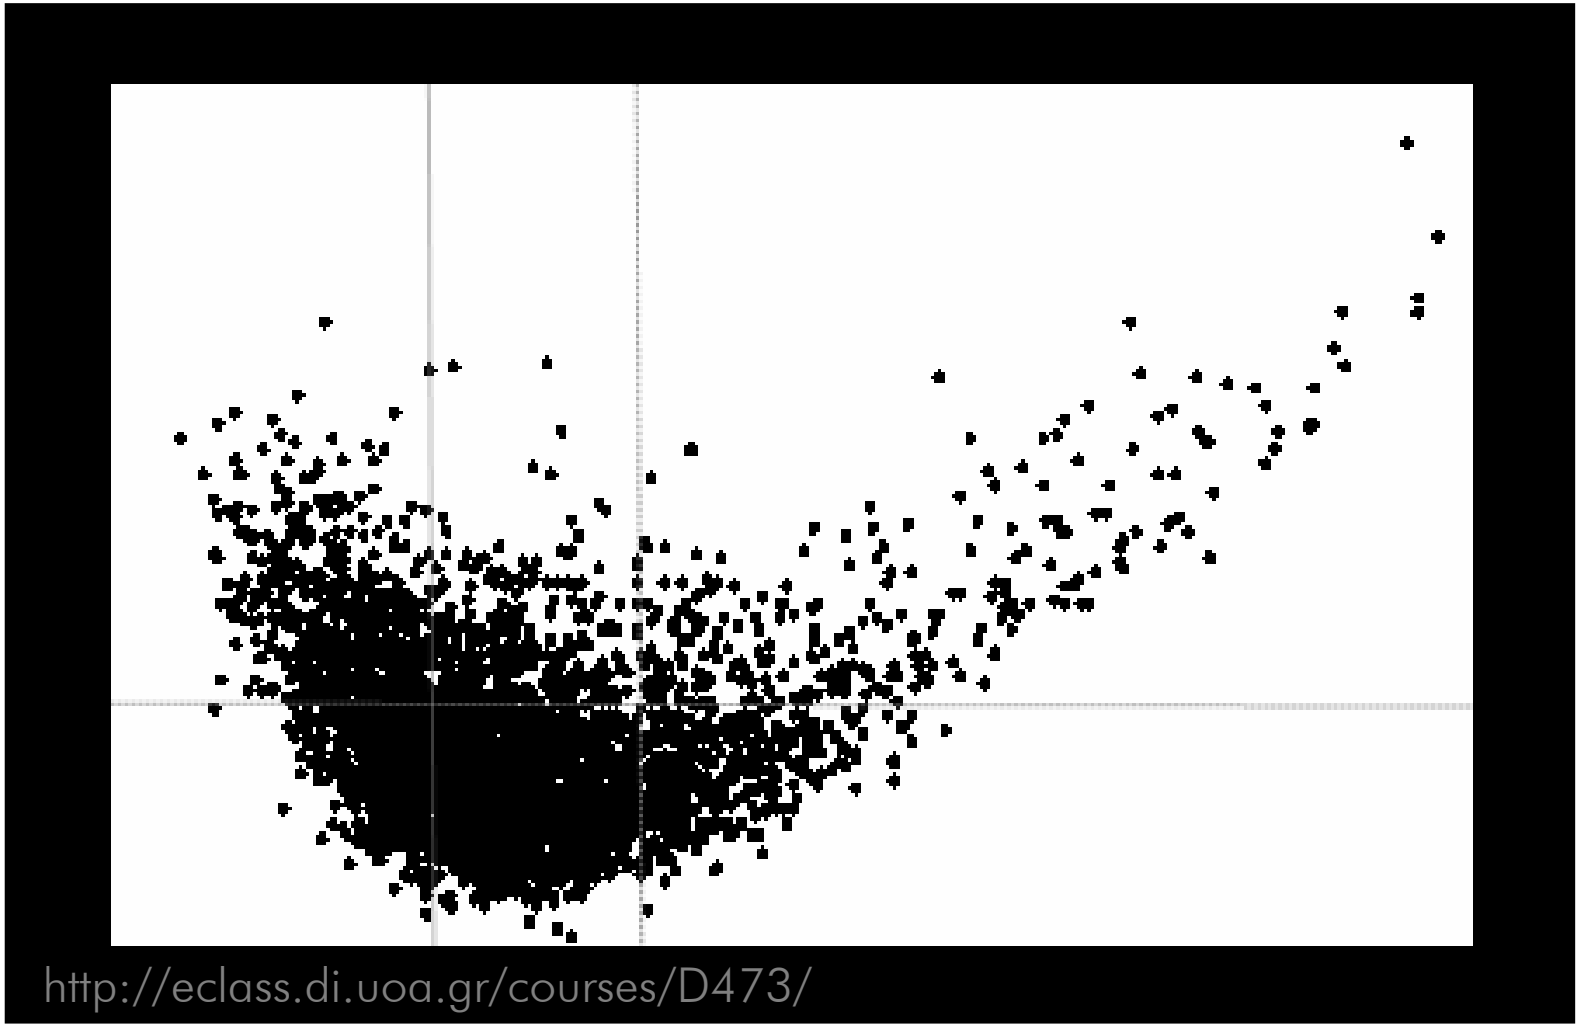
Ειδικά Κεφάλαια Βιοπληροφορικής



http://eclass.di.uoa.gr/courses/D473/

George Vernikos – gvernikos@gmail.com

Course Overview

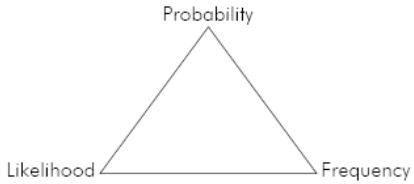
Algorithms in Molecular Biology

1. Probabilities
2. Pairwise Alignment
3. Hidden Markov Models
4. Profile Hidden Markov Models
5. HGT over Time
6. Super Trees
7. RVM Introduction

Course Overview

Algorithms in Molecular Biology

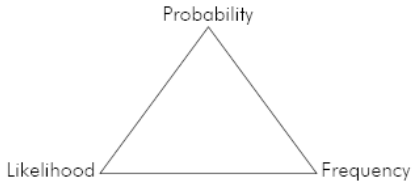
1. Probabilities
2. Pairwise Alignment
3. Hidden Markov Models
4. Profile Hidden Markov Models
5. HGT over Time
6. Super Trees
7. RVM Introduction

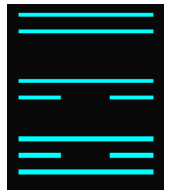


Course Overview

Algorithms in Molecular Biology

1. Probabilities
2. Pairwise Alignment
3. Hidden Markov Models
4. Profile Hidden Markov Models
5. HGT over Time
6. Super Trees
7. RVM Introduction

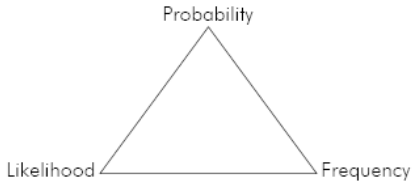


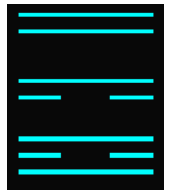


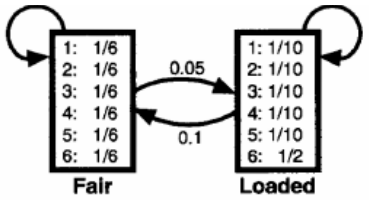
Course Overview

Algorithms in Molecular Biology

1. Probabilities
2. Pairwise Alignment
3. Hidden Markov Models
4. Profile Hidden Markov Models
5. HGT over Time
6. Super Trees
7. RVM Introduction



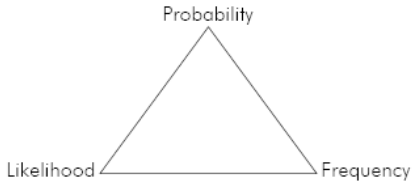


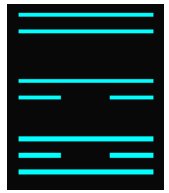


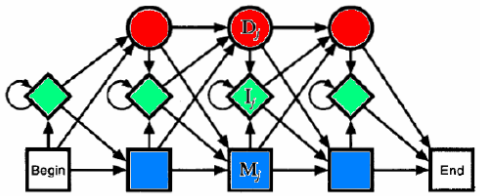
Course Overview

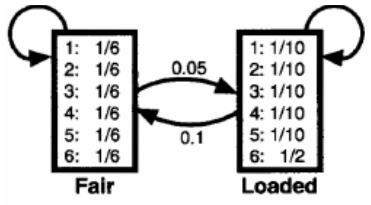
Algorithms in Molecular Biology

1. Probabilities
2. Pairwise Alignment
3. Hidden Markov Models
4. Profile Hidden Markov Models
5. HGT over Time
6. Super Trees
7. RVM Introduction





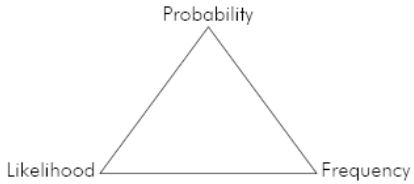


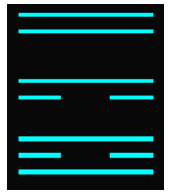


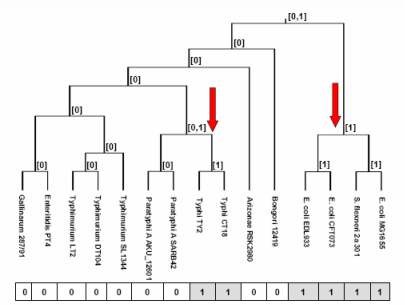
Course Overview

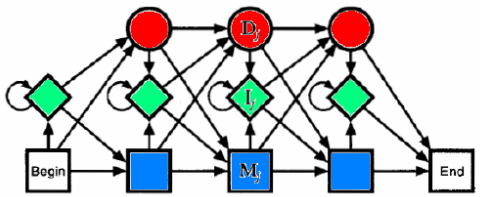
Algorithms in Molecular Biology

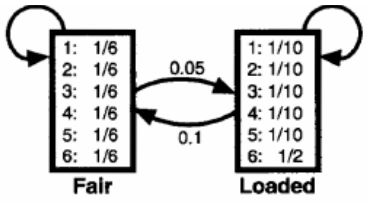
1. Probabilities
2. Pairwise Alignment
3. Hidden Markov Models
4. Profile Hidden Markov Models
5. HGT over Time
6. Super Trees
7. RVM Introduction







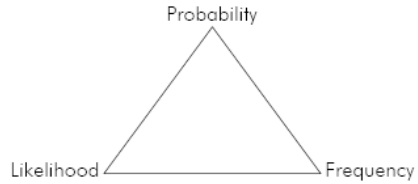


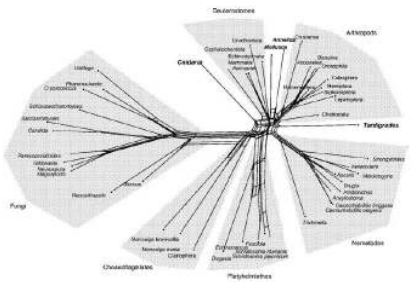


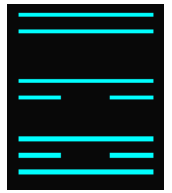
Course Overview

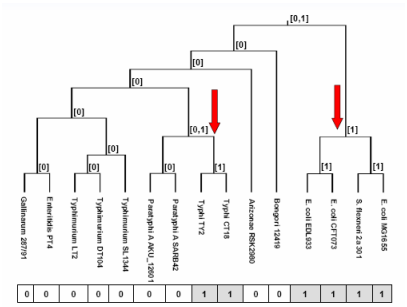
Algorithms in Molecular Biology

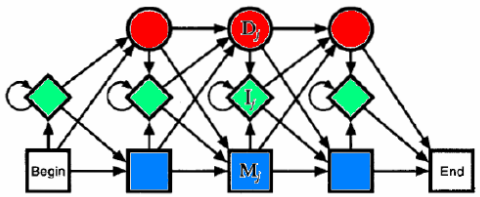
1. Probabilities
2. Pairwise Alignment
3. Hidden Markov Models
4. Profile Hidden Markov Models
5. HGT over Time
6. Super Trees
7. RVM Introduction

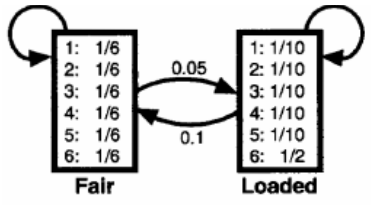




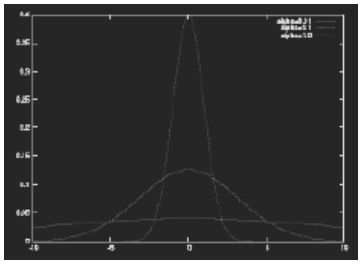






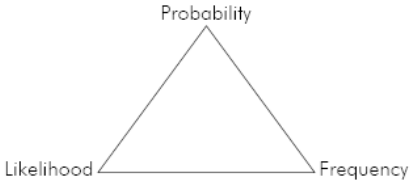


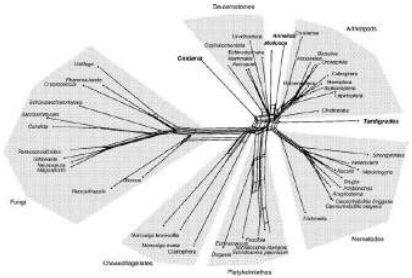
Course Overview

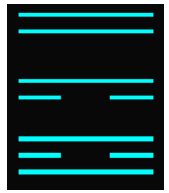


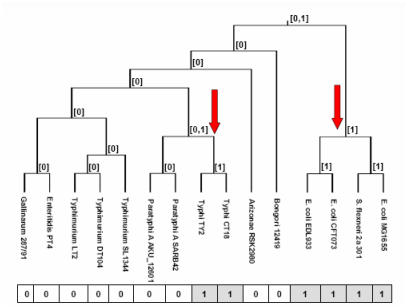
Algorithms in Molecular Biology

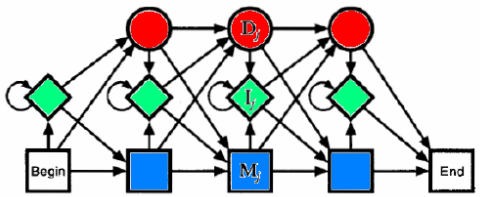
1. Probabilities
2. Pairwise Alignment
3. Hidden Markov Models
4. Profile Hidden Markov Models
5. HGT over Time
6. Super Trees
7. RVM Introduction

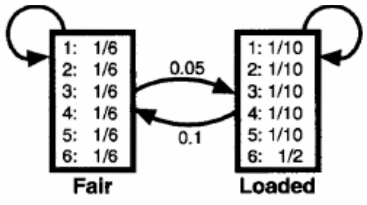












Course Overview

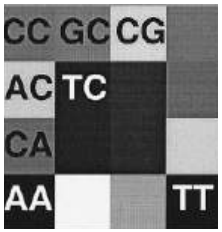
Algorithms in Molecular Biology

1. Probabilities
2. Pa
3. Hi
4. Pr
5. HC
6. Su
7. RV

Special Chapters in Bioinformatics

1. DNA Composition
2. Amelioration
3. Experimental Validation
4. Pan Genome
5. Neisseria Repeats
6. Phylogeny in Depth

Course Overview



Algorithms in Molecular Biology

1. Probabilities
2. Pa
3. Hi
4. Pr
5. HC
6. Su
7. RV

Special Chapters in Bioinformatics

1. DNA Composition
2. Amelioration
3. Experimental Validation
4. Pan Genome
5. Neisseria Repeats
6. Phylogeny in Depth

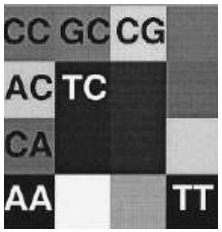
Course Overview

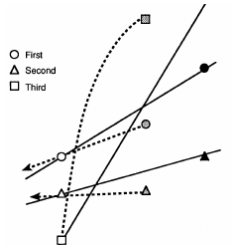
Algorithms in Molecular Biology

1. Probabilities
2. Pa
3. Hi
4. Pr
5. HC
6. Su
7. RV

Special Chapters in Bioinformatics

1. DNA Composition
2. Amelioration
3. Experimental Validation
4. Pan Genome
5. Neisseria Repeats
6. Phylogeny in Depth





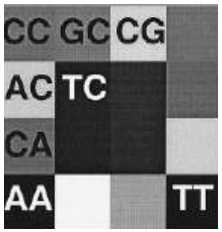
Course Overview

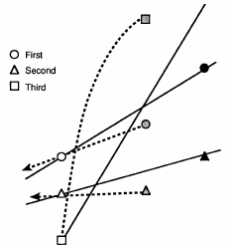
Algorithms in Molecular Biology

1. Probabilities
2. Pa
3. Hi
4. Pr
5. HC
6. Su
7. RV

Special Chapters in Bioinformatics

1. DNA Composition
2. Amelioration
3. Experimental Validation
4. Pan Genome
5. Neisseria Repeats
6. Phylogeny in Depth





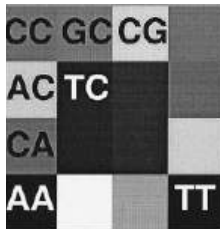
Course Overview

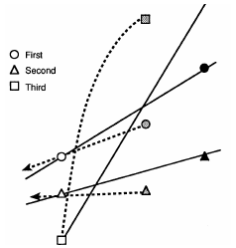
Algorithms in Molecular Biology

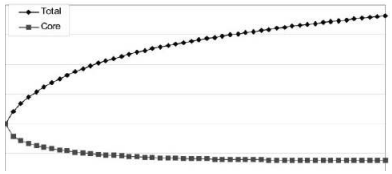
1. Probabilities
2. Pa
3. Hi
4. Pr
5. HC
6. Su
7. RV

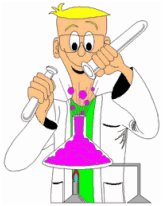
Special Chapters in Bioinformatics

1. DNA Composition
2. Amelioration
3. Experimental Validation
4. Pan Genome
5. Neisseria Repeats
6. Phylogeny in Depth









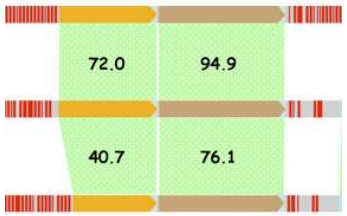
Course Overview

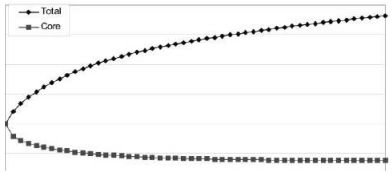
Algorithms in Molecular Biology

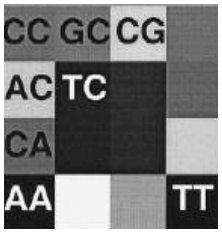
1. Probabilities
2. Pa
3. Hi
4. Pr
5. HC
6. Su
7. RV

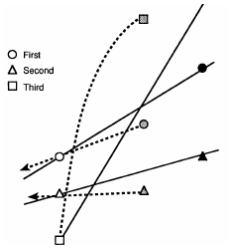
Special Chapters in Bioinformatics

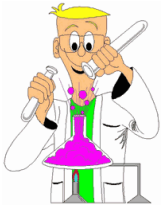
1. DNA Composition
2. Amelioration
3. Experimental Validation
4. Pan Genome
5. Neisseria Repeats
6. Phylogeny in Depth



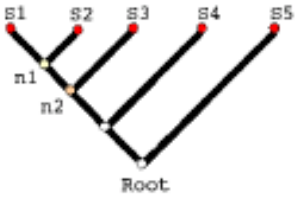


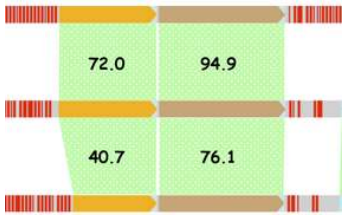


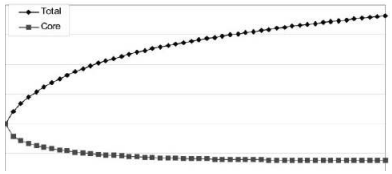




Course Overview







Algorithms in Molecular Biology

1. Probabilities
2. Pa
3. Hi
4. Pr
5. HC
6. Su
7. RV

Special Chapters in Bioinformatics

1. DNA Composition
2. Amelioration
3. Experimental Validation
4. Pan Genome
5. Neisseria Repeats
6. Phylogeny in Depth
