C.E.; Lucan *C.W.* 2.76–83; Plut. *C. Mar.* 39; Velleius Paterculus *Roman History* 2.19.3; but cf. Livy *Epit.* 77). See also later reports of the divine man Apollonius (Philostr. *Vit. Apoll.* 7.38; Brawley, *Luke-Acts and Jews*, 58).

41. Clement has “according to God’s will” rather than Eusebius’s αὐτομάτως, the latter corresponding more explicitly to Acts 12 (*OTP* 2:901 n. j-2)—yet also common elsewhere (Apollod. *Bib.* 3.5.1). On Artapanus’s prison escape, see Weaver, *Epiphany*, 69–72; Weaver associates this with the exodus, in apologetic against

often evokes Greek myths,⁴² with which he skillfully interweaves the biblical story.⁴³ In Artapanus, Pharaoh imprisoned Moses when he came to tell him to release the Jews.⁴⁴ “But when night came, all the doors of the prison opened of themselves, and some of the guards died, while others were relaxed by sleep and their weapons were broken.”⁴⁵ Even Acts 12 and 16 are less dramatic than this report, but both share the same worldview in which God sometimes miraculously delivered his agents.

The LXX lacks a tradition of angels aiding prison escapes, though angels were involved in a prophet’s escape from harm (1 Kgs 19:7), including while in prison (Dan 6:22); another righteous person’s escape (Gen 19:15–16); and the deliverance of Israel from slavery (Exod 3:2; 14:19; 23:20, 23; 32:34; 33:3).⁴⁶ An angel could also (contrast Acts 5:19–20) instruct a prophet to go *with* those who had come to arrest him (2 Kgs 1:15). Although God brought individuals out of prison in ancient Israel (Gen 41:14–45; Ps 105:20; cf. 142:7; Jer 40:1), it was not by the means here. An angel enabled Peter’s escape in Acts 12:7–11, but there the situation was much more serious, requiring Peter’s flight (12:17). Here the apostles preach in the temple.

This fits a pattern of miraculous escapes in Acts, though variety in the pattern undercuts attempts to predict how God must act (cf. 2:38; 10:44–48). Sometimes apostles died (12:2); other times they were miraculously released (12:7–11), were released but were wise to stay (16:28), or had to endure a lengthy judicial process (24:27; 26:30–32). Those offended by the shame of Paul’s imprisonment (cf. Phil 1:7, 20; 2 Tim 1:8, 16) could therefore note that it stemmed not from God’s lack of power to release him but from Paul’s being on trial for the defense of the gospel (Acts 24:20–21; 26:6–8; 28:20; Phil 1:7, 13) and having to testify before officials as Jesus had promised (Luke 12:11–12; 21:12; Acts 9:15).⁴⁷

John Weaver rightly notes a story line common both to the three supernatural release accounts in Acts and to the Dionysus tradition, a plot that may be diagrammed as follows: “Arrival of New God/Cult → Conflict with Impious Ruler(s) → Epiphanic Deliverance from Prison → Death or Repentance of Oppressor → Establishment of Cult.”⁴⁸ His approach does allow for necessary flexibility in sequence and variation in detail,⁴⁹ and he allows for such a plot in historical as well as other genres.⁵⁰ He also

Egyptian anti-exodus polemic (72–78). He also (79–82) compares 3 Maccabees, which recalls (82–84) *Bacchanals*. (Hacham, “Polemic,” views 3 Maccabees as anti-Dionysiac polemic, less plausibly suggesting [182] that some Jews may have been attracted to the cult.) For Jewish prison-escape stories, Koskenniemi, *Miracle-Workers*, 291, cites also *Hist. Rech.* 10:5.

42. Weaver, *Epiphany*, 64–78 (esp. 66: “above all a myth-mimicker”).

43. *Ibid.*, 66–69.

44. Of itself, this would constitute a not implausible surmise for a fairly liberal Greek historian; the following sensationalism, however, reflects haggadic expansion, perhaps from earlier storytellers but not dependent on the exodus story itself.

45. Euseb. *P.E.* 9.27.23 (*OTP* 2:901). Others also cite Artapanus here (Karris, *Invitation*, 72–73). Angels delivered righteous people from prison in *Hist. Rech.* 10:5, but this appears to be a Christian monastic work.

46. For Artapanus’s linking his story of Moses’s miraculous prison escape with the larger narrative of the exodus, see Weaver, *Epiphany*, 72–78. Weaver, 102–3, notes angelic involvement in deliverances in 2 Macc 11:6; 3 Macc 6:5, 7 (though the stories alluded to in 3 Maccabees already include angels; i.e., 2 Kgs 19:35; Dan 6:22).

47. For apologetic for Paul (and his custody) being one element of Luke’s apologetic, see discussion in Keener, “Apologetic”; *idem*, *Acts*, 1:445–47.

48. Weaver, *Epiphany*, 22. He traces this plot in Acts 5 (93–148) (though overdoing the connections with Acts 1–7), in Acts 12 (149–217), and in Acts 16 (219–79). For liberating appearances in mythic settings, see 32–44; for prison epiphany as miraculous salvation, see 44–49; for avenging the god and the cult, 49–51; for reestablishing the cult, 51–53; for political functions of prison epiphany (e.g., the overthrow of Pentheus), 57–59.

49. *Ibid.*, 23.

50. *Ibid.*, 1–6, refers to historians’ use of mythic patterns (though most of Weaver’s examples belong to the distant past) and (282) associates with historical practice Luke’s selection and presentation of such

notes what is distinctive about Acts; it is not fair to say that the apostles themselves are “unhindered” — certainly they *are* hindered by such detentions — but nothing stops the gospel’s “irrepressible advance.”⁵¹ Most important is what follows the releases in Acts, indicating Luke’s theology: these incidents include “not just a release *from* prison, but also a release *for* proclamation.”⁵²

Scholars rightly note narrative connections among various jailings and escapes in Acts, though we should not use Luke’s literary connections to deny that such jailings may have occurred.⁵³ Paul’s letters testify abundantly to the reality of not only various forms of persecution (Rom 15:31; 1 Thess 2:14–15) but also repression from various kinds of authorities (2 Cor 11:23–25; 1 Thess 2:2), a repression in which, he confesses, he himself has participated (1 Cor 15:9; Gal 1:13; Phil 3:6). If Luke, providing a narrative, supplies details about persecutions (including jailings; e.g., Acts 8:3; 22:4)⁵⁴ that Paul’s summaries omit, Luke should not for this reason be held extraordinarily suspect. Only Acts provides *narratives* that include detentions in this period, though Paul’s detention by Roman authorities somewhere is unquestioned (Phil 1:7, 13; 4:22), as are a significant number of earlier imprisonments (2 Cor 6:5; 11:23). Only Acts details miraculous escapes with regard to some of these detentions, however (though cf. 2 Cor 11:32–33 with Acts 9:23–25; perhaps 1 Cor 15:32). The most we can say from Pauline evidence is that Paul would have regarded God as responsible for any release (2 Cor 1:10; Phil 1:19).⁵⁵

The variety in the escapes also shows that, despite his narrative connections, Luke is not bound to an inflexible compositional pattern. Whereas Acts 5 and 12 are similar, Acts 16 is a miraculous *nonescape*, and Acts 22–28 represents a lengthy detention also attested in Paul’s correspondence (especially Philippians and Philemon; also likely Ephesians and/or Colossians if they are accepted as genuine). Granted, the varied outcomes could also be interpreted as a novelistic technique that supports variety.⁵⁶ But the variations do not by themselves demand a novelistic interpretation. Rather, they demand only that Luke, writing about a movement that found itself in conflict with authorities from the earliest period (cf., e.g., Luke 23:1–5), focused on detentions as one of the more interesting features of his sources and believed that the Christian God, no less than Artapanus’s God of Moses or the former gods of some members

material. The best “historical” example may be the biblical adaptation in Artapanus, but it is not unlikely that if Luke had escapes in his sources (and firsthand stories from some of my own in-laws, regarding a war situation, illustrate that escapes do occur; note an example below), he would have been happy to retell them in a manner evoking such narratives.

51. *Ibid.*, 285.

52. *Ibid.*, 286.

53. Pace Goulder, *Type and History*, 188. Those who accept as pre-Lukan tradition only what can be corroborated from extant external sources employ a minimalist approach that, if applied to other historical works (on Acts as a work of ancient historiography, see discussion in Keener, *Acts*, 1:51–319), would leave us little knowledge of premodern history. If our goal is ascertaining what is historically probable rather than merely articulating the bare minimum that seems certain (cf. my brief discussion in *Historical Jesus*, 163–64), we have reason to believe that Luke has information here, just as he does in his Gospel and in the Pauline portions of Acts.

54. Prison was usually employed for temporary detention until trial or execution (Appian *Bell. civ.* 1.3.26; Plut. *Cic.* 20.3), however, not usually as a punishment (cf. Caird, *Revelation*, 35; Stambaugh and Balch, *Environment*, 35; Hemer, *Letters*, 68; esp. Rapske, *Custody*, 12–14). Sometimes it also coerced payment (Aeschines *Tim.* 16; Plut. *Caes.* 2.4; Matt 18:34); occasionally it could be envisioned as punishment (Cic. *Cat.* 4.4.7).

55. Cf. historical narrative in Eunapius *Lives* 479, which recounts as a (pagan) miracle Maximus’s release by order of the officials. Others occasionally escaped from prisons nonmiraculously, usually through guards’ carelessness or complicity (Plut. *Demosth.* 26.2).

56. Pervo, *Profit*, 18. Narratives of incarcerations “introduce great danger while evoking sympathy from the readers” (19).

of his ideal audience, sometimes intervened miraculously and at other times did not. Christians of more recent eras also have miraculous escape stories along with the more common martyr stories.⁵⁷

That the motif of divine escapes was by now widespread could be used to challenge any specific allusion to Euripides, but an allusion to Euripides probably is present (on the level of Luke's audience, regardless of whether it is present in his sources). This is suggested by the use of θεομάχοι in Acts 5:39 (see comments there); although even quotes from the widely known author Euripides can derive from handbooks or school exercises (and hence ignore their contextual source; cf. comment on the Euripides allusion in 26:14), the accumulation of allusions in this context is suggestive. If Luke hopes his audience will infer such a suggestion, however, it would be for Christ as a rival, rather than an imitator, of Dionysus.⁵⁸ For himself, his fellow God-fearers, and other believers traditionally associated with the synagogue, Luke's use of such a model would carry all the more "orthodox" associations they had already gathered in Jewish tradition.

II. THE MESSAGE OF LIFE (5:20)

The command to go speak in the temple fits the situation (it was here that the apostles could address large crowds) but also might evoke similar earlier commands to Jeremiah (again, to address all the people; e.g., Jer 7:2; 26:2; in other public places, 17:19; 18:2; 22:1). "Standing" to speak (also 5:25) may be contrasted with the usual mode of Jewish instruction (cf. Luke 4:20; Matt 5:1),⁵⁹ but it may provide better acoustics for a large crowd. It matches the apostles' posture for speaking in Acts 2:14 and would be the most familiar (though not exclusive) posture for speakers in the world known to Luke's audience (cf. 17:22; 21:40; 22:30; 24:20–21; 25:10, 18; 26:22; 27:21; 1 Cor 14:30).⁶⁰

Though the message of "this life" possibly could refer to the "way" of behavior (cf. Luke 12:15) as in wisdom tradition (see comment on the "way" in Acts 9:2), it probably refers to eternal life (Luke 10:25; 18:18, 30; Acts 11:18; 13:46, 48) through Jesus (cf. Acts 2:28; 3:15). This would make it parallel to "message of this salvation" mentioned later (13:26).⁶¹ It also suggests the sort of message Peter had already preached in the temple the preceding day (3:12–26), which included "the prince of life" (3:15).

That the site of the apostles' ministry is specifically the temple suggests that they

57. E.g., the escape of Sundar Singh, an Indian Christian mystic (Gallagher, "Hope," 163; Lynch-Watson, *Robe*, 63, 79–80, though noting questions); a story of a Yoruba evangelist (Fape, *Powers*, 98); a Chinese prisoner (Yun, *Heavenly Man*, 64, 251–62, both resembling Acts 12; less supernaturally, 44). In Congo-Brazzaville, during the 1993–94 war, one of my brothers-in-law, Aimé Moussounga (interview, Yaoundé, Jan. 13, 2013), a civilian, also providentially (and barely) escaped captors who had bound him and planned to kill him, although this story has no explicit supernatural trappings except perhaps the timing of his sister's prayers (like other "providential" escapes, e.g., in Williams, *Radical Reformation*, 142; Olson, *Bruchko*, 86–89; Trousdale, *Movements*, 152); cf. also the "miraculous" escape in Hunt, *History and Legacy*, 103 (the nature of which is not elaborated).

58. Whatever their historical origins, these stories theologically "may be setting out to rival similar liberation miracles in Dionysus traditions" (Theissen, *Miracle Stories*, 277).

59. See comment on Acts 22:3 (though noting a range of early Jewish teaching postures).

60. See, e.g., Hom. *Il.* 1.68–69; Xen. *Anab.* 5.1.2; 6.4.12; 6.6.11; Cyr. 7.5.55; Dion. Hal. *Ant. rom.* 7.47.1; Cic. *Verr.* 2.4.64.142; *Pro Amer.* 1.1; 22.60; Virg. *Aen.* 11.342; Plut. *Cic.* 16.3; *Coriol.* 16.2; Pliny *Ep.* 4.9.18; 9.13.18; Lucian *Peregr.* 31 (Albucius's approach in Suet. *Rhet.* 6 is unusual); also comment on Acts 2:14. It might contrast with the "standing" of guards (Acts 5:23) or being "stood" before the Sanhedrin (5:27), though supporting clues are too few to render this more than speculation.

61. With, e.g., Marshall, *Acts*, 118 (noting that Syriac translates "life" and "salvation" with the same term); Johnson, *Acts*, 97.

continue Jesus's ministry (Luke 20:2)⁶² and hence Jesus's confrontation with the temple authorities. In a sense, they seek to "reclaim" the site; God's message ought to be proclaimed there of all places.⁶³ This contrasts with the passive approach of most who worshiped in the temple, however they felt toward the authorities, and the monastic Essenes' apparent surrender of the temple to its defilement. It also contrasts with the approach of the apostles later in Acts, when at least Peter (who had been slated for execution) went into hiding during the fiercer persecution under Agrippa I (Acts 12:17), and perhaps with the uneasy, temporary peace that prevailed afterwards, before James's execution (21:18).

c. *The Council's Reaction* (5:21–28)

Going to the city's most public place in direct defiance of the authorities' orders was calculated not to maintain the apostles' safety but to obey the angels' command (5:20). That the apostles followed divine instructions by speaking (5:21, 29) contrasts starkly with the rulers' expectation of obedience to their own command to be silent (5:28). This portrayal fits the narrative's larger characterization of the apostles as obeying God rather than people (5:29–32).

I. MORNING DISCOVERY (5:21–25)

The apostles began teaching immediately at daybreak (5:21), about when the Sanhedrin began to gather to deal with them. Public life in the ancient Mediterranean world began at daybreak, and not only in Judea. Thus, for example, Roman clients approached their patrons early in the morning, those in front of the line receiving attention beginning around dawn, usually about 6:00 a.m.⁶⁴ Jewish people were well aware of this practice; "friends" or clients of officials could visit them even before the sunlight was widely viewed (3 Macc 5:26). Senators also could assemble at daybreak,⁶⁵ even schools started then.⁶⁶

Jewish people offered morning prayers before work at sunrise (*m. Ber.* 1:2). At night guards kept closed the gates of a temple,⁶⁷ like the gates of cities.⁶⁸ The Levite guards must have opened the temple, however, "in time for the sacrifice at daybreak."⁶⁹

62. With, e.g., Crowe, *Acts*, 26. Temples were common sites for teaching (e.g., Dio Chrys. *Or.* 36.17; Philost. *Vit. Apoll.* 4.2; see comment on Acts 2:46); but they were not the only sites, and hence Luke's story as a whole offers the dominant interpretive grid.

63. Barrett, *Acts*, 284, finds doubtful the views that "the Temple now belongs to the Gospel" (Stählin, *Apostelgeschichte*, 89) or that "this proclamation is the purpose for which God intended the Temple" (Roloff, *Apostelgeschichte*, 102). Admittedly, a temple was simply a natural public site for assembling and speaking (cf. Watson, "Education," 310), but the apostles do seem to be (spiritually, not politically) "reclaiming" it to some degree (Acts 3:11; 5:12).

64. E.g., Hor. *Sat.* 1.1.9–10; *Ep.* 2.1.103–5; Mart. *Epig.* 3.36.1–3; see further Friedländer, *Life*, 1:86–93; Clarke, "Italy," 475; receiving guest-clients was important to civic-minded nobles (e.g., Plut. *Cic.* 8.3–4). Roman governors followed the same pattern of early-morning meetings; e.g., *Cic. Verr.* 2.4.66.147 (despite the exceptional circumstances; allowing one to come only at daybreak may reflect arrogance, as it does in Theophr. *Char.* 24.7); Plut. *Cic.* 36.3; cf. Mark 15:1; Luke 22:66; 23:1.

65. *Cic. Fam.* 1.2.4; Plut. *Cic.* 15.3; 19.1.

66. Watson, "Education," 311–12; for Jewish schools, see also Safrai, "Education," 954.

67. *Jos. Ag. Ap.* 2.119; *m. Šeqal.* 5:1 (Ben Geber); Barrett, *Acts*, 284. Haenchen, *Acts*, 249, cites *Jos. Ant.* 18.29 to argue that the gates opened at midnight (it may well be relevant, but it might apply only to Passover, as Bock, *Acts*, 239, also notes).

68. Polyb. 4.18.2; cf. Rev 21:25. This was certainly the practice during war (Sen. *E. Controv.* 5.7), when it might be enforced during the day (Dio Chrys. *Or.* 36.16).

69. Barrett, *Acts*, 285 (citing Exod 29:39; Num 28:4; Philo *Spec. Laws* 1.169; *m. Yoma* 3:1–2; though noting *m. Ed.* 6:1); for the morning sacrifice, see also 11QT XIII, 15; *Jos. Ant.* 3.257; 14.65; *Ag. Ap.* 2.105; Philo *Heir* 174, 199; *Spec. Laws* 1.171, 256. For some questions concerning the official "hour of prayer," see comment on Acts 3:1.

Some Jerusalemites and visitors would begin gathering this early⁷⁰ for the morning prayer, and so the apostles would find a ready-made crowd to teach at that time. Perhaps most significantly, they continued Jesus's practice of beginning his temple teaching early in the mornings (Luke 21:38).

Although the leaders quickly discovered that the apostles were already teaching in the temple (Acts 5:25), it may be noteworthy that it was not part of their own group that informed them (note "you" in 5:25). In contrast to the apostles (3:1), the mostly priestly city leaders are depicted as further removed from the liturgical life of the temple and the Jerusalemites who worshiped there. For comments on the meaning of "teaching" the gospel, see comment on Acts 5:42.

"All the senate of the house of Israel" (5:21) is probably emphatic: the apostles will witness to the leaders of Israel as Jesus had declared (Luke 12:11–12; 21:12–15). Granted, this need not indicate that every member was available. Yet because the matter was so important and word would have circulated (formally or informally) since the close of the previous day's session,⁷¹ we should expect a large complement of the Sanhedrin present (probably larger than usual). That it gathered before the apostles were summoned indicates for Luke's audience that the entire assembly would be confronted with the report of the miracle (or, from their view, the escape) that had taken place.⁷² Luke's careful summary of the groups gathered here may contrast their self-importance (cf. Acts 25:23) with the public embarrassment the leaders are about to receive (Acts 5:24).

Officers were regularly sent to carry out not only arrests but also transfers of detention and other such matters (e.g., P.Oxy. 65). Most cities in the empire had their own "locally recruited watchmen," rarely effective except in Roman colonies.⁷³ Jerusalem used Levites to guard the temple grounds.⁷⁴ The temple guards' most important duty was to guard the temple at night (*m. Mid.* 1:2).⁷⁵ The term ὑπηρέτης has a wide range of usage, including for attendants in the synagogues (Luke 4:20)⁷⁶ or other kinds of assistants (Acts 13:5).

That the guards were at the custody site (5:23) implies that the guards had not abandoned their post and presumably also had not participated in a conspiracy. (Perhaps not everyone would have found this argument persuasive; cf. Agrippa I's view of his guards' failures in 12:18–19, but he is presented as more bloodthirsty than the Sanhedrin.) In a drama, the report here would have been adequate without narrating the action itself,⁷⁷ but Luke has already recounted the action in 5:19–20, albeit briefly.

70. For Jewish prayer at sunrise, see esp. Manns, "Ante lucem"; cf. Philo *Contempl.* 27; *Flacc.* 122; *Jos. War* 2.128; *Ag. Ap.* 2.10; but esp. fuller comment on hours of prayer at Acts 3:1. Knowing, "Acts," 150, relates ὄρθρον to the Judean heat after early morning.

71. Particularly likely for the majority of members who would have lived in the Upper City.

72. For another example of an unpleasant surprise for a gathered senate, see *Plut. Cic.* 15.3 (cf. 1 *Kgs* 1:42–49).

73. Stambaugh and Balch, *Environment*, 34.

74. See 1 *Chr* 9:17–27; 15:18–24; 16:38–39; 23:3–5, 19; 2 *Chr* 34:13; 35:15; *Ezra* 2:42, 70; 7:7; 10:24; *Neh* 7:1, 45, 73; 10:28, 39; 11:19; 12:25, 45–47; 13:5, 22; comment on Acts 4:1; 21:30.

75. Barrett, *Acts*, 286; cf. *Jos. War* 4.298; 6.131; *b. Hor.* 13a; *Tamid* 25b; 27a; for priests ministering at night, cf. *Jos. Ant.* 7.367; *War* 6.299; *Ag. Ap.* 1.199; *b. Ta'an.* 17a; *Zebah.* 87a.

76. Also in one Roman synagogue (*CIJ* 1:xcix); on the *chazzan*, see further *t. Meg.* 3:21; *CIJ* 2:94–95, §855 (but reconstructed); Moore, *Judaism*, 1:289; Safrai, "Synagogue," 935; Leon, *Jews of Rome*, 190. That these Greek and Hebrew terms are equivalent is likely (*Jos. Ant.* 4.214; 12.152; *CIJ* 1:124, §172; 2:57, §805; *Epiph. Her.* 30.11; cited in Applebaum, "Organization," 496; Le Cornu, *Acts*, 695).

77. See Zimmerman, "Messenger Scenes," 765; staging or convention limitations led some actions to be merely narrated in messengers' speeches (cf. *Job* 1:14–19).

Because Sadducees did not (at least according to Josephus)⁷⁸ accept direct divine intervention, they could not but be astonished (5:24; cf. *Jos. Ant.* 13.173).⁷⁹ They do, however, seem more concerned about the potential results of the escape (τί ἄν γένοιτο τοῦτο) than its cause (miracles being ruled out a priori); for Luke's implied audience, this is a morally and probably intellectually negative trait, certainly incompatible with their own Christian beliefs (Acts 4:2; 23:8; Luke 20:27).⁸⁰ By contrast, some non-Sadducean members of the Sanhedrin may have been more open to entertaining the possibility that God had acted (cf. Acts 5:39; 23:9). In contrast to the leading Sadducees (5:17), these other members had not arranged the arrest but only come to discuss it and may have felt the political threat (and personal shame; see below) less fully than the Sadducees did.

In addition to being perplexed,⁸¹ the highest priests and captain of the guard (see comment on Acts 4:1, 5–6) undoubtedly lost face (were shamed) in front of the other Jerusalem leaders they had gathered (5:21). (The captain of the guard would bear primary official responsibility for the proper detention of the prisoners, but his relatives the high priests had also failed to anticipate this situation [5:17–18].) They do not know what is happening and are not in control of the situation, inverting expectations for honor and shame vis-à-vis the apostles.

Whether enemies explained the apostles' escape as due to sorcery or (more likely for the Sadducees) unanticipated human allies (cf. Acts 12:19; perhaps John 7:46–47), the escape presented the apostles as all the more dangerous a threat. If the escape were believed by the crowds to be miraculous, it would heighten the apostles' credibility all the more.⁸² That the apostles were preaching in the temple instead of escaping⁸³ indicated that they were not even afraid of the Sanhedrin—which could appear to the leaders as at once a mark of their confidence in their dangerous popularity and an act of defiance that further shamed the leaders. It constituted a public challenge to their authority, demanding a strong show of force. Yet the increasing popularity of the apostles made such a show of force dangerous (Acts 5:26).

II. REARREST AND CHARGE (5:26–28)

In addition to the shaming of the elite, Luke has to explain how the apostles survived such daring behavior relatively unscathed. Under the corrupt dynasty of Annas and Caiaphas, the Levite temple guards were known for their use of violence.⁸⁴ Nevertheless, soldiers occasionally were too persuaded by speakers they were sent to arrest or execute to carry out their commission.⁸⁵ Here the matter is not personal conviction but concern not to stir the unrest of the crowds,

78. He did present the “sects” so as to correspond with some Jewish philosophic sects, and his sympathies for the Sadducees were limited (though the level of his self-claimed Pharisaic commitment is also questionable).

79. Larkin, *Acts*, 92.

80. Conzelmann, *Acts*, 41, too quickly dismisses the coherency of a rearrest after a miraculous release; granted, it works for Luke's purposes, but it also coheres with the logic of the story world.

81. The verb also applies to hearers at Pentecost (Acts 2:12), to Peter grappling with his vision (10:17), and to Herod Antipas wondering about Jesus (Luke 9:7).

82. Leaders with a Greek education would be familiar with the stories of miraculous escapes surrounding Dionysus's deadly confrontation with King Pentheus. They would also be familiar with the unsubmitiveness of unorthodox Jewish holy men (on “charismatics” and their conflicts with later sages, see Vermes, *Jesus and Judaism*, passim).

83. Cf. the boldness of Moses, who, when miraculously released, went to awaken the king who had imprisoned him (Artapanus in Euseb. *P.E.* 9.27.24).

84. Barrett, *Acts*, 286 (citing *b. Pesah.* 57a; *t. Menah.* 13:21). One would normally understand rulers' “violence” negatively (Dio Chrys. *Or.* 2.75).

85. E.g., Val. Max. 8.9.2 (cf. also 2.10.6); App. *C.W.* 1.8.72; John 7:45–46; cf. 1 Sam 19:20–24; 22:17.

which could prove dangerous in Jerusalem.⁸⁶ Popular support for a hero appears in novels,⁸⁷ but at this point novels reflected social reality about celebrities; sometimes popular support did protect a person (e.g., Jos. *Life* 250; see further comment at Acts 2:47). If the apostles had proved agents of healing for the masses, they would be quite popular.⁸⁸ Leaders in most societies feared “demagogues” who could play on the “irrational” fears of the masses and stir unrest (see comment on Acts 4:21).⁸⁹ Politics sometimes demanded compromise; in one notorious instance, most jurors voted illegibly so as to “neither risk their lives with the populace by condemning” Clodius nor anger other aristocrats “by acquitting him” (Plut. *Caes.* 10.7 [*Lives*, LCL, 7:467]).

The fear of the people “stoning” them recalls Lukan redaction in Luke 20:6. Luke reports such a pattern of concern about the views of the populace among Jerusalem’s leaders (Luke 19:47–48; 20:6, 19, 26; 22:2, 6, 53; Acts 4:21), and their charge that Jesus was misleading the people (Luke 23:5, 14), that his narrative as a whole suggests that Jerusalem might have embraced the message about Jesus had the corrupt authorities not thwarted this (leaving a spirit of bitterness between the groups). This theme suggests that, for the moment at least, “effective power over the populace has passed to the apostles.”⁹⁰ Perhaps like Elijah, the apostles voluntarily accompany guards to speak God’s message to those who summoned them;⁹¹ Jesus had told them that they would speak to rulers (Luke 12:11; cf. 21:12). That they go willingly seems to be assumed, since the temple guard cannot use violence.⁹²

This is not likely a mere doublet of the tradition also reflected in the previous hearing (Acts 4:3–22); most ancients knew enough to distinguish a preliminary hearing concluded with a warning and a punishment for disregarding the warning (see also comment on Acts 4:21).⁹³ Paul also endures multiple hearings later in Acts, though for quite different reasons.

Although it is striking to us (as Luke probably intended) that the interrogators skip over the problem of how the disciples escaped, this matter was less pressing to the authorities than the apostles’ disobedience to their previous warning, disobedience that provided them formal grounds for action (5:28). “Filling” Jerusalem with their teaching (5:28) reflects the apostles’ success (5:12–16), which Luke has already claimed provoked the Sadducean priests’ jealousy (5:17).⁹⁴ Claiming that evildoers had “filled” a vast area with something negative seems to have become a conventional hyperbole.⁹⁵

86. E.g., Jos. *Ant.* 20.108; *War* 2.325–27.

87. Pervo, *Profit*, 35; cf. Char. *Chaer.* 4.7.5; Conzelmann’s citation (*Acts*, 42) of Philost. *Vit. Apoll.* 1.16 as an analogous example of popular unrest.

88. See my *Acts*, 1:366–67, 370. Many think that Jesus’s activity as a healer was a primary draw for crowds (Sanders, *Figure*, 154; cf. Theissen, *Miracle Stories*, 72), just as people in antiquity traveled from far away to reach healing sanctuaries (Casson, *Travel*, 130–35, 193–94) and flocked to hot springs (Keener, *Matthew*, 158).

89. Even Socrates (see comment on Acts 5:29) was accused of socially subversive behavior (e.g., Xen. *Apol.* 20).

90. Johnson, *Acts*, 97. As in the case of the Pharisees, this should be nuanced as a matter of popular religious support, not political power.

91. 2 Kgs 1:15–16, though there the angel commanded Elijah to go whereas here he has commanded the apostles to teach (Acts 5:20).

92. Chance, *Acts*, 94, suggests the humor in this scene as well as in the officer’s being earlier unaware of their activity in the temple, his own jurisdiction.

93. With, e.g., Witherington, *Acts*, 228–29.

94. Also a “filling,” as with Ananias in Acts 5:3; but given Luke’s usage of “filling” language elsewhere (e.g., 13:45; 19:28), the cluster of negative fillings here might be coincidence.

95. Whether a city with confusion (Acts 19:29), “all cities” with Cynics (Lucian *Runaways* 16), the world with false accusations (by Gaius Caligula, Jos. *Ant.* 19.14), or the empire with false teaching (Lucian *Alex.* 2).

Speaking of bringing “blood on them” (5:28) refers to the concept of bloodguilt: one who carried guilt for shedding innocent blood would need to be punished.⁹⁶ In the larger context of Luke-Acts, ironically, the apostles would carry bloodguilt for their hearers if they *failed* to speak (20:26, echoing Ezek 33:6; cf. Acts 5:29; 18:6). Hearers who heard but rejected bore their own guilt (Acts 18:6). Further, as Peter boldly points out, the leaders *were* guilty of Jesus’s blood (5:30), thus climaxing a series of martyred prophets that stretched through all salvation history (Luke 11:50–51). Thus the apostles do not seek to bring Jesus’s bloodguilt on these leaders; the leaders have brought it on themselves.⁹⁷

2. Obeying God rather than the Elite (5:29–33)

Peter and the apostles confront the elite again, again emphasizing that obedience to God takes precedence over obedience to other authorities. The apostles must obey God (Acts 5:29), and this is why they can act by the Holy Spirit, whereas the authorities, who do not obey God, cannot (5:32). The apostles are simply witnesses to what they have seen (5:32); meanwhile, the authorities killed the true king and Savior whom God appointed for Israel (5:31)—just as they now are tempted to kill the king’s agents (5:33).

a. Obeying God (5:29)

Although this speech states its points concisely, Luke has offered a fuller context for these points in earlier speeches addressed to the Sanhedrin or to Jerusalemites in general. Unlike most speeches, it lacks a *captatio*. Although Acts includes only summaries of speeches rather than transcripts, the lack of even an address (in contrast to 4:8) seems deliberate (and would sound abrasive; cf. Luke 15:29). The content of this brief speech is good forensic rhetoric against accusers (though it was not, of course, considered good against judges): it reverses the charge of disobedience (seeking to convict, not, as in the deliberative rhetoric of passages such as Acts 2:14–39 or 3:12–26, to persuade). As members of the elite, the Sanhedrin would not anticipate such boldness (or effrontery) from commoners, but they certainly would understand that they were being accused.

Peter’s claim⁹⁸ to obey God rather than people⁹⁹ (echoed in the closing words of this brief speech in 5:32) likely recalls a line commonly quoted in the Greek world,

96. See Gen 4:10–11; Deut 19:10, 13; 21:8–9; 22:8; 2 Sam 1:16; 3:8; 21:1–6; 1 Kgs 2:32–33, 37; 21:19–24; 2 Kgs 21:16; 24:4; Ps 106:38; Prov 6:17; Jer 7:6; 19:4; 22:3, 17; 26:15; Ezek 18:13; Hos 12:14; Matt 23:35; 27:4, 24–25; cf. Lev 20:9–16, 27; *Test. Zeb.* 2:2; Xen. *Eph. Anthia* 4.2; for the Canaanite concept of bloodguilt, cf., e.g., Pfeiffer, *Ras Shamra*, 43.

97. In an ironic sense, they do seek to bring Jesus’s blood on others salvifically; but Luke does not apply the image of Jesus’s blood this way (even in Luke 22:20; Acts 20:28), and such exploitation of verbal irony is more often Johannine, or possibly Pauline, than Lukan.

98. It seems safe to presume that Peter is the primary spokesperson, as generally when he is named along with others (Luke 9:20; Acts 1:15; 2:14, 37–38; 3:4, 6, 12; 4:8, 13, 19; 8:14, 20; cf. Pesch, *Apostelgeschichte*, 1:216); Luke can speak of a team yet acknowledge a primary spokesperson (Acts 14:12).

99. The pairing of “gods and people” was familiar rhetorically (e.g., Polyb. 18.54.9, 11; 22.10.8; 27.8.4; Sen. *Y. Ben.* 7.1.3; Mus. *Ruf.* 9, p. 76.10; Dio Chrys. *Or.* 1.40; Fronto *Ad M. Caes.* 3.12; for the one God, *Test. Reub.* 4:8; *Test. Levi* 14:7; *Test. Jud.* 16:4; Luke 2:52; Rom 14:18; Poly. *Phil.* 6.1), including in speaking of impiety or hostility toward both (e.g., Polyb. 15.20.4; 32.15.13). The contrast between God and humans is frequent in early Christian texts (Mark 7:8; 10:27; John 12:43; Rom 2:29; 1 Cor 1:25; 2:5, 11; 14:2; 2 Cor 5:11; Gal 1:1, 10; 1 Thess 2:4, 13; 1 Pet 2:4; 4:2, 6; 1 John 5:9; Ign. *Rom.* 2.1; Poly. *Phil.* 5.2), including in Luke (Luke 2:14; 12:8; 16:15; 18:27); the contrast in Acts 5:29 may also echo that emphasis in 5:4. Antithesis was

a line lost neither on Sadducees nor on Luke's audience.¹⁰⁰ People throughout the Mediterranean world knew the story of Socrates's trial, and his obeying God rather than his judges (Plato *Apol.* 29D) was a line easily remembered. Though it had become enough of a commonplace to be used without reference to its source, Luke may count on his ideal audience's recalling the source of the echo (as in his more explicit Scripture citations; cf. Acts 17:19). Although 5:29 echoes this line more clearly than does 4:19, this commentary has treated the allusion more fully under 4:19 (because it surfaces there first); whereas 4:19 is framed in a more conciliatory way as a rhetorical question, however, 5:29 responds more directly. In either situation, this was not an allusion the Sanhedrin would expect to hear from Galileans,¹⁰¹ but still less was it a sentiment the authorities would wish to be expressed. It would frame them in the same role as those who martyred Socrates—an allusion that fits Luke's point perfectly (5:30).

What was the divine commission they were called to obey? God had given them commands through Jesus (1:2), specifically that they should be “witnesses” (1:8; hence 5:32). They could not obey the leaders' command to silence and still obey Christ's command to speak. Paul later echoes obedience to this same commission in 26:16–19.¹⁰²

b. The Message (5:30–32)

In connection with obeying God rather than people (5:29), the apostles in 5:30–31 contrast God's power with the political power of Jerusalem's elite who are essentially “fighting against God” (5:39). The same God who delivered them from unjust imprisonment had delivered Jesus from unjust death (5:30). “The God of our ancestors” is a familiar Lukan and LXX phrase (3:13; 22:14; 24:14; cf. 7:32; 22:3; 26:6; 28:17; elsewhere in the NT only at Matt 23:30; see fuller comment on Acts 3:13); its primary function here is to ground the apostolic message in Israel's history, against the Sanhedrin. For the shame and suffering attached to crucifixion, see comment on Acts 2:23.

The municipal aristocracy does not want to have Jesus's blood attributed to them (Acts 5:28), but Peter minces no words. (Luke's ideal audience, valuing portraits of philosophers' frank insistence on truth or prophets' courageous declaration of God's justice, will no doubt appreciate Peter's stance more than did his audience within the narrative.) One might expect Peter to speak of the leaders having “crucified” Jesus by Roman hands (2:23), but instead he speaks in a manner appropriate not to Romans but to Israel's leaders: they “hanged him on a tree” (also Acts 10:39; Gal 3:13; Paul also calls the cross “wood” or a “tree” in Acts 13:29). Luke's contemporaries knew about crosses and would know that they are not normally called “trees.”¹⁰³ The lan-

a familiar rhetorical device (e.g., *Rhet. Alex.* 26, 1435b.25–39; Rowe, “Style,” 142; exploited most notably by Gorgias, most being more restrained; MacDowell, “Introduction,” 18).

100. With most commentators (e.g., Pesch, *Apostelgeschichte*, 1:216; Conzelmann, *Acts*, 42; Barrett, *Acts*, 237; Witherington, *Acts*, 197; Boring, Berger, and Colpe, *Commentary*, 314). In turn, Luke's formulation influences 2 *Clem.* 4.4.

101. The words were a commonplace whose source would not always be recalled (indeed, Plato was hardly the first to speak of “obeying” deities; Hom. *Il.* 1.218; Exod 19:5; Deut 27:10). It is admittedly difficult to think how else the apostles could have responded to the Sanhedrin, given their conviction, but Luke would have freedom to phrase these words so as to recall other ideas (like a Socratic allusion) to his hearers. If pressed, perhaps Luke would attribute the allusion to the Spirit (Luke 12:11–12) rather than to Peter or even the collective knowledge of the Twelve; but cf. Paul's comparable classical allusion in Acts 26:14.

102. For reception history of Acts 5:29 from the Latin fathers through the twelfth century, see Tasca, “Pia disobbedienza.”

103. For an exception, Brown, *Death*, 947, cites Sen. *Y. Ep. Lucil.* 101.14. Ancients also impaled people on stakes or trees (Diod. Sic. 33.15.1), but without thinking of this as the usual means of crucifixion.

guage alludes to a shameful mode of execution in Deut 21:22–23 (cf. Gen 40:19),¹⁰⁴ which other Jews by this period applied to crucifixion, including for charges of treason (11QT LXIV, 7–8) or evading the law (LXIV, 10–12).¹⁰⁵

Much of the apostles' expectation for Israel echoes popular sentiments based on biblical hopes.¹⁰⁶ Because Jesus's mission included salvation for Israel (Acts 5:31), the apostles needed to keep preaching to the people in the temple (5:20)—and hence could not submit to the Sanhedrin's demands for silence. Jesus was Israel's rightful prince (whom the authorities, as caretakers who essentially became usurpers, had participated in killing, 5:30; cf. Luke 20:14). The hearers understand the apostles' claim politically (Acts 5:36–37), and whether the claim is good or bad politics depends on whether God is genuinely with them (5:39). That the authorities killed the rightful prince of Israel portrays them as corrupt. As already noted, this was partly true for leaders of the Sanhedrin. Herod the Great had appointed members to the Sanhedrin after killing their predecessors, and many of the current members would be descended from his appointees.¹⁰⁷ (Herod did not like Pharisees, though more were apparently gaining entrance into the council by the time portrayed in 23:6.)

Although ἀρχηγὸν καὶ σωτῆρα is not technically a hendiadys, the thoughts are closely connected; Jesus is the ἀρχηγός of life and hence also naturally the one who authors or pioneers salvation by being the first to rise from the dead (on the meaning of ἀρχηγός, see extended comment at Acts 3:15). Angels (Luke 2:11) and Paul (Acts 13:23), speaking to Jewish audiences, also identify Jesus as the Savior; Peter has already declared him the only way of salvation (4:12).¹⁰⁸ The first term probably connotes also authority or rank (some even translate “prince”);¹⁰⁹ kings were often called “benefactors” (see comment on Acts 4:9) and “saviors,”¹¹⁰ and in any event, Jesus's exaltation to the Father's right hand (echoing 2:33) assures his authority.¹¹¹ Jesus had a higher claim to authority than did the priestly authorities (cf. 3:15–17, also stressing the leaders' responsibility).

It would appear bad enough to the authorities that the apostles maintained that the authorities had miscarried justice in the execution of Jesus (5:28), and worse, that the execution itself, meant to suppress the movement, had become foundational to it; but the disciples now “improved upon” this “intolerable impertinence” by claiming that God had used it to exalt Christ as the supreme Lord (Ps 110:1).¹¹² The apostles also

104. Often noted, e.g., Morris, *Cross in New Testament*, 142; cf. Davies, *Paul*, 227–28n3; Marguerat, *Actes*, 195; Arnold, “Acts,” 256. The language of the biblical text continued to be used and understood (e.g., Jos. *Ant.* 4.202); Philo allegorizes it (Knox, *Jerusalem*, 132).

105. Fitzmyer, *Acts*, 337 (citing also 4QpNah 3–4 I, 6–8, which refers to the situation in Jos. *Ant.* 13.379–80; 11QT LXIV, 7–8). Execution by such “hanging” was common (e.g., Philo *Flacc.* 85).

106. Most of this made sense within various existing expectations; e.g., opportunity for repentance appears elsewhere (cf. Acts 17:30; Philo *Alleg. Interp.* 3.106; Plut. *Alex.* 11.4), and “cleansing from sins belongs to this eschatological picture (*Pss. Sol.* 17.22–23; *Jub.* 4.26; 50.5; *1 En.* 10.22; *Test. Levi* 18.9; *Test. Jud.* 24.1)” (Conzelmann, *Acts*, 42; cf. also biblical writers, e.g., Mic 7:19).

107. For his killing the Sanhedrin, see Jos. *Ant.* 14.175.

108. Moses may provide an OT model for a bringer of salvation (see Acts 7:25).

109. Cf. Johnston, “Archegos,” 385. Jesus also appears here with a dual title analogous to that of Moses in Acts 7:35 (e.g., Cribbs, “Agreements,” 55), again indicating rank.

110. Cf. comment on Acts 4:9; 27:20. Gilbert, “Propaganda,” 237–42, surveys “savior,” especially its political ideological application to emperor (238–39); but we should note that Luke employs the noun only in distinctly Jewish contexts (Acts 5:31; 13:23; Luke 1:47; 2:11), though Luke 2:11 probably does imply a contrast with the emperor (2:1).

111. “Right hand” alludes to Ps 110:1 (as in Acts 2:33); “exalted” may echo the language of the servant (Isa 52:13) and/or divine language (6:1; 57:15; see Bauckham, *Crucified*, 49–51, esp. 51).

112. Judge, “Scholastic Community,” 12–13.

insist on Israel's repentance for the misdeed, still proclaiming the offer of repentance and the forgiveness of sins (as in Acts 2:38).

Peter's speech begins (5:29) and ends (5:32) with the note of "obedience" to God; this is clearest in the Greek text, where his speech begins with a word translated "We must obey" and ends with "obey him" (5:29, 32).¹¹³ Peter and his colleagues claim to have obeyed God rather than the Sanhedrin (5:29); thus they have already implied that they, rather than the Sanhedrin, obey God. Now they make this claim more explicit. By appealing to the Spirit as evidence of obedience, the apostles (who have demonstrated their possession of the Spirit to the Sanhedrin in 4:8 and for the readers in 5:3, 9) imply that the Sanhedrin, which lacks the Spirit (cf. Rom 8:9; Jude 19), does not obey God. (On the Spirit as "gift," see comment on Acts 2:38.) As was frequent in forensic rhetoric, Peter and his colleagues have gone on the offensive (see comment on Acts 7:51–53).

Some Jewish tradition linked the Spirit with obedience or exceptional holiness.¹¹⁴ In Luke's summary of an element of the apostolic message, the obedience that brings the gift of the Spirit begins with repentance (Acts 2:38). Stephen soon carries Peter's challenge further by explicitly accusing his audience (which Luke presents as roughly the same, 6:12, 15; 7:1) of resisting the Holy Spirit (7:51).

The pairing of the witness of the Spirit and Jesus's followers appears also in the Johannine Jesus tradition (John 15:26–27).¹¹⁵ Historically, this commonality probably suggests pre-Lukan and pre-Johannine tradition behind both sources, perhaps reflecting teaching in the Jesus tradition; rhetorically, it places the testimony of the apostles here (and Jesus's followers in John) on the higher level of divine inspiration.¹¹⁶ To disobey their message is thus to disobey God; even Israelite kings had often thought twice before disobeying Israelite prophets.¹¹⁷

In challenging the officials' behavior, Peter and the other apostles appear unafraid even of provoking their martyrdom. This fearlessness indicates their absolute conviction (not surprising in the narrative world, in view of their experience of witnessing Jesus's resurrection and ascension, and the continuing miracles). It may also reflect their conviction that Jesus would soon establish the kingdom, prevailing against the abusive authorities, whatever actions the authorities might undertake beforehand (cf. 3:20–21, although the timing seems contingent on Israel's repentance, 3:19).

c. The Authorities' Response (5:33)

The apostles' refusal to be intimidated threatens the elite's socially accepted status of honor. Whereas Peter's first audience was struck to the heart in a manner leading to repentance (Acts 2:37), Luke warns that the response to the Spirit's conviction is not always positive, especially when it encounters hardened hearts (cf. 7:51). Διαπρίω, the term used here, indicates mortal rage; in its other NT use, following Stephen's speech (which pushes further the point of this one in 7:51–53), the object of rage

113. The *inclusio* is noted by Dunn, *Acts*, 69 (also noting the fourfold mention of God); it is clearer than the proposed chiasmus (Zehlnle, *Pentecost Discourse*, 39) that also includes it. That *πειθαρχεῖν* in Acts 5:29 is connected with *πειθαρχοῦσιν* in 5:32 is inescapable; the verb appears nowhere else in Luke-Acts except 27:21 (and elsewhere in the NT only at Titus 3:1; in the LXX, Dan 7:27; 1 Esd 8:90; Sir 33:29).

114. E.g., *Mek. Besh.* 7.135ff; *Sipre Deut.* 173.1.3; *'Abot R. Nat.* 11, §28 B; *b. Sukkah* 28a, bar.; *y. 'Abod. Zar.* 3:1, §2; *Soṭah* 9:16, §2; *Exod. Rab.* 5:20; *Lev. Rab.* 35:7; *Song Rab.* 1:1, §9; see further Keener, *Acts*, 1:522n197.

115. Cf. Bruce, *Time*, 97; Keener, *John*, 1021–24.

116. Cf. Menzies, *Development*, 53–112; Turner, *Power*, 86–104; Keener, *Spirit*, 10–13; see *idem*, *Acts*, 1:523–24, 531–32, 537.

117. On "prophetic immunity," see, e.g., Gordon, *Near East*, 222.

was martyred (7:54).¹¹⁸ Without employment of the same term, Nazareth's hostile response to Jesus's challenges conveys the same idea of mortal rage (Luke 4:28), indicating that the same pattern of response to God's agents continues.¹¹⁹ God's servants may anticipate rejection, just as in Israel's story (Luke 11:47–50; Acts 7:52) and Jesus's story. Generating emotive response characterized pathos in ancient rhetoric (normally to stir sympathy), but the stirring of anger in judicial rhetoric was normally designed against one's enemies, not oneself. The philosophic (in contrast to the rhetorical) tradition preferred repentance to applause as the proper response to speech (Mus. Ruf. frg. 49, p. 142.12–19), but a response of pure hostility suggests the tradition of martyred prophets (Luke 11:47–50; 13:34; Acts 7:52).¹²⁰ Although their intention is averted this time, it is carried out at the end of the narrative's next trial scene (Acts 7:54–60).

That the authorities “wanted” (ἐβούλοντο) to kill the apostles makes ironic light of the high priest's charge that the apostles unjustly “wanted” (βούλεσθε) to charge the leaders with Jesus's blood (5:28). Wanting to kill may reflect typical sentiments for offended aristocrats avenging breach of social order, but it violated Roman restrictions on capital authority.¹²¹ Such restrictions could be finessed politically (Luke 23:1–2), especially for followers of one executed for sedition, but the text may suggest that many members were angry enough to act extrajudicially on the spot (cf. Acts 7:57–58; 23:10). Had they sought grounds in the law for executing the apostles, they might have appealed to the prohibition against speaking evil of rulers (cf. 23:5; though this was hardly a curse as in Exod 22:28; the false charge in 1 Kgs 21:10, 13). By performing this act, the leaders would simply confirm the line of behavior with which the apostles had charged them—abusing authority to kill God's agents (Acts 5:30).

Although ancient reports suggest that the Sadducees, like many other powerful elites, sometimes abused their power violently, the Pharisees by this period, like their rabbinic successors, were probably much more stringent in evidential requirements for capital cases.¹²² That the Sanhedrin did not, so far as we know, engage in lynchings¹²³ suggests that historically its members probably would not have carried through their anger on this occasion, but neither were they often confronted with insubordination from leaders of a rapidly growing movement in their capital. (We do know of violent interactions in an earlier period, reflected in both Josephus and the Qumran scrolls.¹²⁴ We also know of violence even among competing aristocratic parties a generation later.)¹²⁵ Given the contrast with 7:54–58, however, Luke may suggest that the lynching would have occurred but for the intervention of Gamaliel (5:34–39).¹²⁶

118. It originally conveyed a cutting image; Barrett, *Acts*, 291, notes classical usage for grinding teeth (e.g., Aristoph. *Frogs* 926–27; for sawing through, BDAG cites also *SIG*² 587.160; 304; sawing in 1 Chr 20:3).

119. Luke 4:28–29 is part of Luke's programmatic section and prefigures Jesus's crucifixion; it also roots Jesus in the history of earlier prophets (4:24–27), as does Stephen's situation (Acts 7:52–54). Jesus's teaching generated positive emotional response among his followers (Luke 24:32).

120. Of course, philosophers also endured martyrdom. When one protested Socrates's being executed unjustly, he reportedly replied, “Would you prefer that I be executed justly?” (Xen. *Apol.* 28).

121. See John 18:31; Keener, *John*, 1107–9; Sherwin-White, *Society*, 32–43, esp. 36.

122. Cf., e.g., Jos. *Ant.* 13.294; *Tg. Neof.* 1 on Lev 24:12; *Tg. Ps.-J.* on Lev 24:12.

123. Later tradition suggests that they rarely approved executions even when they held capital authority (*m. Mak.* 1:10; Le Cornu, *Acts*, 288), but this may be a later, rabbinic idealization.

124. In the Scrolls, see 1QpHab VIII, 8–12; IX, 4–7; XII, 5; 4QpNah I, 11; between Pharisees and Sadducees, Jos. *Ant.* 18.17; *m. Yad.* 4:7; *t. Hag.* 3:35; *Nid.* 5:3; see further documentation in Keener, *Matthew*, 352–53. Later rabbis even accused some Shammaites of such violence against Hillelites (*y. Sabb.* 1:4).

125. See comment on Acts 23:10.

126. Historically, moderates like Gamaliel could be one reason we do *not* have more reports of violence.

3. Gamaliel's Defense (5:34–39)

Luke's portrayal of even Jerusalem's aristocracy is not monolithic (see discussion of Luke and Judaism in the commentary introduction).¹²⁷ Just as a "good" member of the Sanhedrin stood for Jesus in the Gospel (Luke 23:50–51)—albeit quietly and after the execution, unlike Gamaliel—so now a good member stands for justice for God's servants.¹²⁸ Gamaliel, a minority Pharisee on the council, does not so much defend the apostles' views as the Pharisaic position of tolerance. But his warning that fighting against them could constitute fighting against God (Acts 5:39) becomes an important idea as the book progresses, especially for Gamaliel's own (wayward?) disciple Saul (9:4; 26:14; cf. 22:3).

a. Gamaliel, Pharisees, and the Speech (5:34–35)

Luke's portrait of Gamaliel and the Pharisees fits what we know of them and also fits his portrayal of the Pharisees, which is more nuanced than Mark's (and much more so than the later and more polemical presentations in Matthew and John).

I. GAMALIEL

Gamaliel is described as a "teacher of the law," a term Luke employed in Luke 5:17, where it is coupled with Pharisees like the more common γραμματεὺς, usually rendered "scribe" (e.g., 5:21, 30; 6:7);¹²⁹ in such connections, Luke may indicate law teachers of the Pharisaic party (Acts 23:9).¹³⁰ Gamaliel ordered the apostles to be put outside, undoubtedly partly for privacy but perhaps also to prevent the apostles from making the court still angrier.¹³¹

That Gamaliel was respected by all the people (as Paul also presupposes when mentioning him in 22:3) is also attested in rabbinic comments on both him and his grandson and namesake. This is especially the case in the oft-cited *m. Soṭah* 9:15, which eulogizes various prominent sages by declaring what virtues fled Israel at their deaths, associating with Gamaliel the Elder "the glory of the law."¹³² Later rabbinic tradition also sometimes portrayed Gamaliel as lenient (*b. Pesah.* 88b),¹³³ though his son Simon appears in Josephus as a major political player in the Jerusalem aristocracy, not always to his credit (*Jos. Life* 193). Later rabbis made Gamaliel a descendant of Hillel,¹³⁴ who

127. Keener, *Acts*, 1:459–77.

128. Luke gives no indication as to what has become of Joseph of Arimathea or any other sympathizers. Perhaps we are left to infer that they worked quietly to maintain peace as long as possible (perhaps influencing Gamaliel). It is far less likely to assume that they would be excluded from the Sanhedrin for supporting the Nazarenes; that Joseph died so soon after the passion narrative would be, at most, a speculative guess. In any case, a small number of supporters would be insufficient to protect the movement indefinitely if it had aroused significant opposition.

129. See comment on "scribes" at Acts 4:5. The compound νομοδιδάσκαλος resembles the analogous [v]ομομαθης in funerary inscriptions from the Via Appia (*CIJ* 1:79, §113; 1:136, §193).

130. Luke could, however, distinguish them; cf. τις τῶν νομικῶν in Luke 11:45.

131. Sometimes closed sessions prevented partisan appeals to outsiders (cf. *Sall. Ep. Caes.* 11.2); given Gamaliel's popularity with the people, however, this would not be the case here.

132. Regularly cited (e.g., Kennedy, *Epistles*, 15; Bruce, *Commentary*, 124; Longenecker, *Paul*, 22–23; Fitzmyer, *Acts*, 339; Barrett, *Acts*, 292; see esp. Oesterley, *Liturgy*, 25–26). For Gamaliel's prominence, see also *m. Pe'ah* 2:6; 'Or. 2:12; *Roš Haš.* 2:5; *Šeqal.* 6:1; *Yebam.* 16:7; *Git.* 4:2; 'Ab. 1:16 (Strack, *Introduction*, 109).

133. The rabbinic portrayal of his moderation accords with Luke's (Youngblood, "Gamaliel," 394; with better documentation, Chilton, "Gamaliel," though he regards the correspondence as superficial because he rejects the episode in view of Acts 5:36–37).

134. Cf. 'Abot R. Nat. 15 A. This tradition was followed by many earlier scholars (e.g., Strack, *Introduction*, 109; LaSor, *Knew*, 90; Longenecker, *Paul*, 22n3; Rivkin, *Revolution*, 238; Sanders, *Judaism*, 422–23).

was praised for his tolerance;¹³⁵ earlier sources may portray him as simply Hillel's successor,¹³⁶ though his genetic connection with Hillel is less certainly rejected than the claim that he (and hence the later rabbinic "princes") descended from David.¹³⁷ In any case, Hillel's school tended to be more lenient than Shammai's on most issues,¹³⁸ although Shammites probably predominated before 70 C.E.,¹³⁹ as is often noted.¹⁴⁰

The nature of Gamaliel's wealth, status, and influence in the Sanhedrin, despite his minority Pharisaic position, may be illustrated by Josephus's comments about his son Simon. Josephus tells us that he was Gamaliel's son and held much authority in the Jerusalem assembly (*Life* 190); that he was a Pharisee from a prominent Jerusalem family (*Life* 191); that he was very intelligent (*Life* 192); and that he had influence with Ananus and Jesus son of Gamalas, high priests (*Life* 193). Simon and Ananus the high priest sent legates to carry out their will in Galilee (*Life* 216). Josephus reports such influence despite the fact that Simon was his personal enemy (*Life* 193); he probably was happier to report that Simon and Ananus were both later censured for having acted without the Sanhedrin's consent on a matter (*Life* 309).

II. PHARISEES

Gamaliel's Pharisaic associations probably affect his portrayal here. More than the other Gospels, Luke presents the Pharisees in a nuanced way, sometimes as ambiguously favorable toward Jesus (Luke 7:36; 11:37; 13:31; 14:1), and he does so especially in Acts. Their beliefs were not necessarily incompatible with faith in Jesus (Acts 15:5; 23:6).¹⁴¹ Even in the Gospel, Pharisaic opposition focused on disagreements about the law, but it was the Sadducees whose hostility to Jesus led to his execution.¹⁴² In the larger world of skeptical Sadducees and Greeks, the Pharisees at least affirmed the foundational doctrine of resurrection of the dead (23:8).¹⁴³ Although 5:17 suggests that the Sadducees dominate the council, Luke elsewhere plays on the council's divisions to the advantage of Christians (23:6–9). Luke notes that Gamaliel was respected by the people; Josephus indicates that the Pharisees normally were (*Ant.* 13.297–98). Although Gamaliel was part of the elite, he speaks for the Pharisees¹⁴⁴ and hence (from the elite's perspective) for the people.

135. On Hillel's mildness, see, e.g., *b. Šabb.* 31a; Urbach, *Sages*, 1:589. Neusner doubts many of the traditions about Hillel (*Beginning*, 63–88; on his sayings, *idem*, *Traditions*, 1:212–302). Hillelites, in any case, tended to be more lenient (e.g., *m. Git.* 9:10; *t. Šabb.* 16:22; *Sipre Deut.* 269.1.1; *b. Ber.* 23b), though there were a few exceptions (e.g., *b. Hul.* 104b, bar.).

136. E.g., Neusner, *Traditions*, 1:294–95; Lüdemann, *Christianity*, 73.

137. Stern, "Aspects," 617 (noting that the tradition does not predate Judah ha-Nasi). For the view, see, e.g., *Gen. Rab.* 98:8.

138. See, e.g., *t. Šabb.* 1:16; *b. Ber.* 23b; *Hul.* 104; on traditions concerning Shammai and Hillel themselves, see Urbach, *Sages*, 1:589.

139. See, e.g., *m. Šabb.* 1:4; *t. Šabb.* 1:16; *b. Bešah* 20a. Pace Jeremias, *Jerusalem*, 321.

140. E.g., Neusner, *Traditions*, 1:339; Davies, *Paul*, 9; cf. Finkelstein, *Akiba*, 127. Hillelite tradition ultimately won out (*m. Demai* 3:1; *t. Ed.* 2:3).

141. See Gowler, *Host, Guest*, 177–296 and esp. 301–5; Mason, "Chief Priests," 134–42; Tannehill, *Acts*, 67. Contrast, e.g., Sanders, "Parable and Anti-Semitism." See the commentary introduction, Keener, *Acts*, 1:459–77 (esp. 468–69). Mason, "Chief Priests," 150, thinks that Luke earlier suppresses Pharisaic involvement in the Sanhedrin to prevent association with Jesus's execution; this is possible (cf. Acts 23:6; Carroll, "Portrayal of Pharisees"), but the Sanhedrin explicitly appears negatively before this only in Luke 22:66 (contrast Luke 23:51); Acts 4:15 and appears negatively afterward (Acts 6:12, 15; 23:15).

142. Tyson, "Opposition in Luke" (also recognizing the more positive role of the Pharisees in Acts, as does Hakola, "Pharisees"). Luke sometimes redacted his written sources to provide a more nuanced picture of the Pharisees (see Ziesler, "Luke and Pharisees").

143. See also Conzelmann, *History*, 60.

144. Pharisees deferred to their elders' decisions (*Jos. Ant.* 18.12), and so other Pharisaic representatives on the council would presumably line up behind the policy Gamaliel proposes.

Gamaliel's tolerance makes sense from a Pharisaic perspective, as scholars often note.¹⁴⁵ Whereas the Sadducees, who held most of the political power, were sensitive to political threats, the Pharisees would likely object to executing those who kept the law.¹⁴⁶ The Pharisees are reported to have favored more leniency than the Sadducees (Jos. *Ant.* 13.294; cf. *War* 2.166), who punished most strictly (*Ant.* 20.199). Likewise, their rabbinic successors severely restricted capital punishment (even if partly to accommodate Roman and Babylonian legal jurisdiction); serious disagreement on interpretation did not constitute grounds for executing those who supported keeping the law.¹⁴⁷ That Gamaliel's speech would have affected the Sanhedrin is not surprising. Steve Mason argues that Josephus and Luke concur in portraying the Pharisees as representing the views of the people, a status that often (in Josephus, regularly) enabled them "to sway the council's decisions, though both authors suggest that they constituted a minority in the council."¹⁴⁸ Because it is the people's support that provides the apostles political safety (Acts 5:26), the voice of one "respected by the people" (5:34) would be influential in the assembly of the municipal elite.¹⁴⁹

The Pharisaic movement's support for public toleration of the Nazarene sect also is historically plausible and, both before and after their period of likely increase in influence under Agrippa I, even probable. That the church was established in Jerusalem (21:20) and later those "strict in the law" (presumably Pharisees)¹⁵⁰ protested the execution of Jesus's brother James (Jos. *Ant.* 20.200–201) suggests that the church developed some support among Pharisees, who may have seen them as allies in restoring Israel to the law.¹⁵¹

Why would Luke report this tolerance? Part of his aim in reporting information may be simply historical, but this does not explain his process of selection; modern historians are often frustrated by the many details that Luke omits. Certainly he had little to gain by praising Pharisees for his Diaspora audience, whose knowledge of Pharisees might often be limited to little beyond the Jesus tradition and reports about Paul (cf. Phil 3:5). After 70, when he was writing, some of the new leaders of the Pharisaic movement seem to have grown increasingly hostile toward the Nazarenes, as suggested by the polemic in Matthew and John and, in traditions beginning a few decades later, early rabbinic literature.¹⁵² Luke might still wish to appeal to them or their allies, recognizing that they stand poised to become a dominant voice in Palestinian Judaism (and hence an influence in the Diaspora as well). Such an appeal to their (continuing, it would be hoped) tradition of tolerance could also be an appeal to their possible Roman benefactors,¹⁵³ tolerance all the more necessary in the wake of

145. From a largely rabbinic perspective, see Finkelstein, *Akiba*, 9–10; cf. Marmorstein, "Attitudes," 383–84; Klausner, *Jesus to Paul*, 284–85. Older detractors from seeing Gamaliel's tolerance as realistic typically had caricatured Pharisaism negatively (Weiss, *History*, 1:185, critiqued in Longenecker, *Paul*, 33n44).

146. Goppelt, *Judaism*, 105–6; Caird, *Apostolic Age*, 83. Many scholars today recognize the Sadducean rulers, rather than the Pharisees, as the primary culprits in Jesus's execution (e.g., Vermes, "Jesus the Jew," 120).

147. See comment in Sanders, *Jesus to Mishnah*, 18–19; idem, *Figure*, 268; discussion in Keener, *Matthew*, 352–59.

148. Mason, "Chief Priests," 176–77, noting that (given aristocratic complaints of Pharisaic influence) the Pharisees exercised more influence than some scholars suggest.

149. With Mason, "Chief Priests," 151.

150. Cf. Jos. *War* 2.162; *Life* 191; cf. *War* 1.648; *Ant.* 19.332; 20.43 (Theissen, *Gospels*, 230).

151. Cf. Dunn, *Acts*, 71; Marguerat, *Actes*, 190. By partial contrast, Theissen, *Gospels*, 230–31, believes that the Pharisees and the Nazarenes were at odds in the 30s c.e. but reconciled in the 50s.

152. See Keener, *John*, 194–214.

153. Some scholars argue that Luke uses his relatively favorable portrait of Pharisees to help legitimate Christianity (Brawley, *Luke-Acts and Jews*, 105–6; Gowler, *Host, Guest*, 301–5; Carroll, "Portrayal of Pharisees"); others argue against this thesis (Kingsbury, "Pharisees in Luke-Acts").

Roman suppression of Judea's genuine revolutionary movements.¹⁵⁴ If Luke portrays the tolerance of Roman officials, the tolerance of Gamaliel could point in the same direction, inviting Pharisaism's heirs to emulate his example.

*Excursus: Pharisaism*¹⁵⁵

“Pharisee” may derive from a term meaning “specifiers,” those exact in the law,¹⁵⁶ or, considerably less likely, “Persianizers.” Most scholars, however, associate the term with a root implying “separatists.”¹⁵⁷ Some argue that the sense of *perushim* may, indeed, vary among different rabbinic sources.¹⁵⁸ At any rate, the Pharisees' emphasis on tithed food and purity prohibited them from eating with Jews nonobservant in these regards.¹⁵⁹ Nevertheless, they constituted primarily a lay rather than priestly movement¹⁶⁰ and probably did not eat ordinary food as if they were priests, as some have contended.¹⁶¹ They merely agreed to follow a limited number of purity laws¹⁶² and were known as “exact” interpreters of the laws who drew on Pharisaic tradition.¹⁶³

Although Pharisees held political power under Salome Alexandra (Jos. *War* 1.110–13; *Ant.* 13.399–405), the families of Herod and the Sadducean priestly aristocracy formed the regional and municipal governments under the Romans in the Herodian period.¹⁶⁴ In the Roman phase of the Second Temple period,¹⁶⁵ the Pharisees lacked overt political power.¹⁶⁶ Apart from the reign of Agrippa I, the descendants of Herod (Antipas and Agrippa II) controlled Galilee, whereas Jerusalem's municipal aristoc-

154. Tomson, “Counsel,” 603, compares Luke to Josephus, who sought Pharisaic favor and addressed an upper-class Roman audience after 70 C.E. (Luke's audience is less elite than Josephus's, however.) Tomson suggests (603) that Josephus sought to rehabilitate his own reputation (having been a priestly aristocrat) whereas Luke portrays Christianity “as a legitimate outgrowth” of Pharisaic ideals, appealing to appreciation for Hillelite moderation and pluralism. This approach follows Paul's willingness to allow both circumcised and uncircumcised to remain as they were (603–4).

155. I have adapted material here from Keener, *Matthew*, 538–40; idem, *John*, 182–84.

156. Baumgarten, “Pharisees.”

157. Dalman, *Jesus-Jeshua*, 13; Moore, *Judaism*, 2:60; Finkelstein, *Pharisees*, 1:76; Davies, *Introduction*, 6; Cohen, *Maccabees*, 162; Borg, *Conflict*, 58. Bowker takes the term as generally pejorative and applied by the rabbis descended from the *hakamim* to their opponents rather than to themselves (*Pharisees*, 15), but this is highly questionable (see Sanders, *Jesus and Judaism*, 50). To confuse matters further, the rabbis did not limit their term *perushim* to pre-70 Pharisees (Rivkin, “Pharisees”; idem, *Revolution*, 165; Sanders, *Jesus to Mishnah*, 154). They were not always *haberim* despite significant overlap (Rivkin, *Revolution*, 175; Sanders, *Jesus and Judaism*, 187) and often appear as *hakamim* (scholars; Rivkin, *Revolution*, 138, 141), but though many Pharisees, attentive to the law's details, must have been scribes, Rivkin goes too far in identifying them always with the scholar class (177–79). We have sometimes accepted the identification of Pharisees with *haberim*, but even a Sadducee may appear as a *haber* in some sources (*b. Nid.* 33b).

158. Ames, “Fellowship.”

159. E.g., *t. Šabb.* 1:15; *b. 'Abod. Zar.* 70b, *haberim*.

160. See Sanders, *Figure*, 404.

161. See Sanders, *Jesus to Mishnah*, 131–54, 235–36.

162. E.g., *'Abot R. Nat.* 41 A.

163. Jos. *War* 1.110; 2.162; *Ant.* 13.297–98; *Life* 191. Scholars differ as to the antiquity of the “oral Torah” conception (cf. Sanders, *Jesus to Mishnah*, 97–130; Ehrlich, “Tora”; discussion in Keener, *John*, 64, 356–57); e.g., Zetterholm, “Kontinuitet,” thinks that the Pharisees attributed their traditions to Sinai whereas the priesthood allowed for innovations based on Scripture.

164. Sanders, *Jesus to Mishnah*, 128–29; Stambaugh and Balch, *Environment*, 101.

165. Neusner, “Pharisees,” rightly argues that their political involvement effectively ended (with individual exceptions such as Simeon ben Gamaliel) in the first century B.C.E.

166. Sanders, *Judaism*, 388–402, 458–90. Josephus's few statements that could be interpreted otherwise probably reflect his own social situation (see Sanders, *Judaism*, 410–11; cf. 11, 488–89).

racy functioned as Rome's local agents in Jerusalem.¹⁶⁷ Although the Pharisees may have been represented in that municipal aristocracy, the predominantly Sadducean aristocratic priesthood seems to have dominated.¹⁶⁸

This is not to say that the Pharisees were unimportant in this period;¹⁶⁹ from various perspectives, the rabbis, Josephus (esp. in *Antiquities of the Jews*), and the NT (the Gospels; Acts 15:5; 23:6; Phil 3:5) coincide in stressing their prominence.¹⁷⁰ They were probably more influential than Josephus allows in the *Jewish War* (where he may wish to exculpate them from influence in the revolt) but less powerful than many modern scholars have supposed on the basis of his *Antiquities*. By the time he wrote his later *Antiquities*, Pharisaism had become a predominant party within Palestinian Judaism, and Josephus apparently chose to lend greater support.¹⁷¹ As Neusner puts it, "Though Josephus exaggerated the extent of their power, the Pharisees certainly exerted some influence [before 70 C.E.]."¹⁷²

In this period, the Pharisees' popular influence may have stemmed mostly from their popularity with the people rather than from official, political power (Jos. *Ant.* 13.298; 18.15, 17).¹⁷³ With a total of only six thousand Pharisees in an earlier period of influence (17.42),¹⁷⁴ their influence derived more from popular respect than from numbers. Later texts typically contrast their views with those of the Sadducees,¹⁷⁵ with whom they undoubtedly vied for influence (cf. Acts 23:6–9; Jos. *Ant.* 13.297).¹⁷⁶

Most of the educated Pharisees probably belonged to a sort of elite¹⁷⁷ and wielded considerable influence with the masses.¹⁷⁸ Although not all were scribes, they seem to have acquired a reputation for more precision in understanding the law (Jos. *Life* 191). Josephus's autobiography suggests that some prominent first-century Pharisees participated in Jerusalem's municipal aristocracy alongside the leading priests (*Life* 21). Simeon ben Gamaliel, who was wise and powerful (*Life* 190–92), joined with Ananus the high priest to authorize legates to execute their will in Galilee (*Life* 216). When the priestly aristocracy sent aristocratic representatives to Galilee, some of those sent were Pharisees (*Life* 196). Thus some scholars have even portrayed them as a political "retainer" class.¹⁷⁹ With the demise of the leading priests in Jerusalem

167. Except during Agrippa I's reign, the aristocracy answered to the Roman governor, but because he lived in Caesarea most of the year, the municipal aristocracy would have exercised considerable power, provided they expressed it in deference to Rome.

168. Sanders, *Jesus to Mishnah*, 128–29; Stambaugh and Balch, *Environment*, 101. For fuller evidence that the Pharisees did not control Palestine in the time of Jesus, see Sanders, *Figure*, 388–402, 458–90. Later texts frequently contrast their views with those of the Sadducees (e.g., *t. Hag.* 3:35; *Yoma* 1:8; *b. B. Bat.* 115b; *Nid.* 33b; *Sukkah* 48b), with whom they undoubtedly vied for influence (cf. Acts 23:6–9; Jos. *Ant.* 13.297).

169. Smith, *Magician*, 29, 50, is too skeptical. Even Sanders, *Jesus and Judaism*, 312–13, probably explains away too much evidence (the Gospels and some rabbinic and Josephus texts) about Pharisaic presence in the Sanhedrin, although he is surely right to question their dominance vis-à-vis that of the priestly aristocracy.

170. Cohen, *Maccabees*, 163; cf. Neusner, *Beginning*, 45–61; Mason, "Dominance."

171. Sanders, *Jesus and Judaism*, 195–96; idem, *Figure*, 410–11, 488–89; though cf. differently Mason, *Josephus and New Testament*, 140–43; idem, *Pharisees*; Williams, "Smith on Pharisees." Wright, *People of God*, 212, suggests that the Pharisees wielded considerable populist support but that Josephus may exaggerate their political power to exonerate his own aristocratic class.

172. Neusner, *Beginning*, 27.

173. Sanders, *Judaism*, 402–4; cf. Rivkin, *Revolution*, 38–42. Certainly they sought political influence; Horsley, *Galilee*, 149–50, also contends that they functioned as a "retainer" class.

174. In a population of as much as five hundred thousand by the older estimate in Simon, *Sects*, 15.

175. E.g., *t. Hag.* 3:35; *b. B. Bat.* 115b; *Nid.* 33b; *Sukkah* 48b.

176. Cf. Mantel, "Dichotomy."

177. For their prominence, cf. Cohen, *Maccabees*, 163; cf. Neusner, *Beginning*, 45–61; Mason, "Dominance."

178. Jos. *Ant.* 13.298; 18.15, 17; Sanders, *Judaism*, 402–4.

179. Horsley, *Galilee*, 149–50; Overman, *Crisis*, 128.

during the Jewish revolt, the Pharisees were well positioned to have their interests represented in a new coalition of power.

Pharisaism formed not a ruling or “normative” Judaism but, rather, one part of the larger Jewish piety in popular Judaism;¹⁸⁰ thus the Pharisees had no choice but to participate with other elements in Judaism for the common society.¹⁸¹ Later rabbis, who probably included heirs, in some sense, of earlier Pharisaic scribes,¹⁸² found themselves in a much better position to try to establish a “normative” Judaism in the land, and even they were not wholly successful.¹⁸³

It is clear that Pharisees gained influence after 70 with the loss of the Sadducees’ power base: one of the leaders of the rabbis at Yavneh, Gamaliel II, was a son of the aristocratic Pharisee Simeon ben Gamaliel, who figures prominently in pre-70 Jerusalem Judaism.¹⁸⁴ Yavneh was one of the Judean cities controlled by the Herodian family with Rome’s approval,¹⁸⁵ and Vespasian settled there Judeans willing to submit to Rome; they would have included many aristocrats with vested interests.¹⁸⁶ Some scholars argue that the leading citizens among those settled there were mostly Pharisees;¹⁸⁷ others suggest that the leaders were scribes in general, including but not limited to Pharisees.¹⁸⁸ In any case, many of the leaders (such as Gamaliel and Eliezer ben Hyrcanus) were Pharisees—which fits the otherwise inexplicable portrait of hostile Judean leadership in the Fourth Gospel (and to a lesser extent in Matthew’s Gospel) as dominated by “Pharisees.”

The Pharisees and Jewish Christians probably had a more amicable relationship in the 60s,¹⁸⁹ but some factors surrounding the Judean revolt—perhaps the need to consolidate influence afterwards, perhaps the social class or just idiosyncrasies of Yavneh’s surviving elite—seem to have changed the relationship to what appears presupposed in Matthew and John.¹⁹⁰

180. Sanders, *Judaism*, 449; Smith, “Sect,” 355–56. For fuller evidence that the Pharisees did not control Palestine in the time of Jesus, see Sanders, *Judaism*, 388–402, 458–90.

181. Sanders, *Jesus to Mishnah*, passim, e.g., 12. Thus some can portray Jesus himself as ideologically a prerabbinic Pharisee (Winter, *Trial*, 133).

182. Cf., e.g., Sanders, *Judaism*, 422–23; Kugel and Greer, *Interpretation*, 66; Cohen, *Maccabees*, 154–59, 227. The earliest Pharisaic layers of rabbinic texts consist of debates rather than rules, suggesting a society in which Pharisees participated but did not rule (Sanders, *Judaism*, 470–71). Not all agree that the Pharisees were precursors of the rabbinic movement (e.g., Sigal, *Halakah*, 4); although Pharisaic idiosyncrasies may have most often prevailed, Horsley, *Galilee*, 95–97, may well be right that later rabbis inherited the mantle of the previous scribal movement as a whole. The rabbis at least inherited the mantle of the scribes’ most prominent representatives, but in their eyes this apparently included some significant Pharisees, especially through the influence of Gamaliel II, son of Simeon ben Gamaliel.

183. Cf., e.g., Goodman, *State*, 127; Cohen, *Maccabees*, 223–24. One should note that even in Jesus’s day, many people disobeyed laws widely recognized by the pious (Jos. *Life* 65); but synagogues were community centers, and later zodiacs there support the view that populist piety (probably including local elders) differed from the expectations of the intelligentsia most educated in Torah.

184. See Jos. *War* 4.159; and esp. *Life* 190–92, 309. Perhaps the family even produced a short-lived high priesthood (*Ant.* 20.213, 223). Gamaliel II was a landlord reputed for generosity toward the tenant farmers on his estates (*m. B. Meši’ā* 5:8). Neusner, “Gamaliel,” doubts that we can know much biographically about even Gamaliel II.

185. Jos. *War* 2.98; *Ant.* 17.321; 18.31.

186. Jos. *War* 4.444; cf. 4.130; Horsley, *Galilee*, 95–96.

187. Cf., e.g., Sanders, *Judaism*, 422–23; Kugel and Greer, *Interpretation*, 66; Cohen, *Maccabees*, 154–59, 227. Sanders, *Judaism*, 422–23, rightly points especially to the heritage in the schools of Hillel and Shammai, although the purported physical descent of Gamaliel from Hillel may reflect a later development.

188. Horsley, *Galilee*, 96; cf. Sigal, *Halakah*, 4.

189. See Theissen, *Gospels*, 230–32.

190. Suspicion of Jewish Christians’ disloyalty, on grounds of their flight from Jerusalem, is a possible factor, but suspicion based on their linkage with Gentile Christians is less likely given the Yavneh elite’s own partial client relationship with Rome.

III. THE SPEECH'S DESIGN

There is some reason to suspect that Luke designed a speech, perhaps inferred from the apostles' surprising (cf. Acts 5:33) survival of the incident (5:40). One proposed reason for this (in addition to the problem in 5:36–37; see comment there) is the question of sources: was he or one of his sources privy to information from behind closed doors (5:34)?¹⁹¹ As Barrett puts it, "The Christians can hardly have had inside information of what was said in the Sanhedrin after v. 34—unless Gamaliel's pupil, Saul of Tarsus, was present!"¹⁹² It is possible but hardly likely that Luke or his sources had access to a court summary in the civic archives during his visit to Jerusalem (21:17–18);¹⁹³ though such sources existed at least for Roman courts, the Sanhedrin's archives presumably would not be matters of public access (especially for a deliberately private speech), nor would they be arranged topically.

Yet the question of sources is not, by itself, absolutely decisive. It is not impossible, and it is even plausible, that some members of the early apostolic movement eventually would have learned from supporters the substance of what was said about them. Leaks from the Sanhedrin, as from other "closed" elite bodies, were relatively common, especially if one had any secret sympathizers there.¹⁹⁴ Although Luke omits such details from the Sanhedrin later in his work,¹⁹⁵ his revelations in this period could make sense if Christians had any tacit minority allies in the Sanhedrin, the sort who could have also preserved some of the details of Jesus's hearing.¹⁹⁶ Following earlier tradition, Luke in fact reported such a source (Joseph of Arimathea) for several years earlier (Luke 23:50–51), against the tradition's tendency to paint the Sanhedrin wholly negatively.¹⁹⁷ It is impossible at this remove to evaluate the probability of a leak in this particular case; one can offer it only as a possibility. Thus a number of scholars allow that Luke may have had access to the incident (i.e., that Gamaliel's faction withdrew their support from the Sadducees' plans), even if Luke filled in the details (and in the case of Theudas, most argue, not entirely precisely).¹⁹⁸

More to the point on the presuppositions of Luke's story world, if Saul was still a "young man" in Acts 7:58, it is possible that at this point he was still a pupil or at least an associate of Gamaliel (22:3).¹⁹⁹ Had Luke considered such details, he would undoubtedly have considered it likely that the Gamaliel of this assembly would have spoken with his students about his opinions regarding the Nazarenes and, presumably, shared with the students that he once intervened on behalf of tolerance for

191. E.g., Smith, *Magician*, 20 (who calls it "Christian propaganda").

192. Barrett, *Acts*, 296. Sometimes writers of fiction even designed circumstances to explain their "inside knowledge" of some events (e.g., Philost. *Vit. Apoll.* 3.27). On Saul's possible presence, see comment below.

193. On archives at Jerusalem (destroyed in the Judean-Roman war), see Jos. *War* 2.427 (for debts); 6.354. That archives were important is clear from Josephus's report about those in Antioch (*War* 7.55). In this period even the Roman senate's minutes were no longer published, though their resolutions were (Kolb, "Newspaper," 698, citing Suet. *Aug.* 36); Luke may know the outcome but infer some details for the scene.

194. For the Sanhedrin, Jos. *Life* 204; for Rome's senate, see Val. Max. 2.2.1a; elsewhere, e.g., Corn. Nep. 4 (Pausanias), 5.1; 14 (Datames), 5.3; the emperor's inner circle, in Tac. *Ann.* 14.53; in Acts 5, cf. Marshall, *Acts*, 121.

195. Acts 23:16 could be an exception, but the nephew's source (aristocratic priests and municipal elders, or those who formed the plot) is not specified.

196. Keener, *John*, 1088; idem, *Matthew*, 645. See plausibly, e.g., Joseph of Arimathea in Mark 15:43 (Luke 23:51; Matt 27:57; John 19:38); cf. also Nicodemus (John 3:1; 7:50; 19:39), and probably others in the aristocracy who would have friends or relatives sympathetic to the movement.

197. Because Joseph looked for God's kingdom (Luke 23:51), his sympathies were, like Gamaliel's, not Sadducean. In support of the historical Joseph of Arimathea, see O'Collins and Kendall, "Joseph of Arimathea."

198. Cf. Knox, *Acts*, 23; Caird, *Apostolic Age*, 83; C. Williams, *Acts*, 94.

199. Because Gamaliel was a prominent leader ca. 30–50 C.E. (Sandmel, *Judaism*, 241), it is not certain that he would be teaching many students in this period, even those who paid well (he was wealthy already).

them. If Paul was a pupil of Gamaliel as 22:3 claims, it is intrinsically likely, even on the historical level, that he would know Gamaliel's opinion of the Christians, even if he disagreed.²⁰⁰

If, as I think, Luke's sources (probably oral, perhaps from Paul) indicated that Gamaliel advocated tolerance for the allegedly revolutionary apostles in (or outside) the assembly, Luke would nevertheless retain the freedom (and probably the necessity) to write up the speech in his own words, as other ancient historians did with speeches.

The rhetorical formulations, the sometimes profound and sometimes elegant analyses, belong to the historians; so does the organization of material in accordance with rhetorical principle. Everything was heightened, made precise, given point and relevance from foreknowledge of events. Always there was the admixture of the imagination and intellect of the historian, and it obviously increased in the degree that the recollection of speeches actually delivered grew dimmer.²⁰¹

See further discussion below.

IV. GAMALIEL BEGINS SPEAKING (5:34–35)

In the midst of a council, one would “rise” to speak to the assembly (Xen. *Cyr.* 7.5.55; Virg. *Aen.* 11.342; see comment on Acts 5:20), as here (Acts 5:34). Even though one leader might remain in supreme command of an assembly, various leaders could normally step forward to offer their opinions (e.g., 15:7; Philost. *Hrk.* 30.2–3). Ancient narratives elsewhere can present a single voice of reason seeking to move opposition, even if not always successfully (e.g., Virg. *Aen.* 2.40–56; 11.243–95).²⁰² In one fictitious later tradition, when the Sanhedrin's members feared to act justly, a pious sage called for divine judgment and Gabriel slew them (*b. Sanh.* 19b).

For the title “men of Israel” (Acts 5:35), see comment on Acts 2:14. The speech opens and closes with its main theme—namely, a warning against prejudging and mistreating the apostles.²⁰³ “Take heed to yourself/yourselfes” (πρόσεχε/προσέχετε with a reflexive pronoun) is a familiar enough idiom in the context of exhortations (e.g., Exod 19:12; 23:21; 34:12; Deut 4:9; 6:12; 8:11; 11:16; 12:13, 19, 30; 15:9; 24:8; Tob 4:12, 14; Sir 29:20), including in Luke's style (Luke 12:1; 17:3; 21:34; Acts 20:28; nowhere else in the NT).²⁰⁴

b. Jesus versus Revolutionary Movements (5:36–37)

Gamaliel compares the Jesus movement to armed resistance movements (perhaps reflecting a widespread assumption by the narrative's Sanhedrin that Jesus's movement is politically subversive), noting that the latter came to nothing, and the same would happen to the Jesus movement if it lacked God's blessing. It is unfair to Luke's Gamaliel to portray him negatively in light of his disciple, Paul the persecutor (Acts

200. For Paul as a possible source, see also Witherington, *Acts*, 234. For discussion of the possible disagreement, see comment on Acts 22:3.

201. Fornara, *Nature of History*, 167–68 (nevertheless arguing, in contrast to many, that the “core” of most speeches remained based on sources).

202. In more sophisticated literature, this authorial skill fits the ancient rhetorical practice of being able to argue either side of an issue (Cic. *Or. Brut.* 14.46).

203. Gamaliel's warning frames two examples of revolutionaries (5:36–37), as Talbert, *Acts*, 55 (emphasizing an A-B-B'-A' pattern), notes.

204. Without the reflexive pronoun, προσέχω in this sense is far more widespread (6 times in Matthew; several times in the Pastorals; *Test. Dan* 1:2; *Test. Job* 33:4). But even if we simply counted its uses in the imperative, Luke has half the NT uses (including Luke 20:46).

22:3);²⁰⁵ Luke’s point is likely the opposite—namely, Paul’s lack of preconversion sense to heed even his own master. By advocating noninterference, Gamaliel reflects the ideal position (or at least the best-hoped-for possibility) for authorities from a Lukan perspective (cf. 18:15; 25:19).²⁰⁶

Gamaliel’s perspective here is not that of a believer in Jesus,²⁰⁷ despite some optimistic early Christian readings.²⁰⁸ Luke grounds the apostolic ministry in the OT ministry of the prophets (3:18, 21, 24–25; 7:52–53); Gamaliel sees it against the backdrop of failed revolutionary movements. But a persecuted minority sect might well appreciate even advocacy of tolerance, and Luke makes theological use of Gamaliel’s openness. (Given that a Pharisee named Saddok aided Judas the Galilean,²⁰⁹ the historical Pharisees, in general, probably viewed some of these movements more favorably, and perhaps Gamaliel viewed them less harshly, than did the Sadducees.)²¹⁰

This comparison to messianic revolutionary movements²¹¹ suits Luke’s purpose. He seems aware that others had offered the comparison (Luke 22:37; cf. Acts 17:7; 24:5), and he must address the issue as part of his political apologia for the Christian movement.²¹² Historically, the comparison to such movements is also plausible; surely this perception of the Nazarenes as a populist movement that could become out of control constituted part of the historical Sanhedrin’s concern with them. (After all, the movement’s founder had been crucified for sedition [Luke 23:2, 5].) The comparison to a mere four hundred followers (numerically right or wrong, Acts 5:36) shows that Gamaliel severely underestimates the size of the new movement (2:41, 47; 4:4).

I. LUKE VERSUS JOSEPHUS ON THEUDAS’S CHRONOLOGY

Luke’s summary of revolutionary movements here (cf. also 21:38) comports well with Josephus at some points. Theudas and Judas the Galilean²¹³ were revolutionaries,

205. *Pace* Johnson, *Acts*, 99. He rightly notes Gamaliel’s comparison of the Jesus movement to failed revolutionary movements, but the comparison’s outcome is left unclear.

206. Cf. Witherington, *Acts*, 233. After using an angel to rescue the apostles from prison, God uses Gamaliel to rescue them from execution, whatever Gamaliel’s persuasion (Tannehill, *Acts*, 66).

207. He would probably allow for historical claims to be evaluated in retrospect by probability (as in Polyb. 3.20.1–5) and might be more pessimistic than optimistic about the movement’s survival with or without the Sanhedrin’s intervention (e.g., Allen, *Death of Herod*, 114). But he is not closed to the possibility (Luke’s version of his wording is even optimistic), and so his warning about opposing God is probably not mere irony (*pace* Allen, *Death of Herod*, 115)—though, admittedly, “damning with faint praise” was already a malicious rhetorical device (Plut. *Mal. Hdt.* 8–9, *Mor.* 856CD).

208. E.g., Chrys. *Hom. Acts* 14 (Martin, *Acts*, 68): Gamaliel “all but preached the gospel”; in *Hom. Acts* 14.1, Chrysostom suggests that Gamaliel must have eventually become a believer (*NPNF* trans. p. 87n1 cites *Ps.-Clem. Rec.* 1.65 for Gamaliel’s being a secret believer; Photius codex 171, p. 199, cites an earlier source as claiming that Peter and John baptized Gamaliel). These inferences may depend on analogies of secret believers such as Nicodemus (John 19:39; cf. 7:50) or Joseph of Arimathea (Matt 27:57; John 19:38), but Luke is not explicit even in Joseph’s case (Luke 23:50–51, with Mark 15:43).

209. *Jos. Ant.* 18.4, 9.

210. Pharisees, unlike Sadducees, apparently did expect a Messiah (cf. probably *Pss. Sol.* 17; Segal, “Pre-suppositions,” 169; see discussion at Acts 2:23) and might prefer to leave true revolutionaries for the Romans to suppress—until the real Messiah, whom the Romans could not suppress, came. Handing over those who might be God’s servants (cf., e.g., *Judg* 15:11–13) would be reprehensible.

211. Many (e.g., Freyne, *Galilee, Jesus*, 194–95) believe, and with significant reason, that these groups awaited apocalyptic intervention instead of being military movements. Some have doubted that these leaders viewed themselves as messiahs (cf., e.g., Bloomfield, *Recensio*, 3:386). Regardless of their genuine character, however, they would have appeared to the authorities as subversive and destabilizing (many such movements among the masses claimed to follow a king of some sort; Horsley and Hanson, *Bandits*, 114, 129–30). Interestingly, Luke omits Mark’s warning about false Christs (Mark 13:22; cf. Matt 24:24).

212. By contrast, Trumbower, “Jesus and Speech,” thinks that Luke could introduce this comparison only because Jesus was by now depoliticized and (as somewhat in the Gospel) de-eschatologized.

213. Though *Jos. War* calls him a Galilean, in *Ant.* 18.4 he is more specifically from Gamala, east of the Jordan.

and Judas led a revolt in the days of the census (5:37), in 6 C.E.²¹⁴ (Luke probably thinks of the same census to which he already referred in Luke 2:2,²¹⁵ the one place in the Gospel where, as here, secular historiography raises the most questions about his account.)²¹⁶ Judas founded a revolutionary sect that Josephus wishes to distinguish from other Jewish sects (*War* 2.118). Judas's sons were later crucified for rebellion (*Ant.* 20.102).²¹⁷ Theudas apparently tried to be an eschatological-signs prophet, something like Jesus; he tried (unsuccessfully) to part the Jordan (*Ant.* 20.97). These revolts were short lived; Cuspius Fadus captured Theudas and had his head cut off (20.98).

Theudas's revolt (ca. 44 C.E.), however, occurred later than this speech of Gamaliel should have taken place and long after Judas the Galilean's revolt in 6 C.E. (rather than before him as in Acts 5:36–37). In one summary, Josephus also places Theudas before mention of Judas because Judas's sons were also revolutionaries (*Ant.* 20.98, 102), but even here the governors named make it clear that he speaks of matters that occurred after the events depicted in Acts.²¹⁸ (Further, one could argue that Judas's movement was not technically scattered when he died,²¹⁹ though the dissipation of its initial thrust could have been sufficient for Gamaliel's point in the speech.)²²⁰

Various solutions to Luke's contradiction of Josephus are possible.²²¹ One is that Josephus got some details wrong.²²² This solution is certainly conceivable, and no less a careful scholar than Luke Timothy Johnson opines that "it is impossible either to harmonize or to utterly dismiss either version."²²³ Josephus sometimes contradicts himself, apparently even on matters such as when to date the rise of the Sicarii.²²⁴ In his major works he contradicts himself "in names, numbers, and in the order in which events are reported." His *Life* contradicts his *Jewish War* "in the order of six important episodes," and he sometimes does the same with biblical material in *Antiquities of the Jews*.²²⁵ In *Ant.* 20.16, he appears to claim that the authority to remove high priests continued among the descendants of Agrippa I's brother Herod (cf. 20.103), but later we know that instead Agrippa I's son Agrippa II held this authority (20.179, 196, 203).²²⁶ Moreover, in the midst of many genuine details confirmed as correct

214. Some later Christian writers recognized the connection between Judas and Quirinius's census, probably on the basis of Josephus; see Apollinaris, on Rom 13:1–7, in *Pauluskommentare* 78; Bray, *Romans*, 324).

215. The only other place in the NT where the term appears, although it also appears in the LXX and other early Jewish sources (Dan 10:21; 2 Macc 2:1; 3 Macc 2:32; 4:15, 17; 7:22).

216. Luke appears to date it wrongly, but alternative explanations have been offered (see below).

217. Cf. perhaps a different rebel son in *War* 2.433–34, whose activity echoes the deeds of Judas himself.

218. Some claim that Luke followed Josephus's sequence in this passage, but this is chronologically implausible (with, e.g., Fitzmyer, *Acts*, 340), as noted below. Luke's sequence could conflate the later activity of Judas's sons or followers—who kept alive Judas's vision—with Judas himself, but in any case one should keep in mind that their activity was later than Gamaliel's speech in the narrative world.

219. Munck, *Acts*, 48; Wright, *Acts*, 95.

220. Certainly the Romans suppressed it brutally (*Jos. War* 2.68–75); cf. Farmer, "Judas."

221. Contrary to modern critical scholarship's assumption that it was first to notice the problem, it has been addressed at least since Origen; indeed, Lardner (1684–1768) devoted extensive attention to it (*Works*, 1:425–33; cf. 6:420nb; brought to my attention by Timothy McGrew).

222. E.g., Abbott, *Acts*, 73; Arrington, *Acts*, 60; Witherington, *Acts*, 235–39, all as a second choice. The possibility is entertained, but not specifically endorsed, by Hemer, *Acts in History*, 162–63.

223. Johnson, *Acts*, 99.

224. Witherington, *Christology of Jesus*, 83 (to the time of Felix in *Jos. War* 2.253–54; to that of Judas, apparently, in *War* 7.253–54). Sometimes Josephus forgets to return to a subject he promises to treat (*Ant.* 20.53; cf. 20.101).

225. Witherington, *Acts*, 236, following Cohen, *Josephus in Galilee*, 6–7. Other sources, such as OT chronology, also present problems (cf. Gordon, *Near East*, 214).

226. In this case, Josephus may have omitted a later decision that would have explained the change.

by archaeology,²²⁷ archaeology also suggests that Josephus confused the locations of Caesarea's theater and amphitheater.²²⁸ Sometimes Josephus gets wrong even his most public information.²²⁹

Yet given Josephus's more detailed treatment of Theudas and Judas, explicit mention of the governors in authority during their revolts, and his apparent access to written sources, on the grounds normally used to ascertain historical probability Josephus seems likelier than Luke to have access to the correct chronology.²³⁰ Revolutionaries are germane to Josephus's primary interest but almost wholly peripheral to Luke's; by normal historical canons, we would expect Josephus likelier than Luke to offer the correct information in this instance.²³¹

Another (less likely) solution sometimes offered is that there was an earlier Theudas before Jesus's birth (Origen *Cels.* 1.57).²³² Undoubtedly, prophetic figures abounded, and there must have been more "kingdom"-oriented movements than Josephus reports (even if he reports the most prominent).²³³ For such a coincidence of names, a commentator notes that one William O'Brien led an Irish uprising in 1848 and another man of the same name led another in 1891.²³⁴ One could also cite two men of the church named John Eck in Luther's day.²³⁵

Theudas, however, was a rare name, although it does appear.²³⁶ Supporters of the two-Theudas view contrast Luke's minor leader of "four hundred" with Josephus's "masses" who followed Theudas,²³⁷ but by the same token, one might contrast diverse groupings or circles of Jesus's twelve disciples, the 120 (Acts 1:15), and the "crowds" who followed him. Gamaliel must number Theudas's followers here (and Luke may

227. See the commentary introduction, Keener, *Acts*, 1:191–92, and sources cited there.

228. McRay, *Archaeology*, 144.

229. Such as Germanicus's relationship to Tiberius (*Jos. Ant.* 18.206).

230. Some later Christians looked to Josephus for such details, e.g., Bede *Comm. Acts* 5.37 (Martin, *Acts*, 67; L. Martin, 60) on Judas; 5.36 (Martin, *Acts*, 67–68; L. Martin, 60) on Theudas (though apparently adding details, perhaps from Euseb. *H.E.* 2.11). As Lardner noted in the eighteenth century (*Works*, 1:427), Josephus could make mistakes, but one is improbable here; Josephus is explicit about the timing, which was during his own boyhood. Likewise, Bloomfield noted in 1828 (*Recensio*, 4:176; brought to my attention by Tim McGrew), Josephus lived in Judea in that era, "and therefore must have known what happened in his own time."

231. With, e.g., Gaventa, *Acts*, 109.

232. Lardner, *Works*, 1:432–33 (citing Beza, Whitby, and Usher); Bloomfield, *Recensio*, 4:177 (citing Beza, Grotius, Whitby, and many others); Abbott, *Acts*, 73; Bruce, *Acts*¹, 147; Neil, *Acts*, 99–100; Arrington, *Acts*, 60; Polhill, *Acts*, 172; Kistemaker, *Acts*, 211; Witherington, *Acts*, 239; Larkin, *Acts*, 97; Bock, *Acts*, 250; Peterson, *Acts*, 225. Some (e.g., Cassidy, *Politics*, 17; Packer, *Acts*, 13, 47) cite this solution as possible but not necessarily probable. We cannot assume that any pre-Judas Theudas would be the same one who led the later revolt in Josephus (in his old age), though this seems likelier than "another" Theudas (unless we should think of a son of Theudas bearing his name). Lardner, *Works*, 1:427–28, does rightly note that one should not read too much into Luke's "some time ago"; he cites Jer 31:31; Acts 9:23; more convincingly Porphyry and Cicero; cf. the same expression in Acts 21:38.

233. On the abundance of movements, cf., e.g., Grappe, "Jésus."

234. Kistemaker, *Acts*, 211n52. But "William" and "O'Brien" were probably more common, even conjoined, in their era than "Theudas" was in first-century Palestine.

235. John Eck of Ingolstadt (Bainton, *Stand*, 107–20 and passim) and John Eck of Trier (182–83, 185; distinguished on 182).

236. *CIJ* 2:261, §1255, from Jerusalem, has in Hebrew "Judah son of Todos," i.e., Judas son of Theudas; commentators cite also *CIG* 2684; 3563; 3920; 5698. (By contrast, "Judas" was an extremely common name; Williams, "Names," 89–90.) Bloomfield, *Recensio*, 4:178, following Wetstein, considered the name a common one. Lardner, *Works*, 1:430, 433, compares the confusion of different figures with the name Simeon; but, though Lardner would not have had means to know this as we do today, Simeon was a quite common name (see, e.g., Fitzmyer, *Essays*, 105–12). Lardner's observation of *three* men named Judas involved in disturbances at roughly the same time (*Works*, 1:430) is much more compelling; but again, Judas was a very common name (Williams, "Names," 89–90).

237. Polhill, *Acts*, 172–73, also protesting that Luke omits Josephus's spectacular descriptions (this seems somewhat an argument from silence in a summary of fewer than thirty words!).

depend on a genuine historical estimate for this point) to show that the apostles need pose no ultimate threat. “Theudas gathered a following, just as . . . the apostles have.”²³⁸ More plausibly, supporters point out that “Theudas” might be a nickname, short for such popular names as “Theodorus,” “Theodosius,” and “Theodotus” (which were equivalent to such Semitic names as “Jonathan,” “Nathanael,” and “Matthias”). Such names were possible among the many uprisings that occurred when Herod died (Jos. *Ant.* 17.269).²³⁹ (One could even argue that Luke conflated two figures with similar names, deliberately or inadvertently, as he is sometimes thought to conflate two censuses in Luke 2:2.)

For all this solution’s ingenuity, however, “Theudas” (whether as name or nickname) does not (contrary to some commentators’ suggestion) appear very often in our sources, and one wonders why people bearing this name or nickname would turn up primarily as revolutionaries, one in Luke and a different one in Josephus.²⁴⁰ Further, Josephus mentions only one rebel of this name (and indeed, extremely few other rebels of *any* name) prominent enough to be classed with Judas the Galilean, just as Luke here mentions only one Theudas alongside one Judas. Although it is true that Josephus mentions “thousands” of disorders in Judea (*Ant.* 17.269), he specifies by name only the most prominent, and we would expect the same from Gamaliel. Arguments for another Theudas, no matter how valiantly argued, prove unpersuasive to most scholars, and (in my opinion) for good reason.²⁴¹

II. LUKE’S RHETORICAL USE OF THEUDAS

Most scholars believe that the simplest solution is that Luke “made a mistake, either unaware of the true date of Theudas or confusing him with some other rebel.”²⁴² Although one cannot rule out the proposal that Josephus introduced the confusion, most scholars feel that conventional historiographic method, limited as it is in terms of the certainty of its results, in this case deems historically likelier Luke’s imprecision than Josephus’s. Usually, comparing with Acts our limited historical external evidence favors Luke’s accuracy. Where evidence is most limited, Luke’s excellent historical record at most other points should weight the burden of proof in his favor in cases where no strong contrary evidence exists. In this case, however, most historians consider the contrary evidence strong enough.²⁴³ More conservative scholars help sometimes unduly critical scholars keep perspective on Luke’s reliability as a Hellenistic historian; historians of the Greco-Roman world often need to depend

238. Fitzmyer, *Acts*, 340.

239. Especially *μυρία* *θουσίβων*, “thousands of [i.e., innumerable; see BDAG] disturbances.” See Bruce, *Acts*¹, 147; idem, *Documents*, 104; Polhill, *Acts*, 173; Larkin, *Acts*, 97.

240. I have a similar problem with the idea, found in Eusebius’s interpretation of Papias and often today, that there were two “Johns” associated with the production of the Fourth Gospel (see Keener, *John*, 95–98)—though “John” at least was a far more common name, requiring far less extraordinary coincidence, than Theudas.

241. See Munck, *Acts*, 48; Kee, *Every Nation*, 85–86. Although it is always remotely possible that archaeologists will uncover evidence of another Theudas involved in a revolt, the evidence from Josephus is sufficient to question the *likelihood* of this happening. Pervo, *Dating Acts*, 156, by tongue-in-cheek analogy suggests two early Christian missionaries named Paul, working in roughly the same region, to explain differences between Acts and Paul’s letters.

242. Barrett, *Acts*, 296; see, e.g., Gray, *Figures*, 116 (though noting that Luke’s information coheres with Josephus’s apart from chronology).

243. Historical methodology is limited to probabilities based on the rules that it employs. Those with other epistemological considerations may challenge the limitations of our historical evidence here but, unless they articulate those considerations intelligently in public discourse, must allow scholars working with normal historical methods to follow where the evidence leads them. The same rules cited to support, to various degrees of probability, Luke’s accuracy on some points (e.g., Paul’s travels), and to which some gladly appeal at those points, raise more questions in this case.

on works far less careful and contemporary than Luke's.²⁴⁴ Yet critical arguments also challenge the most optimistic scholars to handle the evidence evenhandedly. As one fairly conservative scholar points out, "The concurrence of names between Luke and Josephus is so striking that even conservative exegetes assume here that either Luke himself or the tradition preceding him made an error."²⁴⁵ Along this line, Bo Reicke allows that Luke may have wished "to embellish Gamaliel's speech with some familiar examples of frustrated messianic movements, and had also heard of Theudas."²⁴⁶ Although Ben Witherington does not adopt this approach, he insists that its possibility "must be frankly admitted," and that it "is not impossible if Luke was following Thucydides' advice about making the speaker" approximate what he would have been known to say.²⁴⁷

According to this approach, it is reasonable that Luke fills in the summary of a comparison of Christians with revolutionary leaders (surely part of the historical Sanhedrin's concern with them),²⁴⁸ providing the names of such leaders as are most likely familiar (if any names are) to some of his audience.²⁴⁹ In the process, he appears not to be concerned with their precise chronology. If confronted with the chronological problem, perhaps his response would have been that he simply needed to use the well-known members of the category he was illustrating so that some of his audience would catch his point.²⁵⁰ Probably few in Luke's audience would have found this practice objectionable for even the best of ancient historians (and it ought to be able to go without saying that *ancient*, rather than modern, history was the genre in which he was writing).²⁵¹ Perhaps if he had thought anyone would have found this objectionable and had his critics provided more detailed information, he might have accommodated their concern.²⁵²

As historical oversights go, this would be a rather minor one, excusable especially in a summary speech (which historians wrote in their own words)—still more in a speech behind closed doors (which probably normally required historians' greatest compositional skill). It would also be one of only two particularly obvious deviations that most scholars cite in Luke-Acts in relation to Greco-Roman history (cf. Luke

244. It is not the case that only one group of scholars has assumptions; see, e.g., Keener, "Assumptions."

245. Riesner, *Early Period*, 332. There are exceptions to this consensus (some noted above).

246. Reicke, *Era*, 204n51.

247. Witherington, *Acts*, 238, 239 respectively, on the dating of Theudas (brought to my attention by Philip Richardson).

248. Appealingly but less persuasively, Knox, *Jerusalem*, 2, sees Gamaliel's support stemming from them as *nonrevolutionaries*, "a counter-attraction to the dangerous lures of nationalist agitators."

249. Perhaps only a few would have known even these names, but he picks the best known, those he knows, to bring the case as close as possible to what he believes Gamaliel would have said. Diaspora Christians may have heard of some messianic claimants in Judea from Judean believers, just as the Judean actions of Caligula may have left their mark on early Christian tradition (cf. 2 Thess 2:3–4). Rome had to contend with various religiously inspired revolts like that of Theudas elsewhere in its empire; see Rives, *Religion*, 188, citing Dio Cass. 54.34.5–7; Tac. *Hist.* 4.61, 65; cf. comments on slave revolts in the excursus at Acts 12:13.

250. It is relevant that Luke normally follows even Mark's chronology of events in his Gospel, though biographies did not require such chronology, but Luke feels free to shift the location of his programmatic scene in the Nazareth synagogue for strategic literary purposes (Mark 6:2–4; Luke 4:16–30). Dissociating the messianic Jesus movement from revolutionaries was important to his purpose (cf. Acts 21:38).

251. On differences between ancient and modern historiographic approaches, see discussion in Keener, *Acts*, e.g., 1:100–102, 166–67 (cf. 91, 107, 201, 309). Historically based approaches work to avoid anachronism. Although Witherington prefers a different solution in this case, he critiques some unfounded conservative approaches to incongruities in biblical narratives, insisting that a narrative "be judged on the basis of what the author was attempting to do" in his setting, not by modern standards (*Doctor*, 62).

252. That Luke places Theudas's date before Judas (whose approximate period he seems to know; cf. Luke 2:2) probably indicates that he lacked the detail himself; but he might have considered the question pedantic on the basis of the limited access to such information available to him and his audience.

2:2),²⁵³ quite a small number for an ancient (or modern) historian. (Compare again Josephus above, who made quite a few more obvious deviations, though at least partly because he writes more extensively and covers a larger span of history.)²⁵⁴ Apart from annals and the works of predecessors, ancient historians did not have access to compilations of records as extensive as are available to their modern counterparts, and so accuracy in a range of details often entailed extensive work. As Colin Hemer, who elsewhere argues for Luke's accuracy even in many matters of detail, rightly concedes, "Yet even if Luke has committed an anachronism by placing these words on Gamaliel's lips and has reversed the order of the two uprisings, one such slip on his part would not entitle us to argue for his general unreliability."²⁵⁵

Given Luke's freedom to rewrite details in passages such as Luke 24:47–49 and Acts 1:4–8 (or the slight differences among Paul's conversion accounts), it is unlikely that Luke or his ancient audience would feel as scandalized by this approach as some of his more recent readers have been. In fact, the matter is minor enough that it might generate little attention beyond a footnote in comment on another ancient historian, and may generate greater attention in Acts primarily in response to the strictest theological protests against its possibility. As some scholars note, apart from this passage and Quirinius's census, Luke's other significant historical assertions that can be tested most securely (Gallio, Felix and Festus, Drusilla, Agrippa and Berenice, the Egyptian prophet, local titles for officials, etc.) can all be corroborated.²⁵⁶ To judge Luke's integrity by modern assumptions of how precisely he should have written speeches, rather than by his objectives and standards as a Christian Hellenistic historian, disrespects the canons of Hellenistic historians in general, violating our own historical canons against anachronism.

Some scholars contend that Luke depends on (and hence is later than) Josephus here,²⁵⁷ but most recognize that this is quite unlikely.²⁵⁸ Should we assume that Josephus was the only source to preserve these names?²⁵⁹ What then would have been Josephus's source? (If Josephus lacked a source, we might suppose that Josephus invented these figures, and if such important figures as these, why not many others as well? But given Josephus's apologetic interests, this solution is quite improbable even apart from other historical considerations.) Further, if Luke depends on Josephus, it would certainly prove remarkable that the clearest trace of his work would be here, in an instance where Luke contradicts him. Josephus completed *Antiquities of the Jews* no earlier than 93 C.E., in a period probably too late to date Luke on other grounds.²⁶⁰ This is especially true if we must allow time for Luke to secure eventual access to the elite circles in which Josephus's work would have initially circulated.

253. For some credible, though not all necessarily equally compelling, alternative explanations even on Luke 2:2, see the summary of views in Keener, *Acts*, 1:74–75n210, 201n300.

254. I refer here to errors of detail; if we factor in Josephus's penchant for elite, rhetorical embellishment, the "errors" multiply (but ancients probably would not consider such deliberate adaptations errors). One finds mistakes also in other usually careful writers, such as Pliny *Ep.* 10.58.5; 10.81.6.

255. Hemer, *Acts in History*, 162–63.

256. As emphasized rightly by Riesner, *Early Period*, 333.

257. Torrey, *Composition*, 70 (who thinks that Luke depends on Josephus only here and at Luke 3:1; cf. *Jos. Ant.* 20.137, 140); Pervo, "Dating Acts."

258. Barrett, *Acts*, xliii; Fitzmyer, *Acts*, 52; Ehrhardt, *Acts*, 2–4; Witherington, *Acts*, 237–38; Padilla, *Speeches*, 124.

259. Luke could have used any source (Barrett, *Acts*, 296).

260. Quite apart from the question of the "we" narratives' authorship, Luke's perspective on Pharisaism is friendlier and earlier than John and likely Matthew, and his openness to Roman administrators would hardly make sense in the later years of Domitian's reign; his apologetic for Paul also appears early (for the suggested date of Acts, see discussion in Keener, *Acts*, 1:383–401).

From the standpoint of usual historical method, it is more likely that Luke, from his conversations in Judea, has a general knowledge of revolts that occurred (cf. Acts 21:8–27:1), even if he does not have easy access to (or have reason to be concerned with) their exact dates.²⁶¹ If he believed that Gamaliel compared (or would have compared) the earliest apostolic movement to revolutionary movements, the proper procedure in ancient historiography was to flesh out the speech with the most plausible details.²⁶² He thus would preserve the thrust of the speech by providing what seem the most appropriate details. Ancient historians would be less concerned about such a detail than are modern commentators.²⁶³ Although rhetoricians warned against this common danger of mixing chronology (Hermog. *Issues* 34.3–9, on flawed invention), it happened even in widely read and accepted works (e.g., the probable anachronism in Plato *Alcib.* 2.141D).²⁶⁴ Whether this above approach to Luke's inclusion of the names is ultimately correct in this instance or not, it is certainly well within the range of ancient historiographic practice.

Luke's particular wording is useful for his argument. Like Simon (Acts 8:9) but in contrast to Peter and Paul (who refuse divine honors, 10:25–26; 14:14–15), Theudas claimed to be “someone”; Jesus had already taught that only the humble would be exalted (Luke 14:11; 18:14).²⁶⁵ Gamaliel's wording also fits the comparison of Jesus to revolutionary leaders. Theudas also “rose up,” the same term used for Jesus's resurrection (Acts 2:24, 32; 3:22, 26),²⁶⁶ further, people “obeyed” (ἐπείθοντο) both Theudas and Judas (5:36–37), as the apostles claimed to “obey” God (5:29, 32).²⁶⁷

Luke's wording also points to the future. Judas's movement fell apart when it was “dispersed” or “scattered” (διεσκορπίσθησαν),²⁶⁸ as Luke leads us to expect for the wicked (Luke 1:51; cognate in 11:23). As Theudas's followers were also scattered (a different term in Acts 5:36), Gamaliel might expect (and most of his hearers likely expect) the same ultimate fate for Jesus's followers.²⁶⁹ Yet soon Luke will narrate (using the different term διασπείρω) the dispersal of Jesus's Jerusalem followers (8:1), while showing that this very dispersal strengthened this godly movement (8:4; 11:19–20).

261. Judean outsiders would have naturally compared a prophetic leader such as Theudas with Jesus, to the extent that Judean believers in the 40s would have remembered Theudas and had to respond to him. It is possible that some of Jesus's movement outside Judea had heard of him from Judean believers.

262. See discussion of speeches, and different views about them, in Keener, *Acts*, 1:258–319. Histories' speeches often introduce historical examples (Tac. *Ann.* 11.24; Sall. *Catil.* 51.5–6; Jos. *War* 5.376–98; Jer 26:17–23; cited in Plümacher, *Lukas*, 38–72, esp. 41–50; Conzelmann, *Acts*, 42); the practice may be more common in Acts than Plümacher recognizes (Soards, *Speeches*, 138–42, esp. 142). Vell. Pat. 1.3.2 does complain about anachronistic speech in the mouth of poets' characters, but such updating was not uncommon (see the commentary introduction, ch. 8). The observation that historians updated language has been widely accepted by even fairly conservative biblical scholars, for example, at Gen 12:16 (e.g., Albright, *Biblical Period*, 6–7; Bright, *History*, 81; Wright, *Archaeology*, 40)—though this particular example is now uncertain (for occasional use of some camels, note data in Becker, “Camels”; Forbes, *Technology*, 2:187–208, esp. 202–3; Gordon, *Near East*, 124; Millard, “Methods,” 49)—and more often at Gen 21:32, 34 (Wright, *Archaeology*, 40; Yamauchi, *Stones*, 46; Walton, “Genesis,” 96).

263. With Dunn, *Acts*, 73. The exception would be ancient polemical critics (on the order of Celsus or Porphyry) looking for grounds to criticize the early Christians; historians could have such critics, but perhaps not commonly enough for Luke to have envisaged the potential problem.

264. Here the pseudepigrapher of *Alcibiades* attributes to Socrates the reference to a “recent” event in 399 B.C.E., the year he died (see LCL, 4:240–41n2).

265. Tannehill, *Acts*, 53. Gamaliel's use of ἐαυτόν with respect to Theudas may also rhetorically echo his use of ἐαυτοῖς for the Sanhedrin in 5:35; the nearest uses of ἐαυτοῦ outside Gamaliel's speech are in 1:3 and 7:21.

266. Then again, the term is also applied to Gamaliel (Acts 5:34) and the high priest (5:17); Luke employs the term seventy-one times (about two-thirds of the NT uses).

267. Johnson, *Acts*, 99–100.

268. Many contend that it, in fact, resurfaced later through Judas's sons, but it was apparently squelched at least in the short term.

269. Cf. Talbert, *Acts*, 55–56.

Perhaps most important for Luke's purposes is the difference between Jesus's movement and that of a failed revolutionary. If, as I suggest in chapter 10 of our introduction, Luke writes in the wake of the Judean-Roman war, differentiating the Jesus movement from other Judean messianic movements that led to revolt and Jerusalem's destruction will be an important part of his apologetic.²⁷⁰ That Jesus's movement continues shows Luke's audience that it differs from movements dependent on the strength of followers or dispersed after the execution of leaders.²⁷¹

c. *Gamaliel's Wise Counsel* (5:38–39)

Gamaliel's "I say to you" (5:38) was a common formula for the sages.²⁷² The sentiment of 5:38–39 is appropriate to the Pharisaic movement, both for reasons of leniency mentioned above (Jos. *Ant.* 13.294) and (if correctly understood) for views such as expressed by a second-century disciple of R. Akiba in *m. 'Ab.* 4:11 (Danby, 454): "Any assembling together that is for the sake of Heaven shall in the end be established, but any that is not for the sake of Heaven shall not in the end be established."²⁷³

Good historians sought either to provide what speakers said or to plausibly reconstruct what they might have said; whichever Luke did here, he appears to have done it admirably. Granted, the analogy is inexact: Judas and Theudas failed because of intervention, whereas it is intervention that Gamaliel argues against for the apostles. But the apostles' supporters are in Jerusalem itself, are so far nonviolent, and seem less dangerous if not provoked with their leaders' martyrdom; and as far as Gamaliel was concerned, Roman intervention might prove the divine will, but Pharisees might know the divine purpose in such cases only in retrospect.²⁷⁴

Such sentiments were not, however, limited to Pharisaism. Thus Diogenes Laertius cites as a proof of Epicurus's goodness that his school, unlike most others, has continued with a succession of scholars supervising it (Diog. Laert. 10.1.9). At the same time, many ancients recognized the limits of such logic; one cannot always judge what is praiseworthy on the basis of successes or failures, Polybius said, because successes can yield calamity if used unwisely, and failures can be turned to advantage through courage.²⁷⁵

270. Josephus, who portrays Jesus (*Ant.* 18.63–64), like John the Baptist (18.116–19), in a manner quite different from leaders of politically dangerous prophetic movements, remains silent (according to the likeliest original version) about the movement that grew up around Jesus and had attracted negative press in Rome (*Tac. Ann.* 15.44).

271. The movement's continuance would not yet have been evident to Gamaliel within the narrative but is evident to Luke's audience (even by the end of Acts itself); for the function of this difference as dramatic irony, see Padilla, *Speeches*, 128–30.

272. See (with reference to Jesus's usage) Schechter, "Parallels," 427; Abrahams, *Studies* (1), 16; Smith, *Parallels*, 28–30; Daube, *New Testament and Judaism*, 55–58; Urbach, *Sages*, 1:294; Keener, *Matthew*, 182; cf., e.g., *Mek. Pisha* 1.58, 62; *b. Ber.* 63a.; significantly paralleled also in 4QMMT (though Wise, "General Introduction," 264, regards it as previously unparalleled).

273. Regularly cited at least since Strack and Billerbeck, *Kommentar*, 2:640; see Haenchen, *Acts*, 253n2; Conzelmann, *Acts*, 43; Longenecker, *Paul*, 33n44 (see also other suggestions there); idem, *Acts*, 119; Dunn, *Acts*, 72; Chance, *Acts*, 97. On the survival of bad teaching, see, e.g., *m. 'Ab.* 1:11; *Sipre Deut.* 48.2.5.

274. On some Pharisaic sympathy for revolutionaries despite the claim of Jos. *War* 2.118–19 and the possibly pacifist attitude of Johanan ben Zakkai, see Jos. *Ant.* 18.4, 9 (a Pharisee who aided Judas's revolt); 18.23 (the revolutionaries agree with Pharisaism on most points except violence, though this is a significant exception here); *War* 1.648–50 (Pharisaic resistance against the imperial eagle in the temple); see also Simon, *Sects*, 44; Witherington, *Christology of Jesus*, 83–84; Sanders, *Judaism*, 408–11; Neusner, *Beginning*, 26–27; Horsley and Hanson, *Bandits*, 198 (contrast Davies, *Introduction*, 18–19). Revolutionaries themselves probably saw themselves in the mold of the Maccabees (e.g., 1 Macc 2:24–28); what made the difference in others' evaluation of them was that the Maccabees were successful against Syria whereas first-century revolutionaries failed against Rome. Failures were then retroactively recognized as cursed by God (e.g., *Pesiq. Rab.* 30:3).

275. Polyb. 3.4.1–5; cf. *Judg* 8:27; 2 Kgs 14:7–14.

Whereas Pharisees and other Jews would allow that some bad teachings survived, one would not expect the same for revolutionary movements under Roman rule.²⁷⁶ Pharisees would also believe, and Luke would emphasize, that a movement raised up by God's "purpose" would not be destroyed²⁷⁷ (on God's "plan," see comment on Acts 2:23). In the broader context of Luke-Acts, the divine purpose in the gospel contrasts starkly with the human plan to oppose it, both of which coincided in the cross (Luke 23:51). The opposition itself was part of God's plan (Acts 2:23; 4:28); thus nothing would stop the gospel (28:31; cf. 8:36; 10:47; 11:17).²⁷⁸

Gamaliel's warning against fighting against God (5:39), more plausible by conventional expectations than Peter's apparent paraphrase of Socrates, seems to echo Greek tradition. Many scholars have argued that the rare term *θεομάχοι* suggests an allusion to a term most notably found in Euripides's *Bacchanals*.²⁷⁹ Verses from Euripides were collected in anthologies long before this period, and many naturally suppose these the source;²⁸⁰ by Luke's day the term had become more widespread.²⁸¹ But even some of the later uses alluded back to Euripides's story; thus, when Apollonius escapes a king's custody (just as Dionysus had in Euripides's story), the king concedes that he cannot "fight against a god" (*θεομαχεῖν*, Philost. *Vit. Apoll.* 4.44).

Even a Jewish text that circulated widely used the term (2 Macc 7:19), and this would be the closest likely source for Jewish readers.²⁸² In this passage, "fighting against God" is what the pagan persecutors of the Maccabean martyrs did, and God would punish these persecutors (7:19) and resurrect these martyrs (7:23).²⁸³ Gamaliel's hearers (many of them Sadducees denying the resurrection) would hardly wish to be ranged with pagan persecutors. But even though Luke's audience might think of 2 Maccabees, that passage itself likely alludes to Euripides and treats the wicked king, persecuting God's servants, like Euripides's god-resistant king Pentheus, warning of the same fate.²⁸⁴ If Luke and his ideal audience might have thought of Euripides, an allusion to the story there would be striking: the god freed his agents supernaturally from confinement and destroyed the leader who persecuted his followers.²⁸⁵

276. Even under normal circumstances, millenarian movements by their nature either die out quickly or mutate from being millenarian (Gager, *Kingdom*, 21).

277. Cf. the basic Pharisaic tenet that God determines destiny (Jos. *War* 2.162; Reicke, *Era*, 189).

278. Literally, Gamaliel speaks not of the gospel itself, nor of God's just-mentioned plan (feminine singular), but of "these men" (masculine plural), also just mentioned. This expression is not meant to confer immortality on God's agents but does imply that God's plan for his agents will not be thwarted (see Acts 13:36; cf. Luke 4:30; 22:53). Thus one servant may die (Acts 7:60), but another is preserved for a time to fulfill God's promised purpose (23:11; 27:24). Outside Luke-Acts, compare the tension between individual martyrdom and the preservation of God's community probably implied in Matt 16:18, 24.

279. Renehan, "Quotations," 22–23 (Eurip. *Bacch.* 45, 32S, 125S; cf. *Iph. Aul.* 1408 if genuine; the noun in *Bacch.* 795); esp. Weaver, *Epiphany*, 132–36. I say "most notably" because this would be the single most recognizable literary source for Greeks.

280. See Malherbe, *Social Aspects*, 42; idem, *Moral Exhortation*, 115. Euripides may depend on an earlier Greek proverb (Munck, *Acts*, 48–49).

281. Heracl. *Hom. Prob.* 1.2 (cf. 2.1; contending that Homer would so qualify were he not read allegorically); Lucian *Z. Rants* 45 (a Stoic against an Epicurean who denies the gods); cf. the idea in Quint. *Decl.* 323.5. It also applied to deities battling each other (Heracl. *Hom. Prob.* 52.1–53.1, esp. 52.1).

282. See Conzelmann, *Acts*, 43. In different words, cf. the concept in *Test. Ab.* 8:8 A.

283. The Maccabean context might be fresh in the minds of Luke's audience if *νοσφισσάθαι* evoked 2 Macc 4:32 at Acts 5:3.

284. Cf. the issue of Dionysus in 2 Macc 6:7; 14:33. Similarly, in view of anti-Dionysiac apologetic in 3 Maccabees (cf. 3 Macc 2:29), Cousland, "Dionysus *theomachos*?" is probably correct that 3 Maccabees also recalls Euripides's *Bacchanals* (also Weaver, *Epiphany*, 82–84); God defeats the "new Dionysus," Ptolemy IV Philopator.

285. See above, on Eurip. *Bacch.* 443–48. For the connection with the apostles' earlier prison escape, see similarly Weaver, *Epiphany*, 144, 147; that I noticed the connection before reading Weaver encourages me that we have noticed a genuine feature of the text.

Moreover, not only might Luke's ideal audience recognize an allusion to the setting in Euripides; they might expect much of Jerusalem's ruling elite to catch it.²⁸⁶ Given the supernatural escape in Acts 5:19 (known from Greek traditions surrounding Dionysus), Gamaliel himself could use θεομάχοι in view of the tradition of authorities opposing a god in the narrative tradition of the *Bacchantes*. The Sanhedrin should not act like Pentheus in the myth, blind to a supernatural escape. Gamaliel instructed some Hellenists (22:3), and we have reason to believe that his household trained scholars in Greek as well as Hebrew texts (see comment on Acts 22:3). Whether or not Luke expects his audience to think that Gamaliel made the allusion deliberately, however, Luke might expect much of his audience to catch it.

We should not underestimate the possibility that Gamaliel, as an actor within this narrative, would be willing to entertain at least the possibility that God was working through this movement.²⁸⁷ To entertain the possibility committed him to nothing, but it also allowed for the apparent miracle the Sanhedrin itself had just experienced (5:24), a miracle that Pharisees, unlike Sadducees, were not theologically compelled to dismiss.²⁸⁸ Further, only the leading Sadducees had ordered the arrest to begin with (5:17); Gamaliel's Pharisaic minority had not, in fact, lost face through the unexpected release.

Certainly, the way Luke puts Gamaliel's words serves his narrative well. The informed reader of Luke's day was well aware that the movement would *not* simply vanish like the short-lived revolutionary movements with which it is compared in 5:36–37.²⁸⁹ The reader would know that the apostles' "plan" (βουλή) was in fact from God (Luke 7:30; Acts 2:23; 4:28; 13:36; 20:27).²⁹⁰ Thus Gamaliel's shift from the subjunctive ("if it be of human origin") to the indicative ("if it is from God") may function as God's own wisdom for Luke.²⁹¹ Further, "fighting against God" is precisely what Saul later found himself doing (Acts 26:14), against the counsel of his own teacher (22:3).²⁹²

4. Continued Obedience (5:40–42)

After the council has the apostles flogged (5:40), the apostles celebrate their shame in human eyes (5:41) and continue obeying their commission to be witnesses (5:42).

286. This would be all the more true if some of them happened to be well informed: historically, the household of Gamaliel was known for Greek as well as Jewish learning (see comment on Acts 22:3), and the Sadducean aristocracy knew Greek well. Most aristocratic burial inscriptions are in Greek (at least one-third of all Jerusalem inscriptions, mainly those of the smaller middle and upper classes; Levine, *Hellenism*, 78, 94–95, 182), though aristocrats may have been bilingual (cf. Jos. *Ant.* 20.263–64). (Even the Semiticist Dalman long ago recognized the use of Greek in Jerusalem [*Jesus-Jeshua*, 3].) See further discussion at Acts 21:40; 22:2.

287. Strelan, "Gamaliel's Hunch," argues that Luke's Gamaliel has a "hunch" that the apostles serve God's purposes.

288. Pharisees were certainly more open to fresh revelation than were Sadducees (see Dunn, *Acts*, 72–73; Jos. *Ant.* 13.297, 408).

289. With, e.g., Pervo, *Story*, 28 (Luke's informed audience has just heard of the angelic intervention, Acts 5:19). For the speech's apologetic value for Luke, see Padilla, *Speeches*, 120–34.

290. Cf. Moessner, "Script," 230. Sometimes "work" was linked with "plan" (Isa 29:15; Mic 6:16; Wis 6:3; cf. Sir 37:16), including when both are God's (Ps 106:13; Jer 32:19); cf. Luke's "words and works" (Luke 24:19; Acts 7:22). Lohfink, "Taten Gottes," thinks that the "work" here (from Luke's perspective) is the church (cf. Acts 13:41); cf. "work" as ministry (13:2; 14:26; 15:38).

291. With, e.g., Conzelmann, *Acts*, 43; Soards, *Speeches*, 54; Tannehill, *Acts*, 67; Witherington, *Acts*, 235; Blass, Debrunner, and Funk, *Grammar*, §372.1; contrast Darr, "Irenic or Ironic?" Many ancients believed that speakers could utter unintended prophecies (Jdt 6:2; 'Abot R. Nat. 43, §118 B; b. *Soṭah* 12b; through children, Plut. *Isis* 14, *Mor.* 356E; Xen. *Eph. Anthia* 5.4; Aug. *Conf.* 8.12; in more detail, Keener, *John*, 856–57, on John 11:51–52).

292. Cf. the allusion to Greek literary tradition in Acts 26:14, which reinforces the possibility of such an allusion here.

a. The Council's Reluctance to Execute (5:40)

Having been calmed down, council members would not likely desire a lynching (though contrast violence in Jerusalem settings in 7:57–58; 21:30–32; 22:20, 22–23; 23:12–14);²⁹³ handing the disciples over to the Roman governor on the charge of sedition would, however, remain a legal option, an option later employed against Paul (24:5). Nevertheless, the turn of events in the narrative here is a more logical one at this stage in the story. The apostles are too popular in Jerusalem to risk disposing of them the way Jesus was dealt with earlier or the way some would attempt to deal with Paul later. Paul will lack significant popular support at his arrest (21:21, 28–30; 22:22; 23:14–15), but the same cannot be said even at that time for the Jerusalem Christians, who are known to be law abiding (21:20).

Luke emphasizes Gamaliel's Pharisaic affiliation (5:34) in part because, as information both extrinsic and intrinsic to his account implies, Pharisees were closer to the people than were the Sadducees. The Sadducees and their temple police fear the masses (Acts 5:26; Luke 20:6; 22:2), but Luke tells us that Gamaliel is respected by the people (Acts 5:34). Gamaliel has special influence in the council, and particularly in a situation such as this, because the Sadducees hear him as a voice for the people.²⁹⁴

Moreover, the disciples were a charismatic, messianic sect within Judaism, not a distinct "religion." They were a sect like the Essenes or Gamaliel's own Pharisees, and so Pharisees could believe them wrong about some matters yet still grant that God might use them. Administrators of a diverse nation, especially if they needed Roman ratification for executions, had to practice a measure of political tolerance for such sects whatever their individual beliefs. (Minorities might also appreciate another movement that more vocally challenged the rulers' hegemony.) Perhaps this political reality lent urgency to Gamaliel's case; the politically less powerful Pharisees stood to suffer from restrictions on religious freedom, whereas the Sadducees stood to suffer from Pharisaic discontent.²⁹⁵ Most of all, both groups stood to suffer if they made martyrs out of the now-popular apostles, whose followers already considered the Jerusalem leaders responsible for martyring the Galilean prophet Jesus. Martyring more leaders, even if it did not provoke a violent response (5:26), would further alienate the aristocratic elite from the people they governed. Gamaliel's solution made political sense for a municipal aristocracy, even if a later, popular king felt no need for such scruples (12:2; perhaps conveniently for the movement's critics, the climate of opinion may have shifted after Stephen's more radical approach to the land, cf. 12:3).

An ancient senate most of whose members advocated conspirators' execution could be dissuaded, at least temporarily, from its plan (e.g., Plut. *Cic.* 21.1–2).²⁹⁶ Whereas Gamaliel is presented as a person of principle, the Sanhedrin had some political considerations (cf. Luke 20:6, 19; 22:2) that would have made his counsel more convenient to embrace: the same popularity that made the apostles a threat to them also made it dangerous to dispose of them too harshly (Acts 5:26), even by a sedition charge to the governor (as in Luke 23:2).

293. Apart from Acts 23:12–14, these mostly appear spontaneous and hence not reflective of official activities.

294. See Mason, "Chief Priests," 151. In the Roman Republic, one might compare the influence of the tribunes of the plebs.

295. Luke does seem aware of the distinction between the politically more powerful Sadducees and the populist Pharisees (see Mason, "Chief Priests," 115).

296. In the case in Plut. *Cic.* 20–22, however, the death sentence finally did prevail (21.3) and was carried out (22.2).

Luke's account of Pharisaic persuasiveness for some tolerance is not only historically plausible, it is theologically pregnant. The council "heeded" (ἐπέισθησαν, 5:39–40) Gamaliel—the same term Gamaliel employed for the crowds who "followed" Theudas and who "followed" Judas. This is functionally a synonym for the term used to depict the apostles' determination to "obey" (πειθαρχεῖν) God rather than humans (5:29) and their claim that God gives the Spirit to those who "obey" him (5:32).²⁹⁷ This proves ironic: the Sanhedrin's members end up heeding people rather than God. (Ultimately, through Gamaliel, popular with the people [5:34], they heed the people, whom they fear [5:26; cf. Luke 20:6, 19; 22:2].) By contrast, the apostles refuse to heed the Sanhedrin's decree (Acts 5:40) and keep preaching and teaching (5:42), thus obeying God rather than people.²⁹⁸

A flogging was hardly the same as merely another warning (4:17, 21),²⁹⁹ though it was not execution (cf. Pilate's willingness to settle merely for Jesus's scourging in Luke 23:16, 22). That it is passed over so quickly, with emphasis on the triumph of Gamaliel's "tolerant" counsel, probably suggests that it is genuine historical tradition; narrators were to pass over quickly matters likely to trouble the audience.³⁰⁰ Ancient courts could order beatings for violating court orders.³⁰¹ Beatings were also common for a variety of other causes; in addition to the disciplining of children,³⁰² masters could flog apprentices for habitual tardiness,³⁰³ and slaves also would be beaten.³⁰⁴ For fully free men, however, official beatings were an act of public humiliation,³⁰⁵ even seen as making the one beaten comparable to a slave (Jos. *Ant.* 4.238).

Many scholars suspect that the flogging was the traditional Jewish thirty-nine³⁰⁶ lashes (2 Cor 11:24); at least the Pharisees in the council would not have approved

297. As noted above, Luke draws attention to this verb because it frames Peter's brief speech (and uses it only one other time in Luke-Acts, in Acts 27:21).

298. Johnson, *Acts*, 101.

299. Preliminary warnings were standard for many offenses (Fitzmyer, *Acts*, 332; see comment on Acts 4:16–17, 21). Granted, Luke nowhere makes this rule explicit (Conzelmann, *Acts*, 41); but he makes two hearings explicit, and preliminary warnings were not unheard of elsewhere.

300. So Theon *Progymn.* 5.52–56. The scene may, however, also fit Luke's apologetic: the same sort of leaders who later charge Paul here flog innocent people (Mauck, *Trial*, 83–84).

301. In Egyptian papyri, see Lewis, *Life*, 194.

302. By fathers (Aristoph. *Clouds* 1409–10; Xen. *Lac.* 6.1–2; *Ahiq.* 81 [saying 3]; Prov 13:24; Sir 30:1, 12; *t. B. Qam.* 9:11; *Pesiq. Rab Kah.* 15:4; Pilch, "Beat"; Safrai, "Home," 770–71), teachers (Quint. *Inst.* 1.3.13; *t. B. Qam.* 9:11; Goodman, *State*, 78; Safrai, "Education," 954–55; Carcopino, *Life*, 105; Townsend, "Education," 145), and pedagogues (Ael. Arist. *Def. Or.* 380, §127). Some opposed this (Quint. *Inst.* 1.3.13–14; cf. Plut. *M. Cato* 20.2; Ps.-Phoc. 150).

303. For habitual tardiness (Jos. *Ant.* 18.314) or mistakes, even as a child (Lucian *Career* 4).

304. E.g., "King Cheops and the Magicians" 12.8–28 (in Simpson, *Literature of Egypt*, 23–24); Aristoph. *Clouds* 1451; Xen. *Cyr.* 1.4.13; Theophr. *Char.* 12.12; Apollod. *Bib.* 2.8.2; Cic. *Fin.* 4.27.76; Quint. *Inst.* 1.3.14; Plut. *M. Cato* 21.3; Martial *Epig.* 2.66, 82 (crucifixion); 8.23; Juv. *Sat.* 6.219 (crucifixion), 474–85, 490–91; Ach. Tat. 5.17.8–9; Xen. *Eph. Anthia* 2.6; Moore, *Judaism*, 2:138. Sometimes they would receive fifty (Aeschines *Tim.* 139) or even a hundred (Plato *Laws* 9.881C; P.Hal. 1.188–89, 196–99; Petron. *Sat.* 28) lashes. But Germans were said to beat slaves less often (Tac. *Germ.* 25), and Greeks were not to beat other slaveholders' slaves (Demosth. *Con.* 4).

305. Even a personal blow to the face constituted a grievous insult (e.g., P.Hal. 1.203–5; Plut. *Alc.* 8.1; Plat. *Q.* 9.4, *Mor.* 1010F; *m. B. Qam.* 8:6; *b. Sanh.* 58b; Lachs, *Commentary*, 106), and severer public beatings even more so (Hom. *Il.* 2.265–70; 1 Thess 2:2). But Luke's ideal audience will know that biblical prophets faced such insults (1 Kgs 22:24; 2 Chr 18:23; Isa 50:6; Jeremiah, *Sermon*, 29).

306. See Jos. *Ant.* 4.238, 248; many rabbis in *m. Mak.* 3:10 (though R. Judah insists on forty; but 3:11 requires a number divisible by three, such as thirty-nine); this was apparently to avoid accidentally going beyond Deuteronomy's forty (so also Chrys. *Hom.* 2 Cor. 25.1). In cases of a person with a weak physical constitution, the blows might be reduced further (*m. Mak.* 3:11; *y. Naz.* 4:3, §1; people being scourged often pleaded for the number of blows to be reduced, Polyb. 30.31.3). The prescription of eighty blows for an offense (*b. Ker.* 15a) was presumably administered, if at all, in installments (*b. Pesah.* 24a prescribes four flagellations). It might differ with heavenly beings: Metatron received sixty blows (*b. Hag.* 15a), as did Elijah (*b. B. Meš'i'a*

of more,³⁰⁷ and in view of Deut 25:2–3, even the Sadducees would have presumably observed this limit, especially given the punishment’s public character. Later rabbis inflicted the punishment for various offenses,³⁰⁸ such as breach of ritual law;³⁰⁹ breaking the bone of a paschal offering;³¹⁰ breaking a Nazirite vow with wine;³¹¹ cursing another with the divine name;³¹² *orlah*;³¹³ trimming hair to emulate pagans;³¹⁴ and, more commonly, work on a festival day.³¹⁵ Since options for discipline were limited, however, Jewish courts may have employed flogging even for cases beyond those later specified.³¹⁶ Some did allow monetary payment in substitution for some beatings.³¹⁷ Relevant here, this punishment was more apt to occur after the offender had defied a prior warning.³¹⁸

In the custom preserved in later rabbinic sources, the person would be tied to a post³¹⁹ or lie on the ground,³²⁰ receiving one-third of the blows on the front of the body and two-thirds on the back.³²¹ Thus the one inflicting the punishment would strike a strap of calf leather with interwoven thongs against the offender’s back twenty-six times and the breast thirteen times.³²² It is doubtful that a Sanhedrin dominated by the Sadducean high priest would have trifled with such details, but the rabbinic picture may give us a “low” estimate of the kind of discipline the apostles received. In the Mishnah, the synagogue *chazzan* would supervise; here we might presume the involvement of the captain of the temple guard (Acts 4:1).

b. Celebrating Persecution (5:41)

The narrative concludes in 5:41–42 by reinforcing the characterization that the apostles, in contrast to Jerusalem’s political elite, obey God rather than people (5:29). They rejoice when suffering for Jesus’s name (5:41), as he commanded (Luke 6:22–23), while disobeying the Sanhedrin’s injunction not to teach in Jesus’s name (Acts 5:40, 42). The apostles return with joy, as they did after Jesus’s ascension (Luke

85b), but in *b. Yoma* 77a, Gabriel received only forty. Some Amoraim claimed that the forty represented the forty days it took to give the Torah (*Num. Rab.* 5:4). Forty was also a round number that Gentiles could use for beatings (Petron. *Sat.* 105), but not regularly as in Judaism.

307. With, e.g., Le Cornu, *Acts*, 297. In contrast to Gentile courts, Jewish courts limited the beatings (*b. Ketub.* 33b), texts suggesting that the usual number was about forty (probably generally thirty-nine). We cannot be certain that they would have followed the strictures laid out in the Mishnah, but this procedure is closer chronologically than the nineteenth-century suggestion of the Egyptian bastinado, in which the person was beaten on the ground (Abbott, *Acts*, 74).

308. E.g., *m. Hul.* 5:2; *Kil.* 8:3; *Tem.* 1:1; *Mak.* 1:1–3; 3:3–5; *b. B. Meši’a* 115b. Even against fellow rabbis, who might receive it humbly (e.g., one R. Jacob in *Pesiq. Rab Kah.* 4:3; *Gen. Rab.* 7:2; *Num. Rab.* 19:3; *Eccl. Rab.* 7:23, §4; *Pesiq. Rab.* 14:9; allegedly, Akiba received this five times, *Sipra Qed. pq.* 4.200.3.3; *Sipre Deut.* 1.3.2).

309. E.g., *t. Tem.* 1:1.

310. So *m. Pesah.* 7:11.

311. So *m. Naz.* 4:3 (unless her husband has annulled her vow).

312. *Pesiq. Rab.* 22:6.

313. *Y. Pesah.* 24b limits the punishment to olives and grapes.

314. *Deut. Rab.* 2:18.

315. As opposed to the Sabbath, which merited stoning; e.g., *y. Šabb.* 7:2, §15; *y. Bešah* 5:2, §11; *y. Meg.* 1:6, §2. Some of the offenses for which they prescribed the flogging must have applied only in theory, e.g., the high priest leaving the Temple Mount in priestly garments (*Num. Rab.* 19:19); the high priest held more power than Pharisees so long as the temple stood.

316. See Thrall, *2 Corinthians*, 737.

317. So R. ‘Ulla, a Babylonian Amora, in *b. Ketub.* 32ab.

318. So Simeon ben Lakish, *y. Ter.* 7:1.

319. E.g., *m. Mak.* 3:12.

320. E.g., *Sipre Deut.* 286.4.1.

321. E.g., *m. Mak.* 3:13; *Sipre Deut.* 286.5.1. According to the rabbis, someone was to read from Deut 28:58–59 at the time (*m. Mak.* 3:14).

322. *M. Mak.* 3:10–12.

24:52). Luke often emphasizes joy over embracing the gospel (e.g., Acts 8:8, 39; cf. Luke 10:20),³²³ but the connection with suffering is no coincidence (also Acts 16:25). The apostles here follow Jesus's teaching to rejoice when persecuted, because this suffering made them successors of the biblical prophets (Luke 6:22–23). Early Christians often spoke of rejoicing in suffering (Rom 5:3; Jas 1:2; 1 Pet 1:6)³²⁴ and even giving thanks for all things (Eph 5:20; cf. 1 Thess 5:16–18), an ethic that would appeal to many of those familiar with Greek philosophy (especially Stoics)³²⁵ as well as with the Jewish wisdom and apocalyptic traditions.³²⁶

That they suffered “for the name” is significant. Jewish people emphasized sanctifying “the name” and suffering on behalf of it; the Name was a divine circumlocution in Judaism (see comment on Acts 2:21). Acts transfers many concepts associated with the divine name to the name of Jesus (see comment on Acts 3:6).³²⁷ They suffer ὑπέρ Jesus's name, just as he suffered ὑπέρ (for) others.³²⁸ Similarly, Jewish sources praised martyrs who died διὰ (on account of) God (4 Macc 16:25), God's law (6:27, 30), or piety (9:7), or ὑπέρ (on behalf of) their ancestral covenant (1 Macc 2:50) or God's laws (2 Macc 7:9).

Beneficiaries should display gratitude toward their patron, in part, by showing loyalty, ideally even when this commitment entails suffering (Sen. *Y. Ep. Lucil.* 81.27).³²⁹ Sharing in what was another's could mean sharing the other's suffering or death (Philost. *Hrk.* 28.11–12). Suffering (δείραντες, “having flogged [them],” Acts 5:40) for Jesus's “name” meant that the disciples shared his sufferings, standing in continuity with the prophets (Luke 6:22–23, 26; δείραντες, 20:10–11) and their Lord (δέροντες, 22:63; later believers in Acts 16:37; 22:19). They have already been sharing Christ's sufferings, interpreting their sufferings in solidarity with Christ's in Acts 4:25–29, just as Stephen emulates Jesus's death in 7:59–60.

They had been “dishonored” (ἀτιμασθῆναι, 5:41), the beating meant to serve as public humiliation and a challenge to their status (Luke 20:11, the other Lukan use, applying to God's servant-messengers [from Mark 12:4]).³³⁰ Paul and Silas face analogous public humiliation later in the book (Acts 16:22; cf. 1 Thess 2:2),³³¹ ironically because they are Jewish (Acts 16:20–21). In an honor-shame society, such punishments were experienced as degrading; yet none of these was considered as degrading

323. On joy in Acts, see, e.g., Harnack, *Acts*, 277–81; Martín-Moreno, “Alegria”; comment on Acts 13:52.

324. Repeated later, e.g., in Chrys. *Hom. 1 Cor.* 23.4 (Bray, *Corinthians*, 95).

325. See esp. Epict. *Diatr.* 1.6.1; 4.7.9; Marc. Aur. 6.16. Since one cannot change one's lot, one should accept it (Sen. *Y. Dial.* 1.5.6; 7.8.3; 11.4.1; *Ep. Lucil.* 66.18, 37–39; 98.3; Mus. Ruf. 17, p. 108.37–38; frg. 38, p. 136.4–8; Epict. *Diatr.* 1.12.23; 2.16.42; 3.18.1–9; Marc. Aur. 3.12; Lucian *Phil. Sale* 21; *Dem.* 19–20; cf. Cic. *Fam.* 6.20.3; Val. Max. 7.2.ext. 1a) and appreciate whatever is good in it (Sen. *Y. Dial.* 7.15.4–7.16.3; 9.10.4), remaining cheerful (Sen. *Y. Ep. Lucil.* 123.3; *Nat. Q.* 3.pref. 12–13, 15; *Dial.* 1.5.8; 7.15.4; 7.16.1–3), without complaining (*Ep. Lucil.* 96.1–2; 107.6; *Dial.* 7.15.6; Epict. *Diatr.* 1.14.16; Marc. Aur. 2.16; cf. Publ. Syr. 180). Cf. the formula “Perhaps it is for the best” (Cic. *Fam.* 13.47.1; *b. Ta'an.* 21a).

326. See 1QS X, 15–17; Sir 2:4; 2 Bar. 52:6; for praise despite suffering, 1 En. 108:10; *b. Ta'an.* 21a. For joy in suffering for God's commandments (because of future reward), see *Sipre Deut.* 32.5.5; *Pesiq. Rab.* 21:2/3; for joy in martyrdom in hope of future reward, see the Essenes in Jos. *War.* 2.152. See further the comment on Acts 16:25.

327. “The Name,” employed “without qualification (cf. 3 John 7),” may be “Christian Greek” (Lake and Cadbury, *Commentary*, 62–63), reflecting divine Christology (see Longenecker, *Christology*, 43–45). But Gentiles would also understand “name” in terms of honor (e.g., the emperor's, in Pliny *Ep.* 10.82.1).

328. Acts uses ὑπέρ often with reference to suffering on behalf of Christ (Acts 9:16; 15:26; 21:13); elsewhere for sacrifices “on behalf of” persons (21:26) (elsewhere only 26:13, in a different sense; and praying on one's behalf in 8:24). This sense of ὑπέρ (vs. in Luke 6:40; 9:50; 16:8) appears in the Gospel only for Jesus dying on behalf of others (22:19–20, perhaps employing the language of ransom for God's people as in Isa 43:3–4).

329. DeSilva, *Honor*, 144.

330. For shame and imprisonment, see, e.g., Rapske, *Custody*, 298.

331. Cf., e.g., Mus. Ruf. 10, p. 78.23–24; Dio Chrys. *Or.* 76.4; see comment on Acts 16:22.

as the cross, which God had, for Christians, inverted to make it a symbol of honor (Luke 9:23; 14:27; 1 Cor 1:17–18; Gal 5:11; 6:12–14; Phil 2:8; Col 1:20; Heb 12:2).

Although Gamaliel is a positive figure as far as worldly figures go, it is possible that Luke’s audience may see an implicit contrast between the comfortable elite teacher and the suffering apostles: Gamaliel is “honored” (τίμιος) by all the people (Acts 5:34), but the apostles are “dishonored” by standing for Jesus’s name (5:41).³³² To be “counted worthy”³³³ for this human dishonor means interpreting such dishonor as a badge of honor by their Lord’s standards (cf. again Luke 6:22–23).

This picture of the disciples rejoicing over unjust public “dishonor” would appeal to Luke’s audience. Popular Stoic philosophers identified joy with a correct perspective on sufferings.³³⁴ One mid-first-century C.E. Stoic philosopher opined that experiencing supposedly insulting and shameful punishments (Mus. Ruf. 10, p. 76.18–19), and even enduring blows (πληγαί, 76.20; cf. Acts 16:23, 33; 2 Cor 6:5; 11:23), was not truly shameful (αἰσχρόν, Mus. Ruf. 10, p. 76.20) or insulting (ὕβριστικόν, 76.21). It was a matter of perception, he explained; when scourged (μαστιγουμένους; cf. Luke 18:33), Spartan boys “celebrate” (ἀγαλλομένους) it (Mus. Ruf. 10, p. 76.21). True philosophers ought to despise blows and insults (76.23–24); those who regard popular honor do not discern what is really shameful (76.29–30), for real shame comes not from enduring insults (p. 78.1–2) but only from one’s own behavior (78.4, 7).³³⁵

Philosophically minded orators developed the same themes. Thus the second-century orator Maximus of Tyre urged hearers “to rejoice in noble deeds. . . . Thus it was that Heracles rejoiced on his way to the pyre,³³⁶ and Socrates rejoiced as he waited in prison, in obedience to the law” (Max. Tyre 25.7 [Trapp, 213]).³³⁷ Greeks praised both philosophers and heroes with lists of their sufferings through which they demonstrated noble character.³³⁸

c. Continued Teaching about Jesus (5:42)

This verse caps the narrative with a summary statement (as in Acts 2:46; 4:33; 5:12–14; the next is 6:7); it evokes particularly 2:46. As in 2:46, the apostles continue their activity daily in both the temple (i.e., publicly) and homes; they continue teaching as in 2:42. The public nature of their activity also undercuts the possibility of charges of subversion (see comment on Acts 26:26). By returning to the summary of the church’s growth in 5:12–16, Luke makes the persecution, discussed at length in 5:17–41, almost a digression (albeit an intriguing one from a narrative standpoint) in the continuing spread of the gospel. Luke’s literary perspective here probably also provides his theological perspective; opposition did not hinder the spread of the good

332. Of course, the apostles were still being honored among the people, too (Acts 5:13), but the close proximity of the two cognates here may invite a contrast.

333. Luke uses καταξιώω also for meriting the resurrection in Luke 20:35 (the other NT use concerns suffering to be worthy of the kingdom, 2 Thess 1:5). Less relevant, Luke employs ἀξιώω in Luke 7:7; Acts 15:38; 28:22—three of the seven NT uses.

334. Engberg-Pedersen, *Paul and Stoics*, 96–98, esp. 96. Barrett, *Acts*, 300, compares here Epict. *Diatr.* 1.29.49; 2.1.38–39.

335. Wicked behavior was universally deemed shameful, even if individuals sometimes debated which behaviors fell in this category (e.g., Eurip. *El.* 44–45; Mus. Ruf. 3, p. 38.29–30; 4, p. 48.3; 8, p. 62.8–9; 16, p. 106.10–12; 18B, p. 116.4, 17–20; frg. 51, p. 144.8; Dio Chrys. *Or.* 4.43, 115; 18.9; 33.50, 60; Iambl. *V.P.* 31.203; Philost. *Hrk.* 34.7).

336. This is Maximus’s philosophized version, certainly differing from such tragic accounts as Sophocles’s *Women of Trachis* and Ovid *Metam.* 9.

337. To praise unexpected matters (such as Death or Poverty) functioned as rhetorical paradox and hence captured attention (see Men. *Rhet.* 1.2, 346.10–23).

338. Danker, “Debt,” 265; see further Fitzgerald, *Cracks*, 36.

news.³³⁹ By refusing to “stop” (a favorite Lukan expression) speaking, they obeyed God rather than the authorities (5:29). This unhindered increase in turn reveals that God is genuinely with the movement (5:39; cf. 28:31).

The semantic ranges of “teaching” and “preaching” overlap, but when combined they surely include the entire range of activity suggested by either. Some scholars distinguish teaching from proclamation,³⁴⁰ which in Acts tends to be especially deliberative (seeking converts),³⁴¹ but it is possible that the apostles also “proclaimed” to believers (20:25). In a synagogue context, even evangelistic preaching would include Scripture exposition (13:17–41; cf. 7:2–53). “Teaching” (διδασκίη) could sometimes be evangelistic (5:28; 13:12; 17:19); the verb is evangelistic in 4:2, 18; 5:21, 25, 28, but it refers to instruction in 18:25, probably refers to instruction in 11:26; 15:1, 35; 18:11; 20:20; 21:21, includes instruction in 1:1, and is unclear in 5:42; 21:28; 28:31.³⁴² Luke’s audience might visualize teaching in terms of synagogue homilies (13:16–41), public lectures in philosophers’ schools (see comment on Acts 19:9), or lectures at banquets in homes.³⁴³

By contrast, “proclamation” (κηρύσσω,³⁴⁴ conjoined with teaching in 28:31) was usually evangelistic (8:5; 9:20; 10:37, 42; 19:13; probably 28:31), but it represents instruction in 15:21 and possibly in 20:25 (where either meaning is possible but teaching is easier). Their semantic ranges overlap, but like familiar OT merisms (coupling of opposites) to indicate a whole (though these are closer to synonyms than opposites), their appearance together (Luke 20:1; Acts 5:42; 28:31) probably implies a full range of activities.

The Greek term εὐαγγέλιον, “gospel,” normally included the idea of news to the hearer, and hence the NT usage refers especially to proclamation to those outside the believing community.³⁴⁵ The term for “proclaim” here, εὐαγγελίζομαι, is thus by definition “evangelistic” (conjoined with teaching also in Acts 15:35), though even here a partial function of encouraging the church with the “good news” cannot be ruled out.³⁴⁶ Luke’s ideal audience, familiar with the Septuagint and the earlier Christian use of the term, might think of the good news of Israel’s restoration (Isa 52:7; 56:1; 61:1–2),³⁴⁷ unless the history of Christian usage had already obscured the term’s origins.³⁴⁸ Naturally, the enthronement of Israel’s Messiah (Acts 2:34–36)

339. Luke’s optimism could be tempered by the fulfillment of prophecies against the temple (Luke 21) and by Paul’s execution, but he records neither, keeping his narrative upbeat and fast moving. Even in those cases, his theological perspective would be positive (Acts 5:41); God was sovereign and was achieving his purposes even in apparent tragedy (2:23).

340. E.g., Dodd, *Preaching*, 7–8; Fitzmyer, *Acts*, 270.

341. That it can also occur in houses (Acts 5:42) may suggest that nonbelievers were welcomed (cf. 1 Cor 14:22–25); perhaps inquirers sometimes even offered their homes (Acts 10:24–25, 48).

342. That Luke sometimes describes the apostles’ evangelistic ministry as “teaching” (Acts 5:21, 25, 28) probably does underline the emphasis on the *content* of their message (Fernando, *Acts*, 211). Gerhardsson, *Memory*, 225, thinks that the “word of the Lord” in Acts includes not only the *kerygma* but also the *didachē*. This is probably not the phrase’s focus, but that teaching is central in the apostolic mission is difficult to miss.

343. For lectures at banquets in homes, see, e.g., Max. Tyre 22; Pогоloff, *Logos*, 264–71; Slater, “Introduction,” 2–3; cf. Plut. *Lect.* 14, *Mor.* 45D; see esp. comment on Acts 2:42, 46.

344. Technically, this entailed repeating the message of a sovereign without embellishment or interpretation (Siegert, “Homily,” 426–27); the connection of its root with “power” (Athen. *Deipn.* 14.660B), however, is fallacious. Associating it with, e.g., the Eleusinian Mysteries (which used a κήρυξ, “herald”; Epict. *Diatr.* 3.21.13) is too narrow.

345. Dickson, “Gospel as News.” For one history of usage, see Milligan, *Thessalonians*, 141–44.

346. Καί functions here not purely exegetically, but it does connect the terms.

347. Betz, “Kingdom,” suggesting allusion also to the context of Isa 52:13–53:12; cf. Hengel, “Problems,” 244–48. Moses is a herald of good tidings in 4Q377 2 II, 11 (possibly alluding to Isa 61:1–5), but early Judaism also continued to apply the term to Israel’s restoration (*Pss. Sol.* 11:1).

348. For Paul’s usage, see Stuhlmacher, “Pauline Gospel.”

meant the beginning of Israel's restoration in some sense (3:19–21; 5:31). In some early Christian contexts, the reapplication of the Jewish use in a pagan context may challenge pagan uses (e.g., hailing the emperor's works).³⁴⁹

In rhetorical terms, teaching and preaching were probably both mainly deliberative, calling for moral change; teaching might also include epideictic elements (especially narrating accounts praising Jesus),³⁵⁰ and some apostolic proclamation in Acts includes forensic elements (as in 5:29–32). But Luke, like most ancients, was in any case probably less concerned to divide these categories of rhetoric in practice than one would guess from the handbooks, which overemphasized such classifications.³⁵¹

That the apostles continue their public ministry in the temple (5:42; cf. 5:20), in defiance of the temple authorities' decree (5:40), underlines continuity with their previous practice (Luke 24:53; Acts 2:46; 3:1; 5:12, 20–21, 25). The temple was God's house (Luke 19:46), and so God's servants were right to use it regardless of what its political and financial custodians demanded. But this activity also provides the backdrop for the coming debate about the temple's role (Acts 6:13–14; 7:48–50), a debate that will indirectly transform the church's active mission (8:1–4).³⁵² Transitions functioned rhetorically to restate what had already been stated and to set forth what would follow (*Rhet. Her.* 4.26.35); in this case, Acts 5:42 caps off the preceding story but sets the stage for the growth—and conflict—of 6:2.

349. Wright, *Founder*, 42–44, 60; cf. Horsley, "Assembly," 386; Montefiore, *Gospels*, 4. On imperial usage, cf., e.g., Fears, "Ideology of Power." But the secular usage applied to any good news (e.g., Diogenes *Ep.* 23), including wedding invitations (Horsley, *Documents*, 3:10–15, §2, esp. pp. 10, 12, citing P.Oxy. 3313; Longus 3.33). Further, the Hellenistic usage is less directly relevant than the history of the Hellenistic Jewish usage noted above (so also Nock, "Vocabulary," 132).

350. On the epideictic function of much biography, see, e.g., Burrige, *Gospels*, 88; Keener, *Matthew*, 17, esp. n. 46; cf. Aune, *Dictionary of Rhetoric*, 145.

351. See Aune, *Dictionary of Rhetoric*, 419; Stowers, *Letter Writing*, 51 (noting admissions in *Rhet. Her.* 3.4.7; Quint. *Inst.* 3.4.15–16). For the conventional categories in the handbooks, see, e.g., Dion. Hal. *Isoc.* 20; Theon *Progymn.* 1.74–76; Fronto *Ad M. Caes.* 3.16.1; Diog. Laert. 7.1.42; Men. *Rhet.* 1.1, 331.4–9; Hermog. *Issues* 34.21–35.2; Nicolaus *Progymn.* 1.pref. 3; Kennedy, *Art of Rhetoric*, 7–23; idem, "Genres"; Calboli, "Genera." They were not always defined the same way (Anderson, *Rhetorical Theory*, 97).

352. Cf. Dunn, *Acts*, 74.

THE HELLENIST EXPANSION (6:1–9:31)

Luke reports the ministry of the Hellenist leaders, replacing one of the ministries of the apostles (6:1–7), and focuses on Stephen (6:8–7:60) and Philip (8:5–40) in particular. He also focuses on a particular Hellenist nemesis of these Christians—namely, Saul (7:58; 8:1–3), who is soon converted and called to become an agent of the message he once persecuted (9:1–30).

These chapters (Acts 6–8 or 6–9) provide, in a sense, a transition between the Jerusalem church and the beginning of the Gentile mission.¹ They introduce the bicultural Hellenist faction in the church and narrate accounts of two of their leaders who broke cultural boundaries. In Acts 9, a bicultural Hellenist is called to the Gentile mission; in Acts 10, we encounter the first “official” Gentile convert (though Luke informs us of an earlier Gentile convert not “ratified” by the church in 8:27–39). Other ancient writers also used transitional sections at times.²

This larger section also allows for the transition from Peter (a bridge between Jesus and Paul) to Paul as central characters. Saul is a Hellenist, and the attentive reader of Acts (though probably not the first-time hearer) will catch an allusion to Saul of Tarsus in the Cilicians’ synagogue of 6:9. Luke introduces Saul the persecutor explicitly in 7:58–8:3 (followed by Philip’s ministry), details his conversion and early faith in 9:1–30 (ended by a summary statement in 9:31 and Peter’s ministry in 9:31–10:18; repeated in 22:5–21 and 26:9–18), shows his recruitment by a Hellenist emissary of the Jerusalem church in 11:19–30 (esp. 11:25–26, 30; followed by Peter’s escape from “Herod” and from Jerusalem in 12:1–24), and finally returns

1. It was the Antioch community, not the Hellenists as a whole, that spearheaded the Gentile mission (Skarsaune, *Shadow*, 167), but some Hellenists certainly provided the transition (esp. Acts 8:4–40).

2. See, e.g., Val. Max. 1.6.ext. 2–3, which ends the section on prodigies (1.6.113; 1.6.ext. 1–3) with events that happened to Midas and Plato while asleep, then turns to dreams (1.7.1–8; 1.7.ext. 1–10; see esp. 1.7.1; see Wardle, *Valerius*, 195, on such links in Val. Max. 1.6.7, 9; 1.6.ext. 3).

to Paul permanently in 12:25–28:31 (though Peter reappears in 15:7–14). Saul’s persecution (7:58–8:3; 9:1–2) frames Philip’s ministry (8:4–40); Paul’s apostolic call (9:15; 13:2–4) might in some way implicitly frame all of the final Peter section (9:32–12:24), but his ministry to the Jerusalem church clearly frames the narrative of Peter’s departure from Jerusalem (11:30–12:25).

Goulder sees 6:1–9:31 as a major section and notes various signals of continuity with the previous section.³ We may picture these as follows:

Acts 1:1–5:42	Acts 6:1–9:31
Election of Matthias (1:23–26)	Election of the Seven (6:3–6)
Peter teaches about Abraham and Moses (3:22, 25)	Stephen develops Abraham and Moses themes further (7:2–7, 20–49)
Apostles are arrested, tried, and beaten (4:3–22; 5:17–41; but cf. esp. 5:33)	Stephen is arraigned, tried, and killed (6:11–7:60; cf. esp. 7:54)
The Spirit comes at Pentecost and in 4:31	The Spirit comes in Samaria (8:14–17)
Greedy Ananias filled with Satan (5:3)	Greedy Simon the sorcerer (8:20)

Somewhat less persuasively at points, he offers a further set of parallel themes in the first, second, and third (9:32–12:20) sections of Acts as follows:⁴

First Section	Second Section	Third Section
1:1; 3:1: raising of Jesus, disabled man	—*	9:34, 40: raising of Aeneas, Dorcas
1:14: choosing of Matthias	6:1: choosing of the Seven	—†
2:1; 4:31: descent of the Spirit	8:14: descent of the Spirit	10:44: descent of the Spirit
2:14; 3:11: apostolic preaching	8:26: preaching‡	10:28: preaching
2:37; 4:4: crowd converted and baptized	8:36; 9:1: eunuch, Saul converted and baptized	10:48: Cornelius converted and baptized
4:23: gathering of church	—	11:1: gathering of church
2:42; 4:34: charity	6:1: charity	11:22: famine relief
4:1; 5:17: arrest of apostles	6:11: arrest of Stephen	12:1: arrest of James and Peter
4:5; 5:27: trial of apostles	7:1: trial of Stephen	—
5:40: punishment of apostles	7:54: martyrdom of Stephen	12:1: martyrdom of James
5:19: apostles released by an angel	—	12:7: Peter released by an angel
5:1: Ananias struck dead through Peter	8:18: Simon Magus confounded through Peter	12:20: Herod struck dead (after Peter’s release) by angel

* One might add signs summaries here (Acts 6:8; 8:6–7).

† If exact sequence is not crucial (and I believe that it is not), one might cite Saul’s calling here (Acts 9:15).

‡ One might cite Stephen’s speech in Acts 7 to parallel those of Peter in Acts 2, 3, and 10 (though, admittedly, it parallels the forensic speeches of Acts 4–5 better).

Although some of these parallels are noteworthy, others are weak; some items recur so frequently in Acts (and sometimes more than mentioned in these “sections”) as to render the table questionable. Clearly the “parallels” are not all sequential. What they do, however, illustrate abundantly is the narrative continuity of Acts.⁵

3. Goulder, *Type and History*, 23.

4. *Ibid.*, 26.

5. Wiest, “Stephen,” probably makes too much of the narrative connections in doubting historical content (although Luke would have been free to make the sort of adjustments of detail appropriate to his genre); one need not choose between literary patterns and historical content (see the commentary introduction, Keener, *Acts*, 1:562–74, esp. 568–74). Again, Luke’s use of biblical texts as narrative models (Kea, “Septuagint,” though accepting the likelihood of Stephen’s martyrdom) need not rule out historical tradition.

HELLENIST LEADERS (6:1–7)

In this passage Luke introduces some characters who will prove important to his narrative, both individually and as a cultural and missiological transition to the Gentile mission.

The crucial ministry of resource sharing, emphasized in 2:44–45 and highlighted further in 4:32–5:10, now outgrows apostolic supervision with an intra-Jewish cultural clash. This leads to Luke’s treatment of the Hellenist leaders, including Stephen, Philip, and eventually Saul of Tarsus. The apostolic church has survived the threat of sin’s infiltration (5:1–11) and persecution from the outside (5:17–42), nevertheless continuing to grow (5:42–6:1a); now it must address the danger of internal cultural conflicts.¹ The passage, then, concerns age-old and always-repeating issues of intercultural encounters and association² as well as of how to define leadership in the most workable forms.³

Instead of defending their challenged honor, as would have been customary in the wider culture, the apostles sought to share the challenged responsibilities. The following narrative reveals that they shared them with members of the offended minority. Luke does not indicate whether the charges were true (which might suggest that they were), but since the minority members chosen were genuinely “full of the Spirit and wisdom,” everyone could be assured that equity, rather than the interests of any faction, would be pursued.

Despite the sometimes controversial issues dividing early Christians, Luke portrays their assemblies to discuss such matters (6:2–6; 11:1–18; 15:5–29; cf. 21:18–26) as orderly, in contrast to public assemblies, which sometimes rioted and proved hostile to Christians (19:25–34; cf. 18:17; 21:27–29).⁴ Of course, Christians, as members of a minority faith, surely would have experienced the larger culture as more hostile

1. In another possible connection with the preceding context, Willimon, *Acts*, 58, suggests that in contrast to the council, which (like most institutions) preserved the vested interests of tradition (Acts 5:28), the believing community in Acts 6 proves flexible and ready to adapt to new situations. Pervo, “Meet Right,” treats such contrasts as a mark of fiction; but a partisan vantage point for interpretation is not the same as recounting fictitious information. For a different reading, from a semiotic perspective, see Dagron and Calloud, “Récit.”

2. Those concerned with applying the text might offer the following sorts of application of the principles: Leaders in Jesus’s movement can give more “ownership” of the movement (i.e., more participation in its leadership) to leaders of its culturally marginalized minorities when they too are led by God’s Spirit. Freeing such minorities with indigenous leadership often leads to greater growth there than is experienced among the original “sending” population. (Many parts of Christendom still fail to heed less powerful voices in their midst: often women in very conservative churches; ethnic or cultural minorities; the youngest or elderly members; the suffering; etc.) Hertig, “Cross-cultural Mediation,” applies Acts 6:1–7 to multicultural situations, diversity, immigration, and cross-cultural partnership. See also González, *Acts*, 92–93, for contemporary analogies addressing pluralism and minority communities in larger church and political bodies, including (p. 93) the importance of sound indigenous leadership in so-called mission churches. It may have been a sort of “affirmative action.” For various principles in the Stephen narrative, see Schönberger, “Stephanus.”

3. From Luke’s perspective, qualifications for leadership include moral and spiritual readiness; increasing growth invites increasing specialization, including for supervising resource sharing. (Others also draw leadership principles from this passage, e.g., Annen, “Heilige Geist.”)

4. Pervo, *Profit*, 39–42.

than their internal gatherings; one need only compare rules for order in Qumran's *Manual of Discipline* (admittedly more structured than early Christian assemblies) with Qumran's depictions of its external oppressors (e.g., 1QpHab IX, 9; XII, 8; 4Q171 IV, 8) to recognize the intrinsic likelihood of this portrayal of their experience. Still, although Luke focuses on the resolution of issues, he leaves indications that original, genuine conflicts stood behind these assemblies' need for resolution (Acts 6:1; 11:2–3; 15:1, 5, 7; 21:21–22).

Luke also portrays the origins of the Christian movement, and here the Hellenist movement that provided a transition to the Diaspora mission, as praiseworthy. Penner shows that Jewish apologetic historiography often offers epideictic portrayals of God's people in the past.⁵ This approach to the past includes favorable portrayal of a community's founding,⁶ including its progressive attitude of openness to foreigners⁷ and the way it faced opposition.⁸ Such a favorable history serves to rank the pristine movement with the highest Jewish, Greek, and Roman ideals, confirming it as the divinely ordained continuation of Israel's ancient heritage.⁹

1. Historical Basis?

A major purpose of 6:1–7 is to introduce the Hellenist leaders Stephen and Philip.¹⁰ Whereas Luke's ideal audience would have heard of Peter (1 Cor 1:12; 3:22; 9:5; 15:5; Gal 1:18; 2:7–14) and probably John (Gal 2:9) from the Jesus tradition, it may have known nothing of these Hellenist leaders. Because Luke moves from the assignment of waiting on tables to the ministry of the Seven without narrating their work with community goods, and because Luke earlier attributes this role to the apostles, some scholars suspect that Luke created the community goods role for them merely to symbolize the transfer of authority.¹¹

This skepticism, however, reads far too much into Luke's compressed account (like the apostles, he will not focus on waiting on tables, though caring for economic need is a frequent theme in the early chapters of Acts). Would Luke have invented the murmuring against the apostolic administration of goods, then worked so hard to soften the charge? A minority movement could prove quite sensitive to charges that its leaders mishandled funds.¹² Luke, no less than Paul (cf. 1 Cor 4:11–12; 2 Cor 2:17; 8:20–21; 12:17–18; 1 Thess 2:5), includes a running apologetic against any suspicion of the apostles' greed or profit from their ministries (cf. Acts 3:6; 18:3; Luke 9:3, 58; 10:4; esp. comment on Acts 20:33–35). He would hardly invent a story suggesting that anyone had raised contrary questions (handing the financial administration over to the others would support this picture). Granted, there are Lukan themes here, but this is true of Luke's writing even where we know from other Gospels or Paul that he depends on historical tradition.

Penner believes that scholars have expended too much attention on questions of

5. Penner, *Praise*, 235–61.

6. *Ibid.*, 262–87.

7. *Ibid.*, 276–87, noting both Acts and Dionysius of Halicarnassus. Such an attitude must appear particularly "progressive" when the members of one's audience (or their ancestors) would have counted as foreigners within the narrative.

8. *Ibid.*, 287–303.

9. *Ibid.*, 330.

10. Wilson, *Gentile Mission*, 130.

11. Johnson, *Acts*, 110–11.

12. For embarrassment over a treasurer's abuse of office, see, e.g., Aeschines *Tim.* 56; cf. John 6:70–71; 12:6; 13:26–30.

“historical reliability”; he believes the narrative’s sole purpose is “to demonstrate the praiseworthy response of the community to a crisis situation.”¹³ Penner is probably right about this epideictic function in such narratives, but there is a likely reason that Luke recounts this rather than another crisis situation and that Luke writes historical rather than another kind of narrative. Whatever ancient historians’ epideictic purposes, they did include claims about the past as a basis for that praise (see the commentary introduction).¹⁴ Even for rhetorically attentive Josephus, focusing on praiseworthy details and composing with this emphasis in view did not entail wholesale replacement of all events in one’s history.

If Luke did not simply make up the stories, what might his sources be?¹⁵ Many scholars find a “Hellenist source” in Acts 6–8 and 11:19–30. Some language seems to characterize this section more than other parts of Luke-Acts: “the disciples” (6:1, 2, 7; 9:1, 10, 19, 25–26; 11:26);¹⁶ the Twelve (only at 6:2); and “full of the Spirit” (6:3, 5; 7:55; 11:24) and “of wisdom” (6:3, 10; 7:10, 22) in contrast to Luke’s usual “filled with the Spirit.”¹⁷ Luke then would have inserted his favorite stories of Paul’s conversion (9:1–31, repeated twice further in Acts) and Cornelius’s conversion (twice in Acts 10–11 and later in 15:7–9).¹⁸

The link between 8:1–3 and 11:19–20 may suggest that the material on the Seven (Acts 6–8) derives from the tradition of the Antioch church.¹⁹ The objection that one would “expect more concrete material” here if this were the case is rather subjective.²⁰ Luke does provide concrete material here but has probably more concrete sources (such as the “we” narrative) that take priority for space devoted to details. More important, how much concrete material one should “expect” is difficult to quantify. This Antioch source could represent oral traditions rather than specific written or even oral sources.²¹ In this case, Paul would certainly have known these traditions (13:1) and could have recounted them occasionally in his preaching (even as he summarized his own role as persecutor occasionally in his writings or recounted a conflict in Antioch in one of his extant letters [Gal 2:11–14]).

I regard another source as more probable than an Antioch source, however, despite Luke’s skillful literary connections with Antioch. On my view of the “we” narratives’ authorship,²² Luke was directly acquainted with two actors in the present narrative. One, implied throughout the “we” narratives, is Paul himself, who would have had direct access to some of this information, particularly Stephen’s trial (Acts 7:58).²³

Another, with whom Luke stayed for several days during his time with Paul in

13. Penner, *Praise*, 275–76.

14. Keener, *Acts*, 1:116–65.

15. Richard, *Composition*, 306, concludes that despite Luke’s significant literary activity, he depends strongly on his source (more fully, see 243–352; Scott, “Stephen’s Speech”).

16. Probably Luke’s own terminology to establish continuity with Jesus’s ministry. It does not occur elsewhere among earliest believers outside the narrator’s wording, apart from Acts 15:10, where Luke probably gives Peter this wording (Trebilco, “Self-Designations,” 37).

17. Dunn, *Acts*, 79–80. For verbal connections between Acts 6:1–7 and the following sections (6:8–7:2a; 7:2b–53), see Richard, *Composition*, 232–38. Being “full” of the Spirit may characterize continuous experience rather than empowerment for a specific occasion.

18. Dunn, *Acts*, 76.

19. Barrett, *Acts*, 52. The view of an Antioch-Jerusalem source in Acts 6:1–8:4; 11:19–30; and 12:25–15:35 goes back to W. L. Knox. Watson, *Gentiles*, 68, doubts a special source here, correctly observing that Diaspora Jews were converted in Acts 2:5, 9–11, 41; but Luke could have generated the portrayal of these Diaspora Jews in Acts 2 on the basis of information in Acts 6 or information consonant with it.

20. Conzelmann, *Acts*, 87.

21. Barrett, *Acts*, 53.

22. See discussion in Keener, *Acts*, 1:402–22; comment on Acts 16:10.

23. Some of what Luke knew indirectly, of course, he may well have learned from disciples in Antioch.

Caesarea (21:8–10), was Philip, whose story is told in Acts 8 up to the location where Luke later meets him.²⁴ Had Paul and Philip conversed during Paul’s stay there (and the rules of hospitality demanded no less), they likely would have compared memories of the events that they knew from different perspectives—Philip from that of Stephen as a colleague, Paul from that of Stephen’s trial and martyrdom, in which he had a hand. Even though it is debated whether Luke mentions Philip primarily to specify him as an informant, Luke is not shy about implying that he met some of the prominent early actors in his story he recounts (21:8, 18). Because Paul remained in Caesarean detention for up to two years (24:27), during which the “we” narrative’s author apparently remained nearby (27:1–2), it is possible that Philip continued to be the narrator’s host, and it is likely that the narrator at least remained in Caesarea and had continued access to Philip and those close to him. The tradition of Cornelius’s conversion would also likely be recounted in Caesarea (cf. 10:1, 24; 11:11).

2. Literary Connections

While depending on the information in his source or sources, Luke also shows his literary skill in constructing the narrative. The narrative echoes, for example, an analogous situation in the OT. Goulder finds a double parallel in Luke’s work; as the seventy followed the apostles in Luke’s Gospel (Luke 10:1), so the Seven follow them here; both echo Moses’s appointing seventy elders to help him with his work.²⁵

Leaders in Numbers 11	Leaders in Luke 9–10	Leaders in Acts 6
Mixed multitude hungry (Num 11:4)*	Feeding in mixed territory (Luke 9:10)	Mixed multitude hungry (Acts 6:1)
Pressure of work forces delegating it to seventy (11:24)	Appointment of seventy (or seventy-two)† (10:1)	Appointment of Seven (6:3)‡
Seventy after Moses	Seventy (seventy-two) after the Twelve (9:1–6)	Ministry of Twelve (Acts 1–5), then of Seven (Acts 6–8)
Requirement that leaders be full of the Spirit (11:25)	(implied, 10:9)	Requirement that leaders be full of the Spirit (6:3, 5)
Wish to restrain (11:28)	Something like a wish to restrain (9:49–50)	—
Multitude fed (11:31)	—	Multitude fed (6:1–3)
—§	Addresses Samaritans (10:25–37)	Ministry to Samaritans (8:5–25)

* On the complaining here (and some other parallels), see further C. Williams, *Acts*, 95–96, following A. Farrer.

† If one adds Eldad and Medad to the seventy (Num 11:26–27), the seventy-two may echo the same passage.

‡ Pearce, “Council of Seven,” suggests tentatively that Josephus’s local councils of seven might evoke the seventy of Num 11 (though I am skeptical).

§ One could suggest here a comparison with God’s defense of Moses’s marriage to a Nubian outsider.

|| This connection appears in Goulder, *Type and History*, 57; it is one of the weaker ones.

Again, some of these connections are not statistically significant, given their occurrence elsewhere or the tenuousness of the comparisons. Some elements, however (especially the numbers of those to whom work is delegated), do suggest an allusion in both the Gospel and Acts. (The Seven could evoke the seventy [or seventy-two] the way the 120 in Acts 1:15 may evoke the Twelve.)

24. Spencer, *Philip*, 249. If someone else authored the “we” narrative, Luke could still have had access to Philip’s testimony from the same source, at one remove.

25. Goulder, *Type and History*, 56. They may in fact be seventy-two, depending on the textual variant. Robertson, “Limits,” also plausibly connects the role of Luke’s seventy with the Seven here. For Luke grounding the mission of the seventy (Luke 10) in Num 11:24–30 rather than Gen 10 (where the number must be inferred), see the argument in Menzies, “Sending,” 95–99.

The theme of wealth and poverty, common in Luke-Acts (see comment on Acts 2:44–45; 3:6), also surfaces here.²⁶

3. The Problem (6:1)

The (probably unintentional) neglect of the Hellenist widows in the community's charity distribution provoked charges of discrimination. This provided one of the church's first reported internal schisms, one that had to be handled quite differently from the case of Ananias and Sapphira or instances of external persecution. In this case a wrong had to be righted, but a cultural issue was involved that the Galilean apostles were not yet well equipped to handle.

"In those days" (6:1) sometimes functions as a chronological transition device in Luke-Acts (Luke 1:5, 39; 2:1; 6:12; Acts 1:15; 9:37; 11:27)²⁷ as well as evoking earlier biblical narratives (repeatedly throughout the LXX; e.g., Exod 2:11; Judg 17:6; 18:1; 19:1; 21:21; 1 Sam 3:1; 2 Kgs 15:37; 2 Chr 32:24; cf. Luke 4:25; 17:26, 28; cf. comment on Acts 1:15). That the numbers were growing fits Luke's fuller summary statements elsewhere (see, e.g., Acts 2:47; esp. 6:7, which shows that this growth continued after the resolution of the conflict reported here).²⁸

That the disciples were increasing (6:1) fits the pattern of other summaries (2:47; 6:7; 5:14); by implication, they continue to increase in Judea until Jerusalem's fall (21:20).²⁹ With growth came problems, however, especially as the growth crossed cultural boundaries. The apostles may have been unaware of the level of growth among the Hellenist Christians. Nevertheless, the imperfect verb probably suggests that the problem persisted over time.³⁰ The apostles were among the "Hebrews" (6:1) and supervised the distribution (4:35), and so the complaint ultimately includes the sphere of their responsibility. It is not difficult to imagine that, given the rapid spread of their fame in the city, they could offer detailed attention to the organized ministry of charity no more than they could pray individually over all the supplicants who sought their help (5:15–16). Their very success pressed the needs beyond the limits of their human ability to accommodate (cf. Luke 5:16, 19; 8:19; 19:3), requiring them to delegate through the Spirit, as Jesus had done (Luke 9:1–2; 10:1–2).

a. Hellenists and Hebrews

Scholars have long debated the nature of the "Hebrews" and "Hellenists" specified in Acts 6:1. Although many earlier scholars focused on a theological divide, the trend today is to view the groups as linguistically (and to some extent culturally) distinct. The Hebrews presumably spoke Aramaic and (in varying measures) Greek; the Hellenists were primarily Greek speakers, probably especially Diaspora immigrants or their descendants in Jerusalem. Such Hellenists, in many cases, probably never learned much Aramaic; in others, such as among youth growing up in Jerusalem, they may have learned some Aramaic (cf. 21:40) yet retained significant identification with their Diaspora Jewish heritage.

26. See Hoyt, "Poor in Luke-Acts," 222–25.

27. So Bruce, *Acts*¹, 15.

28. Some also point out the cognate $\pi\lambda\eta\theta$ - terms in Acts 6:2, 5, 7 (Gaventa, *Acts*, 114); others note the growth summaries of 6:1, 7 as an *inclusio* (Parsons, *Acts*, 82).

29. Though often disputed, it is historically inevitable that the disciples did increase at some point, given the eventually large number of Christians throughout the empire. Revival movements tend to multiply more rapidly during the period of revival (though often consolidating the growth later).

30. Dunn, *Acts*, 82. Many suspect that the system did prove inadequate (e.g., Fitzmyer, *Acts*, 344).

I. THE TÜBINGEN APPROACH

Some earlier scholars, such as F. C. Baur and his nineteenth-century Tübingen school, speculated too much behind the text, inferring that the Hellenists in the Jerusalem church held a theology distinct from, and independent of, that of the rest of the church.³¹ In their view, Luke smoothed over differences in the movement (if 6:1 can be rightly called “smoothing over” instead of presenting the best face). The apostles and “Hebrews” supported the temple, whereas the Hellenists opposed the temple and hence were driven from Jerusalem (8:1).³² In this view, the Hellenists ultimately found themselves in conflict with law observance, following Jesus’s trajectory better than the apostles did.³³ This hypothesis has also generated numerous secondary and tertiary hypotheses dependent on it.³⁴

Strangely, however, our only explicit source for the discussion claims that this charge of opposing the temple was false (6:13),³⁵ and Acts presents no theological conflicts with these Hellenists the way it later reports debates about the Gentile mission in 11:3–18.³⁶ (That Hellenists participated in the circumcision debate of 15:5–22 is possible, although Luke does not note it, but this suggestion assumes that they returned to Jerusalem after being dispersed or that a new community of Hellenist believers began there.)

The supposed theological divide between Hebrews and Hellenists may reflect especially Baur’s use of Hegelian dialectic rather than Luke’s narrative itself.³⁷ Stephen clearly does not reject the law (on which 7:2–53 depends liberally); for that matter, neither does Luke’s apostle to the Gentiles (16:3; 18:18; 21:26). Nor should we assume that Stephen speaks for the theology of all the Hellenists; given the range of places and backgrounds from which Hellenists came, it is likely that, on the historical level at least, he would not. Given Luke’s varied usage (6:1; 9:29; 11:20), he does not use the term very technically and hence is not likely to signal a continuing “party” in the church.³⁸

II. HEBREWS

The title “Hebrews” appears often in inscriptions throughout the empire, though it should be noted that these inscriptions are mostly in Greek and the term there probably simply means “Israelite.”³⁹ Paul writes fluent Greek yet calls himself a “Hebrew

31. See the summary of the approach in Hill, *Hellenists*, 5–17 (which he goes on to refute in the rest of the book; cf. also Jervell, *Unknown Paul*, 13–22).

32. Esler, *Community*, 140. Cf. Barnett, *Birth*, 71 (thinking that the infusion of pro-temple priests in Acts 6:7 would have created conflict).

33. Conzelmann, *Acts*, 45; cf. Knox, *Jerusalem*, 39–40. Tyson, “Legacy,” notes recent supporters of Baur’s basic thesis (cf. Tyson, “Themes”).

34. E.g., Cullmann, “Qumran Texts,” 220–24, views the Hellenists as a bridge between Essenes and early Christians (also Black, *Scrolls*, 88; tentatively, Klijn, “Stephen’s Speech,” 31), a form of Christianity later represented in the Fourth Gospel (though scholars more often use the Scrolls to emphasize the Palestinian nature of this Gospel; cf. Fitzmyer, *Acts*, 348). Goulder, *Midrash*, 139–41, theorizes that nine apostles returned to Galilee (thus Mark 16:7; Matt 28:10), that the three and James remained in Jerusalem, and that Stephen and Philip led the Hellenists who emerged from the Jerusalem community. But Mark 16:7 mentions Peter, one of “the three.”

35. Jervell, *Unknown Paul*, 13–14; Watson, *Gentiles*, 67; Skarsaune, *Shadow*, 153.

36. Jervell, *Unknown Paul*, 22. Most thoroughly, Hill, “Division,” strongly challenges the view of a theological divide; although I think he plays down too much Stephen’s challenge to the temple, I believe he is correct to doubt opposition to the law in the Jerusalem church.

37. See Gerdmar, “Hebreer och hellenister.”

38. Barrett, *Acts*, 309; Reinbold, “Hellenisten.”

39. See *CIJ* 1:230, §291; 1:249, §317; 1:276, §354; 1:287–88, §370; 1:294, §379; 1:366, §502; 1:369, §505; 1:373, §510; 1:397, §535; 2:16, §750; 2:46, §793. On this title for an early immigrant synagogue in Rome, see also Lung-Kwong, *Purpose*, 97 (citing *CIJ* 1:230, §291; 1:288, §371; 1:373, §510; 1:397, §535).

of Hebrews” (Phil 3:5; cf. 2 Cor 11:22), underlining his credentials as thoroughly Jewish; but Luke, who links Paul with the Hellenist faction (Acts 6:9; 9:29), probably uses his terms in a different way.⁴⁰ In Acts, related terminology elsewhere indicates language (21:40; 22:2; 26:14), but this cannot settle the question until we have examined the term “Hellenists” and its cognates, which in the NT appear only in Acts. This term, too, is ambiguous; it refers to people, Jewish in 9:29 but perhaps not in 11:20 (depending on the variant).⁴¹

III. HELLENISTS

Scholars differ over the meaning of “Hellenists.” The argument that the term means “Gentiles”⁴² is impossible to defend without dismissing more of the evidence than is left to build the theory. They cannot be converted Greeks, which would make 6:7 “superfluous”⁴³ and would also require an incredible number of Jerusalem proselytes to make the rest of the story work (6:9; 9:29; cf. 11:20).

Most scholars today see the distinction as primarily linguistic, between Greek and Aramaic speakers.⁴⁴ Luke reflects interest in groups’ languages (14:11; 21:37; 22:2; 26:14; 28:2). Some suggest that “Hebrews” means those who “speak exclusively or mainly Aramaic,”⁴⁵ but in view of the linguistic evidence, this limitation cannot have included the majority of the Jerusalemite church and probably would not have included the apostles. Because Greek was the lingua franca of the urban eastern Mediterranean, probably most Jerusalemites and even Galileans knew some Greek.⁴⁶ More likely, therefore, is the now-dominant view that “Hebrews” may have known some Greek in addition to Aramaic whereas “Hellenists” spoke only or mainly Greek.⁴⁷

Excursus: Greek and Aramaic Use in Judea and Galilee

Bilingualism was apparently fairly standard in antiquity, although fluency in the second language was not expected. Because Greek and Latin represented the languages of education and the empire, however, they were widely adopted voluntarily by the upwardly mobile in the empire.⁴⁸ In the East, Greek was much more common, origi-

40. Hill, *Hellenists*, 47–48. Granted, Paul cannot be a Hellenist in the sense of speaking only Greek (scriptural arguments in his letters demonstrate this), even for Luke (Acts 21:40; 22:2; 26:14).

41. It could refer to culturally and linguistically hellenized Syrians, as one would expect much of Antioch to be (cf. Ferguson, “Hellenists”; Stanton, “Hellenism,” 470). The common language allowed for spreading the message.

42. Cadbury, “Hellenists,” 59–74.

43. Fitzmyer, *Acts*, 348.

44. E.g., Sevenster, *Greek*, 33; Avi-Yonah, *Hellenism*, 1; Bruce, *Acts*¹, 151; Gaventa, *Acts*, 112; Jervell, *Apostelgeschichte*, 216; Campbell, “*We*” *Passages*, 94. Earlier, John Chrysostom viewed the Hellenists as Greek-speaking Jews (*Hom. Acts* 14).

45. Johnson, *Acts*, 105; cf. Simon, *Stephen and Hellenists*, 4–5.

46. Marshall, *Acts*, 125–26; Capper, “Context,” 353. Aramaic was the dominant language of rural Syria, but Greek prevailed in cities and among “upper classes” (Rives, *Religion*, 63).

47. Moule, “Once More, Hellenists”; Fitzmyer, *Acts*, 347; Dunn, *Acts*, 81; Fiensy, “Composition,” 234–35; cf. Johnson, *Acts*, 105. This indicates, incidentally, that the Jesus tradition would have first entered Greek in a bilingual setting when the tradition’s original transmitters remained dominant voices (on this tradition’s reliability, see discussion in Keener, *Matthew*, 8–36, esp. 24–32).

48. Thomas, “Bilingualism.”

nally spread by Alexander's conquests and spread further, in urban areas, through his Hellenistic successors.

Although Aramaic was probably the first language of most Galileans outside the urban centers, even in Lower Galilee,⁴⁹ Greek was widespread in the land;⁵⁰ even in Jewish Palestine, some scholars estimate that as many as two-thirds of known funerary inscriptions are in Greek (a high estimate).⁵¹ But Greek was not evenly distributed:⁵² Semitic remains prevail primarily in part of heavily traditional Upper Galilee;⁵³ Aramaic inscriptions are common around villages of Jesus's Lower Galilee as well.⁵⁴ But urban Jerusalem is different. Even the Semiticist Dalman long ago recognized the use of Greek in Jerusalem.⁵⁵

Some estimate that about two-thirds of the Palestinian papyri discovered (roughly four hundred) are in Greek, even some in the Bar Kokhba archive;⁵⁶ thus, although the "indigenous Semitic language continued to be used, these documents illustrate that the language of commerce, trade, and governmental administration, including the courts, was Greek."⁵⁷ This is exactly the situation one finds in most postcolonial bilingual settings today, though the national trade language is typically used less, and at a less sophisticated level, in more remote rural areas where it is less needed. Many Palestinian Jews learned Greek as an educated culture language or for urban trade.⁵⁸ Gymnasia, Greek names, and elements such as architecture "and pottery show Greek influences."⁵⁹ Even rabbinic literature includes some fifteen hundred Greek loanwords.⁶⁰

Up to 39 percent of ossuary inscriptions from Jerusalem are in Greek, not including those that are bilingual.⁶¹ Thus many scholars estimate that at least 10–20 percent of Jerusalemites would have spoken Greek as their first language;⁶² a very rough guess of at least ten thousand speakers is reasonable. These native Greek-speakers were hardly the only Jewish Greek speakers by this period. In fact, the percentage of Greek inscriptions in Jerusalem may be as high as 40 percent.⁶³ (This is a much lower

49. See Horsley, *Galilee*, 247–49; cf. Millard, *Reading and Writing*, 85–102, esp. 91–102.

50. E.g., Mussies, "Vehicle"; Millard, *Reading and Writing*, 102–17; cf. *y. Soṭah* 7:1, §4.

51. Van der Horst, "Funerary Inscriptions"; cf. Leon, *Jews of Rome*, 75.

52. Claims about Greek use that are based on the hellenized cities should not be extrapolated to all Palestine, as is done by Schwank, "Grabungen."

53. Cf. Meyers, "Judaism and Christianity," 74.

54. Horsley, *Galilee*, 249.

55. Dalman, *Jesus-Jeshua*, 3; on Greek-speakers in Jerusalem, see Hengel, *Pre-Christian Paul*, 54–62. Because most of Jesus's teachings in the Synoptics appear to have been delivered to Galilean villagers, they probably reflect Aramaic (Meier, *Marginal Jew*, 1:267–68; Deissmann, *Light*, 64; Black, "Language," 305; Jeremias, *Theology*, 4; Segert, "Languages"), rather than Greek, originals. Yet because he also taught in urban Jerusalem, the scholars who suggest that he sometimes taught in Greek (Porter, "Teach"; idem, "Greek in Galilee," 154; cf. Argyle, "Semitism"; *pace* Draper, "Greek") are also likely correct. For discussion of Jesus's language through Dalman, see Schweitzer, *Quest*, 270–78.

56. Porter, "Papyri, Palestinian"; van der Horst, "Funerary Inscriptions."

57. Porter, "Papyri, Palestinian," 766. Rabbinic literature might call into question the language of the courts, but Pharisees (probably the dominant influence on the later rabbinic movement) did not control first-century courts.

58. Fiensy, "Composition," 230; cf. Porter, "Greek of New Testament."

59. Fiensy, "Composition," 231; followed by, e.g., Le Cornu, *Acts*, 316.

60. Aune, *Dictionary of Rhetoric*, 209.

61. Fiensy, "Composition," 231, following Hengel. Levine, *Hellenism*, 78, 94–95, 182, estimates that at least one-third of all Jerusalem inscriptions are in Greek, mainly those of the smaller middle and upper classes.

62. Fiensy, "Composition," 231, again following Hengel. This lower estimate takes into account that surviving ossuaries are more apt to be the expensive stone ones more available to the well-to-do, who were also more exposed to Greek. (Many of the very poor in antiquity left no burial records; Macmullen, *Social Relations*, 34.)

63. Levine, *Hellenism*, 182, estimates that 35 percent of Jerusalem's Jewish inscriptions overall are in Greek; Aune, *Dictionary of Rhetoric*, 209–10, estimates more than 60 percent in Palestine and roughly 40 percent in Jerusalem.

proportion of Greek inscriptions than we find in coastal Joppa or distant Rome,⁶⁴ though Jerusalem was quite hellenized culturally.)⁶⁵ Admittedly, the statistics for Greek use in Judea outside Jerusalem might be unnaturally high, given the difficulty of dating inscriptions; use of the Greek language probably made greater inroads in succeeding centuries, whereas our record for Jewish Jerusalem ends, for the most part, in 70 C.E.⁶⁶ In any case, there is no disputing that Greek was widely used in Jewish Palestine, including in Jerusalem.

IV. MORE THAN LANGUAGE

Many scholars hence argue that the Hellenists are those whose “mother tongue is Greek.”⁶⁷ Thus they spoke primarily Greek and usually little Aramaic,⁶⁸ and their Greek may have been more fluent than that of the average bilingual Galilean or Judean. Martin Hengel notes, “The word ἑλληνίζειν primarily meant ‘speak Greek correctly,’ and only secondarily ‘adopt a Greek style of life.’ Impeccable command of the Greek language was the most important qualification for taking over Greek culture.”⁶⁹ The verb “hellenize” was used in contrast to “barbarize” and hence meant speaking correct Greek, sometimes (though clearly not to be expected in first-century Jerusalem) Attic Greek.⁷⁰ The Sadducean aristocracy seems to have felt at home in Greek, and some members of the Hellenist community may have had relations with them (Acts 6:12); some Levites were perhaps Hellenists (4:36), and the conversion of priests in 6:7 could be viewed against this background (though perhaps only the upper-class Jerusalem priests were, in fact, more Hellenistic). Although the “Hebrews” might know Greek, their “liturgical language” would be Hebrew or Aramaic,⁷¹ as attested by the use of Hebrew psalms and the abundance of preserved early prayers.⁷²

One problem with making the Hellenists’ language the hard-and-fast distinction between “Hebrews” and “Hellenists” for Luke is that Luke’s Paul is connected with the Hellenists (6:9; 7:58; 9:29) yet spoke and understood Aramaic relatively fluently (26:14), even years after his full-time residence in Jerusalem (21:40–22:2). Those who argue that *most* of the Hellenists spoke Greek almost exclusively (in contrast to the Hebrews) are very probably correct; but to stop here begs the question of why there were many Jews in Jerusalem who knew only Greek.⁷³ Were they descended

64. Levine, *Hellenism*, 182, estimates 90 percent for Jaffa and 78 percent in Rome (99 percent if Latin is added).

65. *Ibid.*, 94–95.

66. But the dated papyri still indicate widespread Greek use.

67. Conzelmann, *Acts*, 45; cf. Reinbold, “Hellenisten.”

68. Some scholars suggest that the Hellenists may have known a little Hebrew or Aramaic, mainly regarding the Torah (Le Cornu, *Acts*, 308). Probably this was sometimes the case (as with Saul of Tarsus), but given the dominance of Greek translation in the Diaspora by this period, it can by no means be taken for granted. Knowledge of basic Semitic greetings (e.g., *shalom*) and phrases, of course, would be likely in Judea even if many Hellenists remained largely in their own enclaves; this would be more the case for immigrants’ children than for first-generation immigrants.

69. Hengel, *Judaism and Hellenism*, 1:58.

70. Barrett, *Acts*, 308 (citing the texts). In *Jos. Ant.* 14.191, cf. an adverb cognate to Luke’s term for the Greek language.

71. E.g., Moule, “Once More, Hellenists”; Capper, “Context,” 353.

72. Some think that Jesus supported prayer in vernacular Aramaic instead of Hebrew (Dalman, *Jesus-Jeshua*, 18–21; Jeremias, *Theology*, 188–89; *idem*, *Prayer*, 92–94); on the assumption that Matthew may have adapted Mark for a stricter Jewish-Christian community, cf. Mark 15:34 with Matt 27:46.

73. Cf. Hengel, *Judaism and Hellenism*, 1:105, who suggests that some “groups grew up bilingual and thus stood right on the boundary of two cultures” (though most scholars today would view the “Hebrews” as the more bilingual group).

from the Hellenist reformers who rejected Jewish customs? Or were they foreign Jews who had simply not learned the “Judean” language?

Although language must have been an important factor, it is not the entire story.⁷⁴ Greeks spread their language and culture together; early in the Hellenistic period, some began to define even “Greek” as no longer a purely ethnic term but as a term identifying disposition and education.⁷⁵ Many scholars doubt that the term concerns only language, arguing that it also implies “support for Greek culture”⁷⁶ or at least considerable influence from Greek lifestyle.⁷⁷

Some factors favor the emphasis on a cultural as well as linguistic divide here. Although the noun Ἑλληνιστής first appears in currently extant literature in Acts, related terms apply in 2 Maccabees to those who follow Greek customs (2 Macc 4:10, 13, 15; 6:9; 11:24; cf. 4 Macc 8:8).⁷⁸ One may compare “Medizing” (μηδίζοντες) Greeks—that is, those who had gone over to the Persians (Plut. *Arist.* 18.4).⁷⁹ But the term cannot be a question of cultural *loyalties* here, for the fiercest defenders of traditional Judean institutions in the narrative are also Hellenists (Acts 6:9–11; 9:29).⁸⁰ Still, although some sectors of Judaism were considerably more hellenized than others (e.g., elite Alexandrian Jews, such as Philo, in contrast with authors of Qumran’s sectarian documents),⁸¹ Hellenistic culture had influenced all of Jewish society in the Roman Empire (though much less in Parthia), including in Judea and Galilee.

Jewish Palestine was not as hellenized in this period as the Diaspora or as Palestine was a few centuries later,⁸² but evidence of hellenization is abundant.⁸³ Rabbinic texts—traditionally (albeit inaccurately) considered the epitome of Judaism in Palestine and less hellenized areas further east⁸⁴—often betray Greek language⁸⁵ and culture;⁸⁶ Judaism in Alexandria and elsewhere naturally absorbed and accommodated even more Greek cultural influences.⁸⁷ Many Jewish documents, including at times purely Palestinian Jewish documents, employ Greek interpretive methods.⁸⁸ Jewish

74. Cf. those who doubt that they were a discrete linguistic group (e.g., Bodinger, “‘Hébreux’ et ‘hellénistes’”).

75. Isoc. *Paneg.* 50 in Hengel, *Judaism and Hellenism*, 1:65.

76. Stanton, “Hellenism,” 470.

77. Barrett, *Acts*, 208–9. We should, of course, think much more of Greek athletics and education than of Greek religion.

78. Stanton, “Hellenism,” 464. Simon, *Stephen and Hellenists*, 18, connects the term with Jews “who followed or were suspected of following the ways of the Greeks, i.e., of the heathen.”

79. The language may be more cultural and less a matter of loyalty (given the element of compulsion) in Plut. *Mal. Hdt.* 29, *Mor.* 864A; 31, *Mor.* 864D.

80. The term could reflect the Hebrews’ perceptions about the Hellenists’ cultural loyalties, but then continued use in Acts 9:29 would not fit. Sociological study of immigrant subcultures could suggest a generational divide, but for Luke the biggest divide in the Hellenist community is between the Nazarenes and those who are not. The Hellenist immigrants here were probably conservative regarding the Torah and the temple cult (Schneider, “Stephanus,” 237).

81. For varieties and degrees of hellenization, see, e.g., Wilson, “Hellenistic Judaism”; for Aramaic-speaking Jews, including early rabbis, being much less hellenized than some other circles, see Wasserstein, “Non-hellenized Jews.” Indeed, not all Aramaic-speaking cultures were hellenized to the same degree (Gzella, “Sprachsituationen”), and speaking Aramaic did not unify them (Wallace and Williams, *World*, 39, following Millar, *Near East*).

82. See, e.g., Meyers, “Challenge.”

83. For one nuanced approach to Judaism and Hellenism, see Levine, *Hellenism*, *passim*.

84. Greek learning did apparently arouse some opposition (*t. Abod. Zar.* 1:20; *b. Menah.* 99b), especially in instructing children (*m. Soṭah* 9:14; *t. Soṭah* 15:8; *b. Menah.* 64b, bar.; *Soṭah* 49b, bar.; *B. Qam.* 83a); but cf. Lieberman, *Hellenism*, 100–114; Urbach, “Self-Isolation,” 284–87.

85. E.g., *b. B. Bat.* 140b; *Pesiq. Rab Kah.* 24:6; *Gen. Rab.* 81:5; *Lam. Rab.* proem 31; 4:15, §18; cf. Sevenster, *Greek*, 38–61; Alarcón Sainz, “Vocables.”

86. See, e.g., Sperber, “Note”; Roshwald, “Ben Zoma.”

87. This is hardly disputed, but see, e.g., *Let. Aris.* 121–22.

88. Sambursky, “Gematria”; Stambaugh and Balch, *Environment*, 103, citing Cic. *Inv.* 2.40.116; Hengel, *Judaism and Hellenism*, 1:80ff.; Lieberman, *Hellenism*, 47–82. Some may also reflect Babylonian sources (Cavigneaux, “Herméneutique”).

texts frequently include elements from Greek mythology,⁸⁹ although these naturally prevail in more hellenized Jewish communities and are sometimes euhemeristic.⁹⁰ Scholars have often suggested that Judaism was more assimilated to local pagan culture in some regions than in others,⁹¹ although Diaspora Judaism was on the whole no more “lax” than Palestinian.⁹²

Jerusalem’s Hellenists are defined by their “acculturation”⁹³ to Hellenism (its language and various degrees of cultural literacy), but they were not highly assimilated (i.e., did not abandon minority Jewish customs in the Diaspora) and, if Saul of Tarsus is an example, proved not very “accommodated”—that is, they rejected rather than embraced essential Hellenistic ideals. What degree of hellenization distinguished Hebrews from Hellenists as groups?

V. DIASPORA IMMIGRANTS

In view of the narrative that precedes, the Hellenists to whom Luke refers are probably the Diaspora immigrants who appear strategic already in 2:7–12 and 4:36. (In 2:7–12, Luke uses them to prefigure the Gentile mission, and so it is not surprising that he would revisit them more fully here; they have presumably grown in number since then, like other Jerusalem believers [2:47].) That hellenized immigrants are in view is confirmed by 6:9, where their unconverted counterparts identify themselves with a synagogue or synagogues on the basis of their immigrant status.⁹⁴ Probably the synagogue in 6:9, like various immigrant congregations today, included second-generation members who had grown up in Jerusalem (cf. 22:3; 23:6). (On synagogues, see comment on Acts 6:9.)

Archaeological evidence suggests that many Diaspora Jews did settle in Jerusalem, perhaps to spend their final days there.⁹⁵ Josephus also explicitly testifies that there were many Diaspora immigrants.⁹⁶ Diaspora Jews were certainly hellenized; though faithful to Jerusalem, they were also faithful to the cities where they settled and into whose cultures they integrated.⁹⁷

89. Jdt 16:7; Jos. *War* 1.353; 2.155–58; *Ag. Ap.* 1.255; 2.263; *Pesiq. Rab.* 20:4 (cf. Greek Phlegethon; cf. the Elysian Plain and the Acherusian Lake in *Sib. Or.* 2.337–38, probably Christian redaction; *Apoc. Mos.* 37:3).

90. E.g., Artapanus in Euseb. *P.E.* 9.27.3; *Sib. Or.* 2.15 (Poseidon); 2.19 (Hephaestus); 3.22 (Tethys); 3.110–16, 121–55, 551–54, 588 (euhemeristic; cf. similarly *Let. Aris.* 136; *Sib. Or.* 3.723; 8.43–47); 5.334 (personification; cf. also 7.46; 11.104, 147, 187, 205, 219, 278; 12.53, 278; 14.56, 115); *Test. Job* 1:3 (cornucopia); 51:1/2 (perhaps an allusion to Nereus, also in *Sib. Or.* 1.232); cf. eastern Ishtar as an evil spirit in *Incant. Text* 43.6–7, perhaps 53.12 (Isbell, *Bowls*, 103); cf. art (some of it in Palestinian synagogues) in Goodenough, *Symbols*, vols. 7–8 (and Dura-Europos synagogue, vols. 9–11 and 12:158–83).

91. E.g., Martin, *Colossians*, 18–19; Knox, *Gentiles*, 149; Wilson, *Gnostic Problem*, 259. Although an Egyptian provenance for the *Testament of Solomon* is possible, I would favor an Asian provenance, given its date (cf. also Artemis in *Test. Sol.* 8:11, etc.), and stress the magical-mystical nature of much of Judaism in Asia.

92. So Kennedy, *Epistles*, 14, 22; Robinson, *Redating*, 294. Palestine had its Pharisees and Essenes (by Josephus’s estimates, only six thousand of the former and four thousand of the latter) but had even more *amme ha’aretz*.

93. Using the “acculturation,” “assimilation,” and “accommodation” categories and definitions in Barclay, “Paul among Jews,” 93–98.

94. For Hellenists as wholly or partly Diaspora immigrants here, see, e.g., Dunn, *Acts*, 81–82; Lenski, *Acts*, 240; Kurzinger, *Apostelgeschichte*, 26; Kilgallen, *Commentary*, 47; Johnson, *Acts*, 105; Kisau, “Acts,” 1309.

95. Safrai, “Relations,” 193–94; Witherington, *Acts*, 135. Ossuary inscriptions sometimes declare the place of origin, suggesting the sort of continuing identification found in Acts 6:9 (cf. in Fiensy, “Composition,” 231, though he extrapolates from this to too many of the Greek inscriptions; contrast the correct caution in Sevenster, *Greek*, 147).

96. Fiensy, “Composition,” 232; these include a Babylonian-appointed high priest (for obscurity’s sake; *Jos. Ant.* 15.22, 34, 39).

97. See esp. Gruen, *Diaspora*, passim. For sample inscriptions, see Reinhold, *Diaspora*, 93–96; most fully, *CIJ* passim.

VI. CONFLICT OVER THE LAW?

Would these Jews' hellenization have brought them into conflict with native-born Jerusalemites over the law? Some scholars suggest that the "Hebrews" continued nationalist resentment against Hellenistic influences.⁹⁸ But while the Jewish people had staved off Greek religion in the Maccabean period (1 Macc 1–2), other elements of Hellenistic culture were as much a part of Jerusalem now as of any eastern Mediterranean city. Granted, the Hellenists' subculture may have alienated Hellenists from native Jerusalemites, but the Hellenists, at least, would not view it as a conflict over the law.⁹⁹ Diaspora Jews who paid the annual half-shekel tax to the temple¹⁰⁰ hardly dismissed its importance. Even more to the point, Jewish immigrants who came to Jerusalem would have settled there out of respect for the Holy City and its temple and hence would not be any less committed to the temple than were others.

Further, it is not "Hebrews" but other members of the immigrant community who react most fiercely to the Hellenist Christian message (Acts 6:9; 7:58; 9:29). Their bicultural competence made the Hellenist Jewish Christians a natural bridge to reaching non-Jewish Hellenists (11:20)¹⁰¹ and perhaps to new ideas that eventually shifted their theology. But it did not in itself make them disloyal to the law or the temple. It is thus probably too much to consider them a distinct theological group within the Jerusalem church as well as a distinct sociological one.¹⁰²

Perhaps Luke's audience also lacked the information to clearly identify the differences between the two groups; perhaps they and Luke were less interested in such historical questions than we are. Because they were themselves mostly Greek or hellenized Jews, they would naturally identify with the emerging Hellenist movement. The narrative supplies the information necessary to understand the story and its primary thrust, especially its function in the larger work. For Luke's theological purposes, certainly the Hellenists, as bicultural Jews, form a natural bridge to the Gentile mission.¹⁰³

b. The Complaint (6:1)

The widows' complaint addressed not the community of goods per se (2:44–45; 4:32–5:11) but the distribution mechanism.¹⁰⁴ Luke softens the charge of the complaint in several ways:

1. The church was growing faster (6:1) than the apostles could supervise adequately, and so they needed help.¹⁰⁵

98. E.g., Dunn, *Acts*, 82.

99. Nor were Hellenists allied only with the more hellenized Sadducees (Acts 6:12) if we may accept that Paul was a Hellenist Jerusalem Pharisee (23:6; 26:5; Phil 3:5).

100. Cf. Jos. *Ant.* 18.312; Liver, "Offering"; Sanders, *Judaism*, 156; Trebilco, *Communities*, 13–16; earlier, Exod 30:13–16; Jos. *Ant.* 3.194; 9.161; cf. 7.318. Those known to disagree were in fact Judean (4Q159 I II, 6–12, esp. 7).

101. With Larsson, "Hellenisten und Urgemeinde," this was more linguistic than due to a less law-faithful theology (Koch, "Border," emphasizes the influence of their Christology already held in Jerusalem).

102. I concur here with, e.g., Marshall, "Hellenistic Christianity," esp. 286; Larsson, "Hellenisten und Urgemeinde"; Gerdmar, "Hebreer och hellenister"; Schneider, "Stephanus," 237; Watson, *Gentiles*, 67; Gaventa, *Acts*, 112; most thoroughly, Hill, *Hellenists*, passim; Hurtado, *Lord Jesus Christ*, 207–10; *pace*, e.g., Scobie, "Source Material," 421. I do go further than some of these scholars in arguing that the Hellenists probably functioned historically as a bridge group, which is how Luke, our only direct reporter of their existence, portrays them.

103. See, e.g., Bodinger, "Hébreux' et 'hellénistes"; cf. Watson, *Gentiles*, 68–69: "to underline the universal significance of the Pentecost event."

104. Capper, "Context," 350. Certainly there is no criticism implied of the event in Acts 5:1–11; for that matter, judging from their names, Ananias and Sapphira did not belong to the Hellenists.

105. With Johnson, *Acts*, 105 ("needs outstripping administration").

2. Luke fails to specify that the apostles were the object of the complaint—even though they had been in charge (4:35) and they had to respond to the complaint.
3. The apostles recognized their limitations and their explicit calling and welcomed members of the offended minority to replace them.
4. A later passage shows Peter's compassion and (miraculous) provision for widows (9:39–41).¹⁰⁶

Just treatment of foreigners was one basis for praise in encomia of cities (Men. Rhet. 1.3, 363.4–10) and was heavily emphasized in Judaism even when the foreigners were not Jewish.¹⁰⁷ Some Judeans felt that Diaspora Jews lived too far from the temple and the land and that they compromised God's law too much.¹⁰⁸

Luke probably doubts that the apostles would have deliberately shown prejudice against the Hellenist widows, though he recognizes Peter's prejudice against full-fledged Gentiles (Acts 10:28). Even if it was not deliberate, however, Jerusalem's charities could have neglected foreign widows. In the unlikely event that food for the poor was distributed through a public dole as in Rome, immigrants might have had less knowledge and access to the dole. If, as is more likely, charity was distributed through private means and synagogues, those ministering to Hellenists might have faced a disproportionate number of widows compared with the native Judean counterparts (see discussion below).

Some of the Hellenists had been able to settle in Jerusalem precisely because they were families of means (cf. 4:36); certainly only a family of means would be able to provide for study with Gamaliel (22:3) or access to the high priest (9:1). Others, however, were apparently poor; in any event, many widows became destitute. At this point, we must survey several issues: the general nature of social welfare and charity in Jerusalem, the specific question of the treatment of widows, and the question as to whether there might be a disproportionate number of Hellenist widows requiring support.

The language by which Luke describes the complainers does not appear complimentary to them (cf. Jesus's religious critics in Luke 5:30; 15:2; 19:7):¹⁰⁹ γογγυσμός represents Israel's sin against Moses and the Lord in Exod 16:7–9, 12; Num 17:5, 10; Sir 46:7 (also γόγγυσιν, Num 14:27).¹¹⁰ The verb cognate also applies to Israel's offenses in the wilderness in Exod 17:3; Num 14:27, 29; 16:41; 17:5; Ps 106:25;¹¹¹ and most significant for our purposes, Num 11:1.¹¹² The complaints of Num 11:1, 4 led to the appointment and Spirit-filling of seventy elders (11:16–17), but God was

106. On this fourth point, see Spencer, "Neglected Widows."

107. Exod 22:21; 23:9; Lev 19:34; 23:22; Num 9:14; 15:14–16, 26, 29; 35:15; Deut 10:18–19; 24:14, 17, 19–21; 26:11, 13; 27:19; Jos. *Ant.* 4.234; Ag. *Ap.* 2.209–10.

108. E.g., *Exod. Rab.* 42:9, though this example is late.

109. Without using the terminology, Luke 12:13 provides another example of one seeking a more favorable distribution of resources (Jesus's response is unfavorable in Luke 12:14–21; but he may have responded differently to someone genuinely destitute, Luke 20:47).

110. Its other LXX uses are also very negative (Isa 58:9; Wis 1:10–11). Second-century Christians carried on the tradition against grumbling (*Did.* 3.6; 4.7; *Barn.* 3.5). On "murmuring" in OT tradition, see Hunt, "Murmuring."

111. Its other LXX uses are also usually negative (Ps 58:15 [59:15 MT]; Isa 29:24; 30:12; Jdt 5:22; cf. perhaps Judg 1:14, added to the MT; Lam 3:39; Sir 10:25). The cognate διαγογγύζω, used in Luke 15:1; 19:7, fits Israel's grumbling against Moses, Aaron, and the Lord (Exod 15:24; 16:2, 7–8; Num 14:2, 36; 16:11; Deut 1:27), as against Joshua's generation of leaders (Josh 9:18); for complaining about stingy food distribution, see Sir 31:24.

112. On Num 11's relevance here, see C. Williams, *Acts*, 95–97.

not pleased with the complaints (11:33–34). Although not in the case of Num 11, most of Israel's complaints concerned food or drink, as here. The portrayal of such complaints would appear flattering neither to Jewish people familiar with the wilderness tradition¹¹³ nor to those thinking about complaints more generally.¹¹⁴

From the standpoint of Greco-Roman benefaction, the appropriate response to any gift was gratitude; complaining was utterly inappropriate. Jewish charity was not based on reciprocity of honor,¹¹⁵ but Luke's ideal urban audience might still wince at the complaints of the widows.¹¹⁶ The response of the apostles to this complaint would be considered extraordinarily charitable; benefactors who gave without thought for their own honor were thought worthy of the greatest honors.¹¹⁷

The widows themselves, however, presumably viewed their plight as too urgent to wait, and some members of Luke's first real audiences probably sympathized with them.¹¹⁸ Despite the terminology, these widows' complaints were probably more justifiable than that of Israel in Num 11¹¹⁹ (especially if we read the $\sigma\tau\iota$ in Acts 6:1 as "because"), and even in Moses's day, the just complaint of aggrieved women had to be heard (Num 27:1–11; a context possibly relevant again in Acts 6:6). The narrative suggests no judgment against them (in contrast to most complainers in Numbers, e.g., 11:1); the allusions to the Pentateuch here are varied, since the apostles, like Moses, delegate, but Moses delegated on the basis of wise counsel, not complaints (Exod 18:17–24). When flattering the elite did not obtain necessary provision, nonelites escalated conflict with complaints.¹²⁰ The apostles are not elite, but they do supervise the resources.

Moreover, ancient readers would know that women, especially widows, could safely get away with complaining and even harassing authorities (Luke 18:3–5) in ways that men could not;¹²¹ such demands were often their only means for securing redress against injustices.¹²² The widows here may continue in the path of earlier

113. See CD III, 8; 4Q365 6 II, 10; Jos. *Ant.* 3.23; b. *Arak.* 11b; 15a; *Lam. Rab.* 3:39, §9; 1 Cor 10:10; cf. 1QH^a XIII, 25, 27; XVII, 22; John 6:41, 43, 61; Phil 2:14. Cf. also Bonsirven, *Judaism*, 58.

114. Philosophers and moralists often critiqued complaints against the divine will (Sen. *Y. Ep. Lucil.* 96.1; Epict. *Diatr.* 1.6.42; 1.14.16; Marc. *Aur.* 2.16; 8.10; 10.1; 12.12; Max. Tyre 15.1); hearing excess complaining also bothered ordinary people (cf. Theophr. *Char.* 15.7; 17.1–3). "Human grumbling," opined one writer, "deified Fortune" (Publ. Syr. 180).

115. Winter, *Welfare*, 50; Witherington, *Acts*, 249.

116. Cf. murmuring on the part of some who were serving widows in *Test. Job* 14:3–5 (in context, 13:4–14:5). Land, *Diffusion*, 225, is probably right to think that Acts 6:1 would be understood by the accused group as an honor challenge (which the Twelve defused with sibling terminology in 6:3).

117. DeSilva, *Honor*, 106–9; cf. Pliny *Ep.* 7.18.5; 9.30.2; Fronto *Nep. am.* 2.9.

118. Luke does not clarify whether the widows were in desperate need or simply receiving less than their share, but $\pi\alpha\rho\epsilon\theta\epsilon\omega\rho\omicron\upsilon\nu\tau\omicron$ (a biblical hapax legomenon, but cf. BDAG) does suggest that their complaint was accurate and just.

119. With Gaventa, *Acts*, 113.

120. Toner, *Culture*, 35.

121. In Jewish settings, Luke 18:2–5; 2 Sam 14:1–21; 20:16–22; 1 Kgs 1:11–16; 2:17; Matt 20:20; Bailey, *Peasant Eyes*, 134; in Gentile settings, see Dixon, *Roman Mother*, 179; Simon, "Causes" (on Val. Max. 8.3); cf. Dion. Hal. *Ant. rom.* 8.44.1–8.54.1; Tac. *Ann.* 16.10; Plut. *Coriol.* 34.1–2; *Alex.* 12.3; 21.1–3. Cf. also appeals to prefects with special concern for women's powerlessness (e.g., P.Sakaon 36 in Horsley, *Documents*, 4:132–33; *Lysias Or.* 32.11–18, §§506–11).

122. Later an office of widows existed (perhaps already in 1 Tim 5:3–16; see Keener, *Marries Another*, 90–91; esp. Thurston, *Widows*, 36–55, esp. 44–46; in the Apostolic Fathers, 56–75; Tertullian, 76–91; cf. Scott, *Pastoral Epistles*, 57; Pelser, "Women," 105; Verner, *Household*, 164–65). But it seems to me that to suggest that widows were growing in power and that Luke attempts "to mask" this by accumulating more power in males' hands (Reid, "Power," 87) attributes crime without motive; I have argued that Luke's agenda is pro-women and not the reverse, even if his setting does not invite him to develop modern sensitivities (see the commentary introduction, ch. 18). (Price, "Rhoda," also argues that Luke suppresses widows, but this work is utterly speculative and not grounded in evidence.) Ng, "Guardians," suggests that even Ign. *Pol.* 4.1–2 has nobler motives.

biblical widows who heroically and unconventionally sought their rights.¹²³ Wise leaders often addressed complaints quickly, stopping dissension within their ranks.¹²⁴

c. *Charity and Widows (6:1)*

Not only in the primitive church but also in their surrounding environment, widows were, for the most part, dependent on the resources of relatives and charity. The heavy emphasis on charity in ancient Judaism would have helped widows, provided the distribution mechanisms proved adequate.

I. CHARITY AND DISTRIBUTION MECHANISMS

It is difficult to overestimate the moral emphasis placed on charity in early Palestinian Judaism (see comment on Acts 3:2).¹²⁵ The thought of structurally abolishing poverty probably did not occur to many first-century thinkers, but Jewish charitable institutions were unique in the Roman world.¹²⁶ Later scholars opined that the classes of sinners bound for Gehinnom include those who fail to provide charity.¹²⁷ For details on charity in early Judaism, see comment on Acts 3:2.

Rabbinic sources reveal a great deal about how local Jewish communities organized charity and distributed goods to meet people's needs, at least in a later period.¹²⁸ Most teachers held that unspecified grants of charity were to be used locally for one's own synagogue or town (*t. B. Qam.* 11:3).¹²⁹ After collecting for communal charity funds, the collectors would distribute the funds in each neighborhood (*t. Demai* 3:16). The officials supervising charity had to be above reproach; thus, if they found no one who needed the food, they could sell it, but not to themselves (*t. B. Meši'a* 3:9). When rabbis or others were appointed to these positions, they might also need to be persuaded to accept them (*y. Pe'ah* 8:7, §3). Later rabbis did condemn charity collectors who themselves oppressed the poor by demanding that they contribute.¹³⁰ The offices of local officials in Palestinian villages, including charity collectors, reflect the characteristic role of village officials throughout the Roman province of Syria: supervision of "village finances and building projects."¹³¹

Some scholars have argued that this system of charity distribution did not exist before 70 C.E.;¹³² certainly this is true of the sources attesting this system.¹³³ Arguments against its existence at that time include Josephus's silence concerning the involvement of local agencies in Herod's and Helena's grain distributions (*Ant.* 15.305–16; 20.51–53) and the frequency of beggars in the NT. The first argument is from silence;

123. See Merz, "Importunate Widow," 86, focusing on Luke 18:2–5 (on the biblical narrative tradition, see 65–70).

124. E.g., Xen. *Cyr.* 6.2.12–13 (for Cyrus's speech, 6.2.14–20). For the dangers of such complaining, while not helping, see, e.g., Polyb. 29.1.1–3.

125. See, e.g., Sanders, *Judaism*, 230–31. Some other societies also have a heavy emphasis on giving alms to the poor and its relation to divine reward (Mbiti, *Religions*, 330).

126. Goodman, *State*, 39 (noting [n. 195] that the aims of Italian *alimenta* were very different).

127. *Tg. Qoh.* 6:6.

128. Johnson, *Acts*, 106, citing, e.g., *m. Demai* 3:1; *'Ab.* 5:9; *b. Meg.* 27a; *B. Bat.* 8a–9a; *Roš Haš.* 4a–5b. A traveler could be given food from the common fund (*m. Pe'ah* 8:7), and one could take offerings for the poor when one deemed oneself truly in sufficient need (*m. Pe'ah* 5:4); presumably a sense of honor prevented most people from exploiting this freedom inappropriately.

129. See also Goodman, *State*, 39.

130. *B. B. Bat.* 8b; *Lev. Rab.* 30:1; *Pesiq. Rab Kah.* 27:1.

131. Goodman, *State*, 121.

132. Seccombe, "Organized Charity"; followed by, e.g., Capper, "Context," 351–52; Fitzmyer, *Acts*, 348; Finger, *Meals*, 235.

133. Though it should be noted that discussion of it is attributed to the pre-70 school of Shammai (*y. Demai* 3:1, 23b).

Herod and Helena would not need to work through such agencies, and Josephus would not need to mention it if they did. The second argument is more convincing, though beggars could coexist with charity distribution then as they do today. Ultimately, however, the later rabbinic practices probably say more about villages and small towns than about how charity could be organized and supervised in a massive population such as Jerusalem's.

Some suggest that the "daily" nature of the service in Jerusalem resembles synagogue practice,¹³⁴ but others stress the differences more. Thus, whereas the later rabbinic system speaks of daily offerings for immediate needs, synagogues normally distributed funds for fourteen meals once each week.¹³⁵ This difference points to another—namely, that the apostles had been distributing not funds but food (thus the apostles' relinquishing of "serving at tables" in Acts 6:2); this practice may have been related to eating together (2:46).¹³⁶ This does not suggest that the apostles had developed the system without Jewish precedents; the Essenes, for example, reportedly ate together daily and also distributed to those in need.¹³⁷ The synagogue undoubtedly exerted its influence as well, but the apostles adapted the system, as they were preparing to adapt it again in response to a new circumstance (6:1–4).

We cannot therefore be sure how organized charity distribution was in Jerusalem; probably its effects were as beneficial but as sporadic as those of many private charities today. Local synagogue communities surely were involved; benefactors ran "a community soup kitchen" in Aphrodisias,¹³⁸ and the Theodotus inscription suggests that Jerusalem synagogues helped Diaspora pilgrims (see comment on Acts 6:9). Whatever their models, Christians also were engaged in charity distribution among their own people.¹³⁹

II. WIDOWS

Widows play a prominent and invariably positive role in Luke-Acts, and so it is unlikely that Luke expects us to view them negatively here. Some widows receive notable blessings: the earlier widow of Zarephath, as a model of God's favor through a prophet (Luke 4:25–26); the widow of Nain (7:12); also those widows blessed through Dorcas and whose entreaties to Peter are answered with Dorcas's resurrection (Acts 9:39–41). A widow becomes a parabolic model for insistent prayer (Luke 18:3–5). Nor are widows only on the receiving end of blessing: Anna the prophetess bears witness to Jesus as an infant (2:37); a poor widow in the temple becomes a model for sacrificial giving (21:2–3).

Some scholars argue that the widows here were neglected not in terms of care for them but in terms of their participation in "the honorable female role of *servicing* food."¹⁴⁰ This argument is plausible; the sharing of possessions and meals (Acts 2:44–45) leads to a situation in which none are needy (4:34), and so "serving at tables" could involve the shared meals of believers.¹⁴¹ Nevertheless, on the whole,

134. Blue, "Influence," 487–88.

135. Capper, "Context," 350–51; Blomberg, *Poverty*, 168–69.

136. Capper, "Context," 350–51. Luke can give τράπεζα a broader economic sense (Luke 19:23), but normally the term refers to eating (Luke 16:21; 22:21, 30; Acts 16:34); for description of the usual furniture, see Carcopino, *Life*, 34.

137. Capper, "Context," 352, citing Philo *Hypoth.* 11.4–11.

138. Blue, "Influence," 487.

139. Walter, "Apostelgeschichte 6.1," believes that the problem here involved not the church but Jerusalem's authorities, but this is unlikely in view of (1) the distribution program that Christians had (Acts 2:44–45; 4:32–35) and (2) the "disciples'" participation in choosing the leaders to solve it (6:2–3).

140. Finger, *Meals*, 167. For discussions of a possible "order of widows" (cf. *ibid.*, 261–62), see comment on Acts 9:39–41.

141. *Ibid.*, 257, 279.

the traditional interpretation of caring for widows has more in its favor. Ancient texts more typically portray widows as destitute¹⁴² (the way Luke’s audience may have understood the text apart from clarification to the contrary); those replacing the apostles in serving tables are seven men (6:2–3);¹⁴³ and in Luke-Acts, Jesus’s model suggests that roles in addition to serving tables were open to women (Luke 10:38–42).

Ancient texts viewed widows not, first of all, in terms of their bereaved marital status (as we generally do)¹⁴⁴ but in terms of the destitution that typically resulted from it.¹⁴⁵ One major study argues that widowhood was more common in this period than often assumed and that most widows were terribly impoverished.¹⁴⁶ Some even argue that widows constituted nearly a third of women in the Roman world and 40 percent of those between forty and fifty years of age.¹⁴⁷ If impoverished widows constituted only half of such numbers (despite the large percentage of poor people in general in Mediterranean antiquity), they could easily overwhelm a community’s resources to care for them.

Compared with Jewish customs of charity, those of Greek society did not help widows much.¹⁴⁸ Generally, widows were expected to be supported by male relatives or to remarry.¹⁴⁹ A Roman ideal was the *univira*, the person who married only once;¹⁵⁰ but from the era of Augustus forward, remarriage was standard practice.¹⁵¹ Judaism tended to encourage widows’ remarriage and certainly did not discourage it.¹⁵²

Scripture commanded concern for widows.¹⁵³ Most ancient Near Eastern legal systems cared for widows, but the OT, unlike Babylonian, Hittite, and Assyrian laws, made no provision for them to inherit.¹⁵⁴ This made supporting them all the more

142. This was not always actually the case, as *ibid.*, 258–60, emphasizes (see also comment on Acts 16:15), but it fits both Luke’s frequent language about widows (Luke 4:25–26; 7:12; 18:3, 5; 20:47; 21:2–3; Acts 9:39; with only Luke 2:37 being ambiguous) and that of the biblical tradition from which he draws it.

143. In Finger’s view, these men would be working with the women (*Meals*, 279), but I think it less likely that Luke’s audience would have inferred this conclusion without Luke’s mentioning the women’s activity. (By contrast, Finger would infer it from the nature of the activity.)

144. This is not to deny that grief was recognized; for widowers, see *b. Sanh.* 22a; for widows, e.g., *Sen. Y. Dial.* 6.7.3.

145. Thurston, *Widows*, 9–10, noting even the terms used in Greek and Hebrew; this is the definition in ancient laws (Duncker, “Viduae”). Not all widows, of course, were left poor (cf., e.g., *Sipre Deut.* 281.1.2).

146. Krause, *Witwen und Waisen*; reviewed favorably in McGinn, “Widows.”

147. Winter, *Wives*, 124 (admitting that such figures can be only estimates but pointing to [125] statistics from inscriptions).

148. Boer, *Morality*, 34–36. Cf. *Mart. Epig.* 4.56.1–2 (and 4.56.7–8, where Martial jests that the funds would have been better donated to himself).

149. Clark, “Widows,” 1621. On widows’ remarriage, see also Finger, *Meals*, 212–13, 258.

150. Clark, “Widows,” 1621; Walcot, “Widows”; Lightman and Zeisel, “Univira” (in the principate, e.g., 19–20; noting [26] that the term may apply to widows no earlier than Tert. *Wife* 2.1); Gardner, *Women*, 50–51; Dixon, *Roman Mother*, 6, 22; Leon, *Jews of Rome*, 232. For the ideal, cf. *Hom. Od.* 18.269–70 (temporarily limited); *Diod. Sic.* 1.22.1; 12.14.2–3; *Val. Max.* 2.1.3; *Sen. E. Controv.* 2.2.intro.; 6.4; 8.1 excerpts, intro.; *Petron. Sat.* 111; *Paus.* 2.21.7; *Char. Chaer.* 3.6.6. For a widower (more rarely), *Eurip. Alc.* 305–68; *Ovid Fasti* 5.527–29.

151. Often noted, e.g., Gardner, *Women*, 82; Dixon, *Roman Mother*, 22; Rawson, “Family,” 31; Winter, *Wives*, 125; O’Rourke, “Law,” 180; Last, “Social Policy,” 448–52; Grant, *Paul*, 107; for some resistance, see *Suet. Aug.* 34.1. Earlier, see *Plut. S. Sp. Wom.*, Gorgo 6, *Mor.* 240E. This principle was less applicable to older widows (*Plut. S. Kings*, Dionysius the Elder 6, *Mor.* 175F).

152. Ilan, *Women*, 148–49; Harrell, *Divorce*, 58; Safrai, “Home,” 788; see, e.g., *t. ‘Abod. Zar.* 2:7; *‘Abot R. Nat.* 3 A; *y. Ketub.* 9:8, §4; 1 Tim 5:14; though cf. the ideal in Luke 2:36–37; *Jdt* 8:4–5; 16:22.

153. E.g., *Exod* 22:22; *Deut* 10:18; 14:29; 16:11, 14; 24:17, 19–21; 26:12–13; 27:19; *Pss* 68:5; 146:9; *Prov* 15:25; *Isa* 1:17, 23; *Jer* 7:6; 22:3; *Ezek* 22:7; *Zech* 7:10; *Mal* 3:5. Cf. Gordon, *Near East*, 224.

154. Thurston, *Widows*, 13–14. For warnings against oppressing widows, see, e.g., AQHT A (v) (*ANET* 151; cf. C (i) [*ANET* 153]); KRT C (vi) (*ANET* 149); “The Instruction of Amen-em-ope” 6 (*ANET* 422); cf. sources in Wells, “Exodus,” 244.

important. This support continued in early Judaism as well.¹⁵⁵ Widows were, in addition to their poverty, particularly vulnerable without male defenders in the male arena of law and hence warranted special protection.¹⁵⁶ It is not unlikely that the early Christian ministry to widows was modeled after “a Jewish community institution such as the one found at Aphrodisias.”¹⁵⁷

The *Testament of Job*, a probably second-century C.E. work, praises Job’s beneficence toward widows (developing Job 29:13; 31:16); he had twelve tables (τραπέζας) set for them (*Test. Job* 10:2). Rabbis praised a righteous supervisor of a community’s “charity chest” who, finding no money in the chest to give to a poor widow who came with seven sons, gave her his own money (*’Abot R. Nat.* 3 A).¹⁵⁸ Even if Christians continued Jewish practices without adding new elements, it should not surprise us that Christians would attract widows and that pagan writers by the second century associate large numbers of widows and orphans with the Christian movement.¹⁵⁹

Some scholars suggest that these widows were cut off from public support because they became Christians.¹⁶⁰ It is possible that commitment to Christ had cut them off from local synagogue support, but the new movement was probably not generally in competition with local synagogues (cf. 2:47).¹⁶¹ It may simply be that there was more poverty in Lower City Jerusalem than all the charitable resources of the day could meet. It has also been suggested that the Jerusalem church’s resources were drained from caring for all widows indiscriminately, in contrast to the later, more nuanced approach of 1 Tim 5:3–16;¹⁶² but such details can be argued only from silence. What is clear is that the Christian system continued, perhaps with qualifications (1 Tim 5:9–10) that codified the earlier, more charismatic wisdom used for evaluation by overseers such as those in Acts 6:3.¹⁶³

III. DISPROPORTIONATE NUMBERS POOR?

One factor in the need of Hellenist widows might be discrimination, as suggested briefly above; they were a minority subculture within Jerusalem and may have had to fend more for themselves. This suspicion is difficult to quantify, however, since some of the Hellenists probably had ties with some of the elite (as noted above).

Another reason that a disproportionate number of Hellenist widows would be poor is simply that they lacked the same level of local extended kin network¹⁶⁴ (and

155. E.g., Jdt 9:4; Tob 1:8; Wis 2:10; Sir 35:17; 2 Macc 3:10; 8:28, 30; 2 En. 50:5–6; Jos. *Ant.* 4.227, 240; Philo *Spec. Laws* 1.308; *Sib. Or.* 3.242; *Apoc. Zeph.* 7:4; *Sipre Deut.* 281.1.2; *Pesiq. Rab Kah.* 10:10; 15:9; *Gen. Rab.* 100:2; cf. Jas 1:27. On widows in Second Temple Palestinian Judaism, see, e.g., Chapman, “Marriage,” 215–17.

156. Cf., e.g., P.Ryl. 114.5; for vulnerability in ancient Israel and Egypt, see Galpaz-Feller, “Widow.” Care for widows remains an important application emphasis for African readers (see Reggy-Mamo, “Widows”), given widespread abuse of widows in Africa (Kapolyo, *Condition*, 127).

157. Blue, “House Church,” 179.

158. The model of a widow with seven sons could recall 2 Maccabees (2 Macc 7:20; cf. 4 Macc 15:2, 24, 27; 16:1, 3, 6; 17:2, 5, 7, 9, 13; 18:6, 20).

159. Lucian *Peregr.* 12 (probably viewing widows and orphans as particularly gullible and easily exploited).

160. E.g., Larkin, *Acts*, 99 (citing *m. Pe’ah* 8:7, about Jewish charitable distribution to the poor).

161. Granted, at some point members of the Hellenist synagogue of Acts 6:9 came to view Stephen’s movement as a threat; that may suggest continued participation (cf. what 2 Cor 11:24 suggests for Paul). The level of participation in the community of believers (2:42, 46) may have been so high as to diminish other social commitments.

162. Winter, *Welfare*, 66–67.

163. See later P.Oxy. 1954–56 and Horsley, *Documents*, 2:192–93 (cited in Witherington, *Acts*, 248n217). For Christian alms in the patristic period, see Grant, *Christianity and Society*, 124–45.

164. Cf. Safrai, “Home,” 732–33. Still, contrary to common expectation, the nuclear family was dominant both in Rome (Saller and Shaw, “Tombstones”; Garnsey and Saller, *Empire*, 129; Rawson, “Roman Family,” 7; Stambaugh, *City*, 158) and in Galilee (Goodman, *State*, 36, citing *m. B. Meši’a* 5:10).

perhaps sometimes local offspring) on whom they could depend (cf. 1 Tim 5:4, 8).¹⁶⁵ This is the most certain factor.

One possible factor is the age disparity between husbands and wives in Judea and the Greek world¹⁶⁶ (if the latter affected Hellenist Jews).¹⁶⁷ This factor is less certain because it is less clear that Hellenist Jewish immigrants would reflect the same age disparity as Greeks. Some Greeks regarded fourteen as an ideal age for beauty and procreation.¹⁶⁸ Although it was understood that male puberty followed soon after female puberty,¹⁶⁹ Greek men¹⁷⁰ typically married wives roughly a decade their junior;¹⁷¹ Roman men tended to be closer to five years older than their wives.¹⁷² Some scholars argue that girls from the elite class typically married “in their late teens,” with grooms “in their twenties”; lower classes may have married younger.¹⁷³ Others suggest that most Roman women married in their late teens, with men a decade older and an even wider disparity among upper classes.¹⁷⁴ Ancient sources suggest that a large number of women married quite young, but also may suggest geographic variation.¹⁷⁵

Average Judean men, by contrast, probably married wives only a few years younger than themselves. If later rabbinic texts reflect wider Judean practice in the Second Temple period, typical Jewish men probably generally married around the age of eighteen or twenty.¹⁷⁶ This gave them some time to prepare for marriage; young men were expected to begin adult responsibilities around age thirteen.¹⁷⁷ Jewish women

165. Cf. (including esp. children's support), e.g., Hesiod *W.D.* 188–89; Isaeus *Menec.* 10; Lysias *Or.* 24.6, §168; Xen. *Oec.* 7.19; P. Enteux. 26; Quint. *Inst.* 7.6.5; Dio Chrys. *Or.* 33.45; Diog. Laert. 1.37; *Gen. Rab.* 100:2; *Sib. Or.* 2.273–75; Moore, *Judaism*, 2:170.

166. On the common age disparity between husbands and wives in Roman antiquity, see, e.g., Krause, *Witwen und Waisen*.

167. Jeffers, “Families,” 135, suggests Jewish men marrying around thirty, on the basis of Philo *Creation* 103, but this probably reflects Hellenistic influence on the Alexandrian Jewish elite.

168. For beauty, Xen. *Eph. Anthia* 1.2; for conception, fourteen and the years immediately following were most useful (Soranus *Gynec.* 1.8.33–1.9.34).

169. Egyptian males entered adulthood at fourteen (Lewis, *Life*, 156), as did Roman males (Gaius *Inst.* 1.196; 2.113; 3.208; Gardner, *Women*, 14); cf. also Jos. *Life* 9. The basic matter was the achievement of puberty (e.g., Gaius *Inst.* 1.196; *Gen. Rab.* 91:3; *y. Ter.* 1:3), as in many traditional societies (Mbiti, *Religions*, 158–73; Eliade, *Rites*, 41; Dawson, “Urbanization,” 309). Men could marry as young as puberty or fourteen (Gardner, *Women*, 38).

170. Who often married about thirty (Hesiod *W.D.* 695–97, which also recommends marrying a bride in her teens, 698; Pomeroy, *Goddesses*, 118). But a man marries at eighteen in Demosth. *Boeot.* 2.12.

171. For young brides, cf., e.g., Epict. *Encheir.* 40; Plut. *Bride* 2, *Mor.* 138D; Quint. *Inst.* pref. 4; *Nin. Rom.* frg. 1, A.3; thirteen in Ovid *Metam.* 9.714. The age was often thirteen to sixteen among Greeks and Romans (Friedländer, *Life*, 4:123–31; Lewis, *Life*, 55; cf. Pleket 10 in Lefkowitz and Fant, *Life*, 136; Pomeroy, *Goddesses*, 41, 118, 164; Boer, *Morality*, 39, 269; Verner, *Household*, 41), though about eighteen may have been common (cf. Hesiod *W.D.* 698). The claim of typical Indian marriages at seven (Arrian *Ind.* 9.1) is fanciful (cf. two-hundred-year-old elephants in 14.8).

172. Jeffers, “Families,” 134; idem, *World*, 238.

173. Stamps, “Children,” 199.

174. Shaw, “Age.” Most men in the Latin-speaking West outside Rome married around twenty-five or older (Saller, “Age”), often in the late twenties or early thirties (Garnsey and Saller, *Empire*, 131).

175. In inscriptions in Gardner, *Women*, 39, about 40 percent of the women studied married before age fifteen, and almost three-quarters before age nineteen (cf. Hopkins, “Age at Marriage”); in Egyptian census declarations, however, only 10 percent were married before age fifteen, which suggests some geographic variation; see more fully Rawson, “Family,” 21–22; *CIL* 6.

176. E.g., *m. 'Ab.* 5:21, 32; *b. Qidd.* 29b–30a; *Eccl. Rab.* 3:2, §3; cf. Davis, “Age”; Jeremias, *Parables*, 129; also elsewhere, e.g., Lewis, *Life*, 55, though the Diaspora Jew in *CIJ* 1:409, §553, marries around twenty-two. For early betrothals, see Cohen, *Law*, 297–98.

177. Cf. *m. 'Ab.* 5:21; *'Abot R. Nat.* 16 A; *Pesiq. Rab Kah.* Sup. 3:2; *Gen. Rab.* 63:10; probably Luke 2:42 and Jos. *Ant.* 10.50 (not yet adult); cf. adulthood at twelve in 1 *Esd* 5:41.

often married as young as twelve or fourteen, upon reaching puberty,¹⁷⁸ though some were even older than twenty.¹⁷⁹

Another factor was the obvious situation that presumably a large percentage of immigrants arrived in adulthood, whereas native Jerusalemites lived there from childhood; demographically, this would create a larger elderly population among the Hellenists than among the natives (and elderly widows, in contrast to widowers, were apt to lack means of self-support).¹⁸⁰

In conjunction with this fourth factor may be the belief held by some that it was pious to be buried in the Holy Land.¹⁸¹ Assuming that this belief was communicated in the Diaspora through travelers or through festal pilgrims, it might increase the percentage of senior immigrants. It is not as clear how widespread the belief, documented especially in the Amoraic period, was in the first century, but it probably reflects some earlier tendencies.¹⁸² Even in the first century, one king sent the bones of his brother and mother, both proselytes, to Jerusalem (*Jos. Ant.* 20.95). Certainly, Diaspora Jews looked to Jerusalem as their “mother city” (*Philo Flacc.* 46), and hence some who had visited it on pilgrimages might have wished to finish their days there.¹⁸³ Later Palestinian rabbis proved particularly emphatic on the matter; those who died outside Eretz Israel would have to roll underground to the land in order to be resurrected there.¹⁸⁴ The necropolis at Beth She‘arim and other Palestinian burial sites demonstrate that from about the turn of the third century C.E., many Jews from throughout the Diaspora were brought to the Holy Land for burial.¹⁸⁵

4. The Solution (6:2–7)

The Twelve summoned the congregation (cf. Luke 18:16)¹⁸⁶ in Acts 6:2 and delivered a brief speech. The structure of the apostles’ “speech” may be approached as an *inclusio* (6:2, 4 providing the apostles’ primary mission) but is probably too brief for

178. *Gen. Rab.* 95 MSV; *Pesiq. Rab Kah.* 11:6; Jeremias, *Jerusalem*, 365. The usual range seems to have been twelve to eighteen (Chapman, “Marriage,” 186).

179. Ilan, *Women*, 67–69, notes that women usually married in their teens (at ages such as thirteen or sixteen), but some married even older than twenty. Either Miriam or her husband was thirty at marriage in 4Q545 1 I, 5–6.

180. Finger, *Meals*, 213 (following Stark, “Antioch,” 195), notes that wives typically predeceased their husbands, but this was probably most common during child-bearing years and hence would have less demographic impact on older immigrants.

181. See, e.g., Haenchen, *Acts*, 260–61; for the view, cf. Bonsirven, *Judaism*, 63; Davies, *Gospel and Land*, 62–65.

182. *Abot R. Nat.* 26 A (R. Akiba, early second century). God provided special eschatological protection only in the land (2 *Bar.* 29:2, early second century; cf. *L.A.B.* 7:4). Preference for burial in one’s homeland was not limited to Jews (cf. Philodemus *Death* 26.9–10, disdaining the usual inclination).

183. The masses generally pitied those who died “in a foreign land” (Epict. *Diatr.* 1.27.5).

184. *Y. Ketub.* 12:4, §8; *Gen. Rab.* 96 MV; 96:5, some MSS; *Deut. Rab.* 2:9 (most passages citing Ezek 37:10, 12). Even later Babylonian rabbis concurred (*b. Ketub.* 111a), and the patriarchs were said to have endured much to be buried there (*Pesiq. Rab.* 1:4). Such images of subterranean travel were more conceivable in ancient Mediterranean cosmology (e.g., Ovid *Metam.* 5.501–4; Pliny E. *N.H.* 2.106.225).

185. Safrai, “Relations,” 213. See, e.g., *CIJ* 2:132, §920; 2:136, §930; 2:137, §931; 2:262, §1256. For Diaspora Jews being brought to Jerusalem for burial, see also, e.g., the suggested case in Lemaire, “Engraved.”

186. The term for “summon” (προσκαλέω) is rarely used in this way in Luke and is neither specifically Lukan nor evocative of the exodus account (for the cognate καλέω, cf. Exod 12:21; 19:7; Deut 5:1, but among more than four hundred uses in the LXX, this is not significant). “Congregation” (πλήθος) might evoke the wilderness assembly (Exod 36:5), though ἐκκλησία (also relevant for town assemblies, a possible background here; cf. comment on Acts 19:32, 39–40) makes as much sense here (Deut 23:1–8; 31:30) unless Luke wishes to stress the large numbers (e.g., Exod 1:9; Deut 1:10; 10:22; 26:5; cf. Acts 6:1). It may be paralleled in Qumran usage (see Brown, “Scrolls,” 7; this might evoke the wilderness assembly).

one to argue for a structure any more complex.¹⁸⁷ Lest anyone assume that the appeal to what is “desirable” or “pleasing” (ἀρεστόν) could be considered base (cf. 12:3, its only other Lukan use), it appears frequently as an ethical criterion in ancient sources, including philosophers;¹⁸⁸ it was crucial to please the deity.¹⁸⁹

a. God’s Message or Serving Tables? (6:2, 4)

Although this passage, especially when viewed in light of the rest of Luke-Acts, values economic ministry to the needy, it indicates that the apostles of God’s message have a higher obligation to the message and prayer. Both are described as “ministries” here, both must be done, and both require Spirit-filled leaders.

I. THE APOSTLES’ PRIORITIES (6:2, 4)

The apostles’ central “ministry” (διακονία) in proclamation and prayer (6:4) now requires them to delegate their earlier additional “ministry” of food (6:1).¹⁹⁰ Some scholars suggest that the apostles play down Jesus’s more “holistic model of ministry” in the Gospel of Luke,¹⁹¹ but this charge does not seem fair.¹⁹² The more accurate parallel is Jesus’s delegating some of his ministry because the need was too large for him to address by himself (Luke 9:1, 13–14; 10:1).

Luke has already emphasized that the word of the Lord takes priority over serving tables with his story emphasizing Mary’s role as superior to that of Martha (Luke 10:38–42, using διακονίαν in 10:40). This may be one reason why serving the poor, so central to Jesus’s teaching in Luke (see comment on Acts 2:44–45), nevertheless takes a narrative role in Acts that is secondary compared with cross-cultural evangelism (contrast also the programmatic statements of Luke 4:18–19 and Acts 1:8; 2:17–18).¹⁹³ (To say that the role is secondary is not to deny its continuing importance; see, e.g., Acts 4:35; 11:29–30;¹⁹⁴ 24:17.) The issue is partly a matter of delegating (see comment below) forms of ministry that can be done by others, so that leaders can focus on growing tasks that require their special attention.¹⁹⁵ Jesus

187. Soards, *Speeches*, 55, classifies this as deliberative rhetoric, consisting of a proem (Acts 6:2b), a proposition (6:3), and an epilogue (6:4).

188. E.g., Mus. Ruf. 16, p. 106.10–11; Arius Did. *Epit.* 2.7.5i, pp. 32–33.25–26; 2.7.11b, pp. 74–75.17.

189. E.g., Epict. *Diatr.* 2.14.12; 4.12.11; for Israel’s God, see Tob 4:21; Wis 4:10; 9:10; *Test. Ab.* 15:14 A.

190. This διακονία to widows is described as διακονεῖν, to “serve,” or “wait on,” tables in Acts 6:2. Luke continues to respect both the apostolic διακονία of the message (1:25) and διακονία for the poor (11:29), which remains, after all, the focus of economic stewardship throughout Luke-Acts. Jesus’s own mission can be portrayed as “serving at table” (Luke 22:27; Parsons, *Acts*, 84).

191. Spencer, *Acts*, 66–67. Though cf. the court in Yavneh, which, in contrast to Acts 6:2, 4, when “preoccupied with communal needs, . . . did not interrupt” this even for the Shema or prayer (*i. Ber.* 2:6).

192. Finger, *Meals*, 266, notes that the apostles, who prefer preaching, are soon moved off stage in Luke’s narrative. To this we should note that Luke, having already reported their ministry (and established his emphasis on caring for the poor), is not obligated to continue to reiterate it in order to expect his audience to assume its continuance when the focus of his narrative shifts (a principle that Finger also recognizes elsewhere; see *Meals*, 217–18). Pervo complains that Luke narrates from the perspective of the comfortable versus that of the poor (*Acts*, 161–62); but while the poor certainly do have an appropriate predilection for economic justice, surveys (e.g., Pew Forum on Religion and Public Life, “Spirit and Power: A 10-Country Survey of Pentecostals” [October 5, 2006], n.p.; online: <http://pewforum.org/surveys/pentecostal>) show that in Spirit movements such as Majority World Pentecostalism, “witness” remains a central priority, even among the poor.

193. Cf. Bergquist, “Good News to the Poor.”

194. That Barnabas and Saul undertake such a mission before being sent to evangelize (Acts 13:2–4) might suggest that social ministry was sometimes a step preliminary to “apostolic” style of ministry (perhaps helping to develop the compassion valuable for healing signs, as in Luke 7:13–15; cf. Mark 1:41; 6:34–42; 8:2–8).

195. Cf. the distinctive tasks assigned to Plato’s ruling guardians, pointed out by Dupertuis, “Summaries,” 293. Robertson, “Limits,” even argues that the seventy of Luke 10:1–20 and the Seven here fulfill Jesus’s commission more readily than the Twelve (although the failure of the Twelve is not obvious here, Philip certainly reaches Samaria before them).

also set the example of recognizing realistic limits on possible ministry (cf. Luke 4:43–44; 5:1, 3; perhaps 8:9–10; 9:18), though these limits are emphasized more frequently in Mark (e.g., Mark 1:37–38, 45; 3:7, 9; 4:1, 34–36; 6:31–32, 45–46; 7:24; 8:27).

II. SERVING BY PROCLAMATION AND PRAYER (6:2, 4)

The ministry of the “word” includes proclamation and probably sometimes teaching (e.g., Acts 2:41; 4:29, 31; 6:2, 4, 7; 8:4, 14, 25; 10:36; 11:1); the ministry of prayer was likewise integral to the apostles’ (and the early Christian community’s) activity, both corporately (2:42, 46–47), whether during regular hours of prayer (3:1) or perhaps on other spontaneous occasions (4:24–30), presumably sometimes privately (10:9; cf. 10:2), and also during ministry directly to others (6:6; 8:15).

The expression in 6:4, τῆ προσευχῆ . . . προσκαρτερήσομεν (cf. also 1:14; 2:42), need not mean prayer without interruption but a continuing practice of prayer, such as “observance of the regular hours of prayer”¹⁹⁶ and, as we have seen, additional prayer times as well. Some rabbis spoke of earlier pious people who prayed nine hours a day (often by praying every other hour); this left less time for study than rabbis desired, but God miraculously preserved their memory of Torah (*b. Ber.* 32b, bar.).¹⁹⁷ It is unlikely, however, that unceasing prayer entails continuous, cognitive attention to prayer (cf. Eph 6:18; Col 1:3, 9; 1 Thess 2:13; 3:10; 5:17; 2 Thess 1:11; 2 Tim 1:3).¹⁹⁸

Ancients understood well the importance of the consecration of certain individuals (such as priests or vestal virgins) or periods (such as festivals) to a deity or a special work for a deity. Thus, for example, Isis’s priests had special times of devotion free of alcohol, when they would only learn and teach cultic knowledge (Plut. *Isis* 6, *Mor.* 353B). Nazirites were similarly consecrated for periods of time (Num 6:5, 8, 13), and Israelite priests in various ways for life (Exod 28:41; 30:30). Most directly relevant to the apostolic example here, the word and prayer are the focus of Moses’s ministry after he delegates administrative responsibilities to others (Exod 18:19–20).

III. “SERVING” ECONOMICALLY

Serving was not a demeaning role; the earliest church’s Jewish context, in fact, respected people of status humbling themselves before others. A brief survey of leaders’ humility in early Jewish sources provides a helpful context.¹⁹⁹

Judaism emphasized the value of humility for leaders, as for all hearers.²⁰⁰ Thus writers might amplify the biblical report of Moses’s meekness (Num 12:3); under normal circumstances, he acted like one of the multitude and sought not to be exalted above them.²⁰¹ He also declined any honor the people tried to confer on him,²⁰² perhaps like

196. Jeremias, *Prayers*, 79; Bruce, *Acts*¹, 152. The verb’s linkage with prayer may have been common among early Christians (Rom 12:12; Col 4:2); otherwise it appears in the NT only at Mark 3:9; Acts 8:13; 10:7; Rom 13:6 (and in the LXX only at Num 13:20).

197. In Judean society, to be able to take on and fulfill duties could be viewed as a privilege (cf. Derrett, *Audience*, 34, probably correctly despite the scarce evidence he offers).

198. Much as, in a setting of intense revival, all of life is so suffused with the divine presence that one’s heart is turned toward God in everything.

199. Adapted from Keener, *John*, 904–7.

200. E.g., *Let. Aris.* 257, 263; *Pss. Sol.* 5:14; 1QS II, 24; III, 8; IV, 3, 5; V, 3, 25; VIII, 2; 1 *En.* 5:8; 2 *En.* 52:13; *Test. Gad* 5:3; *m. ‘Ab.* 4:4; 5:22; *b. ‘Abod. Zar.* 20b; *Soṭah* 4b–5a. Lincoln, *Ephesians*, 236, also cites Qumran texts extolling gentleness or meekness (including 1QS XI, 1).

201. *Jos. Ant.* 3.212. Cf. imperial propaganda, originally intended to preserve a veneer of Rome’s republic, in which the emperor was merely the *princeps*, the first among many.

202. *Jos. Ant.* 3.212. On his humility, cf., e.g., Sirat and Woog, “Maitre.”

some statesmen of the Roman Republic who claimed to think only in terms of their duty to the state. (Ancient sources often praised generals' or rulers' benevolence and mercy,²⁰³ if not usually their humility in our modern sense of this term.)²⁰⁴ Likewise, through various stories rabbis extolled Hillel's humility and patience.²⁰⁵ The literature regularly employs both God and rabbis as examples of humility.²⁰⁶ Rabbis told of one teacher who, when his ass-driver answered more wisely than he, switched places with him;²⁰⁷ they claimed that R. Meir endured spit in his eye to reconcile a wife and a husband, following God's example of humility.²⁰⁸

Some accounts of humble rabbis illustrated that it was meritorious to seek another's advancement above one's own,²⁰⁹ even in matters of seating.²¹⁰ Rabbinic literature highly praises rabbis who served their guests with humility.²¹¹ Another teacher faced death because he had been proud when he lectured the host of Israel.²¹² One second-century teacher exhorted that one "should recount what is to his credit in a low voice and what is to his discredit in a loud voice."²¹³ Some said that Samuel "the small" was so known because he belittled himself.²¹⁴ A later rabbi claimed that when a sage boasted, his wisdom departed.²¹⁵

In contrast to our present text (but not incompatible with early Christian ethics, cf. 1 Pet 5:5), such humility was often expressed toward those in positions of greater power. A person should be quick to serve a "head," one in authority over himself.²¹⁶ Two third-century teachers attributed their longevity partly to never having walked in front of someone greater than themselves.²¹⁷ But those in power should never dare become too arrogant themselves. The aristocrat R. Gamaliel II insulted the dignity of R. Joshua and was deposed from his position as head of the rabbinic academy until he went around and apologized.²¹⁸ As one Tanna put it, "Power buries those who possess it."²¹⁹ In a parallel particularly relevant for serving, Rabban Gamaliel mixed wine for R. Eliezer, who was unwilling to accept it. But R. Joshua and R. Zadok responded that Abraham and God himself serve others' needs; and therefore it was appropriate for Gamaliel, as the most honored, to serve his colleagues.²²⁰

203. E.g., of Alexander (Arrian *Alex.* 1.17.12; Val. Max. 5.1.ext. 1a) and others (Appian *Hist. rom.* 10.4.24; Corn. Nep. 1 [Miltiades], 8.4; 8 [Thrasylbulus], 2.6; Hdn. 1.2.4; Val. Max. 5.1 passim). Though Achilles slays many suppliants, the gods require his mercy toward Priam near the book's end (Hom. *Il.* 24.507–8, 665–70; though even here cf. his limits in 24.559–70).

204. One could praise a "meek" ruler, i.e., a "gentle" one (Babr. 102.3; Val. Max. 5.1.ext. 1a; Men. Rhet. 2.4, 389.8); see further Good, *King*, 47–49.

205. 'Abot R. Nat. 15 A; 29, §§60–62 B. Rabbis also praised the humility of Simeon ben Shetah (*y. Sanh.* 6:6, §2) and others.

206. See Maher, "Humble." On God's service, see also Bonsirven, *Judaism*, 13. God promised to exalt the humble (cf. Isa 2:11–12; 5:15–16; Ezek 21:26; Sir 11:5–6; *b. 'Ab.* 6:4, bar.; 'Abot R. Nat. 11 A; 22 B; Matt 23:12; Xen. *Anab.* 6.3.18).

207. E.g., *Deut. Rab.* 3:6.

208. *Num. Rab.* 9:20.

209. *Y. Ta'an.* 4:2, §8.

210. *Y. Ta'an.* 4:2, §9.

211. Dalman, *Jesus-Jeshua*, 117.

212. 'Abot R. Nat. 38 A; 41, §111 B. Whoever exalted himself at the expense of another's humiliation would not inherit the coming world (an early Amora in *Gen. Rab.* 1:5).

213. *B. Soṭah* 32b, bar. (R. Simeon ben Yohai; Soncino).

214. *Y. Soṭah* 9:13, §2.

215. *B. Pesah.* 66b.

216. *M. 'Ab.* 3:12 (R. Ishmael).

217. *B. Meg.* 28a; *Ta'an.* 20b.

218. E.g., *y. Ta'an.* 4:1, §14.

219. 'Abot R. Nat. 39 A.

220. *Sipre Deut.* 38.1.4.

Humility did have its limits. Scholars often thought that others should serve scholars.²²¹ For one probably hyperbolic example, those who did not serve scholars, including serving them food, could warrant death!²²² Likewise, any student who was so presumptuous as to offer a legal decision in front of his teacher might be struck dead.²²³ Many also acknowledged limits to their humility; thus R. Judah ha-Nasi, head of the rabbinic academy at the beginning of the third century, was so modest that he would do whatever anyone asked of him—*except* relinquish his position to place another above him.²²⁴ Rabbi Judah also felt that one should observe honor distinctions, starting with the greatest when bestowing greatness and with the least when bestowing humiliation.²²⁵

Because this passage employs the term διακονέω for “serve,” many have linked it with the later office of deacons.²²⁶ Irenaeus, Pseudo-Tertullian, Cyprian, and others applied this passage to the diaconate,²²⁷ and these applications may be useful for models for the later church office. Yet even assuming that the verb points to its noun cognate (which is far from always the case), διάκονος even in Pauline literature usually refers to Christ as minister (Rom 15:8; cf. Gal 2:17), Paul as minister (2 Cor 11:23; Eph 3:7; Col 1:23, 25), Paul and colleagues (1 Cor 3:5; 2 Cor 3:6; 6:4), or specifically Paul’s fellow ministers of the gospel (Rom 16:1; Eph 6:21; Col 1:7; 4:7; 1 Tim 4:6) and only rarely a specific category of local church official (the nature of which remains unclear, Phil 1:1; 1 Tim 3:8, 12).²²⁸

It should also be noted that even in this passage, the verb applies not only to the administrators of the common fund but also to the ministry of the word (Acts 6:1, 4).²²⁹ Both are ministries,²³⁰ but to read the later title “deacon” into the passage may confuse more than illumine.²³¹ (Certainly the later restriction of “diaconal ministry” at times to social ministry should not be read back into biblical usage.)²³² These seven were apparently recognized leaders among the Hellenists²³³ (though probably not leaders specifically of the Hellenists),²³⁴ and their own ministry quickly expanded beyond tables as well (6:8, 10).

221. E.g., 'Abot R. Nat. 25 A; see considerably more documentation in Keener, *Matthew*, 542–45, on Matt 23:7–11.

222. 'Abot R. Nat. 27, §56 B.

223. E.g., *Sipra Sh. M.d.* 99.5.6; *Pesiq. Rab Kah.* 26:6/7.

224. *Y. Ketub.* 12:3, §6; *Gen. Rab.* 33:3.

225. *Sipra Sh. M.d.* 99.6.1.

226. See, e.g., Nagel, “Twelve”; esp. Lightfoot, *Philippians*, 188–89. In Justin 1 *Apol.* 67, deacons carry the Lord’s Supper to those who are absent, but the congregation’s “president” is in charge of distributing funds collected for widows and orphans during the meeting.

227. See Cabié, “Les ‘sept’”; for Irenaeus, Faivre and Faivre, “Terre.” A more nuanced position recognizes that these are not deacons but reflect the sort of ministry that later developed in that direction (e.g., Hamm, *Acts*, 35).

228. If one added the cognate verb διακονέω, used in Acts 6:2, the results would prove similarly ambiguous.

229. With, e.g., Dunn, *Acts*, 83.

230. Ancients would probably view both “as forms of public religious service, or as they would be called in the Greek world, λειτουργιοι (liturgies)” (Witherington, *Acts*, 250). Officially liturgies, including more general civic benefactions enlisted by the community, were a privilege, but many benefactors “drafted” for these duties sought to be released from these obligations (Lewis, *Life*, 177–84, esp. 182; further on the liturgies in Egypt, see Bell, “Egypt,” 301–2, 315).

231. With, e.g., Panning, “Acts 6.”

232. See Collins, *Diakonia*, 64, 254, 260; emphasizing a God-given task, e.g., 251; Dr. Ben Hartley brought this carefully researched book to my attention; cf. Gooley, “Deacons”; in the Fathers, Bray, *Romans*, 305, 312–13, citing Chrys. *Hom. Rom.* 21; Pelagius *Comm. Rom.* on 12:7 (de Bruyn, 133); Theodoret *Interp. Rom.* on 12:7 (*IER*, PG 82:188). The best translation would be “ministry” (with Finger, *Meals*, 256, summarizing Collins’s work).

233. Cf. Capper, “Context,” 354. Reimer, *Women*, 236–37, thinks they were leaders in the cultic life of the Christians besides caring for funds and community meals.

234. See Schnabel, *Mission*, 428, correctly warning against going beyond the text.

The term Luke uses for “serving” was an apt one for the activity of serving widows, among other activities. The *Testament of Job* stresses this critical ministry (*Test. Job* 10:2, noted above) and describes it as “the ministry of service” (τὴν ὑπηρεσίαν τῆς διακονίας, 15:1).²³⁵ For the Seven, this ministry entailed not just handing out food but overseeing the finances of the community, a major part of the community’s life together (Acts 2:44–45; 4:32; 4:34–5:11).²³⁶ Although the language here is that of serving at tables rather than specifically financial,²³⁷ we know that caring for needs, including food, required funding (4:34–5:2). What other Jewish offices (besides the uncertainly dated charity officers mentioned above) might provide analogies or models for this early Christian use?

The *mebaqqer* (overseer) of Qumran may have overseen management of the members’ goods (1QS VI, 20), a role Josephus also attributes to an officer among the Essenes (*War* 2.123, 134; *Ant.* 18.22).²³⁸ The typical Judean community reportedly had seven leaders (archons or magistrates, who acted as judges), assisted by two Levite ὑπηρέται, or helpers (*Ant.* 4.214).²³⁹ (There may be some other parallels with judges [cf. Exod 18:21], but although judges did decide financial matters in dispute, they were distinct from distributors of charity.) Local synagogues had *hazzanim*, who kept order in the services, administered prescribed corporal discipline, and were prominent members of their local communities. The equivalent Greek title for them was ὑπηρέτης.²⁴⁰ In the first century, however, titles seem to have varied from one location to another, and their meaning often varied when the titles did not.²⁴¹ For that matter, the churches no less pragmatically adopted different models of church government in different locations.²⁴² At the least, we can suggest that the office was an honorable one and “service” was meant very positively.²⁴³

b. Securing the Right Ministers (6:3)

The church’s burgeoning economic ministry is necessary, but the apostles are no longer able to supervise it adequately. They must delegate this part of their ministry to others. The apostles define the basic qualifications (good reputation; full of the Spirit and wisdom) and invite the church as a whole to choose appropriate representatives who meet these qualifications.

I. DELEGATION

The principle of delegation may stem from the story of Moses (Exod 18:21–26), to whom apostles were naturally compared (2 Cor 3:7–18; John 1:14).²⁴⁴ Josephus

235. Both of these terms appear for the ministry to the poor also in *Test. Job* 12:1–2 (διακονῆσαι, 12:1; ὑπηρετεῖ, 12:2/3–4). Collins, *Diakonia*, 165–66, treats *Test. Job* 11–15 more extensively here.

236. Lake and Cadbury, *Commentary*, 64, argue that τράπεζα could include nuances of banking as well as referring to dining tables (see also BDAG; but it is more often a dining table, as in, e.g., *Did.* 11.9).

237. Collins, *Diakonia*, 231, argues that διακονία does not involve handling finances, but it could apply to serving persons at a table; see also Finger, *Meals*, 257.

238. Cf. Driver, *Scrolls*, 521–22. The *mebaqqer* may thus be a “bursar” (Vermes, *Scrolls*, 20). 1QS VI, 19–20 may suggest that nine of ten members would support one who could thus engage in full-time study (cf. VI, 6–7; suggested to me by Orval Wintermute in 1987).

239. Applebaum, “Organization,” 491, noting also communal leadership of elders and archons (e.g., Jdt 6:16), and first-century Alexandrian Jews’ gerousiarch and archons (Philo *Flacc.* 74, 117). In synagogues, archons were in charge mainly of “secular” aspects of synagogue business (Applebaum, “Organization,” 494–95).

240. Applebaum, “Organization,” 496 (citing, e.g., Jos. *Ant.* 4.214; Luke 4:20; Epiph. *Her.* 30.11).

241. See Trebilco and Evans, “Diaspora Judaism,” 287.

242. For the varied models of organization in Acts, see, e.g., Dumais, “Ministères et Esprit.”

243. Overseeing community funds was a respectable position in eastern Mediterranean society; so also here (cf. Arlandson, *Women*, 197, countering Witherington’s view that men serving women here inverts the social structure).

244. Rosner, “Judges,” finds in Moses’s appointment of judges a precedent even for 1 Cor 6:5 (though, despite the use of διακρίνω in Exod 18:16 LXX, not many substantive verbal parallels undergird the

suggests that Moses set rulers over the people because of Raguel's advice so that Moses could attend to the more essential business of the nation's safety (*Ant.* 3.68–73). In one account, the seventy to whom the work is delegated are filled with the Spirit and prophesy temporarily (Num 11:16–17, 24–25); here, by contrast, those to whom the work is delegated must be continuously full of the Spirit already (Acts 6:3).²⁴⁵ This may be why some of these new leaders for the Hellenist Christians soon appear preaching the word of the Lord (8:14), as the apostles themselves were determined to do (6:2, 4).

Moses delegated directly to honorable men whose character he knew (Exod 18:21; cf. Num 11:16, 24), but here the entire congregation chooses those with good reputation.²⁴⁶ This is not to suggest that this represents the only form of choosing leaders elsewhere in Acts. Among relatively recent converts, Paul and Barnabas appoint leaders (Acts 14:23); after defining the qualifications and narrowing down candidates to a widely acceptable pool, the Jerusalem church also uses lots to select an apostle (1:21–26). It appears less likely that Acts presents a single model of selecting leaders than that it endorses variety: although the gospel, the Spirit, and the church remain priorities, many other issues can be adapted pragmatically according to available models and current needs.²⁴⁷ Luke elsewhere employs ἐπισκέπτομαι to mean “visit” (Luke 1:68, 78; 7:16; Acts 7:23; 15:14, 36), but other senses (such as “examine carefully”) are well attested in antiquity (BDAG cites, e.g., Num 1:3; Hdt. 2.109.2; Diod. Sic. 12.11.4; *1 Clem.* 25.5; for this context, cf. esp. Num 27:16).

II. QUALIFICATIONS, INCLUDING REPUTATION

Sometimes standards were higher for leaders than for others.²⁴⁸ Lists of qualifications constituted a conventional literary form (cf. 1 Tim 3:2–7),²⁴⁹ applicable, for example, to various civic offices²⁵⁰ and even for the best midwives.²⁵¹ In classical Athens, candidates chosen by vote or lot were afterward questioned to see if they fit the qualifications (e.g., being at least thirty years old).²⁵²

Such qualifications for leadership appear in Hellenistic Jewish literature. In Pseudo-Aristeas, the high priest informed Ptolemy that “in the presence of all we selected [ἐπελέξαμεν] elders good and true, six from each tribe” (*Let. Aris.* 46 [Hadas, 119]). Josephus argues (apologetically but also self-servingly) that the priests were qualified for leadership in Israel because they were the most persuasive and behaved the most wisely, not on the basis of their wealth or possessions (*Ag. Ap.* 2.186).²⁵³ Lists

allusion; cf. “wise” in Deut 1:13, 15; 16:19). For Mosaic text models here, Pervo, *Acts*, 152, cites Daube, “Reform.”

245. On the importance of delegation in Num 11 as background here, see, e.g., Kisau, “Acts,” 1310. I am not here assuming that ancient Israelite texts employed “spirit” in the same manner as early Christianity (cf. discussion in Keener, “Spirit,” 484–87; from a different approach, Levison, *Filled*), but considering how early Christians read them in light of early Christian vocabulary more generally.

246. This more democratic orientation probably reflects the cultural change; Greek culture had experimented much more with the electoral process than had cultures surrounding ancient Israel.

247. Cf. a similar observation regarding church order in the Pastorals, which may be corrective rather than normative, in Fee, “Church Order.”

248. E.g., Tac. *Hist.* 2.29; perhaps Oxford Genizah Text B.10–11.

249. E.g., Macrobius, *Comm.* 1.8.4 (van der Horst, “Macrobius,” 230); comparing 1 Tim 3:2–7 and Titus 1:6–9 with “ancient descriptions of professional leaders, particularly of household managers,” see Malherbe, “Overseers” (quote from 73). For philosophers in India, supposedly, see Philost. *Vit. Apoll.* 2.30; for vestals, see Gardner, *Women*, 22–23.

250. E.g., Arist. *Pol.* 7.8.5–6, 1329a. Cf. negative qualifications in Aeschines *Tim.* 27–30.

251. Soranus *Gynec.* 1.1 (esp. 1.1.3); 1.2.4.

252. Gomme and Hornblower, “*Dokimasia*.”

253. This resembles the epideictic fiction in Dion. Hal. *Anc. Or.* 1.3, praising Rome because “her leaders are chosen on merit” (S. Usher, LCL, 1:11).

of qualifications for judges appear in the Dead Sea Scrolls (CD X, 6–7)²⁵⁴ and in rabbinic literature.²⁵⁵

The necessity of qualifications is also relevant in view of the narratives about Israel's wilderness experience, on which the primitive church and/or Luke were drawing for their model of delegated leadership. In Exodus, leaders chosen had to fear the Lord, be individuals of integrity, and abhor dishonest gain (Exod 18:21); such requirements would be implied in leaders of good reputation who were full of the Spirit and wisdom (Acts 6:3). Moreover, Moses's elders were newly filled with the Spirit, at least temporarily (Num 11:17, 25–26); here the leaders are already continuously full of the Spirit.

One crucial qualification was that of being of good reputation (in early Christianity, 1 Tim 3:2, 7, 10; Titus 1:6),²⁵⁶ essential for leaders in Greco-Roman politics.²⁵⁷ (This is the sense of μαρτυρουμένου, “favorably attested” by others, as in Acts 10:22; 22:12; cf. 22:5; 26:5; Luke 4:22. Divine attestation, of course, proved the most critical element [cf. Acts 13:22; 14:3; 15:8].) Greek custom required electoral candidates to be of good standing;²⁵⁸ Jewish people likewise expected their leaders to be irreproachable.²⁵⁹ Such good reputation could stand one in good stead if one was later accused of any crime,²⁶⁰ giving the accused the benefit of the doubt (cf. 1 Tim 5:19). By contrast, one whose private life was counted immoral was open to criticism as a public leader.²⁶¹ A leader could hardly get away with enforcing standards that he himself was believed to have violated;²⁶² a speaker of known integrity was also more persuasive.²⁶³ Philosophers opined that it was important that those seeking good reputations should be genuinely what they wished to appear to others (Iambl. *V.P.* 9.49). If bad reputation was harmful to the individual, it also reflected on one's family and associates;²⁶⁴ it was thus a great liability to a minority community. Thus Jewish people often worked hard to establish themselves as honorable in their Diaspora communities.²⁶⁵

254. Cf. likewise age qualifications for a ruling priest (CD XIV, 7) and a *mebaqqer* (XIV, 9).

255. E.g., *t. Hag.* 2:9; *Sanh.* 7:1. Earlier, cf. Exod 18:21.

256. On the value of reputation, see, e.g., Pindar *Nemean* 8.37–39; Publ. Syr. 75, 96; Vitruv. *Arch.* 6.pref. 5; Marc. Aur. 10.1; Prov 3:4; 22:1; Eccl 7:1; Sir 41:13; 42:8; Jdt 8:8; Ign. *Philad.* 11.1. For being above reproach, see, e.g., Hesiod *W.D.* 760–64; Arius Did. *Epit.* 2.7.Sb.2, pp. 14.35–16.1; Philost. *Vit. soph.* 2.5.570; Philo *Abr.* 6; *CIJ* 1:57, §82; 1:81, §117; 1:91, §130; 1:102, §144. For condemnations of those neglecting reputation, see, e.g., Theophr. *Char.* 9 *passim*.

257. E.g., Dion. Hal. *Demosth.* 18; *Let. Aris.* 280; also for other kinds of leaders, e.g., Val. Max. 8.15.3.

258. Cf. Betz, *Corinthians*, 74. A truly virtuous man ought to be above even suspicion (Aeschines *Tim.* 49; Plut. *Caes.* 10.6; cf. Plut. *Table* 2.1.4–5, *Mor.* 631F–632A) and certainly above consistently bad reputation (Aeschines *Tim.* 126–29).

259. Gerousiarchs in *CIJ* 1:13, §9; 1:83, §119; 1:276, §353; fathers of synagogues in 1:66, §93; 1:372, §509; 1:398, §537; blameless priests in 1 Macc 4:42. Cf. those of “good report” (2 Macc 14:37; cf. Tob 10:13; Sir 34:23–24).

260. E.g., Lysias *Or.* 5.2–3, §§102–3; Dion. Hal. *Ant. rom.* 7.58.2; Cic. *Mur.* 6.14 (who creates and refutes a vice list to underline his point); Val. Max. 2.10.1; Char. *Chaer.* 5.7.2; Sus 27; see further discussion at Acts 24:5. Accusing one of known virtuous character might reflect badly on the accuser (Cic. *Vat.* 10.25–26). Conversely, public sentences against one can ruin one's reputation (Cic. *Quinct.* 15.50).

261. E.g., Cic. *Sest.* 9.20.

262. Cic. *Verr.* 2.3.1.2 (claiming that as prosecutor he has therefore lived by the more difficult standard); 2.3.2.4.

263. *Rhet. Alex.* 38, 1445b.30–34.

264. For wives, e.g., Mus. Ruf. 10, p. 78.16–19; Mart. *Epig.* 2.56; Pliny *Ep.* 6.31.4; Sir 22:5; some marriage contracts even prohibit the wife from shaming her husband (P.Eleph. 1.6; P.Tebt. 104.30). For children, Eurip. *Hel.* 136, 200–202; Xen. *Apol.* 31; Cic. *Invect. Sall.* 5.13; Corn. Nep. 15 (Epaminondas), 10.1; Plut. *Themist.* 2.6; Parth. *L.R.* 35.1, 3–4; Gaius *Inst.* 3.221; Diog. Laert. 2.114; 4Q213 2 18–20; Sir 3:10; 22:5; 42:11. Cicero implies that those too intimate with Catiline could be suspected of having behaved immorally with him (*Cael.* 4.10). The text 4Q541 24 5 might involve a priest honoring the priesthood by his deeds.

265. E.g., 3 Macc 3:5.

Being of good reputation might seem particularly important for someone handling money, as these new leaders would be. Qualifications for office might include avoidance of greed (e.g., 1 Tim 3:3);²⁶⁶ this was important even for a midwife, to ensure that she could not be bribed to give an abortive agent (Soranus *Gynec.* 1.2.4). Such love of money could be coupled with other forms of susceptibility to desire, such as for sex and wine.²⁶⁷ Greed could corrupt people and make them traitors (Polyb. 13.2.3–5). A stingy person ought not be put in charge of community finances,²⁶⁸ and one should be ready to give an accounting and remain above suspicion.²⁶⁹ Early Rome expelled from the senate those given to luxury;²⁷⁰ in classical Athens, indeed, officials who coveted the city's possessions were (at least in principle) subject to execution (Lysias *Or.* 28.3, §179). A good leader lived simply, for those given to extravagance found access to public money an irresistible temptation.²⁷¹

Ancients recognized that some treasurers grew rich by abusing their office, embarrassing the official for whom they worked (Aeschines *Tim.* 56); ancients respected statesmen who did not touch public revenues (Iambl. *V.P.* 27.129). Officials²⁷² or ministers²⁷³ who acted out of greed for gain were denounced as corrupt, and officials and others who resisted opportunity to indulge greed were praised.²⁷⁴ Letters of recommendation might insist on the subject's invulnerability to greed²⁷⁵ or contend that one seeking office was not doing so for its salary.²⁷⁶ Hating unjust gain was one of the few qualifications for judges in Exod 18:21, and the early church also contended against greed in ministry.²⁷⁷ Luke, like other NT writers, does not have a high tolerance for corruption (cf. Acts 24:26), and he has a higher standard for leaders (Luke 12:41–42). See further discussion at Acts 20:33–35.

III. FULL OF THE SPIRIT AND WISDOM

Being “full of the Spirit” (Acts 6:3, 5; 7:55; 11:24) probably indicates a continuous state more than does a mere occasion of being “filled with the Spirit,” although, because the latter assertion signified special empowerments, both assertions could be simultaneously true of the same person (cf. 4:8; 13:9).²⁷⁸ In keeping with Luke's emphasis on the

266. For philosophers in India, Philost. *Vit. Apoll.* 2.30. Against love of money more generally, see, e.g., Plato *Laws* 1.649D; Val. Max. 9.4; Sen. *Y. Nat. Q.* 1.16.1; Plut. *Sulla* 1.3; Max. Tyre 5.1; Diog. Laert. 6.2.50; Sir 34:5; *Test. Jud.* 17:1; 18:2; 19:1; Ps.-Phoc. 42.

267. All three in Arius Did. *Epit.* 2.7.10e, pp. 62–63.23; wine and money in 2.7.5f, pp. 30–31.30–31; cf. money, reputation, and pleasure in 2.7.10b, pp. 58–59.36; Philo *Spec. Laws* 1.281; money and pleasure in Longin. *Subl.* 44.6.

268. 4Q424 1 10.

269. E.g., Cic. *Off.* 2.21.75 (in Danker, *Corinthians*, 132–33); *t. Šegal.* 2:2, 24; *Sipre Deut.* 79.1.1; *y. Šegal.* 3:2; *Exod. Rab.* 51:2, 6; 2 Cor 8:21.

270. Val. Max. 2.9.4–5.

271. Polyb. 10.22.5.

272. E.g., Dion. Hal. *Ant. rom.* 6.58.3; Suet. *Tit.* 7.1.

273. E.g., *Test. Levi* 14:6 (priests; perhaps a late addition).

274. E.g., Tac. *Agr.* 6; cf. Pindar *Isthm.* 2.6; Pliny *Ep.* 7.31.2; Men. *Rhet.* 2.1–2, 375.18–21; Socrates in Plato *Phaedo* 82BC; Xen. *Mem.* 1.2.5; Dio Chrys. *Or.* 54.3.

275. Pliny *Ep.* 7.31.3.

276. Fronto *Ad Ant. Pium* 9.2. Heracles supposedly desired kingship for noble reasons, not for gain (Dio Chrys. *Or.* 1.65).

277. Freedom from greed is a qualification for overseers in 1 Tim 3:3; *Did.* 15.1; elders in Poly. *Phil.* 11.1–2; one also discerned prophets by greed in *Did.* 11.12.

278. See Turner, *Power*, 167–69 (also arguing that the expression “full of the Spirit” distinguishes the specially empowered from ordinary Christians; one might concur yet respond that Paul's perspective might be that the “ordinary” Christians simply live short of their privileges in Christ); similarly, Calderón, “Lenura”; Hamilton, “Theology of Spirit.” Luke's construction may reflect LXX idiom (Turner, *Power*, 166). Haya-Prats, *Believers*, 159, sees the Spirit as the cause of wisdom here. Although there is a clear connection between the Spirit and wisdom in some early Jewish sources (see, e.g., Keener, “Pneumatology,” 232–33; idem, *John*,

Spirit's empowerment for mission (1:8), he prefaces his depiction of the ministries of Stephen and Philip (Acts 6–8) with mention of their empowerment by the Spirit here.²⁷⁹ Linking the Spirit with wisdom for a task would make sense for readers of the LXX (Exod 28:3; 31:3; 35:31; Deut 34:9); the righteous would also be filled with “the Spirit of understanding” when God wills and hence pour forth wise (σοφίας) sayings (Sir 39:6).

Some biblical texts provide special models. For example, in a text about delegation on which this scene draws, Moses's elders were filled with the Spirit at least temporarily (Num 11:17, 25–26), whereas here the leaders are already continuously full of the Spirit. Perhaps the most relevant text (supplying an important model for laying on of hands, cf. Acts 6:6) would be Joshua's being filled with the Spirit of wisdom to lead Israel because Moses laid hands on him (Deut 34:9).

The term σοφία appears only four times in Acts: twice in descriptions of the Seven together or Stephen in particular (Acts 6:3, 10), and two in cases of heroes of the past (Joseph and Moses, 7:10, 22) with whom Stephen stands in continuity (7:51–52).²⁸⁰ In the Gospel, wisdom characterizes Jesus (Luke 2:40, 52), John (7:33–35), and all God's agents (11:49), particularly in debate settings and under duress (21:15). Ancients generally regarded wisdom (described by a variety of terminology) as an important gift for proper governing, judging, and lawgiving (Men. Rhet. 2.3, 385.28–386.6). Thus a leader might choose as a unit commander someone “full of good sense” (φρονήματος . . . πλήρη).²⁸¹ Philosophers believed that as wise persons they were the true rulers and could best equip kings for their tasks.²⁸² As noted above, Josephus believed that the priests' wisdom qualified them to oversee and judge (Jos. *Ag. Ap.* 2.186–87; cf. Mal 2:6–7); some leaders in Tiberias favored Josephus's opponents, noting their noble birth and reputation for wisdom (Jos. *Life* 278).

Part of the requisite wisdom would undoubtedly be knowledge of how to manage funds. Lists of qualifications often specified financial integrity and sense for those who would manage funds. Thus 1 Timothy's overseers must not love money (1 Tim 3:3); the Qumran scrolls warn against giving “a stingy man responsibility for money” (4Q424 1 10).²⁸³ Among later rabbis, decisions made by a judge found to be financially corrupted were annulled (*t. Bek.* 3:8). Of course, the Seven's wisdom was not limited to financial matters (Acts 6:10).

IV. SEVEN MEN

It is not surprising that the early church, which already had a group of “the Twelve,” would choose another number widely invested with significance.²⁸⁴ Jewish people and

961–64; Bennema, *Power*, 58–60), some have overplayed it over against the prophetic connection of the Spirit (see the correct critique in Cho, *Spirit and Kingdom*, 14–51).

279. With Miller, *Empowered for Mission*, 144.

280. Its limitation to this section (Acts 6–7) could indicate a source (cf. Richard, *Composition*, 348–49, citing parallels in L material, Luke 2:40, 52; 21:15; but cf. also Luke 11:31, 49) or simply that the term was fresh on Luke's mind. Most likely, however, it deliberately connects these characters.

281. Diod. Sic. 18.7.3; although the selected person did not turn out to be nice, he was competent.

282. Especially Stoics, Cic. *Fin.* 3.22.75; Sen. *Y. Ep. Lucil.* 108.13; Mus. Ruf. 8, p. 66.1–6 (cf. Klassen, “King”); Epict. *Diatr.* 3.22.49; Arius Did. *Epit.* 2.7.11m, pp. 88–89.26–27; pp. 92–93.18–20; Plut. *Flatt.* 16, *Mor.* 58E; Diog. Laert. 7.1.122; ridiculed in Hor. *Sat.* 1.3.125; Lucian *Hermot.* 16, 81. But also others; cf. Plato *Rep.* 5.472; Xen. *Mem.* 2.1.6–7; Val. Max. 7.2.ext. 4; Philo *Abr.* 261; Max. Tyre 36.5; Iamb. *VP.* 35.250; cf. Plut. *S. Kings*, Cyrus 2, *Mor.* 172E; Quint. *Inst.* 2.17.28. Only occasionally did philosophers achieve political power (Eunapius *Lives* 462; also Marcus Aurelius). Cf. the principle for those who sought God in CD VI, 5–6 (perhaps related to eschatological dominion, 1QM I, 5; XII, 16). For Stephen's positive portrayal from ancient philosophic perspectives, cf. Smith, “Portrait of Stephen,” noted in Pervo, *Acts*, 165.

283. *DSSNT* 393.

284. For twelve leaders in Qumran ideology, see 1QM II, 1; 11Q19 LVII, 11–13; cf. 1QS VIII, 1; for seven, cf. much less significantly 1QM VII, 14; seven (apparently angelic) princes in 4Q403 1 I, 6–29; 4Q405 3 II, 1–15.

others widely used the number seven symbolically (see comment below), but its use for groups of leaders is most significant. Given the seventy(-two)'s analogous role of receivers of delegated responsibility in Luke 10, the number might evoke the seventy elders of Num 11.²⁸⁵ (Some scholars argue that Jewish people associated “seven” with the Hellenistic world,²⁸⁶ a comparison that would be apt if correct, though hard to prove given the wide range of associations for “seven.”) Greeks had their famous “seven sages” (though the number is more constant than the individuals named).²⁸⁷ It is possible that Palestinian Jewish charity distributors sometimes functioned in groups of seven.²⁸⁸

More clearly, Josephus claims that councils of seven governed towns (*Ant.* 4.214, 287; *War* 2.571).²⁸⁹ Each of these judges had two officers from the tribe of Levi (*Ant.* 4.214), and all should be honored (4.215). Even if Josephus's portrait here is schematized (and contains only an average), it may represent a frequent ideal.²⁹⁰

The seven planets²⁹¹ made seven an important number for Greeks,²⁹² including in the Mithras cult.²⁹³ Some ancients opined that seven had special power, appearing in many natural phenomena.²⁹⁴ Pythagoras had regarded the number as holy,²⁹⁵ and Pythagorean numerology had important influence in antiquity.²⁹⁶ The days of the week, climaxing in the Sabbath, had already made seven an important number for Jewish people;²⁹⁷ confluence with Hellenistic and continuing Babylonian contexts would have only increased this emphasis. Jewish literature often played on sevens—for example, in Qumran's *Songs of the Sabbath Sacrifice*²⁹⁸ and in *Joseph and Aseneth*.²⁹⁹ Philo explains why seven was the natural number for the day of the Sabbath:³⁰⁰ it was the most honored number³⁰¹ and a suitable symbol for God.³⁰² He uses seven's astro-

285. The talmudic evidence for their ordination by laying on hands (Ehrhardt, *Acts*, 30) need not suggest an early tradition on which the apostles or Luke might draw, but it does reveal that it was natural to read current practice back into that narrative (cf. Num 27:23).

286. Livingston, “Seven” (arguing that the Seven represent a pre-Pauline Gentile mission that did not originally belong to the Jerusalem church).

287. E.g., Dio Chrys. *Or.* 72.12; Lucian *Dial. D.* 416 (6/20, Menippus and Aeacus 4); Paus. 1.23.1; see further Aune, *Dictionary of Rhetoric*, 438. Pervo, *Acts*, 156, also mentions these and “the Roman priestly college called the *Septemviri*,” though conceding that their actual number varied.

288. Goodman, *State*, 121 (noncommittally).

289. Pace Fitzmyer, *Acts*, 349, this may be relevant; with Conzelmann, *Acts*, 45 (citing also Strack and Billerbeck, *Kommentar*, 2:641; Greek councils in *SIG* 1.495.2); Witherington, *Acts*, 249 (citing *b. Meg.* 26a; Roman *septemviri* in Tac. *Ann.* 3.64); Pervo, *Acts*, 156. Pearce, “Council of Seven,” suggests that Josephus might evoke the Greek tradition of the seven sages or echo the seventy of Num 11 (neither of which suggestions I find fully persuasive). Cf. Quint. *Decl.* 365 intro, where Roman court cases involving violence have seven jurors.

290. Greeks may have often used seven jurors in a trial (Lucian *Indictment* 13), though numbers varied from three to eleven (Lucian *Indictment* 13–14).

291. E.g., Pliny E. *N.H.* 2.4.12; 2.6.32–41. Cf. also the seven Pleiades, in *Iliupersis* (*Sack of Ilion*) frg. 5, scholiast D on Hom. *Il.* 18.486a (*GEF* 151).

292. On symbolic values of numbers, and ancient theories on significant numbers, see Menken, *Techniques*, 27–29.

293. Klauck, *Context*, 142. It was also sacred to Apollo (Aune, *Prophecy*, 30).

294. Aul. Gel. 3.10.

295. Apul. *Metam.* 11.1 (influencing the Isis cult).

296. See, e.g., Plut. *E Delph.* 8, *Mor.* 388C; Allen, *Philosophy*, 7; esp. Laroche, “Numbers.” But even six became a “perfect” number (Plut. *Gen. of Soul* 13, *Mor.* 1018C).

297. It appears in ancient Near Eastern sources before Pythagoras (Pfeiffer, *Ras Shamra*, 48–49).

298. 4Q400–407; 11Q17 (the sevenfold schema climaxes in the Sabbath).

299. *Jos. Asen.* 2:6 (cf. also the use of twelve in 3:2/3).

300. Philo *Abr.* 28.

301. Philo *Creation* 99; cf. 89–128. Philo praises seven further in *Spec. Laws* 2.56ff. Carlston, “Vocabulary,” 134, mentions its perfecting power in *Creation* 102, 103, 106, 107 and that it was more perfect than ten (Philo *Posterity* 173) or than anything (*QE* [Armenian] on Exod 26:2; though he once lists ten thousand as the most perfect, Philo *Plant.* 76). It remains the most loved number in *Pesiq. Rab Kah.* 23:10; *Lev. Rab.* 29:11.

302. Philo *Creation* 100.

logical significance to confirm this claim.³⁰³ “Seven” thus had widespread appeal and significance;³⁰⁴ nevertheless, these associations are less directly relevant than those applied to governors of towns.

That the leaders are male (ἄνδρες) undoubtedly reflects the expectation for most leaders in ancient society (e.g., *Lysias Or.* 12.43, §124). In a patriarchal society (which, by all extant accounts, even urban Jerusalem was),³⁰⁵ women leaders in such an office might struggle to be respected even by other women and would generate further criticism from hostile voices outside the movement. This is not to say that the apostles suggest male leaders as an apologetic device; given their Judean and Galilean culture, the possibility of female leaders for this position probably had not yet even occurred to them (despite Acts 2:17–18). We may also point out that this language would be used if the normal expectation was a man even if some individuals would be women. (Thus, for example, Porphyry regularly speaks of the wise ἀνὴρ, even when writing to exhort his *wife*.)³⁰⁶ Some scholars find more significant the fact that Luke allows men here to take on traditional feminine and domestic roles.³⁰⁷

c. Choosing the Seven (6:5)

The multitude, presumably including those who have complained (6:1), welcome the apostles’ proposal (cf. 15:22) and choose seven representatives who meet the qualifications. This time, instead of twelve Hebrews, the food distribution program is assigned to seven Hellenists. Because they belong to the offended minority, they have special sensitivity to both the minority’s needs and perceptions, and they are less vulnerable to criticism than Hebrews would have been. Because they are genuinely people of the Spirit, they can be trusted not to treat Hebrews or others unjustly.³⁰⁸

I. HARMONIOUS RESOLUTION

The church’s public assembly (the language may parallel the gathered assembly at Qumran)³⁰⁹ is pleased with this decision, as crowds sometimes received favorably the answers of other leaders (*Jos. Ant.* 6.22).³¹⁰ That the conflict is quickly resolved fits a pattern of Luke’s summaries of church meetings ending in consensus (Acts 1:15–26; 11:2–18; 15:22–29; 21:22–26). For Luke, it is the ultimate resolution, rather than the conflicts along the way, that merits most attention; but this presentation does allow for a narrative contrast with the riotous meetings of some who oppose the Christians (19:25–34, 40; 21:27–32; 23:7–10).³¹¹

Greek and Roman political theory emphasized the establishment of concord and the removal of discord (see also comment on Acts 15:25).³¹² Sometimes this

303. Philo *Creation* 116.

304. Cf. Arator *Acts* 1 (Martin, *Acts*, 70), treating seven here as a heavenly number.

305. Not all Jewish groups in all cities shared the same perspectives on gender (see Brooten, *Women Leaders*; cf. comment in Keener, *Acts*, 1:614–16, 636–37), but at least a majority of Jerusalemites would have found women leaders unusual and requiring explanation.

306. E.g., Porphy. *Marc.* 32.497. And Porphyry tells her that gender as a bodily matter is irrelevant (*Marc.* 33.511–12).

307. See Finger, *Meals*, 268 (citing also Luke 22:24–27), 275 (concluding a longer argument).

308. For what it is worth, we hear of no further complaints, but given Luke’s brevity for this period and his emphasis lying elsewhere, such an argument from silence is not particularly strong.

309. Brown, “Scrolls,” 7.

310. Conzelmann, *Acts*, 45, compares 2 Sam 3:36 LXX, though the parallel rests mainly on the verb (the noun is λάος).

311. See Pervo, *Profit*, 39–42. Still, as a minority, Christians undoubtedly did experience the larger culture as more hostile than any internal gatherings that did not end in schism; cf. John 15:18–25; rules for assemblies in the *Manual of Discipline*.

312. See, e.g., Grant, *Paul*, 26; Mitchell, *Rhetoric of Reconciliation*, 60–64, 68–99, 151–57.

concord had to be achieved through the forcible removal of a person causing discord.³¹³ Although elites often suppressed complaints of politically powerless minorities and rarely recruited members of the offended minority for leadership,³¹⁴ the concept would have been intelligible.³¹⁵ Polybius reports that a Spartan complained about the way the Carthaginian generals were conducting their war against Rome. The generals summoned him, and after being convinced, put him in charge of their troops, who found him more competent than the generals had been (Polyb. 1.32.1–9; cf. 1 Sam 17:31–58).³¹⁶ (The Greco-Roman theme of rulers establishing concord in diverse societies³¹⁷ also appears in Hellenistic Jewish texts³¹⁸ and would be familiar to Luke’s audience.)³¹⁹ Still, the report is exceptional³²⁰ and presents the apostles as benevolent and wise rulers, the sort whom philosophers idealized.³²¹ Hellenists (or Gentile members of Luke’s audience, to whom Hellenists would be the closest cultural equivalent so far) would identify with the Hellenists now chosen.³²²

II. ELECTING THE SEVEN

The term for choosing (ἐκλέγομαι) does not by itself specify a vote (Luke 6:13; Acts 1:2), but it refers to some corporate selection mechanism (Acts 6:3; cf. 15:25) other than drawing lots (1:24, which also uses the term).³²³ In view of Luke’s Greek audience, a vote would be the most likely inference; Greek individualism and emphasis on equality made voting common among them.³²⁴ Many Greek offices were elective,³²⁵ although some decisions used ballots (cf. comment on Acts 26:10), many probably required simply raising hands, no exact count being necessary if a majority was obvious.³²⁶ Greeks often appointed officials through lots, but the prevalence of elective offices in the Roman Republic led to a higher level of *ambitus*, or electoral corruption, there.³²⁷ Early second-century Rome apparently introduced use of a secret ballot to check abuses of popularity (Pliny *Ep.* 3.20.7), but some feared that it would breed its own abuses, since people were more dishonest in secret than in public (3.20.8;

313. See Mitchell, *Rhetoric of Reconciliation*, 112 (citing, e.g., Dio Chrys. *Or.* 34.21 and the principle of exile). For even subjugation as pacification in some imperial ideology, see comment on Acts 10:36.

314. One may contrast the tribunes of the plebs but should recall that this situation was forced on the patricians rather than welcomed. The apostles here appear exceptionally benevolent.

315. One solution to strife was to let the other party decide how to divide the disputed matter (Gen 13:7–13; cf. 36:6–8, though both passages emphasize especially God’s sovereign grant of the land to his people).

316. They won this battle (Polyb. 1.34.1–12).

317. See, e.g., Mitchell, *Rhetoric of Reconciliation*, 114–15, 126–27.

318. *Let. Aris.* 267.

319. Cf., e.g., agents of reconciliation making peace between quarrelers in Phil 4:3 (cf. 2 Cor 5:20); *Did.* 4.3; *Cic. Att.* 1.3, 5, 10; Pliny *Ep.* 1.5.8; Philost. *Vit. Apoll.* 5.38.

320. Cf. observations by Sider, *Christians*, 99–100. Land, *Diffusion*, 152–67, 225, shows that instead of responding harshly to an honor challenge, the Twelve defuse it by sharing honor, using fictive sibling language (Acts 6:3) to reframe (225) “the conflict as an internal family affair”; against ancient expectations, they show that “honor is an unlimited good.”

321. On philosophers’ views that they were themselves ideal rulers, see, e.g., *Cic. Fin.* 3.22.75; much more fully, information noted above.

322. The principle of people identifying with others belonging to the same category was widespread (e.g., Max. Tyre 1.9; *Abot R. Nat.* 6 A; 12, §30 B; *b. Yoma* 35b; *Lev. Rab.* 2:9; *Pesiq. Rab.* 35:3; 3 *En.* 4:3).

323. When no one sought an office, the people might need to choose (Dion. Hal. *Ant. rom.* 6.49.1). The people could also choose some leaders in the OT (Deut 1:13).

324. Engels, *Roman Corinth*, 85–87 (noting even Arist. *Pol.* 1282a); cf. Rhodes, “Elections” (cf. Roman voting in Paterson, “Elections”). Some other cultures also practice election (e.g., Mbiti, *Religions*, 247), whereas others practice appointment (Mbiti, *Religions*, 241).

325. E.g., *Men. Rhet.* 1.3, 364.1–2. Cf. election to office in cult associations (Jeffers, *World*, 77).

326. Rhodes, “Ekklesia,” 869. Cf. voting at trials, which could also entail either ballots or raised hands (Rhodes, “Katacheirotonia”).

327. Eder, “Elections,” 897.

4.25.1–3). Pliny viewed as unfair that every voter in an assembly have an equal say, since not all shared equal ability to discern (2.12.5–6).

Among both Greeks and Romans, only adult male citizens (and in some states, those with property qualifications), a minimum of residents, could vote.³²⁸ The generals of Athens were elected by the people (ὑπὸ τοῦ δήμου χειροτονηθέντας, *Lysias Or.* 15.6, §144). Soldiers also sometimes voted on matters important to their assemblies (e.g., *Xen. Anab.* 7.3.6; awards in *Philost. Hrk.* 23.25).³²⁹ A Dionysiac association could vote on the admittance of new members.³³⁰

Writing for readers familiar with Greek politics, Josephus claims that the Essenes “elect by show of hands [χειροτονοῦντες] good men to receive their revenues and the produce of the earth and priests to prepare bread and other food” (*Ant.* 18.22 [LCL, 19]).³³¹ When his two companions ruled against his decision, Josephus claimed, he had to submit to the majority (*Life* 73). Some synagogue offices may have been elective,³³² but as with Greek assemblies, prominent and wealthy members would presumably be regarded as favored candidates. Majority opinion dominated in various early Jewish circles.³³³

Spencer compares decisions made by the elders and the “whole church” later in Acts (Acts 15:4, 12, 22) and concludes:

In short, throughout the book of Acts a non-hierarchical, democratic process characterizes church government in general and the appointment of ministers in particular. Peter and the apostles play a leading role but do not lord their authority over fellow-believers in Jerusalem or elsewhere.³³⁴

This statement might need to be qualified: Paul appointed elders for young congregations (14:23), and the mother church in Jerusalem exercised a leading role in decisions that would affect the Diaspora churches if they submitted to that church and its decisions (15:22–23, 30, 41; 16:4). Nevertheless, the observation of sometimes democratic polity (certainly in a passage depicting the apostles’ accommodation to Hellenists) would probably not escape Luke’s audience, which may have found such government most suitable in their cities in the Aegean region (cf. 1 Cor 12:4–30; 16:16).

III. STEPHEN

Some of these names are rare, and there was no need to introduce all seven of them unless Luke had a list or oral information. “Stephen” was a very common Greek name, but it was rare in Palestine and is never clearly attested for Palestinian

328. Among Greeks, see Rhodes, “Ekklesia,” 868; in the Roman Republic, Gizewski, “Comitia,” 621–22.

329. Greeks often cast ballots by hand, but they could also vote by raising hands (e.g., *Heliod. Eth.* 4.21; the soldiers in *Xen. Anab.* 3.2.33, 38; 7.3.6); Spartans, by contrast, usually voted by shout (*Thucyd.* 1.87.2). See further Rhodes, “Elections.”

330. Smith, *Symposium*, 119 (also on business, 113).

331. The verb cognate does not, however, mean “elect by show of hands” in Acts 14:23; there imposition of hands in ordination might be meant, but the verb had taken on the figurative extension “select.”

332. Cf. Applebaum, “Organization,” 494–95.

333. E.g., *IQS V*, 2, 9; VI, 19; *Jos. War* 2.145 (on the Essenes); *t. Ber.* 4:15; *Pesiq. Rab Kah.* 11:17; *b. Ber.* 11a; 37a; *B. Meṣi’a* 59b; *Yebam.* 46b; *Hor.* 5b; *Yoma* 36b; *Beza* 11a; *y. Mo’ed Qat.* 3:1, §6; *Gen. Rab.* 79:6; *Ecll. Rab.* 10:8, §1; *Song Rab.* 1:1, §5. Finger, *Meals*, 270–71, uses the Essene model to argue against assumptions that Luke must read a later form of church order into his tradition.

334. Spencer, *Acts*, 198. For the seven as an example of a team formed to meet ministry needs, see Sell, “Seven” (denying they are deacons). For a survey of team leadership in Acts, see also Shenk and Stutzman, *Communities*, 48–49.

Jews.³³⁵ Clearly then, Stephen belongs to the immigrant Hellenists. As a common Greek name, it is also likely literal, not symbolic or fabricated,³³⁶ against some scholars who think that the narrative could be fabricated.³³⁷ Some writers in the ancient church did in fact connect Stephen's name with his martyrdom; Eusebius (*H.E.* 2.1.1) opined that "Stephen" was a fitting name for one who received the "crown" of martyrdom.³³⁸ The term and its cognates apply to garlands, including those used for mystery rites.³³⁹ Early Jewish sources speak of such garlands and crowns for future rewards,³⁴⁰ playing especially on the victor's wreath in athletic settings³⁴¹ (also used in military settings³⁴² and for other honors³⁴³ or celebrations).³⁴⁴ But the Christian connection of the crown with martyrdom in particular, rather than with righteousness more generally, depends most explicitly on the later Rev 2:10,³⁴⁵ something to which Luke's original audience could not have appealed for their understanding.³⁴⁶ Other names would have sufficed better, and had Luke wished to play on the title, he could have used the common cognate for "garlands" on sacrificial animals in Acts 14:13; that he does not probably militates against a wordplay on or creativity with Stephen's name.

That he was "full of faith and of the Spirit" links him with the requirement that he should be "full of the Spirit" (6:3) and also with the trouble this would cause him (7:55; cf. 6:10). That he was "full of faith" is also a Lukan expression, perhaps

335. Williams, "Names," 111–12. In the Diaspora, see, e.g., *CIJ* 1:311, §404; 1:312, §405; 1:457, §642.

336. Although secondary to Peter and Paul, Stephen is a major figure in Acts (with, e.g., Jeska, "Stephanus"), and if Luke has not fabricated major figures where we can check him, we should doubt that he has fabricated Stephen. A novel could employ realistic names in symbolic ways (for etymological or other associations; see Jones, "Names," on Heliodorus's *Ethiopian Story*); but this approach does not work well for historical works such as Acts, full of actual personages—Peter, Paul, Agrippa, etc.

337. Matthews, "Stoning," 125; idem, "Hellenists." She also notes (rightly) that the earliest patristic martyr lists start with the apostles ("Stoning," 129, citing *1 Clem.* 5.1–6.2; *Poly. Phil.* 9.1–2; and noting that *Iren. Her.* 3.12.10 is the first to portray Stephen as the first martyr). She could be correct that Clement and Polycarp did not know Luke's account of Stephen or about Stephen independently; but even if they did, it made sense to start with the apostles (who were not likely the sole objects of persecution; cf. *1 Thess* 2:14–16 and comments in the commentary introduction, Keener, *Acts*, 1:462–63). Matthews, "Stoning," 127–29, does observe that most NT scholars have accepted Stephen's historicity.

338. Noted also by Matthews, "Stoning," 130.

339. *Men. Rhet.* 2.6, 409.10, 13 (also wedding celebrations); Mylonas, *Eleusis*, 238; Otto, *Dionysus*, 153.

340. *1QS* IV, 7; *4Q257* V, 5; *Wis* 5:16; cf. *2 Bar.* 15:8; *Test. Job* 40:3; *Sib. Or.* 2.153–54; *b. Ber.* 17a; *Meg.* 15b; *Deut. Rab.* 3:7; *Phil* 4:1; *1 Cor* 9:25; *1 Thess* 2:19.

341. E.g., *Aeschines Ctes.* 179; *Diod. Sic.* 16.79.3; *Dio Chrys. Or.* 9.11; 28.4; 31.21–22, 82, 95; [Favorinus] 37.15; 66.5; *Pliny Ep.* 10.118.1; *Suet. Nero* 24.2; 25.1; *Lucian Anach.* 9, 16; *Book-Coll.* 10; *Paus.* 6.8.4; 6.14.11; *Ps.-Callisth. Alex.* 1.19; *Diogenes Ep.* 31. Sometimes this was applied figuratively; e.g., *Dio Chrys. Or.* 8.15; 9.11–13; *Max. Tyre* 1.4–6; 34.8–9; *Iambl. V.P.* 9.49; *Wis* 4:2; *Philo Dreams* 2.62; *Jos. Ag. Ap.* 2.217–18; *Test. Job* 4:10/8; *Exod. Rab.* 21:11.

342. E.g., *Thucyd.* 2.46.1 (figuratively); *Polyb.* 6.39.5–6; *Dion. Hal. Ant. rom.* 6.94.1; *Corn. Nep.* 8 (Thra-sybulus), 4.1; 16 (Pelopidas), 5.5; *Arrian Alex.* 7.5.4; 7.10.3; *Suet. Jul.* 2; *Aul. Gel.* 5.6; *Jos. War* 7.105; but these may have followed the athletic analogy, as in *Corn. Nep.* 7 (Alcibiades), 6.3; *Pliny E.N.H.* 15.5.19; *Plut. Comparison of Lucullus and Cimon* 2.1; *Lucian Posts* 13.

343. E.g., *Val. Max.* 2.6.5; *Diog. Laert.* 6.2.41; *Philost. Vit. soph.* 1.25.530; *Hrk.* 23.23; 33.19; cf. *Polyb.* 32.1.1; 32.2.1; also data in Horsley, *Documents*, 2:50, §14.3.

344. E.g., for Athenian citizenship, *Aeschines Tim.* 21; for prosperity, *Sib. Or.* 5.100; for celebration, *Apoll. K. Tyre* 46; *Jub.* 16:30; *Jos. War* 7.72; for weddings, *m. Soṭah* 9:14; *Eccl. Rab.* 10:5, §1; *Lam. Rab.* 5:16, §1; *Men. Rhet.* 2.6, 409.10, 13; other rewards, *Sir* 15:6; 32:2; at Sinai, *Pesiq. Rab Kah.* 16:3; *b. Šabb.* 88a; *Song Rab.* 4:4, §1; *Lam. Rab.* 2:13, §17; *Pesiq. Rab.* 10:6; 21:7. For various other figurative uses, see, e.g., *Lam* 5:16; *Ps* 89:39; *Let. Aris.* 280; *m. 'Ab.* 4:13; 6:5; *'Abot R. Nat.* 41 A; *Pesiq. Rab Kah.* 2:7; *b. Ber.* 7a; *Gen. Rab.* 63:2; *Exod. Rab.* 34:2; *Num. Rab.* 14:10; *Eccl. Rab.* 7:1, §2.

345. Though it also appears in *4 Macc* 17:15 (possibly as a particular display of righteousness); later *Gr. Ezra* 6:17. Later *Iren. Her.* 5.29.1, for achieving victory through suffering the final tribulation.

346. One could appeal to *Mark* 15:17; *2 Tim* 4:8 but only after *Rev* 2:10 explicitly articulated the connection, and not to *Phil* 4:1; *1 Thess* 2:19; or *1 Pet* 5:4.

comparing him to the Hellenist Barnabas (11:24), unless these are simply sample designations (which appears fairly likely if 6:3 and 6:8 reflect synonyms). It may also suggest why he could perform signs in 6:8 (3:16; 14:9; cf. Luke 5:20; 7:9, 50; 8:25, 48; 17:5–6, 19; 18:42). Some scholars suggest that Stephen was leader of the group, given his listing first and his description.³⁴⁷ If any of the Seven was leader, this appears a reasonable inference; Peter’s name appears first in apostolic lists (Mark 3:16; 13:3; Luke 6:14; Acts 1:13; Matt 10:2), and Peter was at least the most prominent and outspoken among the Twelve. But we cannot be certain that hierarchy is involved; although Stephen appears to have been a particularly competent theologian, he may appear first simply as the subject on whom Luke will first focus, with Philip mentioned next because Luke will treat him next.

IV. PHILIP AND OTHER NAMES

“Philip” does appear as a name among Palestinian Jews (cf., e.g., Acts 1:13) but was not as common³⁴⁸ as it was in the Diaspora. The theory that he was “a hellenized Jew from Palestine itself” simply because he settled in Caesarea (21:8)³⁴⁹ rests on faulty logic; were all the Seven “from Palestine itself” because they settled in Jerusalem? His ability to preach across Palestine (albeit apparently most comfortably in hellenized areas) may suggest his familiarity with Palestine but without identifying his place of origin.³⁵⁰ In any case, that he is a Hellenistic Jew of some sort, probably from a predominantly Greek area (whether in Palestine or beyond it), is not generally in dispute. The name “Prochorus” was rare everywhere and means something like “leader of the dance”; it would be more likely to arise in the Diaspora.³⁵¹ Although we know of Nic- compounded names in Jewish Palestine, the specific name “Nicanor” is so far attested for first-century Jews only in the Diaspora.³⁵² Because of the limited sample size of extant sources, the name “Timon,” common among Greeks, is nowhere else attested for Jews.³⁵³ We likewise lack any other examples of Jews named Parmenas; the -as ending indicates that his name was “from a Doric-speaking Diaspora community”³⁵⁴ or, perhaps more likely, borrowed from some popular figure of the past.

V. NICOLAS FROM ANTIOCH

“Nikolaos” or “Nicolas” was a common Greek name,³⁵⁵ not surprising for a convert from Antioch.³⁵⁶ (Josephus in fact depends heavily for his knowledge of Herod the

347. Schnabel, *Mission*, 428.

348. Williams, “Names,” 98–99. On Philip, see further Spencer, *Philip*; Dobbeler, *Philippus*.

349. Williams, “Names,” 112.

350. His ministry in Aramaic-speaking villages is reported, if at all, only alongside Galilean apostles (Acts 8:25).

351. Williams, “Names,” 111 (arguing that the name suggests pagan cultic associations, usually avoided in Palestinian Jewish names).

352. *Ibid.*, 110 (citing, e.g., *CIJ* 2. §§1256, 1491).

353. Williams, “Names,” 112.

354. *Ibid.*, 111.

355. E.g., Ps.-Callisth. *Alex.* 1.18–19; Jews also could use Greek ΝΙΚ- names (e.g., *Test. Job* 1:3). The name means in Greek roughly the same as “Nicodemus” (on which cf. Keener, *John*, 535). The patristic connection of “Nicolaitans” (Rev 2:6, 15) to him (Iren. *Her.* 1.26.3; 3.11.1; Walter, “Proselyt aus Antiochien”) was undoubtedly speculation based on the common name (Ford, *Revelation*, 387, noting further extrapolation later, in Hippol. *Her.* 7.24; Epiph. *Her.* 1.2.25).

356. On Hellenistic influence from Antioch’s founding, see comment on Acts 11:19. Proselytes occasionally took Hebrew names on conversion (e.g., Judah in *m. Yad.* 4:4; *b. Ber.* 28a [unlike Judah the son of proselytes in *b. Šabb.* 33b]; Benjamin in *Sipre Deut.* 253.2.2; “Sara” added to “Veturia Paulla” in *CIJ* 1:384, §523; cf. Salome in Meyers and Strange, *Archaeology*, 68); this was obviously not the case here (or generally). Although the term “proselyte” eventually extended to some Christian converts (Justin *Dial.* 28.2; Levinskaya, *Diaspora Setting*, 40–46), this cannot be the sense this early.

Great's reign on the well-known Nicolaus of Damascus.)³⁵⁷ That the place of origin of Nicolas alone is noted (though cf. 13:1), and that he is from Antioch, points the reader's attention toward the city to which the narrative's action will soon shift (11:19–30; see comment there). Most significant, he is a proselyte, a former Gentile now in leadership in the church. Proselytes had apparently entered the church before (2:11, perhaps from Rome) and would continue to do so (perhaps 13:43), but this is the first occasion in which any are identified as in leadership. This foretaste of diversity points the way forward to the later diverse leadership team in Nicolas's home city of Antioch (13:1).

Josephus indicates that many Greeks in Antioch converted to Judaism in some periods.³⁵⁸ Inscriptions testify of some Diaspora proselytes who settled in or had connections with Jerusalem,³⁵⁹ including another emigrant from Syria.³⁶⁰ Although most later sages welcomed proselytes and, in many respects, their status was theoretically equal to that of those who were born Jews, they also faced discrimination from many other Jewish people.³⁶¹ This, too, shows the direction the narrative of Acts is moving, and it is no coincidence that the proselyte from Antioch takes the climactic final place on the list begun by Stephen and Philip. As Goulder puts it, "That is the way the wind is blowing—not merely Israelites but ex-Gentiles may be the officers of the Church, and Antioch is a place they may come from."³⁶²

Excursus: Proselytes

See also the discussion on proselyte baptism at Acts 2:38; on God-fearers at 10:2; on women proselytes at 16:13; and on Jewish interest in making proselytes at 1:8. Biblical texts about the "stranger" in the land gradually came to be applied to proselytes³⁶³ (see also discussion on Acts 15:20). In later rabbinic sources, Abraham came to be viewed as the model proselyte,³⁶⁴ whose late circumcision encouraged all proselytes to feel welcome.³⁶⁵ Some Jews seemed very eager to make converts to

357. See Jos. *Ant.* 1.94, 108, 159; 7.101; 12.126–27; 13.250, 347; 14.9, 68, 104; 16.29, 30, 58, 183, 299, 333, 335, 337, 338, 339, 342, 370; 17.54, 99, 106, 127, 219, 225, 240, 248, 315–16; *War* 1.574, 629, 637; 2.14, 21, 34, 37, 92.

358. Jos. *War* 7.45 (cf. Stambaugh and Balch, *Environment*, 147; D. Williams, *Acts*, 119).

359. Fiensy, "Composition," 232, noting the son of a proselyte (*CIJ* 2.§1385) and the presence of tombs and other real estate owned by the royal house of Adiabene (Jos. *War* 4.567; 5.55, 119, 252–53; 6.355; *Ant.* 20.17–37, 75–80). On proselytes in Jerusalem, see also Le Cornu, *Acts*, 316.

360. Ariston/Judah (Riesner, *Early Period*, 110n8).

361. See the excursus below.

362. Goulder, *Type and History*, 71; cf. Bruce, *Acts*¹, 153.

363. Although *ger* may remain a "stranger" in CD VI, 21; 4Q174 1 I, 4 (but cf. CD XIV, 4, 6) and probably even in *Targum Neofiti* (vs. later Targumim; Ohana, "Proselytisme"), the biblical *ger* also became a model for proselytes. Thus the LXX already often translated it as προσήλυτος (Lake, "Proselytes," 8:84), and the rabbinic *ger* (proselyte) applied biblical prescriptions concerning the *ger* (stranger in the land); see, e.g., *Sipra A.M. par.* 7.190.1.1; *pq.* 11.191.1.1; *Sipra Qed. par.* 4.206.1.2; *pq.* 8.205.1.4; *Sipra Emor. par.* 7.223.1.1; *pq.* 17.239.2.4; *pq.* 19.243.1.12; *Pesiq. Rab Kah.* 3:16; *Pesiq. Rab.* 12:9; cf. also Montefiore and Loewe, *Anthology*, 566.

364. E.g., *b. Sukkah* 49b; *Num. Rab.* 8:9; *Pesiq. Rab.* 11:4; on his forgiveness, see *Gen. Rab.* 39:8; cf. Bamberger, *Proselytism*, 175–76; Torrance, "Origins," 170. He was also known to recruit proselytes (e.g., *Sipre Deut.* 32.2.1; *Abot R. Nat.* 12 A; 26, §54 B; *Num. Rab.* 14:11; *Song Rab.* 1:3, §3; *Tg. Neof.* 1 on Gen 21:33; cf. Bamberger, *Proselytism*, 176–79; Safrai, "Abraham und Sara"; Hayward, "Abraham as Proselytizer"). Job holds a similar role in some sources (Jacobs, "Motifs"), as does Ruth (Butting, "Bedeutung").

365. *Mek. Nez.* 18.36f. (Lauterbach, 3:140); *Gen. Rab.* 46:1. The rabbis also portrayed the early sages She-mayah and Abtalion as descendants of proselytes (*b. Git.* 57b; *Yoma* 71b; cf. Bamberger, *Proselytism*, 222–23).

their true faith;³⁶⁶ other Diaspora Jews, such as Philo, often expressed positive views concerning proselytes.³⁶⁷ Conversion to Judaism often carried a large cost for those rejected by their own people.³⁶⁸

Against the sectarian scrolls from Qumran, the temple authorities probably never excluded proselytes from the temple.³⁶⁹ In some Qumran texts, proselytes are lower in status than Israelites but are on the correct side in the eschatological time.³⁷⁰ Rabbinic literature also ranks proselytes' social status toward the bottom of the Jewish community (below illegitimates but above freed slaves),³⁷¹ although some other statements may have mitigated this in practice.³⁷²

The rabbis were in the vast majority of cases positive toward proselytes,³⁷³ though a number of texts are negative.³⁷⁴ The emphasis on embracing proselytes fully³⁷⁵ may not have always translated into practice,³⁷⁶ just as immigrants often face prejudice from some individuals regardless of legal status.³⁷⁷ Although there was never consensus, many Tannaim forbade proselytes to call Abraham their father.³⁷⁸ Most important, however, is that proselytes, like Israelites, accepted God's covenant³⁷⁹ and would be saved.³⁸⁰

366. See, e.g., *Jos. Ant.* 20.34–46. For proselytes in Diaspora inscriptions (though some are fragmentary), see, e.g., *CIJ* 1:20, §21; 1:141, §202; 1:159, §222; 1:182, §256; 1:340–41, §462; 1:384, §523; 1:424, §576.

367. E.g., *Philo Virt.* 219; so also Josephus, a Judean with a Diaspora audience (*Ag. Ap.* 2.210).

368. E.g., *Jos. Ant.* 20.77, 81; *t. Pe'ah* 4:18. Tacitus also despises proselytes (*Hist.* 5.5).

369. Baumgarten, "Exclusions." Rabbinic literature never went so far, but Baumgarten, "Netinim," 96, does compare their exclusion from being part of Qumran's eschatological sanctuary to some rabbinic exclusions; Blidstein, "4QFlorilegium," 435, also notes its overlap with some rabbinic conceptions.

370. *CD* XIV, 4; 4Q279 1 6.

371. E.g., *m. Hor.* 3:8 (lower than bastards but higher than freedpersons); *m. Qidd.* 4:1, 7; *Num. Rab.* 6:1. Cf. further Jeremias, *Jerusalem*, 272, 323; Das, *Debate*, 180; noted for Acts 6 also in Marguerat, *Actes*, 211 (comparing the marginal in Acts 8:5–40).

372. One should love proselytes as oneself (*Sipra Qed. pq.* 8.205.1.6) and not remind them of their past (*m. B. Meši'a* 4:10; *Pesiq. Rab.* 42:1).

373. E.g., *Sipre Num.* 78.3.1; 78.5.1; *b. B. Meši'a* 59b, bar.; *Gen. Rab.* 88:7; *Num. Rab.* 8:9; *Tg. Ps.-J.* on Gen 9:27; on Exod 2:12; on Deut 23:7–9; cf. Bamberger, *Proselytism*, 145, 149–61; Moore, *Judaism*, 1:330–35; Hoenig, "Conversion," 41–42; McKnight, "Proselytism," 840–41. Among disciples of Akiba, cf. the esteemed translator Aquila (e.g., *y. Meg.* 1:9, §4; *Qid.* 1:1, §13; *Gen. Rab.* 70:5; *Eccl. Rab.* 7:8, §1) and the Egyptian proselyte Benjamin (*Sipre Deut.* 253.2.2); another (Johanan ben Torta) also taught Torah (*Pesiq. Rab.* 14:2). The Tannaim were probably more positive than the Amoraim (Hoenig, "Conversion," 43). Converts in various kinds of sources (*Joseph and Aseneth*; the Isis cult in Apuleius) became members of the communities (Galagher, "Conversion and Community"). Chestnut, "Setting," even suggests that the purpose of *Joseph and Aseneth* was to improve proselytes' status.

374. Kunin, "Proselytes"; McKnight, "Proselytism," 841–42; Bamberger, *Proselytism*, 161–65 (with mixed opinions, 165–69). They had no place in the land, but neither did priests (Bamberger, *Proselytism*, 66–67). At least in theory, proselytes might be limited initially in marriage prospects (e.g., Egyptians in *Sipre Deut.* 253.2.2; more generally, *b. Pesah.* 112b; cf. Stern, "Aspects," 623), perhaps especially males (cf. Moabites in *Pesiq. Rab Kah.* 16:1; positively for females, *t. Hor.* 2:11; *Sipre Num.* 115.5.7); but in practice cf. *m. Qidd.* 4:7.

375. Kern-Ulmer, "Bewertung"; Bamberger, *Proselytism*, 145–61; McKnight, "Proselytism," 840–41.

376. Cf., e.g., *m. Hor.* 3:8; *Sipre Deut.* 253.2.2; Bamberger, *Proselytism*, 161–69; McKnight, "Proselytism," 841–42; Keener, *Spirit*, 146–47; 4Q279 1 6.

377. The rabbis' favorable opinions did not eliminate other people's prejudices (Bamberger, *Proselytism*, 277–78).

378. See *m. Bik.* 1:4–5 in Cohen, "Fathers" (noting the more positive view in *y. Bik.* 1:4).

379. *Sipra VDDen. par.* 2.3.3.1; *Sipra Qed. pq.* 8.205.1.5. Proselytes shared in all obligations of the Torah (*Sipre Num.* 71.2.1).

380. E.g., 2 *Bar.* 42:4–6; the thirteenth benediction of the Amidah (Oesterley, *Liturgy*, 65); *Lev. Rab.* 3:2; cf. *Pesiq. Rab Kah.* 12:20. Converts rendered unconverted Gentiles without excuse (*Lev. Rab.* 2:9; *Pesiq. Rab.* 35:3). They lacked ancestral merits but earned their own (*Num. Rab.* 8:9), and could excel in Torah (13:15–16); they also had deliverance at Sinai (*b. Šabb.* 146a). For God's love for them, see, e.g., *Lev. Rab.* 1:2; *Num. Rab.* 8:2; *Ruth Rab.* 3:5; *Eccl. Rab.* 7:8, §1.

Judaism despised false or uncommitted proselytes,³⁸¹ later texts explicitly demanding fear of God as the proper motive for authentic conversion,³⁸² though some allowed that proselytes from impure motives might still have some status before God.³⁸³ Some second-century rabbis rejected proselytes who balked at so much as a single obligation of Torah.³⁸⁴ Some proselytes, however, may have become too strict through lack of knowledge of Torah.³⁸⁵

Later Jewish teachers opined that when a Gentile converted to Judaism, the proselyte became “like a new-born child”;³⁸⁶ in the earliest rabbinic sources, the phrase applies to a new legal status rather than to an ontological transformation.³⁸⁷ Perhaps engaging in hyperbole to underline the newness of status, later rabbis took the new legal status of proselytes so seriously that in theory³⁸⁸ they permitted marriage to one’s “former” mother,³⁸⁹ but this was a matter of legal status akin to what occurred in Roman adoption. Roman law recognized adoptive ties so strongly that it prohibited incest even if ties were based only on adoption;³⁹⁰ children were freed from their father’s authority if the father lost his citizenship, just as if he had died.³⁹¹ By adoption, the new son lost all status connections with his natural family and his former debts.³⁹² Likewise, for one who became a Roman, it might no longer be considered appropriate for that person to inherit from a mother of another nationality.³⁹³ Cotta, recalled from exile, claimed to be “born twice” into Roman citizenship.³⁹⁴

By their nature, other sources unfortunately provide less detail about the legal status or ontological dynamics of conversion than the more voluminous body of rabbinic tradition. Yet sources from Philo and Josephus to *Joseph and Aseneth* indicate that people anticipated transformation of some sort as well as a change in legal status; proselytes turned completely from their former Gentile condition.³⁹⁵ Various traditions of moral transformation suggest the possibility of that image: echoing the language of

381. E.g., Jdt 11:23; *Test. Jos.* 4:4–6; *Sipre Deut.* 356.S.7; *b. 'Abod. Zar.* 3b; *Nid.* 13b; *Šabb.* 33b; *Pesiq. Rab.* 22:5; 23:4; for caution, e.g., *Sipre Num.* 115.S.7. The worshipers of the calf in the wilderness were proselytes (*Lev. Rab.* 27:8). Proselytes among Gentiles, less familiar with Torah, proved less culpable (*b. Šabb.* 68ab); a defective proselyte might also be like a righteous Gentile (*b. 'Abod. Zar.* 64b).

382. *B. Qidd.* 62a; *Yebam.* 24b; 47a; *y. Giṭ.* 1:4, §2; *Qidd.* 4:1, §§2–3; *Num. Rab.* 8:4, 9; cf. Urbach, *Sages*, 1:387–88, on *b. B. Meš'i'a* 72a. Neusner, “Conversion,” 66, argues that political factors may have partially motivated the conversions of Helena and Izates, though their conversions were sincere.

383. Cf. *y. Sanh.* 6:7, §2; *Num. Rab.* 8:4. New entrants to a culture often found some difficulties in adjustment (e.g., *Plut. Lect. 2, Mor.* 37EF).

384. *T. Demai* 2:50; *b. Bek.* 30b, bar.; cf. *Num. Rab.* 5:3.

385. E.g., *b. Pesah.* 91b.

386. Often noted, e.g., Mary, *Mysticism*, 64; White, *Initiation*, 70; Malina and Rohrbaugh, *John*, 82 (citing *b. Yebam.* 22a; 48b; 62a; 97b; *Bek.* 47a). Lightfoot, *Talmud*, 3:265, noted this in regard to John 3:3 in the seventeenth century.

387. Kelly, *Peter*, 49; Lampe, *Seal*, 25.

388. In practice, freed slaves who had converted to Judaism were forbidden lest they view Judaism as less than holy (Cohen, *Law*, 148–49).

389. Cf., e.g., Jeremias, *Jerusalem*, 324. Further on legal status, see Hoenig, “Conversion,” 54–55; for other legal relationships, cf. *y. Yebam.* 2:10, §2. The proselyte’s status changed at the point of conversion (*m. Ketub.* 4:3; *Sipre Deut.* 165.2.3).

390. Gaius *Inst.* 1.59; this remained true even after the adoptive tie was broken. Cf. also blood siblings in Mbiti, *Religions*, 276.

391. Gaius *Inst.* 1.127–28. Cf. the loss of agnatic ties by change of status in 1.161; the invalidation of a will through status change in 2.147.

392. Wansink, “Law,” 990; Lane, *Hebrews*, 371.

393. Cf. *BGU* 5.54.140–41.

394. *Sall. Sp. G. Cotta* 3; cf. *Cic. Att.* 6.6.4. Accepting citizenship in one place terminated it elsewhere (*Corn. Nep.* 25 [Atticus], 3.1).

395. Boccaccini, *Judaism*, 252–56.

Saul's transformation (1 Sam 10:6), Joshua and Kenaz each became "another person."³⁹⁶ More relevant, if the document does not bear Christian influence, is that Joseph prays for the repentant Aseneth as she converts to Judaism: "Renew [ἀνακαίνισον] her by your spirit . . . revive [ἀναζωοποίησον] her by your life."³⁹⁷ The Qumran covenanters held that a hostile angel left the convert who truly obeyed the law (CD XVI, 4–6).

VI. SEVEN HELLENISTS

What are we to make of the seven Greek names? Fitzmyer concedes that most were probably Hellenists (and originally Diaspora Jews) but doubts that we can say this for all of them; "many Jews of that period bore Greek names."³⁹⁸ But a sizable number of the Palestinian Jews with Greek names were Hellenists. It was more likely for Diaspora Jews to bear biblical names than for even rich Judeans to bear Greek ones.³⁹⁹ In Rome, where three-quarters of all Jewish inscriptions are in Greek and only 1 percent are Semitic, roughly half the Jewish names examined were Latin (because many were freedpersons) and nearly one-third were Greek, but 15.2 percent included some Semitic elements.⁴⁰⁰ The linguistic mixture of names of the putative LXX translators in Pseudo-Aristeas is also informative (*Let. Aris.* 47–50).⁴⁰¹ Even centuries later, Palestinian rabbis recognized that Gentile names were particularly common in the Diaspora but much rarer in the Holy Land (*y. Git.* 1:1, §3).

That all seven have Greek names was hardly a coincidence, was surely deliberate,⁴⁰² and would be recognized by readers in regions where Greek names were common; Luke's informed readers are suddenly on ground familiar from their own environment. Most scholars concur that the Seven are members of the Hellenist faction.⁴⁰³ Given the apostles' use of Moses's model for delegation here (Exod 18:21), it might be relevant that Moses selected judges (probably representatively) from "all Israel" (Exod 18:25); this pattern also fits the trajectory that Acts will follow.

As the "Twelve" (Acts 6:2; Luke 8:1; 9:1, 12; 18:31; 22:3, 47; cf. Mark 3:16; 1 Cor 15:5) led most of the church, the "Seven" (Acts 21:8) would provide recognized and universally accepted leadership for the minority subculture in the Jerusalem church.⁴⁰⁴ (Some scholars even believe that they were chosen specifically to oversee distribution to the neglected Hellenists and not the entire distribution program,⁴⁰⁵ but this view may go too far.) This necessary expansion of leadership to meet the growing needs of

396. *L.A.B.* 20:2; 27:10. For Philo, ascending to the pure realm of spirit, as Moses did, could produce a "second birth" (*QE* 2.46).

397. *Jos. Asen.* 8:9/8:10–11. Some scholars also think the prayer for the regeneration of catechumens in *Apost. Const.* 8.6.6 reflects an earlier Jewish prayer, but this is unclear.

398. Fitzmyer, *Acts*, 350; cf. Gaventa, *Acts*, 115. For Jews bearing Greek names, see, e.g., Mussies, "Greek," 1051–52, and the sources cited there.

399. They also appear among "the rich and well-educated" (Williams, "Names," 109; though even here cf. only one in Acts 4:6). One could think here of wealthy Jews drafted for "liturgies" (Lewis, *Life*, 177–84, esp. 182; cf. Danker, *Corinthians*, 144), but even then class would not provide all seven with Greek names unless they really were Hellenists, which fits the point of the story (Acts 6:9).

400. Leon, *Jews of Rome*, 107–8; also Lung-Kwong, *Purpose*, 102–3.

401. Cohen, "Names of Translators," views Persian names as a mark of the transition from a Persian to a Hellenistic framework, but the document's Alexandrian provenance suggests Alexandrian expectation (at least in an early period) that Palestinian Jews had varied names.

402. With Hill, *Hellenists*, 47.

403. E.g., Klausner, *Jesus to Paul*, 289; Bruce, *Commentary*, 129; Dunn, *Acts*, 83.

404. Cf. Dunn, *Acts*, 84; Simon, *Stephen and Hellenists*, 7.

405. E.g., Capper, "Context," 353–54 (speculatively suggesting even a movement away from community of goods to the more common Diaspora model in Acts, which was generous [Acts 11:19–21] but less radical); tentatively, Hill, *Hellenists*, 48.

the Christian community shows that the leadership is growing beyond the Twelve, and hence pointing toward the leaders who would arise in the Diaspora (13:1) and for the Gentile mission.⁴⁰⁶ The bilingual milieu of the Jerusalem church already in this period provided a groundwork for the transition that would come.⁴⁰⁷

d. *The Commissioning (6:6)*

The people chose the leaders, but the apostles commissioned them, perhaps adding their blessing as they later did to Philip's ministry in Samaria (8:14–17; commissioning with prayer also appears in 13:3). Laying on of hands may evoke patriarchal blessings (Gen 48:14)⁴⁰⁸ and Moses's commissioning of Joshua (Num 27:23; Deut 34:9)⁴⁰⁹ as well as Jesus's imparting blessings to children (Luke 18:15–16; Mark 10:16; on the efficacious touch, see comment on Acts 3:6; 5:15).

Hands could be laid on for healings in Luke-Acts (Luke 4:40; 13:13; Acts 5:12; 9:17; 14:3; 19:11; 28:8), as in some Jewish expectations (1Qap Gen^{ar} XX, 22, 29;⁴¹⁰ 2 Kgs 5:11 LXX) and in gospel tradition (e.g., Mark 5:23; 8:23).⁴¹¹ Hands might also be laid on to pray for blessings (Luke 18:15–16) in some early Jewish sources,⁴¹² following the patriarchal model. Probably more relevant here, rabbis ordained their pupils through laying on of hands;⁴¹³ some emphasize that this was a special form of hand-laying characterized by heavy pressure, to be distinguished from mere contact necessary in blessing or healing.⁴¹⁴ The technical distinction between "laying" and a heavier "leaning" of hands cannot work in the NT, which employs only one Greek verb,⁴¹⁵ but probably at least the earliest Jewish Christians would have been familiar with laying on of hands for ordination before it was practiced among themselves (1 Tim 4:14).⁴¹⁶ Because of their date,⁴¹⁷ sources could derive from imitation of the Christian practice, but this is inherently less likely than the reverse.

406. Cf. Nock, *Conversion*, 189; with Greek names and the Spirit of prophecy, they could take the gospel further.

407. Hengel, *Jesus and Paul*, 26, believes this allowed the apocalyptic sect to begin to universalize (he may date this transition too early; but one doubts that all thinkers made the "transition" simultaneously, cf. Acts 10:28).

408. Talbert, *Acts*, 117, also helpfully cites Jacob's mother, placing both her hands on his head to bless him, in *Jub.* 25:14; and Pharaoh blessing Joseph and Aseneth in *Jos. Asen.* 21:5–6/4.

409. Cf. also the commissioning of Levites as Israel's representatives in Num 8:10–11 (as a wave offering [Num 8:11, 13, 15, 21], perhaps analogous to laying hands on sacrifices, Exod 29:10, 15, 19; Lev 4:15; 8:14, 18, 22; 16:21; Num 8:12; 2 Chr 29:23). Witnesses also laid hands on the head of the one they accused of blasphemy (Lev 24:14) and apparently other offenses (Sus 34). Some suggest possible analogies before the Pentateuch, such as a pharaoh delegating authority "by extending his hands over" officials' heads (Cole, "Numbers," 388, regarding a scene from the Amarna period).

410. See Fitzmyer, *Apocryphon*, 65, 67; Flusser, "Laying-On of Hands"; Driver, *Scrolls*, 461.

411. Vermes, *Jesus the Jew*, 240n35 (to p. 66), contrasting the MT. For Chrys. *Hom. Acts* 14, the laying on of human hands (in ordination) mediates God's touch (Pelikan, *Acts*, 95).

412. *Jos. Asen.* 8:9; 21:6, some MSS; cf. perhaps Xen. *Cyr.* 6.4.9 (though the touch may be for other reasons). Laying on hands for sacrifice was a different reason (cf., e.g., *m. Hag.* 2:2, probably early as a reported debate between the early Pharisaic schools; *y. Hag.* 2:3, §2), also in Greek practice (Isaeus *Ciron* 16).

413. E.g., Jeremias, *Jerusalem*, 235–36; more fully, Daube, *New Testament and Judaism*, 207ff.; idem, "Johanan ben Zaccai," 56–59; Strack and Billerbeck, *Kommentar*, 2:647–61; Hruby, "Ordination." Le Cornu, *Acts*, 320, notes that סמניכה could be conferred by words without actual touch (*b. Sanh.* 13b).

414. E.g., Jeremias, *Theology*, 143; more fully, Daube, *New Testament and Judaism*, 224ff. (arguing for this heavier *samakh* in Acts 6, 237ff.); idem, "Gospel and Rabbis," 343.

415. Barrett, *Acts*, 316.

416. Laying on hands seems one tradition already known from early Judaism in Heb 6:2 (though it is not clear there that it is for ordination). Many societies have rites of passage to validate religious workers (e.g., Mbiti, *Religions*, 232, 246), but these need not include hand-laying. For earlier studies of laying on of hands relevant to Acts, see Mattill and Mattill, *Bibliography*, 293, §§4088–99.

417. Some scholars argue for the lateness of various rabbinic ordination customs, including hand-laying (cf. Hoffman, "Ordination juive").

Scholars often, however, recognize as part of the direct background here the unquestionably pre-Christian story of Moses's laying hands on Joshua (Num 27:18, 23; Deut 34:9),⁴¹⁸ also part of the background of the wider practice of laying on of hands for ordination. Joshua was filled with the Spirit of wisdom because Moses laid hands on him (Deut 34:9);⁴¹⁹ although this fullness was a prerequisite in Acts 6:3 (and mentioned explicitly for Stephen in 6:5), it clearly continues in 6:10. Laying on of hands in Acts is sometimes associated with empowerment by the Spirit (8:17; 19:6).⁴²⁰ The congregation of Israel obeyed Joshua because Moses imparted some of his authority to him (Num 27:20), and the same image may be present here.⁴²¹

Our fullest picture of what happened at the sort of laying-on-of-hands ordination⁴²² with which Luke's ideal audience would have been familiar appears in two early Christian letters also in Paul's sphere of influence (or possibly even paraphrasing his teaching)—namely, 1 and 2 Timothy. Elders (1 Tim 4:14) and Paul (2 Tim 1:6) had laid hands on Timothy, presumably at his ordination (cf. 1 Tim 5:22). That event involved the Spirit, as this one seems to (Acts 6:3, 5, 10):⁴²³ prophecies were given (1 Tim 4:14; cf. 1:18), and a spiritual gift was given (4:14), through Paul's laying on of hands (2 Tim 1:6), from the Spirit (1:7).⁴²⁴

e. Summary of the Church's Growth (6:7)

Nothing, even internal conflicts (Acts 6:1), hindered the church's growth; the conflict was quickly resolved, and the church continued to grow. The "word of the Lord"—that is, the prophetic message of the apostolic witnesses (cf. 1:8)—was spreading.⁴²⁵

I. SUMMARY STATEMENTS

As is presumably the case here, Luke elsewhere uses summary statements to chart the gospel's expansion (9:31; 12:24; 16:5; 19:20; 28:31;⁴²⁶ in the Gospel, cf., e.g.,

418. E.g., Abbott, *Acts*, 77; Boismard and Lamouille, *Actes*, 2:50; Daube, *New Testament and Judaism*, 238–39; Marshall, "Acts," 555 (comparing also ἐπισκέπτομαι in Num 27:16 with Acts 6:3); cf. also Talbert, *Acts*, 58 (also noting Moses's role in Exod 18:14–18, which I have cited in other connections here); on the LXX of Num 27:15–23, cf. Kislev, "Vocabulary." Num 11 may also be relevant, though hand-laying here appears only in later tradition about the passage (for the tradition see, e.g., Ehrhardt, *Acts*, 30), probably inferred midrashically from the analogy of Joshua.

419. A point that continued to be emphasized in a later period (*Sipre Deut.* 357.17.1).

420. Scholars hold various views about this practice; for one study, see Coppens, "Imposition," 423–32. For the suggestion that the Spirit is transferred by laying on hands in 2 Tim 1:6, see Poirier, "Callings," 95–98.

421. As in Acts 14:23, the succession here is not precisely one of office but of function (διακονία) (Talbert, *Mediterranean Milieu*, 53). For Moses corresponding to the apostles, cf. 2 Cor 3:7–18; John 1:14 (on the latter, cf. comments in Keener, "Beheld," esp. 22).

422. By using the term "ordination," I do not mean to imply all the connotations for such an event that the practice eventually developed. Acts and the Pastorals probably suggest laying on hands to authorize for ministries but may not indicate a formal ordination ritual in the later sense (see Dowd, "Ordination"); laying on hands confers blessing or appoints to a task rather than creates an office (Villiers, "Church Rule," 79). Luke displays greater interest in service than in offices (see Bartchy, "Power," 96–97, 101–3, esp. 103).

423. For themes connecting Acts 6:8, 10, 15, cf. Combrink, *Analysis*, 7. Chrys. *Hom. Acts* 14 associates this laying on of hands with ordination but claims that if one is truly ordained, it is especially God's hand that touches one's head.

424. Grammar does not specify the antecedent naming the persons who prayed for them, who could be the crowds (cf. Num 8:10), but the background suggests the apostles (Num 27:23; Deut 34:9; 1 Tim 4:14; Dunn, *Acts*, 84; cf. also hand-laying by one person in the late first century according to *y. Sanh.* 1:2, §13). Banks, *Community*, 83, sees the laying on of hands as itself an act of prayer (citing patriarchal blessings such as Gen 48:14–20).

425. On the meaning of this phrase, see comment on Acts 4:31. The NT most often employs it for the gospel, but the OT for the law and the prophetic message. Pao, *Isaianic Exodus*, 147–79, esp. 158, grounds this claim in restoration texts such as Isa 2:3; 40:9, but the allusion may be more general.

426. My list of summary statements concurs with that of most commentators (e.g., Bruce, *Commentary*, 131; Brehm, "Significance of Summaries"); Liefeld's list (*Acts*, 41–42) includes other conversion summaries, but these are not all section summaries per se.

Luke 4:14, 37; 7:17).⁴²⁷ These summaries advance the work's central purpose and theme (Acts 1:8)⁴²⁸ and function somewhat like a narrative "refrain"; refrains are most common in poetic works⁴²⁹ but appear elsewhere.⁴³⁰ These statements are more focused and less extensive than broader summary passages (such as 2:42–47), which seem to depict the church's lifestyle.⁴³¹

Ancient readers would not be surprised by Luke's use of summary statements (for summary sections, see comment on Acts 2:41–47). It was common to recapitulate one's preceding argument at the end of a section;⁴³² summary statements are common in many historical works.⁴³³ The Israelite historiographic work 1–2 Kings uses "a set formula or pattern as a connective . . . to move from one king to another."⁴³⁴

Such summaries serve an apologetic purpose. Although people of status despised demagogues, they could also appreciate leaders whose character was recognized and approved by the people (e.g., *Jos. Life* 250),⁴³⁵ and Luke includes here "priests." Because Luke describes the history of a "people,"⁴³⁶ it is noteworthy that this verse also echoes the multiplication of the Israelites in Egypt (Exod 1:7, quoted soon after in Acts 7:17).⁴³⁷ This biblical formula pairing ἀύξάνω and πληθύνω (as also in Acts 12:24) may allude beyond that exodus quotation to a wider pattern: what God does for all creatures in creation and restoration (Gen 1:22, 28; 8:17; 9:1, 7), God does specifically for his people (Gen 17:20; 28:3; 35:11; 47:27; 48:4; Exod 1:7; Lev 26:9)⁴³⁸ and would do again at the time of their restoration (Jer 3:16; 23:3). Those familiar with LXX language could not have missed these sorts of associations.

This growth summary also confirms the direction in which God's answer to Gamaliel's test points: God is with the Jesus movement (Acts 5:38–39). Direct opposition, however, may be a more severe test than internal problems (6:1); this is the test that follows (6:9–14), and although it ultimately will temporarily decimate the movement locally, it simply serves to disseminate the movement's roots more widely (8:1–4). If (as this commentary supposes) Luke writes after Jerusalem's fall, his audience will recognize that God used such dissemination to preserve and expand the movement

427. Witherington, *Acts*, 156–59; Rosner, "Progress," 221–23; Brehm, "Significance of Summaries."

428. With Rosner, "Progress," 232–33.

429. E.g., Pss 42:5, 11; 43:2, 5; 107:1, 8, 15, 21, 31; 118:1–4, 29; 136:1–26; the wedding invocation to Hymen in Ovid *Her.* 12.143; esp. Catull. *Carm.* 61.4–5, 39–40, 49–50, 59–60; 62.4–5, 10, 19, 25, 31, 38, 48, 66 (with *io* added, 61.117–18, 137–38, 142–43, 147–48, 152–53, 157–58, 162–63, 167–68, 172–73, 177–78, 182–83); the bridal summons (Catull. *Carm.* 61.96, 106, 113); invocation to the Fates (64.327, in briefer form thereafter in 333, 337, 342, 347, 352, 356, 361, 365, 371, 375, 381); or a summons to love (*Peru. Ven.* 1, 8, 27, 36, 48, 57–58, 68, 75, 80, 93).

430. E.g., Sen. *Y. Nat. Q.* 3.pref. 11, 12, 13, 14, 15, 16; Judg 17:6; 18:1; 19:1; 21:25; Rom 5:2–3, 11.

431. Witherington, *Acts*, 159. Analysis of Luke's redactional patterns suggests his greatest creativity in summary statements (Witherington, "Editing," 346).

432. E.g., Cic. *Fin.* 3.9.31; 1 Cor 14:39–40; 4Q270 11 I, 15.

433. E.g., Xen. *Hell.* 3.5.25; 4.8.19.

434. Rosner, "Biblical History," 76 (citing as examples 1 Kgs 14:19–20, 31; 15:8, 24).

435. For fame spreading, cf., e.g., Char. *Chaer.* 4.7.5; see more fully comment on Acts 2:47.

436. For discussion of ethnographic histories, see Keener, *Acts*, 1:108–9, 113–14, 161–64, and sources cited there, especially Sterling.

437. Tannehill, *Acts*, 82. Acts 6:7 shares with the LXX ἀύξάνω, πληθύνω, and (though missing in Acts 7:17) σφόδρα. Cf. Col 1:6, 10 (noted in, e.g., Talbert, *Ephesians*, 185). Relevant but not nearly as relevant as LXX usage, Balch, "ΜΕΤΑΒΟΛΗ ΠΟΛΙΤΕΙΩΝ," 165, notes the use for the growth of new colonies in Dionysius of Halicarnassus (see comment at Acts 2:47).

438. Authors many centuries before Luke already drew explicit literary connections between the creation mandate and Israel's mandate. The *fear* of humanity on all creatures (Gen 9:2) prefigures the fear of God's chosen on others (Gen 35:5; Exod 23:27; Deut 2:25; 11:25; Josh 2:9); the command to subdue the earth (Gen 1:29) also applied to subduing the promised land (Num 32:22, 29; Deut 20:20; Josh 18:1).

for the future. The summary in 6:7 is simply another sign pointing to God's securing the spread of the gospel through and sometimes despite the church. By God's intervention, obstacles produce growth; growth leads to more persecution, but even this does not stop the spreading of God's message.⁴³⁹

II. CONVERSION OF PRIESTS

Many priests "were obeying the faith." Other early Christian writers could speak of accepting the Christian message as "obeying" it (Rom 6:16–17; 10:16; 15:18; 2 Thess 1:8) and expected obedience as a sign of faith (connected most explicitly in Rom 1:5; 16:26).⁴⁴⁰ Luke is no less concerned with obeying God (Acts 5:29, 32; 7:39, 53).

Like the ancient Israelite Chronicler, Luke has interest in the priesthood as well as in temple worship (Acts 2:46; 3:1–3; 5:20, 42). The faith of many of the priesthood's members may help validate the Christian message's heritage in the Diaspora as well (cf. 19:14; 22:5). Luke opens his entire narrative, in fact, with an account of a pious priestly family (Luke 1:5).⁴⁴¹ Because of priests' association with the temple, Luke can also show the falsehood of the charge against Stephen at Acts 6:13–14. Despite his mistrust of the priestly aristocracy (a sentiment shared by many Judean religious groups and probably many poorer priests), Luke has a positive view of the priesthood in general and knows how to differentiate the two (see Luke 1:5; 5:14; 17:14).⁴⁴²

By noting the conversion of many priests, Luke also emphasizes that the Sadducean aristocracy (cf. Acts 5:17, 21, 27) was now virtually alone in opposing the movement, with even Pharisees and priests open to it (5:34; cf. 15:5).⁴⁴³ Some priests here, like Zechariah in Luke 1:5, serve the Lord. Since there were nearly two thousand in an earlier period (Neh 11:10–14; cf. 1 Chr 9:13), there were probably no fewer in first-century Jerusalem.⁴⁴⁴ Josephus claims (in a context that might invite characteristic exaggeration on the high side) twenty thousand priests (*Ag. Ap.* 2.108). Jeremias estimates as many as eighteen thousand priests and Levites in all Judea, but is surely correct that the temple could not employ so many during the ten or eleven months

439. See Sole, "Rapporto." Luke would surely approve of those who use as a model his portrait of the church growing even through struggles and conflicts (e.g., Thekkekara and Punnapadam, "Growth").

440. Bruce, *Commentary*, 131n17, suggests "obedient by faith," noting that "the faith" as the gospel's content is rare in Acts (in contrast to Pauline literature, 2 Cor 13:5; Gal 1:23; and abundantly in the Pastorals); but cf. Acts 13:8; 14:22; 16:5. Cf. obeying God's message in Rom 6:17; 10:16; 2 Thess 1:8. The language does not echo the LXX; Gen 49:10 (cited by Le Cornu, *Acts*, 323) does not mention the "faith."

441. For the piety of many priests, see, e.g., *Jos. Ant.* 14.65–68. Luke might even know the tradition of Jesus as high priest (Heb 2:17; 3:1; 4:14–15; 5:1–10; 6:20; 7:26; 8:1; 9:11, 35; cf. Ps 110:4), given Jesus's lifted hands for blessing (Luke 24:50; Danker, *New Age*, 254; Stempvoort, "Interpretation of Ascension," 34; cf. Lev 9:22; *b. Ta'an.* 26ab; *Soṭah* 38a) and Luke's use of Ps 110:1 (Luke 20:42; Acts 2:34–35). (The mention of priests was relevant in the context of Joshua's ordination just cited, Num 27:19, 21–22; but the thought in Acts 6:7 is a new one, not dependent on the ordination in 6:6.)

442. Though cf. Luke 10:31; Acts 4:1; but the priests in Acts 4:1 are those serving in the temple, led, presumably, by the elite priesthood. Phillips, "Prophets," 234, rightly notes evidence for the hostility of the priesthood in Luke-Acts, but this hostility reflects the priestly establishment (as often in the OT tradition) rather than all priests per se (the limitations of Zechariah correctly noted on 225, 228, are not outright hostility like that of the chief priestly aristocrats).

443. Dunn, *Acts*, 85. Stephen's message and murder scattered the church (Acts 8:1), apparently leaving a more hostile population behind (12:3a).

444. Fiensy, "Composition," 219–20; Sanders, *Judaism*, 170; Le Cornu, *Acts*, 322. The numbers in Jerusalem were particularly large (Stern, "Aspects," 584). Although various conflicts forced some priests (such as those associated with the Qumran community) out, Jerusalem's population had multiplied since Nehemiah's era; the proportion of priests, however, had declined, since they could be sustained only by birth rate (Stern, "Aspects," 595–96).

outside their temple service.⁴⁴⁵ In any event, “a great crowd” of priests becoming disciples is not at all implausible.⁴⁴⁶

Luke gives no clear indication whether they were of high status like the Sadducees (see comment on Acts 4:6) or poorer common priests like those Josephus says were exploited and starved by the more powerful aristocratic priests (*Ant.* 20.181, 206–7).⁴⁴⁷ Poorer priests might work as stone cutters, in agriculture, or selling oil; more influential priests likely served as scribes and judges,⁴⁴⁸ and Josephus even attributes to them divine authority in Judea.⁴⁴⁹ Many peasants did not pay the tithes on which poorer priests depended (Philo *Spec. Laws* 1.153–54; *m. Demai* passim), and richer priests allegedly robbed the poorer ones, an activity reported as beginning perhaps a decade after the events reported here (*Jos. Ant.* 20.181; cf. *b. Pesah.* 57a).⁴⁵⁰

That Luke does not specify their status may suggest that more of them were poorer, since he typically mentions persons of status when possible⁴⁵¹ (to appeal to the parts of his audience with much status to lose by following the gospel). Priests of any status could have strengthened the community’s ties with the temple,⁴⁵² but higher-status priests would have wielded more influence. That nonaristocratic priests were not all Sadducees is clear; tradition even suggests, undoubtedly rightly, that some priests followed Pharisaic interpretation of the law.⁴⁵³

For Luke’s Diaspora audience, however, any priests might have status; even Gentile converts would respect them for their role in the Scriptures. Priests may have maintained high status in Diaspora Jewish communities (Philo *Hypoth.* 7.13; cf. *Jos. Ag. Ap.* 1.32).⁴⁵⁴ Priests held the highest status in Qumran texts (in contrast to later rabbis, who ranked sages most highly).⁴⁵⁵ (For that matter, even later rabbis praised the priesthood as winning God’s favor for Israel.)⁴⁵⁶ We should pause to note that just as Luke does not reveal the priests’ economic status, he does not reveal their prior sectarian orientation. Given the similarities between Christian and Essene beliefs, it is not surprising that some scholars, especially in the early flush of enthusiasm over the Dead Sea Scrolls, would suggest that these priests were Essenes.⁴⁵⁷ There were

445. *Jerusalem*, 204; followed, e.g., by Haenchen, *Acts*, 264.

446. With Carter and Earle, *Acts*, 89. Luke’s summaries may serve a literary purpose, while also depending on historical information (with, e.g., Varickasseril, “Portrait”). Certainly, in the second century, others also believed that some priests and scribes were Christians, if Lucian is not confused (*Peregr.* 11).

447. Cf. Stern, “Aspects,” 580–621, for a discussion of the elite classes, including priests (580–612, esp. 580–96); cf. also Basser, “Priests.”

448. Cf. *Deut* 17:9; 21:5; 2 *Chr* 15:3; *Ezek* 44:24; *Mal* 2:7; *Jub.* 31:15; *Sir* 45:16–17; *Jos. Life* 197; *Ag. Ap.* 2.187; *Diod. Sic.* 40.3.5. See Fiensy, “Composition,” 220 (for the poorer priests; citing Stern, “Aspects,” 586–87; *t. Kip.* 1:6; *Beṣah* 3:8); for some priests as *haberim* (probably Pharisees), see *t. Ter.* 7:5–6. Other nations also had priests as a literate class in religious matters or laws (e.g., *Val. Max.* 2.5.2).

449. Sanders, *Judaism*, 171 (citing *Jos. Ag. Ap.* 2.165, 184–87, 194; *Ant.* 14.4); as a priest himself, Josephus may have imbibed this ideology more than others.

450. Fiensy, “Composition,” 220, along with various commentators.

451. Luke’s reports of people of status are often noted, though the status increases considerably in the more novelistic second-century apocryphal acts (Grant, “Social Setting,” 22).

452. As suggested by Bruce, *Commentary*, 131 (noting also the status differences, 131–32).

453. E.g., *y. Ter.* 6:1.

454. Sanders, *Judaism*, 52–53 (mentioning also archaeological evidence). Priests may have been community leaders even in Alexandria if one follows the reading of *Let. Aris.* 310 proposed by Schwartz, “Priests in *Ep. Arist.*,” but this is uncertain.

455. Cf. Sharvit, “Hkhn” (though this point may characterize later rabbis more than pre-70 C.E. Pharisees).

456. *Sipre Deut.* 352.1.2.

457. Others have conjectured plausibly (but still speculatively) on interaction between Christians and Jerusalem Essenes (Capper, “Monks”).

in fact Essenes living in Jerusalem, as the Essene Gate (Jos. *War* 5.145) suggests.⁴⁵⁸ But there is no indication in the text, and certainly no external evidence, supporting the view that these are specifically Essene priests; not all Essenes were priests, and certainly not all priests were Essenes.⁴⁵⁹

458. Fiensy, “Composition,” 228 (noting also 1QM VII, 6–7; 11QT XLVI). Archaeology confirms the Essene Gate on the southern part of Jerusalem’s Western Wall, on Mount Zion (Riesner, “Gate”; Pixner, “Essene Gate”; idem, “Gateway”; idem, “Zion,” 321; Pixner, Chen, and Margalit, “Mount Zion”). Some scholars also point to “Essene-type” graves in Jerusalem (Zissu, “Graves”; idem, “Tomb”), but such graves were not unique to Essene sites (Shanks, “Who Lies?”; Zangenberg, “Farewell”). Some also argue that Essenes used the temple (e.g., Kugler, “Reconstruction”), although consensus eludes us.

459. See also the critiques in Brown, “Scrolls,” 6; Fiensy, “Composition,” 228 (though acknowledging priests at Qumran, 1QS I, 18).

STEPHEN (6:8–8:1A)

After introducing the seven Hellenists in Acts 6:1–6 (esp. 6:5), Luke focuses on two of them: Stephen (6:8–8:1a) and Philip (8:1b–40). Commissioned by the apostles (6:6), these Hellenists now expand the apostles' sphere of ministry theologically (Acts 7) and geographically and culturally (Acts 8). In so doing, they are led by the Spirit to push forward toward the work's goal specified by Jesus in 1:8.

As noted above, Luke (or his source) could know something about Stephen's ministry from Philip and about his final speech and death from Paul, although Luke would select from and develop this information in ways suitable to his cohesive narrative.

1. Introduction to Stephen

Stephen is mentioned by name nowhere else in the NT. If Luke's creation, his name could be symbolic for a victor's wreath, used for martyrs in Rev 2:10. Yet as noted above, this was not the primary symbolic association of wreaths at this time. The other names in the list (and in Luke-Acts generally) are not easily symbolic, and other potential names could better symbolize martyrdom (or even triumph, with *νικ-* roots elsewhere in the list) than this one. Paul never mentions Stephen, but he never mentions any of his victims, details the specifics of his persecutions, or mentions individuals from his past who were not also his contemporaries. Paul does, however, indicate that all Judean Christians knew of his persecutions (Gal 1:22–23), which would make learning details relatively easy for one who had contact with Judean churches or with traveling former members before or after 70 (e.g., Acts 21:16–18). For a traveling companion of Paul on long voyages, knowledge of details not mentioned in Paul's letters would be easy to come by (certainly more than it is for us, dependent on his letters). It would be especially difficult to believe that, if Luke's account is correct, Paul could spend several days with Philip (21:8, 10) without some conversation about Stephen, at least from Paul's side.

It is unclear how long Stephen preached before his martyrdom, but it is certain that he was martyred before Paul's conversion in Acts 9. Some scholars suggest that Stephen was martyred under the interregnum after Pilate's departure (36–37 C.E.), when no Roman governor was present to prevent it (as later in Jos. *Ant.* 20.200). It is difficult to date Paul's conversion so late, however (Gal 1:18; 2:1), and less difficult to simply believe that a mob lynching could occur during the majority of the year when the governor resided in Caesarea. See comment on Acts 7:54–60.

Luke parallels Jesus and Stephen, since the latter, as the church's first martyr, provides a paradigm of the church following its Lord. Some of the parallels work with pre-Lukan passion tradition but not Luke's own record of the passion. Witherington summarizes the parallels thus:¹

1. Witherington, *Acts*, 253; others also note many of the parallels, e.g., Boismard and Lamouille, *Actes*, 2:26; Marguerat, *Actes*, 221; Pervo, *Acts*, 168; esp. Green, "Acts," 745, with sixteen parallels (adding, e.g., burial and mourning by the righteous).

1. Trial before the high priest/Sanhedrin (Mark 14:53 par.)
2. False witnesses (Mark 14:56–57; not in Luke)²
3. Testimony about the temple's destruction (Mark 14:58; not in Luke)
4. Temple “made with hands” (Mark 14:58; not in Luke; Acts 7:48)
5. Heavenly Son of Man (Mark 14:62; Acts 7:56)
6. Blasphemy charge (Mark 14:64; not in Luke; Acts 6:11)
7. High priest's question (Mark 14:61; not in Luke, though cf. Luke 22:67; Acts 7:1)
8. Committal of spirit (only Luke 23:46; Acts 7:59)
9. Cry with a loud voice (Mark 15:34, 37; Acts 7:60)
10. Prayer for forgiveness of persecutors (only in Luke 23:34; Acts 7:60)

Two of the ten parallels appear only in Luke and Acts (8 and 10); five appear in Acts and other Synoptics but not in Luke's Gospel. Thus Luke “had Acts in mind while writing his Gospel”;³ Luke omitted some material from Mark in his Gospel but recalled it in Acts. (We should note, however, that Jesus is unofficially accused of blasphemy in Luke 5:21.)

The obvious question is, why did he omit some of his parallels (especially when making others so explicit)? Had it happened only one or two times, one might simply accuse Luke of being so familiar with the common passion narrative that he forgot that he had made the omissions. Perhaps the omissions suggest that others had already shaped the Stephen story for such parallels before Luke heard it, and he then developed some others; but since Luke clearly notices some parallels (cf. Acts 7:56–60) and knew Mark, why would he omit some of them? It is also possible that Luke omits the parallel in his Gospel when he will need to transfer it to the Stephen story in Acts (as Matthew omits Markan accounts of a healing and an exorcism, then may midrashically compensate by doubling blind men and demoniacs in Matt 8:28; 9:27–28).⁴ But this proposal is unlikely here, especially since Luke's passion narrative sometimes supplies the only parallel for something in the Stephen story. Perhaps most likely is that Luke presupposes widespread knowledge of the passion tradition (as John does)⁵ even where he does not record it.

Some scholars argue that the Stephen narrative is likely fictitious, since (it is argued) it portrays Jewish murderous behavior and hence is an example of Luke's rhetorical violence against Jewish people.⁶ Several points could be raised against this position, but since I address Luke's perspectives on Judaism more specifically elsewhere,⁷ I raise just two points here: first, an anti-Jewish reading of the Stephen narrative runs counter to Luke's narrative as a whole (see esp. comment on the law in the introduction to Acts 7); second, Luke's report that some Jews were hostile to some other Jews

2. Luke's knowledge of the false witnesses is probably implied, however, in Luke 22:71.

3. Witherington, *Acts*, 253; cf. similarly Pervo, *Acts*, 168–69.

4. On the possible midrashic technique, cf. Holtzmann in Bruce, “Matthew,” 145; Goulder, *Midrash*, 44–45; Gundry, *Matthew*, 158.

5. See Keener, *John*, 918–19, 1067–68, 1100–1103, 1133–34.

6. Matthews, “Stoning,” 133–34; idem, “Hellenists.” She contends that if there was a Stephen and he died, he was like anyone else who died—that we must reject Luke's ideology. Romans and lions cared little, she notes, whether the lions devoured criminals or Christians, though friends of Christians and criminals told different stories. This much is true, but remaining academically neutral about claims of metanarratives is not the same as (dogmatically) denying all such claims on the basis that no such metanarratives are possible. Since Matthews rejects Luke's alleged assault on Judaism, however, she is not simply absolutizing moral relativism, and much of the argument will revolve around whether Luke is genuinely anti-Jewish (see discussion in the commentary introduction, Keener, *Acts*, 1:459–77).

7. Again, see discussion in Keener, *Acts*, 1:459–77, and sources cited there.

who believed in Jesus is almost impossible to dispute, since we have Paul's personal testimony to this effect.⁸ Luke does not claim more than this. The same argument contends that "Jews" become negative characters after Stephen's stoning,⁹ but this is not always the case. Sometimes they constitute a hostile group, but often do not,¹⁰ and some major positive characters hold this title (Acts 18:2, 24; 21:39; 22:3).

Modern Westerners are often skeptical of martyrdom accounts because secular societies tend to experience fewer cases of violent persecution against religious or ideological minorities; but such persecution is widespread in many other societies. Not only are there thousands (some claim tens of thousands) of Christian martyrs annually,¹¹ but other religious minorities also suffer in other nonsecular societies (whether the state ideology is a particular religion or antireligion).¹² To readers in many places, Luke's account of a single martyr is far more restrained than their normal experience.¹³

2. Ministry and Opposition (6:8–7:1)

Among the Hellenists of 6:1–7, Luke focuses on the example of the ministry of Stephen and especially on opposition (6:8–15). Luke offers various features in this narrative that fit larger patterns in his work, suggesting some of his emphases (persecution, social and evangelistic ministry, signs, and so forth).¹⁴

a. Grace and Signs (6:8)

Luke rhetorically couples nouns here, both the abstract nouns "grace" and "power" (cf. Acts 4:33; 2 Cor 12:9; Eph 3:7) and the traditional biblical pairing of "wonders" with "signs." Connected with "power," "grace" probably involves divine empowerment.

8. Paul's letters confirm especially his own activity. One might argue (as an extreme example; I do not know anyone who argues this) that Paul fabricated claims of his former persecutions, but Paul offered these claims at the risk of discrediting himself, not in his favor. One could propose almost anything counter to the text, but the most radical skepticism leaves nothing but the skeptic's hypothetical reconstructions.

9. Matthews, "Stoning," 131–32; idem, "Hellenists." Cf. similarly Pervo, "Gates," although he begins the primarily negative usage after Acts 9:22.

10. See Acts 10:22, 28, 39; 11:19; 13:5, 43; 16:1, 20; 17:1, 10, 17; 18:4–5, 19; 19:10, 17; 20:21; 21:20; 22:12; 24:24. The term does not appear anywhere in Acts 6–8. For a more nuanced picture of the varied senses of the title in Acts, fitting the ambiguous boundaries of ethnicity, see Barreto, *Negotiations*, 81, including his challenge of A. Barbi's argument (though it, too, includes a range of uses; "Use and Meaning"), which he believes determined by the criterion but misunderstanding ethnicity (82–83). Luke employs the term more in the Diaspora (85). In Barreto's survey of uses (88–90), only the sixth of seven appears adversarial. For the diverse usage of the term in the Fourth Gospel, see Keener, *John*, 214–28; for other discussions, see, e.g., Bratcher, "Jews"; Cuming, "Jews"; De Boer, "Depiction" (the approach closest to mine); Fuller, "Jews"; Lowe, "ΙΟΥΔΑΙΟΙ"; Nothomb, "Juifs"; Von Wahlde, "Jews"; White, "Jews."

11. For one very high estimate (perhaps based on a broad definition of "martyr"), see Barrett, "Table," estimating more than 160,000 Christians martyred in 1996. On persecution in modern times, see, e.g., Marshall, *Blood*; from a somewhat different approach, Hefley and Hefley, *Blood*; see esp. recently Marshall and Shea, *Silenced*.

12. See, e.g., Mandryk, *Operation World*, regarding Muslims in parts of India (421), tens of thousands of Muslims in parts of Indonesia (450), Sufis and followers of Baha'i in Iran (466). Regarding the intelligibility of Paul's own later captivity, Zerbe, "Constructions," 255, offers a helpful modern analogy in a Filipino context.

13. As someone who has been personally beaten and had his life threatened more than once for Christian witness even in the United States (mostly in the years soon after my conversion), and has spent time in places where Christians have been killed for their faith (for one account, see Keener, "Mayhem," 61–64), I find nothing implausible in the suggestion of far more martyrdoms than Acts records (whether or not such martyrdoms took place, they are not implausible).

14. Applications of the passage might include the following: persecution and false accusations should not surprise Jesus's followers; ministries can grow (as Stephen's changes from social ministry to public proclamation); signs (6:8) can draw attention and provoke greater hostility from rivals for popular support (6:9–10), especially among those for whom ends (which they believe noble) justify inappropriate means.

I. GRACE

“Grace” could apply to special rhetorical skill or other eloquent or charming speech (in classical texts often translated “charm”).¹⁵ (This was also closer to the idea of the Greeks’ three divine graces.)¹⁶ Thus delivery style could add χάρις to one’s oratory (Plut. *Demosth.* 7.2), and rhetoricians supported the “charms” of entertaining narratives (Men. Rhet. 2.5, 395.4); simplicity (2.7, 411.23–24) or verbal ornamentation (411.29–31); grace and appropriateness in epideictic wedding speeches (411.22); and charm in even formal proems (2.6, 400.1). Dionysius claims that Demosthenes possessed all rhetorical skills except “charm” (χάριν, Dion. Hal. *Demosth.* 54). Cicero’s speech was so full of pathos and grace (χάριτι) that Caesar acquitted his own enemy whom Cicero was defending (Plut. *Cic.* 39.6). This is one of the few NT passages where this sense of “grace” is possible (cf. Eph 4:29; Col 4:6). This sense surely appears in Luke 4:22 (possibly 2:40 but, in view of 2:52, probably not), but it is unlikely here as elsewhere, unless perhaps in the sense related to divinely imparted favor in the sight of others.

In the widely read *Odyssey*, Athena shed (κατέχευε) charm (χάριν) on Odysseus’s head (Hom. *Od.* 8.19) to make him look taller and impress the Phaeacians (8.20–22), and poured (κατέχευεν) charm (χάριν) on Telemachus (2.12), so that all the people were impressed when he came to speak (2.13; again, 17.63–64).¹⁷ This usage may be relevant again to Luke 4:22 and Acts 2:47 and to some other early Jewish texts (*Test. Jud.* 2:1). It is certainly relevant to the image of divine “favor” in Acts 7:9, which alludes back to this passage and hence is undoubtedly relevant here. Stephen, like Jesus (Luke 2:40, 52) and Joseph (Acts 7:10) before him, would have “favor.”

The nearest background for Luke’s ideal audience, however, would be their early Christian context. Early Christian writers often spoke of “grace” as God’s gift of empowerment for necessary tasks (see esp. Rom 12:6; 1 Cor 1:7; 12:4, 9, 28–29; Eph 4:7; 1 Tim 4:14; 1 Pet 4:10);¹⁸ this would fit the mention of signs and wonders here and is probably the point in Acts 4:33.¹⁹ Since both “favor” and “empowerment” are divine gifts, it is possible that both nuances are present here. This would fit the connection with “power” here.

II. SIGNS AND WONDERS

The pairing of “signs and wonders” throughout Luke-Acts evokes the miracles God performed in the exodus through Moses (7:36).²⁰ Though signs characterize apostolic ministry in Acts (cf. also 2 Cor 12:12), the ministry of the Seven demonstrates that signs were not limited to the Twelve (Acts 6:8; also 8:6–7; 9:17–18). They might, rather, characterize the church in general (cf. Mark 16:17–18), especially particular

15. See, e.g., Sir 20:19; 21:16 (other “charm” in 7:19); Prov 10:32 LXX; Pliny E. *N.H.* 35.36.79 (for artistic charm); Dio Chrys. *Or.* 53.6; Max. Tyre 25.7; Men. Rhet. 2.7, 405.28; 2.17, 446.11–13, esp. 446.12; cf. likewise analogous Latin terms (Fronto *Ad Ant. imp.* 1.2.4; Symm. *Ep.* 1.2.6). For particular rhetorical figures providing “charm,” see Demet. *Style* 29, 154, cf. 247 (Anderson, *Glossary*, 127).

16. E.g., *SIG*³ 985 (= *LSAM* 20), lines 1–11 (in Klauck, *Context*, 65); Dio Chrys. *Or.* 31.37; Men. Rhet. 2.7, 407.5–6; 2.17, 439.19–20; Schachter, “Charites”; in Roman art, Francis, “Three Graces”; givers of beauty in Hom. *Od.* 6.18; cf. Hephaestus’s wife in Hom. *Il.* 18.382–83. Luke and Paul might even avoid the plural of χάρις precisely to avoid any semblance of alluding to these daughters of Zeus (cf. Harrison, *Grace*, 9).

17. Flavius Philostratus in *Hrk.* 34.6 accuses Odysseus of “gracelessness” in his anti-Odyssean polemic (contrast the “charm” of Agamemnon’s regal appearance, *Hrk.* 29.2).

18. Even rhetoricians employed χάρις for signs of favor from deities (e.g., Men. Rhet. 2.17, 440.8–9; the same context also uses its frequent sense for thanks, 444.19).

19. See Keener, “Gifts,” 156; cf., e.g., Wis 3:14. Nolland (“Words”) sees “grace” as divine power in Luke 4:22.

20. E.g., Combrink, *Analysis*, 7; see esp. and more fully comment on Acts 2:22.

members “full of the Spirit,” though, as in Paul’s theology (1 Cor 12:7–10, 28–30), Luke expects particular gifts to regularly accompany particular callings, and Stephen’s and Philip’s recorded signs (though not clearly those of Ananias) come after the apostles have ratified their leadership.

Stephen was doing the great²¹ signs among “the people” (λαῶν), the contemporary Jerusalemite expression of historic Israel (already Acts 2:47; 3:9, 11–12, 23; 4:1–2, 8, 10, 17, 21; 5:12–13, 20, 25–26, 34), which has biblical significance for Luke (e.g., 3:23; 7:17, 34).²² The church’s favor among the people (e.g., 2:47; 5:26) was, however, vulnerable to negative influences (6:12).²³ It should be noted that Jesus’s favor with the “crowd” also diminished later in the Gospel.²⁴ Stephen may have been a Torah teacher, but this is not certain; what is clear is that he had signs and wonders—a phenomenon his academically “qualified” opponents could not answer on its own terms. In a social power conflict, this likely threatened their hegemony.²⁵

b. Debating Some from the “Freedpersons” Synagogue (6:9–10)

Just as the success of the Jerusalem apostles provoked envy and a backlash (5:12–17), so Stephen’s success provoked the same (6:8–9). That Stephen was indicted by fellow Hellenists may mean that they felt responsibility for disciplining members of their own community in Jerusalem.²⁶ Even more than this, however, it suggests that they felt the threat because many of their own members were being converted (cf. 6:8, 10).

Although the term συζητέω (6:9) can apply even to discussions among disciples (Luke 22:23; 24:15), it also applies to the sort of passionate debate that can provoke mortal enemies, as later with Paul (Acts 9:29). Educated proponents of the faith, such as Paul, could “dialogue” or “argue” with others who disagreed with them, seeking to persuade (17:2, 17; 18:4, 19; 19:8–9; 24:25), and Stephen apparently engaged in the same. What synagogue or synagogues were involved in 6:9?

Excursus: Synagogues

Synagogues were likely a Diaspora institution imported into Judea; in Egypt they appear as early as the third century B.C.E. and are well attested in the first century C.E.²⁷ By “synagogues” is meant local gatherings, formal or informal, usually in regular meeting places.²⁸ In the Diaspora the places of gathering were called προσευχαί—that

21. Cf. Philip’s miracles in Acts 8:13 and, negatively, “great signs” for false prophets (Luke 21:11; Matt 24:24; Rev 13:13); the phrase applies to apocalyptic symbols in Rev 12:1, 3; 15:1.

22. For Luke, λαός is basically synonymous with ἄλλος, but he prefers the former (eighty-three times; the latter sixty-three; as against two uses of λαός in Mark, two in John [in addition to one time in an interpolation], and fourteen in Matthew); see Tannehill, *Luke*, 143.

23. On the masses being easily swayed or changing their minds, see, e.g., Corn. Nep. 3 [Aristides], 1.4; Jos. War 2.237–38, 316–17, 321–25; Keener, *Matthew*, 670. Modern democratic politics in most countries provides a more contemporary and verifiable example of periodic opinion shifts.

24. See Tannehill, *Luke*, 157–58.

25. See Philip, *Pneumatology*, 156–57.

26. R. Simeon ben Gamaliel and other Tannaim emphasized the responsibility of each locality to judge members of their own locality (*t. Sanh.* 3:10).

27. Fine and Meyers, “Synagogues,” 122 (citing, e.g., Philo *Embassy* 156; *Dreams* 2.156; *Mos.* 2.216).

28. The title in this period more often designates the community, not the edifice, as Frey notes in *CIJ* 1:1xx.

is, “places of prayer” —well before the first century B.C.E.²⁹ Gentile literature also takes note of them (*Juv. Sat.* 3.296). Many were small and simple, like the first-century B.C.E. structure on Delos;³⁰ the characteristic activity, rather than a particular structure, defined the site (cf. Acts 1:14; 16:13–16).

Although we know of many synagogues (with that title) from the ancient Mediterranean world,³¹ most are of later or uncertain date.³² With a different title, some are attested much earlier, “well established” in Egypt “as early as the mid-third century BCE.”³³ These Diaspora synagogues were often called “prayerhouses” in this period (see comment on Acts 1:14).³⁴ Thus some scholars (most notably H. C. Kee, who in other scholarly matters is generally more careful) have argued that the term “synagogue” is Luke’s anachronism, from the post-70 C.E. period when the term became more popular.³⁵ Certainly, later rabbis were never hesitant to read synagogues anachronistically back into earlier periods.³⁶

Other scholars, however, have offered sound arguments against this position, which has been rejected by most commentators.³⁷ Thus Josephus calls them “prayerhouses” (προσευχαί) five times (for the Diaspora and hellenized Tiberias)—but “assemblies” (συναγωγαί, synagogues) six times.³⁸ Kee dismisses the relevance of Josephus as from the second century, but Josephus was born in 37 C.E. (*Life* 5) and his works date from about the mid-70s through about 95.³⁹ It also appears as a title for Diaspora synagogues in 56 C.E. (Berenice in North Africa, *SEG* 17.16) and about 40 C.E. (Philo *Good Person* 81).⁴⁰ It is likely that some of the Diaspora houses of prayer that Luke calls “synagogues” would have called themselves “prayerhouses,” but we can also be certain that his audience was familiar with his term and that it had been used at times even in the Diaspora in the period he describes. (On “prayerhouses,” see comment on Acts 1:14.) It may have been popularized further in his region by the forced Palestinian Diaspora after 70 C.E.

Certainly, it is impossible to maintain with Kee that we lack firm evidence for Palestinian synagogues before the late fourth century,⁴¹ though the vast majority of

29. E.g., *CPJ* 1:239–40, §129; 1:247–49, §134; 2:368, §1441; 2:370–71, §1443–44; 2:375–76, §1449. For later examples, see, e.g., *CIJ* 1:476, §662; 1:495, §683; 1:497, §684; 2:367, §1440; 2:369, §1442; perhaps 1:525, §726; 2:360, §1432; 2:361, §1433. *Jos. Life* 277 also freely applies the Hellenistic title to a Galilean structure; the favored title seems to have varied geographically (Applebaum, “Organization,” 490), perhaps until rabbinic influence became more widespread (Schubert, “Sacra Sinagoga”).

30. Stambaugh and Balch, *Environment*, 48. Some now, however, question the site’s identification as a synagogue (Matassa, “Myth”; among earlier scholars supporting the identification, see Kraabel, “Evidence”).

31. E.g., *CIJ* 1:238, §301; 1:251, §319; 1:286, §368; 1:298, §383; 1:298–99, §384; 1:303, §390; 1:318, §416; 1:319, §417; 1:323, §425; 1:360, §494; 1:368, §503; 1:372, §509; 1:373, §510; 1:384, §523; 1:398, §537; 1:457, §639; 1:504–7, §694; cf. 1:295, §380; 1:313, §408; 1:369, §504.

32. Discoveries in recent decades have thrown into disarray older “typologies” of synagogue architecture (McRay, *Archaeology*, 70).

33. Lightstone, “Diaspora Judaism,” 356.

34. See further, e.g., Schubert, “Sacra Sinagoga.” For a survey of Diaspora synagogues, see Foerster, “Survey of Synagogues”; cf. discussion in Nanos, *Mystery*, 42–50.

35. E.g., Kee, “Response to Oster”; idem, “Reassessing Evidence from Gospels.” Hachlili, “Origin,” argues that the institution spread after 70 C.E., being considerably more limited beforehand; but even this approach risks reading our extant evidence as if fairly complete rather than representative.

36. E.g., *Tg. Amos* 6:3; probably also *Tg. Zech.* 9:17.

37. See, e.g., Oster, “Rejoinder to Kee”; Atkinson, “Defining”; Dunn, “Synagogue,” 216–21. See esp. the careful and thorough Kloppenborg, “Theodotus Synagogue Inscription”; idem, “Dating Theodotus.”

38. Riesner, “Synagogues in Jerusalem,” 183.

39. *Ibid.*, 182–83; Smallwood and Rajak, “Josephus,” 798.

40. Riesner, “Synagogues in Jerusalem,” 181–82. The Corinthian synagogue lintel identifying it as a “synagogue” also may be second century or earlier (Witherington, *Acts*, 255; see comment on Acts 18:4).

41. Kee, “Transformation,” 10.

buildings devoted strictly to this usage do postdate 70. Three fairly clear pre-70 synagogues have now been excavated in Palestine (Gamla, Masada, and the Herodium), including not only stone benches around the walls, ritual baths, and an apparent orientation toward Jerusalem but also Torah fragments and possibly evidence of a niche for the Torah scroll.⁴² Many scholars today find a larger number certain.⁴³ Other sites have been or are being discussed as well,⁴⁴ not including suggestions of pre-70 liturgical use of other buildings beneath the ruins of second-century and later synagogues. Some specialists have argued that most synagogues developed from houses or *insulae* (following a pattern for religious-association meetings in antiquity),⁴⁵ and only after 70 did specific synagogue forms develop.⁴⁶ This origin makes them more problematic to identify; it does not refute literary evidence for their existence. *Pace* Kee, pre-70 synagogues existed even in Jerusalem (see section 2.b.iii, “Diaspora Synagogues in Jerusalem,” below on the Theodotus inscription, pp. 1306–8).⁴⁷

Most early synagogues probably began as parts of other buildings, which minimizes early archaeological evidence, but we cannot simply dismiss the literary evidence of Josephus, the Gospels, and other contemporary sources as if they all conspired together merely to deceive later readers about their fictitious institution.⁴⁸ In the Diaspora they functioned as *collegia* (corporations) on the model of other Hellenistic social and religious associations (Jos. *Ant.* 14.258, 260; Philo *Embassy* 311–15).⁴⁹ (On associations, see comment at Acts 12:12.)

Some scholars have argued that the assembly halls common in the Diaspora and attested in Jerusalem may have been less common in Galilee.⁵⁰ Others contend that the reason few pre-70 Palestinian synagogues have been uncovered is simply that those building later synagogues completely demolished earlier ones on the same site; all three probable pre-70 synagogues that have been discovered are from sites not resettled after their destruction.⁵¹ They may have also not been architecturally

42. Riesner, “Synagogues in Jerusalem,” 184–86, following Meyers, “Synagogue,” 255; and a number of excavation reports (including Ma’oz, “Synagogue from Second Temple,” 142; Gutman, “Gamala,” 460–62; Netzer, “Masada,” 981–83); see also Chilton and Yamauchi, “Synagogues,” 1146–47; Hachlili, “Architecture,” 127–28. But some dispute even these three (Grabbe, “Synagogue,” 1727, cites Chiat, *Handbook*, 116–18, 204–7, 248–51, 282–84, though this work is from 1982).

43. Evans, *World*, notes Magdala (53), the earlier Hasmonean synagogue at Modi’in (56–57), Qiryat Sefer (57–58), in addition to Herodium (51), Gamla (49–51, noting on 50 that it was destroyed in November 67), and Masada (55). Grabbe, “Synagogue,” 1729, thinks that the Diaspora institution of the synagogue probably reached Palestine in the first century B.C.E. (but possibly the first century C.E.).

44. Cf. also a probable first-century B.C.E. synagogue or prayer room from Shuafat (Shu’fat), north of Jerusalem (Riesner, “Synagogues in Jerusalem,” 192). There are various other recent or disputed sites (e.g., in Jericho, in Netzer, “Jericho”; Shanks, “Is It a Synagogue?”; in the Second Temple village of Kiryat Sefer, in Magen, Zionit, and Sirkis, “Qryt-spr”; Chorazim’s synagogue in May and Stark, “Reconstruction”).

45. White, *Origins of Architecture*, 1:62, 101 (more generally, 60–101).

46. *Ibid.*, 1:85. For the wide variety of synagogue structures, see Meyers, “Synagogue,” with a full survey of archaeological evidence then available.

47. See, e.g., Fitzmyer, *Acts*, 357; Riesner, “Synagogues in Jerusalem”; Evans, *World*, 38–58 (noting that hardly anyone has been persuaded by Kee).

48. E.g., though no synagogue has been excavated from Sepphoris from any period, it is impossible to doubt that some existed; a contemporary source, indeed, attests eighteen there (Riesner, “Synagogues in Jerusalem,” 186, citing *y. Kil.* 32b; Weiss, “Sepphoris”); cf. also Witherington, *Acts*, 255–57 (citing Jos. *War* 2.285–91; 7.43–44; *b. Ber.* 6a; *y. Ber.* 5:1, §9). Riesner, “Synagogues in Jerusalem,” 185–86, argues for Pharisaic influence in the synagogues.

49. Mantel, “Nature of Synagogue,” 75–91; cf. White, “Revisited”; Harland, *Associations*, 30–55, esp. 33–36.

50. See Horsley, *Galilee*, 222–33.

51. Sanders, *Judaism*, 200; *idem*, *Jesus to Mishnah*, 77; cf. May, “Synagogues,” 3.

distinctive, preventing us from recognizing them.⁵² With the loss of the temple, synagogues grew more ornate after 70.⁵³

But even if one were to assume the lack of formal structures functioning through the week as religious and community centers,⁵⁴ one should not suppose that Galileans failed to assemble (cf. Sir 1:30). Although smaller towns may have lacked the resources for such formal structures,⁵⁵ Josephus reflects the interpretation that the law required Jews to assemble each Sabbath to study Torah (*Ag. Ap.* 2.175) and pray (1.209).⁵⁶ A public place of prayer in Tiberias (one of Galilee's two large cities) functioned as the meeting place for the entire citizen assembly (*Life* 277–78).

Regardless of the kind of building, the assembly places were not restricted to what Western society would call religious functions as many modern Western churches are. Certainly they remained houses of study (e.g., *CIJ* 2:333, §1404), but as Levine summarizes,⁵⁷ before 70 they also functioned as community courts,⁵⁸ gathering sites for charity,⁵⁹ collection points for funds for the temple,⁶⁰ hostels (as in the Theodotus inscription),⁶¹ and banquet halls.⁶² Further, both synagogue designs⁶³ and comments of later rabbis⁶⁴ show us that the local communities, not representatives of the rabbinic academy, controlled synagogues in the second century and later.⁶⁵ Seats face one another in the pre-70 synagogue at Gamla, suggesting interaction in Galilean assemblies.⁶⁶ Members of the community may have gathered to such assembly halls for special events during the week, such as the visit of a traveling teacher like Jesus

52. Miller, "Number in Cities." Atkinson, "Defining," finds features consistent with later synagogues in the four he identifies as certain; but this would not be obvious in houses or other building types.

53. From the earliest period (well before 70 C.E.), writers associated the synagogues with the Jerusalem temple (Cohen, "Evidence on Synagogue," 163). The associations grew after 70, however, and probably still further under later Byzantine influence (Levine, "Nature and Origin," 446–47).

54. Most do see them as multipurpose (e.g., Levine, "Synagogue," 14, offering first-century evidence; Evans, *World*, 58). No form was mandatory; various architectural types existed even through the medieval period (Meyers, "State," 128–32); on pre-70 Judean types, see Chen, "Design." Friedman, "Features," argues that many features of synagogues emulated the temple (so also Spero, "Tabernacle").

55. Well-to-do persons sometimes donated synagogues (Luke 7:5; *CIJ* 2:8, §738; Theodotus inscription). Some synagogues probably met in well-to-do patrons' homes, like the house churches (Meyers and Strange, *Archaeology*, 141; cf. Le Cornu, *Acts*, 1218); some have suggested that a private home lies beneath the later Capernaum synagogue (Strange and Shanks, "House in Capernaum," 29–30; cf. idem, "Synagogue"), though the reuse instead of demolition of the earlier, impractical foundation may suggest that it was actually the earlier synagogue (Evans, *World*, 46–47).

56. Cf. also Jos. *War* 2.289; *Ant.* 16.43. As Sanders, *Judaism*, 199, points out, Philo recognizes a "house of prayer" (*Embassy* 132) in which Jews learned Torah in an assembly on the Sabbath (*Hypoth.* 7.12–13; cf. *Spec. Laws* 2.62–63; *Good Person* 81). First-century Jews believed that Moses required this (*Hypoth.* 7.12–13; Jos. *Ag. Ap.* 2.175; *L.A.B.* 11:8; Sanders, *Jesus to Mishnah*, 78).

57. Levine, "Synagogue," 14. See also idem, "First-Century Synagogue"; idem, "Nature and Origin"; for Diaspora synagogues as community economic centers, see Rosenfeld and Menirav, "Synagogue"; Lightstone, "Diaspora Judaism," 372.

58. Like the "gates" of biblical tradition; Acts 22:19; Matt 10:17; 23:34; *m. Mak.* 3:12; though Urman, "House of Assembly," argues for a distinction between synagogues and community centers in this period.

59. Matt 6:2; *t. B. Bat.* 8:14; *Šabb.* 16:22; *Ter.* 1:10.

60. Philo *Embassy* 156; Jos. *Ant.* 14.215; 16.167–68.

61. Cf. synagogues as guest houses also in later times, e.g., *y. Meg.* 3:3, §5.

62. Jos. *Ant.* 14.214–16; 16.164.

63. E.g., May, "Synagogues," 9; Hachlili, "Zodiac in Art"; Narkiss, "Elements," 185–86; Levine, "Nature and Origin," 444.

64. E.g., *t. B. Meš'it* 11:23; *Ṭehar.* 8:11.

65. Synagogues nevertheless regularly appear as positive places of worship in rabbinic texts, e.g., *t. Sukkah* 4:6; *b. Meg.* 28ab; *y. Ta'an.* 3:11, §4. Later rabbis both project the institution anachronistically into the distant past (e.g., *Lam. Rab.* proem 2) and exaggerate their numbers in the more recent past (e.g., 3:51, §9).

66. Freyne, *Galilee, Jesus*, 152–53.

or Paul (see further discussion at Acts 13:5). In many places the respected elders probably allowed any guest with a reputation as a teacher to speak.⁶⁷

I. MULTIPLE SYNAGOGUES?

What is the synagogue or synagogues mentioned here? Some argue that grammatically, this verse might refer to five synagogues, or to at least two,⁶⁸ but most scholars now read the grammar in support of a single “Synagogue of the *Libertini* [former Roman slaves],” who immigrated to the Holy Land from the various regions mentioned in Acts 6:9.⁶⁹ Certainly there is no reason to limit the number of synagogues to one on the supposition that only one would be possible in the city (cf. 24:12). Later rabbinic traditions claimed that pre-70 Jerusalem contained 480 synagogues, but this is probably no more than nostalgic glorifying of their past heritage; the tradition also claims elementary schools and Mishnaic institutes attached to each.⁷⁰ Despite such exaggerations, if a tiny village such as Nazareth could have its own synagogue, one might expect many in Jerusalem even though public activities in the temple might be more popular. In favor of multiple synagogues in this passage is the difficulty in supposing that large numbers of Jewish slaves of Roman citizens would have settled in other, non-Jewish Eastern cities before moving here; one could thus argue that freed slaves could thus meet as a social group separate from the groups from other locations. Nevertheless, just as Paul was a Roman citizen from Tarsus, it is conceivable that a number of freed Roman Jews had settled elsewhere before returning to Judea. Given Luke’s multicultural focus, noting representatively diverse locations helps his case; not all members were necessarily from these areas (nor even necessarily all descended from the freedpersons who founded the synagogue). Diaspora Jews might, however, appreciate the status of a synagogue founded by Roman citizens.

The use of the Latin *libertini*, borrowed into the Greek, probably suggests not just any freedpersons but citizens’ freedpersons, who would therefore have normally been made citizens themselves (see comment on citizenship acquisition at Acts 22:28).⁷¹ Some scholars doubt that they would wish to retain the self-designation “freedpersons” after many generations;⁷² but the synagogue may have taken this name in a prior generation and retained its name, hosting especially citizens of slave descent. Because the Latin name connoted citizenship, Jerusalemites who attended it would probably associate the title with high rather than low status (though there were higher-status methods of acquiring citizenship).

67. Cf. Sanders, *Jesus to Mishnah*, 80–81.

68. E.g., D. Williams, *Acts*, 127, thinks two, since the grammar distinguishes Cilicia and Asia (especially τῶν ἀπὸ). But the distinction probably simply takes note of the geographic shift rather than distinct synagogues.

69. Riesner, *Early Period*, 153; idem, “Synagogues in Jerusalem,” 204–5; Bruce, *Acts*¹, 156; Munck, *Acts*, 58; Fitzmyer, *Acts*, 358; Barrett, *Acts*, 325; Dunn, *Acts*, 86; tentatively, Johnson, *Acts*, 108.

70. E.g., *y. Meg.* 3:1, §3; *Pesiq. Rab Kah.* 15:7; *Lam. Rab.* proem 12; cf. the variant “80” in *Num. Rab.* 18:21. Of course, a city of some eighty thousand could easily contain so many synagogues, and with six thousand mostly Jerusalemite Pharisees and possibly more scribes, the number of schools is also plausible.

71. Many have noted the connection with “freedmen of Rome” here (in the nineteenth century, Hort, *Judaistic Christianity*, 50). The term was already a loanword in Greek, but it does not appear in any other NT or LXX passage referring to freed slaves. Some Gentile *libertini* also apparently became God-fearers or proselytes (*Tac. Ann.* 2.85, noted by Arnold, “Acts,” 265).

72. D. Williams, *Acts*, 127 (following Sherwin-White, *Society*, 152). The title retained some stigma, but even after equestrian status was limited to free birth in 23 C.E., this limitation no longer applied to the third freeborn generation (Lintott, *Romans*, 93).

II. SYNAGOGUE OF FREEDPERSONS (6:9)

Some arguments for multiple synagogues are noted above. The grammar, however, is more easily read as referring to one synagogue rather than to several. But only one “synagogue” is actually mentioned here, and one would not expect the synagogue to be “called” by the names of each of the separate groups, so the first is likely its title. It suggests a gathering of *libertini*, freed slaves of Roman citizens (or descendants of such freed slaves)⁷³ who were thus citizens themselves. The apparent improbability of slaves freed from Rome settling elsewhere before returning to the land of their ancestors (mentioned above) is mitigated by the large number of Jews in Rome descended from freed slaves. Philo reports as common knowledge (even in Alexandria and certainly in Rome) that most of the Jewish community on the other side of the Tiber was descended from captives who had been freed and who maintained their observances (*Embassy* 155) and had synagogues there (*Embassy* 156).⁷⁴ People regularly moved to and from Rome (cf. Rom 16:3–15),⁷⁵ and it is likely that some would wish to return to the mother city of their ancestors, as Jewish people throughout the Roman world considered Jerusalem.⁷⁶

Other Hellenist synagogues may have affiliated on the basis of where their ancestors came from or what (presumably Hellenist) neighborhoods they lived in; this group, while also united by its use of Greek language, was united on the basis of social status. Freed slaves could hold ambivalent status in Roman or Jewish society;⁷⁷ as Roman citizens, however, they held a coveted status not shared by even much of the municipal aristocracy in Jerusalem or other Eastern cities (see comment on Acts 22:28). (Freed status was lower than free status within citizenship, a common status in Rome;⁷⁸ but in the East few yet held Roman citizenship.)

Synagogues sometimes bore names, some indicating their patrons;⁷⁹ possibly the patrons, and more likely the founders, rather than every person who attended, were *libertini*. Nevertheless, the synagogue seems to have been of high status, and hence likely influential, and might have been the preferred synagogue for other Roman citizens of Diaspora and slave descent. If the founders and their descendants were Roman citizens, they would therefore have a readier hearing with the Sanhedrin (Acts 6:12) and presumably with Rome.⁸⁰

73. Although the title might apply strictly to first-generation children of freedpersons (Suet. *Claud.* 24.1; Bruce, *Acts*¹, 156), those for whom it was a high-status term might preserve it longer; and it would need apply only to the synagogue’s founders, in any case, not to all those who attended it.

74. Large numbers of these “captive” Jews had been taken by Pompey in 63 B.C.E. (noted in, e.g., Kurzinger, *Apostelgeschichte*, 27). Jews may have often sought to buy the freedom of fellow Jews (Lohse, *Environment*, 150).

75. Cf. Meeks, *Urban Christians*, 16–17; Hunter, *Romans*, 131. For immigration to Rome from Palestine, see, e.g., Jos. *Life* 13; *CIJ* 1:282, §362; 1:287–88, §370; and (involuntarily) 1:411, §556; from the East and other provinces more generally, 1:365, §500; Leon, *Jews of Rome*, 238–40; Clarke, “Italy,” 466; Carcopino, *Life*, 55; Friedländer, *Life*, 4:11; Nock, *Conversion*, 66–70. In a sense, all roads led to Rome (Ramsay, “Roads and Travel,” 376).

76. Tob 13:9; Philo *Flacc.* 46; *Embassy* 281 (cf. 203, 294, 305); 4 *Ezra* 9:38–10:28, esp. 9:43–45; 10:7; 2 *Bar.* 3:1–3; cf. Isa 66:8–9; Gal 4:25–26; Luke 13:34; Rev 12:1–2; 21:2. A city that founded colonies was a “mother city” (e.g., Pliny E. *N.H.* 5.17.76).

77. See Gaius *Inst.* 1.11; Jos. *Ant.* 18.47; Dupont, *Life*, 65–66; Meeks, *Urban Christians*, 21. Later rabbis ranked freed slaves (of Jews) one step below proselytes (Jeremias, *Jerusalem*, 272, citing *m. Hor.* 3:8; less relevant, *m. Qidd.* 4:1; *t. Meg.* 2:7).

78. In Rome, the thousands of Jewish freedmen seem not to have been well accepted, especially a generation earlier (19 C.E.; Tac. *Ann.* 2.85, though these may be understood as Gentiles with Jewish leanings, as in Fitzmyer, *Acts*, 356), a factor that may have motivated some toward migration eastward.

79. See *CIJ* 1:1xxi–lxxxii; e.g., 1:318, §416; 1:323, §503; or other names, e.g., 1:372, §509.

80. If “Junia” was a Roman citizen, her conversion before Paul (probably in Jerusalem; see Rom 16:7; unless she was Joanna, as some have proposed) suggests that she may have belonged to this synagogue and hence that some of its members had joined the Jesus movement.

*Excursus: Freedpersons*⁸¹

Because less than .05 percent of U.S. slaves were manumitted before the U.S. Civil War,⁸² most modern readers are not familiar with a very common aspect of ancient slavery, namely, manumission. Apart from high-status slave positions such as slavery to Caesar, people recognized that as a rule freedom was preferable to slavery.⁸³ By the hope of manumission, slaveholders motivated slaves' compliance besides presenting themselves as benevolent and virtuous in their society.⁸⁴ Slaves often bought their freedom, and masters could use the funds to buy younger and healthier replacements.⁸⁵ Sometimes it was also less expensive to release the slave than to continue to maintain him or her in the household.⁸⁶

Slaves had to be more than thirty years old (and slaves of Roman citizens) to be manumitted in such a way as to obtain citizenship.⁸⁷ Augustus had restricted manumission (e.g., Suet. *Aug.* 40.3), but even during his reign many achieved it (42.2–3); it became common during the empire.⁸⁸ Probably a large proportion of household slaves were eventually manumitted.⁸⁹ Earlier many slaves achieved freedom even during the republic;⁹⁰ it was said that earlier slaves achieved it by good behavior but later ones by purchasing it (Dion. Hal. *Ant. rom.* 4.24.4).

Roman law recognized freedpersons as a category of free people (of lower status than freeborn),⁹¹ not as a class intermediate between slave and free.⁹² Nevertheless, freedpersons retained obligations to their former masters, now as clients belonging

81. For sample source texts on freedpersons, see, e.g., Shelton, *Romans*, 186–202; Gaius *Inst.* 3.39–76; Justin. *Inst.* 1.5. For sample emancipation contracts, see, e.g., P.Oxy. 722 (91 or 107 C.E.). See further Heinrichs, “Freedmen”; Friedländer, *Life*, 1:202–6; for Greek analogies, see Cartledge, “Freedmen”; in Corinth's history, Engels, *Roman Corinth*, 16–18, 67–69.

82. Fogel and Engerman, *Time*, 150.

83. E.g., Xen. *Symp.* 4.29 (much earlier); *Test. Jos.* 1:5.

84. Bradley, *Slaves*, 83, 111–12. Manumitting slaves appeared virtuous partly through creating more citizens (Pliny *Ep.* 7.32.1). Perhaps to appear benevolent, Pliny favored a more liberal approach to slaves than did some of his contemporaries (e.g., Pliny *Ep.* 4.10.1–2; 7.6.8; 8.14.12; 10.66.2; 10.72). For manumission as a reward for service, see, e.g., Cic. *Mil.* 22.58. Sacral manumission (e.g., Deissmann, *Light*, 319–23; among Hellenistic Jews, 321–22), by contrast, was not a widespread practice (see Bartchy, *Slavery*, 121–25); on Jewish manumission, see Hezser, *Slavery*, 304–17.

85. Winter, *Welfare*, 153, following Bradley, *Slaves*, 109–12. Some even abandoned sick slaves to evade the expense of treating them, although at that point Claudius intervened and freed them (Suet. *Claud.* 25.2). When an estate might be confiscated, freeing slaves to become freedpersons might be the more profitable course (Cic. *Fam.* 14.4.4); freedmen had legal obligations to their patrons, but not to the patrons' heirs (Quint. *Decl.* 318.1–2). On the sometimes high monetary price at which slaves might have to secure manumission, see, e.g., Quint. *Decl.* 388.24.

86. Stambaugh, *City*, 96–97. For slave accommodations in Roman homes, often tight, see Jeffers, “Families,” 132; naturally, wealthy homes afforded better accommodations (e.g., Pliny *Ep.* 2.17.9, with rooms for freedpersons also; but for two in one bed, see 7.27.12).

87. Gaius *Inst.* 1.17, 20; Buckland, *Roman Law*, 79 (though manumission by the manumitter's will was less restrictive, 80). A girl of fourteen was manumitted in *ILS* 5213 (Lefkowitz and Fant, *Life*, 133, §135). On conditions for freedpersons becoming citizens, see also Schieman, “Manumission,” 265.

88. Cf. Jeffers, *World*, 230; Harrill, “Paul and Slavery,” 589; Grant, *Social History*, 112–22; cf. Lintott, *Romans*, 92. The slaveholder had complete freedom to manumit (e.g., Quint. *Decl.* 340 intro; 340.1; 342 intro; 342.1).

89. E.g., Winter, *Welfare*, 153 (following Hopkins, *Conquerors*, 116); Rawson, “Roman Family,” 12–13; Garnsey and Saller, *Empire*, 124f.; Jeffers, *World*, 231 (suggesting “the average slave”); though “virtually all slaves . . . in their 30s” (Murphy-O'Connor, *Corinthians*, 79) may be an overstatement. Scheidel, “Quantifying,” thinks the numbers low; but see the critique of Harris, “Demography.” A runaway slave might also, when recognized, pretend to have been freed (Cic. *Quint. frat.* 1.2.4.14).

90. Dupont, *Life*, 62–65.

91. For perceptions of their lower status, see, e.g., Gaius *Inst.* 1.11; Jos. *Ant.* 18.47; cf. Tac. *Ann.* 15.72; 16.10.

92. Gaius *Inst.* 1.9–11. Nevertheless, practical ambiguities remained; see Lintott, “Freedmen and Slaves.”

to their household.⁹³ Even after the slaveholder died, a freedperson might dedicate a monument to him or to her.⁹⁴ The former masters now owed their new clients help, such as letters of recommendation⁹⁵ and other business assistance.⁹⁶ Freedpersons' patrons often employed them and at least sometimes, as in the case of Cicero with his educated scribe Tiro, grew close to them.⁹⁷ Freedpersons were of lower status, so that some were surprised that Pliny ate with his freedmen; but he did so by sharing their quality of food, rather than expending more resources by treating them to his.⁹⁸

Freedpersons remained a distinct group. They received lower seating in banquets, could not marry higher-class women, and could not serve in Roman legions.⁹⁹ In the first and second centuries C.E., freed slaves on special occasions wore a special conical hat with no brim to celebrate their emancipation.¹⁰⁰ Some associations were only for freedpersons.¹⁰¹ A number of freedmen were teachers.¹⁰²

After Augustus, freeborn Roman men not belonging to the senatorial class could marry freedwomen.¹⁰³ Perhaps two-thirds of imperial slaves and freedmen, a group with high status and influence, married freeborn women.¹⁰⁴ A free man often used his freedwoman as a concubine.¹⁰⁵ Slaveholders often freed favorite female slaves in order to marry them;¹⁰⁶ on occasion, even a wife might free her deceased husband's favorite slave woman.¹⁰⁷ Although a freedwoman married to her patron could divorce him, this did not grant her the freedom divorces normally conferred on wives.¹⁰⁸

93. See, e.g., Cic. *Fam.* 3.1.2; Val. Max. 5.1.11; Sen. E. *Controv.* 4.8, excerpts; Pliny *Panegy.* 42.2; *Ep.* 9.21.1–3; 9.24; Tac. *Ann.* 4.7; Suet. *Calig.* 16.4; *Rhet.* 3; discussion in Bradley, *Slaves*, 81; Winter, *Welfare*, 152–54 (citing *Dig.* 38.1.16.1); Buckland, *Roman Law*, 88–89; Shelton, *Romans*, 198–200; Lampe, “Patrons,” 489; Chow, *Patronage*, 69–72; Dupont, *Life*, 65–66. For contracts specifying continuing duties as conditions of freedom, see Horsley, *Documents*, 4:102–3, §24. A former holder, as a *paterfamilias*, also could execute freedmen (Val. Max. 6.1.4; Suet. *Jul.* 48); for revoking freedom under some conditions, see Val. Max. 2.6.6; 2.6.7a; Suet. *Claud.* 25.1; for limits on such revocation, see Tac. *Ann.* 13.26–27.

94. E.g., *ILS* 7558, 7580 (Sherk, *Empire*, §173I, p. 229). A patron might also dedicate a monument to himself and to his freedmen and freedwomen (*ILS* 7486, in Sherk, *Empire*, §173F, p. 228).

95. E.g., Cic. *Fam.* 13.23.1–2. On remaining part of the household business, see, e.g., Cic. *Fam.* 1.3.2.

96. E.g., Suet. *Jul.* 2. Freedpersons might also be designated as heirs (e.g., *CIL* 2.4332, in Sherk, *Empire*, §180, p. 239), though this might also entail debts (suggested by the editor on *CPJ* 2:20–22, §148).

97. Cic. *Fam.* 16.1.1–2; 16.3.1–2 (freed soon after); cf. similarly Pliny *Ep.* 5.19.2. They might well seek work in a former holder's employment even without the holder's interest, as in Fronto *Ad M. Caes.* 5.37 (52). Freedpersons acquired honor through positive association with their former holders (cf. Polyb. 12.6a.4).

98. Pliny *Ep.* 2.6.3–5. That Claudius is presented as easily influenced by his freedmen is viewed as shameful (Suet. *Claud.* 25.5).

99. MacMullen, *Social Relations*, 105. Perhaps exceptions were made for those with sufficient power (see comment on Acts 23:24), but these restrictions would have applied generally.

100. Croom, *Clothing*, 69; Cosgrave, *History of Costume*, 78.

101. Klauck, *Context*, 47.

102. Suet. *Gramm.* 15–20; 23 (when one was “freeborn,” as in *Gramm.* 21, it is noted; but he became a slave).

103. McGinn, “Missing Females?”

104. Jeffers, *World*, 228. Under normal circumstances, however, freeborn women of means marrying freedmen was less acceptable than free men marrying freedwomen (Sen. E. *Controv.* 7.6.1–12), perhaps not least because of the shortage of aristocratic women. But imperial freedwomen might attract suitors for political reasons (Suet. *Otho* 2.2).

105. Treggiari, “Marriage and Family,” 169.

106. E.g., Jeffers, *World*, 239; Osiek, “Female Slaves,” 261.

107. E.g., Val. Max. 6.7.1 (although one might also consider that this removed the woman from the house). Apparently wives also had affairs with male slaves (cf. Lucian *Downward Journey* 11), though this activity required far more discretion.

108. Buckland, *Roman Law*, 117.

Freedpersons of Caesar could wield considerable power,¹⁰⁹ and slaves of Caesar might prefer to remain in that privileged position.¹¹⁰ After the abuses of imperial freedpersons in Claudius's and Nero's reigns, however, many condemned the worst extremes.¹¹¹ More generally, freedpersons experienced significant social mobility.¹¹² In Pompeii, large numbers of freedpeople and their descendants entered the aristocracy;¹¹³ freedpeople were well represented in many of the empire's municipal aristocracies.¹¹⁴ It would not be surprising if some Jewish ex-slave Roman citizens were prominent in Jerusalem. Traditional aristocrats, however, lampooned nouveau riche freedpersons.¹¹⁵

Many Jews brought to Rome as slaves under Pompey were soon freed, possibly through the financial help of other Jews.¹¹⁶ Under the usual conditions, freed slaves of Roman citizens became Roman citizens.¹¹⁷ If Paul belonged to a Cilician family in the synagogue of freedpersons (cf. Acts 6:9 with 21:39), it is reasonable to assume that his ancestors received citizenship the way many Jews had—through being enslaved and then freed.¹¹⁸ They normally took the patron's nomen and praenomen;¹¹⁹ for a discussion of the origin of Paul's name, see comment on Acts 13:9.

III. DIASPORA SYNAGOGUES IN JERUSALEM

Most striking is archaeological evidence for a Diaspora-related synagogue in Jerusalem, the Theodotus inscription.¹²⁰ Most scholars naturally date this synagogue complex before Jerusalem's destruction.¹²¹ The paleography suggests a pre-70 date,¹²² and archaeological evidence (such as items found near it) also fit this date.¹²³ Kee dates it to the fourth century, but Jews remained banned from Jerusalem at that date.¹²⁴ Since Theodotus was expanding a complex founded earlier by his grandfather, and

109. E.g., P.Oxy. 3312.10–13 (on which see Weaver, "P. Oxy. 3312"); *CIL* 6.8583; *ILS* 1578 (Sherk, *Empire*, §181, p. 240); *Pliny Ep.* 10.27–28, 84–85; *Jos. Ant.* 18.167; 19.64; 20.135; cf. also Balch, "Families," 273. Naturally not all held exalted positions (cf. the water bearer in *Jos. Ant.* 18.192).

110. E.g., Suet. *Gramm.* 21 (in Dixon, *Roman Mother*, 19).

111. E.g., *Tac. Ann.* 14.39; 16.23; *Philost. Vit. Apoll.* 5.36; see comments on Pallas at Acts 23:24. For a governor avoiding transacting business through freedmen and hence eliminating a cause of corruption, see *Tac. Agr.* 19. For examples of the abuses, e.g., *Epict. Diatr.* 1.1.20; *Tac. Hist.* 1.76.

112. Jeffers, *World*, 233; López Barja de Quiroga, "Mobility."

113. MacMullen, *Social Relations*, 103.

114. Finley, *Economy*, 72 (up to 33 percent in Ostia and as low as 12 percent in rural Cisalpine Gaul), based on M. L. Gordon's study of more than a thousand epitaphs.

115. See Trimalchio in *Petron. Sat.*, e.g., 38.

116. Leon, *Jews of Rome*, 237.

117. E.g., *Dion. Hal. Ant. rom.* 4.23.3; *Gaius Inst.* 1.12, 17 (for those not qualified for citizenship, 1.13, 16–17); cf. Lyall, "Slave and Freedman," 78; Finley and Treggiari, "Freedmen." One satire notes free persons who sold themselves into slavery and then had themselves manumitted to achieve citizenship (*Petron. Sat.* 57). Those freed by aliens (*Pliny Ep.* 10.5.2) or under the wrong conditions were not Roman citizens, but the ideal was full Roman, rather than mere Latin, citizenship (7.16.4; 10.104–5).

118. Schnabel, *Missionary*, 42, notes also patristic support for this thesis. See further discussion at Acts 22:28.

119. Chow, *Patronage*, 70.

120. Available, e.g., in *CIJ* 2:332–35, §1404; Carmon, *Inscriptions*, §182, pp. 83, 182–83.

121. See, e.g., Porter, "Inscriptions," 534; Riesner, "Synagogues in Jerusalem," 192–200.

122. Riesner, "Synagogues in Jerusalem," 194–95.

123. *Ibid.*, 195–98.

124. *Ibid.*, 198–99; for lack of evidence for habitation on the Ophel in the second through fourth centuries, see also Evans, *World*, 43. Theodotus does appear as a feminine name in a fourth- or fifth-century C.E. Palestinian inscription (Schwartz, "Inscription in Library," esp. 87), but the Greek theophoric element was quite common in Jewish names (see comments on "Theophilus" in Acts 1:1). Grabbe, "Synagogue," 1727, notes that "Kee is almost alone in arguing that it is post-70"; Evans, *World*, 42–43, notes that most paleographers date it to the Herodian period, against Kee.

this would not have been possible after 70 in this part of Jerusalem, it must have been standing in Jesus's day.¹²⁵

Given the name of Theodotus's father, Vettenu, the synagogue was probably originally founded by a Jew from Rome.¹²⁶ The name "Vettenu" may refer to the *gens Vettina*, suggesting freed status; freed slaves often adopted the family names of the patron who freed them, and we know that many slaves in Rome became free and achieved citizenship through this act of manumission (Philo *Embassy* 155). Many scholars have thus offered the reasonable suggestion that this is the "synagogue of the libertines" mentioned here,¹²⁷ but others are more skeptical of this connection.¹²⁸ It seems plausible but not provable.¹²⁹ Without any suggestion to that effect in the inscription, however, one wonders how likely the coincidence would be that the synagogue in this inscription uncovered by archaeologists would be the very one mentioned in Acts, at least if many Diaspora (or other) synagogues existed in Jerusalem. (If few did, the likelihood increases correspondingly.) We cannot be certain that Theodotus's synagogue is the one mentioned in Acts; at the least, however, it illustrates that synagogues with Diaspora associations, perhaps built by Diaspora Jews, existed in Jerusalem.¹³⁰

Scholars often cite the Tannaitic tradition mentioning a synagogue of Alexandrians (*t. Meg.* 3[2]:6); this tradition stems from the early third century, but the earlier events it depicts may fit other data.¹³¹ Although we cannot be sure that it represents the pre-70 situation, it is a likely inference; Alexandria was the closest major city to Jerusalem¹³² (unless we count smaller cities such as Damascus) and boasted one of the world's largest Jewish populations.¹³³ The Tarsian synagogue in Jerusalem (if this is the meaning in *b. Meg.* 26a; it might refer to a sort of metalworker) might be a different synagogue,¹³⁴ but some have suggested that it is the same one, which would fit the probable way to take the grammar of Acts 6:9.¹³⁵ What such traditions indicate at the least is that later Palestinian Jews found it likely that Diaspora Jews settled in Jerusalem and maintained their identity through synagogues there.

Alexandria was one of the largest cities of the Roman world and was also a major intellectual center (see further comment on Acts 18:24–25).¹³⁶ While Philo belonged to

125. Riesner, "Synagogues in Jerusalem," 200. See also Kloppenborg, "Dating Theodotus"; idem, "Theodotus Synagogue Inscription"; Charlesworth, "Archaeology," 50–51.

126. With Dalman, *Jesus-Jeshua*, 3.

127. Yamauchi, *Stones*, 112–13; Thompson, *Archaeology*, 315; Barrett, *Acts*, 1:324; Riesner, "Synagogues in Jerusalem," 206.

128. E.g., Safrai, "Relations," 193. Evans, *World*, 43, regards the identification as possible but "speculative." Deissmann, *Light*, 441, argues that the "synagogue of libertini" was probably made up of former imperial slaves, but this represents an even greater overspecification than identification with Theodotus's synagogue.

129. With Witherington, *Acts*, 254; Le Cornu, *Acts*, 326.

130. Martin, "Theodotus Inscription," notes that Theodotus's synagogue may have differed from many Jerusalem synagogues, as it was for Greek-speaking Diaspora Jews.

131. E.g., Riesner, "Synagogues in Jerusalem," 188–89; Lake and Cadbury, *Commentary*, 68; Conzelmann, *Acts*, 47; most following earlier writers such as Dalman, *Jesus-Jeshua*, 3; Strack and Billerbeck, *Kommentar*, 2:663–64; scholars often add *y. Meg.* 3, 73d. The context of *t. Sukkah* 4:6 also indicates an Alexandrian synagogue. Alexandrian Judaism was decimated in the early second century C.E.

132. Commonalities in some views, despite different cultures, also suggest interaction (see, e.g., Bamberger, "Philo and Aggadāh").

133. On Alexandria's Jewish population, see Clarke, "Alexandria," 24–25; further comment on Acts 18:24–25.

134. E.g., Knowling, "Acts," 175.

135. Riesner, "Synagogues in Jerusalem," 189, 204–5; Conzelmann, *Acts*, 47. A synagogue of Tarsians (perhaps in Tarsus?) appears negatively in *y. Šeqal.* 2:5 (it was later reused by idolaters); Cilicia also had a bad reputation for violence (Plut. *Caes.* 2.1).

136. See Clarke, "Alexandrian Library"; and esp. idem, "Alexandrian Scholarship" (focusing esp. on philosophy and mathematics).

the educated Jewish elite there (Egyptian Jewish papyri in *Corpus papyrorum judaicarum* reveal a different disposition), some Alexandrian Jews later apparently agitated for Hellenistic citizenship in the city, suggesting that as a community they were probably better educated Hellenistically than many Jews, especially those elsewhere in Egypt.¹³⁷ Philo,¹³⁸ the *Letter of Aristeas*,¹³⁹ and other sources¹⁴⁰ also indicate that most of the Alexandrian Jewish educational establishment supported the Jerusalem temple. Some Alexandrian immigrants, presumably in the sphere of acquaintance of those mentioned here, probably became believers earlier (cf. Acts 2:10; Alexandrians would have constituted the majority of Egyptian Jews, especially those likely to settle in Jerusalem).

Cyrene in North Africa also had a large Jewish community (cf. 2 Macc 2:23; Mark 15:21; perhaps 1 Macc 15:23), as Luke himself knew (Luke 23:26; Acts 2:10; 11:20; 13:1).¹⁴¹ Although estimates of a hundred thousand Jews there are surely too high (especially given lower estimates for most cities' populations than was once common), that some scholars provide such estimates (higher than most estimates for Jerusalem's population) points to the size and prominence of the community there. (See further comment on Acts 11:20.)

The Roman province of Asia, mentioned here, also had a significant Jewish population (e.g., Acts 18:19),¹⁴² and its hostility here may prefigure some of Paul's struggles with Asian Jews later (19:9; 21:27–28). Diaspora Jews from Tarsus or elsewhere in Cilicia were also known abroad (Philo *Embassy* 281)¹⁴³ and sometimes settled among Diaspora Jews in Palestine (cf. one Isaak from Tarsus, elder of [apparently the synagogue] of the Cappadocians, *CIJ* 2:137, §931).¹⁴⁴

North African Jews—namely, Cyrenians and Alexandrians (especially given Alexandria's proximity)—may have dominated; but given the trajectory of Luke's narrative, his emphasis probably rests on the Cilicians and Asians. Saul, soon to be the lead character, is a Cilician (Acts 7:58; 9:11; 21:39) and will have a ministry in the larger region of Asia, including the province of Asia proper (19:10). Luke does not play down the importance of these sites: others minister to Cyrene and Alexandria,¹⁴⁵ and we know that Apollos from Alexandria also became a believer at some point (18:24). But Luke's focus will be on Paul.

IV. A "HELLENIST" SYNAGOGUE

Perhaps this synagogue or "assembling" functions like communities of Jews in the Diaspora that acted as semiautonomous communities of resident aliens.¹⁴⁶ Though

137. See discussion in Barclay, *Jews in Diaspora*, 63–71; briefly, see comment on Acts 18:24.

138. E.g., Philo *Embassy* 278, 312.

139. E.g., *Let. Aris.* 33, 40, 42, 84–104.

140. See Schniedewind, "Tendenz in Greek Text." Some allegorists wished to abandon literal kashrut and sacrifices, but Philo's retention of the (symbolic) customs seems more likely to have been mainstream (cf. discussion in Barclay, "Paul among Jews," 100–101).

141. See most fully Applebaum, *Jews and Greeks in Cyrene*, esp. 130–200. A synagogue in nearby Berenike of Cyrenaica was repaired in 55 C.E. (*SEG* 17.283, cited in Evans, *World*, 41).

142. See Stern, "Diaspora," 143–55, for all of Asia Minor.

143. On Cilician Jewry, see *CIJ* 2:39–48, §§782–95; Stern, "Diaspora," 147–48 (including Epiph. *Her.* 30.11.2 and inscriptions, in addition to Philo and Josephus); on Cilicia more generally, see, e.g., Bing, "Cilicia." Cf. *Jos. Ant.* 20.145, which is rendered more plausible by the supposition of some Cilician Jews. The location of Cilicia would be familiar to most readers in eastern Mediterranean cities (*Jdt* 1:7, 12; 2:21, 25; 1 Macc 11:14; 2 Macc 4:36; 4 Macc 4:2).

144. Cilicians had long had relations with Cappadocia; thus, when Cicero was governor of Cilicia in 51 B.C.E. (*Cic. Fam.* 13.67.1), he was assigned to keep Cappadocia on good terms with Rome (*Plut. Cic.* 36.1–2).

145. Both outside Luke's narrative; but many Cyrenian settlers in Jerusalem had become believers (Acts 2:10; 11:20; 13:1; cf. Luke 23:26) and presumably had taken the gospel back to their region. Cf. also Egypt in Acts 2:10.

146. On such communities, see, e.g., Harland, *Associations*, 102–3.

not viewed as resident aliens, these Diaspora Jews might form their own respected Hellenist minority community in Jerusalem, overseeing some of their own affairs. They probably lived primarily in their own area of the city, just as some other groups (such as Essenes and Sadducees) did.¹⁴⁷ They would seek intervention from civic authorities (6:12) only when they wished to carry matters further (cf. 18:12–13).

Possibly both Stephen and Paul grew up in this synagogue;¹⁴⁸ the text is relatively clear that Paul did (6:9; 7:58; 22:3), though it does not clarify until later from which of the geographic regions that are represented his family derives (Cilicia; 9:11).¹⁴⁹ Descent from freed slaves (implied by “the synagogue of freedpersons”) would explain Paul’s citizenship (16:37),¹⁵⁰ although it is not surprising that Luke, stressing Paul’s high status (22:28; see comment there), does not emphasize this point. If Luke were simply inventing Paul’s citizenship, would he not portray him not only as a freeborn person but also as not (contrary to what one might infer from this text) a descendant of freedpersons? (Jewish readers would also prefer Roman citizenship without slavery; if a female ancestor was a slave during her child’s conception, the paternity of the child¹⁵¹ and the purity of Jewish ancestry could well be regarded as uncertain.)¹⁵²

Although Stephen faced opponents from various parts of the Diaspora, Luke does not wish to impugn these areas. He reports Hellenist Christians from some of the same areas: Cyrenian converts included Lucius (Acts 13:1), perhaps Simon (Luke 23:26; cf. Mark 15:21),¹⁵³ and others (Acts 11:20); Paul came from Cilicia (9:11), and churches arise there (15:23, 41; cf. Gal 1:21); later, Apollos came from Alexandria (Acts 18:24). Paul’s ministry would lead to many converts from Asia, though there was much opposition there as well (cf. 21:27–29). We should also note that it was not the entire synagogue community that opposed Stephen but some (τινες) within this synagogue.¹⁵⁴ Unfortunately for Stephen, they seem to have been highly influential members.

Against the assumptions of some NT scholars, we should expect that foreign Jews who immigrated to Jerusalem would support the temple (as 6:13 indicates), despite common disparaging views about foreign Jews’ orthodoxy.¹⁵⁵ If anything, the Hellenists were more zealous for the traditions than were many other Jews¹⁵⁶ (as suggested by the former’s being the ones to persecute Stephen and Saul). Granted, many Diaspora Jews may have been less temple-centered than those who had greater access to the

147. On living in different parts of the city, see Chilton, *Rabbi Paul*, 34.

148. Stephen’s name is Greek, but noncitizens could also attend a synagogue founded by citizens.

149. Lake and Cadbury, *Commentary*, 68 (linking Paul with “both” Cilician and *libertini* synagogues, as if distinct).

150. It serves as a likely historical confirmation of Paul’s citizenship (Minnen, “Roman Citizen”).

151. For sexual use of slaves, see, e.g., Alciph. *Farm.* 24 (Gemellus to Salaconis), 3.27; Sen. E. *Controv.* 4.pref. 10; 6.3; Xen. Eph. *Anthia* 2.4; Bradley, *Slaves*, 116–18; Osiek, “Female Slaves,” 262–64; Osiek and MacDonald, *Place*, 103–5; Arlandson, *Women*, 99–102; Glancy, “Obstacles”; see further comment under “Sexual Abuse” in the excursus “Slaves and Slavery” at Acts 12:13.

152. For the importance of the purity of one’s Israelite lineage, see, e.g., Jos. *Ag. Ap.* 1.30; cf. *b. Pesah.* 62b; *y. Ter.* 7:1; Johnson, *Genealogies*, 88–95; for priestly lineage, 1 *Esd* 5:39–40; cf. *t. Hag.* 2:9; 7:1; *y. Ketub.* 1:9, §1.

153. On the likelihood of his conversion (explaining the preservation of his name), see France, *Matthew*, 395; Brown, *Death*, 913. A first-century burial cave in Jerusalem suggests an Alexander, son of Simon, with apparently Cyrenian origins (Powers, “Treasures”); but (*pace* some scholars) these were common names, and so identification is not certain.

154. Hertig, “Dynamics,” 76, compares the frequent conflict in immigrant communities often between an older generation and a more assimilated, less strict younger generation.

155. E.g., *t. Abod. Zar.* 4:6 (R. Simeon ben Eleazar associating them with idolatry for eating with Gentiles). By 300 B.C.E., some Gentiles spoke of Jews with “Greek souls” (Stern, *Authors*, 1:47–52); on the hellenization of Alexandrian Judaism, see *CPJ* 1:25–47.

156. See, e.g., the prologue to Sirach.

temple.¹⁵⁷ But that these Diaspora Jews had left their homelands to settle in Jerusalem shows, as Skarsaune points out, “that they were not average Jews.”¹⁵⁸

Given his role in 7:58 (and claim in 26:10), Saul may well have been among those debating with Stephen. Paul’s letters identify him as a Pharisee (Phil 3:5) and reveal his thorough training in Torah, which Luke also knows (Acts 22:3; 23:6; 26:5); it is thus not unlikely that he was a Torah teacher in Greek-speaking Jerusalem synagogues.¹⁵⁹ One might wonder how much teaching he was doing as “a young man” (7:58), but by 8:3 and 9:1–2 it is clear that Saul is prominent in the persecution of Nazarenes, even if still a young man (cf. Gal 1:14). Perhaps we would expect Luke to be more explicit if Saul was involved before Acts 7:58, but his role in 7:58 seems hard to explain if it was his first introduction. Thus it is at least plausible that Saul debated with Stephen and, perhaps in one of his few early setbacks, met his match there. Luke does not address this, however; he avoids most unedifying details about Saul’s role beyond 7:58 and general summaries.

V. STEPHEN’S INSPIRED SUCCESS IN DEBATE (6:10)

Although it appears that members of the synagogue initiated the dispute with Stephen (6:9), he obtained the upper hand not only by signs but also intellectually (6:10). The key to his success was wisdom and the Spirit.

That Stephen speaks with “wisdom and the Spirit”¹⁶⁰ confirms these traits that characterized him before his commissioning (6:3; see comment there). “Wisdom” could include not only administrative ability (6:3) but speaking and rhetorical ability (cf. 1 Cor 1:20; 2:1, 4–5, 13; 12:8).¹⁶¹ Luke provides a sample of such wisdom in Stephen’s speech in chapter 7. Judaism recognized God as the source of wisdom.¹⁶² Luke does not use a hendiadys (the distinct articles prevent us reading “wisdom of the Spirit”), but clearly he does associate wisdom and the Spirit (see esp. Acts 6:3; cf. 1 Cor 2:4, 13; 12:8; Eph 1:17).¹⁶³ Scripture already associated wisdom and knowledge with God’s Spirit;¹⁶⁴ this association with wisdom and knowledge is also emphasized in Qumran texts.¹⁶⁵

157. So Shutt, “Aristeas,” 10.

158. Skarsaune, *Shadow*, 153–54 (quotation, 154); he compares “English-speaking Brooklyn Jews, settling in Jerusalem’s ultra-orthodox quarters” in modern times (154n13).

159. So Philip, *Pneumatology*, 151.

160. The concepts are related (see comment on Acts 6:3), though this is not technically a hendiadys here (the second noun also being articular).

161. Cf. Lucian *Hipp.* 1; Men. *Rhet.* 1.3, 364.14–16 (φρονήσεως); Pogoloff, *Logos*, 110–11; but cf. Anderson, *Rhetorical Theory*, 273. The term also applies to other forms of skill (Lucian *Phal.* 1.12; Philost. *Hrk.* 1.3; 4.10; 25.13). In 1 Cor 1–2, philosophy may also be in view, but in the context speech is at least partly in view (1 Cor 1:17, 20; 2:1–5).

162. E.g., 4Q286 1 II, 6–7; *L.A.B.* 20:3. Bible teachers understood it as mediated through the Torah (Bonsirven, *Judaism*, 84); for some, wisdom had to come by divine revelation (1QS II, 3; 1QpHab XI, 1; Cook, introduction to “Book of Secrets,” in *DSSNT* 175, although, of course, this could also apply to understanding of the Torah). For Gentiles, divine wisdom also could include recognizing patterns in nature (Xen. *Mem.* 4.3.12; Dio Chrys. *Or.* 12.36–37; Philost. *Hrk.* 9.4), which would presumably apply also to patterns in history (as in Rom 11:33), relevant to Stephen’s understanding in Acts 7.

163. Cf., e.g., 1 *En.* 49:3 (modeled on Isa 11:2); 61:7, 11; Sir 39:6; *Pss. Sol.* 18:8; Wis 1:6; 7:7, 22, 25; 9:17 (on the usage in Wisdom, cf. also Levison, “Rhetoric,” 31–34); 4 *Ezra* 5:22; 14:40; *Jos. Asen.* 19:11 MSS; Philo *Giants* 23, 27, 47; *Spec. Laws* 1.8.

164. Exod 28:3; 31:3; 35:31 (changed in *Tg. Neof.* 1 on Exod 35:31); Deut 34:9; Isa 11:2; cf. Dan 5:11–12, 14 (cf. *Jos. Ant.* 10.239); perhaps Job 32:8.

165. See 1QS IV, 3, 26; 1QSb V, 25 (cf. Isa 11:2); VI, 36; 1QH^a VI, 24–27; 4Q161 8–10 12 (cf. Isa 11:2); 4Q213a 1 I, 14 (reconstructed); 4Q257 V, 1–3; 4Q365 10 4 (cf. Exod 31:3); 4Q427 2 + 3 II, 13; 4Q444 1 1, 3; perhaps 4Q510 1 6; 4Q511 18 II, 6. See also Menzies, *Development*, 84–87; Flusser, *Judaism*, 54–55; Barth, *Ephesians*, 1:148.

No one had been able to answer Jesus either (e.g., Luke 20:8, 26; esp. 20:39–40). Jesus had promised the help of the Spirit (12:12) and that adversaries would not be able to answer divinely given wisdom (21:15, using ἀνθίστημι, as here),¹⁶⁶ both in defense settings (12:11–12; 21:12–15). It is noteworthy that at Stephen's trial his accusers oppose him but never answer him (Acts 7:54–58); he has the narrative's last words (7:59–60). But although the apostles survived (5:40), Jesus warned that some of those accused would be put to death, despite the gift of divine wisdom (Luke 21:15–16); Stephen will become the first example of this warning. Jesus also refuted his opponents in public (Luke 20:7–8, 19, 26, 39–40) and was condemned without refutation at his hearing (Luke 22:67–71).

Rhetoricians knew how to turn opponents' arguments against them, implying sinister motives that violated the audience's values.¹⁶⁷ That his opponents could not refute Stephen may have therefore surprised them; in a synagogue serving members from the background discussed above (Acts 6:9), many must have had some skill in rhetoric. Invective and denunciation characterized much of ancient rhetoric.¹⁶⁸ Some scholars have argued that the rise of *delatores* as accusers¹⁶⁹ ushered in a new era of harshness in Roman oratory, but Roman oratory had long been that violent.¹⁷⁰ In the second century, Lucian satirizes the base level of some popular rhetoric: "Effrontery and shamelessness, a prompt lie, with an oath to confirm it always on the edge of your lips, jealousy and hatred of everyone, abuse and plausible slanders—all this will make you famous and distinguished in an instant."¹⁷¹

Jewish tradition (based on Deut 13:1–5) obligated all Jews to denounce any Jewish prophet leading others away from God;¹⁷² to love God more than others made this an obligation, even for those for whom it felt most distasteful. If this group of opponents within the synagogue believed that Stephen filled the role of a prophet leading astray, his persuasiveness made him all the more dangerous. Against the best in Jewish ethics (but according well with common human nature), some may have judged that the end justified the means (witnesses biased enough for Luke to present them as false in Acts 6:11–13).¹⁷³

c. False Witnesses (6:11, 13)

The appearance of false witnesses (6:11, 13) parallels Jesus's trial in the passion tradition (Mark 14:55–59); does Luke forget that he did not record this?¹⁷⁴ Stephen's trial will parallel that of Jesus in other respects as well (see esp. comment on Acts 7:55–56, 59–60). (Although Luke's passion narrative omits Mark's blasphemy charge, he does report that some hearers accused Jesus of blasphemy earlier [Luke 5:21].)

166. The term applies to Elymas's resistance (Acts 13:8); it could also apply to others resisting God (e.g., Wis 11:21; 12:12; Rom 9:19; 2 Tim 3:8; 4:15; 1 Clem. 27.5) and his servants (e.g., Wis 2:18).

167. E.g., *Rhet. Alex.* 36, 1444a.16–34.

168. E.g., Lucian *Critic* passim; see Marshall, *Enmity*, 46–69.

169. On which cf., e.g., Tac. *Agr.* 2; *Hist.* 1.2; Suet. *Tit.* 8.5; Hdn. 7.3.2; 7.6.4; O'Neal, "Delation."

170. Rutledge, "Delatores."

171. Lucian *Prof. P.S.* 22 (Harmon in LCL). In *Phal.* 1, ¶14, Lucian derides the use of false testimony in his mock apology for a tyrant.

172. Cf. also the traditions cited in Stauffer, *Jesus and Story*, 206, though these are all from later rabbis (e.g., *m. Sanh.* 7:10).

173. Stauffer, *Jesus and Story*, 206, argues that Jewish tradition allowed secret witnesses to wait for "mislead-ers" (and them only) to betray themselves (citing, e.g., *m. Sanh.* 7:10; *b. Sanh.* 67a), but such secret witnesses are more like "undercover agents" than false witnesses.

174. Many argue that he omitted them deliberately because he will use them here (e.g., Lake and Cadbury, *Commentary*, 69; Simon, *Stephen and Hellenists*, 26; Dunn, *Acts*, 88), but Luke's more common practice is to include a feature in both volumes.

The false witnesses of Acts 6:13 contrast with the men of “good reputation” (μαρτυρουμένους) in 6:3, a group that included Stephen; they also contrast with God’s true witnesses (1:8; 2:32; 3:15; 5:32; 10:39, 41; 13:31). The term ὑποβάλλω appears only here in the NT;¹⁷⁵ the term can mean “instigate,” indicating that some of Stephen’s opponents prompted false witnesses.¹⁷⁶ The exact language for “seizing” him together (6:12) is exclusively Lukan in the NT or Apostolic Fathers (Luke 8:29; Acts 27:15), used for a mob action in 19:29.¹⁷⁷

I. FALSE CHARGES

The masses supported the apostles (Acts 5:13, 26); why do they not defend Stephen? Peter’s sermons challenged the authorities but not Israel or its heritage; the charge that Stephen opposed the temple, however, could be enough to turn “the people” as well as the authorities against him.¹⁷⁸

Frivolous lawsuits were common in Greco-Roman culture; sometimes people were prosecuted because they had incurred the plaintiff’s personal enmity on an unrelated matter¹⁷⁹ or simply because the plaintiff needed a scapegoat to divert attention from his own guilt.¹⁸⁰ Sometimes, without actually proving the person guilty,¹⁸¹ a prosecutor would stir the audience’s anger concerning the terrible charges against a person, forcing the defense speaker to remind the hearers that a person was on trial, not the vice (Cic. *Cael.* 12.29). But false witnesses could advance the prosecution’s case by “proving” the defendant guilty of the terrible offenses.¹⁸²

II. INVESTIGATING AND PUNISHING FALSE WITNESSES

Cross-examination often exposed false witnesses, whom everyone viewed with disdain.¹⁸³ Jewish tradition included separate examination of witnesses to test them for falsehood.¹⁸⁴ If they contradicted each other even in matters of detail, their testimony was thrown out (e.g., *Sus* 51–52; *Sipre Deut.* 93.2.1).¹⁸⁵ Cross-examiners had to be very discriminating with witnesses (pre-Christian tradition in *m. ’Ab.* 1:9) and careful not to lead the witnesses into error (if this is the correct understanding of the Mishnah passage).

Self-contradiction raised suspicions concerning witnesses not only in Jewish courts (e.g., *Sipre Deut.* 189.1.3) but also in Greek and Roman courts. If a witness

175. Its only use in the LXX, 1 Esd 2:14 (2:18 ET), is not relevant (nor are its four uses in Josephus [but the adjective cognate in *Ant.* 7.186; *War* 5.439 is relevant] or most of its forty-eight uses in Philo); but cf. Dan 3:9 Theod.

176. Lake and Cadbury, *Commentary*, 68–69 (citing Appian *Bell. civ.* 1.74; hostile Smyranean Jewish deceit in *Mart. Pol.* 17.2; BDAG adds other sources, including Dan 3:9 Theod.; *Test. Sim.* 3:3).

177. Cf. the cognate form in 23:10 (without the prefix), for a mob action by the Sanhedrin. Schille, *Apostelgeschichte*, 176, notes the prevalence of the term in martyr literature, citing 2 Macc 3:27; 4:41; 4 Macc 5:4; but of these instances, only the last use is parallel in sense to the idea here. As language of human violence (resembling Acts 19:29) it appears also in *Jos. War* 7.415; Philo *Flacc.* 65, 95.

178. Dunn, *Acts*, 85–87.

179. E.g., *Ps.-Lysias Or.* 9.10, §115; *Vit. Aes.* 127.

180. Cic. *Verr.* 2.4.45.101; cf. Nero’s charge against the Christians in *Tac. Ann.* 15.44.

181. See also Hall, “Delivery,” 232, citing for the prosecution Cic. *De or.* 2.185–90, and giving as examples *Verr.* 2.1.40–54, 64–70; 2.4.26–54; 2.5.160–63; and more rarely for the defense, *Rosc. am.* 145–46; *Clu.* 199; cf. *Quint. Inst.* 6.1.9–10. Cf. the stirring of the people in Acts 6:12.

182. Witnesses could persuade a court to convict (e.g., *Dion. Hal. Ant. rom.* 8.78.3).

183. For hostility toward accused false witnesses and perjurers, see, e.g., *Isaeus Dicaeog.* 19; *Philoct.* 10; *Cic. Mur.* 6.13; *Sall. Catil.* 16.2; *Prop. Eleg.* 3.6.20; 1 *Tim* 1:10. Perjury would offend the deity whose “name was taken in vain” (Ferguson, *Backgrounds*, 117).

184. *Sus* 48–62; *m. ’Ab.* 1:9; *Sanh.* 3:6; 5:1–4; *t. Sanh.* 6:3, 6; *Sipre Deut.* 149.1.1–2; 189.1.3.

185. Stauffer, *Jesus and Story*, 208 (citing also *m. Sanh.* 5:2; *Mak.* 1:3–8; *t. Sanh.* 5:5; 6:3); Trites, *Witness*, 186 (citing *Sus* 54, 58, 61; *t. Sanh.* 5:5; *b. Pesah.* 12b). Gentiles also cross-examined people (the accused in *Tac. Ann.* 15.55).

changed his story, this implied his falsehood (Cic. *Att.* 2.24). Thus, when one witness who had claimed never to have spoken with a person afterward mentioned a lengthy conversation with him, he was declared a liar and an undependable witness (Cic. *Vat.* 1.3). If a story did not fit the facts (e.g., the informer claimed to see the defendant by moonlight, yet there was no moon that night), the witness was false (Plut. *Alc.* 20.5).¹⁸⁶

No one officially tolerated false witnesses. Among earlier Athenians, a case influenced by a false witness might be thrown out of court and required to start over (Isaeus *Hagnias* 46). Under Jewish law, false witnesses were to be punished with the judgment they had sought for their neighbor;¹⁸⁷ Roman law included the same provision, meant to reduce the abuse of *delatio* (the system by which prosecution depended on accusers).¹⁸⁸ Thus, in this capital case, Stephen's accusers would assume the death sentence themselves if shown to be false. (The Pharisees, who severely restricted genuine capital offenses in general, apparently also restricted the capital nature of this crime.)¹⁸⁹ Egyptian law also punished perjury with death.¹⁹⁰ Some other places punished false accusers with so much shame that they fled their city (Diod. Sic. 12.12.2).¹⁹¹

III. DELIBERATE JUDICIAL DECEPTION

We should not assume, however, that such constraints, favored by many and practiced when feasible, must have shaped Stephen's trial. If the council behind Luke's story is what we usually call the Sanhedrin (συνέδριον simply means "council"),¹⁹² the young movement already had some enemies there (Acts 4:15; 5:21; Luke 22:66). Later rabbis idealized the Sanhedrin,¹⁹³ including the judicial experience for judges (*t. Šeqal.* 3:27), but first-century sources are less sanguine, at least about the aristocratic priests who usually dominated the assembly (see comment on Acts 4:1).¹⁹⁴

186. The principle of investigating claims extended beyond legal settings (e.g., Phaedrus 3.10.5–6).

187. E.g., Deut 18:18–19; 11QT LXI, 7–11; Jos. *Ant.* 4.219; *m. Mak.* 1:7; *t. Sanh.* 6:6; *Sipre Deut.* 190.5.1. This is also true in ancient Mesopotamian law (Hamm. 1–4, 11, esp. 1, 3, 11).

188. Ferguson, *Backgrounds*, 51; cf. Quint. *Decl.* 313 intro; 324 intro; 331 intro; 331.2, 5. On other penalties associated with false witness, see Robinson, *Criminal Law*, 37. Cf. also the distaste for perjury in Sall. *Catil.* 16.2; *Philip.* 15; *Invect. M. Tull.* 2; Cic. *Invect. Sall.* 5.14; Prop. *Eleg.* 3.6.20.

189. For some limitations, see, e.g., *m. Mak.* 1:4. But Sadducees were apparently more lenient in this situation, requiring that the false witness not merely intended, but even succeeded, in having the defendant executed, whereas the Pharisees required only that the sentence was passed (1:6; *Sipre Deut.* 190.5.1; cf. *t. Sanh.* 6:6).

190. At least in Hellenistic idealizations of it; Diod. Sic. 1.77.2.

191. A false witness becoming prisoner of the person he slandered (Sen. E. *Controv.* 5.4) is probably fictitious, but it recalls the principle of just retribution. The Qur'an harshly punishes false witnesses (Qur'an 24.4).

192. Even according to later rabbis, twenty-three judges were sufficient for even a capital hearing (*m. Sanh.* 1:6; *t. Sanh.* 3:1 [though this instance is for an ox]; cf. *b. Sanh.* 9a; 36b). Later tradition required the Sanhedrin's participation in capital cases concerning apostasy or false prophets (Stauffer, *Jesus and Story*, 207–8, relevantly citing *m. Sanh.* 1:5; 11:4–5), but since earlier sources reveal that it lacked capital jurisdiction (see above), it is doubtful that the hearing here began as an official "capital" case.

193. This is commonly acknowledged today as one area where the Mishnah contradicts earlier sources. Although I prefer to take Tannaitic traditions as reliable where feasible (see Keener, *John*, 185–94), conflict with earlier sources renders that procedure more problematic here.

194. I have argued elsewhere that much of the Sanhedrin, loaded with the descendants of Herod's political appointees, could have been as corrupt as the NT and early Jewish sources present (and certainly as biased toward the elite), without, for that reason, casting Jewish piety as a whole in a bad light (Keener, *Matthew*, 613–16; esp. 644–46). Politically powerful members of the Sanhedrin differed from most of the Jewish people in many respects. I have observed politically motivated legal injustice in some cultures today, and in ecclesiastical courts and denominational hierarchies as well, and doubt that human nature has changed much, regardless of its ethnic or creedal label. Today there are both noble and ignoble lawyers, both noble and ignoble clients, and both noble and ignoble causes; justice is not always served, including in many Western courtrooms with all their safeguards.

Pharisees and their rabbinic successors seem to have been strict in their requirements for testimony,¹⁹⁵ but such legal conservatism is not relevant here; we have no indication that the Pharisees or others of like convictions are in view. Luke’s “elders,” “scribes,” and “Sanhedrin” (and possibly “people”; 6:12) echo Jesus’s passion in Luke 22:66.

If Stephen’s Hellenist accusers were at all like the forensic rhetoricians who show up throughout our ancient sources, the criterion that would determine which witnesses to bring and which witnesses to challenge was simply what would help them win their case (see comment on Acts 24:5–8a). For example, those who wanted to bring down a popular leader in classical Athens formed a coalition to charge him (Plut. *Cim.* 14.2). In another trial, informers were proved false, but the case proceeded toward its predetermined outcome (Plut. *Alc.* 20.5).

More to the point, rhetoric taught people not only how to turn arguments but how to deceive legally.¹⁹⁶ One Hellenistic rhetorical handbook, indeed, provides training for what we would recognize as false witnesses. It explains how to give false evidence without being liable to charges as a false witness if exposed. For example, one can refuse to take the oath because one does not wish to expose the crime (thereby implying the person’s guilt without perjuring oneself by stating it; *Rhet. Alex.* 15, 1432a.4–9). By contrast, if one’s opponents tried the same technique, an able rhetorician would demand “written depositions” (1432a.9–11 [LCL, 347]).¹⁹⁷ One could swear truly about a point, then attach a false statement to it that will seem like an oath yet remain immune to prosecution (1432a.4–5). It is hardly surprising that a notorious “false accuser” (*calumnia notatus*) became a teacher of oratory (Suet. *Rhet.* 4). By succumbing to bribery or personal vendettas, even prosecutors could be corrupted (Pliny *Ep.* 3.9.29–30).¹⁹⁸

Rhetoricians knew how to discredit opposing witnesses when this would be helpful to their case (*Rhet. Alex.* 15, 1431b.37–1432a.3). Likewise, if a witness’s oath favors one’s case, one argues that the swearer would fear to perjure himself before the gods; if it opposes one’s case, one argues that the swearer is so notoriously wicked that he is not moved by fear of the gods (17, 1432a.33–1432b.10).¹⁹⁹ When attacking the credibility of witnesses, one could “either attack them on the grounds that they give evidence out of partiality or enmity, or because of personal relationships, or for private gain, or because they are untrustworthy because of their age.”²⁰⁰ Apparently, false witnesses sometimes conspired together, because an old Jewish legal tradition prohibited executing one false witness unless the other was also found false (*t. Sanh.*

195. E.g., *t. Sanh.* 8:3; *b. Sanh.* 37b. On the need for at least two witnesses, see Deut 17:6; 19:15; CD IX, 17–23; Jos. *Ant.* 4.219; *Sipre Deut.* 148.1.1; 188.2.1–2; 188.3.1–2; Daube, “Witnesses”; Vliet, *No Single Testimony*; for potential abuses even here, see *y. Sanh.* 6:3, §3, but the rabbis were stricter in demanding evidence in some respects than, e.g., the *Damascus Document* had (CD IX, 17–20; see Neusner, “Testimony”; despite Rabinovitch, “Parallels”). Rothstein, “Testimony,” argues that the *Damascus Document* required testimony (and punishment!) on the very day of the crime. If the court lacked adequate evidence to execute a sentence, God would do so (e.g., *Tg. Ps.-J.* on Gen 9:6).

196. Thus Lysias appears as if he always speaks the truth, but this appearance simply reveals the excellence of his imitation of truth (Dion. Hal. *Isaeus* 16). For turning any claims to one’s advantage, see, e.g., *Rhet. Her.* 3.3.6; for arguing either side of a case, e.g., Quint. *Decl.* 331.14; Hermog. *Inv.* 2.2.110–12; 3.5.145, 149 (skeptics, denying accessible truth, also followed this practice; cf. Hippol. *Ref.* 1.20).

197. Ethics were violated, not simply unknown; the opponents sought to “steal” (κλέπτειν) their way by lies (*Rhet. Alex.* 15, 1432a.3–4, 8–9). Orators themselves would not swear about objective acts they had not witnessed but added casual oaths reinforcing subjective *ēthos* (Hermog. *Method* 20.435).

198. For further on bribing judges or jurors, see Robinson, *Criminal Law*, 37; on political bribery, see comment on Acts 24:26. Some legal traditions made convicting some categories of criminals financially profitable, though the consequences of failure could prove lethal (Quint. *Decl.* 324 intro, perhaps hypothetical).

199. An oath is defined as “an unproved statement supported by an appeal to the gods” (*Rhet. Alex.* 17, 1432a.1–2).

200. Hermog. *Issues* 45.10–20 (Heath, 36–37).

6:6).²⁰¹ It was not always possible to distinguish true witnesses from false, and ancient judges, like modern ones, sometimes came to varied conclusions (*m. Roš Haš. 2:8*).

IV. LUKE'S PORTRAYAL

How would this case of false witnesses be viewed by Luke's audience? Would this fate cause readers to think that God had forsaken Stephen? The descriptions of both Stephen (Acts 6:3, 8, 10, 15) and the witnesses (6:11, 13) would prevent that. Although the system probably worked better in Roman Corinth and Philippi than in some other locations, everyone was well aware that courts sometimes corrupted justice; Christians in some locations where Luke expected an audience had probably experienced this (16:20–23; 17:5–9), and others knew that Paul warned against dependence on the courts to achieve justice (1 Cor 6:1–11).²⁰² Everyone would view as honorable Socrates, who, though falsely charged, felt no guilt, in contrast to the false witnesses against him (*Xen. Apol. 24*). Historians portrayed as vicious those who hired false witnesses.²⁰³ Luke's ideal audience would certainly sympathize with Stephen, a true witness (cf. Acts 22:20) who contrasts with the false ones here (cf. 7:58).²⁰⁴

Most relevant is that hiring false witnesses to get someone stoned (6:13; 7:58–59) recalls the behavior of wicked rebels against God such as Ahab and Jezebel (1 Kgs 21:8–15),²⁰⁵ except that Stephen is not merely an innocent victim figure like Naboth but a righteous, signs-working, divinely attested prophet figure like Elijah (1 Kgs 21:17–24); for stoning, cf. Moses in Exod 17:4.²⁰⁶ The parallel also leads the informed reader to expect judgment on the false witnesses (1 Kgs 21:20–24); the conversion of one of their allies (Acts 7:58; 9:5–8) partially subverts this expectation, at least for first-time readers still unaware of "Saul's" identity.

Witnesses were to be the first to cast stones at the person convicted of a capital charge (Deut 17:7). Conversely, false witnesses were subject to the sentence they sought for the accused (19:16–19); such measures were intended as deterrents (19:20). In this case, however, the false witnesses explicitly joined in the stoning (Acts 7:58). By various narrative elements, however (the witnesses stripping themselves; Stephen confessing their sin rather than his own; and possibly Jesus standing at God's right hand), Luke implies that God would execute their sentence (see comment on Acts 7:59–60).

d. The Charges (6:11–14)

Just as rhetoricians who wanted to be clear stated their theses early in their speeches, historians who wanted to make their forensic narratives lucid would include the

201. Given Pharisaic reticence to approve of executions, this may, of course, simply provide a further limitation. But the conspiracy concern appears elsewhere (e.g., *Sipre Deut.* 189.1.3).

202. See briefly Keener, *Corinthians*, 52–53; for bias against the poor, cf. Cic. *Quinct.* 1.1–2; *Mil.* 7.17; Mitchell, "Rich"; Winter, "Litigation"; for corruption, e.g., Cic. *Quint. frat.* 3.1.5.15; 3.4.1 (though Roman courts were interested in truth and not simply oratory; Riggsby, "Verdicts"; Men. *Rhet.* 2.3, 379.20–24). Paul's approach in some respects resembles the legal nonresistance of some philosophers; see Mus. *Ruf.* 10, p. 76.16–17; p. 78.7–9, 22–26; Epict. *Diatr.* 2.2.5; 3.3.12; Philost. *Vit. Apoll.* 8.22; Iambli. *V.P.* 27.124, 126; cf. Max. Tyre 12; mocked in Lucian *Eunuch* 1–3; *Icar.* 16.

203. E.g., Quint. *Curt.* 10.1.27, 36.

204. On Stephen as "witness" (in view of Lukan usage), see Malipurathu, "Mission."

205. Boisnard and Lamouille, *Actes*, 2:26, 54; Brodie, "Stoning of Naboth"; Hill, *Hellenists*, 65–66. The only clear parallels need not, however, suggest Lukan fabrication (as Brodie would argue); if one was stoned on false charges (as early Christians would insist that Stephen was), this was one of the most relevant OT accounts through which to view it. Despite echoes, the stories are quite different, with Naboth also being a minor character in the Elijah story rather than a major character like Stephen (Marshall, "Acts," 556).

206. On Stephen's prophetic characterization, see Stronstad, *Prophethood*, 86–90.

charges early in their presentation of the trial. To understand Stephen's speech in Acts 7, we must first understand the charges to which his speech responds.²⁰⁷

The charges also resonate, by parallel or contrast, with other elements of Luke's narrative. Stephen's enemies stirred up the people (6:12), but ironically Christ's agents are accused of this offense (24:5; cf. 17:6; Jesus in Luke 23:2). The charge of undermining Moses's traditions and customs (6:14) is later a slander against Paul in the Jerusalem church itself (21:21).

I. LISTING THE CHARGES

By providing three versions of the charges against Stephen (which, concretely, come down to rejecting the law and the temple; 6:11, 13–14), Luke signals his audience what issues to listen for in Stephen's speech. (Answering charges was standard practice, though the answer is often more explicit than in Acts 7 [e.g., Isoc. *Antid.* 31].)²⁰⁸ The charges appear thus:

6:11	Against God	Against Moses
6:13	Against this holy place (the temple)	Against the law
6:14	Destroy this place	Destroy the customs

Three times Stephen is charged with opposing Moses, the law, or the "customs"; twice he is charged with opposing the temple; once he is charged with opposing God, perhaps a general catchall charge covering the other charges.²⁰⁹ E. P. Sanders accepts Luke's portrait on this point as plausible: "We can accept without argument the reason given for Stephen's death: he spoke against the temple, and consequently against the law, which establishes it."²¹⁰

The Greek term βλάσφημος (Acts 6:11) applies to any kind of defaming and was not limited to narrower, later Mishnaic definitions of religious blasphemy.²¹¹ Ironically, bearing false witness (hence violating divine oaths) did in fact constitute desecration of the divine name according to most ancient thought. "Blasphemy" against Moses sounds particularly strange under narrower definitions, but the use here fits first-century Greek usage,²¹² even specifically against Moses.²¹³

Both the temple and the law were central to first-century Judaism. It is difficult to overstate the centrality of Torah for early Judaism.²¹⁴ Each nation was defined in

207. With, e.g., Kilgallen, *Speech*, 35.

208. The issues do surface throughout the speech, *pace* Richard, *Composition*, 315–16 (who compares Jesus answering questions but not accusations, n. 174).

209. Because of the parallels with the other charges, Combrink, *Analysis*, 7, suggests that the accusers use "God" for the temple.

210. Sanders, *Jesus and Judaism*, 284 (one of the rare cases of persecution that he grants without argument).

211. See *m. Sanh.* 7:5; Keener, *Matthew*, 365–66, 651. Profaning the name in any way, however, was offensive (e.g., *y. Ta'an.* 3:10, §1); offensive acts could be popularly viewed as blasphemous even without a statute (Bock, *Blasphemy*, 111; *idem*, *Acts*, 271). For blasphemy in Judaism, see, particularly thoroughly, Bock, *Blasphemy*, 30–112; on blasphemy in the Pentateuch, see Rooker, "Blasphemy" (and sources he cites).

212. The Greek verb covers any "abusive language" whether or not the charge is religious (with BDAG; Lake and Cadbury, *Commentary*, 69; see Luke 22:65; 23:39). One could also blaspheme (though the term is different) by threatening the temple (1 Macc 7:35, 38).

213. *Jos. War* 2.145 (Klausner, *Jesus of Nazareth*, 208; Dunn, *Acts*, 87; Le Cornu, *Acts*, 333); *Ag. Ap.* 1.279 (the Egyptians against Moses); and esp. *Ant.* 4.307 (where the Israelites revile and seek to stone Moses, as Stephen's accusers will do to him in Acts 7:58). Among later rabbis, even dishonoring sages could merit exclusion from the future world (*m. Sanh.* 10:1; Le Cornu, *Acts*, 333); some sages, indeed, averred that teaching law even in the presence of one's teacher merited death by God (*Sipra Sh. M.d.* 99.5.6; *b. Erub.* 63a; *Tem.* 16a; *Lev. Rab.* 20:6–7).

214. Cf., e.g., Moore, *Judaism*, 1:235–50; Schechter, *Aspects*, 116–69; Grossfeld, "Torah." For the law in the prophets, see discussion in Halton, "Law" (esp. 493–94).

part by its own laws, and Diaspora Jews were often granted the legal right to organize themselves according to their ancestral laws (e.g., *Jos. Ant.* 14.216, 223, 227, 263; 16.172; 19.310–11). One Diaspora Jew, for example, could argue that Jews had not changed a single word since Moses and would die ten thousand deaths rather than violate the law (*Philo Hypoth.* 6.9).²¹⁵

Jewish people studied Torah not only to learn how to live but also as an act of devotion toward God;²¹⁶ its prescriptions were no more viewed as a burden than our modern traffic codes are for us.²¹⁷ Although Torah could be said to consist of commandments,²¹⁸ its sense is broader than code or custom, denoting instruction and revelation.²¹⁹

Jewish people scrupulously taught Torah to their children²²⁰ and were thus regarded among Gentiles as a particularly educated people.²²¹ The relatively popular Pharisees and their successors were particularly known for their study of the law.²²² Tannaim emphasized lifelong study of Torah;²²³ a Torah scroll could be said to be “beyond price.”²²⁴ Some declared that study of Torah was the Bible’s point in saying “serve the Lord with all one’s heart and soul”;²²⁵ other Tannaitic texts attribute the exile to neglect of Torah²²⁶ or declare that it is better never to have been born than to be unable to recite words of Torah,²²⁷ or that one who does not study is worthy of death;²²⁸ or that Torah study is a greater role than priesthood or kingship.²²⁹ Amoraim tend to be even more graphic: God himself keeps Torah;²³⁰ the entire world represents less than a thousandth of Torah.²³¹ Amoraim elaborated the Tannaitic tradition that the world is sustained by Torah: the world would not continue without it.²³² And whereas the Holy One may be lenient in judging idolatry, sexual immorality, murder, or even apostasy, he would not be lenient in neglect of Torah.²³³

215. Cf. later rabbis on the sacredness of a single *yod* (*b. Sanh.* 107ab; *y. Sanh.* 2:6, §2; *Gen. Rab.* 47:1; *Lev. Rab.* 19:2; *Num. Rab.* 18:21; *Song Rab.* 5:11, §§3–4; cf. *Luke* 16:17; *Matt* 5:18; *Pesiq. Rab Kah.* Sup. 1:8; *Exod. Rab.* 6:1).

216. See, e.g., Safrai, “Education,” 945. I am borrowing here from Keener, *John*, 355, 357–59 passim.

217. *T. Ber.* 6:24–25; see Sanders, *Jesus and Judaism*, 191; cf. Koester, *Introduction*, 1:242. The law’s purpose had been gracious from the start (e.g., *Deut* 6:20–25).

218. E.g., *Exod. Rab.* 33:7 (Amoraic).

219. Sandmel, *Genius of Paul*, 47. Translations regularly speak of the “revelation” at Sinai (e.g., in *Sipra Sav pq.* 18.97.1.4; *Sipra Taz. par.* 1.121.1.6; *b. Hag.* 6a, in purported discussion of the schools of Shammai and Hillel; *Gen. Rab.* 34:9; *Exod. Rab.* 28:5; *Num. Rab.* 7:1; *Deut. Rab.* 2:31; 7:8); see Ross, “Revelation,” 119.

220. Cf. Lichtenberger, “Lebenskraft.”

221. See, e.g., Stern, *Authors*, 8–11.

222. See Sanders, *Jesus to Mishnah*, 236.

223. *’Abot R. Nat.* 3 A (R. Ishmael and R. Akiba).

224. *T. B. Meṣi’a* 3:24 (Neusner, 4:92), R. Judah. On its worth, see also, e.g., *m. Qidd.* 4:14; *Gen. Rab.* 16:4 (using *Ps* 19:1); such comparisons with wealth derive especially from the wisdom tradition in Proverbs.

225. *Sipre Deut.* 41.6.1.

226. *’Abot R. Nat.* 5, §18 B.

227. *T. Hag.* 1:2.

228. Hillel in *m. ’Ab.* 1:13.

229. *B. ’Ab.* 6:5, bar.

230. *Y. Roš Haš.* 1:3, §24 (R. Eleazar; 57b); *b. Ber.* 7a; *Pesiq. Rab.* 14:6. Harvey, “Torah,” 1239, cites *b. ’Abod. Zar.* 3b to show that God studies it daily, to which we may add *Tg. Neof.* 1 on *Deut.* 32:4; cf. Marmorstein, *Anthropomorphism*, 66–68.

231. *B. ’Erub.* 21a and *y. Pe’ah* 1:1, 15d, cited in Harvey, “Torah,” 1239.

232. See *m. ’Ab.* 1:2; *b. Pesah.* 68b; *Ned.* 32a, cited in Harvey, “Torah,” 1239.

233. *Pesiq. Rab Kah.* 15:5; *Lam. Rab.* proem 2; cf. *y. Hag.* 1:7, §3. To those familiar with rabbinic literature, the language is obviously hyperbolic here, meant to underline the point; further, one must obey as well as study Torah (e.g., *b. ’Abod. Zar.* 17b). Many may have agreed literally, however, with the Tannaitic tradition that a person would first give account in the judgment for Torah study (*b. Sanh.* 7a). The importance of Torah study appears in many other Amoraic texts (e.g., *b. Menah.* 110a; *Roš Haš.* 4a; *Šabb.* 83b; *Exod. Rab.* 41:7; see further references in Patte, *Hermeneutic*, 25–26).

But Torah's importance was hardly limited to the Pharisees and later rabbis, although most people did not have the time for the academic pursuits in which rabbis reveled. The Qumran sectarians, apparently practicing virtual monasticism so as to devote themselves fully to Torah study, emphasized devotion to Torah more heavily, it seems, than did their other contemporaries.²³⁴ The law's centrality appears in Greek-speaking Jewish texts as well as documents in Hebrew or Aramaic: for instance, the law was eternal (Bar 4:1) and constituted God's holy words (*Let. Aris.* 177).²³⁵

Josephus claims that the law was central to the life of all Palestinian Jews (*Ag. Ap.* 1.60), and this undoubtedly reflects accurately the norm (even if he glosses over exceptions). He further claims that Jewish observance of the law everywhere (2.282) causes the law to be in all the world just as God himself is everywhere (2.284). Further, because the limited legal autonomy that was granted Jewish communities in the Diaspora permitted them to judge members of their communities on the basis of Jewish law, study and exegesis of biblical laws was a civil as well as a religious issue.²³⁶ In short, "to be a Jew may . . . be reduced to the single, pervasive symbol of Judaism: Torah. To be a Jew meant to live the life of Torah, in one of the many ways in which the masters of Torah taught."²³⁷ Often in later (especially Amoraic) Jewish texts, the Torah is betrothed to Israel, God's daughter to his son,²³⁸ and sometimes the law giving at Sinai is portrayed as a wedding.²³⁹ In another kind of parable, Torah is God's bride and queen, interceding for Israel.²⁴⁰ Thus Torah laughs at men,²⁴¹ exclaims,²⁴² talks with the Shekinah,²⁴³ and so forth. When God says, "Let us make humanity," the plural refers to God and his Torah.²⁴⁴ The Sabbath is sometimes personified in a similar way.²⁴⁵

The law contained what was most fundamental to Jewish heritage and practice and hence to the Jews' identity as a people. A challenge to the law was thus a challenge to their very understanding of their existence as a people, as well as a challenge to God the lawgiver and to what God required.²⁴⁶

II. ANCIENT CUSTOMS AND LAWS

"Customs" (Acts 6:14) here must be roughly equivalent to "law" (6:13), since they were passed down by Moses (cf. 2 Macc 12:38).²⁴⁷ Whereas Dio Chrysostom in one

234. For the emphasis in the Scrolls, cf. Braun, "Beobachtungen"; LaSor, *Scrolls*, 116–20. For mystical Judaism, see Urbach, *Sages*, 1:177.

235. Jewish people, unlike Romans, did not distinguish divinely inspired ritual prescriptions from merely humanly ordained civil laws (Cohen, *Law*, 28–29). Eventually, Jewish tombs as distant from the Holy Land as Rome were decorated with Torah shrines (Goodenough, *Symbols*, 2:6, 22; for an extensive treatment of these shrines, see 4:99–144; cf. 12:83–86).

236. See Meeks, *Moral World*, 64.

237. Neusner, *Beginning*, 13.

238. *Sipre Deut.* 345.2.2; *Pesiq. Rab Kah.* 26:9; *Exod. Rab.* 29:4; *Song Rab.* 8:11, §2; *Pesiq. Rab.* 20:2. For Torah as God's daughter, cf. also *b. Sanh.* 101a; *Exod. Rab.* 33:1; *Num. Rab.* 12:4; *Song Rab.* 3:10, §2; *Pesiq. Rab.* 20:1. Although this is the usual image in rabbinic sources, Jewish people used imagery flexibly; in a much rarer variant, Torah is the bride and the ark is the bridegroom (*y. Ta'an.* 2:1, §6), or (more often) Israel is God's daughter rather than God's son (e.g., *b. Pesah.* 56a; *Song Rab.* 8:9, §2).

239. *Pesiq. Rab Kah.* 12:11; 26:9.

240. *Song Rab.* 8:14, §1, attributing the parable to R. Levi, early third-century Palestine. For Torah as intercessor, cf. also *Exod. Rab.* 29:4.

241. *Gen. Rab.* 85:9, third-century Palestine.

242. *Exod. Rab.* 30:3; on the Holy Spirit's analogous exclamations, cf., e.g., *Exod. Rab.* 27:9.

243. *B. Šabb.* 87a.

244. *Tanḥ. Pekudei* 3, as cited in Harvey, "Torah," 1239.

245. *B. Šabb.* 119a (bride); *Pesiq. Rab.* 23:6 (married to Israel at Sinai); 46:2.

246. With, e.g., Moore, *Judaism*, 1:466. Greek orators might practice supporting or challenging laws (Gibson, "Notes," 527, and sources there), but Israel's laws were too sacred for direct challenge.

247. With Kilgallen, *Speech*, 115; O'Toole, *Acts* 26, 38–39.

oration (*Or.* 75) argues (in an encomium on law) that laws are the best guide, “customs” (ἔθνη) usurp this pride of place in *Or.* 76, “On Custom” (Περὶ ἔθους; an encomium on custom). As an “unwritten law” obeyed by people voluntarily, it is superior to written codes (76.1);²⁴⁸ laws are like tyrants, but customs are like benevolent kings (76.2; cf. 76.4).

For Greeks, all peoples’ laws (νόμοι) included various traditions passed down, including beliefs and rites.²⁴⁹ A “custom” (ἔθος) also included traditions, sometimes religious in nature (e.g., 1 Kgs 18:28 LXX; Wis 14:16; Iambl. *V.P.* 1.1),²⁵⁰ even from the moment of its first transmission (Iambl. *V.P.* 28.149). Custom provided one critical foundation for ancient law²⁵¹ and also a criterion for argument (alongside advantage and feasibility).²⁵² “Above all,” Roman law declared, the judge “must be sure not to depart from the statutes, imperial pronouncements, and custom.”²⁵³ Most thinkers in the period valued ancient customs and viewed innovation as suspicious.²⁵⁴ Thus Augustus emphasized how he heroically upheld ancestral customs (*Res gest.* 6.1; 8.5),²⁵⁵ and Romans expected fathers to educate their sons in national traditions to make them good citizens (Cic. *Verr.* 2.3.69.161). Because cities came to follow Roman laws rather than local laws, local customs remained a matter for individual cities’ encomia (Men. *Rhet.* 1.3, 363.11–14).²⁵⁶

Respect for the “ancients” was of paramount importance, and people regularly appealed to their authority.²⁵⁷ One dare not disbelieve one’s ancestors (Dio Chrys. *Or.* 31.77). One who dared to differ from the precedent of the ancients must reckon with their prestige (e.g., *Rhet. Her.* 4.2.2–4.3.4, esp. 4.2.2). When one polytheistic ruler converted to Judaism, his people wanted him dethroned for having abandoned their ancestral customs (Jos. *Ant.* 20.77, 81). Even “savage” Scythians, noted Josephus, obey their own customs (*Ag. Ap.* 2.269).

Gentiles’ arguments for new customs often turned on how they fit ancient laws;²⁵⁸ this would have been a still greater concern for Jewish people. Those debating about changing religious rites could either advocate the change or protest it (*Rhet. Alex.* 2, 1423a.30–33; 1423b.12–33); if the latter, they could argue on the basis of ancestral custom (1423a.32–1423b.12). But Stephen’s response focuses on the temple, meanwhile presupposing rather than arguing for his fidelity to the law.²⁵⁹

248. Cf. also Hierocles *How Should One Behave toward One’s Country?* in Stobaeus *Anth.* 3.39.36.

249. See Rudhardt, “Attitude des Grecs”; cf. Jervis, “Law,” 632; Thucyd. 2.34.1; 2.35.3; on the value of ancient law, see, e.g., Quint. *Decl.* 320.3.

250. See also Macrobi. *Sat.* 3.8.9 (van der Horst, “Macrobius,” 226).

251. Jervis, “Law,” 632 (citing, e.g., Cic. *Resp.* 5.1). This was the basis for written law and was as important as written law (Plato in Diog. Laert. 3.86).

252. Ael. Arist. *Leuct. Or.* 5.6–11.

253. Justin. *Inst.* 4.17.intro. (Birks and McLeod, 143; *legibus aut constitutionibus aut moribus proditum est*); for an earlier appeal to “laws . . . tribunals and customs,” see, e.g., Cic. *Cael.* 1.1. For classical Athenians, rule by “laws” was what uniquely characterized democracies (νόμοις, Aeschines *Ctes.* 6).

254. Cic. *Resp.* 5.1.2; Hierocles *How Should One Behave toward One’s Country?* (Stobaeus *Anth.* 3.39.36, also noted in Malherbe, *Moral Exhortation*, 88); valuing of ancestral custom in *Res Gestae* 2.8; Quint. *Decl.* 339.10.

255. Conveniently, in Sherck, *Empire*, §26, p. 43.

256. This work dates to the late third to early fourth century C.E. and probably reflects a higher degree of unity under Roman law than existed in the first century, certainly in the province of Syria. Otherwise customs parallel laws (Men. *Rhet.* 1.3, 363.6–7); the term also applies to local customs in 2 Macc 13:4. Honoring one’s homeland was a high value (Cic. *Resp.* 6.16.16; 6.24.26; *Inv.* 2.22.65; see comment on Acts 21:39).

257. E.g., Cornutus *Summ.* 1 (Lang, 2, lines 17–18), in van der Horst, “Cornutus,” 168; *Rhet. Her.* 4.2.2; Mus. Ruf. 8, p. 64.12; Epict. *Diatr.* 1.18.17; Tac. *Dial.* 16; Babr. 47.1; Crates *Ep.* 35; Athen. *Deipn.* 8.363D; Matt 5:21, 33; cf. “ancient things” in Philost. *Hrk.* 7.12.

258. Hermog. *Progymn.* 12, “On Introduction of a Law,” 27; Aphth. *Progymn.* 14, “On Introduction of a Law,” 53S, 47R. Stoics argued that they alone observed the full spirit of laws (Arius Did. *Epit.* 2.7.11d, pp. 68–69.1–3, 6–8; 2.7.11i, pp. 76–77.30–37).

259. Cf. Kilgallen, *Speech*, 115.

As with other peoples, for Israel to forsake its customs was a terrible offense (1 Macc 1:41–43; 2 Macc 4:12; 11:25; 4 Macc 18:5).²⁶⁰ Even most Diaspora Jews maintained some distinctively Jewish customs.²⁶¹ It is possible that Luke includes here oral traditions, such as those respected by the Pharisees (Jos. *Ant.* 13.297, 408; *m. 'Ab.* 1:1),²⁶² although others would not have shared all the Pharisees' traditions. The idea that Moses “handed down” the customs might allude to a supposed unbroken chain of tradition, perhaps what came to be called oral Torah;²⁶³ still, it could as easily refer to his having handed them down in the written law (cf. 1 Esd 9:39).

Although rabbinic traditions eventually came to be identified with the law itself as a sort of “oral law”²⁶⁴ and viewed oral tradition as greater than written Torah²⁶⁵ (because oral law encompassed and explained written law),²⁶⁶ it is debated how widely spread this development was even in Pharisaism by Luke's day.²⁶⁷ (Proposed early attestation in Philo may simply attest a popular Greek idea not yet widely applied to Torah in Judea.²⁶⁸ It might be of relevance, however, for the perspective of the Hellenists.) Like the Samaritans,²⁶⁹ many non-Pharisaic Jews regarded the written Torah as sufficient, while filling in its gaps, which they did not admit existed. The early image of the fence around Torah,²⁷⁰ however, reflects the importance of Torah observance; the “fence” of traditional interpretations that grew up around the law, assumed to be correct,²⁷¹ was undoubtedly in practice identified with the sense of the law.²⁷² The Essenes certainly regarded their laws as equivalent to Scripture.²⁷³

260. They must also resist the “customs of the Gentiles” (1 Macc 1:14).

261. Barclay, *Jews in Diaspora*, 1–2, citing Philo *Mos.* 1.278; for some characteristic traits of Judaism in the Diaspora, despite diversity, see Barclay, *Jews in Diaspora*, 399–444.

262. So also Fitzmyer, *Acts*, 359.

263. Le Cornu, *Acts*, 334.

264. *'Abot R. Nat.* 15 A (reportedly of Shammai and Hillel); 29, §§61–62 B; *Sipra Behuq.* pq. 8.269.2.14 (citing also Akiba); *Sipre Deut.* 306.25.1; 351.1.2, 3 (the latter citing R. Gamaliel II); *Pesiq. Rab Kah.* 4:7; 10:5; 15:5; *Num. Rab.* 13:15–16; *Song Rab.* 1:2, §5; 1:3, §2; cf. *'Abot R. Nat.* 3 A; *Sipra Behuq. par.* 2.264.1.1; *Sipre Deut.* 115.1.1–2; 161.1.3; *Pesiq. Rab.* 3:1; probably also *Sipre Deut.* 335.1.1. Thus not only later Scripture (e.g., Esther in *y. Meg.* 1:5, §3) was revealed on Sinai but also the correct rabbinic interpretations implicit in Torah (*b. Ber.* 5a; *Meg.* 19b; cf. Urbach, *Sages*, 1:304). On oral Torah, cf., e.g., Ehrlich, “Tora.”

265. *Y. Ber.* 1:3; *Pe'ah* 2:6, §3; *Sanh.* 11:4, §1; *'Abod. Zar.* 2:7, §3; *Hor.* 3:5, §3; *b. 'Abod. Zar.* 35a; *'Erub.* 21b; *Num. Rab.* 14:4; *Song Rab.* 1:2, §2; *Pesiq. Rab.* 3:2; cf. *b. Menah.* 29b. Transgression of sages' teachings was deathworthy (*'Abot R. Nat.* 2 A; cf. *b. 'Erub.* 21b), and a person could be fined for transgressing the words of a Tanna, e.g., R. Akiba (*'Abot R. Nat.* 3 A). The words of the scribes were nearly always on a lower level, however, than the words of Torah in the earliest rabbinic sources (Sanders, *Jesus to Mishnah*, 115–25; *Sipre Deut.* 154.2.1).

266. Later amplification was understood to have been implicit in the Sinai Torah from the very beginning (*Sipre Deut.* 313.2.4); cf. Urbach, *Sages*, 1:305, 376.

267. See Sanders, *Jesus to Mishnah*, 97–130; on the varying value of tradition among early Tannaim, cf. Landman, “Traditions,” 111–28. Chernick, “Responses,” 393–406, suggests that this emphasis reflects a polemical response to Jewish Christians and Gnosticism (cf. similarly Montefiore and Loewe, *Anthology*, 159). This observation contrasts with the assumptions of much earlier scholarship, e.g., Sandmel, *Judaism*, 183; Kohler, *Theology*, 355; Simon, *Sects*, 34; Bonsirven, *Judaism*, 85 (although Bonsirven notes that the term is rare in the early period, “traditions” being preferred).

268. Cf. Martens, “Unwritten Law.”

269. See Bowman, *Documents*, v–vi.

270. E.g., *m. 'Ab.* 1:1; 3:14; *Sipre Deut.* 48.1.5; echoed in the Amoraim (e.g., *Ruth Rab.* 2:2; for the principle, cf., e.g., *m. Ber.* 1:1; *Sanh.* 11:4; Tannaitic tradition in *b. Šabb.* 12b and *b. 'Erub.* 7a); cf. CD V, 20–21; XX, 25. The use of the image in *Let. Aris.* 139, 142 may be somewhat different, but the principle of not even approaching genuine transgression was not solely Jewish (Plut. *Compliancy* 6, *Mor.* 531D).

271. Pharisees were known for their unwritten ancestral traditions of interpretation (Jos. *Ant.* 13.297; 13.408); cf. the collection in *m. 'Ab.* 1–2, whose “primary purpose . . . is to demonstrate the continuity and hence the weight of tradition” (Strack, *Introduction*, 53).

272. Cf. Sanders, *Jesus to Mishnah*, 127. One may compare the unconscious assumption of the biblical reliability of information gleaned from Scofield's reference notes, held by many early to mid-twentieth-century fundamentalist Christians.

273. Sanders, *Jesus to Mishnah*, 126–27, esp. on the *Temple Scroll* (though the Scrolls can warn against adding or subtracting measures regarding sacrifices, Oxford Genizah Text D.17–19). But Essenes frequently wrote their halakah, in contrast to that of the Pharisees (cf. Baumgarten, “Unwritten Law,” 7–29).

That Hellenists might already think in these terms is certainly plausible. Plato valued unwritten law as highly as written law, the former being the basis for the latter (Diog. Laert. 3.86).²⁷⁴ Zeno reportedly urged people to live according to nature, following “the common law”—that is, the law common to all—which he identifies as the pervasive Logos and Zeus.²⁷⁵ This “natural law” also existed beyond purely philosophic circles.²⁷⁶ Plutarch could appeal to classical poets to prove that law was written in human hearts, which he identifies with ensouled Logos, or reason.²⁷⁷ The idea of natural, universal law became so widespread that some Roman legal codes began by distinguishing laws particular to given states from the law of nature (*ius naturale*),²⁷⁸ the law due to natural reason (*naturalis ratio*).²⁷⁹ Philo²⁸⁰ and Josephus²⁸¹ draw on the notion of natural law (or humanity’s common law), and Paul probably draws on it in Rom 2:14–15.

Stephen undoubtedly challenged many customs, but because first-century Judaism divided over such traditions (Sadducees, who held the high priesthood, rejected them; Jos. *Ant.* 13.297), probably only the claim that he rejected the law of Moses or violated widely agreed-on tenets of the law could be grounds for conviction by a Jewish legal body.²⁸²

Luke (who alone uses the term in the NT, apart from John 19:40; Heb 10:25) employs ἔθος or its cognates for personal customs (Luke 22:39),²⁸³ Roman customs (Acts 25:16), and Jewish ancestral customs (16:21; 26:3), particularly those established by the law (positively in Luke 1:9; 2:27, 42; Acts 21:21; 28:17; negatively in quotations in Acts 15:1; 16:21). Later Paul will be alternately accused of promoting (Acts 16:21) or attacking (21:21) Jewish customs, but he practices them himself (16:3; 18:18; 21:26) and objects only to their imposition on Gentiles (15:1–2).

Those who sought to introduce new customs could accomplish this with least offense by grounding their new ideas in the teaching of the founders.²⁸⁴ Luke, who emphasizes early believers’ coming to welcome foreigners into the sacred community, must demonstrate continuity with the old ways.²⁸⁵ Luke grounds the Gentile mission in Israel’s heritage without inventing new pro-Gentile sayings for Jesus (though

274. Fitzmyer, *Acts*, 359–60, cites also Plato *Laws* 7.793A.

275. Diog. Laert. 7.1.88. On divine law meaning living according to nature, see also Epict. *Diatr.* 2.16.28; on one law and Logos in the universe, see Marc. Aur. 7.9. For a full discussion of natural law in Stoicism, see Watson, “Natural Law.” For the connotative difference between *logos* and *physis* (Nature), see Long, *Philosophy*, 120, 148–49.

276. Cf. Cicero in Frank, *Aspects*, 109; Max. Tyre 6.5; 11.12 (comparing mind and law; in 27.8 he regards God as pure Mind); even Lucan *C.W.* 7.1; *Sib. Or.* 3.757. Cf., in Palestinian Judaism, 1 *En.* 72:2; 73:1; 74:1; 76:14; 78:10; 79:1–2; 1QM X, 12–13.

277. Plut. *Uned. R.* 3, *Mor.* 780C; cf. *Stoic Cont.* 1, *Mor.* 1033B, where “Philosophy’s Logos,” or doctrine, is a law by which people will choose to live.

278. Justin. *Inst.* 1.2.1–2 (Birks and McLeod, 36–37), a later compilation of earlier laws.

279. Gaius *Inst.* 1.1 (Gordon and Robinson, 19–20). In the Hellenistic period, *Rhet. Alex.* pref. 1420a.26–28 defined law as reason (λόγος) specified by common agreement, a sort of social contract.

280. Cf. Philo *Posterity* 185; *Agr.* 31, 66; *Plant.* 132; *Sobr.* 25; *Migr.* 105; *Abr.* 249; *Spec. Laws* 3.46, 189; *Rewards* 42, 108; *Good Person* 30; *Contempl.* 59; *Eternity* 105; *Prov.* 2.23; *Embassy* 68. Cf. *Sib. Or.* 3.757.

281. Jos. *Ant.* 4.322; *War* 1.378; 3.374.

282. In Tannaitic sources, violating oral teachings of the scribes was not deathworthy like violating Torah (*Sipre Deut.* 154.2.1).

283. Use for personal or family habits or customs was common; e.g., 1 Macc 10:89; Sir 23:9, 14. Cf. the Greek cliché that ἔθος (habit) led to ἦθος (character; Meeks, *Moral World*, 15). For customs as ethnic markers, cf. Barreto, *Negotiations*, 93.

284. Balch, “ΜΕΤΑΒΟΛΗ ΠΟΛΙΤΕΙΩΝ,” 140.

285. Ibid. Balch (174–80) notes that in Plutarch, founders change constitutions; Dionysius, with a more apologetic end, emphasizes continuity instead. Distinct from both Romans and kosher-keeping Jews, Luke’s believers must emphasize continuity (180–83).

including Q's centurion, he even omits Mark's Syrophenician woman). But he does build toward this grounding with Jesus's acceptance of outsiders—already in the tradition—and Jesus's and soon Stephen's use of Scripture.

III. THE TEMPLE

Profaning or even denouncing the temple might be viewed as worthy of death,²⁸⁶ especially to the Sadducees who controlled the temple (cf. Acts 21:28; Luke 19:45–47; Jer 20:1–2).²⁸⁷ Even merely predicting the temple's destruction (as Stephen presumably does; cf. Acts 6:14) invited arrest by the temple authorities themselves. Thus, a generation later, one Jesus ben Ananias prophesied the temple's demise, and this led to his arrest by the authorities and being handed over to the governor for a brutal flogging (Jos. *War* 6.300–309).²⁸⁸ Threatening a temple that was central to a city's identity and livelihood could also be dangerous, as Luke knows (Acts 19:27; 21:28–29). Given the earlier, historically likely challenge of Jesus to the temple authorities and the known antipathy of the Sadducean authorities to any actions thought to undermine the temple's sanctity, the temple charges in Acts (against both Stephen and Paul) appear plausible.²⁸⁹ Of particular interest to Luke, however, is how the charges against Stephen presage those that Paul will face later in the book.

Excursus: Views about the Temple

Much of Jerusalem's economy depended on the temple, in ways that sometimes would have applied to immigrant as well as native citizens. The temple establishment "required bakers, weavers, goldsmiths, washers, merchants of ointments and money changers." Because it was still under construction, it required also stonemasons and carpenters; its completion (in 62–64 C.E.) would create an estimated eighteen thousand unemployed workers (Jos. *Ant.* 20.219).²⁹⁰

The temple was renowned for its beauty²⁹¹ and known throughout the Roman world.²⁹² Perhaps because Judaism had just one God and its cult was centralized,²⁹³ its temple was larger and more magnificent than virtually any other temple of antiquity.²⁹⁴ Pharisees, who generally disliked Herod, were sometimes displeased with his

286. Stauffer, *Jesus and Story*, 206, cites later rabbinic sources (*t. Sanh.* 13:5; *b. Roš Haš.* 17a; *y. Ber.* 9, 13b; also doubting the tabernacle's holiness in *L.A.B.* 25:9).

287. See esp. Regev, "Concerns," 86; for profaning the temple as a capital offense, see comment on Acts 21:28. Taylor, "Stephen," intriguingly explains sensitivity to the temple charge in view of the tensions surrounding Caligula's plan to desecrate it in 40 C.E. But we should retain Stephen's link with Paul's conversion, which cannot be dated so late. The resistance to Caligula's decree does, however, at least illustrate the fervent loyalty to the temple that could produce volatile conflict such as depicted here in the 30s.

288. Also noted by Le Cornu, *Acts*, 337.

289. On their historical likelihood, see Regev, "Concerns," adding later accounts of James's martyrdom. Regev views the sources as consistent among themselves and with Sadducean concerns for the temple's sanctity.

290. Fiensy, "Composition," 221 (noting also other markets famous for wares in Jos. *War* 2.305, 315; weavers' and wool dealers' markets in *m. Erub.* 10:9; *Ed.* 1:3; and (221–22) other markets in Jos. *War* 2.530; 5.147, 331). Enormous labor and ingenuity went into the temple's construction; for archaeological material corroborating and explaining Josephus's account of the temple and its building (*War* 5.184–227), see esp. Cornfeld, *Josephus*, 346–61.

291. Jos. *War* 6.267; *Abot R. Nat.* 28 A; 48, §132 B.

292. 2 Macc 2:22; *Let. Aris.* 84–91; *CIJ* 1:378, §515; Lohse, *Environment*, 151.

293. Sanders, *Judaism*, 50.

294. *Ibid.*, 55–69; cf. Wilkinson, *Jerusalem*, 76; Patrich, "Temple." On its massive architecture and how it was built, see Jos. *War* 5.184–227; and, for archaeological corroboration, Cornfeld, *Josephus*, 346–61. Some

approach to the temple, especially regarding his golden eagle there;²⁹⁵ nevertheless, even their movement ultimately regarded the temple as the holiest site in the world's holiest city.²⁹⁶ (In succeeding centuries, however, popular synagogue Judaism seems to have liked eagle decorations).²⁹⁷

Some hellenized Jews may have spiritualized the temple;²⁹⁸ such spiritualized imagery naturally appears in Philo.²⁹⁹ Yet the claim that the temple would not have been honored so much in the Diaspora (where the Jews of Acts 6:9 are from) as in Judea³⁰⁰ is questionable, at least for Jews serious enough about their heritage to move back to Jerusalem. First of all, the spiritual imagery of the temple appears in the far less hellenized Qumran scrolls, where the true temple often stands for the community.³⁰¹ Second, Philo himself emphasized Jewry's unanimous love for the temple and expected it to remain forever.³⁰² Third, Diaspora Jews were intensely committed to the temple, as attested both by their payment of the annual tax for its upkeep³⁰³ and remarks in Egyptian Jewish literature (e.g., *Sib. Or.* 3.575–79; cf. also *Letter of Aristeas*). For the related discussion of the centrality of the land (also a matter of ethnic sacred space), see section 6 in the introduction to Acts 7, below.³⁰⁴

A minority of Jews did view the temple as defiled, and a smaller minority did predict its consequent destruction.³⁰⁵ For example, the *Testament of Moses*, which accuses priests of polluting the altar (*Test. Mos.* 5:4), prophesies judgment against the temple (6:8–9).³⁰⁶ In some other texts, enemy rulers may want to destroy the temple (*Sib. Or.* 3.665), but God will establish it eschatologically (*Sib. Or.* 3.657–60). Scholars

recent scholars have questioned whether the temple proper is under the Dome of the Rock (see Cornfeld, *Josephus*, 364, 426; Vogt, "Temple"; Kaufman, "Temple"; this different location would be easier politically). In many ancient cities, "temple mounts" included palaces and other supremely important buildings as part of the most defensible acropolis (see Rohrbaugh, "Pre-industrial City," 134).

295. *Jos. Ant.* 17.151–52; *War* 1.651; Schürer, *Time of Jesus*, 144, 157.

296. E.g., *m. Kelim* 1:6–9; *Mek. Pisha* 1.48ff. (Lauterbach, 1:4). Long after the temple's destruction, it remained central in Jewish hopes (e.g., *Gen. Rab.* 14:8; 56:2; 95 MSV); speaking hyperbolically, a later teacher lamented that whereas pagans pray for the earth, all Israel's prayers are for the temple's rebuilding (*Gen. Rab.* 13:2).

297. Goodenough, *Symbols*, 8:121–22.

298. Romans could do so (e.g., *Tac. Ann.* 4.38.2; Sinclair, "Temples").

299. E.g., *Philo Rewards* 123, where the wise man's mind is God's οἶκος.

300. E.g., Ehrhardt, *Acts*, 33; Shutt, "Aristeas," 10.

301. E.g., 1Q5 VIII, 5, 8–9; IX, 6; CD III, 19A; II, 10, 13B; 4Q511 35 2–3; more fully, Gärtner, *Temple*, 20–46; Flusser, *Judaism*, 37–39; Bruce, "Jesus," 76; Wilcox, "Dualism," 93–94; McNamara, *Judaism*, 142; already applied by NT commentators, e.g., in Kelly, *Peter*, 90; Goppelt, *Theology*, 2:11; and by Sanders, e.g., in *Judaism*, 376–77; but cf. suggested qualifications in Caquot, "Secte et temple." The claims for 4QFlor (e.g., Gärtner, *Temple*, 30–42) have proved less persuasive (McNicol, "Temple"; Schwartz, "Temples"). The eschatological temple in the *Temple Scroll* follows the design of Israel's camp in the wilderness (inlay article in Yadin, "Temple Scroll," 42).

302. Philo *Spec. Laws* 1.76; Sanders, *Judaism*, 52. Not all Jews embraced the temple's sanctity, but most did.

303. See *Jos. Ant.* 18.312 and discussion above.

304. See also the summary in Keener, *John*, 613–15.

305. E.g., *Test. Levi* 15:1 (cf. 14:6) if pre-Christian. Whatever the date of *Testament of Levi* specifically, predictions of the temple's destruction in general need not be post-70. That a Qumran document accurately warns that the Kittim (by whom it means the Romans) would carry off the Jerusalem priesthood's wealth (1QpHab IX, 6–7) hardly makes the prediction post-70 when it is in a clearly pre-70 document. Fritsch thinks that the probable Damascus Essenes were less antitemple than the Qumran community (*Community*, 84; cf. CD VI, 16, 19–20; XI, 18–XII, 2); cf. also Davies, "Temple in Damascus Document." Even later rabbis, while praising the temple, acknowledged its inadequacy to withhold judgment if Jerusalem was engaging in sin (e.g., *y. Ta'an.* 4:5, §13). Josephus both finds portents warning of the temple's destruction and reports prophetic figures who denied it; see Bedenbender, "Kampf."

306. Because the Roman ruler destroys only part of the temple in the oracle, the prophecy presumably predates 70 C.E.

note the repeated expectation in some strands of early Jewish literature, including some texts before 70 C.E., that God would bring a new temple down.³⁰⁷ Often this expectation reflected the view that the priesthood was impure.³⁰⁸ See fuller discussion at Acts 2:46, on the temple's eschatological renewal.

Most ordinary Jews, however, honored and used the temple, whether or not they approved of everything the temple establishment did.³⁰⁹ Even in the Ptolemaic period, before Herod's grand temple, an Egyptian Jew might view the temple as invincible (*Let. Aris.* 100–101).³¹⁰ Indeed, if Greeks believed that gods might fight to defend their temples (e.g., *Hdt.* 8.37), why should not Israel believe the same about its temple (4 Macc 4:9–12)?

Certainly, Stephen could express dissatisfaction with the temple yet remain part of a movement that worshiped there; even the Essenes reportedly sent sacrifices to the temple (*Jos. Ant.* 18.19). Other groups that criticized the temple were marginalized, but not (in this period) hunted down and persecuted;³¹¹ yet an individual deemed too much of a public threat or a nuisance could be severely punished (*War* 6.300–309, esp. 301, 303–4), depending on how his words were interpreted or (more likely in this case) twisted.

Two of the three summaries of the charges here that mention the temple (Acts 6:11, 13–14) refer to the temple as “this place” (6:13–14), in one of these instances specifically “this holy place” (6:13). This wording is hardly unique,³¹² but it has special significance in Acts. It matches the wording of the LXX quote (Exod 3:5) in Acts 7:33 as well as the later charge against Paul in 21:28. Stephen will answer this charge by demonstrating that *any* place where God's presence is is holy, whether the promised land (7:7) or a mountain near Egypt (7:33). Stephen afterward employs another quotation (Isa 66:1), which contains the same term τόπος (probably connecting a prophets reading with a law reading by *gezerah shevah*), to show that God's “place” is not only the temple (Acts 7:49).³¹³

The final version of the charge specifies Jesus's role as the temple's destroyer; this reveals more of how Stephen's words may have been distorted than the other charges do. Probably this suggests³¹⁴ that Stephen developed some of Jesus's teaching regarding the temple's destruction (Luke 21:6, also using καταλύω,³¹⁵

307. See esp. Sanders, *Figure*, 262, noting 1 *En.* 90:28–29; 11QT XXIX, 8–10. After 70, cf., e.g., the Amidah and 2 *Bar.* 32:1–4.

308. Thus in the Scrolls (Flusser, *Judaism*, 43; probably, e.g., also in 4Q176 1–2 L, 2–3). Bryan, “Hallel,” rightly argues that the renewal of the temple suggests its purification rather than its rejection.

309. Loyalty to the temple functioned as a covenant marker in early Judaism (Holmén, *Covenant Thinking*, 53).

310. For the general sentiment of its invulnerability, cf. Borg, *Conflict*, 165–70. After 70, some opinions revised the claim of invincibility to argue that the surviving western wall would never be destroyed (*Num. Rab.* 11:2; *Song Rab.* 2:9, §4; *Lam. Rab.* 1:5, §31; *Pesiq. Rab.* 15:10).

311. In contrast to the earlier conflict regarding the Wicked Priest, reflected in the Qumran scrolls.

312. A temple might be called a “place” (e.g., *Test. Job* 3:7), but given the frequency of the noun (nearly ninety times in the NT and more than five hundred in the LXX), this observation is not very helpful; more significant is “holy place” (e.g., Ps 24:3; Eccl 8:10; Isa 60:13; Ezek 42:13; Matt 24:15; 2 Macc 8:17; 3 Macc 2:14; probably the land in 2 Macc 1:29; 2:18).

313. Τόπος appears sixteen times in Acts, five of them in this section (about 38.5 percent of the uses, even though Acts 6:13–7:60 comprises only about 6.3 percent of the verses in Acts).

314. For our historical interests, not necessarily Luke's readers. But his ideal audience undoubtedly knew the passion tradition, and so it might have also ideally gathered this point.

315. Interestingly, this verb for the temple's and the city's destruction also applies to human actions (Acts 5:38–39); but this correspondence may be coincidence. Athenian law applied the cognate noun to treason

cf. 19:44–45),³¹⁶ a feature that the passion tradition indicates false witnesses had already distorted (and which perhaps Luke does not care to emphasize by mentioning more than once?). That the later church felt comfortable attributing the charge about Jesus's destroying the temple only to false witnesses (here and Mark 14:58) suggests its authenticity in some form³¹⁷ (as does likely Jesus tradition in 2 Thess 2:4).³¹⁸ Jesus's threat of the temple's destruction may not have articulated his own agency, but it is not surprising that his critics would so report his words.

This version of the charge shows that the basis for Stephen's critique is christological and eschatological (probably partly realized eschatology, in view of his salvation-historical approach climaxing in Jesus in Acts 7). For Stephen and Luke, the temple's destruction does have to do with Jesus as his accusers have charged; but "it was rejection of him that brought this destruction about."³¹⁹

After 70 C.E., rabbis reported divine portents forty years before the temple's destruction;³²⁰ such tragedy required explanations that only hindsight could provide (or invent). In light of the whole context of Luke-Acts (cf. Luke 21:5–6, 20–24; 23:45; Acts 22:21–22) in its likely post-70 setting, some scholars argue that "Stephen's speech in Acts 7 became an explanation for the destruction of the temple; the temple worship was no longer acceptable because Jesus had not been accepted."³²¹ That Stephen's speech partly provides an explanation for the temple's destruction is likely; still, although temple worship was not adequate by itself, that it was not "acceptable" is an overstatement. Against some scholars, Luke seems to portray the temple itself and the primitive church's view of it favorably (e.g., Acts 2:46; 5:20; 21:26; Luke 2:27, 37, 46), but the temple was provisional,³²² not eternal, as the events of 70 C.E. confirmed. Stephen protests not the temple's divine ordination (explicit in Acts 7:44) but its abuse.³²³ If Luke is against localizing God's presence in temples, this is antilocalization in general, not specifically against a Jewish temple (17:24);³²⁴ the issue is not hostility toward the temple but a wider concern for God's broader purpose.³²⁵ In this narrative, Stephen is not antitemple *per se*; it is unlikely that we

against the state (lit. "dissolution" of the state's constitution; Thür, "Katalysis"). For the concept of abolishing by undermining Israel's law, cf. *m. Ber.* 10:5; sources in Keener, *Matthew*, 177; other laws, cf. Val. Max. 7.2.ext. 15.

316. Dunn, *Acts*, 87.

317. Cf., e.g., Sanders, *Jesus and Judaism*, 73–74; Theissen, *Gospels*, 113, 194; Wright, *Victory*, 335. Given other pre-70 prophets of the temple's destruction, many scholars accept the authenticity of Jesus's prediction of the temple's destruction (e.g., Hill, *Prophecy*, 62–63; Aune, *Prophecy*, 174–75).

318. On Thessalonian parallels with Jesus's eschatological teaching, see my comments in Keener, *Matthew*, 565–66; in greater detail, idem, *Historical Jesus*, 361–71; Wenham, *Rediscovery*, 176–80; Waterman, "Sources." That the later church would have grown more eschatologically oriented than Jesus is inherently unlikely, and that it would have invented 2 Thess 2:3–4 after 70, when the temple was destroyed, is even less likely.

319. Kilgallen, *Speech*, 119; cf. O'Neill, *Theology*, 79; on Jesus's centrality here, see Kilgallen, *Speech*, 32–33. Because these witnesses do not mention the temple's rebuilding (contrast Mark 14:58; John 2:19), Simon, *Stephen and Hellenists*, 23, thinks that for "Stephen the coming destruction of the sanctuary will be final," but this probably reads too much into the testimony of "false witnesses" (Acts 6:13).

320. Some scholars cite Jos. *War* 6.293–96; *b. Yoma* 39b; *y. Yoma* 6:3 (43c); cf. Tac. *Hist.* 5.13 (see Dibelius, *Tradition*, 195 [though he thinks the tradition circulated only after 70]; Carson, "Matthew," 580; France, *Matthew*, 400n2).

321. Harrington, *God's People*, 38–39 (following Kilgallen, "Turning Points"; though the additional claim that Acts 8–14 challenges the necessity of the law for salvation is not clear). God's message in 1 Kgs 9:6–9 likewise functions as a warning within the narrative world, yet as theological commentary for the edited work's postexilic audience.

322. For the temple as provisional but positive, see, e.g., Weinert, "Meaning of Temple"; idem, "Luke, Stephen, and Temple"; Peterson, "Worship," 378; comment on Acts 2:46. Larsson, "Temple-Criticism," sees the temple as good but superseded by the fulfillment of God's promise.

323. See also Bachmann, "Stephanusepisode," 561.

324. Walton, "Perspectives," 143.

325. *Ibid.*, 148.

are to interpret this speech of Luke's reliable character as significantly harsher than Luke's own view.

The charges are mostly false, especially and most obviously the charge that Jesus threatened the temple's destruction.³²⁶ Stephen is no true apostate; he has not, unlike some,³²⁷ abandoned the ancestral faith. But because the charges come before Stephen's response, they create suspense for a first-time reader. The reader trusts that no one full of the Spirit will speak against God or Moses (as Israel did in the wilderness, Num 21:5), but what of the temple or (less likely) the law?³²⁸ (On "blasphemy" in Acts 6:11, see comment above.) That he refuses to "stop" speaking may echo the recent refusal of the apostles to stop speaking for Christ (5:42, though Luke has a predilection for this term).

It is unlikely, given Stephen's Scripture-laden response and counteraccusation (7:2–53, esp. 7:51–53), that Luke believes that Stephen opposed the law;³²⁹ certainly, Luke does not (and he is our only source for Stephen's views).³³⁰ But Stephen's words about the temple appear more ambiguous.³³¹ Stephen will thus confirm some suspicions about him while answering the charges. As noted above, the "Hellenist faction" did not espouse a radical Hellenistic theology that diverged from the apostles, as some have argued. This should not be taken to mean, however, that Stephen's speech failed to challenge some widely held Jewish ideals.³³²

e. Stephen's Transfiguration (6:15)

Just as Jesus (Luke 9:29) and Moses were transfigured, so is Stephen here, even if not as literally.³³³ In view of connections with the following context, which situates Stephen (Acts 7:51) in the tradition of the prophets (7:52), an allusion to Moses makes sense here. Moses saw God's glory in the bush (via an angel, 7:30–31, 35) and reflected God's glory (Exod 34:29–30, 35); Stephen (later) witnesses Jesus's glory in heaven (Acts 7:55–56), and so perhaps he (albeit beforehand) reflects his glory as

326. With Hill, *Hellenists*, 57–58; cf. Borg, *Conflict*, 180. But apparently Jesus spoke about the temple in such a way as to lend plausibility to the charge (see Sanders, *Jesus and Judaism*, 73–74).

327. Tiberius Alexander indeed abandoned Judaism (Jos. *Ant.* 20.100).

328. Johnson, *Acts*, 113.

329. Cf. Simon, *Stephen and Hellenists*, 47 (against only the debased practice of it); pace, e.g., Hengel, *Jesus and Paul*, 56–57. Watson, *Gentiles*, 67, complains that Hengel accepts Luke's report about the charge against Stephen yet not its "attribution to 'false witnesses.'"

330. Even when ancient Jews contradicted statements in the law, they typically thought, apparently, that they supported the law. Thus we have conflicts with written statements in the Torah in *Jubilees* (wrongly taken as against the Pentateuch by Zeitlin, "'Jubilees' and Pentateuch," 234; idem, "Jubilees, Character"); the rabbis (see, e.g., comment on Acts 2:1 regarding their date for the law giving); and Josephus's haggadic expansions of biblical texts (see the commentary introduction, Keener, *Acts*, 1:144–47, 302); yet all these sources must have affirmed the authority of the law.

331. Goppelt, *Judaism*, 106, thinks that Stephen denies that his words against the localization of God's presence in the temple are blasphemy, but Goppelt admits that he says them. In Stephen's speech, God is transcendent above the temple, which Israel's larger history relativizes, but Stephen does not portray the temple as bad (see Rhodes, "Tabernacle," esp. 136). Rather, Stephen views himself and Jesus's movement as heirs of the dynamic relationship with God behind the tabernacle's and temple's founding, a relationship from which the entrenched elite who run the temple have moved away.

332. Cf., e.g., Latourette, *To A.D. 1500*, 70–71.

333. So also others, e.g., Le Cornu, *Acts*, 337; Chrys. *Hom. Acts* 15 (Martin, *Acts*, 73: "This was the glory of Moses"). Although Greek and Jewish literature reported many transfigurations (see Walde, "Metamorphosis"), that of Moses was the standard one behind the Gospel accounts (Exod 34:29–35; cf. *L.A.B.* 12:1; 19:16; *'Abot R. Nat.* 13, §32 B; *b. B. Bat.* 75a; cf. more fully Moses, *Transfiguration Story*, 84–85; Keener, *Matthew*, 437; the citation of Philo *Mos.* 1.57 in Davies and Allison, *Matthew*, 2:695). For Moses-Sinai and transfiguration themes in Philo, see Moses, *Transfiguration Story*, 50–57; in Josephus, 57–61; in Qumran, 61–66; in other sources, 66–83. In addition to Exod 34:29, Packer, *Acts*, 51, cites Eccl 8:1 and Judg 13:6; but the latter reference concerns an actual angel.

Moses reflected God's glory to the people. Luke thus ironically reverses the accusation that Stephen opposes Moses (in 6:11); instead, Stephen follows the pattern of Moses,³³⁴ whereas (as he will shortly demonstrate) his accusers identify with their ancestors who repudiated Moses (7:27, 35–37). Stephen stands in prophetic continuity with the earlier agents of God whom his speech invokes (7:51–52).

Luke saves the climactic ἀγγέλου (of an angel) for the final word of the sentence. In this case, Stephen's face appearing like that of an angel in 6:15 and his vision of Christ's glory in 7:55–56 frame his martyr speech, connecting his martyrdom closely with that of Jesus (see comment on Acts 7:55–60). The most important contextual connection may be 7:53;³³⁵ God's people failed to keep God's law given to them through angels (cf. also 7:30, 35, 38) and likewise reject Stephen, who is God's agent of revelation to them. Far from undermining the law (per their accusation), Stephen is linked with the angelic giving of the law and himself offers prophetic revelation in chapter 7. (Possibly it is relevant that he is facing death and that Luke elsewhere shows his awareness that some believe in an angelic existence after death [cf. 12:15].)³³⁶ The Sadducean part of the Sanhedrin, who reject angels (23:8–9), will also reject Stephen, God's agent.

Luke may expect his audience to visualize this event as literal yet ambiguous. Some scholars suggest that Luke intends a literal transfiguration here, with Stephen being transformed by beholding Jesus's glory.³³⁷ Later apocryphal literature echoes the expression here, applying it literally to Paul (whose appearance alternated between human and angelic, *Acts Paul* 3.3).³³⁸ But a transfiguration as dramatic as that of Jesus in Luke 9:29–32 would render the hostile audience reaction difficult to understand, though it is possible that it falls into the range of irresistible miracles that enraged them (Acts 6:8, 10) and they might attribute it to magic (which often specialized in transformation of various kinds).³³⁹ Luke uses ὡσεὶ, which he normally applies to approximations (as in 2:41) or resemblances that are not exact identifications (see comment on Acts 2:3).³⁴⁰

In a figurative sense, it was hard for the wicked even to look at the righteous, whose lifestyle was so different, according to a widely circulating Hellenistic Jewish work (Wis 2:15).³⁴¹ Jacob had praised Esau as God's agent as if one had seen in him God's

334. Moses's experience of God's glory provided other early Christian writers a pattern for new-covenant ministry, especially Paul (2 Cor 3:7–18; cf. Belleville, *Glory*; Hays, *Echoes*, 123–53; Osten-Sacken, "Geist"; Keener, *Corinthians*, 168–69) and John (John 1:14–18; cf., e.g., Keener, *John*, 405–26; idem, "Beheld"; idem, "Transformation," 17; Boisnard, *Prologue*, 135–45, esp. 136–39; Hanson, "Exodus"; Harrison, "John 1:14," 29; Mowley, "Exodus").

335. Also noted by others, e.g., Pate et al., *Story*, 197; Fletcher-Louis, *Angels*, 98 (following Glombitza, "Charakterisierung," 244).

336. Cf. also the ancient expectation that those near death could predict the future (e.g., Aune, *Prophecy*, 178; Boring, Berger, and Colpe, *Commentary*, 105, 155).

337. Lake and Cadbury, *Commentary*, 69, contending plausibly that the ὡσεὶ restricts the miracle's reality no more than in Acts 2:3. For background, some scholars appeal to Jewish traditions where pious men appeared like angels (Strack and Billerbeck, *Kommentar*, 2:665–66; followed by Haenchen, *Acts*, 272n3). Some revival settings also report shining faces (e.g., Peckham, *Sounds*, 171, recalling Moses); also some power encounter reports (Tandi Randa, interview, May 23, 2012; follow-up correspondence, May 25, 2012).

338. Figuratively, grace shone from Polycarp's face in *Mart. Pol.* 12.1.

339. Metamorphosing one substance into another (Hom. *Od.* 10.239–40; Ovid *Metam.* 14.414–15; *y. Hag.* 2:2, §5; *Sanh.* 6:6, §2), or themselves or others (Apul. *Metam.* 1.9; 2.1, 5, 30; 3.21–25; 6.22; Blackburn, "ΑΝΑΡΕΣ," 190, 193; in modern times, cf. Mbiti, *Religions*, 256–58; Nanan, "Sorcerer"). Magicians were also known for attempting invisibility (e.g., *PGM* 1.222–31, 247–62, 256–57; cf. Smith, *Magician*, 120). The idea that the Sanhedrin's "glare" points to "something 'magical' . . . a kind of 'giving the eye' to Stephen" (Strelan, *Strange Acts*, 127) reads too much into ἀτενίσαντες, which is capable of various senses.

340. Cf. discussions of the use of simile in Greek thought (though more common in poetry than in prose; see Anderson, *Glossary*, 38).

341. Philo *Virt.* 67 appears to speak figuratively also (of radiant joy), despite the subject being Moses.

face (Gen 33:10, probably in view of 32:20, 30); others could employ the same sort of complimentary hyperbole in addressing one as appearing like an angel of God (1 Sam 29:9; Esth 15:13 LXX).³⁴² But if a full-fledged transfiguration is too dramatic, a figurative reading is, at least on the level of the story, not dramatic enough. What the figurative readings offer is some of the moral significance that Luke and his ideal audience may have found in the narrative.

f. The High Priest's Question (7:1)

The high priest's question, the immediate occasion of Stephen's speech, does not repeat but alludes to the charges in Acts 6:11–14. It thus reminds the reader that Stephen's speech (7:2–53) both responds to these specific charges and addresses not only the false witnesses of 6:13–14 but also the authorities introduced to this narrative in 6:12.

The high priest appears as an essentially "flat," uniformly hostile character in Luke's narrative (5:17, 21), sometimes passive (9:1; cf. 23:14–15) but sometimes (as here) leading the questioning of the Christians (5:27; cf. Mark 14:60–66). This picture applies to different high priests as well (Acts 23:2; 24:1); since "the high priests" (the high-priestly family; or, often more generally, the aristocratic priests) function as a group, a sort of composite character (4:6; cf. 4:23; 5:24; 9:14; Luke 19:47; 20:1, 19; 22:2, 52; 23:4, 10, 13), the individual high priest is less important to the narrative here than is the character of the group. (See comment on Acts 4:1.)

The high priest's "... these things so" is Lukan language (Acts 17:11; 24:9).³⁴³ The high priest's question functions in the story world to give Stephen a chance to defend himself, but it also allows Luke to give Stephen the chance to speak. Those who knew the Jewish martyr tradition might think of the opportunities interrogators sometimes gave prospective martyrs to save themselves by denying their faith, opportunities that the martyrs used instead to reaffirm their commitments.³⁴⁴

Stephen was probably lynched, and so some scholars doubt the involvement of the Sanhedrin (6:12, 15) and the high priest (7:1).³⁴⁵ They are not necessary for the basic story line and are given less a distinct voice here than in the apparently different material (possibly indicating a different source?) in Acts 4–5. They may then appear more for consistency with the persecuting establishment in Acts (4:15; 5:21, 41; 23:1). It should be noted, however, that Luke does not believe the high-priestly establishment morally incapable of approving lynchings (23:14–15; 25:3).³⁴⁶

3. Stephen's Countercharge (7:2–53)

Luke offers a climactic example of Stephen's preaching by the Spirit (6:10), hence like a prophet (7:51). The two charges are that Stephen opposes the temple and the

342. Scholars often cite Esth 15:13 here (Lake and Cadbury, *Commentary*, 69; Bruce, *Acts*¹, 158; Marshall, *Acts*, 131; Johnson, *Acts*, 110 [citing also Dan 3:92 LXX, with similar language for the "fourth"]). Some add 2 Sam 14:17 (Peterson, *Acts*, 243).

343. The speech introduction resembles the procedure in Acts 4:7 and 5:27 (cf. 13:15; Richard, *Composition*, 314).

344. E.g., 2 Macc 7:7–9, 24–38; 4 Macc 5:6–13; 6:16; 8:10; 9:4; cf. *Mart. Pol.* 9.2.

345. Barrett, *Acts*, 340, thinks it "probably but not certainly correct . . . that the unannounced appearance of the High Priest indicates that Luke is rewriting the story of a lynching." Luke is capable of blending accounts; his passion narrative (Luke 22:66) collapses Jesus's hearings into Mark's official morning hearing (Mark 15:1) instead of the longer night session (Mark 14:53–65; cf. Luke 22:54, 67–71).

346. These explicit references portray the events of a generation later, but cf. here Acts 5:33; 9:1–2.

law (6:11–14). He responds to both charges, the latter by the conventional rhetorical technique of returning their charges against them.³⁴⁷ Stephen responds to the temple charge apparently by explaining what he has been saying about the temple (which may sound to his accusers, but not to Luke, like confirming the charge of speaking “against” the temple). Stephen responds to the charge that he opposes the law, however, not by defending himself directly (although his authoritative and pervasive use of Scripture, especially the Pentateuch, offers an implicit defense)³⁴⁸ but by tracing Israel’s rebellion against the law through history and finally laying that charge at the feet of his accusers and judges. It is not he but they who have defied God’s law, “uncircumcised in heart” (7:51).

a. Introduction

This speech assumes the authority of the law (implicitly refuting one charge against Stephen), explains the sorts of ideas that generated the (distorted) temple charge (7:43–50), and countercharges Stephen’s opponents with violating the law themselves (7:38–42; esp. 7:51–53). With regard to the temple, it emphasizes that God is not localized (Abraham, Joseph, and Moses; 7:2, 5–6, 10, 14–15, 22, 29–30, 33–34, 36, 48–50); with regard to the countercharge, it emphasizes that Israel has often rejected servants God raised up (Joseph, 7:9; Moses, 7:27–28, 35, 39–40, 53; and all the prophets, 7:52). Although Luke treats many characters in the narrative of Israel’s history, the one enduring and continuous character on whom his telling of the narrative focuses is God.³⁴⁹

Luke’s application of this material includes the idea that God is not confined only to Jerusalem (supporting his emphasis on the Gentile mission) and that it is not surprising (in view of history) that God’s own people rejected the king God appointed for them. God is not attached to any one place (cf. Jer 7:4–15; Amos 9:7), a point that would strike home especially after Jerusalem’s fall in 70. Further, God’s servants should expect persecution in the world, even from others who claim to be his servants (Luke 21:12).

How might Luke have applied such principles in a setting relevant to the subsequent generations where Jerusalem no longer remained the theological center? He suggests that the Spirit pushes God’s people to what we could describe as an international, multicultural vision and that tradition that holds people back from such a vision is not serving God’s purpose. This vision would also warn against limiting God’s activity to anyone’s ethnic or cultural group or to one’s Christian in-group.³⁵⁰

This passage climaxes “a series of three trials before the Sanhedrin chronicled in Acts 4–7, with escalating results (warning, flogging, and in this case death).”³⁵¹ Stephen’s

347. Most commentators recognize that he charges them (Bruce, *Acts*¹, 161; idem, *Commentary*, 142) or even returns the charge (e.g., O’Neill, *Theology*, 79; Kilgallen, “Speech of Stephen”); on the frequency of this pattern in ancient forensic rhetoric, see discussion below. The argument that the speech does not respond to the original charges and hence was originally independent (Haenchen, *Acts*, 286–89) displays little sensitivity to the rhetorical situation; Stephen builds rapport in his *narratio*, but its points prepare for his countercharge in his climax. For a fuller bibliography on Acts 7, see, e.g., Jervell, *Apostelgeschichte*, 231–32.

348. His quotations of the law provide an indirect or implicit defense; cf. Aeschines, who, charged with treason against the democracy, simply persistently condemns those who suppress democracy (*Tim. passim*, e.g., 191). For the pervasiveness of Stephen’s use of Scripture, see discussion on each passage below.

349. Rhetorical observations may support this theocentric approach. Parsons, “*Progymnasmata*,” 58n45; idem, *Acts*, 91, notes that orators would repeat a term in different inflections to identify the subject of a speech and that the speech includes θεός inflected in four cases (though most often [twelve times] in the nominative). Θεός is also the final word of Acts 7:56, a climactic pronouncement (which Parsons, “*Progymnasmata*,” 58n45, counts as the end of the speech).

350. In modern terms, perhaps akin to denominations, movements, cliques, or other sorts of identifying principles, as opposed to Christ (cf. perhaps Luke 9:49–50).

351. Witherington, *Acts*, 252.

death is “a turning point” in the narrative,³⁵² through which the church passes from a phase of popularity in Jerusalem (2:47) to one of persecution and scattering (8:4). Other Jewish sects or visionaries challenged the temple,³⁵³ but most of them did so privately or from a distance, like the wilderness sectarians of Qumran. The early Christian leaders, however, were vying with the temple authorities for the leadership of Jerusalem’s Jewish faith, a conflict that would ultimately lead to Stephen’s martyrdom as it had led to that of Jesus. Unlike the apostles, who acted as a group, Stephen here (like Paul later) had to stand trial alone.³⁵⁴

If one wonders why Luke provides a lengthy speech (in fact, the book’s longest) at this critical juncture in the narrative, we should remember that speeches were part of the action in Hellenistic histories, whether generals’ speeches before battle or forensic speeches in a courtroom (though these reports often treated both sides at length). Like Stephen’s speech, these speeches in moments of crisis sometimes recalled earlier history, placing the events of the literary context in a broader chronological context of analogous events.³⁵⁵ This is the longest survey of salvation history in Luke-Acts and offers insight into Luke’s agenda: Jesus and the experience of the church (7:51–52) continue and climax earlier biblical experience, a living experience of God’s activity in the present (cf. 2:17–18).

Because speeches often provided the author’s perspective on their narrative context,³⁵⁶ scholars find strategic theological commentary here. Stephen develops both the theme of God’s fulfillment of his promises (e.g., 7:17) and the theme of the opposition to agents of promise that appear in each generation (e.g., 7:9, 27–28, 35–37).³⁵⁷ This conflict is often portrayed in somewhat supersessionist terms³⁵⁸—for example (though some are more supersessionist than others): Jerusalem’s stubbornness would justify the Gentile mission;³⁵⁹ Stephen was the first to recognize the movement’s need to expand beyond Jewish categories;³⁶⁰ Stephen’s answer to the charges (6:11, 13–14) shows why the church moved beyond the temple and the law;³⁶¹ the conflict caused by the truth identifies Stephen as a paradigm for true biblical interpretation and true descent from Abraham;³⁶² Luke uses this speech as “a farewell speech to Judaism”;³⁶³ Stephen pushes the Hellenist agenda to reject the temple and purify the canon.³⁶⁴

But to the extent that Stephen’s speech represents Luke’s theology (as well as any historical tradition behind the speech), it does not represent a break with the law (7:38, 52–53).³⁶⁵ Because Stephen argues from the law, the reverse would in fact appear more

352. *Ibid.*

353. See comment on Acts 6:13–14.

354. His stand could be viewed as strategic historically; cf. Jewish tradition regarding the importance of solitary figures (e.g., Ezra or Akiba) rising in their various generations to preserve the law (*Sipre Deut.* 48.4.1).

355. Johnson, *Acts*, 120, cites Hdt. 9.26–27; Thucyd. 1.3.68–70; 2.6.35–47; Jos. *War* 5.376–419.

356. See the commentary introduction, Keener, *Acts*, 1:265–66, and sources cited there.

357. Dahl, “Abraham,” 147–48 (though the language of “disinheritance” [148] is strong it is applied corporately); Stephen viewed the fulfillment and the rejection as both climaxed in his day.

358. Positive supersession was certainly understandable; thus Plutarch does not criticize Cicero’s poetry, noting that it is not celebrated because greater poets followed him (*Cic.* 2.4).

359. O’Neill, *Theology*, 87.

360. Stanley, *Resurrection*, 36. The claim of expanding traditional categories is true, but the demand for this already existed in segments of Judaism.

361. Kilgallen, “Function of Speech.”

362. Richard, *Composition*, 358.

363. Richard, “Joseph Episode,” 265.

364. Simon, *Sects*, 101, 105.

365. Dunn, *Acts*, 90–91, agrees, though he thinks that Stephen saw Solomon’s temple as a misunderstanding (Acts 7:48–50), and he allows for a break with the law in Acts 15.

likely!³⁶⁶ That conflict over geographic centralization scattered the church (and led to conflict over ethnic centralization) is, however, inescapable here (8:4). The speech's theology of decentralization regarding the land provides theological groundwork for the church's mission, in line with Luke's thesis (1:8).³⁶⁷

It is also important to note that, contrary to anachronistic perspectives (argued from the vantage point of later Christian anti-Semitism), Luke does not present Stephen's speech as anti-Jewish. Stephen accepts the temple as God-ordained but abhors its abuse; this is hardly anti-Judaism.³⁶⁸ Stephen's polemic is intra-Jewish and delivered "in the style of *Israel's* classical prophets."³⁶⁹ Intra-Jewish polemic appears throughout Second Temple sources and comes in harsher shades than this (such as Qumran's denunciation of apostate Israel as a "congregation of Satan").³⁷⁰ The speech fits the ideology of other Jewish sects like Qumran who saw themselves as the righteous remnant and viewed most of their people as apostate.³⁷¹ Stephen appeals to biblical common ground; the only explicit "Christian" elements added to the OT are the present applications to continuing resistance in 7:51 and the recent killing of Jesus, implied in 7:52.³⁷²

Theologically, the issue in Acts 7 is not Jewish people versus Gentiles. Although Luke emphasizes the Diaspora mission, he affirms heritage as well as mission and respects the Jewish people (see our introduction, ch. 14), of whom Stephen was himself one. The speech may instead contrast intransigent human power and institutions, such as those before whom Stephen is tried, with the activity of God through those who dynamically follow him, such as Stephen. From an early Christian perspective, Stephen's historical emphases appear uncomfortably relevant to Stephen's audience in the narrative. These emphases would also be respectable to Luke's milieu, which normally valued prophetic revelation so long as it was not subversive toward the Roman government.

Stephen points away from Israel's possessions and institutions to God himself. God did give the land that Stephen's hearers held sacred, but not every generation experienced that promise (7:5–6), and the purpose of giving the land was not as an end in itself but for divine worship (7:7). Possession of the land came through Abraham's faithful obedience to God's new revelation (7:2–3), not dependent on the sort of institutions, places, or power that Stephen's audience took for granted. God fulfilled his purposes for Joseph, though the latter was outnumbered and overpowered by his brothers (7:9), just as God's movement in Stephen's day lacked the prestige and power of its opponents (cf. 6:12).³⁷³ Through God's signs, God showed that he

366. Cf. Longenecker, *Paul*, 133n33; Njoroge wa Ngugi, "Catechetical Discourse" (who sees Luke's purpose in the speech as catechetical, showing the church grounded in the OT).

367. See Scott, "World Mission."

368. Bachmann, "Stephanusepisode," 561 (contrasting real anti-Judaism in *Barn.* 16.1–10); Rhodes, "Tabernacle" (relativizing rather than denouncing the temple). For discussion of genuinely anti-Jewish sources in antiquity, see Keener, *Acts*, 1:464–65. Parsons, *Acts*, 107–8, shows that the speech follows conventions for contrasting positive and negative characters and is not anti-Jewish.

369. Spencer, *Acts*, 81. For Luke's prophetic characterization of Stephen, see Stronstad, *Prophethood*, 86–90.

370. See 1QH^a X, 22; esp. Johnson, "Slander"; cf. (on Matt 23) also Overman, *Gospel and Judaism*, 16–23. Sometimes intra-Jewish disputes indeed became violent; in the Scrolls, see 1QpHab VIII, 8–12; IX, 4–7; XII, 5; 4QpNah I, 11; between Pharisees and Sadducees, *Jos. Ant.* 18.17; *m. Yad.* 4:7; *t. Hag.* 3:35; *Nid.* 5:3; see further documentation in Keener, *Matthew*, 352–53. Later rabbis even accused some Shammites of such violence against Hillelites (*y. Sabb.* 1:4). In the first century, however, such violence was more often spontaneous and rarely official (see comment on Acts 23:2, 10).

371. See Donaldson, "Sectarian Nature."

372. With Spencer, *Acts*, 81.

373. The narrative connections between Stephen and the biblical predecessors he cites are manifold, e.g., the "wisdom" of Stephen and his companions (6:3, 10) and that of Joseph (7:10) and Moses (7:22), the only

was with Moses rather than the powerful Pharaoh (7:36), just as signs confirmed that God was with the minority movement to which Stephen belonged rather than with its powerful opponents (6:8).³⁷⁴ The tabernacle and even temple originated in a dynamic relationship with God, which continued in Stephen and his allies, not in entrenched positions of hereditary power, such as Jesus's early movement saw in the temple establishment of their day.³⁷⁵ Stephen thus sees continuity with an earlier biblical pattern in which God often worked through a suffering or marginalized people, while those with power were often blind to God's activity.³⁷⁶ The temple's destruction would appear a vindication of Stephen's approach; mission would necessarily take precedence over previous centers of power.

I. RHETORIC OF ACTS 7

Because Luke has made clear that Stephen is a Hellenist (6:1, 5) and that his speech is irresistible (6:10), Luke's ideal audience will likely read this speech in light of standard audience expectations for Greco-Roman speeches. The language is not ornate, but this would not be expected in a speech summary or necessary in a speech that thoroughly embodies and echoes the LXX.³⁷⁷ Although the three major forms of rhetoric overlapped in practice, Stephen's speech is plainly forensic, though it is unexpectedly offensive rather than defensive.³⁷⁸ Some scholars have compared its structure to that of ancient Israelite speeches (which it may echo), especially historical retrospectives, such as Josh 24.³⁷⁹ The heavy Jewish elements might help explain why it does not fit Greco-Roman rhetorical conventions as well as do Paul's defense speeches in the final quarter of Acts.

Scholars debate the value of rhetorical analysis for letters, but for speeches ancient critics themselves would have read Acts in rhetorical terms. If we take Cicero's *Pro Quintio* as a typical defense speech, the proem is followed by a lengthy *narratio* (*Quinct.* 3.11–9.33), a statement of the case (10.36), the proving of his case (11.37–27.85), and a summary of what he has proved (28.85–29.90). The proofs repeat events as the *narratio* does, but they are not arranged chronologically as in the *narratio*.³⁸⁰ Stephen is less explicit about his agenda at the beginning (becoming most explicit only in Acts 7:51–53), but this stealth approach is necessary to gain him time to complete the speech.

Dupont's basic rhetorical outline of Stephen's speech follows the passage helpfully, though some might dispute where to divide the *narratio* from the argument.³⁸¹

1. *Exordium* (7:2a)
2. *Narratio* (7:2b–34)

uses of this noun in Acts (sometimes in paired form; cf. also Luke 2:40, 52); cf. also Moses being powerful (in speech) with the power of Stephen (for miracles; 6:8; 7:22).

374. Possibly Luke draws on earlier Christian precedent for paralleling some powerful Jewish interests with those of Pharaoh; cf. Matt 2:16 and, more generally, Rom 9:15–17.

375. As noted in the discussion of Acts 4, above, Herod allegedly executed the former sanhedrin that had resisted him (*Jos. Ant.* 14.175); he could then assemble his own councils as needed (*Ant.* 16.357, 360; 17.46). Since Herod's day the body had probably been self-selecting but undoubtedly drew most of its members from the local hereditary aristocracy.

376. For the idea in Pauline Christianity, see, e.g., 1 Cor 1:18–31; 2 Cor 12:9–10; 13:4.

377. For the large narrative, too, "simplicity" might be preferred (*Men. Rhet.* 2.7, 411.23–24).

378. Soards, *Speeches*, 58; Witherington, *Acts*, 260. For the emphasis on counteraccusation here, see also Kennedy, *New Testament Interpretation*, 121–22.

379. Kennedy, *Classical Rhetoric*, 129; on historical retrospectives, see below.

380. Perhaps relevant for Acts 7:36–47 if we follow Dupont's outline below.

381. Dupont, "Structure oratoire"; mostly followed by Witherington, *Acts*, 260–61; similarly, Bock, *Acts*, 277. Marguerat, *Actes*, 231, suggests a double *narratio* (Acts 7:2–34, 44–47) and *argumentatio* (7:35–43, 48–50). Pervo, *Acts*, 179, surveys multiple options but plausibly warns that Acts 7 is defective as a normal Greek speech.

3. Transition (7:35)
4. *Argumentatio* (7:36–50)
5. *Peroratio* (7:51–53)

Narrative introductions suited not only forensic speeches³⁸² but also dialogues (Tac. *Dial.* 1–3) and other genres, including even ancient Near Eastern treaties³⁸³ and, perhaps, argumentative (as opposed to typical) letters.³⁸⁴ Yet Stephen's *narratio* is unusually long, compared with most speeches in Acts. This may be partly because a speaker addressing a hostile audience "must follow the indirect route of *insinuatio*"; such speeches require a longer *narratio* to establish some common ground.³⁸⁵ The *narratio* is also long, however, because Luke writes a narrative work for hearers drawn to narrative and hence will include narratives within his narratives (a technique common in ancient literature, including the many digressions in Homer). By placing the narrative of Israel within his narrative, while connecting his narrative with Israel's narrative, Luke stresses again that his narrative is part of the larger metanarrative of Israel's salvific history (see the commentary introduction, ch. 14, sect. 2).³⁸⁶

Within the story world, Stephen's own audience would expect his *narratio* to rehearse the history of events leading up to the case;³⁸⁷ for Stephen, however, the events that set the stage for his case are Israel's history of contentions against the Lord,³⁸⁸ climaxing in the murder of the Messiah and yielding a countercharge against the accusers. This resembles some biblical prophetic speeches with narratives for a similar purpose (e.g., Deut 1–3 as an introduction for Deut 4; 1 Sam 12:8–11; cf. Isa 5:1–2; Ezek 16); compare also historical psalms to set the stage for prayer (Pss 105; 106). Rhetoricians sometimes reserved the most controversial part of the speech for the end.³⁸⁹

The thrust of Stephen's forensic rhetoric is his counterattack, which he saves for the end; had he stated it up front in a *propositio*, Luke's ideal audience would be left wondering how Stephen survived long enough to finish the speech.³⁹⁰ But Acts 7:6–7, though not constituting a *propositio*, probably does help provide a chronological framework for the narrative that follows: the people of Israel would be foreigners in Egypt (7:6a, 9–16); they would be enslaved four hundred years (7:6b, 17–19, though this covers only the period's final generation); God would judge Egypt (7:7a, 20–32, 20–38 or 20–44). Meanwhile, bringing them again to "this place," the Holy Land, sets the stage for discussion of the real holy place (7:33, 43–50).³⁹¹

It is of interest for the structure of the speech's narrative portion that the rhetorical historian Dionysius of Halicarnassus arranges history the way some scholars have

382. E.g., 2 Sam 14:5–7; Cic. *Quinct.* 3.11–9.33.

383. The historical prologue; see, e.g., Mendenhall, "Covenant Forms," 58–60; Bright, *History*, 151; Thompson, "Covenant," 790; Weinfeld, "Covenant Making."

384. Thus, e.g., Melanchthon analyzed Romans as judicial rhetoric, with *exordium*, *narratio*, and *confirmatio* (Peterson, *Eloquence*, 8). Against finding this in normal letters, see, e.g., Reed, "Epistle," 179–82.

385. Witherington, *Acts*, 260.

386. Wiens, *Sermon*, naturally parallels the structure of Luke-Acts with that of Stephen's speech. The parallel is, however, more explicit and therefore even likelier with Israel's history.

387. E.g., Cic. *Quinct.* 3.11–9.33; Tac. *Dial.* 19.

388. No one doubted these, though most would have objected that the history of the Gentiles was far worse.

389. E.g., Demosthenes's *De corona*; in a letter, Stowers, *Letter Writing*, 88 (citing P.Oxy. 1837); likewise, philosophers start with simple matters and then proceed to the more difficult (Epict. *Diatr.* 1.26.3). Cf. also the use of figured speech to cloak one's full intention (Anderson, *Glossary*, 58).

390. Dupont, "Structure oratoire," thinks that the charges (Acts 6:11, 13–14) function something like a *propositio*; Witherington, *Acts*, 260n267, attributes this role to 7:35 because it moves from *insinuatio* closer to a direct statement of the speech's agenda.

391. Here I have adapted insights from Dupont, "Structure oratoire."

argued Luke does, in three eras: “ancestors, Founder(s), and successors.”³⁹² (Of course, a chronological approach to history, highlighting the most noted figures, makes sense in any case.) Luke treats the early ancestors most fully in this speech (dwelling on David more in 13:22–23, 34–37). He explicitly treats the ultimate founder and successors together and only briefly at the speech’s conclusion because his countercharge must be concise to be heard at all.

II. USE OF SCRIPTURE

Readers curious about what Luke has in mind regarding the content of Jesus’s christological interpretation of Scripture in Luke 24:27, 44–45 can reconstruct the sort of passages and interpretations implied by the use of Scripture in Acts. Acts 7 provides the longest example of this interpretive approach and suggests a heavy emphasis on noting patterns of deliverers.³⁹³

(1) *Historical Retrospectives*

If orators were happy to draw on ancient quotations as “proofs,”³⁹⁴ Stephen’s speech (including not only his “proofs” but his *narratio*) consists primarily of retelling sacred stories. Historical retrospectives and lists of heroes of the faith were a common literary device, as scholars often point out.³⁹⁵ Moses recites God’s past deliverances (Adam, Noah, Abraham, and Joseph) to encourage Israel (Jos. *Ant.* 3.87); Josephus recounts history to address his own day in a speech as well as in his writings (*War* 5.379–411). Even an Ammonite commander rehearses Israel’s history from Abraham on to warn how dangerous Israel will be (Jdt 5:6–21), thereby implicitly praising Israel’s God. Other such retrospectives noted by scholars include 4 *Ezra* 3:4–36; 14:29–31; CD II, 18–V, 6. Later Christians adopted the model (Heb 11:4–32; 1 *Clem.* 4.1–5.7).³⁹⁶

Minority groups within Judaism could recount these historical retrospectives in different ways. Most such voices, whether the Qumran sectarians, or Hellenistic Jewish philosophers such as Philo, or authors of apocalypses recounting history with a view to the future, reread the biblical narratives from their own perspectives and with their own agendas. “It would have been astonishing,” Johnson suggests, “for a splinter group of Judaism such as the first Christians not to have engaged in a similar exercise.”³⁹⁷ The sharing of a (mostly) common canon usually limited the divergence of views and dictated some overlap, but the diversity of questions necessarily led to different emphases. That Luke’s retelling differs from many other perspectives³⁹⁸ is to be expected.

Historical retrospectives could call on Israel to depend on God, as in Deuteronomy’s briefer confessions (Deut 6:20–24; 26:5–9) and in Joshua (Josh 24:2–14).³⁹⁹ Other retellings emphasized repentance for continued rebellion against God (Neh 9:6–31; cf. Ps 78:1–64; perhaps Ezek 20:5–29); judgment on the wicked (3 *Macc* 2:4–7); worship (Pss 105; 106; 135:8–12; 136:10–22); continued faithfulness and

392. Balch, “Genre,” 16, also arguing that Luke denounces the unjust patriarchs. But while Luke offers a “revisionist” historical perspective (at least from the perspective of the traditional, more hagiographic reading of these narratives), he cites a legitimate pattern in these narratives.

393. Cf., e.g., Johnson, *Acts*, 13.

394. With, e.g., Black, *Rhetoric of Gospel*, 128.

395. E.g., Bruce, *Commentary*, 144; Simon, *Stephen and Hellenists*, 40–41; Richard, *Composition*, 141; Neudorfer, “Speech,” 281–83; Soards, *Speeches*, 61.

396. Cf. the brief sample in *Apost. Const.* 7.37.2–4.

397. Johnson, *Romans*, 152 (on Rom 9, another example of this pattern).

398. Notably, regarding the land; see, e.g., Pate et al., *Story*, 199–201; and discussion below. For a contemporary model, for all Scripture (OT and NT) read as a unity of Israel’s story, see Pate et al., *Story*, *passim*, who read the entire Christian canon as a unity of Israel’s story.

399. They could also be used, as they often are in the Middle East and elsewhere today, in land disputes (Judg 11:12–13, 15–27).

sacrifice (1 Macc 2:52–60; Heb 11:3–38); stricter interpretation of the law (*Jubilees*); or God’s sovereign purpose (1 *En.* 83–90).⁴⁰⁰ The very diversity of applications available in history allowed Luke considerable freedom in his own application. Given Stephen’s execution immediately after his speech, it might also be relevant that such historical retrospectives could provide exhortation in testaments, a dying father’s final instructions to his successors (e.g., 1 Macc 2:51–60 in 2:49–69).⁴⁰¹

Sometimes these retrospective views may portray the present time as a continuation of biblical history. Sirach lists many heroes of biblical history chronologically (Sir 44:16–49:13), then jumps back to earlier characters (perhaps for a climax)—Enoch (49:14; where he started in 44:16), Joseph (49:15), and figures before Enoch (49:16)—before covering the postbiblical period (Sir 50), featuring Simon son of Onias. Likewise, after tracing history from Adam (Wis 10:1–2) to Israel’s wilderness wanderings (11:2–16), Wisdom of Solomon moves to application.⁴⁰² Psalm 78 may end with David (Ps 78:70–72; cf. 78:65–69) in hopes that the Davidic dynasty can lead Israel toward a better future.⁴⁰³ One could recount past characters of history in a way that reframed the way more recent characters, or the present era, would be viewed (or vice versa).⁴⁰⁴ Among later Christian writers, Clement adds NT heroes (1 *Clem.* 5.1–6.1) to his OT list (4.1–13).

(2) Luke’s Selection Criteria

Stephen’s speech sometimes follows postbiblical traditions (e.g., Acts 7:16, 22), but as the commentary will demonstrate, he chooses them fairly conservatively and omits most of those available. He stays closer to the basic content of the biblical narratives more often than do most of his contemporaries, including those who, like Josephus, claimed to repeat them carefully.⁴⁰⁵ The speech does employ numerous first-century Jewish interpretive techniques (such as midrashic allusiveness and blending of texts) that are foreign to us today, but it also explores intertextual patterns among biblical characters more familiar to us from contemporary narrative criticism.

Ancient writers, like modern ones, were often faced with the problem of too many sources; to forestall criticism, they sometimes had to explain why they chose to focus on some matters to the exclusion of others (Dion. Hal. *Isaeus* 19–20). Luke ranges across his canon, but the combination of examples he selects is significant for the point he wishes to emphasize. That Stephen emphasizes characters first from the law before moving briefly to the prophets fits what was probably a frequent pattern for synagogue exposition (see comment on Acts 13:16–47); that so much of the speech concerns the law fits both his audience in the narrative world (which may include Sadducees, Acts 6:12; 7:1) and Stephen’s strategy of reserving the most controversial points for the speech’s final moments.

400. I have supplemented here Dunn, *Acts*, 89. Some of these texts overlap categories.

401. Some ancients thought that those close to death could foretell the future (e.g., Xen. *Apol.* 30; Gen 49; Aune, *Prophecy*, 178; Boring, Berger, and Colpe, *Commentary*, 105, 155); Stephen’s focus is past, but his insight is prophetic (Acts 7:51–52). His speech also helps explain the temple’s destruction (future from Stephen’s perspective) for Luke’s audience (Kilgallen, “Speech of Stephen”).

402. Doble, *Paradox*, 145, thinks that Wisdom of Solomon provides Luke’s model here.

403. Some, however, regard it as preexilic (e.g., Delitzsch, *Psalms*, 2:361–62; Anderson, *Psalms*, 562), but this seems unlikely (Ps 78:61–64 could refer to events at Shiloh as in 78:60, if the psalm follows chronological sequence here).

404. See, e.g., Bergren, “Nehemiah”; Borgen, “Reviewing and Rewriting.”

405. With Richard, *Composition*, 308, on this point. Surprisingly, Ps.-Philo *Biblical Antiquities* and often even *Jubilees* feel free to remain closer to the narrative than the Hellenistic historian Josephus (on whom rhetoric and apologetic make higher demands); Luke’s relative brevity and less elite audience may spare him some of Josephus’s “excesses” (from our modern historical perspective).

Ancient interpreters could narrate history (e.g., 4Q370 I) and then apply the message they found there to principles relevant for their own time (e.g., 4Q370 II).⁴⁰⁶ Early Jewish interpreters often approached biblical texts in the context of the canon, connecting them freely with other texts that helped them fill out the passages they were examining.⁴⁰⁷ Interpreters could excerpt and collect texts on related topics from different parts of the same book (e.g., 4Q365 28 + 36); they could recount God’s miracles epideictically to invite praise (4Q185 1–2 I, 14–15). Stephen finds particular patterns persisting in the narratives of Abraham, Joseph, and Moses, which introduce the book of the covenant. Although Stephen’s (Luke’s) application is specifically Christian, these recurring patterns are mostly evident within the Genesis-Exodus narratives themselves (for a much fuller treatment, see comment on Acts 7:9–16). Like some of his contemporaries, Luke understood these patterns as evidence of God’s “plan” (see comment on Acts 2:23).

J. Bradley Chance offers a helpful table comparing some of the key differences between Scripture itself and Stephen’s retelling of it (often explainable as due to use of the LXX or postbiblical early Jewish readings):⁴⁰⁸

Speech in Acts 7	Pentateuch Passage	Possible Explanations
7:2–3: God called Abram in Gen 12:1 “before he lived in Haran”	The context of Gen 12:1 shows that God called Abram <i>when</i> he was in Haran (11:31–32; 12:4–5)	Gen 12:1 says, “from your own country”; Gen 15:7 says that God brought Abram from Ur
7:4: Abram left Haran for Canaan after Terah’s death*	Abram was born when Terah was seventy (Gen 11:26) and left seventy-five years later (12:4)—long before Terah’s death at 205 (11:32)	Abram’s departure (Gen 12:5) is mentioned after Terah’s death (11:32); Philo read the passage the way Stephen did (<i>Migr.</i> 177)
7:14: Seventy-five went to Egypt	Seventy went to Egypt (Gen 46:27; Exod 1:5; Deut 10:22)	The LXX does report seventy-five (at Gen 46:27; Exod 1:5) because, instead of adding Jacob, Joseph, and Joseph’s <i>two</i> sons to Gen 46:26, the LXX claims that he has <i>nine</i> sons. Philo also notes the discrepancy (<i>Migr.</i> 200–202)
7:16: Jacob and Joseph were buried in Shechem	Though Joseph was buried in Shechem (Josh 24:32), Jacob was buried at Hebron (Gen 49:29–32)	Luke is deemphasizing the Holy Land, and the ruins of Shechem were now in Samaritan territory†
7:22: Moses’s training in Egyptian wisdom	Not noted‡	Often emphasized in postbiblical Jewish sources (e.g., Philo <i>Mos.</i> 1.20–24)
7:23: Moses visited his people at age forty	In Exodus, it is clear only that he was now grown (Exod 2:11)	Later rabbis, undoubtedly reflecting earlier tradition, divided Moses’s 120-year life into three forty-year periods
7:53: Angels mediated the law	Missing in the Hebrew Bible	This was apparently a common Jewish tradition (cf. Deut 33:2 LXX; Jos. <i>Ant.</i> 15.136; Gal 3:19; Heb 2:2)

* It is possible that Luke’s Stephen, like many modern interpreters, does not take the ages in Genesis very literally.

† The imprecision of condensation is also possible, but Luke’s theology could explain why Luke uses Shechem rather than Hebron for the condensed version.

‡ Although some Egyptian education could be assumed for a son of one of Pharaoh’s daughters.

406. See Wise, “Introduction to 4Q370.”

407. Fisk, “Genesis Apocryphon,” 401; on intertextuality, see Hays, *Echoes*; Fishbane, *Interpretation*; on a canonical approach to correspondences in history, see Longenecker, *Exegesis*, 94; cf. further Neusner, *Connection* (maintaining the importance of appropriate historical perspective).

408. Chance, *Acts*, 110 (though the wording has been adapted here). For a recent discussion of Luke’s adaptations of Genesis, see Kim, “Quotations.”

(3) *Applying the Scriptures*

Stephen's (and Luke's) application of the motifs to their own day also fits expectations.⁴⁰⁹ Those who read Israel's Scripture as Scripture naturally sought to emulate its models and interpret their lives in light of it. Thus, for example, Josephus sometimes described himself in light of various biblical characters and may have portrayed them in ways that foreshadowed (or helped justify) his own activities.⁴¹⁰ As noted in the commentary introduction (see comment there), historians found patterns in history that they believed to be divine;⁴¹¹ Luke does likewise with his narratives, but he certainly also does so with the larger story of Israel, into which the story of Jesus and the apostolic mission are embedded.⁴¹² Some Jewish teachers and Hellenistic historians, to be sure, distinguished the current time from the supernatural or heroic past;⁴¹³ but many Jewish movements, especially eschatological-restoration movements such as the Qumran community and the early Christians, saw themselves as continuing to live in "biblical" times.⁴¹⁴

God's activity in previous eras, reported in Scripture, suggested the way believers should expect God to work in their own. Thus, for example, testing and suffering were always a pattern for God's servants in Scripture, including the heroes of Acts 7 (7:3–5, 9, 27–28). This scriptural pattern fits the suffering-exaltation central to recitals of the gospel story, and Luke believed it foundational to understanding that story (Luke 24:46; Acts 3:18; 17:2–3; 26:22–23; 1 Cor 15:3; 1 Pet 1:11).⁴¹⁵ (For several biblical patterns relevant for this speech, see comment on Acts 7:9–16, 29.)

Scripture also provided another useful pattern: God nearly always surprised his people in how he fulfilled his promises to them. When God informed Abraham that the son he had obtained by natural means was not the final fulfillment of his promise but that God would provide the promised son by "impossible" means, Abraham was astonished (Gen 17:17–18; cf. 16:2; 18:12). God fulfilled his promise that Abraham would have a multitude of descendants, though to his dying day he had only one son of promise, and Isaac to his dying day had only two sons. Joseph's exaltation fulfilled divine promises (27:29; 37:7, 9), but it came through Joseph's suffering first; as noted below, significant aspects of Moses's exaltation invert the pattern of Joseph, although Moses also suffered before his exaltation. The God of Scripture was always full of surprises, revealing that even when he was keeping his promises, he would usually sovereignly surprise his people in how he did so (a pattern Paul also noticed in Scripture, Rom 11:33–34; 1 Cor 1:18–19; 3:19). Should Israel be surprised that God had fulfilled his promise of the Messiah in a way it was not expecting, obvious only in retrospect?

Early Christians understood the OT differently than their Jewish contemporaries

409. See discussion of *peshet* at Acts 2:16, though making the text applicable to one's own time was the role of all midrash (Wright, "Midrash," 133–34). Although not expository in the modern sense, preaching of Scripture in Acts is biblically grounded (Scharf, "Expository Preachers").

410. See Daube, "Typology in Josephus."

411. For historians and patterns, see esp. Keener, *Acts*, 1:571–74; for historians and theology, see 1:73, 156–58. More generally, they would also value arguments by analogy (Arist. *Rhet.* 2.23.4–5, 1397b).

412. Cf. Paul's reading of Scripture "primarily as a *narrative* of divine election and promise" (Hays, *Echoes*, 157; more fully, 155–58).

413. On historians, see the commentary introduction; on differences in supernatural activity in some Jewish sources, see, e.g., Keener, *Spirit*, 13–16.

414. Cf. Hays, *Echoes*, 170–72 (though drawing a starker distinction between early Christians and Qumran on this point). Qumran sectarians, probably more firmly than many others, also believed that they held the correct interpretive grid (Trever, "Covenanters," 129). This perspective also characterizes many Christian apocalyptic movements today; see, e.g., Robeck, *Mission*, 121–22.

415. Czachesz, "Logic," draws attention to the humiliation-exaltation pattern in Luke-Acts.

even though both shared similar interpretive techniques.⁴¹⁶ Ancient readers of texts sometimes argued over the original intention of texts; their perspectives on intention, however, could differ.⁴¹⁷ A major difference between the Jesus movement and much of mainstream Judaism stemmed from a different approach or “interpretive grid”; for most of our sources from the Jesus movement, the biblical narrative was promise, finally understood in light of its fulfillment.⁴¹⁸ As Darrell Bock puts it:

The very premise behind reading history as involving promise and pattern is divine design and the constancy of God’s character as he saves in similar ways at different times. Jewish imagery reusing Exodus motifs or new creation language shows how Judaism accepted this view of history.⁴¹⁹

Stephen’s speech reads the biblical narrative intertextually to expound God’s coherent plan in history in a way that provides the reader an interpretive grid for the charges in Acts 6:11–13.⁴²⁰ Luke will provide another example in Acts 13, which suggests that historical retrospective is important to his perspective.⁴²¹ Clearly Luke sees historical narrative as critical to proclamation; with this indicator, he suggests the purpose of his own two-volume work (as a “gospel,” so to speak, or at least a gospel and a model for further preaching it).

III. HISTORY AND REDACTION

Many scholars have argued for sources for even specific wording in Stephen’s speech, often on dubious grounds. Many others have argued against such sources, also often on dubious grounds.

(1) *Arguments for Sources*

A number of scholars have argued that Luke drew on an earlier source for Stephen’s speech.⁴²² Marcel Simon summarized the mid-twentieth-century consensus: the elements and at least some of the wording derive from a pre-Lukan source.⁴²³ Some scholars point to contrasts with other speeches to argue that even if Luke composed the other speeches, this one depends on preexisting material (whether or not that material goes back to Stephen).⁴²⁴ Martin Scharlemann regards the speech’s “vocabulary and style” as “so unusual in places as to be inexplicable if the author of Acts was interested only in creating variety by literary *fiat*.”⁴²⁵ Why, he asks, would Luke leave “awkward connections” and elements foreign to his own style?⁴²⁶

416. Pace Scharlemann, *Stephen*, 80, christological interpretation did not require abandoning traditional exegetical techniques (see Longenecker, *Exegesis*, passim).

417. Greek legal interpreters in the same way sometimes sought to ascertain a lawgiver’s intention and/or courts’ interpretations of the law that reinforced it (*Rhet. Alex.* 1, 1422b.20–25; Hermog. *Inv.* 2.2.110–12).

418. Bock, “Scripture and Realisation of Promises,” 43–44. Qumran’s pesher approach to Scripture may have been similar, but Luke’s large-scale appropriation of biblical patterns here is distinctive enough to be significant.

419. *Ibid.*, 47.

420. See, e.g., Njoroge wa Ngugi, “Stephen’s Speech.” One may compare Luke’s mentor Paul, who, as Hays puts it (*Echoes*, 157), “finds the continuity between Torah and gospel through a hermeneutic that reads scripture primarily as a *narrative* of divine election and promise.”

421. Acts 13 provides the closest parallel to Acts 7 (Neudorfer, “Speech,” 281–82).

422. E.g., Scharlemann, “Speech: Lukan Creation?”; Lenski, *Acts*, 15, 259–60; Marshall, *Acts*, 133; D. Williams, *Acts*, 128 (following Dunn, *Unity*, 270–71); views noted in Weiser, *Apostelgeschichte*, 180–82. Pervo, *Acts*, 176, notes that this is a very widespread position and surveys the options (175–78; concluding, however, that no source is certain here).

423. Simon, *Stephen and Hellenists*, 39–40.

424. Klijn, “Stephen’s Speech,” 25–28.

425. Scharlemann, *Stephen*, 24.

426. *Ibid.*, 29–30.

Others note that Stephen's thorough use of the language of LXX passages usually without explicit quotation "suggests an extemporaneous speech rather than a conscious literary composition."⁴²⁷ Aside from the fact that this approach would make much of Luke-Acts merely "extemporaneous," it assumes that Luke had traces of Stephen's actual wording rather than the report of the gist.⁴²⁸ This is unlikely in Stephen's speech (in contrast to traditions passed down in school settings, such as those of Jesus's disciples). It could reflect Luke's use of a written source (if not verbatim from Stephen), but this question invites further exploration.

John A. T. Robinson sees the sermon, which does not emphasize Christology, as "pre-messianic from beginning to end."⁴²⁹ Dunn offers the following arguments for a pre-Lukan source that Luke has adapted to fit his own presentation:

1. It is overtly Christian only at the end and (unique in Acts) lacks a call for repentance.⁴³⁰
2. It is unorthodox (the burial in Shechem, 7:16).
3. Circumcision (7:8) is not yet problematic, and so this is pre-Pauline.
4. The temple is denounced (7:48), in contrast to Luke's usual view (Luke 1:8–23; 2:22–38, 41–50; 24:53; Acts 2:46; 3:1; 5:42).

Dunn therefore suggests that this speech derives from the Hellenist source followed throughout Acts 6–8.⁴³¹

At least one of these arguments is without merit: the lack of polemic against *Jewish* circumcision (point 3) does not conflict with Luke's (Acts 16:3; 21:21) or Paul's (1 Cor 7:18; Gal 5:6; 6:15) theology. Other arguments are of limited merit: the practice of writing speeches "in character"⁴³² could allow for a measure of diversity in a historian's speeches.

Moreover, it is not as clear as some scholars have asserted that this speech differs from Luke's usual theology on the points claimed. Thus some question whether one can identify pre-Lukan tradition here. The emphasis on salvation history is also Lukan, and the lack of christological emphasis until the end is explicable on rhetorical terms appropriate to the situation depicted here. This is not to deny that such features may point to earlier tradition (at some points, they at least may increase this likelihood); it is merely to note that they could also be individually explained on other grounds.

(2) Arguments against Sources

Some arguments against the speech's authenticity are at least equally strained. Some claim, for example, that Luke's account of the speech depends fully on the LXX (Acts 7:38, 43, 45) and regard it as doubtful "that the whole hearing was conducted

427. Bruce, *Acts*¹, 167. Haenchen, *Acts*, 286–89, thinks that this speech was originally independent because it does not answer the charges in Acts 6:11–13, but this approach misunderstands the speech's rhetoric.

428. Luke, who is consciously producing a literary work, would also have the ancient historian's freedom to reshape the speech for his audience's standards.

429. Robinson, *Studies*, 151.

430. O'Neill, *Theology*, 89, even doubts that Stephen was a Christian (attributing to Stephen's disciples [94] the identification of his Son of God vision with Jesus). This is an extreme position that ignores the narrative context, which has better claim to historicity than the content of a speech.

431. Dunn, *Acts*, 92. With many other scholars, Dunn notes (*Partings*, 65) that Acts 6–8 coheres so well as to suggest a source. These chapters might, however, simply reflect Hellenist perspectives reported through Paul and Philip. Many contrast Stephen's radical approach with Luke-Acts elsewhere (e.g., Hays-Pratts, *Believers*, 215); while these observations are not without merit, characterization often varied among figures in the same writer.

432. See the commentary introduction, Keener, *Acts*, 1:284–86.

in Greek.”⁴³³ But since the hearing involved especially Hellenists (6:9, 12), who may have spoken only Greek, and since the Sadducees were the most likely members of the Sanhedrin to have participated in the hearing, Greek is, in fact, the likely language of the proceedings. (Romans also accommodated Greek language in eastern Mediterranean courts, since it was the lingua franca of the urban East.)⁴³⁴ Because Stephen was a Hellenist, it is also likely the language in which Stephen studied Scripture and preached.

Some also date Stephen’s speech shortly after the temple’s destruction.⁴³⁵ But many before 70 C.E., employing OT language, denounced the temple and/or predicted its demise far more explicitly than we can argue Stephen’s speech does;⁴³⁶ such predictions do not reveal their date. This is especially the case if we grant that the early Christian source Q, which also announced Jerusalem’s demise, is pre-70 (Matt 23:35, 38; Luke 11:50–51; 13:35; cf. Mark 13:14)⁴³⁷ or that Jesus overturned tables in the temple as a sign of imminent judgment (Mark 11:15–17).⁴³⁸ (Naturally, those of us who date Acts after 70 will see the influence of such an event on the shaping of Luke’s narrative, as in Luke 21,⁴³⁹ but this perspective does not settle the question of whether Luke drew on historical tradition or, if he did, of how much he drew.)

Others point to clear signs of thorough Lukan composition.⁴⁴⁰ Even the emphasis on prophecy fulfillment in the speech, some argue, is characteristic enough of Luke to point to his authorship.⁴⁴¹ It is clear that Luke writes the speech in his own words, and it can be integrated without serious conflict into his theology. Some therefore doubt that Luke had access to much tradition about Stephen.⁴⁴² Yet Luke incorporates plenty of tradition into his Gospel while selecting and arranging it according to his own literary purposes. Indeed, advocates of a source themselves do not deny Luke’s freedom to put the account into his own words.⁴⁴³ This observation does make sources difficult to demonstrate (despite the suggestion of *some* dissonance between the speech and Luke’s theology, offered below), though, of course, neither does it refute sources; historians customarily rewrote material—above all, speech material—in their own words.⁴⁴⁴ This argument is stronger than the other arguments against authenticity, but if pressed elsewhere in Luke or Acts, it might yield *no* pre-Lukan material (despite our clear external evidence to the contrary).

Although Stephen’s perspective on the temple serves Luke’s purpose, it does appear to go beyond the voice of other reliable characters in Acts. Thus Luke “almost bends over backwards to show Paul in a conciliatory mood towards the Temple ([Acts]

433. Dunn, *Acts*, 91–92, though he (like Witherington, *Acts*, 261) notes that this means simply that Luke reported the summary in his own words.

434. E.g., Winter, “*Captatio benevolentiae*,” 526; see comment on Acts 18:12–13.

435. Conzelmann, “Luke’s Place,” 309.

436. See discussion at Acts 6:13; also Keener, *Matthew*, 560–62, and sources there (see esp. *Test. Mos.* 6:8–9; cf. *1 En.* 90:28–29; 11QT XXIX, 8–10; 1QpHab IX, 6–7; Josephus *War* 6.306–9; *Test. Levi* 15:1).

437. Theissen, *Gospels*, 203–34, esp. 220–21, 230–32, dates Q to the 40s. Caligula’s attempt to install his statue in the temple may have fueled further interest in the subject at that time.

438. With, e.g., Harvey, *History*, 131–32; Aune, *Prophecy*, 136; Catchpole, “‘Triumphal’ Entry,” 334; Sanders, *Jesus and Judaism*, 70, 364n4; Keener, *Matthew*, 500–501.

439. For Luke’s using Stephen’s speech to help explain the temple’s demise in 70, see, e.g., Kilgallen, “Speech of Stephen”; Taylor, “Temple,” 720–21.

440. Hill, *Hellenists*, 82–90; Kilgallen, *Speech*, 121–63; also Koester, *Introduction*, 2:90. Hill summarizes and counters various specific source theories: Aramaic, Alexandrian, and Essene sources (*Hellenists*, 92–93); the Antiochene source (93–95); the Samaritan source (95–99; see below); the “neutral” source (99–101).

441. Dahl, “Abraham,” 147 (contrasting other recapitulations of history).

442. Hill, *Hellenists*, 101.

443. E.g., Simon, *Stephen and Hellenists*, 39; Scharlemann, *Stephen*, 23; Richard, *Composition*, 239–41.

444. See the commentary introduction, Keener, *Acts*, 1:178–79, 201, 230, 258n7, 268, 277, 281, 302.

21.26; 22.17; 24.12, 18; 25.8).⁴⁴⁵ Though Stephen is not really against the temple in the larger context of Luke's report⁴⁴⁶ (and Luke uses Stephen's words to serve the broader context of his own theme, Luke 21:5–6), he may sound, on the whole, more antitemple than Luke is (esp. in Acts 7:43, 47–50). Certainly, Stephen's accusers thought him opposing the temple (6:11–14; 7:58–60). One could therefore suggest that Luke tones down and tames an antitemple speech, but this conclusion is still not necessary. An institution's guardians often perceive attacks against its abuse as attacks against the institution itself (cf. Mark 14:58). Before his conversion, Paul, who is the likeliest candidate for Luke's primary source here,⁴⁴⁷ would have understood the basic outline of the speech as antitemple, but afterward he may have appreciated that Stephen merely opposed misplaced veneration of the temple.

(3) *Mediating Approaches*

Barrett doubts that the material in the speech stems from a trial but accepts much of it as historically valuable for insights into the views articulated by Stephen and some fellow Diaspora Jews.⁴⁴⁸ Although Lüdemann rejects the historicity of most of the story, he does accept as historical "Stephen's criticism of law and cult," judging that "the expulsion of those of like mind from Jerusalem is the best reason for such an assumption."⁴⁴⁹ One can question, however, whether even Luke limits the expulsion only to those of like mind (Acts 8:4), and we have already questioned whether Stephen, in fact, criticizes the law itself.

Still, it is likely that the basic substance (or for many not in leadership, at least the rumored basic substance) of both the charge and the response would have been remembered by Jerusalem Christians and certainly by the scattered Hellenists such as Philip and (in a different way) Saul. As Kennedy points out, "The first martyrdom was a turning point for the Church, and the substance of what Stephen said may thus have been remembered."⁴⁵⁰ This was not Stephen's only speech (6:10), and in an oral culture Stephen's friends (such as Philip) and enemies (such as Saul) would likely have remembered key themes of his preaching, especially if they were taken up by others afterward. Probably most exegetes still favor Simon's view that essential elements are pre-Lukan, though most are also more skeptical of our ability to discern a pre-Lukan source on the basis of peculiar wording.⁴⁵¹ Although specific evidence of sources continues to be debated (and source criticism in general is no longer in vogue), Luke's historical work where we can test him suggests that here, too, he works from sources. Given his association with Paul and (for several days) with Philip, Luke should have had plenty of material for all of Acts 6–8, however he may have thought best to package it. He may have known the basic charges against Stephen and the kinds of arguments with which Stephen countered them; Luke could then flesh out that argument concretely. Given his usual willingness to settle for much briefer speeches, he may for this speech have a fuller or even fairly substantial idea of what Stephen

445. Dunn, *Partings*, 64–65.

446. Sweeney, "Stephen's Speech," contending that Luke is not antitemple, even argues that Luke's focus here is not the temple but salvation history.

447. Suggested also by others, e.g., Witherington, *Acts*, 261.

448. Barrett, *Acts*, 339; for the theology of Stephen and his movement here, cf. also Taylor, "History and Tradition."

449. Lüdemann, *Christianity*, 93; cf. Koester, *Introduction*, 2:90 (citing Acts 6:11, though doubting 6:13–7:53).

450. Kennedy, *New Testament Interpretation*, 122.

451. Cf. Simon, *Stephen and Hellenists*, 39–40. Cf., e.g., Marguerat, *Actes*, 235: Luke reshaped a source from the Hellenists, but one that we cannot reconstruct.

and/or those aligned with him often taught. But we should avoid overestimating our ability to reconstruct the sources.

IV. ACTS 7 AND THE SAMARITANS

Scholars have often looked for a Samaritan source or Samaritan connections here. Some have used such “Samaritanisms” to demonstrate the authenticity of the speech, opining that Luke (despite his Samaritan interests, Luke 9:52; 10:33; 17:11, 16; Acts 1:8; 8:1–25; 9:31; 15:3) could not be responsible for these.⁴⁵² Those who find numerous Samaritanisms here sometimes suggest that Stephen was influenced by the Samaritans, particularly regarding the temple.⁴⁵³

On the historical level, Stephen’s colleagues apparently began a Samaritan mission soon after his death (Acts 8:5), but does this likelihood suggest deliberate Samaritan connections on Stephen’s part before the mission began?⁴⁵⁴ Would a Hellenist *be* a Samaritan (though cf. comment on Acts 8:5 regarding Sebaste)? And if 8:5–25 reveals a Samaritan source, would this source also cover Stephen’s earlier preaching, before the Samaritans’ conversion (7:2–53; yet summarize Philip only in 8:5–25)?⁴⁵⁵

Most of Stephen’s retrospective derives from the Pentateuch, which would fit Samaritan expectations. For Samaritans, only the Pentateuch was “canonical”; their version of Joshua was not biblical but part of their “chronicles.”⁴⁵⁶ But Jewish expositors often started with and focused on a Pentateuch text; Sadducees (relevant for the reported Sanhedrin setting, cf. 6:12; 7:1) may have also (according to some views) emphasized the Pentateuch;⁴⁵⁷ and once Stephen becomes more explicit in the prophets, he cannot confidently count on much more time to speak uninterrupted. Further, his retrospective includes Joshua, David, and Solomon (even if Solomon might not be fully positive in 7:47) and quotes prophets the Samaritans rejected (7:45–50).

Fitzmyer’s critique of the various Samaritan theses is accurate: since Samaritans valued Mount Gerizim, Stephen’s geographic universalism would undermine their theology as well as that of Jerusalemites.⁴⁵⁸ Neither Samaritan sources nor variant textual traditions are necessary to explain details; these apparent anomalies may simply reveal “the conflation and inexactitude of popular Judaism.”⁴⁵⁹ Most Samaritan

452. Scobie, “Origins and Development,” 396. Scobie believes that the source was Samaritan (“Source Material,” 405–12) but revised in a Christian tract before reaching Luke (412–15).

453. Scharlemann, *Stephen*, 19. Cf. Spiro, “Samaritan Background”; perhaps Le Cornu, *Acts*, 330 (but questioned [340]).

454. Cf. Scharlemann, “Speech: Lucan Creation?”

455. That Acts 8:26–40 is outside the range of Samaritan knowledge makes it far more likely that Philip was the source for both accounts; Luke stayed with Philip (Acts 21:8, 10), but he gives us no indication of having gone out of his way to visit Samaria.

456. Bowman, *Documents*, 61. Bóid, “Transmission,” thinks that elements of the Samaritan version of Joshua-Judges may reflect an earlier source than the MT or the LXX; whether or not this is correct, the observation underlines the observable differences between the recensions.

457. See Jos. *Ant.* 13.297; 18.16 (but Josephus explicitly refers here only to Sadducean denial of the oral Torah, not post-Mosaic Scripture); Pharisees, in debating with Sadducees, used especially the Pentateuch. Again, this need not mean that Sadducees denied the rest of Scripture (like Samaritans), but the Torah held pride of place (witness Philo’s focus almost exclusively on the Pentateuch).

458. Fitzmyer, *Acts*, 368. Jewish texts report not simply Samaritan repudiation of Jerusalem but Samaritans’ competition between Jewish and their own holy sites (e.g., *Gen. Rab.* 32:10). Samaritans also valued the past (and eschatological) tabernacle (see Pummer, “Tabernacle”).

459. Longenecker, *Acts*, 136. Richard, *Composition*, 41, thinks that Luke’s use of the LXX here makes variations from the LXX all the more significant; these may stem, however, from different text types, the interpreter’s freedom to paraphrase relevantly, and the quoter’s freedom to paraphrase by memory. Parsons, *Acts*, 105, helpfully emphasizes the use of paraphrasing citations in rhetoric more generally (citing Theon *Progymn.* 108P).

“distinctives” echoed in the speech appear elsewhere in early Judaism.⁴⁶⁰ Samaritans themselves may have been influenced by, more than influenced, the sort of Hellenistic Judaism reflected in Acts 7 (perhaps especially given the proximity of Sebaste). The only distinctive Samaritan element is the burial of the twelve patriarchs; everything else appears in Jewish sources.⁴⁶¹ This element may derive from ethnic cross-fertilization of traditions, perhaps among early Christians themselves (see 9:31; 15:3 for continuing interaction). In the end, most scholars have been unpersuaded by Samaritan sources or distinctives.⁴⁶²

Luke’s primary biblical version in the speech is unquestionably the LXX (see the following commentary on the speech, *passim*),⁴⁶³ and elements resembling the “Samaritan Pentateuch” are not usually distinctively Samaritan.⁴⁶⁴ (Discussion below focuses primarily on the most common Septuagintal readings rather than digressing at greater length to note divergent LXX texts.) Readings known to us primarily or only from the Samaritan Pentateuch⁴⁶⁵ may have been available to ancient readers from other sources. The Samaritan Pentateuch’s readings sometimes agree with the text type found in pre-Masoretic sources, such as Qumran or the most common extant version of the LXX.⁴⁶⁶ Thus the expanded form of Exod 20:19–21 in the Samaritan version is also attested in 4Q158 frg. 6.⁴⁶⁷ Another fragment (4QNum^b) is closer to the Samaritan than to LXX or MT readings.⁴⁶⁸

Some parallels, however, are questionable; for example, some supposed proto-Samaritan elements (e.g., in 4QDeutⁿ) may simply handle the text in a manner similar to the Samaritan Pentateuch.⁴⁶⁹ More important, despite agreements with other early sources at points, the Samaritan Pentateuch’s readings diverge from other sources more often than do most of our other text traditions;⁴⁷⁰ for example, Terah’s age in the Samaritan Pentateuch for Gen 11:32 was 145 years, but 205 years in the MT, the LXX, Josephus (*Ant.* 1.152), and apparently 4Q252 1 II, 8–10. Obviously, other manuscripts would not agree with the Samaritan conflation of

460. Cf. likewise Bowman, “Samaritan and Pauline Theology” (on comparisons of Paul with Samaritan thought). Cf. even Coggins, “Samaritans and Acts” (who emphasizes “Samaritanisms” in Acts 7), 433: Samaritan elements there “may emanate from a milieu analogous to, if not precisely identifiable with, Samaritanism.”

461. Neudorfer, “Speech,” 293–94.

462. With Richard, “Samaritan Evidence”; Witherington, *Acts*, 265.

463. Scharlemann, *Stephen*, 20, argues that Samaritans early adopted the Greek language and perhaps a pre-LXX Greek translation of the OT.

464. With, e.g., Mare, “Acts 7.”

465. Some scholars argue for Samaritan originals of some works (Kugler, “Evidence,” but, in my opinion, questionably); Schorch, “Bedeutung,” argues that Samaritan oral tradition for vocalizing the Hebrew Bible may sometimes preserve a more original reading than the MT and the LXX. (Throughout the commentary, when I speak of the “LXX,” it should be understood that I refer to a family of texts, not as if there were a single LXX text.)

466. See, e.g., Koester, *Introduction*, 1:248; Wevers, “Scrolls”; for one early collection of studies on the Scrolls and text criticism, see Cross and Talmon, *Qumran and History*. Qumran texts often read closer to the LXX than to the MT (e.g., Cross, “Fragment”; idem, “Manuscripts”; Orlinsky, “Text Studies”; Vermes, *Scrolls in Perspective*, 204; Martone, “Septuagint”; Wevers, “Scrolls”). Greek fragments there (Orlinsky, “Text Studies,” 32) also reflect diverse textual traditions (Miller, “Fragments”).

467. Skehan, “Exodus,” argues that Qumran’s Exodus is often closer to the Samaritan Pentateuch than to the MT.

468. Vermes, *Scrolls in Perspective*, 204.

469. Owen, “4QDeutⁿ.” For arguments for some proto-Samaritan readings in the Qumran scrolls, see, e.g., Jastram, “Comparison”; Tov, “Compositions.”

470. On its secondary character, see, e.g., Bowman, *Documents*, 18 (though the Qumran scrolls have improved our picture of the Samaritan Pentateuch’s value since Bowman’s writing). Some rabbinic objections to Samaritan use of the law concerned merely liturgical arrangement (see Bowman, *Documents*, 2, 4, 27, 31–35).

the ninth and tenth commandments to make room for their own tenth commandment, to build an altar on Gerizim (Deut 27:3–5).⁴⁷¹ Further, many of the earlier readings in the Samaritan Targum resemble the Masoretic Text, perhaps pointing to an earlier *Vorlage*.⁴⁷²

Even the LXX we know was not yet standardized. Josephus used a Greek text closer to 4QSam^a than to the MT, and the OT Chronicler apparently did the same.⁴⁷³ The Samaritan Pentateuch probably diverged from the tradition that led to the standardized MT early enough to point to an early text type; this text type may stand behind Acts 7 without any direct dependence on the Samaritan Pentateuch.⁴⁷⁴

V. HELLENISTIC JUDAISM

Whatever else Stephen was, he was a “Hellenist” (6:1–9). To classify him as a Hellenistic Jew is therefore not very controversial. Unfortunately, it is also not very helpful; since all but the most rural Jews in the empire were somewhat hellenized, the label is not very restrictive if one does not specify the extent and nature of hellenization. Two scholars may use the label to signify very different levels of Hellenism. What the discussion should lay to rest are any protests emphasizing “primitive” Semitic traits “beneath” a hellenized exterior.

Some scholars use Stephen’s “Hellenism” to explain too much. For example, Simon contends that Stephen held his antitemple views as a “Reform” Jew before his conversion.⁴⁷⁵ Opposition to the temple (or, more properly, to the temple hierarchy who had defiled it) was not, however, a distinctively or even commonly “Hellenist” trait (more characteristic of the Essenes, some apocalyptic visionaries, or a Judean prophet such as Jesus son of Ananias)⁴⁷⁶ and could stem from early Christian conviction about a new temple (probably analogous to Qumran’s).⁴⁷⁷ Stephen differed from most critics of the temple (except, in a sense, Jesus son of Ananias) in that he publicly challenged its guardians in Jerusalem. This is a difference not of theology about the temple but of temperament or character, fitting a prophet “full of the Spirit” (6:3, 5, 10).

Others have sought to identify Stephen’s Hellenistic background with more precision, connecting him, for example, with a background in Alexandria. Although this is possible, it “cannot be proved.”⁴⁷⁸ Hellenized Alexandrian Judaism did exhibit some distinctive features, but these would have been carried to various locations by those who studied there (cf. 18:24). Stephen is not interested in allegory like Philo, nor do his prophetic denunciations come in Greek meter as one finds in the Alexandrian *Sibylline Oracles* (which are not formally distinguishable from Asian *Sibylline Oracles*).

471. See *ibid.*, 14.

472. See Tal, “Traditions.”

473. Ulrich, “Text for Samuel,” 93 (arguing that Theodotion and Aquila sought to bring the old LXX into line with the rabbinic Bible that would become the MT); Vermes, *Jesus and Judaism*, 105. Josephus follows a text closer to 4QSam^a at *Ant.* 6.68–85 (Begg, “Saul’s Start”), among other places.

474. See Pummer, “Samaritan Pentateuch.”

475. Simon, *Stephen and Hellenists*, 75, risking anachronism perhaps for the sake of finding a modern analogy. He later contrasts Paul’s christological “criticism of the Law” with Stephen’s preconversion conviction (115).

476. See Keener, *Matthew*, 560–62. Behind Josephus’s Greek rendering is Joshua ben Hananiah.

477. Bruce, *Commentary*, 143–44. For Qumran’s “new temple,” see Sanders, *Jesus and Judaism*, 82–85; on the more general apocalyptic new-temple expectation, see 77–90.

478. Barnard, “Stephen and Alexandrian Christianity,” 44. Neudorfer, “Speech,” 292, also contends that the name “Stephen” is attested only in Italy (a contention weakened, however, at least by the Jerusalemite location of the Stephen of our text).

Some connect Stephen's speech to Qumran and thence to the Hellenists,⁴⁷⁹ though Qumran constitutes only one example among potential Jewish connections—and is one of the least “hellenized” among them.

Where did this Hellenism lie on the continuum of early Christian sources? Some have compared Matthew,⁴⁸⁰ but this Gospel may not be “Hellenistic” enough.⁴⁸¹ Many have compared Hebrews (the traditional label for which means “Jews,” not specifically non-Hellenistic Jews as in Acts 6:1). Some find behind both Acts 7 and Hebrews an antitemple midrash based on Isa 66 and 2 Sam 7.⁴⁸² One commentator on Hebrews compiles voluminous parallels and treats Acts 7 as the key to Hebrews.⁴⁸³ F. F. Bruce more tamely suggests that Stephen is “the spiritual father” of Hebrews' author.⁴⁸⁴ But such connections should not be pushed too far. The distinctive features of Acts 7 show affinities with Hebrews, but such affinities are simply “in character with the Hellenistic Judaism which is associated with Stephen.”⁴⁸⁵ Parallels with Hebrews, then, illustrate the milieu of early Christian Hellenistic Jewish exegetical thought, rather than dependence of any direct sort of either on the other.⁴⁸⁶

VI. THE LAND

The land represents a crucial element of the speech's theology; although this was also a feature of the theology of much of the Pentateuch, the emphasis here differs: instead of assuring the people that the land would be theirs,⁴⁸⁷ Stephen warns that God is not limited to this land. Against those who think that Stephen challenged the centrality of law and holy land, Barrett is surely right that only the latter is in view.⁴⁸⁸ Stephen's approach to biblical history challenges the permanent centrality of the land, at least in the present era.⁴⁸⁹ (This fits Luke's shift in this volume from heritage to mission until the eschatological restoration.)

Most Diaspora Jews, especially those who settled in the Holy Land, continued to respect the temple and the land,⁴⁹⁰ but this is not to deny that Stephen's (or Luke's) Diaspora background may help his critique of the centrality of the land. The speech might draw on Samaritan and Egyptian Jewish models of defending Diaspora Judaism, based on earlier biblical stories where people lived outside the land.⁴⁹¹

479. Klijn, “Stephen's Speech,” 31.

480. Baum, *Gospel*, 145.

481. Matthew seems, to me, closer to what emerged as rabbinic Judaism than do other early Christian sources included in the NT, even John and probably even Paul in Romans (Keener, *Matthew*, 45–51, esp. 50; cf. also Goulder, *Matthew*; Bonnard, *Matthieu*; Ellis, *Matthew*, 3; Gundry, *Matthew*, 606). John and Revelation are thoroughly Jewish, but Matthew shares far more language also attested in the later rabbis.

482. Thurston, “Midrash”

483. Manson, *Hebrews*, 25–46.

484. Bruce, *Commentary*, 143.

485. Moule, “Christology of Acts,” 171 (doubting the speech's christological distinctiveness). Elsewhere Moule does compare their hermeneutical premises (*Messengers*, 59), but the differences are too great, and the commonalities too common elsewhere, to make that comparison significant.

486. Cf. Scharlemann, *Stephen*, 165–75, esp. 175.

487. E.g., Gen 12:1, 7; Deut 4:1, 21; 7:13; 8:7. But the Pentateuch also warned that the land could spew them out if they broke God's covenant (Lev 18:28; 20:22; cf. Gen 3:23–24; Deut 9:4–7), a warning we might have expected Stephen to emphasize more explicitly if the source were post-70 C.E. But Luke may well use this speech to help explain the devastation of 70 (cf. Luke 21:24).

488. Barrett, *Acts*, 339.

489. See Davies, *Gospel and Land*, 269–70; Bruce, *Commentary*, 141; Pate et al., *Story*, 199–201; Kistemaker, *Acts*, 244.

490. Pace the disdain of some teachers (e.g., *t. 'Abod. Zar.* 4:6). See discussion at Acts 6:9–14.

491. See Sterling, “Legitimation,” 217 (suggesting that Luke is “probably a Diaspora Jew”); in one source, see perhaps Hacham, “Aristeas”; for a positive view of the Diaspora here, see also Neudorfer, “Speech,” 284–86. Arai, “Stephanusrede,” thinks that this speech fits an audience of God-fearers.

(1) *Early Jewish Land Theology*⁴⁹²

The centrality of the land appears in the OT,⁴⁹³ the Qumran scrolls,⁴⁹⁴ and rabbinic literature;⁴⁹⁵ in different (often eschatological) forms, the emphasis on land also appears in early Christianity.⁴⁹⁶ By the Jewish nationalist revival of the mid-second century B.C.E., the book of *Jubilees* was heightening the land polemic already present in Genesis: because Shem owned the land (*Jub.* 9:1–13) and those who violated established boundaries were cursed (9:14–15), Canaan seized Shem's possession there and hence was cursed (9:27–34). An angel warns Jacob not to build at Bethel (32:23).

Although Josephus, writing in the wake of the Judean revolt, does not highlight the land as much as one might expect,⁴⁹⁷ the emphasis on it appears in other early Jewish texts. Thus God loved the land when Israel was righteous (2 *Bar.* 61:7), and only those living there would experience God's protection in the end time (29:2). Aune even suggests that, despite Israel's experiences of exile beginning in 722 B.C.E., the land was so central that no major Jewish historical works focus on Jewish life outside the land.⁴⁹⁸ Naturally, following biblical prophecy, early Judaism envisioned a unique eschatological significance for its homeland.⁴⁹⁹

Later rabbis (especially Palestinian rabbis) developed this theology more fully.⁵⁰⁰ Rabbinic texts portray Israel as the holiest among lands⁵⁰¹ and as the highest, hence most praiseworthy, of lands.⁵⁰² Along with Torah and eternal life, Eretz Israel was one of God's most precious gifts to Israel, all given through sufferings.⁵⁰³ One could limit the Torah to the land of Israel;⁵⁰⁴ a rabbi might merit the Shekinah but forfeit it through living in Babylon;⁵⁰⁵ those who lived in Syria might need to work twice as hard for each commandment to merit the same reward as one who lived in the land.⁵⁰⁶ Many second-century teachers felt that, apart from some notable exceptions, the Spirit of prophecy was limited to the Holy Land.⁵⁰⁷ Thus the *Mekilta*, reporting the second-century views of the school of R. Ishmael, goes to great lengths to explain away all texts that do not agree with the premise that God reveals himself only inside

492. Here I adapt and expand my material in Keener, *John*, 613–15.

493. See, e.g., Schiffman, "Israel," 554–56; McKeown, "Land"; Rad, *Theology*, 96–305; Williamson, "Land"; Wright, *Ethics*, 182–211; Janzen, "Land"; Brueggemann, *Land*; Marlow, "Land," 492. The specification of Jerusalem comes after the law (2 Sam 5:6–10), but "land" itself is prominent in the promises to the patriarchs (e.g., Gen 12:1, 7; 13:15; 15:18; 17:8; 26:2–3; 28:13; 35:12).

494. Schiffman, "Israel," 556–57.

495. *Ibid.*, 557–58; Montefiore and Loewe, *Anthology*, 660–64; Urbach, *Sages*, 1:42–43, 489, 587; Goodman, *State*, 43.

496. Allison, "Land." Davies, *Gospel and Land*, 220, thinks that Paul's "in Christ" replaces the land, but they are probably different kinds of categories.

497. Probably to avoid revolutionary-type implications in the minds of his Gentile readers (cf. Amaru, "Theology"; Harrison, *Grace*, 136).

498. Aune, *Environment*, 97, though overstating the case (cf., e.g., fictional works such as 3 Maccabees or Tobit; sections of the *Letter of Aristeas*; historical sections in Josephus *Antiquities of the Jews*; Jonah; Daniel; Esther).

499. E.g., Tob 13:7–16; *Pss. Sol.* 11:2–7; 4 *Ezra* 7:26.

500. E.g., *Sipre Deut.* 37.1.4–6; 37.2–3.7. For the emphasis on the land in early Judaism, see, e.g., Allison, "Land," 643; esp. Davies, *Gospel and Land*; for its exclusive holiness, Ben Eliyahu, "Polemic."

501. E.g., *m. Kelim* 1:6; cf. *Esth. Rab.* 1:17, although it also notes excessive hypocrisy in Jerusalem; Hester, *Inheritance*, 76. In some traditions, it is more precious to God than is anything else (*Num. Rab.* 23:7).

502. *Sipre Deut.* 37.3.5–6. Praising cities was a standard part of ancient rhetoric (Ps 48; Ael. Arist. *Panath.*; Isocrates *Panegyricus*; *Panathenaicus*; SQ15; Quint. *Inst.* 3.7.26; Rev 21:10–23; cf. Balch, "Encomia").

503. Rabbi Simeon ben Yohai in *Sipre Deut.* 32.5.10; *b. Ber.* 5a; *Exod. Rab.* 1:1.

504. *Sipre Deut.* 37.1.4; cf. *Mek. Pisha* 1.43–44.

505. *B. Mo'ed Qat.* 25a. Some Babylonian Amoraim, however, did view immigration to Eretz Israel unfavorably (*b. Ber.* 24b).

506. *Pesiq. Rab Kah.* 14:4.

507. *Mek. Pisha* 1.59–105.

the land (*Pisha* 1.35–88, esp. 1.58–72); only Israel was now suitable for the divine word (1.43–44).⁵⁰⁸

Later Palestinian rabbis and those who transmitted their sentiments sought to further translate into practice this emphasis on the Holy Land.⁵⁰⁹ Some regarded living in the land as meritorious,⁵¹⁰ equal (in standard rabbinic hyperbole) to all other commandments,⁵¹¹ and guaranteeing the life to come;⁵¹² still more hyperbolically, a single day in Jerusalem removed one's sins.⁵¹³

Inferior students within Israel were better than the best outside (R. Gamaliel in *'Abot R. Nat.* 32, §70 B); if a sage who lived in the land left it, his skills weakened, but he remained superior to those who never lived there (Simeon ben Eleazar in *'Abot R. Nat.* 28 A). Some teachers warned against the temptation of idolatry for those dwelling among Gentiles elsewhere,⁵¹⁴ and Palestinian teachers sometimes cast aspersions on those who resided in Babylon.⁵¹⁵

Some Jewish teachers prohibited renting land to Samaritans or Gentiles in the Holy Land.⁵¹⁶ A fully Jewish town is normally preferable for habitation to a partly Gentile one, but better a majority Gentile town within Eretz Israel than a fully Jewish one in the Diaspora.⁵¹⁷ It thus comes as no surprise that a later rabbi would conclude that in the time to come, all synagogues would be in Eretz Israel.⁵¹⁸ Guardian angels would not escort people outside the land (*Gen. Rab.* 68:12).

Many seem to have thought that burial in the Holy Land was meritorious (see discussion under Acts 6:1, and note even Stephen's own observation in Acts 7:16). Citing Ezek 37:12–14, Amoraim taught that the dead in Israel would be raised first, or that the righteous dead outside Eretz Israel would have to roll underground to return to the land before being resurrected.⁵¹⁹ (This eschatological scenario likely provided a not-so-subtle hint to whatever Diaspora Jews might ever encounter rabbinic teaching that they ought to emigrate while still alive.)⁵²⁰ That preference for burial in Eretz Israel was more widespread than the rabbis' own views may be attested by Palestinian burial sites with an abundance of Diaspora Jews throughout the Amoraic period.⁵²¹ Although this practice becomes abundant more than a century after the

508. See also Davies, "Spirit in Mekilta"; idem, *Gospel and Land*, 62 (cf. also idem, *Paul*, 206). More generally, a range of early Jewish sources reduce or remove biblical dialogues between God and people (Koskenniemi, *Miracle-Workers*, 294, citing *Jubilees*, Artapanus, Philo, and Josephus).

509. Rabbi Johanan initially forbade R. Assi to leave "the Land" (*b. Qidd.* 31b).

510. E.g., *b. Roš Haš.* 16b.

511. Urbach, *Sages*, 1:349, on *Sipre Deut.* 80.

512. *T. Šabb.* 1:3; R. Meir in *Sipre Deut.* 333.6.1; *b. Pesah.* 113a; *Ketub.* 111a; *y. Šeqal.* 3:3.

513. *Pesiq. Rab Kah.* 6:4; 15:7, referring to Jerusalem's offerings. More strongly, 6:3 claims that the land itself expiates sins.

514. *'Abot R. Nat.* 32, §71 B (attributed to Akiba).

515. The Jerusalem Talmud often calls Babylonian rabbis "rabbis of that other place" (e.g., *y. Yebam.* 10:1, §11) or "the rabbis from over there" (e.g., 10:3, §1); for tension between them, often over the authority of their respective rulings, see, e.g., *y. Ketub.* 12:4, §8; *Ned.* 6:8, §3; *Sanh.* 1:2, §10; *'Abod. Zar.* 2:1, §1; 2:8, §5. Babylonian rabbis relegated the land's importance especially to the past and the future (see Stemberger, "Bedeutung des 'Landes'").

516. E.g., R. Meir in *t. 'Abod. Zar.* 2:8 (R. Jose disagrees).

517. Goodman, *State*, 43, citing esp. *t. 'Abod. Zar.* 4/5:3. Israel's deserts are better than palaces elsewhere (*Gen. Rab.* 39:8). The baraita in *b. Ketub.* 110b is far more emphatic, (hyperbolically?) denying the faith of all Diaspora Jews.

518. *B. Meg.* 29a.

519. *B. Ketub.* 111a; *y. Ketub.* 12:4, §8; *Gen. Rab.* 74:1; 96:5, some texts; 96 (MV); *Pesiq. Rab.* 1:4; cf. *'Abot R. Nat.* 26 A; *Deut. Rab.* 2:9. Ancients apparently anticipated underground conduits for travel (Ovid *Metam.* 5.501–4). For the emphasis on burial in the land, see also Davies, *Gospel and Land*, 62–65.

520. Burial in Eretz Israel was a privilege and reward (*Gen. Rab.* 36:6; *Pesiq. Rab.* 1:4).

521. Safrai, "Relations," 213; cf. *CIJ* 2:132, §920; 2:136, §930; 2:262, §1256.

composition of Acts, some Diaspora Jews and proselytes of the first century also preferred to be buried in the land (e.g., *Jos. Ant.* 20.95; cf. comment on Acts 6:1).

(2) *Holy Sites within the Land*

Sacred space meant not only the land but holier space within the land.⁵²² Whatever the date of other traditions surrounding Jerusalem, Jerusalem's great holiness was certainly highly regarded before and during the first century.⁵²³ Later rabbis regarded Jerusalem as the holiest place in the Holy Land,⁵²⁴ the only place worthy of the temple or altars.⁵²⁵ According to some later traditions, in the world to come, Jerusalem would be the size of Eretz Israel, and Israel the size of the current world.⁵²⁶

The principle of holy land applied especially to the holiest site of all, the Jerusalem temple. Thus when Jewish teachers spoke of a progression of holiness, the holiest site in the Holy Land's Holy City was the temple.⁵²⁷ Various Jewish groups argued that God had long before chosen this site for the temple.⁵²⁸ Thus an angel warned Jacob at Bethel not to build a sanctuary there "because this is not the place."⁵²⁹ Just as Israel was the highest of all lands,⁵³⁰ the temple was higher than the rest of the world.⁵³¹ That Jews, unlike other peoples, had a single God with a single (massive) centralized temple may help explain their united response to Roman challenges to the temple.⁵³²

Thus Jews sought honor not only for their people but for their temple (1 Esd 8:67). Later sources claimed that the temple was the center of the world (see comment on Acts 1:8). Against what Luke's audience presumably already knows (on my admittedly tentative dating of the book), many believed that Jerusalem and its temple were indestructible (see excursus on views of the temple at Acts 6:11–14). Indeed, the Romans recognized that Jerusalem was well fortified, which prolonged their siege. In some areas, the wall towers were 60 feet high, and in valleys 120 feet (*Tac. Hist.* 5.11). The temple itself was fully walled like a citadel in its own right (5.12), as one would expect for an ancient city's acropolis (cf. *Judg* 9:46–47, 51).⁵³³

Naturally, Palestinian Jews stood to profit from Diaspora interest in their land. Probably partly because the Romans found revolutionary potential in such ethnic ties of geographical loyalty, they eventually diverted the didrachma tax once used for the temple's upkeep.⁵³⁴

522. Some space was also unholy and hence not fit for religious activity (e.g., *b. Ber.* 25a) except under extraordinary circumstances (*Exod. Rab.* 15:5).

523. *Sir* 36:13; 2 *Macc* 3:1; *Tob* 13:9; 11QT XLVII, 14–15; *Philo Flacc.* 46.

524. E.g., *m. Kelim* 1:8; *Seqal.* 8:1. In *Pesiq. Rab Kah.* 6:4; 15:7, it also sanctified its inhabitants.

525. E.g., *Mek. Pisha* 1.44–46; *Lev. Rab.* 13:2 (attributed to Simeon ben Yohai, second century C.E.). Later tradition united the altars of Adam, Noah, and Abraham on the site (*Tg. Ps.-J.* on *Gen* 22:9; for Abraham, *Tg. Onq.* on *Gen* 22:14)—even if Jewish interpreters did not, like Samaritans, modify the text of Torah.

526. *Pesiq. Rab.* 1:3 (attributed to a third-century C.E. Palestinian Amora).

527. E.g., *m. Kelim* 1:6–9; *Mek. Pisha* 1.42–50. For the progression of holiness in the biblical tabernacle and temple, see Davies, "Tabernacle," 498–506; Haran, "Image," 200–206; Keener and Usry, *Faith*, 144. Early Jewish architecture further amplified biblical divisions of holiness in the temple (*Jos. Ag. Ap.* 2.102).

528. Perhaps in polemic against groups such as the Samaritans, some insisted that God had chosen the temple before the creation (*Abot R. Nat.* 37, §95 B; but cf. already *Wis* 9:8; *Jub.* 3:10).

529. *Jub.* 32:23 (*OTP* 2:118).

530. *Sipre Deut.* 37.3.5–6.

531. *Sipre Deut.* 317.2.1; *b. Qidd.* 69a; *Song Rab.* 7:5, §3. For the temple's geographic centrality, see comment on Acts 1:8; Keener, *John*, 729–30. Some, however, preferred prayer in low spots (*b. Ber.* 10b).

532. See Bohak, "Theopolis," also noting the protest movements against this temple, such as those on Gerizim or in Heliopolis. *Jos. Ag. Ap.* 2.193 argued that there should be just one temple to correspond to the one true God. For the tabernacle's and the temple's earlier function in engendering unity, cf. Andrews, "Worship," 61; much less persuasively, Wainwright, "Pyramid."

533. On inner citadels, see also Rohrbach, "Pre-industrial City," 134.

534. See *CPJ* 1:80–81; 2:119–36, §§160–229; *Dio Cass. R.H.* 65.7.2; Hemer, "Ostraka"; Carlebach, "References."

(3) *Devotion to Holy Sites*

Ancient Near Eastern religion emphasized holy sites; thus, when invaders destroyed an existing city, they often reused the site of its cult for their own shrine.⁵³⁵ Early Judaism⁵³⁶ and Christianity⁵³⁷ continued this tradition. Like many cultures,⁵³⁸ ancient Near Eastern cultures often spoke of holy mountains, whether the Greeks' Olympus, Jerusalem's Zion (the Temple Mount), or the Babylonians' artificial ziggurat.⁵³⁹ A pre-Christian Jewish tradition accepted four holy mountains—two in the east, Sinai, and, with eschatological associations, Zion (*Jub.* 4:26).

Gentiles usually believed that deities most naturally heard prayers at their favored spots (e.g., Fronto *Ad M. Caes.* 3.9.1). Thus gods were figuratively addressed according to their sanctuaries or favored locations.⁵⁴⁰ Ground remained consecrated to a deity even after a shrine had collapsed (Pliny *Ep.* 10.71).⁵⁴¹ Synagogue architecture reveals more about popular Jewish views of sacred space outside rabbinic circles.⁵⁴² Thus builders sometimes elevated synagogues.⁵⁴³ The location of prayer was often important in early Judaism;⁵⁴⁴ some locations made prayers more likely to be heard than others.⁵⁴⁵ One should not recite the Shema in an unclean location;⁵⁴⁶ a Jewish teacher who had never meditated on Torah in any unclean place would invite emulation.⁵⁴⁷

Orientation for prayer was a widely known concept; earlier Greeks faced east for prayers to celestial gods but west for curses (e.g., Lysias *Or.* 6.51, §107).⁵⁴⁸ Following biblical precedents,⁵⁴⁹ many Jewish communities also oriented synagogues toward the Jerusalem temple,⁵⁵⁰ although not all synagogues fit this description.⁵⁵¹ The limited archaeological evidence from Qumran can be read as suggesting that Qumran's as-

535. Albright, *Yahweh*, 194–95, contrasting this practice with evidence from the Israelite conquest.

536. See Davies, *Land*, passim.

537. See Meyers, "Judaism and Christianity," 75, against Davies, *Land*.

538. Cf., e.g., Mbiti, *Religions*, 71–72.

539. See ANET 326; Clifford, "Tent," 223; Gordon, *Civilizations*, 48, 232–33; Kaiser, "Pantheon," 29–30, 181; de Vaux, *Israel*, 279–80; Dahood, *Psalms*, 11; Max. Tyre 2.1. Rabbi Simeon ben Yohai reportedly claimed that no mountain proved suitable for Torah but Sinai (*Lev. Rab.* 13:2).

540. Kearns, "Religion, Greek," 1301.

541. Although Pliny and Trajan recognized that some cultures saw the shrines, rather than the ground, as consecrated (Pliny *Ep.* 10.49.2; 10.50). Thus polytheistic conquerors often reused shrines from vanquished cities (cf. Albright, *Yahweh*, 194–95).

542. Rabbis as well as others, however, considered synagogues sacred (*m. Meg.* 3:1–3). Some even thought that God heard prayers there only, but most disagreed (*b. Ber.* 6a).

543. *T. Meg.* 3:23; Strange and Shanks, "House in Capernaum," 29 (citing *t. Meg.* 4:23).

544. E.g., in the *Mekilta* (Davies, "Spirit in Mekilta," 96).

545. Johnson, *Prayer*, 44–46. Many religions prefer particular postures and sometimes geographical directions in prayer (Mbiti, *Religions*, 84), including traditional Greek religion (Lysias *Or.* 6.51, §107).

546. *B. Ber.* 25a, near excrement; cf. *y. Hal.* 2:1, §10. Similarly, one should ask guardian angels to wait outside when one uses the restroom (*b. Ber.* 60b), and follow careful purity rules, including not facing the east-west axis (*Abot R. Nat.* 40 A; *b. Ber.* 62a, reportedly Tannaitic tradition).

547. *B. Ta'an.* 20b (R. Adda bar Ahaba); told of R. Zera in *b. Meg.* 28a.

548. The design of Greek temples, however, was very much influenced by regional variations (Tomlinson, "Temple"). A foreigner could pray toward God's temple in 1 Kgs 8:42 (but apparently after coming to the location, 8:41).

549. 1 Kgs 8:30, 44, 48; 2 Chr 6:32, 34, 38; Dan 6:10. Orientation of buildings toward Jerusalem may begin in the second century B.C.E. (Riesner, "Synagogues in Jerusalem," 191–92).

550. Meyers and Strange, *Archaeology*, 143–44; Meyers, "State," 128–29; Ferguson, *Backgrounds*, 399; attested also in *t. Ber.* 3:15–16; *Sipre Deut.* 29.3.2; for prayers, cf. *m. Ber.* 4:5–6; *t. Meg.* 3:21. Cf. Muslim orientation of graves toward Mecca (Mbiti, *Religions*, 329); Greek toilet manners regarding the sun and streams (Hesiod *W.D.* 727–32, 757–59).

551. See Ma'oz, "Synagogues," 119; Wilkinson, "Orientation"; cf. Stewart, "Synagogue." Greek temples were normally oriented eastward, though exceptions existed (Herbert, "Orientation"); cf. eastward orientation in *Jos. Ag. Ap.* 2.10 (Apion's claim); *t. Meg.* 3:22; a synagogue in Delos facing eastward toward Jerusalem (Stambaugh and Balch, *Environment*, 48).

sembly hall was oriented toward Jerusalem, a perception that, if true, would date the custom of facing Jerusalem quite early.⁵⁵² Whatever the community's leaders thought of the reigning priesthood, their very use of the Psalter, which emphasized Zion,⁵⁵³ disposed them to regard Jerusalem as the eternally chosen city (also 4Q380 I, 2–6). The site of Jerusalem had been holy since the times of Adam and especially Abraham.⁵⁵⁴

(4) Samaritans and the Temple⁵⁵⁵

Both prophets and philosophers critiqued worship based merely on sacred space, such as a temple cult.⁵⁵⁶ Thus philosophers “reconceptualized” sacred space, making philosophy the genuine cultic activity.⁵⁵⁷

Samaritans offered the most persistent and hostile critique of the Jerusalem temple. Samaritans regarded Gerizim as “the holiest of mountains” (*Jos. Ant.* 18.85).⁵⁵⁸ Even in the mid-30s C.E. a prophetic figure could rally Samaritan masses around an eschatological hope for the recovery of the hidden vessels of the tabernacle,⁵⁵⁹ and probably for a rebuilt temple,⁵⁶⁰ on Gerizim (18.85–87). A generation later Samaritans gathered on Mount Gerizim to oppose the Romans (*War* 3.307–8), and those who did not surrender (3.313–14) were slaughtered there (3.315). Samaritan Decalogue inscriptions show that the Samaritans combined the traditional ninth and tenth commandments to make room for their own commandment based on their reading of Deut 27:3–5: they must build an altar to God at Gerizim.⁵⁶¹

Disagreement over respective holy sites had led to severe conflicts in the Ptolemaic period (*Jos. Ant.* 13.74–79). Before the governorship of Pontius Pilate, some Samaritans, in an act of revenge for earlier acts against their temple and nation, secretly defiled the Jerusalem temple with bones (18.30). Luke earlier claims that the Samaritans refused to receive Jesus because he was going to Jerusalem for a Passover feast (Luke 9:51–53). See a much fuller discussion in the excursus on Samaritans at Acts 8:5.

Some scholars compare Stephen's critique to the Samaritan critique, but Stephen is hostile to the temple's abuse, not to the temple per se. Thus, for example, he affirms that God promises that they will eventually worship “in this place” (7:7); the problem is missing the true God to which the temple is meant to point (7:39–44). Stephen stands closer to the prophetic tradition that he (unlike Samaritans) cites

552. Riesner, “Synagogues in Jerusalem,” 191–92 (on Locus 77, the large dining hall).

553. E.g., Pss 2:6; 9:11; 46:4–5; 48:1, 11; 51:18; 68:29; 99:2; 116:19; 122:2–6; 125:2; 128:5; 129:5; 135:21; 137:6–7; 147:2, 12.

554. Cf., e.g., Mount Moriah in *Tg. Ps.-J.* on Gen 22:9; *Tg. Onq.* on Gen 22:14; *Tg. 2 Chr.* 3:1.

555. Here I adapt some of my material from Keener, *John*, 611–12; see further comment in the excursus on Samaritans at Acts 8:5.

556. So Talbert, “Worship,” 337–40, citing, e.g., *Xen. Mem.* 1.3.1–3; *Plato Alcib.* 2.149E; *Pers. Sat.* 2.69–75; *Amos* 5:21–24; *Hos* 6:6. To this may be added *Strabo* 16.2.36 on Mosaic worship.

557. Talbert, “Worship,” 340–46, citing, e.g., *Sen. Y. Ep.* 41; Apollonius of Tyana *On Sacrifices*, frg. in *Euseb. PE.* 4.12–13; Apollonius of Tyana *Ep.* 26; *Porph. Abst.*, frg. in *Euseb. PE.* 4.11; *Philo Good Person* 75. One could cite many examples of spiritual or ethical sacrifices (e.g., *Isoc. Ad Nic.* 20; *Plut. Educ.* 14, *Mor.* 11C; *Pyth. Sent.* 15, 20; *Diog. Laert.* 7.1.119; 8.1.22; *Philost. Ep. Apoll.* 27; *Prov* 15:8; *Ps* 154:10–11; *Jdt* 16:16; *Sir* 32:1–3; *Wis* 3:6; 1QS IX, 4–5; X, 6; *Sipre Deut.* 306.20.3; *Abot R. Nat.* 4 A; 8, §22 B; *Rom* 12:1; *Sent. Sext.* 47).

558. Rabbis viewed Mount Gerizim as the Samaritan counterpart to the Jewish temple (*b. Yoma* 69a); just as Jewish synagogues often pointed toward Jerusalem (see above), so it is reported that an excavated Samaritan synagogue points toward Mount Gerizim (*Goodenough, Symbols*, 1:262–63).

559. Cf. Kalimi and Purvis, “Hiding”; Collins, “Vessels”; MacDonald, *Samaritans*, 365. For a parallel Jewish hope, cf. *2 Macc* 2:4–7; *2 Bar.* 6:7–9; *4 Bar.* 3:10–11, 19; 4:4; *m. Šeqal.* 6:1–2; contrast *Jer* 3:16.

560. I extrapolate here on the basis of Jewish hopes. Later Samaritan texts also attest the hope that the tabernacle of Moses's day had been hidden on that mountain and would be restored in the eschatological time (Olsson, *Structure*, 190).

561. Bowman, *Documents*, 14; Hepner, “Tenth Commandment.”

(here, Isa 66:1). Early Jews often critiqued the temple or the corruption of those who ran it (see comment on Acts 2:46; 6:13–14; where I have also argued that Luke was not hostile to the temple itself). Without critiquing the temple or the land, Paul points to eschatological fulfillment of covenant land theology.⁵⁶² Neither Paul nor the harsher Jewish critics may be associated significantly with Samaritan theology; neither is it necessary to associate Stephen with Samaritanism on the basis of his approach to the temple.

b. Abraham the Alien (7:2–8)

Luke might portray his own time as a continuation of biblical history by selecting points about Abraham (Acts 7:2–8) and Joseph (7:9–16) that suggest relevant models, prefiguring events in his own narrative. Thus Joseph helped with the famine (7:11–14, though this is not the emphasis here) as did Agabus later (11:27–28). God sent Abram out (7:3), as he continued sending people out (13:3–4); more to the point, if God’s servants Abraham and Joseph often encountered God outside the promised land, God’s servants in Luke’s day could also work to bring salvation to the nations instead of focusing on the recent tragic events in the Holy Land.⁵⁶³

God’s promise to Abraham begins a history of promises, with partial fulfillments, climaxing in Jesus’s coming (7:52).⁵⁶⁴ Luke introduced the motif of this promise already in Luke 1:55, 73. The paragraph’s goal is “*worship in this place*” (7:7); that is, Stephen refers not only to the Holy Land but ultimately to the temple, which is not uniquely holy (see 7:33). Readers attentive to the charge against Stephen (6:11–14) will hear here a beginning of his response, climaxed in 7:44–50.

Luke’s portrayal of Abraham follows the biblical text fairly closely. Dahl argues that whereas Paul, John, Hebrews, and James make Abraham a protagonist for the Christian faith, the rabbis make him a protorabbi, and Philo makes him a philosopher, Luke reinterprets Abraham less for his own time.⁵⁶⁵ Dahl’s survey may exaggerate dominant elements of other portrayals and diminish Luke’s agenda, but it is generally accurate that Luke, writing concisely, adjusts Abraham less than many of the other writers.

Jewish texts often call Abraham “our father”⁵⁶⁶ and Jewish people his children.⁵⁶⁷ Various Jewish groups apparently employed the model of Abraham as a prototype for their own form of Judaism, from the group behind *Jubilees* to Paul.⁵⁶⁸ Thus, for example, for later rabbis he was the model Pharisee.⁵⁶⁹ They also made Abraham and Sarah model proselytes.⁵⁷⁰

562. Harrison, *Grace*, 138. Cf. Rom 4:13; note the omission of the land in Rom 9:4.

563. Cf. Bruce, *Commentary*, 143.

564. Dahl, “Abraham,” 144. Kilgallen, *Speech*, 44, rejects promise as the story’s key, in view of the prominence of Acts 7:7 (see comment below). Luke uses Abraham traditions for his characterization of God (Brawley, “Abrahamic Traditions,” 130–31); for the centrality of the Abrahamic covenant in Luke-Acts, see further idem, “Blessing.”

565. Dahl, “Abraham,” 140.

566. E.g., 4 Macc 16:20; *m. ’Ab.* 3:16; 5:3–4, 9, 22; *Sipre Deut.* 311.1.1; 313.1.3; *’Abot R. Nat.* 23, §46 B; *b. Ber.* 6b; *Ned.* 32a; Rom 4:1. Those not his descendants also could greet him with the honorary title “father” (*Test. Ab.* 2:3 A; 9:4 B); in some sense, he was father of the whole world (*t. Ber.* 1:12 on Gen 17:5). On Abraham traditions, see further Moore, *Judaism*, 1:538–39; Strack and Billerbeck, *Kommentar*, 3:186–202.

567. E.g., Gal 3:7; 4 Macc 6:17, 22; 18:1.

568. Müller, “Abraham-Gestalt.” Initially he was the only person following God (*Pesiq. Rab.* 11:4).

569. E.g., *y. Soṭah* 5:5, §2.

570. E.g., *Mek. Nez.* 18.36ff. (Lauterbach, 3:140); cf. *b. Sukkah* 49b; *Num. Rab.* 8:9; Bamberger, *Proselytism*, 175–76. Abraham and Sarah were also active in making proselytes (e.g., *Song Rab.* 1:3, §3; cf. Bamberger, *Proselytism*, 176–79).

Abraham was righteous⁵⁷¹ and hence became a model for righteous behavior.⁵⁷² Despite contrary information in Genesis, Abraham was supposed to have kept the entire law before it was given.⁵⁷³ Jews in the Roman Empire also used the figure of Abraham to defend Jewish identity.⁵⁷⁴ In later texts, Abraham could intercede for sinners' salvation, especially for circumcised Israelites.⁵⁷⁵

Often legends exalted Abraham far beyond the faithful-but-sometimes-struggling figure of Genesis.⁵⁷⁶ Abraham invented various plows for protection from crows (*Jub.* 11:23). The flood shortened most lifespans, but not Abraham's (23:9–10). Eventually rabbis developed extensive Abraham haggadah; for example, he was larger than Adam before his fall,⁵⁷⁷ so that each of Abraham's steps was three miles long.⁵⁷⁸ He merited being created before Adam, but God sent him after Adam to repair the world that Adam had ruined.⁵⁷⁹ He was of enviably high status.⁵⁸⁰

More important, Abraham rejected and contended with idolatry.⁵⁸¹ Sometimes he reasoned against idols;⁵⁸² sometimes he destroyed them.⁵⁸³ In Jewish tradition, Abraham became a fierce opponent of idolatry;⁵⁸⁴ he destroyed the idols in his household⁵⁸⁵ and faced conflict with his family.⁵⁸⁶ Later rabbis said that Abraham was the first person to leave idolatry.⁵⁸⁷ He shamed a prospective idol buyer by asking him why he, at age fifty, would worship something made just a day ago.⁵⁸⁸ Likewise, he shattered idols and put a stick in the hand of the largest; when his father disbelieved

571. E.g., 1 Macc 2:52; *Test. Ab.* 1:3, 18; 2:1, 3, 6, 12; 4:6; 7:8; 9:1, 2, 8; 13:14 (cf. 13:2); 15:6, 9; 16:7, 11; 17:10, 19 (cf. 17:7); 18:6, 8, 11 (cf. 18:1); 19:7, 14 A; 4:10 B (although Nickelsburg, "Structure and Message," 87, suggests that *Testament of Abraham* parodies Abraham's traditional righteousness); 'Abot R. Nat. 36, §94 B; *Gen. Rab.* 56:8, later MSS; *b. Ned.* 32a, bar.; cf. later Qur'an 16.120. Still, many recognized that even Abraham was not completely righteous (cf. *Test. Ab.* 9:3; 14:12; 15:9–10 A; *b. 'Arak.* 17a, bar.; Sandmel, *Judaism*, 187), though some demurred (*Pr Man* 8; *Test. Ab.* 10:14 A).

572. E.g., 4 Macc 15:28; *m. 'Ab.* 5:19/22. Martyrs are "offspring of Abraham" in 4 Macc 9:21; 18:23. For Abraham as an example in Judaism, see also Dibelius, *James*, 168–74. Naturally this included the model of his faith (Urbach, *Sages*, 1:31, citing the *Mekilta*; Rom 4:12, 16; Gal 3:6–7; cf. 4Q225 2 I; for various interpretations of Gen 15:6, see Oeming, "Glaube"), though Josephus and the Targumim emphasize his works instead (Cairus, "Works-Righteousness"); for both, see Gregory, "Abraham," on Sir 44:19–21.

573. E.g., *Jub.* passim; 2 *Bar.* 57:2; *m. Qidd.* 4:14. Contrast, e.g., Gen 21:33 (with Deut 16:21).

574. See Fornberg, "Abraham" (also in Fornberg, "Times").

575. E.g., *b. Erub.* 19a; *Gen. Rab.* 35:2; 48:8; *Gr. Ezra* 2:5. For Abraham's praying sinners to salvation in narratives, see, e.g., *Test. Ab.* 14:5–8 A. Abraham would lead all the world to repentance (*Gen. Rab.* 30:8); for his success at making converts, see, e.g., 'Abot R. Nat. 12 A; 26, §54 B; *Tg. Neof.* 1 on Gen 21:33; comment on "proselyte" at Acts 6:5.

576. Noted, e.g., by Scharlemann, *Stephen*, 59. For his visions, see, e.g., 2 *Bar.* 4:4.

577. *Pesiq. Rab.* 7:2; cf. *Jos. Asen.* 1:5/8. On Adam's size before his fall, see, e.g., *Sipra Behuq.* pq. 3.263.1.9; 'Abot R. Nat. 8, §22 B; 42, §116; *b. Hag.* 12a; *Sanh.* 38b; *Pesiq. Rab Kah.* 1:1; 5:3; *Gen. Rab.* 2:3; 8:1; 12:6; 21:3; 24:2; 58:8; *Lev. Rab.* 14:1; 18:2; *Num. Rab.* 13:12; *Song Rab.* 3:7, §5; *Pesiq. Rab.* 15:3.

578. *Gen. Rab.* 43:3; *Pesiq. Rab.* 49:5.

579. E.g., *Gen. Rab.* 14:6; *Eccl. Rab.* 3:11, §2. The picture of Abraham's seed as restorer of what Adam ruined, at least, is already implied in Genesis (see discussion below).

580. So *Gen. Rab.* 82:14.

581. E.g., *Jub.* 11:16; 21:3; *Apoc. Ab.* 1–8; *b. 'Abod. Zar.* 3a; *Gen. Rab.* 39:1; *Pesiq. Rab.* 33:3. Cf. the comparable stories about Job, *Test. Job* 2–5.

582. E.g., *Jub.* 12:1–8; *Gen. Rab.* 38:13; cf. later Qur'an 26.70–73.

583. E.g., *Jub.* 11:12; *Gen. Rab.* 38:13.

584. E.g., *Jub.* 21:3 (summarizing his righteousness); *Apoc. Ab.* 1–8. Flusser, "Upanishads," highlights Abraham's resistance to idolatry (e.g., *Jub.* 11:16–18; 12:1–6, 12–14; *Jos. Ant.* 1.155–56), but his comparison to the Upanishads is unnecessary (in the Qur'an, see 16.120, 123; 19.46; 43.26 and esp. 21.58–69 and 26.69–76, which echo the earlier Jewish legend).

585. *Jub.* 11:12–14.

586. *Jub.* 11:16–17; 12:1–8.

587. *Pesiq. Rab.* 33:3. In *Gen. Rab.* 39:1 (attributed to a Tanna), he questioned and God revealed himself to him.

588. *Gen. Rab.* 38:13.

that an idol could have carried out the violence, Abraham asked why he worshiped an object unable to act.⁵⁸⁹ Nimrod was unable to persuade Abraham to worship idols made by fire, or fire extinguished by water, or water carried by breath, or breath carried by people; Abraham thus reasoned back to a first cause.⁵⁹⁰

Stories about Abraham often exemplified an emphasis on Israel's election, as some scholars have seen here.⁵⁹¹ Stephen's contemporaries may have envisioned Abraham as a source of blessing and favor for their people, although this approach reaches dramatic lengths in later rabbinic sources.⁵⁹² Later rabbis emphasized that patriarchs' merits permitted Israel's first redemption from Egypt and deliverance through the sea;⁵⁹³ this tradition may even reflect pre-Christian tradition concerning Abraham's merit.⁵⁹⁴ Later rabbis sometimes attributed God's blessings on Israel to merits of the patriarchs,⁵⁹⁵ or occasionally the matriarchs,⁵⁹⁶ though some also emphasized the greater importance of one's own merits.⁵⁹⁷ But opinion was not unanimous even by the end of the second century,⁵⁹⁸ and there appears little explicit connection between merits and personal benefits unrelated to corporate blessing on Israel.

Nevertheless, the notion of dependence on Abrahamic descent for salvation is explicit in early Christian polemical texts (such as Matt 3:9//Luke 3:8).⁵⁹⁹ That Jewish people could seek God's blessings for his people on the basis of his covenant with the patriarchs (2 Macc 1:2; Sg Three 11) suggests the antiquity of potential dependence on Abraham in some sense.⁶⁰⁰ Scripture already emphasized that God had blessed Israel for Abraham's sake (Exod 2:24; Lev 26:42; Deut 4:37; 7:8; 9:5; 10:15; 2 Kgs 13:23; Ps 105:8–9, 42–45; Mic 7:18–20) and that God could be entreated on this basis (Exod 32:13; Deut 9:27).⁶⁰¹ But God had also warned against depending on this

589. *Gen. Rab.* 38:13.

590. E.g., *Gen. Rab.* 38:13 (including Abraham's survival in a fiery furnace, a story persisting even in Qur'an 21.68–69); cf. b. 'Abod. Zar. 3a.

591. Reinmuth, "Beobachtungen" (citing *L.A.B.* 1–8; 18:5; 32:1–4; 40:2).

592. I draw here from Keener, *John*, 754–56.

593. E.g., *Mek. Pisha* 16.165–68 (other opinions in 169–72); *y. Ta'an.* 1:1, §8; *Gen. Rab.* 55:8; 74:12; 76:5 (Jacob's merit); 84:5 and 87:8 (Joseph's merit); *Exod. Rab.* 2:4; 15:10; 23:5; *Lev. Rab.* 34:8, bar.; *Num. Rab.* 13:20; *Song Rab.* 4:4, §4; *Pesiq. Rab.* 10:9 (in prayer); see further Moore, *Judaism*, 1:537. Some Tannaim suggested they could have used more merit (*Sipre Deut.* 2.1.1–4); some Amoraim attributed the exodus to the merit of, or faith in, Moses (*Exod. Rab.* 15:3; 16:1), to righteous acts (*Exod. Rab.* 1:28; *Lev. Rab.* 28:4; *Num. Rab.* 20:22), to the merits of Israelite women (*Exod. Rab.* 1:12; *Num. Rab.* 3:6, bar.), or to various factors, including patriarchal merits (*Deut. Rab.* 2:23).

594. E.g., in *Mek. Besh.* 4.52–57 (attributed to Shemaya and Abtalion). The idea of God showing favor to descendants for an ancestor's sake does appear in Scripture (e.g., Deut 7:8; 10:15; 1 Kgs 11:36; 2 Kgs 8:19; 2 Chr 21:7).

595. E.g., *m. 'Ab.* 2:2; *Sipra Behuq.* pp. 8.269.2.5; *Sipre Deut.* 8.1.1; *Pesiq. Rab Kah.* 1:1; 2:5; 5:8; 22:4; *Pesiq. Rab Kah.* Sup. 5:2; *Gen. Rab.* 39:3; 44:16; 48:12; 49:11; 70:8; *Exod. Rab.* 1:4; 15:4; 44:5; *Lev. Rab.* 31:4; 36:5; *Song Rab.* 7:6, §1; *Pesiq. Rab.* 15:9; 27/28:1; *Tg. Neof.* 1 on Gen 48:20; cf. *Tg. Neof.* 1 on Gen 30:27; 39:5; *Tg. Ps.-J.* on Gen 18:18; 19:29; 21:17. This included expiation of Israel's sins (*Pesiq. Rab Kah.* 23:8; *Lev. Rab.* 29:7; *Deut. Rab.* 3:15).

596. *Pesiq. Rab Kah.* 11:6; *Lev. Rab.* 21:11; 36:5; *Num. Rab.* 11:2; *Pesiq. Rab.* 12:5; 15:9.

597. E.g., *'Abot R. Nat.* 12, §30; 22, §46 B; *Gen. Rab.* 74:12; *Num. Rab.* 8:9; cf. individuals' benefits from ancestral merit, *y. Ta'an.* 4:1, §14; *Lev. Rab.* 9:2. Amoraim differed as to whether patriarchal merit could eventually run out (*y. Sanh.* 10:1, §6; *Lev. Rab.* 36:5).

598. See *Sipre Deut.* 329.3.1, following biblical precedent (Ezek 18:20); cf. 2 *En.* 53:1. Even in *Song Rab.* 1:2, §3, biblical sacrifices appear preferable to ancestral merits.

599. Noted also by Marmorstein, *Merits*, 38.

600. Cf. protection from judgment on account of the patriarchs in *Test. Levi* 15:4 (possibly a later interpolation); perhaps Moses's virtue and the law (*Jos. Ant.* 3.322).

601. Cf. invoking an ancestor in 3 *En.* 1:3; supplication on the basis of the honor of the patriarchs in *CIJ* 1:519, §719 (if it means the biblical patriarchs); invoking their merits in prayer in *Gen. Rab.* 60:2.

heritage (Deut 7:7; 10:22; 26:5; cf. Dan 9:18). The first of the Eighteen Benedictions, likely pre-Christian, reminded God of the ancestors' righteous deeds and, on this basis, prayed for God to send a redeemer; Tannaim summarized this benediction under the title "Fathers" (*m. Roš Haš. 4:5*). In the early period, the issue may have been simply Israel's deliverance as a people and the expectation that Abraham's Israelite descendants would all be saved, except for those who broke covenant (cf. *m. Sanh. 10:1*).⁶⁰²

Luke knows that some vainly depend on Abrahamic descent—that is, on being God's chosen people—for salvation (Luke 3:8; 16:24, 30). But whereas some Christian sources polemicize against dependence (perhaps on a popular level) on Abrahamic descent, there is no indication of polemic here, and Luke does affirm God's covenant with Israel's ancestor Abraham in a nonpolemical context (1:73; cf. 13:16; 19:9). Stephen appeals to Abraham's life as an example of how (and where) God acts.

Throughout Luke-Acts, biblical narratives of God's faithfulness to characters such as Abraham echo as a subtext. The Abraham story, a foundational biblical narrative, is echoed even at the opening of Luke's Gospel, where Zechariah and Elizabeth resemble Abraham and Sarah (1:7, 13); see further comment on Acts 3:25.

I. GOD SPEAKS IN MESOPOTAMIA (7:2)

The *captatio* summary is brief. On "men," see comment on Acts 2:14; on "brothers," see comment on Acts 9:17. In addressing "fathers," Stephen addresses respectfully the elders of the people, perhaps especially the Sanhedrin, Jerusalem's municipal senate (Acts 6:12, 15).⁶⁰³ Thus Romans spoke of their own senators, the "elders" of their people.⁶⁰⁴ More generally, ancients employed such fictive kinship terminology in an honorary manner, sometimes in direct address (e.g., 2 Kgs 5:13; 13:14; Diod. Sic. 21.12.5). For example, various texts apply "father/son" language to teachers and their disciples;⁶⁰⁵ disciples were called "children" of their teachers,⁶⁰⁶ and their teachers were their "fathers."⁶⁰⁷ Ancients employed titles such as "father of the Jews" (2 Macc 14:37); "fathers of the world" for the first-century schools of Hillel and Shammai (*Gen. Rab. 12:14*);⁶⁰⁸ "father of his country" or of the state for the emperor;⁶⁰⁹ and "fathers" for

602. For the salvation of all Israel, cf. also *b. Hag. 27a*; *Sanh. 110b*; Rom 11:26. For Abraham's involvement, see also Just. *Dial.* 44.1; Williams, *Justin*, xxxii.

603. I adapt my father/son comments from Keener, *John*, 921–22, which provides further detail.

Nep. 23 (Hannibal), 12.2; Sil. It. 1.610, 675; Quint. *Decl.* 265.15.

605. Among philosophers, cf. Epicurus (Culpepper, *School*, 107, cites *Lucr. Nat.* 3.9); Epict. *Diatr.* 3.22.82; Nock, *Christianity*, 30.

606. E.g., Porph. *Marc.* 1.6–8; Eunapius *Lives* 486, 493; 1 Cor 4:14–15; 1 Tim 1:2; Phlm 10; 3 John 4; 4 Bar. 7:24; *Sipre Deut.* 34.3.1–3, 5; 305.3.4; *b. Pesah.* 112a; *Šabb.* 25b; 31a (Hillel); *Pesiq. Rab.* 21:6 (Moses to Israel); 51:1. Other texts make analogies between fathers and teachers (e.g., *t. B. Qam.* 9:11). Some scholars have suggested the same analogy for mystagogues and mystery initiates (Lohse, *Colossians*, 200).

607. E.g., Philost. *Vit. soph.* 1.490; 1.25.536, 537; Iambl. *V.P.* 35.250; 2 Kgs 2:12; 4 Bar. 2:4, 6, 8; 5:5; *t. Sanh.* 7:9; Matt 23:9; cf. *Gen. Rab.* 12:14 (Simeon ben Yohai of the sages of Beth Hillel and Shammai); for Christian usage from the second to fifth centuries, see Hall, *Reading Scripture*, 50.

608. "Father of the world" also came to be a title for the patriarchs (*Tg. Neof.* 1 on Gen 40:12; *Tg. Ps.-J.* on Gen 40:12; Deut 28:15).

609. *Res Gestae* 6.35; Ovid *Tristia* 4.4.13; *Fasti* 2.130–32, 637; Tac. *Ann.* 2.87 (refused); 11.25; Suetonius *Julius* 76.1; *Aug.* 58.2; *Vespasian* 12; Pliny *Paneg.* 42.3; Dio Chrys. *Or.* 1.22 (the ideal ruler); Hdn. 2.2.9; 2.6.2; or simply "parent" or "father" (Ovid *Pont.* 4.9.134; cf. the deceased Julius Caesar in Cicero *Fam.* 12.3.1;

triumphant generals,⁶¹⁰ for other societal leaders or benefactors,⁶¹¹ for rescuers in battle (Polyb. 6.39.6–7), and for older mentors.⁶¹² Nevertheless, the respectful⁶¹³ but negative picture of “our fathers” at Acts 7:39, 44–45 may color the respectful address “fathers” in 7:2. Calling one’s audience to “hear” or “heed” one was common in rhetoric⁶¹⁴ and biblical tradition (e.g., Job 5:27; 13:6; 34:2; Prov 1:8; 4:1, 10)⁶¹⁵ and is common elsewhere in Acts (Acts 2:14, 22; 13:16, 40; 15:13; 22:1; 26:3; see comment on Acts 2:14).

The phrase “God of glory” appears in Ps 29:3 (28:3 LXX),⁶¹⁶ from the early Christians’ prayerbook (Psalms; e.g., Acts 4:24–26): the God who deserves that all glory be ascribed to him (Ps 29:2) because he reigns in majesty (29:4). That the God of glory appeared⁶¹⁷ might allude to God’s glory appearing in Isa 40:5 LXX (though this is omitted from Luke 3:6). Genesis does not record a vision of glory at Abram’s call, but this report undoubtedly anticipates Stephen’s vision of glory in Acts 7:55, forming an *inclusio* around Stephen’s speech;⁶¹⁸ the patriarchal history continued in Stephen’s experience. That the verb is no accident might be confirmed from its introduction to a quotation from Exodus in 7:26 (see comment there). “Our father Abraham” fits standard Jewish thought about Abraham (cf. John 8:53; Rom 4:12),⁶¹⁹ as Luke seems to recognize (Luke 1:73; 3:8; 16:24, 30).

“Mesopotamia” and “Haran” appear together in Gen 27:43 LXX (although the MT does not mention Mesopotamia there), but this is probably not an allusion to a specific text; “Harran” appears eight times in the LXX of Genesis, and “Mesopotamia” thirteen times in the LXX of Genesis.⁶²⁰ Although in practice Luke focuses his cross-cultural theology on the mission to Rome and its empire, he recognizes that the mission is beyond Rome as well (Acts 1:8; 8:26–40); in this case, he knows of Jews in Mesopotamia and Christian proclamation there (2:9). Many scholars would not define “Ur of the Chaldeans” (Gen 11:28, 31; 15:7; Neh 9:7) as technically in Mesopotamia, but it was for Josephus (explicitly, *Ant.* 1.157).⁶²¹

In a straightforward reading of Genesis (Gen 11:31–12:4), God appears to have called Abram in Haran, but ancient writers sometimes read behind narratives and

Suetonius *Julius* 85); so also for other kings (the fictitious Ethiopian king in Heliod. *Eth.* 10.17) and for the Roman state itself (Tac. *Ann.* 3.28); comparing a ruler to a father, Xen. *Cyr.* 8.1.1. For the significance and publicizing of Augustus’s title, cf. Starr, “*Pater patriae*.”

610. Sil. It. 7.734–35; 8.2; 17.651; Tac. *Ann.* 2.80.

611. Dion. Hal. *Ant. rom.* 12.1.8; Paus. 8.48.5–6; 8.51.7; Cicero in Plut. *Cic.* 23.3; for Rome’s founding elders (Ovid *Fasti* 5.71); honorary title “father of the Greeks” (Philost. *Vit. soph.* 2.27.617); a kind master (Xen. *Cyr.* 8.1.44); an ideal ruler (Mus. Ruf. 8, p. 64.14, claiming that this imitates Zeus’s role). Cf. for leaders in the Mithraic cult (Burkert, *Cults*, p. 42).

612. Hom. *Il.* 9.607, employing a different term; *Od.* 1.308.

613. See Acts 7:11–12, 15, 19.

614. E.g., *Rhet. Alex.* 19, 1433b.19–23; Cic. *Verr.* 2.3.5.10; *Mil.* 2.4; in ethical exhortation, cf. Epict. *Diatr.* 2.19.12.

615. Including for divine speech (e.g., Deut 5:1; 6:4; 9:1; 2 Chr 18:18; Isa 66:5; Jer 2:4; Amos 3:1; 4:1; 5:1; Mic 1:2; 3:1) and prayer (e.g., Pss 27:7; 143:1; Dan 9:18).

616. Others (Richard, *Composition*, 39; Soards, *Speeches*, 61; Dunn, *Acts*, 92) also note this connection. The psalm may depict a storm in theophanic terms (cf. Weiser, *Psalms*, 261–63).

617. Luke is fond of the aorist passive of ὀράω for revelations, whether of angels (Luke 1:11; 22:43; Acts 7:30, 35), Elijah and Moses (Luke 9:31), the risen Jesus (Luke 24:34; Acts 9:17; 13:31; 26:16), the fire at Pentecost (Acts 2:3), or a night vision (16:9); otherwise only 7:26.

618. E.g., Johnson, *Acts*, 114; Richard, *Composition*, 39; Soards, *Speeches*, 61; Dunn, *Acts*, 92.

619. E.g., 4 Macc 16:20; *m. ’Ab.* 3:16; see the introduction to Acts 7:2–8 above.

620. Apart from the LXX, Luke’s audience might have little interest in Mesopotamia. Important as it was for understanding Israel’s origins (and Parthian Jewry), the Roman world’s understanding of Mesopotamian history was, in general, limited (see Pliny *N.H.* 6.30.117–20, esp. 117).

621. Le Cornu, *Acts*, 343. Stephen apparently defines “Mesopotamia” as narrowly around Ur (Acts 7:2, 4), though Haran is in Mesopotamia in Gen 24:10 LXX (Marshall, “Acts,” 557).

rearranged chronology according to what they thought a more accurate scheme. In contrast to the surface narrative sequence in the Genesis passage, the figures in Genesis (11:26, 32; 12:4; cf. 17:1) suggest that Abram was called and left before Terah died⁶²² (although the speech also rejects this option, Acts 7:4). Some have found a connection here with the Samaritan Pentateuch, which varies from the MT here (to allow Terah's death before Abram's departure),⁶²³ but this may simply reflect a broader Jewish tradition. For a calling before Terah's death, perhaps Luke depended on Gen 15:7 or Neh 9:7 or on exegetical tradition suggesting an earlier calling (attested also in Philo *Abr.* 71–72);⁶²⁴ see further in comment on Acts 7:4.

II. FORSAKING ALL FOR GOD'S PROMISE (7:3)

The call to leave kin and land for a greater promise (Gen 12:1, 4) fits Luke's larger understanding of Christ's call to believers (Luke 18:29–30; employing συγγενής, 14:12; 21:16). The calling of Saul that Luke will soon narrate also involves a degree of leaving his own people and going where God will show (9:15–16; cf. 22:21; 26:17).⁶²⁵ Even sooner, the principle here will require believers to be scattered from Jerusalem—ironically, especially due (on the narrative level) to the hostile response to Stephen's message (8:1; 11:19).

God's promise to Abram in Genesis concerned land and seed, but Luke's and Stephen's canonical reading would view this promise (especially regarding the ultimate seed, 13:23; see comment on Acts 3:26) as partly already fulfilled in God's kingdom through the Davidic ruler. This promise of the land was delayed through the people's rejection of Moses (cf. Acts 7:42, 45); hence the kingdom and Israel's rule over its own land could be likewise delayed through their rejection of the prophet like Moses (cf. 7:37, 52). The quote here is almost exactly the same as in Gen 12:1 LXX except for the omission of a statement about Abram leaving his father's house. This omission would not seem significant except for Acts 7:4's emphasis that he waited until his father's death, having received the call earlier (see comment on Acts 7:4). This might emphasize that God allowed Abraham to wait, which would make even longer the time of God's faithfulness *outside* the land. The omission might also respond to apologetic concerns, emphasizing submission to the *paterfamilias*,⁶²⁶ but it could have been omitted simply to conserve space.

III. ABRAHAM'S DEPARTURE (7:4)

Stephen spends much more time narrating Abraham's wanderings in Mesopotamia than his hearers might expect; Abraham heard from God before in Haran (7:2), then

622. Lake and Cadbury, *Commentary*, 70; Haenchen, *Acts*, 278. Of course, Gen 11:26 is not intended as a detailed chronological statement unless the three sons were triplets, but if he began fathering at that age, Abram may have been his firstborn.

623. E.g., Bruce, *Acts*¹, 162n1; Bruce, *Books*, 130n2; Conzelmann, *Acts*, 52.

624. Lake and Cadbury, *Commentary*, 70; Foakes-Jackson, *Acts*, 60; Bruce, *Acts*¹, 161 (citing also Jos. *Ant.* 1.154, which could work if the Chaldean land includes Ur but not Haran). Soards, *Speeches*, 148, emphasizes Neh 9:7, noting other allusions to that passage's retrospective in Acts 7. Such solutions are better, Litke argues ("Samaritan Chronology"), than dependence on Samaritan ideas.

625. Acts 9:16 employs a cognate (ὑποδείκνυμι) of the verb for "show" (δείκνυμι) in 7:3 (the cognate ὑποδείκνυμι appears also in 20:35; Luke 3:7 Q; 6:47; 12:5). Cf. also God "showing" Peter (the only other use of the exact verb δείκνυμι, from Acts 7:3, in Acts) that God welcomes Gentiles. (Admittedly, the verb appears in other senses in the Gospel: Luke 4:5; 5:14; 20:24; 22:12; most early manuscripts of 24:40.) The command "come" in Acts 7:3 appears only in summons or calls in Luke-Acts (7:34, for Moses; Luke 18:22) and is probably introduced into Stephen's quotation in Acts 7:3 from the LXX of Exod 3:10 (quoted in Acts 7:34).

626. Cf. Jesus's submission to parents in Luke 2:51 (though Luke does not tone down the radical character of the Jesus tradition about "hating" parents in 14:26 in the way that Matthew apparently does); Luke also includes Joseph's kindness to his father Jacob in Acts 7:14. Is this apologetic for those who thought Christians subversive (on which see, e.g., Keener, *Paul*, 129–56, and sources cited there; Balch, *Wives*, 65–80, 118)?

lived in Haran before coming to the promised land (7:4); likewise, his descendants would live in God’s providence in a foreign land for centuries before settling in the land (7:6). The term used for their current living in the land (κατοικεῖτε) recalls Abraham’s dwelling in Haran (7:4; also earlier in 7:2).

Here begins a series of tragic reversals (“a central device in tragedy” since the time of Aristotle).⁶²⁷ The positive events demonstrating God’s faithfulness to Abraham in this paragraph are echoed and reversed for Israel later in the speech:

Abraham Story	Condemnation of Israel
God “resettled” Abraham (7:4)	God “resettled” Israel by exile (7:43)
Abraham’s descendants should worship God (7:7)	Israel worships idolatrously (7:42)
God grants the covenant of circumcision (7:8)	Stephen’s covenant-breaking accusers have uncircumcised hearts (7:51)

“Thus three key words or root words associated with God’s saving work and promise in the Abraham section of the speech,” Tannehill notes, are recalled later in the speech to remind Stephen’s hearers how far Israel has often strayed, and how far his own hearers have strayed, from God’s call and promise.⁶²⁸

Terah died in Gen 11:32, in Haran (also in *Jos. Ant.* 1.152); then Abram’s call to the promised land came explicitly in Gen 12:1–3 (also *Jos. Ant.* 1.154), but Luke approaches the chronology differently. Because the family had already started en route to Canaan when they settled in Haran (Gen 11:31), Luke reports the calling (Acts 7:2–3) not only before the migration to Canaan but also before the migration to Haran.⁶²⁹ (See comment on Acts 7:2–3.) The ages at which events occurred in Genesis suggest that Abraham left before his father’s death (Gen 11:26, 32; 12:4), but simply following the Genesis narrative would not inform the reader of this. Terah’s age at death (11:32) in the Samaritan Pentateuch was 145 years, which allows for the harmonizing of both tendencies in Genesis, but the number is 205 years in the MT, the LXX, Josephus (*Ant.* 1.152), and apparently in 4Q252 1 II, 8–10, in all of which Terah was presumably alive when Abraham left. If Luke had specific reasons for the change, they may be social-apologetic, related to his omission of Genesis’s “leave your father’s house” (see comment on Acts 7:3).⁶³⁰ But others besides Luke and the Samaritans also opined that Abraham left after Terah’s death (*Philo Migr.* 177).⁶³¹

Abraham went and “dwelt” in Haran; the description resembles the LXX of Gen 12:4–5 except in his use of κατοικέω, which nowhere appears in the LXX with Haran or Mesopotamia (altogether only three times in the LXX, never in Genesis) but appears in Acts 7:2 as in 7:4. Was Luke using language that would appeal to resident Diaspora Jews (2:5, 9)? Or perhaps it is just Lukan style in Acts (19 occurrences; only twice in the Gospel). In a legend that Josephus claims to find in Nicolaus of Damascus *History* 4, Abraham remained a powerful leader in Damascus (Josephus perhaps identifying Damascus with Haran) before leaving for Canaan (*Jos. Ant.* 1.159–60).

627. Tannehill, *Acts*, 90.

628. *Ibid.*

629. Whether Terah was following God’s call (cf. Gen 31:53) or not (cf. Josh 24:2) the narrative does not settle.

630. This might help mitigate Jesus’s alleged dishonoring of families; but if reducing that charge were a major concern of Luke’s, one would have expected him to retain Mark’s *qorban* passage (Mark 7:11) and to qualify his harsh statements, such as Luke 14:26 (cf. Matt 10:37).

631. E.g., Lake and Cadbury, *Commentary*, 70; Haenchen, *Acts*, 278; Schille, *Apostelgeschichte*, 180; Chance, *Acts*, 110.

IV. THE PROMISE FOR THE FUTURE, NOT THE PRESENT (7:5)

Stephen here employs the rhetorical device that some more technical rhetoricians called *epimone*, following “no inheritance” with the specification “not even a foot of ground.”⁶³² In view of Gen 23:16–18, this may be partly hyperbole;⁶³³ but the point may be that nothing was yet permanent (in view of Acts 7:6). In any case, “not even a foot of ground” exemplifies the way midrashists borrowed from one story to fill in another because they affirmed patterns of divine activity in history. “Not even a foot” quotes words from Deut 2:5, where God prohibits Esau’s land to Israel because he has given that land to Esau for an inheritance.⁶³⁴ If the allusion is deliberate, it evokes awareness of the God who cares for all peoples and is sovereign over geography.⁶³⁵ Stephen is free to describe one part of Scripture with the language of another. Thus this “giving an inheritance” was more common in Numbers and Deuteronomy (about twenty times each) than in Genesis (only once, Gen 31:14, undoubtedly irrelevant). But Stephen has not forgotten Genesis. The promise in this verse clearly echoes Gen 17:8, to which it corresponds in several key words, and the mention of the child he did not yet have uses the term for “child” applied to Isaac in 17:16; 22:7. (“Inheritance” invited various theological, including eschatological, associations for Israel; see comment on Acts 20:32; on the “promise,” see comment on Acts 7:17.)

Despite the conciseness of the summary, Stephen emphasizes that Abraham did not yet have a child; this may highlight that the promise demanded faith. Abraham (and his descendants, Acts 7:6) needed to persevere by faith through testing. Testing was always a pattern for God’s servants in Scripture, including the heroes of this chapter (7:3–5, 9, 27–28); this fit the pattern of suffering-exaltation continued in recitals of the gospel story, and Luke believed it foundational to understanding that story (Luke 24:46; Acts 3:18; 17:2–3; 26:22–23; cf. 1 Cor 15:3; 1 Pet 1:11).

That Abraham did not yet receive the promise shows that God worked through someone not yet in possession of the land; it is not so much present possession of the land but the guarantee of eschatological promise that matters. This connection might suggest the importance of faith for Luke’s early Christian audience (Heb 4:1–2; 11:9–10, 13–16; cf. Rom 4:17–21). It also placed the land in perspective: although God’s people could be confident of eschatological possession of the land (cf. Acts 1:6–7; 3:19–21), there was no guarantee that they would hold it in the present, particularly if they faced judgment (cf. Luke 21:24).

V. THE PROMISE OF EXODUS AND THE LAND (7:6–7)

Following proper rhetorical protocol, this part of the speech anticipates some of what will come. It prepares the way for the Moses story by predicting slavery and oppression (cf. *κακόω* in Acts 7:19, 34), just as the Moses story alludes back to the fulfillment of the “promise” in the exodus (7:17) and refers to God as the God “of Abraham” (7:32).⁶³⁶ It also implies that the exodus will echo Abraham’s own experience of “coming out” of the place where he had lived (7:3).⁶³⁷

632. On *epimone*, see Rowe, “Style,” 144–45 (citing as examples Greg. Naz. *Or.* 16.1; Cic. *Mil.* 26.69); cf. also Porter, “Paul and Letters,” 582 (citing Rom 7:18–20).

633. The language may reflect Hittite deeds (see comment below on Acts 7:15–16). Most important, however, from a literary perspective, it establishes a foothold for Israel’s future presence in the land. Genesis itself can use “foot” hyperbolically (Gen 41:44).

634. Others also note the allusion (Conzelmann, *Acts*, 52, also noting similar language in Gen 12:7; 13:15; 48:4; tentatively, Dunn, *Acts*, 93).

635. Possession by “feet” refers to one way of measuring ground off, but see also Josh 1:3, which echoes the Abraham story at Gen 13:14–15.

636. Tannehill, *Acts*, 91.

637. Cf. Kilgallen, *Speech*, 38.

The key wording reflects Gen 15:13 (“the seed will be πάροικον in a land . . . , they will enslave and abuse [them] for 400 [years]”).⁶³⁸ The existence of Israel’s people as resident aliens in Egypt provides a model for God’s people as aliens in the world (cf. Heb 11:8–10, 13–16; 1 Pet 1:1, 17; 2:11; perhaps Ps 119:19 [118:19 LXX]; *Diogn.* 5.5). “The only land that Abraham possessed,” Bruce points out, was the land “he bought for a burying-place” (cf. Acts 7:16, 29, 44, 47; cf. Gen 23:4 LXX; Ps 105:12 [104:12 LXX]).⁶³⁹ The many connections throughout the speech show how deep this emphasis runs. The immigrant theme appears also in the Joseph story (Acts 7:17–21),⁶⁴⁰ and the term πάροικος applies to Moses (the reversal of Joseph in some respects; cf. comment on Acts 7:9–18), who became an alien in Midian (7:29); Luke employs a cognate in 13:17 again for Israel’s sojourn in Egypt.⁶⁴¹ The LXX sometimes uses πάροικος with ἀλλότριος for living in a foreign land (Deut 14:21), including in Moses’s story (Exod 2:22; 18:3).⁶⁴² (It is possible that some of Luke’s audience after 70 would connect this with Israel’s period of oppression.)⁶⁴³

Gentile readers would understand Luke’s language of “slavery” (Acts 7:7) here even without knowledge of the story in the LXX (Exod 14:5, 12); many condemned political tyranny or domination, whether by tyrants⁶⁴⁴ or empires,⁶⁴⁵ as “slavery.” “Freedom,” conversely, often meant freedom from political domination, including by a foreign empire.⁶⁴⁶

The Abraham story heads to this climax of worship in “this place” (Acts 7:7). The land is tied to the place of worship, answering Stephen’s accusers’ claims that he opposed the temple (6:11–14). This is clear in part from the speech’s blending of quotations. (Luke’s speakers elsewhere add phrases such as “says God” for clarity [2:17; 15:17–18].) Although most of the quotation closely follows Gen 15:14 LXX (appropriate after Gen 15:13 in the preceding verse),⁶⁴⁷ the language of worship (λατρεύουσιν) jumps ahead to its possibly implied goal in Exodus, where God commands Pharaoh to let Israel come “worship” God in the wilderness (Exod 3:12;

638. The figure is obviously a round one; cf. 430 years in Exod 12:40 and Gal 3:17, as well as 450 years in Acts 13:19.

639. Bruce, *Acts*¹, 163.

640. See Kilgallen, *Speech*, 41.

641. Cognates easily applied to Israel’s exile as well (Ezra 8:35; 1 Esd 5:7). Μέτοικος applies to “immigrant foreigners who lived in a Greek city without possessing rights of citizenship” (Cartledge, “Metokoikos,” 810), even if (as in Hellenistic Athens) this may have been half the city (812). Though best attested in prominent Athens, such resident aliens are attested in about seventy cities under various synonyms, including πάροικος (813).

642. Ideally, hospitality prohibits treating anyone as an “alien” (Dio Chrys. *Or.* 12.74, ἀλλότριον; Exod 12:48–49, though here and elsewhere the LXX applies this principle specifically to “proselytes”). But aliens normally remained susceptible to harsher treatment (Aeschylus *Suppl.* 202–3; Dio Chrys. *Or.* 31.84; for the tax on resident aliens, see Lucian *Parl. G.* 3). Those who grew up in a place as resident aliens tended to accept the culture more readily than newcomers (Plut. *Lect. 2, Mor.* 37EF) and might hold a status superior to pure foreigners (Dio Chrys. *Or.* 31.3).

643. According to some views of early Judaism, even Judean Jews before 70 remained in exile (Pao, *Isaianic Exodus*, 143–45, following Wright, *People of God*, 269–70 and others; citing, e.g., Tob 14:5; Sir 36). Others argue that although Judaism recognized the need for future restoration, Judean Jews before 70 did not see *themselves* as still in exile (see Kim, *New Perspective*, 136–41, esp. 137–38); contrast the twelve tribes, on which see comment on Acts 26:7.

644. E.g., Corn. Nep. 8 (Thrasylbulus), 1.5; Cic. *Att.* 14.14; *Phil.* 3.5.12; 3.11.29; 3.13.33; 6.7.19; 14.14.37; Sen. E. *Historical Frg.* 1; Lucan *C.W.* 7.445; Tac. *Agr.* 2–3; Iamb. *V.P.* 32.220; Philost. *Vit. soph.* 1.15.498; 1.486.

645. E.g., Lysias *Or.* 2.21, §192; Demosth. *Philip.* 3.36; 4.25; Isoc. *Peace* 105 (*Or.* 8.180); Sall. *Jug.* 102.6; *Mith.* 10; Dion. Hal. *Ant. rom.* 3.23.20; Appian *Hist. rom.* 8.9.56; Hdn. 3.2.8; Corn. Nep. 15 (Epaminondas), 5.3; 1 Macc 2:11.

646. E.g., from Rome in Tac. *Hist.* 4.64; cf. Diod. Sic. 10.34.8; Strabo 10.4.16. For a survey of political and moral applications of “freedom” language in ancient literature, see Keener, *John*, 749–52.

647. The omission of ἀποσκευή, “possessions” (cf. Gen 14:12; 31:18; 34:29; 30 times in the LXX but never in the NT) may be due to the need to quote only part of the verse, but if deliberate, it would match Luke’s emphasis on the worthlessness of possessions (Acts 2:44–45; Luke 14:33).

4:23; 7:16; 8:1, 20; 9:1, 13; 10:3, 7–8, 11, 24, 26; 12:31).⁶⁴⁸ Stephen substitutes “this place” (Acts 6:13–14; cf. 21:28) for “wilderness.” But it may especially allude to the first reference (Exod 3:12 LXX),⁶⁴⁹ where Israel would come worship God at Mount Sinai. Thus Stephen’s use of “this place” would anticipate his later usage in Acts 7:33;⁶⁵⁰ in Acts 6–7, τόπος is elsewhere a place of worship (6:13–14; 7:49). Offering the following evidences, Kilgallen argues that Luke emphasizes 7:7:⁶⁵¹

1. The fact that the verse provides the last direct quotation from God in the Abraham story (and until 7:32)
2. Luke concluding with it emphatically in a position of fulfillment
3. The deliberate coordination of two texts in 7:6–7, introducing a verse from Exodus into the Abraham narrative
4. Arguments from the composition of 7:7b
5. Auxiliary arguments

Not all of these arguments are compelling in themselves, but in view of Luke’s context (6:11–14; 7:44–50), it is impossible to doubt the connection with the temple and hence the importance of these words for their context. But if the land’s (and the temple’s) purpose was as a place for worship, then defiled worship (cf. 7:39–50) at least temporarily voided the land of its sacred value and Israel of its promised right. The new “place” of worship was where God was (7:33), and God was dwelling in the midst of Jesus’s community through the Holy Spirit (2:4; 4:31).⁶⁵²

VI. THE COVENANT AND THE PATRIARCHS (7:8)

The terms “covenant” and “circumcision” appear together in Gen 17:13 LXX; “giving” a covenant appears idiomatically in 9:12; 21:27 and (with Abram) in 15:18.⁶⁵³ (On the covenant, see also comment on Acts 3:25.) Again the speech alludes to particular texts but echoes entire sections, demonstrating familiarity with the ethos of the text.

After noting the gift of circumcision, Acts 7:8 provides a chronological transition from Abraham to Joseph.⁶⁵⁴ The structure of Genesis itself lays special emphasis on these two figures. Of course, the literary connections are not limited to them. The first cycle of stories links Adam, Noah, and Abraham with promises of blessings, curses, offspring, and land as well as with genealogies (Gen 1:28; 9:1; 12:2–3).⁶⁵⁵

648. The verb λατρεύω means “serve” (Luke 1:74; Acts 24:14; 26:7; 27:23), but sometimes specifically by worship (Luke 2:37; 4:8; Acts 7:42; cf. Rom 9:4; 12:1; Heb 9:1, 6, 9; 10:2; 12:28; 13:10; Rev 7:15).

649. This is the reference most frequently cited (Dahl, “Abraham,” 145). Because τόπος appears in Acts 6:13; 7:33, 49, others note the significance of Luke’s change of “mountain” here (Combrink, *Analysis*, 9; Kilgallen, *Speech*, 38).

650. As Penner, *Praise*, 308, notes, thus “the place of Moses becomes the place of Abraham.” It is possible that this place alludes to the Akedah (Gen 22:3–4, 9, 14 LXX), perhaps identifying Moriah with Jerusalem (cf. 2 Chr 3:1), but this is probably pressing too much.

651. Kilgallen, *Speech*, 35–39, esp. 37–39. Kilgallen thus regards “promise” to be inadequate as a key for interpreting the story (44).

652. Smith, “Refutation.” Because of this new emphasis, the temple’s demise need not traumatize (Taylor, “Temple,” 720–21). Later rabbis often called God himself “the place” to underline his omnipresence (e.g., 3 *En.* 18:24; *m. Ab.* 2:9, 13; 3:14; *t. Sanh.* 1:2; 13:1, 6; 14:3, 10; *Sipre Num.* 11.2.3; see fuller comment at Acts 7:46), an emphasis Stephen would have appreciated.

653. Soards, *Speeches*, 149, compares Neh 9:8, presumably because of that passage’s other echoes in the context.

654. On the transition, see esp. Kilgallen, *Speech*, 45. A rhetorically trained reader might have viewed the way names are linked as akin to anadiplosis (on which see Rowe, “Style,” 130; Porter, “Paul and Letters,” 579), though LXX readers might think more of genealogies such as Gen 5:1–32 and 10:1–32, which provide chronological transitions between narratives.

655. Each of the genealogies separating these figures runs approximately ten generations and ends in three sons (Gen 5:1–32; 11:10–27). The curses appear in Gen 3:14; 9:25; 12:3, paralleling the serpent’s seed and Abraham’s opponents with Canaan.

Adam Narratives	Noah Narrative	Abraham Narrative
Blessed (1:28a; 5:2)	Blessed (9:1)	Blessed (12:2–3)
After creation	Recreation after the flood	After Babel*
“Be fruitful and multiply” (1:28)	“Be fruitful and multiply” (9:1, 7)	Promise of seed (12:2; 15:4–5)
Fill the earth (1:28)	Fill the earth (9:1)	Promise of the land (12:1)
Curse: serpent (and its seed, 3:14–15)	Curse: Canaan (9:25)	Curse: those who curse you (12:3)
Followed by a genealogy with about ten generations ending in three sons (5:3–32)	Preceded and followed by a genealogy with about ten generations ending in three sons (5:3–32)	Preceded by a genealogy with about ten generations ending in three sons (11:12–27)

* Making Abraham’s name great (12:2) contrasts with the people at Babel seeking to make their own name great (11:4); they were scattered after seeking not to be scattered (11:4, 8–9), whereas Abraham went in obedience to God (Gen 12:1, 4).

In Genesis, a remnant is called to begin to undo the damage done in Adam;⁶⁵⁶ God establishes a new people in Abraham, who must teach his descendants God’s way (Gen 18:19).⁶⁵⁷ The remnant contrasts with surrounding wickedness, contrasting also obedience to God’s promise with destruction: thus Noah versus his violent contemporaries (Gen 6–9), and hospitable Abraham versus dangerously inhospitable Sodom (Gen 18–19).⁶⁵⁸

But the largest narratives in Genesis concern Abraham, Jacob, and Joseph. Even in this transition in Acts, however, the covenant of circumcision remains critical, providing the speech’s only comment about Isaac besides that he fathered Jacob. Isaac’s circumcision on the eighth day appears in Gen 21:4 (in obedience to 17:12), but Acts does not quote it exactly. Isaac played a major role in Jewish thought of this period;⁶⁵⁹ in later texts,⁶⁶⁰ Isaac’s willingness to be sacrificed proved meritorious,⁶⁶¹ and other details were also added.⁶⁶² Later Christians applied the Akedah to Jesus’s death,⁶⁶³ but Stephen offers little more role to Isaac in his narrative than that of a genealogical connector.⁶⁶⁴

656. Noah is destined to reverse the curse in Gen 5:29; Moses nearly assumes this remnant role in Exod 32:10.

657. In Luke’s theology, Jesus’s movement propagates God’s way not primarily through rearing children (although that pattern is not discontinued) but through reaching existing peoples, thereby blessing all the earth’s families (Acts 3:25).

658. Similarly, the flood and fate of Sodom, like the plagues against Egypt, represent on a smaller scale the undoing of the blessing of creation. Sodomites threaten Lot, the nephew of the man who rescued them from slavery in Gen 14; Adam’s rebellion followed God’s supreme benevolence. Lot chose wicked Sodom’s area because it looked like the “garden of the LORD” (13:10); its comparison also to Egypt might warn hearers tempted to return to Egypt (Num 11:5).

659. The Akedah was among the Genesis texts apt to be emphasized in the Second Temple period (*Jub.* 17:15–18:16; 4Q225 2 I–II; 4Q252 1 III, 6–9; Huizenga, “Battle”; Fitzmyer, “Sacrifice”; Fisk, “Offering Isaac”; cf. Feldman, “*Aqedah*”; idem, “Version of *Aqedah*”; Swetnam, *Jesus and Isaac*, 23–55; Longenecker, *Christology*, 115). Samaritans also were interested (note the fourth-century lamp in Sussman, “Binding”). For surveys of the entire ancient Akedah tradition, see Heijne, “*Aqedat Isak*”; Kundert, “*Bindung Isaaks*.” Sanders, *Paul and Judaism*, 28–29, regards the tradition as minor in this period.

660. Hayward, “*State of Research*,” argues that elements such as Isaac’s willing sacrifice were established by the first century, but it does not seem clear enough in certainly earlier sources.

661. E.g., *Pesiq. Rab Kah.* Sup. 1:20; *Gen. Rab.* 55:4; 56:8; *Pesiq. Rab.* 40:6; *Tg. Neof.* 1 on Gen 22:8, 10, 14; *Tg. Ps.-J.* on Gen 22:1, 10; *ibid.* on Lev 22:27; contrast the Greek child sacrifice tradition in Aeschylus *Ag.* 205–47. For connections with Israel’s redemption, see, e.g., *Exod. Rab.* 15:11.

662. E.g., Bernstein, “*Angels*”; Chilton, “*Second Night*.” For varied approaches, see Elbaum, “*Sermon*.”

663. Early Christian art (for differences from the rabbinic approach, see, e.g., Bardski, “*Intuitions parallèles*”; Bourguine, “*Opfer*”) applies the Akedah to Jesus’s death (Jensen, “*Binding*”); this tradition continues in later history (e.g., a seventeenth-century Pietist hymn that mixes Hebrew, Yiddish, and German; Lapide, *Hebrew*, 75). (For Jewish artistic depiction of the Akedah, see Goodenough, *Symbols*, 9:71–77.) Hayward, “*Sacrifice*,” argues that the later Akedah haggadah is without Christian influence; by contrast, Davies, “*Passover*,” argues that the paschal link is a reaction against Christian teaching; Swetnam, *Jesus and Isaac*, 78, argues that the connection with expiation grew in reaction to Christian teaching.

664. Allusions in the NT are debated (for a survey of views, see Swetnam, *Jesus and Isaac*, 5–22); some find allusions to the rabbinic form (Wood, “*Typology*,” citing [583] also Israël Lévi in 1912) whereas others (I think more plausibly) find allusions only to the biblical account (e.g., Brown, *Death*, 1435–44, on the passion

Whereas Isaac's role is largely transitional in Genesis (apart from a small cycle of stories), Jacob's is not;⁶⁶⁵ here, however, he appears only in connection with the Joseph story (Acts 7:12, 14–15). This may not be surprising; Luke nowhere shows detailed interest in Jacob, mentioning him only as ancestor (Luke 1:33; 3:34; Acts 7:8) and in a title for God (Acts 7:46), usually alongside other patriarchs (Luke 20:37; Acts 3:13; 7:32), with whom he also appears in the kingdom (Luke 13:38).⁶⁶⁶ "Patriarchs" nowhere appears for the earliest ancestors in the early LXX (just for heads of families in 1–2 Chronicles) but appears in 4 Macc 7:19; 16:25.⁶⁶⁷

Luke elsewhere specifies circumcision on the eighth day (for John, Luke 1:59; for Jesus, 2:21),⁶⁶⁸ as does Paul in a perhaps oft-recounted summary of his orthodox past (Phil 3:5). Circumcision on the "eighth day" (cf. Lev 12:3) originally meant after the first week (12:2).⁶⁶⁹ It probably originally involved mercy toward the child for its first week (cf. Exod 22:30; Lev 22:27) before entering the covenant that devoted him to the Lord (Gen 17:10–14, presumably the immediate source of Stephen's "covenant" of "circumcision").⁶⁷⁰ Despite opposition to imposing circumcision on Gentile converts (Acts 15; see discussion of circumcision there), clearly Luke is not against circumcision for ethnic Israel (21:21).

c. Joseph the Rejected Deliverer and Alien (7:9–16)

By various literary connections, Luke links Joseph⁶⁷¹ with Jesus⁶⁷² and Stephen himself, whereas Joseph's brothers are spiritual ancestors of those who killed the prophets, Jesus, and ultimately Stephen himself (7:51–60).⁶⁷³ By the time the speech reaches its explicit climax, Luke's audience will credit Stephen for clear *παρρησία* (on which see comment on Acts 4:13): only the boldest of prophets or philosophers accused their hearers' ancestors of evildoing and added that the hearers now compounded their offenses (Luke 11:47–51; Diogenes *Ep.* 28).⁶⁷⁴ As in the Abraham story (Acts

narratives). Many doubt that the Akedah influenced Paul (e.g., Messner, "Soteriologie"), though many others disagree (e.g., Schoeps, *Paul*, 141; Rubenstein, *Paul*, 109; Dunn, *Theology of Paul*, 224; Penna, "Motivo"). Some find it in John (e.g., Braun, "Sacrifice d'Isaac") or in Jesus's binding to the "tree" (Wilcox, "Tree").

665. He is also further elaborated in haggadah (see, e.g., *Jub.* 19–45; see further Endres, *Interpretation*, 85–119).

666. Jewish traditions tend to either exalt Jacob or ignore him (Sicre Díaz, "Tradiciones").

667. Also *Testaments of the Twelve Patriarchs*; without the Greek term, cf. *Sipra Behuq.* pp. 8.269.2.5; later rabbis identified Abraham, Isaac, and Jacob as "the fathers" eighteen times in the Torah (*y. Ta'an.* 2:2, §2). In the NT, it is used only in Acts 7:8–9; for David in Acts 2:29; for Abraham in Heb 7:4. Luke's usage of this Greek term is among its early samples (Lake and Cadbury, *Commentary*, 72, suggested the earliest extant).

668. The accompanying naming ceremony (Luke 1:59; confirmed in later sources, Safrai, "Hebrew Sources," 5; idem, "Home," 767) resembles and might stem from a more widespread ancient custom (Danker, *New Age*, 17, suggests Hellenistic influence here). Romans named daughters on the eighth day and sons on the ninth (Plut. *Rom. Q.* 102, *Mor.* 288BC; Stamps, "Children," 198). For celebration until the circumcision, see Safrai, "Home," 767. The *sandak* as a godparent who holds the boy during circumcision is probably a later custom (see Newman, "Sandak").

669. Cf. this use of "eighth day" as "after the week" in, e.g., Lev 23:39; 2 Chr 7:8–9; Neh 8:18; Ezek 43:27.

670. Cf. 1 Macc 1:15; *Jub.* 15:11, 13, 14, 26; 16:14; 20:3; *t. Ber.* 6:12; *b. Šabb.* 132a; *Ned.* 32a; *Sanh.* 59b; *Menaḥ.* 53b; *Ker.* 9a; polemically, *Barn.* 9.6.

671. The setting of our earliest extant version of the Joseph story fits an Egyptian context (e.g., Hoffmeier, *Israel in Egypt*, 77–106; Sarna, *Genesis*, 211–31; Kitchen, "Egypt," 209; idem, *Reliability*, 343–52; Currid, *Egypt*, 74–82), and most Egyptologists (except Redford) date its essential form to the Ramesside (New Kingdom) period (Hoffmeier, *Israel in Egypt*, 98).

672. Subsequent Christian writers elaborated Joseph-Jesus parallels further, e.g., in Aphrahat *Dem.* 21.9 (brought to my attention by Ilya Lizorkin; Aphrahat lived ca. 285–345 C.E.). More relevant for modern critical sensibilities, Lunn, "Allusions," 31–35, usefully highlights concrete verbal allusions to the Joseph narrative in Luke-Acts. Although some might simply recall biblical language more generally, the pattern seems striking, suggesting that Luke may draw on Joseph typology himself more widely than in this passage.

673. See Richard, "Joseph Episode," esp. 265; Kilgallen, *Speech*, 49–51; Lampe, "Wolves," 264; in a more general way, noted often (e.g., R. Williams, *Acts*, 72).

674. Rhetoricians advised making hearers well disposed by praising their ancestors (Socratics *Ep.* 28).

7:4–5), the theme of God’s servant suffering before exaltation also recurs (7:9; cf. Gen 37:18–41:14; Ps 105:17–19).

I. LITERARY CONNECTIONS

This *narratio* focuses on common features of three major characters in the Torah (Abraham, Joseph, and Moses) from the narratives that introduced the law (cf. Acts 7:53).⁶⁷⁵ The principle of linking characters “typologically”⁶⁷⁶ in biblical history is not one that Luke originated; Joshua’s picture of a second exodus (Josh 4:22–24) and the prophets’ picture of a future exodus (e.g., Isa 12:2; 40:3; 43:20; Jer 16:14–15; Hos 2:14–15; 11:1, 11; Mic 7:14) evoked their prototype; Jewish eschatological literature uses the *Urzeit* as a prototype for the *Endzeit* (Isa 51:3; 63:11–14; 65:17; especially Eden).⁶⁷⁷ As noted in the commentary introduction, Greek historians themselves, citing providence, retrospectively discerned correspondences and patterns in history.⁶⁷⁸

For that matter, various characters are linked in the Genesis-Exodus narratives themselves, as discerning readers recognized and continue to recognize. These connections are most obvious between Joseph and Moses, sometimes as parallels and other times as contrasts. The contrasts reveal that God acts in history by a variety of means, not all as dramatic and obvious as the parting of the sea, yet all necessary and strategic for God’s plan (on the plan, see comment on Acts 2:23).

Joseph*	Moses
Brothers sold him into slavery	Family, who were slaves, rescued him from slavery
Midianites sold Joseph into Egypt	Midianites received Moses when he fled Egypt
Joseph became “father” to Pharaoh (Gen 45:8)	Moses became son to Pharaoh’s daughter
In one day, Joseph was exalted from slavery, over Egypt	In one day, Moses lost his royalty in Egypt by identifying with slaves
Joseph made all Egypt Pharaoh’s slaves (Gen 47:19)	Moses freed slaves; through him God judged Pharaoh’s might
Joseph from Jacob’s house to Egypt as a deliverer	Moses from Pharaoh’s house from Egypt as a deliverer
Joseph’s God delivered Egypt in famine	Moses’s God struck Egypt with plagues
Joseph, exiled in Egypt, married an Egyptian	Moses, exiled from Egypt, married a Midianite (and a Cushite)†
Aseneth’s father was priest of On	Zipporah’s father was priest of Midian
Aseneth‡ bore two initial sons, the name of the first reflecting his father’s sojourn in a foreign land	Zipporah bore two initial sons, the name of the first reflecting his father’s sojourn in a foreign land
God raised him up to bring Israel to Egypt	God raised him up to bring Israel out of Egypt
Future deliverer’s leadership initially rejected by his brothers	Future deliverer’s leadership initially rejected by his people

* Of course, narrative connections within the Joseph story itself abound. Thus, for example, Joseph’s prison is also a “pit” (Gen 40:16; 41:14), recalling where his brothers threw him (37:24; cf. Ps 40:2); each case is preceded with Joseph being stripped of his cloak (Gen 37:23; 39:12), which is replaced with a more exalted one at his exaltation (41:42). Judah, who sold Joseph into slavery (37:26–27), betrays his signet ring to an apparent prostitute (38:18, 25); Joseph, who resists temptation, gets Pharaoh’s signet ring (41:42), and Judah prefers slavery for himself rather than for Joseph’s brother Benjamin (44:33).

† The account shows other narrative connections as well: e.g., Isaac (via an intermediary, Gen 24:10–24), Jacob (Gen 29:1–12), and Moses (Exod 2:16–21) all found wives at wells.

‡ Her name in Gen 41:45, 50; 46:20; *Jub.* 34:20; *Jos. Asen.* passim; some MSS (perhaps corrections) of *Test. Jos.* 20:3 but, surprisingly, not in that document’s B and S texts (which have “Zelphan”).

675. Some Qumran texts parallel Joseph with Abraham (perhaps even as teachers if one reads “had taught” in 4Q213 1 I, 11–12; Rothstein, “Pedagogue”).

676. Cf. Longenecker, *Exegesis*, 94. I am employing the term more generally—less technically—than in Bock, *Proclamation*, 50, who distinguishes it from analogy.

677. Kugel and Greer, *Interpretation*, 46–47; on the *Endzeit* and the *Urzeit*, see discussion at Acts 3:21; Eden as the eschatological paradise for the righteous (e.g., Isa 51:3; Rev 22:1–3; the rabbis [e.g., *m. Ab.* 5:22, 24]; *Test. Dan* 5:12). Hays, *Echoes*, 101, gives the example of the Jordan crossing deliberately evoking the crossing of the *Yam Suph* (Josh 3:7–13).

678. Keener, *Acts*, 1:571–74.

Other parallels are possible, too, though not all are equally compelling.⁶⁷⁹ Luke, who compares and contrasts Jesus, Peter, Paul, and others in his story (following Greco-Roman conventions), can barely have missed such rich allusions in Israel's ancient Scriptures.

Various sources exploited the Joseph story for various purposes.⁶⁸⁰ Jewish traditions, especially the stream preserved in later rabbinic literature, often saw Joseph as a paradigm for the exiled and oppressed who would be vindicated by God.⁶⁸¹ They also extol his righteousness and observance of the law.⁶⁸² Philo in some respects treats Joseph as a model "of a bad politician."⁶⁸³ Stephen picks up on a function of Joseph that is highlighted by the above contrasts with Moses that appear early in the story collection: he was a deliverer whom God raised up. By contrasting two very different sorts of deliverers that God used to rescue his people, this speech provides some common characteristics of deliverers God used, which one would expect to find in most deliverers God raised up, especially the deliverer par excellence. One would expect the ultimate deliverer to be rejected by his own people, at least initially (cf. Luke 4:24–29).

II. GOD'S PRESENCE VERSUS JEALOUS PATRIARCHS (7:9)

As in Gen 37:11, Joseph's brothers "envied" him (and hated him in 37:4).⁶⁸⁴ This fits the passion tradition (Mark 15:10, but omitted by Luke; on jealousy and attacks, see Acts 17:5) and how apostles were treated by fellow Israelites in Acts 5:17 (see comment there).⁶⁸⁵ Ancient Jewish sources often commented on the jealousy of Joseph's brothers (e.g., *Jos. Ant.* 2.13; *Test. Dan* 1:6).⁶⁸⁶ These traditions sometimes amplified Joseph's danger,⁶⁸⁷ allowing for even closer assimilation to the pattern of the martyred prophet that grew in prominence in early Judaism (Acts 7:52). The brothers' jealousy stemmed from failing to understand that Joseph was not their rival but their deliverer (7:11–14). In Luke's theology, God exalts a person not for the person himself or herself but for his or her people's good (cf. Acts 13:36; 15:7; Luke 6:13–16); jealousy is therefore foolish.⁶⁸⁸

679. E.g., Joseph avoided adultery (Gen 39:8–12), but Moses committed murder (Exod 2:11–12; but the act may be understood more nobly, as in, e.g., Acts 7:24); Joseph continued interpreting dreams during suffering (Gen 40:12–19), but Moses apparently abandoned hope of deliverance (Exod 4:10, 13); Joseph was a young deliverer (Gen 41:46), but Moses an old one (Acts 7:40). For contrasts between positive and negative characters in Acts 7, see Parsons, *Acts*, 107–8.

680. For the early interpretation of Joseph in *Jubilees*, see Endres, *Interpretation*, 171–90.

681. Kern-Ulmer, "Vorlage und Rezeption."

682. See Scharlemann, *Stephen*, 66. Samaritan texts linked Joseph as the greatest king and Moses as the greatest prophet (Bowman, *Documents*, 257). Cf. Joseph's celebrated resistance to sexual temptation (*Jub.* 39:5–6; *Test. Jos.* 8:3; *y. Hor.* 2:6, §4; *Gen. Rab.* 87:6, 8; *Lev. Rab.* 23:10; *Song Rab.* 4:12, §1; *Tg. Neof.* 1 on Gen 39:10; Teugels, "Kuisse").

683. Neudorfer, "Speech," 292; cf. Philo *Jos.* passim.

684. Josephus's depiction of Izates (*Ant.* 20.20–21) might recall Joseph's brothers' envy due to his favor with his father (Gen 37:4).

685. Cf. also the possible allusion to Gen 37:20 in Luke 20:14, though it is less obvious than in Mark 12:7 and Matt 21:38 (it is not certain whether Luke caught the allusion).

686. Johnson, *Acts*, 117, cites also Philo's emphasis on their envy (*Jos.* 5, 17), hatred (5), grief and anger (10–11), anger and murder (12); and *Testaments of the Twelve Patriarchs* (*Test. Gad* 3:3; 4:5–6; 5:1; *Test. Jos.* 1:3–4; esp. *Test. Sim.* 2:6–7, 11, 14; 3:2–3; 4:4–9). Envy often appears as a motivation in historical (Thucyd. 2.35.2; Polyb. 1.36.2–3), biographic (Plut. *Coriol.* 39.1; Philost. *Vit. soph.* 1.21.515), and ethical (Plut. *Profit by Enemies* 10, *Mor.* 91E) texts; see fuller comment on Acts 5:17, including discussion of envy in ancient ethics.

687. E.g., Joseph's warning that his siblings not "shed innocent blood" (*Test. Zeb.* 2:2). The story of their opposition continued to circulate in subsequent centuries (e.g., Qur'an 12.9–20).

688. For Luke, jealousy against Jesus belongs to a different category, in which jealousy is foolish because it is hubris against the Creator.

That they “handed him over” or “traded” (ἀπέδοντο) him “to Egypt” echoes Genesis: Joseph’s brothers “handed him over” to slave traders who “handed him over” to people in Egypt⁶⁸⁹ (Gen 37:27–28, 36; 45:4–5). This betrayal likely also echoes the image of Jesus’s being “handed over” by fellow Jews to Gentiles in the passion tradition, though the Greek term there is παραδίδωμι and not ἀποδίδωμι (Luke 9:44; 18:32; 20:20; 24:7, 20; Acts 3:13; for disciples, see Luke 21:12, 16; Acts 8:3; 12:4; 21:11; 22:4; 27:1; 28:17).⁶⁹⁰ Kidnapping for slave trading was a heinous offense both in ancient Near Eastern legal collections (Exod 21:16; Deut 24:7; Hamm. 15) and in Greco-Roman thought.⁶⁹¹ Some other historians and rhetoricians portrayed ancients who introduced slavery and slave abuse as wicked.⁶⁹² Stephen’s and Luke’s audiences would recoil at the behavior depicted here.

Some Jewish traditions tried to reduce the ancestors’ guilt for what they did to Joseph. *Jubilees* 39:1–2, Artapanus (*On Jews* frg. 2), and Pseudo-Philo (*L.A.B.* 8:9) omit the element of envy.⁶⁹³ One very late tradition, against a plain reading of Genesis, even claims that all twelve patriarchs were “equally righteous” (*Tg. Ps.-J.* on Gen 49:28).⁶⁹⁴ Other perspectives were less lenient: God ordained the Day of Atonement because of what Joseph’s brothers did to him (*Jub.* 34:18–19).

Jewish sources often recognized the pattern in Scripture that Acts 7:51–52 climaxes. Philo wrote of the worse hating the better (*Worse* passim). A late rabbinic tradition (*Song Rab.* 8:1, §1) points out the pattern that Cain killed Abel,⁶⁹⁵ Ishmael hated Isaac (this part is postbiblical), Esau hated Jacob,⁶⁹⁶ and Joseph’s brothers hated him (Gen 37:8; cf. also probably 1 Sam 17:28). Of course, sibling rivalry was not limited to Jewish tradition: Romans had their primeval Romulus and Remus,⁶⁹⁷ sibling quarrels continued to characterize much of the culture;⁶⁹⁸ and squabbles about inheritance,

689. In the larger context of this narrative, Egypt’s role here stands for the Diaspora, but Luke is aware of believers from Egypt (Acts 2:10; 18:24) and elsewhere in North Africa (2:10; 11:20; 13:1; cf. Luke 23:26), though his own narrative’s focus will be on Paul’s missions to the north and west.

690. In addition, Judas “handed Jesus over” to the priests (Luke 22:4, 6, 21–22, 48), and Pilate also “handed Jesus over” to them (23:25).

691. E.g., 1 Tim 1:10; Xen. *Mem.* 1.2.62; Terence *Eun.* 108–9 (kidnapping children for the slave trade); Dio Chrys. *Or.* 69.9; cf. seizing stragglers in Xen. *Anab.* 6.1.1. It grew from an offense that incurred a very heavy fine to a capital offense under Huplian (Robinson, *Criminal Law*, 34). Kidnapping remained a major source for the slave trade (Scroggs, *Homosexuality*, 120; Gagnon, *Homosexual Practice*, 333–34; Goodman, *State*, 38).

692. Balch, “Genre,” 14, offering a comparison with Acts 7:9. For further summary discussion of ancient slavery, see comment on Acts 12:13.

693. Johnson, *Acts*, 116–17.

694. Like Josephus, Philo, and Pseudo-Philo, Luke skips Joseph’s “bad report,” but later rabbinic midrashim view Joseph’s behavior negatively (Kalimi, “Josef,” who suggests that Jewish-Christian tension underlies these midrashim). The rabbis could react against Christian polemic against “the fathers” acting unjustifiably or simply sought haggadic reduction of their guilt (as in *Testaments of the Twelve Patriarchs*).

695. On Cain killing Abel, see further 1 *En.* 22:6–7; *Jub.* 4:2–3; Wis 10:3; 4 Macc 18:11; *L.A.B.* 16:2; *Jos. Ant.* 1.52–59; *L.A.E.* 23; *Apoc. Mos.* 2–3; 40:4; *Test. Benj.* 7:3–5; *Test. 697. E.g., Hor. *Epodes* 7.17–20; Ovid *Tristia* 4.3.8–9; Livy 1.7.2; cf. Fronto *Ad verum imp.* 2.1.11.

698. E.g., Hdn. 4.5.2–3. Sibling murder was viewed as terrible (Apollod. *Bib.* 3.12.6; Cic. *Off.* 3.10.41; Plut. *Cic.* 10.2; Lucian *Icar.* 25; Z. *Rants* 52; Hdn. 4.5.2; cf. Pindar *Pyth.* 2.32; Val. Max. 9.2.ext. 2), with terrible punishment (Diod. Sic. 16.65.5–6; Apul. *Metam.* 10.8). Sibling rivalry, of course, appears in a variety of cultures (e.g., Freeman, “Observations,” 565).

often among relatives, became a prominent form of legal discourse (cf. Luke 12:13).⁶⁹⁹ But this was more to be expected among ungodly Gentiles than among the patriarchs of God's own people!

God was "with" Joseph; the language echoes Gen 39:21 (cf. 48:21), during his imprisonment, and appears elsewhere in the patriarchal narratives with various patriarchs (Ishmael, 21:20; Abraham, 21:22; Isaac, 26:24; Jacob, 28:20; 31:5; 35:3); in Acts, God was with Jesus (Acts 10:38) and Paul (18:10).⁷⁰⁰

III. GOD EXALTED JOSEPH (7:10)

The statement that God "delivered" Joseph employs the same term (ἐξείλατο) as in Gen 37:21 (where Reuben delivers him from being killed), but Stephen's speech applies it more broadly: God might be "with" one (cf. Acts 7:9) in "affliction," and "deliver" one (Ps 91:15 [90:15 LXX], same words).⁷⁰¹ Just as God "delivered" Joseph, he delivers Israel from Egypt's oppression (Acts 7:34) and in Acts delivers Peter (12:11, in a paschal context) and Paul (26:17), which shows a common pattern of divine activity. Affliction, meanwhile, was also a common circumstance of God's servants (7:11; 11:19; 20:23; esp. 14:22).

That God gave Joseph grace and wisdom before Pharaoh (cf. Gen 50:4) certainly accurately summarizes Joseph's appearance before Pharaoh, if not its wording; he suddenly surmounted the "wise men" (41:8, 39) and had favor before (ἐναντίον) Potiphar (39:4). The primary focus of the language, however, is 39:21, where God gave Joseph favor and also (see Acts 7:9) God was with Joseph.⁷⁰² Possibly (the expression is too common to be sure) the Moses story also echoes the Joseph story with God's giving all Israel, freed slaves, favor before the Egyptians (Exod 3:21; 11:3); Luke may suggest a parallel with God's activity toward David (Acts 7:46), the church (2:47), and Stephen (6:8).

But Luke has a special reason for the wording: that Joseph had "favor" (grace) and "wisdom" connects him with Stephen himself (6:3, 8). ("Favor and wisdom" also connects him with Jesus in Luke 2:40, 52.) Also relevant for Luke's central theme, Joseph, like Stephen and some other Hellenistic Jewish proclaimers in Acts, was persecuted by his brothers yet secured a hearing among *Gentiles* such as Pharaoh (Acts 7:10).

Cognates of σοφός appear in Genesis only for Pharaoh's failing wise men (Gen 41:8), but Luke pairs it with "speech" (Luke 21:15), the Holy Spirit (with Stephen and his colleagues, Acts 6:3, 10), and perhaps "power" (7:22).⁷⁰³ Although the Lord's gift of "wisdom" appears with popular favor in Sir 37:21, the terms "favor" and "wisdom" elsewhere canonically are paired in this way only in Luke 2:40, 52, about Jesus, whom Joseph typifies here.

The title "Pharaoh" appears often in Genesis (perhaps seventy times) but the LXX has "king of Egypt" seven times in the Joseph story; the titles are combined occasionally, as here (Gen 40:17; 41:46; 45:21; 47:5; cf. Exod 3:10–11, 18–19). "King" may evoke for the informed reader Luke 21:12, making Joseph paradigmatic

699. E.g., Isaeus *Cleon.* 4.35; 6.35; *Menec.* 28–29; Pliny *Ep.* 6.33.2; for a more positive approach, Philost. *Vit. Apoll.* 1.13.

700. Cf. *Jos. Asen.* 4:7/9, where the Lord's grace was with (μετ') Joseph.

701. Cf. Ps 50:15 (49:15 LXX); 1 Sam 26:24; with different language, Pss 34:4; 54:7; 107:6; such language came naturally to those steeped in the Psalms, e.g., Ps 18 superscription.

702. Other Jewish commentators also noticed this prominent element of "favor" (e.g., *Test. Jos.* 11:6; *Jub.* 40:5 [in the older Charles ed., 40:4]), though it also appears elsewhere (e.g., Tob 1:13; *Test. Jud.* 2:1).

703. If one omits the first two chapters of 1 Corinthians, Luke-Acts displays one of the particularly high concentrations of "wisdom" in the NT corpus (the highest numerically but not by percentage).

for the Christian mission (cf. Acts 21:24, though this “king” is Jewish). That Joseph was appointed (κατέστησεν) presumably echoes Gen 41:43 LXX but also fits Luke’s purpose: Stephen himself was just “appointed” (6:3), and Israel questioned Moses’s being “appointed” (7:27, 35); together these four instances in this section account for all but one use of the term in Acts (17:15; cf. Luke 12:14, 42, 44). The description of Joseph’s exaltation echoes especially Gen 45:8 LXX (though, at points, the ideas more than the wording). The term ἡγέομαι is not applied to Joseph in Genesis but can summarize Genesis’s more extensive list of titles.⁷⁰⁴

IV. MEETING JOSEPH THROUGH FAMINE (7:11–13)

Gentile hearers would also understand “our fathers” as an expression for ancestors, for example, in one’s native city (Plut. *Cim.* 1.6); it appears especially pervasively, however, in Jewish sources (see comment on Acts 3:13). “Our fathers” respectfully connects Stephen with his audience; common ground was important in defense speeches,⁷⁰⁵ though Stephen will drop this bridging pronoun (for polemic, not ethnic-theological, reasons) during his explicit counterattack (“your fathers,” twice in Acts 7:51–52). Although Luke employs the title elsewhere (Luke 1:55, 72; Acts 3:13; 5:30; 13:17; 15:10; 22:3; 24:14; 26:6; 28:17), an overwhelmingly disproportionate concentration of his usage appears in this speech (Acts 7:11, 12, 15, 19, 38, 39, 44, 45), where it builds rapport but also foreshadows conflict when he speaks of “our fathers” disobedience to Moses (7:39; cf. 28:25; Luke 6:23, 26; 11:47–48). Biblical prophets and prayer leaders often drew attention to the “fathers” sins, especially when their descendants continued in their ways.⁷⁰⁶ One could emphasize either side of the ancestral tradition,⁷⁰⁷ depending on one’s objective. Stephen’s emphasis fits the pattern he will articulate, a pattern of rejecting God’s agents⁷⁰⁸ and of consequent judgment.⁷⁰⁹

Famine on “all the world” (Gen 41:54, 57) becomes “on the land of Egypt and Canaan” in Acts 7:11 (though this is also true in Genesis, cf. Gen 41:36; 42:5); in Acts, Agabus, like Joseph, can predict famine on a much larger world than Joseph’s and prepare people to help those in the promised land by a method similar to that of Joseph (Acts 11:28).⁷¹⁰ Famines elsewhere became occasions for divine intervention (Luke 4:25, on Elijah’s day).⁷¹¹

The description “great tribulation” may summarize what happened, though the wording appears elsewhere in the LXX (Neh 9:37; Jer 11:16; 1 Macc 9:27). Just as Joseph was delivered from his affliction in Acts 7:10, he becomes the agent for his siblings’ deliverance from affliction here; Lukan theology expects tribulations (11:19; 14:2; 20:23). The expression need not include an eschatological allusion (Rev 2:22; Neh 9:37; Jer 11:16), but one is possible (Matt 24:21; Rev 7:14), especially if an allusion to Dan

704. For the meanings of some of these, see Sarna, *Genesis*, 219–22.

705. See Witherington, *Acts*, 268 (on establishing common ground in the *narratio*).

706. E.g., Neh 9:2, 16, 34; Pss 78:8, 57; 106:6–7; Isa 65:7; Jer 2:5; 3:25; 7:25–26; 9:14; 14:20; 23:27; 44:9; Lam 5:7; Ezek 2:3; 20:36; Dan 9:16; Amos 2:4; Zech 1:2, 4; 8:14; Mal 3:7.

707. Deuteronomy is overwhelmingly positive toward the “ancestors” but refers (as is appropriate to its Mosaic setting) especially to the patriarchs.

708. Bock, *Proclamation*, 217–18, acknowledges the pattern but would not call it typology; the classification question here hinges on the definition of “typology.”

709. Balch, “Genre,” 11–13, argues that whereas Dionysius of Halicarnassus employs ancestors for eulogy, Luke employs some of them for invective. Balch compares Josephus’s analogous invective about the ancestors to explain their sufferings (14).

710. On famine in antiquity, see Garnsey, “Malnutrition”; and further comment at Acts 11:28.

711. Also for repentance (Luke 15:14).

12:1 is in view.⁷¹² If there are eschatological associations, then this “tribulation” famine perhaps foreshadows the one that Agabus, like Joseph of old, predicts in Acts 11:28 (the only other use of “famine” in Acts, though it appears four times in Luke’s Gospel).

They “could find no food” (7:11 NRSV, NASB) literally refers to no “fodder” for animals (so the term appears in Gen 42:27; 43:24 LXX and normally in the LXX). It is possible that Luke might mean it more broadly, since he uses the cognate verb for Jesus’s feeding people (Luke 9:17),⁷¹³ but the verb often bears this broader sense (most NT and LXX uses), and it is unclear whether we ought to read that sense into its cognate noun here. The plural noun can bear a broader sense,⁷¹⁴ but if Septuagintal usage is determinative here the term likelier connotes primarily “fodder.”

Stephen’s “our fathers” (Acts 7:12) brings home the point that this behavior stemmed from those his audience often idolized (cf. Luke 11:48). Legends and haggadah had whitewashed the behavior of many of the patriarchs, or at least explained their behavior and provided sufficient repentance. Storytellers could tone down negative incidents,⁷¹⁵ omit them,⁷¹⁶ or justify the protagonists’ behavior.⁷¹⁷

That the patriarchs heard of grain in Egypt repeats Gen 42:2.⁷¹⁸ The speech’s “the first time” (Acts 7:12) provides a deliberate contrast to “second time” in 7:13, making the contrast emphatic—Joseph revealed himself openly and saved his people *fully* only the second time (allowing for the “hidden Messiah” of the first coming; see comment on Acts 3:22); cf. Heb. 9:28. This two-stage revelation is sometimes compared with Christian proclamation through both Peter and Stephen,⁷¹⁹ but in this case we would be surprised that it is rejected both times. It could fit Jesus’s rejection at Nazareth (Luke 4:28–29) and reappearance for Israel after his forty-day exile in the wilderness (4:14),⁷²⁰ though the chronology is reversed. Or the Gospel of Luke is Jesus’s first visitation, whereas he offers his second in Acts.⁷²¹ But perhaps a comparison with Jesus’s expected return is more likely (Acts 1:6, 11).⁷²²

Joseph revealed himself to his brothers on their “second” journey to him (7:13), which is emphatically contrasted with their first (7:12, noted above; cf. Gen 42–45). Likewise, God’s people accepted Moses only when he came to them after their initial rejection of him (Acts 7:27–35; and in that case they still were not obedient, 7:38–44, esp. 7:39–40).⁷²³ The term for Joseph’s “revealing” himself to his brothers (a form of ἀναγνωρίζω) clearly echoes Gen 45:1, the only other place in either the LXX or

712. Cf. the duration of Elijah’s famine in Luke 4:25; Jas 5:17 as perhaps an eschatological prefiguring (contrast more simply 1 Kgs 18:1). Some cite this figure in later rabbinic sources as well (e.g., *Yalqut Simeoni*, fol. 32, col. 2, on 1 Kings).

713. Barrett, *Acts*, 348. Cf. perhaps in Ps 36:19 LXX [37:19], where the cognate verb stands for God’s provision during famine (cf. Conzelmann, *Acts*, 52).

714. Cf. Moulton and Milligan, *Vocabulary*, 690; Liddell and Scott.

715. E.g., *L.A.B.* 12:2–3; *Test. Job* 39:12–13/9–10; 40:3/4.

716. E.g., *Jub.* 13:17–18; 14:21–16:22; 29:13; *Test. Zeb.* 1:5–7.

717. E.g., CD IV, 20–V, 3; *Jub.* 19:15–16; 27:6–7; 28:6–7; 30:2–17, 41; 1 Qap Gen^{tr} XX, 10–11; *Jos. Asen.* 23; *Test. Jud.* 8–12; *Test. Iss.* 3:1; *Tg. Neof.* 1 on Gen 38:25; *Tg. Ps.-J.* on Gen 38:25–26; 49:28.

718. Ἐξαποστέλλω is not used here in the Joseph narrative (though it appears for Joseph’s sending brothers back to Jacob, Gen 45:24), but the cognate ἀποστέλλω is frequent in the narrative.

719. E.g., Witherington, *Acts*, 268.

720. Johnson, *Acts*, 13, on the Moses parallel (Acts 7:24–39).

721. Again *ibid.* on the Moses parallel (Acts 7:24–39).

722. Lake and Cadbury, *Commentary*, 73; mentioned noncommittally by Bruce, *Acts*¹, 165 (citing Zech 12:10); opposed by Gaventa, *Acts*, 123. Chance, *Acts*, 113, observes that one can accept this reading, at most, for the level of Luke’s audience, not for that of Stephen in the story world; but were Stephen’s accusers unaware of Christian teaching that Jesus would return (cf. Acts 6:14; the allusion to Jesus’s own eschatological teaching in 7:56)?

723. Others also note the parallel with Moses here (e.g., Bruce, *Acts*¹, 165).

the NT⁷²⁴ where the term appears.⁷²⁵ Pharaoh then learns of them in Gen 45:16.⁷²⁶ In contrast to the king who did not know Joseph (Acts 7:18), this pharaoh was hospitable (Gen 45:16–20), supporting Stephen’s speech and Luke’s theology of a Gentile welcome outside the land.

V. MIGRATION TO EGYPT (7:14–15A)

The number seventy-five derives from the LXX (Gen 46:27; Exod 1:5);⁷²⁷ one can calculate the numbers in a variety of ways, but Genesis listed them artificially so as to yield seventy, possibly to parallel the genealogy of Gen 10.⁷²⁸ The tradition was probably wider than the LXX; 4QGen-Ex^a 17–18 2 and 4QEx^a I, 5 have seventy-five.⁷²⁹ The LXX gives Joseph nine sons instead of two (Gen 46:27 LXX); though he had more than two sons altogether (Gen 48:6), we can be relatively sure that the MT is the original reading here (cf. *Jub.* 44:24); even the LXX retains seventy in Deut 10:22.⁷³⁰ Educated Diaspora Jewish scholars recognized the discrepancy, at least between the LXX of Exod 1:5 and Deut 10:22; Philo says that the difference of five allegorically represented the senses, which Jacob managed to eradicate before going to Egypt (*Migr.* 199–201). Other Greek-speaking Jews sometimes preserved seventy despite the LXX, revealing their awareness of the earlier textual tradition.⁷³¹ Stephen simply follows the LXX of the more familiar passages, which Luke may have expected his audience to know, and perhaps this is all Luke was aware of here. If Luke knew another version, perhaps he considered it better to cite the version better known to his audience.⁷³²

Joseph’s sending to his father alludes to Gen 45:23–25; on Luke’s level, Joseph “sent” word to Jacob to bring him to Egypt (Acts 7:14),⁷³³ and God “sent” Moses to Egypt to bring his people out (7:34–35). Whereas leaving behind “relatives” (7:3) fits Jesus’s summons to commitment (Luke 14:12; 21:16), caring for relatives can also be virtuous (cf. Luke 1:58; Acts 10:24; although Luke, unlike Matthew, omits Mark 7:9–13).

VI. THE PATRIARCHS’ DEATH AND BURIAL (7:15B–16)

The same term for death (Acts 7:15) appears for Jacob’s death in a false retrospective in Gen 50:16 LXX (his death is in 49:33, and Joseph’s death is in 50:26).⁷³⁴ The

724. Though cf. *Herm.* 1.1; *Jos. Ant.* 3.173. The cognate noun appears in Philo *only* with reference to this revelation (*Jos.* 237; fairly rare, it appears in Josephus at *Ant.* 13.168).

725. Here Joseph also “sent out” (ἐξαποστείλατε) the Egyptians present, a term appearing in Acts 7:12, but the term is frequent enough to be coincidence. Joseph’s revelation fits the ancient appreciation for hidden heroes’ revelation (see Porras, “Return,” esp. 50–58).

726. The speech’s term φανερός is appropriate but appears in the Joseph story (and Genesis) only at Gen 42:16, which is not relevant.

727. Bede *Comm. Acts* 7.14 also points out that Stephen follows the LXX here rather than the Hebrew’s “seventy.”

728. See, e.g., Walton, *Genesis*, 684–85. Seventy was a standard round number (see, e.g., Fensham, “Seventy”).

729. Fitzmyer, *Acts*, 374; Vermes, *Scrolls in Perspective*, 205; Le Cornu, *Acts*, 347; cf. also Conzelmann, *Acts*, 52; Barrett, *Acts*, 350. Scharlemann, *Stephen*, 41, believes that this figure came to Stephen through Samaritan tradition. *Jubilees* may know both readings, noting seventy people belonging to Jacob, but explaining that five died before Joseph (*Jub.* 44:33; though these may be from the seventy).

730. Often noted; cf. Kurzinger, *Apostelgeschichte*, 29. Strangely, the LXX wording of Deut 10:22 may have influenced this text (Lake and Cadbury, *Commentary*, 73; Richard, *Composition*, 71).

731. *Jos. Ant.* 2.176; 6.89; Ezek. *Trag. Exag.* 2 (*OTP* 2:808).

732. Ancient Jewish teachers typically used a pragmatic approach to text criticism—namely, the most effective version (e.g., Brownlee, “Interpretation,” 61).

733. For Jacob’s going down (καταβαίνω) to Egypt, see LXX Gen 45:9; 46:3–4.

734. Tacitus finds parallels in Jewish and Egyptian modes of burial, since neither normally cremated (*Hist.* 5.5).

patriarchs died in Egypt but, trusting in God's promise of the land, planned burial there (cf. Gen 50:24; Heb 11:22).⁷³⁵ The patriarchs' burial may evoke the burials of Jesus (Luke 23:50–56) and Stephen (Acts 8:2), but this may be pressing connections too far, since Jewish people buried almost everyone (cf. 5:6, 9–10).⁷³⁶ More clearly, their burial may remind the reader that their story points not to themselves but to God's redemptive purposes, into the pattern of which they fit (cf. Acts 2:29; Luke 11:47; though cf. also Luke 20:37–38). Heroes such as David died and were buried after serving God's purposes for their generation (Acts 2:29; 13:36), reminding hearers that the only overarching, consistent, and ultimate "hero" of biblical narrative is God himself.

Jacob, not Abraham, purchased the site from "the sons of Shechem's father Hamor"⁷³⁷ (Gen 33:19; a hundred pieces of money), and it would be hard to think otherwise:⁷³⁸ the name "Hamor" first appears in 33:19 and then appears about ten more times—all in Gen 34. Joshua says that Joseph's bones were buried here, repeating that Jacob bought it from the sons of Shechem's father, Hamor (Josh 24:32). Luke's summary probably conflates the biblical sources,⁷³⁹ whether deliberately (to evoke more Scripture or simply to condense the account) or not: Abraham bought with "silver" (Gen 23:9, 13, 15–16; four hundred shekels) a field from Ephron the Hittite to bury his wife.⁷⁴⁰ Both texts do illustrate that at some strategic moments in their history, God's people lacked more than a foothold in the promised land.

Joseph's bones were buried at Shechem a generation after the exodus from Egypt (Josh 24:25, 32). It is realistic to think, contrary to later tradition, that if Joseph's brothers' bones were transferred at all, it would have been at the same time as Joseph's rather than earlier.⁷⁴¹ But Jacob was buried at the cave of Mamre (Gen 50:13), earlier bought from Ephron the Hittite near Hebron (23:16, 19; 49:30),⁷⁴² just as Jacob instructed (47:29–31; 49:29; 50:5).⁷⁴³

It is grammatically possible that Acts 7:15–16 refers to the burial only of Joseph's brothers ("our fathers" in 7:15, referring to the brothers as in 7:12) instead of including

735. The journey for the burial made embalming convenient (Gen 50:2; though also done for Joseph, 50:6). The LXX nevertheless appears shy about this, though embalming was an Egyptian custom (e.g., Youngblood, "Embalming Process"), as Luke's audience would also recognize (Diod. Sic. 1.91.1–7; 19.99.3; the duration in Hdt. 2.88 is seventy days [cf. Gen 50:3]). Mummification continued in the Greco-Roman period (Gessler-Löhr, "Mummies," 278).

736. They also seem to have valued burial in the land (e.g., Jos. *Ant.* 20.95; see comment on Acts 6:1).

737. As for Acts 7:16, the reading "in Shechem" is probably better attested than "of Shechem" (Metzger, *Textual Commentary*, 345), which might imply an otherwise unattested father of Hamor, not just his known son, named Shechem. Bede *Comm. Acts* 7.16 (Martin, *Acts*, 77) also preferred "in Shechem," although allowing that Hamor could have had a father with this name.

738. Packer, *Acts*, 57, suggests that Jacob here is buried in a tomb purchased by another, which fits the depiction of Jesus in Luke 23:53 (cf. Matt 27:60).

739. Marshall, "Acts," 560, cites F. F. Bruce's 1988 opinion to this effect: as Stephen conflated two different calls of Abraham, he also conflates two land purchases in Canaan.

740. On the Hittite negotiations there, see Gordon, *Civilizations*, 94, 288; idem, *Near East*, 124; Wright, *Archaeology*, 51; Kitchen, *Orient*, 155; Bright, *History*, 117; cf. Katzoff, "Purchase." Tucker, "Legal Background," prefers first-millennium parallels; but Rabin, "Imperative," argues for a Hurrian component, and Reviv, "Elements," argues from early features that Israel simply updated the language of older material. In any case, the chapter is meant to further confirm Israel's rightful possession of the land.

741. Bede *Comm. Acts* 7.15 (Martin, *Acts*, 77; L. Martin, 71), quoting from Jerome *Ep.* 57.10; 108.13, remarks that Jerome, who lived in Palestine, attests that Joseph's brothers were buried with him at Shechem, though Genesis mentioned only the more prominent Joseph. Against this tradition, local Christians who had heard Acts even once would happily look for clues of such burial sites; so would others before them, given the Samaritan tradition. Yet the command of Joseph and the tribal location correctly noted by Bede might be significant.

742. Abraham's tomb was still venerated there in the first century, decorated with marble (Jos. *War* 4.531–32); on tombs, see comment on Acts 2:29.

743. Testaments often included burial instructions (e.g., Xen. *Cyr.* 8.7.25).

that of Jacob. This is not, however, what most Jewish people held.⁷⁴⁴ Later Jewish tradition claimed that Jacob's other sons were buried at Hebron as well (*Jub.* 46:9–10; *Jos. Ant.* 2.199);⁷⁴⁵ this is repeatedly emphasized in the *Testaments of the Twelve Patriarchs*.⁷⁴⁶ Certainly, the tradition would want them buried in the Holy Land (especially given increasing emphasis on the importance of such burial; see comment on Acts 6:1; cf. *Jos. Ant.* 20.95). Thus, for example, some Jews held that Kohath and Amram went to Canaan to build tombs for their ancestors (4Q545 1 II, 12–13, 17–18; 4Q544 1 3); a later tradition even explains that Abraham, Isaac, and Jacob sought burial there because the dead would rise first there (third-century tradition in *Gen. Rab.* 96 MV).⁷⁴⁷ But once the patriarchs were in the land, Jewish interpreters would prefer them to be in the right *part* of the land. Anti-Samaritan polemic in Jewish texts also “hardly commends Shechem as a suitable final resting place for Israel’s fathers.”⁷⁴⁸ This would be especially the case if Samaritans claimed Shechem as the burial site for all Jacob’s children⁷⁴⁹ (a tradition that is, however, unattested and would probably have been unknown to Luke’s audience, in any case).

Clearly, “Luke has . . . either confused these traditions, or telescoped them into one.”⁷⁵⁰ Scholars who speak of a telescoping of events here cite a similar possibility in Acts 7:2 (and a composite quotation in 7:7), which they attribute (plausibly) to Luke’s compressing the narrative.⁷⁵¹ Luke or Stephen might well assume that the patriarchs were buried with Joseph rather than Jacob, and Luke might well abbreviate this to mention only Joseph’s burial site (but allude to Jacob’s by mentioning Abraham’s purchase), clearly the more offensive and “Diaspora” (albeit in the Holy Land) of the two. Perhaps Luke and most of his audience would not have quibbled over such details; yet the polemical nature of the passage made these details important because they could lay him open to a charge of error on Scripture from his detractors.

Why telescope events in this manner? Is Luke portraying Stephen realistically by allowing a few accidental conflation? (Had Luke intended us to think that Stephen made mistakes,⁷⁵² however, we might expect that someone in Stephen’s biblically literate audience would have responded.) Or did Luke simply conflate details accidentally

744. Many scholars acknowledge the grammatical possibility even if not the conclusion (Kilgallen, *Speech*, 57).

745. *Jubilees* offers the oldest version of this tradition (Charles, *Jubilees*, lxxxiii).

746. *Test. Reub.* 7:2; *Test. Jud.* 26:3–4; *Test. Levi* 19:5; *Test. Sim.* 8:2; *Test. Iss.* 7:8; *Test. Zeb.* 10:6/7; *Test. Dan* 7:2; *Test. Naph.* 9:1; *Test. Gad* 8:4/5; *Test. Ash.* 8:1–2; *Test. Jos.* 20:6; *Test. Benj.* 12:1, 3.

747. Judean hearers in Stephen’s generation (though not Luke’s Diaspora audience) might even assume secondary burial from their own practice; for that custom in the mid-first century, see Hachlili, “Architecture,” 127; idem, “Necropolis,” 239; Hachlili and Killebrew, “Customs”; Silberman, “Ossuary”; for some slightly later uses, see Rahmani, “Customs”; idem, “Remarks.” Jews may have borrowed the custom as early as the Hasmonean period, from Romans (Levine, *Hellenism*, 67; McCane, “Burial Practices,” 174). Despite some relevant pagan models, ossuaries are not yet attested among Jews outside Palestine (McCane, “Burial Practices,” 174). But on other occasions as well, heroes were reburied at better sites (Plut. *Thes.* 36.1; *Cim.* 8.5–6; Dio Chrys. *Or.* 47.16–17; see comment on Acts 2:29).

748. Spencer, *Acts*, 79. The earlier centrality of Shechem during Israel’s era of the judges, postulated by Alt and Noth, may be historically improbable (see Cross, “Tabernacle”).

749. See Scharlemann, *Stephen*, 41.

750. Johnson, *Acts*, 119. Bede displays almost modern historical sense at this point: although one cannot be certain, it may be that Stephen conflated material, concentrating “less on the arrangement of the historical details than on the point with which he was concerned” (*Comm. Acts* 7.16 [Martin, *Acts*, 77; see also L. Martin, 72]). But Bede also thinks that Stephen may have accommodated “popular opinion” (L. Martin, 72).

751. Bruce, *Acts*, 165–66.

752. Le Cornu and Shulam, *Acts*, xxxvi, suggest that Luke simply accurately reports Stephen’s mistake. But Luke lacked a verbatim transcript, and had he had one and expected readers to catch the mistake, he probably would have corrected it (cf. how Luke 3:4–6 and Matt 3:3 avoid the problem in Mark 1:2–3).

in his own memory? Certainly, it does not appear that Luke had a Genesis scroll in front of him while writing the chapter; he was working from memory and may have made other such slips (such as Theudas in Acts 5:36–37; many also think Quirinius in Luke 2:2).⁷⁵³

Nevertheless, writers normally took such large narrative works through several stages of revision, and if the book were orally performed, Luke or other biblically literate hearers should have caught the mistake, just as subsequent readers have. Luke's audience may not have known much about Theudas or Quirinius, but they apparently knew biblical narrative. The generally accepted text of Acts may not be in the final form Luke would have desired, but neither is it the roughest first draft, as its symmetry in length with the Gospel of Luke indicates.

Possibly, then, Luke is making a deliberate conflation to tie the accounts together. (Ancients could employ such deliberate conflation as a midrashic technique.)⁷⁵⁴ Why might he do this? He could allude to Abraham's purchase of a burial site as a prototype of the care later to be expended, since all of Gen 23 is devoted to the negotiations. This explanation, however, lacks much explanatory power by itself. More likely, he is alluding to the multiple burials of the patriarchs; Jacob is among those buried in Acts 7:16, and Jacob was buried in the field Abraham bought from Ephron (Gen 50:13).⁷⁵⁵ But the conflation allows Luke to stress the Samaritan connection (below). If the conflation is not deliberate on Luke's part, it could represent the obscurity obtained from abbreviating a source, but this suggestion encounters the same objection from revisions as above. The burials of Jacob and Joseph are plainly conflated here; whether the conflation is deliberate (as seems to me somewhat more likely) or inadvertent (as is probably more commonly held) is not certain.

Scholars often point out a Samaritan connection here.⁷⁵⁶ Shechem was a Samaritan city, prominent in the early Hellenistic and later Roman periods⁷⁵⁷ and central in Samaritan thought;⁷⁵⁸ Luke may be indicating that Stephen's universal thinking included the Samaritans (cf. Acts 1:8), which helps prepare the way for the Samaritan ministry in 8:5–25 (and fits a larger pattern of embracing Samaritans that is also revealed in Luke 9:51–56; 10:25–37; 17:11–17). Shechem was now called by a different name (Jos. *War* 4.449)⁷⁵⁹ but in Jewish tradition was known by its biblical title. Shechem was known to be close to Gerizim (Judg 9:7), so that Judeans were strongly anti-Shechemite.⁷⁶⁰ Because the proper site for the temple was the primary divisive issue

753. Qumran Decalogue texts (4QPhyl G, 8QPhyl Group III, and 4Qmez A—i.e., 4Q134, 8Q3, and 4Q149) could conflate Exod 20 (the dominant source) with Deut 5, possibly mixing sources in their memory (Himbaza, "Décalogue").

754. Cf. blending of texts in 4Q266, 270 (note Baumgarten, "Citation"); see further Keener, *Matthew*, 657; Longenecker, *Exegesis*, 138, 150. It could be used as a means of haggadic exegesis, though it might also reflect the confusion of distant tradition (cf. perhaps the depiction of Moses like Jacob in Qur'an 28.27).

755. Deliberate conflation is one way to surface the message of more material in limited space. It still characterizes summaries and ordinary speech and popular (as opposed to academic) accounts (writers who try to precisely qualify all matters end up with multivolume works). Ancient rhetoric valued topical arrangement and recombinations of material, a practice that affected ancient biographies; that was less the case with elite historiography dependent on annals for chronology.

756. E.g., Spencer, *Acts*, 75–78, 81; C. Williams, *Acts*, 105; Scharlemann, *Stephen*, 41; Witherington, *Acts*, 268.

757. See Seger, "Shechem," 23 (though it was apparently rebuilt only in Vespasian's day); comment on Acts 8:5.

758. In later tradition (the Samaritan Chronicle *Tolidah*), part of the original Torah scroll remained in Shechem (Bowman, *Documents*, 48).

759. Vespasian refounded it as Flavia Neapolis (ca. 72 C.E.), today called Nablus (Bruce, *Acts*¹, 166).

760. Spencer, *Acts*, 73, citing Sir 50:25–26; *Test. Levi* 7:2; Jos. *Ant.* 11.340–41; also citing (78–79) Jewish interpretations of Shechem material in Gen 34, in *Jub.* 30; Jos. *Ant.* 1.337–40.

between Jews and Samaritans in this period⁷⁶¹ and the centrality of the temple is at issue in Acts 7, the Samaritan connection makes good sense here.

Could Luke’s ideal audience have known enough about Samaria to have picked up on this connection? It is uncertain; nevertheless, it is possible that Luke hoped that they were biblically informed enough to recognize that Shechem was a city in the region controlled by Samaria (1 Kgs 12:25; 16:24; Jer 41:5). If so, he probably would have expected this ideal core audience to recognize that Stephen’s audience would have reacted negatively. Indeed, the tradition of burial near Hebron may have been formulated partly against the alternative Samaritan location.

d. Moses the Rejected Deliverer (7:17–28)

The connections this speech draws between various characters are highly selective, considering the breadth of narrative connections in the original cycles of stories. The Joseph and Moses stories introducing the book of the covenant were probably connected orally from an early period and show numerous parallels and contrasts (see more extended comment on Acts 7:9–16). The original writers or storytellers provided a variety of other narrative connections as well (see, e.g., comment on Acts 7:19, 21), few of which this speech takes space to exploit.

I. INTRODUCTION

Scholars have drawn connections between the description of Moses here and Luke’s depiction of Jesus elsewhere. Such a comparison should be expected, since Stephen views Jesus as the “prophet like Moses” predicted in Acts 7:37 (and 3:22), one who is rejected like Moses and the entire prophetic tradition (7:52). One useful list of comparisons is provided by Zehnle:⁷⁶²

Moses in Acts 7	Jesus in Luke-Acts
“Powerful in words and works” (7:22)	“Powerful in words and works” (Luke 24:19)
Instructed in wisdom (7:22)	Instructed in wisdom (Luke 2:40, 52)
They did not understand his mission (7:25); they denied him (7:35); words were rejected (7:39–43)	Jesus was denied (cf. Acts 3:14, 17, 26)
Sees theophany; leader and liberator (7:35)	Cf. the theophany in Luke 3:21; * Jesus as leader (Acts 3:15)
Ascends on Mount Sinai (7:38)†	Jesus ascends (Acts 2:33)

* The language is not exclusively visionary, however, as in Mark 1:10 (cf. Matt 3:16).

† The ascent element is not explicit here, though it may be assumed (see comment on Acts 2:33).

Because Stephen was accused of speaking against “Moses” and his law, the speech gives special and extended attention to Moses—as a witness for Stephen’s defense (cf. John 5:39, 45–47).⁷⁶³

Advocates of the Samaritan thesis here could be encouraged that Moses’s role was particularly prominent in Samaritan thought: he was next to God, sometimes even viewed as preexistent, though this appears only in late materials.⁷⁶⁴ But Moses was also prominent in Jewish thought (see comment on Acts 3:22), more than enough

761. Spencer, *Acts*, 73–75; Keener, *John*, 612–13. See, e.g., 4Q371 1 + 8 + 11; 4Q372 1 10–14, esp. 11–12; *Jos. Ant.* 13.74–79; 18.30; *y. ’Abod. Zar.* 5:4, §3; *Gen. Rab.* 32:10; 81:3; *Deut. Rab.* 3:6; *Song Rab.* 4:4, §5.

762. Zehnle, *Pentecost Discourse*, 77 (slightly adapted). For others, see, e.g., Lampe, “Lucan Portrait of Christ,” 169; Marguerat, *Actes*, 235, 237, 247, 252; most fully (on Matthew) Allison, *Moses*, 98–100. Pauline typology focuses on the creation narratives and the exodus story (Ellis, “New Testament Uses Old,” 211).

763. Cf. Simon, *Stephen and Hellenists*, 44.

764. See MacDonald, *Samaritans*, 147–222, esp. 162ff.; the *Memar Marqah* in Bowman, *Documents*, 253; Buchanan, *Hebrews*, 59. A liturgical prayer that God turn from wrath “for Moses’ sake” (Bowman, *Documents*, 335) expresses a sentiment that is not uniquely Samaritan.

to warrant the attention here.⁷⁶⁵ For the rabbis, Moses was by far the greatest of ancient heroes.⁷⁶⁶ Some sources may treat him as almost divine.⁷⁶⁷ The angel of death could not take Moses, requiring God to do it himself.⁷⁶⁸ Later rabbis viewed Moses as a mediator between God and his royal children (*Pesiq. Rab.* 6:2, purportedly Tannaitic tradition).⁷⁶⁹

Despite his emphasis on Moses and occasional use of postbiblical tradition, Stephen's mission (and perhaps Luke's space constraints) help keep him closer to the biblical text than the novelistic expansions of Moses tradition common in his day (see esp. comment on Acts 7:20, 22). Philo conformed Moses to fit philosophical ideals for sages, at points running roughshod over the biblical portrait to do so.⁷⁷⁰ The pictures of Moses in Josephus and Artapanus also include novelistic features to conform to Hellenistic conventions.⁷⁷¹ Moses was so celebrated in Judaism that Greek and Roman sources often mention him in connection with Israel, whether as a wise lawgiver, a subversive lawgiver, or a magician.⁷⁷² Some of the latter negative portrayals of Moses may indeed have invited the heavy apologetic retelling of his life in early Jewish sources.

II. GROWING IN EGYPT (7:17–18)

The term “promise” does not appear in Genesis LXX, though the idea it represents is a dominant theme there (focusing on land and seed).⁷⁷³ But aside from Luke's use for the Spirit (Luke 24:49; Acts 1:4; 2:33, 39), in Luke it can refer to the entire prophetic thread of promise, including David (Acts 13:23, 32–33), and especially concerning the resurrection (26:6). These other references are Pauline, and Paul historically made considerable use of the “promise” motif (twenty-five examples in the Pauline corpus), particularly the promise to Abraham in Romans and Galatians.

In 7:17 the “promise” refers to Gen 15:13–16, in which Abraham's seed would possess the land at a specified time; but connected with other singular uses in Acts, it may connote also the entire promise motif of God to Abraham and his descendants, including the later Davidic promise and consequent hope for Israel's restoration.⁷⁷⁴

The time (χρόνος) drawing near may be suggestive of a pattern for God's appointed time for the fulfillment of the promises in Jesus (cf. Acts 1:7; 3:21; Gal 4:4), but

765. Derda, “Moses,” argues that Christians but not Greco-Roman Egyptian Jews named their children Moses; Williams, “Moses,” provides some evidence; Derda, “Reply,” counters that this evidence is insufficient. Williams, “Case,” attests the name widely in the Diaspora outside Egypt.

766. Explicit in *m. Soṭah* 1:9; *Mek. Shir.* 9.34–37 (Lauterbach, 2:69).

767. Fletcher-Louis, “4Q374,” argues that 4Q374 presents Moses's glorification as deification, and uses this as background for Jesus. But early Judaism offers much more diverse potential “deity” parallels.”

768. *Sipre Deut.* 305.3.3; *Abot R. Nat.* 12 A; 25, §51 B. This reflects the same sort of idea of a hero resisting death found in *Test. Ab.* 15–20 A.

769. For Moses as both king and priest, cf. Deut 33:5; Philo *Mos.* 1.334; 2.2–7, 187, 292; *Rewards* 53; Tiede, *Figure*, 127.

770. Petit, “Traversée exemplaire” (on Philo's *Hypothetica*, and comparing similar practices in Artapanus, Josephus, and Ezekiel the Tragedian); Van Veldhuizen, “Model of Philanthropia” (emphasizing Stoic *apatheia*). Cf. also Philo's portrait of Moses as commander-in-chief (Canevet, “Remarques sur l'utilisation”).

771. Silver, “Moses and Birds” (on *Jos. Ant.* 2.243–53; Artapanus in Euseb. *P.E.* 9.27).

772. See the sources collected in Whittaker, *Jews and Christians*, 55–63.

773. One might find the idea in Gen 18:19; 21:1; and 28:15, but Luke's terminology surfaces only in later parts of the LXX, especially the Apocrypha (e.g., 1 Esd 1:7; 1 Macc 10:15; 11:28; 2 Macc 2:18; 4:8, 27, 45; 3 Macc 1:4; 4 Macc 12:9; Wis 2:13; Sir 20:23; *Pss. Sol.* 7:10; 12:6; 17:5). The language was appropriate for first-century sources (e.g., *Jos. Ant.* 1.236).

774. Kaiser, *Theology*, passim; idem, “Centre”; Hasel, *Old Testament Theology*, 115–17, and sources cited there (esp. Westermann, “Promise”; Zimmerli, “Promise”; Rad, “Verheissung”; Murphy, “Relationship”; idem, “Understanding”; though Hasel, *Old Testament Theology*, 98–99, responds that no single theme can unify OT theology). Some see Acts 7:17 as allowing a future fulfillment (Kilgallen, *Speech*, 64), but future fulfillment need not rule out partial fulfillment in that era.

one should note that Luke omits the quote in Mark 1:15 (καίρός; cf. Matt 21:34), using such language only for the eschaton (cf. Luke 21:8). Still, just as a salvific time approached (using ἡγγιζεν) in Moses's era, so the "kingdom" (Luke 10:9, 11) and divine redemption (21:28; cf. 21:20) were now approaching.

"Grew and multiplied" refers to Exod 1:7 LXX.⁷⁷⁵ Exactly the same phrase (nowhere else alluded to in the NT corpus, except perhaps 2 Cor 9:10; Col 1:10) appears in two of the summaries in Acts (Acts 6:7; 12:24), suggesting that Luke saw the pentateuchal expansion of God's people as a pattern for the expansion of God's message among people in Luke's own time. Historically, strong evidence indicates many Semites in Egypt, including Semitic slaves who are especially well documented in the Rameside era.⁷⁷⁶ Semites like the Israelites probably flourished under the Asian Hyksos,⁷⁷⁷ although individual Semites (such as Moses) are also attested in high positions under later dynasties.⁷⁷⁸ Phenomenal growth of Israel in Egypt is plausible, though scholars usually question the more exact biblical estimates, on the basis of projected birth rate, spatial calculations, or—much more important here—economic and other data.⁷⁷⁹ (That the term translated "thousands" may also mean military "units" may alleviate the problem slightly.)⁷⁸⁰ Luke's audience, of course, simply assumed the reliability of the biblical claims.⁷⁸¹

In 7:18, the speech quotes Exod 1:8 LXX (appropriate, after Exod 1:7) almost exactly. The pharaoh originally described may have been Seti I (1308–1290)⁷⁸² or perhaps Ramses II,⁷⁸³ though scholarly consensus on the date of the exodus is elusive (probably more so today than half a century ago); neither Stephen nor his hearers would have had access to the pharaoh's name. The Exodus narrative does name the

775. It appears also as a motif of Adamic creation (Gen 1:22, 28), Noahic renewal after the flood (8:17; 9:1, 7), and with reference to Ishmael (17:20) and Jacob (28:3; 35:11; 48:4) and is fulfilled in Israel (47:27; Lev 26:9).

776. Hoffmeier, *Israel in Egypt*, 52–76, 112–16; cf. Colless, "Inscriptions"; Albright, *Biblical Period*, 12–13; Aharoni, *Archaeology*, 146; sources in Smith, *Education*, 233; cf. "Earliest Alphabet." For evidence of "Israel" in Egypt, see Hoffmeier, *Israel in Egypt*, 107–34, noting that New Kingdom texts deliberately omit names of Pharaoh's enemies (111) and that the list of sites, while perhaps containing editorial additions, including early elements (e.g., Ramses), thus would be unintelligible after 1100 B.C.E. (117–22). Canaanites had ties with Egyptian mines (Amiran, "Centre"), perhaps related to Semitic slaves there.

777. For relevant information regarding the Hyksos here, see, e.g., ANET 230–34; Jos. *Ag. Ap.* 1.75–91; Bright, *History*, 59–61, 108–9; Albright, *Biblical Period*, 10–11; idem, *Yahweh*, 57; idem, *Stone Age*, 152; Wright, *Archaeology*, 58; Kenyon, *Archaeology*, 182; Aharoni, *Archaeology*, 99; cf. Bietak, "Problems."

778. E.g., Kitchen, *World*, 74; Pfeiffer, *Tell el Amarna*, 70.

779. Bright, *History*, 134 (including n. 69). Some of Bright's spatial calculations seem to assume that the Israelites traveled in single file, when in fact the more probable arrangement reduces spatial problems. Crossing the sea in one night is more difficult (if they were about a hundred abreast, one would need eleven hours if each new row entered at two-second intervals). The generational multiplication is not impossible (cf. the Druse for an equivalent doubling rate; Faiman, "Hebrews"); moreover, in sixteen generations (at twenty-five years each) with seven or eight surviving children to the average family (starting with not only Jacob's "seventy" immediate family members but servants and the tribe), one could reach the biblical numbers easily, especially if the "mixed multitude" is reckoned in tribal numbers. Nevertheless, these are not the primary problems with the numbers. Impact on the Egyptian economy and other factors appear more difficult.

780. See Wenham, "Numbers."

781. Though some Egyptians (e.g., Manetho and Apion) had, naturally, challenged the Israelite version. On Manetho's early Hellenistic, anti-Jewish version of lepers driven from Egypt, see Raspe, "Manetho on Exodus"; cf. the Egyptian version in Diod. Sic. 1.28.2; Tac. *Hist.* 5.3. On the conflict between pagan polemic and Jewish apologetic regarding Moses, see Moro, "Mosè"

782. E.g., Strawn, "Pharaoh," 634. Fitzmyer, *Acts*, 375, notes that Seti began construction projects in the Nile Delta region and Ramses continued them (see also John A. Wilson, ANET 252). For Egyptian elements in Exod 2:1–10, see, e.g., Hoffmeier, *Israel in Egypt*, 138–40; Sarna, *Exodus*, 27–37. For possible Egyptian roots of Moses's name, see Thissen, "Namen."

783. E.g., Sarna, *Exodus*, 10.

midwives, presumably implying that they are more significant to God's plan than is Pharaoh.⁷⁸⁴

III. EXPOSING INFANTS (7:19)

The term ἔκθετος, as here, and the term ἐκτίθημι, as in Acts 7:21, often were used for “exposing” infants.⁷⁸⁵ This image would have been very familiar to Luke's audience. Against the teaching of its prophets,⁷⁸⁶ ancient Israelites were sometimes tempted by surrounding cultures' customs of child sacrifice.⁷⁸⁷ This was not a Greco-Roman custom,⁷⁸⁸ although Phoenician cities apparently retained vestiges of the practice during the Greco-Roman period.⁷⁸⁹ Discarding children was, however, a common practice among cultural Greeks.

Population decline in Hellenistic Greece may have stemmed from child exposure.⁷⁹⁰ The practice is well attested,⁷⁹¹ though it was most common for children with defects⁷⁹² (which Roman law viewed as evil omens);⁷⁹³ probably, those deemed illegitimate were also often exposed.⁷⁹⁴ Public interest in malformed and disabled infants rested in their value for omens, but in private law, the father officially decided their fate.⁷⁹⁵ Nevertheless, the oft-repeated claim that the father had to lift a child from the ground

784. With Sarna, *Exodus*, 25.

785. See, e.g., Wis 18:5; Richard, *Composition*, 335n200, cites Hdt. 1.112; Diod. Sic. 3.56; Lucian *Sacr. 5*; Philo *Mos.* 1.10–12 (most of these and others also appear in BDAG); also see Philo *Spec. Laws* 3.110, 115–17; *Virt.* 131. The semantic range of the verb is broader, but in context of infant exposure, the term carries especially this sense. For the adjective BDAG cites Manetho *Apot.* 6.52.

786. E.g., Lev 18:21; 20:2–5; 2 Kgs 23:10; Jer 32:35; Ezek 16:21; cf. Wis 12:5–6; 14:23; L.A.B. 4:16; Bodoff, “Tragedy.”

787. E.g., 2 Kgs 17:31; 2 Chr 28:3.

788. Greeks and Romans abhorred human sacrifice (Ovid *Tristia* 4.4.81–82; *Fasti* 3.339–42; 5.621–32; Sil. It. 4.791; Plut. *Cic.* 10.3; Philost. *Vit. Apoll.* 8.7), recognizing it as a custom of other peoples (e.g., Apollod. *Bib.* 2.5.11; Lycophron *Alex.* 229; Cic. *Resp.* 3.9.15; Arrian *Alex.* 1.5.7 [children]; Lucian *Sacr.* 13; *Dial. G.* 274 [3/23, Apollo and Dionysus 1]) or the wicked (Appian *Bell. civ.* 1.14.117; Xen. *Eph. Anthia* 2.13); Rome suppressed it elsewhere (Garnsey and Saller, *Empire*, 169; cf. Tert. *Apol.* 9.2). Exceptions appear mainly (but cf. Plut. *Themist.* 13.2–3; Suet. *Aug.* 15) in stories about earlier times (e.g., Hom. *Il.* 23.175–76; Sen. *Y. Troj.* 360–70; Plut. *Par. St.* 35; *Mor.* 314CD); for Iphigeneia (besides sources above), see, e.g., Aeschylus *Ag.* 205–26; *Soph. El.* 530–45; Eurip. *Iph. Aul.* 1592–95; *Cypria* 8; some scholars compare Iphigeneia with Isaac (Gordon, *Civilizations*, 290; Tucker, “Sins”; Prestel, “Erprobung”; if anything, it should be a contrast). Earlier, e.g., Rundin, “Poza Moro”; Ritner, *Mechanics*, 162–63; Mitchell, “Archaeology,” 185; Glueck, *Rivers*, 61; Albright, *Biblical Period*, 17; Albright, *Yahweh*, 152; in some other traditional cultures, e.g., Mbiti, *Religions*, 235 (children), 241; Tippett, *Solomon Islands Christianity*, 13.

789. Cf. the nearly one hundred infant skeletons found in Roman-Byzantine sewers (Stager, “Eroticism at Ashkelon”). Lucian *Syr. G.* 58 accuses Syrians of killing their children like oxen. Judean rabbis also thought that pagans practiced infanticide (Sipre *Deut.* 81.4.1–2).

790. Sallares, “Infanticide” (citing Polyb. 36.17). Wiesehöfer, “Exposure,” 224–25, doubts that this was deliberate population control.

791. E.g., Polyb. 36.17; Paus. 2.26.4; Harris, “Infanticide” (against D. Engel); Dixon, *Roman Mother*, 19, 23 (noting, e.g., Pliny *Panegy.* 26.5); Rawson, “Children,” 172.

792. Wiesehöfer, “Exposure,” 224 (citing Plut. *Lyc.* 16; Plato *Rep.* 5.460C; Arist. *Pol.* 1335b; Soranus *Gynec.* 2.6). Aristotle in *Pol.* 7.14.10, 1335b may be expressing his own view only, but it is that all deformed infants should be exposed if possible. Some other traditional societies withhold ceremonies at a “deformed” person's death (Mbiti, *Religions*, 202).

793. Wiesehöfer, “Exposure,” 224 (citing Lex 12 tab. 4.1; Dion. Hal. *Ant. rom.* 2.15.2; Cic. *Leg.* 3.19; Sen. *Y. Ira* 1.15.2; Livy 27.37.5–6); see also Sen. *E. Controv.* 10.4.16. This is not to argue that all ancients abhorred all malformed infants (see Edwards, “Deformity”); only some were discarded (Libero, “Disability,” 535). During the republic, seriously deformed babies were killed (Boer, *Morality*, 98–99, 113, 116, noting that they were typically burned; in some other societies, see Dawson, “Urbanization,” 324), but this practice is not so well attested during the empire (Libero, “Disability,” 535, apparently doubting its occurrence; cf. Pliny *E.N.H.* 7.3.34).

794. Wiesehöfer, “Exposure,” 224; e.g., Apollod. *Bib.* 2.7.4.

795. Allély, “Enfants malformés”; on the father's right (“until the late fourth century”), see Garnsey and Saller, *Empire*, 136. Rearing children was a choice of love; Dio Chrys. *frag.* 9 (Stob. *Flor.* 4, 28.13 [Hense, 679]; 85.13 [Meineke]); Crosby in *Dio Chrysostom*, LCL, 5:350–51.

and recognize it as part of the family before it became such does not appear in the ancient sources.⁷⁹⁶

More commonly, infants were abandoned. The head of a family had to manage costs for the family, and in relatively poor families this sometimes led to tragic decisions. The problem persisted even in Augustine's time: "Sometimes when parents have begotten one, two, or three children, they fear to give birth to any more lest they reduce the others to beggary."⁷⁹⁷ Some estimate that as many as 10 percent of infants were either exposed or (less often) directly killed.⁷⁹⁸

Although mothers could attempt to abort before birth, after birth the decision whether to keep the child rested more formally with the father.⁷⁹⁹ Although the father normally decided the child's fate, there were limitations in some regions.⁸⁰⁰ Early Roman law prohibited abandoning sons (unless they were disabled) and first daughters.⁸⁰¹

Midwives might have to decide which children were too sickly to be worth rearing.⁸⁰² In depicting denizens of the underworld, Lucian includes abandoned babies who died.⁸⁰³ Astrologers suggested that astrological conditions determined which babies were salvaged and which perished.⁸⁰⁴ Exposing babies became illegal only in 374 C.E.⁸⁰⁵

Because traditional societies often prefer boys, many scholars assume that females were exposed more often.⁸⁰⁶ Some who deny this assumption appeal to parental love for children and high infant mortality rates,⁸⁰⁷ doubting that the cost of the dowry would prove a deterrent.⁸⁰⁸ Often they also protest that this practice would have reduced the women available for marriage and hence caused population decline;⁸⁰⁹

796. Shaw, "Raising." For an example of the more traditional view (which I also once shared), see Stamps, "Children," 197–98.

797. Aug. *Serm.* 57.2, as quoted in Toner, *Culture*, 17. (On 67, however, Toner estimates that "each woman would need to produce five or six live births" to prevent population decline.)

798. Toner, *Culture*, 47.

799. Gardner, *Women*, 6, 154–55; on the father's authority, see also Dixon, *Roman Mother*, 95; cf. Quint. *Decl.* 306 intro. The mothers seem more hostile to such a decision, but the father holds the final say unless the mother acts behind his back (Diod. Sic. 19.2.3–5; Ovid *Metam.* 9.704–13; *Her.* 11.83–128); Quint. *Decl.* 306.4 appears to assume that a mother would not do this unless her husband ordered her; in 306.32, she is said to have honorably obeyed. In infancy the child would be better known to its nurse than to its father (Sen. Y. *Ep. Lucil.* 99.14).

800. For different customs regarding infanticide among various peoples, see Sext. *Emp. Pыр.* 3.211.

801. Cary and Haerhoff, *Life*, 143–44.

802. Soranus *Gynec.* 2.5.9; 2.6.10.

803. Lucian *Downward Journey* 5.

804. Ptolemy *Tetrab.* 3.9.126.

805. Gardner, *Women*, 6. In Rawson, "Children," 172, exposed infants were deemed free fully only under Justinian (*Cod.* 8.51).

806. E.g., Dunand, *Religion en Égypte*, 116–17 (noting boys' usefulness for work); Pomeroy, *Goddesses*, 227–28 (even suggesting that men often outnumbered women two to one); for slaves, Osiek, "Female Slaves," 260–61.

807. On high infant mortality, see also, e.g., *Eccl. Rab.* 11:6, §1; Plut. *Consol., Mor.* 608C, 609D, 611D; *CJ* passim, e.g., 1:308, §399; Stamps, "Children," 198; Malina and Rohrbaugh, *Gospels*, 41; Kloner and Eisenberg, "M'rt"; Sussman, "Cave"; Zias, "Remains from 'Caiaphas' Tomb"; Dunand, *Religion en Égypte*, 114; Wiesehöfer, "Mortality," 214; Tropper, "Children"; esp. data in Lewis, *Life*, 54 (in more recent traditional societies, see, e.g., Mbiti, *Religions*, 153). Toner, *Culture*, 67, estimates 30 percent infant mortality, more than three times the figure for the West today. Our epigraphic data may be skewed in that inscriptions tend to report most often the ages of those who died especially young or old (Leon, *Jews of Rome*, 230), but skeletal remains even in some elite tombs suggest that often fewer than half reached adulthood (Evans, *World*, 111).

808. Ingalls, "Demography." Whether influencing infanticide or not, providing dowries did trouble fathers (e.g., Plut. *Arist.* 1.1; Philost. *Vit. Apoll.* 6.39; cf. Pliny *Ep.* 6.32.2). On parental love and high infant mortality, see, e.g., Garnsey and Saller, *Empire*, 138–39. Some preferred detachment to suffering from the loss of young children (cf. Val. Max. 2.6.16; Sen. Y. *Ep. Lucil.* 99.2; Dixon, *Roman Mothers*, 113). At least in (prosperous) Corinth, a higher number received burials than is often thought (Walbank, "Graves," 271).

809. E.g., Engels, "Infanticide"; cf. idem, "Demography"; Wiesehöfer, "Exposure," 224.

given the disparity in marital ages of men and women,⁸¹⁰ however, this scenario is likely (the Greek population did decline at times in some cities).⁸¹¹ Scholars often cite a papyrus in which a husband instructs his wife to discard the baby if it is a girl (P.Oxy. 744.9–10), although we lack many such explicit claims.⁸¹² In an earlier story, a poor husband told his wife to kill the baby if it was a girl, because they did not have the money to raise her.⁸¹³

Census documents from Egypt's nomes speak most eloquently to the question. Although we lack evidence for a serious gender disparity among Romans,⁸¹⁴ the story seems different among Greeks. While infants of both genders were sometimes discarded, females must have been discarded more often. Suggesting that metropolites in Egypt followed the Greek custom, Naphtali Lewis observes, "In only two of the dozens of extant census declarations does a metropolitan family have more daughters than sons (and then only one and two more, respectively)."⁸¹⁵ It is possible that the evidence is skewed, but the conjunction of various lines of evidence suggests that girls were abandoned more often than boys. This does not suggest, however, that all exposed infants died.

A large proportion of the abandoned babies must have died (Lucian *Downward Journey* 5), but this was not the case for all of them. That children were abandoned most often in places such as dung heaps and shrines suggests that parents often hoped the children would survive.⁸¹⁶ Babies who were not taken up ended up as food for vultures and dogs,⁸¹⁷ but abandoned children often ended up as slaves.⁸¹⁸ The female slaves were commonly turned into prostitutes.⁸¹⁹ It was easier for poor persons to bring up a slave they found than to buy one.⁸²⁰ Foundlings who could later prove their free birth would go free without having to pay the cost of manumission,⁸²¹ but it is not likely that most acquired such proof to the satisfaction of those who profited more from their slavery. A father who identified his exposed

810. See comment on Acts 6:1.

811. Cary and Haarhoff, *Life*, 143; see also Sallares, "Infanticide," noted above.

812. The point about gender remains the same even if (as West, "Baby," argues) the husband is not referring to his wife's baby.

813. Ovid *Metam.* 9.669–84, 704–6 (in the story, she raises the girl as a boy, deceiving the father).

814. Rawson, "Family," 18. Of course, the loss of more men during wars and political intrigues could have compensated for a small preference for female exposure, but during most of the early empire, only a relatively small one.

815. Lewis, *Life*, 54–55. More selectively, Tarn, *Civilisation*, 101, notes fourth-century B.C.E. Athenian data with 87 sons to 44 daughters, and 118 sons and 28 daughters in 79 families in a record from Miletus of ca. 228–220 B.C.E. Another source from ca. 200 B.C.E. lists twenty-five males to seven females; out of six hundred families listed in inscriptions from second-century B.C.E. Delphi, only 1 percent "reared 2 daughters" (yet only fifty-seven, about 10 percent, show more than one son either). But possibly some sources considered it less necessary to list all the females?

816. Wiesehöfer, "Exposure," 225. Juv. *Sat.* 6.602–9 also notes that many of those exposed were adopted; yet Quint. *Decl.* 306.22 is probably correct (despite its rhetorical purpose) that most exposed babies died. The charge that infants were sometimes killed directly instead of exposed (Philo *Spec. Laws* 3.114–15) is harder to substantiate, at least as an accepted practice (on Roman sources, Gardner, *Women*, 155) except perhaps, at times, for deformed infants (Boer, *Morality*, 98–99, 113, 116).

817. Ovid *Her.* 11.83–84; Ps.-Phoc. 185. Sen. E. *Controv.* 10.4.21 lists predators, but also cold and starvation, as threats.

818. Garnsey and Saller, *Empire*, 138, think that the majority ended up as slaves. Some ancients reacted viscerally to the idea of such children being abused (Sen. E. *Controv.* 10.4.intro.) whereas others countered that this was better than their having died as infants from exposure (10.4.17).

819. Pomeroy, *Goddesses*, 140.

820. Dunand, *Religion en Égypte*, 116–17.

821. Pliny *Ep.* 10.65.1; 10.66.2. Discovering free background is common in ancient comedy and novels (Longus 4, esp. 4.36; cf. Menander *Epitrepontes* 294–305), especially in the plays of Terence (*Self-Tormentor*; *Eunuch*; *Lady of Andros*; *Lady of Perinthos*).

child could reclaim the child afterward if he repaid the expenses of whoever had raised the child.⁸²²

Some ancients disapproved of abandoning babies. Thus a Stoic philosopher noted that some people did not want to raise many children because they were poor;⁸²³ but the little birds are poorer, yet they feed their young, and so people can do the same.⁸²⁴ Likewise, Egyptian law opposed discarding babies;⁸²⁵ when metropolitans, following Greek practice, discarded the infants along with their garbage, local Egyptians often raised the children.⁸²⁶ The Roman tax system penalized Egyptians for adopting them, however, and so they usually raised them as slaves.⁸²⁷ Germans were also noteworthy for not destroying their children (Tac. *Germ.* 19).

Jewish people were aware of the Gentile practice of disposing of unwanted babies, including in pagan myth (a euhemeristic version appears in *Sib. Or.* 3.130–55). Although some scholars have provocatively defended the view that Jews participated in the abandonment of babies, the evidence suggests that the vast majority of Jews rejected this practice.⁸²⁸ Josephus notes that the law requires Jews to raise their children,⁸²⁹ and our other Jewish sources clearly oppose exposure.⁸³⁰ Many Gentiles were likewise aware of Jewish opposition to this practice.⁸³¹ The condemnation appears in Philo (*Spec. Laws* 3.110–19) and among later Christian writers (Tert. *Apol.* 9.6–7; *Nat.* 1.15).⁸³²

The opposition to abandoning babies extended, in early Jewish understanding, to opposing abortion,⁸³³ although views on when life began varied as widely then as in modern debates.⁸³⁴ (That born children could be discarded does suggest that most Greeks and Romans drew the line differently than most people do today.)⁸³⁵ Whereas women sometimes sought abortive agents in the Greek and

822. Sen. E. *Controv.* 9.3.intro.; 10.4.6; Quint. *Inst.* 7.1.14; cf. Quint. *Decl.* 376 intro. M. Winterbottom's note to *Controv.* 9.3.intro. (LCL, 2:264n3) observes that this is not Greek practice but may be Roman (citing Quint. *Inst.* 7.1.14; 9.2.89).

823. Mus. Ruf. 15, p. 98.18–19; cf. also Plut. *On Affection for Offspring, Mor.* 497E (Sherk, *Empire*, §188, p. 245). Even a rich family might expose a child, however, if it felt it already had too many (Longus 4.24). So also those that thought themselves poor (cf. Suet. *Tib.* 47, where Quintus Hortensius chooses to have four children despite limited means).

824. Mus. Ruf. 15, p. 98.20–27. Hierocles *On Marriage* (Stobaeus *Anth.* 4.75.14) favored raising “all or at least most” babies (trans. Ramelli and Konstan).

825. Diod. Sic. 1.80.3 says that this was to enlarge the Egyptian population.

826. Lewis, *Life*, 54. Many inscriptions, especially in Roman Africa, attest to exposed children raised as foster children (e.g., *ILS* 1486, from Carthage, in Sherk, *Empire*, §188, p. 245 E). On foster children, cf., e.g., the study on one in Bernstein, “Puer.”

827. Lewis, *Life*, 58; see *Gnomon of the Idios Logos* 41 §92 (*BGU* 1210, in Sherk, *Empire*, §188, p. 245 D).

828. Schwartz, “Infant Exposure.” Breiner, “Abuse Patterns,” argues that ancient China and especially ancient Israel abused children less (including infanticide) than did ancient Greece and Rome.

829. Jos. *Ag. Ap.* 2.202 (including forbidding abortion).

830. E.g., Philo *Spec. Laws* 3.115–16; *Virt.* 131; *Sib. Or.* 3.765–66; Ps.-Phoc. 184–85; in the rabbis, see Safrai, “Home,” 750 (citing *m. Makš.* 2:7 and *t. Makš.* 1:8).

831. Diod. Sic. 40.3.8; Tac. *Hist.* 5.5.

832. Wiesehöfer, “Exposure,” 225; also *Diogn.* 5.6.

833. Perhaps there was no widespread use of contraception and abortion to limit children among poorer Romans (Frier, “Fertility”), but it appears often in ancient sources (Gorman, *Abortion*, 14–15). For some supposed abortive agents, see, e.g., Pliny E. *N.H.* 20.52.146.

834. For the debate, Theon *Progymn.* 2.96–99. Simshäuser, “Behandlung,” argues that despite legal prohibitions, the view that the embryo constituted a distinct life dates from the late second century (Simshäuser, “Behandlung”). But it becomes alive apparently soon after the womb receives semen in Soranus *Gynec.* 1.8.33; 1.10.36; 1.12.43; Iamblichus *Soul* 381.31 (VLC.1, pp. 58–59, in Finamore and Dillon) contrasts Hippocrates's view of life beginning at conception with Porphyry's view that it begins at birth. Among some peoples today, the child becomes fully human on the fourth day after birth (Mbiti, *Religions*, 156; but cf. elsewhere, 143–46). Greeks did not allow a woman to be executed during her pregnancy, to prevent the innocent suffering with the guilty (Diod. Sic. 1.77.9).

835. The person became legally protected only once the father accepted the child (Ferguson, *Backgrounds*, 59), although this was not a claim that a distinct life began only at that moment.

Roman world,⁸³⁶ among the practice's vigorous opponents⁸³⁷ (in addition to many philosophers⁸³⁸ and physicians⁸³⁹) were early Jews⁸⁴⁰ and Christians,⁸⁴¹ who often called it murder.⁸⁴²

Abandonment was common in myths and legends,⁸⁴³ reflecting both the reality of and the popular fascination with the practice. The story line of the infant exposed but surviving to become a great leader was widely known,⁸⁴⁴ applied, for example, to Cyrus,⁸⁴⁵ Romulus and Remus,⁸⁴⁶ and, more tragically, to Oedipus⁸⁴⁷ and Paris.⁸⁴⁸ (In some stories, usually about the mythical past, animals nurtured the abandoned babies;⁸⁴⁹ stories of adoptive parents better mirrored social reality.)⁸⁵⁰ Jewish tradition also spoke of the ruler wanting to kill the babies because of prophecy of a deliverer,⁸⁵¹ a story line more widespread than in just Judea (in Roman historiog-

836. Cf., e.g., Char. *Char.* 2.9.3 (she decides against it, a decision that the narrator presents as virtuous). A range of purposes were associated with it: e.g., to prevent children being abused by tyranny (Sen. E. *Controv.* 2.5.2) or to prevent the exposure of adultery (Juv. *Sat.* 6.595–601, part of his misogynist satire), or prostitutes aborting formed fetuses a week (!) after conception (Hippocr. *Fleshes* 19, ¶1). Women sometimes died in the process (Suet. *Tib.* 22).

837. E.g., Klauck, *Context*, 66. Laws could oppose it as a form of poisoning (Paulus *Sent.* 5.23.14, 19, in Sherk, *Empire*, §161B, p. 206; Paulus *Dig.* 48.19.38.5, in Grant, *Paul*, 114; cf. Simshäuser, "Behandlung"; but contrast Gregor, "Abortigo"). Further on the usually hostile male attitude, see Dixon, *Roman Mother*, 94–95; Boer, *Morality*, 272–88; Grant, *Paul*, 112 (citing, e.g., SIG³ 985.21; Mus. Ruf. frg. 15, p. 96, Lutz; Plut. *Adv. K. Well* 22, *Mor.* 134F; *Rom.* 22.3; *Lyc.* 3.2; also Aul. Gel. 12.1.8–9; Ulp. *Dig.* 48.8.8).

838. E.g., Heracl. *Ep.* 7. Because they viewed procreation as marriage's purpose, later Stoics also condemned abortion (Mus. Ruf. 15, p. 96.18–19), though the early Stoic Chrysippus believed that the fetus received a fully human soul only at birth (Plut. *Stoic Cont.* 41, *Mor.* 1052EF).

839. E.g., Soranus *Gynec.* 1.2.4; see further Gorman, *Abortion*, 19–32, esp. 20. For diverse views (some modifying the original Hippocratic prohibition), see Soranus *Gynec.* 1.19.60. Most thinkers would not have objected to expulsives for a dead fetus (Pliny E. *N.H.* 26.90.154, 158, 161). Cf. the so-called *Hippocratic Oath* in Hippocrates (CMG 1.1.4, lines 16–17; Grant, *Paul*, 112).

840. Jos. *Ag. Ap.* 2.202; Philo *Spec. Laws* 3.108–18; *Hypoth.* 7.7; Ps.-Phoc. 184; cf. 4Q270 9 II, 15 (against slaughtering a pregnant animal). See further Safrai, "Home," 750; for concern with corpse defilement from abortions in Gentile homes, see *m. 'Ohal.* 18:7 as construed by deSilva, *Honor*, 286n6. Many Jewish teachers believed that killing a fetus also killed that one's descendants not yet conceived (*Tg. Neof.* 1 on Gen 4:10). For various views, cf. Gorman, *Abortion*, 33–45; Grisez, *Abortion*, 127–35; Bleich, "Abortion."

841. Grant, *Paul*, 113–14, cites *Did.* 2.2; *Barn.* 19.5; *Apost. Const.* 7.3.2; *Apoc. Pet.* 8 (Ethiopic), 26 (Greek); *Apoc. Paul* 40; Athenag. *Plea* 33.1–2; 35.6; Clem. Alex. *Instr.* 2.95.3; 2.96.1; *Prophetic Selections* 48.1–50.3; Tert. *Apol.* 9.8; *Exhortation to Chastity* 12.5; *On the Soul* 25.5. See further Gorman, *Abortion*; Lindemann, "Unborn Babe"; Osiek and MacDonald, *Place*, 52.

842. E.g., Jos. *Ag. Ap.* 2.202; *Did.* 2.2; Athenag. *Plea* 35.6; Tert. *Apol.* 9.8 (though believing that the life was still being formed). In *Sib. Or.* 2.281–82 (possibly a Christian interpolation), it merits eternal punishment.

843. See Oswald, "Exposure"; cf. Apollod. *Bib.* 1.9.8; 2.7.4; 3.5.5, 7; 3.12.5. In novels, e.g., Longus 1.2, 5; Heliod. *Eth.* 2.31; in declamation practice, Quint. *Decl.* 338 intro; cf. the alleged ordeal among Celts in Libanius *Narration* 37.

844. In the ancient Near East, see "Sargon Legend," lines 1–10 (*ANET* 119); Gordon, *Near East*, 75; Sarna, *Exodus*, 29–31 (contrasting Sargon, 30). Child abandonment was widely attested, but Kitchen, *Reliability*, 296, notes that even birth legends do not make their heroes mythical (offering Sargon as a plain example).

845. Hdt. 1.107; Val. Max. 1.7.ext. 5.

846. E.g., Diod. Sic. 8.4.1; Appian *Hist. rom.* 1.1.2.

847. E.g., Soph. *Oed. tyr.* 717–19, 1022–34; Apollod. *Bib.* 3.5.7; Diod. Sic. 4.64.1; Androtion *Atthis* frg. 62.

848. E.g., Apollod. *Bib.* 3.12.5.

849. E.g., Ovid *Fasti* 2.415–16, 420; 3.53–54; Livy 1.4.6; Pliny E. *N.H.* 8.22.61; 15.20.77; Dio Chrys. *Or.* 64.23; Longus 1.2, 5, 16; Prop. *Eleg.* 4.1.55–56; Philost. *Vit. soph.* 2.1.553 (cf. also 2.1.554); cf. nymphs in Apollod. *Bib.* 1.1.7. For a nonmiraculous analogy, cf. Virg. *Aen.* 11.570–72. Cf. brief discussion in Keener, "Milk," 708.

850. Except when these turned fanciful, e.g., Mordecai nursing Esther (*Gen. Rab.* 30:8; *Tg. Rishon* on Esth 2:7), another man nursing (*b. Šabb.* 53b), or Sarah breastfeeding multitudes (*Pesiq. Rab Kah.* 22:1; *Gen. Rab.* 53:9).

851. See esp. Jos. *Ant.* 2.205–17, 234–36; widely noted (e.g., Crossan, "Moses"; Soares Prabhu, *Quotations*, 289–90; Overman, *Gospel and Judaism*, 77–78). In rabbinic tradition, astrologers foretold Moses's birth (*b. Sanh.* 101a; *Soṭah* 12b; *Exod. Rab.* on 1:22; noted by Allison, *Moses*, 145).

raphy, cf. attempted preventive action in response to the prediction of Augustus's birth in Suet. *Aug.* 94.3).

This verse alludes to an entire section of the exodus narrative, which it summarizes. That Pharaoh “outwitted” (κατασοφίζομαι can also mean “to conquer by trickery;” LSJ) clearly reflects Exod 1:10 and also appears in a summary of the same events in Jdt 5:11 (two of only three times the verb or cognates appear in the LXX, and only here in the NT).⁸⁵² It may stand in contrast to Moses's wisdom (Acts 7:22). That Pharaoh oppressed Israel's γένος, “race,” alludes to Exod 1:9 LXX; the term used here for Egypt's treating them harshly (κακόω) is from 1:11 LXX, referring to the Israelites' hard labor on building projects.

Pharaoh demanded that the people of Israel expose their infants⁸⁵³ “so they would not live” (alluding to casting boys into the Nile; ζωογονέω is from 1:22 LXX), in response to the fact that the midwives were allowing them to live (also ζωογονέω, 1:17–18 LXX). The term for “infant” appears in the LXX especially where Antiochus was killing Israel's babies (1 Macc 1:61; 2 Macc 6:10; 4 Macc 4:25; cf. the threat to babies' lives also in 3 Macc 5:49; the exception is Sir 19:11). Jewish revulsion against Gentile child abandonment and Antiochus's oppression would both transfer readily to Pharaoh in this narrative.

If this speech draws numerous connections between events in salvation history, it only follows a habit of the exodus narrative itself. Pharaoh's oppression of Israel set the stage for the events of the later Exodus narrative. Because most male babies were ultimately drowned in the Nile (Exod 1:22), God responded to Egypt in the next generation proportionately.⁸⁵⁴

1. The first plague turned the Nile to blood (Exod 7:17), in memory of the blood shed there.⁸⁵⁵
2. The last plague involved the death of Egypt's firstborn males, in response to the death of Israel's boys (Exod 12:29–30; cf. 4:22–23).⁸⁵⁶
3. God drowned Pharaoh's army in the sea (Exod 14:27–28; 15:1–21).⁸⁵⁷

Likewise, Moses was drawn from the water (Exod 2:10; hence his name, according to its Hebrew interpretation),⁸⁵⁸ as Israel would later be brought safely through the water (14:22).

852. Some early Christians extended their Christ-Moses comparison to Herod and Pharaoh (Matt 2:16–19; cf. Jos. *Ant.* 2.205–17, 234–36; Allison, *Moses*, 146); although Luke contrasts Augustus and Christ at the latter's birth, however (Luke 2:1, 14; see Danker, *Luke*, 6–7; idem, *New Age*, 24), he makes nothing of the Moses allusion in that connection.

853. Though the command is given to Pharaoh's people (both the MT and the LXX). The suggestion that Egypt's torment caused Israelites to want to “rescue” their children by killing them (cf. Le Cornu, *Acts*, 349) fits some slave settings (cf. Sterling, *Sisters*, 40, 57–58) but contradicts Jewish ethics. The Jewish tradition that they stopped intercourse (*L.A.B.* 9:2) till persuaded to do otherwise (*Exod. Rab.* 1:13) is not the same as killing born children; Luke's phrase can mean simply that Pharaoh badly treated them by making them expose their infants. Luke's audience would understand Pharaoh's initial dependence on Israel exposing their infants because childbirth normally happened in the home (Osiek and MacDonald, *Place*, 53), although Luke's audience was more familiar with individual slaves than with enslaved peoples living in their own communities (as in Exodus).

854. By contrast, a later tradition argues that Pharaoh drowned Israel's babies because his astrologers predicted that Israel's deliverer would suffer from water (but it would be the water of Meribah; *b. Sanh.* 101a).

855. Cf. also the reversal noted in Wis 11:5–7, supplying water to Israel.

856. In later haggadah, God's slaying the firstborn included Pharaoh himself and other adults (*Pesiq. Rab.* 17:5).

857. The last two of these points may be suggested in Wis 18:5.

858. The name is also Egyptian albeit not with the same meaning (Hoffmeier, *Israel in Egypt*, 140–42), amplifying the ingenuity of the wordplay.

IV. MOSES'S INFANCY (7:20)

Discussion of birth, nurture, and education (Acts 7:20–22) follows “the classic biographical triad” of Greek writers (as in 22:3).⁸⁵⁹ The term translated “nurtured” is not in Exodus LXX; it balances the influence of Jochebed with Pharaoh’s daughter, who “nurtures” Moses further in Acts 7:21 before his schooling in 7:22, as Paul was later “nurtured” in Jerusalem before his education with Gamaliel (22:3).⁸⁶⁰

That Moses was ἀστεῖος reflects Exod 2:2 LXX, where his mother hid him because of his beauty;⁸⁶¹ the only other use in the NT is in Heb 11:23, where *both* Moses’s parents hid him (a logical inference, but perhaps patriarchally motivated) because they saw he was beautiful. Jewish tradition expanded considerably on this “beauty” far more than Stephen’s addition, “before God.”⁸⁶² Granted, some expansions, like this speech’s, were minimal. For example, in the second century B.C.E., Ezekiel the Tragedian elaborates little, though recounting the story in iambic trimeter (*Exagōgē* 12–31); nor are miracles mentioned in *Jub.* 47:1–8. Philo (*Mos.* 1.9) simply mentions it, following the likely sense of the LXX (but using the comparative ἀστειωτέρων).⁸⁶³ The level of expansion rises slightly with Josephus. Josephus claims that Moses’s birth was kept secret because his mother experienced little pain at his birth (*Ant.* 2.218) and further insists that Moses’s size and beauty (2.224, 231) were such that they proved even divine in appearance to Pharaoh’s daughter (2.232). His attractiveness continued at age three, when God marvelously increased his stature (cf. Luke 2:52), attracting the attention of all onlookers (*Jos. Ant.* 2.230–31).

One tradition claimed that Moses was born circumcised (*L.A.B.* 9:13; *b. Soṭah* 12a),⁸⁶⁴ like many other biblical heroes (*ʿAbot R. Nat.* 2 A; *Gen. Rab.* 26:3; 84:6);⁸⁶⁵ another, attributed to the Tannaim, claimed that Moses’s birth filled the house with light (*b. Soṭah* 12a). Not surprisingly, our later Samaritan sources also include Moses’s miraculous birth.⁸⁶⁶

Such expansions are understandable. Greeks and Romans expected great leaders’ births to be heralded by signs (e.g., *Ps.-Callisth. Alex.* 1.12) or at least unusual events (e.g., *Val. Max.* 1.8.ext. 5);⁸⁶⁷ dreams were frequent. Sometimes this could include a

859. Various commentators (e.g., Johnson, *Acts*, 125; Witherington, *Acts*, 269), citing Plato *Crito* 50E, 51C; Philo *Mos.* 2.1; *Flacc.* 158; see fuller comment at Acts 22:3. Cf. Pesch, *Apostelgeschichte*, 1:252 (citing, for Moses’s learning, e.g., Philo *Mos.* 1.20–23; *Jos. Ant.* 2.232–37).

860. The term refers to proper Jewish upbringing in 4 *Macc* 10:2; 11:15; it is associated with infancy, probably, in *Wis* 7:4. *Sib. Or.* 3.254 (probably second century B.C.E.) applies a cognate (usually involving feeding, but cf., e.g., *Tob* 14:10) to the queen’s “rearing” Moses.

861. The Greek term can refer to any sort of elegance, which is only a little more specific than the Hebrew’s *tov* (“good”); it refers to beautiful appearance in *Jdt* 11:23 (cf. also *Dan* 13:7–8 LXX, mss), but prudent speech in 2 *Macc* 6:23.

862. Passive verbs used with Moses (as with Abraham and Joseph to some extent) in Acts 7:20–22 may emphasize his initially passive role, drawing further attention to the role of God here (cf. Kilgallen, *Speech*, 65). Pervo, *Acts*, 183–84, treats Moses’s beauty in ancient sources (though his suggestion of “a dative of standard of judgment” seems questionable).

863. Philo’s biography of Moses follows the pattern of many other biographies (Feldman, “View of Birth”).

864. Later attributed to R. Meir (late second century C.E.; *Lev. Rab.* 20:1). Rabbis as early as the schools of Hillel and Shammai debated whether one needed to at least prick a baby born circumcised (*Sipra Taz. pq.* 1.123.1.8; *t. Šabb.* 15:9; *Gen. Rab.* 46:12; *y. Yebam.* 8:1, §12).

865. On thirteen characters in *Midr. Pss.* 9:7, see Kalimi, “Born Circumcised”; cf. idem, “Geboren.”

866. Bowman, *Documents*, 284–97.

867. See further Shuler, *Genre*, 94; Davies, *Matthew*, 31–32 (citing *Plut. Rom.* 2; *Alex.* 2); cf. Klauck, *Context*, 300. For announcement by a dream, cf., e.g., *Plut. Alex.* 2.1–3.2 (Boring, Berger, and Colpe, *Commentary*, 37–38); for miraculous omens, cf., e.g., *Suet. Aug.* 94 (Boring, Berger, and Colpe, *Commentary*, 43–44); *Aul. Gel.* 6.1.2–4. For supernatural births of famous philosophers, *Diog. Laert.* 3.1–2, 45; *Iambl. VP.* 2.3–5; *Diod.*

flame shining around the boy's head (Val. Max. 1.6.1).⁸⁶⁸ Rhetoricians advised noting any supernatural phenomena attending a person's birth.⁸⁶⁹ Thus orators would praise a king's noble birth, looking for any phenomena that happened at the time that could be interpreted as favorable portents (Men. Rhet. 2.1–2, 371.5–6);⁸⁷⁰ if these were not available, one could invent them (371.11–12), and invent them obviously and extravagantly (e.g., 371.15–17).⁸⁷¹ This could include the baby shining at its birth; thus the deity Apollo shone (λάμψαι) and lit up all the cosmos (2.17, 439.18–19). Early Jewish literature applied some of these motifs especially to Noah (1 En. 106–8, esp. 106;⁸⁷² 1 QapGen II;⁸⁷³ cf. 4Q534).⁸⁷⁴ That others, especially later rabbis, would apply these traditions more to their hero Moses is understandable.⁸⁷⁵ Perhaps countering competing traditions, rabbis argued that Moses was godlier and “more loved by God” than was Noah (*Gen. Rab.* 36:3).

That the child was hidden for three months reflects Exod 2:2 LXX; “in his father's house” is not in the LXX but may be an inference from it; the verb the LXX uses for “hid” can mean “sheltered” or “covered.” It emphasizes again familial connection; compare the omission of Scripture's “from his father's house” in Acts 7:3. Jewish writers and storytellers seem to have been at pains to justify his heroic parents' willingness to finally expose Moses. One Jewish source claimed that someone reported Jochebed, making it impossible for her to hide him longer (*Jub.* 47:3); another contended that his father cast him into the Nile only by trusting the divine assurance of his safety provided him in a dream (*Jos. Ant.* 2.216–19).⁸⁷⁶ Another source claims that his mother “hid” him in her womb for three additional months (*L.A.B.* 9:12; perhaps related to hiding pregnancy for three months in 9:5). In one story adding later haggadic details, the Egyptians, searching for Israelite babies, took an Egyptian baby with them and made him cry, recognizing that this would provoke any Israelite babies to cry (*b. Soṭah* 12a; *Exod. Rab.* 1:20). Others emphasized that Moses's mother birthed quickly, making Moses a seven-month child like various Jewish, Greek, and Roman heroes “miraculously” conceived.⁸⁷⁷ (Although natural seven-month pregnancies

Sic. 4.9.1–10 (Boring, Berger, and Colpe, *Commentary*, 33–35). For supposed signs at Zoroaster's birth, see Pliny E. *N.H.* 7.16.72.

868. In this case, the boy, Servus Tullius, was then adopted into the royal family; a flame around a general's head later portended victory (Val. Max. 1.6.2).

869. Hermog. *Progymn.* 7, “On Encomion,” 15–16.

870. This could then be used to invite rhetorical comparison with Romulus and Cyrus, whose births were allegedly accompanied with marvels.

871. The rhetorical principle also applied to praising deities by describing marvelous births (e.g., Men. Rhet. 2.17, 438.30–439.24).

872. For his beauty, esp. 1 En. 106:2; his newborn speech, 106:3; his glowing, 106:4; his further praise in 106:11.

873. The child was so beautiful that Lamech doubted that it was his own (see Fitzmyer, *Apocryphon*, 51, 53, 77–79, esp. 79).

874. This view of 4Q534 depends on the greater clarity of the other texts (see Swanson, “4Q534”). Starcky originally proposed a messianic sense (“Texte messianique”), but the likeliest interpretation is Noah (with Fitzmyer, “Elect of God' Text,” 371; Brown, “Theory of Development,” 51).

875. Even Philo emphasizes that Noah's righteousness was merely relative to his generation (*Abr.* 36–37); cf. anti-Noah polemic in 2 *Enoch* (Orlov, “Brother”).

876. Later, in *Pesiq. Rab.* 43:4, Israel foreknew the redeemer's birth to Amram. Earlier stories claimed that Moses's father and mother were paired because providentially born the same day (*Test. Levi* 12:4).

877. See van der Horst, “Seven Months' Children”; this and other Jewish examples of supernaturally expedited seven-months' births reflect Greco-Roman tradition (e.g., Apollod. *Bib.* 2.4.5). Lake and Cadbury, *Commentary*, 75, cite *Tg. Jer.* on Exod 2 for Moses as a six-months' child.

were known⁸⁷⁸ and some physicians knew that the gestation period was nine months,⁸⁷⁹ ancients commonly believed that ten months was the normal period for a pregnancy, or at least used that expression.)⁸⁸⁰ One early source increased the suspense by having Moses's mother nurse him seven nights among the reeds and by having Miriam drive away ravenous birds during the day (*Jub.* 47:4). But everyone would have marveled at Moses's survival and later achievements (e.g., *Gen. Rab.* 88:7).

V. MOSES'S ADOPTION (7:21)

That Pharaoh's daughter "took him away" is intended favorably. The term in Luke-Acts (seventeen other uses in Acts, two in Luke) means "kill" in every other instance, which could fit a context of infanticide, reflecting negatively on Pharaoh's daughter; but this reading cannot fit this context and its biblical background. The term, when used with infants, most often meant what it must mean in this context and in the context of the scriptural story Stephen is retelling (Exod 2:5 LXX). The term ἀναίρειω may apply here (as sometimes in Koine) to adoption (cf. the idea in different words in Exod 2:10), though often it was used simply (as in 2:5 LXX) for taking up newborns (Plut. *M. Ant.* 36.3; LSJ; see esp. BDAG).⁸⁸¹

Pharaoh's daughter is part of the irony of the exodus story: mighty Pharaoh orders the death of Israel's babies, but God uses a series of women to subvert Pharaoh's will (midwives, Exod 1:17–21; Moses's mother and sister, 2:2–9), employing finally Pharaoh's own daughter (2:5–10).⁸⁸² Here, however, the house of Moses's "father" (Acts 7:20) replaces any specific mention of his "mother" (Exod 2:2–3), and the emphasis may be more on Moses's status even among Gentiles (Acts 7:22). Thus 7:21 employs the same term for "nurture" as applied to Moses's birth mother in 7:20, and the speech omits mention of Jochebed's nursing Moses (Exod 2:7–9), despite the great influence attributed to nurses in antiquity.⁸⁸³ Children could be fond of their

878. Hippocr. *Fleshes* 19, ¶3 (insisting that he has seen it himself and that midwives can attest it); Soranus *Gynec.* 2.6.10 (26.79). Cf. Philo *Creation* 124 (claiming that they become alive at the end of seven months and cannot survive after the end of the eighth; Pliny E. *N.H.* 11.96.236 concurs that the fetus becomes alive in the seventh month).

879. See Galen *N.F.* 3.3.147; esp. Soranus *Gynec.* 1.16.56; 2.6.10 (26.79); also Lucian *Dial. G.* 228 (12/9, Poseidon and Hermes), ¶2. Heir to numerous traditions, Pliny the Elder hedges: children can be born between the sixth and the eleventh month, though likeliest to survive from the eighth onward (*N.H.* 7.5.38).

880. Ovid *Fasti* 1.33; 3.43 (by implication); Virg. *Ecl.* 4.61; Quint. *Inst.* 8.3.54; Statius *Silv.* 1.2.268; *Sent. Syr. Men.* 97; *Wis* 7:2; 4 *Macc* 16:7; *Jos. Ant.* 3.271; Arrian *Alex.* 7.12.6; Suet. *Aug.* 94.4; Aul. Gel. 3.16; 6.1.4; Quint. *Decl.* 339.29; *Iambl. V.P.* 31.192; *PGM* 101.36–37; the Isis aretology in Grant, *Religions*, 132.

881. See Bruce, *Acts*¹, 167; Richard, *Composition*, 335; Johnson, *Acts*, 125. Parsons and Culy, *Acts*, 125–26, prefer the LXX sense of taking him up, distinguishing this action from the verse's subsequent emphasis on his adoption.

882. See Sarna, *Exodus*, 31–32; cf. powerful women surrounding Alexander's childhood in Hdn. 5.8.10; 6.1.1. The term might be appropriate for the exaltation of the least in light of Luke's most recent usage, Luke 22:26 (if we suppose that Luke might recall his specific word choice there). Another irony: Moses's exaltation to Pharaoh's house came from the murder of the infants (Chrys. *Hom. Acts* 54 [Martin, *Acts*, 316]).

883. Influence for good or for ill; see, e.g., Quint. *Inst.* 1.1.4–5; Plut. *Educ. S, Mor.* 3DE; Tac. *Dial.* 28–29; *Germ.* 20; Aul. Gel. 12.1; Soranus *Gynec.* 1.1.3; 2.12.19–20 (32.88–89), esp. 2.12.19 (32.88); Ael. Arist. *Def. Or.* 380, §§126D–127D; Lucian *Anach.* 20; Lefkowitz and Fant, *Life*, 110–11, §111; Bradley, "Wet-Nursing." Although used regularly by the upper classes (Dixon, *Roman Mother*, 3, 120–26; Treggiari, "Jobs for Women," 87), nurses were also used by others (Dixon, *Roman Mother*, 146). In aristocratic homes, the nurses were often slaves (e.g., Hom. *Od.* 1.435; 19.354; Char. *Chaer.* 1.12.9; *CPJ* 2:19 [citing *BGU* 1085; P.Oxy. 91; P.Tebt. 399; *BGU* 1109]; Garnsey and Saller, *Empire*, 139); in Egypt, they were often impoverished peasants (*CPJ* 2:15–19, §146; Horsley, *Documents*, 2:7–8, §1 [citing *BGU* 4.1058, 1106, 1107, 1108, 1109, 1153; P.Rein. 2.103, 104; *PSI* 9.1065]); Lewis, *Life*, 146–47; for risks, cf., e.g., P.Oxy. 37), and elsewhere some took the position only through financial necessity (Demosthenes *Euxitheus against Eubulides*). On nurses, see also Gaventa, *Mother*, 21–23.

nurses, with affectionate ties continuing into adulthood;⁸⁸⁴ these did not, however, displace the normal parental bond.⁸⁸⁵

Orators were eager to praise a person's rearing;⁸⁸⁶ given other alternatives for newborns, rearing one was considered an act of love (Dio Chrys. *Or. frag.* 9). (Likewise, giving up a child for a better adoption could be a sign of love; Quint. *Decl.* 346.1. This act could be held to invite special gratitude; Quint. *Decl.* 372.12; 376.6.) The early rearing, however, was done mostly by mothers, nurses, and pedagogues (slave-tutors), the fathers taking over only at a later stage (Lucian *Anach.* 20).

Pharaoh's daughter made Moses her own son.⁸⁸⁷ Naturally, the tradition behind the Exodus narrative here differs from adoption practices familiar to Luke's audience,⁸⁸⁸ but they would still associate with it the only ideas about adoption with which they would have been familiar.⁸⁸⁹ What did adoption mean for a first-century audience?⁸⁹⁰ One major feature of adoption was to make one an heir.⁸⁹¹ Another feature was to free one from former familiar obligations, abrogating one's debts and previous legal family ties.⁸⁹² Some adoptions carried with them special honor. For example, to be adopted by Caesar⁸⁹³ was considered an ideal honor;⁸⁹⁴ naturally, Luke's audience would thus understand adoption by Pharaoh's daughter to constitute a significant improvement

884. E.g., Gen 35:8; Hom. *Od.* 1.435; *ILS* 8536 (in Sherk, *Empire*, §172C, p. 226); Pliny *Ep.* 6.3.1–2; Suet. *Dom.* 17.3; Lefkowitz and Fant, *Life*, 28; Dixon, *Roman Mother*, 145, 148–55; Bradley, "Wet-Nursing," 220–21; Hezser, "Impact," 376–77, 406–7. For her affection for the child, see, e.g., Epict. *Diatr.* 1.11.22; Fronto *Ad Ant. imp.* 1.5.2. Still, it is precarious to extrapolate the pervasive sentiments of slave nurses from aristocratic data (Joshel, "Nurturing"; Bradley, "Wet-Nursing," 221–22; so also Plut. *Educ. S, Mor.* 3CD); many must have resented losing a fully maternal connection with the child they had "mothered" (cf. Fronto *Ad Ant. imp.* 1.5.2).

885. Dixon, *Roman Mother*, 127–29. Sometimes, however, relations were closer with the nurse (Hezser, "Impact," 376–77).

886. So ἀνατροφή, Men. *Rhet.* 2.1–2, 371.17–23; cf. ἀνατρέφω in Acts 7:20–21; 22:3. Nurture was the subject after birth (Hermog. *Progymn.* 7, "On Encomion," 16).

887. See *Sib. Or.* 3.253–54; Jos. *Ant.* 2.232. The tradition persisted much later (e.g., Qur'an 28.8).

888. Women could not adopt under Roman law (e.g., Gaius *Inst.* 1.104). Although this is probably not the point here, exposed children who were adopted were sometimes treated as inferior to others (see Bernstein, "Adoptees").

889. Legal adoption was a widespread practice (cf. Ferguson, *Backgrounds*, 51; Burke, "Adoption"; Deissmann, *Studies*, 239; idem, *Life*, 174–75; Ramsay, *Teaching*, 203; e.g., Sen. E. *Controv.* 3.3 excerpts; Pliny *Ep.* 5.8.5; Suet. *Galba* 17). This was also true in the Hellenistic era (Tarn, *Civilisation*, 101–2), but not "adoption" imagery seems especially Roman (Lyll, "Law," esp. 466; idem, *Slaves*, 67, 81–99; Hester, *Inheritance*, 59); or ancient Near Eastern examples (e.g., Kitchen, *World*, 70, 145n63; cf. Vellanickeal, *Sonship*, 69–70) are more distant (Lyll, *Slaves*, 70–81).

890. On Roman law, see Buckland, *Roman Law*, 121–28. Adoption by will (e.g., Val. Max. 7.8.5) may be less common (it was also more open to challenge [Isaeus *Apollo.* 2]).

891. See Walters, "Adoption," 44–51, for Greek sources, and 51–55 for Roman sources; see, e.g., P.Oxy. 1206.9–11, 22. Many adopted to acquire heirs (e.g., Isaeus *Menec.* 1, 14; *Apollo.* 1) and carry on the line (Lyll, *Slaves*, 69).

892. See Walters, "Adoption," 57–58; Wansink, "Law," 990. This was probably especially true among Romans, but Mishnaic law shows similarities (cf. Keener, *John*, 543); some may have also given children they could not support (cf. P.Oxy. 1895, though this is from 554 C.E.). One could refuse adoption, preferring to retain birth ties (Sen. E. *Controv.* 2.1.19). Although adoption of freedmen in the early republic conferred freeborn status, they remained freedmen in the late republic (Gardner, "Adoption"). A true father, said one familiar maxim, is the one who rears rather than the one who merely begets (*SPap* 3:476–77, §116; cf. adoptive or stepparents as parents in Luke 2:33; Eurip. *Herc. fur.* 587, 1192). The audience would typically reckon sonship via adoption; see, e.g., Pliny *Ep.* 5.8.5; Quint. *Decl.* 278.5–6; 372.6, 11–12. For potential ambiguities that could arise, see, e.g., Quint. *Decl.* 346 intro; 376 intro (where legal relations do not appear to extend to marriage).

893. Such adoptions, placing one in the possible line of succession for the throne, were naturally of great interest in ancient literature; e.g., Vell. *Paterc.* 2.75.3; *Res Gestae* 1.2; Pliny *Ep.* 10.1.1; 10.3A.1; 10.4.2; Tac. *Ann.* 12.25; Suet. *Tib.* 15.2; 23; also in inscriptions, e.g., *I. Ital.* 13.2, p. 187 (Sherk, *Empire*, §1J, p. 4).

894. Epict. *Diatr.* 1.3.2; Tac. *Hist.* 1.16.

in social status.⁸⁹⁵ Legally, one could also be emancipated from the adoptive state, breaking all ties;⁸⁹⁶ Luke’s audience would probably not assume that Moses retained his ties with Egypt’s royal household after his flight.

Later traditions developed about Pharaoh’s daughter. Josephus calls her Thermuthis (*Ant.* 2.224–36); *Jubilees* (second century B.C.E.) similarly has Tharmuth (*Jub.* 47:5). Another early story in Artapanus *On Jews* frg. 3 calls her Meris and claims that she was barren.⁸⁹⁷ Later rabbis called her Bithiah and claimed that she was later spared, though a firstborn, by Moses’s intercession.⁸⁹⁸ Some also explained her love for Moses by claiming that she already rejected idolatry or that Moses’s ark cleansed her from leprosy.⁸⁹⁹

In his compressed account, Luke omits more patterns in the Exodus narratives than he reports here. God delivered both Moses and Noah through “arks” (the only places in the OT where the Hebrew term occurs; Gen 6:14–9:18; Exod 2:3). Moses was rescued in reeds (Exod 2:3) and later led Israel to safety through (according to the usual reconstruction) a sea of reeds (Exod 13:18; 15:4, 22; Neh 9:9; Pss 106:9; 136:13–15).⁹⁰⁰ But Luke focuses on the patterns most relevant to his point.

VI. EDUCATION AND EXPLOITS (7:22)

Moses’s Egyptian wisdom might contrast with Pharaoh’s “trickery” (see Acts 7:19) and certainly parallels the wisdom of Joseph, another Diaspora Israelite, in 7:10.⁹⁰¹ It is surely no coincidence that “wisdom” appears elsewhere in Acts only for Stephen and his colleagues (6:3, 10); Stephen will portray himself as in continuity with Joseph, Moses, and ultimately Jesus whereas his opponents might be like Pharaoh as well as the Jews who opposed Moses.

Eastern and northern Mediterranean peoples generally despised Egyptians in Stephen’s day,⁹⁰² and especially the animal forms of many of their deities,⁹⁰³ but Jews and others were aware of Egypt’s past grandeur, and Stephen can here underline Moses’s Diaspora education. (Egypt, like Babylonia and other “distant” nations, sometimes offered images of “exotic” and occult learning for the Roman world.)⁹⁰⁴ Stephen makes no claim, as Scripture did not, that Gentiles stole their learning from Judaism (a claim especially directed toward Greeks in his day);⁹⁰⁵ rather, Moses learned from

895. Luke’s audience would not be aware that both Ramses and Seti, in contrast to Roman emperors of Luke’s day, had scores of children (Ramses II had fifty-nine daughters; Sarna, *Exodus*, 31). Moses’s adoptive status was significant, but it would appear more significant to a first-century audience (if the audience did not unduly underestimate the power of Seti and Ramses).

896. Buckland, *Roman Law*, 132; cf. Gaius *Inst.* 2.136. Genetic sonship, however, could also be legally annulled.

897. Johnson, *Acts*, 125 (noting that Philo *Mos.* 1.12–15 develops this barrenness psychologically; her barrenness may have been particularly an Alexandrian tradition). Bruce, *Commentary*, 149n43, notes the similarity to the name of a daughter of Ramses II and a Hittite but that in the usual dating she would have been Moses’s junior.

898. *Pesiq. Rab Kah.* 7:6/9; *Pesiq. Rab.* 17:5; *Exod. Rab.* 18:3.

899. *Exod. Rab.* 1:23. This version might polemically invert the Egyptian polemic that Egypt expelled the Jewish people because of leprosy (see Jos. *Ag. Ap.* 1.233–35, 251; on the tradition, cf. Raspe, “Manetho on Exodus”).

900. For these connections, see Sarna, *Exodus*, 28–29; Enns, *Exodus*, 62.

901. It could function as a natural midrashic inference from the experience of Hebrews in another royal court in Dan 1:4–5.

902. E.g., P.Oxy. 1681.6–7; see comment on Acts 18:24. They could not become Roman citizens unless they were citizens of Alexandria (Pliny *Ep.* 10.6.1–2).

903. See, e.g., Gordon, “Egyptian Deities,” 512; Frankfurter, *Religion in Egypt*, 66; Lucian *Portr.* 11; Philost. *Vit. Apoll.* 6.18–19; *Let. Aris.* 138; Jos. *Ag. Ap.* 2.81, 128, 224; cf. Sext. *Emp. Pyr.* 3.219; comment on Acts 7:41.

904. Cf., e.g., Egypt in Val. Max. 8.7.ext. 2–3; Iamb. *V.P.* 29.158; Jos. *Ant.* 1.168; Klauck, *Context*, 129; Persia in Plut. *Themist.* 29.4; Eunapius *Lives* 468; Indian sages in Philost. *Vit. Apoll.* 6.11.

905. E.g., Jos. *Ag. Ap.* 2.257, 281; Justin *1 Apol.* 59. See further comment at Acts 17:19–20.

Gentiles, and this education is positive as his power in words and deeds is positive (cf. Dan 1:17). Luke may offer a hint that Gentile learning was not contaminating (cf. Acts 10:28; 19:9).⁹⁰⁶

Educated Alexandrian Jews, naturally enough, had supplied elaborate precedent for this tradition; Alexandria had achieved great fame as an educational center (see comment on Acts 18:24). Stephen and his Hellenist colleagues had Greek education and perhaps valued it. Saul was likewise “educated” under Gamaliel (22:3) but must have been exposed to Greek ideas, whether from Gamaliel or elsewhere (cf. discussion of Acts 17:22–31).⁹⁰⁷ John (Luke 1:80) and Jesus (2:40, 52) also grew in wisdom.

After praising a subject’s birth and rearing (Men. Rhet. 2.1–2, 370.28–371.23), an orator would praise his education (παιδεία; 371.23–372.2; cf. παιδεύω in Acts 7:22; 22:3). Because later Jewish storytellers and writers valued education, they added it to various sources. For example, Jacob, in contrast to Esau, learned writing (*Jub.* 19:14).⁹⁰⁸ This interest naturally would come to bear on someone raised in a powerful royal court (about whom some education could be inferred).⁹⁰⁹ If Daniel learned the wisdom of the Chaldeans (Dan 1:4, 17), how much more, it would be argued, would Moses as a prince in Egypt? In the Greco-Roman world as elsewhere, advanced education was limited to an elite few,⁹¹⁰ but royal households certainly qualified. All this education would occur well before Moses’s fortieth year (Acts 7:23); most ancients would think of even the rare tertiary education (for aristocratic males), often traveling to study with a foreign teacher, as beginning around fifteen.⁹¹¹ (For discussion of ancient education, see comment on Acts 22:3.) Adoption (7:21) and responsibility for education (7:22) were closely linked.⁹¹²

Writers varied on the degree to which they believed Moses was influenced by Egyptian culture.⁹¹³ *Jubilees* attributes Moses’s learning to write to Moses’s father Amram (*Jub.* 47:9); but if some early Palestinian sources were reticent about foreign learning, others were not so reserved. Josephus mentions Moses’s Egyptian education, although he does not expand it extravagantly (*Ant.* 2.236).⁹¹⁴ Josephus did not need to regard Egyptian learning as “foreign,” since he believed that Abraham taught the Egyptians everything they knew about arithmetic and astronomy (1.168).⁹¹⁵ Philo of Alexandria was naturally happy to emphasize Moses’s Egyptian learning (*Mos.* 1.5; cf. 2.1), expanding on it at length in 1.20–24, where Moses learns mathematics, music,

906. In a different direction, Paul’s apologetic emphasis about his Jerusalemite education in Acts 22:3, to prevent his audience assuming that Gentile learning biased him.

907. On training in Greek ideas in the household of Gamaliel II (after 70 C.E.), see discussion at Acts 22:3; it is likelier that the mistrust of Greek learning, rather than attention to it, increased after 70 (Josephus implies little respect for Greek learning earlier in *Ant.* 20.264, but to lower expectations; he notes that he acquired it, 20.263; elsewhere he respects those who possessed both kinds of learning, *Life* 359).

908. Likewise, Enoch seems to have learned writing at an early age (*1 En.* 83:2; on Enoch’s learning, cf. also *Jub.* 4:17; *1 En.* 12:4).

909. See Sarna, *Exodus*, 33; Kitchen, *Reliability*, 295, 297; Harrison in Harrison et al., *Criticism*, 9–10.

910. See Christes, “Education,” 821–22; comment on Acts 22:3.

911. E.g., Lucian *Career* 1; Hock, “Paul and Education,” 204.

912. The rabbis showed familiarity with legal traditions that one who supplied an education to another’s child could be perceived as an adoptive parent (Jacobson, “Adoptive Parents”). For the princess’s care for Moses’s instruction, see Ezek. Trag. *Exag.* 36–38 (noted in Enns, *Problem*, 147).

913. See Römer, “Vie de Moïse” (finding the difference even in OT traditions as well as pre-Christian historians).

914. Josephus claims that Judaism discouraged foreign learning (*Ant.* 20.264), explaining his own supposed deficit in Greek (20.263; this is, however, to highlight his *Jewish* learning, which some ideal readers might consider exotic). For sources regarding Moses’s education, see now most fully Koskenniemi, “Moses.”

915. Following Artapanus in Euseb. *P.E.* 9.18.

astronomy, and so forth—in short, an ideal Hellenistic education.⁹¹⁶ Like Josephus, Philo might suppose that Jewish thinkers provided Egyptian wisdom to begin with.⁹¹⁷ Certainly, many early Jewish and Christian apologists believed that the Greeks obtained their learning from Moses, even if it was mediated through other sources.⁹¹⁸ Like Josephus, Stephen offers what is a natural inference concerning a youth raised in a royal court;⁹¹⁹ but his interest in the subject is the interest of a Hellenistic Jew.⁹²⁰ It points toward where Acts is moving; not everything from the Gentile sphere is negative. (On education, see further comment at Acts 22:3.)

Moses's being "powerful in words and deeds" exactly echoes a Lukan portrait of Jesus (Luke 24:19) and might be echoed to some extent in Luke's mention of Apollo's rhetorical prowess (Acts 18:24). Luke associates this with Moses *before* his call at the burning bush. However eloquent Moses might have become, at least initially he was "slow in speech" (Exod 4:10), but "the handicap is already glossed over as early as Sir 45:3 and is missing completely in Josephus *Ant.* 2.271–72."⁹²¹ Indeed, Josephus makes Moses into a Hellenistic orator (3.14–23).⁹²² Emphasizing such rhetorical weakness may have fit Paul's purpose, at times (1 Cor 2:3);⁹²³ it did not suit Luke's. (Thus Luke's Paul is also a great orator.) The pairing of "words" with "deeds" was standard rhetoric.⁹²⁴

Storytellers expanded on the details of Moses's childhood and young adulthood. He was particularly intelligent and beautiful as an infant (Jos. *Ant.* 2.230–31). As a child he portentously cast Pharaoh's crown down (2.233–34) or (in a later source) placed it on his own head (*Exod. Rab.* 1:26). Again such expansions fit ancient expectations; as suggested above, great adults were often assumed to have been child prodigies.⁹²⁵ Thus, for example, Cyrus revealed his royal character by his authoritativeness already at age ten.⁹²⁶ Pythagoras was respected even while very young (Iambl. *V.P.* 2.10–11); Apollonius was thought wise as a child.⁹²⁷ On the historical level, Fronto attributes such advanced maturity to Marcus Aurelius (*Ad M. Caes.* 4.1).

916. Cf. also Barnard, "Stephen and Alexandrian Christianity," 44; for Alexandrian learning, see Clarke, "Alexandrian Scholarship"; for outsiders impressed with Egyptian learning, see, e.g., Macrobius *Sat.* 1.14.3; 7.13.10 (van der Horst, "Macrobius," 226); Lucian *Lover of Lies* 34 (Lake and Cadbury, *Commentary*, 75); comment on Acts 18:24.

917. Cf. the idea in, e.g., Artapanus frg. 3 (Euseb. *P.E.* 9.27.4). Still, Philo has Moses learning Egyptian and Greek wisdom in *Mos.* 1.23.

918. Clem. *Strom.* 1.23 (Pelikan, *Acts*, 102).

919. For genuine ancient Egyptian education, see Vanstiphout, "Memory," 2189 (best attested in school exercises ca. 1300–1100 B.C.E.); scribes often handled multiple languages (Daniels, "Scribes," 501–2). Historically, Egyptians began writing hieroglyphics no later than 3100 B.C.E. (Kitchen, *World*, 16).

920. Cf. Bruce, *Acts*¹, 168.

921. Conzelmann, *Acts*, 53 (unfortunately calling this a "divine man" motif; citing Lucian *Dem.* 13ff.; Demosth. *Encomium* 14–15); similarly, Haenchen, *Acts*, 281.

922. Johnson, *Acts*, 126.

923. It often lowered expectations; e.g., Lysias *Or.* 2.1, §190; 12.3, §120; 19.1–2, §152; Isaeus *Astyph.* 35; *Aristarch.* 1; *Rhet. Alex.* 29, 1436b.34–36; Cic. *Quinct.* 1.1–4; 24.77; Dio Chrys. *Or.* 1.9; 32.39; 42.1; 46.7; 47.1; Tac. *Hist.* 4.73; Fronto *Ep. graec.* 1.5; M. Aurelius to Fronto, *Ad M. Caes.* 2.6.2. In other genres, e.g., Catull. *Carm.* 49.5–7; Aul. Gel. pref. 10.

924. In early Christianity, see Rom 15:18; 2 Cor 10:11; Col 3:17; 2 Thess 2:17; 1 John 3:18; 1 Clem. 30.3; 38.2; *Herm.* 98.2; cf. Matt 23:3; but more generally, see esp. discussion at Acts 1:1.

925. E.g., Jos. *Ant.* 10.50; Val. Max. 3.1.1; 3.1.2ab; Eunapius *Lives* 468; see further examples in Bultmann, *Tradition*, 300–301. For growing in size, cf. e.g., Philost. *Hrk.* 45.5; for Moses, Jos. *Ant.* 2.230; cf. Luke 1:80; 2:52. Naturally, such rapid maturation happened even more quickly for a deity (Soph. *Searchers* 224–27, 253–56).

926. Hdt. 1.113–15. On Cyrus's precocity, see also Xen. *Cyr.* 1.4.3.

927. Philost. *Vit. Apoll.* 1.7–8, 11. Supposedly, Zoroaster laughed on the day of his birth, and his head throbbed wildly (Pliny E. *N.H.* 7.16.72).

Biographers thus expanded on material available about famous figures' youth (e.g., Ps-Callisth. *Alex.* 1.13–19; *Infancy Gospel of Thomas*), and Moses was no exception (Jos. *Ant.* 2.233–36; Philo *Mos.* 1.21–31).⁹²⁸ Such prodigies might fit the sorts of parallels Luke likes to draw with Jesus (Luke 2:40, 46–47),⁹²⁹ but beyond Jesus, though John offers something of a literary parallel to Jesus here (Luke 1:80), even Luke's hero Paul (Acts 22:3) is not quite comparable.

Orators praising a person liked to include virtues or deeds from the person's youth when possible (Men. *Rhet.* 2.1–2, 372.5–9). As a young man, Moses achieves a great victory in Ethiopia (Nubia), in a narrative that follows conventions for Hellenistic historiography⁹³⁰ and that Josephus has adjusted for apologetic purposes (*Ant.* 2.238–57).⁹³¹ There Tharbis, the Ethiopian king's daughter, falls in love with Moses; she hands the city over to him peacefully, and he marries her in return (2.252–53).⁹³² Whether for reasons of conviction (cf. 1 Tim 1:4; Titus 1:14) or of brevity, Luke's report of Stephen's speech "leaps the gap" from Moses's childhood to his adult story almost as quickly as Exodus⁹³³ (cf. Luke 2:52–3:1).

VII. MOSES VISITS AND DEFENDS HIS PEOPLE (7:23–24)

Luke divides Moses's life into three periods of forty years (Acts 7:23, 30, 36). Exodus 2:11 specifies only "when Moses had grown to adulthood," not age forty. Forty was a minimum age for some offices in antiquity⁹³⁴ and, in some places, the maximum for war.⁹³⁵ Luke likewise rounds Jesus's age to thirty, which age constituted a qualification for some other offices or activities.⁹³⁶ This is not to imply that Luke necessarily invents such traditions; fifty was even more honorable and also required for some offices.⁹³⁷ For youth, see comment on Acts 7:58.

Jewish interpreters of Luke's era struggled with some chronological complexities in the Scriptures,⁹³⁸ but while Stephen's chronology may not quote a pentateuchal text, it reflects the sort of age approximation standard in his Bible. Some data used in his estimate were plain in the text: Moses was eighty when he spoke with Pharaoh (Exod 7:7); Israel wandered forty years (cf. Acts 13:18); and Moses died at 120 (Deut 34:7; cf. 31:2).⁹³⁹ But the use of forty years often functioned as a generation

928. Johnson, *Acts*, 125. Josephus also presents himself as a prodigy (*Life* 9; cf. Rajak, *Josephus*, 27–29; but given the many ancient prodigy stories, the connections with early Christianity drawn by Herrmann, "Bannoun," are fanciful).

929. Other biographies also used a childhood anecdote to prefigure future greatness (Burrige, *Gospels*, 207; Danker, *New Age*, 39), though not all child prodigies remained advanced (Quint. *Inst.* 1.3.3–5) or pleased their elders (y. *Soṭah* 3:4, §12).

930. See Rajak, "Moses in Ethiopia" (thinking that Josephus's source and Artapanus shared a common source).

931. See Runnalls, "Ethiopian Campaign" (thinking that Josephus subtly challenged Artapanus's account).

932. He won the Ethiopians peacefully also in Artapanus frg. 3 (Euseb. *P.E.* 9.27.10). Similar stories are told of Alexander's diplomacy (Ps-Callisth. *Alex.* 1.23), though soldiers eager for plunder must have complicated such intentions in real life.

933. Kilgallen, *Speech*, 67. Ps-Philo *Biblical Antiquities* leaps even more quickly (9:16–10:1).

934. E.g., officers in 1QM VII, 1–3 (though cf. more broadly CD XIV, 7, 9); Aeschines *Tim.* 11–12.

935. Aeschines *Embassy* 133.

936. E.g., Cic. *Verr.* 2.2.49.122; Pliny *Ep.* 10.79.1; 1QSa (=1Q28a) I, 12–13; m. 'Ab. 5:21; t. *Šeqal.* 3:26; cf. Gaius *Inst.* 1.17. Some ended "youth" then (Xen. *Mem.* 1.2.35; cf. Jos. *Life* 80; Philost. *Hrk.* 21.6), but one still lacked honor (Plut. *Demosth.* 12.1); when one assumed a prominent position at this age, it could arouse envy (e.g., Jos. *Life* 80). For Joseph (Gen 41:46) and David (2 Sam 5:4), see Danker, *New Age*, 52–53.

937. Aeschines *Tim.* 23; *Ctes.* 4; Dion. Hal. *Ant. rom.* 4.29.3; m. 'Ab. 5:21; b. *Hag.* 14a.

938. See, e.g., Wise, "To Know" (on 4Q559); DiTommaso, "Note" (on Demetrius the Chronographer frg. 2.11 = Euseb. *P.E.* 9.21.11).

939. Egyptians seem to have used 110 as a round number for a very old age (Sarna, *Genesis*, 226–27; Kitchen, *Reliability*, 351; Walton, "Genesis," 137; cf. Gen 50:22, 26; Josh 24:29; Judg 2:8); 120 would then be older (more blessed) than that.

in ancient Israel and Phoenicia.⁹⁴⁰ Joshua was forty when sent as a spy (Josh 14:7); it is standard language for a generation (e.g., Acts 13:21; Judg 3:11; 5:31; 8:28; 13:1; 1 Sam 4:18; 13:1; 2 Sam 2:10; 5:4; 1 Kgs 2:11; 11:42; 2 Kgs 12:1).

The sum of generations yielded great age for Moses (Deut 34:7). On low estimates, the “average life expectancy at birth” in preindustrial societies was probably twenty to thirty years, skewed by high infant mortality (probably about 25 percent in the first year and 50 percent by age ten), with survivors of “their first decade” on average probably living “another thirty-five to forty years.”⁹⁴¹ To Moses is attributed great age, hence great wisdom⁹⁴² and honor (cf., e.g., Prov 16:31; 20:29). As in the broader Mediterranean culture,⁹⁴³ Jewish tradition emphasized respect for the aged.⁹⁴⁴ For example, in the ancient Mediterranean world, formal settings might require the eldest to speak first;⁹⁴⁵ young men should rise before elders to offer their seats.⁹⁴⁶ Such practices permeated Jewish circles as well.⁹⁴⁷ (Those growing older did, however, privately acknowledge the disadvantages of aging.)⁹⁴⁸

We need not suppose, however, that Stephen made the inference directly from the common use of the number forty himself. His estimate reflects a more widespread Jewish tradition. A rabbinic tradition divided Moses’s 120 years into forty in

940. Cf., e.g., Gen 26:34; Exod 16:35; Num 14:33–34; 32:13; Josh 14:7; Judg 3:11; 5:31; 8:28; 13:1; 1 Sam 4:18; 2 Sam 2:10; 5:4; 1 Kgs 2:11; 11:42; Jos. *Ant.* 5.184, 209, 232, 275; CD XX, 14–15; Bright, *History*, 123 (for Phoenicia, n. 37). Also in Moab (the Mesha inscription [ANET 320–21]; Gordon, *Near East*, 205, takes this as a round, idiomatic number).

941. Garnsey and Saller, *Empire*, 138; cf. Gardner, *Women*, 40 (the average life expectancy being below age thirty, with some estimating as low as 21.11 years of age); Scheidel, “Age Structure” (estimates below thirty are plausible but hypothetical). Garland, “Age,” finds thirty-four years the average for wives, and 46.5 for husbands, in burial epitaphs; in Jewish burials, the average age of skeletons was thirty-eight years (Nagar and Torgeë, “Characteristics”). Against extrapolations from some other societies, ancient Mediterranean nutrition may have been better than is often supposed (Kron, “Anthropometry”; Borowski, “Eat”). Arrian *Ind.* 9.1 seems to suppose forty a low life expectancy (but he was not an Egyptian peasant).

942. Cf. the wisdom of age in, e.g., Aeschines *Tim.* 24; Diod. Sic. 1.1.4; Dion. Hal. *Ant. rom.* 8.15.1; Phaedrus 4.2.16–19; Plut. *Old Men* passim, *Mor.* 783B–797F; Pliny *Ep.* 3.1.10; Philost. *Vit. Apoll.* 6.11; *t. ‘Abod. Zar.* 1:19; for local knowledge, Lysias *Or.* 23.5, §167. There were, of course, exceptions (e.g., Aeschylus frg. 224 in LCL, 2:501, from Stob. *Anth.* 3.29.24; Fronto *Ad M. Caes.* 3.3; *Sent. Syr. Men.* 170–72; cf. Wis 4:8–9). Not all remained mentally keen into old age (Iambl. *V.P.* 5.21), but some did (e.g., Sen. *Y. Ep. Lucil.* 76; Paus. 1.18.8; Philost. *Vit. soph.* 1.9.494; see much more fully Keener, *John*, 102–3).

943. E.g., Hom. *Il.* 1.259; 23.616–23; Aeschines *Tim.* 25; Xen. *Cyr.* 8.7.10; Arist. *Pol.* 2.7.5, 1272a; Diod. Sic. 2.58.6; 21.18.1; Dion. Hal. *Ant. rom.* 8.15.1; Cato *Coll. Dist.* 10; Livy 5.25.3; 6.24.7; Val. Max. 2.1.9–10; 4.5.ext. 2; Pliny *Ep.* 8.14.4, 6; 8.23.3; Ptolemy *Tetrab.* 4.10.206; Diog. Laert. 8.1.22; Men. *Rhet.* 2.4, 394.22; Iambl. *V.P.* 16.69; maxim in *SPap* 3:476–77, §116. The practice is not limited to Mediterranean cultures; cf. the Confucian emphasis noted in, e.g., Kwon, *Corinthians*, 201.

944. Philo *Good Person* 87; Jos. *Ag. Ap.* 2.206; *Ant.* 3.47; 18.12; *War* 2.145; 4 *Bar.* 5:20; *Sent. Syr. Men.* 11–14, 76–93; *Syr. Men. Epit.* 2–4; cf. Wis 2:10; *Pesiq. Rab.* 15:14/15; Leon, *Jews of Rome*, 230. Prominent local leaders tended to be those who were aged, as both literary texts (Jos. *Life 266*; *Let. Aris.* 32, 39; Acts 14:23) and inscriptions (CJ 1:294, §378; 1:426, §581; 1:432, §595; 1:433, §597; 2:9, §739; 2:45, §790; 2:46, §792; 2:53, §801; 2:76–77, §828a; 2:77, §828b; 2:79, §829; 2:137, §931; cf. l:xxxxvi–l:xxxvii) testify, as does the LXX (e.g., Josh 24:1; Judg 8:14, 16; 11:5–11; 21:16; Ruth 4:2–11; 2 Chr 34:29; Jer 26:17; Jdt 6:16; 7:23–24; 13:12; 1 Macc 1:26; 7:33; 11:23; 12:35; 13:36; 14:20, 28; 2 Macc 13:13; 14:37). Among Amoraim, see Cohen, “Criterion”; cf. Perelmuter, “Strength.”

945. Dion. Hal. *Ant. rom.* 7.47.1; Aeschines *Tim.* 23–24; Cic. *Verr.* 2.4.64.142.

946. Plut. *S. Sp.*, Lycurgus 14, *Mor.* 227F; Xen. *Mem.* 2.3.16. Roman society also demanded giving way to one’s elder (Cato *Coll. Dist.* 10; Dion. Hal. *Ant. rom.* 7.47.1).

947. Ps.-Phoc. 220–22; *t. Meg.* 3:24. Appropriate etiquette for rising before elders is discussed in *y. Bik.* 3:3, §§4–6.

948. Cic. *Att.* 14.21; 15.1; Mus. Ruf. 17, p. 108.28; *Sib. Or.* 1.299–304. Rabbis opined that Abraham introduced old age to distinguish fathers from sons (*Gen. Rab.* 97 MSV) or because, like all forms of suffering, it atoned for sin (cf. *b. Sanh.* 107b, bar.; *Gen. Rab.* 65:9). Deterioration of beauty was one problem (Cic. *Att.* 15.1; *Sent. Syr. Men.* 397–401), although occasionally it could be supernaturally arrested (*Jos. Asen.* 22:7). Stoics maintained, however, that virtue was what mattered (Arius Did. *Epit.* 2.7.11q, pp. 98–99.4–7).

Egypt, forty in Midian, and forty leading Israel (*Sipre Deut.* 357.14.1).⁹⁴⁹ A tradition that antedates Stephen makes Moses forty-two when he struck the Egyptian (*Jub.* 47:10–12), a number easily rounded to forty.⁹⁵⁰ Later rabbis divided the lives of the famous sages Hillel, R. Johanan ben Zakkai, and R. Akiba into three periods of forty years each, expressly following the model of Moses (*Gen. Rab.* 100:10).

That it “arose in Moses’s heart”⁹⁵¹ to visit his brothers” may suggest that he intended to use his position to act on their behalf. “Brothers” underlines his connection and identification with them rather than with Pharaoh’s household (see comment on Acts 9:17; cf. Heb 11:24–25). The term “visit” is more deliberate than Exod 2:11 requires, but Luke has good reason to use it (cf. 3:16; 4:31 LXX). In Luke-Acts it usually refers to God’s salvation-historical activity (Luke 1:68, 78; 7:16; Acts 15:14; the other two uses seem not theologically pregnant); the allusion here might be to God’s visiting Israel through the prophet Jesus in Luke 7:16.⁹⁵² The likelihood that Luke wants his audience to view his description of Moses’s mission here as foreshadowing that of Jesus is increased by the recurrence of “his siblings, the children of Israel,” together again in Acts 7:37, where Moses tells the children of Israel that God will raise a prophet like him.⁹⁵³

“Striking down” the Egyptian (7:24) refers to Exod 2:12.⁹⁵⁴ The one καταπονουμένω (“worn down by work”) might evoke the sound of 2:11 LXX, κατανοήσας . . . πόνον; more important rhetorically, Acts 7:24 balances the sounds of the verb ἀδικούμενον and the noun ἐκδίκησιν. The sentiment that vengeance should be left to God appears often in Jewish literature (Deut 32:35; cf. Luke 21:22).⁹⁵⁵ Some Greek thinkers also eschewed vengeance.⁹⁵⁶ Whether Luke presents the attempt to execute vengeance as wise or as acting before the proper time, however, Luke clearly interprets Moses’s action as just.⁹⁵⁷ His attempt to execute vengeance might prefigure the Passover, when God himself would do it (Exod 12:12; cf. 7:4; Num 33:4; Deut 32:35).⁹⁵⁸

The term for “mistreat,” ἀδικέω, appears twice in Exodus, referring in this case to Exod 2:13—an Israelite wronging his fellow Israelite (5:16 refers to Egyptian

949. The tradition used Moses as a paradigm for Hillel, R. Johanan ben Zakkai, and R. Akiba, dividing each of their lives into three sets of forty years (for this tradition about R. Akiba, see also *Abot R. Nat.* 12, §29 B); cf. three periods of ten years implied in *Hom. Il.* 24.765. For this and other traditions, see Strack and Billerbeck, *Kommentar*, 2:679–80 (followed by, e.g., Lake and Cadbury, *Commentary*, 75; Haenchen, *Acts*, 281; Conzelmann, *Acts*, 53; Bock, *Acts*, 291).

950. See Charles, *Jubilees*, lxxxiv, esp. n. 1. *Jubilees* treats the equivalent of Moses’s adulthood, however, as age 21 (*Jub.* 47:10). *Jubilees* also breaks down Joseph’s 110 years into segments (46:3).

951. The expression about thoughts arising in the heart appears idiomatically elsewhere in Luke (Luke 24:38; cf. elsewhere in the NT at 1 Cor 2:9), and the phrase might be Septuagintal (2 Kgs 12:4 [12:5 LXX]; Isa 65:16; Jer 3:16; 51:50 [28:50 LXX]; 32:35 [39:35 LXX]; 44:21 [51:21 LXX]; Ezek 38:10), as Lake and Cadbury, *Commentary*, 75, suggest.

952. It can apply to the glory of martyrdom in Wis 3:7.

953. “Children of Israel” and “brothers,” indeed, appear nowhere else together in the NT, though they appear in the LXX—Deut 3:18; Judg 20:13; 1 Kgs 12:24; here probably Exod 2:11.

954. Strangely, the verb ἀμύνομαι appears only here in the NT, is not from Exod 2 LXX (it appears only nine or ten times in the LXX, four of them in deuterocanonical books, among the later translated; cf. standing for what is just in 2 Macc 6:20), and may have been rare in Koine (Bruce, *Acts*¹, 168); the likeliest source might be Israel’s vengeance on its enemies in the wilderness period (Wis 11:3), perhaps related to the drowning of the Egyptians (10:19).

955. Sir 28:1–8; Jos. *War* 5.377; Ps.-Phoc. 77; 2 *En.* 50:4; *Sipra Qed. pq.* 4.200.3.4–5; Rom 12:14, 19; cf. CD IX, 3–6; Flusser, *Judaism*, 199, 485; Stendahl, “Hate.” But contrast human vengeance in, e.g., Jdt 9:2; 1 Macc 2:67; *Test. Levi* 5:3. It is indeed an angel that “strikes down” Herod, Peter’s oppressor (Acts 12:23), and Jesus disapproves of such “striking,” even to protect him (Luke 22:49–51).

956. Arius Did. *Epit.* 2.7.10c, pp. 60–61.8–10. More commonly, however, Greeks would think vengeance appropriate (e.g., Hermog. *Inv.* 1.1.97).

957. This appears more explicit in Acts than in Exodus (cf. Kilgallen, *Speech*, 68).

958. “Avenge” could recall the need to avenge killed slaves in Exod 21:20, but this would not fit the story here (Exod 2:11; 21:21; Lev 19:18).

oppression but in a later setting). Stephen quotes from this passage in Acts 7:26–27 (it appears otherwise in Acts only at 25:10–11), making clear its function here: Egyptians oppressed Israelites, but Israelites also oppressed one another.⁹⁵⁹

Others also portrayed Moses's act as noble. Artapanus, writing as a Greek-speaking Jew in second- or third-century B.C.E. Egypt, claimed that Moses killed the Egyptian in self-defense (Euseb. *P.E.* 9.27.18). Josephus quietly omits the episode, claiming that Moses fled because the Egyptians were jealous of him and wanted to kill *him* (*Ant.* 2.254–57). Philo claims that Moses killed “the cruelest of all” the Egyptians, who beat Israelites “to the point of death . . . subjecting them to every outrage. Moses considered that his action in killing him was a righteous action. And righteous it was that one who only lived to destroy men should himself be destroyed” (*Mos.* 1.44 [LCL 6:299]).⁹⁶⁰ Later rabbis claimed that before Moses slew the Egyptian, he considered the future, making sure that none of his potential descendants would ever become a proselyte (*Tg. Ps.-J.* on Exod 2:12).⁹⁶¹ Rabbis justified it by various means; some even claimed that Moses slew him by means of the divine Name (*Exod. Rab.* 1:28–29).

Stephen's portrayal of Moses acting for justice would resonate with Luke's audience, reducing the potential offense of Gentiles viewing it as an act of anti-Gentile, Jewish nationalism.⁹⁶² Exodus also suggests that Moses acted for justice, but, in contrast to Acts 7:25, before experiencing his call and perhaps not in faith, since it contrasts Moses's youthful act with God's later use of him when he was humbled (cf. Exod 3:11; Num 12:3).⁹⁶³ Some other traditions also portrayed Moses as deliberately already acting for justice for his people (Philo *Mos.* 1.40–46), but the idea that Moses already knew something of his call is the speech's foreshadowing technique (cf. Acts 7:35). It enables Stephen to further highlight the motif of a deliverer misunderstood and rejected by his people (7:35–37).⁹⁶⁴

VIII. A REJECTED DELIVERER (7:25–28)

Some of Moses's own people fail to appreciate and embrace his God-ordained role for them (7:25). For Luke, even those closest to Jesus often did not understand him (Luke 2:50; 9:45; 18:34) without divine aid (24:45). In this context, however, Stephen most likely alludes to his people's misunderstanding, fulfilling Isaiah's prophecy (Luke 8:10; Acts 28:26–27; Isa 6:9–10). Moses's “supposing”⁹⁶⁵ that his people would understand highlights their misunderstanding.

Because Stephen emphasizes the connection between Moses and Jesus (Acts 7:37), he lays emphasis on Moses's role in saving his people (7:25, 35; cf. Jesus in 5:31).⁹⁶⁶ The redeemer would be misunderstood (3:17; 7:25) and denied (3:13–14; 7:35)

959. From some thinkers' standpoint, only the worthless harm one another (Arius Did. *Epit.* 2.7.11b, pp. 64–65.7–9).

960. Conzelmann, *Acts*, 53, rightly finds “the tendency to excuse Moses by assigning a noble motive to his actions . . . more marked” in Philo's version.

961. See more fully Bamberger, *Proselytism*, 182.

962. It is important to note that deliverance did not come through this action of Moses, either here or in Stephen's biblical source. Luke does not want Jesus or his followers to be identified with revolutionaries (cf. 5:36–37 and comments there), especially if, as I suggest in the introduction, he writes some time in the wake of the consequences of the Judean revolt against Rome.

963. Most commentators mention the contrast with Exodus (e.g., Kilgallen, *Speech*, 68–69; Bruce, *Acts*¹, 169; Fitzmyer, *Acts*, 376–77; Johnson, *Acts*, 126).

964. The idea of a rejected leader fits ancient Israelite experience but, more widely, Mediterranean (e.g., Corn. Nep. 19 [Phocion], 4.3; 23 [Hannibal], 1.2) and, perhaps finally, human experience; followers typically both extol and criticize leaders unrealistically.

965. The verb $\nu\omicron\mu\iota\zeta\omega$ often applies to a contrary-to-fact supposition (e.g., *Test. Jud.* 19:4), including six of its seven uses in Acts.

966. Commentators often note this (e.g., Richard, *Composition*, 336).

despite signs (2:22; 7:36).⁹⁶⁷ In Exodus LXX, only God is salvation and savior (Exod 14:13; 15:2; also Deut 32:15; 33:29); here the salvation comes “through” Moses, accurately enough.⁹⁶⁸ The language evokes the frequent use of σωτήρ and σωτηρία for Jesus as Savior in Luke-Acts (e.g., Luke 1:69; 2:11; Acts 4:12; 5:31; 13:23).

The term used here is σωτηρία; in Acts 7:35, Moses is called a λυτρωτής (“redeemer”), a NT hapax legomenon used in the LXX for God (Pss 18:15 [19:14 MT]; 77:35 [78:35]), though not exclusively (Lev 25:31–32). Cognates apply to God (e.g., 1 Kgs 1:29; Pss 25:11 [26:11]; 30:6 [31:5]; 129:7 [130:7]; Dan 6:27; Sir 51:2) and his deliverance of Israel (e.g., Pss 24:22 [25:22]; 110:9 [111:9]; Isa 63:4; Sir 50:24), including (most relevant here) from Egypt (Exod 6:6; 15:13; Deut 7:8; 9:26; 13:5; 15:15; 21:8; 24:18; 2 Sam 7:23; 1 Chr 17:21; Neh 1:10; Isa 63:9; Mic 6:4).⁹⁶⁹ Josephus speaks of how the Egyptians were “saved” (ἐσωζοντο) by Moses (from the Ethiopians, *Ant.* 2.254); Moses’s father-in-law also recognized him as savior of his people (*Ant.* 3.69), whom he saved from their troubles (*Ag. Ap.* 2.157).

In Acts 7:26, Luke adds the term “appeared” (ὤφθη) to Exod 2:13 (in Exod 3:2 and 16:10, God or his angel “appeared”; cf. also Acts 7:2, 30, 35; 16:9), but this addition fits Moses as a type of Jesus the deliverer after the resurrection. We might think nothing of Moses’s having “appeared” to his people were not Luke’s normal use of ὄραω in the passive for supernatural encounters, usually either for angels (Luke 1:11; 22:43) or for Christ in glory (Luke 9:31; 24:34; Acts 13:31; cf. 9:17; 26:16).⁹⁷⁰ By this unusual wording, Luke again hints of a comparison with Christ.

That Moses tried to reconcile the antagonists (Acts 7:26) paraphrases Exod 2:13; “peace” is a familiar Lukan term (20 times), including with the sense of no hostility (Luke 11:21; 14:32; Acts 9:31; 12:20; 15:33; 24:2).⁹⁷¹ Jesus came to establish peace (Luke 1:79; 2:14; 19:38; Acts 10:36; though cf. Luke 12:51); peace is also what Israel would forfeit by rejecting him (Luke 19:42). The role of establishing peace between offended parties was a familiar one.⁹⁷² Enemies could be “reconciled” (Plut. *Cic.* 33.5);⁹⁷³ “reconciling” with one’s neighbors was virtuous.⁹⁷⁴ Generally, one party would seek forgiveness or reconciliation and the other (often the stronger party) would grant it.⁹⁷⁵ Reconciliation is often linked with friendship, which it is meant to achieve;⁹⁷⁶ some intellectuals opined that turning an enemy into a friend was a higher ideal than harming the enemy.⁹⁷⁷

967. Tannehill, *Acts*, 91.

968. Speaking of Moses as “saving” Israel or being its “redeemer” was, however, a natural enough extension (e.g., *Exod. Rab.* 1:22; 4:2).

969. Isaiah applies redemption language also to the new exodus (Isa 35:9; 41:14; 43:1, 14; 44:22–24; 51:11; 62:12; cf. Jer 31:11 [38:11 LXX]; 50:34 [27:34 LXX]).

970. Also visionary or other miraculous encounters in Acts 2:3; 16:9.

971. “In peace” (with or without the preposition) in the sense of security, wellness, or no hostility in Luke 2:29; 7:50; 8:48; 11:21; Acts 15:33; 16:36. In wish-prayer greetings, see Luke 10:5–6; perhaps 24:36.

972. E.g., Phil 4:3; Cic. *Att.* 1.3, 5, 10; Pliny *Ep.* 1.5.8; Philost. *Vit. Apoll.* 5.38; in politics, cf. Welborn, *Politics*, 70–71; some suggest it in 2 Cor 5:20, probably rightly (Särkiö, “Versöhnung”).

973. In personal rivalries, Marshall, *Enmity*, 42–43; in diplomacy, Fitzgerald, “Reconciliation,” 242–44 (following Breytenbach, *Versöhnung*; idem, “Versöhnung”).

974. Arius Did. *Epit.* 2.7.5b.2, pp. 16–17.16–17.

975. Fitzgerald, “Reconciliation,” 249 (citing Libanius [*Epistolary Styles*] 63; Gen 50:15–21; P.Mich. 8.502.7–8; Demet. [*Epistolary Types*] 12); see also Fitzgerald, “Reconciliation,” 256. For steps involving cities, see Dio Chrys. *Or.* 40.16, 23.

976. Fitzgerald, “Friendship,” 334–37; Fredrickson, “Hardships,” 187; e.g., Dio Chrys. *Or.* 38.11; 40.16. For this role in Paul, cf., e.g., Fryer, “Reconciliation”; Richards, *Letter Writing*, 203.

977. E.g., Dion. Hal. *Ant. rom.* 5.30.2; Diod. Sic. 21.21.9; Plut. *S. Sp.*, Ariston 1, *Mor.* 218A (Babbitt in the LCL note cites also Plato *Rep.* 1.9; *Crito* 10.49A ff.; *Gorgias* 469AB, 475BD); Hierocles *Love* 4.27.20 (in Malherbe, *Moral Exhortation*, 94); Iambl. *V.P.* 8.40; Diog. Laert. 8.1.23; Ps.-Phoc. 142; politically, cf. Suet. *Jul.* 73; Ps.-Callisth. *Alex.* 1.23.

The vocative use of “men” (ἄνδρες, Acts 7:26) is not a familiar LXX pentateuchal expression,⁹⁷⁸ but it appears twenty-nine times in Acts⁹⁷⁹ and is a standard Hellenistic rhetorical flourish (see comment on Acts 2:14). Moses reminds them they are brothers in 7:26; Moses went to see his brothers in Exod 2:11, and Joseph told his brothers not to quarrel with each other (Gen 45:24). Exodus 2:13 has one wronging the other; Stephen here seems to claim that each is wronging the other, perhaps to emphasize all Israel’s need or to portray Moses as a sage;⁹⁸⁰ but probably the language is simply not precise, as in Acts 7:27 it becomes clear that Stephen also regards one as wronging the other and the former protests to Moses (perhaps as Israel’s leaders opposed Jesus more than did the rest of Israel [13:27]).⁹⁸¹

Members of God’s people “repudiated” (ἀπώσατο) Moses (7:27; see also 7:39), as a synagogue audience might also do to Paul later in the book (13:46). In the demand “Who appointed you ruler?” “appointed” (κατέστησεν) links Moses here (and in 7:35) with Joseph, appointed over Egypt in 7:10, and probably also with Stephen’s own appointment in 6:3 (as a servant of Jesus, Luke 12:42). Luke may have also had this Exodus passage in mind when he wrote about Jesus asking who had “appointed him” as judge or ruler over his audience (Luke 12:14). The speech quotes exactly the words of the oppressor Israelite from Exod 2:14 LXX (though not completing his words), probably because the point here is emphatic, as is clarified further by its repetition in Acts 7:35.⁹⁸² The repetition of Moses’s rejection in 7:35 provides a literary *inclusio* around Moses’s revelation and commission from God and another prophet who would arise like him. Acts 7:28 is an exact quote from Exod 2:14 LXX.

The exodus narrative implies that only Israelites were witnesses to Moses killing the Egyptian, suggesting that it was an Israelite who betrayed this information to the Egyptians (Exod 2:12–15). Only one person directly challenges Moses in Acts 7:27,⁹⁸³ but even in Exodus this rejection prefigures many more rejections Moses will experience. The rejection of Moses was not an isolated instance in the Moses story but reflects a pattern that extended into repeated complaints in the wilderness (e.g., Exod 16:3; 17:3; Num 13:31–33; Jos. *Ant.* 3.13, 295–97, 307; 4.1, 14–63).⁹⁸⁴ After initial warnings, these rebellions often led to divine punishment (e.g., Num 11:33; 14:29, 37; Jos. *Ant.* 3.299, 311–14; 1 Cor 10:5–10), as rejection of Jesus would lead to Jerusalem’s demise (Luke 19:42–44; 21:22). It is not Stephen who rejects Moses (Acts 6:11); that precedent of rejection is followed by his accusers.

e. Moses the Alien (7:29–34)

Moses fled Egypt and apparently abandoned his desire to liberate his ungrateful people, only to be sent back there by God for this very purpose. Stephen

978. Though cf. 1 Esd 3:18, 24; 4:2, 14, 32, 34; 4 Macc 8:19; Jer 4:4; 19:3.

979. The only three additional NT references, all from the Pauline corpus, address husbands.

980. Some commentators (Conzelmann, *Acts*, 53; Johnson, *Acts*, 126–27) contrast Moses’s taking sides in Exod 2:14 (and *Jub.* 47:11) with his apparent neutrality here, comparing sages who were thought to bring peace (Dio Chrys. *Or.* 22, 38; 77/78; Lucian *Dem.* 9; Philost. *Vit. Apoll.* 1.15; 6.38).

981. Intervening between fighting brothers (*Sent. Syr. Men.* 133–38) or others (Prov 26:17) was not advised unless with good reason, especially if the contestants were one’s own friends (Diog. Laert. 1.87).

982. Though cf. also how closely *Jub.* 47:12 follows Exodus. *Exod. Rab.* 1:30 offers different reasons for rejecting Moses (such as his age or his association with Egypt). *Inclusio* (e.g., Ps 8:1, 9; Matt 5:3, 10; comment on Acts 28:30) can appear in narratives; see Hermog. *Inv.* 4.8.195; elsewhere in Luke-Acts, in Luke 15:24, 32.

983. Later tradition claimed that Dathan and Abiram were the ones who informed on Moses for killing the Egyptian (*Tg. Ps.-J.* on Num 16:26; Le Cornu, *Acts*, 352, cites *Exod. Rab.* 1:29).

984. Most ancient readers would probably have viewed negatively those who revolted because they underestimated a leader (e.g., Polyb. 5.41.1, where the ruler is young). Ancients censured revolt against good leaders (Balch, “Genre,” 14).

highlights this point: God revealed himself on “holy ground” outside both the “Holy Land” and the midst of his people to send his servant into foreign territory with his message.

I. THE FUGITIVE FATHER (7:29)

This verse continues the end of Exod 2:14, though no longer as an exact quote. Stephen’s omission of “feared” might be significant (cf. Heb 11:27); the change of ῥῆμα to λόγος is not significant. Perhaps slightly more significant is the change of ἀναχωρέω (ten times in Matthew but in Luke-Acts only at Acts 23:19; 26:31) to the more graphic verb φεύγω, which seems more amenable to Luke’s style (cf. Luke 3:7; 8:34; 21:21; Acts 27:30; a cognate applies to apostles fleeing persecution [Acts 14:6]; cf. a different cognate in Luke 21:36; Acts 16:27; 19:16).

Artapanus claims that Moses slew the assassin whom Pharaoh sent to kill him (Artapanus frg. 3 [Euseb. *P.E.* 9.27.18]). Josephus reports that Moses fled, but because the Egyptians were jealous of him (*Ant.* 2.256). Philo mentions both the killing and the plot against Moses (*Mos.* 1.43–46); Philo then treats “Moses’ exile as a kind of philosophical retreat” (1.47–48).⁹⁸⁵ Hebrews suggests that he fled *without* fear (Heb 11:27; contrast Exod 2:14). Later rabbis claimed that Pharaoh struck Moses with a sword but he proved invulnerable; that the sword slipped, killing the executioner instead; that his assailants struck an angel instead; or that Pharaoh’s counselors became blind and deaf, enabling his escape.⁹⁸⁶

“Settled in the land of Midian” is Luke’s paraphrase of Exod 2:15. Becoming “an alien” (πάρροικος) fits the theme of such alienation in Acts 7:6: one cannot depend on a particular land as a permanent home.⁹⁸⁷ The speech focuses on this section of Exodus because it allows the emphasis on Israel’s deliverer being rejected by his own people (perhaps also in part because Moses, like Joseph after his rejection, has some association with Gentiles).

Moses’s first son is born in Exod 2:22, and he has at least two by 4:20 (though only one circumcision appears in 4:25) and 18:5; explicitly, there are two in 18:3, 6; 1 Chr 23:15. Just as Joseph had two sons by an Egyptian wife (Gen 41:50; 46:27; 48:1), Moses in exile (because of fellow Israelites’ betrayal, as in Joseph’s case) intermarried, as did Timothy’s Diaspora mother (Acts 16:1–3).

After following a few verses closely, Luke skips the details between Moses’s flight and his revelation, except this one. Why does the text digress, of all things, to mention Moses’s two sons? This observation comes in a clause introduced by “where” (οὗ), connecting it closely with the location where this took place and thereby implying Moses’s interethnic marriage (Exod 2:21–22; cf. Num 12:1, though that woman is Nubian). This marriage and the bearing of two sons are not incidental to a theme of reversal in the Exodus account. When Moses left his role as a prince in Egypt,⁹⁸⁸ he married a Midianite priest’s daughter and named his first son for his stay in a foreign land (Exod 2:22). By contrast, when Joseph was exalted to the position of prince over Egypt, he married an Egyptian priest’s daughter and named his first son for God making him forget his homeland (Gen 41:51). Joseph probably ultimately had more than two sons (48:6), but Genesis

985. Johnson, *Acts*, 127, noting the parallel with the Therapeutae (Philo *Contempl.* 18–32).

986. *Exod. Rab.* 1:31; *Deut. Rab.* 2:26–27; *Song Rab.* 7:5, §1.

987. Moses was twice an alien—first, in Egypt, which was not his ancestral or promised land, and second, in Midian (Smith, “Refutation”).

988. I do not intend this in the sense of the modern fiction of a supreme role competing with the next pharaoh; pharaohs often had exceptionally large households, as was the case with both Seti and Ramses (Sarna, *Exodus*, 31).

mentions two (41:50; 46:27; 48:1, 9) who would become tribes in Israel (48:5); Moses had two sons in Exod 18:3, 6.⁹⁸⁹

Although this speech does not mention Joseph’s interethnic marriage, Stephen’s connection between Joseph and Moses suggests other potential connections that could be developed from the same story. These Diaspora, interethnic marriages by two of Israel’s greatest leaders challenged the ethnocentrism and geographic chauvinism of Stephen’s accusers.⁹⁹⁰ Luke *might* see here a foreshadowing of a justification for the Gentile mission: rejected by their own people, God’s agents could turn to the Gentiles until the fuller time of their own Jewish people came (Acts 13:46; 18:6; 28:28).

This parallel was one of the parallels that the Pentateuch drew between the Moses and Joseph stories, and the emphasis on the Gentile priests as the fathers-in-law is probably not coincidental. Although Genesis does not specifically report Aseneth’s father embracing Joseph’s God, elsewhere in pentateuchal narratives some Gentile priests glorified the God of Abraham and Moses:

Melchizedek (Gen 14)	Jethro (Exod 18)
Priest of God Most High (14:18)	Priest of Midian (18:1)
Brought bread and wine (14:18)	Fellowship meal (18:12)
Blessed be God, who helped you against your enemies (14:20)	Blessed be YHWH, who saved you from your enemies (18:10)

Although Stephen does not note this parallel, it is part of the literary and theological repertoire from which he could have drawn.

II. THE BURNING-BUSH THEOPHANY (7:30–31)

Forty years is necessary for a forty-year-old Moses (Acts 7:23, expressed in a parallel manner) to achieve his biblical age of eighty (Exod 7:7).⁹⁹¹ The appearance⁹⁹² of the angel “in the burning flame of the bush” recalls Exod 3:2 LXX closely, except that Stephen adds “in the desert of Mount Sinai,” a familiar LXX pentateuchal phrase,⁹⁹³ but not from this context. The addition is not unnatural but, given the summary’s economy for words, may be emphatic, underlining that a “holy place” (Acts 6:13; 7:33) will be outside the Holy Land. The appearance in Exodus might recall for its first readers Abraham’s encounter with God in Gen 15:17 (which mentions fire); in Acts, a connection with Abraham’s revelation may be strengthened by the proximity of his story (Acts 7:2–8), though Luke does not rehearse the specific account of Gen 15:12–21.

The “wilderness” is integral to the story, but it is possible that its mention provides a further challenge to a holy-land theology such as was articulated by Judean rabbis more than a century later: in the exceptional times when God spoke outside the Holy Land, it was in a pure place near water.⁹⁹⁴ These later rabbis had to specifically defend why God gave his law not in the Holy Land but in the desert (*Mek. Bah.* 5.92ff.; cf. Acts 7:33). More important, the pervasiveness of the wilderness in the rest of the story recalls a seminal period in Israel’s history but emphasizes the rebellion there

989. See fuller discussion of this in Keener, “Interethnic Marriages,” 30–33; idem, “Interracial Marriage,” 8; on Moses’s marriage more fully, 8–9; on Joseph’s, 6–7; cf. Samuel, “Acts of Philip,” 66.

990. Luke does not evoke the more negative cases (e.g., Deut 7:3; 1 Kgs 11:1–4; Ezra 9:1–4; 10:2–3); see discussion in the comment on Acts 16:1.

991. Cf. thirty-eight years in *Jub.* 48:1; Charles, *Jubilees*, lxxiv.

992. On ὄφθη here, see comment on Acts 7:2.

993. Exod 16:1; 19:1–2; Lev 7:38; Num 1:1, 19; 3:4, 14; 9:1, 5; 10:12; 26:61, 64; 33:15–16.

994. *Mek. Pisha* 1.63–64 (Lauterbach, 1:6), on Exod 12:1 (cited in Davies, *Paul*, 206n6).

(Acts 7:30, 36, 38, 42, 44; cf. 13:18).⁹⁹⁵ It may remind Luke's audience of the initial events of the promised new exodus in Luke 3:2, 4; 4:1 (cf. 5:16; 7:24; Acts 21:38).⁹⁹⁶ Though Exodus speaks of Horeb (Exod 3:1), "Sinai" (Acts 7:30, 38) is the more familiar name (Exod 16:1; 19:1–2, 11, 18, 20, 23; 24:16; 31:18; 34:2, 4, 29, 32).⁹⁹⁷

The angel of the Lord who appeared in the bush⁹⁹⁸ often spoke as God's representative in the OT.⁹⁹⁹ Later rabbis typically claimed that both God and the angel were in the bush,¹⁰⁰⁰ and later Christians often claimed the angel as a divine christophany, prefiguring the incarnate Christ,¹⁰⁰¹ perhaps inviting less rabbinic emphasis.¹⁰⁰² Artapanus apparently intensified the miraculous element in the story by replacing the burning bush with fire from the earth without any kindling material (frg. 3, Euseb. *P.E.* 9.27.21).

For Stephen's and Luke's audiences, such visionary reports were not simply irrelevant history; they were paradigmatic for their own era (Acts 2:17). In describing Moses's amazement at the sight (7:31), Stephen transposes Moses's description to himself in Exod 3:3 into third-person narration; from here forward, Luke regularly employs the term ὄραμα (from 3:3 LXX) for visions or dreams experienced by God's servants or Cornelius, who was about to become one (Acts 9:10, 12; 10:3, 17, 19; 11:5; 12:9; 16:9–10; 18:9). As Moses saw the Lord's glory (albeit without Luke using δόξα) in 7:30–31, Stephen saw it in 7:55.¹⁰⁰³ The mention of the Lord's voice coming to Moses follows paraphrases and abbreviates part of Exod 3:4.

995. Cf. Mauser, *Christ in Wilderness*, 68. Orators could praise or blame people on the basis of "their willingness to be ruled" (Parsons, *Acts*, 99, citing Men. Rhet. *Epideictica* 3.360.10; Dion. Hal. *Ant. rom.* 2.9.2; Jos. *Ant.* 4.186–90).

996. For proposed Lukan exodus allusions, see further O'Toole, *Acts* 26, 106. Many suggest that Jesus's "exodus" in Luke 9:31 may also evoke Israel's exodus or Isaiah's new exodus (e.g., Yoder, "Exodus"), though it can mean "death" more simply (Wis 7:6, contrasting εἴσοδος at birth). Bailey, "Song of Mary," finds allusions to Exod 15 in Mary's song in Luke 1:46–55.

997. "Sinai" appears more than thirty times in the OT, about twice as often as "Horeb"; only the former appears in the NT (Gal 4:24–25). The identification is clear, e.g., by comparing Exod 3:1, 12 and Deut 1:6 with Exod 19:11 (Bruce, *Acts*¹, 169).

998. Missing in *Jub.* 48:1–2; *L.A.B.* 10:1–2 (Johnson, *Acts*, 128); cf. *4 Ezra* 14:1, 3. Josephus and Philo add a few details about the "thornbush" (Jos. *Ant.* 2.266; Philo *Mos.* 1.65–66). On the burning bush, see Luke 20:37 (from Mark 12:26). Samaritans also recognized the angel of the Lord, who in later Samaritan liturgical texts appears as Kebal; but this title is from the "Glory of God" (Fossum, "Angel in Samaritanism"). The laurel was sacred to Apollo at Didyma (Burkert, *Religion*, 86); Clarke, "Spaces," 263, calls it a bush, but while it can be a shrub, the laurel tree can also grow quite tall. In rabbinic sources, some kinds of bushes could harbor spirits (*b. Pesah.* 111b). Moses's bush (Exod 3:2–4; Deut 33:16), twice mentioned here (Acts 7:30, 35), was known enough to be mentioned without explanation (Mark 12:26; Luke 20:37; Jos. *Ant.* 2.276; 3.62–63; *4 Ezra* 14:3; *1 Clem.* 17.5; cf. Philo *Flight* 161; *Dreams* 1.194; *Mos.* 1.65, 67) and could appear in revelatory scenes evoking it (*4 Ezra* 14:1); God chose the burning bush because it was lower (hence humbler) than trees (*b. Šabb.* 67a; *Soṭah* 5a).

999. He spoke for God, but cf. Joseph's agent speaking for him in Gen 43:19, 23; 44:10; cf. human agents as "angels" or "messengers" in 4Q377 2 II, 11; 4Q545 1 I, 8–9, 17–18. But God could also be identified with his angel more clearly (Gen 48:15–16).

1000. Rabbis associated God's presence with this angel (Le Cornu, *Acts*, 354), whom they often associated with Michael (355). Michael was the best-known angel (and one of only two biblically named angels); e.g., 1QM IX, 16; XVII, 6–7; 4QS29 1 I; *1 En.* 9:1; 10:11; 20:5; 24:6; 71:3, 8, 13; *2 En.* 22:6; 33:10; *3 En.* 17:3; 44:10; *Sib. Or.* 2.215; *3 Bar.* 11:2–15:1 passim; *L.A.E.* 25:2; *Apoc. Mos.* 3:2; *Test. Ab.* 1:13; 2:13–14; 7:11; 8:4, 12 A; 4:6 (the first among angels); 14:7 B; *Gen. Rab.* 44:13; *Tg. Ps.-J.* on Gen 32:25; *Test. Sol.* 1:7; PGM 1.301; *Jude* 9; *Rev* 12:7.

1001. See Barnard, *Justin Martyr*, 24. For Christ identified as an angel in some early Christian literature, see Juncker, "Christ as Angel"; Daniélou, *Theology*, 67, 117; Longenecker, *Christology*, 26ff; cf. perhaps Gal 4:14; 1 Thess 4:16. The practice was discontinued only in the fourth century because of exploitation by Arians (Daniélou, *Theology*, 117); cf. Ebionite use in *G. Eb.* frg. 6 (Epiph. *Her.* 30.16.4–5). For the Logos as the Lord's angel, see, e.g., Philo *Names* 87; *Flight* 5; *Dreams* 1.239.

1002. All three angels in Gen 18 were only angels in *Tg. Neof.* 1 on Gen 18:1; *Tg. Ps.-J.* on Gen 18:2.

1003. Interpreters naturally understood the flame with reference to the Lord's glory (e.g., *Tg. Neof.* 1 on Exod 3:1, 6). Ezek. *Trag. Exag.* 99 claims that the divine word (λόγος) shone to Moses from the bush (for a discussion of Alexandrian and others' Logos theology, see Keener, *John*, 339–47, 352).

III. GOD'S COMMISSION (7:32–34)

God first introduces himself (Acts 7:32), in a way that emphasizes continuity with his prior revelation (as in 7:2–16); then God announces that the ground where Moses stands is holy (7:33) and sends Moses to pagan Egypt, where God will save his people (7:34).

In 7:32–33, Stephen inverts the sequence of Exod 3:5–6, perhaps to place God's self-introduction first (Acts 7:32) for rhetorical purposes or for identifying the passage (Luke 20:37), possibly to draw attention to "holy place" in Acts 7:33 (though it is not clear how this move would do so, since it is not technically climactic); or perhaps the change is not significant. God here identifies himself to Moses in terms of his servants the patriarchs; soon, in another theophany, the Lord Jesus will identify himself to Saul in terms of his relationship with his servants (9:4).

In 7:32, Moses was afraid to look (recalling Exod 3:6 though not using the LXX words). This fits the traditional dangers of having seen God (Exod 33:20; Judg 6:22–23; 13:22–23); shortly after Stephen's speech in Luke's narrative, Paul looked and was struck blind (Acts 9:8). (Greek and Roman sources sometimes emphasized God's invisibility;¹⁰⁰⁴ more consistently, Palestinian Jewish tradition emphasized it,¹⁰⁰⁵ as did Diaspora Jewish writers.)¹⁰⁰⁶ Stephen's God is a God to be found not primarily in the institutions emphasized by his accusers but in dramatic theophanies and demonstrations of power through signs and wonders, just as in Jesus's movement (e.g., 2:2–4, 17–18, 43; 6:8).

Luke is not the only early Christian writer to use ἔντρομος for Moses's response to a Sinai theophany (Heb 12:21).¹⁰⁰⁷ Philosophers were supposed to remain unafraid,¹⁰⁰⁸ but Luke's hellenization goes only so far, though the LXX upgrades Moses's attitude here to εὐλαβεῖτο. Trembling was an appropriately humble or awestruck response to divine revelation.¹⁰⁰⁹

Luke changes "God of your father" (Exod 3:6, Amram) to "God of your fathers" (matching the following "Abraham, Isaac, and Jacob"); the latter expression appears only slightly more often than the former in the OT (about fifteen times versus twelve), though the former applied most often to patriarchs in Genesis, but the latter expression was on the whole perhaps more familiar.¹⁰¹⁰ Certainly in Luke-Acts, this is Luke's preferred style ("God of our fathers" in Acts 3:13; 5:30; 22:14; 24:14). "God of Abraham, Isaac, and Jacob" would have been extremely familiar, not only from the

1004. Greek views seem to have varied (cf., e.g., Xen. *Mem.* 1.4.9; Epict. *Diatr.* 1.6.19; Plut. *Isis* 9, *Mor.* 354D; *Isis* 75, *Mor.* 381B; Char. *Chaer.* 1.14.1; cf. Plut. *Isis* 78, *Mor.* 383A; Dio Cass. frg. 1.6.3; Hippol. *Her.* 1.16); for the danger of seeing deities, e.g., Callim. *Hymns* 5 (to the Baths of Pallas), lines 98–102, 111–16; some writers suggested that only the pure intellect could apprehend or "see" the divine (Max. Tyre 11.9–10). Cf. some analogous ideas of God's transcendence in traditional societies (Mbiti, *Religions*, 64).

1005. 1QS XI, 20; 2 *En.* 48:5; *'Abot R. Nat.* 2, 39 A; *Sipra VDDen.* pq. 2.2.3.2–3; *Tg. Ps.-J.* on Gen 16:13; *Tg. Neof.* 1 on Exod 33:23; *Tg. Onq.* on Exod 33:20, 23; see further Keener, *John*, 247–50, 423–24.

1006. E.g., Aristob. frg. 4 (Euseb. *P.E.* 13.13.5); *Orphica* long version 11–12; a line attributed to Euripides but possibly from a Jewish work, in Clem. Alex. *Strom.* 5.14.121.1–3; Euseb. *P.E.* 13.13.47; Philo *Names* 7; *Creation* 69; *Spec. Laws* 1.47; 2.165; *Sib. Or.* 3.12, 17; frg. 1, lines 8–11; Jos. *Ag. Ap.* 2.191; *Test. Ab.* 16:4 A; Rom 1:20; 1 Tim 1:17. Cf. the danger of beholding death in *Test. Ab.* 17:9–18:1 A; 13:15–14:5 B.

1007. This need not suggest direct borrowing, but it may be more than coincidence, reflecting a common retelling of the story.

1008. E.g., Mus. *Ruf.* 8, p. 66.10; Epict. *Diatr.* 3.2.9. Nevertheless, real speakers (Pliny *Ep.* 7.17.13; Lucian *Z. Rants* 41) and others might well tremble; it also could reflect indignation (Cic. *Verr.* 2.4.50.110) or mortal fear (Jdt 15:2; 1 Macc 13:2; 2 Macc 3:17).

1009. E.g., Dan 10:7, 11; cf. Savage, *Power*, 72–73.

1010. "God of our fathers" (never "our father") appears four times; "God of my father," four times, versus one "God of my fathers"; "God of his father[s]" is roughly even; but "God of their fathers" appears twenty times (and "God of their father" only once).

OT but from the first of the regularly recited Eighteen Benedictions.¹⁰¹¹ In Exod 32, in a scene partly inverting the revelation of Exod 3, God later is ready to destroy his people instead of delivering them; at that time, Moses reminds God of his promises to the patriarchs (Exod 32:13).

The quotation in Acts 7:33 is nearly identical to Exod 3:5 LXX (the change from λῦσαι to λῦσον is insignificant),¹⁰¹² with the slight possibility of influence from Josh 5:15 LXX (the only point at which it is closer than Exod 3:5, however, is the preposition ἐφ' versus Exodus's ἐν).¹⁰¹³ Others besides those familiar with the Exodus text would also understand the custom of some taking off footwear to respect a holy place.¹⁰¹⁴ Middle Eastern cultures remove sandals to signify respect or reverence; the removal of shoes before entering a mosque is a case in point.¹⁰¹⁵ Indeed, it could signify respect even for an honorable household. Servants would remove the shoes and wash the feet of a guest before escorting him to the banquet hall.¹⁰¹⁶ Sandals were normally made of leather, although other substances were also used;¹⁰¹⁷ see further comment on sandals at Acts 12:8; 13:25.

Stephen's emphasis in 7:33, as in much of the speech, is that God is not confined to Jerusalem's temple.¹⁰¹⁸ The "holy place" recalls the charge of 6:13 regarding the temple (as in 21:28; Matt 24:15; see comment on Acts 6:13).¹⁰¹⁹ The mentioning of God's plan to deliver his people (Acts 7:34) quotes much of Exod 3:7, plus lines from 3:8, 10.¹⁰²⁰ The mistreatment (κάκωσιν) of the people recalls that Pharaoh mistreated (ἐκάκωσεν) the people of Israel in Acts 7:19.¹⁰²¹ Exodus 3:7's "cry" (κραυγῆς) becomes "groan" (στεναγμοῦ) in view of the groaning of his people that God heard in Exod 2:24; 6:5 (the quotation suggests composite allusions to the context).¹⁰²² Acts 7:34 condenses much of the content of Exod 3:7–8 into three parallel statements of God's activity: he has seen, heard, and come down to deliver them.¹⁰²³ A midrashic reading

1011. For which see, e.g., Oesterley, *Liturgy*, 60. It was borrowed into Christian liturgy as well (*Apost. Const.* 7.33.2).

1012. "Loosing the sandals" of the Messiah (Luke 3:16; Acts 13:25) may be unrelated (both sandal passages are in Luke's tradition; cf. Acts 12:8), but C. Williams, *Acts*, 108, suggests a contrast: whereas Moses was reverencing God, John was reverencing Jesus.

1013. Cf. also Richard, *Composition*, 98.

1014. E.g., Iambl. *V.P.* 18.85; 23.105; *m. Ber.* 9:15; *Sipre Deut.* 258.2.2; *b. Ber.* 62b; cf. further Barrett, *Acts*, 361–62. Pallbearers did this as a sign of mourning during funeral processions (Safrai, "Home," 778, citing *y. Ber.* 3, 6b; *Naz.* 7, 56c; *Gen. Rab.* 96).

1015. Abbott, *Acts*, 87.

1016. Smith, *Symposium*, 27 (citing Plato *Symp.* 175A). This act would also prove more comfortable for the guest, however.

1017. See Le Cornu, *Acts*, 728.

1018. As has often been noted, e.g., Abbott, *Acts*, 87; R. Williams, *Acts*, 72; Fitzmyer, *Acts*, 378.

1019. In the Greek of Acts 7:33, "holy" is feminine because it directly modifies "ground." Sacred mountains (cf. *Jub.* 4:26; *1 En.* 18:8; 24:2; 77:4; Heb 12:22; *Tg. Ps.-J.* on Gen 2:7, 15; 3:23; 27:27) appear also in Greek (cf., e.g., Ovid *Metam.* 1.212; Iambl. *V.P.* 3.15) and Canaanite (Albright, *Biblical Period*, 22) tradition.

1020. The phrase ἰδὼν εἶδον, following the LXX, renders an emphatic Hebrew construction in Exod 3:7; ἀποστείλω also derives from the LXX and is a "futuristic use of subjunctive" (Bruce, *Acts*¹, 171). Neh 9:9 (2 Esd 19:9; Soards, *Speeches*, 149) summarizes the same passage but less closely.

1021. The νῦν δεῦρω combination is familiar Koine (Gen 31:44; Num 22:6, 11; 1 Kgs 1:12; 2 Kgs 7:9; Neh 6:7; cf. Num 24:14); "into Egypt" may come from the later commission in Exod 4:19 (cf. 4:20, 21). God's promise of deliverance in Exod 3:4–10 might parallel his heavenly voice of deliverance for the promised seed in Gen 22:11.

1022. Paul used this noun and its verb cognate in a new-exodus context (Rom 8:23, 26, probably playing on Exod 2:23 as well as birth pangs). The cries of God's people may precede redemption also in Luke-Acts (Luke 2:37–38; cf. 1:10, 13), followed by a rejected deliverer (though it would be different at the second coming, Luke 21:28, 36).

1023. For God earlier "coming down" in the world of Exodus's audience (before Exod 3:8), see Gen 11:5, 7 (on which see comment at Acts 2:5–13); within Exodus, he also comes down on Sinai (Exod 19:11, 18,

might connect God seeing his people here with God seeing their disobedience in Exod 32:9 (which uses “this people” rather than “my people” in the context of God calling them Moses’s people; cf. 32:7, 11). Stephen will soon mine that context (Acts 7:41). Because a long elapse of time (here forty years, Acts 7:30) sometimes barred prosecution,¹⁰²⁴ Moses’s past offense may now be viewed as forgotten.

Given the comparison between Jesus and Moses in the context (7:37), Luke may link Moses’s call vision with that of Jesus (Luke 3:21–22)¹⁰²⁵ and certainly, soon after, with Paul’s (Acts 9:4–16). For “deliver,” see comment on Acts 7:10. Luke often employs ἀποστέλλω for divine sending, whether for Jesus (Acts 3:20, 26; Luke 4:18, 43; 9:48), John (Luke 7:27), angels (1:19, 26), prophets (13:34; 20:10), Paul (Acts 22:21; 26:17), the Spirit (Luke 24:49), those sent by visions (Ananias in Acts 9:17; Cornelius’s agents in 10:20), the saving message (10:36; 28:28), or, here repeated twice, Moses (7:34–35).

f. Moses, Prototype of the Rejected Deliverer (7:35–43)

God sent the rejected one as deliverer (7:35), with signs and wonders (7:36); Scripture employed Moses as the pattern for one understood to be the ultimate deliverer (7:37). If Stephen was accused of undermining the law, he merely preached the promised successor to the true lawgiver. Moses had God’s living message (7:38), but he was rejected by his people (7:39), whose hearts never came out of ancient Egypt’s paganism (7:40–42). By implication, the prophet like Moses would be a rejected deliverer who might also return and deliver in an unexpected way.

I. REITERATING MOSES’S REJECTION (7:35)

This verse recalls 7:27, emphasizing it and framing Moses’s call with his rejection. (Repeating a statement several times underlined it for rhetorical effect [e.g., Cic. *Quinct.* 16.52–53].) “This Moses” (Acts 7:35), derived from the Scripture quotation in 7:40 (Exod 32:1, 23), probably recalls for the reader the recent and specifically Lukan expression “this Jesus” (Acts 1:11; 2:32, 36; also 9:22; 17:3).¹⁰²⁶ Like a powerful rhetorician, Stephen hammers home his point that the very one whom Israel rejected was the deliverer whom God appointed for them: “*This* [τοῦτον] Moses whom they disowned . . . *this* [τοῦτον] is the one God sent to be your ruler and deliverer” (7:35); “this one [οὗτος] led them forth” (7:36); “this one [οὗτος] is the prophesied prototype of the prophetic deliverer” (7:37); “this one [οὗτος] who mediated God’s own message” (7:38).¹⁰²⁷ Those hearing the speech in Greek would not miss Stephen’s (hence Luke’s) emphasis here.¹⁰²⁸ “This Moses” is not only the

20; cf. 24:16; 34:5). Luke applies the same common Greek verb to the Spirit’s descent (Luke 3:22), a sheet descending from heaven (Acts 11:5), or misinformed belief that deities have descended (14:11), but there is no evidence that Luke makes deliberate use of this language from Exodus in those places.

1024. E.g., Hermog. *Issues* 44.10–12. Cf. discussion of analogies to a “statute of limitations” in comment on Acts 28:30–31.

1025. C. Williams, *Acts*, 108. But Luke’s language, unlike Mark’s (Mark 1:10), is not clearly visionary. Would some have read his language in light of the story known from Mark?

1026. With Johnson, *Acts*, 27. The expression appears with Jesus only in Acts in the NT.

1027. Other scholars also noted the repetition of “this” (Gaventa, *Acts*, 126–27). On anaphora (repeatedly starting with the same term), see, e.g., Mus. Ruf. 14, p. 92.35–36 (repeating the same verb at the beginning of three successive clauses); Black, “Oration at Olivet,” 86 (noting *Rhet. Her.* 4.13.19); Rowe, “Style,” 131; Porter, “Paul and Letters,” 579; Lee, “Translations: Greek,” 779 (noting Prov 13:9; Job 28:23–24); cf. Demet. *Style* 5.268. That the opening instances differ from the others (shifting from the accusative to the nominative case) would not ruin the rhetoric (polyptoton, too, was a rhetorical device; Rowe, “Style,” 132–33, citing Hdn. *On Figures* [RG 3:97, line 10]; Cic. *Clu.* 60.167).

1028. Ironically, the later Passover haggadah may play down Moses’s role (Henshke, “Haggadah”; Avioz, “Moses”; cf. John 6:32), but the abundance of Moses haggadah in early Jewish literature warns against pressing

one whom God called, but also the one who had *not* made himself anything; the context in Exodus (after 3:10, some of which Stephen has just paraphrased) goes on to narrate Moses's protests against God's calling (Exod 3:11; 4:1, 10, 13; cf. 3:13).

The expression that the Israelites "denied" Moses does not specifically echo the LXX¹⁰²⁹ but relates to Israel's denial of Jesus (3:13–14; cf. 4:16),¹⁰³⁰ and it was standard early Christian language for repudiating faith (Luke 12:9; 22:57; John 13:38; 2 Tim 3:5; Titus 1:16; 2 Pet 2:1; 1 John 2:22–23; Jude 4; Rev 2:13; 3:8) or perhaps renouncing privileges (Moses in Heb 11:24). They repudiated Moses as "ruler and judge"; God, by contrast, made him "ruler" (chain parallelism?) and "redeemer."¹⁰³¹ Although Stephen's audience in the story world may not yet catch the connections with Jesus, they would be obvious to Luke's informed audience (see Acts 5:31).¹⁰³² Stephen must emphasize the angel's help (7:35, 38; see comment on Acts 7:38–40) because Moses, for all his significance as a prototype, was not Jesus, one exalted to God's right hand (7:55–56).

II. AN EXODUS WITH SIGNS (7:36)

Some Romans knew of the exodus from a later, Egyptian version, in which Egypt's king removed the Hebrews because they were "hateful to the gods" and caused a plague (Tac. *Hist.* 5.3). Luke, however, assumes his implied audience's knowledge of the earlier, biblical version of the account. This verse closely recalls Exod 15:22. Moses¹⁰³³ "led" Israel (15:22) as he had his flock (3:1) (though those verses do not have ἐξήγαγεν but instead ἦγαγεν). The forty years could recall Exod 16:35, but if it implies an allusion to Israel's guilt and unbelief, it alludes to Num 14:34; 32:13 (or the faithfulness of God's leading and provision, Deut 2:7; 8:4; 29:5).

Exodus also links the "signs" in Egypt with those in the sea.¹⁰³⁴ The "Red Sea" designation reflects the LXX¹⁰³⁵ and most subsequent sources (Heb 11:29; Philo *Mos.* 1.165; 2.1; 1 *Clem.* 51.5), though they apparently understood this as the Persian Gulf (1 QapGen XXI, 17–18; Jos. *Ant.* 1.39).¹⁰³⁶ Greeks used the phrase for "all eastern waters," including the Red Sea, the Persian Gulf, and even the Indian Ocean.¹⁰³⁷

The final deliverer who would be like Moses (cf. Acts 7:37) could be expected to perform signs as Moses did (cf. 7:36). The conjunction of "signs and wonders" almost

it into the background here. Some scholars date many elements of the Pesach haggadah to the period between the second temple's destruction and the Mishnah (Kulp, "Origins"; Hauptman, "Haggadah"); others emphasize its final medieval form (Leonhard, "Älteste Haggada"; cf. Carmichael, "Haggadah," 343, though supporting earlier tradition); in any case, it is post-NT (Safrai, "Religion," 809; Manns, "Pâque"; Stemberger, "Pesachhaggada"; pace Finkelstein, "Documents"; Wright, "Midrash," 417).

1029. It appears only in Gen 18:15; 4 Macc 8:7; 10:15; 12:27; 16:16; 17:9.

1030. Cf. Jesus's twofold title in Acts 3:14 and title as founding prince in 3:15.

1031. Only here in the NT; in the LXX, never of Moses (Lev 25:31–32; God in Pss 19:14; 78:35; see comment on Acts 7:25); for the judges, the LXX uses σωτήρ in Judg 3:9, 15; Neh 9:27, though it employs this title more commonly for God. As redeemer, Moses foreshadowed the eschatological redemption (Luke 1:68; 2:38) through Jesus (24:21).

1032. E.g., Cribbs, "Agreements," 55. Other possible echoes are less significant for this point: God "sent" Moses (familiar language from the LXX and early Judaism) with "the hand of the angel" (perhaps Exod 23:20 LXX, where God sends an angel); the angel "appeared in the bush" (Exod 3:2–4).

1033. "This man" continues the description of Acts 7:35 (cf. Haenchen, *Acts*, 283; Exod 10:7; very common in Lukan style).

1034. *Bela'* appears in both the serpent confrontation (Exod 7:12) and the sea (15:12), bounding the plagues, and the staff is used in both (7:9–10; 14:16, 26; see Currid, *Egypt*, 85).

1035. Exod 13:18; 15:4, 22; Deut 11:4; Josh 2:10; 4:23; 24:6; Judg 11:16; Neh 9:9; Pss 106:7–9, 22 (105:7–9, 22 LXX); 136:13, 15 (135:13, 15); Jdt 5:12–13; Wis 10:18; 19:7; 1 Macc 4:9.

1036. Fitzmyer, *Acts*, 379. In earliest tradition it was more likely "a marshy region of the eastern Delta" or "any marshy lakes in the Isthmus of Suez" (Hoffmeier, *Israel in Egypt*, 214–15; see further 199–22). The moist climate of the Nile Delta virtually obliterated documents from this area, limiting our external controls on researching the biblical exodus narrative (cf. Kitchen, *Reliability*, 246, 255).

1037. Warmington and Salles, "Red Sea."

explicitly evokes the exodus narrative, as throughout the biblical literature (Exod 7:3; Deut 4:34; 6:22; 7:19; 26:8; 29:3; 34:11; Neh 9:10;¹⁰³⁸ Pss 78:43 [77:43 LXX]; 105:27 [104:27]; 135:9 [134:9]; Jer 32:20–21 [39:20–21]; Bar 2:11; Wis 10:16) and sometimes Jewish tradition dependent on it (*Jub.* 48:4).¹⁰³⁹ It also applies, however, to signs performed by Jesus (Acts 2:22), the Twelve (2:43; 4:30; 5:12), Stephen (6:8), and Paul (14:3; 15:12). (This may be why works that Exod 7:3 attributes to God are applied more loosely to Moses here, as in the wording of Ps 105:27.)¹⁰⁴⁰ Those resisting Stephen's message should notice the pattern, for Stephen and Jesus worked signs as Moses did.

The "forty years" recalls Israel's extensive sojourn in the wilderness (Acts 7:42; 13:18), a delay occasioned by sin, which lengthened what should have been an eleven days' journey (Deut 1:2; cf. the observation of *Tg. Neof.* 1 on Deut 1:2). But if disobedience merely delayed and did not prevent God's purposes for Israel in Moses's day, neither would it ultimately thwart God's purposes for Israel through Jesus (Acts 3:19–21).¹⁰⁴¹

III. THE PROPHET LIKE MOSES (7:37)

Luke apparently adapts the LXX, especially by moving "like me" to a more emphatic position at the end of the sentence, underlining the continuity with Moses here.¹⁰⁴² Some scholars have contended that the idea of a messianic figure being like a new Moses is a purely Samaritan idea, reflecting this speech's Samaritan roots.¹⁰⁴³ This passage was certainly important in Samaritan expectation; the Samaritan Pentateuch placed Deut 18:18 near the Ten Commandments in Exod 20.¹⁰⁴⁴

But that the idea was ever uniquely Samaritan should be doubted unless some elements of Jewish theology previously borrowed it from the Samaritans. A Qumran text (4Q175 I, 5–10) links it with at least one messianic text (Num 24:15–17).¹⁰⁴⁵ (See at length comment on Acts 3:22.)¹⁰⁴⁶ Indeed, Moses parallels in the Joshua and Elijah narratives suggest that already in ancient Israel Moses had become in some ways a paradigmatic prophet. Even had there been no such ideas in the milieu or (more likely) had early Christians not known them, early Christians would surely have noticed this text in their Bibles and found it useful for their purposes. Only a limited number of texts lent themselves to such uses.

In what ways would the final Moses be like the first one?¹⁰⁴⁷ Although Stephen mentions signs (Acts 7:36) and other connections, the most prominent connection,

1038. Soards, *Speeches*, 149, emphasizes 2 Esd 19:10 (= Neh 9:10) because of the chain of parallels he finds with this passage (not all equally convincing, since Neh 9 also echoes Exodus).

1039. Elsewhere in the OT or the LXX, only Isa 8:18; 20:3 (relating to Egypt but in a different period); Dan 4:2–3; 6:27; Esth 10:9 LXX; Wis 8:8. Without the full formula, cf. Exod 4:21; 11:9; Num 14:22; Deut 11:3; Josh 24:17; Pss 78:12; 106:7; Philo *Mos.* 1.91.

1040. So Conzelmann, *Acts*, 54 (citing also *Jos. Ant.* 2.276).

1041. Paul also speaks of Israel's disobedience as delaying the consummation in his own day, but he attributes this disobedience to God's sovereign purpose of allowing a delay for the Gentile mission to be fulfilled (Rom 11:11–27).

1042. Kilgallen, *Speech*, 78.

1043. Simon, *Stephen and Hellenists*, 61; Scharlemann, *Stephen*, 73. Cf. comments in Longenecker, *Christology*, 34.

1044. Bowman, *Documents*, 21.

1045. For discussion, see Gaster, *Scriptures*, 444–46; Brooke, "4Q175." Xeravits, "Moses Redivivus," even thinks it implied in 11QMelch II, 15–21. As Marshall, "Acts," 563, notes, the citation is closer to Deut 18:15 than to 18:18.

1046. As Borgman, *Way*, 292, notes, Acts 7:37 evokes the new-Moses theme already found in Peter's speech.

1047. The use of $\omega\varsigma$ suits a simile here (cf. Acts 11:5; with $\omega\sigma\epsilon\acute{\iota}$, 2:3); similes were recognized in ancient rhetoric (Fronto *Ad M. Caes.* 3.8.2; Anderson, *Glossary*, 38).

which applies also to Joseph, is the idea of a deliverer rejected by his own people (7:51–52).¹⁰⁴⁸ Jesus's rejection was no complete surprise, no failure in God's plan, but rather fulfilled Scripture (13:27; cf. Isa 53:1–4). We should recall that ancient writers did not believe that they were creating such parallels from whole cloth, but that they found in such historical patterns evidence of divine design (e.g., Plut. *Demosth.* 3.2; see the commentary introduction).¹⁰⁴⁹

Some scholars argue that the lack of extensive parallels with Moses in the Gospel suggests that the new-Moses traditions in Acts 3:22 and 7:22 stem from pre-Lukan sources.¹⁰⁵⁰ Whether or not they stem from pre-Lukan sources, Luke makes much of the idea in Acts 7 (and something of it in 3:22); it is Lukan even if it may also be pre-Lukan. (That he makes comparatively little of this analogy in his Gospel might simply suggest his greater historical restraint there than here.)

IV. PREFERRING EGYPT'S IDOLS TO MOSES'S LAW (7:38–40)

Moses brought Israel the very oracles that Stephen now stood falsely accused of repudiating, yet it was Israel—those whose traditions Stephen's accusers now leveled against the prophetic figure Stephen—that had, from the start, repudiated Moses's message, preferring the ways and idols of Egypt. Using the consensus of God's people as the standard for interpreting God's word, rather than God's word as the standard for evaluating the faithfulness of God's people, could thus prove a dangerous enterprise (when the consensus departed from Scripture). Stephen's appeal to Scripture in a way that violated consensus ought not, therefore, to be dismissed; he is in any case clearly not against the law (6:13–14).

Various Jewish traditions amplified Moses's mediatorial role (Philo *Mos.* 2.166);¹⁰⁵¹ this might be a way, as in Acts 7:53, of glorifying the law's value.¹⁰⁵² But more clearly and critically, it furthers the parallel between Moses and Christ. Moses "received oracles"¹⁰⁵³ for Israel; Christ "received" (though a different term) the promise of the Spirit for his followers (2:33). The mention of "living" oracles¹⁰⁵⁴ might emphasize divine reality against the mere letter; "living" was often a description of God. ("Living God" contrasted especially with idols [see comment on Acts 14:15], relevant in the following context here.)

Jewish tradition elaborated Moses's ascent to receive the law (see also comment on Acts 2:33). Moses ascended higher than the sun and moon (*L.A.B.* 12:1). Angels

1048. On Jesus's death as fulfilling some rejected-prophet motifs, cf., e.g., Cunningham, *Many Tribulations*, 339.

1049. See discussion in Keener, *Acts*, 1:561–74. Anecdotally, I may note (in addition to anecdotes in *ibid.*, 566) that while narrating my wife's story and deleting much material for lack of space, we preserved the earlier elements that we saw could foreshadow later ones. In so doing, we had narrative cohesiveness in mind, but we did not invent any of the elements.

1050. E.g., Aune, *Prophecy*, 155; see comment on Acts 3:22.

1051. Johnson, *Acts*, 130 (citing also Tannaitic tradition). Such mediation is clear in *b. Ned.* 38a (R. Jose b. Hanina), where God gave the law only to Moses but he shared it with Israel. Cf. Greeks claiming laws from the gods (Plato *Laws* 1.624A; Aphth. *Progymn.* 14, "On Introduction of a Law," 53S, 47R); "godlike" lawgivers (Mus. Ruf. 15, p. 96.24); ideal lawgivers who were of divine parentage (Lucian *Anach.* 39) or spoke directly for the gods (cf. Pythagoras's "law" to his followers in Philost. *Vit. Apoll.* 1.1), though the more mundane conception was more common (cf. MacDowell, "Nomothetai"). Qumran apparently envisioned prophets beyond Moses as lawgivers (Jassen, "Presentation," esp. 335).

1052. So Kilgallen, *Speech*, 82–83.

1053. The term often applies to Scripture (e.g., Ps 119 [118 LXX]:11, 38, 41, 50, 58, 67, 76, 82, 103, 116, 123, 133, 140, 148, 158, 162, 169, 170, 172; Wis 16:11; Rom 3:2; Heb 5:12; *1 Clem.* 53.1) as well as continuing prophecy (1 Pet 4:11; Jesus's sayings in Ign. *Phil.* 7.1; Papias frg. 3.1, 15–16; 5.1; 6.1).

1054. Cf. life-giving oracles in Ps 118:50, 116 LXX (119:50, 116 ET); John 6:63; cf. words of the living God in Jer 23:36.

tried to prevent Moses's ascent to heaven to receive Torah, but God gave him success (*b. Šabb.* 88b).¹⁰⁵⁵ His ascent may have even divinized him in some Hellenistic Jewish interpretations (Aristob. *fig.* 4).¹⁰⁵⁶ Stephen gives this ascent no attention (contrast perhaps Acts 2:33).¹⁰⁵⁷

The LXX often translates *qahal* as συναγωγή but sometimes also as ἐκκλησία (as here, 7:38);¹⁰⁵⁸ Luke's description of the "congregation" of Israel thus fits the LXX (and secular usage, 19:32). But for Luke's audience, it may also connect the congregation in the wilderness with the church; Moses was with the first church (cf. 5:11; 8:3; 9:31).¹⁰⁵⁹ Scholars often note that the Qumran scrolls speak of God's "congregation."¹⁰⁶⁰

Exodus does not mention an angel involved in the giving of the law on Mount Sinai (Acts 7:38; though one is promised for the future in Exod 32:34; 33:2), but it might be inferred midrashically from the previous experience on Sinai (Exod 3:2) or the many angels at the revelation of the law in Deut 33:2 LXX.¹⁰⁶¹

Israel's "unwillingness" (Acts 7:39) might reflect Deut 1:26 but is probably simply Luke's own language.¹⁰⁶² Israel's disobedience in the wilderness is portrayed no less harshly in CD III, 6–12.¹⁰⁶³ Hebrews 3:7–11 also emphasizes the people of Israel's disobedience during their formative period in the wilderness (though Hebrews emphasizes a heavenly tabernacle rather than the defilement of the earthly one as here; Heb 8:2; 9:11–12, 23–24). Israel's continuing disobedience will climax Stephen's speech (Acts 7:53; cf. Luke 16:29–31). The rejection of the prophets (also Luke 11:47–49; 13:34) offers a paradigm for what Jesus (11:50; 13:33–34) and his followers (6:23; 11:49) should anticipate (see comment on Acts 7:52).

People's interior faith becomes an important issue in the speech. On "their hearts," compare the Jewish notion of the heart's intention, a notion apparently emphasized in at least Pharisaic circles (it is unknown whether the Sadducees or most Hellenists emphasized this).¹⁰⁶⁴ The same concept appears at Acts 7:51; the context includes others with evil hearts (5:3–4; 8:21–22), including Stephen's enemies (7:54); contrast Moses's heart in 7:23.

1055. In later versions, angels also sought to slay Moses on his descent afterward (*Exod. Rab.* 42:4); Moses battled various giant angels to receive Torah and escaped the river of fire (*Pesiq. Rab.* 20:4; cf. Greek *Phlegethon*). Cf. also the legions of angels in 3 *En.* 15B:2 (appendix in *OTP* 1:303).

1056. Second century B.C.E., in Euseb. *P.E.* 13.13.5; but it is possible that the divine splendor refers to God. Cf. Scott, "Ascent," 448–50; Fletcher-Louis, "4Q374."

1057. Cf. probable Johannine polemic against this tradition or its abuse in John 3:11–13; see discussion in Aune, *Cultic Setting*, 91; Nicholson, *Death*, 98; Petersen, *Sociology*, 5; Keener, *John*, 562–63; esp. Meeks, *Prophet-King*, 295–97.

1058. New Testament scholars regularly note the connection between *qahal* and ἐκκλησία (e.g., Bultmann, *Theology*, 1:38; Foakes-Jackson and Lake, "Development," 327–28; Lake and Cadbury, *Commentary*, 54; Richardson, *Theology*, 285; Davies and Allison, *Matthew*, 2:629).

1059. See Dunn, *Acts*, 95 (citing Deut 9:10; 18:16; 23:1).

1060. Using *qahal*, Albright and Mann, *Matthew*, 121; Brown, Donfried, and Reumann, *Peter*, 92; Harrington, *Matthew*, 29; using *dt*, Pike, "Congregation." This is true even though some individual instances of "congregation" terminology may be disputed (as in Golb, "Qadmoniot," on *yhd*).

1061. The LXX removes an angel (reading "presence" as a substitution for the angel) in the exodus summary of Isa 63:9 (Bruce, *Acts*¹, 172); in Deut 33:2, it makes angels explicit where Jewish readers would probably infer them; cf. their agency in Jos. *Ant.* 15.136. Angels at Sinai are a prominent legend in the later rabbis (see comment on Acts 7:53).

1062. Soards, *Speeches*, 151, emphasizes the idea in 2 Esd 19:16–17. Later sources continued to recount their refusal to enter the land, leading to forty years of wandering (e.g., Qur'an 5:24–25).

1063. Johnson, *Acts*, 130. Josephus also appears to highlight Israel's rebellion against Moses (see Damgaard, "Brothers," suggesting that Josephus parallels Moses with himself; if correct, this could offer a partial analogy to Luke paralleling Moses to Jesus).

1064. See, e.g., *m. 'Ab.* 2:9; *b. Ber.* 13a; rabbinic discussions of *kavanah*, on which see Bonsirven, *Judaism*, 95; Montefiore and Loewe, *Anthology*, 272–94; Pawlikowski, "Pharisees"; cf. also Jos. *Ag. Ap.* 2.183, 217 in Vermes, *Religion*, 32.

So unattached and ungrateful were the people that not long after Moses had left them, they wanted an animal idol (7:40); Stephen might have argued that if this was the case after a few weeks of Moses's absence, how much more in later generations? How did an animal idol mean turning back to Egypt? As noted in more detail below, Egypt was known for its animal deities, including cow deities.¹⁰⁶⁵ Well before (and after) Stephen's day, northern Mediterranean polytheists often derided Egyptians for their animal images (see discussion below). The request for "gods" (plural) reflects the LXX (and is a possible way to read the Hebrew *elohim*).

V. ISRAEL'S IDOLATRY IN THE WILDERNESS (7:41–43)

Part of Israel's repudiation of Moses was in asking for an Egyptian-type animal deity as soon as he went missing (7:40);¹⁰⁶⁶ Stephen here develops this theme of Israel's idolatry in the wilderness, making special use of an earlier interpretation of the wilderness by the prophet Amos (7:42–43). Luke recalls that Israel could mix idolatry with divine worship, just as God calls Gentiles to turn from idols (14:15; 17:29–30); such reminders feed into his emphasis on the Gentile mission, since God is no respecter of persons (10:34–36; cf. Luke 3:6, 8).

In Acts 7:41, Stephen develops Exod 32:4 LXX, but the wording is specifically calculated for the point he will make; whereas the LXX makes "calf" (μόσχος) the object of the verb "make" (ποιέω), here Stephen coins a new term, "to calf-make" (μοσχοποιέω, so far attested only in Christian literature; so BDAG), rhetorically implying the weight of a deed worthy to have its own designation thereafter. (This may reflect the repetition of the conjunction of the two terms in Exod 32:4, 8, 20, 35.)¹⁰⁶⁷ Word coinage could be used for emphasis.¹⁰⁶⁸ Further, ἐμοσχοποίησαν . . . τῶν χειρῶν prepares the reader for what is to come (χειροποιήτοις in Acts 7:48).¹⁰⁶⁹ That term was normally applied to idols in the LXX, emphasizing the foolishness of worshiping what humans create (e.g., Lev 26:1, 30); subsequent Jewish writers also applied this language to the folly of idolatry (e.g., *Sib. Or.* 3.606, 618, 722–23; see more fully comment on Acts 7:48). A major feature of anti-idolatry polemic was the reminder that idolaters worshiped what they had made, not the one who had made them (Ps 115:4–8; Isa 40:18–20 [with 40:21–23]; 46:6–7; Jer 1:16).¹⁰⁷⁰

When Stephen mentions the idolatrous "works of their hands" (Acts 7:41),¹⁰⁷¹ however, he is already thinking ahead to 7:48 (which readers accustomed to using *gezerah shevah*, the linking of key terms, would especially quickly connect to this verse): God

1065. For Egyptian bovine deities, see, e.g., Currid, *Egypt*, 111; closer to Luke's period, Lewis, *Life*, 94.

1066. *Lev. Rab.* 22:8 suggests that Israel had served idols already in Egypt. This is a logical inference; the Sinaitic inscriptions probably suggest that many Semitic slaves worshiped Canaanite deities, partly blended with Egyptian deities (Albright, *Biblical Period*, 13; cf. Aharoni, *Archaeology*, 146).

1067. Cf. Deut 9:21; Neh 9:18; Ps 106:19; Hos 13:2; of Jeroboam's calves in 2 Chr 11:15; 13:8. Luke's own style is also present; a calf, "slay," and "rejoice" all appear in Luke 15:23, though not, as here, in connection with idolatry (rather, implying a banquet provided by God, as in the context; Luke 14:12–24).

1068. E.g., Fronto *Ad M. Caes.* 3.13.1. Except for emphasis, it was better to avoid word coinage (Fronto *Eloq.* 1.4; Rowe, "Style," 123).

1069. The compound ἐμοσχοποίησαν seems a graphic creation from ἐποίησεν (an almost identical-sounding form of the verb) and μόσχον in Exod 32:4 (the compound followed by Justin *Dial.* 19, 73, 102, 132; Bruce, *Acts*¹, 173), meant to highlight the compound employing the same verb root in Acts 7:48.

1070. Sometimes Gentile thinkers likewise critiqued the folly of worshiping one's artwork (Lucian *Sacr.* 11).

1071. "Works of hands" suited idolatry (Deut 4:28; 27:15; 31:29; 1 Kgs 16:7; 2 Kgs 19:11; 22:17; 2 Chr 32:19; 34:25; Isa 2:8; 37:19; Jer 1:16; 25:6; 44:8 [51:8 LXX]; Bar 6:51; Wis 13:10; Rev 9:20), though the work of one's hands also connoted labor (e.g., Gen 5:29; Deut 2:7; 24:19; Jdt 13:4; cf. Artem. *Oneir.* 1.42), like God's creation (Ps 8:6 [8:7 LXX]; 102:25 [101:26]; Heb 1:10; *Barn.* 5.10; 15.3). Joy should be at the work of God's hands (Ps 92:4 [91:5 LXX]); the rejoicing here probably alludes to the "playing" and singing of Exod 32:6, 18.

does not dwell in temples made with hands, which means that God's people could make an idol even of their temple (7:43). Stephen may likewise omit discussion of Israel's sexual immorality on that occasion (in contrast to Wis 14:12–27; 1 Cor 10:7–8) to highlight its idolatry in particular.¹⁰⁷²

Although some of Israel's neighbors employed bulls as throne pedestals for deities during the monarchy period,¹⁰⁷³ first-century readers would view calf worship especially in terms of Egyptian worship of gods wholly or partly in the form of animals.¹⁰⁷⁴ (This is especially relevant in view of the speakers attributing to the calf deliverance from Egypt in Acts 7:40.) Not only Jews¹⁰⁷⁵ but many Greeks and Romans¹⁰⁷⁶ mocked this as superstition, “especially after they heard of a Roman emissary who accidentally killed a cat and apparently was murdered by an Egyptian mob in 59 B.C.”¹⁰⁷⁷ Pliny the Elder complains about those who worship animals, especially “loathsome ones.”¹⁰⁷⁸ Philostratus's Apollonius attacks Egyptian worship of animal shapes, arguing that, by contrast, Greek portrayal of the gods as humans honors the gods.¹⁰⁷⁹ (One who wished to mock Greek myths might point out Zeus's transformation into a bull and other animals.)¹⁰⁸⁰ Maximus of Tyre thought even animal images acceptable if they turned people's thoughts toward God.¹⁰⁸¹ God specifically warned Israel to reject idols of animals (Deut 4:17–18).¹⁰⁸² The sin of the exodus generation is recapitulated by the golden calves of the northern kingdom (1 Kgs 12:28, 32; 2 Kgs 10:29; 17:16; 2 Chr 11:15; 13:8; Hos 8:5–6; 10:5; 13:2).¹⁰⁸³

Josephus, who writes apologetically for Gentile as well as Jewish readers, combines both forty-day fasts of Moses into one so that he can skip the golden-calf episode (*Ant.*

1072. Dunn, *Acts*, 95.

1073. Albright, *Stone Age*, 230; idem, *Biblical Period*, 60; idem, *Yahweh*, 198; Wright, *Archaeology*, 148; Bright, *History*, 238. Use of the bull to signify Baal in Israel might be attested as early as ca. 1200 B.C.E.; see Mazar, “Bull.” Earlier, for El as the “bull,” see, e.g., *ANET* 129–30; KRT A (i–ii) (*ANET* 143); AQHT A (i) (*ANET* 153); Kaiser, “Pantheon,” 24–25, 58; for Baal, Kaiser, “Pantheon,” 58, 218.

1074. People knew that Egyptians worshiped oxen (Pliny E. *N.H.* 8.71.184–86). Cf. the Egyptian god Apis (e.g., Strabo 17.1.31; Mazar, Avi-Yonah, and Malamat, *Views*, 1:171; in this period, Lewis, *Life*, 94; Brenk, “Image,” 227; more extensively, Vos, “Apis”); animal deities or totems in Brenk, “Image,” 230–31. For Egyptian deities as often human-animal hybrids, see Green, “Monsters,” 182; Anubis in Brenk, “Image,” 225 (the only hybrid in Pompeii's Isis temple); of course, Greeks had their own hybrids (e.g., Käppel, “Monsters”; Stenger, “Minotaurus”). On calf deities in the ancient Near East, see Wyatt, “Calf.”

1075. E.g., *Let. Aris.* 138; Wis 13:13–14 (but also mocking Greeks' human images); Jos. *Ag. Ap.* 2.81, 85, 128–29, 139 (happily excoriating Apion on a point where Josephus knows his hellenized audience will concur; he contrasts Moses in *Ag. Ap.* 2.75–76). Others knew that the Jews felt this way (so Strabo 16.2.35; Tac. *Hist.* 5.5).

1076. E.g., Plut. *Isis* 71, *Mor.* 379DE; Lucian *Parl. G.* 10–11; *Astr.* 7 (if genuine); Max. Tyre 2.5 (but cf. 2.10); see further Pearson, “Idolatry, Jewish Conception of,” 526–28. Paul may mock them in Rom 1:23 (Grant, *Gods*, 47; Pearson, “Polytheism,” 818). Apollod. *Bib.* 1.6.3 claims that the gods disguised themselves as animals in Egypt (ultimately leading Egyptians astray; cf. apparently Egyptian claims in Lucian *Sacr.* 14). Even where Greek and Egyptian culture interpenetrated in Egypt, of course, Egyptian practices remained (see Dhennin, “Necropolis”).

1077. Grant, *Paul*, 67 (citing Diod. Sic. 1.83.6–9). Egyptians lavished care on their sacred animals (1.84.1–8).

1078. Pliny E. *N.H.* 2.5.16.

1079. Philost. *Vit. Apoll.* 6.18–19. Max. Tyre 2.3 concurs that human images are nobler for deities than are animal images.

1080. E.g., Lucian *Dial. S.-G.* 305 (11/7, South Wind and West Wind 1); 306, still ¶1; 325–26 (15, West Wind and South Wind 2); 327, ¶3; *Dial. G.* 206 (6/2, Eros and Zeus 1); 207–8 (7/3, Zeus and Hermes 1); 269–71 (2/22, Pan and Hermes 1–2); Byzantine polemic in Ps.-Lucian *Patriot* 4.

1081. Max. Tyre 2.10. Such a position is ridiculed in Lucian *Parl. G.* 11.

1082. Van de Sandt, “Amos 5, 25–27,” thinks that Luke read the calf story (Exod 32) intertextually in relation to Deut 4:1–28.

1083. Israel's own defiling of her temple with carvings of images of animals in the late monarchy was not forgotten in the first century C.E.; see *Test. Mos.* 2:8–9. But in the LXX, Exod 20:3–6 prohibits only idols, not images not used for cultic purposes (Tatum, “Second Commandment”), and animals decorate Roman Jewish epitaphs (Leon, *Jews of Rome*, 196–97; though also “pagan mythological beings,” 228).

3.79–99, esp. 95–99); recording the disgraceful episode could have fed accusations, such as those of Apion, that Josephus would later need to challenge.¹⁰⁸⁴ Jewish writers with potential Gentile audiences sometimes omitted embarrassing episodes for apologetic reasons and, when they included them, needed to explain them.¹⁰⁸⁵ Philo omits Aaron's role (later rabbis also excluded his guilt), perhaps focusing on Israel's imitating an Egyptian bull deity.¹⁰⁸⁶

Those who directed their writings to Israel, however, found the narrative much more useful; Pseudo-Philo in *L.A.B.* 12:1–10 elaborates the narrative, highlighting Israel's unfaithfulness.¹⁰⁸⁷ Later rabbis, whose audience was Jewish and whose goals were more hortatory than apologetic, often emphasized, rather than played down, the story (*Tg. Neof.* 1 on Exod 32) and could be quite harsh (e.g., R. Simeon ben Yohai in *Exod. Rab.* 42:7). For the sin of the golden calf, R. Eliezer ben Jacob lamented, God could justly punish Israel until the resurrection of the dead (*'Abot R. Nat.* 34 A). Granted, they had some ways to tone down the strength of the sin. For example, some Amoraim attributed it to the proselytes and the mixed multitude (e.g., *Lev. Rab.* 27:8).¹⁰⁸⁸ Blaming a mixed multitude (Exod 12:38; cf. Lev 24:10; Num 11:4) made good sense in the ancient world, where citizens of a community might wish to deny that evildoers had been born there (Polyb. 2.55.9). It was also natural to point out that Satan (R. Joshua ben Levi in *b. Šabb.* 89a) or the evil impulse had incited Israel to worship the calf (*Song Rab.* 2:4, §1; *Tg. Ps.-J.* on Exod 32:22).

Although rabbis answered pagan critics apologetically,¹⁰⁸⁹ they knew the depth of sin in worship of the calf; they considered it the worst sin of Israel's history (R. Judah commenting on earlier tradition in *Sipre Deut.* 1.9.1–2).¹⁰⁹⁰ Such a condemnation made sense for those who viewed idolatry as the worst of sins (*Mek. Pisha* 5.40–41). Rabbi Eleazar condemned Israel's proneness to idolatry revealed by its worshiping the calf (*b. 'Abod. Zar.* 53b). No generation escaped some punishment for the sin of the calf along with its own sins (*Lam. Rab.* 1:3, §28).¹⁰⁹¹ Moses proved Israel's accuser, rather than defender, on the occasion of the calf (*y. Yoma* 7:3).¹⁰⁹²

1084. See also H. St. J. Thackeray in *Josephus*, LCL, 4:362–63 n. c: "this is the most glaring exception" to Josephus's promise "to omit nothing" (*Jos. Ant.* 1.17). *Jos. War* 4.3 refers to the later calf idol of Jeroboam. This presumably reflects Josephus's apologetic for a Gentile audience (though Feldman, "Levites," suggests that Josephus's preference of priests over Levites also helps explain the omission).

1085. Philo and Pseudo-Philo omit the command to destroy Canaan's nations, and Josephus explains it in a manner intelligible to Romans (Feldman, "Command"; for Philo, see also Berthelot, "Conquest"). Josephus may play down negative elements of the biblical picture of Israelites during the exodus (Cheon, "Plagues"), the horror of the raped concubine (Feldman, "Concubine"), and problematic elements in Gen 18:22–33 and Gen 22 (Niehoff, "Two Examples"). Plutarch also could minimize elements of his portrayals (cf. Beneker, "Chaste Caesar").

1086. So Feldman, "Calf," on Philo *Mos.* 2.161–73, esp. 165, 169, though Feldman may overplay this point.

1087. But Fisk, "Scripture," notes that Pseudo-Philo uses biblical citations to provide the interpretive context (Gen 11:6 in *L.A.B.* 12:3; Gen 12:7 in *L.A.B.* 12:4).

1088. Cf. Urbach, *Sages*, 1:554–55; Longenecker, *Acts*, 140 (citing also *Pesiq. Rab Kah.* 9:8; *Exod. Rab.* 42:6). As Bamberger, *Proselytism*, 192, notes, "The intent of the story is not to blacken the name of converts, but to whitenash the reputation of Israel" (citing also other sources). For the mixed multitude, cf. Exod 12:38; historically, see Bright, *History*, 134.

1089. And (at least in Amoraic sources) they believed that God exonerated Israel for the sin of the golden calf in the sight of the *nations* (R. Levi in *Pesiq. Rab Kah.* 9:7). God also forgave them when they repented (*Num. Rab.* 19:3; 20:20).

1090. Longenecker, *Acts*, 140, cites *b. Šabb.* 17a; *Meg.* 25b; *'Abod. Zar.* 5a; *Sop.* 35a; *'Abot R. Nat.* 18 B; 21 B; 30 A; *Exod. Rab.* 48:2; *Lev. Rab.* 2:15; 5:3; 9:49; 27:3; *Deut. Rab.* 3:10, 12.

1091. Cf. also judgment for this sin in *Num. Rab.* 7:4; 9:48–49. Park, *Herem*, 126–28, finds in the calf story a contextual allusion to *herem*.

1092. But in *Deut. Rab.* 1:2, only Moses's intercession saved them from destruction (as in Exod 32:10). Later the Qur'an emphasizes Israel's sin with the calf (Qur'an 2.51, 92; 4.153; 7.148; 20.88).

For the rabbis, the contrast with God's love for Israel made the Israelites' sin with the calf appear all the more heinous. While Israel was engraving idols below the mountain, God was engraving his gracious gift of the law above (R. Levi in *Exod. Rab.* 41:1). "Shameless is the bride," Ulla (a Babylonian Amora) lamented, "that plays the harlot within her bridal canopy!" (*b. Šabb.* 88b). Earlier Jews also confessed and repented of sins, including those of their ancestors (1QS I, 22–23); this could include confessing the sin of the calf (Neh 9:18; Ps 106:19).

Stephen's verdict that God "delivered them up" (Acts 7:42) also evokes themes intelligible in his milieu. A similar idea appears in Rom 1:24, 26, 28 with Paul's refrain that God "gave them over."¹⁰⁹³ Because God was sovereign,¹⁰⁹⁴ he could be said to lead the wicked astray or deliver them to their sin.¹⁰⁹⁵ (Some thinkers declared that the greatest punishment for sin was wickedness itself.)¹⁰⁹⁶

"Host of heaven" (Acts 7:42) and "star" (7:43) suggest astrological deities once especially associated with Babylon (cf. 7:43) but now widespread in the Greco-Roman world. Although Jewish people more often considered the stars angels,¹⁰⁹⁷ Romans sometimes viewed them as deities¹⁰⁹⁸ (or immortalized or deified humans);¹⁰⁹⁹ see excursus on astrology at Acts 2:9–11. Scripture had often condemned worship of the "host of heaven," the stars and planets (Deut 4:19; 17:3; 2 Kgs 17:16; 21:3, 5; 23:4–5; 2 Chr 33:3, 5; Jer 8:2; 19:13; Zeph 1:5; also Jer 7:18 LXX; Isa 24:21; 34:4). The idolatrous perspective was, however, a misinterpretation, for the true "host of heaven" constituted God's court (1 Kgs 22:19; 2 Chr 18:18; cf. Neh 9:6; Dan 4:35; 8:10). Only Luke employs στρατιά in the NT, using it again in connection with heavenly hosts present for angelic worship at Jesus's birth (Luke 2:13). The term στρατιά also connotes military ranks (e.g., Exod 14:4, 9, 17; Deut 20:9); angels were sometimes thought to be arranged in military ranks.¹¹⁰⁰ Apparently, demons could also be described as so arrayed at times (Luke 8:30, though this may be a nickname; from Mark 5:9).¹¹⁰¹

On the wilderness, see comment on Acts 21:38. On the quotation formula "as it is written," see comment on Acts 1:20. "The book of the prophets" refers to the scroll containing the twelve "minor" prophets, including Amos (as here and in Acts 15:15) and Habakkuk (13:40).¹¹⁰² The question as Stephen phrases it contains μή,

1093. Paul refers to Gentiles, but using OT language concerning Israel's idolatry (cf. Rom 1:23 with Ps 106:20; perhaps Jer 2:11), perhaps to foreshadow his turn to Jewish sin in Rom 2.

1094. More finite pagan gods also could take mortals' sense from them to destroy them (e.g., Hom. *Il.* 18.311), but this was more selective and partisan.

1095. E.g., CD II, 13; 4Q266 18 V, 9–10; *Jub.* 21:22. Sometimes this is explicitly as judgment for prior choices (e.g., 1 Sam 2:25; Ps 81:12; Jos. *War* 5.343; 2 Thess 2:11; cf. Exod 8:15, 32; 9:34 with 9:12; 10:20; 14:4, 8; rabbinic tradition in Bonsirven, *Judaism*, 14).

1096. Plato *Laws* 5.728B; Sen. *Y. Ep. Lucil.* 97.14; cf. Cic. *Tusc.* 1.30.72; Wis 2:21; Sir 4:19.

1097. 1QM X, 12; Philo *Plant.* 12, 14; cf. Ps.-Phoc. 71; 2 *En.* 4:1; 3 *En.* 46:1; for posthumous humans as angels like stars, see 2 *Bar.* 51:10; perhaps Dan 12:2; 1QM XII, 1; 1 *En.* 51:5; 104:2–4; 4 *Macc* 17:5; 1 *Cor* 15:41; as alive, *Sib. Or.* 5.512–31.

1098. Cic. *Nat. d.* 2.15.39–40 (in Stoicism); *Resp.* 6.15.15; Sen. *Y. Ben.* 4.23.4. Judaism mainly despised this approach (1 *En.* 80:7; *Gen. Rab.* 6:1; *Lev. Rab.* 31:9; *Pesiq. Rab.* 15:1), which existed also among Israel's neighbors (2 Kgs 17:16; 21:3; 2 Chr 33:3; Jer 8:2; Bright, *History*, 161). Monotheistic Jews sometimes did borrow pagan language (e.g., Ps.-Phoc. 11, 71, 75, 163; Philo *Creation* 27), like later use of the zodiac in synagogue mosaics.

1099. Val. Flacc. 3.378–82; Ovid *Metam.* 14.824–28, 846–51; 15.749, 843–51, 875–76; Virg. *Aen.* 7.210–11; Val. Max. 3.2.19; 4.6.ext. 3; Lucan *C.W.* 9.1–9. Against earlier speculation (e.g., Cumont, *After Life*, 91–109), astral immortality was not specifically connected with the Mysteries (Gasparro, *Soteriology*, 98).

1100. 1 *En.* 69:3; 72:1; 75:1; 82:10–12; 2 *En.* 29:3; for angelic armies, cf., e.g., 2 Kgs 6:17; 1QM VII, 6; 4Q402 3–4 7–10; 4Q491 Manuscript B 1–3 3, 10; 4Q529; 2 *Macc* 5:1–4 (with 3:24–26); 11:8; 4 *Macc* 4:10; 2 *En.* 17:1; *Apost. Const.* 8.12.27; note especially "the Lord of hosts."

1101. Cf. (later) *Test. Sol.* 11:3, 5.

1102. Bruce, *Acts*¹, 173; Johnson, *Acts*, 236.

which “demands the negative response”;¹¹⁰³ this means that Israel was worshipping idols (including the golden calf) rather than the true God in the wilderness.¹¹⁰⁴ If this was hyperbole,¹¹⁰⁵ it nevertheless rested on a serious truth (see comment on Acts 7:41). In a tragic reversal of God’s purposes (7:7), the people’s worship (the verb *λατρεύω*, also used positively in 24:14; 26:7; 27:23; Luke 1:74; 2:37; 4:8) became idolatrous.¹¹⁰⁶

Stephen was not the only protestor against the temple cult to notice Amos’s denunciation of Israel’s rebellion in the wilderness (Amos 5:25–27, which Amos was applying to the idolatry of his own era);¹¹⁰⁷ it also appears in Qumran’s CD VII, 14–17.¹¹⁰⁸ This passage also contains Amos 9:11 (CD VII, 16; cf. Acts 15:16). For that matter, some of the Tannaim (including R. Akiba) doubted that the wilderness generation would enter the world to come (*b. Sanh.* 110b, bar.; cf. Ps 95:10–11; Heb 3:11, 18). Rabbi Eliezer reportedly taught that “an idol passed with Israel through the sea” (*y. Sukkah* 4:3, §5 [Neusner 17:100]).

The term *σφάγιον* (victim) does not imply a cultic meal, but *θυσία*, the commonest kind of sacrifice, normally does.¹¹⁰⁹ The vast majority of such sacrifices included feasts as part of the religious act.¹¹¹⁰ Although the LXX uses *θυσία* frequently (ca. 350 times), the pagan connotations of Amos’s accusation in Stephen’s speech might suggest an allusion especially to Exod 32:6, where Israel celebrated idolatrous worship and ate before the calf (32:4, 8), which Stephen mentions in Acts 7:40–41. Of the four uses of *θυσία* in Luke–Acts, the only other in Acts besides 7:42 is 7:41, indicating that the golden-calf incident remains in view.¹¹¹¹

Both the star and the tabernacle (7:43) merit further discussion. Some interpreters applied “star” in Num 24:17 messianically, even in relation to Deut 18:18 (see 4Q175, above).¹¹¹² Some later applied this oracle to Simeon bar Kokhba, but for the rabbis, the star (*kokhab*) proved to be a disappointing deception (*kozeba*; R. Akiba in *y. Ta’an.* 4:5, §10). The star here, however, relates to astral deities; see comment on Acts 7:42.

The exact sense of Amos’s prophecy is disputed, and its history of interpretation is diverse. Elsewhere the Hebrew consonants rendered “Sukkoth” appear as a place

1103. Amos 5:25–27 can read as a complaint against lack of sacrifices in the wilderness (Conzelmann, *Acts*, 55), but in view of testimony otherwise from the Pentateuch and texts such as Ps 50:8–10; Isa 1:11–15; 58:5–6; 66:3; Jer 6:20; Hos 6:6; and esp. Amos 5:21–24, Stephen reads it as sacrifices not acceptable to the Lord (so also others, e.g., Bock, *Acts*, 299).

1104. Johnson, *Acts*, 131–32.

1105. An accepted literary and rhetorical technique; e.g., *Rhet. Alex.* 11, 1430b.16–19; Cic. *Or. Brut.* 40.139; Philost. *Vit. Apoll.* 8.7; Anderson, *Glossary*, 122–24. It was particularly apt for stirring emotion (e.g., Pliny *Ep.* 5.16.1). Worshiping idols in addition to God, rather than instead of God, was still no small offense (cf. 2 Kgs 17:28–33).

1106. So also Tannehill, *Acts*, 90.

1107. God was not impressed with Israel’s sacrifices in the wilderness (Amos 5:25) because (5:26) they were coupled with idolatry; its offerings were worthless (5:22–23), for justice was what God required (5:24). Might “house of Israel” appear here for a *gezerah shevah*–type connection with the “house” in Acts 7:46, 47, 49? This would help explain “house of Jacob” in 7:46.

1108. The use of Amos quotes (see Acts 15:16–18) also used in the *Damascus Document* suggests a shared early Jewish tradition, although Luke himself works from the LXX and changes the readings on the basis of his knowledge of LXX terminology (Steyn, “*Vorlage* of Quotations,” 78–80) more familiar to his audience.

1109. Smith, *Symposium*, 68.

1110. *Ibid.*, 67–69 (citing as examples Dio Chrys. *Or.* 3.97; Plut. *Table* 693E–694A).

1111. Israel’s idolatry in Exod 32 remained a subject of much discussion (e.g., *t. Soṭah* 6:6; *Exod. Rab.* 41:7).

1112. The application in 1QM XI, 6 could be to “messianic” leaders (cf. “anointed” in XI, 7) or to the elect. The quotation appears in CD VII, 18–19; 1QM XI, 6; 4Q175 I, 12 and probably in (reconstructed) fragments in 4Q266 and 4Q269. The star of Judah in *Test. Jud.* 24:1 is surely messianic, but it may be a Christian interpolation; Jesus is Jacob’s star in Jewish-Christian texts (Daniélou, *Theology*, 214–24).

name,¹¹¹³ a sense that does not work here. Some scholars suggest proper nouns: *Sikkuth* as an Akkadian name for the god Ninib (the planet Saturn), with the vowels of *shiqqūs*, “abomination” (hence “King Saturn”).¹¹¹⁴ *Kiyyun* could thus be “Assyrian *kaiwanu*, another name of Ninib, spelt (like *sikkuth*) with the vowels of *shiqqūs*.”¹¹¹⁵ Others doubt the names of deities here;¹¹¹⁶ more critical for study of Acts, neither name for Ninib (nor Ninib himself) would be known to Luke’s audience or most LXX readers. The sense of idolatry is clear (“your gods which you made for yourselves,” Amos 5:26; in the LXX, note ἐποιήσατε; cf. Acts 7:48).

Stephen’s speech follows the LXX, which speaks not of “Sikkuth” or “Kiyyun” but of “Moloch” (Μόλοχ) and “Raiphān” (Ῥαιφάν). Like the probable meaning of the MT, the LXX seeks to bring out the sense of idolatry, but by a different method; it reads *skvt* as the construct for *sukkah*, hence translating it as σκηνή, “tent,” but *mlk* as Moloch, hence “tent of Moloch.” (Tent-shrines were widely known, though more so among nomadic peoples and earlier in Egypt.)¹¹¹⁷ (“Raiphān”¹¹¹⁸ may resemble Repa, an Egyptian equivalent of Saturn, which would have made more sense for the Alexandrian translators than a more obscure Akkadian name of the same deity.)¹¹¹⁹ But the LXX ignores the Hebrew suffix “your” on *mlk*; if the Hebrew intended “tent of Moloch,” it is “tent of *your* Moloch”—that is, “tent of your god Moloch.”

One could more naturally revocalize *mlk* (given the plural suffix “your”) as “king” (hence “your king”), rather than the LXX’s “Moloch,” alongside *skvt* as “tent” (though *skvt* is not the expected form even in the construct); this approach is taken in CD VII, 15–16. Read as “tent of your king” (VII, 14), it could naturally be connected (and reversed) midrashically in Amos 9:11’s restored “tent of David.” That the *Damascus Document* links the two texts (CD VII, 14–17) is no surprise; the LXX also has σκηνή for both. The LXX has “tabernacle of Moloch and the star of your god Raipha” (Amos 5:26). Though condemning Israel’s apostasy (e.g., CD VII, 13) and idolatry (VII, 17, on Amos 5:26) just as the LXX does,¹¹²⁰ the *Damascus Document* interprets the passage differently than does the LXX; the royal tabernacle of Amos 5:26 stands for the

1113. Gen 33:17; Exod 12:37; 13:20; Num 33:5–6; Josh 13:27; Judg 8:5–16; 1 Kgs 7:46; 2 Kgs 17:30; Pss 60:6; 108:7; 2 Chr 4:17; associated with a deity in 2 Kgs 17:30 (but contrast LXX).

1114. *Melekh* being read with the vowels of *bōsheth*, “shame” (Bruce, *Acts*¹, 174; cf. idem, *Commentary*, 155; Fitzmyer, *Acts*, 382; Le Cornu, *Acts*, 359).

1115. Bruce, *Acts*¹, 174. On the deity and on the Amos reference, see discussion in Stol, “Kaiwan.”

1116. See Prato, “Idolatry” (noting that neither the MT nor the LXX reads the text thus).

1117. Cross, “Tabernacle,” 49, 60; de Vaux, *Israel*, 296–97; Singer, “Hills,” 20; Bright, *History*, 127; Morgenstern, “Ark,” 208–9, 216; Kitchen, “Background,” 8–11; idem, *Reliability*, 275–80; Aharoni, *Archaeology*, 136–37; Averbeck, “Tabernacle,” 818–19; Keener, “Tabernacle,” 838; idem, “Worship”; Keener and Usry, *Faith*, 139–40.

1118. Some early manuscripts of Acts have Ῥομφαν instead of the LXX Ῥαιφάν, allowing that the latter occurrence here may be an early correction. Klein, “Romfan,” suggests that a copyist changed Luke’s correct form to Ῥομφαν because A and M appeared similar when later minuscules were being written; this proposal makes good sense if it can account for not only later manuscripts but the original of Sinaiticus in the fourth century. Bede *Comm. Acts* 7.43 has *Remfam*, a spelling needed to make a connection with pagan worship of Venus, the morning star. While one could explain *Raiphān* as a corruption of Hebrew terms (say, for “heal”), no Greek term is both relevant (radish? cabbage? punishing adultery?) and similar.

1119. Bruce, *Acts*¹, 174; Le Cornu, *Acts*, 359; Marshall, “Acts,” 565; Peterson, *Acts*, 261. Stephen himself might be expected to know this only if he was Alexandrian (Acts 6:9), and perhaps Luke and his ideal audience not at all, as they simply follow the LXX. A derivation from ῥάτω (“destroy”; or ῥομφαία, “sword”) would not explain the ending. (It is not an intelligible “translation”: one might take *kiyyun* as a feminine plural, but of what term? Or related to *kwn*, a verb for straightening, establishing, making firm, or drawing a line—again not easily relevant.) The similar Heb. term *riphin*, “light lattice work” (*t. Kil.* 4:5; Jastrow, *Dictionary*, 1476), is even less revealing. On Molech, see Heider, “Molech.”

1120. The document seems to portray only the Essenes as faithful Israel (CD III, 13–14; see “Essene Origins,” 55).

“books of the law” (CD VII, 14–15).¹¹²¹ Israel’s disobedience would cause the law (and a righteous remnant, VII, 13–14) to be exiled to Damascus, leading therefore to an Essene settlement there.¹¹²²

Rabbis and other ancient interpreters who had access to various readings usually selected the reading, translation, or interpretation that best fit their point. Even had Stephen known the Hebrew *Sikkun*, his use of the LXX interpretation σκηνή (tent; shared in Hebrew by CD VII) plays into his midrashic application. Israel’s singular “tent” in its wilderness¹¹²³ wanderings (the quoted context in Amos 5:25; Acts 7:42) could be only the tabernacle, but Amos called this “tent” (Heb. *Sikkun*) an idolatrous image (Amos 5:26; Acts 7:43). Thus, with this reading, Israel made an idol even of the holy tabernacle! Stephen then uses the interpretive principle that later rabbis called *gezerah shevah* to link together texts on the basis of a common key word or sometimes (as in Acts 7:46) a cognate. He mentions more favorably the “tabernacle” or “tent” in 7:44 as divinely designed by God (but so were all creations that people perverted into idols). In 7:46, however, David asks to provide a dwelling (σκήνωμα) for God,¹¹²⁴ which in 7:47 turns out to be the temple that Solomon built.

The danger of idolatry in the wilderness, signaled by Amos, had been transferred to the Jerusalem temple. In the context of answering the charge that he denounces the temple (6:11–14), Stephen prepares to respond that his accusers have made an idol of it. Interestingly, the only other use of σκηνή in Acts is another Amos quotation in 15:16 (“David’s tent”), which might be understood as implying a new temple and/or (more likely) a fresh Davidic dynasty (see comment there).¹¹²⁵ Although he does not make the connection explicit, Luke’s usage probably presupposes an early Christian link between the two Amos texts (possibly based on an exegetical tradition like CD VII, with “tent of the king” and “David’s tent”), though Luke here has contextual reason to follow the LXX’s “tent of [the idol] Moloch” rather than revocalizing the Hebrew as “tent of the king.”

Stephen reminds his hearers of exile for their sins (Acts 7:43). Israel’s idolatry merited exile, but while that judgment climaxed in Nebuchadnezzar’s generation, its roots were as old as the exodus. The authors or editors of Kings and Chronicles narrate the exile not in isolation but as the culminating judgment against Israel’s series of sins (e.g., 2 Kgs 17:7–23; 23:26; 24:3). Amos 5:25–27, the text Stephen chooses for comment on the wilderness wanderings, may also ground the coming exile to Assyria in disobedience that began in the wilderness.

What is oddest about Stephen’s version of the quotation is his “beyond Babylon.” Peshier application of Amos’s prophecy to contemporary idolatry led to a practical revision of its geography. “Beyond Damascus” in Amos referred to Assyrian exile;¹¹²⁶ a few centuries later, exile could be applied to Babylon and in the *Damascus Document* may refer to the community *in* (rather than beyond) Damascus.¹¹²⁷ When the people

1121. See Osten-Sacken, “Bücher der Tora.”

1122. Cf. Scharlemann, *Stephen*, 82. Burgmann, “Nordemigration,” thinks the *Damascus Document* to be especially for émigrés from Damascus to Qumran.

1123. Particular sorts of demons were often associated with the wilderness as well (e.g., 2 Bar. 10:8; cf. Isa 13:21; 24:14 LXX; Tob 8:3; 1 En. 10:4; 4 Macc 18:8).

1124. Σκήνωμα is probably from Ps 132:5 (131:5 LXX), probably equivalent to σκηνή in 2 Sam 7:2; see Combrink, *Analysis*, 17.

1125. For observation of these connections, though with a different application, see Combrink, *Analysis*, 17.

1126. Damascus was in fact the first city judged on Amos’s list of nations (Amos 1:3–5), judged by Assyria, which lay, and carried captives, beyond it.

1127. One may read CD VII, 15 as “from the tents of Damascus” (conflating from the next line in Amos). Some, by contrast, take “Damascus” as a cipher for Babylon, hence for the community’s exilic origin (Davies, “Birthplace of Essenes”).

of Israel first rejected Moses, he went into exile (Acts 7:27–29); when they rejected Moses (and his law) again, they would be exiled (7:43).¹¹²⁸

“Beyond Babylon” might be a way of deliberately underlining an obvious pesher identification of “beyond Damascus” with Babylonian captivity and noting that the application now reached beyond that first Babylon. Amos’s “Damascus” referred to the Assyrian exile of Israel; Stephen alludes instead to Judah’s under the Babylonians.¹¹²⁹ In doing so, Stephen implies that the idolatry continued well beyond the era that Amos condemned. On the level of Luke’s audience, the oracle probably also points to the captivity inaugurated in 70 C.E. (Luke 21:24, not specified in parallel passages in Mark or Matthew), which revealed an exile not limited to Babylon.¹¹³⁰

In Acts 7:40–50, Israel focused on a house of worship while rejecting the deliverer and his instructions for true worship (7:27–39). God had “removed” or “resettled” Abraham to the land of promise (7:4) but would “remove” or “resettle” his descendants in a foreign land by exile (7:43).¹¹³¹ In Luke’s present application, Israel was rejecting the new Moses and hence faced exile again (Luke 21:22, 24). As many of his Jewish contemporaries also affirmed, the new “Babylonian” captivity was under Rome, a new “Babylon.”¹¹³² (“Babylon” was only one of several ciphers for Rome in early Jewish literature before¹¹³³ and after¹¹³⁴ Jerusalem’s fall, but it was one of the most natural and effective.) By this period, some Romans believed that most of literal Babylon had reverted to desert, apart from its walls and a few structures (Pliny E. *N.H.* 6.30.121–22).

g. God Does Not Need the Temple (7:44–50)

If Scripture showed that Israel practiced idolatry in the wilderness, even with a “tabernacle” (Acts 7:43), a tabernacle or temple might not profit Israel, and God certainly did not need it (cf. Jer 3:16; 7:4–15). Until Solomon’s day, Israel did not have even a stationary temple (Acts 7:47); nor, the prophet showed, did he need one (7:48–50). The temple was an accommodation to human need, but God desired pure worship, not simply a place or institution.

I. THE TABERNACLE (7:44–45)

“Tabernacle of testimony”¹¹³⁵ (7:44) contrasts with “tabernacle of Moloch” (7:43).¹¹³⁶ Likewise, the “form” (τύπον) God showed Moses on the mountain¹¹³⁷ contrasts with

1128. Johnson, *Acts*, 132.

1129. With, e.g., Foakes-Jackson, *Acts*, 64; Marshall, “Acts,” 565.

1130. Early Jewish texts show that Jews did not believe that Israel’s restoration had yet occurred (cf. Pao, *Isaianic Exodus*, 143–45), but most Judean Jews may not have seen themselves as still “exiled” before 70 (cf. Kim, *New Perspective*, 136–41).

1131. Tannehill, *Acts*, 90.

1132. Cf. 4Q163 6–7 II, 4–5; frg. 8–10; 4Q386 1 III, 1–2; *Sib. Or.* 5.143, 159–60 (contrast 5.434–46); 4 *Ezra* 3:28, 31; 2 *Bar.* 67:7; *Rev* 14:8; 17:5; 18:2; Assyria (by implication) in *Gen. Rab.* 16:4.

1133. Cf. “Kittim” in some Qumran scrolls; see excursus on God’s kingdom at Acts 1:3.

1134. Cf. “Edom” in later rabbis (with perhaps earlier antecedents; cf. 4 *Ezra* 6:7–10): *Pesiq. Rab Kah.* Sup. 5:3; *y. Ta’an.* 4:5, §10; *Gen. Rab.* 37:2; 44:15, 17; 63:7; 76:6; 83:4; *Exod. Rab.* 31:17; 35:5; *Num. Rab.* 15:17; *Deut. Rab.* 1:16; *Eccl. Rab.* 5:7, §1; 11:1, §1; *Pesiq. Rab.* 10:1; 12:4; 14:15; further sources at Acts 2:16.

1135. The LXX Pentateuch uses the phrase more than 140 times; it appears only seven times elsewhere in the LXX; also 1 *Clem.* 43.2, 5; for the heavenly sanctuary in *Rev* 15:5.

1136. With, e.g., Bruce, *Acts*’, 174.

1137. Hebrews applies this to the need for the earthly tent to resemble the heavenly prototype (Heb 8:5); the principle recalls not only Platonic or apocalyptic vertical dualism but ancient temple theology (see discussion below; for ancient Near Eastern parallels, see Clifford, “Tent,” 226; Cassuto, *Exodus*, 322; on reading the tabernacle through ancient temple imagery rather than fanciful typology developed in a post-NT era, see, e.g., Keener, “Worship”).

the idolatrous images (τύπους) of a pagan “tent” they worshiped in 7:43. To “make” (ποιῆσαι) the tabernacle contrasts with the making of idols in 7:43 (and 7:40); both were made “in the wilderness” (7:42).¹¹³⁸ Canaanites also spoke of their chief deity, El, as dwelling in a “tent” (perhaps evoking an earlier, nomadic cult),¹¹³⁹ yet we also know that in fact tent shrines were widely used,¹¹⁴⁰ most obviously in Egypt.¹¹⁴¹

The tabernacle was not itself pagan, however.¹¹⁴² That Moses made the tabernacle according to the pattern God showed him (Acts 7:44; Exod 25:8) indicates Stephen’s own view that it was from God.¹¹⁴³ Indeed, this language suggested to some ancient audiences that the tabernacle or temple was a prototype of a heavenly version,¹¹⁴⁴ a point possibly relevant even to the first audiences.¹¹⁴⁵ Many aspects of the tabernacle’s design reflected conventional architectural features for temples, but some specific contrasts—most notably, the absence of an image atop the ark in the holiest place—underlined its peculiarly monotheistic and aniconic intent.¹¹⁴⁶

Some scholars think that Luke and Stephen play on Joshua’s name in Acts 7:45 (Ἰησοῦ).¹¹⁴⁷ Orators sometimes did play on a person’s name, including citing another honorable person with the same name (Theon *Progymn.* 9.52–53), but Luke makes nothing of the comparison, probably less than intended by many Jewish parents who named their sons after the famous conqueror of the past. The name is simply the standard translation for Joshua in the LXX (including all who bear the name, more than 250 times).¹¹⁴⁸ It is difficult to guess what Luke would have called him had he

1138. For the hook words “tent,” “wilderness,” “pattern,” and “make,” see Kilgallen, *Speech*, 88.

1139. Clifford, “Tent,” 222–23. “Tents” might, however, simply reflect an archaic usage (cf., e.g., 2 Sam 20:1; 1 Kgs 12:16). Against Van Seters’s emphasis on exclusively first-millennium B.C.E. usage, tent dwellers may be attested in the third millennium B.C.E. (Bright, *History*, 50) and appear most frequently in second-millennium texts (see Kitchen, *World*, 58–59; Wiseman, “Tents,” 195–200; idem, “Abraham,” 142). That no shrines to El have been uncovered may suggest that his shrine was made only of perishable material (Clifford, “Tent,” 225).

1140. Cf. the portable shrine in the bas-relief in Cross, “Tabernacle,” 49; de Vaux, *Israel*, 296–97; remains of the possible Midianite tent-shrine in Singer, “Hills,” 20; Bright, *History*, 127; comparison with the pre-Islamic *qubbah* in Morgenstern, “Ark,” 208–9, 216; Cross, “Tabernacle,” 60.

1141. Kitchen, “Background,” 8–11; cf. Murray, *Temples*, 2, 87–88; Nelson, “Temple,” 148–49; Lurker, *Symbols*, 120; also possible remains in Timna in Aharoni, *Archaeology*, 136–37. For further comments on tent-shrines, see Keener and Usry, *Faith*, 139–41.

1142. On the importance of the past (and future) tabernacle for Samaritans, see Pummer, “Tabernacle.”

1143. Cf. also L.A.B. 11:15.

1144. Clear in Wis 9:8; Heb 8:5; 2 Bar. 4:5–6; *Pesiq. Rab Kah.* 1:3; cf. *Pesiq. Rab.* 5:11; *Gen. Rab.* 55:7; 69:7. See also, e.g., Philo (influenced by Platonism) *Mos.* 2.76; *Alleg. Interp.* 3.108; *Spec. Laws* 1.66; *Drunkenness* 134; *Test. Levi* 3:4–8; 5:1; *Pesiq. Rab.* 20:4; see further Cody, *Sanctuary*. The idea of a cosmic temple appears in a range of sources (Cic. *Resp.* 6.15.15; *Leg.* 2.10.26; Heracl. *Ep.* 4; in Jewish sources, Philo *Spec. Laws* 1.66; *Creation* 55; Jos. *Ant.* 3.180; Davila, “Macrocosmic Temple”; in Egyptian temples, Scott, “Tabernacle,” 165–66; Reitzenstein, *Religions*, 196; in Mithraism, Campbell, *Iconography*, 44–90; Gordon, “*Mithraeum*”; Klauck, *Context*, 146; Martin, *Religions*, 116).

1145. See Wilcox, “Pattern”; for heavenly prototypes more generally, see, e.g., *Jub.* 2:30; 6:18; Philo *Creation* 17, 29. Baal’s temples were constructed in the same form in which his house had appeared in ancient myth (Clifford, “Tent,” 226), and Babylonians believed that their glorious Esagila, the temple of Marduk, was situated facing the heavenly Esagila (Cassuto, *Exodus*, 322). For this approach, see also Buchanan, *Hebrews*, 134–35; Montefiore, *Hebrews*, 135–36; Hurst, “Platonic”; cf. also Bruce, “Hebrews or Essenes,” 229–30; MacRae, “Temple.”

1146. See further discussion in Keener and Usry, *Faith*, 139–46, with notes, 201–6.

1147. Dunn, *Acts*, 96. An implicit comparison might be possible in Heb 4:8 (so Montefiore, *Hebrews*, 85; Fuller, “Hebrews,” 11; but cf. Moffatt, *Hebrews*, 52) and is clearer in *Barn.* 6.8–9, but the same problem remains though later writers saw Joshua as a type of Christ (Justin *Dial.* 113) and plays on names were accepted (as noted above). Crawford, “Promised Land,” treats Acts’ relation to the Gospels as analogous to Joshua’s to the Pentateuch; the analogy is reasonable, but Luke, who mentions Joshua only here, probably did not have the idea in mind.

1148. Josephus also uses Ἰησοῦς (altogether 123 times), e.g., both for Moses’s successor (*War* 4.459) and for the later high priest (*Ant.* 11.151). Philo, whose focus is the Pentateuch, uses the name only seven times in his extant work.

wished to avoid this name. The ark continued in the tent even in the promised land (e.g., Josh 3:14; 18:1; 19:51; 22:19, 29; 23:9; 24:18).¹¹⁴⁹ One could conversely argue that the brevity of Luke’s mention reflects a tradition that played down Joshua;¹¹⁵⁰ this, too, would be reading too much into the passage.

The use of the term *κατάσχεσις* for possessing the land shows a partial fulfillment in the land promise to Abram in Acts 7:5 (the only other NT use, though it appears some sixty times in the LXX), but Stephen spends little time on this point of agreement, having focused by contrast on God not being localized in the tabernacle. The theme of disobedient nations being displaced from the Holy Land (7:45; see especially 13:19) fits the implication of judgment on disobedience even in the Holy Land (cf. Luke 19:44; 21:22; Lev 18:28; Ps 78:55–60), preparing for Acts 7:51–53.

II. DAVID WANTS TO BUILD A TEMPLE (7:46)

Even David’s favor with God (7:46) did not cause God to grant his request to build God an earthly temple; this honor awaited his son Solomon (7:47). David’s “favor” before God may connect him with Joseph (7:10), Moses (cf. 7:20), and perhaps Stephen (6:8). Noah (Gen 6:8), Moses (Exod 33:17), and Mary (Luke 1:30) had “found favor” with God (a Hebrew idiom for being pleasing to him). Luke’s audience would already know that David requested permission to build a temple for God. Yet Luke’s biblically informed ideal audience would also recognize, and expect Stephen’s biblically informed audience within the narrative world to recognize, that God honored yet politely refused David’s request (his son would build the temple, 1 Kgs 8:17–19). This turn of events is obliquely implied in Acts 7:47, where Solomon has the privilege of building the house. Although the Chronicler attributes God’s refusal of David to his bloodshed (1 Chr 22:8; 28:3), part of God’s response concerns the fact that God needs nothing more than a wandering tabernacle (2 Sam 7:6–7;¹¹⁵¹ 1 Chr 17:5–6). God deigned to inhabit a fixed and humanly magnificent sanctuary, but God did not need it (cf. Acts 17:24–25; 1 Kgs 8:27). This does not make the stationary temple negative; God blessed David for the good *intention*, promising to build David a house (2 Sam 7:11–14), and allowed Solomon to build a house for God (see comment on Acts 7:47). The point is not that the temple was bad but that it was not essential.

The textual variant in Acts 7:46 is difficult; the early manuscripts and more difficult reading favor “house of Jacob,”¹¹⁵² but the sense plainly favors “God of Jacob.” “Dwelling place for the God of Jacob” clearly echoes Ps 132:5 (131:5 LXX), even down to *σκήνωμα* and the Davidic context.¹¹⁵³ (It is clear from Acts 2:30 that Luke knows this psalm and finds its Davidic promise significant.)¹¹⁵⁴ The context also presupposes that meaning here (*αὐτῶ* in 7:47 and “God does not dwell” in 7:48).¹¹⁵⁵ The context speaks

1149. Dunn, *Acts*, 96.

1150. Samaritans may have embraced Joshua only in the Middle Ages, and even then not as part of their canon (Bowman, *Documents*, ii).

1151. On 2 Sam 7:1–17 in early Judaism (including the OT, 4Q174, and the NT), see, e.g., Robert, “Avenir.” Some sectarians applied 2 Sam 7:10–11 to an eschatological house (4Q174 1 I, 1–2).

1152. Metzger, *Textual Commentary*, 351–53; Witherington, *Acts*, 272.

1153. This term is rare in other early Christian texts (which apply it to the mortal body, 2 Pet 1:13–14; *Diogn.* 6.8) but frequent in the LXX after the Pentateuch. On the use of Ps 132, cf. also van de Sandt, “Presence.” *Pace* some interpreters, however, the use of Ps 132 does not justify playing off the tabernacle against the temple with the latter as negative (Rhodes, “Tabernacle,” 123–24).

1154. It reaffirms the promise of a Davidic dynasty (Ps 132:11–12, 17); Acts 2:30 quotes Ps 132:11.

1155. Johnson, *Acts*, 133. Cf. “God of Jacob” in Luke 20:37; Luke might play on “house of Jacob” (Luke 1:33), but if so, the sense in this case seems to me obscure (unless intended to blend both as “the house of Jacob’s God”; cf. Isa 2:3). Both expressions are familiar in the OT.

not of Jacob's descendants (the usual meaning of "house of Jacob"; cf. Luke 1:33; Acts 7:42) but of a dwelling place for Jacob's God (and since David found favor with God, we should not think of an idolatrous sense of even a divine "house" here). The context does use "house" as temple (Acts 7:47, 48, 49),¹¹⁵⁶ but 7:46 does not clearly speak of a "house (of God)" in either reading. "God" may have been inadvertently omitted from "house of Jacob's God" from the start, though it would seem strange that the error was not noticed until later scribes.

Thinking of the temple context may have precipitated an early scribe to change "God" to "house" or perhaps the original person dictating (or the scribe), though meaning "God," to inadvertently say (or write) "house" (leaving it to later scribes to try to correct it). Possibly "house" appears as a euphemism for the divine name (though it is rare¹¹⁵⁷ and Stephen is not given in this speech to euphemisms, nor does Luke stress dwelling in God as in Johannine literature); one might compare the later rabbinic circumlocution "place."¹¹⁵⁸ It may serve a *gezerah shevah* function, connecting the temple "house" (7:47, 49) with the "house of Israel" in 7:42. Whatever the textual history (or if Luke somehow used "house" as a euphemism for God), the quotation from the psalm and the context leave the final sense clear enough.

III. SOLOMON'S TEMPLE (7:47)

Luke uses Stephen's challenge to centralized worship to promote mission to the ends of the earth (1:8),¹¹⁵⁹ but this does not mean that he would view the movable tabernacle more favorably than the immobile temple. Many scholars view Stephen's argument as favoring the tabernacle over the stationary temple (cf. 2 Sam 7:5–7).¹¹⁶⁰ There might be an element of truth here, in that a tabernacle proved more flexible and transitory, but it should be remembered that both centralized worship and tabernacle worship were explicitly viewed earlier in the passage as having been perverted (Acts 7:43). Those who think Stephen regarded the temple's construction as, indeed, wrong go beyond the evidence of the text; this cannot be Luke's view (cf. Luke 19:46; Acts 2:46), and we cannot certainly reconstruct Stephen's view apart from Luke's text. Granted, some Greek thinkers and those who influenced them rejected temples (e.g., Zeno in Plut. *Stoic Cont.* 6, *Mor.* 1034BC).¹¹⁶¹ Even some who allegorized the temple (e.g., Philo *Spec. Laws* 1.66) affirmed the sanctity of the actual building (e.g., Philo *Embassy* 212, 278); see comment on Acts 2:46.

1156. See Kilgallen, *Speech*, 90, who argues that the term is necessary for this connection; cf. Barrett, *Acts*, 372; Gaventa, *Acts*, 129.

1157. If it appears in Marmorstein's thorough *Names*, I did not find it, nor do I recall it elsewhere, though cf. God as a "dwelling place" (Deut 33:27; cf. Pss 18:2; 31:3; 32:7; 61:4; 71:3; 91:1–2; 119:114; 144:2; John 14:2).

1158. For God as the "omnipresent one" in rabbinic sources, see 3 *En.* 18:24; *m. 'Ab.* 2:9, 13; 3:14; *t. Pe'ah* 1:4; 3:8; *Šabb.* 7:22, 25; 13:5; *Roš Haš.* 1:18; *Ta'an.* 2:13; *B. Qam.* 7:7; *Sanh.* 1:2; 13:1, 6; 14:3, 10; *Sipre Num.* 11.2.3; 11.3.1; 42.1.2; 42.2.3; 76.2.2; 78.1.1; 78.5.1; 80.1.1; 82.3.1; 84.1.1; 84.5.1; 85.3.1; 85.4.1; 85.5.1; *Sipra VDDen.* *pq.* 2.2.4.2; 4.6.4.1; *Sipra Sav M.d. par.* 98.7.7; *Sipra Sh. M.d.* 99.1.4, 5, 7; 99.2.2, 3; 99.3.9, 11; 99.5.13; *Sipra Qed. par.* 1.195.2.3; *pq.* 7.204.1.4; *Sipra Emor pq.* 9.227.1.5; *Sipra Behuq. pq.* 5.266.1.1; *Sipre Deut.* 1.8.3; 1.9.2; 1.10.4; 2.1.1; 11.1.1; 21.1.1; 24.3.1; 26.4.1; 28.1.1; 32.3.2; 32.5.8; 33.1.1; 37.1.1, 3; 38.1.1, 3; see Keener, *Marries Another*, 150n27, for fuller documentation.

1159. The idea that devotion to the temple could hinder Samaritan outreach is probable (Luke 9:53), but the idea that Stephen opposed it for this reason (Scharlemann, "Speech: Lucan Creation?") lacks sufficient support in the passage.

1160. Foakes-Jackson, *Acts*, 64 (comparing Heb 8:1–5); Bruce, *Acts*¹, 175–76; Munck, *Acts*, 65; Dahl, "Abraham," 146; Simon, *Stephen and Hellenists*, 52–53; van de Sandt, "Presence." See the stronger counter-argument in Hill, *Hellenists*, 71–78; Larsson, "Temple-Criticism."

1161. Boring, Berger, and Colpe, *Commentary*, 316–17 (on Acts 7:48–49), cite also Clem. Alex. *Strom.* 5.11.76.

The more nuanced position that Stephen accuses many of his contemporaries of “verging on idolatry,”¹¹⁶² however, seems likely. As noted at Acts 6:14, many pre-70 Jews believed that the temple was invincible,¹¹⁶³ although other Jews challenged this notion (not least among them Jesus of Nazareth).¹¹⁶⁴ The best defense against a charge (here, cf. 6:11–14) was to be able to deny it; the next best defense was to admit that one acted as charged but that what one did was genuinely “lawful [ἔννομον] and just [δίκαιον] and noble and to the public advantage” (*Rhet. Alex.* 4, 1427a.24–27 [LCL, 313]).¹¹⁶⁵ If Stephen challenges the temple or its abuse, it is, he argues, a challenge justified by Scripture.

Jewish writers usually depicted Solomon favorably for Hellenistic readers, such as much of Luke’s ideal audience.¹¹⁶⁶ Still, for Luke, building (which can refer to sponsoring, Luke 7:5) material projects, an expensive activity involving human honor (11:47; 14:28–30), is of tangential relevance (cf. 12:18; 17:28) compared with spiritual building (6:48–49; 20:17; Acts 9:31; 20:32). (Luke expects Jesus to offer the ultimate fulfillment of 2 Sam 7:13, David’s son building him a house and reigning forever; see Luke 1:32–33; Acts 2:30.) After noting that Solomon constructed a house for God, Stephen quotes God in Isaiah: “What sort of house will you construct for me?”

IV. NOT IN HUMANLY BUILT TEMPLES (7:48)

Orators sometimes made an ambiguous, controversial statement to invite attention;¹¹⁶⁷ given the temple charge against Stephen (Acts 6:11–14), there is no question that his use of Isa 66:1 will arouse attention. For “the Most High,” see comment on Acts 16:17. The term used here for “made by hands” (χειροποίητος) was virtually a technical term in Greek-speaking Judaism for idols (cf. also 19:26).¹¹⁶⁸ The LXX normally applied it to idols, emphasizing the foolishness of worshiping what humans create (Lev 26:1, 30; Isa 2:18; 10:11; 16:12; 19:1; 21:9; 31:7; 46:6; Dan 5:4, 23).¹¹⁶⁹ Subsequent Jewish writers also applied this language to the folly of idolatry (e.g., *Sib. Or.* 3.722, where ἔργα . . . χειροποίητα is equivalent to εἰδωλα in 3.723; second century B.C.E.).¹¹⁷⁰ Philo spoke of divine punishment on those who served idols “made with hands” (χειροποιήτοις; *Mos.* 1.303) and condemned the wilderness bull idol as “the work of their hands” (χειροποίητον; 2.165). A dedicatory inscription by one Pamphylia, apparently a God-fearer, likewise distinguishes the true God from those made with hands.¹¹⁷¹ In contrast to idols, the true God was not made by hands (*Sib.*

1162. Lake and Cadbury, *Commentary*, 81; cf. Dunn, *Acts*, 90–91; Kilgallen, *Speech*, 92 (perhaps more strongly). Some myths spoke of deities building their own houses or temples (e.g., Baal Epic; *Enuma Elish* 6.62); Solomon’s building of it offers a fitting contrast (though divine orders to build are more common; Cassuto, *Exodus*, 322; de Vaux, *Israel*, 277; Lurker, *Symbols*, 120), but this would be lost on a first-century audience.

1163. E.g., *Let. Aris.* 100–101; see comment on Acts 6:14. Cf. Tob 1:4 (but Tobit recognizes its destruction, cf. 1:10).

1164. E.g., *Test. Mos.* 6:8–9; Mark 13:2; see comment on Acts 6:14.

1165. Orators also debated the letter and intent of the law, arguing either that the just intent was narrower than the explicit law or that it was broader than it (Hermog. *Issues* 40.6–16; 40.20–41.13; cf. 83.19–88.2, esp. 87.14–18; Heath, *Hermogenes*, 77); sometimes one must also show which laws should take precedence over others (Hermog. *Issues* 87.2–9).

1166. For the positive presentation of Solomon to the Hellenistic world, see Feldman, “Apologist of World”; on Solomon in general in early Judaism, see Mayer and Rühle, “Salomo.” (Some later rabbis, by contrast, said that only building the temple kept him from being classed among the kings who were damned; *Pesiq. Rab.* 6:4.)

1167. See Black, “Oration at Olivet,” 88, on *controversia* (citing Quint. *Inst.* 9.2.65–95; Mark 13:14).

1168. Simon, *Sects*, 100; Kilgallen, *Speech*, 90. οτ terms for idols include those emphasizing their shaping or forming (see Barrett, “Idols,” 353).

1169. Cf. MSS of Dan 6:28; cf. Bel 5. Possibly idol sanctuaries are in view in Isa 16:12 LXX.

1170. Also *Sib. Or.* 3.606, 618; *Jub.* 20:8; cf. similar language in *Sib. Or.* 3.586.

1171. See van der Horst, “Waarachtige”; idem, “New Altar?”

Or. 4.6–7; *Jos. Ant.* 8.280).¹¹⁷² The echo of Acts 7:41 (χειρῶν) implied in “by hands” (the first part of χειροποιήτως) drives home the point (cf. ποιέω in 7:40, 43; the compound with this verb in 7:41). (See further documentation in comment on Acts 7:41.) By contrast, it was God’s own “hand” that “made” everything (7:50), evoking the biblical image of folly in a created being worshiping what it created (Isa 46:6–7).¹¹⁷³

Early Christians may have developed the notion of a temple not made by hands, attested in Acts 7:48, from Jesus’s teaching (distorted in Mark 14:58, which uses ἀχειροποίητον) because they employed χειροποίητος for mere human temples (also Acts 17:24; Heb 9:11, 24; cf. 2 Cor 5:1; Heb 8:2) or physical ritual (Eph 2:11; cf. Col 2:11).¹¹⁷⁴ Luke also looks more to a messianic house (Acts 15:16) and spiritual building up (9:31), with Jesus as the keystone (4:11); see comment on Acts 7:47. Early Christians may have contrasted the “spiritual” temple (Eph 2:21–22; 1 Pet 2:5) and worship “in the Spirit” (Phil 3:3; John 4:24)¹¹⁷⁵ with the stone temple made with hands, massive but not eternal.¹¹⁷⁶ The Qumran scrolls also spoke of the Qumran community as a sort of spiritual house or temple (1QS VIII, 5–10).¹¹⁷⁷ Stephen is able to demonstrate how God does not dwell in handmade temples by the rhetorical protest against houses “built” by Isaiah’s audience in the text quoted in Acts 7:49 (the use of hands being implicit in this case).

Some would translate, “It is not the Most High who dwells in temples made with hands”—that is, rather, only false gods do.¹¹⁷⁸ This is certainly not Luke’s view (Luke 2:49; Acts 2:46) and probably not his portrayal of Stephen’s either; Luke regards Stephen as a reliable, Spirit-inspired character (Acts 6:5; 7:51). One need not add harshness to this speech; it is harsh enough as it is! It is possible that a harsher source stands behind Luke’s report here; it is the context of the rest of his work that domesticates it. But the language used does not require total rejection of the temple as originally sanctioned by God or of biblical support for it (see comment also on Acts 7:47, 49).¹¹⁷⁹ It does imply that his opponents’ wrong approach to the temple has become idolatrous.

V. ISAIAH’S TESTIMONY (7:49–50)

Via the principle of *gezerah shevah*, Stephen’s application of “related” wording in Isa 66 (“house,” “build”) qualifies the interpretation of 2 Sam 7:13 implied in Acts 7:47. “What sort of house will you build for me?”¹¹⁸⁰ responds to the claim that Solomon built God a house (7:47), relativizing the importance of Solomon’s temple.

1172. Nor, added one source, did he have a house (*Sib. Or.* 4.8). Neither the Lord (2 *En.* 33:4, esp. A) nor his throne (22:2) was made with hands.

1173. Poetically speaking, one could claim that God made the Holy Land a sanctuary by his own hands (Exod 15:17). Pagans might understand the value of the concept; cf. the deity’s palace built not *humanis manibus* but by the deity’s power (*Apul. Metam.* 5.1; cf. Baal’s divinely built palace, e.g., in Clifford, “Tent,” 226; Cassuto, “Palace,” 55; for divine instructions, Gudea Cylinder A in, e.g., Cassuto, *Exodus*, 322).

1174. For the new Christian use of the traditional LXX terminology, see also Biguzzi, “Mc. 14, 58.”

1175. Contrasting circumcision in Phil 3:3 and the old temple in John 4:20–24 (see discussion in Keener, *John*, 613–18).

1176. See Hanson, *Unity*, 134 (esp. on Eph 2:22; also 1 Pet 2:5 with its “living stones”).

1177. See further Kelly, *Peter*, 90; 4Q164 1 2–3; 4Q511 35 2–3; themselves as the cornerstone in 1QS VIII, 7. Cf. the Teacher of Righteousness in 4QpPs 37 (4Q171) III, 16. Such views were not incompatible with an eschatological temple (4Q509 IV, 2, 12); contrast Caquot, “Secte et temple,” emphasizing primarily the latter.

1178. Simon, *Stephen and Hellenists*, 54.

1179. Cf., e.g., the altar “made by hand” associated with idolatry in *L.A.B.* 22:5.

1180. The rhetorical question derives from Isa 66:1, but the oratorical value of rhetorical questions would be widely recognized (see Anderson, *Glossary*, 14, 51, 124; e.g., Cic. *Rosc. Amer.* 1.2; *Phil.* 3.6.15; Mus. Ruf. 11, p. 80.22–25; 13B, p. 90.13–16; 15, p. 98.25–27; Lucian *Tyr.* 10; *Pesiq. Rab.* 13:7; Rom 3:1). The rhetorical question in Acts 7:52 strikes still more forcefully.

Solomon himself recognized that only God's benevolence rendered the best of human temples a suitable dwelling place; not unlike Isaiah, Solomon observed that heaven itself could not contain God (1 Kgs 8:27). The "resting place" in Luke's Septuagint quotation of Isaiah here not surprisingly sometimes refers to the ark (Num 10:35–36; 1 Chr 6:31; 2 Chr 6:41; Ps 131 [ET 132]:13–14; cf. Jdt 9:8); including Isaiah, these references constitute nearly half of the term's occurrences in the Septuagint. Isaiah's implication that a temple is not God's "place" also fits the same point earlier in Stephen's speech (7:7, 33), countering the charge in 6:13–14.

Although homilists may have often begun with a key text, Stephen has reasons for quoting Isaiah only here. One is that a person expounding the Torah could weave in a reading from the prophets afterward; another may be that Stephen's presentation is in chronological sequence, and Isaiah is later than Solomon. But it is also strategic to save his most volatile and explicit text for last, providing him opportunity to preface it with the necessary narrative to drive home his counteroffensive. Homilies did at least sometimes reserve their most significant texts for the end of the homily.¹¹⁸¹

Some scholars argue that, for Stephen, Isaiah's prophecy shows that Solomon's temple was unacceptable (see comment on Acts 7:47)¹¹⁸² or at least (in a more nuanced way) was not God's ultimate design.¹¹⁸³ Yet this is not the only way to read the prophet; ancient readers would not have assumed that Isaiah himself was rejecting the temple.¹¹⁸⁴ Many temples in the ancient world were designed to reveal the heavenly splendor of the deity; localization in a special way was not held to contradict a deity's cosmic rule.¹¹⁸⁵ Nevertheless, Isaiah was undoubtedly opposing inappropriate worship (Isa 66:1–3), comparing temple rituals to idolatry for those whose hearts are impure (66:3), similar to the point of the Amos passage Stephen quotes in Acts 7:42–43. Further, Isaiah's words do relativize the need for earthly temples (cf. the similar argument for sacrifices in Ps 50:8–14); God is not dependent on human provisions as in pagan temple ideology (see comment on Acts 17:25). The earthly temple might be destroyed (Isa 64:11), but God would establish an eschatological one (66:20; cf. 2:1–2). Long after the temple's destruction in 70 C.E., rabbis could freely associate this prophecy of Isaiah with praise of Solomon's temple (*Tg. 2 Chr. 2:5*).¹¹⁸⁶

Isaiah's sense would be sufficient for Stephen's point in its Lukan context; again, we could argue that the original Stephen meant more than Luke allows him to say, but this would necessarily be an argument from silence. Stephen need not reject the temple's usefulness in some ways to regard its abuse as equivalent to idolatry. Even in the OT, support of the temple was conditional (1 Kgs 6:11–13), and prophets warned against dependence on its ritual (Amos 5:21–27; Mic 3:9–12; Isa 1:12–17; Jer 7:4–15).¹¹⁸⁷ Yet likewise, even in the OT, prophets who appeared to threaten the sanctity of the cult with such words invited retribution from the temple establishment (Jer 20:1–2; 26:8–15).

The closing line of this part of Stephen's speech (Acts 7:50) uses Isaiah's words (the first and most relevant line of Isa 66:2, where he ends his quotation) to cast light

1181. Cf., e.g., all the homilies in *Pesiq. Rab Kah.* 16, most of which end with Isa 40:1, whether mentioning it earlier or not. For reserving the harshest part of a speech for the end, see, e.g., Demosthenes's *De corona*.

1182. E.g., Barrett, "Eschatology," 392n1 (simply noting that this is how it "is often taken"); Knox, *Jerusalem*, 44.

1183. Dahl, "Abraham," 146.

1184. Ancient readers approached Isaiah as a single work and would have known of Isaiah's divine encounter in the temple (Isa 6:1–2, 4, 6).

1185. Wright, "Temple," 172, 180.

1186. Isa 66:1 was also echoed elsewhere and earlier (e.g., *1 En.* 84:2).

1187. Johnson, *Acts*, 133. Cf. the principle in Isa 58.

on an earlier biblical theme in the speech, which prepared for it. That God made (ἐποίησεν) everything by his own hand (χείρ, Acts 7:50)¹¹⁸⁸ contrasts with those who “made” their own gods (7:40, 43) with their own hands (7:41); moreover, since God created all by his “hand,” there is no reason to limit God to houses made by human “hands” (7:48). Now Stephen is ready to drive home the application in his *peroratio* (7:51–53).

h. Returning the Charge of Undermining the Law (7:51–53)

Most major characters in Luke-Acts are filled with the Spirit and speak God’s message with signs; the apostles and their signs-working colleagues follow the paradigm of Jesus (in the Gospel) and of Moses (7:36) and the prophets in the OT (Luke 1:17; 4:25–26; 9:8, 19). Likewise, the rejection of the apostles fits the paradigm of Jesus’s rejection (4:24; 13:31–35; 24:19–20) and that of the prophets (6:22–23; 11:47–51).¹¹⁸⁹ Stephen himself follows the pattern of the rejected prophet here (see comment on Acts 7:51).¹¹⁹⁰

Stephen saves both his harshest criticisms (Acts 7:51–53) and most explicit christological statements (7:52, 56) for the end of his speech, just as Paul saves the points least acceptable to his audience for the end of his speech in 17:30–31. Sometimes arguments reserved a special, irrefutable, clinching component for the very end (Cic. *Quinct.* 25.78–80; see comment on Acts 28:17–31, esp. 30–31). Orators often also recapitulated points toward the end (or sometimes earlier, e.g., Demosth. *Fals. leg.* 177), but Stephen was unable to offer these points explicitly earlier.

I. STEPHEN’S RHETORIC IN 7:51–53

Had Stephen’s accusers charged him with opposition to the law (Acts 6:11–14)? Stephen now returns the charge with interest (7:51–53). It was in fact his accusers who were the law’s violators—spiritually uncircumcised (7:51), murderers of the prophets (7:52), and general disobeyers of the law (7:53).

Returning charges against one’s accusers was standard rhetorical practice in all periods of Greek and Roman forensic rhetoric.¹¹⁹¹ Rhetorical handbooks advised blaming one’s opponents “for both the charge and the lawsuit . . . at the outset” (Dion. Hal. *Lysias* 24 [LCL, 1:67]). Thus a speaker may concede that an offense is worthy of death, then note that it is his accuser and not himself who is really guilty of the offense (Xen. *Hell.* 2.3.37). In an adaptation of the rhetorical technique called apostrophe, the speaker could shift suddenly from addressing the entire crowd to singling out the accuser, denouncing him, for example, as “you lunatic” (Libanius *Declam.* 36.22) and “You malicious accuser” (36.23).¹¹⁹²

When one Timarchus prepared to prosecute Aeschines in the fourth century B.C.E., Aeschines preemptively charged him, won the case, and hence discredited him (Aeschines *Timarchus*). When Demosthenes accused Aeschines of taking bribes, Aeschines replied that the charge was not credible because Demosthenes was the one

1188. On this OT usage, see further comment on Acts 7:41.

1189. Tannehill, *Acts*, 32–33.

1190. Denova, *Things Accomplished*, 162, 167–68. For Luke’s characterization of Stephen as a prophet, see Stronstad, *Prophethood*, 86–90.

1191. E.g., Eurip. *Cretans* frg. 472e.33–35; Thucyd. 3.61.1; Cic. *Rosc. Amer.* 30.82–45.132; Hermog. *Inv.* 4.14.211; see further comment on Acts 24:19; 28:19. Others have noted that Stephen’s speech countercharges his accusers (O’Neill, *Theology*, 79; Kilgallen, “Speech of Stephen”; Neagoe, *Trial*, 174); for harshness in the invective of this period, see Rutledge, “*Delatores*.”

1192. Trans. Heath, *Hermogenes*, 202. On apostrophe, see further *Rhet. Her.* 4.15.22; Usher, “Apostrophe”; Rowe, “Style,” 139; Porter, “Paul and Letters,” 581; Anderson, *Glossary*, 25.

involved with bribery (Aeschines *Embassy* 3). The treasonous Philocrates used not Aeschines but Demosthenes (*Embassy* 14, 56). “Consider whether . . . it is I whom Demosthenes has accused, or whether on the contrary he has accused himself in my name” (*Embassy* 69 [LCL, 211]).

Cicero in the first century B.C.E. repelled a charge from Clodia by observing that she was sexually notorious, though he promised to “say no more than what is necessary to repel the charge” (*Cael.* 13.31 [LCL, 13:445]), rhetorically insinuating that she was worse than his best evidence or hearsay. He spends much of the speech accusing her; for example, he implies her guilt for her husband’s earlier death, which, he claims, grieves him so much that he must return to the defense (24.60). Needless to say, orators who returned charges made the process of accusing such orators or their clients unpleasant enough, it was hoped, to deter unnecessary charges in the future.

Stephen does not, however, simply charge the false witnesses (Acts 6:11–13), which Hellenists would have considered good rhetorical form. Instead Stephen here violates a cardinal rule of forensic rhetoric (though he was hardly the only person to do so). Shaming one’s accusers was standard fare (cf. comment on Acts 24:18–19), but one should not reprove one’s *judges* even if they protested one’s words, lest one stir their anger (*Rhet. Alex.* 18, 1433a.20–24). The speaker in a defense speech was expected to praise the judges or jurors “for their justice and competence in their office” (*Rhet. Alex.* 36, 1442a.14–16 [LCL, 415]).

A speaker finishing a case would often leave the matter in the hands of the judges or jurors—for example, among classical Athenian orators: “You are judges of my words” (Aeschines *Tim.* 196 [LCL, 155]); “It remains for you . . . to give the verdict that is just” (Aeschines *Ctes.* 260 [LCL, 511]); one trusts that the jurors, his hearers, “will vote what is just” (Lysias *Or.* 14.47, §144 [LCL, 363]); “For it is you, and none else, who are judges of their worth” (Lysias *Or.* 16.21, §147). One did not normally remind the judges that one had no choice but to leave matters with them; appearing to trust their jurisdiction created a positive rhetorical effect. An orator might insinuate that the judges themselves knew what was right; if his hearers were not the judges, Aeschines contended, he would summon them as witnesses because they themselves knew the truth of his claim (*Tim.* 89).

The Roman orator Cicero also knew how to “encourage” a jury: “[Vote with] the courage of your convictions. . . . Your courage, justice, and honour will . . . meet with high approval [from the one who chose for the jury] the best, the wisest, and the most brave” (*Mil.* 38.105 [LCL, 14:123]).¹¹⁹³ Cicero was sometimes bolder, effecting rhetorical *παρηγορία* (on which see comment on Acts 4:13): for all his guilt, Cicero charges, Verres “is no guiltier than those who, sworn to vote truly, have voted for the acquittal of this man loaded with so many monstrous and horrible crimes” (*Verr.* 2.1.4.9 [LCL, 7:131]). But if such words contained the hint of potential reproach, Cicero quickly assures his hearers that he will prosecute and they will convict so clearly that Verres cannot escape by any stealth (2.1.4.10). (Verres skipped town before the trial was over.)

II. POSITIVE PORTRAYAL OF STEPHEN

How would Luke’s audience have received this portrayal of Stephen? Probably quite favorably. Although attacking one’s judges was poor rhetoric, it was noble philosophy.¹¹⁹⁴

1193. Speakers would also cast themselves on the will of the jury, seeking to arouse compassion (see Anderson, “Glossary,” 54, on *ἐπιτροπή*), although, of course, one was at the jury’s mercy anyway.

1194. Cf. the positive portrayal of Nestor as not flattering but reproving the masses (Philost. *Hrk.* 26.1). On aristocratic condemnations of demagogues, see comment on Acts 4:21; or Keener, *John*, 732.

Thus Socrates, by “exalting” (μεγαλύνειν) himself, angered his jury (*Xen. Apol.* 32) and hence provoked his own execution (*Apol.* 33). Yet it was not Socrates’s accuser who overcame Socrates but the reverse, for Socrates accomplished the greater deeds and achieved the greater reputation over time (*Apol.* 29). Xenophon opined,

Whereas it is the custom of defendants to curry favour with the jury and to indulge in flattery and illegal appeals, and many by such means have been known to gain a verdict of acquittal, he rejected utterly the familiar chicanery of the courts; and though he might easily have gained a favourable verdict by even a moderate indulgence in such stratagems, he chose to die through his loyalty to the laws rather than to live through violating them.¹¹⁹⁵

Thus Socrates allowed himself to be convicted, but “God and the truth sat in judgment over” the court (Max. Tyre 3.8 [Trapp, 30]).¹¹⁹⁶

It was a moralist commonplace that judges’ decrees passed judgment on (i.e., revealed the character of) the judges themselves no less than the defendants (Publ. Syr. 698).¹¹⁹⁷ A prosecutor might claim that the court was on trial (in contrast to the safer rhetorical approach mentioned above) if he was sure he could get away with it. Thus Cicero employs such affected boldness, claiming that the entire world can see Verres’s guilt and so it merely waits to see what the judges will decide. “What still remains on trial? . . . It is the members of this Court; and also, to be candid, it is yourself” (*Verr.* 2.5.69.177 [LCL, 8:665]).

Still, only one who was certain of one’s judges’ agreement or who deliberately wished to provoke them would emphasize this point to them. Epictetus complains about a friend who ruined his case by telling his judges that they were on trial; such behavior was appropriate only if one wished, like Socrates, to provoke the anger of the judges (*Diatr.* 2.2.17–18). If one really wished to be condemned, he advised, one could do it more easily by refusing to answer the summons (2.2.19–20). Probably more relevant here, one might also speak boldly if one expected to be condemned anyway (cf. Tac. *Ann.* 4.34–35).

Perhaps most relevant is that the Jewish martyr tradition included denunciations of tyrannical persecutors (2 Macc 7:14–19; 4 Macc 5–12).¹¹⁹⁸ One martyr, for example, allegedly hurled his bowels at the multitude, expecting to receive them back at the resurrection (2 Macc 14:46).¹¹⁹⁹ Martyrdom stories functioned as legitimation,¹²⁰⁰ so that sages’ willingness to die could vindicate their authenticity and sometimes (as in the case of Socrates) advance their cause.¹²⁰¹ Nevertheless, Gentile, Jewish,

1195. *Xen. Mem.* 4.4.4 (LCL, 309). Plato makes even more of Socrates as a martyr; Socrates also provoked his death in the stories in Diog. Laert. 2.41–42. The orator Maximus of Tyre, however, opined that Socrates must have really kept silent, because speaking truth could only anger his jurors needlessly (*Or.* 3.7; cf. Philost. *Vit. Apoll.* 8.2; Jesus in 1 Pet 2:23); under normal circumstances, answering a charge with silence aggravated it (Publ. Syr. 291).

1196. For “turning of the tables” regarding Socrates’s trial, see also Plato *Apol.* 39CD (Trapp, *Maximus*, 30n22). For Socrates as a model martyr, see comment on Acts 17:19.

1197. An orator could claim that outside observers have come to evaluate whether Athens could not only make good laws but execute their punishments (Aeschines *Tim.* 117–18). See further examples below on Acts 7:55–60.

1198. Conzelmann, *Acts*, 56. On martyr stories, including and in addition to most of what follows here, see also Keener, *Matthew*, 607–8; idem, *John*, 1068–69. Berthelot, “Idéologie maccabéenne,” argues that 1 Maccabees favored armed resistance but that 2 Maccabees favored martyrdom, an emphasis naturally developed in post-Bar Kokhba rabbis.

1199. Greeks also respected sturdy resistance; e.g., Zeno of Elea pretended to lean toward a tyrant’s ear to speak in it but bit it off instead (Diog. Laert. 9.5.26).

1200. Talbert, *Mediterranean Milieu*, 110–12.

1201. See *ibid.*, 111.

and Christian sources warn against deliberately seeking martyrdom;¹²⁰² Stephen's boldness in declaring truth provokes martyrdom because of his unjust situation, not because death rather than proclamation was his primary aim. Martyr accounts provided useful propaganda (in the neutral sense of the term); a wide audience could respect the courage and conviction of martyrs even if it might not agree with all their views.¹²⁰³

Jewish sources understood that God was the true judge who would decide the case¹²⁰⁴ and that judicial status could be reversed before God (Isa 54:17; cf. Jer 50:34; 51:36; Lam 3:58–66). God pleads David's case against Saul in 1 Sam 24:15 (cf. 25:39); God pleads the case of the afflicted against their adversaries in Jer 50:34; 51:36; Lam 3:58; in Job 16:19–21, God is Job's witness who can defend him before himself.¹²⁰⁵ In *m. 'Ab.* 4:22, God is judge, witness, and accuser at the judgment;¹²⁰⁶ Amoraim could observe that in God's court, he is judge, defender, and accuser.¹²⁰⁷

Ancient moralists and historians praised honorable and heroic deaths, whether within martyr stories or not.¹²⁰⁸ Writers may have also drawn on a stock arsenal of motifs when expanding martyr stories for dramatic purposes.¹²⁰⁹ At the same time, analogous story lines illustrate the nuances with which an ancient audience would have heard the story, but need not demonstrate that people simply invented all stories of martyrs from whole cloth. Those who stood against the establishment regularly invited repression, and numerous genuine martyrdoms provided the foundation for this sort of story. Some features characteristic of martyr stories, such as betrayal, refusal to compromise, and sentencing¹²¹⁰ (only one of which actually occurs here), reflect the common pattern of ancient law and Jewish resilience rather than borrowed motifs.¹²¹¹

An account of martyrdom by itself need not indicate a specific literary genre (although it reflects a theme of widespread interest). For example, where possible, Diogenes Laertius ends his discussions of the lives of eminent philosophers with their death.¹²¹² That a biographer would include a deceased subject's death is not surprising, especially if it was noteworthy; martyr stories, which could vindicate their protagonist's devotion, offered more rhetorical effect than other death accounts. A legendary figure might even receive a legendary martyrdom;¹²¹³ in Stephen's case, however, it is precisely his martyrdom that makes him most noteworthy, and so it is unlikely to reflect a later invention.

1202. *Ibid.*, 112–14. Similar reservations appear in Luke-Acts (Luke 22:42; cf. Acts 14:6), where martyrs do not seek out martyrdom (Talbert, *Mediterranean Milieu*, 114–15), though Stephen, like Jesus, surely expects it. Rabbinic admonitions concerning circumstances requiring martyrdom may function more as hortatory rhetoric than as a considered plan (Passamaneck, "Mandate").

1203. Cf., e.g., Iamblichus's report (for a probably less committed audience) about the willingness of Pythagoras's disciples to die rather than tread on a bean field (Iambl. *V.P.* 31.191, 193; 32.214). On Stephen's boldness, see discussion in Shelton, "Boldness," 315–17.

1204. See further discussion in Keener, *John*, 956–60, 1032–33.

1205. Cf. Hanson, *Gospel*, 177.

1206. Elsewhere God bears witness on behalf of the righteous (4 *Ezra* 7:94).

1207. *Exod. Rab.* 15:29; cf. *Ruth Rab.* proem 1.

1208. E.g., Plut. *S. Kings*, Epameinondas 2, *Mor.* 192C; cf. accounts of Socrates's brave end (Xen. *Apol.* 1).

1209. Compare, e.g., the mother in Maccabean accounts with the Spartan mother Argileonis in Plut. *S. Sp. Wom.*, *Mor.* 240C. Cf. Robbins, *Jesus the Teacher*, 185, following Nickelsburg, "Genre," 156, on the tradition of a righteous sufferer vindicated by God.

1210. Boring, Berger, and Colpe, *Commentary*, 152.

1211. On the diversity of Jewish martyr stories, see Van Henten, "Prolegomena."

1212. E.g., with Cleanthes in Diog. Laert. 7.5.176. Against a rigid genre, Philodemus *On Death* 33.7–9 notes that many righteous death accounts lack common features.

1213. Cf. *Life of Aesop*, end, in Drury, *Design*, 29. This is not to deny the possibility of a historical figure behind the Aesop stories (Kanavou, "Names").

III. RESISTING GOD'S SPIRIT (7:51)

The purpose of Stephen's recent indictment of their "ancestors" (7:39, 44; cf. 7:9–11) becomes obvious as Stephen climaxes the challenge that they have repeated their ancestors' crime of rejecting a deliverer (on ancestral ways, cf. also comment on Acts 23:6). His hearers' resistance against the Holy Spirit places them in the same category as those who rejected the biblical prophets (Acts 7:52; cf. Isa 63:10). The relevant LXX use of the same verb, ἀντιπίπτω, applies to Israel's rebellion in the wilderness (Num 27:14).¹²¹⁴ The present tense, however, suggests that they are currently resisting the Spirit's message;¹²¹⁵ given the frequent association of the Spirit with inspired speech (Acts 1:8; 2:17–18; 4:31; cf. 6:8),¹²¹⁶ Stephen is placing himself in the line of the prophets that climaxed with Jesus. Stephen, after all, speaks by the Spirit (6:10; cf. 6:3, 5).¹²¹⁷

Thus, as they rejected and killed the prophets (7:52), Stephen apparently essentially invites them (and certainly at least expects them) to kill him, thereby confirming his message and prophetic status (Luke 6:22–23).¹²¹⁸ Their continued resistance against the Holy Spirit (cf. Acts 5:32), however, means that they not only speak against Jesus but are in danger of blaspheming the Holy Spirit (Luke 12:10) through his witnesses when they are on trial (12:11–12).¹²¹⁹ If we envision the municipal aristocracy as part of Stephen's audience (Acts 6:12, 15; 7:1), the charge of opposing Jesus is directly applicable (4:10; Luke 22:2; cf. Acts 4:27), but he has already traced out a broader pattern about the frequent recalcitrance of God's people.

As here (and often in Luke-Acts and the NT), the condition of "hearts" is important throughout the speech (Acts 7:23, 39) and in its effects (7:54). "Stiff-necked"¹²²⁰ and uncircumcised in heart¹²²¹ and ears¹²²² was familiar Jewish language, though not, of course, normally directed against one's judges. "Stiff-necked" and (by implication) uncircumcised hearts appear together in Deut 10:16, which calls Israel to repentance, as Stephen presumably does here (see comment below). Israelite prayers of penitence recalled the stubbornness of the ancestors in the wilderness (Neh 9:16–17).¹²²³ That they were "hard-necked" (σκληροτράχηλοι) resembles those who later slandered

1214. Also Bruce, *Acts*¹, 177.

1215. For a connection between the Spirit and suffering in Luke-Acts, see Mittelstadt, *Spirit*; Warrington, "Suffering"; on Stephen as "Spirit-led martyr," see 103–16 (in Mark, cf. Keener, *Spirit*, 49–90, esp. 70–71). Luke-Acts especially connects the Spirit with proclamation but, in turn, connects proclamation with suffering.

1216. Cf. Neh 9:30; Sir 48:24; Philo *Flight* 186; Keener, *Spirit*, 10–13; Menzies, *Development*, 53–112; Turner, *Power*, 86–104; see further discussion in the commentary introduction, Keener, *Acts*, 1:534–37.

1217. On Stephen as a prophetic figure, see Stronstad, *Prophethood*, 86–90.

1218. When used more explicitly (but also more ironically), the rhetorical technique *permissio* or *epitrope* was often used by speakers, who pretended to dare the audience to contradict their position (Rowe, "Style," 147, citing, e.g., Demosth. *Fals. leg.* 57; Cic. *Cat.* 1.5.10; cf. Porter, "Paul and Letters," S82, citing Gal 3:2; cf. somewhat differently Anderson, *Glossary*, 54). For a virtual invitation to follow up one's previous evil by killing the speaker, see Sil. It. 11.254–55.

1219. This arrangement of the context in Luke appears different from Matthew's emphasis on blasphemy against the Spirit (cf. Matt 12:18, 28, 31–32; Keener, *Matthew*, 360, 364–66).

1220. See the exact wording in LXX Exod 33:3, 5; 34:9; Deut 9:6, 13; Prov 29:1; Sir 16:11; Bar 2:30; also note Exod 32:9; 2 Kgs 17:14; 2 Chr 30:8; 36:13; Neh 9:16–17, 29; Isa 48:4; Jer 7:26; 17:23; 19:15; 1 Esd 1:48; cf. *Jub.* 1:7, 22; *Pss. Sol.* 8:29/35; *Test. Sim.* 6:2. The cluster of such terms in the account of the golden calf is relevant here (Acts 7:40–41).

1221. That is, spiritually pagan or Gentile (Lev 26:41; Jer 9:26; Ezek 44:7, 9; cf. perhaps 1QS V, 26).

1222. Cf. 1QH^a XXI, 5. For uncircumcised lips, 1QH^a X, 18. The idea of shutting ears and eyes against God's message was familiar (e.g., Prov 21:13; Isa 6:10; 33:15; Jer 6:10; see Acts 28:27) and reflects a Hebrew idiom (e.g., Lam 3:56).

1223. With Soards, *Speeches*, 151.

the Way because they were “hardened” (ἔσκληρύνοντο, Acts 19:9).¹²²⁴ One could pile up cognate or other similar-sounding words, as here, to drive home one’s point.¹²²⁵

Qumran scrolls condemned those walking in the “stubbornness” of their “hearts.”¹²²⁶ Some later rabbis claimed that Jews in the Diaspora were stiff-necked.¹²²⁷ Spiritual deafness occasionally appears alongside the more common image of spiritual blindness (cf. Acts 28:27; 1 *En.* 90:7).¹²²⁸ “Ears” functioned as a natural metonymy for listening (e.g., Luke 1:44; 8:8; 9:44; 14:35; Acts 11:22);¹²²⁹ the prophets also denounced Israel for closed ears (e.g., Jer 6:10; see Isa 6:10 in Acts 28:27; cf. comment there). Here the hearers confirm the charge literally by covering their ears (Acts 7:57).

God’s ideal was always that his people’s hearts be circumcised; he called them to circumcise their hearts (Deut 10:16; Jer 4:4) and promised that he would someday turn their hearts to him in this way (Deut 30:6). Scripture complains about uncircumcised hearts (Lev 26:41), which made Israel’s people like spiritual pagans (Jer 9:26; cf. Ezek 44:7, 9).¹²³⁰ Some later Jewish thinkers continued this emphasis; God would circumcise Israel’s heart (*Jub.* 1:23);¹²³¹ God’s servants must circumcise their desire (or inclination; lit., *yetzer*) and remove what was hard (1QS V, 5);¹²³² the wicked leader failed to circumcise his heart (1QpHab XI, 12–13, esp. XI, 13).¹²³³ Rabbi Samuel later prayed that God would circumcise the heart of his people to fear him (*b. Ber.* 29a).¹²³⁴ Philo, who insisted on the literal practice of circumcision,¹²³⁵ interpreted the ritual symbolically as teaching the removal “of sensual pleasures and the other passions.”¹²³⁶ Naturally, their debates over the necessity of circumcision¹²³⁷ forced early Christians to develop this biblical idea of spiritual circumcision (Rom 2:27–29; Col 2:11).¹²³⁸ As noted above, the allusion here is especially to Deut 10:16, where Israel’s circumcising its heart is parallel with no longer stiffening its neck.¹²³⁹ God gave Israel the covenant of circumcision (Acts 7:8), but Stephen’s accusers, who falsely charged

1224. A “hard” disposition could be a “harsh” one, as in Arius Did. *Epit.* 2.7.11o, pp. 96–97.27–28.

1225. Anderson, *Rhetoric*, 33, on διαλλαγή (citing Quint. *Inst.* 9.3.49; cf. Dion. Hal. *Lys.* 3).

1226. 1QS I, 6; II, 26; III, 3; CD VIII, 8, 19; cf. hardness of heart in 1 *En.* 5:4; 16:3.

1227. *Exod. Rab.* 42:9 (expounding Exod 32:9).

1228. On spiritual blindness, see Keener, *John*, 795–96; comment on Acts 9:8.

1229. Elsewhere, e.g., 2 Tim 4:3–4; Quint. *Curt.* 8.1.49; Philost. *Hrk.* 57.1; Symm. *Ep.* 1.4.3. Probably sometimes for memory as well, since hearing properly involved heeding; “plucking the ear” was a gesture appealing to memory (Sen. *Y. Dial.* 7.10.3; Basore, in *Moral Essays*, LCL, 2:124 n. a, cites also Pliny E. N.H. 11.251; cf. Virgil *Copa* 38).

1230. On the sense in Jer 9:25–26 (9:24–25 LXX), with Jos. *Ant.* 13.257–58, see Steiner, “Incomplete Circumcision.” For uncircumcision as negative, and hence an insult here, see also, e.g., *Gen. Rab.* 80:8; *Pesiq. Rab.* 15:17. Citing Jer 4:4 and 9:25 here, see, e.g., Mufwata, *Extrémities*, 15.

1231. Cf. also 4Q434 1 I, 4 (on which see Seely, “Heart”); 4Q435 1 I, 1; among Christians, *Barn.* 9.1; 10.12.

1232. Among Christians, cf. *Barn.* 9.5. Some Amoraim later regarded uncircumcision of heart as equivalent to the dominance of the evil impulse (*yetzer hara*; *b. Sukkah* 52a).

1233. Cf. probably also 4Q504 4 11; 4Q509 287 1 (though these are reconstructed). Cf. circumcision of heart (by analogy) in Philo *Spec. Laws* 1.6.

1234. Some Targumim sometimes use circumcision language metaphorically (DeRouchie, “Circumcision”).

1235. See Philo *Migr.* 89–93. Contrast, e.g., *G. Thom.* 53.

1236. Philo *QE* 2.2 (Tobin, *Rhetoric in Contexts*, 116). He recognized biblical teaching on spiritual circumcision in Lev 26 and Deut 10 (Philo *Spec. Laws* 1.304–5), as did others (e.g., 1QS V, 5; 4Q504 4 11; cf. 4Q509 287 1).

1237. Cf. a similar but lesser debate among some Jews in a mission context in Jos. *Ant.* 20.34–48.

1238. It was carried further by later writers (e.g., *Barn.* 9.1–8; cf. *Odes Sol.* 11:2); Justin even regards outward circumcision as a sign of judgment (*Dial.* 16.2), quite in contrast to first-century Christian writers (e.g., 1 Cor 7:19; Gal 5:6; 6:15). Still later, Pelagius *Comm. Rom.* on 2:26 (de Bruyn, 75–76; Bray, *Romans*, 77), though unfortunately condemning literal circumcision (on 2:27; de Bruyn, 76; Bray, *Romans*, 78); Origen *Comm. Rom.* on 2:29 (*CER* 1:298, 300; Bray, *Romans*, 78–79). Part of the idea in Col 2:11 may be circumcision’s cultural offensiveness to Gentiles (see Smith, “Translation,” 331).

1239. That passage accounts for the wordplay in Hebrew between neck (*ʾrf*) and foreskin (*ʾrlh*).

that *he* undermined the law (6:11–14), themselves cast off the covenant with their uncircumcised hearts!¹²⁴⁰

IV. KILLING PROPHETS (7:52)

Rhetorically, the closing argument was a useful place for pathos,¹²⁴¹ including inciting emotion against the opponent. Thus, for example, in his closing argument, Cicero calls on all the gods whose temples Verres violated to bring Verres to justice (*Verr.* 2.5.72.184–89). Rhetorical questions were often useful for driving home a polemical or apologetic point¹²⁴² (although more so when several were piled up).¹²⁴³

Some scholars contrast later rabbis' explanation of the temple's destruction with Luke's explanation as the difference between confessing "our sins" and pointing out "your sins."¹²⁴⁴ Although this was undoubtedly the historical trajectory that Christian polemic followed (when it moved from intra-Jewish to interreligious polemic), it overlooks the frequency of "our fathers" in Stephen's speech. This is instead part of the polemical turn in the closing argument. "*Your* fathers" rhetorically emphasizes moral continuity among those in all generations who break God's covenant, but it does not repudiate Stephen's ethnic continuity with Israel or hope for Israel.¹²⁴⁵ "Your fathers" is not negative in Acts 3:25 or 7:32 (though it is equivalent toward Acts' conclusion in 28:25), and "our fathers" is far more common (3:13; 5:30; 13:17; 15:10; 22:3, 14; 24:14; 26:6; also at the conclusion in 28:17), including in this speech (7:11–12, 15, 19, 38–39, 44–45).

For Stephen, the killing of Jesus simply climaxes a history of rejected deliverers (e.g., Joseph in 7:9 and Moses in 7:27–28, 35, 37); it fulfills Scripture (cf. 13:27). Because Jesus's death climaxed the entire history of martyrs who preceded him, it would bring judgment on that generation (Luke 11:50–51), which Luke undoubtedly views as fulfilled in the destruction of Jerusalem (19:42–44; 21:6, 20–24). Martyrdom of prophets was to be *expected* in Jerusalem¹²⁴⁶ (13:34, applied to Jesus's death in 13:33).¹²⁴⁷ Luke's audience knew that Jesus was treated as a false prophet (22:64) but that he had already prophesied that true prophets would be treated thus (6:22–23), versus false prophets (6:26). Because Luke 11:49 adds "apostles" to "prophets" (contextualized differently in Matt 23:34), it undoubtedly implies also the continuing persecution of God's agents (Luke 21:12), as exemplified in

1240. For the implied contrast with Acts 7:8 here, see, e.g., Combrink, *Analysis*, 22; Tannehill, *Acts*, 90. Scharlemann, *Stephen*, 114, notes that the Samaritans highly praised circumcision, even "as a means of grace."

1241. E.g., Witherington, *Corinthians*, 431; e.g., Isaacs *Menec.* 44–47 (of 47 paragraphs). On pathos in general, see Anderson, *Glossary*, 61–63.

1242. On various forms of rhetorical questions, see, e.g., Anderson, *Glossary*, 51–52.

1243. E.g., in Xen. *Anab.* 5.8.4–5; Dio Chrys. *Or.* 38.47; Lucian *Tyr.* 10; Fronto *Ad am.* 2.7.3; 1 Cor 9:1–12; cf. Anderson, *Rhetorical Theory*, 162.

1244. Juel, *Promise*, 76; some even treat the narrative as anti-Jewish rhetorical violence (Matthews, "Stoning"; idem, "Hellenists"). The rabbis did seek to explain the temple's destruction in terms of their sins, though sometimes to justify more rabbinic legislative authority (see Rubenstein, "Gittin"). Hearon, "Read Ourselves," argues that *Sib. Or.* 5 blames Rome, 2 *Baruch* blames the people, and the Gospels and Josephus blame religious leaders (Josephus also blames "bandits" and governors).

1245. Cf. Juel, *Promise*, 76, who may not go so far but finds in such phrases in Luke-Acts evidence of "a decisive parting of the way." But even such an approach may read too much even into the Fourth Gospel (cf. Whitacre, *Polemic*, 65–66; Keener, *John*, 225, 828). Cf. "your fathers" in 1 Sam 12:8, 15 (though the sin there was asking for a king, 12:19; whereas in Acts 7 it is esp. rejecting their king).

1246. Cf. Foakes-Jackson and Lake, "Internal Evidence of Acts," 183: "His defence is nothing but a long argument to show that this is exactly what the Jews might have been expected to do" (except seeing here the rejection of ethnic Israel rather than of Jerusalem).

1247. Future acceptance may, however, be implied in Luke 13:35 (as in Acts 3:19–21); but cf. Luke 19:38 (in contrast to the positioning of each in Matt 21:9; 23:39).

Acts (e.g., Acts 8:1; 9:4–5; 12:1–4; 22:4; 26:11). If God’s people killed the prophets who “announced in advance” (προκαταγγείλαντας, the same verb as in 3:18; cf. 3:24; 1 Pet 1:11) the coming of “the just one,” it is not surprising that they would also unjustly kill the just one himself (Acts 3:14–15). Like Judas (Luke 6:16), they had “betrayed” the righteous one (Acts 3:13). Whereas Peter earlier claimed that God’s people wanted to release a “murderer” (3:14), Stephen now escalates the rhetoric by applying this provocative and explicit title to his entire audience (7:52; cf. Saul in 9:1).¹²⁴⁸

Jewish thought included categories of corporate personality foreign to modern Western individualism. Thus Jewish people confessed the sins of their ancestors¹²⁴⁹ and pleaded that God not hold these against them.¹²⁵⁰ They recognized that they could suffer for the sins of their ancestors¹²⁵¹ and could seek atonement for their ancestors’ sins as well as their own.¹²⁵² Greeks could also appeal to a sense of solidarity with one’s ancestors; thus jurors dared not free a criminal when their ancestors wrote such just laws to convict him (Aeschines *Tim.* 185).¹²⁵³ Likewise, one who killed a man accidentally did, in fact, a helpful thing, since the slain man was a descendant of one who had laid waste the country (thirteen generations earlier; Philost. *Vit. Apoll.* 6.5).

The implication that the people had killed “all” the prophets is hyperbole,¹²⁵⁴ but this hyperbole would not long disturb ancient Jewish auditors. Israel had killed “the prophets” (Neh 9:26), a tradition that early Jewish legend and exhortation developed far beyond the OT data.¹²⁵⁵ In addition to Zechariah, mentioned in Luke 11:51 (Q material in Matt 23:35; from 2 Chr 24:20–22),¹²⁵⁶ or Uriah in Jer 26:21–23, Scripture recounted many prophets killed by Ahab in Israel (1 Kgs 18:4, 13), and tradition added many under Manasseh in Judah, usually including Isaiah (Jos. *Ant.* 10.38;¹²⁵⁷ cf. 2 Kgs 21:16). Israel had despised the prophets (CD VII, 17–18)

1248. They unjustly “killed” the just one in Acts 3:14–15, but Peter does not use the explicit verb for “murder,” though that is implied.

1249. Neh 1:6; 9:2, 26–30, 34–35; Ezra 9:7; Dan 9:16; cf. 1QH^a XII, 34.

1250. Tob 3:3; 4QS04 4 6–7.

1251. E.g., Jdt 7:28; 1 Esd 8:77; 4QS50^c 1 I, 1–2. Continuing judgment on descendants (e.g., Exod 20:5; 34:7; Deut 5:9; 2 Sam 21:6; 2 Kgs 22:30; Lam 5:7; cf. also *Sipre Deut.* 332.2.1) presupposed those descendants continuing in the sins of their ancestors (e.g., 2 Kgs 15:9; Ps 106:6; Jer 3:25; 14:20; 31:29–30; Ezek 18:2, 14, 19–20; Dan 9:8; *Tg. Neof.* 1 on Exod 20:5). Rabbis were reluctant to view God as simply transferring judgment to subsequent generations (Neudecker, “Iniquity”).

1252. 4Q434 1 II, 3; 4QS04 1–2 VI, 5–6.

1253. One should imitate ancestors’ virtues (cf., for fathers, *Rhet. Alex.* 1, 1422a.30–32); failure to do so was blameworthy (e.g., Dion. Hal. *Isoc.* 17; Plut. *Demosth.* 14.2); one could even deny that those who failed to imitate their ancestors’ virtues were their ancestors’ descendants, in some sense (Philost. *Vit. soph.* 1.25.544). Those who did evil could be accused of foreign descent (Polyb. 2.55.9). For ancestral intentions being most venerable, see, e.g., Hermog. *Inv.* 2.2.110.

1254. On hyperbole, see further, e.g., Anderson, *Glossary*, 122–24; *Rhet. Alex.* 11, 1430b.16–19; Cic. *Or. Brut.* 40.139.

1255. Regularly noted by scholars, e.g., Lake and Cadbury, *Commentary*, 82; Davies and Allison, *Matthew*, 1:465; Cunningham, *Many Tribulations*, 339; Avemarie, “Sterben.”

1256. That this is the Zechariah especially in view seems likely in light of Jewish tradition (see Keener, *Matthew*, 556–57), albeit partly conflated with another (for such confluences, see, e.g., *Liv. Pr.* 9 [Obadiah] 2–4; *b. Sanh.* 39b; Davies and Allison, *Matthew*, 3:319; Keener, *Matthew*, 556n70). Bloodshed in the temple desecrated it and invited judgment (Jos. *Ant.* 20.165–66).

1257. See *Ascension of Isaiah* (*Mart. Is.* 1–3). For Isaiah’s own martyrdom under Manasseh, see *Mart. Is.* 5:1–14; *y. Sanh.* 10:2, §6; *Pesiq. Rab.* 4:3; *Liv. Pr.* 1:1 (*OTP* 2:385; Schermann, §24, p. 75, line 1); also *OTP* 2:151 (citing also *b. Yebam.* 49b; *Sanh.* 103b); in Christian sources, presumably Heb 11:37; also patristic sources (Justin *Dial.* 120.5; Tert. *Pat.* 14; *Scorp.* 8) cited by commentators (Knibb, “Introduction,” 149; Hagner, *Hebrews*, 192; Arnold, “Acts,” 273). The active tree in this Isaiah legend resembles Greek hamadryads (cf., e.g., Ap. Rhod. 2.475–483; Ovid *Metam.* 8.758–76).

and killed them (*1 En.* 89:51; *Jub.* 1:12).¹²⁵⁸ One compilation, called *Lives of the Prophets*, recounted legends of various prophets' martyrdoms, including Amos,¹²⁵⁹ Micah,¹²⁶⁰ and Jeremiah.¹²⁶¹ The Bar Kokhba revolt and other events also provided Judaism with subsequent martyrs.¹²⁶² Throughout the ancient Mediterranean world, to murder envoys of any kind was considered a heinous offense (*Jos. Ant.* 15.136);¹²⁶³ how much more when their sender was God! Prophets in ancient Israel enjoyed an analogous form of immunity from the assaults of all but the most wicked rulers.¹²⁶⁴

The climax of the prophetic tradition was the "coming"¹²⁶⁵ of the righteous one." Some scholars argue that "righteous one" is a sign of primitive Christology, probably based on Isa 53:11.¹²⁶⁶ Others suggest that it reflects the righteous-martyr tradition of Wis 2:12–20.¹²⁶⁷ The designation was more widespread, however,¹²⁶⁸ and may lay emphasis here on the innocence of Jesus and his cause (*Luke* 23:47);¹²⁶⁹ this was appropriate in a forensic speech.¹²⁷⁰ Some have suggested that it is primarily Stephen's Christology, rather than his charges against the temple, that lead to his being charged and stoned (for blasphemy) in Acts.¹²⁷¹ This does not fit either the recorded charges (*Acts* 6:11–14) or most of Stephen's defense (7:2–50); certainly, however, Stephen's emphasis on the exaltation of the one whose execution many of the elite supported provokes them (7:52, 55–56).

The speech denounces its audience in the narrative world as the "betrayers" of the righteous one. Luke elsewhere employs this noun only when introducing Judas Iscariot (*Luke* 6:16), but alludes to Jesus being handed over by the Jerusalem elite¹²⁷² to the Gentiles (18:32), specifically to Pilate (20:20; *Acts* 3:13).¹²⁷³ They are the

1258. Cf. further *1 En.* 89:52–53; persecuting the righteous in *1 En.* 95:7; 100:10; *4 Ezra* 8:57; Israel rejecting Elijah and Elisha (*Pesiq. Rab.* 26:1/2); in rabbinic literature generally, see Urbach, *Sages*, 1:560. Islam continued this tradition (*Qur'an* 2:91; 4:155; 5:70; with rejection even more often, e.g., 22:42–44; cf. 43:7).

1259. *Liv. Pr.* 7:1–2 (Schermann §14, p. 51).

1260. *Liv. Pr.* 6:1 (Schermann §17, p. 60).

1261. *Liv. Pr.* 2:1 (Schermann §25, p. 81.2).

1262. E.g., R. Akiba (*b. Menah.* 29b; *Ber.* 61b; *y. Ber.* 9:5, §3; *Soṭah* 5:5, §4); for another, cf. *b. Hul.* 142a. For martyrdom by apostates, see *y. Hag.* 2:1, §8.

1263. Cf. Eurip. *Heracl.* 272; Xen. *Anab.* 5.7.18–19, 34; Apollod. *Epit.* 3.28–29; Polyb. 15.2; Dion. Hal. *Ant. rom.* 8.43.4; Diod. Sic. 36.15.1–2; Dio Cass. 19.61; Appian *Hist. rom.* 3.6.1–2; 3.7.2–3; 4.11; 8.8.53; Val. Max. 6.6.3–4. This immunity was important, since receivers of news sometimes responded positively or negatively to messengers, depending on the news they received (e.g., Hom. *Il.* 17.694–96; 18.15–21; Eurip. *Med.* 1125–29; Appian *Hist. rom.* 12.12.84; Arrian *Ind.* 34.4; 35.1; 2 Sam 1:15; 18:20, 22; Ps.-Callisth. *Alex.* 1.35, 37). On rare occasions, it was threatened (Polyb. 1.81.2–3).

1264. See, e.g., 1 Sam 10:8; 15:1, 18–19; 1 Kgs 11:29–39; 12:22–24; 13:4; 14:4; 18:13, 22; 19:15–16; 2 Kgs 3:14; 4:13; 9:1–2; 13:14; 1 Chr 16:22 (the patriarchs); 2 Chr 20:20; 25:16.

1265. The word ἔλευσις is a NT and LXX hapax legomenon, but some suggest that it was associated with the Messiah's coming elsewhere (Bruce, *Acts*¹, 177); in Christian texts, perhaps developing the Baptist's language, cf. "the coming one" (*Mark* 1:7; *John* 1:15, 27; 2 *John* 7).

1266. Simon, *Stephen and Hellenists*, 65; Robinson, *Studies*, 151; see comment on *Acts* 3:14. Luke uses it only in Jerusalem speeches (Hays, *Conversion*, 126–27).

1267. Hays, *Moral Vision*, 118–19; Doble, *Paradox*, 158.

1268. E.g., for Enoch (*Test. Levi* 10:5; "Enoch the just" in 2 *En.* 1a 1, rec. A).

1269. It fits Pilate's threefold declaration of Jesus's innocence (*Luke* 23:4, 13–15, 22) and that of the thief as well (23:40–41); see Hays, *Moral Vision*, 118–19.

1270. Witherington, *Acts*, 274.

1271. Finsterbusch, "Christologie als Blasphemie." But it should be noted that stoning was not limited to blasphemy, especially when executed by mob lynching (see comment on *Acts* 7:58).

1272. Those immediately responsible are the elite (cf. *Luke* 20:19–20; 24:20), though their function as their people's chief representatives, along with Jerusalemite crowds' participation, invites corporate responsibility; see comment on *Acts* 3:13, 17.

1273. Similarly, to "people" (*Luke* 9:44), to "sinful people" (24:7), or simply to death (24:20). Ironically, Pilate also "hands over" Jesus to the Jerusalem crowds (23:25); this follows the chain of guilt in the standard passion narrative (*Mark* 14:41–42, 44; 15:1, 10, 15; *Matt* 26:48; 27:2–4, 18, 26; *John* 18:5, 30, 35–36; 19:16).

righteous one's betrayers and murderers; the speech in Acts 3:13–15 also conjoins responsibility for betraying and killing Israel's rightful prince.

V. AGAINST THE LAWBREAKERS (7:53)

Rhetoricians distinguished, when necessary, between jurors' convictions and the laws by which they were obligated to judge (they must judge the case, not the law; *Rhet. Alex.* 36, 1443a.18–20). Here, however, the law convicted the accusers (on reversing opponents' charges, see introduction, above, to Acts 7:51–53). Ancient polemic often included the accusation that one's opponents had failed to follow their own claims.¹²⁷⁴ Those who had the greatest knowledge were held most responsible.¹²⁷⁵ Thus those who "received the commandments" and "obtained the law" would be punished all the more severely.¹²⁷⁶

Although interruptions were common fare in ancient courts, advocates did sometimes succeed in finishing their speeches, at least in the abstracts we have of them.¹²⁷⁷ It may seem surprising that the hearers allowed Stephen to go so far before interrupting him,¹²⁷⁸ even in terms of the narrative's internal plausibility, but we should remember that until Acts 7:51 the reality that he was prosecuting *them* would be clear only in retrospect.¹²⁷⁹

The idea that the law was mediated through¹²⁸⁰ angels fits Luke's interest in angels (forty-six times in Luke-Acts), in his second volume predominant especially in this section (5:19–12:23, eighteen times), but it is by no means Luke's invention. It could be related to the support of angels in Moses's mission (Exod 3:2; 14:19; 23:20) but as an explicit construct was postbiblical.¹²⁸¹ It is explicit in Heb 2:2 and Gal 3:19. The idea may be implied in Deut 33:2 and is explicit in the LXX there; it may also be implied in Ps 68:17–18, which provided at least a further textual basis for the later view. It probably appears in Qumran.¹²⁸² It is at best minimal in Philo, who stresses Moses's mediatorial role more (*Dreams* 1.141–48),¹²⁸³ but it figures in *Jos. Ant.* 15.136. Later rabbis also knew this tradition¹²⁸⁴ and commented often on the angels at Sinai,¹²⁸⁵ though some rabbis also emphasized that God gave Moses the law directly, not through an angel (*'Abot R. Nat.* 1, §2 B). Those who claimed

1274. Johnson, *Acts*, 134–35 (citing Plut. *Stoic Cont.* 1–2, *Mor.* 1033BD; Sen. *Y. Ep. Lucil.* 20.1; Lucian *Hermot.* 79; *Tim.* 54–55; Rom 2:17–24); see further documentation in Keener, *Matthew*, 540.

1275. E.g., Luke 12:47–48; Amos 3:2; Rom 2:12–13; Jas 4:17. Contrast the usual philosophic emphasis that true knowledge brings right behavior (e.g., Lucian *Downward Journey* 24); but cf. the emphasis on ignorance as mitigating guilt, in comment on Acts 3:17.

1276. 4 *Ezra* 7:72 (*OTP* 1:539); cf. also 4 *Ezra* 9:32.

1277. Crook, *Advocacy*, 66–67.

1278. Haenchen, *Acts*, 286, notes how conveniently the interruption is placed; see comment on such procedures in Acts 10:44, but it is more plausible here than he allows.

1279. Cf., e.g., the length of Thomas Cranmer's speech before its interruption, if our report is basically accurate (see Duffield, *Cranmer*, 334–38).

1280. The apparently curious use of εἰς reflects its increasing encroachment on ἐν and the general weakening of the classical force of prepositions in Koine (see Bruce, *Acts*¹, 177; cf. Robertson, *Grammar*, 97, 449, 453, 584–86, 591; Moulton and Milligan, *Vocabulary*, 210).

1281. The intervening angel (cf. Exod 3:2) is emphasized in various texts (*Jub.* 1:27, 29; 2:1; *Test. Dan* 6:2); apart from LXX, *Jubilees* offers the mediating-angel tradition's earliest attestation (Charles, *Jubilees*, lxxxiv). Probably the point is simply that God gave Moses the law through an angel (cf. VanderKam, "Author," 217).

1282. 4Q521 2 + 4 II, 2. Cf., by way of analogy, Zedekiah's covenant with Michael in 4Q470 frg. 1, if correctly understood (see Wise, "Introduction to 4Q470").

1283. See discussion in Isaacs, *Spirit*, 130.

1284. Lane, *Hebrews*, 17 (citing *Mek.* on Exod 20:18; *Sipre* 102 on Num 12:5; *Pesiq. Rab.* 21:7–8); Le Cornu, *Acts*, 368 (adding to these *b. Sabb.* 88a; *Num. Rab.* 2:8; *Pesiq. Rab.* 10:6; 33:10; *Tanḥ. Bemidbar* 14); earlier, e.g., Peake, "Colossians," 481.

1285. E.g., *Pesiq. Rab Kah.* 12:22; 16:3; *Num. Rab.* 2:3; *Song Rab.* 2:4, §1; 6:10, §1; *Pesiq. Rab.* 21:7–9.

that the law was mediated through angels intended by this claim to exalt rather than denigrate the law.¹²⁸⁶ Contrary to usual perspectives,¹²⁸⁷ that might even be the case in Gal 3:19,¹²⁸⁸ the only questionable instance.¹²⁸⁹

4. Stephen Follows His Martyred Lord (7:54–8:1a)

In martyrdom, Stephen follows his Lord's model. Just as Stephen inverts the charges in Acts 7:51–53, so Luke inverts them in 7:56, 58, and 60, confirming Stephen's message.¹²⁹⁰ Jesus vindicates his suffering follower (the application of Jesus's faithfulness to those who suffer with him is similar to 2 Tim 2:11–12). This passage also introduces Saul, the persecutor.

a. Stephen's Martyrdom

The passage evokes other martyr stories, but especially Jesus's passion. It also invites historical discussion of the Sanhedrin's capital authority and whether the Sanhedrin or a lynch mob was more likely responsible for Stephen's death.

I. MARTYR STORIES

Martyr stories (even more than other kinds of atrocity reports) provided a challenge for their hearers to suffer bravely for the chosen cause.¹²⁹¹ In this sense, they functioned like models of brave deaths in war, seeking to inspire other soldiers to such acts of valor (e.g., Thucyd. 2.43.4). (Stephen thus functions as what the church fathers called the "protomartyr"—that is, the "first martyr"—thus offering a model for those who would need to follow.)¹²⁹²

Jews had stories of martyrs for faithfulness to the law (e.g., 2 Macc 7:30, 40; 4 Macc 6:27, 30). Anti-Semitic Alexandrians also had their own martyr stories about Greeks who argued for their rights and died because the emperors were, from their perspective, pro-Jewish!¹²⁹³ (See further discussion of martyr stories above, under sect. 3.h.ii,

1286. With most scholars (e.g., Simon, *Stephen and Hellenists*, 48). Many ancient peoples believed their laws of divine origin (Plato *Laws* 1.624A; Ael. Arist. *Panath.* 382, in 313D, 314D; Iambl. *V.P.* 1.1; Val. Max. 1.2.1–5; 1.2.ext. 1–4; Tac. *Ann.* 3.26; in some other traditional societies, see Mbiti, *Religions*, 52, 268, 270). The Romans may have been unusual in regarding only part of their law as inspired (Cohen, *Law*, 28–29).

1287. E.g., Stendahl, *Paul*, 19; O'Neill, *Theology*, 51–52 (though regarding it as a gloss); Harrington, *God's People*, 51; Martin, *Reconciliation*, 61; cf. Longenecker, *Paul*, 146n109.

1288. See Dunn, *Theology of Paul*, 139–40.

1289. Sometimes speakers adopted a consensus view on a matter to argue their particular point, without subscribing to that view (e.g., Dio Chrys. *Or.* 23.9; cf. *Sipra Qed. par.* 4.206.1.1; Rom 6:19; Rowe, "Style," 145–46; some commentators on 1 Cor 15:29); to what extent Luke's Stephen accepted these traditions we cannot say, nor is the question germane to Luke's point.

1290. See here Keener, "Inverted Guilt."

1291. Because Luke avoids recounting Paul's death and describes only Stephen's martyrdom in detail, Brawley, *Luke-Acts and Jews*, 25, suggests that Luke "may have attempted to exhort his readers to avoid a martyr complex." But while Luke is much more positive about the world than are John (John 15:18–25), Revelation (Rev 13:7–8), and 2 Thessalonians (2 Thess 2:3–7), he does expect Christians to be ready to die (Luke 9:23–26; 14:26–34).

1292. Pelikan, *Acts*, 168 (following Lampe, *Lexicon*, 1200); see Barkhuizen, "Proclus" (on Proclus of Constantinople *Homilies* 17); for Stephen as the prototypical martyr, see *Martyre d'Étienne* (BHG 1649c), in Bovon and Bouvier, "Étienne," 318–31; in Chrysostom (Dehandschutter, "Proto-Martyr," emphasizing also Ps.-Chrysostom's anti-Judaic reading). Pelikan, *Acts*, 169, suggests the relevance of this model today, given the estimates claiming "that more Christians may have died for the faith during the twentieth century than during all the preceding centuries combined" (under Stalin, Mao, Pol Pot, Idi Amin, in the Sudan, etc.). Other interpreters also take Stephen as a model, inviting Jesus's followers to be prepared to die to spread the gospel (Kisau, "Acts," 1312–13).

1293. See CPJ 2:55–107, §§154–59.

“Positive Portrayal of Stephen.”) The tragic irony in this passage is that those who were most “zealous for the temple” (cf. Acts 6:14) here “manifest the blindness that brings its destruction” (Luke 19:44).¹²⁹⁴ They also become like the Gentile persecutors they would have so abhorred.

II. PARALLELS WITH JESUS

Scholars often note the parallels with Jesus’s passion in this section.¹²⁹⁵ This correspondence fits Stephen’s own presentation of himself (Acts 7:51) following the pattern of Jesus and the prophets (7:52), and Moses and the patriarchs (7:5, 9, 27–28, 37), whereas his opponents resemble those who persecuted the prophets (7:52).¹²⁹⁶

Jesus in Luke’s Passion Narrative*	Stephen in Acts
Hearing before Sanhedrin (22:66)	Hearing before Sanhedrin (6:12)
Announces Son of Man at God’s right hand (22:69)	Sees Son of Man at God’s right hand (7:55–56)
Condemned for blasphemy from his own testimony (22:70–72)	Condemned for blasphemy from his own testimony (7:56–57)†
Outside the city (cf. 23:26)‡	Outside the city (7:58)
“Receive my spirit!” (23:46)	“Receive my spirit!” (7:59)
“Forgive them” (23:34)§	“Forgive them” (7:60)

* If one extends beyond the section, one may note both Jesus and Stephen being “full of the Holy Spirit” (Luke 4:1; Acts 6:3, 5; 7:55; cf. “wisdom” in Luke 2:52; Acts 6:3, 10; and “power,” Luke 4:14; Acts 6:8); working miracles (Acts 2:22; 6:8); facing a blasphemy charge (Luke 5:21; Acts 6:11); challenging the rejection of prophets (Luke 4:24; Acts 7:52); and experiencing transfiguration (Luke 9:29; Acts 6:15; for these parallels, see Stronstad, *Prophethood*, 100).

† This is an inference, but apparently a reasonable one; see Goulder, *Type and History*, 42.

‡ This parallel lacks evidential value because it is not explicit in the Gospel and was the normal location for ancient executions. Cf. the attempted stoning in Luke 4:29.

§ This prayer is not in all manuscripts, but one would not expect later scribes to insert it specifically in Luke, rather than in another Gospel, to parallel Acts unless they recognized the patterns between the two volumes and not simply between the two characters. Would a scribe that sophisticated introduce the variant? The parallel with a standard Jewish prayer was probably also unknown to the hypothetical scribe.

Some of the Gospel’s information clearly does stem from tradition, especially in the Son of Man statement (Luke 22:69; see Mark 14:62). The prayer to receive Jesus’s spirit (Luke 23:46), though not found in Mark, may reflect a regular Jewish prayer typically uttered at the time of day Jesus uttered it (albeit to different effect),¹²⁹⁷ a datum Luke may not have known (hence a detail he would not have thought to create). On the historical level, Stephen may have chosen to deliberately imitate Jesus’s martyrdom, as many Christian martyrs since then have done,¹²⁹⁸ but Luke certainly chooses to record *these* details (rather than others available to him at least in Mark’s passion narrative) to emphasize the continuity between the martyred Lord and the first of his martyred followers.¹²⁹⁹

1294. Tannehill, *Acts*, 94–95.

1295. E.g., Abbott, *Acts*, 93; Simon, *Stephen and Hellenists*, 21; Foakes-Jackson, *Acts*, 58; Hamm, *Acts*, 40–41; Pervo, *Acts*, 195; Green, “Acts,” 745–46; more fully Goulder, *Type and History*, 42–43; Talbert, *Acts*, 66–67; Stronstad, *Prophethood*, 100.

1296. With, e.g., Combrink, *Analysis*, 22.

1297. See Stauffer, *Jesus and Story*, 142.

1298. For one example, though a number of traditions in *Foxe’s Book of Martyrs* (tendentious in its honor of Protestant but neglect of Catholic martyrs) may be questionable, echoes or the influence of the Lukan Jesus’s final words are sometimes unmistakable (e.g., 132, 133, 212–13, 235, 252). Ancient use of Jesus’s model fits the ancient use of Jewish martyr traditions as models. This comparison stands in contrast to other possible death models; e.g., the mime imitation of the deceased at Roman funerals (cf. Sumi, “Impersonating”) cannot be relevant here.

1299. Goulder, *Type and History*, 189, argues conversely for the historicity of Stephen’s dying words, which provide Jesus’s words in Luke; but if one must choose, disciples (or the women present at the cross) would be more likely to preserve their master’s words.

III. CAPITAL AUTHORITY?¹³⁰⁰

Some scholars think that Rome allowed the Sanhedrin to execute capital sentences directly,¹³⁰¹ but this proposal does not fit what we know of the way Romans administered their provinces. The governor held the power of life and death in a province (Jos. *War* 2.117; cf. *b. Šabb.* 108a). Against Paul Winter,¹³⁰² Acts 23:1–10 constitutes a preliminary inquiry to formulate a charge (22:30; 23:28–29), not evidence for capital authority, even though profanation of the temple (cf. 21:28–29) was the one charge for which the Romans permitted local executions.¹³⁰³ Some cite the passion narrative in favor of the Sanhedrin's capital authority, but the logic of the passion narrative in fact presupposes that the Sanhedrin lacks capital authority; why else would it hand Jesus over to Pilate?¹³⁰⁴ An intermediate position is that Romans rarely delegated capital authority but that Roman governors were authorized to do so;¹³⁰⁵ but whatever governors of some provinces may have wished to do, it is inconceivable from what we know historically of Pilate that he would have shared this authority with the Jerusalem aristocracy.¹³⁰⁶

Later rabbis discussed appropriate grounds¹³⁰⁷ and means¹³⁰⁸ for execution, but rabbinic literature itself shows that these discussions were primarily theoretical.¹³⁰⁹ Some rabbinic tradition traces the loss of Jewish courts' capital authority to 70 C.E.,¹³¹⁰ and other tradition to no later than 30 C.E.¹³¹¹ Although Josephus naturally does not report any precedents unfavorable toward Jewish autonomy, this loss of sovereignty (for so it would be viewed, Ep Jer 14) must have begun much earlier. Rome delegated the right of the sword to Herod and other client rulers, but these were not local aristocracies. Although even Diaspora Jewish communities could enforce corporal penalties on their own members,¹³¹² corporal punishment was not capital punishment. Rome withheld capital jurisdiction from municipal aristocracies who could employ it against citizens loyal to Rome.¹³¹³ For this, local rulers needed at least Roman ratification.

Some precedent existed for Romans overlooking past executions, or even human sacrifices, that could be justified by local custom, but they expected such practices to be discontinued.¹³¹⁴ Provable extrajudicial executions were not therefore in the political interests of the priestly aristocracy. Although councils of subject territories could

1300. Here I am adapting information from Keener, *John*, 1107–9.

1301. Winter, *Trial*, 10–15; Smallwood, *Jews*, 150.

1302. Winter, *Trial*, 75–90.

1303. Cf. O'Rourke, "Law," 174; Sanders, *Judaism*, 61. Paul's Roman citizenship could shield him under normal circumstances (Rabello, "Condition," 738), but not for profaning a temple (Jos. *War* 2.224; Hesiod *Astron.* frg. 3).

1304. Cf. also Catchpole, *Trial*, 247.

1305. O'Rourke, "Law," 174–75.

1306. On Pilate, see briefly comment on Acts 4:27–28. Brown, *Death*, 339, correctly observes that executions required ratification by the Sanhedrin in Jos. *Ant.* 14.167; although this datum is undoubtedly relevant for the discussion, we should note that it describes the time of Herod the Great, not direct Roman rule.

1307. E.g., *Sipre Deut.* 154.2.1.

1308. E.g., *b. Sanh.* 49b–50a.

1309. Unless secret executions (cf. Winter, *Trial*, 70–73) were practiced; but Pharisaic and later rabbinic requirements for evidence were so strict that executions must have remained very rare.

1310. *Sipre Deut.* 154.1.1; *b. Sanh.* 37b. The date appears indeterminate in *Sipra Qed. par.* 4.206.2.9.

1311. E.g., *y. Sanh.* 1:1, §3; 7:2, §3. Safrai, "Self-Government," 398, cites also *b. Šabb.* 15a; *ʿAbod. Zar.* 8b. This was the widespread view at the turn of the twentieth century (Abrahams, *Studies* [1], 73; Sanday, *Criticism*, 127; Edersheim, *Life*, 583).

1312. Blinzler, *Trial*, 164; Winter, *Trial*, 12–13.

1313. With, e.g., Morris, *Luke*, 319.

1314. Plut. *Rom. Q.* 83, *Mor.* 283F (although he notes that Romans had themselves offered such sacrifices).

pronounce a death sentence, they had to bring their sentence before the governor for ratification.¹³¹⁵ Most scholars thus currently recognize that the Sanhedrin lacked the legal authority to execute prisoners in this period (Jos. *Ant.* 20.200).¹³¹⁶ As Roman legal scholar Sherwin-White notes,¹³¹⁷

When we find that capital power was the most jealously guarded of all the attributes of government, nor even entrusted to the principal assistants of the governors, and specifically withdrawn, in the instance of Cyrene, from the competence of local courts, it becomes very questionable indeed for the Sanhedrin.

The Sanhedrin could sentence offenders and recommend them for execution, but apart from violation of the temple (not simply speaking against it), few Jewish religious charges would receive an automatic capital sentence from the Romans (e.g., the case of Jesus ben Ananias).¹³¹⁸ It is not impossible that Roman officials might look the other way in the case of lynchings, but even these would be problematic if they could generate complaints to Rome.¹³¹⁹

IV. LYNCH MOBS?

This is one of the few killings narrated in Acts (cf. Acts 12:2),¹³²⁰ but others may well be implied (22:4; cf. 9:1).¹³²¹ Although specific arguments for (or against) the historical authenticity of this section are not compelling,¹³²² apart from our knowledge of Luke's historiography in general, many scholars acknowledge the possibility of a mob lynching here.¹³²³ Those who support the occurrence of an official trial point out that unless the governor ratified the execution (at least "in retrospect to cover the invalidity"), the ensuing arrests (8:3; 9:2; 22:5) and especially extension of the investigation to Damascus (9:1–2; 26:12) would have proved problematic.¹³²⁴ This would seem to be a reasonable objection but assumes that the governor chose to know and take interest in any of these activities and would have allowed a stoning rather than handling the execution by Roman means (crucifixion). It also presumes that oversight from the ethnarch in Damascus would be necessary for extradition.

Those who affirm that Stephen faced an official hearing also note that the narrative speaks of the Sanhedrin (6:12) and at least something comparable to a vote

1315. Blinzler, *Trial*, 164–68; Ramsay, *Church in Empire*, 293.

1316. Benoit, *Jesus*, 1:135; Lane, *Mark*, 530; Stewart, "Procedure"; Sanders, *Jesus to Mishnah*, 17; Bruce, "Trial," 12–13.

1317. Sherwin-White, *Society*, 36; see more fully 32–43.

1318. Brown, *Death*, 363–72.

1319. Sanders, *Jesus to Mishnah*, 17.

1320. Because 1 Thess 2:14–16 mentions only Jesus and the prophets, Hare, *Persecution*, 36, doubts that "ordinary Christians" were widely martyred. This is probably correct (so long as we do not press from Paul's silence the supposition that it never happened, since prophets and Jesus would take precedence in being mentioned).

1321. See Bammel, "Activity," 359. Perhaps more direct admission of Paul's preconversion involvement in extrajudicial killings would not have played well in a Roman setting, especially for outsiders unsympathetic toward the Christian notion of conversion effecting forgiveness.

1322. Literary factors can account for nearly all of Dunn's arguments (*Acts*, 99) in favor of reliability. At the same time, such literary patterning was common in historians both because of their views of providence and because of their narrative style (see Keener, *Acts*, 1:571–74).

1323. E.g., Lake and Cadbury, *Commentary*, 85; Grant, *Christianity and Society*, 39; Wallace and Williams, *Acts*, 45; Fitzmyer, *Acts*, 391; Dunn, *Acts*, 99; Aune, *Dictionary of Rhetoric*, 5; Marguerat, *Actes*, 271–72; Pervo, *Acts*, 193–94 (drawing on evidence for vigilantism in Seland, *Violence*), 196; Schille, *Apostelgeschichte*, 187; Scholl, *Apostelgeschichte*, 47; cf. Sanders, *Jesus to Mishnah*, 18.

1324. Judge, *Pattern*, 65.

(26:10),¹³²⁵ but U.S. history can illustrate that hearings and lynchings are not always mutually exclusive options (though mob “justice” more often preceded planned hearings than followed them).¹³²⁶ A mob could have responded to Stephen’s speech, cutting short orderly public proceedings.¹³²⁷ Further, the hearing before the Sanhedrin may be Luke’s adaptation of a less formal hearing (see comment on Acts 7:1); or Luke may have telescoped together events that occurred at different times; or even some members of the Sanhedrin may have grown angry enough by this point (cf. 4:18–21; 5:28, 40; esp. 5:33) to refuse to intervene against the mob action (especially if colleagues intent on official procedures were preventing the apparently just or necessary outcome).¹³²⁸ The language of voting is likely figurative (see comment on Acts 26:10).

Mob violence was a common phenomenon of ancient life (its occurrence thus says nothing about specifically “Jewish” hostility, Stephen himself being Jewish). Fights could break out spontaneously in the streets and escalate into violence, requiring subsequent court action (*Sent. Syr. Men.* 139–42). When one comedian made comments in a theater that the Roman audience considered offensive, they lynched him on the spot, complaining that he “was not playing his part as the situation required.”¹³²⁹ Josephus claims that a crowd “lynched” the pious man Onias the Just (Honi the Circle-Drawer) for refusing to curse their enemies (*Ant.* 14.22–24).¹³³⁰

Court settings often degenerated into unruly shouting (see comment on Acts 18:17) but could degenerate further than this (see other examples involving stones in the discussion of stoning at Acts 7:58). Because of tensions between elements of the narrative that point either to a lynching or to a trial, some suggest plausibly that two accounts of Stephen’s death circulated and Luke has failed to harmonize them fully.¹³³¹ But it is equally possible that Luke chose to focus on legal elements in what started as a popular legal action (Acts 6:12–15) and culminated unexpectedly (at least for most of its participants) in a lynching (7:57–60), whether on the same occasion or subsequently.¹³³²

Although such actions were very likely technically illegal under Roman law,¹³³³ they would have fit literal biblical demands—if in fact Stephen had been guilty.¹³³⁴ We should not allow contemporary secular Western perspectives to render unintelligible the commitment first-century Jerusalemites could show for their faith; for example, Jerusalem’s masses preferred death to allowing pagan images in the city (*Jos. War* 2.169–74, 197–98).¹³³⁵ Diaspora Jews could also appreciate stories in which faithful

1325. Noted by Fitzmyer, *Acts*, 390 (though he settles for a lynching, 391).

1326. For mob violence, see, e.g., Woodward, *Career*, 70; Tuttle, *Riot*, passim. In antiquity, cf. Völkl, “Lapidation.”

1327. See Bock, *Acts*, 310.

1328. The rabbis would have required the full Sanhedrin to try a false prophet (see Foakes-Jackson and Lake, “Background of Jewish History,” 33), but Sadducees would have cared little for Pharisaic ideals (*Jos. Ant.* 18.16; cf. Neusner, *Beginning*, 27–28; Sanders, *Jesus to Mishnah*, 107) and by definition not at all for (later) rabbinic ones (see Brown, *Death*, 357–63; Blinzler, *Trial*, 138–43; Keener, *Matthew*, 614, 644–45).

1329. Diod. Sic. 37.12.1 (LCL, 12:215).

1330. Noted by Le Cornu, *Acts*, 375–76.

1331. Barrett, *Acts*, 380–81 (the lynching source being Acts 6:9–11 and 7:54–58a; the trial source being 6:12–14 and 7:58b–60).

1332. Luke’s narrative technique prefers a cohesive scene depicting a single occasion, but he has apparently telescoped or conflated clearly chronologically distinct biblical material even in Stephen’s speech (see comment on Acts 7:2–3, 15–16).

1333. See Keener, *John*, 1107–9.

1334. Le Cornu, *Acts*, 374, cites even rabbinic support for extrajudicial measures in emergency situations. The situation depicted here probably was dictated more by mob sentiment than by official design, but the mob undoubtedly felt justified.

1335. Dunn, *Acts*, 101.

Jews executed the Jews who had apostatized, as an example to others (3 Macc 7:14–15). Illegal killings and exploitation are frequent events in much of the world today (e.g., “accidental” bride burnings;¹³³⁶ enslavement; clan killings),¹³³⁷ and at times these can include partly religious motivations.¹³³⁸ To say this is to condemn neither religion in general nor any religion in particular; it is to recognize that historically religion (like irreligion) has been among the many forces that could be harnessed to produce behavior otherwise not normally considered justified. Earlier in Acts, local officers had feared that the masses would support the apostles by stoning those who would detain the apostles (Acts 5:25).

How could such a lynching occur? Some suggest that it best fits the interregnum after Pilate’s removal, perhaps before the winter of 36–37 C.E.¹³³⁹ It is difficult to date Paul’s conversion so late, however (Gal 1:18; 2:1),¹³⁴⁰ and less difficult to believe that an unpremeditated mob lynching could occur during the majority of the year when the governor resided in Caesarea.¹³⁴¹ Governors left all but the most critical decisions to the local council, including all internal religious questions.¹³⁴² Capital sentences were among the exceptions,¹³⁴³ but in this case, in the unpremeditated heat of the moment, more radical elements might have presumed on Pilate’s discretion.

Further, the one area where Rome granted Jerusalem’s council capital jurisdiction was an offense against the temple (cf. also Acts 21:28; 24:6); although it is unlikely that Rome included in this concession mere criticism or even “threats” (cf. 6:14) against the temple (cf. Jos. *War* 6.300–305), some local individuals might have been more willing to press the boundaries on such a matter than on others (cf. Mark 14:58; though this attempt, according to 14:59, failed).¹³⁴⁴

Although only the Roman governor held the official power of execution, after the fact he “may have turned a blind eye to local Jewish justice if no harm (such as an uprising or complaints to Rome) came of it.”¹³⁴⁵ The passion narrative suggests that Pilate was compelled or disposed to accept realities of local politics perhaps as early as 30 C.E. (Luke 23:23–24; John 19:12);¹³⁴⁶ after the fall of his patron Sejanus in 31 C.E., Pilate would need to be even more accommodating (he was eventually recalled on charges brought by local officials).¹³⁴⁷ Because he stayed in

1336. E.g., Hull, “Yoke,” 18. The custom of widow burning (differing from what Hull’s article primarily addresses) has ancient roots (Diod. Sic. 17.91.3; Cic. *Tusc.* 5.27.78; Val. Max. 2.6.14).

1337. E.g., “Sudan—Ravages”; Bhatia, “Booty,” 40; “Child Laborers”; Masland et al., “Slavery”; Gordon, *Slavery*, x–xi; Usry and Keener, *Religion*, 94–98.

1338. E.g., during my travels to northern Nigeria, I received oral reports (and have since received more and reviewed written reports) on sectarian violence (initially started by jihadists but then broadened). In the year following September 7, 2001, at least three thousand people were killed in interreligious (and interethnic) strife in Plateau State, catalyzed by mercenaries under the banner of jihad (Keener, “Mayhem”; “Ethno Religion Violence”; cf. Guthrie, “Blast”; see esp. articles by Obed Minchakpu).

1339. E.g., Reicke, *Era*, 190–93; Kistemaker, *Acts*, 280; Fitzmyer, *Acts*, 391; D. Williams, *Acts*, 148.

1340. See, e.g., Lake and Cadbury, *Commentary*, 86.

1341. One could date Stephen’s death after Paul’s conversion, arguing that Luke associated Paul with the most dramatic martyrdom story that he had (cf. Acts 5:36–37) and ended persecution after Paul’s conversion too neatly (9:31; cf. 1 Thess 2:14–16). But the associations run too deep in the story (e.g., Acts 6:9; 8:1–4), and one could as easily argue that Luke would have dated Saul’s conversion as *early* as possible.

1342. Stambaugh and Balch, *Environment*, 33.

1343. See discussion in Sherwin-White, *Society*, 32–43; Keener, *John*, 1107–9.

1344. See discussion in Blinzler, *Trial*, 170; more nuanced, Bruce, “Trial,” 12.

1345. Sanders, *Jesus to Mishnah*, 17. Some argue that Roman governors could also exercise the discretion of delegating this right to local officials (O’Rourke, “Law,” 174).

1346. Not all accept the historicity of this claim, but see Keener, *Matthew*, 665–67; idem, *John*, 1105–7 (examining both possible apologetic and historical motives).

1347. See, e.g., Bruce, *Acts*, 179; idem, *Commentary*, 170; idem, *History*, 226; Riesner, *Early Period*, 63.

Caesarea (cf. Acts 23:33), he may not have known of these events until after the fact. Thus he may have been willing (or politically compelled) to ignore certain local procedures against potential troublemakers; the martyrdom thus could be as early as 31–32 C.E.¹³⁴⁸

b. The Audience's Anger and the Lord's Support (7:54–57)

The audience's hostility to Stephen's message (7:54, 57) frames Stephen's revelation of the exalted Lord (7:55–56), contrasting human resistance against the Spirit (7:51) with obedience to the Spirit (cf. 2:17–18).¹³⁴⁹

I. THE ENRAGED AUDIENCE (7:54)

The language in 7:54 directly recalls 5:33, where hearers (οἱ ἀκούσαντες) also were infuriated (διεπρίοντο, the only other NT use) and wanted to slay the speakers; in this case, however, the sentiment has escalated, and no Gamaliel intervenes. Their “uncircumcised” hearts (7:51) are now pierced. The hearers may think that they have convicted Stephen from his own mouth (cf. Luke 22:71), but the informed audience knows that the witnesses are false (Acts 6:13). The language of “grinding teeth” here applies appropriately to rage, possibly recalling LXX passages¹³⁵⁰ where the wicked do so against the righteous, desiring to kill them (Pss 34:16 [35:16 MT]; 36:12 [37:12]; cf. Ps 111:10 [112:10]; Lam 2:16).¹³⁵¹ But while gnashing of teeth could indicate anger or strong emotion similar to it (e.g., Ps 112:10), it often (and in Luke's Gospel) signifies especially anguish (Luke 13:28).¹³⁵² This gnashing thus probably offers a proleptic fulfillment of the warning that some, finding themselves cast out of the kingdom banquet that they expected to share with the patriarchs and prophets, would weep and gnash their teeth (Luke 13:28; Q material also in Matt 8:11–12).

This portrayal would commend Stephen's heroism to Luke's audience. Greek orators could also depict Socrates's jurors as being irrationally “enraged.”¹³⁵³ Likewise, a Stoic complained that philosophers whose audiences applaud them have accomplished nothing (Mus. Ruf. frg. 49, p. 142.4–12); true success is the audience's shame, repentance (142.12–19), or silence (142.19–21).

II. STEPHEN SEES JESUS EXALTED (7:55–56)

Jesus appears here where the narrative has already indicated his location (1:9–11; 2:33–35). Looking to heaven was a common posture for prayer (cf., e.g., Luke 9:16).¹³⁵⁴ “Lifting up” one's “eyes” was a familiar posture of prayer both among Jewish people¹³⁵⁵

1348. With Riesner, *Early Period*, 63.

1349. Penner, *Praise*, 289–91, also contends that the Stephen narratives practice *synkrisis*, contrasting his character with that of his opponents.

1350. Cited in Fitzmyer, *Acts*, 392, in addition to *Sib. Or.* 2.203, 305; 8.105; cf. Marshall, “Acts,” 571.

1351. With, e.g., Dunn, *Acts*, 99; Chance, *Acts*, 121. The expression is adversarial also in Job 16:9.

1352. See *Sib. Or.* 2.203, 305; 8.86, 105, 125; *Exod. Rab.* 31:5; *Ecl. Rab.* 1:15, §1; cf. Derrett, *Audience*, 70; Matt 13:42, 50; 22:13; 24:51; 25:30.

1353. Max. Tyre 3.4 (Trapp, 28).

1354. Shiell, comparing athletes' and others' gesture of pointing to the sky with an index finger when conceding defeat (*Reading Acts*, 156–58), suggests that Stephen here gestures upward to concede his impending death (156). Heavenward gestures (and especially looking, as here) are, however, appropriate for other reasons.

1355. Ezra 9:6; Job 22:26; Ps 123:1; 1 Esd 4:58; Tob 3:11–12; *Jub.* 25:11; 4Q213 1 I, 8; 4 Macc 6:6, 26 (during martyrdom); *4 Bar.* 6:5; *Jos. Asen.* 11:19/12:1; *t. Ber.* 3:14; *Pesiq. Rab.* 3:5; *y. Ber.* 4:6; Mark 6:41; 7:34; John 11:41; 17:1). Prayer toward Jerusalem was, however, normative as well (1 Kgs 8:44; Dan 6:10; 1 Esd 4:58; *m. Ber.* 4:5–6; *t. Ber.* 3:14).

and among Gentiles.¹³⁵⁶ Because God was envisioned as being in heaven,¹³⁵⁷ both Jews¹³⁵⁸ and Gentiles¹³⁵⁹ regularly lifted their hands in prayer, supplication, or worship. Despite the context, the action of looking to God in heaven was familiar enough that readers would think not so much of an alternative temple (though the idea need not be completely ruled out; “heaven is his throne,” Acts 7:49)¹³⁶⁰ as the idea that heaven as God’s dwelling place was where one might witness God’s activity, especially for someone who was being caught up there (Acts 1:10–11; 2:34; 3:21). It was also the locus for some divine revelations (Luke 2:13, 15; 3:21–22; 22:43), such as would soon happen to Paul (Acts 9:3; 22:6; 26:19) and Peter (10:11–16; 11:5–10).

Thus some other early Jewish texts presented similar heavenly visions.¹³⁶¹ Although speakers could sometimes narrate events as if they were seeing them when, in fact, everyone knew they were not,¹³⁶² Luke intends the claim as genuinely visionary: not only Stephen (7:56) but Luke (7:55) declares that Stephen indeed saw Jesus. The heavens being “opened” recalls Luke 3:21, at Jesus’s calling and empowerment by the Spirit (as Stephen is “filled” with the Spirit here).¹³⁶³ It also reflects the imagery of divine revelation (Ezek 1:1; John 1:51; Acts 10:11; Rev 4:1; 11:19; 15:5; 19:11).¹³⁶⁴ Luke thus compares Stephen to Jesus here as in some other, more explicit aspects of this account of his martyrdom; perhaps he underlines thereby the assurance to both concerning God’s purpose. Further, Stephen sees God’s glory in heaven rather than in the temple,¹³⁶⁵ for, as Stephen has just declared, heaven is God’s throne, rather than any earthly temple containing him (Acts 7:49, quoting Isa 66:1).

Stephen was already “full of the Spirit” (Acts 6:5),¹³⁶⁶ but Luke reminds the reader here that Stephen is prophetically empowered and hence can have genuine visions

1356. Hom. *Il.* 7.178, 201; Xen. *Cyr.* 6.4.9; Virg. *Aen.* 2.405–6 (because she could not lift her hands); 12.195; Sil. *It.* 1.508; Char. *Chaer.* 8.7.2; cf. some (albeit only some) traditional cultures in Mbiti, *Religions*, 84. PGM 4.585 reports closing eyes for prayer, but some parts of the scroll require the eyes to be open (PGM 4.625; cf. Iamblichus *V.P.* 28.156); the magical papyri require many different magical gestures.

1357. E.g., Judaism frequently associates God with “heaven” (e.g., 1 Esd 4:58; Tob 10:13; Jdt 6:19; 1 Macc 3:18, 50, 60; 4:24; 3 Macc 7:6; 1 En. 83:9; 91:7). Greeks also sometimes located Zeus in heaven (Ach. Tat. 5.2.2; cf. Sen. *Y. Dial.* 12.8.5).

1358. Ezra 9:5; Lam 2:19; 3:41; Isa 1:15; 1 En. 84:1; *Jub.* 25:11; Ps 155:2; 1 Esd 9:47; 2 Macc 3:20; 14:34; 15:12, 21; 3 Macc 5:25; 4 Macc 4:11; *Sib. Or.* 3.559–60, 591–93; 4.162–70; *Jos. Ant.* 3.26; 3.53; 4.40; *Ag. Ap.* 1.209; *Test. Mos.* 4:1; *Mek. Pisha* 1.38; *t. Mo’ed Qat.* 2:17. Cf. also 1 Tim 2:8; 1 *Clem.* 29.1; *Acts John* 43.

1359. E.g., Hom. *Il.* 1.450; 3.275, 318; 5.174; 6.257; 7.130; 8.347; 15.368–72; 19.254; *Od.* 9.294, 527; 17.239; 20.97; Eurip. *El.* 592–93; *Ap. Rhod.* 1.248; 4.593, 1702; Virg. *Aen.* 1.93; 4.205; 9.16; 12.195; Ovid *Metam.* 2.477, 580; 6.261–62; 9.702–3; 11.131; 13.410–11; Diod. Sic. 14.29.4; Dion. Hal. *Ant. rom.* 3.17.5; 15.9.2; Appian *Bell. civ.* 2.12.85; *Hist. rom.* 2.5.5; Livy 7.6.4; Suet. *Nero* 41; Arrian *Alex.* 4.20.3 (a Persian); Epict. *Diatr.* 4.10.14; Plut. *Cleverness* 17, *Mor.* 972B; Char. *Chaer.* 3.1.8.

1360. The blind who could not pray toward the temple could pray toward heaven (*t. Ber.* 3:14; *y. Ber.* 4:6, §2), which was God’s sanctuary also (*Tg. Isa.* 6:3).

1361. Thus Eve stares (ἤρένισεν; cf. Acts 1:10–11) into heaven and witnesses a heavenly chariot coming to take Adam (*Apoc. Mos.* 33:2); Job tells his wife to look into heaven and she will see their children crowned with glory (*Test. Job* 40:3–4/4–5). Cf. perhaps *Test. Sol.* 2:7 (third century c.e.), which speaks of immediate help from heaven in answer to Solomon’s prayer. Cf. perhaps Jesus’s activity in Luke 10:18.

1362. See Anderson, *Glossary*, 125, on φαντασία.

1363. Some note that Acts 7:55 is one of the NT texts mentioning the Spirit alongside the Father and the Son (Humphrey, *Ecstasy*, 22); the same is true of Luke 3:22.

1364. Also *Apoc. Mos.* 35:2; 2 *Bar.* 22:1; *Test. Ab.* 7:3 A; *Test. Levi* 2:6; see also Lentzen-Deis, “Motiv,” citing esp. 2 Macc 3:24ff.; 3 Macc 6:18. For heaven’s parting for revelatory messengers, see, e.g., Virg. *Aen.* 9.20–21; heavenly vision, see, e.g., Max. Tyre 11.11–12.

1365. With Gaventa, *Acts*, 131 (cf. Ps 63:2; Isa 6:1).

1366. Probably the wording does not refer to a fresh empowerment here as in Acts 4:8 and 13:9; see Turner, *Power*, 165–69, esp. 169.

(2:17–18).¹³⁶⁷ Many ancients granted that those nearing death experienced special prophetic abilities,¹³⁶⁸ and this may have been particularly expected for martyrs;¹³⁶⁹ for Stephen, however, the explicit emphasis is on the Spirit's empowerment. (Still, Stephen's vision precedes his martyrdom just as Jesus's transfiguration includes a warning of his impending martyrdom in Luke 9:30–31.)¹³⁷⁰ The "God of glory" appeared to Abraham in Acts 7:2, at the very opening of Stephen's speech; now Stephen himself sees God's glory.¹³⁷¹ Jesus had "entered into glory" (Luke 24:26; cf. 9:31–32) and would return in glory to judge the world (9:26; 21:27), a point undoubtedly significant in this context.

In Acts 7:30–31, Moses sees God's glory in the bush; here Stephen witnesses Jesus along with God's glory in heaven. Stephen's face like that of an angel in 6:15 may also evoke Moses's reflecting God's glory. Far from blaspheming Moses (6:11), Stephen is his true follower. Just as others had "gazed" on Stephen's glorified face in 6:15, so he "gazed" into God's heavenly glory here. Most important, however, is that Stephen's vision of the Son of Man at God's right hand (7:55–56) clearly parallels Jesus's announcement of the Son of Man at God's right hand (Luke 22:69), as scholars commonly observe.¹³⁷² "Son of Man" is rare outside the Gospels and barely ever occurs on anyone's lips but Jesus's; this makes dependence on Jesus's words before the Sanhedrin all the more likely.¹³⁷³ Jesus's claim before the Sanhedrin is what ultimately clinches his condemnation; Stephen's adapting the same claim produces the same effect here.

*Excursus: The Son of Man*¹³⁷⁴

Whatever the ultimate source of early Christian "Son of Man" imagery, there can be no question that it derives in this case from the gospel tradition. The expression appears nowhere else in Acts, and its twenty-six uses in Luke's Gospel all appear on Jesus's lips. In early Christian literature, in fact, it appears almost exclusively in

1367. On the Spirit's connection with prophetic empowerment in many early Jewish sources, see Menzies, *Development*, 53–112; Turner, *Power*, 86–104; Keener, *Spirit*, 10–13. On "full of the Spirit," van der Horst, "Macrobius," 226, compares here Macrob. *Sat.* 3.7.3, *deo plenam*.

1368. E.g., Plato *Apol.* 39; Xen. *Apol.* 30; Cic. *Div.* 1.23.47; Aune, *Prophecy*, 178; many references in Malina and Rohrbaugh, *John*, 221–22. For Jewish testaments, cf. introduction to Acts 20:18–35; others also stressed the importance of final words (see Englhofer, "Ultima verba").

1369. Cf. Munoa, "Merkavah" (though the most persuasive example, *Passion of Perpetua and Felicitas*, is much later and most such visions are not associated with suffering).

1370. See Goulder, *Type and History*, 57.

1371. On the *inclusio*, see, e.g., Knowling, "Acts," 201; further comment on Acts 7:2.

1372. E.g., Dupont, *Salvation*, 114; Focant, "Fils de l'homme" (addressing a range of potential meaning for "Son of Man" in Luke-Acts); Marguerat, *Actes*, 274; cf. Abbott, *Acts*, 92. Although the Markan source for Luke 22:69 speaks of the parousia (Mark 14:62; cf. also Matt 26:64), Matera, *Theology*, 93–94, notes that Luke's eschatological interest involves not only the future kingdom but also eschatology immediately after death (Luke 12:20; 16:23; 23:43), like Paul (2 Cor 5:1–10; Phil 1:23). Sleeman, *Geography*, 165, rightly links "glory" in 7:55 with both the risen, ascended Jesus (Luke 9:31–32; 24:26; Acts 3:13) and the coming Son of Man (Luke 9:26; 21:27).

1373. Cf. Tannehill, *Acts*, 98. Also Dunn, *Acts*, 99–100 (simultaneously arguing plausibly for authenticity because Luke nowhere else introduces it though it could have provided useful parallels elsewhere as well). This unique use of the title is often noted (e.g., Schweizer, "Son of Man Again," 257); some associate its use outside the Gospels with Jesus's solidarity with his saints (Longenecker, *Christology*, 92, developing Moule, "Circumstances," 256–57).

1374. For brief surveys of views, see, e.g., Marshall, "Son of Man Sayings"; Longenecker, *Christology*, 82–87; Marshall, *Origins*, 63–82; Mansfield, *Spirit and Gospel*, 52–53; Keener, *Matthew*, 65–66.

sayings attributed to Jesus.¹³⁷⁵ (In view of the patently Semitic, non-Hellenistic figure of speech involved,¹³⁷⁶ the view that the expression originated among Hellenists such as Stephen¹³⁷⁷ should be rejected outright.)

The supposed distinction between the “Son of Man” and Jesus himself in some of his sayings (Mark 8:38; Luke 12:8) ignores the common polite Aramaic use of third-person speech for oneself.¹³⁷⁸ Sometimes it might even mean “I” in common usage.¹³⁷⁹ Jesus’s use of the term allows some ambiguity,¹³⁸⁰ however, which might be connected with the “messianic secret” and delaying his own conflict with the politically powerful authorities.

Normally, “son of man” was simply good Hebrew and Aramaic for “human one”¹³⁸¹ and sometimes was used as a circumlocution like “that one.”¹³⁸² Although this broader usage allowed Jesus to maintain sufficient ambiguity to protect himself officially, his eschatological usage points to a more specific biblical allusion. Because it can mean a “human being” (or occasionally “I”), some scholars reject its eschatological sense in the Gospels.¹³⁸³ Most, however, recognize that at least some of the Son of Man sayings use the title eschatologically,¹³⁸⁴ whether they derive the title’s background from Daniel¹³⁸⁵ or, less likely, from the Similitudes of *1 Enoch*.¹³⁸⁶ (Some think that the usage is also reflected in *4 Ezra*,¹³⁸⁷ though this is less clear and stems from a period after the gospel tradition was spreading.)

The Similitudes, however, are of uncertain date,¹³⁸⁸ and even the meaning in *1 Enoch* is debated. Some argue that Enoch is himself the “son of man” (human one; see *1 En.*

1375. The exceptions are Heb 2:6; Rev 1:13; 14:14, all reflecting OT language and explicable without allusion to Jesus’s frequent self-title (though they might reflect cognizance of it). Paul likely knew Son of Man sayings (see parallels in 1 Thess 4:13–5:11), but the Semitic construction was not relevant for his audience (Nickelsburg, “Son of Man,” 804).

1376. With, e.g., Jeremias, *Theology*, 260–62.

1377. Walker, “Origin of Concept,” 490.

1378. See Diez Macho, “Hijo del Hombre,” illustrating from the Palestinian Targumim. It also appears in only four sayings; if even one of the many other “Son of Man” sayings is authentic, this distinction between Jesus and the Son of Man would be untenable (Witherington, *Christology of Jesus*, 257–58; idem, *End*, 170).

1379. Vermes, *Jesus the Jew*, 163–68, shows that *bar nasha* can mean “that one,” which in turn could function as a circumlocution for “I” (some others are less convinced, e.g., Jeremias, *Theology*, 261n1; esp. Chilton, *Approaches*, 75–76). For its use for “I,” see, e.g., *y. Hag.* 2:1, §9; *Ketub.* 4:14, §1; *Sukkah* 5:1, §7; *Ta’an.* 1:4, §1; 4:5, §11; for “you,” see *Pesiq. Rab Kah.* 9:1. But Vermes probably limits the usage too much to focus solely on it.

1380. See, e.g., Marshall, “Son of Man Sayings,” 350–51.

1381. With, e.g., Cullmann, *Christology*, 138; about one hundred times in the Hebrew Bible.

1382. “That one” could refer to significant personages; it became a title for Pythagoras among Pythagoreans (e.g., Iambl. *V.P.* 18.88; 35.255).

1383. Burkitt, *Sources*, 66–68; Montefiore, *Gospels*, 1:44; Vermes, *Jesus the Jew*, 160–91; Leivestad, “Exit,” 266–67; cf. Cullmann, *Christology*, 138; Chilton, *Approaches*, 75–109. It addresses a prophet in Ezekiel (cf. also *Apoc. Elij.* 1:1).

1384. Lindars, “Re-enter.” Hamerton-Kelly, *Pre-existence*, 41, differentiates the use in Daniel (for Israel), the Similitudes (for an exalted Enoch), and *4 Ezra* 13 (for a Messiah) but argues (in keeping with his focus) that all suggest preexistence.

1385. E.g., Manson, *Servant-Messiah*, 72–73; Brown, *Death*, 514; Witherington, *Christology of Jesus*, 239; Wade, “Son of Man”; Hooker, *Message*, 71–72; Bruce, *Time*, 27; cf. Wright, *People of God*, 292; Lohse, *Mark’s Witness*, 44. Many focus on Daniel but supplement with the Similitudes as a probable source (e.g., Brown, *Death*, 509–14; Witherington, *Christology of Jesus*, 235–36; Hagner, *Matthew*, 215). Daniel was more widely known than the Similitudes, but early Christians could have known both.

1386. *1 En.* 46:3–4; 48:2; 60:10; 62:5, 7, 9, 14; 63:11; 69:26–27, 29; 70:1; 71:13–14, 17. Many scholars find background for the Gospels’ usage here, e.g., Burkitt, *Sources*, 66ff.; Bonsirven, *Judaism*, 189; Tödt, *Son of Man*; Sandmel, *Judaism*, 88–89; Ladd, *Theology*, 145–58; Lindars, “Re-enter”; idem, *Son of Man*, 99; Boccaccini, *Judaism*, 219; Collins, “Son of Man”; Charlesworth, *Jesus within Judaism*, 40. Against this, see, e.g., Vermes, *Jesus and Judaism*, 89–99.

1387. Cf. *4 Ezra* 13:1–56; Boring, Berger, and Colpe, *Commentary*, 143; Collins, “Son of Man”; cf. Wright, *People of God*, 316. For the divine-warrior tradition here and in Dan 7, see Hayman, “Man from Sea” (Stevens, “Warrior,” sees the divine warrior behind Mark’s Son of Man).

1388. The majority today may view the Similitudes as pre-Christian, but some dispute remains. Some scholars date them to the early second century c.e. (Hindley, “Date”) or even the medieval period (Black,

71:14),¹³⁸⁹ or even that “son of man” there represents humanity in general.¹³⁹⁰ Still, whether representing Enoch or not, the figure in most passages in the Similitudes is an exalted one: the son of man was chosen before creation of the world (48:6) and will be worshiped by the whole earth (48:5), a light to the Gentiles (48:4); he appears to be identified with “my Elect” (48:9) and “God’s Anointed” (48:10). He sits on the throne of glory as a judge (69:26–29).¹³⁹¹

In any case, an eschatological usage in Enoch would probably reflect an interpretation of Daniel,¹³⁹² which (as part of common Judaism’s basic “canon”) circulated even more widely than the widely spread traditions of *1 Enoch*. The “son of man” in *1 En.* 46:3, the first occurrence in the Similitudes, reflects the language of Dan 7.¹³⁹³ Some scholars think that the figure of Dan 7:13 is angelic;¹³⁹⁴ this is not clear, since the figure is closely identified with the suffering saints of the most high God (7:18, 21–22). The figure in Dan 7 may be corporate,¹³⁹⁵ but many argue that it reflects a sort of corporate identity between the people (7:18, 21–22) and their ruler (7:13–14);¹³⁹⁶ in any case, it was certainly amenable to such an interpretation in the first century.¹³⁹⁷

When the Pharisees think that Jesus “blasphemes” because he forgives sins, Jesus demonstrates the “Son of Man’s authority on earth” (Luke 5:24; Mark 2:10); he likewise claims authority for the Son of Man as “Lord of the Sabbath” (Luke 6:5; Mark 2:28). The Son of Man’s “authority” may refer to Dan 7:14. But Jesus’s allusion to Dan 7:13–14 becomes most explicit in Mark 13:26 (addressed to Jesus’s disciples; not in Luke) and in Luke 22:69//Mark 14:62 (addressed to Jesus’s opponents, effectively ending Mark’s “messianic secret”).

“Parables”); most, however, date them earlier (see, e.g., Charlesworth, *Pseudepigrapha and New Testament*, 89; idem, *Jesus within Judaism*, 39–40; Thompson, “Son of Man”; cf. Wright, *People of God*, 317n116: most favor a first-century C.E. date). Some think the title in the Similitudes reflects the Christian usage (Agouridis, “Son of Man”; contrast Thompson, “Son of Man”); some view the Similitudes as anti-Christian polemic, reflecting a different Son of Man (Jas, “Hénoch”).

1389. E.g., Casey, “Son of Man” in Similitudes”; Ricciardi, “Henoc”; Charlesworth, *Pseudepigrapha and New Testament*, 18, 88–89; Hamerton-Kelly, *Pre-existence*, 41; against this, see, e.g., Luke, “Son of Man.” Some argue (plausibly but hypothetically) that Enoch becomes the Son of Man (*1 En.* 71:14) only in later redaction (Schreiber, “Menschensohn”); E. Isaac (*OTP* 1:50) argues that “son of man” for Enoch in this passage is an Ethiopic construction different from that in the earlier passages.

1390. Cf. Cullmann, *Christology*, 140–41.

1391. Thus many view the title as messianic (McNamara, *Judaism*, 107–8; Kim, *Introduction*, 69–70); some view it as divine (Quarles, “Lord”); for a binitarian reading, see Scott, “Binitarian Nature.” Enoch could be or become a superhuman figure himself (as in some other Enoch literature), like Abel or (in the rabbis) Elijah in some other sources.

1392. So Collins, “Son of Man” (reading *4 Ezra* 13 as a similar attestation of this first-century interpretation of Daniel); Nickelsburg, “Son of Man,” 801 (noting the interweaving of Daniel, Isaiah, and Davidic traditions). Cf. the view that Messiah and Son of Man had been merged by the first century (Davies, *Paul*, 279).

1393. Thus *1 En.* 46:3 also alludes to the “Ancient of Days” (Dan 7:9, 13, 22). Possibly even indisputably early portions of *1 Enoch* draw on this part of Daniel (see Glasson, “Son of Man Imagery”).

1394. Chilton, *Rabbi Paul*, 45.

1395. So Burkitt, *Sources*, 67, and Bright, *History*, 457, contrasting the Similitudes.

1396. See, e.g., Riesenfeld, *Tradition*, 38. For a nonmessianic, heavenly-representative approach, see Koch, “Menschensohn.” Witherington, *Christology of Jesus*, 241, provides a messianic reading of Daniel’s “son of man,” but not all will find all his arguments compelling.

1397. Vermes, *Jesus the Jew*, 169–76, notes that Daniel’s “son of man” did acquire messianic significance, but not (he argues) as a title. See sources noted above. Certainly, Justin’s Trypho in the second century read Dan 7 messianically (*Dial.* 31–32; Barnard, “Old Testament,” 404; idem, *Justin Martyr*, 48; Shotwell, *Exegesis*, 73), but this may reflect only Justin’s language (Higgins, “Belief,” 301–2). In later rabbinic discussion, see Moore, *Judaism*, 2:335–37. For a possible messianic reading of Daniel’s “son of man” in the Old Greek, see Reynolds, “Son of Man,” 77–79. Stauffer, *Jesus and Story*, 163–64, suggests deliberate suppression.

Although some scholars have argued that the later church created many or all of Jesus's "Son of Man" sayings,¹³⁹⁸ "Son of Man" in early Christian texts appears almost exclusively on Jesus's lips. The proper, positive use of the criterion of dissimilarity thus would suggest that if *any* title of Jesus is authentic, this one is.¹³⁹⁹ Although many scholars agree that Jesus used the title, they dispute the authenticity of one or more groups of sayings in which the title is used. Yet if the title is authentic and barely used by anyone except Jesus, one need not a priori exclude any of the uses. If Jesus proclaimed a kingdom and implied his messiahship, one especially need not exclude the eschatological sayings.

If the Gospels provide any indication at all, Jesus apparently defined his mission—both its suffering and its exaltation—in terms of the son of man of Dan 7:13–14.¹⁴⁰⁰ Daniel's context would explain both the suffering and the exaltation aspects of the title (cf. 7:21–22, 25–27), rendering irrelevant any forced choice between their uses.¹⁴⁰¹ For Luke's source, Mark, the Son of Man who suffered before his exaltation is the forerunner of the community of faith, his audience, now suffering great tribulation at the hands of hostile world rulers (Mark 13:9–20, 26).¹⁴⁰² Yet because of its more common idiomatic associations, "Son of Man" retains an ambiguity that "Son of God" as a title for a specific person would lack.

Luke believes his own usage in his Gospel reflects Jesus's usage. Luke and his Diaspora audience were likely less familiar with Enoch's Similitudes than they were with Daniel. Even without the mention of clouds in Luke 22:69 (contrast Mark 14:62, where Jesus more explicitly recalls Dan 7:13), "Son of Man" there (and consequently in Acts 7:56) evokes the figure in Dan 7.

III. STANDING AT GOD'S RIGHT HAND (7:55–56)

That Jesus is at the Father's right hand (Acts 7:55, repeated at the end of 7:56 as epiphora or antistrophe) emphasizes the claim of his exaltation as sovereign Messiah and Lord (2:33–36), the "Lord" of Ps 110:1 (Acts 2:34). The high priest (Acts 7:1) and others would construe this as political defiance, claiming an alternate kingdom and authority in the hands of one whose execution they approved to maintain political stability (see 3:15; 4:7–10; 5:28).

But whereas other passages portray Jesus sitting at God's right hand (Luke 20:42; Acts 2:33–34; esp. Luke 22:69), why does Stephen emphatically see him *standing*

1398. E.g., Higgins, *Son of Man* (e.g., 53, 118); Borg, *Vision*, 14; idem, *Conflict*, 221–27; Boring, *Sayings*, 239–50; Donahue, *Christ*, 184; Crossan, *Jesus*, 238–55; Koester, *Introduction*, 2:88–89.

1399. Many scholars have concluded thus; cf., e.g., Bowman, *Intention*, 125–42; Jeremias, *Theology*, 260–76; Kümmel, *Theology*, 106; Gerhardtsson, *Origins*, 57; Riesenfeld, "Background," 94–95; Hill, *Prophecy*, 183; Marshall, "Son of Man Sayings"; idem, *Origins*, 63–82; France, "Authenticity," 113; Davies and Allison, *Matthew*, 2:43–50; Witherington, *End*, 170; Bruce, *Time*, 27–28; Bock, "Words," 91; Charlesworth, *Jesus within Judaism*, 42. The negative use of the criterion, by contrast with our approach here, has faced serious challenges in recent years (Meier, *Marginal Jew*, 1:173; Brown, *Death*, 19; Stanton, *Gospel Truth?*, 143; Young, *Jewish Theologian*, 257).

1400. Cf. Stanton, *Jesus of Nazareth*, 160–61; Witherington, *Christology of Jesus*, 234–45; Brown, *Death*, 509–14; *pace* Crossan, *Jesus*, 238–55.

1401. See Manson, *Servant-Messiah*, 72–74 (emphasizing corporate personality); Riesenfeld, *Tradition*, 38 (noting corporate personality between king and people); Witherington, *Christology of Jesus*, 245, 269; Hooker, *Message*, 71–72. Kazen, "Son of Man," 87, 108, thinks that Jesus and his movement preserved both corporate and individual aspects. Doeve, *Hermeneutics*, instead finds suffering through a midrashic connection with the Suffering Servant (cf. the favorable review by Boismard, "Review"). Bowman, *Intention*, 142–53, thinks that Jesus added the suffering aspect to the conventional apocalyptic usage.

1402. Matthew also interprets the title in view of Dan 7 (see Davies and Allison, *Matthew*, 2:50–52).

there (Acts 7:55–56)? Scholars have offered evidence for various proposals.¹⁴⁰³ Some cite the Samaritan view of Moses as the world ruler who interceded for the faithful during the period called “the Standing.”¹⁴⁰⁴ Even assuming that the extant evidence is early enough, this view is too narrow in light of the many possibilities and would be difficult for either Luke or his audience to know. In light of the parallel with Luke 22:69, others suggest that Jesus’s standing may signify his own eagerness to return, delayed only by the necessity of the Gentile mission (Acts 1:8–11). Because Stephen urges the church to world mission, he receives this proleptic vision.¹⁴⁰⁵ This view is possible but, to be as plausible as some others, requires too many lacunae in the text to be filled by readers’ assumptions.

Some other views draw more on widely available images of standing. A person of higher rank might stand to welcome one with whom he was pleased (1 Esd 4:47).¹⁴⁰⁶ Some suggest that standing is the posture for martyrs in heaven and hence Jesus the martyr prefigures Stephen.¹⁴⁰⁷ Johnson summarizes several views: the posture could be “cultic (see Lev 14:11; Ps 22:3),¹⁴⁰⁸ prophetic (Ezek 1:21; 2:1–2), or forensic, with Jesus playing the role of advocate (Gen 18:22; Exod 8:20; 9:13; Zech 3:1–8; Jer 18:20),¹⁴⁰⁹ or even of judge (Isa 3:13);” or it could apply, as some suggest, to those “attending God in the heavenly court” (cf. Ps 81:1 LXX [82:1 MT]; Zech 3:1–8; esp. Isa 6:2; Luke 1:19).¹⁴¹⁰ In view of other signs of judgment reversal in the passage, it seems likely that the forensic images of advocate, witness, and/or judge are paramount.¹⁴¹¹ The OT depicted witnesses as standing, with a vindicating witness at the right hand; as applied here, it would mean that “condemned by the earthly tribunal, Stephen would be vindicated by the heavenly

1403. For a fairly complete list of views, see Barrett, *Acts*, 384–85 (eleven views); Bock, *Proclamation*, 222–24 (six major views, Bock himself preferring the images of judge and advocate). Lake and Cadbury, *Commentary*, 84, believe it implies (like Luke 16:22; 23:43) “that Stephen would pass straight to the presence of God, without waiting for the judgment or resurrection.” Among signs at one’s death confirming that one’s destination is paradise, an early second-century rabbi included one’s fulfilling a commandment at the time (*Abot R. Nat.* 25 A); some said God softened the death of special ones (*Test. Ab.* 8:10–12 A, for Abraham but not prophets).

1404. Scharlemann, *Stephen*, 15–16 (citing *Memar Marqah* 4.12; Meeks, *Prophet-King*, 377–78). Moses as “God’s Man” (*Stephen*, 15–16, citing *Memar Marqah* 6.6) also cannot take precedence over gospel tradition in explaining “Son of Man.”

1405. Owen, “Stephen’s Vision.” His portrayal of Jesus as an advocate for Stephen is not unlikely. For divine eagerness for the parousia, cf. Rom 8:26 (with 8:22–23).

1406. Though this posture could simply be necessary for Darius to kiss Zerubbabel.

1407. Chibici-Revneanu, “Stehplatz,” plausibly connecting the posture to the context in Acts 7. But the posture (applicable to martyrs in 4 Macc 17:18) appears in heaven as applicable to others besides martyrs (1 Kgs 22:19; 2 Chr 18:18; 4Q405 20 II + 21–22, in DSSNT 374; 2 En. 21:1; 22:2; 4 Ezra 8:21; 2 Bar. 21:6; 51:11; cf. 2 Bar. 6:4; 2 En. 29:3; esp. Aune, *Revelation*, 471); in some cultures, this posture may have connoted respect (cf., e.g., Val. Max. 2.4.2; Neyrey, “Shame of Cross,” 117).

1408. Because Jesus quotes Ps 110:1 while confronting the leading priests (Luke 22:66–69), he might appear as the true high priest (cf. Acts 7:1); the heavenly priest in Hebrews (Heb 3:1; 4:14–16; 5:5, 10; 6:20; 7:21, 26; 8:1; 9:11, 24–25) is rooted especially in Ps 110:4 (Heb 5:6–7:28). But the idea seems more conspicuous in Luke-Acts by its absence.

1409. Cf. perhaps also Hor. *Sat.* 1.9.38–39. But speakers normally arose to speak in various settings (see comment on Acts 1:15; 2:14; 15:7).

1410. Johnson, *Acts*, 139. On standing in the heavenly court, see 4Q405 20 II + 21–22 2 (DSSNT 374); *Test. Ab.* 7:11 A; 1 En. 39:12; 2 En. 21:1; *Odes Sol.* 36:2; *b. Hag.* 13b. This last position resembles (but is more nuanced than) Légasse, “Encore ἐστῶτα,” who contends that the object of visions in the LXX usually was standing; the Lord was usually seated (1 Kgs 22:19; Isa 6:1–2), but his court and others could stand (1 Chr 21:16; Isa 6:1–2; Zech 3:1). Angels also could stand to act in history (Dan 11:1; 12:1).

1411. Sabbe, “Saying,” 275, rejects the judge interpretation because the vocabulary differs from Acts 10:42 and 17:31. The vocabulary recalls, however, Luke 22:69, which is more important here.

one.”¹⁴¹² Though judges generally sat through cases (Acts 23:3),¹⁴¹³ it is said that they rendered the verdict (and witnesses offered testimony) only standing.¹⁴¹⁴ The image of God arising to defend his people is common in Scripture¹⁴¹⁵ and appears elsewhere.¹⁴¹⁶ Although judges in Roman trials could be seated, lawyers pleading cases would stand (Pliny *Ep.* 1.23.2; on standing for speakers in general, see comment on Acts 2:14–15).

Could Stephen be pronouncing judgment on his own (earthly) judges?¹⁴¹⁷ The nearest parallels to the present-tense description of a vision (Acts 7:56) may be visionary judgment oracles found in Philo and Pseudo-Philo’s *Biblical Antiquities*.¹⁴¹⁸ But whatever the other parallels, the allusion to Luke 22:69 imports the idea of eschatological judgment; Jesus, who was condemned at his trial but would someday judge his accusers, now stands to vindicate his witness against the same Sanhedrin.¹⁴¹⁹ The Son of Man also testifies on behalf of his witness, as Luke 12:8–9 promised.¹⁴²⁰ If this text refers to Stephen’s judges being the ones really on trial instead of Stephen himself (also suggested by Acts 7:51–53; see comment there), this is one of several ironies in the narrative that suggest a reversal of guilt:

Expectations for Condemned	Events in This Passage
Judge stands to render verdict (or witnesses stand to testify)	Jesus stands as eschatological, heavenly judge or witness (Acts 7:55–56)
The condemned is stripped for execution	The false witnesses strip themselves (7:58)
The condemned must confess sins (see comment on Acts 7:60)	Stephen confesses their sins, not his own (7:60)

The idea of such reversal was readily understood in the Greco-Roman world (for further examples, see comment on Acts 7:51–53).¹⁴²¹ Thus Socrates allowed himself to be convicted, but “God and the truth sat in judgment over” the court.¹⁴²² Cicero

1412. Trites, *Witness*, 132; cf. Bruce, *Commentary*, 168; Moule, *Messengers*, 30; esp. Cullmann, *Christology*, 157–58; Bock, *Proclamation*, 224. On the heavenly court, which, however, predominates in Amoraic rather than earlier sources, see Keener, “Heavenly Court”; 3 *En.* 30:1; *’Abot R. Nat.* 32 A; b. *’Abod. Zar.* 36a; B. *Mešī’a* 75a; 85b; 86a; *Git.* 68a; *Mak.* 13b; *Pesah.* 53b; *Šabb.* 129b; y. *Sanh.* 1:1, §4; 11:5, §1; *Gen. Rab.* 49:2; 64:4; *Exod. Rab.* 12:4; 30:18; *Lev. Rab.* 11:8; 24:2; 29:1, 4; *Num. Rab.* 3:4; 18:4; 19:3; *Ruth Rab.* 4:3, 5; *Eccl. Rab.* 1:11, §1; 2:12, §1; 5:11, §5; *Song Rab.* 3:11, §2; *Pesiq. Rab Kah.* 23:4; 24:11; *Pesiq. Rab.* 15:19; *Tg. Ps.-J.* on Deut 5:31; cf. the Gentile analogues in Bright, *History*, 158–59; Vitruv. *Arch.* 1.pref. 2.

1413. E.g., Exod 18:13, 22; Joel 3:12; Sir 11:9; 38:33; 4Q381 76–77 12; 1 *En.* 55:4; t. *Sanh.* 6:3.

1414. So t. *Sanh.* 6:2. If defendants also stood (as in Stauffer, *Jesus and Story*, 123), Jesus might stand as Stephen’s codefendant, but the other imagery in the passage makes this suggestion less probable.

1415. As judge in Pss 9:19; 74:22; 82:8; Isa 3:13; as advocate in Ps 109:31; cf. 1 Sam 12:7; Job 31:14; Pss 3:7; 7:6; 10:12; 12:5; 17:13; 68:1; 82:1; Isa 2:19, 21; 14:22; 28:21; 33:10; Jas 5:9. In court, cf. also Isa 50:8.

1416. E.g., *Test. Mos.* 10:3, according to the likeliest reconstruction. In the eschatological time, God will stand to judge the world (*Exod. Rab.* 17:4), though God could render judgment in either position (cf. *Gen. Rab.* 82:8, where standing might imply prosecution); in *Pesiq. Rab Kah.* 23:3, 8, God rises from the throne of judgment, but only to sit at the throne of mercy.

1417. Cf., e.g., Conzelmann, *Acts*, 60; Fitzmyer, *Acts*, 392.

1418. Aune, *Prophecy*, 270.

1419. Goulder, *Type and History*, 57, suggests that this vision even fulfills the promise of seeing the Son of Man coming in his kingdom before death (Mark 9:1; Matt 16:28; Luke 9:27). Some contend that this is Stephen’s personal parousia, an eschatology generated by the parousia’s delay (Wilson, *Gentile Mission*, 77); Luke does have some individual eschatology (Luke 23:46). But Sabbe, “Saying,” 268–69, argues against the personal-parousia interpretation.

1420. Cf. Bruce, *Commentary*, 168; idem, *Message*, 76; idem, *Time*, 28n24; Tannehill, *Acts*, 98–99.

1421. The idea of reversal before a heavenly court may be implied in John 16:7–11; see Keener, *John*, 1033. Such reversal provided irony (cf. Aeschines *Tim.* 117–18; Xen. *Mem.* 4.8.9–10; Sen. E. *Controv.* 6.5).

1422. Max. Tyre 3.8 (Trapp, 30); see similarly Xen. *Apol.* 29; Epict. *Diatr.* 4.1.123. For another case (not mentioning Socrates), see Epict. *Diatr.* 2.2.17–18. A prosecutor might claim to simply confirm a verdict already revealed by gods (Hermog. *Inv.* 1.4.106).

presented evidence for Verres's guilt so thoroughly that he declared it was really the jury that was on trial before the rest of the world.¹⁴²³ Philostratus claims that Apollonius left his trial having convicted Domitian rather than himself (*Vit. Apoll.* 7.1; cf. 8.2). When a hero was killed unjustly, he trusted that truth and justice nevertheless supported him (Philost. *Hrk.* 33.37). That Stephen may suggest such reversal even within the narrative world (by Jesus's standing) could incite the narrative response of Acts 7:57; if a group of judges could feel threatened that one was going to judge them, they might react with hostility (Sen. E. *Controv.* 6.5).

IV. THE AUDIENCE'S HOSTILITY (7:57)

The audience's response may imply that it thought Stephen's words blasphemous, associating a mortal too closely with God's power.¹⁴²⁴ Granted, even apart from later Jewish speculation about the heavenly role of Metatron or other potentially dualistic agents,¹⁴²⁵ Ps 110:1 spoke of a "lord" at the Lord's right hand. But a comparison with Luke 22:66–71 suggests that Luke may understand the audience's response as a response to a political claim (Luke 23:2) or possibly (if assuming Markan tradition that Luke omits, Mark 14:64) blasphemy (on the broad usage of this term, as opposed to the narrower Mishnaic definition, see comment on Acts 6:11–14).

Although κράζω applies to any loud speech (Luke 18:39; 19:40; Acts 14:14; 23:6; 24:21), the audience's crying out here fits that of demons or those possessed by them (Luke 4:41; 9:39; Acts 16:17), or hostile mobs (Acts 19:28, 32, 34; 21:28, 36). Likewise, the phrase φωνῆ μεγάλη (sometimes with the terms in reverse sequence), though applicable to loud praise (Luke 17:15; 19:37) and other loud cries (Luke 23:46; Acts 14:10; 16:28), can apply to demons (Luke 4:33; 8:28; Acts 8:7) or hostile mobs (Luke 23:23; Acts 19:34; cf. Acts 26:24). Most important, however, is that the expression contrasts with Stephen's "cry" to the Lord to forgive his hearers (Acts 7:60); this is the only other reference in Luke-Acts to redundantly (but emphatically) include both a form of κράζω and φωνῆ μεγάλη.¹⁴²⁶

Covering one's ears to prevent hearing further blasphemy may have been considered a pious act.¹⁴²⁷ For Luke, however, it illustrates the principle in 7:51 and 28:26–27: they were deliberately deaf to God's summons.¹⁴²⁸ If unjust judges could be described as "hiding their eyes" (*Sipra Qed. par.* 4.206.2.7–10),¹⁴²⁹ "hiding ears" cannot be thought much better. A late first-century orator compared mobs to beasts; they act in rage and close their ears to anything profitable (Dio Chrys. *Or.* 32.26). The term here for "rush" (ὀρμάω) and its cognates can apply to the violence of demon-inspired suicide (Luke 8:33; from Mark 5:13) and especially hostile mob violence (Acts 14:5;

1423. Cic. *Verr.* 2.5.69.177. For Philodemus *On Death* 35.6–8, those who condemn the innocent suffer throughout life from their own vice.

1424. Witherington, *Acts*, 276; Goulder, *Type and History*, 42.

1425. For discussions concerning Metatron (though restricted to later sources), see, e.g., *b. Hag.* 15a; Abrams, "Boundaries"; Fauth, "Metatron"; Stroumsa, "Form(s)." Early Christian Christology, however, plays more on Wisdom than on notions such as Metatron (see, e.g., Bauckham, *God Crucified*, 17–22). Most Christians were not dualists in this sense, despite apparent rabbinic assumptions (*m. Sanh.* 4:5; *Sipre Deut.* 329.1.1; *b. Hag.* 14a; *Sanh.* 38ab; *Pesiq. Rab.* 21:6; 3 *En.* 16:2; but these *minim* may not have all been Christians [cf. Bassler, "Cain"]).

1426. One might add the demonic cries of Luke 4:33; 8:28 if one includes the verb ἀνακράζω in the count, but these are nowhere close to this context. Cf. 2 Sam 19:4 LXX.

1427. If the third-century source is literal and reflects widespread practice; Strack and Billerbeck, *Kommentar*, 2:684; Haenchen, *Acts*, 292n6; Catchpole, *Trial*, 249. Cf. the danger of hearing and approving *minuth*, heresy (*t. Hul.* 2:24; *b. Abod. Zar.* 16b–17a).

1428. Cf. also Tannehill, *Acts*, 98 (on Acts 28:26–27).

1429. For the Semitic idiom, cf. Job 28:21; Isa 1:15; Jer 16:17; Ezek 22:26.

19:29).¹⁴³⁰ On the use of ὁμοθυμαδόν (their united activity here), see comment on Acts 2:46; it contrasts with the united devotion of the believers (1:14; 2:46; 4:24; 5:12; 15:25; cf. 19:29).

c. Introducing Saul (7:58)

Luke here introduces “Saul” for the first time. Luke often introduces important new characters initially as minor characters (e.g., Barnabas in 4:36–37), perhaps partly to unify the narrative¹⁴³¹ and partly to acclimate the reader gradually to the new character. Stephen’s death is an appropriate time to introduce the church’s persecutor (cf. 1 Cor 15:9; Gal 1:13; Phil 3:6). Luke will provide Paul-Stephen parallels later (e.g., Acts 21:28 with 6:13), as he parallels Stephen with Jesus here.¹⁴³² That Stephen and his circle influenced Paul’s theology (and perhaps conversion) should not be doubted,¹⁴³³ least of all on the level of Luke’s narrative. It is no accident that the Lord Jesus will show Saul the things he must suffer for his sake (9:16).

I. SAUL’S NAME

Although even some of Luke’s first-time hearers may have eventually guessed that Saul is Paul, Paul’s letters offer no suggestion that most of his churches knew him by the name “Saul.” Thus first-time readers might be kept in suspense until 13:9 (on which see comment) or, more likely, at least until his conversion in 9:3–9.

Some scholars suggest plausibly that Jewish parents who were Roman citizens probably often gave Hebrew names that would resemble the Roman names;¹⁴³⁴ in this case, “Saul” matches “Paul” well, at least in Greek (Σαῦλος and Παῦλος, as opposed to the Hebrew “Shaul” and “Paulus”). Names could play on characteristics,¹⁴³⁵ and so “Paul” might be appropriate for a small baby (Latin *paulus*, small); more likely, however, it is a Roman family name (see fully comment on Acts 13:9). But “Saul” probably evoked for most Jews, and especially most of Luke’s Diaspora audience, the famous king of Israel.¹⁴³⁶ Diaspora readers may have associated the name “Saul” with the persecutor of Jesus’s royal ancestor David,¹⁴³⁷ but we should not doubt that Jewish (especially Benjaminite) parents continued to use the name for their children; not everyone viewed Saul wholly negatively. The name is attested among Greek-speaking Jews in Palestine (Σαούλ, in Joppa; *CIJ* 2:146, §953).

Even in the pro-Davidic books of Samuel, Saul was a positive figure when God first called him;¹⁴³⁸ further, Josephus’s portrait of Saul includes many features appropriate

1430. Fairly frequent in the LXX, especially Maccabean literature (1 Macc 4:8, 30; 6:33, 47; 2 Macc 9:2; 10:16; 12:20, 22, 29, 32; cf. 3 Macc 1:16, 23; 4:5), most often in a military sense.

1431. Tannehill, *Acts*, 99.

1432. *Ibid.*

1433. See, e.g., Harrop, “Stephen.”

1434. E.g., Bauckham, “Latin Names,” 204–14; we know of a few other Jews named Paul, in Asia Minor (Bauckham, “Latin Names,” 207). For evidence supporting Paul’s Roman citizenship, see comment on Acts 16:37.

1435. E.g., they could be named for the circumstances of their birth (Cambridge Geniza Text, col. 3, lines 13–16, with three wordplays).

1436. Children were sometimes named for grandfathers (cf. *y. Šabb.* 2:7, §3; also the house of Gamaliel) or other relatives (Luke 1:61; 3:23–26).

1437. E.g., 1 Sam 19:1, 10–17; 20:31; 23:15, 25–26; *Jos. Ant.* 6.205, 213, 218, 237–38. The name “Saul” might be useful to Luke by way of allusion to the earlier Saul (Acts 13:21, after this name for Paul disappears in the narrative), who persecuted David, but Luke makes nothing of the connection. He does not even mention Saul’s persecuting activity in his single mention of that king’s name (unless it is alluded to in God’s disapproval of Saul, perhaps implied in a form of μεθίστημι in 13:22; Luke uses the same verb for involuntary removal in Luke 16:4). Luke lacks incentive to invent the name, which continues after Saul’s conversion until Acts 13:9; “Paul” was in any case the name by which the churches knew him (perhaps even at an early period in Judea; cf. Gal 1:22–23).

1438. 1 Sam 10:10; 11:6–7, 13; *Jos. Ant.* 6.63; cf. 1 Sam 10:22–24; 15:17.

for a Hellenistic hero.¹⁴³⁹ Benjaminitic names associated with Saul's family ("Kish" and "Shimei")¹⁴⁴⁰ later applied to positive characters (Esth 2:5). Saul remained the most prominent ancestor for Benjaminites to look back to, and Paul himself informs us (though Luke does not) that he was a Benjaminite (Rom 11:1; Phil 3:5). (This conjunction of name and tribe from separate sources incidentally provides support for each of the sources, increasing the likelihood that Luke does correctly report Paul's Semitic name.) But as the biblical Saul went from good to bad, so Luke's Saul moves from bad to good (although again, Luke himself does not draw this connection). (In any case, the name "Saul" is not likely Luke's invention, not only given the pro-Davidic slant of Israel's canonical history but also the negative connotations of the name in Greek.)¹⁴⁴¹

II. SAUL'S PRESENCE

Why would Saul be present? Later Jewish tradition claimed that three rows of sages' disciples quietly sat in on meetings of the Sanhedrin.¹⁴⁴² A more likely reason within Luke's story (as well as Paul's background as a persecutor), and less anachronistic, is that Saul of Tarsus was present as a member of the radical wing of the Hellenist synagogue mentioned in Acts 6:9, perhaps as one of Stephen's unsuccessful challengers in debate (6:10). (Certainly the witnesses who laid their cloaks at Saul's feet knew Saul, probably implying that he was part of the group from that synagogue.)¹⁴⁴³ Saul is not himself one of the witnesses, who were obligated by law to begin the stoning (Deut 17:7).¹⁴⁴⁴ (Luke does not, therefore, suggest that Saul was a false witness.)

Saul, however, may have already been influential in the persecution; certainly it diminished after his conversion (Acts 9:31), not because of lack of hostility (9:29) but perhaps for lack of an adequately motivated organizer. If Luke employs "at his feet" the same way in 7:58 as he did in 4:35, 37 and 5:1, the witnesses' laying their cloaks at Paul's feet might symbolize "recognition of Paul as a leader of those opposed to Stephen, a position that he will immediately assume in 8:3."¹⁴⁴⁵ The action also contrasts Saul's harmful leadership with the benevolent leadership of the apostles.

If Saul supervised the false witnesses, then, from Luke's view of the nature of the witnesses, Saul might have knowingly participated in their falsehood (6:11). This suggestion, however, fits the portrait of the preconversion Paul neither in Luke (Acts 9:5; 22:3; 26:9) nor in Paul's own writings (Phil 3:6; cf. 1 Tim 1:13); Luke does not mention it, nor would it have suited his purposes to do so. But if Saul played a role as prominent as Luke may suggest here (perhaps a less prominent role than he later had in Acts 8:3; 9:1–2), we may guess that some of the persecutors were not only sincere in their belief (cf. John 16:2) but also not consciously aware of distorting truth. (The hiring of false witnesses in Acts 6:13 may suggest fabrication of evidence [cf. 17:5] but need not imply that all those opposing Stephen took part in this.)

1439. See Feldman, "Saul."

1440. Admittedly, "Shimei" was not uniquely Benjaminitic (as in the case of the particularly anti-Davidic Shimei in 2 Sam 16:5–13; 19:16–23; 1 Kgs 2:8, 36–44); it applied also to Levites (Exod 6:17; Num 3:18; 1 Chr 6:17; 23:7–10; 25:3; 2 Chr 31:12; Ezra 10:23) and Judahites (2 Sam 21:21; 1 Kgs 1:8; 1 Chr 3:19; 4:26–27).

1441. On the latter, see Leary, "Improper Name"; comment on Acts 13:9.

1442. *M. Sanh.* 4:4; *Pesiq. Rab Kah.* 27:9. The tradition is suspiciously rabbinic, however, implying that new appointees to courts were from these rabbinic students.

1443. With, e.g., Minnen, "Roman Citizen."

1444. Pace Klausner, *Jesus to Paul*, 303.

1445. Johnson, *Acts*, 140.

III. PAUL'S JUDEAN BACKGROUND

Some writers have found it impossible to harmonize Acts and Paul even on the basic idea that Paul grew up in Jerusalem (22:3). Samuel Sandmel goes so far as to conclude “that Paul, a Hellenistic Jew, had never been in Palestine until after he had joined the new movement.”¹⁴⁴⁶ This perspective drew a rigid dichotomy between Palestinian and Hellenistic that can no longer be seriously maintained (see comment on Acts 6:1).¹⁴⁴⁷ (It also smacks of a denigrating of ancient Diaspora Judaism, but Diaspora Judaism was no less Jewish or diverse than is Judaism outside the nation of Israel today.)

Paul claims to be a “Hebrew of Hebrews” (Phil 3:5), an expression the meaning of which is much debated. More clearly, he claims to be a Pharisee (3:5)—that is, to belong to a group that apparently existed exclusively or almost exclusively in Palestine, especially in Jerusalem.¹⁴⁴⁸ At the same time, his letters reveal comfort with Greek and thorough familiarity with the LXX;¹⁴⁴⁹ for one who spent enough time in Palestine to be a Pharisee, this Greek aptitude also suggests an educated (and hence economically stable) family in urban Jerusalem. He could either be from an eastern Mediterranean Diaspora Jewish family that settled in Jerusalem, be an aristocratic Pharisee like Gamaliel (whose family taught Greek), or both. The portrait of Saul as zealous for the law to the point of persecuting the church perfectly fits Paul’s frequent summary of his preconversion past (1 Cor 15:9; Gal 1:13, 23; Phil 3:6; cf. 1 Tim 1:13–15)¹⁴⁵⁰ and might be derived from hearing Paul recount it.¹⁴⁵¹

Paul’s account of his own background at this point is that he was “progressing” in Judaism beyond his peers (Gal 1:14);¹⁴⁵² if this progress generated any jealousy, it might have unleashed further enmity after his conversion. Paul’s zeal for traditions (Gal 1:14), perhaps vaguely echoed in Luke (Acts 22:3; cf. 21:20) sounds Pharisaic (cf. Phil 3:5; Jos. *Ant.* 13.297, 408); Paul indicates that such zeal also led to the persecution of Christians (Phil 3:6; cf. Rom 10:2).

Some scholars object that Paul’s responses are unintelligible for a disciple of Gamaliel. This objection challenges Paul’s study under Gamaliel more than his undisputed persecution of Christians, and so we will examine it more fully at Acts 22:3. For the moment, however, two responses are in order. First, Stephen was going further than the apostles whom Gamaliel heard in Acts 5:30–31.¹⁴⁵³ Second and, in my view, a more important point, Luke appears to explicitly contrast Paul’s strategy with that

1446. Sandmel, *Genius of Paul*, 13. He denies Paul’s Palestinian attachment despite conceding that Paul called himself a “Pharisee” (p. 15)!

1447. Scholarship over the past half century has repeatedly challenged the old dichotomy; see, e.g., Lieberman, *Hellenism*; Hengel, *Judaism and Hellenism*; Engberg-Pedersen, *Beyond Divide*. Athens may in fact have something to do with Jerusalem.

1448. See, e.g., Sanders, *Jesus and Judaism*, 198; Horsley, *Galilee*, 256; on Paul, Campbell, *Deliverance*, 147. That is, they may have been active outside Jerusalem at times (as far away as Galilee), but Jerusalem was their home base (and where they appear in Josephus; *Life* 191; *Ant.* 13.401; 15.3).

1449. See, e.g., Légasse, “Career,” 374.

1450. See further Hemer, *Acts in History*, 181–82.

1451. Dibelius, *Studies in Acts*, 208, believes that Paul’s oral reports of his presence at Stephen’s lynching provided the source for Luke’s own informants (Luke 1:3).

1452. Cf. a comparable claim in Jos. *Ant.* 20.263. “Progress” suggests academic and moral achievement and was applicable, e.g., to Stoic philosophic study and consequent moral development (Cic. *Fin.* 4.24.67; Sen. *Y. Ep. Lucil.* 87.5; 94.50; Epict. *Diatr.* 2.17.39–40; *Encheir.* 12–13; 51.2; Lucian *Hermot.* 63; Marc. Aur. 1.17.4; Diog. Laert. 7.1.25; Arius Did. *Epit.* 2.7.7, pp. 42–43.26; cf. Motto, “Progress”; Deming, “Indifferent Things,” 390; Engberg-Pedersen, *Paul and Stoics*, 70–71); but the ideal of advancing pervaded, of course, education and philosophy (Quint. *Inst.* 2.7.1; Plut. *Progr. Virt.*, *Mor.* 75A–86A [esp. 3, *Mor.* 76B, on degrees of progress in the soul]; Suet. *Gramm.* 17; cf. Stowers, “Resemble Philosophy?,” 91).

1453. Longenecker, *Ministry and Message*, 27.

of his teacher (5:39 vs. 26:14), at least after he has revealed that Paul studied with Gamaliel (22:3).¹⁴⁵⁴ Ancient disciples did not always concur with their former teachers on every matter, though generally they respectfully deferred to them; wealthy fathers might send their sons to study with a famous teacher simply because of the teacher's reputation, without expecting (as Greek aristocrats who sent sons to study with philosophers did not) that the sons would always agree with their teachers.¹⁴⁵⁵

IV. SAUL AS A "YOUTH" (7:58)

The noun νεανίας means a "young man" or "youth," but as in the English term "young," νεανίας can span a wide range of meaning. Given Saul's role here, he is probably not a young adolescent merely beginning studies with Gamaliel or some other teacher. Instead, he has probably finished his studies; by the time of 8:3, he has surely finished his studies. Still, the designation must fit him, just as "aged" is appropriate in Phlm 9.¹⁴⁵⁶ The approximate chronology of Paul's life reconstructed from his letters (Gal 1:14–2:1) requires that he be young here (cf. his peer group in Gal 1:14; there is little reason to mention his age peers if he was not young), perhaps born in the first decade C.E.¹⁴⁵⁷ (like, presumably, many of Jesus's disciples).¹⁴⁵⁸

Scholars, however, differ on the precise sense of the term,¹⁴⁵⁹ and for good reason: various ancient sources employ it differently. Some sources define it more carefully as "anyone from 24 to 40 years of age,"¹⁴⁶⁰ others, ages twenty-one to twenty-eight;¹⁴⁶¹ yet the term could also be applied to someone under twenty (Philost. *Hrk.* 10.2–5).

Age classifications in the empire often ran to fourteen, to twenty-eight, to fifty or sixty, and then beyond.¹⁴⁶² Whereas Pythagoreans divided life into four stages (Diod. Sic. 10.9.5) and Hippocratic writers into seven (of seven years each; *Poll.* 2.4), a threefold division into παῖς, νέος, and γέρων may have been more commonly assumed;¹⁴⁶³ still others preferred a sevenfold system.¹⁴⁶⁴ Hellenistic schooling divided

1454. Does Luke withhold this information at first because he has presented Gamaliel so favorably and does not wish to undercut the unexpected character of Paul's conversion?

1455. Some scholars even suggest that Paul was a Shammaite, as opposed to the Hillelite orientation of Gamaliel (see comment on Acts 22:3); I do not think this approach is necessary.

1456. Some count Phlm 9 against "young" here, because they date Philemon early in Paul's ministry (cf. Campbell, *Deliverance*, 146, though he allows for the variant reading and that Acts may be correct here). I date Philemon after 60; if it is dated in the 50s (the earliest possible date) the evidence is still reconcilable with an older "youth" (given the range of meaning), with Paul born closer to the turn of the century. In some schemes, "elder" covered ages forty-nine to fifty-six (Vincent, *Philippians, Philemon*, 184, citing Hippocrates); it refers to one aged fifty-five in Horsley, *Documents*, 2, p. 19, §2b.

1457. Accepted whether one dates the conversion to no earlier than 36 C.E. (Fitzmyer, *Acts*, 394) or, more plausibly, earlier (Riesner, *Early Period*, 213–14; cf. Ramsay, *Other Studies*, 363).

1458. Contrary to usual suppositions today, many of Jesus's disciples may have been, like many other disciples, in their teens, and hence some may have been born in the second decade; but some adult disciples (e.g., Akiba) were also possible.

1459. Schoeps, *Paul*, 17, suggests that Paul left Tarsus for Jerusalem as a νεανίας, probably sixteen to seventeen years old. That may be too young for Paul here and is almost certainly too old for Acts 22:3.

1460. Fitzmyer, *Acts*, 394 (citing Diog. Laert. 8.10; Philo *Cher.* 114); also other commentators (e.g., Longenecker, *Acts*, 150; cf. Blaiklock, *Acts*, 83).

1461. Plausibly challenging most examples usually cited in support of the twenty-four to forty division, Overstreet, "Concept," 541–45, argues that the range twenty-one to twenty-eight was much more common.

1462. Suder, "Age Classification." For one (astrological) classification, see Ptolemy *Tetrab.* 4.10.204–7; for a suggestion of seven-year cycles in age, cf. Sen. *Y. Ben.* 7.1.3. Earlier Greek views of aging had also evolved (Finch, "Views of Ageing"). For Stoics, reason entered about age fourteen (Iambl. *Soul* 2.15, §609).

1463. Garland, "Age."

1464. See Overstreet, "Concept." For a full survey of Greek and Roman views, see Binder, "Age(s)"; for life stages elsewhere, see, e.g., Confuc. *Anal.* 173 (2.4). Contrast Seneca's simple division of life into past, present, and future (*Dial.* 10.10.2). Life stages were so significant that divine beings were assigned to each (Belayche, "Actors," 279).

youth into three age categories: boys (παῖδες) were twelve to seventeen years old; ἔφηβοι were eighteen to twenty in Athens, though younger in other places; νέοι were “in their twenties.”¹⁴⁶⁵ An inscription from Beroea in Macedonia ranks παῖδες up to age fifteen, ἔφηβοι from fifteen to seventeen, and νέοι or νεανίσκοι from eighteen to twenty-two.¹⁴⁶⁶ Philo, perhaps reflecting the situation among Alexandrian Jews, counted anyone aged twenty-one to twenty-eight years a “young man” (νεανίσκος; old age began around age forty-nine).¹⁴⁶⁷ Some teaching was for specific age-groups.¹⁴⁶⁸ Thus Solon laid down laws prescribing morals for boys, then for lads, “and next for the other age-groups in succession.”¹⁴⁶⁹ Some moral precepts were not applicable to youth but could be saved up for later (e.g., Isoc. *Demon.* 44). On stages of education in general, see comment on Acts 7:22 and especially 22:3.

Roman men achieved full “majority” status at age twenty-five¹⁴⁷⁰ but could be criminally liable once past puberty.¹⁴⁷¹ Roman boys achieved manhood, receiving their *toga virilis*, in their mid-teens.¹⁴⁷² Many senatorial youth in Rome invited senators and many common people to their coming-of-age ceremonies;¹⁴⁷³ such ceremonies became so frequent that a Roman aristocrat could lament the daily time lavished on such social obligations.¹⁴⁷⁴ This often occurred at the Festival of Liber, god of fertility.¹⁴⁷⁵ Once a Roman boy adopted the *toga virilis*, he became a *iuuenis*, a youth of military age.¹⁴⁷⁶ After the coming of age, childish ways were no longer acceptable.¹⁴⁷⁷ Other cultures generally recognized the coming of age in the same range of life.¹⁴⁷⁸ Although the bar mitzvah originated in a later period,¹⁴⁷⁹

1465. Beck and Thomas, “Education,” 508. *Ephebeia* tended to be late puberty (but could range between twelve and twenty), and its end marked the beginning of full citizen rights and responsibilities (Gehrke, “Ephebeia,” 1018).

1466. McRay, *Archaeology*, 296.

1467. Philo *Creation* 104–5 (Grayston, *Epistles*, 71). This division reflects the conventional sevenfold system (see Overstreet, “Concept,” 554; cf. 541–45) and could suggest Saul’s age here.

1468. Cf., e.g., Iambl. *V.P.* 31.201–3; 1 John 2:12–14 (cf. comment in Keener, “Vigor”). Orators could also greet people by age-groups (Men. *Rhet.* 2.4, 392.5–8; 394.21–22).

1469. Aeschines *Tim.* 7 (LCL, 8–9).

1470. Schieman, “Minors,” 23.

1471. *Ibid.*, 24.

1472. E.g., at age fifteen (Suet. *Vergil* 6), at sixteen (Suet. *Aug.* 8.1), or at the shaving of the first beard (Suet. *Calig.* 10.1). The age was not standardized for boys (Wiesehöfer, “Pubertas,” 177); Dupont, *Life*, 229, suggests an average of sixteen or seventeen; Stamps, “Children,” 198, an average of fourteen to sixteen. On the exchange of the youthful for the man’s toga, see Croom, *Clothing*, 122 (placing it about age fifteen to sixteen); cf. Barclay, *Train a Child*, 157–58. Coming of age meant legal independence (Gardner, *Women*, 14), and youths entered adult life then (Wiesehöfer, “Youth,” 854).

1473. Pliny *Ep.* 10.116.1, noting what had become fashionable in his day (and complaining that some invited more than a thousand, 10.116.2). Writing in the early second century, Pliny hosted some of these celebrations in his home (8.23.2, 6). By the NT period, senatorial youths could attend senate meetings once they received the toga of manhood (Suet. *Aug.* 38.2).

1474. Pliny *Ep.* 1.9.2–3 (the only excuse was to be able to be away from Rome, 1.9.4, 6).

1475. North, “Liber Pater.”

1476. Balsdon and Levick, “*Iuuenes*,” dating the ceremony as usually around age fourteen. Guardianship ended at puberty or age fourteen (Gaius *Inst.* 1.196); males could not make a will before age fourteen (though females could from age twelve; *Inst.* 2.113).

1477. Cf. (without mention of coming of age) 1 Cor 13:11; Hom. *Od.* 1.296–97; Polyb. 12.4b.1; 12.25K.9; Ptolemy *Tetrab.* 4.10.205; Lucian *Amber* 3; Max. Tyre 36.5; Marc. Aur. 4.28. At puberty, adolescents would dedicate as votive offerings “toys or locks of their hair” (Malkin, “Votive offerings,” 1613); for girls, see Friedländer, *Life*, 1:234.

1478. Persian boys reportedly achieved manhood at sixteen or seventeen (Xen. *Cyr.* 1.2.8). Many (though not all) traditional societies mark coming-of-age initiations to the adult community around puberty (cf. Mbiti, *Religions*, 159, 165, 171; Eliade, *Rites*, 41; Dawson, “Urbanization,” 309; Kapolyo, *Condition*, 43–44).

1479. Safrai, “Home,” 771–72; Sandmel, *Judaism*, 199.

rabbis expected most adult male responsibilities to begin around puberty, or the age of thirteen.¹⁴⁸⁰

Ramsay thinks that Paul would have entered public life around age thirty as was common and hence dates his birth to about 1 B.C.E.¹⁴⁸¹ I allow that Paul may have been younger; my estimate would be that he may have been born in the last half of the first decade C.E., but this is at best a guess.

V. SAUL'S ACTIVITY AND HIS YOUTH (7:58)

That the most violent zeal in the text would be associated with a young man would not surprise most ancient hearers. Some elders might have allowed the younger hotheads to take care of details, while the elders maintained their own dignity (cf. comment on Acts 23:12–16). Young men were associated with vigor,¹⁴⁸² which characterizes Paul here. Some military expeditions preferred citizens below age forty (Aeschines *Embassy* 133); heroic warriors were sometimes viewed as even below twenty (e.g., Philost. *Hrk.* 10.2). Youths were more impetuous and hence more eager for battle (e.g., Dio Chrys. *Or.* 2.1–2).¹⁴⁸³ Feelings, including affectionate sentiments, were most intense in youth.¹⁴⁸⁴

This youthful vigor was not always viewed favorably. Homer was thought to have characterized Achilles's fury as the emotions of youth (Max. Tyre 26.5). An adolescent was considered more prone to rash acts (Cic. *Rosc. Amer.* 14.39, contrasting with one over forty); youths are impetuous, unable to control their violent impulses (Sen. *Y. Troj.* 250–51).¹⁴⁸⁵ Youthful inexperience might lead one to give unsound counsel (Polyb. 31.11.7; 1 Kgs 12:6–15). Youths were also supposed susceptible to the influences of others; both bad companions¹⁴⁸⁶ and deceptive leaders¹⁴⁸⁷ could corrupt a youth. Conversely, a philosopher could shepherd youthful impulses positively,¹⁴⁸⁸ and youths' self-control would often be attributed to those who governed them.¹⁴⁸⁹

It is not relevant here, but youths were also considered more susceptible to sexual

1480. E.g., *m. Nid.* 5:6; *b. Nid.* 52a; *y. Ter.* 1:3; *Gen. Rab.* 91:3; cf. *b. Yebam.* 80ab; 96b; 97a; Safrai, "Home," 772; they did recognize that not all showed signs of puberty at the same age (*m. Nid.* 5:7–9). Josephus describes himself as still "virtually a boy" (ἀντίπαῖς) at fourteen (*Life* 9), but this is to emphasize his early accomplishments.

1481. Ramsay, *Other Studies*, 363.

1482. Cf., e.g., Job 20:11; 33:25; Prov 20:29; 2 Esd 5:53, 55; 1 John 2:14; Jos. *War* 4.464; 7.384; Babr. 29.5–6; Pliny *Ep.* 3.1.2; cf. Gen 49:3; 4Q252 IV, 3. Among women, see, e.g., Soranus *Gynec.* 1.2.4. Philo identifies the period twenty-one to twenty-eight as the focus of "manly strength" (*Creation* 103). For weakness in old age, see, e.g., Eccl 12:5; 1QSa I, 19; Jos. *Ant.* 10.265; 11.57; Fronto *Ad am.* 2.7.8; cf. Polyb. 5.55.10.

1483. Emphasizing examples from the OT, 4 Maccabees, and Josephus, Spencer notes the stereotype that young men were prone to violence ("Young Man," 36–39), applicable to Paul until a christophany transforms him (41–43).

1484. Pliny *Ep.* 6.8.2. Pliny also opined that some "irregularity and excitement" were suitable for youth, in contrast to the elderly (3.1.2). Josephus probably implies that lawless passions remain difficult to restrain around age thirty (*Life* 80).

1485. Perhaps also Eurip. *Andromeda* frg. 134a (Stobaeus 4.11.4). One writer characterizes ages fifteen to twenty-two as ruled by passion, though young manhood (νεανικὴν) as more serious and ambitious (Ptolemy *Tetrab.* 4.10.205); many considered youths prone to mistakes (Libanius *Anecdote* 2.6) and the younger generation prone to libertinism (Piso *frg.* 40; Sallust *Cat.* 14.2; in Laistner, *Historians*, 54). At the same time, old age might make one ill-tempered (Cic. *Att.* 14.21). For susceptibility to drunkenness, see, e.g., Polyb. 31.13.8.

1486. Cic. *Rosc. Amer.* 14.39; cf. Prov 1:10–19; 13:20.

1487. Sall. *Catil.* 14.5. These leaders played especially on youths' lusts (Sall. *Catil.* 14.6; Cic. *Pis.* 28.68–69).

1488. Eunapius *Lives* 464; for educators and shaping youth, e.g., Proclus *Poet.* 5, K50.1–2. A philosopher might also use soothing music to calm enraged, drunken youth (Iambl. *V.P.* 25.112–13). A youthful novice to philosophy, however, was no match against an attractive woman (Epict. *Diatr.* 3.12.12).

1489. *Rhet. Alex.* 35, 1441a.16–19.

temptations¹⁴⁹⁰ and hence all the more praiseworthy when they avoided them.¹⁴⁹¹ During adolescence and young adulthood, proper teaching or mentoring, which cultivated virtues, was necessary to restrain youthful indulgence (of various kinds but especially sexual).¹⁴⁹² But youths' vulnerability to temptation made some more willing to forgive them,¹⁴⁹³ and Saul's "youth" here might therefore support Luke's apologetic portrayal of Saul not only as one advanced for his age (cf. Gal 1:14) but as one whose error here was informed by his youthfulness.

Many Roman jurists began moral accountability near the age of puberty; before that time, a boy might not be guilty of theft because the crime depended on intention.¹⁴⁹⁴ Some Jewish pietists felt twenty was the age when a youth could discern morality on his own (1QSa [=1Q28a] I, 8–10).¹⁴⁹⁵ But later rabbis believed that boys were born with the evil impulse and acquired a good impulse only when receiving the Torah at thirteen.¹⁴⁹⁶ For the rabbis and presumably most Jews, personal moral accountability began especially around age thirteen.¹⁴⁹⁷ Saul's relative "youth" may help Luke's apologetic for Paul (cf. Acts 23:1). A rhetorician defending a client on current charges also had to avoid charges based on patterns from the past and hence might plead that some past misbehavior was due only to youth (*Rhet. Alex.* 7, 1428b.37–40).¹⁴⁹⁸

VI. GAINING RESPECT WHILE YOUNG

Achieving leadership at this age would be difficult, since those who were "young" might have trouble gaining respect (1 Tim 4:12), a pattern that persisted from classical Athens through imperial Rome. Young men were expected to have some limitations in ability (e.g., 1 Sam 17:33).

Classical Athens considered those below thirty to be "young" (νέος) and hence easily misled¹⁴⁹⁹ and ineligible to sit in the city council;¹⁵⁰⁰ Athenians over fifty would speak first.¹⁵⁰¹ Speakers could be discredited immediately by their age (*Rhet. Alex.* 29, 1437a.31–34), and so a young speaker should begin by conceding his lack of years but appeal to wisdom from another source (1437b.4–5; cf. Job 32:6–7). Youth should exercise restraint in speaking (Sir 32:7–8 LXX [35:7–8]), and though philosophers

1490. Eurip. *Alc.* 1052–54; Cic. *Cael.* 20.48–49; Sen. E. *Controv.* 2.67–8, 10–11; Epict. *Diatr.* 3.12.12; Lucian *Tox.* 14, 16; Philost. *Hrk.* 21.29; Iambl. *V.P.* 8.41; *Test. Reub.* 1:6; 2:9; 3:8; 4:6; *Gen. Rab.* 87:6; cf. Mus. Ruf. 17, p. 108.27; Philost. *Elder Imag.* 1.2; Winter, *Left Corinth*, 89–91. One dealing much with children might need to be forty, hence at a more sexually temperate age (Aeschines *Tim.* 11–12).

1491. Cf. Polyb. 31.25.8; Pliny *Ep.* 7.24.3.

1492. See Isoc. *Demon.* 15; Plut. *S. Rom.*, Cato the Elder 12, *Mor.* 198F; Pliny *Ep.* 3.3.3–4, 7; Men. *Rhet.* 2.3, 385.22–23; Iambl. *V.P.* 31.202–3; 2 Tim 2:22. Marriage was another cure (e.g., Dion. Hal. *Epid.* 2.263).

1493. For youth as a potentially mitigating factor, sometimes even as a plea in court, see *Rhet. Alex.* 7, 1428b.37–40; Dion. Hal. *Ant. rom.* 5.9.2; *Epid.* 7.291; Plut. *Alc.* 16.3; Suet. *Aug.* 5; *Nero* 26.1; Quint. *Decl.* 260.2; 267.1, 4; 290.2; 300.2; 357.2; *Test. Jud.* 11:1. Apparently most persons grew out of such behaviors (Cic. *Senect.* 14.47; Plut. *Themist.* 2.5; Suet. *Vergil* 9, 11).

1494. Gaius *Inst.* 3.208. Below age seven no liability obtained; reduced culpability obtained between puberty and twenty-five (Robinson, *Criminal Law*, 16–17).

1495. Cf. an implied age for judging in CD X, 1. Among Greeks, personal moral responsibility began when one was enrolled as an adult citizen (Aeschines *Tim.* 18). Not all rabbis believed that children needed to be sprinkled with the sin offering (*m. Parah* 3:4).

1496. 'Abot R. Nat. 16 A; *Pesiq. Rab Kah.* Sup. 3:2. On the evil impulse from birth, see also 'Abot R. Nat. 30, §63 B; *b. Sanh.* 91b; *Gen. Rab.* 34:10. The concept of the evil impulse is earlier (e.g., CD II, 15–16; 1QS V, 5; 4Q417.2 [+4Q418] II, 12; cf. *Jub.* 1:19; 35:9) and is widespread by the Tannaic era (e.g., *m. 'Ab.* 2:11; *Sipre Deut.* 32.3.1; 45.1.3; *Sipra Sh. M.d.* 99.2.3; *Sipra A.M. pq.* 13.194.2.11; cf. *Test. Jud.* 20:1; the evil yetzer in 4 *Ezra* 7:92 [cf. Thompson, *Responsibility*, 356]; Seitz, "Two Spirits").

1497. *Gen. Rab.* 63:10.

1498. Cf. Aeschines *Tim.* 39 (declaring that he will focus on his object's adult crimes).

1499. As a rule, young men might be more easily led astray by wicked leaders (Sall. *Catil.* 14.5).

1500. Xen. *Mem.* 1.2.35. Paul was not likely part of the Sanhedrin (see comment on Acts 26:10).

1501. Aeschines *Tim.* 23–24; *Ctes.* 4.

ought not to be judged by age,¹⁵⁰² a youth might not be able to acquire many listeners.¹⁵⁰³ In antiquity generally, old age might provide greater eloquence,¹⁵⁰⁴ and assemblies tended to resent younger men addressing them.¹⁵⁰⁵ Thus Cicero at age twenty-seven notes that his words will either be ignored because he has not yet held public office “or pardoned owing to my youth.”¹⁵⁰⁶

Some locations had laws excluding from office anyone under thirty, though in the late republic a very corrupt governor might sell offices to those in their mid-teens (Cic. *Verr.* 2.2.49.122). In the Qumran scrolls, judges of the congregation had to be between twenty-five and sixty years old (CD X, 6–7; cf. 1QS*a* I, 12–13);¹⁵⁰⁷ early rabbis generalized that one could be ready for authority at thirty, and for some offices fifty was required (*m. 'Ab.* 5:21).¹⁵⁰⁸ One writer regarded the age range from fifty-six to sixty-seven as the most respectable (Ptolemy *Tetrab.* 4.10.206).¹⁵⁰⁹ (On the age of offices and respect accorded elders, see further comment on Acts 7:23–24.) Inscriptions do attest some young men in their early twenties holding offices in the imperial East; but these offices did not include direct governing functions.¹⁵¹⁰ We also do read of Jewish officials who were just nineteen,¹⁵¹¹ twelve,¹⁵¹² and even two years and ten months,¹⁵¹³ but these are probably (and the younger ages are certainly) honorary.

One could seek wisdom even as a “youth” (νεώτερος, Sir 51:13–14);¹⁵¹⁴ some could be counted advanced in wisdom although they were youths.¹⁵¹⁵ Youths were supposed to be modest before their elders,¹⁵¹⁶ but it was sometimes appropriate for youths to speak;¹⁵¹⁷ likewise, even the youngest member of the Roman senate could gain a hearing and give good advice.¹⁵¹⁸ Although youths were not normally honored,¹⁵¹⁹ exceptions were sometimes appropriate.¹⁵²⁰ Because of his wisdom, Daniel was invited to sit among the elders, though he was a young child (παιδαρίου νεωτέρου),

1502. Max. Tyre 1.10.

1503. Xen. *Mem.* 4.2.1.

1504. Lucian *Heracles* 4, 7–8.

1506. Cic. *Rosc. Amer.* 1.3 (LCL, 6:125).

1507. Overseers should be between thirty and fifty (CD XIV, 8–9); Buchanan, “Age,” cites also 1QS*a* I, 13–21. This was the age range for temple service (Num 4:35; cf. 8:24; *t. Šeqal.* 3:26); thirty (Luke 3:23) held wider precedent as a transition age (Gen 41:46; 2 Sam 5:4; Gaius *Inst.* 1.20).

1508. Fifty was necessary to give counsel (*m. 'Ab.* 5:21); for the meturgeman (*b. Hag.* 14a). To be an elder, one should be sixty (*m. 'Ab.* 5:21). Many in the Greek world counted fifty an ideal age for ruling (Dion. Hal. *Ant. rom.* 4.29.3).

1509. Forty was the minimum for a χορηγός so that he could be trusted not to corrupt children (Aeschines *Tim.* 11–12), though Aristotle claimed that fifty was the upper age for the best procreation (Arist. *Pol.* 7.14.11–12, 1335b).

1510. Strubbe, “Young Magistrates.”

1511. *CIJ* 1:195, §277 (an ἄρχων); another who was twice archon in 1:369, §505 (unless it means that his father was the archon); possibly another one of twenty-three in 1:261, §332 (but this is reconstructed).

1512. *CIJ* 1:200, §284 (possibly non-Jewish).

1513. *CIJ* 1:310, §402.

1514. Epicurus opined that one was never too young or old to seek wisdom (Epicurus *Let. Men.* 122; Diog. Laert. 10.122).

1515. E.g., Fronto *Ad M. Caes.* 3.3 (though this is directed toward an imperial prince).

1516. Plato *Charm.* 158C.

1517. Plut. *S. Kings*, Pytheas, *Mor.* 187E.

1518. See Livy 4.48.5–10. A younger man would prove more apt to be flustered before the senate, but it might take that into account and let him just read his message (Appian *Hist. rom.* 9.9.6).

1519. Some honors were inappropriate except for older persons (Suet. *Tib.* 54.1).

1520. E.g., Alexander of Macedon, Polyb. 8.10. Alexander became king at age twenty (Plut. *Alex.* 11.1); he charged ahead because, as a youth, he was impetuous (Dio Chrys. *Or.* 2.1–2). In later history, exceptional characters might achieve even more outstanding leadership in youth (e.g., Metaxas, *Grace*, 35). Education could make a difference (Libanius *Anecdote* 3.13).

because God had given him “elderliness” (τὸ πρεσβεῖον, Sus 50). Likewise, because of wisdom, Solomon could have honor among the elders (πρεσβύτεροις) though he was young (νέος, Wis 8:10). In one tradition, R. Eleazar ben Azariah at the age of sixteen was appointed to the academy of R. Gamaliel II, whereupon (as if to qualify him) all his hair went gray.¹⁵²¹ Some Greek heroes were also young,¹⁵²² though battle and adventure were different from wise governance.

Young men could, however, achieve leadership; their very rareness in such positions could fuel their self-assurance. Cicero tells how his rhetorical teacher matured Cicero’s style, which had been “marked by a youthful impetuosity and lack of restraint” (*Brut.* 91.316 [LCL, 5:275]). Thus he could boast that everyone knew “that few men, if any, of my age have defended more cases” (*Ag. Caec.* 13.41 [LCL, 7:37]) and that he had become consul “at the earliest legal age” (*Brut.* 93.323 [LCL, 5:281]). He praises the young Caesar as qualified for authority, “seeing that by his valour he has overcome age” (*Phil.* 14.10.28).

Advancing beyond one’s age-peers (as Paul himself tells us he did, Gal 1:14)¹⁵²³ often aroused envy and consequent enmity.¹⁵²⁴ Thus, if one assumed a prominent position around the age of thirty, this apparent breach of seniority would arouse envy (e.g., *Jos. Life* 80).¹⁵²⁵ Socrates (who was not particularly young) boasted of being the youngest to address the Athenian judges, which angered them.¹⁵²⁶ If a younger man could outdo an older one (πρεσβύτερος) in wit, the elder was humiliated (*Philost. Hrk.* 33.13).¹⁵²⁷ Creon (foolishly, it turns out) complains that his son Haimon seeks to persuade him: “So men of my age are to be taught sense by a man of your age?”¹⁵²⁸ For example, Demosthenes was only thirty-two when he prosecuted Meidias; lacking political strength and honor (δόξαν), he had to settle for less than he would have otherwise (*Plut. Demosth.* 12.1).

Such sentiments could be overcome. Some might despise a new king on account of his youth,¹⁵²⁹ but as noted above, others could hail a young ruler whose “valor” outweighed his youth.¹⁵³⁰ Initially his family’s enemies in Carthage despised Hannibal because he was young (*Appian Hist. rom.* 7.1.3), but he proved a great general.

If witnesses laying their clothes at Saul’s feet implies his supervisory role (and not mere acquaintance),¹⁵³¹ he has achieved respect early, as he also implies in his own writings (Gal 1:14). Perhaps assuming a leading role in the emerging anti-Nazarene

1521. So *y. Ta’an.* 4:1, §14.

1522. E.g., *Ap. Rhod.* 1.972; 2.43–44.

1523. Luke values precocity (*Luke* 2:46), as did many other sources (*Xen. Cyr.* 1.4.3; *Hdt.* 1.113–15; *Val. Max.* 3.1.1; 3.1.2ab; *Philost. Vit. Apoll.* 1.7–8, 11; *Iambl. V.P.* 2.10; *Eunapius Lives* 468; *Dibelius, Tradition*, 107; for an extreme case, *Pliny E. N.H.* 7.16.72; further sources in comment on *Acts* 7:22). On the example of *Josephus (Life 9)*, see *Rajak, Josephus*, 27–29; *Vermes, Religion*, 186n2.

1524. Paul’s conversion would naturally facilitate the expression of such hostility, although, of course, it also had other grounds (*Acts* 9:29).

1525. Or at least surprise (*Philost. Hrk.* 21.6).

1526. *Diog. Laert.* 2.41.

1527. If elders argued with younger persons, they might lose honor by taking them so seriously (*Malina, Windows*, 144).

1528. *Soph. Antig.* 726–27 (LCL, 2:69).

1529. *Polyb.* 5.41.1.

1530. *Cic. Phil.* 14.10.28.

1531. The mention of feet might be meant to convey the impression of Saul’s prominence (cf. *Acts* 4:35, 37; 5:2; cf. the image of disciples in 22:3) without necessarily explicitly claiming that he had achieved advanced leadership at this point. Luke is aware of Saul’s leadership, emerging soon after, in a more organized persecution (8:1, 3; 9:1–2), and he may hint at it here, aware of Saul’s involvement in Stephen’s lynching. Perhaps one should not make too much of the possible differences, however. Given Pauline chronology, the later persecution cannot be long after Stephen’s death, and Paul was advanced for his age (*Gal* 1:14).

movement from his synagogue helped propel him to prominence (though family connections are also likely; see comment on Acts 22:3). Given the other Jeremiah echoes in Acts and Paul's writings (cf. Rom 11:13; 15:16; Gal 1:15–16; Jer 1:5; see comment on Acts 9:15–16; 18:9–10; 26:17), it is possible that Luke would have also seen a secondary association with Jeremiah in Paul's "youth" (Jer 1:6), though it is probably not the main purpose in mentioning his age, especially since Luke mentions it in connection with his persecution of Jesus's followers rather than in connection with his calling by Jesus.

d. Stephen's Stoning (7:58)

Although Stephen essentially implied (and from his opponents' perspective, provoked) his death (Acts 7:51–52), his sudden death in the narrative might still appear jarring.¹⁵³² But even if Luke's audience did not know the account of Stephen per se, they would know that some of Jesus's early followers suffered violent persecution (cf. Gal 1:23; Phil 3:6; 1 Thess 2:15).

Luke's expression for removing him from the city, ἐκβαλόντες, "having cast out," reflects the same wording as for one of God's servants rejected by Jerusalem's leaders in Luke 20:12 and for Jesus in 20:15. Similarly, Paul was cast out of a city, although after being stoned (Acts 14:19). Removing a condemned person from a city before killing him represented normal judicial expectations¹⁵³³ (although one could not always count on lynch mobs to follow these).

I. STONING AS A MOB ACTION

For centuries until Roman law limited local punishments, Greeks and other peoples, like Jews, executed people by stoning.¹⁵³⁴ But even in this period Roman law could not prevent stoning from occurring altogether, since it was a common way for mobs to execute vengeance without regard for official laws. Stoning was often a mob action (Luke 20:6; John 8:59) both in Jewish Palestine¹⁵³⁵ and elsewhere.¹⁵³⁶ Mobs were known to kill unwanted speakers by stoning, as here (Polyb. 1.69.10, 13).¹⁵³⁷ It could be envisioned as happening unexpectedly in a citizen assembly (Libanius *Declam.* 36.19) and be regretted later (36.47).

An individual angered by another's criticism also might hurl a stone and draw blood from the critic's head (Lucian *Dem.* 16). Misdemeanors might also defend someone popular but guilty by hurling stones at his just critics (Lucian *Peregr.* 15; *Alex.* 44); occasionally, however, a speaker might gain sufficient hearing to persuade the mob to drop their stones (Lucian *Dem.* 11).

1532. Cf. Schwartz, "Trial Scenes," 122, although the claim that it "never brings about the death of the hero" must be qualified. Stephen is not Luke's primary hero, and subsidiary heroes did die from group violence (e.g., Palamedes, stoned at Odysseus's instigation in Philost. *Vit. Apoll.* 3.22; cf. 4.13; 6.21). His death would strike ancient moderners as jarring in another sense as well, since they would visualize the gory death of stoning in ways most modern Western readers do not.

1533. E.g., Deut 17:5; 22:24; 1 Kgs 21:13; Heb 13:12; Jos. *Ant.* 4.264; *War* 4.360; *Apoll. K. Tyre* 50; Blinzler, *Trial*, 251; Lane, *Hebrews*, 2:541; Gnlika, *Jesus*, 309 (Plaut. *Miles glor.* 2.6–7). Even executioners lived outside the city (Rapske, *Custody*, 247–48).

1534. E.g., Soph. *Ajax* 254; Eurip. *Orest.* 442, 625; Quint. Curt. 6.11.38 (cf. 7.2.1); Plut. *Alex.* 55.4; Paus. 8.23.7; Arrian *Alex.* 4.14.3; Corn. Nep. 4 (Pausanias), 5.3; Iambl. *V.P.* 35.252; Philost. *Hrk.* 33.31, 37; *Apoll. K. Tyre* 50. For Roman disgust with "barbaric" stoning, see also helpfully Matthews, "Stoning," 133.

1535. E.g., 1 Kgs 12:18; 2 Chr 10:18; Jos. *Life* 76, 303; *Ant.* 6.358; 14.24; 16.394; 17.216.

1536. E.g., Virg. *Aen.* 1.150; Dion. Hal. *Ant. rom.* 8.59.1; 9.48.2; Quint. Curt. 7.2.1; Paus. 2.32.2; 8.23.7; Lucian *Peregr.* 19; Libanius *Declam.* 36.19; 1 Kgs 12:18.

1537. Stones grabbed at random, instead of by preparation, might prove unsuitably small to wound enemies in battle (Livy 38.21.6), but a crowd could easily fell an unarmed person.

II. JUDEAN STONINGS

Stoning was simply the most ready-to-hand form of public violence available, including in Judea. When Syrians and Jews in Caesarea came to blows, they threw stones at each other (Jos. *Ant.* 20.176). Nor should we think that, in the heat of the moment, even all priestly aristocrats would have avoided hurling stones. When the high priests were divided from other aristocrats in Jerusalem, they hurled not only insults but also stones (20.180); likewise, when two factions of chief priests were engaged in a great conflict, they threw stones at each other (20.213). The most unscrupulous leaders (much less politically astute, however, than Caiaphas) might even engage in premeditated stoning. During an interregnum between Festus and Albinus, the high priest Ananus had James brother of Jesus and others stoned (20.200). Although Stephen's lynching was probably engineered by his opponents (Acts 6:9–11), not by the priestly aristocrats of the Sanhedrin (cf. 6:12; 7:1), historical considerations alone would not force us to rule out the participation of even some local priestly aristocrats.

Stoning was appropriate for blasphemy,¹⁵³⁸ among other offenses,¹⁵³⁹ and had to be done outside the city (Num 15:35–36). If later idealized (and probably sanitized) procedures can tell us much about how a mob action might proceed,¹⁵⁴⁰ people may have stripped a male victim four cubits from the place of stoning (*m. Sanh.* 6:3), then one of the witnesses would have knocked him off a cliff roughly double his height; the second witness would then drop a large stone on his heart,¹⁵⁴¹ and if that failed to kill him,¹⁵⁴² all the witnesses completed the stoning (6:4).¹⁵⁴³ In cases of blasphemy, his corpse would also be hanged (6:4), an event unlikely here (or at least unknown to Luke, who would have surely reported another parallel with Jesus before recounting Stephen's burial; Luke 23:23).¹⁵⁴⁴

The Bible warned that sometimes God's people tried to stone God's prophets (2 Chr 24:21; cf. Exod 17:4) or others (cf. Num 14:10; 1 Sam 30:6; 1 Kgs 21:13); Josephus claimed that by throwing stones at Moses, the Israelites were opposing God himself (*Ant.* 3.21). Jewish tradition acknowledged and developed this image (cf. Matt 21:35;

1538. Lev 24:11–16, 23; Jos. *Ant.* 4.202; *b. Sanh.* 45b; John 10:33; cf. comment on Acts 7:57. Also elsewhere in the ancient Mediterranean world; see Soph. *Ajax* 254; Lucian Z. *Rants* 36; cf. Lucian *Fisherman* 1. For crowds in the temple trying to attack a teacher whose teaching violated their traditions, cf. *t. Pisha* 4:13; John 8:59.

1539. E.g., Exod 19:13; Lev 20:27; Num 15:35–36; Josh 7:25; *Jub.* 30:9; 33:13; Jos. *Ag. Ap.* 2.206; *Ant.* 4.281; *Sipre Deut.* 242.1.6; *b. Ber.* 21b; *Mo'ed Qat.* 9a; *Yebam.* 4a; *B. Qam.* 44b; *Sanh.* 41a; 54ab; 66a; 67a; 79b; *Ker.* 3b; 5a. For allusions to Naboth's stoning (1 Kgs 21:13; Jos. *Ant.* 8.407), see Boismard and Lamouille, *Actes*, 2:54; see comment on Acts 6:13. Cf. *Jub.* 4:31, where God stones Cain.

1540. New Testament scholars often depend on the Mishnah here (e.g., Reicke, *Era*, 192; Edersheim, *Life*, 602; Schille, *Apostelgeschichte*, 189) precisely because it is our only "procedural" source for Jewish stonings.

1541. The procedure here presupposes rather skillful precision in stone dropping; the instructions' theoretical character does invite the question how much practical experience the rabbis had with executions, and their own literature suggests that it was minimal.

1542. The sanitized tradition sanctioned a second stone only if the first failed (*Sipre Deut.* 220.1.2, 6; *b. Sanh.* 45ab, bar.), which it probably would in reality, but a mob would almost certainly ignore such niceties. A cultural disposition to leave responsibility with the group would have made stoning by the group easier (Malina, *Windows*, 137).

1543. If he died while under the ban, they "stoned" him by laying a stone on his coffin (*m. 'Ed.* 5:6; *b. Ber.* 19a; *y. Mo'ed Qat.* 3:1, §9; unrelated to the Galli's burial beneath stones in Lucian *Syr. G.* 52).

1544. Some rabbis prescribed strangulation as the penalty for a false prophet (*m. Sanh.* 11:1; contrast *b. Sanh.* 50a; on execution for false prophets, see Deut 13:5; Stauffer, *Jesus and Story*, 208–9), the most lenient form of execution, applied to any execution for which Torah did not specify the mode (e.g., *Sipre Deut.* 178.1.1; 241.1.4; 273.3.1); strangulation (not in the Torah but a rabbinic method in *m. Sanh.* 7:1) may have allowed fewer public executions to continue without Roman knowledge, often for adultery (Daube, *New Testament and Judaism*, 306–7; cf. Origen *Ad Africanum* 14; Winter, *Trial*, 70–73). Rabbis considered stoning the severest acceptable form of execution (*b. Sanh.* 49b–50a).

Heb 11:37); for example, Jeremiah was said to have died by stoning.¹⁵⁴⁵ Although Luke seems unaware of any tradition that people sought to stone Jesus,¹⁵⁴⁶ he is aware of the tradition of stoning prophets (Luke 13:34) and applies it to Paul as well as to Stephen (Acts 14:5, 19). (This connection with Paul is Luke's application but not his fiction; Paul also alludes to the incident in 2 Cor 11:25.) Stephen's death by stoning raises suspense for the occasion when Paul is stoned as well as when he is mobbed in the temple. Luke also contrasts the true prophets, willing to be stoned, with other leaders of the people who fear to act with conviction lest they be stoned (Luke 20:6; Acts 5:26).

Witnesses were to be the first to cast stones (Deut 17:7), perhaps as a deterrent to false witnesses (cf. 19:19–20). But we should not forget that, from Luke's perspective, these witnesses carrying out the execution are false witnesses (Acts 6:13). Further, Luke probably presumes that God will execute the sentence against them (see comment on Acts 7:59–60); false witnesses were to receive the penalty they sought to bring on the accused (Deut 19:19).

e. *The Witnesses' Nakedness (7:58)*

The hostile witnesses discard their ἱμάτια. What were these garments? In the Greek East, the typical male outer garb was “a calf-length tunic, often unbelted, with a large mantle worn over the top (called a *himation*, the equivalent of the *pallium*), and openwork shoes.”¹⁵⁴⁷ Most people wore a tunic or shirt composed of “two pieces of cloth sewn together”; the simplest form was sleeveless, but in cooler weather one could add “a *himation*, a rectangular piece of cloth draped around the body.”¹⁵⁴⁸ Thus the removal of ἱμάτια does not involve complete nakedness. Nevertheless, the self-stripping is informative, not so much because it would be unusual (it was common during strenuous activity) but because of the shame it could symbolize to Luke's audience in an “execution” context.

I. STRIPPING FOR ACTIVITIES

The report that Stephen's accusers removed their cloaks to engage in the strenuous activity of stoning him is plausible, especially if the day was warm. Greeks normally stripped naked for athletics¹⁵⁴⁹ and admired athletic physiques.¹⁵⁵⁰ Although Greeks originally wore at least loincloths even for exercise, Spartans introduced naked exercise to the rest of Greek athletic culture centuries before the NT period.¹⁵⁵¹ When the sun was hot, Greeks might strip to enjoy it.¹⁵⁵² They also laid aside garments for other strenuous activities;¹⁵⁵³ Jewish men engaged in strenuous labor presumably laid aside at least outer garments as well (cf. John 21:7).

1545. E.g., 4 Bar. 9:31; Liv. Pr. 2:1 (Schermann §25, p. 81, line 2). This also appears in patristic sources (commentators cite Jerome *Adversus Jovinianum* 2.37; Tert. *Scorp.* 8). See also comment on Acts 21:21.

1546. Cf. John 8:59; 10:31–32. That is, unless it was implied as the sequel to throwing him from a cliff in Luke 4:29.

1547. Croom, *Clothing*, 127; cf. Cosgrave, *History of Costume*, 47. Cf. also Roman “tunics” (Croom, *Clothing*, 31–41; Cary and Haarhoff, *Life*, 97); togas (Croom, *Clothing*, 41–49); and the *pallium* (ibid., 51; Cary and Haarhoff, *Life*, 97–98). On the basic Greek garment beneath the ἱμάτιον, i.e., the χιτών, see Cosgrave, *History of Costume*, 43–47.

1548. Jeffers, *World*, 43.

1549. E.g., Dio Chrys. *Or.* 28.6; Lucian *Lucius* 8–9; *Anach.* 36; Diogenes *Ep.* 37; Philost. *Hrk.* 15.9; 26.20.

1550. Philost. *Hrk.* 10.4. Greeks associated exercise with nakedness, even etymologically (prolegomenon to Aphthonius *Progymnasmata* [fifth century]). They may have traditionally associated male nudity in special ways with heroes and aristocrats, though less in the empire (see Bonfante, “Naked Greek”).

1551. Thucyd. 1.6.5; Dion. Hal. *Ant. rom.* 7.72.2–3 (King, “Body,” 245). For a Roman in the East stripped for exercise, see Tac. *Ann.* 14.59.

1552. Philosophy students in Philost. *Vit. Apoll.* 4.17; cf. Eurip. *Allope* frg. 105.

1553. Ap. Rhod. 1.364; also Romans, e.g., Plut. *M. Cato* 3.2. Naturally people stripped to swim (e.g., Theophr. *Char.* 25.2; Vell. Paterc. 2.43.2; cf. John 21:7).

We need not suppose that the Jewish accusers, Hellenists though they were, stripped off all their clothes, especially with some non-Hellenist supporters present (cf. Acts 6:12; 7:1). Sometimes “nakedness” referred only to inadequate clothing,¹⁵⁵⁴ as in the case of soldiers without their full armor or shield.¹⁵⁵⁵ Thus, for example, Lycaon was γυμνός because he had cast away his helmet and shield (Hom. *Il.* 21.50) because of sweat (21.51–52); the term applied even to one without his shield (Philost. *Hrk.* 23.24–25). Stripping at times might include the groin only by accident (Livy 45.39.17).

II. NAKEDNESS AND SHAME

Many ancients associated nakedness with shame, although this association varied from culture to culture and from one era to another within particular cultures.¹⁵⁵⁶ Persians in particular regarded nakedness as shameful and humiliating.¹⁵⁵⁷ Yet one people in Africa was thought to normally go naked (Pliny E. *N.H.* 5.8.45), as also the famous Indian philosophers called “gymnosophists”¹⁵⁵⁸ and some reputed Egyptian and Ethiopian sages.¹⁵⁵⁹ Greek philosophers were also ready to reconsider societal expectations. Cynic philosophers did not mind nakedness, apart from their rugged cloak for protection.¹⁵⁶⁰ Similarly, Middle Platonic thinkers were also more than happy to rid themselves of the metaphoric garments of their body.¹⁵⁶¹

Even Greeks originally wore loincloths for exercise; in Homer nakedness remained embarrassing (*Od.* 6.126–29, esp. 129).¹⁵⁶² Earlier Athenians had been more sensitive to nakedness (e.g., Aeschines *Tim.* 25–26). Theophrastus defined a buffoon as someone who “will lift his shirt in the presence of freeborn women” (*Char.* 11.2 [LCL, 69]). After Spartans introduced naked exercise to the rest of Greek athletic culture,¹⁵⁶³ “only barbarians are represented as feeling shame when a man is seen naked.”¹⁵⁶⁴ Greeks became comfortable with nakedness in some situations, especially (as already noted) athletics.¹⁵⁶⁵

1554. E.g., Eurip. *El.* 308; Livy 45.39.17 (*nudasse . . . se*); Epict. *Diatr.* 3.22.45 (having one cloak); 2 Cor 11:27; probably Tob 1:16–17; 4:16; Rom 8:35; Libanius *Descr.* 2.5; 23.2–3 with 23.8.

1555. E.g., Hom. *Il.* 21.50; 22.124; Hdn. 2.13.8, 10; Philost. *Hrk.* 23.24–25. It could also apply to lack of adornment (Lucian *Hall* 7).

1556. Hittites could employ total nakedness as a humiliation in place of execution (“Instructions for Temple Officials” 11 [ANET 209]).

1557. So Dio Chrys. *Or.* 13.24; Jos. *Ant.* 18.356; cf. Xen. *Cyr.* 1.2.16. It is not surprising that women were more secluded, and their head coverings covered more, farther to the east (cf. Xen. *Cyr.* 5.1.4; Diod. Sic. 17.35.5; Plut. *Alex.* 21.3; *Themist.* 26.3–4; Jos. *Ant.* 11.191; Tg. *Rishon* on Esth 2:7; see further discussion in Keener, “Head Coverings”); a noble Persian woman might seek the death of one who exposed her (Libanius *Narration* 16).

1558. Arrian *Ind.* 11.7; Ps.-Callisth. *Alex.* 3.5; cf. Pliny E. *N.H.* 7.2.22; Lucian *Runaways* 7; Muckensturm-Pouille, “Gymnosophists.”

1559. Philost. *Vit. Apoll.* 1.2; 5.43 (if Philostratus did not model them after the Indian sages; he claims that they migrated from India, 6.6; *Vit. soph.* 2.5.572); Heliod. *Eth.* 10.2. Apollonius points out that their land is too hot to wear clothes anyway (Philost. *Vit. Apoll.* 6.8).

1560. E.g., Lucian *Cynic* 4 (cf. 19–20); implied in Quint. *Decl.* 268.12.

1561. E.g., Plato *Phaedo* 87BD; Max. Tyre 7.5; Porph. *Marc.* 33.501–5; cf. Sen. *Y. Ep. Lucil.* 66.3; Marc. Aur. 10.1; 2 Cor 5:3–4; see more fully Aune, “Duality,” 229. For the nakedness image concerning the afterlife, cf. Lucian *True Story* 2.12; *Downward Journey* 24; *Men.* 12. In Jewish sources, cf., e.g., 2 *En.* 22:8.

1562. King, “Body,” 245. Cf. Juv. *Sat.* 1.71; Plut. *Rom. Q.* 40, *Mor.* 274A; Diog. Laert. 2.73; Libanius *Descr.* 23.2.

1563. Thucyd. 1.6.5; Dion. Hal. *Ant. rom.* 7.72.2–3.

1564. King, “Body,” 245.

1565. But often even outside athletic activities (Plato *Rep.* 5.452C; Dio Chrys. *Or.* 13.24; Arrian *Ind.* 11.7). Hurschmann, “Nudity,” notes that in everyday life, people were clothed and nudity was reserved for unusual circumstances; by contrast, it was the norm for Greek athletics (though it took time to be accepted among Romans, Cic. *Tusc.* 4.70).

Earlier Romans were ashamed to reveal their nakedness;¹⁵⁶⁶ they would not even bathe with their sons-in-law until they acquired the Greek freedom of going naked.¹⁵⁶⁷ By this period, however, those who took advantage of public toilet facilities (most homes lacking such) would have to do so without a modicum of privacy.¹⁵⁶⁸ Increased comfort with nudity was also inevitable in the pervasive use of public baths (on which see comment on Acts 18:8; 19:5).¹⁵⁶⁹

Still, many people continued to conceal their private parts from a sense of shame (Phaedrus 4.16.5–6). A woman in childbirth might be embarrassed if the midwife stared too long at her genitals (Soranus *Gynec.* 2.3.6 [21.70b]). Nakedness could also appear as a form of affliction (e.g., Mus. Ruf. 9, p. 72.1) or disgrace (Polyb. 14.5.11; see below on naked executions). (There is some debate on what Romans wore to bed, but for most of them, it probably was not much.)¹⁵⁷⁰ Social rank had much to do with considerations of propriety; thus, for example, slaveholders did not care whether slaves saw them bathing.¹⁵⁷¹ The respectable class avoided public nudity as degrading;¹⁵⁷² citizens would not strip in public and could be subject even to penalties for indecent exposure.¹⁵⁷³ Exceptions were made in art, where nakedness could be associated with heroism or beauty.¹⁵⁷⁴

Although considered acceptable before humanity's fall,¹⁵⁷⁵ nakedness had been shameful for Jewish people throughout their history.¹⁵⁷⁶ (Ancient Egyptians, though they dressed lightly, also looked down on full nakedness, at least among the upper classes.)¹⁵⁷⁷ Qumran pietists insisted that there be no nakedness seen near the eschatological war camps of the righteous, and hence they required two thousand cubits to the latrine (4Q491 B 1–3 7–8).

Because of the shame attaching to involuntary nudity, especially for Jews but not limited to them, it was common for public punishments.¹⁵⁷⁸ Thus leaders who would be scourged and beheaded (Polyb. 11.30.2) were first stripped naked (11.30.1). Both beatings (e.g., Longus 2.14; Suet. *Calig.* 26.3) and executions (e.g., Dion. Hal. *Ant. rom.* 7.69.2; Jos. *Ag. Ap.* 2.53) were undergone naked. This was true also for illegal lynchings, which were also accompanied by degrading mockery (e.g., Suet. *Vit.* 17.1; Hdn. 8.8.6). Later rabbis expected men to be stoned naked, but women were clothed (for the sake of male onlookers).¹⁵⁷⁹

1566. Plut. *M. Cato* 20.5.

1567. Plut. *M. Cato* 20.5–6. Ambrose later emphasized this early Roman practice (Ambrose *Off.* 1.18.79, noting shame to bathe with adult children; cited in Jensen, "Nudity," 301–2).

1568. See, e.g., McRay, *Archaeology*, 85.

1569. On nudity in the baths at least some of the time, and objections by some ancient moralists, see discussion in Jensen, "Nudity," 299–300.

1570. Cf. Jerome *Vigil.* 11 (although this may be just Vigilantius); Adkin, "Underwear."

1571. Jensen, "Nudity," 298.

1572. *Ibid.*, 300–301. It was associated with slaves, fighters in the arena, or captured soldiers slated for execution (*ibid.*, 299).

1573. *Ibid.*, 298, citing (for Romans) Plut. *Rom.* 20.3; Hallett, *Roman Nude*, esp. 61–101.

1574. Jensen, "Nudity," 297.

1575. Gen 2:25; *Jub.* 3:16; *Sib. Or.* 1.35–37.

1576. Gen 3:7, 10–11; 9:21–23; *Jub.* 3:21–22, 30–31; 7:8–10, 20; 1 QS VII, 12–14; *t. Ber.* 2:14, 20; *Sipre Deut.* 320.5.2; *b. Yebam.* 63b, bar.; *y. Ber.* 2:2; *Tg. Rishon* on Esth 1:11; cf. Moon, "Nudity." This was a factor in early alarm over gymnasia (1 Macc 1:14; 2 Macc 4:9, 12). For use in sexual temptation, see *Tg. Ps.-J.* on Gen 6:2.

1577. Cosgrave, *History of Costume*, 15.

1578. See Rapske, *Custody*, 297–98. See, e.g., Cic. *Verr.* 2.4.40.86 (though this example was intended to be exceptionally cruel); Vell. Patern. 2.1.5; Herodas *Mimes* 5.20; Quint. Curt. 7.5.36 (an alleged Persian example).

1579. *M. Sanh.* 6:3; *b. Sanh.* 45a, bar. The rabbis abhorred male nakedness before God or inferiors, but female nakedness before men (Satlow, "Constructions"). Greeks would execute women naked as well (King, "Body," 246).

Because Stephen's accusers strip themselves rather than him, some scholars have suggested an emendation of ἀυτῶν to αὐτοῦ (more acceptable in the heyday of emended texts);¹⁵⁸⁰ in view of Acts 22:20, however, this solution is unlikely.¹⁵⁸¹ Another explanation is far more likely. Luke portrays the Hellenist accusers as stripping themselves for a strenuous physical activity (above) but, in so doing, portrays them ironically as the guilty party (note its use in public punishments, above; cf. similarly 22:23).¹⁵⁸²

f. Stephen's Prayers and Saul's Approval of His Death (7:59–8:1a)

A significant feature of religious-martyr literature is the dying prayers of martyrs (e.g., 2 Macc 7:37).¹⁵⁸³ Since ancients typically offered their prayers out loud (relegating silent prayer to purportedly malevolent practices), people generally heard them.¹⁵⁸⁴

I. "RECEIVE MY SPIRIT" (7:59)

The specific prayer in Acts 7:59 recalls Luke 23:46 (which also mentions a "loud voice"); most scholars note the parallels.¹⁵⁸⁵ This is not to say that Luke must have invented Jesus's prayer (not in Mark); that prayer echoes the regular Jewish evening prayer that many Jews would be uttering about the time of Jesus's death on the cross (Luke 23:46),¹⁵⁸⁶ a point that Luke may well not have known. Others also offered similar prayers committing their spirit at death.¹⁵⁸⁷ The idea may resemble the report that a Jewish martyr entreated the master of life to restore his life at the resurrection (2 Macc 14:46).¹⁵⁸⁸

The person addressed in Stephen's prayer is significant. He is "calling on the name of the Lord," fulfilling Acts 2:21 ("whoever calls on the name of the Lord will be saved").¹⁵⁸⁹ Whereas Jesus's petition in Luke 23:46 addressed the Father, Stephen's parallel petition here addresses Jesus himself. This probably suggests Jesus's deity;¹⁵⁹⁰ parallels for petitions to nondivine figures in Judaism¹⁵⁹¹ seem outside the mainstream, and certainly on the level of Luke's theology, Jesus's deity is implied (see comment on Acts 2:21).¹⁵⁹²

1580. Esp. Conybeare, "Stoning of Stephen."

1581. See, e.g., Lake and Cadbury, *Commentary*, 85; R. Williams, *Acts*, 76; Bruce, *Acts*¹, 179–80.

1582. Keener, "Inverted Guilt"; idem, *Background Commentary*, 343.

1583. Cf. also, e.g., Philost. *Hrk.* 33.37. This may be shaped more by the relationship between religion and death than by an ancient genre; martyr literature from recent centuries also often includes final prayers.

1584. See van der Horst, "Prayer"; Croy, "Religion, Personal," 929. Cf. differently 1 Sam 1:13.

1585. E.g., Kurz, "Models," 186–87; Johnson, *Acts*, 140. Pace Stanton, *Jesus of Nazareth*, 35, who regards the differences as "more striking than the agreements." The parallels appear only in Luke among the Gospels (as often noted, e.g., Munck, *Acts*, 68).

1586. With Strack and Billerbeck 2:269; Haenchen, *Acts*, 293; Conzelmann, *Acts*, 60; Stanton, *Jesus of Nazareth*, 37; Stauffer, *Jesus and Story*, 142; cf. Ps 31:5 (Marshall, "Acts," 572). Sometimes people coordinated their prayers with the times of offerings in the temple (Jdt 9:1).

1587. Conzelmann, *Acts*, 60, cites Sen. Y. *Herc. Ot.* 1703–4 (to the stars; cf. 1725–26); Lucian *Peregr.* 36 (to his parents). Magical language in PGM 13.377–78 offers a weak verbal parallel, but the sense is unrelated. Cf. committing (παράδιδωμι) oneself to the jurors at the end of a trial (Aeschines *Embassy* 184).

1588. The idea may also be implied in 1 Pet 4:19, which employs the same verb as in Luke 23:46.

1589. With Johnson, *Acts*, 140; Bock, *Acts*, 315.

1590. With Bruce, *Acts*¹, 180; Haenchen, *Acts*, 293; Marguerat, *Acts*, 277.

1591. Simon, *Stephen and Hellenists*, 66 (citing later Catholic prayers to angels and saints). Some later Diaspora Jews did pray to angels (e.g., *CIJ* 2.90–91, §§849–50; for angelic mediation of prayer, 1 *En.* 99:3; see further Cohen, *Maccabees*, 84), but first-century Judean orthodoxy, and presumably the Nazarenes, would not have approved (cf. Luke 4:8). Pagans could, of course, pray to heroes (increasingly popular by the third century C.E., e.g., Philost. *Hrk.* 56.4), but Luke-Acts has more than a hero Christology.

1592. Gustafsson argued for one Herodian ossuary inscription's prayer to Jesus for help, and another's for resurrection ("Graffiti," dating them to the early 40s; Bruce, *Documents*, 95; cf. Sukenik, "Records").

II. KNEELING (7:60)

Stephen's posture reinforces the image of his piety.¹⁵⁹³ Some scholars regard the idiom "placing his knees" as reflecting the influence of Latin (also Acts 9:40; 20:36; 21:5; Mark 15:19; Luke 22:41);¹⁵⁹⁴ it does not appear in the LXX. The posture, however, was common enough; kneeling was a common posture for submission (2 Kgs 1:13),¹⁵⁹⁵ including to a deity (1 Kgs 19:18; Isa 45:23), the most relevant form (for all instances in Acts) of which is prayer (1 Kgs 8:54; 2 Chr 6:13; Ezra 9:5; 1 Esd 8:73; Dan 6:10; Eph 3:14).¹⁵⁹⁶ Such kneeling may have sometimes been done with one's face touching the ground,¹⁵⁹⁷ although Stephen's crying out with a loud voice (expecting to be heard) probably militates against this understanding here.¹⁵⁹⁸

Although kneeling was unusual in Greek prayer,¹⁵⁹⁹ Greeks and Romans sometimes fell on their knees to pray to their gods (Val. Max. 2.4.5). Luke elsewhere mentions kneeling (except in Luke 5:8 always employing this same idiom, as in Mark 15:19) always in connection with prayer (Luke 22:41; Acts 9:40; 20:36; 21:5) or entreaty that would, from Luke's perspective, verge on prayer (Luke 5:8). The Venerable Bede noted that Stephen prayed for himself (Acts 7:59) before kneeling, but for his persecutors only after kneeling; their intense sin, he opined, required a greater gesture of supplication.¹⁶⁰⁰ The image of kneeling might seem incongruent if we think of his being thrown down, landing on his back, and then having stones hurled on his chest before kneeling, as in the Mishnah.¹⁶⁰¹ It is, however, the Mishnaic portrait that is artificial here: we do not know how far Stephen would have fallen, and both the angle of his landing and the locations where stones landed would be difficult to control with precision.

III. JESUS'S MODEL OF FORGIVENESS (7:60)

The climax of the scene of Stephen's martyrdom (before his death) is his prayer for his persecutors. That he "cried with a loud voice" for his persecutors' forgiveness draws attention to the contrast with his opponents, who had "cried with a loud voice" against him in 7:57. Jesus taught prayer for one's oppressors (Luke 6:28//Matt 5:44) but also modeled it in Luke's Gospel. Martyrs' prayers often were for vindication

Fishwick, "Ossuaries," compares them with magical papyri, but his sources are several centuries later than ossuary inscriptions (Yamauchi, *Stones*, 122).

1593. This posture may mean that he was not thrown from a cliff as the Mishnah demanded for normal stoning executions (cf. González, *Acts*, 99n89); certainly, most stonings in antiquity were conducted spontaneously by mobs (see comment on Acts 7:58), though this mob had at least rushed him out of the city, as was appropriate (Acts 7:58). It is also possible that Stephen survived the fall well enough to stand, then knelt when battered down by the stones or in order to pray (both circumstances explicit in the text).

1594. Barrett, *Acts*, 387 (citing Ovid *Fasti* 2.438); Fitzmyer, *Acts*, 394 (tentatively).

1595. E.g., *Ahiq.* 4.5; in Greek sources, see Hock, "Novel," 143. *1 Clem.* 57.1 speaks of "bending the knees" of one's "heart."

1596. For kneeling in prayer, see also *L.A.E.* 32:3; *Test. Jos.* 8:1; *Test. Mos.* 4:1; 11:17; Armenian *Ahiq.* 1.3; *b. Ber.* 34b; *Meg.* 22b; *Šebu.* 16b; *y. Ber.* 1:4; on kneeling for supplication, in antiquity, see further Shiell, *Reading Acts*, 158–60. Hermas often mentions kneeling for prayers of confession (*Herm.* 1.3; 5.2; 9.5), though the confession there is of his own sin, not others'.

1597. Robinson, *Ephesians*, 83, emphasizes this "Eastern prostration." But Greek has a clearer way to express prostration (cf. BDAG on the addition of *προσκυνέω*).

1598. One could also pray with eyes lifted toward heaven; e.g., 4Q213 1 I, 8; 4 Macc 6:6, 26; 4 Bar. 6:5; see further comment on Acts 7:55; or Keener, *John*, 1052.

1599. Burkert, *Religion*, 75. Barth, *Ephesians*, 1:372–79, suggests that kneeling is closer to Gentile than to Jewish practice, but Lincoln, *Ephesians*, 201–2, argues that it was attested more often in Judaism.

1600. Bede *Comm. Acts* 7.60 (L. Martin, 76; also Martin, *Acts*, 88, where n. 19 also compares Aug. *Serm.* 315.3.3; 319.4.4).

1601. Noted by Chance, *Acts*, 122.

or vengeance (2 Chr 24:22; Ps 79:10; Rev 6:10);¹⁶⁰² to pray for one's persecutors' forgiveness, by contrast, follows the model of Jesus in Luke 23:34.¹⁶⁰³ Although the wording differs,¹⁶⁰⁴ the dependence on the substance of Jesus's prayer there is clear.

The prayer in the Gospel is missing in several of the earliest manuscripts (notably \mathfrak{P}^{75} ; $\mathfrak{N}^{\text{a-vid}}$; and B; also in one stream of the Coptic tradition);¹⁶⁰⁵ it is present in some other early manuscripts ($\mathfrak{N}^{\text{*c}}$; A) and most church fathers and, in addition, has the widest geographic distribution. It seems most likely original; an early scribe seeking to create a parallel with Acts probably would not have the insight to place it specifically in Luke rather than in another Gospel.¹⁶⁰⁶ Given the anti-Jewish climate of second-century Egypt, after major pogroms had decimated the Jewish community there, it may have been excised by some Egyptian copyists. A prayer to "the Lord" could address God the Father (Acts 1:24) but, in view of 7:59, the prayer in 7:60 presumably addresses Jesus as divine or as, in some acceptable way, a divine surrogate.

Stephen's prayer for those opposing him may focus on the false witnesses hurling stones but could readily be understood to cover Saul as well (7:58). The reader may then approach Jesus's intervention to stop and convert this persecutor in 9:4 as a fruit, in part, of Stephen's prayer. In that encounter, Jesus accuses Saul of persecuting Jesus himself; the one who died testifying of the Son of Man (7:56) and followed his example (7:59–60) was sharing Jesus's death, bearing his cross (Luke 9:23; 14:27). By persecuting Stephen, Saul and his allies were persecuting Jesus (Acts 9:4). By converting Saul, Jesus was answering Stephen's prayer and hence furthering the fruit of Stephen's own ministry.¹⁶⁰⁷

IV. CONFESSING OTHERS' SINS (7:60)

Jewish people believed in confessing sins before God, sometimes corporately.¹⁶⁰⁸ Rabbis believed that various forms of atonement were necessary, depending on one's

1602. E.g., also *Vit. Aes.* 133, 142; *Iambl. V.P.* 32.222; cf. Ps 137:7–9; Jer 15:15; a wise counselor in *Jos. Ant.* 18.346; a dying warrior might curse his slayer (*Hom. Il.* 22.358–60). For prayers for eschatological justice in general, see Johnson, *Prayer*, 31–34. Kalimi, "Murders," compares Stephen, including his prayer, with 2 Chr 24:20–22. Different from here, a priest's prayer during a trial that deities hopefully not avenge him if he is convicted (*Quint. Decl.* 323.3) could actually function as a warning not to convict.

1603. Stanton, *Jesus of Nazareth*, 35, emphasizes the difference between this idea and the traditional Jewish prayer for vindication; Marshall, "Acts," 572, is more skeptical. Cassidy, *Society*, 36–38, argues that it fits the teaching of nonviolence in the Gospel. Peterson, *Acts*, 269, connects this with offers of forgiveness in Acts 2:38; 3:19; 10:43; 13:38. Matthews, "Clemency," contends that Luke uses forgiveness prayers in the service of his negative construction of Judaism; given examples above, however, would vengeance prayers not have served such a purpose better?

1604. Emphasized by Stanton, *Jesus of Nazareth*, 35 (in an argument for the historical likelihood of Luke 23:34).

1605. Metzger, *Textual Commentary*, 180, thinks that it was added to the Gospel at an early stage.

1606. Unless the scribe was early enough to read Luke-Acts together rather than Luke with the other Gospels, but we have little evidence for such a reading among the scribes, and a parallel fits the other parallels with Jesus's death in Luke in a very Lukan manner. Irenaeus attests that reading Luke with the other Gospels was established usage in a wide range of churches by his time, and early patristic use of the Gospels points in the same direction.

1607. One might perhaps compare something like conversions after Jesus's prayer in Luke 23:34, of a dying thief (23:40–43) and perhaps of one of Jesus's Gentile executioners (23:47). These parallels would not paint Saul's violent activity in a positive light: he was like a Jewish revolutionary or like an imperial oppressor of martyrs.

1608. E.g., 1QS I, 22–23; 4Q393 (see Falk, "4Q393"); 4Q504 1–2 VI, 5–6; *Pss. Sol.* 9:6; *Sipra Behuq.* pq. 8.269.2.1; *b. Sanh.* 43b; *Gen. Rab.* 97 (NV); 1 John 1:9; in the synagogue liturgy, see Oesterley, *Liturgy*, 76–79; for examples, e.g., *Test. Dan* 1:4; *Jos. Asen.* 11:18; 12:3/4; see further Davids, *James*, 195; especially Boda, Falk, and Werline, *Development*; idem, *Impact*. One should confess one's own sin, not that of one's ancestors (*Sipre Num.* 3.1.1). One would pray for forgiveness of "all my sins" on the eve of Yom Kippur (*Lev. Rab.* 3:3); they would be fully forgiven (*b. Yoma* 86b). Among Gentiles, see Horsley, *Documents*, 1:32–33, §7.

crime. Repentance was an important part of atonement.¹⁶⁰⁹ Normally death was considered sufficient suffering to atone for a Jewish person, if coupled with repentance.¹⁶¹⁰ Thus one in danger might pray for safety and add, as a precaution, “May my death atone for all my sins”¹⁶¹¹ (for that prayer’s application more specifically to executions, see below). Then again, some later sages claimed that Jewish martyrs killed by the pagan government would share the coming world even without confessing sins before death.¹⁶¹²

Some individuals, however, committed deeds requiring punishment by the community. Executions might be necessary to turn away God’s wrath from Israel (*Jub.* 41:26), and the executed person’s confession might invite God’s mercy for him at the resurrection (*L.A.B.* 25:7; 27:15).¹⁶¹³ According to later rabbis, in the case of major sins, such as profaning God’s name, denying circumcision, or twisting Torah, one must repent, have the Day of Atonement, *and* die to be forgiven (*b. Šebu.* 13a, bar.; *’Abot R. Nat.* 29 A). Those executed by order of the Sanhedrin were executed justly and hence must have a shameful burial to procure forgiveness (*b. Sanh.* 47b; see comment on Acts 8:2). Posthumous decomposition might be exacted even from a mostly righteous teacher (at least in a story meant to underline God’s justice); when a rabbi’s widow tried to remove a moth she found nibbling behind the ear of her husband’s corpse, a heavenly voice warned that God was still collecting the debt the rabbi owed (*Pesiq. Rab Kah.* 11:23).

Though a mob would hardly follow such careful procedure, later teachers insisted that the condemned be invited to make confession ten cubits from the site of execution so that he could share in the coming world (*m. Sanh.* 6:2). The basic confession that later rabbis insisted be repeated by the person being executed was, “May my death atone for all my sins” (6:3). Rabbi Judah (early third century) allowed that a person who knew that he had been convicted by false testimony should exclude the sin for which he was being executed, but the sages ruled that such an exception would motivate everyone to make this claim to clear their names (6:3). Later rabbis claimed that one man asked God to forgive his sins only if he was guilty of the crime and never to forgive the false witnesses who had him convicted.¹⁶¹⁴ We should not suppose that such later rabbinic scruples would have been followed by a lynch mob, but the expectation of confession may have been early enough to render the narrative’s irony intelligible to some more knowledgeable Jewish members of Luke’s audience.

It might thus be shocking to hearers in the story world that Stephen confesses not his own sins but those of his opponents. But as noted above, martyrs sometimes prayed for vindication, and so the greater shock would be that Stephen’s prayer was

1609. This confession accompanied sin offerings (*Lev* 16:21; confession was explicitly part of the atonement in *Sipra A.M. par.* 2.176.1.5–6).

1610. E.g., *m. Ed.* 5:6 (Neusner treats this passage form-critically in *Traditions*, 1:145); *Yoma* 8:8; *t. Kip.* 4:8–9; *’Abot R. Nat.* 39 A. Also *Num. Rab.* 8:5; cf. similarly *Pesiq. Rab Kah.* 25:3; *Tg. Ps.-J.* on *Lev* 16:30; see further Urbach, *Sages*, 1:431–33. Some counted death as analogous to repentance, effecting atonement (*y. Šebu.* 1:6, §5, R. Judah ha-Nasi), even without repentance (*b. Šebu.* 13a, bar.). For a request for humans’ forgiveness at death, cf. *ILS* 7479 (near Philippi).

1611. E.g., *t. Ber.* 6:17; *b. Ber.* 60a, bar.; *y. Ber.* 9:4, §2. The wicked confessing only on the day of judgment would do so too late to receive mercy (*1 En.* 63:1).

1612. So *b. Sanh.* 47b; *Ecl. Rab.* 4:1, §1.

1613. It is unclear whether *Jub.* 30:14–17 and 33:13 mean that the executed person cannot be atoned for or that his death might be the only atonement for him. Confession before execution followed the model of Achan (*Josh* 7:19–21; *m. Sanh.* 6:3). The Sibyl’s invitation to stone her for her sins so that she could live on is probably from a Christian portion of the document (*Sib. Or.* 7.161–62).

1614. *B. Sanh.* 44b, bar. The court apparently accepted the probability of his innocence at that point but refused to reverse a sentence already decreed. Stephen’s transfer of guilt to the witnesses would analogously exonerate him for Luke’s audience, but Stephen’s response differs from that of the executed man in this other story.

for mercy rather than justice. Such forgiveness was unusual and would be especially foreign to Greeks.¹⁶¹⁵ Unjust executions were thought to bring judgment on the land that executed them;¹⁶¹⁶ but many Jewish people in this period believed that the suffering of martyrs could atone for the sins of their own people (4 Macc 17:22).¹⁶¹⁷ One could also pray for others' forgiveness, especially when the sin committed was against oneself.¹⁶¹⁸ In one early account, a dying son even prays that his martyrdom will turn God's wrath from Israel (2 Macc 7:37–38);¹⁶¹⁹ another martyr, in a document probably circulating in the first century, also is said to have prayed for his death to atone for his people's sins (4 Macc 6:27–29). Why does Luke not portray Stephen's death as atoning for his people's sins? Probably because this role was filled exclusively and sufficiently by Jesus (Luke 22:19–20; Acts 20:28; cf. 8:32–33).

Luke views Jesus's death as culminating the sins that demand judgment on Jerusalem (Luke 11:49–51; 19:42–44; 21:6, 22; 23:29–31; Acts 7:52), but perhaps he sees such prayers as staying the judgment in that generation (Luke 23:34; Acts 7:60). Here, as in Acts 7:59, Stephen imitates Jesus's prayer to the Father but probably redirects his own prayer to Jesus himself.¹⁶²⁰ Although the Father remained the most frequent object of prayer in early Christianity (e.g., John 15:16; 16:23, 26; Rev 4:11), prayer was also addressed to Jesus (John 14:13–14; 2 Cor 12:8–9; Rev 5:9–13).¹⁶²¹

In the context of Stephen's sermon, his closing words also drive home another point. His hearers' ancestors had killed the prophets, his hearers themselves had killed the righteous one (7:52), and now they were going to kill Stephen. For each of these acts, judgment against them was stored up; this generation had climaxed the acts by killing the Messiah, and so the judgments stored up for generations would fall on them (Luke 11:50–51). From Luke's perspective, this threat would be fulfilled at the devastation of Jerusalem, in the "days of vengeance" (Luke 21:22). Stephen is praying that judgment for his death not be added to the overflowing cup against his people.

V. FALLING ASLEEP, SAUL'S APPROVAL (7:60–8:1A)

In describing Stephen's death as "falling asleep" (also in Acts 13:36), Luke uses a common idiom for death (cf. John 11:11–12;¹⁶²² 1 Cor 11:30; 15:6, 18, 20, 51; 1 Thess 4:13–15; 2 Pet 3:4).¹⁶²³ Many ancients compared sleep to death because of the similar

1615. Cf. Leigh, "Forgiveness."

1616. 2 Kgs 21:16; Max. Tyre 3.8; Jos. Ant. 20.166.

1617. See further, e.g., 2 Macc 7:37–38 (on which see Schenker, "Martyrium"); 4 Macc 17:21–22 (on which cf. Grappe, "Intérêt"); y. Sanh. 11:5, §4; on martyrdom as a sacrifice, note also Thoma, "Frühjüdische Martyrer"; Haacker, *Theology*, 133–34; Baslez, "Martyrs." This became part of the larger concept of suffering helping to atone for sins (*Mek. Bah.* 6.142–43 [Lauterbach, 2:247]; *Sipre Deut.* 32.5.2, 5; 310.4.1; 311.1.1; *'Abot R. Nat.* 29 A; *Pesiq. Rab Kah.* 24:9; 26:11; b. *Ta'an.* 8a; *Gen. Rab.* 62:2; 96:5; b. *Qidd.* 40b; cf. Isa 40:2; 1QS VIII, 4; Laytner, "Suffering"). On meritorious suffering, see excursus at Acts 9:16.

1618. E.g., Job 42:8–9; *Test. Job* 42:8; 43:15–17/12–13; cf. 1 John 5:16; *Sent. Sext.* 373–75.

1619. Schenker, "Martyrium," even compares this prayer to Jesus's words over the cup (Mark 14:24).

1620. With Bruce, *Acts*¹, 180. "Lord" does not always bear this sense even in prayers in Acts (Acts 4:24, 29), but this reading best suits the immediate context of 7:59 (cf. also 9:5, 10, 13, 17). This observation suggests significant christological implications (cf. comment on Acts 2:21, 38); by comparison, Jewish people prayed to Abraham's God, not to Abraham (Urbach, *Sages*, 1:117).

1621. Cf. also wish-prayers, or blessings, from both the Father and the Son (Rom 1:7; 1 Cor 1:4; 2 Cor 1:2; Gal 1:3; Eph 1:2; Phil 1:2; 2 Thess 1:2; 1 Tim 1:2; 2 Tim 1:2; Titus 1:4; Phlm 3; 2 John 3; Rev 1:4–5). The same form is used without the binitarian address in Col 1:2; 1 Thess 1:1; 1 Pet 1:2; 2 Pet 1:2; 1 *Clem.* preface; Ign. *Smyrn.* 12.2.

1622. See fuller discussion in Keener, *John*, 840–41.

1623. See, e.g., Soph. *Oed. Col.* 1578; Callim. *Epig.* 11, 18; Plut. *Apoll.* 12, *Mor.* 107D; Prop. *Eleg.* 2.28.25; Diog. Laert. 1.86; Ps.-Callisth. *Alex.* 3.6. See also in unrelated societies (Mbiti, *Religions*, 204–5). Speakers employed circumlocution for various reasons (Hermog. *Method* 8.421–23), but this one was obviously traditional.

appearance of nonactivity;¹⁶²⁴ “Sleep” was Death’s twin,¹⁶²⁵ or sleep was mingled by the gods with death to appear like it.¹⁶²⁶ Thus Callimachus opines that good people “sleep” rather than “die” (*Epig.* 11, including ἱερὸν ὕπνον, holy sleep; cf. 18).

The sleep of death was a common image in the LXX,¹⁶²⁷ Jewish tomb inscriptions in Greek¹⁶²⁸ and Latin,¹⁶²⁹ and Jewish literature.¹⁶³⁰ Jewish people also called death “eternal sleep” (probably 4Q549 2 2). Jewish funerary inscriptions often include “peace,” often in Hebrew (שלום),¹⁶³¹ even when the surrounding inscription is in Latin¹⁶³² or Greek.¹⁶³³ The phrase “in peace” (often “here lies in peace”) is pervasive in Roman sepulchral inscriptions.¹⁶³⁴

Luke closes the martyrdom scene proper with the same character with whom he opened: Saul stood by the clothes of the false witnesses killing Stephen (Acts 7:58) and now is said to approve of (συνευδοκῶν) his killing (8:1a; reiterated in 22:20). To “approve of” (συνευδοκέω) murdering God’s prophets is to share the responsibility (Luke 11:48; in Paul’s own usage, see Rom 1:32).

1624. E.g., Hom. *Il.* 16.419–683; Philost. *Hrk.* 39.4.

1625. Hom. *Il.* 16.672; cf. Statius *Theb.* 5.197–99; Ambühl, “Thanatos,” 365.

1626. Fronto *Fer. als.* 3.9.

1627. E.g., Dan 12:2; 2 Macc 12:45; most often in the phrase “slept with one’s ancestors,” e.g., 1 Kgs 1:21; 2:10; 11:21, 43; 1 Chr 17:11; 2 Chr 9:31; 16:13; 21:1; 26:2, 23; 27:9; 28:27; 32:33; 33:20; 36:8.

1628. Where it is one of the most frequent expressions: *CIJ* 1:8, §3; 1:12, §17; 1:17–19, §§16–20; 1:21, §24; 1:26, §35; 1:28, §37; 1:31, §44; 1:34, §50; 1:37, §55; 1:39, §§62–63; 1:41, §69; 1:56, §81; 1:59, §85; 1:60, §86; 1:62, §88; 1:63, §90; 1:65, §92; 1:66, §93; 1:67, §95; 1:70, §99; 1:71, §100; 1:72, §102; 1:73, §103; 1:74, §105; 1:75, §106; 1:76, §109; 1:78, §111; 1:81, §117; 1:84, §121; 1:90, §129; 1:92, §§131–32; 1:95, §136; 1:96, §137; 1:97, §138; 1:102, §144; 1:103, §145; 1:104, §146; 1:105, §147; 1:107, §149; 1:109, §151; 1:110, §152; 1:111, §154; 1:113, §§156–57; 1:114, §159; 1:118–19, §167; 1:121–22, §169; 1:121, §171; 1:124, §172; 1:130, §180; 1:131, §§184–85; 1:135, §192; 1:195, §277; 1:202, §286.

1629. *CIJ* 1:144–45, §206; 1:149, §210; 1:150, §212; 1:160, §224; 1:162, §228; 1:187–88, §265; 1:338, §458; 1:473, §658; 1:473, §659 (with Hebrew also); 1:473, §660. But some Latin inscriptions have this stereotypical phrase in Greek (1:163, §229; 1:166, §222; 1:338, §459; 1:342–43, §464; 1:384, §523).

1630. 1 Thess 4:13; Acts 7:60; Rev 14:13; Sir 30:17; *Jub.* 23:1; 36:18; 1 *En.* 89:38; *Pss. Sol.* 2:31; *L.A.B.* 3:10; 4 *Ezra* 7:31–32; 2 *Bar.* 11:4; 21:25; 36:11; *Test. Mos.* 10:14; *L.A.E.* 48:2; *Test. Dan* 7:1; *Test. Iss.* 7:9; *Test. Zeb.* 10:6; *Gen. Rab.* 62:2.

1631. E.g., *CIJ* 1:230, §292; 1:422f, §570; 1:423, §§572–73; 1:427, §584; 1:432, §595; 1:433, §§596–97; 2:132, §920; 2:133, §922; 2:138, §§933–34; 2:139, §937; 2:142, §943; 2:144, §948; 2:145, §951; 2:147, §956; 2:148, §959; 2:149, §961; 2:156, §970; 2:159, §973; 2:197, §§1078–80; 2:198, §1086; 2:199, §1090; 2:232, §1195; 2:236, §1200; 2:364, §1437; 2:364f, §1438. Many are mostly Hebrew: 1:446, §626; 1:449, §630; 1:461, §644; 1:474, §661; in Palestinian Aramaic inscriptions, 2:120, §892; 2:121, §893; 2:122, §897. In a nonfunerary inscription, 2:9, §739.

1632. E.g., *CIJ* 1:364, §499; 1:412, §558; 1:436, §§606–7; 1:437, §609; 1:438, §611; 1:440, §613; 1:466, §650; 1:473, §659; 1:483, §671.

1633. *CIJ* 1:198–99, §283; 1:233, §296; 1:250f, §319; 1:362, §497 (with שלום four times); 1:464, §649; 1:499, §688 (Hebrew and Greek); 1:597, §732; 2:108, §874 (an Asian inscription); 2:129, §914 (from Jaffa).

1634. Leon, *Jews of Rome*, 123, counts 167 instances of “in peace” (in Greek) out of 328 usable inscriptions (hence just more than half).

PHILIP REACHES BEYOND JUDEANS (8:1B–40)

The Diaspora Jewish followers of Jesus in Acts 6:5 provided the bridge for the church's mission to the Diaspora. Geographically universal theology like that presented in Stephen's speech (7:2–53) laid the groundwork for the church's mission, but it was the freshly scattered Diaspora Jewish Christians who began to carry it out (8:4).

Thus, having focused on Stephen in 6:8–7:60, Luke now turns to the second of the seven ministers he listed in 6:5, showing how Philip took the gospel across cultural and ethnic boundaries. If Stephen taught that God was not bound to the sacred land or the temple, Philip now implements the vision by evangelizing Samaritans and the first fully Gentile convert, an African official. Samaritans rejected the Jerusalem temple, and the eunuch was unable to become a proselyte or pass the Court of the Gentiles there; as Stephen had preached, God refused to be bound by the temple's barriers (cf. 21:28).¹

The transition about Saul's persecution (8:1b–4) begins in the account of Stephen's martyrdom (7:58–8:1a) yet provides the direct cause (on account of the dispersion of persecuted believers) of Philip's mission. Philip, in fact, is merely the most prominent (or personally accessible to Luke) example of those who were scattered (8:3–4). Although this paragraph forms a transition relevant to both sections, this discussion includes it with Philip for the convenience of users of this commentary in retaining most of the current chapter together.

1. Introduction to Philip's Ministry

If Philip reached both Samaritans and a representative from the "ends of the earth" (see comment on Acts 8:27), his ministry in Acts 8 proleptically fulfills two of the three points of mission in 1:8: Samaria and the ends of the earth. Geographically, Philip advances the gospel north (to Samaria) and south (to Africans).² It is no wonder that Luke awards him the title "the evangelist" (21:8), the one who brought the "good news" to so many people in Acts 8 (8:12, 24, 35, 40; cf. 8:4; earlier in Acts, only at 5:42). Philip's ministry is strategic in the expansion of the gospel across boundaries, following the pattern laid out by Jesus in his table fellowship with "sinners" in the Gospel.

What is the historical likelihood of the material contained in Acts 8? Dunn again provides useful suggestions:³

1. See here also Dunn, *Acts*, 102. Goulder, *Type and History*, 59, stresses the failure of Israel in Acts 8–13, but he bases this too heavily on his parallel with Luke 10–13; this theme is no more prominent here than before or after.

2. For north and south, see e.g., Schille, *Apostelgeschichte*, 194.

3. Dunn, *Acts*, 103. For the view of some historical tradition here, reshaped by Luke, see Spencer, "Waiter." Haya-Prats, *Believers*, 16, finds grammatical signs of a pre-Lukan source for 8:14–25.

1. The persecution of 8:1–3 was historical (e.g., Gal 1:13, 23).
2. Luke possibly knew Philip (Acts 21:8).
3. An early Christian success in Samaria may be implicit in John 4:39–42; Matt 10:5.⁴
4. The gap between baptism and receiving the Spirit is not part of Luke’s theological agenda (Acts 2:38) and hence stems from his source.
5. Simon is known independently as founder of a gnostic sect.
6. Because Luke focuses on Peter’s ministry to the Gentiles in Acts 10, the Ethiopian official appears here because of Philip’s material.

One may question whether patristic references to Simon are genuinely independent of Acts (though at least the tradition in Justin Martyr, which is not specifically gnostic, likely has some historical foundation; see comment on Acts 8:9), but the other arguments mostly appear logically sound. The persecution is commented on more fully under Acts 8:1–4.

Some scholars even think that Luke mentions Philip in 21:8 specifically to indicate one of his sources;⁵ certainly, Luke makes clear there that he met the person whose story he describes earlier. Luke (or on other views, his “we” author) stayed with Philip for several days (21:8–10), and in view of common expectations for hospitality in that culture, it is highly unlikely that Philip and his guests would not have spent time talking, including about the early period in which Paul and Philip, from very different vantage points, had been active. Moreover, the “we” of the narrative apparently remains in Judea for up to two years while Paul is in detention in Caesarea (27:1–2); whoever may have been the “we’s” official hosts during that time, we can be relatively certain that Luke had continued access to Philip.

A successful Samaritan mission likely occurred at some point;⁶ otherwise references to the Samaritans in Diaspora Christian texts (such as Luke-Acts and John) make less sense. Luke knows the “official” public version of the Jerusalem church’s accepting Gentiles in Acts 10–11, a precedent useful for the expanding Gentile mission (15:7–9); his inclusion of a different example of the “ends of the earth” before the Cornelius story likely suggests Philip, the lone witness, whom the “we” author met, as his source. In view of the fact that the precedent was apparently unknown to the Jerusalem church in its deliberations in Acts 11 and 15 (if we may argue that this is an otherwise unlikely silence), it is possible that Paul himself did not know the story until the visit with Philip in 21:8, 10.

2. Persecution Disperses the Jerusalem Church (8:1b–4)

This paragraph about Saul’s persecution (8:1b–4) is a transition from the Stephen narrative to the narratives about Philip, continuing the figure of Saul mentioned in 7:58.⁷ The focus here is persecution, particularly harsh from Saul (who contrasts with the devout

4. Matthew employs the saying in Matt 10:5 in contrast to the disciples’ later mission (28:19), but some suggest that in its pre-Matthean form it may have invited Luke’s response in Acts (e.g., Spencer, *Philip*, 86; Samkuty, *Samaritan Mission*, 190). Pilch, “Samaritans,” briefly explores the differing portraits of Samaritans in Matthew, John, and Luke-Acts.

5. E.g., Ramsay, *Pictures*, 66; Barrett, *Acts*, 51; Witherington, *Acts*, 169, 280; cf. Blaklock, *Acts*, 80–81.

6. See discussion in Keener, *John*, 587–88. Cf. Dion and Pummer, “Synagogue,” for a possible (though disputed) Samaritan-Christian synagogue.

7. Longenecker, “Aversion,” notes the use of rhetorical “chain-link interlock,” a transition device, in Acts 8:1b–2.

men who buried Stephen). The effect of the persecution, however, is the dispersing of the church (fulfilling 1:8 more fully but in a manner undoubtedly not expected by the apostles). This outcome testifies to God's sovereign activity even through opposition,⁸ activity using Paul as a vessel even when he was "kicking against the goads" (26:14). This dispersal includes Philip and hence paves the way for discussing his mission in 8:5–40.

a. Introduction

Although the scattering evidently extended ultimately to Damascus (9:1–2) and beyond (11:19–20), the mention of Judea and Samaria in 8:1 paves the way for the Samaritan mission of 8:5–25 (as well as Peter's Judean mission in 9:32–42).

Luke portrays Stephen's martyrdom as achieving several beneficial effects for the kingdom, though these were not specifically foreseen by Stephen:

1. Stephen's basic message outlines a theology that could function in the Diaspora.
2. Stephen's message provokes persecution, which scatters and spreads the church (8:4).
